HB 722

HB 757

HB 806

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
April 1, 1982
1:11 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Randolph

Members Absent: Rep. Gardiner

COMMITTEE CALENDAR

HB 722 — An Act relating to landlord remedies.

HB 757 — An Act relating to unemployment insurance; and providing for an effective date.

HB 806 — An Act relating to hazardous or toxic substances.

WITNESS REGISTER

Representative Metcalfe
prime sponsor of HB 722
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-4947
Position Statement: Supported passage of CSHB 722; reviewed intent of bill.

Judy Knight
Department of Labor
Box 1149
Juneau, Alaska 99811
465-2700
Position Statement: Concurred with draft committee substitute for HB 806, and presented Department's position regarding HB 757.

Glenn Akins, Deputy Commissioner
Department of Environmental Conservation
Pouch O
Juneau, Alaska 99811
465-2600
Position Statement: Department fully endorsed CSHB 806 (L&C).

Art Zillig
Department of Labor
Box 3-7000

Juneau, Alaska 99811
465-2712
Position Statement: Assisted in presenting testimony and answering questions about HB 757.

Garth Patterson
Department of Health & Social Services
423 Third Street
Juneau, Alaska 99811
465-3360
Position Statement: Requested changes to HB 757.

Gary Jenkins
National Federation of Independent Business
Box 194
Auke Bay, Alaska
586-4100
Position Statement: Felt HB 757 would add to costs of small businessmen.

PREVIOUS ACTION

HB 722

See minutes of 3/1/82.

Statutory Reference: AS 34.03

Action Taken: Committee substitute adopted. Bill reported out of committee.

HB 757

See minutes of 3/16/82 and 3/24/82.

Statutory Reference: AS 23.20

Action Taken: Bill was amended and committee substitute adopted. Rep. Rogers requested that bill come back before committee, with amendments, before reporting out of committee.

HB 806

See minutes of 3/17/82.

Statutory Reference: AS 18.60

Action Taken: Bill was amended; committee substitute was adopted; bill was reported out of committee.

ACTION NARRATIVE

Tape #51
Recording
Number 000

The meeting was called to order by Chairman

Martin at 1:11 p.m. Members present were: Representatives Bylsma, Martin, Randolph, and Rogers. Rep. Gardiner was absent. The first bill considered by the committee was HB 722.

Number 005

Rep. Metcalfe, prime sponsor of HB 722, reviewed the Labor & Commerce committee substitute. He said it was an excellent job of redrafting, and that the bill was watered down sufficiently to get past the House. As explanation of the intent of the bill, he said that if a tenant becomes rowdy or noisy or begins vandalizing property, or creates other circumstances which place an unreasonable burden on a landlord, under current law this can continue for an unreasonable amount of time. He illustrated a situation and explained how it could affect a landlord. Rep. Metcalfe said the bill solves this problem, and does not infringe on the landlord/tenant act. He said it applies only to an unreasonable tenant. He said the tenant has the ability to seek remedy, but the bill changes the burden of who is required to go to court to seek remedy.

Number 051

Rep. Rogers asked what the existing law is for a tenant who refuses to pay rent. Rep. Metcalfe says a landlord can give ten-day notice; then can go to small claims court; and can then seek eviction of the tenant. He said the total process takes upward of a month.

Number 068

Rep. Rogers described the process for resolving a willful damages dispute. He wondered how damages are ascertained. There was discussion of the process.

Number 095

Rep. Bylsma moved to adopt CSHB 722 (L&C). There being no objection, the motion passed.

Number 098

Rep. Bylsma moved to report CSHB 722 (L&C) out of committee. Rep. Rogers objected. On the question: for--Martin, Bylsma. Opposed--Rogers. Motion passed.

Number 106

HB 806 was brought before the committee. Jeff Barry, committee aide, presented an overview of HB 806 and the proposed committee substitute. He said that, in the previous hearing, valid points were raised

by industry, the Department of Labor, and the Department of Health & Social Services. He said the committee substitute addresses those concerns. Barry went over each change to the original bill.

Number 195 — Rep. Rogers moved two amendments to the bill, the first to section 1, exempting certain products; the second making the effective date 1/1/83, to give the department time to prepare for implementation, and to reduce the fiscal note. The first amendment passed without objection. Rep. Rogers moved the second amendment, which also passed without objection.

Number 235 — Judy Knight, Department of Labor, said she reviewed the draft committee substitute, and concurred with the changes. She said the fiscal note would need to be revised to reflect the changes. She said the amendments should cut the cost in half. Knight said it puts the burden on the department to identify substances and stay current. She felt the delayed effective date was good, as the department would need to recruit an industrial hygienist.

Number 266 — Rep. Rogers commented on the fiscal note. He said that the Municipality of Anchorage Health Commission had endorsed the bill.

Number 275 — Glenn Akins, Deputy Commissioner of the Department of Environmental Conservation, said that Commissioner Mueller had reservations about the interpretation of toxic and hazardous substances, but the the committee substitute addressed this concern. He said the Department fully endorses the bill.

Number 286 — Rep. Rogers moved to report CSHB 806 (L&C) out of committee, as amended. There being no objection, the motion passed.

Number 293 — The committee then took up HB 757.

Number 310 — Judy Knight and Art Zillig, from the Department of Labor, came before the committee to testify. Knight said they had drafted language to address their concerns. She said it would be significantly more expensive than anticipated. She said that

if the recommendation was implemented, she would recommend that Section 353 on the last page of the draft be incorporated into the bill, and then another bill should be drafted making an appropriation. She said approximately 1,047 claimants would be affected by the bill. She passed out a sheet showing characteristics of claimants: percentage and location by area, sex, age, and industry breakdown (1981).

Number 359

Rep. Rogers asked the additional cost to the state of raising the top end of the schedule on pages 5-7 from $150 to $156. Zillig said it would cost about $3.4-million (trust funds). Rep. Rogers pointed out that the percentages are higher in the bush than in the cities. He said a large percent of claimants are low income. By adding $3.4-million at the high end of the scale, and saving $1.1-million by cutting off people at the low end, he said we are wiping out the low income bush worker for the benefit of the high income worker, and large percentage of whom are from out of state. He asked the department to find a cutoff figure on the top end which would enable the low end to stay in place without affecting general fund money. ..

Number 415

Zillig said they follow the principle that it is an insurance program based on length of time worked and earnings. He said deviating from this becomes a welfare program, not insurance. He said the question is what direction does the legislature want to go--insurance or social welfare. Rep. Rogers said social welfare has nothing to do with this. He said the federal law has nothing to do with actuarial or social effects of the program. He was concerned with the status quo. He said if the federal government had not made changes, then the federal government and the state government would each pick up half the cost of extended benefits. He said that, as the federal government will no longer do this, these people are cut out. He said the state determines the high end of the scale. Rep. Rogers said it is his opinion that adoption of supplemental state benefits would allow the bush low income people collecting $34-60 a week to remain whole. He felt, so as not to impact the general fund, that the top end

should be lowered.

Number 491

Knight said they could pay half the cost of benefits from the trust fund. She said the section eliminating those funds is a conformity issue, and that the state could not pay from the trust fund and stay in conformity with federal law. She was concerned that the federal government would declare the state out of conformity, which would penalize employees.

Number 525

Rep. Rogers asked which was more likely to cause problems with the federal government: the bill dying, or the bill passing with the new section. Zillig said he asked the federal government's opinion on trust funds. He said there was a possibility, if these are identified as supplemental benefits, that they could be paid out of trust funds. He said if the bill is not passed, they will be out of conformity. Rep. Martin asked when the bill is needed. Zillig said by September 26. Rep. Rogers pointed out that the bill needs to be in Rules Committee by Monday to pass this year. There was discussion of how to change the bill.

Number 682

Garth Patterson, Department of Health & Social Services, said, regarding Section 1, paragraphs (f) and (g), that the Department is facing a $1.2-million sanction due to the high error rate for a six month period. He said further sanctions could be avoided with the U.S. Department of Agriculture plan. He said two-thirds of the errors are due to clients' failure to report or to report correctly. He said clients have been signing a release of information since April of 1980 to food stamps and the Child Support Enforcement Agency. He requested changes to the bill. Rep. Rogers asked the outcome if this were not passed. Rep. Martin had questions. There was discussion.

Side B, Number 015

Gary Jenkins, National Federation of Independent Business, said the changes in the bill will be borne by the employers. He said a Department of Labor analysis anticipates a 4-5% increase to the employers. He said the wage base also went up, for another 5-6% increase. He said small businesses are struggling, and the bill will add to their cost factors.

Number 039

Rep. Rogers felt unemployment insurance was not a high cost to any business. He thought raising the top end caused most of the additional costs. Knight interjected that most of the costs came from adding weeks. Rep. Rogers said that, in the past, the longer unemployment is held down, the larger the jump is when it is increased. Jenkins said he basically agreed, but objected to another cost to small businesses. Knight spoke about costs to employers. There was discussions.

Number 100

Rep. Rogers moved, page 1, line 18, after the word "wage", to insert "and employer". Motion passed without objection.

Number 105

Rep. Rogers moved, page 4, lines 11-12, to delete "and other interested parties...of the department", and to insert "and all of the claimant's employers." There was discussion. He changed the motion to delete the underlined language on lines 11-13. Rep. Bylsma objected. There was discussion. Rep. Rogers changed the motion to: delete the underlined language on lines 11 and 12, and to insert, on line 13, after the word "parties", the language, "as defined by regulation of the Department". Motion passed without objection.

Number 230

There was discussion of the proposed changes beginning on page 4, to sections 7 and 8, and the reasons for those changes. Zillig presented figures and explained them. There was discussion of the benefits schedule. Rep. Rogers asked which was a higher priority to the Unemployment Insurance Committee (composed of labor and management representatives): more weeks or a higher scale. Zillig said that no preference was expressed that he recalled. He thought probably the change to 18 weeks rather than 16 weeks was more important. There was discussion of alternate ways to address unemployment insurance claims.

Number 435

Rep. Rogers moved, page 7, to delete lines 5-9, and on line 4, to delete the figure, "16,200". Motion passed without objection. (This motion made $16,000 the top end of the scale being amended.)

Number 442

Rep. Martin moved to delete Section 8; Rep.

Rogers objected. There was discussion of earnings ratio. On the question: for--Bylsma, Martin; opposed--Rogers. Motion passed.

Number 565 — Rep. Rogers moved to put Section 8 back, change the number of weeks, and add a new earnings ratio of 3.5 at 26 weeks. Rep. Martin objected. On the question: for--Roger; opposed--Bylsma, Martin. Motion failed.

Number 620 — Rep. Rogers moved to add a new Section 8, which was the amendment proposed by the Department of Labor entitled "Sec. 353. SUPPLEMENTAL STATE BENEFITS.", and to delete subsection (c) of that amendment. There was discussion. Motion passed without objection.

Number 714 — Rep. Rogers moved to delete Section 14 on page 10. There was discussion. Rep. Rogers withdrew the motion.

Tape 52, Number 043 — Rep. Rogers moved to delete SEction 17. There was objection. Motion failed.

Number 047 — Rep. Martin moved, on page 13, line 8, to change subsection (j) to subsection (l). (This was a housekeeping change suggested by the Department of Labor.) Motion passed without objection.

Rep. Martin moved to change, on line 12, page 13, the word "excluding" to "including". Rep. Rogers objected. On the question: for--Bylsma, Martin; opposed--Rogers. Motion passed.

Number 070 — Rep. Rogers moved, page 16, line 27, to insert between the words "work," and "self employment", the word "or"; and to delete the comma after "self-employment", and to delete the words "[illegible] labor or public service". Motion p[illegible] unanimously.

Number 084 — Rep. Rogers moved, page 17, line 26, to delete the letter "s" on the word "Sections"; to delete "and 8"; and to change the word "apply" to "applies"; and on line 28, to delete the reference to Section 8; and on page 18, to insert "8, and" so that reference would read, "Sections 8, and 17 -- 25". Motion passed without objection.

Number 114	Rep. Rogers requested that a draft committee substitute be prepared and submitted to the committee.
Number 122	There being no further business to come before the committee, the meeting was adjourned at 2:52 p.m.

Absent: Gardiner Randolph

000 Call to order

HB 722

005 Metcalfe, prime sponsor — rwd CS; excellent job of redrafting. Watered it down sufficiently to get it past House. In event tenant becomes rowdy or noisy or began vandalizing property, or other circum of unreasonable burden on landlord, under current law can continue for unreasonable amt of time. Illustrated with ~~a~~ how it affects landlord. Bill solves problem & doesn't infringe on landlord/tenant act. Applies only to unreasonable tenant. Tenant has ability to seek remedy; bill just changes burden of who is req'd to go to ct to seek remedy.

051 Rogers asked existing law if tenant ~~refused~~ refuses to pay rent. Metcalfe says can give 10-day notice; can then go to small claims ct; then can seek eviction. Total process takes upward of a month.

Rogers clarified.

068 Rogers ~~asked~~ described process for wilful damage -- ~~give 4 the eviction notice~~. ~~If tenant refuses~~ Wondered how damages are ascertained. Discussion of process.

095 Bylsma moved to adopt CS HB 722. No obj; so passed.

098 " " report bill; Rogers objected. Roll call: for-Martin, Bylsma, Opp'd-Rogers. Passed.

HB 306

106 Jeff Berry - overview of HB 806 & CS.

~~In~~ previous hrg, valid pts raised by industry, D. Labor, & D.H.S.S. CS addresses those concerns.

1st part allows dept to adopt regs defining hazardous & toxic substances & exempting substances that don't pose health risk.

P. 2, ~~l. 12~~ l. 17 - changed wording to "wholesaler"

P. 3, n. re info to employees - will be provided to new empes & on request to other empes, rather than providing info yrly.

P. 4 - new sec (d) under reports to be filed w/ department.

- other chng gives dept auth to adopt regs defining hazardous & toxic substances.

195 Rogers ~~moved he has~~ moved two amdmts; first to sec 1, exempting certain products (fm Calif. law)

2d amdmt ED 1/1/83 to give dept time to prepare for implementn & cut FN in half.

224 1st amdmt passed w/o obj.

224 Rogers moved 2d amdmt - passed w/o obj.

HB 806

235 Judy Knight – rwd draft CS, concurs w/ chngs. ~~Friend~~ Need to revise FN to reflect chngs; will cut cost approx in half. Puts burden on dept to identify substances & to stay current. Delayed ED is good, as they'll need to recruit industrial hygienist.

266 Rogers commented on FN. Noted that MOA Health Comm. endorsed bill.

275 Glenn ~~Eakins~~ Akins, Dep. Comm., DEC – Mueller had reservation abt interpretn of toxic & hazard substances; CS addresses this. Dept fully endorses bill.

286 Rogers moved to report out ~~&~~ CSHB 806 L&C as amended. No obj, so passed.

HB 757

293 Brought HB 757 before Comm.

310 Judy Knight & Art Zilly came before comm.
Knight – drafted lang to address concerns. Significantly more expensive than anticipated. If remdn cmp'd, recond Sec 353 on last pg of draft be incld into bill; then ~~add~~ draft another bill making appropn.

332 Approx 1,047 claimants wd be affected by bill. Passed out sheet showing characteristics of clmts - % & loc'n by area (1981); sex, age & industry breakdown.

359 Rogers asked, new sched, p.5-7, asked addl cost to state of raising top end fm 150 to 156.

Zillig said by raising amt, wd increase by 4.1%; abt $3.4M trust funds.

Rogers said ~~sect~~ % ages higher in bush than in cities & ~~[illegible]~~ (making benefit period lower). Large % of claimants there are low income. ~~Taking~~ Putting $3.4M at high end, & saving $1.1M by cutting off people at low end. Wiping out low income bush workers for benefit of high income wkrs, lge % of which are fm out of state. Asked dept to fund cutoff on top end to enable low end to stay in w/o affecting gen fnd money.

415 Zillig said they follow principle that it's an insurance pgm based on length of time worked & earnings. Deviating fm this becomes welfare pgm, not insurance. ~~Asked~~ Asks us what direction do you want to go - ins or social welfare.

440 R - has nothing to do with this. Fed law has nothing to do w/ actuarial or social effects of pgm.

He's concerned w/ status quo. If fed chng p.13, l 7-14 were not there, for extended benefits, st wd pick up ½, feds wd pick up half. Feds won't do this now, so these people are cut out. State determines high end.

His opinion that adoption of suppl st benefits, w/ sec 18, allows (brush) low income people collecting $34-60 wk ~~to cont~~ keeps them whole. To not impact general fund, shd lower top end.

491 Knight said they cd pay ½ cost of benefs fm trust fnd; act eliminating those is a conformity issue. Can't pay fm trust fnd & stay in conformity. Concerned feds wd declare st out of conformity, which wd penalize emples.

525 ~~Ken~~ Rogers asked which was more likely to cause fed'l probs – bill dying or bill passing w/ new sec.

Billig said he asked feds opn on trust fnds; possibility if these are identified as suppl bennies, cd be pd out of trust (unofficial opinion). If bill won't passed, they will be out of conformity.

Martin asked when bill is needed; Billig said 7/26.

568 Rogers – bill needs to be in Rules by Mon to pass this yr.

Discussion of how to chng bill.

600 Rogers had ~~sec 6 p. 4 l. 15~~; asked who wd be notified p. 4, l. 8; clarified this w/ Knight.

" p. 11, l. 20 – child support enforcmt – asked if this was conformity. Knight said it was; this was important to fed govt.

650 Rogers — p. 13, l. 12 — wanted clarification

Discussion

682 Garth Patterson, DH+SS — Sec 1, TP f + g — Dept facing $1.2M sanction due to high error rate for 6 mo. period. Can avoid further sanctions w/ USDAg plan. 2/3 of errors due to clients' failure to report, & to report correctly. Clients have been signing release of info since 4/80 to food stamps & CSEA. Requested changs.

Side B Rogers asked outcome if not passed. Martin had gotns.

Discussion.

015 Gary Jenkins, Nat'l Fed of Independent Business — chngs in bill are borne by empprs. DOL analysis anticipates 4-6% increase to empprs. Also, wage base went up from 13.3 to 14.6, so another 5-6% increase. Small businesses struggling; bill will add to their cost factors.

039 Rogers felt unemp ins not a high cost to any business. Thought raising top end caused most of addl costs. Knight interjected that most come from adding weeks. Rogers said, in past, longer unemp is held down, esp the jump is when it is increased. Jenkins basically agreed; just object to another cost to small businesses.

069 Knight said in 1980, said cost to empr wd vary yr to yr.
1981, av cost 3.3% per empe
1982 % has dropped, but comes out to be same amt of $ per empe.

083 M – p.16, l. 28 – asked clarification of "public svc".

094 R – feel saying "insured work or non-insured work or self-empmt" wd cover all.

100 R – p. 1, l. 18, after "wage" insert "& empr".
Passed w/o obj.

105 R-p. 4, l. 11-12, delete "& other cvt'd ... dept" insert, "+ all of the claimants' empers." Discussion.
Chngd mo to delete underlined lang, lines 11, 12, & 13.
Byisma objected. Discussion.
~~Chngd w/ [illegible] amdmt~~
Chngd l. 13 – after "parties"; l. 13, insert "as ~~determined~~ defined by regulation of the Dept."
Motion passed w/o obj.

changes beginning

230 Discussed, p. 4, Sec. 7 & 8 & reasons for chngs. Billig presented figures & explained them.
Discussion of benefits schedule. Rogers asked which was higher priority to, UI labor mgmt comm — more weeks or higher scale. Billig said no pref expressed that he recalled. Thought probly chng to 18 wks rather than 16 was more important. Discussion of alternate ways to address UI claims

435 R moved p. 7 l 5-9 & l. 4 16,200 — delete.
mo passed w/o obj.

442 M moved to delete Sec. 8. ~~Mo~~ Rogers objected. Discussion of earnings ratio.
For - Byrom, Martin Oppd Rogers — passed

+ add sec 8 back in;

565 Rogers moved, chng # weeks; add new section for 3.5 at 26.
Martin objected; Astn M, B oppd, R-for. Failed.

Sec 353. provid by DOL

620 Rogers moved new sec. 8, suppl state benefits; delete (c). Discussion.
Motion passed w/o obj.

714 R moved to delete Sec. 14, p. 10.
Discussion.
Tape 2
Rogers w/drew mo.

043 Re moved to delete Sec 17. Objection – mo failed.

047 M – sec. 18 chng (j) to (1) l. 8 p. 13 mo passed moved to chng "excluding" to "including" l. 12; Rogers objected. Mo passed (for – B, M oppd R)

070 R – p. 16, l. 27 non-insured work, insert "or" & delete "casual labor or pub svc"; mo passed unan.

084 R – Se.

mo. passed

114 Rogers requested draft CS to come back to comm.

Introduced: 2/11/82
Referred: Labor & Commerce and Finance

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 757

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to unemployment insurance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.20.110 is amended by adding new subsections to read:

(f) On request of the United States Department of Agriculture or an agency of this or another state which administers the food stamp program established by 7 U.S.C. secs. 2011 -- 2026, and if that agency has agreed that information provided by the department will be used only to determine an individual's eligibility for food stamp benefits or the amount of the benefits, the department shall provide, for each individual named by the requesting agency, any of the following information contained in the records of the department:

(1) wage and employer information;

(2) the information specified in (c) of this section; and

(3) the amount of unemployment compensation, if any, to be received.

(g) The requirements of this section concerning the confidentiality of information obtained in the course of administering this chapter apply to officers and employees of a state or federal agency to whom the department provides information as authorized by this section.

* Sec. 2. AS 23.20.115 is amended to read:

Sec. 23.20.115. UNAUTHORIZED DISCLOSURE OF INFORMATION. A member of the department, an employee of the department, [OR] an agent of the department, or an officer or employee of a state or federal agency which

has been provided with information by the department who, in violation of AS 23.20.110, makes a disclosure of information obtained from an employing unit or from an individual in the administration of AS 23.-20.005 -- 23.20.535, or a person who has obtained a list of applicants for work or of claimants or recipients of benefits under this chapter and who uses or permits the use of the list for a purpose not authorized by AS 23.20.110 is guilty of a class B misdemeanor.

* Sec. 3. AS 23.20.165(e) is amended to read:

(e) An employer shall maintain a record of the amount deducted from the wages of each employee and shall furnish a statement of the deductions to each employee at the times and in the manner the department prescribes by regulation. No deduction may be made from those wages paid to an employee during a calendar year which are in excess of the wages subject to contributions under AS 23.20.175. If an employee in the employ of two or more employers earns wages in one calendar year totaling more than the wages subject to contributions or if an employer through error makes a deduction and erroneously pays contributions [OR INTEREST] on wages of an employee in excess of the wages subject to contributions during a calendar year, the amount of deductions in excess of those required by AS 23.20.005 -- 23.20.535 [MAY BE REQUESTED BY THE EMPLOYEE. EMPLOYEE DEDUCTIONS IN EXCESS OF THE WAGES SUBJECT TO CONTRIBUTIONS] shall be refunded to the employee by the department upon application for them in accordance with regulations adopted by the department. Application must be made during the calendar year after the calendar year in which the deductions are made.

* Sec. 4. AS 23.20.290(c) is amended to read:

(c) Beginning January 1, 1981, the rate of contributions for each employer is 82 percent of the average benefit cost rate multiplied by the employer's experience factor set out in column C of the table in

this subsection opposite his applicable rate class set out in column A plus the fund solvency contribution required under (f) of this section. However, the rate of contributions for an employer may not be less than one percent or more than six and one-half percent. The rate of contributions for an employer must be rounded to the nearest one-hundredth of one percent.

COLUMN A	COLUMN B		COLUMN C
Rate Class	Cumulative Ratable Payroll		Experience Factor
	at least (percent)	but less than (percent)	
1		5	.40
2	5	10	.45
3	10	15	.50
4	15	20	.55
5	20	25	.60
6	25	30	.65
7	30	35	.70
8	35	40	.80
9	40	45	.90
10	45	50	1.00
11	50	55	1.00
12	55	60	1.10
13	60	65	1.20
14	65	70	1.30
15	70	75	1.35
16	75	80	1.40
17	80	85	1.45
18	85	90	1.50

19	90	95	1.55
20	95	[100]	1.60

* Sec. 5. AS 23.20.340(d) is amended to read:

(d) Unless the claimant is determined to be disqualified for benefits under AS 23.20.360, 23.20.362, 23.20.375, 23.20.378 -- 23.20.387, or 23.20.505, benefits shall be promptly paid in accordance with the initial determination or subsequent redetermination.

* Sec. 6. AS 23.20.340(f) is amended to read:

(f) If a determination of disqualification under AS 23.20.360, 23.20.362, 23.20.375, 23.20.378 -- 23.20.387, or 23.20.505 is made, the claimant ~~and other interested parties, as defined by regulations of the department,~~ shall be promptly notified of the determination and the reasons for it. The claimant and other interested parties, as defined by regulation of the Department, may appeal the determination in the same manner prescribed in AS 23.20.005 -- 23.20.535 for appeals of initial determinations and redeterminations. Benefits may not be paid while a determination is being appealed for any week for which the determination of disqualification was made. However, if a decision on the appeal allows benefits to the claimant, those benefits must be paid promptly.

* Sec. 7. AS 23.20.350(d) is repealed and reenacted to read:

(d) An individual who is eligible under (a) of this section is entitled to receive the weekly benefit amount set out in column (B) of the table in this subsection which is opposite the amount set out in column (A) of the individual's base period wages determined under (c) of this section:

3.00	3.5	~~26~~ 25
~~3.5~~		26

* Sec. 9. AS 23.20.360 is repealed and reenacted to read:

Sec. 23.20.360. EARNINGS DEDUCTED FROM WEEKLY BENEFIT AMOUNT. The amount of benefits, excluding the allowance for dependents, payable to an insured worker for a week of his unemployment shall be reduced by 75 percent of the wages payable to him for that week which are in excess of $50. However, the amount of benefits may not be reduced below zero. If

the benefit is not a multiple of $1, it is computed to the next higher multiple of $1. If the benefit is zero, no allowance for dependents is payable.

* Sec. 10. AS 23.20.375(a) is amended to read:

(a) An insured worker is entitled to receive waiting-week credit or benefits for a week of unemployment for which he has not been disqualified under AS 23.20.360, 23.20.362, 23.20.378 -- 23.20.387, or 23.20.505 if, in accordance with regulations adopted by the department, he has

(1) made an initial claim for benefits; and

(2) for that week, certified for waiting-week credit or made a claim for benefits.

* Sec. 11. AS 23.20.378(a) is amended to read:

(a) An insured worker is entitled to receive waiting-week credit or benefits for a week of his unemployment if for that week he is able to work and available for suitable work. An insured worker is not considered available for work unless he is registered for work in accordance with regulations adopted by the department. An insured worker may not be disqualified for failure to comply with this subsection if

(1) he is not available for work because

(A) he is ill or disabled;

(B) [(2) HE IS NOT AVAILABLE FOR WORK BECAUSE] he is traveling to obtain medical services which are not available in the area in which he resides, or if a physician determines it is necessary, he is accompanying [NOT AVAILABLE FOR WORK BECAUSE HE MUST ACCOMPANY] a spouse or dependent who is traveling to obtain medical services;

(C) [(3)] he resides in the state and is noncommercially [NOT AVAILABLE FOR WORK BECAUSE OF HIS NONCOMMERCIAL] hunting or fishing [NECESSARY] for his survival or the survival of his de-

pendents; or

(D) [(4) HE IS NOT AVAILABLE FOR WORK BECAUSE] he is serving as a prospective or impaneled juror in a court; and [OR]

(2) [(5)] a condition described in (1)(A) -- (C) [, (2), OR (3)] of this subsection occurs during an uninterrupted period of unemployment immediately following a week for which he has filed a compensable claim, and work has not been offered to him which would have been suitable for him before the illness, disability, hunting, fishing or medical travel.

* Sec. 12. AS 23.20.381 is amended by adding a new subsection to read:

(g) An individual may not receive benefits under this chapter in two successive benefit years unless

(1) he has performed services, whether or not in "employment" as defined in AS 23.20.525, after the beginning of the first benefit year; and

(2) he has earned wages for those services equal to at least eight times his weekly benefit amount, excluding an allowance for dependents.

* Sec. 13. AS 23.20.382 is amended to read:

Sec. 23.20.382. BENEFITS WHILE ATTENDING APPROVED VOCATIONAL TRAINING COURSE. (a) Benefits or waiting-week credit for any week shall not be denied an otherwise eligible individual because he is attending a vocational training or retraining course with the approval of the director of the employment security division or because, while attending the course, he is not available for work or refuses an offer of work.

(b) An otherwise eligible individual shall not be denied benefits or waiting-week credit for any week because

(1) he is in training approved under Section 236(a)(1) of

the Trade Act of 1974;

(2) he left work which was not suitable employment to enter the training; or

(3) while attending the training, he is not available for work, fails to seek work, or refuses work.

(c) For purposes of (b)(2) of this section, "suitable employment" means work which

(1) pays at least 80 percent of the individual's average weekly wage, as determined for the purposes of the Trade Act of 1974; and

(2) is at least equal in skill level to the individual's past adversely affected employment, as defined for purposes of the Trade Act of 1974.

* Sec. 14. AS 23.20.383(b) is amended to read:

(b) This section does not apply if the department finds that

(1) the [AN] insured worker was not participating in or directly interested in the labor dispute which caused his unemployment, and [;(2)] he did not belong to a grade or class of workers which, immediately before the commencement of the dispute, had members employed at the premises at which the labor dispute occurred who were participating in or directly interested in the labor dispute; or [AND]

(2) [(3)] the labor dispute is caused by the failure or refusal of the employer to comply with an agreement or contract between the employer and the insured worker, or a state or federal law pertaining to hours, wages or other conditions of work.

* Sec. 15. AS 23.20.390(e) is amended to read:

(e) An appeal from the determination of liability under this section may be made in the same manner and to the same extent as provided by AS 23.20.340 and 23.20.410 -- 23.20.470 for an appeal relating

to a determination in respect to a claim for benefits. If no appeal is taken to the appeal tribunal by the individual within 15 [10] days of the delivery of the notice of determination of liability, or within 15 [10] days of the mailing of the notice of determination, whichever is earlier, the determination of liability is final and the court shall, upon application of the department, enter a judgment in the amount provided by the notice of determination. The judgment has the same effect as a judgment entered in a civil action.

* Sec. 16. AS 23.20 is amended by adding a new section to read:

Sec. 23.20.392. DEDUCTIONS FROM BACK PAY AWARDS. An employer who makes a deduction from a back pay award to an insured worker because of the insured worker's receipt of benefits under AS 23.20.005 -- 23.20.535 for which he is ineligible by reason of the back pay award, shall pay into the unemployment trust fund an amount equal to the amount of the deduction. If an employer making a payment under this section has already reimbursed the department for the benefits under AS 23.20.276 -- 23.20.277, his account shall be properly credited. The insured worker's liability under AS 23.20.390 shall be reduced by the amount paid by his employer under this section.

* Sec. 17. AS 23.20 is amended by adding a new section to read:

Sec. 23.20.401. CHILD SUPPORT INTERCEPTION. (a) Notwithstanding any other provision of AS 23.20.005 -- 23.20.535, an individual filing a new claim for unemployment compensation must disclose whether he owes child support obligations as defined in (g) of this section. If the individual discloses that he owes child support obligations and is determined to be eligible for unemployment compensation, the department shall notify the child support enforcement agency of the Alaska Department of Revenue that the individual has been determined to be eligible for unemployment compensation.

(b) The department shall deduct and withhold from unemployment compensation payable to an individual who owes child support obligations as defined in (g) of this section

(1) the amount specified by the individual to the department to be deducted and withheld under this subsection, if neither (2) nor (3) of this subsection is applicable;

(2) the amount specified in an agreement submitted to the department under section 454(20)(B)(i) of the Social Security Act (42 U.S.C. sec. 654(20)(B)(i)) by the child support enforcement agency of the Alaska Department of Revenue, unless (3) of this subsection is applicable; or

(3) any amount required to be deducted and withheld through legal process, as defined in section 462(e) of the Social Security Act (42 U.S.C. sec. 662(e)), properly served upon the department.

(c) The department shall pay an amount deducted and withheld under (b) of this section to the child support enforcement agency of the Alaska Department of Revenue.

(d) An amount deducted and withheld under (b) of this section shall for all purposes be treated as if it were paid to the individual as unemployment compensation and paid by that individual to the child support enforcement agency of the Alaska Department of Revenue in satisfaction of the individual's child support obligations.

(e) In (a) -- (d) of this section, "unemployment compensation" means compensation payable under AS 23.20.005 -- 23.20.535, including amounts payable under an agreement under a federal law providing for compensation, assistance, or allowances with respect to unemployment.

(f) This section applies only if appropriate arrangements have been made for reimbursement by the child support enforcement agency of the Alaska Department of Revenue for the administrative costs incurred

by the department under this section.

(g) In this section, "child support obligations" includes only obligations which are being enforced under a plan, described in section 454 of the Social Security Act, (42 U.S.C. sec. 654) which has been approved by the United States Secretary of Health and Human Services under Part D of Title IV of the Social Security Act.

* Sec. 18. AS 23.20.406 is amended by adding a new subsection to read:

(~~j~~ l.) Notwithstanding (a) and (b) of this section, an individual is not eligible for extended benefits unless, in the base period determined with respect to his applicable benefit year, the individual has been paid, for employment covered by AS 23.20.005 -- 23.20.535, total wages which equal or exceed 40 times the weekly benefit amount, ~~excluding~~ including any allowance for dependents, which is payable to him during his applicable benefit year.

* Sec. 19. AS 23.20.407 is amended by adding a new subsection to read:

(c) Notwithstanding any other provision of AS 23.20.005 -- 23.20.535, if the benefit year of an individual ends within an extended benefit period, the remaining balance of extended benefits which the individual would, but for this section, be entitled to receive in the extended benefit period, with respect to weeks of unemployment beginning after the end of the benefit year, shall be reduced by the number of weeks for which the individual received an amount as a trade readjustment allowance within the benefit year multiplied by the individual's weekly benefit amount for extended benefits. However, the extended benefits may not be reduced below zero.

* Sec. 20. AS 23.20.408(a) is amended to read:

(a) When an extended benefit period is to become effective in this state as a result of a state [OR NATIONAL] "on" indicator, or an extended benefit period is to be terminated in this state as a result of

[EITHER] a state "off" indicator [OR A NATIONAL "OFF" INDICATOR], the department shall make an appropriate public announcement.

* Sec. 21. AS 23.20.408(f) is amended to read:

(f) There is a state "on" indicator for a week if the rate of insured unemployment under AS 23.20.005 -- 23.20.535 for the period consisting of that week and the immediately preceding 12 weeks either:

(1) equaled or exceeded 120 percent of the average rate of insured unemployment for the corresponding 13-week period in each of the preceding two calendar years and equaled or exceeded <u>five</u> [FOUR] percent; or

(2) equaled or exceeded <u>six</u> [FIVE] percent.

* Sec. 22. AS 23.20.408(g) is amended to read:

(g) There is a state "off" indicator for a week if, for that week and the immediately preceding 12 weeks, the rate of insured unemployment was either: (1) less than <u>five</u> [FOUR] percent; or (2) less than <u>six</u> [FIVE] percent and was less than 120 percent of the average of the rates of insured unemployment for the corresponding 13-week period in each of the preceding two calendar years.

* Sec. 23. AS 23.20.408(h) is amended to read:

(h) In (f) and (g) of this section, "rate of insured unemployment" means the percentage derived by dividing (1) the average weekly number of individuals filing claims <u>for regular compensation</u> in this state for weeks of unemployment with respect to the most recent 13 consecutive week period, as determined by the department on the basis of its reports to the United States Secretary of Labor, by (2) the average monthly employment covered under AS 23.20.005 -- 23.20.535 for the first four of the most recent six completed calendar quarters ending before the close of that 13-week period. Computations required by this subsection shall be made by the department in accordance with regulations prescribed by the United States Secretary of Labor.

* Sec. 24. AS 23.20.409(1) is amended to read:

(1) "extended benefit period" means a period which

(A) begins with the third week after [WHICHEVER OF THE FOLLOWING WEEKS OCCURS FIRST:

(i) A WEEK FOR WHICH THERE IS A NATIONAL "ON" INDICATOR, OR

(ii)] a week for which there is a state "on" indicator; and

(B) ends with either of the following weeks, whichever occurs later:

(i) the third week after the first week for which there is [BOTH A NATIONAL "OFF" INDICATOR AND] a state "off" indicator; or

(ii) the 13th consecutive week of that period;

* Sec. 25. AS 23.20.409 is amended by adding a new paragraph to read:

(6) "applicable benefit year" means, with respect to an individual, the current benefit year if, at the time an initial claim for extended benefits is filed, the individual has an unexpired benefit year on[1], in the state against which the claim is filed, or, in any other case, the individual's most recent benefit year; the most recent benefit year, for an individual who has unexpired benefit years in more than one state when the initial claim for extended benefits is filed, is the benefit year with the latest ending date or, if the benefit years have the same ending date, the benefit year in which the latest continued claim for regular compensation was filed; no extended benefits are payable under this section unless the "applicable benefit year" was a benefit year established under AS 23.20.005 -- 23.20.535.

* Sec. 26. AS 23.20.505(a) is amended to read:

(a) An individual is considered "unemployed" in a week during

which he performs no services and for which no wages are [REMUNERATION IS] payable to him, or in a week of less than full-time work if the wages [REMUNERATION] payable to him for the week are less [IS NOT MORE] than one and one-third times his weekly benefit amount, excluding the allowance for dependents, plus $50.

* Sec. 27. AS 23.20.520(26) is amended to read:

(26) "vocational training or retraining course" means a course of vocational or technical training or retraining in schools or classes, including but not limited to, field or laboratory work and related remedial or academic instruction, which is conducted as a program designed to prepare individuals for [ENTRY LEVEL] employment in trades, skills or crafts; the term "vocational training or retraining course" does not include a program of instruction for an individual, including a transfer credit program of instruction given at a community college, which is intended as credit for a degree from an institution of higher education;

* Sec. 28. AS 23.20.520(24)(B) is amended to read:

(B) is legally authorized in the [THIS] state in which it is located to provide a program of education beyond high school; and

* Sec. 29. AS 23.20.526(a) is amended by adding a new paragraph to read:

(21) service performed as a prospective or impaneled juror in a court.

* Sec. 30. AS 23.20.530(a) is amended to read:

(a) In this chapter, [UNLESS THE CONTEXT OTHERWISE REQUIRES,] "wages" means all remuneration for service from whatever source, including, but not limited to, insured work, noninsured work, or self-employment ~~casual labor or public service~~; commissions, [AND] bonuses, back pay and the cash value of all remuneration in a medium other than cash shall be

treated as wages; gratuities customarily received by an individual in the course of his service from persons other than his employing unit may be treated as wages received from [FOR] his employing unit only to the extent the individual reports the gratuities to his employing unit [; BACK PAY AWARDED UNDER A STATUTE OF THIS STATE OR THE UNITED STATES SHALL BE TREATED AS WAGES]. The reasonable cash value of remuneration in a medium other than cash, and the reasonable amount of gratuities, shall be estimated and determined in accordance with regulations prescribed by the department; notwithstanding AS 23.20.350(a), [FOR THE PURPOSE OF AN INITIAL DETERMINATION ONLY,] back-pay awards shall be allocated to the weeks or quarters with respect to which the pay was earned. If the remuneration of an individual is not based upon a fixed period [OF DURATION] of time or if his wages are paid in irregular intervals or in a manner which does not extend regularly over the period of employment, [FOR THE PURPOSE OF AN INITIAL DETERMINATION ONLY,] the wages shall be allocated to weeks or quarters [QUARTER] in accordance with regulations prescribed by the department. The regulations shall, so far as possible, produce results reasonably similar to those which would prevail if the individual were paid his wages at regular intervals.

* Sec. 31. AS 23.20.530(b) is amended by adding a new paragraph to read:

(13) compensation received for inactive service performed by a member of the Alaska National Guard or Naval Militia.

* Sec. 32. AS 23.20.350(b), 23.20.408(d), 23.20.408(e), 23.20.505(b), 23.20.505(c), 23.20.530(b)(11), and 23.20.530(b)(12) are repealed.

* Sec. 33. Section[s] 7[~~and 8~~] of this Act apply to insured workers who establish benefit years after December 31, 1982.

* Sec. 34. Sections 1, 2, 7,[~~8,~~] and 33 of this Act take effect January 1, 1983.

* Sec. 35. Sections 8, and 17 -- 25 of this Act take effect September 26, 1982.

* Sec. 36. Sections 3 -- 6, 9 -- 16, and 26 -- 32 of this Act take effect immediately in accordance with AS 01.10.070(c).

DRAFT

New Sec. 8

Sec. 353. SUPPLEMENTAL STATE BENEFITS. (a) An individual is eligible to receive supplemental state benefits for a week in which

(1) he is an "exhaustee" as defined in AS 23.20.409(5);

(2) he has otherwise satisfied the requirements of AS 23.20.005--23.20.535 for the receipt of regular benefits; and

(3) he is ineligible for extended benefits solely because of the provisions of AS 23.20.406(1).

(b) Supplemental state benefits are paid in the same amounts, for the same periods, and under the same conditions as extended benefits under AS 23.20.406(a)--(k) and AS 23.20.407--23.20.409.

~~(c) Supplemental state benefits are payable to the extent that money is appropriated from the general fund for that purpose.~~

Draft CS for HB 806 (L&C)

Sectional Analysis

HB 806 was drafted to conform with model "right-to-know" legislation from other states. The basis for the legislation is that Alaskan workers have the right to know about hazardous or toxic substances with which they work and that it is an employer's responsibility to supply that information.

18.60.051 requires an in-state manufacturer of a hazardous or toxic substance to make available certain information including the name of the substance, its hazards, proper handling procedures, and health risks.

18.60.052 requires a seller of a hazardous or toxic substance to provide the same information.

18.60.071 requires an employer to post in the workplace where a hazardous or toxic substance is present the same information, and to provide training at his own expense about the potential hazards and proper handling of the substances.

18.60.072 requires manufacturers, sellers, and employers to file annual reports with the Department of Labor. Trade secrets are protected.

18.60.073 allows past, present, and future employees access to reports filed with the department and to exposure measurements. The department may require employees to furnish health and exposure records pertinent to an investigation. Regulations shall be adopted to ensure that an employee has ready access to all relevant information about hazards and exposure.

18.60.074 allows for the department to disclose to the public information about hazardous and toxic substances and the circumstances under which the public might be affected.

Section 2 provides definitions.

COMMITTEE CALENDAR

SB 831 — An Act relating to insurance; and providing for an effective date.

PREVIOUS ACTION

SB 831

Senate Action: First reading 3/4/82. Reported from Labor & Commerce 3/18/82. Reported from Rules 3/22/82; taken up immediately. Passed second reading 3/22/82; advanced to third reading by unanimous consent. Passed Senate 3/22/82.

House Action: First reading 3/22/82. Referred to Labor & Commerce.

Statutory Reference: AS 21.09.260. After adoption of committee substitute by House Labor & Commerce, statutory reference also includes AS 36.94.010.

Action Taken: Committee substitute adopted; bill reported out.

ACTION NARRATIVE

Tape #53
Recording
Number 000

The meeting was called to order by Chairman Martin at 12:58 p.m. Members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Rep. Gardiner was absent.

Rep. Martin brought SB 831 before the committee, and presented HCS SB 832 (L&C) to the committee. He then read the following statement of the committee's position regarding wrap-up insurance

policies:

"It is the committee's feeling at this time that the current policy of Alaska Power Authority pertaining to the sole contracting of wrap-up insurance coverage for hydroelectric projects is not in the best interests of the state. We feel that the intent of many regulations and the normal procedures have been circumvented to establish the sole contract wrap-up insurance program as it is known today. We wish that Alaska Power Authority and the Division of Insurance do more in-depth studies before entering into sole contracts, and bring their documented information to the legislative body before entering into any more such contracts. We therefore ask Alaska Power Authority and the Risk Management Insurance Division to make null and void its current contract and to reestablish its previous policy for construction bids. I have asked the committee to look at SB 831, in which we have two new sections which prohibit such contracts."

Number 027 — Rep. Rogers then moved that the committee adopt HCS SB 831 (L&C) and report the bill out of committee. There was discussion. There being no objection, the motion passed.

Number 038 — As there was no further business to come before the committee, the meeting was adjourned at 1:02 p.m.

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 31, 1982
1:07 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Gardiner

Members Absent: Rep. Randolph

COMMITTEE CALENDAR

General meeting with Alaska Power Authority and Division of Risk Management regarding insurance practices.

WITNESS REGISTER

Dick Pettinger
Alaska Chapter, Associated General Contractors
Box 4-2500
Anchorage, Alaska
276-5354
Position Statement: Opposed APA wrap-up insurance program (APCOP).

Eric Yould, Director
Alaska Power Authority
334 West Fifth
Anchorage, Alaska 99501
277-7641
Position Statement: Explained why APA opted to use net of insurance.

John Haywood, Director
Division of Risk Management
Department of Administration
Pouch C
Juneau, Alaska 99811
465-2180
Position Statement: Explained why Division of Risk Management supported use of net of insurance by APA.

Daryl A. Cody
Daryl A. Cody Company
201 Danner Street
Anchorage, Alaska 99502
Position Statement: Opposed to APA's use of net of insurance.

Representative Sutcliffe
Alaska State Legislature

Pouch V
Juneau, Alaska 99811
465-3715
Position Statement: Asked questions of witnesses.

Don Koch, Director
Market Surveillance Section
Division of Insurance
Pouch D
Juneau, Alaska 99811
465-2577
Position Statement: Explained his division's involvement in APA's selection of method of insuring.

Kenneth Moore, Director
Division of Insurance
Pouch D
Juneau, Alaska 99811
465-2515
Position Statement: Testified with Koch regarding division's involvement in APA's selection of method of insuring.

Ken Vassar
Department of Law
Pouch K
Juneau, Alaska 99811
465-3600
Position Statement: Explained his role in providing legal advice to APA.

Commissioner Ernst W. Mueller
Department of Environmental Conservation
and
Vice Chairman, Board of Directors
Alaska Power Authority
Pouch O
Juneau, Alaska 99811
465-2600
Position Statement: Defended Board's decision to use net of insurance.

PREVIOUS ACTION

There were no bills before the committee. This was an informational meeting.

ACTION NARRATIVE

Tape #49
Recording
Number 000 The meeting was called to order by Chairman

Martin at 1:07 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, and Rogers. Rep. Randolph was absent. Representatives Cotten, Sutcliffe, Grussendorf, and Haugen also attended the meeting. Rep. Martin explained the purpose of the meeting, which was to explore policy decisions regarding sole contract of insurance by the Alaska Power Authority.

Number 015

Dick Pettinger, Alaska Chapter, Associated General Contractors, said his association represented 675 construction-related firms. He said the Chapter opposes the Alaska Power Authority wrap-up insurance program known as APCOP. Pettinger said that, nationally, the association has been opposed to this type of insurance program for years. He described stands taken by the AGC in the past.

Number 040

Pettinger asked why regulation or statute permitted a wrap-up insurance program. He asked why APA instituted the program. He said that all bids on the Tyee project included insurance costs, and asked why APA did not notify the public of their intent before imposing the program on the project. He said APA said this program would be cost saving to the rate payer.

Number 054

Pettinger said one of the contractor's tools is removed by this type of insurance program. He explained how safety factors affect the cost of insurance. He said a company with a better safety factor would normally submit a lower bid. Pettinger said APCOP penalizes the safety-conscious contractor. He said that APA assuming insurance means the contractor would not be held responsible for claims. He questioned the ability of APA to ensure proper safety procedures. He questioned the savings as a result. (Pettinger promised to provide the committee with a copy of his written testimony.)

Number 084

Pettinger said major disadvantages are that owner controlled programs are disliked by most contractors. He said administration is a disadvantage due to the length of the project and turnover of personnel. He felt insurance company agents' interests may be diverse, hence there could be a conflict of interest with one company serving all

parties. He felt this could lead to claims control problems and legal difficulties, as well. He spoke about consolidating policies. Pettinger said the true cost of insurance is often not determined for 5-7 years after completion of a project. Pettinger felt with wrap-up insurance, the owner often becomes involved in many insurance disputes that normally take place between the general contractor and the subcontractor.

Number 123 — Pettinger said the best incentive for risk control lies with self insurance programs. He felt APCOP would result in the opposite. He objected to government intervention into the private sector. He requested immediate elimination of APCOP.

Number 135 — Rep. Martin asked when the situation first came to his attention; Pettinger responded that it was early in November, and added that the contract was let in August. There was discussion.

Number 165 — Eric Yould, Director of Alaska Power Authority, and John Haywood, Director of the Division of Risk Management, then came before the committee. Yould said that APA had two options with respect to insurance: 1) bidding under normal procedures, with the contractor providing his own insurance; or, 2) bidding net of insurance (also referred to as a wrap-up program). Yould said the Division of Risk Management provided information that indicated benefits to APA in keeping the cost of insurance premiums down if they provided their own insurance. He said it is their intent to proceed with an owner-insured program. He said the Division of Risk Management used the state's present insurance brokers to provide coverage; AGC then objected to the program.

Number 216 — Yould said at the last board meeting on March 21, the issue was reviewed. Division of Risk Management came before the board and indicated advantages to the state to take part in the program. The AGC opposed this, and Jeff Barry, Labor & Commerce committee aide, posed questions. He said many of the questions presented by Barry on behalf of the Committee should have been addressed to Risk Management, and said that Risk

Management had assisted in answering the questions.

Number 238

Yould said the next project is Terror Lake. He said bid opening is planned for April 26. He said APA would request two bids from each contractor--one reflecting costs with net of insurance, and one with the owner providing his own insurance. He said the board would then decide which type of insurance to use.

Number 250

Rep. Rogers asked when bid opening for Tyee Lake occurred; Yould responded it was September 25, and that the board met on October 2. Rep. Rogers asked if the bids were for net of insurance or if they included costs of insurance; Yould responded the bids included insurance, and that they subsequently requested the winning contractor to remove insurance costs from his bid. Rep. Rogers asked if the other bidders had an opportunity to respond to the bid as modified; Yould said they did not. Rep. Rogers suggested this might have created a different lowest responding bidder. Yould said there was litigation against the bid award for another reason, and that no one else litigated. He said the board went forward with the bid on October 2, but did not sign the agreement until December 2. There was discussion to clarify the dates. Haywood said the program was in place at the time the bidder was asked to back out his insurance costs. He said the contractor voluntarily agreed to back out insurance costs. After that, at Risk Management's recommendation, they felt it would make sense to draft a memorandum of agreement, but the program was in effect at that time.

Number 719

Rep. Rogers said that the state is managing the contractor's risks. Haywood said they were talking about a situation where the state has a joint interest in workers compensation, general liability, and builders risk. He said the workers compensation statute has proven that state entities are liable in the event of a claim without adequate insurance. He said that since World War II, most major public construction authority programs have been handled by wrap-up programs. Rep. Rogers referred to the statute which requires a

contractor to submit proof of workers compensation insurance at the time of bid.

Number 360

Rep. Martin said Harrison Western was the fourth lowest bidder, and that they did not comply with the law in submitting proof of insurance. Haywood said he wasn't involved in opening of the bids, but he understood that Harrison Western was the second lowest bidder. He said at the time the insurance certificates came in, the decision had been made to go with the APCOP program. Yould said he understood Harrison Western did have insurance at the time of the bid. Rep. Rogers asked if they required notice of current coverage of workers compensation prior to awarding bids. Yould wasn't certain.

Number 402

Rep. Rogers was concerned about a couple issues where APA appeared to be circumventing or violating law. He asked if interim financing had been arranged for both Swan Lake and Tyee. Yould said it was. Rep. Rogers asked what would happen if revenue bonds could not be sold and the legislature did not make an appropriation. Yould said advisors and underwriters advised that long term bonds could be issued if necessary. Rep. Rogers asked what the obligation of the state would be if bonds went to 70%. Yould said APA is liable, but that the state would not let its credit be impaired. Rep. Rogers was concerned about an agency of the state making obligations on behalf of the legislature. He asked if there would be a capital reserve account. Yould said there would be, with bond proceeds. Rep. Rogers asked if Swan Lake had received complete legislative authorization. Yould said it had. Rep. Rogers asked if it was the same interim financing issue. Yould said there was a straight bank loan. Rep. Rogers said the Authority said it wouldn't incur debt service that would make the power provided more expensive than diesel. He asked how the APA could ensure this. Yould said the legislature could change the program.

Number 480

Rep. Rogers said current law speaks to a uniform power rate. He asked, if the rate goes above the ceiling, how both the law and the contractual obligation could be met.

Yould said it was not the intent of the legislature to increase the cost of power. Rep. Rogers said the legislature required 10% of the capital costs annually unless there was $5-billion appropriated. Yould said the cost would still be lower than the cost of diesel. He said this was analyzed, and they do not foresee a situation where the cap will come into play. He said people will always have to remain in the system to pay their share of the debt service. Rep. Rogers asked if Yould was agreeing there is a ceiling. Yould said at least on their portion of the debt service. Rep. Rogers requested clarification. Yould responded that in the event the bond market goes, up, it is questionable whether revenue bonds could be sold to cover the program.

Number 554

Rep. Rogers asked if APA has an attorney. Yould responded that Ken Vassar, Department of Law, did legal work for them. He said Vassar doesn't review all the contracts, that they have other attorneys. He said the contract was reviewed by the Department of Law under the Transportation Section, but was primarily reviewed by private counsel.

Number 575

Rep. Martin asked if Division of Insurance had been consulted. Haywood said yes. He said owner wrap-up is a common way of handling major construction projects all over the country for the past 25 years. He said Alyeska was an owner wrap-up program. He said they met with the Division of Insurance several times before going into the program. Haywood said there had been a question of whether special regulations would need to be adopted, and that it had been decided they were not. He said they set the cutoff at $50-million projects for a wrap-up program.

Number 614

Rep. Martin asked if Commissioner Hudson had given permission for a wrap-up program. Haywood said the risks of the state of Alaska would tap a majority of the world-wide marketplace capacity. He said the contract was on the basis of professional services, and would be kept in effect for 3-5 years. He said this was done early in 1981, and that Marsh & McLennan and Coroon & Black/Dawson were selected.

Number 654

Rep. Martin asked why these companies should get paid for an insurance program when the memorandum of agreement was dated three months after the insurance coverage went into effect. Haywood said the insurance was there by October 15. Rep. Martin asked if that was when they decided Harrison Western did not have coverage. Haywood responded that their lack of insurance was not an issue, and that they did not meet other specifications. Rep. Martin asked at what time the Commissioner signed the sole source contract. Haywood said the contract was put together for Tyee Lake insurance. He said insurance is a contract of "utmost good faith". He compared it to car or homeowner's insurance that is ordered by telephone. He said this was the same situation--the coverage was put into place as of 10/1, contracts followed. He said this is standard practice.

Number 734

Rep. Martin said he understood the contractor could not get insurance because they were a high insurance risk. He pointed out, in addition, that it was not a $50-million contract. Haywood said it would be a $90- to $100-million contract when it was done. He said Terror Lake, with one prime contract for a $175-million project, was a better example than Tyee, which was bid in three phases.

Side B, Number 005

Rep. Rogers asked if Coroon & Black would then get the insurance contract on Tyee, Terror Lake, and Susitna. Haywood said they didn't have a contract like that. Rep Rogers asked if they could extend the contract to all projects. Haywood said it was part of the selection process.

Number 027

Haywood said they need four to five months lead time to give the broker time to put together the program needed. He said they now have two projects on-line: Terror Lake and Tyee. He said this is a Risk Management service, it is not separate.

Number 042

Rep. Rogers asked, since the contractor bears no cost of insurance, what is the incentive for a good safety program. Haywood says statistics show they run safer jobs. He said they build safety specs into the project, centralize safety coordinating

and facilities on the job, and report losses to the National Safety Council, so insurance modification factors continue to run. There was discussion of incentive for a good safety program.

Number 076

Haywood said the state isn't forcing safety on the contractor. He said statistics show these jobs are run safely. He said Rep. Rogers was missing the humanism. He said there are so many hidden costs related to an injury that no well-managed contractor would risk that. Rep. Rogers pointed out that a poorly-managed contractor might.

Number 111

Rep. Martin asked what public entities use wrap-up programs. He noted that it seems that private agencies are moving away from it. Haywood said wrap-ups are going as strong now as ever. He said the cutback in federal funds is slowing down major wrap-up programs. He passed out a partial list of owner-controlled programs and documented savings. (This list is available for inspection from the committee.)

Number 130

Rep. Martin asked if Commissioner Hudson signed a document to authorize this. Haywood said it went through contract review in the Department of Administration. Rep. Martin said the insurance was done after the fact. He said that, by regulation, the company selected was not qualified as it had no insurance included in the bid. Haywood said insurance was included in the bid.

Number 148

Rep. Bylsma said, in the contract with the insurance company, they provide APA and prime contractors with a safety incentive formula prior to conception. He asked how they could do this if the job was contracted before the insurance was in force. Haywood said the intention of the agreement is that language for policy be in the contract. He said it is designed for a project where language is included in the bid specification. Rep. Bylsma asked what the safety incentive formula is. Haywood responded that APA got a return of $100,000 to use on other projects, and $200,000 to use as incentive programs with contractors on the basis of good performance. Rep. Bylsma asked if the contractor and APA split that money. Haywood said the incentive is

based on losses.

Number 195 — Rep. Bylsma said that, on 10/2, premium return was mentioned. He said he was led to believe it would come back to the state, not the contractor.

Number 215 — Daryl Cody, president of Daryl A. Cody Company, a business consulting firm with offices in Anchorage and Washington state, said one of his specialties is assisting contractors in the acquisition of surety bonds and construction insurance. He listed his qualifications.

Number 250 — Cody described wrap-up programs that were attempted to be instituted in Washington state in the 1960s that were stopped because what they suggested as savings was over anything they could justify. He said he has been injured by the action of APA, as they took insurance out of one of his clients' hands. He said he is co-chairman of the Insurance Taxing and Bonding Committee of the Alaska Chapter of AGC, and that he holds an office in the national AGC.

Number 280 — Cody said he favors the free enterprise system. He is opposed to anything unnecessary, which is his first reason for opposing APCOP. He said it takes the normal insurance buying process away from the contractor. He said cost of insurance is a major consideration in putting bids together.

Number 297 — Cody was opposed to government involvement in business where no need or purpose is served, as in this case. He said the state and the APA are in the private sector, where they aren't wanted or needed. Cody said in APA's public relations program, they said they would save money. He saw no way they could save money over the way general contractors buy their own insurance. He commented on the document which was passed out to justify use of a wrap-up plan. He said they went back 25 years to find 25 projects. He referred to one project showing a 38% savings. He said these savings have no credibility, as the base used to show savings was subject to question. He did not feel the statistics were credible. He said wrap-ups don't save

money; he believed it would cost more.

Number 360 — Cody referred to APA's inference that money would stay in Alaska. He said they hired two of the largest brokers in the world, and that all the effort has been centered around the Seattle offices of those firms. Cody felt these firms could be considered non-Alaskan firms. Cody said the net of insurance does not save costs; it interferes with contractors' normal insurance buying processes; that contractual liability becomes confused because of the grey areas created by the net of insurance. He said the state is exposing itself beyond the protection of insurance, which is an additional cost.

Number 409 — Rep. Sutcliffe asked if the state has liability by providing the wrap-up. Cody said they assumed a risk greater than they were insuring. There was discussion. Rep. Rogers asked if the builders risk could be larger than the state is insured for. Cody said, if for any reason coverage is denied by the carrier, the state is liable. He said the state is acting as an insurance intermediary. Rep. Bylsma asked if that would be different if the general contractor had private insurance. Cody said yes, the contract specifies the contractor is liable.

Number 470 — Cody referred to exhibits attached to his prepared testimony.

Number 500 — Rep. Rogers tried to clarify the order of events. Cody said the tone of the message to the contractor regarding the change order (after the court battle) was: "Here is the contract. We'll sign it if you sign the change order."

Number 550 — Rep. Bylsma asked what law Washington had passed regarding wrap-up insurance. Cody said the committee has a copy of the law on file. The law prohibits an agency of state or local government in directing the purchase of surety bonds on a state or local project. He said the law was passed in 1967 or 1968.

Number 584 — Rep. Sutcliffe asked, if the state of Washington had built and owned projects as Alaska will, if there was a wrap-up

insurance program and if the state couldn't totally fund the project, would there be any implication that the insurance companies would pay out so much it would reflect back on the state? Cody could not think of a situation where overall financial feasibility of projects could be affected. He believed brokers and Risk Management people capable of handling risk and risk management. He questioned their right to involve state government in private business, and the right of the contractor to protect himself as he wishes to be protected.

Number 625 — Rep. Martin asked who paid for the public relations firm hired, and asked if there was any relationship between any of the board members of APA and the public relations firm hired. Cody assumed APA paid for the services. He said that, as of ten days ago, the firm was still working on the project.

Number 642 — Rep. Martin announced that the hearing would be continued on Friday, when a bill or resolution might be introduced.

Number 645 — Don Koch, Chief of Market Surveillance, Division of Insurance, and Ken Moore, Director of the Division of Insurance, came to testify before the committee. Moore said formal hearings were held in 1971 regarding the pipeline. Two years ago, when the pipeline was out and running, private enterprise approached them about having a wrap-up. As of August 26, the Division had published a worksheet of guidelines.

Tape 50, Number 003 — Koch said he contacted other states to find out their attitudes toward wrap-up programs. He got very little response, and said that some did not know what it was. He commenced work last summer because of a potential wrap-up on the pipeline and on other projects. Rep. Martin said he understood there was a wrap-up on the marine ferries. Koch said there had been only one that he was aware of: the Alyeska pipeline, a private project.

Number 030 — Rep. Martin asked Koch what advice he had given Risk Management and APA. Koch recalled discussions of self-insurance and wrap-up insurance. He said the discussion

was fairly general, and that he had given no advice.

Number 044 — Rep. Martin asked if Koch foresaw the state being solely responsible for paying workers compensation claims. Koch was not sure. He believed that should be considered.

Number 058 — Rep. Martin asked if the Division of Insurance had any overview responsibility, or if Risk Management was independent. Moore said Division of Insurance had no responsibility at all over Risk Management. Koch said they regulate provider coverage.

Number 071 — Rep. Martin asked if they had evaluated the program. Koch said they had not. He said if they were directed to look at it, all they would be required to say is whether or not it covers workers. He said they don't have the expertise to say if it is an appropriate program for those circumstances; that this is not one of the Division's roles.

Number 093 — Rep. Bylsma asked what effect elimination of wrap-up would have on workers compensation (he used Washington state as an example). Moore said it could have an effect. Koch said that whether compensation was a prime consideration when the legislation was created would be a factor.

Number 110 — Rep. Martin asked if the Division could evaluate the policy--percentage of risk and true value to the state. Koch said they did not have the expertise, and that they would have to contract that out if they were requested to provide such an evaluation.

Number 125 — Ken Vassar, attorney in the Department of Law, came before the committee. Rep. Rogers asked if he had reviewed the power sale agreement. Vassar had not. He responded to Rep. Rogers that he had not reviewed the interim financing agreement, either. Vassar said the APA has outside counsel, and he believed they had reviewed the documents in question. Rep. Rogers asked if Vassar had reviewed any of the insurance issues discussed. Vassar said he had. Rep. Rogers went over the occurrence of events:

07/27 APA met with Marsh & McLennan

08/06 Response of Marsh & McLennan with details
08/11 Bids come in
Aug/Sep APA chooses bidder
10/02 APA board meets & approves concept of APCOP
10/06 Change order issued
11/09 Press release regarding APCOP
11/23 and 12/02--sign memorandum of agreement

Vassar said this was not standard procedure. He was not familiar with the timeline. He said the decision to use the program was entered after the bid. He said this constitutes a change of circumstances. Vassar said the details came to the attention of the executive director after the bids were opened. There was discussion. Rep. Rogers asked if they were planning to review the sales agreement with Ketchikan and the interim financing agreement. Vassar said yes.

Number 190

Commissioner Ernst Mueller, vice chairman of the Board of Directors of Alaska Power Authority, said APA is a business in competition with private facilities. He feels it is his responsibility to investigate cost-cutting avenues. He said the only way to keep a cap on costs is to hire experts. Risk Management is one of their agencies used. He said decisions are rightfully in the hands of the Board. Mueller said that, at the meeting, there was sufficient justification to approve this approach. He said information to date has not changed his mind. He said the disadvantages of wrap-up insurance to general contractors are the same in the entire field of wrap-up programs, public and private. He said any decisions made about wrap-up programs should cover public and private contracts. Mueller said information to date indicates it is a good program.

Number 242

Rep. Rogers said, looking over the partial transcript of an APA board meeting, that Commissioner Webber had asked questions about board action and legislative approval, and that others had asked questions about liability, safety incentive, higher policy cost, and workers compensation; but that the Board had taken no action on these questions. Mueller said the Board could have delved more deeply into legal ramifications, and that there was no doubt

that this was an unusual procedure. He said it should have gone to bid differently, but the Attorney General did not seem to think it illegal. There was discussion.

Number 288

Rep. Rogers asked, regarding interim financing, if Mueller had ever seen the same situation (of the legislature being in a position to allow APA to default on interim financing, or approving funds to cover the financing). Mueller said he had not seen the same form. He said those building projects can't wait for a favorable bond market to do work. He said the Department of Revenue gives them money out of the general fund. He said one would have to speak to the APA Bond Council as to the processes involved. There was discussion of bonding. Rep. Rogers pointed out that there has been no legislative oversight of this project. Mueller agreed.

Number 358

Rep. Rogers asked if there were any inconsistencies in the Ketchikan power sales agreement in the ceiling versus statewide wholesale power cost rate. Mueller said they had asked Vassar to look at that to see if it conflicts with law.

Number 374

Rep. Bylsma said that, in the transcript of the 10/2 meeting, Slagle and Webber were talking about insurance when the Commissioner asked if the legislation was there. Slagle said he could not answer, "but we do it". Bylsma asked Mueller if he had questioned that. Mueller said they relied on the attorneys. There was discussion.

Number 400

Rep. Martin asked who was attending the 10/2 board meeting. Yould said he could provide a list of those attending.

Number 417

Rep. Martin noted, regarding a $9-million contract to a Japanese firm, that $570,000 was in advance. He asked if these monies had been authorized yet. Yould responded that they received bids to put in the submarine cable portion of Tyee. The Japanese firm was the lowest bidder. Insurance premiums have been provided for this portion of the program. Martin said this goes against the advertisement about keeping money in Alaska. He questioned

APA's procedure of insuring leased equipment but not insuring owned equipment, which would ensure that APA would get outside contractors because Alaskan contractors would own their equipment. Yould said this was to ensure that leased equipment would be insured. He said owned vehicled are already insured by the owner. Haywood said it was to insure items the owner has the greatest interest in. He said that owned equipment, vehicles, and aircraft are the contractor's responsibility. Martin said that was true, unless the contractor leases it. Haywood said to look at Tyee; they were concerned about someone grabbing a private plane or boat, crashing, and having no insurance. He said this could come back to the owner. Rep. Rogers said then it would make sense to rent or lease equipment, and that this would have an impact on future bids. He said there would be no reason to use one's own equipment, because the bid would be higher because of insurance on the equipment. Mueller disagreed, saying it would depend on the individual situation. Haywood said Tyee was not handled like a normal project. He said there was perhaps a valid concern regarding the conflict with competitive bid contracts. He referred to a companion program in place for contractors to use if they wished; the attorneys were not sure if insurance would affect low bids, so they elected to include subcontractors. He said they are not including aviation and watercraft coverage on future projects. There was discussion.

Number 597

Rep. Martin asked if the Japanese firm owned its equipment for cable laying. Haywood said it was leased on a time charter. Rep. Martin asked if the insurance covered them to and from the job. Haywood said it would cover marine exposure while bringing the cable to the jobsite.

Number 619

Rep. Bylsma questioned the length of the insurance contract. Haywood said there was no date because they were not sure when the exposure would end. Rep. Bylsma asked asked if they were insuring for the length of the program. Haywood said yes, that it was the same situation as when asking for a fixed price bid. He said change orders could increase or decrease the costs.

Number 654	Rep. Rogers said, regarding bids on various projects, that the difference between leased or owned equipment could make a difference in lowest bidder.
Number 678	Rep. Martin asked Mueller and Yould to clarify what legislation is needed to clarify this situation and make it legal. He said committee staff would prepare the opposite point of view. Yould said nothing precludes entering this type of program in Alaska. Vassar said the authority is broad enough under present law. Rep. Martin requested citation of specific authority. Vassar said nothing in the law expressly authorizes it; that it is general authority. There was discussion. Mueller said they asked many questions, wanting to clarify in their minds and ascertain if they had authority. There was more discussion.
Side B, Number 008	As Rep. Martin had announced that the hearing would be continued on Friday, April 2, and as there were no further witnesses wishing to testify, the meeting was adjourned at 3:35 p.m.

000 Call to order

HB 757

010 Randolph moved CSHB 757 L&C out of comm, ind'l rec passed w/o obj.

HB SB 535

025 Martin into bill; explained background

037 Gordon Evans, Ely Bredes & Rudd; represent Multivisions, Anc — requested bill be held until Thursday so Bob Gould of multivisions cd testify.

Said HB 553 & SB 535 began as identical bills in Anc area, abt 4,000 illegal antennas; Multivisions losing ~$40,000/month. Handed out, Visions position stmt of abt bill. After the person who sells illegal antennas. Cited ltr from a man in AZ to man in Anc offering to sell antenna as example.

Explained how antennas work. Explained that they aren't after, prosecuting the people using illegal antennas, but those selling antennas. Pointed out that DA wd make decision abt that, though. Noted that it cd be up to a Class B felony to buy ~~pirate~~ pirate antenna. Said purchaser is committing theft of svcs, a misdemeanor. Again requested bill be held until Thurs. for Gould's testimony.

155 Discussion of bills.

198 Bill Barry presented analysis — this is already a crime, just isn't set out explicitly. Suggested amdmts to clarify law & address concerns.

225 Martin said Judiciary requested bill. ~~Said it was hel~~
Discussion of how to address provisions in bill.

CSSB 535 am

242 Randolph moved bill, be reported out w/ ind'l recmdn.
No objections, mo passed.

~~265~~ Brought HB 698 & HB 795 before comm for taking testimony.
HB 698 & HB 795

270 Paul Arnoldt, Dir, Div Retirent & Benefits
Explained that each bill addresses. Gave background on how bills came abt, & bill history. Discussion of bills, other legislation dealing w/ same areas, & fiscal notes.
Arnoldt felt CS SB 813 was better bill than the rest.

365 Discussion of arrearages, & funding of retirement system. Approx 80% funded; 20% unfunded is amortized over 20 yrs.

395 Bylsma suggested holding bills over until HB 813 is in committee.

403 Bob Cooksey, NEA Alaska – encouraged taking body of SB ~~HB~~ 813 & incorporating it into a CS for one of the other bills. Explained SB ~~HB~~ 813 & left cy of bill. Encouraged moving bill.

445 Arnoldt offered comm sectional analysis of bills.

452 Bob Greene, Ak School Bds assoc – tends to agree w/ prior testimony that emphasis shd be on SB ~~HB~~ 813; explained his reasoning. School Bd's concern is primarily w/ fiscal impact. Prefer to see bill that includes employee contr & phase in of benefits over period of time.

495 Martin commented on fiscal notes. Greene made recommendn on manner of pymt. Wanted consideration for future yr funding. Suggested 2 plans

555 Tended to favor 3-way variable equal split of costs, based on actuarial need in order to keep demands on system down. Greene agreed. Cooksey felt there was a need to deal w/ cost, but felt it wd ~~need~~ be dealt w/ at bargaining table.

605 Martin said he'd speak w/ other members & staff, & wd combine bills; also, that he'd requested unan. referral of SB 813 to HESS, rather than to L&C.

Discussion.

Statutory Reference: AS 23.30

Action Taken: Amended; committee substitute adopted; HCS CSSB 648 (L&C) reported out of committee, with Finance referral requested.

ACTION NARRATIVE

Tape #56
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:13 p.m. Members present were: Representatives Martin, Rogers, and Randolph. Representatives Bylsma and Gardiner were absent. Rep. Zharoff attended the meeting. Rep. Martin brought CSSB 648 (L&C) before the committee.

Number 010

Pat Conheady, director of Pretrial Services, Department of Law, said the bill was aimed at correcting problems encountered in community work service. He referred to letters he had given to the committee. He explained the problem the bill addresses,

and how this bill will correct the situation by defining those performing community work service at the direction of the state as employees of the state for purposes of workers compensation.

Number 042

There was discussion. Rep. Martin asked about the fiscal note. Conheady said a fiscal note would be extremely speculative, as it would be difficult to project costs. There was discussion of what type of work is performed, and by whom. Rep. Randolph was concerned that, as 2,000 people had worked over 50,000 hours with no workers compensation claims; he was concerned that making workers compensation available would encourage claims. There was discussion. rep. Randolph asked exactly what could be claimed--whether it was just medical expenses, or if it would include wages and dependents coverage. Conheady referred the question to Judy Knight.

Number 177

Bev Koski of the Division of Risk Management explained the state's current workers compensation position. There was discussion of who uses voluntary work.

Number 235

Judy Knight, Department of Labor, said she had worked with the Department of Law on drafting of the bill. She said the main purpose of the bill is to provide offenders and pretrial individuals with more places to do community work service. She said the purpose of the bill is to limit the liability an employer would accrue in order to encourage more employers to take part in community work service programs. Knight said they had modeled this bill after a bill introduced to cover high school students in work study programs. She saw the bill reducing the state's liability, as it would limit the liability to workers compensation. There was discussion of liability.

Number 311

Conheady explained how post-conviction work service works. Rep. Rogers was concerned about attempts by people to get a workers compensation claim for the income. There was discussion of this aspect of potential abuses. Rep. Randolph asked if other approaches had been considered. There was discussion. Rep. Rogers said he would be more comfortable with workers compensation

covering medical expenses, and the tort system for wages. There was discussion of alternatives.

Number 450 — Jeff Barry, committee aide, said that these people are not employees, so there is a question of their right to sue. He referred to a statute which sets out liability. Conheady disagreed with Barry's analysis, and went over case law regarding third parties.

Number 525 — Rep. Rogers moved that sections 1 and 2 be replaced with sections limiting compensation to medical expenses only, with language to be drafted by the legislative lawyers. There was discussion. The motion passed without objection.

Number 645 — Rep. Rogers moved, lines 6 and 7, to delete the language, "of certain persons providing community work service.", so that the title of the bill would read, "An Act relating to workers' compensation coverage.", and to add to the end of the bill the body of CSHB 159 (Fin). There was objection, and discussion. On the question: for--Rogers, Martin; opposed--Randolph. Motion carried.

Number 698 — Rep. Rogers moved to report HCS CSSB 648 (L&C) out of committee. Motion passed without objection.

Number 700 — Rep. Rogers moved to request an additional committee referral (to Finance committee). Motion passed without objection.

Side B, Number 000 — Rep. Rogers moved to report CSSB 552 (Fin) out of committee. There being no objection, the motion carried.

Number 010 — As there was no further business to come before the committee, the meeting was adjourned.

House Action: First reading 3/1/81. Labor & Commerce Committee referral added 3/5/82.

Statutory Reference: AS 02.30.040; AS 02.35.120

Action Taken: Bill reported out with individual recommendations.

ACTION NARRATIVE

Tape #57
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:14 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Representatives Rogers and Gardiner were absent. Rep. Martin announced Rep. Randolph's upcoming birthday.

Number 017

Rep. Martin brought CSSB 548 before the committee for consideration.

Number 022

Don Koch, Division of Insurance, supported the bill. He gave background and explained what the bill does. He said: 1) it changes the makeup of the board of governors of MICA; 2) dates in the law are now obsolete, so these were removed, and provided that coverage for prior periods should be available under certain conditions for a fee; 3) language would permit writing general liability coverages at the discretion of the director; and, 4) the bill deals with the director's ability to lower, remove, or reinstate assessments.

Number 084	William Brock, member of the board of governors and legislative committee member of MICA, explained assessability. He said there is also a provision allowing them to insure institutions (not doctors or hospitals) which provide care under the direction of medical doctors if the direction of the Division of Insurance thinks it appropriate. He cited examples (eg, Alaska Treatment Center in Anchorage).
Number 145	Rep. Bylsma moved to report CSSB 548 (Fin) out of committee. There being no objection, the motion passed.
Number 150	Rep. Martin then brought SB 611 before the committee. He gave background on the bill. There was discussion.
Number 188	Jeff Barry, committee aide, reported progress on the Alaska Power Authority investigation. He went over a list of legislative subpoenas needed, and the reasons for the subpoenas. There was discussion of the need for subpoenas.
Number 223	Rep. Randolph moved that subpoenas be prepared. There was discussion. There being no objection, the motion passed.
Number 231	Rep. Bylsma moved that SB 611 be reported out of committee, with individual recommendations. There being no objection, the motion passed.
Number 241	As there was no further business to come before the committee, the meeting was adjourned.

Absent: Bylsma Gardiner

SB 611 — An Act revising the criminal penalties for unlawful operation of an aircraft.

WITNESS REGISTER

Don Koch, Chief
Market Surveillance Section
Division of Insurance
Pouch D
Juneau, Alaska 99811
465-2577
Position Statement: Supported CSSB 548; gave background and explained bill.

William G. Brock
Medical Indemnity Corporation of Alaska (MICA)
1700 Angus Way
Juneau, Alaska 99801
586-3656
Position Statement: Explained need for bill.

PREVIOUS ACTION

SB 548 — Senate Action: First reading 5/5/81. Reported from Labor & Commerce 1/27/82. Reported from Finance 3/17/82. Reported from Rules 3/18/82; taken up immediately. Recommitted to Rules by unanimous consent 3/18/82. Reported back out from Rules 3/22/82; taken up immediately. Finance committee substitute adopted in second reading by unanimous consent 3/22/82. Advanced to third reading and passed third reading 3/22/82.

House Action: First reading 3/22/82; referred to Labor & Commerce.

Statutory Reference: AS 21.88; Sections 1 and 2(b), ch. 177, SLA 1978.

Action Taken. CSSB 548 (Fin) reported out of committee.

SB 611

Senate Action: First reading 1/11/82. Reported from Labor & Commerce 2/9/82. Reported from Judiciary 2/25/82. Reported from Rules 3/1/82; taken up immediately. Passed second reading 3/2/81; advanced to third reading and passed 3/1/82.

House Action: First reading 3/1/81. Labor & Commerce Committee referral added 3/5/82.

Statutory Reference: AS 02.30.040; AS 02.35.120

Action Taken: Bill reported out with individual recommendations.

ACTION NARRATIVE

Tape #57
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:14 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Representatives Rogers and Gardiner were absent. Rep. Martin announced Rep. Randolph's upcoming birthday.

Number 017

Rep. Martin brought CSSB 548 before the committee for consideration.

Number 022

Don Koch. Division of Insurance, supported the bill. He gave background and explained what the bill does. He said: 1) it changes the makeup of the board of governors of MICA; 2) dates in the law are now obsolete, so these were removed, and provided that coverage for prior periods should be available under certain conditions for a fee; 3) language would permit writing general liability coverages at the discretion of the director; and, 4) the bill deals with the director's ability to lower, remove, or reinstate assessments.

Number 084 — William Brock, member of the board of governors and legislative committee member of MICA, explained assessability. He said there is also a provision allowing them to insure institutions (not doctors or hospitals) which provide care under the direction of medical doctors if the direction of the Division of Insurance thinks it appropriate. He cited examples (eg, Alaska Treatment Center in Anchorage).

Number 145 — Rep. Bylsma moved to report CSSB 548 (Fin) out of committee. There being no objection, the motion passed.

Number 150 — Rep. Martin then brought SB 611 before the committee. He gave background on the bill. There was discussion.

Number 188 — Jeff Barry, committee aide, reported progress on the Alaska Power Authority investigation. He went over a list of legislative subpoenas needed, and the reasons for the subpoenas. There was discussion of the need for subpoenas.

Number 223 — Rep. Randolph moved that subpoenas be prepared. There was discussion. There being no objection, the motion passed.

Number 231 — Rep. Bylsma moved that SB 611 be reported out of committee, with individual recommendations. There being no objection, the motion passed.

Number 241 — As there was no further business to come before the committee, the meeting was adjourned.

Absent: Rogers Gardiner

Statutory Reference: AS 06.30 Action Taken: Amended; further action postponed to 4/19/82.

ACTION NARRATIVE

Tape #58 Recording Number 000	The meeting was called to order by Chairman Martin at 2:05 p.m. Members present were: Representatives Bylsma, Martin, Randolph, and Rogers. Rep. Gardiner was absent.
Number 010	Rep. Randolph moved to report SCR 46 out of committee with unanimous do-pass recommendation. There being no objection, the motion passed.
Number 016	Rep. Martin introduced CS SB 752 (L&C) am.
Number 021	Eddie Turner, president of Peninsula Savings & Loan of Soldotna, said the bill pertains only to savings and loans. He said his is

asked about the rest of the sections. Grey said the rest refer to commercial banks, but Section 4 refers only to savings and loans. There was discussion of what the proposed committee substitute does, and the committee went over the changes. Rep. Bylsma asked what eliminating sections does to the bill; Grey explained.

Number 363 — Rep. Rogers questioned Grey's opposition to the new Section 4. Grey explained it would allow direct purchase of a bank, which is not part of interstate banking. He suggested a change.

Number 402 — Rep. Martin asked Lusk to have his division evaluate the proposed committee substitute over the weekend.

Number 409 — Jim Hackett, chairman of the legislative affairs committee, Alaska Bankers Association, explained how the bill would work and compared it to current statutes. He elaborated on related federal laws. Rep. Rogers asked if this would allow savings and loans to become holding companies to purchase banks. Hackett explained. He felt the provision was unnecessary. There was discussion.

Number 505 — There was discussion of various provision in the bill.

Number 527 — Rep. Martin said action would be postponed until the committee meeting on 4/29/82. Jeff Barry, committee aide, commented on how the bill could be changed. Rep. Martin said he felt uncomfortable about piggybacking bills. The issue was postponed until 1:00 Monday.

Number 556 — Rep. Martin brought the committee up to date on proceedings in the Alaska Power Authority investigation. This was discussed. Barry explained what is being done on the Terror Lake project. There was discussion of the fiscal note submitted by Haywood, Division of Risk Management.

Number 728 — Rep. Rogers moved a letter be sent to Speaker Hayes regarding confirmation of the governor's appointments, saying that no member had expressed opposition to the appointments, but that members reserved the

right to vote otherwise. He suggested looking at similar letters sent by Senate committees. There was discussion. Rep. Rogers asked unanimous consent. There being no objection, the motion passed.

Side B, Number 011 There being no further business to come before the committee, the meeting was adjourned at 2:50 p.m.

Absent:

SB 752 H. Labor & Commerce Tape # 58
~~SB~~ SCR 46

2: 05

000 Call to order.

010 Rand moved to report SCR 46 out w/ unan do pass. No obj, passed.

016 Int'd CS SB 752 (L&C) am

021 Eddie Turner, pres Peninsula Savings & Loan. Pertains only to savings & loans - his outfit is the only one in the state. Explained what bill does.

054 Bylsma asked if he was only ~~savs~~ S & L. He said only state chartered S & L. Randolph gotned ~~provision~~ ~~etc~~ wording of line 9, p. 2, "his" sponse.
~~Randolph moved~~ Discussion of how to word this.

078 Rand moved to chng to "his or her". Passed w/o obj.

085 Tom Lusk, chief bank examiner, Dev of Banking & Securities - bill is cleanup legislation to let state chartered S & Ls to act in parity w/ fed'l counterparts

102 Dave Grey, Rainier Bank Corp - asked committee to hold bill over until Monday for further testimony. Said if C & C wanted to move favorably on interstate gotn, sections pertaining to loans would have to be deleted.

145 ~~140~~ Rogers ~~Sp~~ recalled similar bills from prev yrs - felt chng in bill title wd allow both interstate banking & savings issues to be combined. Discussion.

184 Bylsma had gotns on what wd need to be deleted. Grey passed out cys of ~~out~~ his prop'd CS ~~Change~~ & explained ~~his pp~~ what he referred to as the savings interstate banking bill in Senate L & C. Said he wanted a full blown hearing with public participation.

242 Randolph said issue has been substantially discussed in the legislature. Favored a hrg early next week.

252 Rogers urged CS include sections 4-7 of original bill. He wd oppose interstate banking if it wiped out any portion of orig bill. Grey said Berries recommended changes as law might be challenged otherwise.

277 Eddie Turner said re interstate banking bill, that sec 4 had been added & ~~opposed~~ that it said they cd purchase a bank. He opposed that portion. Did not object to Senate banking bill. ~~Boylsma~~ asked abt rest of the sections. Grey said the rest refer to commercial banks, but sec 4 refers only to S&Ls. Discussion of what the prop'd CS does. Went over ~~bills~~ changes. Boylsma asked what eliminating sections does to bill; Grey explained.

363 Rogers questioned Grey's opinion to new section 4. ~~Mr~~ Grey explained it wd allow direct purchase of a bank, which is not part of interstate banking. Suggested a change.

402 Martin asked Lusk to have his dwn evaluate prop'd CS over weekend.

409 Jim Hackett, chmn, leg affairs comm, Bankers Assoc(?)— ~~interstate banking relates to ability of state~~ explained how bill wd work, & compared it to current statutes. Elaborated on related federal laws. Rogers asked if this wd allow S&Ls to become holding cos to purchase banks. Hackett explained. ~~Bill~~ proviso was unnecessary. Discussion.

488 Lusk commented on recent purchase of ~~the~~ S+L by bank holding co.
Discussion.

505 Grey said portion Murray objected to came fm a S+L institution.
Discussion.

527 Martin said action cd be postponed until hrg on Monday.

532 Barry commented on how bill cd be changed.

541 Martin said he feel too uncomfortable abt piggybacking bills.
Postponed issue until 1:00 Mon.

556 Martin brought comm. up to date on proceedings in APA investigation. This was discussed.

632
~~636~~ Barry explained what is being done on Terror Lake project.

670 —— Discussion of fiscal note submitted by Haywood.

708 Rogers moved sending ltr to speaker, ~~Bastis~~ appts, saying no member had expressed oppsn, but reserved right to vote otherwise. Suggested looking at similar wording used by Senate. Discussion. Asked unan consent; no objection, so passed.

The meeting was called to order by Chairman Martin at 1:13 p.m. Members present were: Representatives Martin, Bylsma, and Gardiner. Rep. Martin introduced SB 816 and referred to HB 704.

Number 010

Rep. Gardiner moved that CSHB 704 (L&C) be substituted for the body of SB 816. There being no objection, the motion passed.

Number 015

Rep. Martin explained a problem noted by the Real Estate Commission.

Number 023

Mel Crogsen, a local real estate broker, explained the need for the amendment, which was to cover the cost of hearings.

Number 033

Rep. Gardiner moved that the proposed amendment be adopted to the committee substitute just adopted. This was discussed. There being no objection, the motion passed.

Number 040

Rep. Gardiner moved that HCS SB 816 (L&C) be reported out of committee. There being no objection, the motion passed.

Number 045	Rep. Martin brought SB 874 before the committee.
Number 048	Harry Treager, director of the Division of Occupational Licensing, supported the continuance of the Board of Electrical Examiners. The bill and possible amendments were discussed.
Number 064	Rep. Gardiner moved that SB 874 be reported out of committee. There being no objection, the motion passed.
Number 068	Committee aide Jeff Barry announced an invitation by the Finance Committee to participate in their Saturday hearing. There was discussion of the progress on HCS SB 831 (L&C) and the APA investigation.
Number 083	There being no further business to come before the committee, the meeting was adjourned at 1:20 p.m.

Action Taken: Committee substitute adopted; amended; and reported out of committee.

ACTION NARRATIVE

Tape #60
Recording
Number 000

The meeting was called to order by Chairman Martin at 12:14 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Representatives Rogers and Gardiner were absent. Rep. Martin brought SB 752 and the proposed committee substitute before the committee, and explained what had happened to date on the legislation.

Number 008

Senator Rodey commented on the interstate banking aspect of the committee substitute. He said the benefits of interstate banking to Alaska would be: greater capital available; greater competition among financial institutions; a greater variety of services would be offered; and that competition and the use of electronic services would slow the rise in service

costs. He said the on the whole, there was strong public interest in seeing interstate banking in Alaska. Sen. Rodey said the only criticism being made is that some deposits will leave Alaska. He said this would not happen, and explained why. He said that interstate banking would provide a greater source and a greater variety of sources of capital, which would be good for the consumer.

Number 054 — Rep. Bylsma asked Sen. Rodey's opinion of the committee substitute. Sen. Rodey said the language in the bill should be very carefully and skillfully drafted. He said the committee substitute uses the best language in this area. He offered the assistance of his staff in checking the language of the committee substitute to be sure it is correct.

Number 066 — Rep. Martin said some people were saying that some national banks might have an advantage over others in being aware of the legislation. He asked if there was possibility of providing a grace period. Sen. Rodey said that anyone interested in acquiring an Alaskan bank could do so, and that it would be wrong to regulate the market. This was discussed.

Number 105 — Rep. Martin asked how the public would perceive the legislation. Sen. Rodey said there should be no problem; that bringing national companies to Alaska was good for us and should be encouraged.

Number 130 — Tom Lusk, Chief Bank Examiner for the Division of Banking & Securities, gave an overview of the committee substitute. He said they did not oppose the bill. There was discussion. Lusk said the Attorney General had recommended the bill title, and that the change was made at the AG's suggestion. There was discussion.

Number 154 — Bob Lowe, chairman of Peoples Bank, said that Sen. Rodey had covered the points he wished to make. He felt that, with interstate banking, the infusion of capital would enable his bank to branch in areas which would allow them to be competitive. He said growth is currently limited to what they can generate through internal earnings.

Lowe said the ability of small banks to grow is limited by capital. He felt that the interstate banking system would bring in this capital. He said it would lessen the cost of services and interest rates. He said it also brings sophistication and expertise not currently being provided. Lowe said he had heard the argument raised that these banks would drain off deposits. He said this was not the case: he said the banks are looking for a market for loans, and that they would bring in capital, which would benefit the consumer. Lowe said that competition would strengthen the banking system. Lowe said that another argument is that local control of banking institutions would be lost. Lowe said there is currently no ready market for bank stocks, and that interstate banking would provide this. He said, regarding local control, that he believes small banks will be operated as subsidiaries. Lowe explained how it would impact his bank.

Number 261

Jim Hackett, chairman of the Legislative Affairs Committee of the Alaska Bankers Association, said the Association fully supports the idea of interstate banking. He said it already exists in some cases, and gave examples. Hackett said the issue relates to ownership of existing franchises by out of state holding companies. He said the Association supports the change, as it will open competition; will allow the continued existence of the identity of franchises within the state; allows for the infusion of additional capital and additional deposits; provides greater customer services; and that the interests and knowledge of Alaska would substantially increase. Hackett said the Association supports interstate banking, and supports a wide open approach to banking in Alaska, with few constraints. He said the potential change in statute has been widely publicized throughout the country, and that few banks would be unaware of the opportunity to purchase Alaska banks.

Number 331

Rep. Randolph asked what the negatives would be, from a consumer point of view. Hackett found it difficult to see any negatives. He said that competition for consumer services would increase, which would be positive.

Number 355 — Eddie Turner, Peninsula Savings & Loan, said that the proposed committee substitute addressed all his concerns except one, which was that, in Section 3, the reference to "his" spouse should be changed to "his or her". Regarding what the bill would do for consumers, Turner said that competition would benefit the consumer, and illustrated this view. Turner said he strongly supported the concept of the bill.

Number 393 — Rep. Martin questioned why language in Section 2 had been changed from "shall" to "may". Turner said the changes were needed to make stockholder records more confidential.

Number 413 — Gene Erskine, president of Unicorp, which is the holding company that owns United Bank Alaska, said the owners of Unicorp and management support the concept of interstate banking. He elaborated on why they supported this.

Number 447 — Arnold Espe, chairman of Alaska Pacific Bank Corporation, said they support interstate banking because they are convinced that it will happen at the federal level. He explained. Espe said he feared that Alaska would be declared contiguous to Washington state if the federal government made the changes in law.

Number 468 — Rep. Martin said he had heard that the state of Maine had turned down similar legislation, and asked if anyone knew why. Senator Rodey said it was passed by the Senate, but failed in the House, and that the legislation would not be of as much benefit to Maine as it would to Alaska. Sen. Rodey agreed with Espe that interestate banking was coming. There was discussion. Rep. Randolph said if the federal government does it, it might not be in our interest. He felt we should get into the system ahead of the feds, as there would be more benefits to derive than if we waited.

Number 513 — Rep. Randolph requested more explanation of the overall philosophy of the committee substitute. Sen. Rodey said, regarding the savings and loan bill portions of the bill, that it would put Alaska chartered savings and loans in parity with federal law, so

that all such institutions would be treated equally. Sen. Rodey said the second part of the bill provides language to meet the requirements of the Douglas amendment, allowing bank holding companies to come into the state and acquire banks. Rep. Randolph asked if previous testimony had been on the committee substitute. It was agreed that it had been. Jeff Barry, committee aide, said the Section 10 was an oversight in drafting; amendments were discussed.

Number 593 — Rep. Randolph moved to accept HCS CS SB 752 (L&C). There being no objection, the motion passed.

Number 602 — Rep. Randolph moved, on page to, to add "or her" to the phrase, "his spouse". There being no objection, the motion passed.

Number 614 — Rep. Bylsma moved that a new Section 10 be inserted, being the same as the old Section 7; and that the existing Section 10 be renumbered. There being no objection, the motion passed.

Number 630 — Rep. Randolph moved that HCS CSSB 752 (L&C) be reported out of committee, as amended. There being no objection, the motion passed.

Number 638 — As there was no further business to come before the committee, the meeting was adjourned at 12:56 p.m.

Absent: Rogers Gardiner

Tape # 60

4/19/82

12:14

Sen. Rodey attended.

000 Call to order; int'd SB 752 & prop'd CS. Gave background.

008 Sen Rodey commented on interstate banking aspect of CS.

- greater capital avail
- " competn among fin'l instns
- " variety of services offered

} benefits of interstate banking

- competn & use of electronic svcs will slow rise in svc costs

On whole, strong pub interest in seeing interstate banking in Ak.

Only criticism is some deposits will leave Ak — this will not happen. Explained.

Int. bnkg will provide greater source & variety of sources of capital. — good for consumer.

051 Bycsma asked opn of CS. Rodey said lang in bill shd be drafted very carefully & skillfully. Said CS uses best lang in this area. Requested comm work w/ his staff to be sure lang is correct.

066 Martin said some people said some nat'l banks might have advantage over others. Asked if there was possibility of providing grace period. Rodey said anyone interested in acquiring Akn bank cd do so; wd be wrong to regulate market. Discussion.

1 05 Martin asked if this wd cause harm; asked how public wd perceive legisn. Rodey said there shd be no problem. Said bringing nat'l companies to AK was good for us & shd be encouraged.

1 30 Tom Lusk, chief bank examiner overview of dlw banking & securities — ~~said~~ CS — did not oppose bill. Discussion. Said AG said this is how bill wd have to be titled; said chng was made at his suggestion. Discussion.

1 54 Bob Low ~~n~~ cama Peoples Bank — Sen Rodey covered pts well. Explained posn of his bank. ~~Indicated~~ Feel that w/ cnt. leg. — infusion of capital wd enable his bank to branch in areas in order to be competitive. Growth is currently limited to what they can generate th/ internal earnings. Ability of small banks to grow is limited by capital; int'l bkg system brings in this capital. Will lessen cost of svcs & % rates; also brings sophistication & expertise not currently being provided. Heard argument raised that these banks will drain off deposit; not the case — they're looking for market for loans, bringing in capital. Will benefit consumer. Competition will strengthen banking system. Another argument is we'll lose control of local banking instns — ~~seems~~ currently no ready market for bank stocks — int'l bkg will provide this. Re local control, blw small banks will be operated as subsidiaries. Explained how it wd impact his bank.

261 Jim Hackett, Ak Bankers assoc — Bkrs assoc fully supports idea of interst bkg. Said it already exists in some cases. Issue relates to ownership of existing franchises by out of state holding cos. Assoc supports chng:

- will open competn
- allows continued existence of identity of franchises w/in state
- allows for infusion of add'l capital & add'l deposits.
- greater customer services
- • interests & knowledge of ak wd substantially increase.

Assoc supports interstate bkg, support wide open approach to bkg in ak w/few constraints. Pot'l chng has been widely publicized th/out country.

331 Randolph - fm consumer pt of view, what are negatives. Hackett found it difficult to see negatives. ~~Outside banks tod have~~ Competn for consumer svcs wd increase, which is positive. Transition period may be negative, but not very.

355 Eddie Turner — Penin S&L — Martin said there was tentative prob last mtg; asked if it had been resolved. Turner said prop'd CS solved all but one item: Sec 3 — his "or her". Re what it wd do for consumer — competn will benefit consumer. Gave example. Strongly supports concept of bill.

393 Martin asked abt chngs in sec 2 ("shall to "may") — Turner elaborated on why chngs were needed. - to make stock-holder records more confidential.

413 Gene Erskine - pres, Unicorp, holding co that owns United Bank Alaska — ~~speaking~~ owners of Unicorp support concept of intst bkg. Elaborated. Mgmt supports concept because they can make alliances to bring in expertise, ~~sources~~, & good bankers. Need oppor to make alliances to bring in new thinking & new technology.

447 Arnold Esbee, chm, Ak Pac Bank Corp — support intst bkg because they're convinced it will happen at fedl level. Explained. Fear that Ak will be declared contiguous to Wash state.

468 Martin asked - heard state of Maine turned down similar legion, asked if anyone knew why. Sen Rodey said it failed in H., was passed by S. - didn't have as much benefit to Maine as it does to Ak. Rodey agreed w/ Esby that intst bkg was coming. Discussion. Randolph said if feds do it, it might not be in our interest. We shd get into system ahead of feds — more benefits to derive than if we wait.

513 Rand ~~moved~~ asked for more explan of CS; ~~Barry gave overview~~ overall philosophy of CS. Martin noted changes in underlining (typo errors) — Sen Rodey said, re S&L bill - puts them on parity w/ fed's law. Second pt of bill also provides lang to meet reqmts of Douglas amdmt allowing bank holding cos to come into state & acquire banks. Rand asked if prev testimony had been on CS; it was agreed that it had been. Barry said sec 10 was oversight in drafting.

593 Rand moved to accept HCS CSSB 752 (L&C); no obj., passed.

600 ~~Martin~~ R moved, p. 2, to add "or her" sponsor.
No obj, passed.

614 B moved, wording see 10 ~~be~~ be deleted
AS. 06.30.555 (6)(4) is repealed &
renumber following sections accordingly.
No obj, passed.

630 R moved bill out; no obj, passed.

638 10:56 Adjourned.

HCS for CS FOR SENATE BILL NO. 752 (L&C)
IN THE LEGISLATURE OF THE STATE OF ALASKA
TWELFTH LEGISLATURE - SECOND SESSION
A BILL RELATING TO

For an Act entitled: "An Act relating to financial institutions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.30.115 is amended to read:

Sec. 06.30.115. ACCESS TO BOOKS AND RECORDS OF ASSOCIATION. (a) Every member or stockholder may inspect the books and records of an association which pertain to his loan, [OR] savings account, or voting rights.

(b) Except as provided in (a) [AND (c)] of this section, the right of inspection and examination of the books and records is limited to (1) the commissioner or his authorized representatives as provided in this chapter, (2) persons authorized to act for the association, and (3) any federal instrumentality or agency authorized to inspect or examine the books and records of an insured association.

[(c) IN STOCK ASSOCIATIONS EVERY STOCKHOLDER MAY INSPECT THE GENERAL BOOKS AND RECORDS OF THE ASSOCIATION EXCEPT A STOCKHOLDER MAY NOT HAVE ACCESS TO THE LOAN AND SAVINGS RECORDS OF OTHER MEMBERS.]

* Sec. 2. AS 06.30.120 is amended to read:

Sec. 06.30.120. BOOKS AND RECORDS [PERTAINING TO MEMBERS' ACCOUNTS] TO BE KEPT CONFIDENTIAL. Except as provided in AS 06.30.115, the [THE] books and records pertaining to the accounts, [AND] loans, and voting rights of members, stockholders, savers, and borrowers shall be kept confidential by the association, its directors, officers and employees, and by the commissioner, his examiners and representatives, except where disclosure is compelled by a court of competent jurisdiction. Except as provided in AS 06.30.115, no [NO] person, including a member or stockholder may

[SHALL] have access to the books and records or [SHALL] be furnished [OR SHALL POSSESS] a partial or complete list of the members or stockholders except upon express action and authority of the board of directors.

* Sec. 3. AS 06.30.145(b) is amended to read:

(b) In a stock association each director shall own individually or jointly with his or her spouse [IN HIS OWN RIGHT] free of any encumbrance capital stock of the association in an amount equal to at least $1,000 in par value.

* Sec. 4. AS 06.30.500(3) is amended to read:

(3) Except for participation loans authorized under AS 06.30.530, no [NO] investment may be made in a conventional loan secured by a mortgage on a one-to-four family residence unless the mortgaged property is located inside the state.

* Sec. 5. AS 06.30.520 is amended to read:

Sec. 06.30.520. PROPERTY IMPROVEMENT AND CONSUMER LOANS. An association may make property improvement loans to property owners for maintenance, repair, modernization, improvement, and equipment of their properties. In addition, an association may make consumer loans. A property improvement or consumer loan may be made with or without security and may be secured by liens on real estate and mobile homes. An association may not make property improvement loans exceeding 25 percent of its assets or consumer loans exceeding 40 percent of its assets.

* Section 6. AS 06.05.235(a) is amended to read:

(a) Except as provided in (b) or (e) of this section it [IT] is unlawful for a company to own, control or hold with power to vote 25 percent or more of a class of voting securities or other [THE] capital stock of one or more state banks or domestic [STATE] bank holding companies subject to regulation under this chapter. [NOTHING IN THIS SUBSECTION PROHIBITS A COMPANY FROM QUALIFYING AS A BANK HOLDING COMPANY UNDER (b) OF THIS SECTION.] However, when it becomes a bona fide necessity to avoid loss for a creditor to accept shares of stock in one or more state banks or domestic bank

holding companies constituting more than 25 percent of the ownership or control of a state bank or domestic bank holding company in payment of indebtedness owing to the creditor, shares of stock may be accepted, but the shares of the one or more state banks or domestic bank holding companies exceeding that 25 percent shall be promptly disposed of under the supervision of the department.

* Sec. 7. AS 06.05.235(b) is amended to read:

(b) A domestic bank holding company, as defined in AS 06.05.540 and organized under AS 10.05, which maintains its principal office and place of business in the state and conducts its principal operations in the state, may acquire and own all or any portion of the voting securities [SHARES] or other capital stock of, or all or substantially all of the assets of, one or more banks or bank holding companies unless the bank is a recently formed bank. The department may require a domestic bank holding company to post a bond with the department in an amount equal to the paid-in capital and paid-in surplus represented by the proportion of state bank stock directly or indirectly owned, held, or controlled by it, under conditions the department may prescribe, to assure full protection of the public. The domestic bank holding company is subject to an examination by the department or a competent person designated by the department when the department considers it necessary, but not less than once each year. The domestic bank holding company shall pay an examination fee in accordance with AS 06.01.010.

* Sec. 8. AS 06.05.235(c) is amended to read:

(c) The department may adopt regulations for [BANK HOLDING] companies qualifying as domestic bank holding companies or out-of-state bank holding companies under (b) or (e) of this section to assure financially sound banking organization and practice.

* Sec. 9. AS 06.05.235 is amended by adding new subsections to read:

(e) An out-of-state bank holding company as defined in (h) of this section may acquire and own all or any portion of the

voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank. To assure full protection of the public the department may require an out-of-state bank holding company that directly or indirectly owns, holds, or controls stock in a state bank or domestic bank holding company to post a bond with the department, under conditions the department may prescribe. The amount of the bond shall be equal to the product obtained by multiplying the amount of paid-in capital and paid-in surplus of the state bank or domestic bank holding company by the percentage of state bank or domestic bank holding company stock directly or indirectly owned, held, or controlled by the out-of-state bank holding company.

(f) When the department considers it necessary, an out-of-state bank holding company directly or indirectly owning, holding, or controlling state bank stock or domestic bank holding company stock is subject to an examination by the department or a competent person designated by the department. The out-of-state bank holding company shall pay an examination fee in accordance with AS 06.01.010.

(g) As used in this section a "recently formed bank" is a state bank or national bank conducting a banking business in the state that commenced that banking business in the state on or after July 1, 1982, and that has not been in existence and continuously operating in the state for a period of three years or more. However, the term "recently formed bank" does not include

(1) a bank organized solely for the purpose of facilitating acquisition of a bank that either has been in existence and continuously operating in the state as a bank for a three-year period, or was conducting a banking business in the state on or before June 30, 1982;

(2) a state bank that the department determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to

continue to conduct its business independently in a fashion consistent with the public interest and the interest of depositors, creditors, and shareholders; or

(3) a national bank that the Board of Governors of the Federal Reserve System, or their designee, determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to conduct its business independently in a fashion consistent with the public interest of depositors, creditors, and shareholders.

(h) As used in this section "out-of-state bank holding company" means a company that

(1) is a bank holding company as defined in the U.S.C. 1841, et seq.);

(2) is registered as a bank holding company with the Board of Governors of the Federal Reserve System, with the Federal Reserve Bank of the Federal Reserve District in which the operations of the bank holding company are principally conducted, or with a Federal Reserve Bank that the Board of Governors may designate;

(3) maintains its principal office and place of business outside the state; and

(4) principally conducts its banking operations through out-of-state banking subsidiaries, as measured by total deposits held or controlled by it on the date on which it becomes an out-of-state bank holding company;

(i) For the purpose of this section, a trust company organized under the laws of this state which is conducting a banking business shall be deemed to be a state bank.

* Sec. ~~10~~ 11. This Act takes effect July 1, 1982.

Sec. 10 — take ~~&~~ section 7 of original bill (CSSB 752 (L+C) am) & insert here as new Section 10.

Sen. Pat Rooley.

ACTION NARRATIVE

Tape #61
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:11 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Representatives Gardiner and Rogers were absent. Rep. Martin brought CSSB 749 (L&C) before the committee.

Number 004

Senator Pat Rodey explained the change in equity prohibition. He said there has been a prohibition on equity participation that goes back to about 1970. This bill would change that and would allow equity

participation above a million dollars and for a five year take out, so there are restrictions. He said most other states have been moving in this direction as a matter of economics. Few projects, particularly large commercial projects, can support an effective 17% interest rate, and there is no long term takeout for building. AIDA is the only entity prov[illegible]g take out for the construction of new properties in Anchorage, with the exception of ARCO and Hunt Brothers. Senator Rodey said this would allow the lender to take an equity position in the project. He explained that what is really happening is the lender will defer interest. If the project will support a 13% interest rate, and the net effective rate has to be 17%, the other 5% will be put into an equity position in that project and it will come out someplace during the project or when the project is sold. It allows, in a very uncertain market, for the lender to be secured, because if he is not, he will not lend the money. Senator Rodey felt there really is no alternative, interest rates being what they are today. He said in addition, people are starting to get around the existing statute by signing agreements with Seattle, and finding creative solutions. It was his opinion as a lawyer that you can probably get around the statute, as it is drafted now, anyway, but there is some uncertainty. It was Senator Rodey's intent that the small borrower will not be subject to levering by a lender; and that the larger, sophisticated lenders will be able to seek a national market.

Number 040

Rep. Martin asked if eventually the law should be repealed. Sen. Rodey did not believe the prohibitions should be eliminated completely, in order to avoid undue pressure by lenders on the small borrowers. He felt the law needs to be changed to keep current with economic conditions, but that this revision in the law is appropriate now.

Number 056

Ken Moore, director of the Division of Insurance, supported the bill. He said that among the items listed in the bill are lenders, and among the lenders are insurance companies. He favored the bill so they can leverage the loan. Moore said it is being

done in other states and, as Senator Rodey said, they are just by-passing us and doing it in those states that already give this leveraging permit. Regarding deleting the law entirely, Moore felt that would probably result in massive reconstruction of statutes. This saves that.

Number 065 — Rep. Randolph moved to report CSSB 749 (L&C) out of committee. There being no objection, the motion passed.

Number 075 — Rep. Martin brought CSSB 841 (L&C) before the committee.

Number 082 — Mike Thomas, American Council of Life Insurance, said the council supports the bill. He explained the changes effected by the committee substitute, why the bill is needed, and how the bill would work. He said the law would result in cost savings on new policies.

Number 152 — Rep. Randolph questioned how this would affect existing policies. Thomas said there would be no affect.

Number 165 — Rep. Martin asked about a possible conflict between page 2, lines 9-12, and page 4, the effective date. He requested clarification. Thomas explained. There was discussion among the committee, Moore, and Thomas about how the bill would work.

Number 233 — Don Koch, Chief of the Market Surveillance Section of the Division of Insurance, said the division supported the bill.

Number 235 — Rep. Randolph moved the bill be reported out of committee with individual recommendations. There being no objection, the motion passed.

Number 251 — As there was no further business to come before the committee, the meeting was adjourned at 1:30 p.m.

CSSSSB 630 (SA) am — An Act relating to the legislative oversight procedures relating to state agencies, boards, and commissions under AS 08.03 and AS 44.66; and providing for an effective date.

WITNESS REGISTER

Margo Waring
staff to Senator Sturgulewski
Pouch V
Juneau, Alaska 99811
465-3818
Position Statement: Explained bill.

PREVIOUS ACTION

CSSSSB 630 (SA) am — Senate Action: First reading 1/18/82. Reported from State Affairs 2/25/82. Finance Committee referral added by unanimous consent 3/18/82. Reported form Labor & Commerce 3/18/82. Moved from Finance to Rules 3/29/82 by unanimous consent. Reported from Rules 3/31/82; taken up immediately. Advanced to second reading 3/31/82. Postponed until 4/5/82 by unanimous consent. State Affairs committee substitute adopted by unanimous consent 4/5/82. Amended 4/5/82 and postponed until 4/6/82 by unanimous consent. Amendment 2 withdrawn 4/6/82; bill advanced to third reading by unanimous consent. Passed third reading 4/6/82 with effective date vote same as passage.

House Action: First reading 4/7/82. Reported from State Affairs 4/21/82.

Statutory Reference: AS 44.66.010

Action Taken: Bill was amended and reported out. NOTE: Several of the amendments made during this hearing were later withdrawn, as explained at the end of Action Narrative of these minutes.

ACTION NARRATIVE

Tape #62
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:04 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, and Rogers. Rep. Randolph was absent. Before the committee was CSSSSB 630 (State Affairs) amended.

Number 005

Rep. Rogers moved, page 2, lines 14-16, to delete underlined language. Rep. Bylsma objected. Rep. Rogers explained his motion.

Number 015

Margo Waring, staff to Senator Sturgulewski, explained why the language was included. She said Sen. Sturgulewski supports the language as it accomplishes their purpose. Waring said they want to avoid a free conference committee on the bill. There was discussion of timeframes for the bill.

Number 049

Rep. Rogers asked about continuing the ABC Board (refering to page 1, line 17). There was discussion.

Number 058

Rep. Rogers motion regarding page 2, lines 14-16, was discussed. Waring suggested deleting all of (c). Rep. Rogers explained his intent in moving to delete only the underlined language. On the question: there being no objection, the motion passed.

Number 073

Rep. Rogers moved, page 1, line 19, to delete 1983 and insert 1982. Waring said there had been no sunset audit yet. Rep. Rogers said there had been a sunset audit, and that the decision had been made to sunset the Board in 1983. He felt this was a mistake and that the board should be sunsetted sooner. There was discussion of the motion and the need to sunset the Alaska Transportation Commission.

Number 114 — On the question, there being no objection, the motion passed.

Number 119 — Rep. Gardiner asked if an audit had been done on the ABC Board. Waring said an audit had been done in 1980 and the board had been extended to 1983 with recommendations to make changes. There was discussion.

Number 142 — Rep. Martin, referring to page 1, line 20 (State Parole Board), said Sen. Parr had sent over a bill to extend the Board to 1986. Rep. Martin moved to extend the Board to 1986. Rep. Rogers asked him to change his motion to extend the Board to 1984. Rep. Martin changed his motion. There being no objection, the motion passed.

Number 161 — Rep. Gardiner brought up (page 1, line 27) extending the date on the Alaska Code Revision Commission. There was discussion.

Number 180 — Rep. Gardiner moved, page 1, line 29, to extend the Commission to 1986. Rep. Martin asked him to change the motion to extend the Commission to 1984. Rep. Gardiner changed his motion. There being no objection, the motion passed.

Number 195 — Rep. Rogers moved to incorporate the changes into a Labor & Commerce committee substitute. There being no objection, the motion passed.

Number 198 — Rep. Rogers moved to report the bill out of committee. There being no objection, the motion passed.

Number 203 — The committee had a general discussion concerning bills still in committee. No action was taken.

Number 253 — There being no further business to come before the committee, the meeting was adjourned at 1:22 p.m.

NOTE: Although several changes were made to this bill during this meeting of the House Labor & Commerce Committee, it was recommended by Legislative Affairs legal counsel that changes made to the sunset dates on the various boards and commissions be deleted from the committee substitute as they may not be legal. Therefore, the only

change reflected in the actual committee substitute is the deletion of the underlined language on page 2, lines 14-16.

To: Speaker Joe Hayes

From: Terry Martin, Chairman
Labor & Commerce Committee

Date: February 25, 1982

Subject: Executive Order 52

This committee has reviewed Executive Order 52. We find this order to be of benefit to the administration.

Please note that a correction was made to page 2, line 15, where a statute was incorrectly cited: the first statutory reference on that line should read "AS 18.60.010..."

Contact me if you have any questions.

Re: Executive Order No. 52
(Division of Labor
Standards and Safety)

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mr. Speaker:

This letter is to inform you of two typographical errors in Executive Order No. 52 -- both on the same line.

On page 2, line 15, the first statutory citation reads "AS 18.06.010 -- 18.60.150." The correct citation should be AS 18.60.010 -- 18.60.105" (without the underlining, of course).

I believe that this error can be corrected by the co-revisors of statutes, but I would appreciate your entering this letter in the legislative journals to make the record clear.

Sincerely,

Jay S. Hammond
Governor

PETITION FOR EQUITABLE DISTRIBUTION OF STATE SURPLUS REVENUES

WHEREAS, huge surpluses in the State Treasury endanger the Liberties of all Alaskan Citizens by encouraging the unchecked growth of Socialist Government; and

WHEREAS, the Legislature and the Executive have endeavored to maintain high rates of taxation which create huge surpluses and discourage mineral development, thus insuring high rates of unemployment; and

WHEREAS, it is in the best interest of the People to disburse State surplus wealth equitably among the Citizens of Alaska, rather than to leave it in the hands of the State;

NOW THEREFORE, WE THE PEOPLE undersigned, and each of us, PETITION the Alaska Legislature and the Governor to approve and pass SSHB23 to establish an interest free personal loan program for all Alaskan Citizens.

PETITION FOR EQUITABLE DISTRIBUTION OF STATE SURPLUS REVENUES

WHEREAS, huge surpluses in the State Treasury endanger the Liberties of all Alaskan Citizens by encouraging the unchecked growth of Socialist Government; and

WHEREAS, the Legislature and the Executive have endeavored to maintain high rates of taxation which create huge surpluses and discourage mineral development, thus insuring high rates of unemployment; and

WHEREAS, it is in the best interest of the People to disburse State surplus wealth equitably among the Citizens of Alaska, rather than to leave it in the hands of the State;

NOW THEREFORE, WE THE PEOPLE undersigned, and each of us, PETITION the Alaska Legislature and the Governor to approve and pass SSHB23 to establish an interest free personal loan program for all Alaskan Citizens.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
1) The FY '82 General Fund request will allow the Fund to meet its outstanding obligations. Because of a shortfall in revenues the Fund has accumulated approximately $600.0 in unpaid obligations. Failure to pay these obligations as they become due is in violation of AS 23.30.205, which requires the Fund to reimburse the employer/carrier in full for compensation paid to injured workers under certain prescribed conditions. Since enactment of the Second Injury Fund statutes in 1959, total operating costs of the program have been paid from revenues contributed by employers/carriers. During recent hearings held by the Workers' Compensation Study Commission, employers and their carriers voiced strong concern as to why administrative costs of the program are being paid from the Second Injury Fund rather than out of the State General Fund. Present Second Injury Fund statutes provide for payments to be made to the Fund and disbursements to be made from the Fund under certain prescribed conditions. There is no provision however, that addresses the payment of administrative costs.

IV. DATE April 27, 1981 PREPARED BY Nico Bus, Finance Officer
AGENCY Labor
PHONE 465-2720

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/80)

CONTINUED ON PAGE 2

This fiscal note reflects the impact on the General Fund and the Second Injury Fund when administrative cost will be paid out of General Funds for FY 1982 through FY 1986.

Assumes an inflation factor of 8%.

Assumes an effective date of July 1, 1981.

2) Assumes an annual increase of 20% as a result of the raise in the maximum from $5,000 to $10,000 for vocational retraining and rehabilitation benefits.

In the department's estimation, the proposed bill will provide adequate revenue for the Second Injury Fund to meet its statutory obligations to the Alaskan worker, employer and insurance carrier and preclude the use of State General Funds in future years.

The 5.6 contractual consists of 2.7 space rental, 1.7 indirect (Administrative Services) and 1.2 for computer terminal leasing. The .5 commodities is for office supplies. The .7 equipment is a desk and chair.

This position will handle part of the increased workload in the filing and coding units due to the increased reporting requirements of employers' insurance carriers. The information from the additional reports will be entered via computer terminal into our new information handling system. This data will give the Division accurate statistics on all costs of every claim as well as precise computations as to the carrier's change in any claimant payment.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LABOR

OFFICE OF THE COMMISSIONER

P. O. BOX 1149
JUNEAU, ALASKA 99811
Ph: 465-2700

April 28, 1981

Ken Spray, Administrative Assistant
House Labor and Commerce Committee
Pouch V
Juneau, AK 99811

Dear Mr. Spray.

Enclosed is our proposed committee substitute for House Bill 94.

Sections 1, 2, 3, 4, 5, 6, 7, and 8 of the proposed committee substitute for House Bill 94 correspond to sections 8, 15, 46, 66, 67, 68, 69 and 70, respectively, of House Bill No. 159.

A section by section analysis of the proposed committee substitute is also enclosed, along with the corresponding fiscal notes.

Jacquelyn McClintock, Director of the Workers' Compensation Division, will attend the April 30 hearing to testify on our proposal.

If you have any questions, please call.

Sincerely,

Judy Knight

Judy Knight
Legislative Liaison

07-G9LH

PROPOSED COMMITTEE SUBSTITUTE FOR HB 94

Section by Section Analysis

Section 1. This section adds an additional panel to the Alaska Workers' Compensation Board which may sit in any judicial district in the event regular panel members are unable to attend scheduled hearings. Members of the board, except the Chairman or his designees, are citizens appointed pursuant to AS 23.30.005 and at times have scheduling conflicts with their own occupational duties. The amendment will insure that disputed claims are heard expeditiously by full board panel and will provide the resour to conduct additional board hearings when the workload requires.

Section 2. The repeal and reenactment of AS 23.30.040 is necessary if the second injury fund is to continue to meet its statutory obligations to rehabilitate the injured and disabled worker and to reimburse employers/carriers on subsequent injury claims.

This section expands the base for contributions to the second injury fund and incorporates a contribution schedule which will insure the solvency of the fund. It changes the base for payments to the fund from permanent partial disability to permanent total, permanent partial, temporary total and temporary partial disabilities. Under Section 7, an initial contribution rate of 6 percent is established, which will build reserves before a sliding rate scale takes effect in 1983. It also allows a more realistic maintenance allowance of $200 a month and total maximum expenditures for retraining to $10,000 in order to adequately cover the inflationary rise in expenses encountered for rehabilitation or retraining. The section also transfers the administrative expenses of the state from the resources of the second injury fund to the general fund.

Section 3. The amendments in AS 23.30.155 are administrative "housekeeping" changes to enable the Division and Board to streamline the prompt processing of claims and provide current and accurate claim status information and injury statistical data to the public and private sectors. This section 1) clarifies a controverted claim and the requirements under which a notice of controversion must be filed; 2) requires notice be filed with the board whenever payment of compensation has begun, terminated or changed and provides penalties for failure to file such notice; and 3) requires periodic reporting of all payments made on claims which will be used to provide the public and private sectors with current and accurate injury statistical data.

Section 4. This section is amended to include a definition for the term "reserve rate" as used in Section 2.

Section 5. This section repeals provision AS 23.30.155(g) due to proposed legislation.

Section 6. This section clarifies that the amount of payment to the second injury fund and the conditions under which payment is required, is in accordance with the version of AS 23.30.040(b) that was in effect on the date of injury to the employee.

Section 7. This section establishes an initial contribution rate of 6 percent beginning July 1, 1981 and ending December 31, 1982, which will build reserves before a sliding rate scale takes effect in 1983.

Section 8. This section provides for an effective date for the bill of July 1, 1981.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1) The FY '81 General Fund request will allow the Fund to meet its outstanding obligations for the fiscal year. Because of a shortfall in revenues the Fund has accumulated approximately $600.0 in unpaid obligations. Failure to pay these obligations as they become due is in violation of AS 23.30.205, which requires the Fund to reimburse the employer/carrier in full for compensation paid to injured workers under certain prescribed conditions.

2) Since enactment of the Second Injury Fund statutes in 1959, total operating costs of the program have been paid from revenues contributed by employers/carriers. During recent hearings held by the Workers' Compensation Study Commission, employers and their carriers voiced strong concern as to why administrative costs of the program are being paid from the Second Injury Fund rather than out of the State General Fund. Present Second Injury Fund statutes provide for payments to be made to the Fund and disbursements to be made from the Fund under certain prescribed conditions. There is no provision however, that addresses the payment of administrative costs.

Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/80)

CONTINUED ON PAGE 2

This fiscal note reflects the impact on the General Fund and the Second Injury Fund when administrative cost will be paid out of General Funds for FY 1982 through FY 1986.

Assumes an inflation factor of 8%.

3) Assumes an annual increase of 20% as a result of the raise in the maximum from $5,000 to $10,000 for vocational retraining and rehabilitation benefits.

In the department's estimation, the proposed bill will provide adequate revenue for the Second Injury Fund to meet its statutory obligations to the Alaskan worker, employer and insurance carrier and preclude the use of State General Funds in future years.

CHAIRMAN

H 60 (Rev. 12/78)

February 2, 1981

Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill on boiler and pressure vessel safety standards (AS 18.60). The bill would adapt the Alaska Statutes to the Boiler and Pressure Vessel Code of the American Society of Mechanical Engineers and make some alterations in the procedure of qualification for boiler and pressure vessel safety inspectors. A section-by-section description is attached for your convenience.

Sincerely,

S/SSH

Jay S. Hammond
Governor

Attachment

HB115

SECTION-BY-SECTION DESCRIPTION

Section 1 exempts from inspection requirements pressure vessels of five cubic feet or less in places of public assembly and those having an inside diameter of six inches or less. Unfired pressure vessels and hot water supply boilers or domestic water heaters will also be exempted from the inspection requirements where their BTU capacities and water temperature do not exceed the limits specified by the Boiler and Pressure Vessel Code.

Sections 2 and 3 require that both deputy inspectors, who are employed by the Department of Labor, and special inspectors, who are employed by owner-users or insurance companies and certified by the state, pass a national examination. The bill also specifies that companies authorized by the Department of Commerce and Economic Development to insure against certain types of losses may employ special inspectors.

Section 4 requires inspectors to use reporting forms adopted by the Department of Labor rather than by the American Society of Mechanical Engineers for certification inspection. It also specifies the kind of dangerous condition which a special inspector must report to the department.

Section 5 specifies that the examination for both special and deputy inspectors will be the standard National Board of Boiler and Pressure Vessels Inspectors examination.

Section 6 spells out grounds for revocation or suspension of a state commission for either a special or deputy inspector. "Untrustworthiness" is removed as a ground for suspension or revocation. "Incompetence" remains. Conviction of specified crimes -- bribery and perjury -- in connection with official duties is inserted as a ground for revocation or suspension, and falsification is expanded and clarified to permit the penalty only for intentional falsification of any material matter in connection with an inspection report or an administrative or judicial proceeding. Substituting "intentional" for "wilful" in AS 18.60.200(a)(3) is intended to conform this terminology to that in the new criminal code.

Section 7 specifies the types of internal and external examination required for specific types of boilers, depending upon construction. The period of time within which certificates of inspection are required is also clarified.

Section 8 requires that each inspection be made by a deputy or special inspector.

Section 9 changes the recipient of fees from the deputy inspector to the Department of Labor. The section also repeals time limits on the validity of the inspection certificates; those limits are unnecessary because of the amendments to AS 18.60.320.

Section 10 requires any company authorized by the Department of Commerce and Economic Development to insure boilers or unfired pressure vessels to notify the Department of Labor each time it discontinues the insurance for a boiler or pressure vessel in Alaska. Reinspection is then required only if the insurance was terminated because of a condition dangerous to life or property.

Section 11 requires the owner or user of the boiler or unfired pressure vessel inspected by a deputy inspector to pay the inspection fee to the department rather than to the deputy inspector.

Sections 12 and 13 change the definitions of boilers covered by second and third class boiler operators' licenses to clarify the maximum capacity for the steam boiler and the maximum heat output for the high temperature or high pressure water boiler.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

36.90.001 (a) Direct Cost is loss of interest on 20% of contract amount for 73 days. 20% of $300 million = $60 million. Assume State earns 12% on its money. Then, $60 million (0.12) $(\frac{73}{365})$ = $1.44 million.

Indirect Cost is increased cost of bonding (assume 0.5% of contract) $300 million (.005) -- $1.50 million.

(b) Interest on retainage is calculated at $135,000.

Estimated total annual cost of this bill is $3,075,000.

Re: CS SS HB 146(L&C)
Relating to Payment Procedures
on Certain Public Contracts

Honorable John Fuller, Chairman
House Rules Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Fuller:

We have reviewed the referenced version of House Bill 146(L&C) and believe that this proposed legislation is both unnecessary, as it applies to this Department, and not in the best interest of the State, in general. Should it be determined, however, that it should be pursued, the following comments and recommendations are hereby offered for your consideration.

It is recommended that subsection 36.90.001(a) be deleted. The payment, to the contractor, of 20% of the contract amount prior to beginning work is not only fiscally unsound but also would increase the risk of contractors not performing the work in a timely manner.

This Department already operates under policies which minimize the requirements of interim financing by Contractors without increasing the risk to the bondsmen or increasing the premium. In most contracts, a mobilization pay item allows the contractor to recover move-in and set-up costs very early in the job. Contractor payments are made monthly or semi-monthly at the Contractor's request. Retainage is held to a bare minimum on lump sum contracts and is not held at all on most highways, airports and harbors contracts. Provisions are made which pay for stockpiled materials on the job site prior to incorporation into the project and on buildings contracts bonding, insurance and bidding expenses are paid immediately after the notice to proceed is issued. These policies were developed through cooperative efforts with the contracting industry in an effort to minimize financial problems while still maintaining a competitive bidding atmosphere.

Regarding subsection (b), the language "Initiate Payment" is unclear. The initiation of the payment process may be interpreted to mean anything from the approval of a Contractors invoice or the signing of a monthly pay estimate to the actual mailing of the warrant to the Contractor, a process which could entail from three to ten days (or more), depending on the remoteness of the project site or its distance from the finance office.

It is suggested that the term "Intitate payment" be replaced with "Issue Payment", in which case the period of time allowed should be changed to 30 days in order to allow for the time necessary to transmit pay estimates or bills from a remote project site and to allow for the review and approval of complex pay estimates such as those involving multi-million dollar contracts with a multitude of pay items which must all be verified and approved prior to issuing a warrant.

It should also be pointed out that where subsection (b) uses the language ".. the contractor submits... a bill for materials or services...", this terminology is not applicable to most all of the construction contracts administered by DOT/PF. Firstly, payment for public works contracts is not made directly for materials or services but for items of work for which unit prices are bid. Secondly, in most cases the contractor does not submit a bill. Instead, a pay estimate is prepared by the State and approved by the Contractor.

It is also unclear whether the Contractor under (b) would be paid on the regular basis as set up in the contract (monthly or semi-monthly), or whether he/she could submit weekly or even daily bills.

Subsection (b) is silent concerning the consequences of the Contractor's failure to submit the sworn statement regarding prevailing wages.

The following language is suggested for subsection (b) in order to clarify the above points:

(b) The State shall issue payment to the Contractor, for the amount due under the public construction or public works contract, within 30 days following the end of the pay period for which payment is being made. The Contractor shall submit a sworn statement, to the State at the end of the pay period, certifying that all employees employed on the project during the pay period by the Contractor and all subcontractors have been paid not less that the established prevailing rate of pay as determined and published by the Department of Labor. Failure, by the Contractor, to submit the above sworn statement shall be cause for the State to delay payment, without interest or penalty, until such a sworn statement is submitted.

In reference to subsection (c), it must be stated that this Department strongly opposes the principle of a penalty, other than interest on late payments. This Department has, we believe, an excellent record for making timely payments to Contractors and it is not anticipated that such a penalty provision would ever

be used, were it inacted. Our general contract provisions, in every construction contract, contain an administrative claims clause which provides the vehicle to remedy inequities or disputes whenever they may occur. Such an avenue has always been available to our Contractors and is believed to be much more equitable than an automatic penalty for an event, regardless of its causation or circumstance.

It is recommended that the interest payment provision in (c) be retained, but that the 10 percent penalty provision be deleted.

Regarding subsection (d), interest on retainage, the following language is suggested for the second sentence in order to clarify the beginning of accrual of interest:

> Interest on retainage accrues from the thirtieth day following the end of the pay period from which the retainage is withheld until the date of payment to the Contractor.

Under definitions, Section 36.95.010, the term Contractor must apply only to the prime Contractor as the contract is only between the prime Contractor and the State. The term "unskilled" in (2) should not be used to describe a mechanic or a surveyor but could apply to a laborer. In (3), "Public Construction" or "Public Works", the terms "onsite" and "real property" would not apply to State ferries constructed under contract with this Department. It is suggested that "on-site" be deleted and the term "real Property" be changed to "public Property". (Reference Blacks Law Dictionary for these terms.) The definition of "retainage", (6), would be improved by re-wording as follows:

> (6) "Retainage" means money, or other contingency which the Contractor has earned as evidenced by approval of the applicable pay estimate, which is withheld from the Contractor until the completion of the contract.

The above comments are made in the interest of making the proposed legislation a more meaningful and concise document, as it would apply to the Department of Transportation and Public Facilities, which will hopefully accomplish its intended purpose without unduly increasing the cost or adversely affecting the quality of construction projects built with public funds.

Sincerely,

R.D. Shumway, P.E.
Deputy Commissioner

Enclosure: Copy of CS SS HB 146(L&C)

AMENDMENT TO CSSSHB 146(L&C)

* Sec. 2. AS 36.95.010 is amended by adding a new section to read:

(8) "retainage" means money withheld from a contractor until completion of a contract or other contingency which the contractor has earned as evidenced by approval of the applicable pay estimate.

Position Statement: Opposed HB 595.

PREVIOUS ACTION

HB 146	Referred to committee 3/11/81; no previous action. No action taken by committee this date.
HB 595	Referred to committee 5/26/81; no previous action. No action taken by committee this date.

ACTION NARRATIVE

Tape #003 Recording Number 1190	The meeting was called to order by Chairman Martin at 1:10 p.m. All members were present. The committee schedule called for the consideration of HB 595 and HB 146. Testifying before the committee regarding both bills was Representative Fred Brown, prime sponsor.
Number 1201	Rep. Brown, sponsor of HB 595 and HB 146, gave background on both bills. Chairman Martin limited further testimony and committee consideration to HB 595.
Number 1259	Nick Coti, Division of Occupational Licensing, Department of Commerce and Economic Development, spoke from prepared testimony in favor of continuing the Board of Welding Examiners.
Number 1371	Donald Lockman, of the Testing Institute of Alaska and the State Board of Welding Examiners, testified in favor of HB 595. Rep. Rogers questioned Lockman about his testimony.
Number 1634	Ken Lomax, of ARCO Oil and Gas Company, testified in favor of the bill, and presented written statements and letters to

the committee.

Number 1710 — Louie Rousseau, of Welding Application-Methods, a technical services business in Anchorage, testified against the bill.

Number 0136, Side B — Erwin Long, of Arctic Foundations, Inc., a manufacturer of pressure vessels and geo-tech equipment, also testified against the bill. He said he does contract work for the Corps of Engineers, and finds the State Board of Welding examinations and certifications to be in conflict with federal requirements that certification must be done according to the American Society of Mechanical Engineers (ASME) code.

Number 0312 — Donald Lockman gave rebuttal testimony in favor of the State Board of Welding Examiners.

Number 0348 — No action was taken on HB 595, and the Chairman adjourned the meeting at 3:00 p.m. Hearing on HB 595 will be continued in February.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to payment procedures on certain public contracts."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 36 is amended by adding a new chapter to read:

CHAPTER 90. MISCELLANEOUS PROVISIONS.

Sec. 36.90.001. PUBLIC CONSTRUCTION CONTRACT PAYMENTS. (a) At the request of a contractor the state shall pay the contractor 20 percent of the amount of the contract on or before the date the state gives the contractor notice to proceed with the public construction or public work covered by the contract.

(b) The state shall initiate payment to the contractor for the amount due under the public construction or public work contract within 15 days after the contractor submits a bill with a certified payroll to the state for materials or services.

(c) If the state fails to make a payment due under this section, it shall pay interest to the contractor under AS 45.45.010(a) on the amount due. If a failure to make a payment due under this section continues for 60 days or more, the state shall pay the contractor a penalty of 10 percent of the amount due plus interest.

(d) In this section, title, "state" means a department, office, agency, or other organizational unit of the executive branch, except one expressly excluded by law, but does not include an agency in the judicial or legislative branches of the state government.

delete $

(e) The state or political subdivision of the state is liable to a contractor registered under AS 08.18

for interest at the rate provided in AS 45.45.010(a) on retainage on a contract for public works or public construction. Interest on retainage accrues from the date of approval of a pay estimate until the date of payment to the contractor or application toward the obligation of the contractor under the contract. A contract provision purporting to waive the interest provisions of this subsection is void as contrary to public policy.

* Sec. 2. AS 36.95.010 is amended to read:

Sec. 36.95.010. DEFINITIONS. In <u>this title</u> [AS 36.05 - 36.25] unless the context requires otherwise

(1) "contractor" means the contractor including subcontractors performing work necessary to facilitate public construction;

(2) "laborer, mechanic, or field surveyor" means a person who engages in work which is basically physical or unskilled in nature; or who engages in work, requiring the use of tools or machines, which basically consists of the shaping and working of materials into some type of structure, machine or other object; or who engages in outdoor tasks related to the operation of finding and delineating contour, dimensions, position, topography, as of any part of the earth's surface, by preparation of measured plan or description of any area or other portion of country or of road or line through any area or other portion of country;

(3) "public construction" or "public works" means the onsite field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other inprovements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161;

(4) "qualified" means one who, except for apprentices, is a

journeyman mechanic in his particular trade;

(5) "resident" means a person who maintains his domicile in the state: domicile is the true and permanent home of a person from which he has no present intention of removing and to which he intends to return whenever he is away;

(6) "retainage" means money withheld from a contractor until completion of a contract or other contingency which the contractor has earned as evidenced by approval of the applicable pay estimate;

(7) "state or a political subdivision of the state" means any state department, state agency, state university, borough, city, village, school district or other state subdivision;

(8) "wages" includes fringe benefits.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to payment procedures on certain public contracts."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 36 is amended by adding a new chapter to read:

Dept of Natural Resource

CHAPTER 90. MISCELLANEOUS PROVISIONS.

Sec. 36.90.001. CONTRACT PAYMENTS. (a) At the request of a contractor the state shall pay the contractor 20 percent of the amount of the contract on or before the date the state gives the contractor notice to proceed with the work covered by the contract.

(b) The state shall initiate payment to the contractor for the amount due under the contract within 15 days after the contractor submits a bill to the state for materials or services.

(c) If the state fails to make a payment due under this section, it shall pay interest to the contractor under AS 45.45.010(a) on the amount due. If a failure to make a payment due under this section continues for 60 days or more, the state shall pay the contractor a penalty of 10 percent of the amount due plus interest.

* Sec. 2. AS 36.95.010 is amended to read:

Sec. 36.95.010. DEFINITIONS. In <u>this title</u> [AS 36.05 - 36.25] unless the context requires otherwise

(1) "contractor" means the contractor including subcontractors performing work necessary to facilitate pu lic construction;

(2) "laborer, mechanic, or field surveyor" means a person who engages in work which is basically physical or unskilled in nature;

or who engages in work, requiring the use of tools or machines, which basically consists of the shaping and working of materials into some type of structure, machine or other object; or who engages in outdoor tasks related to the operation of finding and delineating contour, dimensions, position, topography, as of any part of the earth's surface, by preparation of measured plan or description of any area or other portion of country or of road or line through any area or other portion of country; are these new definitions?

(3) "public construction" or "public works" means the onsite field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other inprovements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161;

Dear Mr. ~~Spray~~ Ken:

My apologies for the confusion that has resulted from the hearings and conversations concerning a proposed committee substitute for House Bill 146, "An Act relating to payment procedures on certain public contracts." The confusion seems to relate to "certified" payroll as opposed to "certification." The following amendment is proposed to address the concerns expressed by members of the Department to provide security for the payment of wages to employees on public works projects.

Preferred Amendment: Delete subsection (b), lines 16-19, page 1. Insert the following.

(b) The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services with a certification issued by the Department of Labor that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor.

Alternative Amendment: Delete section (b), lines 16-19, page 1. Insert the following.

(b) The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services and a sworn certification that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor.

Mr. Vernon L. Hurlbert
Chairman
House Labor & Commerce Committee
Pouch V
Juneau, Alaska

March 11, 1981

Transmitted by Anchorage
Legislative Affairs Office

Dear Chairman Hurlbert,

In a recent meeting with the Executive Director of the Alaska Real Estate Commission (AREC) I was advised that there are presently 13 outstanding claims against the Real Estate Surety Fund. These claims range in amounts from $1,250 to $10,000 dollars. The total amount is over $75,000 dollars. I was also advised in this meeting that the AREC could not hold any hearings to determine if these claims are valid until SB-212 (Chapter 169 SLA 1980) which was passed during the last session is amended.

I have been advised that Mr. Lance Youngquist, Chairman of the Real Estate Commission will be meeting with you today to discuss the legislative changes that are need so that the commission can proceed with the hearings on these claims.

It was my understanding that one of the primary objectives of SB-212 was to streamline the Surety Fund Hearing process so that it could serve both the consumer and the industry in a more equitable and possitive fashion. I have been advised that conflicts between SB-212 and the Administrative Procedures Act have created the problem. In any case we have not achieved the goal of SB-212.

As a Public Member of the Real Estate Commission I urge you to support the necessary action to correct this situation.

Sincerely,

Frank Austin, Public Member
Alaska Real Estate Commission

Member, Board of Directors
Coalition for Economic Justice

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(3) * Section 1. AS 18.80.220(a)(4) is amended to read: Sec 66 P 44

We do not have built in insurance 2nd injury Fd. ok.

(4) an employer, labor organization or employment agency to discharge, expel or otherwise discriminate against a person because he has Consider Fed tie ins. peril. Offer of Fed Contract Compliance To Fed. Laws. [Keeps handicapped + prev-injured]

(A) opposed any practices forbidden under AS 18.80.200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30; Sec 13 P 13

(1) * Sec. 2. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation

under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

Sec 17 P17

(1) * Sec. 3. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

Sec 26 P22

(1) * Sec. 4. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

Sec 30 P 23

(1) * Sec. 5. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER-DISABLEMENT.

IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a health care provider [LICENSED PHYSICIAN] inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another health care provider [PHYSICIAN]. Upon procuring the services of a health care provider [PHYSICIAN], the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

(3) * Sec. 6. AS 23.30.095(b) is amended to read:

(b) If the employee is unable to designate a health care provider [PHYSICIAN] and the emergency nature of the injury requires immediate medical care, or if he does not desire to designate a health care provider [PHYSICIAN] and so advises the employer, the employer shall designate the health care provider [PHYSICIAN]. Designation under this subsection, however, does not prevent the employee from subsequently designating a health care provider [PHYSICIAN] for continuance of required medical care.

Sec 31 P24,25

(1) * Sec. 7. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following the first treatment (3) and following the time set by the board for (3) notice of subsequent treatments, the health care provider [PHYSICIAN] giving the treatment or the employee receiving it furnishes to the

employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

Sec 32 P24

(1) * Sec. 8. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a health care provider [PHYSICIAN OR SURGEON] authorized to practice [MEDICINE] under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a health care provider [PHYSICIAN OR SURGEON] who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the

state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

Sec 36 P26

(1) * Sec. 9. AS 23.30.105(a) is amended to read:

(a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of compensation has been made without an award on account of the injury or death, a claim may be filed within two years after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

Sec 40 P30

(1) * Sec. 10. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim

or make an award in respect to it. (3) If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

Sec 45 P33

(1)* Sec. 11. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

Sec 46 P33

(1)* Sec. 12. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) If the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

Sec 51 P36

(1)* Sec. 13. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

Sec 52 P 36,37

(1) * Sec. 14. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those wages earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

(1) Sec 53 P 37

* Sec. 15. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

Sec 55 P 38,39,40

(1) * Sec. 16. AS 23.30.190(a)(20) is amended to read:

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same

employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

Sec 56 P40

(1) * Sec. 17. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation, may receive compensation necessary for his rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

Sec 58 P41

(1) * Sec. 18. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding

(3) ~~$2,500~~ [$1,000];

(3) * Sec. 19. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing 456 [52] into the total wages earned, including self-employment, in the highest paid three consecutive years out of [ANY ONE OF] the five [THREE] calendar years immediately preceding the injury;

Sec 63 P43

(1) * Sec. 20. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who wilfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of theft as defined in AS 11.46.100(3) and is punishable as provided in

AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

Sec 68 P45

(I) * Sec. 21. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

Sec 70 P45

(I) * Sec. 22. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

Sec 71 P45,46

(I) * Sec. 23. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "health care provider" means a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned

or operated hospital; a corporate entity covered under AS 21.88.050-(b)(12); an employee of a health care provider acting within the course and scope of his employment; and persons comparably licensed in other jurisdictions to provide health care;

(3) (31) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours off a site provided by the employer that are not under the supervision or control of the employer.

(1) * Sec. 24. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), and 23.30.225(b) are repealed.

(1) * Sec. 25. This Act takes effect July 1, 1982.

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The purpose of sec. 3 of this Act is to provide both protection for injured employees and flexibility for employers in making the alternative of self-insurance available to those employers required under AS 23.30 to provide workers' compensation insurance coverage for their employees.

(2) * Sec. 2. AS 21.39.030(a)(4) is amended to read:

(4) risks may be grouped by classifications for the establishment of rates and minimum premiums <u>and shall be segregated and developed separately for workers' compensation insurance on construction projects that are extraordinary in scope or nature</u>; classification rates may be modified to produce rates for individual risks in accordance with rating plans which establish standards for measuring variations in hazards or expense provisions, or both; the standards may measure any differences among risks that can be demonstrated to have a probable effect upon losses or expenses;

(2) * Sec. 3. AS 21 is amended by adding a new chapter to read:

CHAPTER 62. WORKERS' COMPENSATION SELF-INSURANCE.

Sec. 21.62.010. SELF-INSURANCE. An employer or two or more employers having a common management or two or more employers having a common interest may elect to pay directly the compensation required in AS 23.30 after providing satisfactory proof of financial ability to

make direct payments and receiving a self-insurance certificate from the director.

(2) Sec. 21.62.020. SELF-INSURANCE FUND. (a) A workers' compensation self-insurance group formed by two or more employers having a common interest shall establish and keep a self-insurance fund with a minimum balance to be determined by the director, but not less than $250,000. The director may adopt regulations to maintain the solvency of the fund.

(b) The fund shall be administered by a board of trustees selected by members of the common interest self-insurance group.

(c) A majority of the trustees of the fund must be members of the self-insurance group.

(d) A trustee of a fund may not be an owner, officer, or employee of the service company used by the common interest self-insurance group which established the fund.

(e) The common interest self-insurance group shall adopt bylaws governing the operation of the fund.

Sec. 21.62.030. APPLICATION. (a) An employer desiring to become an individual self-insurer or two or more employers having common management desiring to become a group self-insurer shall submit an application to the division on a form prescribed by the director.

(b) The trustees of the fund of a common interest group desiring to become a group self-insurer shall submit an application to the division on a form prescribed by the director.

(c) An applicant for self-insurance shall answer all questions on the application. The answers shall be sworn to and notarized. The application shall be submitted at least 90 days before the proposed effective date or renewal date of the self-insurance certificate.

Sec. 21.62.040. CONTENTS OF APPLICATION. An applicant for self-

-L 20A (2)

insurance shall submit the following with the application for self-insurance:

(1) evidence of working capital of an amount which establishes the financial strength and liquidity to pay normal compensation claims promptly;

(2) the proposed amount of retention per loss and retention in the aggregate;

(3) the proposed program of excess insurance coverage;

(4) proof that the applicant has ample facilities and competent personnel to service the self-insurance plan or a copy of a signed service agreement with an approved service company to provide that service;

(5) the location in this state where all records of self-insured loss will be maintained;

(6) a description of any loss control or safety programs to be used by the applicant;

(7) Any further evidence which the director may require to establish the ability of the applicant to meet its obligations under AS 23.30.

Sec. 21.62.050. DOCUMENTS REQUIRED OF INDIVIDUAL SELF-INSURER. In addition to the information required under AS 21.62.040, an application for individual self-insurance shall be accompanied by

(1) a financial statement not more than three months old at the time of the application showing a net worth of not less than $500,000;

(2) an agreement to fully discharge by cash payment all amounts required to be paid under AS 23.30.

Sec. 21.62.060. DOCUMENTS REQUIRED OF COMMON MANAGEMENT SELF-INSURANCE GROUP. In addition to the information required under AS 21.-

(2)

62.040, an application for group self-insurance by a common management group shall be accompanied by

(1) a financial statement not more than three months old at the time of application for each member of the group showing a combined net worth of all members of the group to be not less than $500,000;

(2) an indemnity agreement jointly and severally binding each member of the common management self-insurance group to fully discharge by cash payment all amounts required to be paid under AS 23.-30.

Sec. 21.62.070. DOCUMENTS REQUIRED OF COMMON INTEREST SELF-INSURANCE GROUP. In addition to the information required under AS 21.-62.040, an application for group self-insurance by the trustees of the fund of a common interest group shall be accompanied by

(1) a financial statement not more than three months old at the time of the application for each member applying for coverage on the inception date of the fund showing a combined net worth of all members of the common interest self-insurance group of not less than $1,000,000;

(2) an indemnity agreement jointly and severally binding the fund and each member of the common interest self-insurance group to fully discharge by cash payment all amounts required to be paid under AS 23.30;

(3) An individual application for each member of the common interest self-insurance group applying for coverage under the fund;

(4) a set of bylaws or a trust agreement which shall govern the operation of the fund;

(5) proof of the existence of the minimum balance in the fund as required under AS 21.62.020(a);

(6) an estimate of all administrative expenses of the fund

-L 20A

(2)

(2)

for the period for which the self-insurance certificate is to be issued.

Sec. 21.62.080. REVIEW AND DECISION OF DIRECTOR. (a) The director shall review the contents of an application for self-insurance and determine whether the applicant has the financial ability to meet its obligations under AS 23.30.

(b) The director shall determine the amount of excess insurance coverage necessary for the discharge of the obligations of the employer under AS 23.30 and the protection of the applicant.

(c) The director may require a surety bond under AS 21.62.100 as a condition to issuance of a self-insurance certificate.

(d) The director shall give written notice to the applicant not later than 30 days before the proposed effective date of his approval or denial of an application for self-insurance. If the application is approved, the notice shall list the conditions which must be met before the self-insurance certificate is issued. If the application is denied, the notice shall state the specific reasons for the denial.

(e) A decision of the director is subject to the hearing and appeal procedure under AS 21.06.180 - 21.06.230.

Sec. 21.62.090. SELF-INSURANCE CERTIFICATE. Upon approval of an application and receipt of proof of any conditions established under AS 21.62.080(d), the director shall issue a self-insurance certificate to the applicant. The self-insurance certificate shall be on a form prescribed by the director and shall be issued for a period of one year.

Sec. 21.62.100. BOND. (a) With each application for self-insurance or application for renewal of a self-insurance certificate the director may require a corporate surety bond to secure the payment of obligations under AS 23.30 as they are incurred. The bond shall be on a form prescribed by the director and shall be issued by a corporate

-L 20A

(2)

surety authorized under AS 21.09 to do business in this state. The amount of the bond for each year shall be equal to or greater than the aggregate retention of the self-insurer but not less than $25,000.

(b) A bond secured in compliance with this section may not be cancelled, exchanged, or replaced unless 60 days written notice is given to the director and to the self-insurer.

Sec. 21.62.110. EXCESS INSURANCE. (a) The director shall determine the amount and kind of excess insurance required of an applicant for self-insurance based on the financial strength, past history of loss, and degree of hazard in the operations of the applicant and any other factors he considers appropriate.

(b) Excess insurance coverage shall be written by a casualty insurer authorized under AS 21.09 to do business in this state, except that the director may approve a policy of excess insurance with coverage starting at $1,000,000 with an insurer writing insurance in this state under AS 21.33.

(c) A policy of excess insurance issued under this chapter may not be cancelled unless the excess insurer gives 60 days written notice by certified mail to the director and to the self-insurer.

(d) The policy of excess insurance shall contain a provision that the director may order the payment of obligations due under the terms of the policy to a party other than the employer if necessary to assure the prompt payment of benefits to injured employees.

(e) A policy of excess insurance under this chapter shall cover each employer named in the application for self-insurance under AS 21.-62.030 and no other employers.

Sec. 21.62.120. SERVICING FOR SELF-INSURERS. (a) It is the sole responsibility of a self-insurer to provide competent persons to service its programs for claims adjusting, underwriting, and loss control.

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The purpose of sec. 3 of this Act is to provide both protection for injured employees and flexibility for employers in making the alternative of self-insurance available to those employers required under AS 23.30 to provide workers' compensation insurance coverage for their employees.

(2) * Sec. 2. AS 21.39.030(a)(4) is amended to read:

(4) risks may be grouped by classifications for the establishment of rates and minimum premiums <u>and shall be segregated and developed separately for workers' compensation insurance on construction projects that are extraordinary in scope or nature</u>; classification rates may be modified to produce rates for individual risks in accordance with rating plans which establish standards for measuring variations in hazards or expense provisions, or both; the standards may measure any differences among risks that can be demonstrated to have a probable effect upon losses or expenses;

(2) * Sec. 3. AS 21 is amended by adding a new chapter to read:

CHAPTER 62. WORKERS' COMPENSATION SELF-INSURANCE.

Sec. 21.62.010. SELF-INSURANCE. An employer or two or more employers having a common management or two or more employers having a common interest may elect to pay directly the compensation required in AS 23.30 after providing satisfactory proof of financial ability to

make direct payments and receiving a self-insurance certificate from the director.

(2) Sec. 21.62.020. SELF-INSURANCE FUND. (a) A workers' compensation self-insurance group formed by two or more employers having a common interest shall establish and keep a self-insurance fund with a minimum balance to be determined by the director, but not less than $250,000. The director may adopt regulations to maintain the solvency of the fund.

(b) The fund shall be administered by a board of trustees selected by members of the common interest self-insurance group.

(c) A majority of the trustees of the fund must be members of the self-insurance group.

(d) A trustee of a fund may not be an owner, officer, or employee of the service company used by the common interest self-insurance group which established the fund.

(e) The common interest self-insurance group shall adopt bylaws governing the operation of the fund.

Sec. 21.62.030. APPLICATION. (a) An employer desiring to become an individual self-insurer or two or more employers having common management desiring to become a group self-insurer shall submit an application to the division on a form prescribed by the director.

(b) The trustees of the fund of a common interest group desiring to become a group self-insurer shall submit an application to the division on a form prescribed by the director.

(c) An applicant for self-insurance shall answer all questions on the application. The answers shall be sworn to and notarized. The application shall be submitted at least 90 days before the proposed effective date or renewal date of the self-insurance certificate.

Sec. 21.62.040. CONTENTS OF APPLICATION. An applicant for self-

-L 20A (2)

insurance shall submit the following with the application for self-insurance:

(1) evidence of working capital of an amount which establishes the financial strength and liquidity to pay normal compensation claims promptly;

(2) the proposed amount of retention per loss and retention in the aggregate;

(3) the proposed program of excess insurance coverage;

(4) proof that the applicant has ample facilities and competent personnel to service the self-insurance plan or a copy of a signed service agreement with an approved service company to provide that service;

(5) the location in this state where all records of self-insured loss will be maintained;

(6) a description of any loss control or safety programs to be used by the applicant;

(7) Any further evidence which the director may require to establish the ability of the applicant to meet its obligations under AS 23.30.

Sec. 21.62.050. DOCUMENTS REQUIRED OF INDIVIDUAL SELF-INSURER. In addition to the information required under AS 21.62.040, an application for individual self-insurance shall be accompanied by

(1) a financial statement not more than three months old at the time of the application showing a net worth of not less than $500,000;

(2) an agreement to full, discharge by cash payment all amounts required to be paid under AS 23.30.

Sec. 21.62.060. DOCUMENTS REQUIRED OF COMMON MANAGEMENT SELF-INSURANCE GROUP. In addition to the information required under AS 21.-

L 20A

(2)

62.040, an application for group self-insurance by a common management group shall be accompanied by

(1) a financial statement not more than three months old at the time of application for each member of the group showing a combined net worth of all members of the group to be not less than $500,000;

(2) an indemnity agreement jointly and severally binding each member of the common management self-insurance group to fully discharge by cash payment all amounts required to be paid under AS 23.-30.

Sec. 21.62.070. DOCUMENTS REQUIRED OF COMMON INTEREST SELF-INSURANCE GROUP. In addition to the information required under AS 21.-62.040, an application for group self-insurance by the trustees of the fund of a common interest group shall be accompanied by

(1) a financial statement not more than three months old at the time of the application for each member applying for coverage on the inception date of the fund showing a combined net worth of all members of the common interest self-insurance group of not less than $1,000,000;

(2) an indemnity agreement jointly and severally binding the fund and each member of the common interest self-insurance group to fully discharge by cash payment all amounts required to be paid under AS 23.30;

(3) An individual application for each member of the common interest self-insurance group applying for coverage under the fund;

(4) a set of bylaws or a trust agreement which shall govern the operation of the fund;

(5) proof of the existence of the minimum balance in the fund as required under AS 21.62.020(a);

(6) an estimate of all administrative expenses of the fund

-L 20A

(2)

(2)

for the period for which the self-insurance certificate is to be issued.

Sec. 21.62.080. REVIEW AND DECISION OF DIRECTOR. (a) The director shall review the contents of an application for self-insurance and determine whether the applicant has the financial ability to meet its obligations under AS 23.30.

(b) The director shall determine the amount of excess insurance coverage necessary for the discharge of the obligations of the employer under AS 23.30 and the protection of the applicant.

(c) The director may require a surety bond under AS 21.62.100 as a condition to issuance of a self-insurance certificate.

(d) The director shall give written notice to the applicant not later than 30 days before the proposed effective date of his approval or denial of an application for self-insurance. If the application is approved, the notice shall list the conditions which must be met before the self-insurance certificate is issued. If the application is denied, the notice shall state the specific reasons for the denial.

(e) A decision of the director is subject to the hearing and appeal procedure under AS 21.06.180 - 21.06.230.

Sec. 21.62.090. SELF-INSURANCE CERTIFICATE. Upon approval of an application and receipt of proof of any conditions established under AS 21.62.080(d), the director shall issue a self-insurance certificate to the applicant. The self-insurance certificate shall be on a form prescribed by the director and shall be issued for a period of one year.

Sec. 21.62.100. BOND. (a) With each application for self-insurance, or application for renewal of a self-insurance certificate the director may require a corporate surety bond to secure the payment of obligations under AS 23.30 as they are incurred. The bond shall be on a form prescribed by the director, and shall be issued by a corporate

-L 20A

(2)

surety authorized under AS 21.09 to do business in this state. The amount of the bond for each year shall be equal to or greater than the aggregate retention of the self-insurer but not less than $25,000.

(b) A bond secured in compliance with this section may not be cancelled, exchanged, or replaced unless 60 days written notice is given to the director and to the self-insurer.

Sec. 21.62.110. EXCESS INSURANCE. (a) The director shall determine the amount and kind of excess insurance required of an applicant for self-insurance based on the financial strength, past history of loss, and degree of hazard in the operations of the applicant and any other factors he considers appropriate.

(b) Excess insurance coverage shall be written by a casualty insurer authorized under AS 21.09 to do business in this state, except that the director may approve a policy of excess insurance with coverage starting at $1,000,000 with an insurer writing insurance in this state under AS 21.33.

(c) A policy of excess insurance issued under this chapter may not be cancelled unless the excess insurer gives 60 days written notice by certified mail to the director and to the self-insurer.

(d) The policy of excess insurance shall contain a provision that the director may order the payment of obligations due under the terms of the policy to a party other than the employer if necessary to assure the prompt payment of benefits to injured employees.

(e) A policy of excess insurance under this chapter shall cover each employer named in the application for self-insurance under AS 21.62.030 and no other employers.

Sec. 21.62.120. SERVICING FOR SELF-INSURERS. (a) It is the sole responsibility of a self-insurer to provide competent persons to service its programs for claims adjusting, underwriting, and loss control.

L-L 20A

(2)

(b) A self-insurer may contract with one or more approved service companies to provide these services on a full-time basis.

(c) The department shall adopt regulations for approving service companies under this section.

Sec. 21.62.130. RECORDS. (a) A self-insurer or a service company on behalf of a self-insurer shall maintain all claims records at a location in the state.

(b) The records of a self-insurer which relate to self-insurance under this chapter are subject to guidelines established by the director concerning their retention and the review of those records by the director.

(c) All claims files of a self-insurer are subject to review by the director during normal business hours at a location in the state as stated in the application for self-insurance.

Sec. 21.62.140. REPORTS. The director may by regulation require reports concerning payroll, losses, reserves, financial condition, and other matters reasonably related to the ability of a self-insurer to meet its obligations under AS 23.30. Failure to comply with these regulations is cause for revocation of a self-insurance certificate.

Sec. 21.62.150. INDEMNITY AGREEMENT. The director may by regulation establish the provisions of the indemnity agreement required under AS 21.62.060(2) and 21.62.070(2). An indemnity agreement may contain other provisions that are consistent with the provisions adopted by regulation.

Sec. 21.62.160. REVOCATION OF A SELF-INSURANCE CERTIFICATE. (a) Failure to comply with the provisions of this chapter or AS 23.30 is grounds for revocation of a self-insurance certificate.

(b) The director shall give a self-insurer 30 days written notice of a proposed revocation of a self-insurance certificate. The notice

-L 20A

(2)

of proposed revocation shall contain a statement of the reasons for revocation. Revocation is effective 30 days after a self-insurer receives a notice of proposed revocation unless the self-insurer requests a hearing within 15 days after receiving notice of proposed revocation. Revocation shall be stayed until the hearing process is completed.

(c) A self-insurer may appeal an order under this section as provided in AS 21.06.230.

Sec. 21.62.170. INDEXING. The director may adopt regulations to provide for a revision of the dollar amounts in AS 21.62.020(a), 21.62.050(1), 21.62.060(1), 21.62.070(1), 21.62.100(a), and 21.62.110(f) to reflect devaluation of those amounts due to inflation.

Sec. 21.62.200. DEFINITIONS. In this chapter

(1) "common interest self-insurance group" means a group of employers that are in the same or similar type of business and includes unrelated businesses which are owned or controlled by the same person or persons if one of the unrelated businesses is the same or similar type of business as the other businesses in the group;

(2) "common management self-insurance group" means a group of employers which have businesses that are owned or controlled by the same persons;

(3) "fund" means a self-insurance fund;

(4) "trustee" means a person elected by a common interest self-insurance group for a stated term to direct the administration of a fund.

* Sec. 4. AS 18.80.220(a)(4) is amended to read:

(4) an employer, labor organization or employment agency to discharge, expel or otherwise discriminate against a person because he has

(A) opposed any practices forbidden under AS 18.80.-

200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30;

(2)

* Sec. 5. AS 21.36.190(d) is amended to read:

(d) This section does not apply to workers' compensation insurance when issued to an association of employers in the same rating classification [FORMED FOR PURPOSES OTHER THAN THE PURCHASE OF INSURANCE] and which as a group

(1) has a constitution and bylaws;

(2) incorporates a safety program;

[(3) AS A GROUP HAS PREFERRED CHARACTERISTICS OVER SIMILAR RISKS WRITTEN ON AN INDIVIDUAL BASIS;] and

(4) has filed and received approval from the director for the rating program to be applied to the group.

(2)

* Sec. 6. AS 21.39.040(d) is amended to read:

(d) Subject to the exceptions [EXCEPTION] specified in (e) of this section and AS 21.39.045, each filing shall be on file for a waiting period of 15 days before it becomes effective, which period may be extended by the director for an additional period not to exceed 15 days if he gives written notice within the waiting period to the insurer or rating organization which made the filing stating that he needs additional time for the consideration of the filing. Upon written application by the insurer or rating organization, the director may authorize a filing which he has reviewed to become effective before the expiration of the waiting period. A filing shall be considered to meet the requirements of this chapter unless disapproved by the director within the waiting period.

(2)

* Sec. 7. AS 21.39 is amended by adding a new section to read:

Sec. 21.39.045. WORKERS' COMPENSATION RATE FILINGS. (a) A filing of workers' compensation rates by a rating organization shall be limited to provisions for claim payment and may not include allowances for expenses, taxes, or profit, except as necessary for full rate development for an assigned risk pool under AS 21.39.155.

(b) If each rate in a schedule of workers' compensation rates for a specific classification of risks filed by an insurer is not lower than the rate for each respective classification filed by a rating organization in accordance with (a) of this section and approved by the director, the schedule of rates filed by the insurer is effective immediately and the waiting period in AS 21.39.040(d) is not required.

(c) Notwithstanding (b) of this section, the director may require an insurer to comply with the waiting period in AS 21.39.040(d) for a rate filing or part of a rate filing if he determines that the rate filing or part of the rate filing is excessive, inadequate, or unfairly discriminatory.

(2)

* Sec. 8. AS 21.39.070 is amended by adding new subsections to read:

(c) Notwithstanding (a) of this section, a filing by an insurer of an independent deductible or loss reimbursement plan is not considered a deviation under this section.

(d) Notwithstanding (a) of this section, a filing of workers' compensation rates under AS 21.39.045(b) is not a deviation under this section.

(2)

* Sec. 9. AS 23.30.010 is amended to read:

Sec. 23.30.010. COVERAGE. Benefits are [COMPENSATION IS] payable under this chapter in respect of disability or death of an employee.

(2)

* Sec. 10. AS 23.30.015 is amended to read:

Sec. 23.30.015. BENEFITS [COMPENSATION] WHERE THIRD PERSONS ARE

(2)

LIABLE. (a) If on account of disability or death for which benefits [COMPENSATION IS] payable under this chapter the person entitled to the benefits [COMPENSATION] believes that a third person other than the employer or a fellow employee is liable for damages, he need not elect whether to receive benefits [COMPENSATION] or to recover damages from the third person.

(b) Acceptance of benefits [COMPENSATION] under an award in a compensation order filed by the board operates as an assignment to the employer of all rights of the person entitled to benefits [COMPENSATION] and the personal representative of a deceased employee to recover damages from the third person unless the person or representative entitled to benefits [COMPENSATION] commences an action against the third person within one year after an award.

(c) Payment of compensation into the second-injury fund as a result of death operates as an assignment to the employer of all rights of the representative of the deceased to recover damages from the third person.

(d) An employer under an assignment may either institute proceedings for the recovery of damages or may compromise with a third person, either without or after instituting an action.

(e) An amount recovered by the employer under an assignment, whether by action or compromise, shall be distributed as follows:

(1) The employer shall retain an amount equal to

(A) the expenses incurred by him in respect to the action or compromise, including a reasonable attorney fee determined by the board;

(B) the cost of all benefits actually furnished by him under this chapter;

(C) all amounts paid as compensation and second-injury

(2)

(2)

fund payments;

(D) the present value of all amounts payable later as compensation (present value to be computed from a schedule prepared by the board), and the present value of the cost of all benefits to be furnished later under AS 23.30.095 (as estimated by the board), the amounts so computed and estimated to be retained by the employer as a trust fund to pay compensation and cost of benefits as they become due and to pay any finally remaining excess sum to the person entitled to benefits [COMPENSATION] or to the representative; and

(2) the employer shall pay any excess to the person entitled to benefits [COMPENSATION] or to his representative.

(f) Even if an employee, his representative, or his employer brings an action or settles a claim against the third person, the employer shall pay the benefits [AND COMPENSATION] required by this chapter.

(g) If the employee or his representative recovers damages from the third person, the employee or representative shall promptly pay to the employer the total amounts paid by the employer under (e)(1)(A), (B), and (C) of this section, insofar as the recovery is sufficient after deducting all litigation costs and expenses. Any excess recovery by the employee or representative shall be credited against any amount payable by the employer thereafter.

(h) If compromise with a third person is made by the person entitled to benefits [COMPENSATION] or his representative of an amount less than the benefits [COMPENSATION] to which the person or representative would be entitled, the employer is liable for benefits [COMPENSATION] stated in (f) of this section only if the compromise is made with his written approval.

(2)

20A

(i) If the employer is insured and the carrier has assumed the payment of benefits [COMPENSATION] the carrier shall be subrogated to all the rights of the employer.

(j) Notice of the commencement of an action against a third party shall be given to the board and to all interested parties within 30 days.

(2) * Sec. 11. AS 23.30.020 is amended to read:

Sec. 23.30.020. CHAPTER PART OF CONTRACT OF HIRE. This chapter constitutes part of every contract of hire, express or implied, and every contract of hire shall be construed as an agreement on the part of the employer to pay and on the part of the employee to accept benefits [COMPENSATION] in the manner provided in this chapter for all personal injuries sustained.

(2) * Sec. 12. AS 23.30.025(b) is amended to read:

(b) All policies of insurance companies insuring the payment of benefits [COMPENSATION] under this chapter are conclusively presumed to cover all the employees and the entire benefits [COMPENSATION] liability of the insured employer employed at or in connection with the business of the employer carried on, maintained, or operated at the location or locations set out [FORTH] in that [SUCH] policy or agreement. A provision in a policy attempting to limit or modify the liability of the company issuing it is wholly void except as provided in (c) of this section.

(2) Sec 2 Page 1

(1) * Sec. 13. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision

must be approved by the director of insurance and must provide that the

-L 20A

deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

(2) * Sec. 14. AS 23.30.030 is amended to read:

Sec. 23.30.030. REQUIRED POLICY PROVISIONS. A policy of a company insuring the payment of <u>benefits</u> [COMPENSATION] under this chapter is considered to contain the provisions set out in (1) - (7) of this section.

(1) The insurer assumes in full all the obligations to pay physician's fees, nurse's charges, hospital services, hospital supplies, medicine, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, and compensation or death benefits imposed upon the insured under the provisions of this chapter.

(2) The policy is made subject to the provisions of this chapter and its provisions relative to the liability of the insured employer to pay physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, compensation or death benefits to and for [SAID] employees or beneficiaries, the acceptance of the liability by the insured employer, the adjustment, trial and adjudication of claims for the physician's fees, nurse's charges, hospital services, hospital

(2)

supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, compensation or death benefits and the liability of the insurer to pay the same are considered a part of this policy contract.

(3) As between the insurer and the employee or his beneficiaries, notice to or knowledge of the occurrence of the injury on the part of the insured employer is notice or knowledge on the part of the insurer; jurisdiction of the insured employer for the purpose of this chapter is jurisdiction of the insurer; and the insurer, in all things, is bound by and subject to the orders, awards, judgments and decrees made against the insured employer under this chapter.

(4) The insurer will promptly pay to the person entitled to them the benefits conferred by this chapter, including physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, and all installments of compensation or death benefits awarded or agreed upon under this chapter. The obligation of the insurer is not affected by a default of the insured employer after the injury, or by default in giving a notice required by this policy. The policy is a direct promise by the insurer to the person entitled to physician's fees, nurse's charges, fees for hospital services, charges for medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, and hospital supplies, charges for burial, compensation or death benefits, and is enforceable in the name of that person. The insurer shall provide claims facilities through its own staffed adjusting facilities located within the state, or by independent, licensed, resident adjusters with power to effect settlement within the state.

(2)

-L 20A

(2)

(5) A termination of the policy by cancellation is not effective as to the employees of the insured employer covered by it until 20 days after written notice of the termination has been received by the board. If the employer has a contract with the state or a home rule or other political subdivision of the state, and his policy is cancelled due to nonpayment of a premium, the termination of the policy is not effective as to the employees of the insured employer covered by it until 20 days after written notice of the termination has been received by the contracting agency, and the agency has the option of continuing the payments on behalf of the employer in order to keep the policy in force. If, however, the employer has secured insurance with another insurance carrier, cancellation is effective as of the date of the new coverage.

(6) All claims for compensation, death benefits, physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, and burial expenses, may be made directly against either the employer or the insurer, or both, and the order or award of the board may be made against either the employer or the insurer or both.

(7) If the insurer fails or refuses to pay a final award or judgment (except during the pendency of an appeal) made against it, or its insured, or if it fails or refuses to comply with a provision of this chapter, the director of insurance [COMMISSIONER] shall revoke the approval of the policy form, and may not accept further proofs of insurance from it until it has paid the award or judgment or has complied with the violated provision of this chapter, and has resubmitted its policy form and received the approval of the form by the insurance commissioner.

(2) * Sec. 15. AS 23.30.045(a) is amended to read:

Sec. 23.30.045. EMPLOYER'S LIABILITY FOR BENEFITS [COMPENSATION]. (a) An employer is liable for and shall secure the payment to his employees of the benefits [COMPENSATION] payable under AS 23.30.050, 23.30.095, 23.30.145, and 23.30.185 - 23.30.215. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the benefits [COMPENSATION] to employees of the subcontractor unless the subcontractor secures the payment.

(2) * Sec. 16. AS 23.30.045(b) is amended to read:

(b) Benefits are [COMPENSATION IS] payable irrespective of fault as a cause for the injury.

(1) → Sec 3 P2

* Sec. 17. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter (3) or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

(2) * Sec. 18. AS 23.30.045(d) is amended to read:

(d) No contract may be awarded by the state or a home rule or other political subdivision of the state to an employer unless the employer [PERSON] to whom the contract is to be awarded has submitted to the contracting agency proof, furnished by the insurance carrier, of current coverage by workers' compensation insurance from an insurance company or association authorized to transact the business of workers' compensation insurance in this state or proof, furnished by the director of insurance [BOARD], of a current certificate of self-insurance from the director of insurance [BOARD]. The employer [PERSON] to whom

the contract is awarded shall keep his workers' compensation insurance policy in effect during the life of the contract with the state or political subdivision. If the state or the political subdivision of the state fails to obtain proof of coverage or self-insurance or to protect itself under (e) of this section, and an employee of the contractor is injured during the term of the contract, the state or the political subdivision is liable for workers' compensation to the employee if the employee is unable to recover from the employer because of the employer's lack of financial assets. The state or the political subdivision is not liable, however, to the employee for workers' compensation if the employee can recover from the employer under (a) and (b) of this section.

(2)

* Sec. 19. AS 23.30.045(e) is amended to read:

(e) When a contracting agency of the state or a political subdivision receives notice that the workers' compensation insurance policy of an employer to whom the agency has awarded a contract has been cancelled due to nonpayment of a premium, without being replaced by a comparable policy, the agency may either terminate the contract with the employer or continue the premium payments on his behalf in order to keep the policy in force during the life of the agency's contract. If the agency chooses to keep the policy in force, it may deduct its payments from the contract price or bring an action against the employer to recover the amount of the payments. When the contracting agency receives notice that the <u>director of insurance</u> [BOARD] has revoked a certificate of self-insurance held by a person to whom a contract has been awarded, the agency may terminate the contract. This subsection does not limit the causes of action or remedies which the state or political subdivision may have against the employer.

(2)

* Sec. 20. AS 23.30.055 is amended to read:

Sec. 23.30.055. EXCLUSIVENESS OF LIABILITY. The liability of an employer prescribed in AS 23.30.045 is exclusive and in place of all other liability of the employer and any fellow employee to the employee, his legal representative, husband or wife, parents, dependents, next of kin, and anyone otherwise entitled to recover damages from the employer or fellow employee at law or in admiralty on account of the injury or death. However, if an employer fails to secure payment of benefits [COMPENSATION] as required by this chapter, an injured employee or his legal representative in case death results from the injury may elect to claim benefits [COMPENSATION] under this chapter, or to maintain an action against the employer at law or in admiralty for damages on account of the injury or death. In that action the defendant may not plead as a defense that the injury was caused by the negligence of a fellow servant, or that the employee assumed the risk of his employment, or that the injury was due to the contributory negligence of the employee.

(2)

* Sec. 21. AS 23.30.060 is amended to read:

Sec. 23.30.060. ELECTION OF DIRECT PAYMENT PRESUMED. (a) An employer is conclusively presumed to have elected to pay benefits [COMPENSATION] directly to employees for injuries sustained arising out of and in the course of the employment according to the provisions of this chapter, until notice in writing of insurance, stating the name and address of the insurance company and the period of insurance, is given to the employee.

(b) The notice shall be posted and kept on the premises of the employer or on the premises where the employer's operations are being carried on in three conspicuous places, at the office of the employer, at the mess house or boarding house if there is one, and in some conspicuous place on the premises or works. The notice shall be sub-

stantially in the following form, and the signature shall be witnessed by two witnesses:

EMPLOYER'S NOTICE OF INSURANCE

To the employees of the undersigned:

You and each of you are hereby notified that the undersigned is insured in the.....Insurance Company, whose address is.....and that the period covered by the insurance.....in accordance with the terms, conditions and provisions to pay benefits [COMPENSATION] to employees of the undersigned for injuries received as provided in the Act of the State of Alaska, known as the "Alaska Workers' Compensation Act"

Signed.....

.....

Witness:

.....

(2) * Sec. 22. AS 23.30.070(e) is amended to read:

(e) If the employer or the carrier has been given notice, or the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier has knowledge of an injury or death of an employee and fails, neglects, or refuses to file a report of it as required by the provisions of (a) of this section, the limitations in AS 23.30.105(a) do not begin to run against the claim of the injured employee or his dependents entitled to benefits [COMPENSATION,] or in favor of either the employer or the carrier, until the report has been furnished as required by the provisions of (a) of this section.

(2) * Sec. 23. AS 23.30.070(f) is amended to read:

(f) An employer who fails or refuses to send a report required of him by this section or who fails or refuses to send the report required

by (a) of this section within the time required shall, if so required by the board, pay the employee or his legal representative or other person entitled to benefits [COMPENSATION] by reason of the employee's injury or death an additional award equal to 20 percent of the compensation [AMOUNTS] which was [WERE] unpaid when due. The award shall be against either the employer or his insurance carrier, or both.

(2) * Sec. 24. AS 23.30.075(a) is amended to read:

(a) An employer under this chapter, unless exempted, shall either [,] insure and keep insured for his liability under this chapter in an insurance company or association duly authorized to transact the business of workers' compensation insurance in this state, or shall furnish the director of insurance [BOARD] satisfactory proof of his financial ability to pay directly the benefits [COMPENSATION] provided for. If an employer elects to pay directly, the director of insurance [BOARD] may, in his [ITS] discretion, require

(1) the deposit of an acceptable security, indemnity or bond to secure the payment of benefit [COMPENSATION] liabilities as they are incurred; and

(2) proof of excess insurance.

(2) * Sec. 25. AS 23.30.075(b) is amended to read:

(b) An employer who fails to insure and keep insured employees subject to this chapter or fails to obtain a certificate of self-insurance from the board, upon conviction, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both. If an employer is a corporation, all persons who, at the time of the injury or death, had authority to insure the [SAID] corporation or apply for a certificate of self-insurance, and the person actively in charge of the business of the [SUCH] corporation shall be subject to the penalties prescribed in this subsection [HEREIN] and shall be

-L 20A

personally, jointly, and severally liable together with the corporation for the payment of all [COMPENSATION OR OTHER] benefits for which the corporation is liable under this chapter if the [SAID] corporation at the [SUCH] time is not insured or qualified as a self-insurer.

(1)

→ Sec 4 P2

* Sec. 26. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

(2)

* Sec. 27. AS 23.30.085(a) is amended to read:

(a) An employer subject to this chapter, unless exempted, shall initially file evidence of his compliance with the insurance provisions of this chapter with the board, in the form prescribed by it. The employer shall also give evidence of compliance within 10 days after the termination of his insurance by expiration or cancellation. These requirements do not apply to an employer who has certification from the director of insurance [BOARD] of his financial ability to pay benefits [COMPENSATION] directly without insurance.

(2)

* Sec. 28. AS 23.30.090 is amended to read:

Sec. 23.30.090. SELF-INSURANCE CERTIFICATES. If an employer has complied with the provisions of this chapter relating to self-insurance, the director of insurance [BOARD] shall issue him a certificate which shall remain in force for a period fixed by the director of insurance [BOARD]. The director of insurance [BOARD] may, upon at least 10 days' notice and a hearing, revoke a self-insurance certificate upon satis-

factory proof that an employer is no longer entitled to it. After revocation the director of insurance [BOARD] may grant a new certificate to an employer, upon his petition and satisfactory proof of his financial ability as provided in this chapter. The director of insurance shall notify the contracting agency of the state or of a political subdivision of the state when it revokes the self-insurance certificate of an employer holding a contract with the state or a political subdivision of the state. An employer authorized as a self-insurer shall provide claims facilities through its own staffed adjusting facilities located within the state, or independent, licensed, resident adjustors with power to effect settlement within the state.

(2)

* Sec. 29. AS 23.30.092 is amended to read:

Sec. 23.30.092. VOLUNTEER AMBULANCE ATTENDANTS, POLICEMEN AND FIREMEN INSURANCE. A political subdivision may elect to provide benefits [AND COMPENSATION] to its volunteer ambulance attendants, policemen or firemen by obtaining insurance which would provide its volunteer ambulance attendants, policemen or firemen with benefits [AND COMPENSATION] at least equivalent to those conferred upon volunteer ambulance attendants, policemen or firemen by this chapter, and the election shall be considered compliance with the coverage and insurance provisions of this chapter. The election shall be made by filing copies of the insurance policy or policies with the commissioner.

(1)

→ Sec 5 P 2+3

* Sec. 30. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR

PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPL(MENT AND AFTER-DISABLEMENT. IT SHALL BE ADDITIONALLY PROVIDED ' IAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a (3) [illegible] physician inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another (3) licensed physician. Upon procuring the services of a (3) licensed physician, the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

Sec 7 P 3+4

(1) * Sec. 31. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following each visit for [THE FIRST] treatment, the physician giving the treatment or the employee receiving it furnishes to the employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

(1) Sec 8 P 4

* Sec. 32. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times

during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

(2) * Sec. 33. AS 23.30.100(a) is amended to read:

Sec. 23.30.100. NOTICE OF INJURY OR DEATH. (a) Notice of an injury or death in respect to which benefits are [COMPENSATION IS]

payable under this chapter shall be given within 30 days after the date of the [SUCH] injury or death to the board and to the employer.

(2) * Sec. 34. AS 23.30.100(b) is amended to read:

(b) The notice shall be in writing, contain the name and address of the employee and a statement of the time, place, nature, and cause of the injury or death, and be signed by the employee or by a person on his behalf, or in case of death, by a person claiming to be entitled to benefits [COMPENSATION] for the death or by a person on his behalf.

(2) * Sec. 35. AS 23.30.100(d) is amended to read:

(d) Failure to give notice does not bar a claim under this chapter

(1) if the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier had knowledge of the injury or death and the board determines that the employer or carrier has not been prejudiced by failure to give notice;

(2) if the board excuses the failure on the ground that for some satisfactory reason notice could not be given;

(3) unless objection to the failure is raised before the board at the first hearing of a claim for benefits [COMPENSATION] in respect to the injury or death.

Sec 9 pg 5

(1) * Sec. 36. AS 23.30.105 is amended to read:

Sec. 23.30.105. TIME FOR FILING OF CLAIMS. (1) (a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a

claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of benefits [COMPENSATION] has been made without an award on account of the injury or death, a claim may be filed within one year [TWO YEARS] after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

(2) (b) Failure to file a claim within the period prescribed in (a) of this section is not a bar to benefits [COMPENSATION] unless objection to the failure is made at the first hearing of the claim in which all parties in interest are given reasonable notice and opportunity to be heard.

(2) (c) If a person who is entitled to benefits [COMPENSATION] under this chapter is mentally incompetent or a minor, the provisions of (a) of this section are not applicable so long as he has no guardian or other authorized representative, but are applicable in the case of a person who is mentally incompetent or a minor from the date of appointment (guardian or other representative, or in the case of a minor, if no guardian is appointed before he becomes of age, from the date he becomes of age.

(2) (d) If recovery is denied to a person, in a suit brought at law or in admiralty to recover damages in respect to injury or death, on the ground that he was an employee and that the defendant is an employer within the meaning of this chapter and that the employer has secured benefits [COMPENSATION] to the employee under this chapter, the limitation of time prescribed in (a) of this section begins to run only from the date of termination of the suit.

* Sec. 37. AS 23.30.106(b) is amended to read:

(2)

-L 20A

(b) The payment or award of benefits under the workers' compensation law of another state, territory, province, or foreign nation to an employee or his dependents otherwise entitled on account of the injury or death to the benefits under this chapter is not a bar to a claim for benefits under this chapter; however, a claim under this chapter must be filed within the time limits set out in this chapter. If benefits are [COMPENSATION IS] paid or awarded under this section:

(1) the medical and related benefits furnished or paid for by the employer under another workers' compensation law on account of the injury or death shall be credited against the medical and related benefits to which the employee would have been entitled under this chapter had claim been made solely under this chapter;

(2) the amount of all income benefits paid or awarded the employee under another workers' compensation law shall be credited against the total amount of income benefits which would have been due the employee under this chapter had claim been made solely under this chapter;

(3) the total amount of death benefits paid or awarded under another workers' compensation law shall be credited against the total amount of death benefits due under this chapter.

(2) * Sec. 38. AS 23.30.106(c) is amended to read:

(c) If an employee is entitled to the benefits of this chapter by reason of an injury sustained in this state in employment by an employer who is domiciled in another state and who has not secured the payment of benefits [COMPENSATION] as required by this chapter, the employer or his carrier may file with the board a certificate, issued by the commission or agency of the other state having jurisdiction over workers' compensation claims, certifying that the employer has secured the payment of benefits [COMPENSATION] under the workers' compensation law

of the other state and that with respect to that injury the employee is entitled to the benefits provided under that law. In that event

(1) the filing of the certificate shall constitute an appointment by the employer or his carrier of the board as his agent for acceptance of the service of process in a proceeding brought by the employee or his dependents to enforce his or their rights under this chapter on account of the injury;

(2) the board shall send to the employer or carrier, by registered or certified mail to the address shown on the certificate, a true copy of any notice of claim or other process served on the director by the employee or his dependents in any proceeding brought to enforce his or their rights under this chapter;

(3) if the employer is a qualified self-insurer under the workers' compensation law of the other state, the employer, upon submission of evidence satisfactory to the board of his ability to meet his liability to the employee under this chapter, shall be considered to be a qualified self-insurer under this chapter;

(4) if the employer's liability under the workers' compensation law of another state is insured, the employer's carrier, as to the employee or his dependents only, shall be considered to be an insurer authorized to write insurance under and be subject to this chapter; however, unless its contract with the employer requires it to pay an amount equivalent to the [COMPENSATION] benefits provided by this chapter, its liability for income benefits or medical and related benefits may not exceed the amounts of the benefits for which the insurer would have been liable under the workers' compensation law of the other state;

(5) if the amount for which the employer's insurance is liable under (3) and (4) of this subsection is less than the total [OF

THE COMPENSATION] benefits to which the employee is entitled under this chapter, the board may, if it considers it necessary, require the employer to file security satisfactory to the board to secure the payment of benefits due the employee or his dependents under this chapter; and

(6) upon compliance with the preceding requirements of (c) of this section, the employer, as to the employee only, shall be considered to have secured the payment of benefits [COMPENSATION] under this chapter.

* Sec. 39. AS 23.30.110(a) is amended to read:

(a) Subject to the provisions of AS 23.30.105, a claim for benefits [COMPENSATION] may be filed with the board in accordance with its regulations at any time after the first seven days of disability following an injury, or at any time after death, and the board may hear and determine all questions in respect to the claim.

Sec 10 P5+6

* Sec. 40. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim or make an award in respect to it. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

* Sec. 41. AS 23.30.120 is amended to read:

Sec. 23.30.120. PRESUMPTIONS. In a proceeding for the enforce-

ment of a claim for benefits [COMPENSATION] under this chapter it is presumed, in the absence of substantial evidence to the contrary, that

(1) the claim comes within the provisions of this chapter;

(2) sufficient notice of the claim has been given;

(3) the injury was not occasioned solely by the intoxication of the injured employee;

(4) the injury was not occasioned by the wilful intention of the injured employee to injure or kill himself or another.

(2) * Sec. 42. AS 23.30.130 is amended to read:

Sec. 23.30.130. MODIFICATION OF AWARDS. (a) Upon its own initiative, or upon the application of any party in interest on the ground of a change in conditions, including, for the purposes of AS 23.30.175, a change in residence, or because of a mistake in its determination of a fact, the board may, before one year after the date of the last payment of benefits [COMPENSATION,] whether or not a compensation order has been issued, or before one year after the rejection of a claim, review a compensation case in accordance with the procedure prescribed in respect of claims in AS 23.30.110. In accordance with AS 23.30.110 the board may issue a new compensation order which terminates, continues, reinstates, increases, or decreases the compensation, or award benefits [COMPENSATION].

(b) A new order does not affect benefits [COMPENSATION] previously paid, except that an award increasing the compensation rate may be made effective from the date of the injury, and if part of the compensation due or to become due is unpaid, an award decreasing the compensation rate may be made effective from the date of the injury, and payment made earlier in excess of the decreased rate shall be deducted from the unpaid compensation, in the manner the board determines.

(2) * Sec. 43. AS 23.30.140 is amended to read:

-L 20A

Sec. 23.30.140. APPOINTMENT OF GUARDIAN BY COURT. The board may require the appointment of a guardian or other representative by a competent court for any person who is mentally incompetent or a minor to receive benefits [COMPENSATION] payable to the person under this chapter and to exercise the powers granted to or to perform the duties required of the person under this chapter. If the board does not require the appointment of a guardian to receive the compensation of a minor, appointment for this purpose is not necessary.

(2) * Sec. 44. AS 23.30.145 is amended to read:

Sec. 23.30.145. ATTORNEY FEES. (a) Fees for legal services rendered in respect to a claim are not valid unless approved by the board, and the fees may not be less than 25 percent on the first $1,000 of benefits [COMPENSATION] or part of the first $1,000 of benefits [COMPENSATION] and 10 percent of all sums in excess of $1,000 of benefits [COMPENSATION]. When the board advises that a claim has been controverted, in whole or in part, the board may direct that the fees for legal services be paid by the employer or carrier in addition to benefits [COMPENSATION] awarded; the fees may be allowed only on the amount of benefits [COMPENSATION] controverted and awarded. When the board advises that a claim has not been controverted, but further advises that bona fide legal services have been rendered in respect to the claim, then the board shall direct the payment of the fees out of the benefits [COMPENSATION] awarded. In determining the amount of fees the board shall take into consideration the nature, length and complexity of the services performed, transportation charges, and the benefits resulting from the services to the compensation beneficiaries.

(b) If an employer fails to file timely notice of controversy or fails to pay [COMPENSATION OR MEDICAL AND RELATED] benefits within 15 days after it becomes due or otherwise resists the payment of [COMPEN-

-L 20A (2)

SATION OR MEDICAL AND RELATED] benefits and if the claimant has employed an attorney in the successful prosecution of his claim, the board shall make an award to reimburse the claimant for his costs in the proceedings, including a reasonable attorney fee. The award is in addition to the [COMPENSATION OR MEDICAL AND RELATED] benefits ordered.

(c) If proceedings are had for review of an [A COMPENSATION OR MEDICAL AND RELATED BENEFITS] order before a court, the court may allow or increase an attorney's fees. The fees are in addition to [COMPENSATION OR MEDICAL AND RELATED] benefits ordered and shall be paid as the court may direct.

(1) Sec 11 P6

* Sec. 45. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

(1) Sec 12 P6

* Sec. 46. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) Whenever the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

(2)

* Sec. 47. AS 23.30 is amended by adding new sections to read:

Sec. 23.30.157. AVAILABILITY FOR EMPLOYMENT. (a) An injured employee who receives compensation or medical and related benefits under this chapter and who is not employed shall register with the employment service operated by the state and shall report to job inter-

views and referrals arranged by the employment service.

(b) An employee described in (a) of this section who is unemployed and has received 10 or more job referrals within the preceding three years may not receive further benefits under this chapter unless the employee is determined to be permanently totally disabled in accordance with AS 23.30.180.

(2) Sec. 23.30.159. OTHER EARNINGS. (a) An injured employee who receives compensation or medical and related benefits shall report monthly any wages earned during the preceding month

(1) to the board; or

(2) if the employer elects to pay benefits directly, to the director of insurance.

(b) An employee who fails to report wages as required under (a) of this section may not receive benefits under this chapter until those reports are made.

(2) * Sec. 48. AS 23.30.160 is amended to read:

Sec. 23.30.160. ASSIGNMENT AND EXEMPTION FROM CLAIMS OF CREDITORS. No assignment, release, or commutation of [COMPENSATION OR] benefits due or payable under this chapter, except as provided by this chapter, is valid, and the [COMPENSATION AND] benefits are exempt from all claims of creditors and from levy, execution, and attachment or other remedy for recovery or collection of a debt. This exemption may not be waived.

(2) * Sec. 49. AS 23.30.165 is amended to read:

Sec. 23.30.165. LIEN. (a) Each employee and beneficiary entitled to <u>benefits</u> [COMPENSATION] under the provisions of this chapter has a lien for the full amount of his <u>benefits</u> [COMPENSATION], including costs and disbursements of suit and attorney fees allowed, upon all of the property in connection with the construction, preservation, mainte-

nance or operation of which the work of the employee was being performed at the time of his injury or death. For example: in the case of an employee injured or killed while engaged in mining or in work connected with mining, the lien extends to the entire mine and all property used in connection with it; and in the case of an employee injured or killed while engaged in fishing or in the packing, canning, or salting of fish, or other branch of the fish industry, the lien extends to the entire packing, fishing, salting or canning plant or establishment and all property used in connection with it; and this is the case with other businesses, industries, works, occupations and employments.

(b) The lien is prior and paramount to any other lien on the property, except a lien for wages or materials as provided by law, and is of equal rank with a lien for wages or materials.

(c) The lien extends to all right, title, interest and claim of the employer in the property affected by the lien.

(d) A person claiming a lien under this chapter shall, within one year after the date of the injury from which the claim of benefits [COMPENSATION] arises, file for record in the office of the recorder of the recording district in which the property affected by the lien is located a notice of lien signed and verified by the claimant or someone on his behalf, and stating in substance, the name of the person injured or killed out of which injury or death the claim of benefits [COMPENSATION] arises, the name of the employer of the injured or deceased person at the time of the injury or death, a description of the property affected or covered by the lien and the name of the owner or reputed owner of the property.

(e) The lien for benefits [COMPENSATION] provided for in this section may be enforced by equitable proceedings as in the enforcement

of other liens upon real or personal property, within 10 months after the cause of action arises. Nothing in this section prevents an attachment of property as security for the payment of benefits [COMPENSATION].

(2) * Sec. 50. AS 23.30.170(a) is amended to read:

(a) In case of default by the employer in the payment of benefits [COMPENSATION] due under an award of benefits [COMPENSATION] for a period of 30 days after the benefits are [COMPENSATION IS] due, the person to whom the benefits are [COMPENSATION IS] payable may, within one year after the default, apply to the board making the compensation order for a supplementary order declaring the amount of the default. After investigation, notice, and hearing, as provided in AS 23.30.110, the board shall make a supplementary order declaring the amount of the default The order shall be filed in the same manner as the compensation order.

(1) Sec 13 P6

* Sec. 51. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for the preceding calendar year as computed by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year. The average weekly wage for Alaska is the amount determined by dividing (1) the total wages paid by all employers covered by the Alaska Employment Security Act by (2) the average monthly employment reported by those employers for the same period and dividing the result by 52.

(1) Sec 14 P7

* Sec. 52. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated using the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if

(A) the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) by use of wages earned in jurisdictions other than Alaska; or

(B) the absence of the recipient is for medical or rehabilitation services not reasonably available in Alaska.

(3) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

(1) Sec 15 P 7

* Sec. 53. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

(2)

* Sec. 54. AS 23.30.180 is amended to read:

Sec. 23.30.180. PERMANENT TOTAL DISABILITY. In case of total disability adjudged to be permanent 66-2/3 percent of the injured employee's average weekly wages shall be paid to the employee during the continuance of the total disability. Permanent [LOSS OF BOTH

-L 20A

HANDS, OR BOTH ARMS, OR BOTH FEET, OR BOTH LEGS, OR BOTH EYES, OR OF ANY TWO OF THEM, IN THE ABSENCE OF CONCLUSIVE PROOF TO THE CONTRARY, CONSTITUTES PERMANENT TOTAL DISABILITY. IN ALL OTHER CASES PERMANENT] total disability is determined in accordance with the facts.

(1) * Sec. 55. AS 23.30.190 Sec 16 P7/8 is amended to read:

(2) Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 66-2/3 percent of the injured employee's average weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with AS 23.30.185 or 23.30.200, respectively, and shall be paid to the employee as follows:

(2) (1) arm lost, 156 [280] weeks compensation, not to exceed $43,680;

(2) (2) leg lost, 156 [248] weeks compensation, not to exceed $40,320;

(2) (3) hand lost, 156 [212] weeks compensation, not to exceed $33,600;

(2) (4) foot lost, 156 [173] weeks compensation, not to exceed $28,700;

(2) (5) eye lost, 140 weeks compensation, not to exceed $22,400;

(2) (6) thumb lost, 51 weeks compensation, not to exceed $10,400;

(2) (7) first finger lost, 28 weeks compensation, not to exceed $6,440;

(2) (8) great toe lost, 26 weeks compensation, not to exceed $5,320;

(2) (9) second finger lost, 18 weeks compensation, not to exceed $4,200; third finger lost, 18 weeks compensation, not to exceed $3,500;

(2) (10) toe other than great toe lost, eight weeks compensation, not to exceed $2,240;

(2) (11) fourth finger lost, seven weeks compensation, not to exceed $2,100;

(2) (12) loss of hearing of one ear, 52 weeks compensation, not exceeding $7,280; loss of hearing of both ears, 156 [200] weeks compensation, not to exceed $28,000;

(2) (13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(2) (14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(2) (15) compensation for loss of binocular vision or for 80 percent or more of the vision of an eye is the same as for loss of the eye;

(2) (16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(2) (17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(2) (18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(2) (19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(2) (A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this subsection [SECTION], not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this subsection [SECTION] applies.

(b) Total compensation paid under (a)(20) of this section may not continue for more than 156 weeks or exceed $60,000.

Sec 17 P8

* Sec. 56. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation, may receive compensation necessary for his

rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

(2) * Sec. 57. AS 23.30.210(b) is amended to read:

(b) At any time after death, or after 30 days subsequent to the date of injury, the employer and the employee or the beneficiary or beneficiaries, as the case may be, have the right to reach an agreement in regard to a claim for injury or death under this chapter [HEREUNDER] in accordance with the applicable schedule [HEREOF], but a memorandum of the agreement in a form prescribed by the board shall be filed with the board. Otherwise, the agreement is void for any purpose. If approved by the board, the agreement is enforceable the same as an order or award of the board and discharges the liability of the employer for the benefits [COMPENSATION] notwithstanding the provisions of [AS 23.30.130,] AS 23.30.160 [,] and AS 23.30.245(b) [AS 23.30.245]. The agreement shall be approved by the board only when the terms conform to the provisions of this chapter and, if it involves or is likely to involve permanent disability, the board may require an impartial medical examination and a hearing in order to determine whether or not to approve the agreement. The board may approve lump-sum settlements when it appears to be to the best interest of the employee or beneficiary or beneficiaries.

(1) SEC 18 P 8

* Sec. 58. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding $2,500; the commissioner by regulation shall annually adjust this limit to reflect increased expenses resulting from inflation [$1,000];

(3) SEC 20 P 8

* Sec. 59. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing 52 into the total wages earned, including self-employment, in [ANY ONE OF] the [THREE] calendar year

[YEARS] immediately preceding the injury;

(2) * Sec. 60. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.227. OTHER BENEFITS. (a) Notwithstanding any other provision of this chapter, an injured employee may not receive compensation for permanent total, permanent partial, temporary total, or temporary partial disability if he receives unemployment benefits (AS 23.20) for the same period of time.

(b) Notwithstanding any other provision of this chapter, an injured employee may not receive compensation for permanent total, permanent partial, temporary total, or temporary partial disability that exceeds 100 percent of his average weekly wage when added to any sick pay to which he is entitled for the same period of time.

(c) Notwithstanding any other provision of this chapter, the amount of compensation received by an injured employee for permanent total, permanent partial, temporary total, or temporary partial disability shall be reduced by the amount of retirement benefits paid to him for the same period of time.

(2) * Sec. 61. AS 23.30.235 is amended to read:

Sec. 23.30.235. CASES IN WHICH NO <u>BENEFITS ARE</u> [COMPENSATION IS] PAYABLE. No <u>benefits</u> [COMPENSATION] may be paid if the injury was occasioned solely by the intoxication of the employee or by the wilful intention of the employee to injure or kill himself or another.

(2) * Sec. 62. AS 23.30.245 is amended to read:

Sec. 23.30.245. INVALID AGREEMENTS. (a) An agreement by an employee to pay a portion of the premium paid by his employer to a carrier or to contribute to a benefit fund or department maintained by the employer for the purpose of providing <u>benefits</u> [COMPENSATION OR MEDICAL SERVICES AND SUPPLIES] as required by this chapter is not valid. An employer who makes a deduction for this purpose from the pay

200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30;

(2) Sec. 5. AS 21.36.190(d) is amended to read:

(d) This section does not apply to workers' compensation insurance when issued to an association of employers in the same rating classification [FORMED FOR PURPOSES OTHER THAN THE PURCHASE OF INSURANCE] and which as a group

(1) has a constitution and bylaws;

(2) incorporates a safety program;

[(3) AS A GROUP HAS PREFERRED CHARACTERISTICS OVER SIMILAR RISKS WRITTEN ON AN INDIVIDUAL BASIS;] and

(4) has filed and received approval from the director for the rating program to be applied to the group.

(2) Sec. 6. AS 21.39.040(d) is amended to read:

(d) Subject to the exceptions [EXCEPTION] specified in (e) of this section and AS 21.39.045, each filing shall be on file for a waiting period of 15 days before it becomes effective, which period may be extended by the director for an additional period not to exceed 15 days if he gives written notice within the waiting period to the insurer or rating organization which made the filing stating that he needs additional time for the consideration of the filing. Upon written application by the insurer or rating organization, the director may authorize a filing which he has reviewed to become effective before the expiration of the waiting period. A filing shall be considered to meet the requirements of this chapter unless disapproved by the director within the waiting period.

* Sec. 7. AS 21.39 is amended by adding a new section to read:

Sec. 21.39.045. WORKERS' COMPENSATION RATE FILINGS. (a) A filing of workers compensation rates by a rating organization shall be limited to provisions for claim payment and may not include allowances for expenses, taxes, or profit, except as necessary for full rate development for an assigned risk pool under AS 21.39.155.

(b) If each rate in a schedule of workers' compensation rates for a specific classification of risks filed by an insurer is not lower than the rate for each respective classification filed by a rating organization in accordance with (a) of this section and approved by the director, the schedule of rates filed by the insurer is effective immediately and the waiting period in AS 21.39.040(d) is not required.

(c) Notwithstanding (b) of this section, the director may require an insurer to comply with the waiting period in AS 21.39.040(d) for a rate filing or part of a rate filing if he determines that the rate filing or part of the rate filing is excessive, inadequate, or unfairly discriminatory.

* Sec. 8. AS 21.39.070 is amended by adding new subsections to read:

(c) Notwithstanding (a) of this section, a filing by an insurer of an independent deductible or loss reimbursement plan is not considered a deviation under this section.

(d) Notwithstanding (a) of this section, a filing of workers' compensation rates under AS 21.39.045(b) is not a deviation under this section.

* Sec. 9. AS 23.30.010 is amended to read:

Sec. 23.30.010. COVERAGE. Benefits are [COMPENSATION IS] payable under this chapter in respect of disability or death of an employee.

* Sec. 10. AS 23.30.015 is amended to read:

Sec. 23.30.015. BENEFITS [COMPENSATION] WHERE THIRD PERSONS ARE

-L 20A

(2)

LIABLE. (a) If on account of disability or death for which benefits [COMPENSATION IS] payable under this chapter the person entitled to the benefits [COMPENSATION] believes that a third person other than the employer or a fellow employee is liable for damages, he need not elect whether to receive benefits [COMPENSATION] or to recover damages from the third person.

(b) Acceptance of benefits [COMPENSATION] under an award in a compensation order filed by the board operates as an assignment to the employer of all rights of the person entitled to benefits [COMPENSATION] and the personal representative of a deceased employee to recover damages from the third person unless the person or representative entitled to benefits [COMPENSATION] commences an action against the third person within one year after an award.

(c) Payment of compensation into the second-injury fund as a result of death operates as an assignment to the employer of all rights of the representative of the deceased to recover damages from the third person.

(d) An employer under an assignment may either institute proceedings for the recovery of damages or may compromise with a third person, either without or after instituting an action.

(e) An amount recovered by the employer under an assignment, whether by action or compromise, shall be distributed as follows:

(1) The employer shall retain an amount equal to

(A) the expenses incurred by him in respect to the action or compromise, including a reasonable attorney fee determined by the board;

(B) the cost of all benefits actually furnished by him under this chapter;

(C) all amounts paid as compensation and second-injury

(2)

(2)

fund payments;

(D) the present value of all amounts payable later as compensation (present value to be computed from a schedule prepared by the board), and the present value of the cost of all benefits to be furnished later under AS 23.30.095 (as estimated by the board), the amounts so computed and estimated to be retained by the employer as a trust fund to pay compensation and cost of benefits as they become due and to pay any finally remaining excess sum to the person entitled to benefits [COMPENSATION] or to the representative; and

(2) the employer shall pay any excess to the person entitled to benefits [COMPENSATION] or to his representative.

(f) Even if an employee, his representative, or his employer brings an action or settles a claim against the third person, the employer shall pay the benefits [AND COMPENSATION] required by this chapter.

(g) If the employee or his representative recovers damages from the third person, the employee or representative shall promptly pay to the employer the total amounts paid by the employer under (e)(1)(A), (B), and (C) of this section, insofar as the recovery is sufficient after deducting all litigation costs and expenses. Any excess recovery by the employee or representative shall be credited against any amount payable by the employer thereafter.

(h) If compromise with a third person is made by the person entitled to benefits [COMPENSATION] or his representative of an amount less than the benefits [COMPENSATION] to which the person or representative would be entitled, the employer is liable for benefits [COMPENSATION] stated in (f) of this section only if the compromise is made with his written approval.

(i) If the employer is insured and the carrier has assumed the payment of benefits [COMPENSATION] the carrier shall be subrogated to all the rights of the employer.

(j) Notice of the commencement of an action against a third party shall be given to the board and to all interested parties within 30 days.

(2) * Sec. 11. AS 23.30.020 is amended to read:

Sec. 23.30.020. CHAPTER PART OF CONTRACT OF HIRE. This chapter constitutes part of every contract of hire, express or implied, and every contract of hire shall be construed as an agreement on the part of the employer to pay and on the part of the employee to accept benefits [COMPENSATION] in the manner provided in this chapter for all personal injuries sustained.

(2) * Sec. 12. AS 23.30.025(b) is amended to read:

(b) All policies of insurance companies insuring the payment of benefits [COMPENSATION] under this chapter are conclusively presumed to cover all the employees and the entire benefits [COMPENSATION] liability of the insured employer employed at or in connection with the business of the employer carried on, maintained, or operated at the location or locations set out [FORTH] in that [SUCH] policy or agreement. A provision in a policy attempting to limit or modify the liability of the company issuing it is wholly void except as provided in (c) of this section.

(2) Sec 2 Page 1

(1) * Sec. 13. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision

must be approved by the director of insurance and must provide that the

deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

(2) * Sec. 14. AS 23.30.030 is amended to read:

Sec. 23.30.030. REQUIRED POLICY PROVISIONS. A policy of a company insuring the payment of <u>benefits</u> [COMPENSATION] under this chapter is considered to contain the provisions set out in (1) - (7) of this section.

(1) The insurer assumes in full all the obligations to pay physician's fees, nurse's charges, hospital services, hospital supplies, medicine, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, and compensation or death benefits imposed upon the insured under the provisions of this chapter.

(2) The policy is made subject to the provisions of this chapter and its provisions relative to the liability of the insured employer to pay physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, compensation or death benefits to and for [SAID] employees or beneficiaries, the acceptance of the liability by the insured employer, the adjustment, trial and adjudication of claims for the physician's fees, nurse's charges, hospital services, hospital

supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, compensation or death benefits and the liability of the insurer to pay the same are considered a part of this policy contract.

(3) As between the insurer and the employee or his beneficiaries, notice to or knowledge of the occurrence of the injury on the part of the insured employer is notice or knowledge on the part of the insurer; jurisdiction of the insured employer for the purpose of this chapter is jurisdiction of the insurer; and the insurer, in all things, is bound by and subject to the orders, awards, judgments and decrees made against the insured employer under this chapter.

(4) The insurer will promptly pay to the person entitled to them the benefits conferred by this chapter, including physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, burial expenses, and all installments of compensation or death benefits awarded or agreed upon under this chapter. The obligation of the insurer is not affected by a default of the insured employer after the injury, or by default in giving a notice required by this policy. The policy is a direct promise by the insurer to the person entitled to physician's fees, nurse's charges, fees for hospital services, charges for medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, and hospital supplies, charges for burial, compensation or death benefits, and is enforceable in the name of that person. The insurer shall provide claims facilities through its own staffed adjusting facilities located within the state, or by independent, licensed, resident adjusters with power to effect settlement within the state.

(2) [redacted]

(5) A termination of the policy by cancellation is not effective as to the employees of the insured employer covered by it until 20 days after written notice of the termination has been received by the board. If the employer has a contract with the state or a home rule or other political subdivision of the state, and his policy is cancelled due to nonpayment of a premium, the termination of the policy is not effective as to the employees of the insured employer covered by it until 20 days after written notice of the termination has been received by the contracting agency, and the agency has the option of continuing the payments on behalf of the employer in order to keep the policy in force. If, however, the employer has secured insurance with another insurance carrier, cancellation is effective as of the date of the new coverage.

(6) All claims for compensation, death benefits, physician's fees, nurse's charges, hospital services, hospital supplies, medicines, prosthetic devices, transportation charges to the nearest point where adequate medical facilities are available, and burial expenses, may be made directly against either the employer or the insurer, or both, and the order or award of the board may be made against either the employer or the insurer or both.

(7) If the insurer fails or refuses to pay a final award or judgment (except during the pendency of an appeal) made against it, or its insured, or if it fails or refuses to comply with a provision of this chapter, the director of insurance [COMMISSIONER] shall revoke the approval of the policy form, and may not accept further proofs of insurance from it until it has paid the award or judgment or has complied with the violated provision of this chapter, and has resubmitted its policy form and received the approval of the form by the insurance commissioner.

(2) [redacted]

-L 20A

(2) * Sec. 15. AS 23.30.045(a) is amended to read:

Sec. 23.30.045. EMPLOYER'S LIABILITY FOR BENEFITS [COMPENSATION]. (a) An employer is liable for and shall secure the payment to his employees of the benefits [COMPENSATION] payable under AS 23.30.050, 23.30.095, 23.30.145, and 23.30.185 - 23.30.215. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the benefits [COMPENSATION] to employees of the subcontractor unless the subcontractor secures the payment.

(2) Sec. 16. AS 23.30.045(b) is amended to read:

(b) Benefits are [COMPENSATION IS] payable irrespective of fault as a cause for the injury.

(1) → SEC 3 P2

* Sec. 17. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter (3) or and AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

(2) * Sec. 18. AS 23.30.045(d) is amended to read:

(d) No contract may be awarded by the state or a home rule or other political subdivision of the state to an employer unless the employer [PERSON] to whom the contract is to be awarded has submitted to the contracting agency proof, furnished by the insurance carrier, of current coverage by workers' compensation insurance from an insurance company or association authorized to transact the business of workers' compensation insurance in this state or proof, furnished by the director of insurance [BOARD], of a current certificate of self-insurance from the director of insurance [BOARD]. The employer [PERSON] to whom

-L 20A

the contract is awarded shall keep his workers' compensation insurance policy in effect during the life of the contract with the state or political subdivision. If the state or the political subdivision of the state fails to obtain proof of coverage or self-insurance or to protect itself under (e) of this section, and an employee of the contractor is injured during the term of the contract, the state or the political subdivision is liable for workers' compensation to the employee if the employee is unable to recover from the employer because of the employer's lack of financial assets. The state or the political subdivision is not liable, however, to the employee for workers' compensation if the employee can recover from the employer under (a) and (b) of this section.

(2)

* Sec. 19. AS 23.30.045(e) is amended to read:

(e) When a contracting agency of the state or a political subdivision receives notice that the workers' compensation insurance policy of an employer to whom the agency has awarded a contract has been cancelled due to nonpayment of a premium, without being replaced by a comparable policy, the agency may either terminate the contract with the employer or continue the premium payments on his behalf in order to keep the policy in force during the life of the agency's contract. If the agency chooses to keep the policy in force, it may deduct its payments from the contract price or bring an action against the employer to recover the amount of the payments. When the contracting agency receives notice that the <u>director of insurance</u> [BOARD] has revoked a certificate of self-insurance held by a person to whom a contract has been awarded, the agency may terminate the contract. This subsection does not limit the causes of action or remedies which the state or political subdivision may have against the employer.

(2)

* Sec. 20. AS 23.30.055 is amended to read:

Sec. 23.30.055. EXCLUSIVENESS OF LIABILITY. The liability of an employer prescribed in AS 23.30.045 is exclusive and in place of all other liability of the employer and any fellow employee to the employee, his legal representative, husband or wife, parents, dependents, next of kin, and anyone otherwise entitled to recover damages from the employer or fellow employee at law or in admiralty on account of the injury or death. However, if an employer fails to secure payment of benefits [COMPENSATION] as required by this chapter, an injured employee or his legal representative in case death results from the injury may elect to claim benefits [COMPENSATION] under this chapter, or to maintain an action against the employer at law or in admiralty for damages on account of the injury or death. In that action the defendant may not plead as a defense that the injury was caused by the negligence of a fellow servant, or that the employee assumed the risk of his employment, or that the injury was due to the contributory negligence of the employee.

(2) Sec. 21. AS 23.30.060 is amended to read:

Sec. 23.30.060. ELECTION OF DIRECT PAYMENT PRESUMED. (a) An employer is conclusively presumed to have elected to pay benefits [COMPENSATION] directly to employees for injuries sustained arising out of and in the course of the employment according to the provisions of this chapter, until notice in writing of insurance, stating the name and address of the insurance company and the period of insurance, is given to the employee.

(b) The notice shall be posted and kept on the premises of the employer or on the premises where the employer's operations are being carried on in three conspicuous places, at the office of the employer, at the mess house or boarding house if there is one, and in some conspicuous place on the premises or works. The notice shall be sub-

stantially in the following form, and the signature shall be witnessed by two witnesses:

EMPLOYER'S NOTICE OF INSURANCE

To the employees of the undersigned:

You and each of you are hereby notified that the undersigned is insured in the.....Insurance Company, whose address is.....and that the period covered by the insurance.....in accordance with the terms, conditions and provisions to pay benefits [COMPENSATION] to employees of the undersigned for injuries received as provided in the Act of the State of Alaska, known as the "Alaska Workers' Compensation Act"

Signed.....

.....

Witness:

.....

(2) * Sec. 22. AS 23.30.070(e) is amended to read:

(e) If the employer or the carrier has been given notice, or the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier has knowledge of an injury or death of an employee and fails, neglects, or refuses to file a report of it as required by the provisions of (a) of this section, the limitations in AS 23.30.105(a) do not begin to run against the claim of the injured employee or his dependents entitled to benefits [COMPENSATION,] or in favor of either the employer or the carrier, until the report has been furnished as required by the provisions of (a) of this section.

(2) * Sec. 23. AS 23.30.070(f) is amended to read:

(f) An employer who fails or refuses to send a report required of him by this section or who fails or refuses to send the report required

-L 20A

by (a) of this section within the time required shall, if so required by the board, pay the employee or his legal representative or other person entitled to benefits [COMPENSATION] by reason of the employee's injury or death an additional award equal to 20 percent of the compensation [AMOUNTS] which was [WERE] unpaid when due. The award shall be against either the employer or his insurance carrier, or both.

(2) Sec. 24. AS 23.30.075(a) is amended to read:

(a) An employer under this chapter, unless exempted, shall either [,] insure and keep insured for his liability under this chapter in an insurance company or association duly authorized to transact the business of workers' compensation insurance in this state, or shall furnish the director of insurance [BOARD] satisfactory proof of his financial ability to pay directly the benefits [COMPENSATION] provided for. If an employer elects to pay directly, the director of insurance [BOARD] may, in his [ITS] discretion, require

(1) the deposit of an acceptable security, indemnity or bond to secure the payment of benefit [COMPENSATION] liabilities as they are incurred; and

(2) proof of excess insurance.

(2) Sec. 25. AS 23.30.075(b) is amended to read:

(b) An employer who fails to insure and keep insured employees subject to this chapter or fails to obtain a certificate of self-insurance from the board, upon conviction, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both. If an employer is a corporation, all persons who, at the time of the injury or death, had authority to insure the [SAID] corporation or apply for a certificate of self-insurance, and the person actively in charge of the business of the [SUCH] corporation shall be subject to the penalties prescribed in this subsection [HEREIN] and shall be

personally, jointly, and severally liable together with the corporation for the payment of all [COMPENSATION OR OTHER] benefits for which the corporation is liable under this chapter if the [SAID] corporation at the [SUCH] time is not insured or qualified as a self-insurer.

(1) → See 4 P2

* Sec. 26. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

(i)

* Sec. 27. AS 23.30.085(a) is amended to read:

(a) An employer subject to this chapter, unless exempted, shall initially file evidence of his compliance with the insurance provisions of this chapter with the board, in the form prescribed by it. The employer shall also give evidence of compliance within 10 days after the termination of his insurance by expiration or cancellation. These requirements do not apply to an employer who has certification from the director of insurance [BOARD] of his financial ability to pay benefits [COMPENSATION] directly without insurance.

(2)

* Sec. 28. AS 23.30.090 is amended to read:

Sec. 23.30.090. SELF-INSURANCE CERTIFICATES. If an employer has complied with the provisions of this chapter relating to self-insurance, the director of insurance [BOARD] shall issue him a certificate which shall remain in force for a period fixed by the director of insurance [BOARD]. The director of insurance [BOARD] may, upon at least 10 days' notice and a hearing, revoke a self-insurance certificate upon satis-

factory proof that an employer is no longer entitled to it. After revocation the director of insurance [BOARD] may grant a new certificate to an employer, upon his petition and satisfactory proof of his financial ability as provided in this chapter. The director of insurance shall notify the contracting agency of the state or of a political subdivision of the state when it revokes the self-insurance certificate of an employer holding a contract with the state or a political subdivision of the state. An employer authorized as a self-insurer shall provide claims facilities through its own staffed adjusting facilities located within the state, or independent, licensed, resident adjustors with power to effect settlement within the state.

(2) Sec. 29. AS 23.30.092 is amended to read:

Sec. 23.30.092. VOLUNTEER AMBULANCE ATTENDANTS, POLICEMEN AND FIREMEN INSURANCE. A political subdivision may elect to provide benefits [AND COMPENSATION] to its volunteer ambulance attendants, policemen or firemen by obtaining insurance which would provide its volunteer ambulance attendants, policemen or firemen with benefits [AND COMPENSATION] at least equivalent to those conferred upon volunteer ambulance attendants, policemen or firemen by this chapter, and the election shall be considered compliance with the coverage and insurance provisions of this chapter. The election shall be made by filing copies of the insurance policy or policies with the commissioner.

(1) → Sec 5 P 2+3

* Sec. 30. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR

PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER-DISABLEMENT. IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a licensed physician inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another licensed physician. Upon procuring the services of a licensed physician, the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

Sec 7 P 3+4

* Sec. 31. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following each visit for [THE FIRST] treatment, the physician giving the treatment or the employee receiving it furnishes to the employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

Sec 8 P 4

* Sec. 32. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times

L 20A

during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

(2) Sec. 33. AS 23.30.100(a) is amended to read:

Sec. 23.30.100. NOTICE OF INJURY OR DEATH. (a) Notice of an injury or death in respect to which benefits are [COMPENSATION IS]

payable under this chapter shall be given within 30 days after the date of the [SUCH] injury or death to the board and to the employer.

(2) * Sec. 34. AS 23.30.100(b) is amended to read:

(b) The notice shall be in writing, contain the name and address of the employee and a statement of the time, place, nature, and cause of the injury or death, and be signed by the employee or by a person on his behalf, or in case of death, by a person claiming to be entitled to benefits [COMPENSATION] for the death or by a person on his behalf.

(2) * Sec. 35. AS 23.30.100(d) is amended to read:

(d) Failure to give notice does not bar a claim under this chapter

(1) if the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier had knowledge of the injury or death and the board determines that the employer or carrier has not been prejudiced by failure to give notice;

(2) if the board excuses the failure on the ground that for some satisfactory reason notice could not be given;

(3) unless objection to the failure is raised before the board at the first hearing of a claim for benefits [COMPENSATION] in respect to the injury or death.

Sec 9 pg

(1) * Sec. 36. AS 23.30.105 is amended to read:

Sec. 23.30.105. TIME FOR FILING OF CLAIMS. (1) (a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a

-L 20A

claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of benefits [COMPENSATION] has been made without an award on account of the injury or death, a claim may be filed within one year [TWO YEARS] after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

(2) [redacted] Failure to file a claim within the period prescribed in (a) of this section is not a bar to benefits [COMPENSATION] unless objection to the failure is made at the first hearing of the claim in which all parties in interest are given reasonable notice and opportunity to be heard.

(2) [redacted] If a person who is entitled to benefits [COMPENSATION] under this chapter is mentally incompetent or a minor, the provisions of (a) of this section are not applicable so long as he has no guardian or other authorized representative, but are applicable in the case of a person who is mentally incompetent or a minor from the date of appointment of a guardian or other representative, or in the case of a minor, if no guardian is appointed before he becomes of age, from the date he becomes of age.

(2) [redacted] If recovery is denied to a person, in a suit brought at law or in admiralty to recover damages in respect to injury or death, on the ground that he was an employee and that the defendant is an employer within the meaning of this chapter and that the employer has secured benefits [COMPENSATION] to the employee under this chapter, the limitation of time prescribed in (a) of this section begins to run only from the date of termination of the suit.

(2) * Sec. 37. AS 23.30.106(b) is amended to read:

-L 20A

(b) The payment or award of benefits under the workers' compensation law of another state, territory, province, or foreign nation to an employee or his dependents otherwise entitled on account of the injury or death to the benefits under this chapter is not a bar to a claim for benefits under this chapter; however, a claim under this chapter must be filed within the time limits set out in this chapter. If benefits are [COMPENSATION IS] paid or awarded under this section:

(1) the medical and related benefits furnished or paid for by the employer under another workers' compensation law on account of the injury or death shall be credited against the medical and related benefits to which the employee would have been entitled under this chapter had claim been made solely under this chapter;

(2) the amount of all income benefits paid or awarded the employee under another workers' compensation law shall be credited against the total amount of income benefits which would have been due the employee under this chapter had claim been made solely under this chapter;

(3) the total amount of death benefits paid or awarded under another workers' compensation law shall be credited against the total amount of death benefits due under this chapter.

(2) * Sec. 38. AS 23.30.106(c) is amended to read:

(c) If an employee is entitled to the benefits of this chapter by reason of an injury sustained in this state in employment by an employer who is domiciled in another state and who has not secured the payment of benefits [COMPENSATION] as required by this chapter, the employer or his carrier may file with the board a certificate, issued by the commission or agency of the other state having jurisdiction over workers' compensation claims, certifying that the employer has secured the payment of benefits [COMPENSATION] under the workers' compensation law

of the other state and that with respect to that injury the employee is entitled to the benefits provided under that law. In that event

(1) the filing of the certificate shall constitute an appointment by the employer or his carrier of the board as his agent for acceptance of the service of process in a proceeding brought by the employee or his dependents to enforce his or their rights under this chapter on account of the injury;

(2) the board shall send to the employer or carrier, by registered or certified mail to the address shown on the certificate, a true copy of any notice of claim or other process served on the director by the employee or his dependents in any proceeding brought to enforce his or their rights under this chapter;

(3) if the employer is a qualified self-insurer under the workers' compensation law of the other state, the employer, upon submission of evidence satisfactory to the board of his ability to meet his liability to the employee under this chapter, shall be considered to be a qualified self-insurer under this chapter;

(4) if the employer's liability under the workers' compensation law of another state is insured, the employer's carrier, as to the employee or his dependents only, shall be considered to be an insurer authorized to write insurance under and be subject to this chapter; however, unless its contract with the employer requires it to pay an amount equivalent to the [COMPENSATION] benefits provided by this chapter, its liability for income benefits or medical and related benefits may not exceed the amounts of the benefits for which the insurer would have been liable under the workers' compensation law of the other state;

(5) if the amount for which the employer's insurance is liable under (3) and (4) of this subsection is less than the total [OF

THE COMPENSATION] benefits to which the employee is entitled under this chapter, the board may, if it considers it necessary, require the employer to file security satisfactory to the board to secure the payment of benefits due the employee or his dependents under this chapter; and

(6) upon compliance with the preceding requirements of (c) of this section, the employer, as to the employee only, shall be considered to have secured the payment of benefits [COMPENSATION] under this chapter.

(2) * Sec. 39. AS 23.30.110(a) is amended to read:

(a) Subject to the provisions of AS 23.30.105, a claim for benefits [COMPENSATION] may be filed with the board in accordance with its regulations at any time after the first seven days of disability following an injury, or at any time after death, and the board may hear and determine all questions in respect to the claim.

Sec 10 P546

(1) * Sec. 40. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim or make an award in respect to it. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

(2) * Sec. 41. AS 23.30.120 is amended to read:

Sec. 23.30.120. PRESUMPTIONS. In a proceeding for the enforce-

-L 20A

ment of a claim for benefits [COMPENSATION] under this chapter it is presumed, in the absence of substantial evidence to the contrary, that

(1) the claim comes within the provisions of this chapter;

(2) sufficient notice of the claim has been given;

(3) the injury was not occasioned solely by the intoxication of the injured employee;

(4) the injury was not occasioned by the wilful intention of the injured employee to injure or kill himself or another.

(2) Sec. 42. AS 23.30.130 is amended to read:

Sec. 23.30.130. MODIFICATION OF AWARDS. (a) Upon its own initiative, or upon the application of any party in interest on the ground of a change in conditions, including, for the purposes of AS 23.30.175, a change in residence, or because of a mistake in its determination of a fact, the board may, before one year after the date of the last payment of benefits [COMPENSATION,] whether or not a compensation order has been issued, or before one year after the rejection of a claim, review a compensation case in accordance with the procedure prescribed in respect of claims in AS 23.30.110. In accordance with AS 23.30.110 the board may issue a new compensation order which terminates, continues, reinstates, increases, or decreases the compensation, or award benefits [COMPENSATION].

(b) A new order does not affect benefits [COMPENSATION] previously paid, except that an award increasing the compensation rate may be made effective from the date of the injury, and if part of the compensation due or to become due is unpaid, an award decreasing the compensation rate may be made effective from the date of the injury, and payment made earlier in excess of the decreased rate shall be deducted from the unpaid compensation, in the manner the board determines.

(2) Sec. 43. AS 23.30.140 is amended to read:

Sec. 23.30.140. APPOINTMENT OF GUARDIAN BY COURT. The board may require the appointment of a guardian or other representative by a competent court for any person who is mentally incompetent or a minor to receive benefits [COMPENSATION] payable to the person under this chapter and to exercise the powers granted to or to perform the duties required of the person under this chapter. If the board does not require the appointment of a guardian to receive the compensation of a minor, appointment for this purpose is not necessary.

(2) * Sec. 44. AS 23.30.145 is amended to read:

Sec. 23.30.145. ATTORNEY FEES. (a) Fees for legal services rendered in respect to a claim are not valid unless approved by the board, and the fees may not be less than 25 percent on the first $1,000 of benefits [COMPENSATION] or part of the first $1,000 of benefits [COMPENSATION] and 10 percent of all sums in excess of $1,000 of benefits [COMPENSATION]. When the board advises that a claim has been controverted, in whole or in part, the board may direct that the fees for legal services be paid by the employer or carrier in addition to benefits [COMPENSATION] awarded; the fees may be allowed only on the amount of benefits [COMPENSATION] controverted and awarded. When the board advises that a claim has not been controverted, but further advises that bona fide legal services have been rendered in respect to the claim, then the board shall direct the payment of the fees out of the benefits [COMPENSATION] awarded. In determining the amount of fees the board shall take into consideration the nature, length and complexity of the services performed, transportation charges, and the benefits resulting from the services to the compensation beneficiaries.

(b) If an employer fails to file timely notice of controversy or fails to pay [COMPENSATION OR MEDICAL AND RELATED] benefits within 15 days after it becomes due or otherwise resists the payment of [COMPEN-

SATION OR MEDICAL AND RELATED] benefits and if the claimant has employed an attorney in the successful prosecution of his claim, the board shall make an award to reimburse the claimant for his costs in the proceedings, including a reasonable attorney fee. The award is in addition to the [COMPENSATION OR MEDICAL AND RELATED] benefits ordered.

(c) If proceedings are had for review of an [A COMPENSATION OR MEDICAL AND RELATED BENEFITS] order before a court, the court may allow or increase an attorney's fees. The fees are in addition to [COMPENSATION OR MEDICAL AND RELATED] benefits ordered and shall be paid as the court may direct.

(1) Sec 11 P6

* Sec. 45. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

(2) Sec 12 P6

* Sec. 46. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) Whenever the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

(2) * Sec. 47. AS 23.30 is amended by adding new sections to read:

Sec. 23.30.157. AVAILABILITY FOR EMPLOYMENT. (a) An injured employee who receives compensation or medical and related benefits under this chapter and who is not employed shall register with the employment service operated by the state and shall report to job inter-

views and referrals arranged by the employment service.

(b) An employee described in (a) of this section who is unemployed and has received 10 or more job referrals within the preceding three years may not receive further benefits under this chapter unless the employee is determined to be permanently totally disabled in accordance with AS 23.30.180.

(2) Sec. 23.30.159. OTHER EARNINGS. (a) An injured employee who receives compensation or medical and related benefits shall report monthly any wages earned during the preceding month

(1) to the board; or

(2) if the employer elects to pay benefits directly, to the director of insurance.

(b) An employee who fails to report wages as required under (a) of this section may not receive benefits under this chapter until those reports are made.

(2) * Sec. 48. AS 23.30.160 is amended to read:

Sec. 23.30.160. ASSIGNMENT AND EXEMPTION FROM CLAIMS OF CREDITORS. No assignment, release, or commutation of [COMPENSATION OR] benefits due or payable under this chapter, except as provided by this chapter, is valid, and the [COMPENSATION AND] benefits are exempt from all claims of creditors and from levy, execution, and attachment or other remedy for recovery or collection of a debt. This exemption may not be waived.

(2) * Sec. 49. AS 23.30.165 is amended to read:

Sec. 23.30.165. LIEN. (a) Each employee and beneficiary entitled to benefits [COMPENSATION] under the provisions of this chapter has a lien for the full amount of his benefits [COMPENSATION], including costs and disbursements of suit and attorney fees allowed, upon all of the property in connection with the construction, preservation, mainte-

nance or operation of which the work of the employee was being performed at the time of his injury or death. For example: in the case of an employee injured or killed while engaged in mining or in work connected with mining, the lien extends to the entire mine and all property used in connection with it; and in the case of an employee injured or killed while engaged in fishing or in the packing, canning, or salting of fish, or other branch of the fish industry, the lien extends to the entire packing, fishing, salting or canning plant or establishment and all property used in connection with it; and this is the case with other businesses, industries, works, occupations and employments.

(b) The lien is prior and paramount to any other lien on the property, except a lien for wages or materials as provided by law, and is of equal rank with a lien for wages or materials.

(c) The lien extends to all right, title, interest and claim of the employer in the property affected by the lien.

(d) A person claiming a lien under this chapter shall, within one year after the date of the injury from which the claim of benefits [COMPENSATION] arises, file for record in the office of the recorder of the recording district in which the property affected by the lien is located a notice of lien signed and verified by the claimant or someone on his behalf, and stating in substance, the name of the person injured or killed out of which injury or death the claim of benefits [COMPENSATION] arises, the name of the employer of the injured or deceased person at the time of the injury or death, a description of the property affected or covered by the lien and the name of the owner or reputed owner of the property.

(e) The lien for benefits [COMPENSATION] provided for in this section may be enforced by equitable proceedings as in the enforcement

of other liens upon real or personal property, within 10 months after the cause of action arises. Nothing in this section prevents an attachment of property as security for the payment of benefits [COMPENSATION].

(2) * Sec. 50. AS 23.30.170(a) is amended to read:

(a) In case of default by the employer in the payment of benefits [COMPENSATION] due under an award of benefits [COMPENSATION] for a period of 30 days after the benefits are [COMPENSATION IS] due, the person to whom the benefits are [COMPENSATION IS] payable may, within one year after the default, apply to the board making the compensation order for a supplementary order declaring the amount of the default. After investigation, notice, and hearing, as provided in AS 23.30.110, the board shall make a supplementary order declaring the amount of the default. The order shall be filed in the same manner as the compensation order.

(1) Sec 13 P6

* Sec. 51. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for the preceding calendar year as computed by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year. The average weekly wage for Alaska is the amount determined by dividing (1) the total wages paid by all employers covered by the Alaska Employment Security Act by (2) the average monthly employment reported by those employers for the same period and dividing the result by 52.

(1) Sec 14 P7

* Sec. 52. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated using the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if

(A) the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) by use of wages earned in jurisdictions other than Alaska; or

(B) the absence of the recipient is for medical or rehabilitation services not reasonably available in Alaska.

(3) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

(1) Sec 15 P 7

* Sec. 53. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

(2) * Sec. 54. AS 23.30.180 is amended to read:

Sec. 23.30.180. PERMANENT TOTAL DISABILITY. In case of total disability adjudged to be permanent 66-2/3 percent of the injured employee's average weekly wages shall be paid to the employee during the continuance of the total disability. Permanent [LOSS OF BOTH

HANDS, OR BOTH ARMS, OR BOTH FEET, OR BOTH LEGS, OR BOTH EYES, OR OF ANY TWO OF THEM, IN THE ABSENCE OF CONCLUSIVE PROOF TO THE CONTRARY, CONSTITUTES PERMANENT TOTAL DISABILITY. IN ALL OTHER CASES PERMANENT] total disability is determined in accordance with the facts.

* Sec. 55. AS 23.30.190 is amended to read:

Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 66-2/3 percent of the injured employee's average weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with AS 23.30.185 or 23.30.200, respectively, and shall be paid to the employee as follows:

(1) arm lost, 156 [280] weeks compensation, not to exceed $43,680;

(2) leg lost, 156 [248] weeks compensation, not to exceed $40,320;

(3) hand lost, 156 [212] weeks compensation, not to exceed $33,600;

(4) foot lost, 156 [173] weeks compensation, not to exceed $28,700;

(5) eye lost, 140 weeks compensation, not to exceed $22,400;

(6) thumb lost, 51 weeks compensation, not to exceed $10,400;

(7) first finger lost, 28 weeks compensation, not to exceed $6,440;

(8) great toe lost, 26 weeks compensation, not to exceed $5,320;

(9) second finger lost, 18 weeks compensation, not to exceed $4,200; third finger lost, 18 weeks compensation, not to exceed $3,500;

(10) toe other than great toe lost, eight weeks compensation, not to exceed $2,240;

L 20A

(2) (11) fourth finger lost, seven weeks compensation, not to exceed $2,100;

(2) (12) loss of hearing of one ear, 52 weeks compensation, not exceeding $7,280; loss of hearing of both ears, 156 [200] weeks compensation, not to exceed $28,000;

(2) (13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(2) (14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(2) (15) compensation for loss of binocular vision or for 80 percent or more of the vision of an eye is the same as for loss of the eye;

(2) (16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(2) (17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(2) (18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(2) (19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(2) (A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this subsection [SECTION], not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this subsection [SECTION] applies.

(b) Total compensation paid under (a)(20) of this section may not continue for more than 156 weeks or exceed $60,000.

Sec 17 P8

* Sec. 56. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation, may receive compensation necessary for his

rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

(2) * Sec. 57. AS 23.30.210(b) is amended to read:

(b) At any time after death, or after 30 days subsequent to the date of injury, the employer and the employee or the beneficiary or beneficiaries, as the case may be, have the right to reach an agreement in regard to a claim for injury or death under this chapter [HEREUNDER] in accordance with the applicable schedule [HEREOF], but a memorandum of the agreement in a form prescribed by the board shall be filed with the board. Otherwise, the agreement is void for any purpose. If approved by the board, the agreement is enforceable the same as an order or award of the board and discharges the liability of the employer for the benefits [COMPENSATION] notwithstanding the provisions of [AS 23.30.130,] AS 23.30.160 [,] and AS 23.30.245(b) [AS 23.30.245]. The agreement shall be approved by the board only when the terms conform to the provisions of this chapter and, if it involves or is likely to involve permanent disability, the board may require an impartial medical examination and a hearing in order to determine whether or not to approve the agreement. The board may approve lump-sum settlements when it appears to be to the best interest of the employee or beneficiary or beneficiaries.

(1) Sec 18 p 8

* Sec. 58. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding $2,500; the commissioner by regulation shall annually adjust this limit to reflect increased expenses resulting from inflation [$1,000];

(3) Sec 20 p 8 ff

* Sec. 59. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing 52 into the total wages earned, including self-employment, in [ANY ONE OF] the [THREE] calendar year

[YEARS] immediately preceding the injury;

* Sec. 60. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.227. OTHER BENEFITS. (a) Notwithstanding any other provision of this chapter, an injured employee may not receive compensation for permanent total, permanent partial, temporary total, or temporary partial disability if he receives unemployment benefits (AS 23.20) for the same period of time.

(b) Notwithstanding any other provision of this chapter, an injured employee may not receive compensation for permanent total, permanent partial, temporary total, or temporary partial disability that exceeds 100 percent of his average weekly wage when added to any sick pay to which he is entitled for the same period of time.

(c) Notwithstanding any other provision of this chapter, the amount of compensation received by an injured employee for permanent total, permanent partial, temporary total, or temporary partial disability shall be reduced by the amount of retirement benefits paid to him for the same period of time.

* Sec. 61. AS 23.30.235 is amended to read:

Sec. 23.30.235. CASES IN WHICH NO BENEFITS ARE [COMPENSATION IS] PAYABLE. No benefits [COMPENSATION] may be paid if the injury was occasioned solely by the intoxication of the employee or by the wilful intention of the employee to injure or kill himself or another.

* Sec. 62. AS 23.30.245 is amended to read:

Sec. 23.30.245. INVALID AGREEMENTS. (a) An agreement by an employee to pay a portion of the premium paid by his employer to a carrier or to contribute to a benefit fund or department maintained by the employer for the purpose of providing benefits [COMPENSATION OR MEDICAL SERVICES AND SUPPLIES] as required by this chapter is not valid. An employer who makes a deduction for this purpose from the pay

of an employee entitled to the benefits of this chapter is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $1,000.

(b) An agreement by an employee to waive his right to benefits [COMPENSATION] under this chapter is not valid.

(1) Sec 20 P 8,9

* Sec. 63. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who wilfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of theft as defined in AS 11.46.100(3) and is punishable as provided in AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

(2)

* Sec. 64. AS 23.30.255 is amended to read:

Sec. 23.30.255. PENALTY FOR FAILURE TO PAY BENEFITS [COMPENSATION]. (a) An employer required to secure the payment of benefits [COMPENSATION] under this chapter who fails to do so is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both. If the employer is a corporation, its president, secretary, and treasurer are also severally liable to the fine or imprisonment provided in this section for the failure of the corporation to secure the payment of benefits [COMPENSATION]. The president, secretary, and treasurer are severally personally liable, jointly with the corporation, for the benefits [COMPENSATION] or other benefit which accrues under this chapter in respect to an injury which happens to an employee of the corporation while it has failed to secure the payment of benefits [COMPENSATION] as required by AS 23.30.075.

(b) An employer who knowingly transfers, sells, encumbers, as-

signs, or in any manner disposes of, conceals, secretes, or destroys any of his property after one of his employees has been injured within the scope of this chapter, with intent to avoid the payment of benefits [COMPENSATION] under this chapter to the employee or his dependents, is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both. If the employer is a corporation, its president, secretary, and treasurer are also severally liable to the penalty of imprisonment as well as jointly liable with the corporation for the fine.

(c) This section does not affect any other liability of the employer under this chapter.

(2)

* Sec. 65. AS 23.30.260 is amended to read:

Sec. 23.30.260. PENALTY FOR RECEIVING UNAPPROVED FEES AND SOLICITING. A person is guilty of a misdemeanor, and upon conviction is punishable for each offense by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both, if he

(1) receives a fee, other consideration, or a gratuity on account of services rendered in respect to a claim, unless the consideration or gratuity is approved by the board or the court; or

(2) makes it a business to solicit employment for a lawyer or for himself in respect to a claim or award for benefits [COMPENSATION].

(3) Sec 3 P 7

* Sec. 66. AS 23.30 is amended by adding a new section to read:

(2)

Sec. 23.30.263. UNLAWFUL EMPLOYMENT PRACTICE. It is unlawful for an employer to discharge or otherwise discriminate against an employee because he has filed a claim for workers' compensation benefits under this chapter.

* Sec. 67. AS 23.30.265(9) is amended to read:

(9) "death" as a basis for a right to benefits [COMPENSA-

TION] means only death resulting from an injury;

* Sec. 68. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

* Sec. 69. AS 23.30.265(19) is amended to read:

(19) "self-insurer" means an employer who, instead of insuring his liability under this chapter as it provides, elects to pay directly the benefits [COMPENSATION] provided for, and who has furnished to the director of insurance [BOARD] satisfactory proof of his financial ability to make the direct payments and has been issued a self-insurance certificate;

* Sec. 70. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

* Sec. 71. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours that are not work-connected or in which an employee ordi-

signs, or in any manner disposes of, conceals, secretes, or destroys any of his property after one of his employees has been injured within the scope of this chapter, with intent to avoid the payment of benefits [COMPENSATION] under this chapter to the employee or his dependents, is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both. If the employer is a corporation, its president, secretary, and treasurer are also severally liable to the penalty of imprisonment as well as jointly liable with the corporation for the fine.

(c) This section does not affect any other liability of the employer under this chapter.

(2)

* Sec. 65. AS 23.30.260 is amended to read:

Sec. 23.30.260. PENALTY FOR RECEIVING UNAPPROVED FEES AND SOLICITING. A person is guilty of a misdemeanor, and upon conviction is punishable for each offense by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both, if he

(1) receives a fee, other consideration, or a gratuity on account of services rendered in respect to a claim, unless the consideration or gratuity is approved by the board or the court; or

(2) makes it a business to solicit employment for a lawyer or for himself in respect to a claim or award for benefits [COMPENSATION].

(3)

Sec 1 P 2

* Sec. 66. AS 23.30 is amended by adding a new section to read:

(2)

Sec. 23.30.263. UNLAWFUL EMPLOYMENT PRACTICE. It is unlawful for an employer to discharge or otherwise discriminate against an employee because he has filed a claim for workers' compensation benefits under this chapter.

* Sec. 67. AS 23.30.265(9) is amended to read:

(9) "death" as a basis for a right to benefits [COMPENSA-

TION] means only death resulting from an injury;

* Sec. 68. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

* Sec. 69. AS 23.30.265(19) is amended to read:

(19) "self-insurer" means an employer who, instead of insuring his liability under this chapter as it provides, elects to pay directly the benefits [COMPENSATION] provided for, and who has furnished to the director of insurance [BOARD] satisfactory proof of his financial ability to make the direct payments and has been issued a self-insurance certificate;

* Sec. 70. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

* Sec. 71. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours that are not work-connected or in which an employee ordi-

narily engages while not at a remote job site.

(1)* (2) Sec. 72. AS 23.30.005(k), 23.30.095(g), 23.30.125(b), and 23.30.175(e) and (f) are repealed.

(1)* Sec. 73. This Act takes effect on July 1, 1982.

* Sec. . AS 23.30.190 is amended to read:

Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 66-2/3 percent of the injured employee's average weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with AS 23.30.185 or 23.30.200, respectively, and shall be paid to the employee as follows:

(1) arm lost, 156 [280] weeks compensation, not to exceed $43,680;

(2) leg lost, 156 [248] weeks compensation, not to exceed $40,320;

(3) hand lost, 156 [212] weeks compensation, not to exceed $33,600;

(4) foot lost, 156 [173] weeks compensation, not to exceed $28,700;

(5) eye lost, 140 weeks compensation, not to exceed $22,400;

(6) thumb lost, 51 weeks compensation, not to exceed $10,400;

(7) first finger lost, 28 weeks compensation, not to exceed $6,440;

(8) great toe lost, 26 weeks compensation, not to exceed $5,320;

(9) second finger lost, 18 weeks compensation, not to exceed $4,200; third finger lost, 18 weeks compensation, not to exceed $3,500;

(10) toe other than great toe lost, eight weeks compensation, not to exceed $2,240;

(11) fourth finger lost, seven weeks compensation, not to exceed $2,100;

(12) loss of hearing of one ear, 52 weeks compensation, not exceeding $7,280; loss of hearing of both ears, 156 [200] weeks compen-

sation, not to exceed $28,000;

(13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(15) compensation for loss of binocular vision or for 80 percent or more of the vision of an eye is the same as for loss of the eye;

(16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impair-

ment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this subsection [SECTION], not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this subsection [SECTION] applies.

(b) Total compensation paid under (a)(20) of this section may not continue for more than 156 weeks or exceed $60,000.

March 12, 1982

To the Legislature.

A Preliminary Report was delivered to you on January 26, 1982.

I have the honor to submit to you the Final Report of the Comprehensive Study of Vocational Rehabilitation in the Alaska Workers' Compensation Program in accordance with House Bill 94, effective July 11, 1981. Corrections and minor changes which do not alter the essence of the Preliminary Report have been made.

Findings of the study have led to general conclusions regarding the delivery system of vocational rehabilitation benefits to injured workers. The State Workers' Compensation system has the potential to fulfill its obligations to injured workers and employers through the provision of properly structured and managed rehabilitation services. These services are presently inadequate, however, for a substantial number of injured workers. Recommendations for change and major improvements are offered for consideration in developing an effective delivery system of rehabilitation benefits to injured workers in Alaska.

Sincerely,

Zee Pamplin Jackson

Acknowledgments

On behalf of the members of the staff, I wish to acknowledge the assistance we received in conducting the study and preparing this Report.

The Department of Labor and the Division of Workers' Compensation arranged for office space and telephones. Administrative staff at both levels provided guidance on fiscal policies, procedures and budgetary matters. Their supportive assistance in preparing the Preliminary Report was provided with diligence, good will and best wishes.

The staff was assisted by rehabilitation professionals and administrators of other workers' compensation rehabilitation programs, who contributed ideas and advice. Gary Stivers of the Idaho Industrial Commission and Charles Kilczewski of the Office of Workers' Compensation Programs were among those who provided data and their views on structuring and managing rehabilitation services for industrially injured workers. In addition, we express our appreciation to injured workers, employers, unions, insurance companies, physicians and attorneys who provided valuable ideas and resource data for our review.

The Workers' Compensation Board was critical to the completion of the study. The Board imparted elements of practicality and feasibility through its legal and technical contributions. These elements, and the Board's expressed interest in improving the rehabilitation program, provided a framework for the conclusions and recommendations of the study.

Special gratitude is expressed to Nancy Fisher. Her patience and perseverance in transcribing numerous drafts added clarity and legibility to the Report.

Introduction & Summary

Major Conclusions and Recommendations

INTRODUCTION

In 1981 the Legislature of the State of Alaska enacted laws relating to workers' compensation. House Bill 94 became effective on July 11, 1981. Section 7 of the bill provides for the Division of Workers' Compensation within the Department of Labor to conduct a comprehensive study of vocational rehabilitation of injured workers. The Division was directed to report its findings and recommendations for legislative or administrative action by the 30th day of the Second Session of the Twelfth Legislature.

The study began on August 24, 1981. Activities for the past six months have been devoted to querying, collecting, investigating and analyzing concerns registered by all participants in the State's workers' compensation system. Four public hearings, conducted by the House Labor and Commerce Committee on Workers' Compensation, were attended in Anchorage, Fairbanks and Juneau. A survey of over 600 injured workers was conducted. Meetings were held with physicians, rehabilitation professionals, insurance companies, employers and representatives of labor and management. Records of the Division of Workers' Compensation, rehabilitation firms and insurance companies were reviewed. The rehabilitation programs in two other workers' compensation systems were reviewed and discussed in order to show examples of the potential savings and benefits to be derived from a properly structured and managed program. Additionally, published reports and writings of study groups and authorities in workers' compensation were reviewed.

The study found that the delivery system is not providing timely and adequate rehablitation services to a substantial number of those injured workers who could benefit from these services for two primary reasons. First, the system does not afford prompt referral of appropriate cases to

rehabilitation facilities. Second, injured workers are not consistently advised of their potential entitlement to these services, nor are the services being provided monitored. This is due primarily to a lack of resources and trained personnel within the Division of Workers' Compensation, as well as the absence of established procedures and guidelines for delivering and monitoring the system. The State's workers' compensation system has the potential to fulfill its obligations to injured workers and employers through the provision of properly managed rehabilitation services. A detailed discussion of these findings and recommendations are offered in the main body of the report, which is summarized below.

PART I. THE GOALS OF REHABILITATION IN A WORKERS' COMPENSATION PROGRAM

There are five goals of rehabilitation in a workers' compensation program.

Early identification of injured workers who potentially need rehabilitation

Workers who may not be able to return to their regular employment after suffering job-related injuries should be referred to rehabilitation as soon as this determination has been made or can be reasonably predicted.

Use of competent rehabilitation providers

The unusual characteristics of workers' compensation and the different approach required for successful rehabilitation are strong arguments for the use of counselors trained in industrial rehabilitation. While this training does not require an intimate knowledge of the law, it should include the ability to recognize the needs of the industrially injured population and the compensation system alike.

Provide opportunities for return to direct employment

The success of rehabilitation in a workers' compensation program rests on the attainment of one of its most critical goals: the earliest possible return of workers to direct employment.

Maintenance of atmosphere conducive to rehabilitation

Rehabilitation is a process which does not occur in isolation. The conditions and atmosphere surrounding this process are primary determinants of its eventual outcome.

Provide incentives, remove disincentives to rehabilitation

A rehabilitation program may fall short of fully achieving the primary objective of a workers' compensation system unless it maintains sufficient incentives and removes disincentives in the rehabilitation process.

PART II. EVALUATION OF VOCATIONAL REHABILITATION IN THE ALASKA WORKERS' COMPENSATION PROGRAM AND RECOMMENDATIONS

1. Injured Workers Who Potentially Need Rehabilitation Should Be Identified as Early as this Determination Can Reasonably Be Made.

Based on available data, it appears that the average time from the date of injury to referral is 16.8 months for injured workers referred to the state vocational rehabilitation program and 11.8 months for workers referred to the private rehabilitation firm.

Recommendation. Insurers/employers should timely report to the Division of Workers' Compensation all injured workers who potentially need rehabilitation services. The Division of Workers' Compensation should timely screen these reports and contact injured workers regarding their potential entitlement to these services. (See Recommendations 1.1 through 1.4 in the main body of the report for complete details.)

2. Provision of Rehabilitation Services by Competent Counselors.

Counselors presently providing rehabilitation services to injured workers covered by the Act are presumed to have sound backgrounds in basic rehabilitation principles. However, a review of rehabilitation plans, reports and correspondence, as well as views expressed by these counselors, raises questions regarding the presence of critical elements needed to meet the objective of a workers' compensation rehabilitation program. Clearly, the lack of regulations, definitive procedures and guidelines for the provision of vocational rehabilitation has affected the performance of counselors providing services to injured workers covered by the Act.

Recommendation. Regulations on vocational rehabilitation should be adopted. The Division of Workers' Compensation should establish, publish and distribute guidelines for providers of rehabilitation services. (See Recommendations 2.1 through 2.5.)

3. Provide for Early Return to Direct Employment.

The extent to which injured workers are provided opportunities for return to direct employment is a primary determinant of the ultimate success of rehabilitation in a workers' compensation program. There is little evidence in support of Alaska employers providing measurable opportunities for reemployment of injured workers.

Recommendation. Insurers should provide assistance to employers in developing programs for reemployment of injured workers. Arrangements can be made for counselors' services, to include on-site job analyses and assistance in modification of jobs to enhance reemployment opportunities of an employer's injured employees. The Division of Workers' Compensation should encourage the development and implementation of reemployment programs by providing positive monitoring and endorsement of the efforts of all parties. Union agreements can be negotiated between management and labor for reemployment and rehabilitation of injured union members. (See Recommendations 3.1 through 3.4.)

4. Maintenance of Atmosphere Conducive to Rehabilitation.

In general, the extent and timeliness of communication, coordination and commitment seem inadequate for the purpose of supporting a successful rehabilitation program. The lag between date of injury to date of referral of injured workers to rehabilitation supports the conclusion that injured workers are not timely contacted and advised of their entitlement or potential need for rehabilitation services. Rehabilitation reports and other correspondence reflect communication is sporadic and generally inadequate to ensure the rehabilitation effort of a successful and cost-effective outcome. Progress during rehabilitation is not timely monitored or timely reported. Concurrently, coordination of activities necessary to develop realistic return-to-work plans is insufficient, so that inordinate delays and interruptions occur to the detriment of injured workers, the rehabilitation program and the compensation system alike.

Recommendation. Insurers/employers, union representatives and the Division of Workers' Compensation should increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits. The services of rehabilitation professionals can enhance this effort and contribute to the maintenance of an atmosphere conducive to successful rehabilitation. (See Recommendations 4.1 through 4.3.)

5. Provision of Incentives, Removal of Disincentives.

Proper rating of employers, participation in the targeted jobs tax credit program and the proper administration of the Second Injury Fund have all been identified as incentives to employers to rehire their injured workers and support the rehabilitation program. The extent to which experience and retrospective rating methods are used in rating Alaska employers is unknown and is beyond the scope of this report. Changes in the administration of the Second Injury Fund which would enhance the overall rehabilitation program of the state's workers' compensation system appear to be in order. (See discussion in Part Two, under Goal 5 and Recommendations 5.1 through 5.7.)

Applications for settlements are frequently submitted for various reasons, including funding for proposed self-employment ventures in lieu of participation in a supervised rehabilitation program. Recommendations for such plans, without adequate documentation to support the soundness or feasibility of the proposals, are common. All parties seem to lose sight of the end goal of rehabilitation when this occurs.

Recommendation. Each plan must be carefully evaluated for its soundness and potential for successfully returning the worker to productive employment. In cases not involving self-employment plans, claims should be settled only after a determination has been made that to do so is in the best interest of the injured worker. (See Recommendation 5.8.)

Rehabilitation professionals providing services to injured workers in Alaska readily attest to the activities of both the plaintiffs' bar and defense attorneys as interfering in the rehabilitation process. Regulations, guidelines and well-defined procedures regarding rehabilitation will remove much of the need and opportunity to litigate issues surrounding the rehabilitation process. (See Recommendations 2.1 through 2.5.)

Parties who refuse to cooperate or who sabotage the rehabilitation effort through passive-aggressive means should be encouraged to cooperate through the application of remedial penalties acting upon both the insurer/employer and the injured worker similarly. The board has the authority to apply such remedies. A review of the board's more recent decisions and orders reflects an increased effort to make sufficient applications of these remedies in support of the rehabilitation objective.

DELIVERY OF REHABILITATION IN THE ALASKA WORKERS' COMPENSATION SYSTEM

The Alaska workers' compensation program must have an effective rehabilitation delivery system if it is to meet its six obligations as outlined in Part One of this report and achieve the five goals of rehabilitation. Despite the ongoing efforts of the Division of Workers' Compensation to improve its delivery system to the workers' compensation community, it continues to lack the resources and staff necessary to achieve a successful rehabilitation program which will ultimately reduce the cost of the compensation system. Administrative monitoring and positive assistance to injured workers and all other members in the system require the adoption of the recommendations set forth in this report.

The savings experienced in other compensation programs cited in the main body of this report resulted from the delivery of well-managed, cost-effective rehabilitation benefits. These results did not occur independent of the economic wisdom of administrators for those programs, who realized that a relatively small investment of resources would yield tremendous dividends in the reduction of compensation costs to employers, injured workers and society.

Part One

Goals of Rehabilitation

A brief description of the history of rehabilitation provisions
for industrially injured workers

A. HISTORY OF REHABILITATION PROVISIONS FOR INDUSTRIALLY INJURED WORKERS.

Rehabilitation in workers' compensation programs in the United States has been paid increasing attention over the past ten years following publication of the 1972 Report of the National Commission on State Workmen's Compensation Laws. However, the realization that workers' compensation laws should include provisions for rehabilitating industrially injured workers was manifested by the Massachusetts Industrial Accident Board as early as 1914, when a member of that board went to study the German program. Pursuant to that study, and a meeting in 1916 of the International Association of Industrial Accident Boards and Commissions (IAIABC), during which the delegates were advised that a primary goal of workers' compensation programs was the rehabilitation of disabled workers, the first state vocational rehabilitation law was enacted in 1918 in Massachusetts. (Berkowitz, 1963). The law, administered by the Industrial Accident Board, covered only those persons disabled by industrial accidents and occupational diseases. Following Massachusetts' lead, other states enacted laws with similar rehabilitation provisions. Congress, through the passage of Public Law 236 in 1920, created the State/Federal Vocational Rehabilitation Program. Its statement of purpose provided for the promotion of vocational rehabilitation of industrially disabled workers. Thus, persons with occupational disabilities were the prime target for vocational rehabilitation services. Subsequent Congressional mandates, however, shifted the attention to other specific disability groups and resulted in obscuring the focus on industrially injured workers. This shift in focus, coupled with the existence of the common law tort liability in the compensation system with its inherent litigation, resulted in the failure of both systems to adequately provide rehabilitation services to the industrially disabled, a condition which still exists today, according to the report of the National Commission (National Commission on State Workmen's Compensation Laws, 1972) and Larson, who suggests that one-half of 1% of industrially injured workers are rehabilitated under the federal/state programs. Larson further suggests that ten percent of workers currently being injured could benefit from vocational rehabilitation services. (Larson, 1980).

B. REHABILITATION DEFINED.

The increased emphasis on the inclusion of rehabilitation benefits in a modern workers' compensation system has prompted attempts by those in the system to define rehabilitation. A noteworthy observation is made by Sawyer in this regard, wherein he makes a distinction between the philosophical differences in rehabilitation of the workers' compensation system and the state/federal program. Sawyer observes that the objective of workers' compensation rehabilitation is to restore the industrially injured worker to a state of employability equal to, or as near as possible to that of his pre-injury status, through the provision of only those services necessary to achieve this objective. On the other hand, he notes, the state vocational program seeks to rehabilitate disabled persons to their maximum potential through the provision of education and other services deemed necessary by the disabled worker to achieve a chosen vocational objective. (Sawyer, 1978)

A further distinction can be made through examination of the primary funding source of each program. The state vocational rehabilitation program is supported by federal and state funds, while the cost of rehabilitation in a workers' compensation system is borne by private industry through contributions to a special or second injury fund and direct payment to private rehabilitation providers. The employer further contributes to the rehabilitation of industrially injured workers through payment of compensation benefits during the period of rehabilitation.

A third distinction, perhaps more revealing than the first two, is the difference in population served by each system. As we previously discussed, Congressional mandates have directed the focus of the state/federal program to give priority to specific disability groups classified as severely disabled. These include developmental disabilities, congenital, orthopedic and neurological conditions, and catastrophic injuries resulting in paraplegia and quadriplegia. The bulk of individuals in these disability categories are adolescents and young adults, most of whom have never participated in the world of work. Therefore, the process employed in making them work ready is habilitation rather than rehabilitation. Since their backgrounds do not include significant work experience which has imparted marketable skills, their plans usually include long-term pre-vocational and vocational preparation centered around academic training toward a specific career goal chosen by the individual. Contrast this to the industrially injured group, who for the most part, have not been severely disabled by their injuries, according to state/federal guidelines, and whose pre-injury work experiences have imparted skills which can usually be marketed in the workplace. On the whole, their natural orientation is not likely to be toward academic or classroom training, as they did not choose this method to enter the world of work to begin with, and they have not usually chosen to engage in academic pursuits at any point in their work life prior to the injury and subsequent visits to the

state vocational rehabilitation office. It is reasonable to conclude that the approach taken in assisting them to return to the work place will differ considerably from that taken for the first group.

The socially underlying concept of rehabilitation embraced by rehabilitation professionals is the intrinsic dignity of man, his feeling of self-worth and his right to life, liberty and the pursuit of happiness. This concept cannot realistically exist independent of economic wisdom in a workers' compensation program. The timely return of an industrially injured worker to a safe employment status, commensurate with that held at the time of injury, through the investment of necessary resources, is a logical goal in a workers' compensation program. The end result is an economic as well as a social asset to the injured worker, the compensation system and society. Properly managed, cost-effective rehabilitation will enable many disabled workers to return to productive jobs and thus reduce compensation costs.

C. THE APPROPRIATENESS OF REHABILITATION IN A WORKERS' COMPENSATION SYSTEM.

In 1976, the Rehabilitation Committee of the International Association of Industrial Accident Boards and Commissions conducted research on rehabilitation services in all state workers' compensation programs and went on to submit a model program of medical care and rehabilitation which was adopted by the IAIABC in 1977. The stated purpose of the model program was the assurance and coordination of efficient and timely delivery of services necessary to restore the industrially disabled employee to optimum physical and vocational well-being. (Ross, 1976).

The need for rehabilitating injured workers was stressed in the 1977 report of the President's Interdepartmental Workers' Compensation Task Force. The report, which stressed reemployment, advocated increased private rehabilitation efforts by employers and insurance companies. (Interdepartmental Workers' Compensation Task Force, 1977).

The Insurance Rehabilitation Study Group is an organization whose purpose is to provide a forum for members of the insurance industry to explore and develop concepts and programs of rehabilitation and medical administration applicable to all phases of insurance. The group undertook a project to develop guidelines and language dealing with rehabilitation and subsequently published a report which in part stated:

> While insurance losses and benefits are usually stated in monetary terms, the full consequences of human disability cannot be measured by money alone. Earnings lost due to accident or sickness can be replaced and medical expenses can be reimbursed, but there is no meaningful way to financially translate the value of an arm or a leg, or the personal dignity of being able to contribute to society as a useful member rather than merely existing disabled and dependent.

The study group went on to state that:

> If insurance is to protect against these human losses, it must do more than provide financial compensation alone. It must also strive to restore such losses. Insurance should provide the means for disabled workers to return to gainful employment whenever possible, and to regain as much functional independence as they can, even if they cannot return to work. Compensation cannot accomplish these goals without rehabilitation. (Insurance Rehabilitation Study Group, 1975).

The Study Group's report included its model rehabilitation program.

Based on the cited research and studies conducted by recognized authorities in workers' compensation, it is clear the consensus supports the premise that rehabilitation is an effective tool which should be included in workers' compensation if the system is to fulfill its total responsibility to the industrially injured worker and to society within the economy.

D. WHO SHOULD FUND REHABILITATION IN WORKERS'COMPENSATION

Leading insurance companies, employers and other members of the workers' compensation community support the belief that all costs of the system should be borne by the employer and not by the general public. Sawyer suggests:

> While some individual insurers and self-insured employers still approach the subject of rehabilitation with varying degrees of acceptance, the matter of involvement is no longer an option. Through a combination of either basic legislative changes or administrative regulations, the responsibilities of carriers and employers to provide rehabilitation services specifically directed toward returning injured workers to suitable gainful employment are spreading to all jurisdictions. (Sawyer, 1981).

It is reasonable to conclude that the legal requirement to provide rehabilitation benefits for injured workers has as its basis a collective mandate by society, for industry to provide benefits which most effectively achieve the basic remedial and restorative purpose for which the workers' compensation laws were intended.

E. THE ROLE OF THE STATE WORKERS' COMPENSATION AGENCY IN REHABILITATION.

The National Commission on State Workers Compensation Laws suggest that a state agency has six primary obligations in a workers' compensation program. Those obligations are applicable to rehabilitation and will be used for the purpose of this discussion.

First, the agency must ensure that the basic objective of rehabilitation is met by taking the initiative to administer the laws relative to rehabilitation.

Second, the agency must continually review the performance of the rehabilitation program and make procedural changes to improve the program when change is indicated.

Third, the workers' compensation agency is obliged to advise workers of their rights and obligations under the law and to assure that they receive the rehabilitation benefits to which they are entitled.

Fourth, the agency should apprise employers and carriers of their responsibilities and rights under the law. Physicians and attorneys must also be informed of their obligations in the rehabilitation process.

Fifth, the agency should assist in voluntary and informal resolution of rehabilitation issues and assure that such resolutions are consistent with the law.

Sixth, in the absence of voluntary resolutions, the Workers' Compensation Board must make adjudicatory decisions to resolve issues affecting rehabilitation.

The compensation agency must have sufficient authority and adequate staff to fulfill these six obligations. Moreover, the skills and background of the staff must be consistent with the functions to be served and the tasks to be performed.

F. FIVE SPECIFIC GOALS OF REHABILITATION IN A WORKERS' COMPENSATION PROGRAM

One of the four basic objectives of a modern workers' compensation program, as presented in the report by the National Commission, is the provision of sufficient medical care and rehabilitation services. The Commission suggests that these services are equally as important as the cash benefits of the program. However, it can be reasoned from a long-range perspective, these services are even more important than cash benefits, given the nature of their permanent and long-term value. Indeed, the provision of temporary compensation payments to replace a substantial portion of the worker's lost earnings, during the period of total disability, is a critical factor if the worker and his family are to be spared the disastrous hardships resulting from lack of income. However, the temporary characteristic of compensation payments suggests that a remedy with a far more long-range quality must be provided if the compensation system is to achieve its more fundamental objective of restoring the worker's ability to earn wages by returning him to the work place. Rehabilitation is an effective tool to be used in achieving this basic objective.

Five goals must be achieved in a workers' compensation rehabilitation program if the system is to serve its primary purpose. The basic goals are:

1. *early identification of injured workers potentially needing rehabilitation;*

2. *provision of effective rehabilitation services through the use of competent professionals;*

3. *provision of early return to direct employment;*

4. *maintenance of atmosphere conducive to rehabilitation;*

5. *provision of incentives, removal of disincentives in rehabilitation.*

(1) EARLY IDENTIFICATION OF INJURED WORKERS POTENTIALLY NEEDING REHABILITATION

One of the central themes repeated by rehabilitation professionals as well as noted authorities in workers' compensation is the need for early involvement in the rehabilitation process of workers whose injuries prevent them from timely returning to their regular job. Indeed, the idea as Sawyer suggests may well have originated with a limited number of leading

insurers who embraced the notion of rehabilitation as a part of a sound workers' compensation system. Whatever the original source, this premise, which has been endorsed by previously cited authorities, has gained increasing acceptance in workers' compensation over the past recent years.

Those proponents of the early involvement theory share the common realization that time can be a deadly enemy to successful rehabilitation. Benign neglect of what originally is a minor disability can result in protracting that disability to the point where an unwholesome attitude regarding return to work becomes permanent and fixed, and the psychological hurdle required to overcome this is extremely difficult, if not impossible to achieve. The notion of a timely return to work should be one of the first imparted to an injured worker.

The responsibility of the employer to provide rehabilitation benefits to injured workers has been sufficiently discussed. The extent to which this responsibility is met by the employer or insurer depends on the extent to which top management is committed to rehabilitation. This decision cannot be left to the discretion of individual claims adjusters. Early intervention in appropriate cases requires an unequivocal commitment to rehabilitation and precludes the adversary approach. In Sawyer's words:

> The role of the claims administrator moves from that of a "dollar doler" to an advocate of good care directed toward the earliest possible return to safe employment. In this context the disability, not the claimant, is the adversary to be overcome. (Sawyer, 1981).

The vice-president of a local insurance company, recognized in the workers' compensation community for her commitment to rehabilitation, reports that it is a standard company requirement of claims adjusters to make initial arrangements for rehabilitation in all cases where the injured worker remains off work 60 days or longer after the injury. In jurisdictions where the workers' compensation agency monitors rehabilitation, the adjuster files a report with the agency to advise that rehabilitation services are being initiated, or to request assistance from the agency in arranging for services. The company's philosophy and commitment to rehabilitation, which top administration holds as a non-negotiable policy with its staff, are included in the initial and ongoing training of all claims adjusters. While the company does not afford statistical data on its total rehabilitation program, the vice-president emphatically holds that the company indeed saves money for its insureds through its non-adversary, early intervention approach to rehabilitation.

The state workers' compensation agency, in fulfilling its obligation to support the goal of early identification of injured workers needing rehabilitation services and to ensure their receipt of these services, must maintain a systematic reporting and screening mechanism. Insurance companies and self-insured employers should file reports in all lost-time cases where injured workers continue to remain off work after a specified period of time. (A recommended time period is discussed in Part Two.) The report should indicate the carrier's immediate or future plans with explanation for the provision of rehabilitation services. Simultaneously, the workers' compensation agency must continually screen all lost-time injury reports and arrange for rehabilitation services in appropriate cases where the carrier has failed to do so.

The early intervention approach clearly militates against the obsolete concept that the injured worker's medical condition must be fixed and stationary before a successful rehabilitation effort can begin. A recently completed study by the California Workers' Compensation Institute Rehabilitation Committee appears to refute this outmoded concept. The study sample was randomly selected from files closed by the Rehabilitation Bureau of the State Division of Industrial Accidents during June and July of 1980. Findings are based on a detailed analysis of 611 cases. The results of the study show a direct correlation between early implementation of rehabilitation and completion rate. (See Table 1.) Clearly, the dangerous wait-and-see practice has no real validity and can be a deterrent to successful rehabilitation. If allowed to prevail, it will most surely undermine achieving the goals of successful rehabilitation.

(2) IDENTIFICATION AND USE OF COMPETENT REHABILITATION PROVIDERS WHO UNDERSTAND THE PURPOSE AND PHILOSOPHY OF WORKERS' COMPENSATION.

The differences in philosophical approaches to rehabilitation in workers' compensation systems and state/federal programs have been adequately discussed. Little or no purpose is served in arguing the merits of these differences in a vacuum. It is important to understand, however, the need to provide rehabilitation services in a workers' compensation program in a manner which supports the basic objective of the system. Therefore, it is important to engage the services of

those rehabilitation providers who not only understand this objective, but who are willing to provide services to injured workers consistent with achieving this objective. The counselor must have a sufficient understanding of medical issues and the function of the workers' compensation system, along with the ability to employ sound rehabilitation practices within the total context of the system.

Beyond meeting the requirement of understanding and working to achieve the objective of a workers' compensation program, the rehabilitation counselor must be competent and skilled in working with multiple parties in the system. The counselor must possess the ability to establish rapport with the injured worker to create the level of trust and cooperation necessary to achieve a successful outcome of the rehabilitation effort. The injured worker must be involved. It is not only his right but also his responsibility, as his complete involvement is a major key to any successful result. This means approaching the worker from an objective, yet restorative and supportive posture. This posture precludes counselor attempts to adjudicate and negotiate settlement and other claims issues more appropriately left to the adjudicatory body in the system.

The counselor must be able to effectively work with and gain the support of the treating physician in the rehabilitation effort. Contacting the physician prior to contacting the injured worker, to explain what is being attempted, is imperative if the counselor expects to gain the support of the physician, who can pave the way for a successful rehabilitation outcome. Work restrictions and remaining physical capabilities, which will serve as a basis for vocational planning, can be obtained at this time. Simultaneously, the counselor's presence provides assistance to the physician in his efforts to counsel the patient in working toward recovery and an eventual return to productive employment, with emphasis on what he can do, as opposed to what he cannot do.

Since the earliest possible return to work is the goal of industrial rehabilitation, inordinate delay on the part of the counselor in conducting extensive vocational evaluations and testing, before attempting to develop a direct return-to-work plan, is inappropriate in the workers' compensation system. An attempt to return the injured worker to his modified job held at the time of injury, or a different job with the same employer is the appropriate initial direction to take. If this is not possible, selective placement with a new employer in a job using established skills compatible with remaining physical capabilities is the next logical course to pursue. If either course is likely to result in returning the injured worker to safe, gainful employment, the counselor must not only be competent and willing to pursue this course, but must be required to pursue it by the workers' compensation system. In the face of existing opportunities for direct return to work, it is a disservice to an injured worker and his family if the counselor attempts to develop an unnecessary training plan which may result in prolonging the disability and increasing the cost of workers' compensation to industry and ultimately to society.

When efforts to return the injured worker to direct employment are not likely to succeed because of insufficient marketable skills, the counselor must recognize the need to timely establish a plan of vocational training, the scope and duration of which must not exceed that which is absolutely necessary to return the injured worker to an employment status commensurate with his pre-injury status. It is reasonable to place parameters on the training benefits of injured workers which will coincidentally place limitations on the employers' liability for such benefits. (Suggested parameters are offered in the recommendations in Part Two of this report.) There must be a plan with a realistic goal. This requires skillful, specific actions on the part of the counselor, as plans do not emerge from the waters. The goal of the plan should be clearly described and fully understood by those who are to participate in it. A time table with specific target dates, and a delineation of roles and responsibilities, specifying who, what, when, where and how, must be spelled out.

TABLE 1. Results of early implementation.

	% Plans Implemented	
	Before P & S	After P & S
Rehab plans completed	82	74
Employees working	75	65
Plan suspended/terminated	18	26
Average cost	$4,238	$7,671

Remarks: P & S refers to the injured worker's medical condition as being permanent and stationary.

Claims management by the insurer, and administrative oversight by the state workers' compensation agency, cannot occur in a void. Therefore, the system requires the counselor to maintain effective communication with all interested parties. The counselor must provide initial written and oral communication regarding the original plan, and make ongoing reports sufficient in content and scope to keep all appropriate parties fully advised of the progress being made toward achieving the goal of the plan and the primary objective of workers' compensation. This requires consistent, ongoing monitoring by the counselor. The workers' compensation system must provide additional monitoring to ensure the counselor is meeting this requirement.

Cooperative Agreements. During the formative years of no-fault workers' compensation, many systems provided for cooperative agreements between the workers' compensation agency and the state/federal division of vocational rehabilitation. This practice was primarily due to the fact that the state/federal program was the sole source of rehabilitation services for disabled workers. The National Commission's report, however, detailed the past failure of many state programs to fulfill the expectancy of the compensation systems, as well as the failure of state compensation agencies to resolve this matter. In view of this failure, coupled with the emergence of private rehabilitation providers, whose services appear to be more specifically geared toward working with industrially injured workers, cooperative agreements between the two agencies may well be obsolete. As noted earlier, the purpose of the workers' compensation system can best be served by identifying and utilizing those providers whose services support the primary objective of the compensation system.

(3) PROVISION FOR EARLY RETURN TO DIRECT EMPLOYMENT.

The success of rehabilitation in a workers' compensation program rests on attaining one of its most critical goals: the earliest possible return of workers to direct employment. Members of the workers' compensation community share the widely held belief that the fewer changes made in the life of an injured worker during the rehabilitation process, the more successful that process is likely to be. Conversely, a more complex rehabilitation plan requiring numerous changes in the life of the injured worker, and requiring a proportionate period of time to implement, diminishes the chance of a successful outcome. This too, appears to be borne out by the study of the California Workers' Compensation Rehabilitation Committee. The results show that modification of the worker's pre-injury job and direct placement of workers with transferable skills were more successful than formal training programs in terms of return to work. (See Table 2.) The results also revealed the costs and outcome of plans were inversely proportionate, with the least expensive program offering the greatest opportunity to return the injured worker to the work force. (See Tables 2 and 3.)

Key Players Necessary

Employer Participation. The employer's responsibility to his injured employee must transcend the traditional role of merely paying premiums and forwarding accident reports to the insurance company. The employer has the first and foremost obligation to do everything within reason to assure his employee's return to safe work. It is accepted that this will not always be possible. However, the employer must make more than a cursory attempt in the return to work

TABLE 2. RTW by plan type completed.

	% RTW

On-the-job training	69.7
Formal Schooling	52.1

effort. His actions may include arrangements for an on-site job analysis by a qualified rehabilitation professional, to identify a job compatible with the remaining physical capacities of the recovered employee, or the union representative may be called upon to run interference in overcoming obstacles in union agreements which may prevent the injured worker from successfully returning to work. At any rate, the employer will not know what can be done until he initiates an active and aggressive return-to-work effort. In the absence of this effort, complaints regarding spiraling workers' compensation costs are hardly justifiable.

Employee Responsibility. The employee must clearly understand his rights do not exist independent of his responsibilities under the workers' compensation law. He must therefore act responsibly in the face of a valid reemployment offer made by his employer. His total cooperation as well as participation in a return-to-work effort is a requirement, not an option, if he expects to receive the benefits which the system provides. Pursuit of training or a more elaborate rehabilitation plan is not justified if the opportunity exists for his return to a safe employment status compatible with his pre-injury employment status. After all, the basic purpose of workers' compensation is to ensure his opportunity for restoration to work when he is medically able to do so. This is not synonymous with guaranteeing an unconditional right to training.

Union Support. Union representatives can play a significant role in supporting reemployment programs for their members. Contracts can be negotiated to permit the existence of light-duty and rehabilitation positions to which an injured worker may be assigned, once released by his physician for light duty. Information obtained from the Idaho Industrial Commission Rehabilitation Division confirms the benefits to be reaped from union involvement and support of direct reemployment opportunities for its members.

During the 1981 fiscal year, 18% of injured workers experiencing lost time in Idaho received rehabilitation services. Twenty-four percent of those who received services were successfully rehabilitated. Of the total number successfully rehabilitated, 38% returned to work with their previous employer. (See Table 4.) The administrator of the industrial rehabilitation unit, as well as labor and industry representatives, attributes this high rate of return to direct employment to the cooperative efforts of labor and management. Such efforts include contractual provisions for rehabilitation and light-duty assignments of industrially injured union members.

Significan Others

Rehabiiitation Counselor. The role of the counselor in the rehabilitation process, as previously discussed, is worthy of mention here. Early and consistent contact with the injured worker and other family members, consultation with the treating physician regarding remaining physical capacities and performance of on-site job analysis are all activities which can be effectively and timely performed by the competent rehabilitation counselor, who serves as a key link in the communication process with all appropriate parties. The timely release of a sufficiently recovered worker to light-duty employment is significantly enhanced if the treating physician is aware of existing opportunities for such work, and the availability of counselor services to assist the patient in making a safe return to work.

Remarks: *Lost time injuries based on 20% of total injuries (39,026) provided by Administrator of Idaho Industrial Commission, Division of Rehabilitation.

Attorney Obligation. In most cases, attorney involvement in the rehabilitation process should be appropriately limited to encouraging respective clients to participate in the rehabilitation effort. There may be a few instances where issues in the claim may have a bearing on rehabilitation or vice versa, and thus litigation may ensue. However, direct, ongoing attorney involvement in the rehabilitation process is unnecessary and inappropriate in the workers' compensation system. The remaining physical capabilities of an injured worker as related to his ability to return to productive work are determined by his physician. The counselor is the key person who works with the injured worker, his physician, the employer and all other appropriate parties in the rehabilitation effort. The worker's compensation agency provides monitoring and administrative oversight to ensure all parties will act in good faith in meeting their respective responsibilities and obligations. Clearly, this well-designed procedural mechanism makes it possible to address issues and concerns in the appropriate context and removes the opportunity, as well as the necessity for excessive attorney involvement in the rehabilitation process.

(4) MAINTENANCE OF AN ATMOSPHERE CONDUCIVE TO SUCCESSFUL REHABILITATION

Sawyer, in a written discourse on private insurance company rehabilitation programming, makes several noteworthy statements regarding rehabilitation and claims disposition:

> Rehabilitation, in the broadest sense, represents one of several concepts currently being advocated as socially desirable and economically feasible for inclusion in a modern benefit system. It has reached the point of respectability primarily as a result of the voluntary experimentation by those leading insurance companies that have recognized the need for workers' compensation to mean something more than "a check in the mail" and filing forms for industrial commission review.

Sawyer goes on to note:

> Rehabilitation is important in claims disposition... An adversary approach to claims handling is obsolete. Modern claims practices recognize the essential function of the claims person in identifying and meeting the needs of his employer and claimant alike. (Sawyer, 1978).

Rehabilitation is a process which does not occur in isolation. The condition and atmosphere in which rehabilitation takes place are primary determinants of the eventual outcome of that process. The screening and early identification of injured workers who potentially need rehabilitation services and the timely provision of these services will not necessarily result in a successful outcome if the process is fraught with hostilities, mistrust and excessive litigation. Certain positive elements which may be termed the "four C's" must be present to ensure successful rehabilitation.

Concern

An accident resulting in a traumatic injury to a worker is a sudden, potentially devastating experience with far-reaching implications for the injured worker, his future and that of his family. This is no time to present him with vague ambiguities and benign neglect. The adjuster must recognize and demonstrate an understanding of the worker, his reaction and that of his family to the injury and its potential effect on their future. An early demonstration of concern and a sincere effort to assist the worker in receiving all the benefits to which he is entitled, including rehabilitation, will often eliminate disputes over issues arising from the injury.

Communication

Perhaps one of the main barriers to successful rehabilitation and claims disposition is poor communication, or the absence of communication. Whether this barrier is present at the onset of the injury, or develops at a later stage in the claim, it can result in exacting a heavy toll on the injured worker and his family, the employer and

the compensation system alike. A dearth of information to the injured worker regarding his rights, extent of benefits and how to secure them and his responsibility for meeting certain requirements can lead to the worker acting on erroneous information sought from inappropriate sources. This may result in the claims adjuster taking action which adversely affects the worker and sets the tone for the course and eventual disposition of the claim.

A simple and most desirable way of providing the injured worker with information on his benefits, rights and responsibilities is through the employer at the time of injury. This of course requires the employer to be sufficiently knowledgeable of the state compensation laws and attendant matters. This requirement is entirely reasonable, as the employer is the responsible party for damages sustained by a worker in the performance of his job. It is a matter of historical reality, however, that the claims adjuster, as a representative of the employer is the likely party with whom the injured worker will have the most contact throughout the duration of his claim. The extent to which the adjuster is available to communicate with the injured worker and advise him of what the provisions are for rehabilitation and other services, can have a significant bearing on his orientation to litigate or cooperate in the rehabilitation process.

Some insurance companies take a rather progressive approach in this regard. Instead of waiting to be contacted by the severely injured worker, as a matter of standard company policy, the adjuster pays a personal visit to the worker and his family in the home or hospital to determine what their needs and concerns are as a result of the injury, and to explain as nearly as possible procedural matters and the series of events most likely to occur in the course of the claim. Going a step beyond this, the adjuster assigns a rehabilitation counselor who works with everyone involved through the collection of information pertinent to the rehabilitation and ultimate disposition of the case, and who serves as the major communication link between the worker and his family and all other parties in the compensation system.

Coordination

Successful rehabilitation requires considerable coordination. The early assignment of a competent rehabilitation counselor is an appropriate step toward achieving this. The counselor is able to direct the initial emphasis on the worker and the problems presented by the injury, and to subsequently expand the focus to include all other factors within the context of the compensation system pertinent to the eventual outcome of his return to the work force and resumption of a productive life. Medical treatment and course of recovery, remaining physical capacities and abilities and opportunities for return to direct employment can be used by the counselor and the injured worker to develop a realistic plan. Now is the time for the who, what, where, when and how to be glued together and set in motion for the achievement of a return-to-work goal.

Cooperation/Commitment

A rehabilitation plan will not realize its purpose unless the parties involved bring to it a sufficient level of commitment to ensure its success. Good faith, cooperation and understanding of respective roles, rights and responsibilities are ingredients necessary to ensure commitment to the rehabilitation effort.

The employer at the time of injury must make a sincere effort to provide the recovered employee appropriate, safe work commensurate with remaining physical abilities and skills. The employee must be realistic and understand his responsibility to cooperate with the employer in a reemployment plan. The counselor must meet the responsibility of counseling the worker toward exploring existing opportunities for direct return to work. The claims adjuster, after agreeing to the plan, must act in good faith by providing timely compensation payments and other services necessary to support the plan. The attorneys must act responsibly by counseling their clients to fully cooperate in the rehabilitation effort. All parties must be realistic and flexible to allow for amendment of the plan if change is needed to ensure achievement of the ultimate return-to-work goal. The workers' compensation agency must provide sufficient administrative oversight and monitoring to ensure that all parties clearly understand and meet their responsibilities.

(5) PROVISION OF INCENTIVES, REMOVAL OF DISINCENTIVES TO REHABILITATION.

A rehabilitation program which makes early identification of workers needing rehabilitation, provides for early return to direct employment, uses competent rehabilitation providers and maintains an atmosphere conducive to rehabilitation, may fall short of fully achieving the primary objective of a workers' compensation system unless it maintains sufficient incentives and removes disincentives in the rehabilitation of injured workers. Caution must be exercised so that expectations regarding rehabilitation are not based on the premise that good faith efforts on the part of all parties in the system will spontaneously

occur. There must be a realization that basic human nature usually requires the existence or application of stimuli necessary to create sufficient incentives before actions are taken to achieve a desired goal.

Incentives

Proper Rating of Employers. Authorities in workers' compensation have suggested internalizing the costs of work-related accidents and diseases by properly rating employers will support the safety objective of a workers' compensation system. The Interdepartmental Workers' Compensation Task Force's recommendation that experience rating should be extended to small as well as large employers in an incentive to reemploy injured workers. (Interdepartmental Workers' Compensation Task Force, 1977). Experience rating permits a "before-the-fact" look at an employer's safety and reemployment record over a specified period of time. If the record is good, the employer is given a credit toward future premiums.

A similar incentive exists in retrospective rating where the employer pays a fixed advance premium based on his classification rate and estimated payroll. His loss experience is assessed after the policy has been in force for a predetermined period of months. Depending on his experience, he may be reimbursed for a portion of the advance premium.

A detailed discussion of the intricate features of rating methods is not intended. They are offered in light of their suggested use by authorities in workers' compensation as incentives to employers in rehiring their injured employees. The insurance industry should provide assistance and information on rating to employers as a part of loss-control services to them.

Targeted Jobs Tax Credits. As part of the Revenue Act of 1978, Congress created the Targeted Jobs Tax Credit (TJTC), which gives private-sector employers an incentive in the form of tax credits to hire certain targeted groups including vocational rehabilitation clients. New legislation was passed in August 1981 which allows employers to claim a full two-year credit on all certified employees. The TJTC credit is based on 50% of the first $6,000.00 in wages paid to a qualified employee during the first year of employment, and 25% of the first $6,000 in wages paid during the second year. The potential "in-pocket" two-year savings can amount to as much as $3,870 per eligible employee, depending on the amount of wages paid and the employer's tax bracket. The program requires minimal paperwork on the part of the employer. The knowledgeable rehabilitation counselor is aware of this incentive and should readily make prospective employers aware of its features when assisting the injured worker in returning to employment.

Second Injury Fund. Placement of the partially disabled worker is difficult at best, depending on the extent of the disability, age, education background, skill level of the disabled person and the prevailing job market. The task is made more difficult by employer reluctance to hire the handicapped. While a cure-all to eliminate this reluctance is not likely to exist, the workers' compensation system can provide a remedy to at least reduce the fears of employers surrounding hiring a worker with an impairment, through establishing a second injury fund. The National Commission has suggested that second injury funds serve two intents: to encourage employment of the handicapped and to spread the risk associated with pre-existing impairments among employers equitably. Both intents are applicable for purposes of this discussion.

A second injury fund within the workers' compensation system presents a remedy to deal equitably with a situation where the second injury would not have occurred had the prior impairment not existed, or where the degree of impairment resulting from the combination of the prior and subsequent injuries is more serious than the total effect of the two injuries considered separately. The fund provides full compensation for the worker who suffers a second injury, and simultaneously allows the employer to be responsible only for the benefits resulting from the second injury.

The second injury fund can help a handicapped worker get a job if employers are aware of the existence and nature of the fund. As suggested by the National Commission, the workers' compensation agency can encourage rehabilitation and employment of industrially handicapped workers through wide publication and interpretation of eligibility requirements.

Substantial Maintenance. That the basic needs of injured workers and their families continue during rehabilitation is too obvious for argument. It is worth emphasizing, however, the importance of keeping this in mind when discussing incentives which will enhance the rehabilitation effort. Total compensation should of course continue during the period of rehabilitation. Additionally, maintenance payments to offset extra expenses such as transportation costs incurred by the worker while undergoing rehabilitation should be provided. This realization is prevalent in the compensation community as most systems provide such incentives.

Removal of Disincentives

Premature Settlements. Perhaps one of the greatest deterrents to rehabilitation in workers' compensation is the settlement of a claim before an injured worker undertakes or completes rehabilitation. Larson notes:

> One of the worst enemies of the rehabilitation program is the reckless, lump-summing of permanent disability awards, since this usually means that the claimant loses all benefit of continued surveillance of his case, and often finds himself in a few years with neither money nor competitive earning ability. (Larson, 1980).

Attempts by any party in the system to settle a workers' claim prior to the worker undertaking a rehabilitation effort should not be allowed by the workers' compensation agency, unless it has been determined after careful consideration that settlement is in the best interest of the injured worker. Factors and conditions to be considered are too varied and numerous in each individual case to allow a complete discussion in this report. The primary aim is to motivate an injured worker to undertake a supervised rehabilitation program designed to restore his ability to earn a living as a productive worker, rather than to allow him to persist in "foot-dragging" based on the expectation of receiving the "pot of gold" at the end of the rainbow. The workers' compensation agency should ensure that all parties in the system understand the policy regarding settlement and rehabilitation.

Excessive Litigation. As previously discussed, excessive litigation serves no useful purpose in the rehabilitation process. It is likely to be a primary obstacle to successful rehabilitation of industrially injured workers. Excessive litigation serves to obscure the goal of rehabilitation in achieving the primary objective of workers' compensation. It causes the focus to shift from restoring the injured worker's competitive earning ability to highlighting his disability. In the ensuing process, rehabilitation is not used as an effective tool for the long-range benefit of the injured worker. It becomes a bargaining stick employed by the worker's attorney in the quest to obtain his pot of gold. It is simultaneously used as a trade-off carrot by the insurer's attorney to limit future liability. The workers' compensation agency can provide an effective remedy to this unacceptable paradox by reducing the need and opportunity to litigate, through maintenance of an effective delivery system of rehabilitation services. As suggested by the National Commission, litigation may occur less frequently if state agencies provide enough positive assistance to workers who are unable by themselves to deal with the complexities of the law. Regulations, along with definitive procedures and guidelines for rehabilitation services, aggressively administered, would remove much of the opportunity to litigate.

Other Stimuli

There are likely to be a few cases in which some workers may hesitate to restore their earning capabilities because of a possible reduction in benefits. Although these instances may be rare, they are to be expected and must be dealt with if the compensation system is to have an effective rehabilitation program. Workers who refuse rehabilitation services, or who sabotage rehabilitation efforts by passive-aggressive means, should be encouraged to cooperate by having their benefits temporarily suspended during the total period of noncooperation. A similar provision acting upon the employer should also exist. This provision is contained in many compensation systems and can be an effective stimulus to ensure cooperation in the rehabilitation process.

Part Two

Evaluation & Recommendations

Evaluation of rehabilitation in the Alaska workers' compensation program, with recommendations for changes

INTRODUCTION

The first workers' compensation act was passed in Alaska in 1915. The law, which limited coverage to miners, permitted employers and employees to elect coverage under the act. Provisions for a schedule of lump-sum benefits were included. The act did not include provisions for medical and rehabilitation care or a second injury fund.

The current act provides for expenses for vocational rehabilitation to be paid out of that portion of the Second Injury Fund exceeding $10,000. Persons undergoing rehabilitation are entitled to receive extra compensation for maintenance during the period of rehabilitation. The total expenditures for maintenance, training, necessary transportation and other rehabilitation services may not exceed $10,000 for one person. (See Appendix B for chronological changes in the law from 1915 to 1981.)

The 1972 Report of the National Commission significantly influenced states' workers' compensation legislation over recent years. Many states have amended their laws to permit adoption of most, if not all, of the 19 essential recommendations made by the Commission. The Alaska Workers' Compensation Act is in compliance with 14 of these essential recommendations. (U.S. Department of Labor, 1981). Three of these hold positive implications for vocational rehabilitation.

Two of the essential recommendations call for the removal of statutory limits on dollar amount and passage of time for medical care and physical rehabilitation. Students of industrial rehabilitation have long recognized quality medical and physical rehabilitation treatments as necessary precursors to successful vocational rehabilitation. This long-standing belief is supported by the Commission's recommendation for inclusion of these benefits in a workers' compensation program.

The third essential recommendation which affects vocational rehabilitation, and with which the Alaska workers' compensation program complies, provides for the replacement of a substantial portion of the worker's lost wages during the period of disability. As previously discussed, the basic needs of the injured worker and his family continue in spite of the injury. Anxieties regarding the family's ability to meet these needs are legitimate and must be sufficiently abated if the worker is to make a satisfactory recovery and return to gainful work. Unresolved anxieties produced by an inadequate source of income to meet basic needs will interfere with the rehabilitation process. As noted by the Commission: "A worker may be in such dire circumstances that he may be forced to return to work before he has properly recovered or he may become so demoralized as to be indefinitely disabled." Substantial protection against interruption of income during rehabilitation prevents this and enhances the prospects for successful rehabilitation.

Efforts of the Division of Workers' Compensation to improve its service delivery system are worthy of discussion here. The Division has recently implemented an automated system which provides an effective tool for capturing and managing complex interdependent sets of data and for releasing staff resources to resolve client problems promptly. It also addresses program quality in a legal sense by providing access to precedence information, thereby reducing the ad-hoc nature of Workers' Compensation Board decisions. Access to claims filed in the field offices will enable compensation officers to resolve disputes in the early stages and thus will reduce the number of board hearings. This will consequently reduce litigation and its costs for all parties. Additionally, the Division has recently implemented a comprehensive compensation report which will enhance its automated system. Training sessions have been provided to insurers on the proper use and completion of the new compensation report.

The board has submitted proposed changes in regulations in Title 8 of the Alaska Administrative Code dealing with workers' compensation and vocational rehabilitation, to clarify the Alaska Workers' Compensation Act. Hearings are currently being held on these proposed changes. (See Appendix C.)

A brochure, explaining benefits to injured workers covered by the Workers' Compensation Act, was published approximately eight months ago and has been widely distributed. Similarly, a handbook for employers is presently being prepared for distribution in the near future. Both publications should enhance the delivery system of the Alaska Workers' Compensation Act.

The board's increasing efforts to address the rights and responsibilities of all parties in the rehabilitation process are reflected by its more recent decisions. Applications for compromise and release settlements, which preclude the worker from engaging in or exploring rehabilitation alternatives prior to settlement, are being disallowed or at the very least, discouraged. The board is taking an active role in ordering vocational evaluations to establish the feasibility of return-to-work plans prior to approving them.

The administrative officer for the Second Injury Fund has been provided additional staff, in

the relentless effort to more efficiently administer the fund and oversee rehabilitation plans requiring Second Injury Fund expenditure. Workers' Compensation officers have been shifted to allow more direct contact with injured workers and other parties to provide individual assistance in rehabilitation and other benefit matters. This shift permits more field visits by the officer as the Division continues in its efforts to improve the delivery system to all parties.

Discussion of Data

Although the Alaska workers' compensation program has many strengths, recording and maintaining baseline data pertinent to rehabilitation is not among them. Gathering quantifiable data from all sources in the system was difficult, due to the incomplete nature of available records.

The primary providers of vocational rehabilitation services to injured workers in Alaska are the state vocational rehabilitation agency and two private rehabilitation firms. The state agency and one of the private firms supplied data retrieved from their automated data systems. Collection of data from the other private firm was precluded due to incomplete records which lacked essential information pertinent to the study. Limitations exist for the purpose of comparing data collected from the two sources.

First, data for the state rehabilitation program reflects a three-year period for fiscal year 1978 through fiscal year 1980. Data supplied by the private rehabilitation firm is for the period of July 1, 1980 through July 31, 1981.

Second, terms common to rehabilitation of disabled persons have several definitions for the purposes of statistics, depending on who collects and records the data. For example, a workers' compensation rehabilitation program, for purposes of closure statistics, defines a successfully rehabilitated worker as one who has 1) maintained paid employment for at least 60 days; 2) in a job consistent with restrictions imposed by the disabling condition. The state rehabilitation program considers a successfully rehabilitated person as one who has completed a rehabilitation program and has 1) maintained paid employment for at least 60 days in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) has not returned to work, but has been restored to an optimum level of function such as an unpaid homemaker. The private rehabilitation firm describes a successful case as one in which the injured worker 1) returned to paid employment in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) whose claim was closed or denied as a result of involvement of the rehabilitation firm. It is important to keep these limitations in mind when making comparisons between data presented for the two sources. Tables 5 and 6 present data received from the state vocational rehabilitation program. Tables 7 and 8 present data received from the private rehabilitation firm.

Although data limitations do not allow unequivocal conclusions to be drawn concerning workers' compensation rehabilitation in Alaska, several widely accepted ideas are supported by the figures presented in the tables. For both the state rehabilitation program and the private rehabilitation firm, the earliest referrals become, on average, the least expensive cases. While there is an anomaly in the trend at 19-24 months where both providers experienced an unexplainable dip in costs, the general direction is one of increased costs as the time between date of injury and the date of referral to rehabilitation increases. There appear to be differences between the state rehabilitation program and the private firm in terms of average cost. The private rehabilitation firm shows 75% of the cases with costs for services below $2,500 as reflected in Table 8a. A comparable figure for the state program can be seen in Table 6a, which shows 64% of the cases with costs for services below $2,500. This difference may be explained in several ways. First, as noted in Table 5, the average time from the date of injury to the date of referral to rehabilitation is 16.8 months for the state program and 11.8 months for the private rehabilitation firm as noted in Table 7. Given the relationships expressed in Tables 6b and 8b, it is reasonable to expect the state program's average costs per case to be higher than the private firm's cost per case. A second factor affecting costs is the average time spent in the rehabilitation process. The average number of months spent in the rehabilitation process for the injured worker served by the state program is 27 months for fiscal year 1980, as can be seen in Table 5. A comparable figure for the private firm is 7.4 months, as shown in Table 7. A third explanation for cost differences between the two programs may be reflected in Table 5 which shows 21% of the cases closed by the state program in fiscal year 1980 involved training, as compared to 3% of the cases for the private firm, which can be seen in Table 7. Training costs for tuition, books and supplies clearly add to the overall costs of services.

Table 5 shows that as the percent of workers receiving college training has decreased since fiscal year 1978, the percent of workers successfully rehabilitated has increased. This inverse correlation is consistent with reported results of the

TABLE 5. Data supplied by the Alaska Division of Vocational Rehabilitation (DVR).

Period	Total Cases Closed	Avg. Mos. in Rehab. Process	% College Training	# of Workers Successfully Rehabilitated	Avg. Cost/ Case	Avg. Cost/ Successful Case
FY80	61	27	21	33 (54%)	$2,280	$3,505
FY79	50	23	36	22 (44%)	1,615	2,821
FY78	48	32	38	20 (42%)	1,468	3,021

Remarks: The average time from date of injury to date of referral to rehabilitation was 16.8 months (derived from DVR data and injury dates reflected in the Division of Workers' Compensation records).

TABLE 6. Cost analysis and referral period — (DVR)

For 72 randomly selected closed cases during fiscal year 78 thjrough fiscal year 80.

a. Cost	#		b. Referral period	#	Avg. Cost/Case
0- 500	18		0- 6 mos. after injury	14	$2,168
500-1,000	9		7-12	26	2,391
1,000-1,500	9	64% below	13-18	10	2,494
1,500-2,000	7	$2,500	19-24	7	975
2,000-2,500	3		25-30	10	2,332
2,500-3,000	3		30-36	4	2,492
3,000-3,500	2				
3,500-4,000	7		36 and over	1	8,258
4,000-4,500	1				
4,500-5,000	3				
5,000 and over	10				

Remarks: Figures for 72 randomly selected cases closed for fiscal years 1978, 1979, and 1980. Thus, an average time from date of injury to date of referral to rehabilitation derived from Table 6b, will not correlate with the figure of 16.8 months noted in Table 5.

TABLE 7. Data supplied by private rehabilitation firm.

Period	# of Surveyed Cases Closed	Avg. Mos. in Rehab. Process	% Rec'd. Training	# of Workers Successfully Rehabilitated	Avg. Cost/ Case	Avg. Cost/ Successful Case
July 1, 1980 through July 31, 1981	188	7.4	3	91 (48%)	$1,685	$1,847

Remarks. The average time from date of injury to date of referral to rehabilitation was 11.8 months as reported by the firm.

TABLE 8. Cost analysis and referral period — private firm. For 188 case files closed between 7/1/80 and 7/31/81.

a. Cost	#		b. Referral period	#	Avg. Cost/Case
0- 500	49		0- 6 mos. after injury	44	$1,414
500-1,000	36		7-12	18	1,670
1,000-1,500	28	75% below	13-18	9	2,003

2,000-2,500	13		25-30	7	1,926
2,500-3,000	12		over 30	6	2,198
3,000-3,500	11				
3,500-4,000	10				
4,000-4,500	4				
4,500-5,000	2				
5,000 and over	7				

study conducted by the California Workers' Compensation Institute, as well as beliefs embraced by members of the workers' compensation community regarding a higher success rate of shorter and less expensive programs over longer and more expensive programs.

While many inferences can be made from the data presented in Tables 5 through 8, it must be kept in mind that the percentage of injured workers involved in rehabilitation with respect to the total number of workers experiencing lost-time injuries is small. The Division of Workers' Compensation processed an average of 6,838 lost-time injuries for fiscal years 1978, 1979 and 1980. The administrator of the Second Injury Fund estimated 200 to 250 injured workers were determined eligible for fund expenditures in fiscal year 1980. This does not include those workers provided direct placement and other services, however, where expenditures from the fund were not required. It cannot be determined that a certain percentage of workers suffering lost-time injuries in a given fiscal year will receive rehabilitation services within that same fiscal year. Based on the estimate of the Second Injury Fund administrator, however, 3 to 4% of these workers eventually become eligible for such services. Table 9 presents comparable data for the state rehabilitation program and the private rehabilitation firm of such factors as the percent of workers with lost-time injuries who were provided services and the percent of workers with lost-time injuries who were successfully rehabilitated.

Survey of Injured Workers

A survey was conducted to measure the post-injury economic status of injured workers and to examine their reactions to the delivery system of rehabilitation in the Alaska worker's compensation program.

Injured workers surveyed fell into two main groups. The first group included workers who had signed compromise and release agreements which did not include provisions for rehabilitation benefits. Out of approximately 1,000 of such workers, 468 were randomly selected to be included in the survey. The second group included 142 injured workers who were certified as eligible for and referred to rehabilitation. A total of 610 injured workers were surveyed from the two groups.

Due to time constraints, problems experienced in obtaining correct addresses and incomplete answers to all questions, response to the survey was limited to the point that no definite conclusions can be drawn.

The survey called for subjective evaluation by injured workers of the rehabilitation services they received. The overriding concerns expressed by injured workers were the inordinate delays they experienced before referral to rehabilitation occurred, the lack of information available to them regarding their entitlement to rehabilitation benefits and the complexity of the system which necessitates obtaining attorney services. These concerns support the argument for positive administration and assistance by the Division of Workers' Compensation.

1. EARLY IDENTIFICATION OF INJURED WORKERS

A basic goal of rehabilitation in workers' compensation is the early identification of injured workers who may not be able to return to the job held at the time of injury, or who may eventually return to their regular work with comprehensive vocational rehabilitation services. In either case, the workers' compensation program must maintain systematic procedures for the reporting of these injuries by the insurance company and the screening of these reports by the workers' compensation agency. The Alaska workers' compensation system does not maintain such a procedure. The insurance companies are not required to file reports, timely or otherwise, indicating a worker's need for rehabilitation services or identifying the workers who are eventually provided these services. Based on available data, it appears that injured workers are not timely identified or referred for rehabilitation services in the Alaska

TABLE 9. Comparable rehabilitation data for Alaska workers' compensation program.

Provider of Services	# of Lost Time Cases	Closed Cases Received Services			Injured Workers Successfully Rehabilitated			Avg. Mos. in RHB	Avg. Cost per Case
		#	% Lost Time Cases	% Received Training	#	% Closed Cases	% Lost Time Cases		
1/ Private Firm	7,784	188	2.4	3	91	48	1.1	7.4	$1,685
2/ DVR	6,356	61	1.9	21	33	54	0.5	27	3,505

2/ Data provided by Division of Vocational Rehabilitation for FY 80.

workers' compensation system. There is no universally accepted, hard and fast rule regarding the point at which an injured worker should be referred to rehabilitation. Average recovery time for the bulk of industrial injuries, back strains and sprains, and the acuteness of other more serious injuries serve as guidelines for most workers' compensation agencies in deciding when to initiate vocational rehabilitation services. While specific time frames vary among workers' compensation agencies, the general rule of thumb applied is, services should be initiated as soon as it appears the worker is unlikely to be able to return to his pre-injury employment. Using this rule of thumb, several study groups suggest 120 days of continuous lost-time as the time when reports regarding the worker's need for services should be filed. Administrative rules of the Oregon workers' compensation program range from within 96 hours of the insurer's knowledge of seriously injured workers who are hospitalized, to 90 consecutive days of lost-time for less seriously injured workers. Additionally, workers who have suffered intermittent lost-time of 190 days from the date of injury must also be reported to the Oregon Workers' Compensation Division. The Idaho Industrial Commission has no specific reporting requirements of insurers or employe
When vocational rehabilitation services
needed as determined by the adjuster, a requ
made for the assistance of the Industrial Commission's rehabilitation staff in initiating rehabilitation services. Still, the Office of Workers' Compensation Programs, in administering the Longshoremen's and Harbor Workers' Compensation Act, requires the insurer to report injured workers who continue to receive compensation payments 60 days from the date of injury. Immediate reporting is encouraged of workers who suffer catastrophic or acute injuries.

The workers' compensation agency, in attempting to meet the early identification goal, must balance the reporting requirements of the insurer with its capability to timely screen these reports. This capability is determined of course by the staff and resources of the workers' compensation agency. The purpose of timely reporting will be undermined if the agency is not sufficiently staffed to screen the reports and monitor provision of rehabilitation services to workers who need them.

Recommendation 1.1

That insurers employers report to the Division of Workers' Compensation:

a. all injured workers who experience continuous lost-time of 90 to 120 days from the date of injury, depending on the staffing level of the division, and

b. all acutely injured workers where an immediate determination can be made that the worker will not likely be able to return to the job held at the time of injury.

Recommendation 1.2

That the Division of Workers' Compensation screen reports no later than five working days from the date each report is received.

Recommendation 1.3

That subsequent to, or during the screening process, the Division of Workers' Compensation contact each reported worker. The purpose for contact is to explain the benefits to which the worker may be entitled and to set the tone for a positive rehabilitation outcome, by explaining the objective of rehabilitation, and the worker's rights and responsibilities in the rehabilitation effort.

Recommendation 1.4

That the Division of Workers' Compensation establish and publish the procedural mechanism to support the reporting, screening and contacting activities.

2. PROVISION OF REHABILITATION SERVICES BY COMPETENT COUNSELORS

The unusual characteristics of workers' compensation and the different approach required for successful rehabilitation, as this report has previously elaborated, are strong arguments for the use of counselors trained in industrial rehabilitation. While this training does not require an intimate knowledge of the law, it should include the ability to recognize the needs of the industrially injured population and the compensation community alike. The backgrounds of most rehabilitation professionals include formal training in rehabilitation or a behavioral science. However, institutions have traditionally failed to include substantial courses on workers' compensation in their schools of rehabilitation. Thus, the degree of competence required to achieve success in a workers' compensation rehabilitation program has generally been acquired through well-designed, in-service programs and practical hands-on experience.

Counselors presently providing rehabilitation services to injured workers covered by the Alaska Workers' Compensation Act are presumed to have sound backgrounds in basic rehabilitation principles. However, a review of rehabilitation plans, reports and correspondence, as well as views expressed by these counselors, raises questions regarding whether remaining critical elements are sufficiently present to meet the objectives of a workers' compensation rehabilitation program.

First, some counselors appear not to understand their roles as they attempt to interpret laws to the board regarding a worker's entitlement to rehabilitation benefits, and they inappropriately make recommendations to the board regarding settlement of workers' claims.

Second, it appears that some counselors are unable/unwilling to deliver services in a manner consistent with supporting the objectives of the workers' compensation system. Services are not timely delivered (six months to complete a vocational evaluation and make recommendations). Training plans are developed prior to pursuing opportunities for direct return to employment. Some plans do not clearly define the vocational objective of the worker, or provide information regarding the type, scope and time frames within which services are to be provided. In cases where the vocational goal is defined, subsequent reports do not reflect specifically what has been accomplished toward achieving the goal.

Third, some counselors believe the system should afford a "pure" environment within which rehabilitation services can be provided to workers. They should not be required to interact with insurance adjusters, attorneys or the board, as this interferes with their ability to effectively deliver services.

Finally, it appears that a number of counselors are unprepared/unwilling to accept the board's authority to make decisions regarding the rehabilitation of injured workers covered by the Act. Board requests for information in support of recommended plans are questioned or ignored. In some instances, attempts to coerce board approval of Second Injury Fund expenditures are made simultaneously to the counselor's overt resistance to the board's requests for information needed to support a plan recommended by the counselor.

Clearly, the lack of regulations, definitive procedures and guidelines for provision of vocational rehabilitation has affected the performance of counselors providing services to injured workers covered by the Act.

Recommendation 2.1

That pursuant to the adoption of regulations on vocational rehabilitation, the Division of Workers' Compensation establish, publish and distribute guidelines for providers of rehabilitation services in accordance with Recommendation 2.2 through 2.5 and the following time frames:

- Completion of vocational evaluation and plan recommendation—six weeks
- Complete development of plan—six weeks
- Direct placement program—three months
- On-the-job training—three to six months, depending on the skills to be acquired coupled with the skill level of the injured worker
- Vocational training—52 weeks (extensions subject to prior approval by the board)

Recommendation 2.2

That rehabilitation providers issue a report within 30 days of initial contact with an injured worker. Background information regarding the worker's age, education, work history and general medical condition, as well as a summary of activities conducted during the 30-day period, should be included in the report. Information regarding the next immediate plan of action should also be included.

Recommendation 2.3

That plans submitted for approval contain pertinent information as outlined in proposed regulations on Vocational Rehabilitation 8 AAC 47.040(b)(1) through (9).

Recommendation 2.4

That subsequent to implementing plans, rehabilitation providers issue monthly progress reports sufficient in content and scope to inform all interested parties of the progress being made toward achieving the vocational goal of the plan.

Recommendation 2.5

That approval by the board must be obtained prior to amendment, suspension or termination of an approved rehabilitation plan.

Members of the rehabilitation community in Alaska have expressed concern regarding the provision of rehabilitation services by persons with proper credentials. The Alaska Rehabilitation Association, an affiliate of the National Rehabilitation Association, reports it is currently taking steps to address this concern. The priority of the Association as reflected in its constitution and bylaws is the certification of rehabilitation professionals practicing in Alaska. In general, setting standards and ethics for rehabilitation practitioners is best left to the

professional associations. However, the basic objective of rehabilitation in a workers' compensation system must be kept uppermost in mind in establishing guidelines and standards for professionals providing services to industrially injured workers. The performance of rehabilitation providers must be measured against these standards, which the system must determine it needs in order to achieve the purpose for which the workers' compensation system was established. The timely return of injured workers to safe employment commensurate with that held at the time of the injury, the cost-effectiveness of services, and the understanding as well as the responsiveness of providers to the needs of injured workers and the compensation system alike are the ultimate credentials which will determine the suitability of rehabilitation professionals providing services in the compensation system.

3. PROVIDE FOR EARLY RETURN TO DIRECT EMPLOYMENT

The extent to which injured workers are provided opportunities for return to direct employment is a primary determinant of the ultimate success of rehabilitation in a workers' compensation program. Administrators of rehabilitation programs for the Idaho Industrial Commission and the Office of Workers' Compensation Programs (OWCP), as well as others in the industrial rehabilitation community, support this premise. The Idaho program states as its primary goal: "The earliest possible return of the injured worker to meaningful safe work." The OWCP, in an effort to improve its rehabilitation program, has developed/endorsed return-to-work programs for injured workers covered by the Longshoremen's and Harbor Workers' (LHCA) and the Federal Employees' Compensation Act (FECA). According to information received from the OWCP, 763 injured workers were successfully rehabilitated under the FECA for fiscal year 1981. Sixty-eight percent of these workers were reemployed by their previous employers. (See Table 10 for data on the rehabilitation programs of the federal acts).

Insurance companies can be instrumental in helping employers develop reemployment programs. A carrier for a large employer covered under the LHCA reports services provided the employer in establishing a reemployment program approved by the OWCP resulted in the employer rehiring 18 injured workers over a nine-month period during fiscal year 1981. A $1.25 million savings in projected compensation payments resulted from this effort. Additionally, the employer reported higher morale and a reduction in suspected fraudulent claims as additional payoffs. The benefits to be derived from reemployment of injured workers by their previous employers is obvious.

There is little evidence in support of Alaska employers providing measurable opportunities for reemployment of injured workers. One self-insured reported having an organized return-to-work program. Figures to substantiate this effort were not afforded. The risk manager of a major employer in Alaska indicated an extensive feasibility study has been conducted over the past year in preparation for developing a comprehensive reemployment program. A precious few employers reported limited efforts of temporarily assigning injured employees to light duty. On the whole, emloyers readily proclaim the nature of their business precludes rehiring their injured employees: their operations simply cannot accommodate workers with less than full body integrity. Insurers' comments contributed little to modify or change the complexion of this proclamation. Neither party admitted to having particular knowledge of how to improve this present state of affairs, although the suggestion of some insurers regarding performance of on-site job analysis, in cases of reemployment dispelled the notion of complete unawareness in this matter.

OFFICE OF WORKERS' COMPENSATION PROGRAMS

TABLE 10. Vocational Rehabilitation Performance Report FY 81.

Program	# of Compensated Lost-Time Cases	Cases Screened for Services		Cases Opened for Services			Injured Workers Successfully Rehabilitated				Avg. Mos. in RHB	Avg. Cost Succ. Case

Remarks: 1/ Longshoremen's and Harbor Workers' Compensation Act
2/ Federal Employees' Compensation Act

Recommendation 3.1

That insurers provide assistance to employers in developing programs for reemployment of injured workers.

Recommendation 3.2

That insurers/employers arrange for counselor services to include on-site job analyses and assistance in modification of jobs to enhance reemployment opportunities for injured employees.

Recommendation 3.3

That the Division of Workers' Compensation encourage the development and implementation of reemployment programs by providing positive monitoring/endorsement of the efforts of all parties.

Recommendation 3.4

That contractual agreements be negotiated between management and labor for reemployment/rehabilitation of injured union members.

4. MAINTENANCE OF ATMOSPHERE CONDUCIVE TO REHABILITATION

Rehabilitation is a process which does not occur in isolation. The conditions and atmosphere surrounding this process are primary determinants of its eventual outcome.

The element of concern is sufficiently intangible to render itself unmeasurable in a quantifiable way. It is therefore difficult to present an elaborate discussion on the extent to which insurers/employers in Alaska are concerned about their injured employees during the course of their claims. This would require a detailed examination of randomly selected files maintained by carriers, with particular notations made of such items as timeliness of first and subsequent compensation payments, timely and adequate provision of medical and rehabilitation services, the extent to which workers are advised of their entitlement to benefits, etc. Moreover, the quality of contacts between the injured worker and the insurer/employer would be difficult if not impossible to capture. The elements of communication, coordination and commitment lend themselves to more discussion, particularly in regard to rehabilitation.

In general, the extent and timeliness of communication with injured workers seem inadequate for the purpose of supporting a successful rehabilitation program. First, the lag between date of injury to date of referral, as previously noted, supports the conclusion that injured workers are not timely contacted and advised of their entitlement or potential need for rehabilitation services. Second, rehabilitation reports and other correspondence reflect communication is sporadic and generally inadequate to ensure the rehabilitation effort of a successful and cost-effective outcome. Progress in rehabilitation plans is not timely monitored or timely reported. Concurrently, coordination of activities necessary to develop realistic return to work plans is insufficient, so that inordinate delays and interruptions occur to the detriment of injured workers, the rehabilitation program and the compensation system alike.

As to the extent of commitment to rehabilitation in the Alaska system, the time lag from date of injury to referral for services, and the percent of lost-time workers provided services, coupled with the percent of lost-time workers successfully rehabilitated, indicate this element too, is inadequate to support a rehabilitation program.

Recommendation 4.1

That insurers/employers increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits.

Recommendation 4.2

That in the case of workers experiencing lost-time, who may need rehabilitation services, insurers/employers assign a counselor to contact the worker as soon as this determination can reasonably be made.

There is a developing trend among leading insurance companies to hire rehabilitation personnel who serve as a communication link between the injured worker and insurance company, as well as other appropriate parties in the system. These personnel assist in creating an atmosphere conducive to an early return to work and facilitate coordination and development of rehabilitation plans for those workers who may not be able to return to employment without training.

Recommendation 4.3

That insurers/employers consider hiring a rehabilitation professional to enhance their ability to effectively communicate with, and timely provide services for injured workers.

5. PROVISION OF INCENTIVES, REMOVAL OF DISINCENTIVES

Incentives

Experience and retrospective rating. The extent to which these methods are used in rating Alaska employers is unknown and is beyond the scope of this report. Their suggested uses by authorities in workers' compensation has been sufficient to present them as incentives for employers to reemploy their injured workers.

Recommendation 5.1

That insurers assist employers by providing loss-control services to assure appropriate rating consistent with their safety record and reemployment practices.

Recommendation 5.2

That to supplement the loss-control services provided by insurers, employers seek the assistance of the state Division of Insurance in rating matters and methods.

Targeted Jobs Tax Credits. According to the Division of Employment Security, Alaska employers rarely take advantage of this tax credit when employing the industrially injured worker. Several factors, such as eligibility criteria and employer awareness, may be influencing this. The extent to which counselors adequately advise employers of this incentive when attempting to place injured workers in unknown.

Recommendation 5.3

That counselors enhance their efforts to place injured workers by informing employers of targeted jobs tax credit provisions and by providing assistance necessary to facilitate employer participation in this program.

Additional Maintenance. Injured workers undertaking a rehabilitation program can receive up to $200 in additional maintenance to defray extra expenses incurred during their rehabilitation program. This provision appears to be adequately serving the purpose for which it was established in the Alaska workers' compensation program.

Second Injury Fund. The Alaska Workers' Compensation Act has provisions for a Second Injury Fund to be administered in accordance with orders and awards of the board. (AS 23.30.040(a)). Subsection (e) authorizes expenditures for rehabilitation expenses and maintenance during the period of rehabilitation which may not exceed $10,000 for one person.

When it comes to placing limitations on rehabilitation benefits in a workers' compensation system, there is an inherent problem in stating these limitations in monetary terms. More than likely, expectations and rehabilitation plans are designed around the upper limits of the dollar amount, rather than around what services are actually needed to make the injured worker employable. The injured worker believes his is an undeniable right to a program which costs $10,000, even though a less expensive program may be more appropriate to restore his employability. The counselor views the $10,000 as the worker's personal account which he has a right to exhaust by charging the costs of items and services superfluous to his rehabilitation program. In settlement negotiations, the attorney seeks to include $10,000 for rehabilitation benefits in the total settlement, which he argues is his client's right. All parties appear to have forgotten the basic tenet in a workers' compensation rehabilitation program: The injured worker's right to rehabilitation services coexists with the need of the worker for such services. The type, scope and duration of a rehabilitation program will vary with each injured worker, depending on such factors as skill level, education, age and extent of disability. It is therefore a reasonable assumption that the cost of services will vary for individual programs. Provisions for rehabilitation should be made with this in mind, which is the current practice in most compensation systems.

Recommendation 5.4

That language in AS 23.30.040(e) be changed from dollar amount to provide for necessary costs of rehabilitation services subject to board approval.

This provision would enhance continual efforts of the board to provide necessary expenditures for workers seeking to rehabilitate themselves back to the work place and at the same time, protect the investment of insurers/employers who support the fund.

There appears to be a lack of employer awareness regarding the existence or purpose of the Second Injury Fund and its provision for preexisting conditions, under AS 23.30.205. This incentive will not realize its basic purpose if employers are not aware of its nature or not encouraged to use the fund appropriately.

Recommendation 5.5

That the Division of Workers' Compensation increase employer awareness and encourage employer use of the Second Injury Fund in employment of industrially injured workers.

Increased publicity and eligibility interpretation will enhance this effort.

Provisions also exist for the board to make cooperative arrangements with insurance companies, private organizations and institutions, and state or federal agencies to provide rehabilitation services to injured workers covered by the Act. Through the end of fiscal year 1981, the board maintained a cooperative agreement with the Alaska Division of Vocational Rehabilitation. The agreement permitted transfer of lump-sum funds from the Second Injury Fund on a fiscal year basis, to the Division of Vocational Rehabilitation, for the provision of rehabilitation services to injured workers in the compensation system. Currently, a cooperative agreement does not exist between the two agencies. This is due to unresolved differences surrounding the board's authority to approve rehabilitation plans submitted by counselors of the Division of Vocational Rehabilitation, requiring Second Injury Fund expenditure. The wisdom of transferring lump-sum Second Injury Fund monies to the agency, and attempting to renew a cooperative agreement between the two agencies is questionable for at least three reasons. First, the obsolete practice of forming cooperative agreements between a compensation and state rehabilitation agency has been sufficiently discussed in Part One of this report. Second, removal of Second Injury Fund monies from the administration of the Commissioner of Labor, by transferring them to another agency which has no administrative oversight in the workers' compensation system, undermines the Commissioner's ability to effectively administer the fund in accordance with the orders and awards of the board. The last reason has legal implications. As the law clearly assigns the administrative responsibility of the fund to the Commissioner, and transfer of monies from the fund undermines the Commissioner's ability to discharge that responsibility, it would appear that meeting the requirement of the law is precluded by a cooperative agreement. This issue is of particular importance in view of the reluctance of the Division of Vocational Rehabilitation to respect the board's authority to approve rehabilitation plans requiring expenditure of Second Injury Fund monies.

Recommendation 5.6

That cooperative agreements involving transfer of Second Injury Fund monies to the Division of Vocational Rehabilitation be discontinued.

Recommendation 5.7

That criteria for development, recommendation and implementation of rehabilitation plans, in accordance with Recommendations 2.1 through 2.5, be applied to all providers of vocational rehabilitation services to persons covered by the state compensation laws.

Disincentives

Premature Compromise and Release Settlements. Authorities on workers' compensation are strong opponents of settlements which prematurely preclude an injured worker's participation in a supervised rehabilitation program. There is a real concern for the worker who settles his claim and releases his rehabilitation benefits. He may quickly exhaust his settlement funds and find himself with inadequate skills to earn a living.

That workers submit applications for settlements to fund proposed self-employment ventures, in lieu of participation in a supervised rehabilitation program, is common knowledge in the Alaska workers' compensation community. Almost equally as common, and particularly disturbing, are the recommendations for such plans without adequate documentation to support their soundness or feasibility. Motivations vary among the parties making unfounded recommendations for such plans.

> The injured worker views it as an opportunity to do what he has always wanted to do. Besides, he will not have to work as hard if he can work at his own pace.
>
> The insurer/employer suggests it as a mutual agreement which affords an equitable solution toward the disposition of the claim. It will also relieve the insurer/employer of any future liability related to compensation and rehabilitation benefits.
>
> The injured worker's attorney argues it will allow his client to get on with resuming a normal life. It will also afford the attorney an immediate appreciable fee.
>
> The rehabilitation counselor opines: "Given the worker's vocational evaluation results, his interests and motivation to succeed, the proposed venture will afford him a realistic vocational goal." It will also provide the counselor with much-needed relief from the task of developing a sound rehabilitation

plan, which has been difficult if not impossible to achieve in light of the worker's resistance to any plan other than the self-employment venture.

In instances such as these, all parties seem to lose sight of the goal of rehabilitation: the return of the injured worker to gainful employment by restoring the ability to earn a living. An injured worker's desire to start his own business is inappropriately equated with the goal of rehabilitation. A self-employment plan may restore the worker to gainful employment which will afford him a livable wage, and thus is a means to an end. An unsound plan, however, may not afford him a sufficient income and will thereby fail to achieve the ultimate goal of rehabilitation. This is not to suggest that all self-employment plans are unsound and thus should not be considered, or that all workers must participate in an approved rehabilitation plan before a claim can be settled. It is suggested, however, that each plan must be carefully evaluated for its soundness and potential for successfully returning the worker to gainful employment. In cases not involving self-employment plans or supervised rehabilitation programs, claims should be settled only after a determination has been made that to do so is in the best interest of the injured worker.

Recommendation 5.8

That as a general policy, the board deny settlement of claims prior to an injured worker's completion of a supervised rehabilitation program.

Excessive Litigation. Rehabilitation professionals providing services to injured workers in Alaska readily attest to the activities of both the plaintiffs' bar and defense attorneys as interfering in the rehabilitation process. Indeed, this seems to be borne out by testimony offered during the public hearings on workers' compensation, and in the claims files of injured workers. Excessive litigation serves little if any purpose in the rehabilitation process, and if allowed to exist, will undermine the primary objectives of rehabilitation. As suggested earlier, regulations, guidelines and well-defined procedures regarding rehabilitation will remove much of the need and opportunity to litigate. (See Recommendations 2.1 through 2.5.)

Other Stimuli. Parties who refuse to cooperate or who sabotage the rehabilitation effort by passive-aggressive means, should be encouraged to cooperate through the application of remedial penalties acting upon both the insurer/employer and the injured worker similarly. The board has authority to apply such remedies in the Alaska workers' compensation system. A review of the board's more recent decisions and orders reflects increased efforts to make sufficient application of these remedies in support of the rehabilitation objectives.

Administrative Organization. The key to an effective delivery system of rehabilitation benefits is the workers' compensation agency's active pursuit of its administrative obligations which this report has previously elaborated. The delivery system can perform well if the Division of Workers' Compensation has authority commensurate with its responsibility and is given the staff and resources sufficient to fulfill its obligations.

Recommendation 5.9

That the Division of Workers' Compensation acquire sufficient staff to develop and implement a rehabilitation program designed to administer and monitor the rehabilitation of industrially injured workers covered by the Alaska Workers' Compensation Act.

Recommendation 5.10

That the Division of Workers' Compensation establish procedures for collecting and analyzing data pertinent to determine the effectiveness of its rehabilitation program.

Members of the Alaska workers' compensation community must agree on the overriding objective of rehabilitation in workers' compensation. It is not an education benefit, a guaranteed training program or a money system, as is the view of some participants. It is not a legalistic system as some attorneys seek to make it. Neither is it a system solely designed to control claims and costs, which may be the view of loss-control technicians or claims adjusters. Instead, the resources and services are provided to restore the injured employee to work. The system must recognize and maintain this return-to-work objective if it is to achieve its basic purpose.

Appendix A

Glossary

adequate: sufficient for what is needed or required; delivering sufficient benefits and services to meet the objectives of the program.

catastrophic injury: damage to a body part caused by an acute, traumatic episode resulting in a severe anatomical or function loss (see injury).

experience rating: a method of rating based on the individual employer's previous loss experience relative to the average employer in his class and the statistical reliability of that experience.

developmental disability: a condition resulting from a physical or intellectual impairment as a consequence of abnormal neurological or cerebral development.

disability: a condition resulting in loss of earnings or earning capacity caused by an impairment.

gainful employment: paid employment which restores the injured worker to maximum self-support.

habilitate: to educate or train (the physically or mentally handicapped) to maximize their ability to function in society.

impairment: an anatomic or functional abnormality or loss.

industrial rehabilitation: restoration of earning capacity of a person whose disability is a consequence of a job-related injury or disease (see vocational rehabilitation).

injury: damage to the body resulting from an acute traumatic episode.

plan: a proposal of services to be performed by a rehabilitation provider with a goal of returning the injured worker to gainful employment.

regulations: rules applied by the board to govern the delivery system of worker's compenstion benefits.

rehabilitate: to restore to a normal or optimum state of constructive activity.

rehabilitation provider: any federal, state or local government agency, or any public or private entity performing services designed to return the injured worker to gainful employment.

retrospective rating: a form of experience rating under which an employer pays a premium which varies with his own loss experience during the policy period.

safe work: gainful employment consistent with a worker's physical and mental capacity and vocational skills.

second injury fund: a special fund which assumes all or part of the liability for benefits provided to a worker because of the combined effect of a work-related impairment with a pre-existing condition.

severe disability: a serious or grave condition caused by an anatomic or functional abnormality or loss, resulting in a loss of earning capacity.

vocational rehabilitation: a program of services, not limited to medical services, designed to restore an injured or disabled worker to gainful employment.

Appendix B

Chronological Development of Workers' Compensation in Alaska, 1915 - 1981

Year	Brief Summary of Laws and Changes
1915	First Alaska Workmen's Compensation Act passed. Covered miners only. Employers and employees permitted to elect not to come within the provisions of the Act. Schedule of lump sum benefit payments established. No provision for medical, surgical, hospital treatment, rehabilitation, and second injury fund. (Ch. 71 SLA 1915).
1923	Repeal of 1915 Act and passage of new law. Language and format of old Act for the most part contained in new law. Coverage extended to all employments except domestic service, agriculture, dairying and the operation of railroads as common carriers. Schedule of benefits increased in all classifications. (Ch. 98 SLA 1923).
1925	Amendment to place responsibility for providing medical, surgical and hospital treatment for injured employees on the employer. (Ch. 63 SLA 1925).
1927	Repeal of prior compensation laws and enactment of new law. Payments allowed under schedule of benefits increased. Temporary partial and total disability compensation increased from 50% of weekly wages to 65%. Interest at 8% per year permitted as a charge against employers on overdue payments to employees. Right to lien on property of employer for full amount of compensation owing. (Ch. 13 SLA 1927).
1929	Repeal and substantial reenactment of existing law. Definition of "child," "widower," and "married" added. (Ch. 25 SLA 1929).
1935	Amendment to change provisions relating to payments to beneficiaries. Employers no longer required to pay transportation costs of injured employees in connection with medical, surgical, or hospital treatment. (Ch. 84 SLA 1935).
1937	Amendment to make insurers parties defendant in actions or proceedings brought under the Act. (Ch. 63 SLA 1937). Amendment to change waiting period after an injury from one week to one day in addition to the day on which the injury occurred. (Ch. 74 SLA 1937).
1941	Amendment to fix time for payment for any temporary disability compensation, defining "wage earning capacity" of an employee. (Ch. 44 SLA 1941).
1946	Existing law repealed with enactment of new "compulsory" type law eliminating right of employees and employers to "elect" whether or not to come within the provisions of the law. Self-insurance by employers permitted. Schedule of benefits substantially the same as provided in the 1929 law. Second Injury Fund established. (Ch. 9 ESLA 1946).
1949	Section pertaining to liens to secure compensation modified. (Ch. 104 SLA 1949).
1951	Alaska Industrial Board reconstituted to include the Auditor in place of the Insurance Commissioner to serve with the Attorney General and the Commissioner of Labor. (Ch. 133 SLA 1951).
1953	Alaska Industrial Board again reconstituted and the Auditor replaced by the Insurance Commissioner. Other members remained unchanged. (Ch. 24 SLA 1953). Coverage extended from employers employing three or more persons to those employing one or more persons. Death and partial permanent disability benefits roughly doubled. Length of time employers required to provide medical and related treatment increased from one year to two years following injury. Period employees required to wait following an injury before compensation begins increased from two days to three days. Limited temporary disability payments to twenty-four months and provided a ceiling of $75 per week to any claimant. (Ch. 60 SLA 1953).
1955	Maximum weekly compensation to be paid during any temporary disability increased from $75 to $100. Employer liability for providing medical and related services increased from two to four years following the injury (Ch. 141 SLA 1955).

1959 A new and comprehensive workers' compensation law was passed for Alaska. Detailed provision on aspects of administration and insurance were included. The new law called for the appointment of an Alaska Workers' Compensation Board consisting of the Commissioner of Labor, one labor representative and one industry representative.

1960 Second Injury Fund contributions increased. In cases of fatally injured workers with no dependents, employers (carriers) must pay a flat $1,500 into the Fund. In-training maintenance allotments for injured workers increased from $50 to $100 per month.

1961 Public hearings held on the possibility of establishing a nonprofit exclusive state fund and the workers' compensation then in effect. Two legislative proposals for establishing a state fund did not pass.

1962 Insurers must provide claims adjustment facilities. Funeral expense allotment increased from $500 to $1,000. Executive officers permitted to waive coverage under the Workers' Compensation Act. Exclusiveness of liability clarified (fellow employees cannot be liable). Two year period for employer liability on medical treatment established, with the Board authorizing all treatment after that. Four-year limit for filing in case of occupational disease established.

1963 Rehabilitation benefits extended to compensate in situations where temporary total or temporary partial benefits have been exhausted. Penalty of misdemeanor established for anyone interfering with the selection of an authorized physician, or for improperly influencing the work of an authorized physician.

1964 Penalties added for failure to insure. Definition of injury broadened. Benefits increased for temporary total and permanent partial disability.

1965 $3,500 maximum allowed for all serious disfigurement of face, head, etc. Two panels established to assist the board in hearing claims.

1966 Second Injury Fund contribution rate increased to 5% of permanent partial losses. Spending limit for rehabilitation increased to $5,000 per case. Death benefits for survivors increased. Maximum weekly compensation increased from $81 to $100 per week.

1968 Board empowered to approve lump-sum payments in cases of unscheduled permanent partial injuries. Eligibility for Second Injury Fund money clarified. Maximum weekly compensation increased from $100 to $113.

1970 Permanent partial disability benefits increased. Contribution rate to Second Injury Fund increased to 8% of permanent partial disability losses. Maximum weekly compensation increased from $113 to $127.

1972 Benefits increased to scheduled permanent partial disability. Maximum weekly compensation increased from $127 to $175. Minimum increased from $25 to $65 per week. Employer liabiality, when the state, a home rule or other political subdivision of the state awards a contract, clarified. If the contractor fails to maintain a valid insurance policy, the state may either terminate the contract or continue the premium payments on the contractor's behalf.

1974 Section on benefit adjustment added to the statute. Benefits for temporary and permanent disabilities shall be calculated according to currently existing benefit rates, and not the rates at time of injury, except in cases where the new rate would cause a decrease in benefits. Death benefits increased for surviving spouse or children. Maximum weekly compensation for permanent total disability increased to $175.

1975 Five-step increase in maximum weekly benefit level passed. Maximum levels go from 80% of state average weekly wage on July 1, 1975 to 200% of state average weekly wage on January 1, 1981. Legislation doubles the maximum compensation allowed for scheduled permanent partial disabilities. Compensation rate for death benefits in case of surviving spouse only or children only, raised to 67% of deceased's average weekly wage. In cases of surviving spouse only, benefits to be paid until remarriage. $75,000 maximum total benefits for surviving spouse removed, as was $30,000 maximum for temporary

partial and permanent partial disability. Determination of state average weekly wage now based on three consecutive quarters of state wage data ending June 30th of the year in question.

1976 Out-of-state claimants receive adjusted benefit based on the ratio of a given state's average weekly wage, to Alaska's average weekly wage. National Council on Compensation Insurance designated the statistical agency for the Division of Insurance with respect to underwriting experience in workers' compensation insurance.

1977 Unscheduled permanent partial disability maximum compensation established at $60,000. Death benefits reduced for widows or widowers under age 52, except in cases where the widow or widower is permanently and totally disabled, at the time of the deceased worker's death. A Social Security offset established. Basis for calculating benefits changed. Average weekly wage in any one of the three calendar years immediately preceding the injury used in order to compute benefit levels.

1979 Workers' compensation coverage may be extended by a political subdivision to volunteer ambulance attendants and policemen. Workers' Compensation Board increased from five to seven members.

1981 Second Injury Fund solvency strengthened as the contribution base expands and the contribution rate becomes flexible according to the fund's reserves at year end. Expense limits for rehabilitation are increased. The Alaska Workers' Compensation Board increased to nine members. Reporting requirements for carriers strengthened to facilitate more accurate cost and injury data collection by the Division of Workers' Compensation. The Legislature funded a study of vocational rehabilitation of injured workers to be completed early in the Second Session of the Twelfth Legislature. Limit for rehabilitation expenditure increased to $10,000.

Appendix C

Proposed Alaska Workers' Compensation Board Regulations

CHAPTER 47

VOCATIONAL REHABILITATION

8 AAC 47.010. Goal of Vocational Rehabilitation. The board shall direct and provide for the vocational rehabilitation of employees entitled under the Act. Vocational plans formulated under the Act and this chapter must be designed to restore the injured employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.020 Duties of the Parties. (a) The employer, the self-insurer, the insurance carrier, and the employee shall promptly recognize the need for the evaluation of vocational rehabilitation and shall initiate necessary action to restore the injured employee to gainful employment as expeditiously as possible.

(b) The employee shall cooperate in all phases of vocational rehabilitation. The employee shall promptly and responsibly participate in a board-approved vocational plan when ordered to do so by the board. If the employee does not choose to enroll in a vocational plan, nothing in this chapter is to be interpreted so as to require the employee to do so. However, in cases where the employee chooses not to enroll in a vocational plan, or unreasonably refuses to complete a vocational plan, the degree of permanent partial disability will be determined as though the employee had enrolled in, and successfully completed, the vocational plan. The employee shall notify the board and the employer within 14 days of the first consultation with a vocational rehabilitation representative.

(c) The vocational rehabilitation representative shall notify the board and all interested parties within 14 days of the first consultation with an employee. Thereafter, the vocational rehabilitation representative shall file regular monthly reports with the board during the consultation period. Within 14 days of the final consultation, the vocational rehabilitation representative shall file a report of consultation which must contain findings, conclusions and recommendations regarding vocational rehabilitation. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.030. Evaluation Analysis. (a) No vocational plan may be initiated until board approval has been secured. Board approval may be secured by any party by filing a petition for initiation of a vocational plan, accompanied by a written evaluation analysis. Copies of the petition and the evaluation analysis must be served upon all parties and the administrator of the Alaska Second Injury Fund, in accordance with 8 AAC 45.060.

(b) A written evaluation analysis must be accompanied by copies of all medical reports referred to in the analysis and must, in addition, include

(1) an assessment of the employee's employable skills, including a synopsis of his work history and educational background;

(2) a summary of the disabilities limiting the employee's employment opportunities; and

(3) a specific accounting of the employee's pre-injury wage and an assessment of his post-injury wage-earning capacity.

(c) After the complete, written evaluation analysis has been filed the boar will review the factors discussed in the analysis and will determine whether the employee is able to return to his previous employment or to modified employment or whether, instead, direct job placement, on-the-job training or formal retraining is necessary in order to return the employee to gainful employment.

(d) If the board determines that formal retraining is necessary, it shall direct the employer or the employee, or both, to initiate a vocational plan in accordance with 8 AAC 47.040. The board will give preference to direct job placement and on-the-job training over a formal retraining program. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.040. Vocational Plans. (a) Following evaluation in accordance with 8 AAC 47.030, a vocational plan may be initiated by direction of the board or by any person. Vocational plans must be developed by a qualified rehabilitation representative designated by either the employer, the carrier, the self-insurer, the employee, or the board.

(b) Proposed vocational plans must be submitted to the board in the form of a petition by the person responsible for initiating the vocational plan. The petition must be in writing and must include

(1) the gainful employment objectives of the vocational plan, including estimated earnings and reasonable availability of gainful employment;

(2) the name and location of the educational institution, public or private vocational training agency, or company or business involved in the vocational plan;

(3) the nature, extent, and duration of services to be provided during the period of rehabilitation;

(4) the dates of commencement and expected completion of the vocational plan;

(5) a statement regarding the general financial condition of the employee;

(6) the amount of weekly income maintenance benefits, tuition, fees, and transportation costs, if any, and the time and manner of such payments to the employee during the period of rehabilitation;

(7) the employee's written acceptance of the plan, plus any comments the employee desires to make a matter of record concerning why the plan is in his best interests;

(8) the name of the rehabilitation representative who prepared the plan, a complete description of his or her qualifications, and the name and address of the representative's institution, agency, or company; and

(9) all medical, psychological, and vocational evaluation reports related to the case.

(c) Objections to a vocational plan must be filed in writing with the board within 10 days of the date of service of the plan upon the board.

(d) Upon receipt of written objections, or where it appears obvious that the employee and the employer are unable to reach agreement on the terms of the vocational plan, a prehearing conference will be scheduled. If agreement is reached at the conference, the board may approve the plan. If the differences cannot be resolved at the prehearing conference, the matter shall be set for a hearing. Hearings shall be held in accordance with the provisions of this chapter.

(e) Upon receipt of a proposed vocational plan acceptable to all parties concerned, or following a hearing, and after review, the board shall approve, disapprove, or modify the plan.

(f) Implementation of the plan must begin as soon as the employee is capable of participating in the program and medical opinion indicates the employee's recovery will not be impeded by participation in the plan. The plan shall begin upon the date of board approval or the date specified in the plan, whichever occurs last.

(g) In the event

(1) a vocational plan is not offered by the employer; or

(2) an employer-offered plan or a rehabilitation agency-offered plan is not accepted by the employee; or

(3) the board finds that the employee is eligible for a plan but the proposed plans are not effective,

the board, on its own motion or upon the petition of any party, shall make a determination by means of a hearing or hearings of the services necessary to restore the employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.050. Modification, Suspension, or Termination of Vocational Plans. Any party may petition the board for modification, suspension, or termination of a plan. The petition shall be treated as any other petition under § 050 of this chapter. The board shall order the modification, suspension, or termination if it finds

(1) satisfactory progress is not being made in the approved plan; or

(2) the plan is not likely to prepare the employee for gainful employment due to unexpected contingencies; or

(3) the employee refuses to complete the vocational plan approved by the board; or

(4) a more suitable plan becomes available. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.060. Vocational Rehabilitation Definitions. As used in this chapter

(1) "Gainful employment" means employment which is reasonably attainable and which offers an opportunity to restore the employee as soon as possible to maximum self-support, due consideration being given to the employee's qualifications, physical and mental condition, interests, motivation and incentives, pre-injury earnings and future earning capacity, and the present and future labor market.

(2) "Implementation of a plan" means commencement by the employee of an actual return-to-work plan of direct job placement, on-the-job training or vocational training in accordance with an approved vocational rehabilitation plan.

(3) "Initiation of a plan" means the creation and drafting of a written vocational rehabilitation plan.

(4) "Vocational rehabilitation" means a program of services, not limited to medical services, designed to restore an injured or disabled employee to gainful employment.

(5) "Vocational rehabilitation representative" means a person who possesses the special skills, knowledge, education, training, and experience necessary to develop and implement vocational rehabilitation plans.

(6) "Vocational rehabilitation plan" means the planning and providing of services, not limited to medical services, reasonably necessary to restore an employee to gainful employment. Such services include, but are not limited to, vocational evaluation, counseling, retraining, on-the-job training, and job placement assistance. (Eff. / / , Register).

RECOMMENDED CHANGES TO THE ALASKAN WORKERS' COMPENSATION ACT

PREPARED FOR

THE ALASKA CONFERENCE OF EMPLOYERS, INC.

% Jack Thompson

Air Van Lines

2216 Post Road

Anchorage, Alaska 99501

REPRODUCED BY THE

WORKERS' COMPENSATION COMMITTEE OF ALASKA, INC.

WITH THE PERMISSION OF THE

ALASKA CONFERENCE OF EMPLOYERS, INC.

Box 1647

Anchorage, Alaska 99501

PREPARED BY:

Edward L. Hite, Vice President
Daryl A. Cody Company
201 Danner Avenue
Suite 155
Anchorage, Alaska 99502

The Alaska Conference of Employer's, (ACE) a non-profit research co-operation, has commissioned this study which is designed to spell out in specific detail exactly what changes to the workers' compensation law are necessary to accomplish three objectives:

1. Reduce the waste of the compensation dollar on non-disabling injuries.

2. Reduce the waste of administrative, medical, legal and judical time and resource.

3. Maximize benefits and minimize costs.

This is the second study sponsored by ACE. The first, published in 1980, was commissioned to identify the problems associated with the workers' compensation program. It accomplished its objective by demonstrating the effects of misdirected incentives, subjectivity in benefit determination, and the unfairness of benefit structures. Another very important result materialized in that it put the legislature on notice that the business community was starting to cry for help.

There are only so many dollars available for compensation as the source of funds is not infinite. Employers who paid attention to claims could not only monitor the status of injured employees they could read their insurance company loss runs and form an impression of the effectiveness of their premium dollar. Their impression was negative, as they saw a waste of time, human resources, and productivity, all of which translate into premium dollars. Those premium dollars, insignificant in the past, were now a very major expense item which easily could determine the difference between a profit or loss for the business.

On the other side of the coin, the burdens endured by employees are often overwhelming when you consider the contortious an employee must go through to obtain what he considers a fair benefit. When a benefit structure is designed for the average person, everyone considers it unfair. When a social program pays the electrical lineman and the executive $33,600 for the loss of a hand resulting from an occupational injury, what is fair. The executive is probably back to work in a week, while the lineman is out of work for months.

These problems can be corrected, and this study was commissioned to define those problems involved and to create positive solutions designed to reduce the cost burden on employers while increasing or making the benefit structure more fair.

In order to convince readers that there is an incredible waste in the compensation premium dollar we needed data to support our theories. We found a total lack of statistical data of the type needed to draw factual conclusions. Therefore, as the result of a meeting in Seattle with industry leaders we decided to accomplish our task in two steps. First, using the data we did have, draw the best conclusions we could and complete the study. Second, was to simultaneously research a large group of recent claims to validate our conclusions. This method puts the credibility of this study in jepordy of being invalidated by the claim study, but the supporting opinions of everyone concerned made it mandatory that we accept the risk, as the probability of error was considered mimimum.

Alaska is not the first state to have its claims studied in this respect, as Florida, Louisiana, and Washington have already conducted the study. The Alaskan Workers' Compensation Act is structured the same as all the other laws in the United States and we have no reason to believe the results obtained in Alaska will differ from those obtained in other states. What was found in other states is that 70 percent of the injured workers who receive cash awards under the permanent partial disability section of the law suffered no economic loss subsequent to the payment of the award. This is a significant indicator of waste if an exceptionally large portion of the benefit dollars are paid in the permanent partial disability section of the law.

The best comparative data obtainable was gathered in Florida during 1977-1978, before their historic change to a wage-loss program. That data was selected for comparative purposes because there is also data gathered after the change to wage-loss which would enable us to predict the effects of our changes if they were similar. The data utilized from Florida is contained in a report prepared by the Bureau of Economic Analysis, Division of Economic Development, Florida Department of Commerce, published in October, 1981, page 7. The content of that report is so pertinent to our study it is added as Exhibit I.

Tables I and II on page 7, compare the percentage distribution of resolved

workmen's compensation cases by injury type, and the percentage distribution of benefits paid in resolved workmen's compensation cases by injury type, between Florida, Alabama, and Wisconsin.

The pertinent data displayed is the difference in percent distribution of permanent partial disability claims between states. As previously stated, 70 percent of the persons who receive cash awards under the permanent partial disability section of the law, incurred no economic loss subsequent to being paid the award. If a disproportionate amount of money is allocated to the permanent partial disability cases, it therefore follows that a significant amount of money is scattered among many claimants who had no economic loss.

In Florida, 30 percent of the claims fell into the permanent partial disability classification, and Florida allocated 67.2 percent of all claim dollars to those claims. In Alabama, only 7 percent were permanent partial cases and they consumed 37.5 percent of the claim dollars. In Wisconsin, 9 percent were permanent partial disability cases that accounted for 40.8 percent of the dollars. Florida had three to four times the number of permanent partial disability cases as Wisconsin and Alabama. Florida also allocated almost twice the percentage of dollars to those claims as did the other states.

The available data in Alaska indicates that our situation is very similar to that in Florida. The source of our data is the National Council on Compensation Insurance (NCCI) and is presented as Exhibit II. Utilizing the state average weekly wage we converted those statistics into comparative data. The results indicate that in Alaska, 24.15 percent of the claims are classified as permanent partial disability cases and we allocated 66.21 percent of all claim dollars to those claims. The claims study in progress at this time will add credibility to those statistics and most importantly, be current. The claim study has been commissioned by the State of Alaska and results will be made available in early 1982.

	Distribution of Claims		Distribution of Claim Dollars	
	Permanent Partial	Other	Permanent Partial	Other
Florida	30%	70%	67.2%	32.8%
Alaska	24%	76%	66.2%	33.8%
Alabama	7%	93%	37.5%	62.5%
Wisconsin	9%	91%	40.8%	59.2%

Note: A later Florida study placed the percentage of claims in the permanent partial category at 24 percent. See Exhibit I, page 22.

As in Florida, Alaska's workers' compensation law has a hole in the dyke containing the claim dollars. Alaska, like Florida, has an inordinate number of permanent partial disability claims and allocates 2/3rds of all claim dollars to those claims.

What is there about the typical permanent partial disability claim which accounts for its popularity and uncommon distribution of money? It is this section of the law which compensates the injured worker who incurs an injury which results in a permanent impairment of one of the body functions. The most predominate type of case is the common back injury. During the healing period, the employee is paid compensation to replace his average weekly wage, and this is the point where the claim gets very costly. Approximately 70 percent of these worker's return to their same job, same pay, same or other employer, and incur no further economic loss. However, that worker is entitled to an additional cash award for the future decrease in wages he may incur throughout his lifetime, as measured by a disability rating subjectively computed by his physician. The higher the rating, the higher the cash award, resulting in employees canvasing the medical community for a physician who will give a higher disability rating (at the employer's expense, called, doctor shopping). For the approximately 30 percent who do incur subsequent economic loss, they are often entitled to be retrained for a new occupation. A number of employees utilize attorneys in this case as the costs of retraining can also be paid in a lump sum along with the award for loss of future wage earning capacity. Many cases are settled on a compromise and release at this point, with the insurance company issuing a check. For those resourceful enough to obtain employment in their old occupation, they pocket the cash; others find new lines of related work. Few are actually trained. Adding to the cost, is the claimant's attorney's fee which is a percentage of the award paid to the worker. The employer must also hire an attorney to represent himself before the board. It is not difficult to visualize the dollar cost involved in these cases and thereafter wonder if the existing act is accomplishing its intended purpose. If the purpose of the original law was to distribute money by the buckets-full to people without economic loss, the intent of the law is being served.

This is Alaska's problem: This was Florida's problem until they changed their law to one based upon wage-loss. Gone are the cash awards for hypothetical loss of future wage earning capacity. Instead, the wage-loss program replaces future wages lost only when wages are actually lost and an employee's wage history can be monitored for as long as 10 years subsequent to reaching the date of maximum medical improvement. Also gone is the doctor shopping as an objective rating system replaces the subjective system. The change to wage-loss redistributed the dollars. For the 70 percent who had no economic loss it took dollars away and gave the 30 percent who actually had economic loss far more dollars. The balance was used for premium reduction.

As a result, Florida employers are enjoying workers' compensation rates 36.4 percent lower than the 1979 pre-wage-loss rates. Employee's who actually incur economic loss are enjoying a higher level of benefits without the hassel which accompanies the compensation systems as it exist in Alaska.

Our recommendation encompasses the wage-loss theory of compensation, and also changes numerous other sections to correct injustices to both the employer and employee, all directed towards making the system fair as perceived by all.

It is the author's opinion, that if the Alaska Workers' Compensation Act should ever be changed as suggested in this study, premium rates will decrease by 25 percent initially, and further decreases determined by company experience will result in a total reduction equal to 35-40 percent.

Before proceeding into our recommendations we wish to identify our major sources for the revisions.

For wage-loss related sections the Florida Workers' Compensation Act was heavily relied upon by modifying its provisions to meet the requirements of Alaska.

The second major source was a "model workers' compensation law" drafted in the 1960's and revised in 1974, by The Council on State Governments, entitled the Workmen's Compensation and Rehabilitation Law, Revised. Many of the existing provisions in the Alaska Act were taken from that "model law" as were many sections found in compensation acts throughout the nation. Portions of that document are attached for your information as Exhibit III.

The third source was "Larson, Workers' Compensation Law, by Dr. Authur Larson, wherein almost every facit of workers' compensation is discussed in

detail. Larson is a renouned authority on workers' compensation and his passages are liberally quoted by courts throughout the land. The Larson volumes were indispensable to this study.

In the following pages on a section by section bases we will enumerate the problems we found, describe our solutions, and indicate the source of the recommendation. Each section is reproduced in its entirety to enable the reader to comprehend the entire content of the section, even if the changes are minor.

New wording is underlined, and wording being deleted is capitalized in brackets.

AS 23.30.040
SECOND INJURY FUND

Problem and Solution:

1. Existing section utilizes the words "Permanent Partial Disability" in subsection (b) which is inconsistent with a wage-loss program. Change "Permanent Partial Disability" to "Permanent Impairment, Wage-Loss".

2. Subsection (e) authorizes vocational retraining and vocational rehabilitation and authorizes the payment of a maintence expense. This and other references should be combined in one section. Transfer content of subsection (e) to a new section, proposed AS 23.30.094, Rehabilitation

Justification:

1. Required in order to conform with overall recommendation in section 190, wage-loss.

2. See proposed section 094, Rehabilitation.

Recommendation:

AS 23.30.040 SECOND INJURY FUND

(a) There is created a second injury fund, administered by the commissioner of labor. Money in the second injury fund may only be paid for the benefit of those persons entitled to payment of benefits from the second injury fund under this chapter. Payments from the second injury fund must be made by the commissioner of labor in accordance with the orders and awards of the board.

(b) If an employee suffers a compensable injury which results in temporary total disability, temporary partial disability, permanent impairment, wage-loss [PARTIAL DISABILITY], or permanent total disability, the employer or insurance carrier shall contribute to the second injury fund. The contribution shall be made by one year from the date of the injury or on termination of the employee's claim, whichever is sooner. If the claim is not terminated within one year, subsequent contributions shall be made yearly until the termination of the employee's claim. The amount of the contribution is the product of the compensation to which the employee is entitled for temporary total disability, temporary partial disability,

permanent impairment, wage-loss [PARTIAL DISABILITY], or permanent total disability, [OR FOR REHABILITATION UNDER AS 23.30.191] and the applicable contribution rate set out in Column A of the subsection. By December 15 of each year the commissioner shall determine and make available to the public the applicable contribution rate for the following calendar year according to the reserve rate of the second injury fund in Column B of this subsection:

Column A	Column B	
Second Injury Fund	Reserve Rate	
Contribution Rate	At Least	But Less Than
(Percent)	(Percent)	(Percent)
6	0	50
5	50	75
4	75	100
3	100	125
2	125	150
1	150	175
0	175	-

(c) If an employee suffers a compensable injury which results in death and the employee is not survived by a widow, widower, child, or dependent relative eligible to receive death benefits under AS 23.30.215, the employer or insurance carrier shall pay $10,000 to the second injury fund.

(d) The board shall refund a payment made into the second injury fund if the employer or insurance carrier shows that it made the payment by mistake or inadvertence, or if it shows there existed at the time of the death of the employee a beneficiary entitled to benefits under AS 23.30.215.

[(e) THE BOARD MAY DIRECT AND PROVIDE THE VOCATIONAL RETRAINING AND VOCATIONAL REHABILITATION OF A PERMANENTLY DISABLED PERSON WHOSE CONDITION IS A RESULT OF AN INJURY COMPENSABLE UNDER THIS CHAPTER BY MAKING COOPERATIVE ARRANGEMENTS WITH INSURANCE CARRIERS, PRIVATE ORGANIZATIONS AND INSTITUTIONS, OR STATE OR FEDERAL AGENCIES. THE PERSON BEING RETRAINED OR REHABILITATED IS ENTITLED TO RECEIVE ADDITIONAL COMPENSATION FROM THE SECOND INJURY FUND FOR MAINTENANCE DURING THE PERIOD OF RETRAINING AND REHABILITATION IN THE SUM THE BOARD CONSIDERS NECESSARY, NOT TO EXCEED $200 A MONTH. THE TOTAL EXPENDITURES FOR MAINTENANCE, RETRAINING, REHABILITATION, AND NECESSARY TRANSPORTATION MAY NOT EXCEED $10,000 FOR ONE PERSON.]

(f) All amounts collected as civil penalties under AS 23.30.155 (c) shall be paid into the second injury fund.

(g) The attorney general may investigate claims and hire expert witnesses necessary to prevent fraudulent or excessive claims for money in the second injury fund.

(h) Administration expenses of the state under this section and AS 23.30.205 shall be paid from the general fund.

AS 23.30.045
EMPLOYER'S LIABILITY FOR COMPENSATION

Problem and Solutions:

1. Subsection (a) does not list the proposed new section, 094, Rehabilitation. Insert AS 23.30.094 in subsection (a).

2. Subsection (e) allows the Division of Vocational Rehabilitation (DVR) to place an injured worker on job training, work readiness, work therapy experience, or in work sampling programs without liability to accommodating employer. The Workers' Compensation Division of the Department of Labor desires the same advantage. Include the Department of Labor as it would facilitate the placement of these people in vital programs.

3. Subsection (c) places the liability on the State of Alaska for injuries incurred by employees placed in job training, work readiness, work therapy experience, or in work sampling programs, rather than on the employer responsible for the original claim. The State of Alaska assumes liability for subsequent accidents when an injured employee is placed in job training programs with accommodating employers. Is it necessary or desirable for the State to lift the liability burden off the previcus employer when the previous employer has the option of providing the same program voluntarily? No. Therefore, change "state" to "employer paying compensation".

4. Subsection (d) (e) and (f) require government entities contracting with "persons" to provide a certificate of workers' compensation insurance. Single proprietors, "persons", do not carry workers' compensation as they have no employees. The utilization of the word "employer" is more appropriate than "person" as the former contemplates someone who has employees and therefore is required to purchase workers' compensation insurance. Therefore, change "persons" to "employers".

Justification:

1. Rehabilitation, like medical and related benefits is an employer provided program and is appropriately inserted in Article 2, Duties of Employer.

2. Recommended by Division of Workers' Compensation, Department of Labor in H.B. 159.

3. The liability of the employer should appropriately extend until the employee is returned to work and all compensation liability is terminated.

4. Recommended by the Division of Workers' Compensation, Department of Labor in H.B. 159.

Recommendation:

Sec. 23.30.045 EMPLOYER'S LIABILITY FOR COMPENSATION

(a) An employer is liable for and shall secure the payment to his employees of the compensation payable under AS 23.30.50, AS 23.30.094, AS 23.30.095, AS 23.30.145, and AS 23.30.180 - AS 23.30.215 of this chapter. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the compensation to employees of the subcontractor unless the subcontractor secures the payment.

(b) Compensation is payable irrespective of fault as a cause for the injury.

(c) For a person eligible for vocational rehabilitation service under AS 23.15.180 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the office of vocational rehabilitation or the Department of Labor to give him on the job training, work readiness, [OR] work therapy experience, or work sampling, notwithstanding AS 23.30.196(c) and (d), the liability set out in (a) of this section applies to the [STATE RATHER THAN TO THE] employer paying compensation.

(d) No contract may be awarded by the state or a home rule or other political subdivision of the state to an employer unless the employer [PERSON] to whom the contract is to be awarded has submitted to the contracting agency proof, furnished by the insurance carrier, of current coverage by workers' compensation insurance from an insurance company or association authorized to transact the business of workers' compensation insurance in this state or proof, furnished by the board, of a current certificate of self-insurance from the board. The employer [PERSON] to whom

the contract is awarded shall keep his workers' compensation insurance policy in effect during the life of the contract with the state or political subdivision. If the state or the political subdivision of the state fails to obtain proof of coverage or self-insurance or to protect itself under (e) of this section, and an employee of the contractor is injured during the term of the contract, the state or the political subdivsion is liable for workers' compensation to the employee if the employee is unable to recover from the employer because of the employer's lack of financial assets. The state or the political subdivision is not liable, however, to the employee for workers' compensation if the employee can recover from the employer under (a) and (b) of this section.

(e) When a contracting agency of the state or a political subdivision receives notice that the workers' compensation insurance policy of an employer to whom the agency has awarded a contract has been cancelled due to nonpayment of a premium, without being replaced by a comparable policy, the agency may either terminate the contract with the employer or continue the premium payments on his behalf in order to keep the policy in force during the life of the agency's contract. If the agency chooses to keep the policy in force, it may deduct its payments from the contract price or bring an action against the employer to recover the amount of the payments. When the contracting agency receives notice that the board has revoked a certificate of self-insurance held by an employer [A PERSON] to whom a contract has been awarded, the agency may terminate the contract. This subsection does not limit the causes of action or remedies which the state or political subdivision may have against the employer.

(f) As used in this section "contractor" means an employer [A PERSON] who undertakes by contract performance of certain work for another and "subcontractor" means an employer [A PERSON] to whom a contractor sublets all or part of his initial undertaking.

AS 23.30.070
REPORT OF INJURY TO BOARD

Problems and Solutions:

1. Subsection (a) requires employers to submit the notice of injury

(form ADL 210) to the board within 10 days of acquiring knowledge of the claim. It is not a reasonable requirement as viewed by most employers. It is reasonable to expect an employer to submit the notice of injury to the board within 10 days after receiving the notice of injury form (ADL 210) in the business office of the employer. This relieves the employer from possible penalties for the reporting while maintaining the important requirement to make the first payment within 14 days of acquiring knowledge as required in AS 23.30.155.

2. Employees when injured have little or no knowledge of the workers' compensation act and obtaining a copy of the law will not help the average employee understand the benefits. Employees should be informed of compensation benefits with an easy to read booklet that offers correct advice. We have option to make the employer or the Division of Workers' Compensation responsible for notifying employees of the benefits. Time is of the essence as the injury has occurred and the employer has knowledge before the board, therefore, the employer should be responsible. It is also hoped that this communication responsibility will relieve some of the existing friction which develops between employees and employers when a claim occurs.

Justification:

1. By request of ACE.
2. Adopted from Florida Workers' Compensation Law, Section 440.185 (4).

Recommendation:

Sec. 23.30.070 REPORT OF INJURY TO BOARD

(a) Within 10 days from the date the employer has received in his business office written notice of an injury, death, disease, or infection as prescribed by AS 23.30.100(b), [KNOWLEDGE OF AN INJURY OR DEATH OR FROM THE DATE THE EMPLOYER HAS KNOWLEDGE OF A DISEASE OR INFECTION], alleged by the employee or on his behalf to have arisen out of and in the course of the employment, the employer shall send to the board a report setting out

(1) the name, address, and business of the employer;

(2) the name, address, and occupation of the employee;

(3) the cause and nature of the alleged injury or death;

(4) the year, month, day, and hour when and the particular locality

where the alleged injury or death occurred; and

(5) the otner information the board may require.

(b) Additional reports in respect to the injury and to the condition of the employee shall be sent by the employer to the board at the times and in the manner which the board prescribes.

(c) A report made under (a) or (b) of this section is not evidence of a fact stated in the report in a proceeding in respect to the injury or death on account of which the report is made.

(d) Mailing of the report and copy to the board in a stamped envelope, within the time prescribed in (a) or (b) of this section, is compliance with this section.

(e) If the employer or the carrier has been given notice, or the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier has knowledge of an injury or death of an employee and fails, neglects, or refuses to file a report of it as required by the provisions of (a) of this section, the limitations in AS 23.30.105 do not begin to run against the claim of the injured employee or his dependents entitled to compensation, or in favor of either the employer or the carrier, until the report has been furnished as required by the provisions of (a) of the section.

(f) Upon receipt of written notice of injury from the employee, the employer shall, within 14 days, deliver or mail to the injured worker at his last known address, a summary statement which sets forth in clear and understandable language, the rights, benefits, and obligations of injured workers under the Workers' Compensation Act, together with an explanation of its operation.

(g) An employer who fails or refuses to send a report required of him by this section or who fails or refuses to send the report required by (a) of this section within the time required shall, if so required by the board, pay the employee or his legal representative or other person entitled to compensation by reason of the the employee's injury or death an additional award equal to 20 per cent of the amounts which were unpaid when due. The award shall be against either the employer or his insurance carrier, or both.

PROPOSED AS 23.30.094

REHABILITATION OF INJURED EMPLOYEES

Problem:

No legislative guidance exists on rehabilitation.

Solution:

- Utilize the most effective rehabilitation methods and create cost incentives to encourage their use.
- Continue to study the rehabilitation problem to make better use of funds spent.
- Define the goal of a vocational rehabilitation program.
- Give employer first opportunity to provide retraining.
- Structure proposed statute to give all possible latitude to the Division of Workers' Compensation to utilize the results of a current study in progress to formulate regulations.
- Provide for necessary expenses.
- Coordinate with the Division of Employment Security for job placements.
- Provide employee incentive to utilize program.
- If employer does not offer re-employment, place rehabilitation under the control and direction of Board.

A great many state laws were reviewed to find other approaches to solving the problem. Many states had wording similar to our proposal in their statute and reports concerning the effectiveness of their law varied from poor to mediocre at the best. It became quite apparent that the effectiveness of the rehabilitation program depended not upon the statute wording but the implementation of the regulations which add concrete substance to the statute.

The State is studying the rehabilitation problem and have hired a very competent consultant who's recommendations will result in regulations guiding the operation of the plan. ACE therefore decided the best approach would be to recommend statutory language which spoke only to those areas which require statutory authorization and which allow the legislature to establish limits or bounds which ought not be exceeded.

Justification:

The "Workmen's Compensation and Rehabilitation Law, Revised," drafted by The Council on State Government, a model workers' compensation act, provided the format for our recommendation and is reproduced with minor changes. This model wording has also been adopted by Kansas, Idaho, New Mexico, Connecticut, West Virginia, and possibly others. The original is reproduced in Exhibit III.

Recommendation:

Sec. 23.30.094 REHABILITATION OF INJURED EMPLOYEES

(a) One of the primary purposes of this act shall be the restoration of the injured employee to suitable gainful employment. To that end it is obvious from the testimony given to the Labor and Commerce Committee that the most effective rehabilitation programs are those which involve re-employment by the employer, therefore, the board will give responsible employers who provide re-employment opportunities sufficient latitude to manage the rehabilitation of their injured employees.

(b) The division shall continuously study the problems of rehabilitation, both physical and vocational, and shall investigate and maintain a directory of all rehabilitation facilities, both private and public. The division shall approve as qualified such facilities, institutions, and physicians as are capable of rendering compentent rehabilitation services to seriously injured employees. No facility or institution shall be considered as qualified unless it is specifically equipped to provide rehabilitation services for persons suffering either from some specialized type of disability or general type of disability within the field of occupational injury and is staffed with trained and qualified personnel.

(c) An employee who has incurred an injury covered by this act shall be entitled to prompt medical rehabilitation services. When as a result of injury he is unable to perform the primary duties of his occupation or any other occupation for which he is qualified by education, training, and experience, he shall be entitled to such vocational rehabilitation services, including retraining, as may be reasonably necessary to restore him for suitable gainful employment. In all instances the board shall inquire if such services have been voluntarily offered and accepted. The board, on its own motion, or upon application of any party after affording the parties

an opportunity to be heard by the board, may refer the employee to a qualified physician or facility for evaluation of the practicability of, need for, and kind of service, treatment or training necessary and appropriate to render him fit for a remunerative occupation. Upon receipt of such report, and after affording the parties an opportunity to be heard by the board, the board may order that the services and treatment recommended in the report, or such other rehabilitation treatment or service as the board may deem necessary, be provided at the expense of the employer. Vocational rehabilitation training, treatment or service shall not extend for a period of more than 26 weeks except in unusual cases when by special order of the board, after hearing, and upon a finding, determined by sound medical evidence which indicates such further rehabilitation is feasible, practical, and justifiable the period may be extended for an additional period. However, no carrier or employer shall be precluded from continuing such rehabilitation beyond such period on a voluntary basis.

(d) Where rehabilitation requires residence at or near the facility or institution, away from the employee's customary residence, reasonable cost of his board, lodging or travel shall be paid for by the employer.

(e) Refusal to accept rehabilitation pursuant to an order of the board shall result in a 50 per cent loss of compensation for each week of the period of refusal.

(f) The division shall cooperate on a reciprocal basis with the vocational rehabilitation section of the Department of Education and the employment service of the Division of Employment Security, and may make cooperative arrangements with insurance carriers, private organizations and institutions or state or federal agencies, to restore the employee to suitable gainful employment.

(g) Temporary disability benefits paid pursuant to AS 23.30.185 or AS 23.30.200 shall include such period as may be reasonably required for training in the use of artifical members and appliances, and shall include such period as the employee may be receiving training or education under a rehabilitation program pursuant to paragraph (c). Notwithstanding AS 23.30.265 (9), the date of maximum medical improvement, for purposes of AS 23.30.190 (b), shall be no earlier than the last day for which such temporary disability benefits are paid.

AS 23.30.095
MEDICAL EXAMINATIONS

Problems and Solutions:

1. Doctor shopping. Doctor shopping occurs at two times during the life of a claim. First, when the employee's physician infers that it is time to return to work because of a lack of objective medical findings, and second, when an employee who has received a permanent impairment and the amount of money received is depended upon a disability rating computed, often times subjectively, by a physician. ACE analyzed the problem as one which is the result of the system and preferred to change the system rather than restrict the free choice of the employee to pick his own physician.

2. Statute limits medical treatment to two years, yet the board regularily orders extended treatments. That portion of subsection (a) which limits medical treatment to two years is deleted and results in medical treatment being given "for the period which the nature of the injury or the process of recovery requires".

3. Independent medical examinations are often times impossible to obtain. The medical examinations are given by a "physician or surgeon authorized to practice medicine" only, as per AS 23.30.095 (e), and the professional friction between the medical profession and chiropractors is aggravated when a medical doctor performs an examination of a chiropractor's patient. The situation is caused because the statute allows an employee to have his physician (or chiropractor) present at the examination, and medical doctors usually will not allow a chiropractor to observe a medical examination. The Workers' Compensation Board and ACE agree that the solution is to delete that portion of AS 23.30.095(e) which states, "the employee has the right to have a physician, paid for by the employer, present at the examination or examinations".

4. It is alleged that employees are deliberately missing medical examination appointments to extend the payment of compensation. The cost to employers resulting from employees missing medical examinations is exceptionally heavy as the weekly indemnity payments continue during the delay. The laws of other states, and the Workmen's Compensation and

Rehabilitation Law, Revised, all incorporate stringent requirements and penalties for missing examination appointments. It is from these laws, used as a model, that ACE recommends requirements for meeting appointments. If an appointment for examination is missed, compensation should be suspended during the delay.

5. Medical reports from physicians are often subjective rather than objective. Independent medical examinations should be based upon objective findings, and if controversy arises as to the facts, the evidence should be weighed by the board at a hearing.

6. In adversary proceedings before the Workers' Compensation Board, the party with the greatest number of supporting medical opinions regularily wins. Obtaining multiple medical opinions to support continued disability or in non-support of disability, is very costly to the employer, yet it is currently necessary to present a preponderance of medical evidence before the Workers' Compensation Board. No one opinion carries more weight than the others in the existing law. Therefore, subsection (e) is amended to allow the formation of an advisory committee to aid the Workers' Compensation Board to select physician's qualified to render independent medical examinations. The examinations given by those physicians will be given greater weight than others in a hearing before the board.

Justification:

1. Request of ACE.

2. Recommended by the Workers' Compensation Board and requested in H.B. 159, and supported and recommended by ACE.

3. An amalgamation of provisions from the Workmen's Compensation and Rehabilitation Law, Revised, and the Delaware Model Workers' Compensation Act, Section 26, pages 63-67.

4. Recommended by the Workers' Compensation Board and ACE.

5. Workmen's Compensation and Rehabilitation Law, Revised, paragraph (C)(2), page 15, and almost all other states.

6. Delaware Model Workers' Compensation Act, Section [illegible], paragraph (b)(3), page 64.

Recommendation:

Sec 23.30.095 MEDICAL EXAMINATIONS

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires. [NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATUR OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER DISABLEMENT. IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE.] When medical care is required, the injured employee may designate a licensed physician inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another physician. Upon procuring the services of a physician, the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated.

(b) If the employee is unable to designate a physician and the emergency nature of the injury requires immediate medical care, or if he does not desire to designate a physician and so advises the employer, the employer shall designate the physician. Designation under this subsection, however, does not prevent the employee from subsequently designating a physician for continuance of required medical care.

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 days following the first treatment, the physician giving the treatment or the employee receiving it furnishes to the employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall, however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

(d) If at any time during the period the employee unreasonably refuses to

submit to medical or surgical treatment, the board may by order suspend the payment of further compensation while the refusal continues, and no compensation may be paid at any time during the period of suspension, unless the circumstances justified the refusal.

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an independent medical examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against and employer who is subject to the compensation provisions of the chapter. If an employee refuses to submit himself to, or in any way obstructs, any independent medical examination by a physician or surgeon designated by the board, carrier, or employer [PROVIDED FOR IN THIS SECTION] his rights to compensation and right to take or prosecute any proceedings under this chapter shall be suspended until the obstruction or refusal ceases, and his compensation during the period of refusal or obstruction shall be suspended until the refusal or obstruction ceases [SUSPENSION MAY, IN THE DISCRETION OF THE BOARD OR THE COURT IN DETERMINING AN ACTION BROUGHT FOR THE RECOVERY OF DAMAGES UNDER THIS CHAPTER, BE FORFEITED]. The physician or surgeon selected by the board, employer, or carrier shall render an impartial medical opinion, based upon his own objective examination after discussion, if possible, with the treating physician, as to the nature and extent of the injury. The physician may, if appropriate, consult with other physicians outside of his specialty to assist him in forming his medical opinion, which shall be rendered within 2 weeks of the date of the examination. The board shall compile and keep current for each region of the state, a separate list of physicians engaged for not less than 3 years in the active licensed practice of surgery or medicine who are willing to render impartial medical opinions pursuant to this subsection. The board may appoint an Advisory Committee to aid and assist the board in compiling and keeping current such

list of physicians, where members shall be appointed by and serve at the pleasure of the board. The Advisory Committee shall consist of 10 members, including, and be apportioned amongst, members of the medical soceity, carriers, self insurers, hospitals, and the general public. The board shall appoint one member of the Advisory Committee as chairman. Medical opinions provided by physicians authorized by the board to render independent medical examinations shall be given greater weight by all parties in a hearing before the board.

(f) The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

(g) [(f)] All fees and other charges for medical treatment or service are limited to the charges that prevail in the same community for similar treatment of injured persons of like standard of living and shall be subject to regulation by the board.

(h) [(g)] Nothing in this section limits the right of the employee to provide in any case at his own expense a consulting physician, surgeon, chiropractor or osteopath or any attending physician, surgeon, chiropractor or osteopath whom he desires.

(i) [(h)] Upon the filing with the board by a party in interest of an application or other pleading, all parties to the proceeding must immediately, or in any event within 5 days after service of the pleadings, send to the board the original signed reports of all physicians relating to the proceedings which they may have in their possession or under their control, and copies of the reports shall be served by the party immediately on the adverse party. There is a continuing duty on the parties to so file and serve all the reports during the pendency of the proceeding.

(j) [(i)] Interference by a person with the selection by an injured employee of an authorized physician to treat him, or the improper influencing or attempt by a person to influence a medical opinion of a physician who has treated or examined an injured employee is a misdemeanor.

AS 23.30.100
NOTICE OF INJURY OR DEATH

Problems and Solutions:

1. The existing statute provides that a claim must be submitted to the employer and board within 30 days. Claims submitted after the 30 day period are routinely allowed to be filed. "Limitation periods pertaining to notice of injury possess a dual purpose of enabling the employer to provide immediate medical diagnosis and treatment with a view to minimizing the seriousness of the injury; and second, to facilitate the earliest possible investigation of the facts surrounding the injury." (Alaska State Housing Authority vs. Sullivan, Sup. Ct. Op. No. 994 (File No. 1989), 518 P.2d 759 (1974).

If claims filed subsequently to the limitation period are routinely accepted by the board, the purpose of the limitation is obscured and the 2 year statutory time limit for filing claims becomes subsequently prominent. If an employer is denied the right to immediate investigation, the employee should be required to provide minimum substantiation of the facts surrounding the claim. The existing statute is defective in this regard as claims filed up to two (2) years after the accident have to be accepted in accordance with §105 and §120. There presently exists three statutory conditions (see subsection (d)(1)-(3) below) and one judical condition sufficient to overcome the existing 30 day notice provision to support the liberal interpretation given to this statute by the board. It is to one of these conditions that we recommend the following: "however, when the delay in giving notice is so excused .... the burden of proof as to the validity of the claim shall shift to the employee who shall be required to show evidence of independent substantiation of the facts pertaining to the occurrence". The membership of ACE unanimously agreed that the employee would not be prejudiced by being required to relate "facts pertaining to the occurrence" and to obtain the facts from an independent source as the employer would have done if notification was timely.

2. Employees can be paid incorrect benefits in error under a new program such as recommended, resulting in possible financial injury to an innocent employee. Paid benefits should be monitored by a neutral party to assure

the correct benefit is being paid. Adopting wording from Florida, who has had a wage-loss system in effect for 2 1/2 years, will provide the necessary control.

3. Controversies headed for board hearing can sometimes be adverted by the intervention of the division. The Workers' Compensation Division has laid the groundwork for such action but statutory support is needed to enforce and make intervention mandatory. Adopting wording from another state successfully utilizing this system is appropriate to add authority to this requirement. (See also AS 23.30.110(h) proposed)

4. Utilizing a wage-loss program requires that the employee report wages in order to compute the actual wage loss. A statutory wage reporting provision is necessary to support proposed AS 23.30.190(b), Compensation for Wage-Loss.

Justification:

1. Recommendation of ACE.
2. Florida Workers' Compensation Act 440.185(4).
3. Florida Workers' Compensation Act 440.185(4).
4. Florida Workers' Compensation Act 440.185(10).

Recommendation:

Sec. 23.30.100 NOTICE OF INJURY OR DEATH

(a) Notice of an injury or death in respect to which compensation is payable under this chapter shall be given to the board and to the employer within 15 days after the date of such injury or within 30 days after a death [WITHIN 30 DAYS AFTER THE DATE OF SUCH INJURY OR DEATH TO THE BOARD AND TO THE EMPLOYER.]

(b) The notice shall be in writing, on the form prescribed by the board or on any form which contains the name and address of the employee, and a statement of the time, place, nature, and cause of the injury or death, and be signed by the employee or by a person on his behalf, or in the case of death, by a person claiming to be entitled to compensation for the death or by a person on his behalf.

(c) Notice shall be given to the board by delivering it or sending it by mail addressed to the board's office, and to the employer by delivering it to him or by sending it by mail addressed to him at his last known place of

business. If the employer is a partnership, the notice may be given to a partner, or if a corporation, the notice may be given to an agent or officer upon whom legal process may be served or who is in charge of the business in the place where the injury occurred.

(d) Failure to give notice does not bar a claim under this chapter

1. if the employer (or his agent in charge of the business in the place where the injury occurred) or the carrier had knowledge of the injury or death and the board determines that the employer or carrier has not been prejudiced by the failure to give notice;

2. if the board excuses the failure on the ground that for some satisfactory reason notice could not be given. However, when the delay in giving notice is so excused, notwithstanding the provisions of AS 23.30.120, the burden of proof as to the validity of the claim shall shift to the employee who shall be required to show evidence of independent substantiation of the facts pertaining to the occurrence;

3. unless objection to the failure is raised before the board at its first hearing of a claim for benefits in respect to injury or death.

(e) The division shall monitor the furnishing of compensation by the employer or carrier to ascertain that correct benefits are being furnished in cases accepted as compensable injuries. In the event of controversion or a dispute and the filing of a claim, the division shall attempt to resolve the dispute promptly in accordance with AS 23.30.110.

(f) When a claimant has the right or is required to mail a notice within the times prescribed in subsection (a), such mailing will be completed and in compliance with this section if it is postmarked and mailed prepaid to the appropriate recipient prior to the expiration of the timeframes in this section.

(g) Any compensable wage loss shall be reported by the employee to the carrier or self-insured employer within 30 days after the termination of the month for which such loss is claimed. The division shall provide by regulation for the reporting of wage loss by the injured worker, and for the reporting of wage loss and payment of wage loss benefits by the employer, to the division, and may prescribe forms for such reporting. The division, upon request by the employer or carrier, shall provide verification through unemployment compensation records of any claimed wage loss and shall obtain such verification from other states, if applicable. The division shall

require by regulation that the employer inform a worker who suffers a permanent impairment of his possible entitlement to wage-loss and other benefits and of the worker's obligation to report a claimed wage loss.

AS 23.30.105
TIME FOR FILING OF CLAIMS

Problems and Solutions:

1. This section allows claims for benefits to be filed for virtually an unlimited period of time after the original injury causing rates for compensation to be excessive. A review of workers' compensation statutes from other jurisdictions reveals many states support a one-year period (No. Dakota, Tennessee, Washington, Connecticut, Wyoming) but the majority have adopted a two year statute. The two (2) year time limit is also consistent with Alaska tort law. The Workmen's Compensation and Rehabilitation Law, Revised, utilizes a three (3) year period and its wording has been adopted by many states with a revision reducing the time to 2 years.

Whether the time period should run from the date of injury or after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement is also in question. A survey of state statutes indicates overwhelming support for the date of injury as starting the period of time limitation. In addition, the Workmen's Compensation and Rehabilitation Law, Revised utilizes the date of injury.

ACE supports a two (2) year period starting with the date of injury but advocates an unlimited time period for occupational diseases. Additionally, we support a two (2) year period after the last payment of compensation or medical and related benefits.

2. A claim for medical and related benefits (not included in the definition of compensation) has no limit. Insert "medical and related benefits" and apply a two year limitation.

Justification:

Workmen's Compensation and Rehabilitation Law, Revised, Section 27, page 34.

Recommendation:

Sec 23.30.105 TIME FOR FILING OF CLAIMS

(a) The right to compensation for disability, wage-loss, impairment, or medical and related benefits under this chapter is barred unless a claim for it is filed within two years after the [EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATION TO HIS EMPLOYMENT AND AFTER DISABLEMENT. HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE] date of injury, and the right to compensation for death is barred unless a claim therefore is filed within one year after death. Except that if payment of compensation or medical and related benefits has been made without an award on account of the injury or death, a claim may be filed within two years from the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

(b) Failure to file a claim within the period prescribed in (a) of this section is not a bar to compensation unless objection to the failure is made at the first hearing of the claim in which all parties in interest are given reasonable notice and opportunity to be heard.

(c) If a person who is entitled to compensation under this chapter is mentally incompetent or a minor, the provisions of (a) of this section are not applicable so long as he has no guardian or other authorized representative, but are applicable in the case of a person who is mentally incompetent or a minor from the date of appointment of a guardian or other representative, or in the case of a minor, if no guardian is appointed before he becomes of age, from the date he becomes of age.

(d) If recovery is denied to a person, in a suit brought at law or in admiralty to recover damages in respect to injury or death, on the ground that he was an employee and that the defendant is an employer within the meaning of this chapter and that the employer as secured compensation to the employee under this chapter, the limitations of time prescribed in (a) of this section begins to run only from the date of termination of the suit.

AS 23.30.110
PROCEDURE ON CLAIMS

Problems and Solutions:

1. It is possible to request a board hearing without having requested the benefit from the employer. Rehabilitation programs are often brought to the board for approval without confirming with the employer. Some aspects of compensation are arbitrary, and requesting the benefit from the employer first, before filing for a board hearing would encourage negotiations and compromise. Board hearings are expensive. Compensation is paid during the request period, attorney fee's are incurred by both sides, and the desired benefit is delayed. ACE's desire is to reduce the cost of compensation, in part, by reducing the number of board hearings. The solution is to require that a request for a board hearing be attached to a request for a benefit and a formal denial of the benefit requested.

2. Board hearings are ordered when negotiating differences might result in immediate delivery of benefits and the resulting cost savings realized by all employers. The solution is to require the Workers' Compensation Division to staff with employees familiar with workers' compensation benefit entitlements. When a controversy develops, have both sides discuss the controversy and attempt to settle differences. The negotiation sessions have to be approved by both the employer and employee, as their right to a hearing before the board should be preserved. The negotiations should be confidential and not be passed to any member of the board. Statutorily creating this section on negotiating will inform employees of this benefit. It will not create claims, as a benefit has to be requested from the employee, and the employer has to deny the benefit. Only then can a request for a board hearing be submitted which initiates the negotiation process.

3. Allegations that board decisions are inordinately delayed by the board or attorneys are not documented, but cases often take excessive periods of time. Benefits are based upon time, therefore time is very expensive, especially at $942 per week in 1982. The actual reasons for delays are not documented. The solution is to require the Worker's Compensation Board to report to key individuals the facts pertaining to hearings not settled within the time period required to obtain sufficient facts to determine and treat the causes of overdue decisions.

Justifications:

1. Adopted from Florida Workers' Compensation Act, 440.25(1).
2. Adopted from Florida Workers' Compensation Act, 440.19(1).
3. Recommended by ACE and adopted from wording in Florida Worker's Compensation Act, 440.25(d).

Recommendation:

AS 23.30.110 PROCEDURE ON CLAIMS

(a) Subject to the provisions of AS 23.30.105, a claim for compensation may be filed with the board at any time after a notice to controvert is filed by the employer or carrier or at any time after a specific benefit becomes due and is not provided. The board shall have full power and authority to hear and determine all questions presented in respect to such claims. [IN ACCORDANCE WITH ITS REGULATIONS AT ANY TIME AFTER THE FIRST SEVEN DAYS OF DISABILITY FOLLOWING AN INJURY, OR AT ANY TIME AFTER DEATH, AND THE BOARD MAY HEAR AND DETERMINE ALL QUESTIONS IN RESPECT TO THE CLAIM.]

(b) Within 10 days after a claim is filed the board, in accordance with its regulations, shall notify the employer and any other person (other than the claimant) whom the board considers an interested party that a claim has been filed. The notice may be served personally upon the employer or other person, or sent by registered mail.

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it within 90 days from the receipt of the request. If a hearing on a claim is ordered the board shall give the claimant and other interested parties at least 20 [10] days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [had], by order, reject the claim or make an award in respect to it. If a hearing is continued by the board, additional notice is not required under this subsection. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

(d) At the hearing the claimant and the employer may each present evidence in respect to the claim and may be represented by any person authorized in writing for that purpose.

(e) The order rejecting the claim or making the award (referred to in this chapter as a compensation order) shall be filed in the office of the board, and a copy of it shall be sent by registered mail to the claimant and to the employer at the last known address of each.

(f) An award of compensation for disability may be made after the death of an injured employee.

(g) An injured employee claiming or entitled to compensation shall submit to the physical examination by a duly qualified physician which the board may require. The place or places shall be reasonably convenient for the employee. [THE PHYSICIAN OR PHYSICIANS AS THE EMPLOYEE, EMPLOYER, OR CARRIER MAY SELECT AND PAY FOR MAY PARTICIPATE IN AN EXAMINATION IF THE EMPLOYEE, EMPLOYER, OR CARRIER SO REQUESTS.] Proceedings shall be suspended and no compensation may be payable for a period during which the employee refuses to submit to examination.

(h) Upon receipt by the board, every claim for compensation and medical and related benefits filed under this chapter shall be evaluated by the division to ascertain, within 20 days after the filing of a claim, whether the claim can be resolved without a hearing by contacting the employer and employee and inviting both to a confidential meeting in an attempt to resolve the issues. No member of the board may be present nor will any part of the negotiation be made known to any other person not in attendence. Both parties must consent in writing to the meeting and neither party may utilize the services of counsel in the meeting. If an agreement is reached between the parties each party will agree in writing to a dismisal of the claim. If no agreement is reached the division will inform the board that the parties met to negotiate the dispute without resolving the issues.

(i) Each panel chairman is required to submit a special report to the division in each contested workers' compensation case in which the case is not determined within 30 days of final hearing. Said form shall be provided by the division and shall contain the names of the panel chairman and the attorneys involved, and a brief explanation by the panel chairman as to the reason for such a delay in issuing a final order. The division will compile these special reports into an annual public report to the Governor, the Commissioner, and the Legislature.

AS 23.30.120
PRESUMPTIONS

Problem and Solution:

Although workers' compensation is a no-fault law, it is not a prerequisite that the employee be protected by a presumption of compensibility on every claim submitted. Modern no-fault auto insurance does not have a blanket presumption of coverage clause. The facts of an injury should substantiate the payment of disability compensation, and if the facts surrounding an injury are in dispute, it is the duty of the board to interpret the facts. When fraudulent claims are submitted under the cover of the presumption, the employer must show substantial evidence of non-compensibility; almost an impossible task as required by the board and courts. In applying a liberal construction to the Workers' Compensation Act, the liberal attitude should be applied to the law, not to the evidence offered to support a claim by virtue of the law. Many jurisdictions hold that awards of compensation cannot be based on speculation or conjecture evidence, but must be based upon sufficient evidence showing that the disability was the result of an accident arising out of and in the course of employment.

The existing statute appears to have been copied from the Workmen's Compensation and Rehabilitation Law, and edited. ACE restored the deleted wording in its recommendation which creates a presumption only for those who are unable to testify as to the facts surrounding the occurrence of a claim.

The State of Idaho utilizes this wording in their section on presumptions without ill effects. The National Council on Compensation Insurance (NCCI) continually compares Idaho, Washington, Oregon, California and Montana with Alaska. Alaskan employees submit 65 percent more claims than Idaho employees and these variations between statistics could in part be the result of the wording in the presumption clause. Denying claims which cannot be substantiated by the facts will not leave an employee destitute as non-occupational benefits also fully protect employees.

Justification:

1. Copied verbatim from Workmen's Compensation and Rehabilitation Law, Revised, Section 9, page 8.

Recommendation:

Sec. 23.30.120 PRESUMPTIONS

In any claim for compensation, where the employee has been killed, or is physically or mentally unable to testify, and there is unrebutted prima facie evidence that indicates that the injury arose in the course of employment, [IN A PROCEEDING FOR THE ENFORCEMENT OF A CLAIM FOR COMPENSATION UNDER THIS CHAPTER] it shall be [IS] presumed in the absence of substantial evidence to the contrary, that

(1) the injury arose out of the employment [CLAIM COMES WITHIN THE PROVISIONS OF THIS CHAPTER];

(2) sufficient notice of the injury [CLAIM] has been given;

(3) the injury or death was not occasioned while the employee was under the influence of alcohol or a controlled substance [SOLELY BY THE INTOXICATION OF THE INJURY EMPLOYEE]; and

(4) the injury was not occasioned by the willful intention of the injured employee to injure or kill himself or another.

AS 23.30.145
ATTORNEY FEES

Problems and Solutions:

1. Employers strenuously object to paying attorney fees based upon the full award of the board when a portion of the award pertains to non-contested benefits. It is their belief that the fees should be awarded only upon the actual benefit gained in the hearing that wasn't offered prior to the hearing. A number of states, including Florida, have adopted provisions concerning the payment of attorney fees which parallel the Workmen's Compensation and Rehabilitation Law, Revised, which awards fees based upon the whole award if compensation was controverted, or that part of the award which was not previously offered by the employer. ACE recommends the adoption of the essence of the provisions of the Workmen's Compensation and Rehabilitation Law, Revised.

2. Attorney fees should be paid in a lump sum, not periodically. ACE supports the payment of attorney fees in a lump sum as allowed by Florida and many other states and recommended by the Workmen's Compensation and Rehabilitation Law, Revised.

Justification:

1. Workmen's Compensation and Rehabilitation Law, Revised, Section 42, page 42.

2. Florida Workers' Compensation Act, 440.34.

Recommendation:

Sec. 23.30.145 ATTORNEY FEES

(a) Fees for legal services rendered in respect to a claim are not valid unless approved by the board, and the fees may not be less that 25 per cent on the first $1,000 of compensation or part of the first $1,000 of compensation, and 10 per cent of all sums in excess of $1,000 of compensation. [WHEN THE BOARD ADVISES THAT A CLAIM HAS BEEN CONTROVERTED, IN WHOLE OR IN PART, THE BOARD MAY DIRECT THAT THE FEES FOR LEGAL SERVICES BE PAID BY THE EMPLOYER OR CARRIER IN ADDITION TO COMPENSATION AWARDED: THE FEES MAY BE ALLOWED ONLY ON THE AMOUNT OF COMPENSATION CONTROVERTED AND AWARDED. WHEN THE BOARD ADVISES THAT A CLAIM HAS NOT BEEN CONTROVERTED, BUT FURTHER ADVISES THAT A BONA FIDE LEGAL SERVICES HAVE BEEN RENDERED IN RESPECT TO THE CLAIM, THEN THE BOARD SHALL DIRECT THE PAYMENT OF THE FEES OUT OF THE COMPENSATION AWARDED.]

(b) Except as provided in (c) of this section, if an employer declines to pay any compensation on the ground that there is no liability for compensation under this chapter, or [(b) IF AN EMPLOYER FAILS TO FILE TIMELY NOTICE OF CONTROVERSY OR FAILS TO PAY COMPENSATION OR MEDICAL AND RELATED BENEFITS WITHIN 15 DAYS AFTER IT BECOMES DUE, OR] otherwise resists the payment of compensation or medical and related benefits, and if the claimant has employed an attorney in the successful prosecution of his claim, the board shall make an award to reimburse the claimant for his costs in the proceedings, including a reasonable attorney fee. The award is in addition to the compensation or medical and related benefits ordered and shall be paid after final decision directly by the employer or carrier to the attorney for the claimant in a lump sum.

(c) If an employer pays or tenders payment of compensation, but contests the amount of compensation due, and the person seeking benefits utilizes the services of an attorney and an order is made or an agreement is reached thereafter on the amount of compensation due which is greater than the amount paid or tendered by the employer, a reasonable attorney's fee based

soley upon the difference between the amount ordered and the amount tendered or paid shall be ordered in addition to the amount of compensation, which shall be paid directly by the employer or carrier to the attorney for the claimant in a lump sum.

(d) In determining the amount of fees the board shall take into consideration the nature, length and complexity of the services performed, transportation charges, and the benefits resulting from the services to the compensation beneficiaries.

(e) If proceedings are had for review of a compensation or medical and related benefits order before a court, the court may allow or increase an attorney's fees. The fees are in addition to compensation or medical and related benefits ordered and shall be paid as the court may direct.

AS 23.30.155
PAYMENT OF COMPENSATION

Problems and Solutions:

1. Failure to notify the board within a given time period of a change in the amount of benefit paid, automatically subjects the employer or carrier to a fine of $100 plus $25 for each day late, a maximum fine of $2,500 on each claim. ACE believes penalties should be levied when the failure to do something results in damage to an interested party, not because an office clerk mislaid some correspondence. ACE recommends that the board "may" assess a penalty rather than "shall" assess a penalty, and that it only be assessed "if the failure to notify the board causes significant financial hardship to the employee".

2. An employer cannot recover overpayments inadvertently made to a claimant. Subsection (j) should include recovery of overpayments out of future installments due the employee.

3. Lump sum payment of awards provides a positive incentive, a pot-of-gold, for each employee to aim for when appropriate. Adequate testimony was presented before the committee to support the multiple incentives created by the existence of cash awards. The Workers' Compensation Board supports the conclusion that lump sum awards are generally not in the employee's best interest if truly injured. Additionally, the payment of a lump sum does not discharge the employer's liability for future medical treatment. The

Workers' Compensation Board supports the general discouragement of lump sum awards. ACE concurs but believes lump sum awards are appropriate only when the employee incurs the loss of a member (arm, leg, hand, foot) as provided in the recommended AS 23.30.190(a). In other situations, lump sum payments are appropriate "only under special circumstances as when the claimant can demonstrate that lump sum payments will definitely aid in his rehabilitation or are otherwise clearly in his best interest and that lump sum payments will avoid undue expense or undue hardship to any party". The payment of future liability in a lump sum will also include future medical expense, closing the claim forever. A lump sum payment will not be payable before six months after the employee reaches the date of maximum medical improvement, thereby precluding the utilization of a lump sum payment in contested medical cases. Application to the board for approval of a lump sum payment requires the parties to first agree to the amount and to jointly petition the board.

4. Compensation can only be paid by a check. Companies prefer to utilize a draft, however not all drafts are payable immediately. Subsection (o) provides for the payment of compensation by a draft, providing however, that the draft be cashable at any bank the day after it is received by the employee.

Justification:

1. ACE recommendation.
2. ACE recommendation.
3. Florida Worker's Compensation Act, Section 440.20(12) (a) and (b).
4. Division of Workers' Compensation, Department of Labor, H.B. 159.

Recommendation:

Sec. 23.30.155 PAYMENT OF COMPENSATION

(a) Compensation under this chapter shall be paid periodically, promptly, and directly to the person entitled to it, without an award, except where liability to pay compensation is controverted by the employer. To controvert a claim the employer must file a notice, on a form prescribed by the board, stating:

(1) that the right of the employee to benefits are controverted;

(2) the name of the employee;

(3) the name of the employer;

(4) the date of the alleged injury or death; and

(5) the type of benefits and all grounds upon which the right to benefits are controverted.

(b) The first installment of compensation becomes due on the 14th day after the employer has knowledge of the injury or death. On this date all compensation then due shall be paid. Subsequent compensation shall be paid in installments, every 14 days, except where the board determines that payment in installments should be made monthly or at some other period.

(c) Upon making the first payment, and upon an increase, reduction, termination, suspension, resumption or a change in rate or type of compensation paid, the employer shall notify the board within 14 days, on a form prescribed by the board, that payment of compensation has begun or has been increased, reduced, terminated, resumed, changed, or suspended, as the case may be. If the employer fails to notify the board within 14 days, the board may [SHALL] assess against the employer a civil penalty of $100 plus $25 for each day in excess of 14 days that the employer fails to give notice if the failure to notify the board causes significant financial hardship to the employee. Total penalties under this section may not exceed $2,500 for each failure to file a required report.

(d) If the employer controverts the right to compensation he shall file with the board on or before the 14th day after he has knowledge of the alleged injury or death or on or before an installment of compensation payable without an award is due, a notice of controversion on a form prescribed by the board.

(e) If any installment of compensation payable without an award is not paid within 14 days after it becomes due, as provided in (b) of this section, there shall be added to the unpaid installment an amount equal to 20 per cent of it, which shall be paid at the same time as, and in addition to, the installment, unless notice is filed under (d) of this section or unless the nonpayment is excused by the board after a showing by the employer that owing to conditions over which he had no control the installment could not be paid within the period prescribed for the payment.

(f) If compensation payable under the terms of an award is not paid within 14 days after it becomes due, there shall be added to that unpaid

compensation an amount equal to 20 per cent of it, which shall be paid at the same time as, but in addition to, the compensation, unless review of the compensation order making the award is had as provided in AS 23.30.125 and an interlocutory injunction staying payments is allowed by the court.

(g) Repealed

(h) The board may upon its own initiative at any time in a case in which payments are being made with or without an award, where the right to compensation is controverted, or where payments of compensation have been increased, reduced, terminated, changed, or suspended, upon receipt of notice from a person entitled to compensation or from the employer, that the right to compensation is controverted, or the payments of compensation have been increased, reduced, terminated, changed, or suspended, make the investigations, cause the medical examinations to be made, or hold the hearings, and take the further action which it considers will properly protect the rights of all parties.

(i) When the board considers it advisable it may require an employer to make a deposit with the Department of Revenue to secure the prompt and convenient payment of compensation and payments from the deposit upon an award shall be made upon order of the board.

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed out of any unpaid installment or installments of compensation due.

(k) An injured employee, or in case of death his dependents or personal representative, shall give receipts for payment of compensation to the employer paying it and the employer shall produce them for inspection by the board, whenever required.

(l) Repealed

(m) An employer shall file on or before the date one year from the date of injury or upon termination of the claim whichever is sooner, a report on a form prescribed by the board, showing the total amount of all compensation, medical and related benefits, legal fees, and penalties paid during the period since the injury including the name of the claimant, the date of injury, and the claim number. If the claim is not terminated within one year, subsequent reports shall be made yearly until the termination of the claim.

(n)(1) It is the stated policy for the administration of the workers' compensation system that it is in the best interest of the injured worker that he receive disability payments on a periodic basis, and that a lump sum settlement shall be the exception rather than the rule. Lump sum payments in exchange for the employer's or carrier's release for liability for future payments of compensation and medical attendance shall be allowed only under special circumstances, as when the claimant can demonstrate that lump sum payments will definitely aid in his rehabilitation or are otherwise clearly in his best interests and that lump sum payments will avoid undue expense or undue hardship to any party. In no case shall a lump sum payment be allowed until 6 months after the date of maximum medical improvement has been reached.

(2) Upon the joint petition of the interested parties, and after giving due consideration to the interest of the parties, if the Board finds that a lump sum payment in exchange for a release from liability is in their best interest under paragraph 1, the Board will enter a compensation order requiring that the liability of the employer for compensation and medical and related benefits shall be discharged by the payment of a lump sum.

(o) Compensation owed to an injured employee in the state shall be paid by a check or draft which may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

AS 23.30.175
RATES OF COMPENSATION

Problems and Solutions:

1. This section was compatible with our proposal as written, however, the Workers' Compensation Division recommended in H.B. 159 a complete re-wording of a major portion of the section in order to treat out-of-state recipients of compensation more fairly. These changes have been incorporated into our recommended change.

2. Subsections (e) and (f) were added which deal with the rounding off of compensation benefit payments to the nearest dollar, and the multiple to be used to convert weekly benefits to monthly benefits. These changes were made to facilitate the administration of the new benefits.

Justifications:

1. Division of Worker's Compensation, H.B. 159.
2. ACE recommendation.

Recommendation:

Sec. 23.30.175 RATES OF COMPENSATION

(a) The weekly rate of compensation for disability or death for a recipient residing in Alaska may not exceed 200 per cent of the Alaska average weekly wage in effect on the date of injury, nor be less than $65 per week.

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for the preceeding calendar year as computed by the United States Secretary of Labor for the purpose of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year. The average weekly wage for Alaska is the amount determined by dividing (1) the total wages paid by all employers covered by the Alaska Employment Security Act by (2) the average monthly employment reported by those employers for the same period and dividing the result by 52.

(c) In jurisdictions for which no average weekly wage is computed by the Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

(d) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated using the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wage in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wage for all jurisdictions.

(2) If the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2), the calculation required by this subsection applies to only those wages earned in Alaska.

(3) The calculation required by this subsection does not apply if the absence of the recipient is for medical or rehabilitation services not reasonably available in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

(e) All payments of compensation shall be adjusted to the nearest dollar.

(f) The monthly wage-loss benefits shall not exceed 4.3 times the maximum weekly benefit as computed pursuant to paragraph (a).

AS 23.30.180
PERMANENT TOTAL DISABILITY

Problems and Solutions:

1. What losses or permanent impairments shall be presumptively considered to constitute permanent total disability? The argument for including the loss of both arms, both hands, both legs, etc. in the permanent total section, and creating a presumption that they constitute permanent total disability, is a weak argument as evidenced by the Work Draft Paper on H.B. 159 issued November 23, 1981 by the State of Alaska. This draft completely omitted the so-called shopping list. The list was retained in our recommendation mainly to avoid confrontation with advocates of retaining the list and we did require "conclusive proof" of a substantial earning capacity to avoid the award. This should prove a more difficult test than the mere showing of "conclusive proof to the contrary". All other cases, as in the past, are determined by the facts as interpreted by the board. A substantial earning capacity as defined in AS 23.30.265 "means that an employee is engaged in, or is physically capable of engaging in, gainful employment, including light work."

We do not contemplate a major cost reduction in the permanent total classification as this class represents a very minor portion (.81 percent) of total claims. The NCCI reports permanent total disability cost accounts for 3.7 percent of all compensation costs, so any change in this area will not have a large impact. (see Exhibit (II)

2. If an employee is drawing permanent total disability and subsequently develops an earning capacity, do payments of permanent total continue? The Alaskan Workers' Compensation Act does not preclude an employee who has been awarded permanent total disability status from subsequently obtaining employment. There is a reported, but unconfirmed, case where a resident has been awarded the permanent total disability status three times in his life. The dollars available for compensation are not infinite, and our recommendation clearly takes advantage of those cases where time and rehabilitation, and the employee's own incentives, have combined to produce an earning capacity. In the ACE recommendation, when an employee develops an earning capacity after being awarded permanent total disability benefits, the permanent total benefit will stop and wage-loss benefits will continue from that point on. The benefit computation is the same, but the wage-loss benefit is reduced by earnings and can extend for as long as 10 years.

3. Inflation has severely eroded the spending power of recipients who have been awarded permanent total benefits in the past. Testimony before the Committee indicates a real need for cost of living increases. It appears justified to include a cost of living clause in the permanent total disability section, as to do otherwise is gross neglect of the industrially injured. A cost of living increase has to be stated in terms that are actuarily computable or else the rating mechanism is thrown off balance, and rates have to be packed with extra contingency dollars. An annual increase of 5 percent of the original benefit is an acceptable increase. The inclusion of this benefit is a first step toward addressing the cost of living problem, and future legislators may want to liberalize this percentage in the future as compensation dollars become more plentiful.

Justification:

1-3 The permanent total disability sections of numerous state laws were researched as well as the complete review of Larson, Workers' Compensation Law. The Florida statutes provide the best guidance for wording and also their interpretation by the court was extensively documented to provide guidance to Alaskan's who will test these same issues in the Alaska courts.

Florida Workers' Compensation Act, Section 440.15(1).

Recommendation:

Sec. 23.30.180 PERMANENT TOTAL DISABILITY

(a) In case of total disability adjudged to be permanent, 80 [66 2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the total disability.

(b) Loss of both hands, or both arms, or both feet, or both legs, or both eyes, or of any two of them, or paraplegia, or quadriplegia, in the absence of conclusive proof of a substantial earning capacity, [TO THE CONTRARY] constitutes permanent total disability. In all other cases permanent total disability is determined in accordance with the facts. In such other cases, no compensation shall be payable under paragraph (a) if the employee is engaged in, or is physically capable of engaging in, gainful employment, and the burden shall be upon the employee to establish that he is not able uninterruptedly to do even light work due to physical limitation.

(c) If an employee who is being paid compensation for permanent total disability shall become rehabilitated to the extent that he shall establish an earning capacity, he shall be paid instead of the compensation provided in paragraph (a), wage-loss benefits pursuant to AS 23.30.190(b). The division shall adopt rules to enable a permanently and totally disabled employee, who may have established an earning capacity to undertake a trial period of reemployment without prejudicing his return to permanent total status in the case that such employee is unable to sustain an earning capacity.

(d) In case of permanent total disability resulting from an accident incurred subsequent to the effective date of this section, the employee shall be entitled to receive additional weekly compensation equal to 5 per cent of the employees' weekly compensation rate at the time of the injury. Such additional 5 per cent benefit will accrue 12 months from the date of the award and each 12 month period thereafter.

(e) The division shall provide by regulation for the periodic reporting to the division of all earnings of any nature and social security income by the injured employee entitled to or claiming benefits for permanent total disability or additional compensation under paragraph (d). Neither the employer or carrier shall make any payment of the permanent total disability

or additional compensation under paragraph (d) for any period during which the employee willfully fails or refuses to report upon request by the division, employer, or carrier in the manner prescribed by said regulations.

(f) Two years after the date the employee is eligible to receive permanent total disability and every two years thereafter, the employer or carrier will re-evaluate the employee's physical condition to ascertain the employee's capacity for rehabilitation to develop an earning capacity. The employer or carrier will report such findings to the Board along with their recommendation for rehabilitation, if any.

AS 23.30.185
TEMPORARY TOTAL DISABILITY

Problem:

This section is not in need of revision except for changing average weekly wage to spendable weekly wage which is discussed in Section 220, to follow.

Recommendation:

Sec. 23.30.185 TEMPORARY TOTAL DISABILITY

(a) In case of disability total in character but temporary in quality, 80 [66 2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the disability.

AS 23.30.190
COMPENSATION FOR PERMANENT PARTIAL DISABILITY

Preface:

The revision of this section of the statute is the most important revision of the recommendation, as it completely changes the entire philosophy of Alaskan Workers' Compensation from one that currently compensates for loss of earning capacity to one based upon compensation for actual economic loss. The only state to accomplish this change to date is Florida, however Louisiana, Washington, Oregon, and Delaware tried to pass the same program last year and will attempt again this year.

ACE selected a wage-loss program to meet it's goals; in fact the benefits

received by the employee who is truly injured is far greater under wage-loss than under the existing program.

The one factor that prompted the decision to utilize wage-loss is the high cost of the permanent partial disability cases in Alaska as compared to other states. Our existing compensation law is virtually the same as other state laws in this area, and what has been found to be fact in other jurisdictions is presumed at this time to be true in Alaska. The same claim survey that verified the facts in other states is being concluded here and the results will be available in early 1982. Surveys in other states with similar laws show that an average 70 percent of the employees who are compensated under the permanent partial disability section for presumed loss of future wage earning capacity, actually incur no economic loss after payment of the award. Seventy percent of the employees return to the same job, same pay, same or different employers. Alaskan employers no longer have sufficient dollars to pay employees who incur no economic loss when others are not paid enough.

The cost savings inherent in a wage-loss program are obtained by re-distributing those dollars. Florida used them to obtain a 36.4 percent rate reduction and also increased the maximum weekly benefit from 66 2/3rds percent of the states average weekly wage to 100 percent of the states average weekly wage, a 50 percent increase. Because Alaska is already at 200 percent of the average weekly wage, that benefit will not be increased. The savings will however, be directed toward increasing benefits for permanently impaired workers who were formerly compensated under the permanent partial disability schedule of benefits, and for employer rate reductions.

A common perception an analyst of workers' compensation systems is that the severly injured are under compensated and the slightly injured are over compensated. This should no longer be true under a wage-loss program. Loss, as defined by the worker on the street, is loss of dollars in the weekly paycheck as the impact is obvious. Loss, as understood by the worker on the street, is not the theoretical loss of some future wage earning capacity. Compensation for the later loss is a windfall to many and no longer affordable by employers in Alaska.

Problems:

Scheduled Benefits

- Insufficient compensation for loss of scheduled impairments. The loss of an arm to two workers earning the same wages is equal, but the impact to an electrical lineman is far more severe than to an executive in terms of future wage earning capacity.
- The loss of one member qualifies employee for a scheduled benefit of a certain amount for a certain number of weeks. No provision for a lump sum payment. In order to obtain a lump sum, the employee normally must hire an attorney to negotiate a sum less than the amount of the benefit times the number of weeks entitlement (present value). Employees loose; attorneys gain; employers pay.
- Benefit entitlement has no direct relationship to economic loss.
- The need for an attorney to collect the benefit creates an adversary environment not consistent with a no-fault program.
- The actual value of the benefit is reduced annually by inflation, requiring periodic legislative adjustment.

Unscheduled Benefits:

- The predominate impairment in this category is the common back injury.
- Most cases require the utilization of an attorney to advise the employee on how to obtain the maximum benefit. The employee with the best attorney receives more than a person utilizing no attorney or one who is slightly less than best.
- Appointments for medical examinations are missed to prelong payment of temporary total disability prior to settling the permanent partial disability loss for a lump sum (lump sum payment is authorized for unscheduled losses).
- Maximum compensation under this section is $60,000 regardless of the employee's actual economic loss resulting in approximately 10 - 30 percent of all employees being under compensated.
- Disability ratings are largely subjective encouraging over utilization of the medical profession in seeking higher ratings.
- No uniform standard of rating by physicians.

Solutions:

The section has been reworded making a dual benefit, permanent impairment and wage-loss.

The portion dealing with permanent impairment is comparable to the existing scheduled benefit. A true or 100 percent wage-loss program would not include this benefit as it is not based upon actual wage loss, but is a concession to those that historically place a value upon a lost arm or leg. The amount of dollars paid under the impairment subsection are not directly comparable to the existing scheduled benefits. Under the existing permanent partial schedule, that is all the employee receives, regardless of his future economic loss. Under the impairment subsection, a sum of money is paid in cash and any actual wage-loss over the next 10 years is also paid pursuant to subsection (b), Wage-Loss.

Under the existing schedule a person who lost an arm will receive a maximum of $43,680 (paid monthly). Under the recommended impairment schedule the employee would receive a 60 percent whole man disability rating entitling him to $471 X 60 = $28,260, PLUS 80 percent of the employee's actual decrease in wages over the next 10 years, which could equal as much as $489,840 if he incurred a 100 percent wage loss. A total sum of $518,100 ($489,840 + $28,260) is considerably higher than $43,680, the existing benefit. Critics of this low lump sum schedule should not forget that employer and union group life insurance plans also pay dismemberment benefits for the loss of an arm or leg.

Exhibit IV lists the major impairments listed in the subsection on impairments and lists the percentage of disability assigned as provided in the recommendation, and the cash benefit resulting from the application of the 1982 State Average Weekly Wage.

When a loss occurs which entitles the employee to a cash award, the award is due after the employee reaches maximum medical improvement. This period could be called the healing period and during this time, the temporary total disability benefit is payable (80% of spendable weekly wage).

The method employed in determining the employees disability or impairment rating is objective rather than subjective thereby eliminating doctor shopping for higher ratings. The AMA's Guide to the Evaluation of Permanent Impairment is reproduced in part in Exhibit V, and is easy to use and acceptable to all medical doctors. Both Florida and Kentucky have adopted its use to resolve numerous problems similar to Alaska's.

It should also be noted that the cash payments authorized in the impairment subsection of the recommendation allow payment of the benefit for those double losses (both arms, both legs) which carry a presumption of total disability as discussed in a preceding section on permanent total disability. The existing statute does not pay the cash benefit for the multiple member losses which constitute permanent and total disability, plus pay the permanent total benefit.

In summary, the recommended impairment subsection is clear and concise, allowing the average worker to determine the exact benefit to which he is entitled without the necessity of employing an attorney. Additionally, each year as the state average weekly wage increases, this benefit will keep pace with inflation.

The wage-loss section entitles the injured worker to a replacement of wages lost subsequent to an accident when the employee has incurred a permanent impairment. The permanent impairment may or may not have entitled the employee to a cash award under the impairment provisions of subsection (a) as discussed above. If the loss was one that is "scheduled" or named in the impairment section, both the lump sum cash benefit and the wage-loss benefit are payable. If the loss is not named in the impairment subsection, only the wage-loss benefit is due.

The weekly benefit is easily computed by subtracting post injury spendable weekly wages from pre-injury spendable weekly wages, and the benefit payable is 80 percent of that difference.

The most predominate loss occurring will be the back injury as it was with the non-scheduled permanent partial disability section previously discussed. However, no impairment ratings from physicians will be necessary again eliminating the need for "doctor shopping". To prevent the employee from attempting to extend the period of entitlement, when the employee reaches the date of maximum medical improvement, benefits are likely to be reduced by actual wages earned, or if no employment is available, by the unemployment benefit, or by the dollar value of his earning capacity if he were to accept employment.

The wage-loss benefit can continue for a period of 10 years, but eligibility is terminated if during a 2 year period its use is less than for 3 consecutive months.

Justification:

The guide for the recommendation on permanent impairment and wage-loss has been the Florida Workers' Compensation Act, Section 440.15(3). The overwhelming support of the business community and the predominate labor union, the AFL-CIO, have made it a success.

The success of the Florida Wage-Loss System is well documented in the 1981 NCCI report entitled, "Preliminary Report on the Wage-Loss Law in Florida", (Exhibit VI) and a similar report entitled "Florida's New Workers' Compensation System: An Interium Report, dated March 1981 with October 1981 Addendum, prepared by the Bureau of Economic Analysis, Division of Economic Development, Florida Department of Commerce. (Exhibit I)

Preliminary analysis of the claim figures presented to the committee during 1980 by the NCCI indicate Alaska's problems track statistically with Florida before enacting wage loss. Prior to wage-loss, 30 percent of Florida's claims involved permanent partial disability and our computation based upon NCCI figures indicates 24 percent for Alaska; approximately 3 times the average of some other states. Florida allocated 67.2 percent of its benefit dollars for permanent partial disability cases and Alaska allocates 66.2 percent of its benefit dollars; again 2 times the average of some other states.

The wage loss package recommended will reduce these figures to acceptable levels and as a result provide significant rate reductions for employers while allocating more dollars to the seriously injury employee.

Recommendation:

Sec. 23.30.190 COMPENSATION FOR PERMANENT IMPAIRMENT AND WAGE-LOSS

(a) Compensation for permanent impairment.

(1) In case of permanent impairment due to amputation or total loss of use of an arm, or leg or loss of 80 per cent or more of vision after correction, or the total loss of hearing, or serious head or facial disfigurement, there shall be paid to the injured worker for each per cent of permanent impairment of the body as a whole, a sum equal to the state average weekly wage at the time of injury. As used in this paragraph, the term "total loss of use" shall mean that a person is no better off with the member than he would be if the member had been severed.

(2) Once the employee has reached the date of maximum medical improvement impairment benefits are due and payable within 20 days after the carrier or employer has knowledge of the status.

(3) The division shall establish and use a schedule for determining the existence and degree of permanent impairment based upon medically or scientifically demonstrable findings. The schedule shall be based on generally accepted medical standards for determining impairment and may incorporate all or part of any one or more generally accepted schedules used for such purpose. Pending the adoption, by regulation, of a permanent schedule, Guides to the Evaluation of Permanent Impairment, copyright 1977, 1971, or as subsequently updated, by the American Medical Association, shall be the temporary schedule and shall be used for the purposes hereof.

(b) Compensation for wage-loss

(1) Each injured worker who incurs any permanent impairment, which permanent impairment is determined pursuant to the schedule adopted in accordance with paragraph (3) of subsection (a), may be entitled to compensation for wage loss under this subsection. Such compensation shall be based on actual wage loss and shall be equal to 80 per cent of the difference between the employee's spendable weekly wages at the time of injury and the employee's spendable weekly salary, wages, and other remuneration the employee is able to earn after reaching the date of maximum medical improvement, as compared on a monthly basis. Notwithstanding the provisions of AS 23.30.175(a), compensation for wage-loss will not be payable in any month when the amount of compensable wage loss is less than 10 per cent of the employee's spendable weekly wage at the time of the injury. The division may adopt, by regulation, rules to simplify the monthly comparison so as to coincide as closely as possible with an injured worker's pay periods.

(2) The amount determined to be the salary, wages, and other remunerations the employee is able to earn after reaching the date of maximum medical improvement shall in no case be less than the sum actually being earned by the employee, including earnings from sheltered employment. In the event the employee voluntarily limits his or her income or fails to accept employment commensurate with his or her abilities, the salary, wages and other remuneration the injured employee is able to earn after the date of maximum medical improvement shall be deemed to be the amount which would have been earned if the employee did not limit his or her income or accepted appropriate employment. Whenever compensation for wage-loss is payable as set forth in paragraph (1) the burden shall be on the employee to establish that any wage-loss claimed is the result of the compensable injury.

(3) The right to compensation for wage-loss shall terminate:

(A) At the end of any 2 year period commencing at any time subsequent to the month when the injured employee reaches the date of maximum medical improvement, unless during such 2 year period wage-loss benefits have been payable during at least 3 consecutive months; or

(B) 520 weeks after the injured employee reaches the date of maximum medical improvement; or

(C) when the injured employee reaches age 65 and becomes eligible for retirement benefits under 42 U.S.C. ss. 402 and 405, whichever comes first, but not before the payment of at least 2 years of wage-loss.

(4) When the injured employee reaches age 62, wage-loss benefits shall be reduced by the total amount of social security retirement benefits which the employee is receiving or is eligible to receive without reduction for age, not to exceed 50 per cent of the employee's wage-loss benefit.

AS 23.30.191
EXPENSES FOR REHABILITATING INJURED EMPLOYEES

ACE recommends repeal of this section as the content has been transferred to recommended Section 094, Rehabilitation.

Recommendation:

Sec. 23.30.191 EXPENSES FOR REHABILITATING INJURED ENPLOYEES

Repealed

AS 23.30.195
SURVIVAL OF THE RIGHT TO COMPENSATION

Problem:

The problems are minor and should be classified as editing which is made necessary by the adoption of wage-loss, and to give equity to surviving children. The changes have no impact on benefit levels or premium rates.

Recommendation:

Sec. 23.30.195 SURVIVAL OF THE RIGHT TO COMPENSATION

(a) Compensation to which any claimant would be entitled under AS 23.30.190 (a) of this chapter [EXCEPTING (20) OF THAT SECTION] shall, notwithstanding death arising from causes other than the injury, be payable to and for the benefit of the persons following:

(1) if there be a widow or widower and no child of the deceased, to the widow or widower;

(2) if there be a widow or widower and a surviving child or children of the deceased, one-half to the widow or widower, the other half to the surviving child or children, to share equally;

(3) if there be [A] surviving children [CHILD] of the deceased, but no widow or widower, then to the child or children to share equally.

(b) An award for disability may be made after the death of the injured employee.

AS 23.30.196
SUBSEQUENT INJURY
(AN ENTIRELY NEW SECTION)

Problem and Solution:

This section deals with apportionment of benefits. Apportionment can take three forms; between successive employers or carriers, between the employer and a second injury fund, and between an employer and the employee himself. The first two situations assure the employee of full benefits from either source, while the third means the employee will bear a portion of the claim himself. This section deals with the third situation; apportionment between the employer and employee.

Alaska already is a "last carrier" state which eliminates apportionment of costs between successive carriers or employers. Alaska has a second injury fund to fill the gap in benefit source for aggravation of injuries attributable to prior employment.

Paragraph (b) of the recommended section re-states current Alaska law pertaining to aggravation or acceleration of a preexisting condition, when that impairment is an obvious condition and ordinarily one capable of being rated, such as the loss of a hand or arm.

Workers who have general diseases or defects, especially degenerative diseases present an unusually serious exposure to loss to the employer. The

defect or disease not disabling itself, when merged or combined with a minor aggravation, can become totally disabling and cost the employer thousands in unanticipated loss without second injury fund protection. We do not believe an employer should be held liable under the workers' compensation program for that portion of the disability which is attributable to the employee's general diseases, especially degenerative diseases which are the result of age.

That portion of subsection (a) which reads "where a preexisting disease or anomaly is accelerated or aggravated by an accident arising out of and in the course of employment, only the acceleration of death or the acceleration or aggravation of the preexisting condition attributable to the accident shall be compensable with respect to permanent impairment or death" reduces this exposure to loss faced by employers. Compensation for permanent impairment and death therefore, are apportionable with the employee. Compensation for temporary total disability, medical and wage-loss are not apportionable with the employee, which has the effect of softening the harshness of this rule as 99 percent of all claims fall into these categories.

Approximately half of the states have some form of apportionment statute, Larson, Workers' Compensation Law was researched along with the provisions of various state statutes to find the most fair, complete, and adequate wording that has been tested in court to give guidance to Alaskans dealing with its provisions should our recommendation ever be enacted into law. The Florida law met the needs of Alaska more closely than any other, possibly because their section on apportionment is operational with the wage-loss program. Larson devotes considerable space to the decisions of the Florida Supreme Court in interpreting the historical development and principles supporting this section. For those who desire further information (see pages 10-345 to 10-534).

Subsection (c) and (d) deal with situations where an employee drawing wage-loss incurs a subsequent injury which entitles the employee to additional benefits, paid simultaneously. The benefit payable because of the prior injury is reduced if the total of the two exceeds normal maximums.

Justification:

Florida Workers' Compensation Act, Section 440-15(5).

Recommendation:

Sec. 23.30.196 SUBSEQUENT INJURY

(a) The fact that an employee has suffered previous disability, impairment, anomaly, or disease, or received compensation therefore, shall not preclude him from benefits for a subsequent injury nor preclude benefits for death resulting therefrom. However, where a preexisting disease or anomaly is accelerated or aggravated by an accident arising out of and in the course of employment, only the acceleration of death or the acceleration or aggravation of the preexisting condition attributable to the accident shall be compensable with respect to permanent impairment or death. Compensation for temporary disability, medical, and wage-loss shall not be subject to apportionment.

(b) If a compensable permanent impairment, or any portion thereof, is a result of aggravation or acceleration of a preexisting condition, or is the result of merger with a preexisting impairment, an employee eligible to receive impairment benefits under AS 23.30.190 (a) shall receive such benefits for the total impairment found to result, excluding the degree of impairment existing at the time of the subject injury or which would have existed by the time of the impairment rating without the intervention of the compensable injury. The degree of permanent impairment attributable to the injury shall be compensated in accordance with AS 23.30.190 (a). As used in the paragraph, "merger" means the combining of a preexisting permanent impairment with a subsequent compensable permanent impairment which, when the effects of both are considered together, result in a permanent impairment rating which is greater than the sum of the two permanent impairment ratings when each impairment is considered individually.

(c) If an employee is receiving compensation for wage-loss suffers a subsequent injury causing temporary disability, both wage-loss benefits and temporary disability benefits shall be payable during the duration of temporary disability; however, the total benefits payable shall not exceed the maximum compensation rate in effect for temporary disability at the time of the subsequent injury. Any reduction in benefits due to such limit shall be applied first to the wage-loss benefits payable as a result of the prior injury.

(d) If an employee receiving wage-loss benefits suffers a subsequent injury causing an additional compensable wage loss, benefits for each wage

loss shall be payable; however, the total wage-loss benefits payable shall not exceed the maximum compensation rate in effect for wage-loss at the time of the subsequent injury. Any reduction in wage-loss benefits due to such limitation shall be applied first to the benefits payable as a result of the prior injury.

AS 23.30.200
TEMPORARY PARTIAL DISABILITY

Problem:

Existing wording not compatible with wage-loss.

Solution:

This section has been completely re-written to coordinate the benefit with wage-loss. The benefit is almost exactly the same as the wage loss benefit, but this form of compensation does not contemplate the employee's injury being so acute that a permanent impairment will exist after reaching maximum medical improvement.

Both the existing benefit and the recommended version contain a maximum period of entitlement of 5 years. The recommended section contains provisions not contained in the existing section:

1. A provision to reduce the benefit if the employee voluntarily reduces income or fails to accept employment available.

2. A provision requiring reporting of wages earned if the employee leaves the employment of the original employer.

Justification:

Adopted from the Florida Workers' Compensation Act, Section 440-15(4).

Recommendation:

Sec. 23.30.200 TEMPORARY PARTIAL DISABILITY

(a) In case of temporary partial disability, benefits shall be based on actual wage loss and shall not be subject to the minimum compensation rate set forth in AS 23.30.175 (a). The compensation shall be equal to 80 per cent of the difference between the employee's spendable weekly wages at the

time of injury and the spendable weekly salary, wages, and other remuneration the employee is able to earn. In order to simplify the comparison of the pre-injury spendable weekly wages with the salary, wages, and other remuneration the employee is able to earn, the division may by regulation provide for the modification of the weekly comparison so as to coincide as closely as possible with the injured worker's pay periods.

(b) The amount determined to be salary, wages, and other remunerations the employee is able to earn shall in no case be less than the sum actually being earned by the employee, including earnings from sheltered employment. In the event the employee voluntarily limits his or her income or fails to accept employment commensurate with his or her abilities, the salary, wages, and other remuneration the employee is able to earn shall be deemed to be the amount which would have been earned if the employee did not limit his or her income or accepted appropriate employment. Whenever compensation as set forth in paragraph (a) may be payable, the burden shall be on the employee to establish that any wage loss claimed is the result of the compensable injury.

(c) Such compensation shall be paid during the continuance of such disability, not to exceed a period of 5 years.

(d) If an injured employee, when receiving compensation for temporary partial disability, leaves the employment of the employer by whom he was employed at the time of the accident for which such compensation is being paid, he shall, upon securing employment elsewhere, give to such former employer an affidavit in writing containing the name of his new employer, the place of employment and the amount of wages being received at such new employment and until he gives such affidavit the compensation for temporary partial disability will cease. The employer by whom such employee was employed at the time of the accident for which such compensation is being paid may also at any time demand of such employee additional affidavits in writing containing the name of his employer, the place of his employment and the amount of wages he is receiving, and if the employee, upon such demand, fails or refuses to make and furnish such affidavit, his right to compensation for temporary partial disability shall cease until such affidavit is made and furnished.

AS 23.30.205

INJURY COMBINED WITH PRE-EXISTING IMPAIRMENT

Problem:

1. Cost. Each employer contributes 6 percent of paid claims to support the second injury fund which is utilized by only a few employers and carriers. Employers and their carriers who do not document pre-hire or the current employee medical status essentially forfeit their right to participate in the benefits of the fund. Those employers pay the 6 percent surcharge to support the fund and also the full amount of subsequent claims that do not qualify for reimbursement. Contribution to the fund should be universal as should the utilization.

2. The existing law requires that employers, in order to qualify for reimbursement from the fund, "must establish by written records that the employer had knowledge of the permanent physical impairment before the subsequent injury and that the employee was hired or retained after the employer acquired that knowledge". Pre-employment physicals are costly and for employers who hire the construction trades for short periods of time during projects, the cost can be enormous. Health questionnaires are often inaccurate as the employee fears the continuance of his job if his employer knows his physican condition.

3. The original purpose of the section was to encourage the hiring of the handicapped by relieving employers of the cost of subsequent injuries made more serious by the pre-existing handicap. In this regard the section fails to achieve its purpose as the non-reimbursed portion of the claim can exceed $100,000.

4. Reimbursement is allowed subsequent to 104 weeks. Even though a claim qualifies for reimbursement from the second injury fund the costs associated with the first 104 weeks can be staggering. Consider a case where medical costs are $30,000 during the first 104 weeks (not uncommon) and the employee is entitled to the maximum benefit in 1982 of $942 per week, or $97,968, for a total of $127,968 within the first 104 weeks. This is a high cost to pay, especially if the accident would not have occurred except for the existence of the preexisting handicap.

Solutions:

The cost will increase generally in proportion to the degree to which reimbursement qualifications are liberalized, which is in conflict with solving problems 2, 3, and 4. The cost of the benefit was considered as important as facilitating the hiring of the handicapped, and the resulting compromise recommendation is suggested.

In order to reduce costs, the cost associated with claims must be reduced which will be accomplished in part by the wage-loss program. Additionally, the apportionment provision (section 196 (a)) which refers to permanent total disability and death which is accelerated or aggravated by a preexisting disease or anomaly, was added to apportion to the employee that portion of the cost of disability associated with the aging process: degenerative back disease, arthritis, and others. These factors will reduce benefits in cases where the preexisting condition is not the result of an accident but the result of simply aging. All employers will share in the costs as they do now, but all employers will be able to share in the benefits of the fund equally as each employee with a preexisting condition will be registered with the division. The employer's ability to give physicals or his method of hiring will not determine second injury fund eligibility.

Rather than require employers to absorb the costs associated with documenting prior knowledge of the preexisting condition, a new requirement used successfully in a number of other states has been added. In order for an employer to obtain second injury fund benefits, he must register with the Workers' Compensation Division the name of the employee and a description of the handicap. This pre-registration along with the combined effects of the apportionment and second injury fund should make the employment situation better for the handicapped, decrease costs, and provide absolute knowledge of second injury fund application.

The issue of reimbursement being allowed after 104 weeks being considered too long and too costly was very difficult to analyze without an accurate projection of the cost impact of any change. Considerable support existed for reducing the time period down to 26 or 52 weeks or to base reimbursement upon a percentage (50, 60, 70, or 80 percent of all costs from the first day rather than 100 percent after 104 weeks). Without rating help from the NCCI, it was determined that the 104 week provision had to remain, subject to further study.

Justification:

This section is in part modeled after the Florida provision, but extensively editited, and the existing Alaska statute. The schedule of preexisting conditions has been liberalized slightly to conform with the model act produced by The Council on State Governments, the Workers' Compensation and Rehabilitation Law, Revised. That part of the section pertaining to pre-registration of handicaps was obtained from the Kansas act, although others could have been utilized.

Recommendation:

Sec. 23.30.205 INJURY COMBINED WITH PRE-EXISTING IMPAIRMENT

(a) Legislative intent. It is the purpose of this section to encourage the employment of persons who have existing physical impairments by protecting employers from excess liability for compensation and medical expense when an injury to a physically impaired worker merges with his preexisting permanent physical impairment to cause a greater disability, permanent impairment, or wage-loss than would have resulted from the injury alone. The division shall inform all employers of the existence and function of the second injury fund. This section shall not be construed to create or provide any benefits for injured employees or their dependents not otherwise provided by this chapter. The entitlement of an injured employee or his dependents to compensation under this chapter shall be determined without regard to this section, the provisions of which shall be considered only in determining whether an employer or carrier who has paid compensation under this chapter is entitled to reimbursement from the second injury fund.

(b) Definitions. As used in this subsection:

(1) "Permanent physical impairment" means any permanent condition due to previous accident or disease or any congenital condition which is, or is likely to be, a hindrance or obstacle to employment.

(2) "Merger" describes or means that:

(A) Had the permanent physical impairment not existed, the subsequent injury would not have occurred;

(B) The permanent disability, permanent impairment, or wage-loss resulting from the subsequent injury is materially and substantially greater than that which would have resulted had the permanent physical impairment

not existed and the employer has been required to pay, and has paid, permanent total disability, permanent impairment, or wage-loss for that materially and substantially greater disability; or

(C) Death would not have been accelerated had the permanent physical impairment not existed.

(c) If an employee who has a preexisting permanent physical impairment incurs a subsequent permanent impairment from injury arising out of and in the course of his employment which merges with the preexisting permanent physical impairment to cause a permanent impairment, wage-loss, total disability, or the need for medical and related benefits, the employer shall, in the first instance, pay all compensation provided by this chapter, but subject to the limitations in subsection (e), such employer shall be entitled to reimbursement from the second injury fund created by AS 23.30.040 for the compensation and medical and related benefits he has been required to provide under this chapter subsequent to those payable for the first 104 weeks.

(d) When death results. If death results from the subsequent permanent impairment contemplated in subsection (c), and it shall be determined by the board that the death resulted from a merger, the employer in the first instance will pay the funeral and death benefits prescribed by this chapter, but he shall be reimbursed from the second injury fund created by AS 23.30.040 for for compesation and medical and related benefits payable in excess of 104 weeks.

(e) Reimbursement Limitations

(1) In order to qualify under this section for reimbursement from the second injury fund the employer must, prior to the occurrence of a subsequent injury to an impaired or handicapped employee, file with the division, on a form prescribed by the division, a notice of the employment or retention of the impaired employee, together with a description of the impairment or handicap claimed.

(2) No condition shall be considered a "permanent impairment" unless it is one of the following conditions:

(A) Epilepsy

(B) Diabetes

(C) Cardiac disease

(D) Arthritis

(E) Amputated foot, leg, arm or hand

(F) Loss of sight of one or both eyes or a partial loss of uncorrected vision of more than 75 per cent bilaterally

(G) Residual disability from poliomyelitis

(H) Cerebral palsy

(I) Multiple sclerosis

(J) Parkinson's disease

(K) Cerebral vascular accident

(L) Tuberculosis

(M) Silicosis

(N) Psychoneurotic disability following treatment in a recognized medical or mental institution

(O) Hemophilia

(P) Chronic osteomyelitis

(Q) Ankylosis of joints

(R) Hyperinsulism

(S) Muscular dystrophies

(T) Arteriosclerosis

(U) Thrombophlebitis

(V) Varicose veins

(W) Heavy metal poisoning

(X) Ionizing radiation injury

(Y) Compressed air sequelae

(Z) Ruptured intervertebral disk, or

(AA) any permanent physical condition which, prior to the injury, constitutes a 20 per cent impairment of the body as a whole determined pursuant to AS 23.30.190 (a)(3).

(3) The second injury fund shall not be liable for any costs, interest, penalties, or attorneys' fees.

(4) An employer's or carrier's right to apportionment or deduction pursuant to AS 23.30.196 shall not preclude reimbursement from said fund except when the merger comes within the definition of paragraph (b)(2)(B) and such apportionment or deduction relieves the employer or carrier from providing the materially and substantially greater permanent disability benefits otherwise contemplated in said paragraphs.

(f). The second injury fund may not be bound as to any question of law or fact by reason of an award or an adjudication to which it was not a party or in relation to which the commissioner of labor was not notified at least 3 weeks before the award or adjudication, that the fund might be subject to liability for the injury or death.

(g) An employer or his carrier shall notify the commissioner of labor of any possible claim against the second injury fund as soon as practicable, but in no event later than 100 weeks after the employer or his carrier have knowledge of the injury or death.

AS 23.30.210
DETERMINATION OF WAGE-EARNING CAPACITY

This section is in direct conflict with the wage-loss theory and its repeal is essential.

Recommendation:

Sec. 23.30.210 DETERMINATION OF WAGE-EARNING CAPACITY

REPEALED

AS 23.30.215
COMPENSATION FOR DEATH

Problems and Solutions:

1. The $1,000 death benefit is inadequate. ACE recommends that the death benefit be increased to $2,500 from the existing $1,000. The $2,500 is recommended by the Division of Workers' Compensation in H.B. 159 along with a cost of living proposal. ACE supports the $2,500 as a more appropriate benefit but believes automatic escalators to be detrimental to proper rating. Future increases can be requested.

2. Remarriage penalty is considered unjust in today's society. If a widow or widower entitled to death benefits remarries two (2) years of benefit entitlement are paid in a lump sum and future benefits are forfeited. ACE recommends the deletion of the remarriage penalty.

Justification:

ACE recommendation.

Recommendation:

Sec. 23.30.215 COMPENSATION FOR DEATH

(a) If death results within one year after the accident or follows continuous disability and results from the accident within 5 years thereafter, the compensation is known as the death benefit and is payable in the following amounts to or for the benefit of the following persons:

(1) Reasonable and necessary funeral expenses not exceeding $2,500 [$1,000];

(2) If there is a widow or widower or a child or children of the deceased, the following percentages of the deceased employee's spendable [AVERAGE] weekly wages:

(A) 80 [66 2/3] per cent for the widow or widower with no children;

(B) 40 [33 1/3] per cent for the widow or widower with one child and 40 [33 1/3] per cent for the child;

(C) 80 [20] per cent for the widow or widower with two or more children, payable 1/3 to the widow or widower, and 2/3 divided equally among the children [AND 46 2/3 PER CENT DIVIDED EQUAILY AMONG THE CHILDREN];

(D) deleted

(E) 80 [66 2/3] per cent for an only child where there is no widow or widower;

(F) Deleted

(G) 80 [66 2/3] per cent, divided equally, if there are two or more children and no widow or widower.

(3) [IF THE WIDOW OR WIDOWER REMARRIES, SHE OR HE IS ENTITLED TO BE PAID IN ONE SUM AN AMOUNT EQUAL TO THE COMPENSATION TO WHICH THE WIDOW OR WIDOWER WOULD OTHERWISE BE ENTITLED IN THE TWO YEARS COMMENCING ON THE DATE OF REMARRIAGE AS FULL AND FINAL SETTLEMENT OF ALL SUMS DUE THE WIDOW OR WIDOWER.]

(4) If there is no widow or widower or child or children, then for the support of father, mother, grandchildren, brothers and sisters, if dependent upon the deceased at the time of the injury, 35 per cent of the spendable [AVERAGE] weekly wage of the deceased to such beneficiaries, share and share alike, not to exceed $20,000 in the aggregrate.

(b) In computing death benefits, the spendable [AVERAGE] weekly wage of the deceased shall be computed under AS 23.30.220 of this chapter and shall be paid in accordance with AS 23.30.155 of this chapter and subject to the weekly maximum limitation in the aggregate as provided in AS 23.30.175 of this chapter, but the total weekly compensation may not be less than $45 for a widow or widower nor less than $15 weekly to a child or $30 for children.

(c) All questions of dependency shall be determined as of the time of the injury, or death.

(d) Compensation under this chapter to aliens not residents (or about to become non-residents) of the United States or Canada is the same in amount as provided for residents, except that dependents in a foreign country are limited to widow or widower and child or children, or if there is no widow or widower and child or children, to surviving father or mother whom the employee has supported, either wholly or in part, for a period of one year before the date of injury. The board, at its option, or upon the application of the employer or carrier, may commute all future installments of compensation to be paid to an alien dependent who is not a resident of the United States or Canada by paying or causing to be paid to him one-half of the commuted amount of the future installments of compensation as determined by the board.

(e) Death benefits payable to a widow or widower in accordance with (a) of this section shall abate as that person ceases to be entitled and does not inure to persons subject to continued entitlement. In the event a child ceases to be entitled, that child's share shall inure to the benefit of the surviving spouse subject to adjustment as provided in (f) of this section.

(f) Except as provided in (g) of this section, the death benefit payable to a widow or widower shall:

(1) five years following date of death of the deceased worker be reduced to 66 2/3 per cent of the benefit being then paid;

(2) eight years following date of death of the deceased worker be reduced to 50 per cent of the benefit being then paid;

(3) terminate 10 years following death of the deceased worker.

(g) The provisions of (f) of this section do not apply to a widow or widower who at the time of death of the deceased worker is permanently and totally disabled. The death benefits payable to a widow or widower are not subject to reduction under (f) of this section after the widow or widower has attained the age of 52 years.

(h) In the event a deceased worker is survived by children of a former marriage not living with the surviving widow or widower, then those children shall receive the amount being paid under a decree of child support; the difference between this amount and the maximum benefit payable under this section shall be distributed pro-rata to the remainder of those entitled.

(i) In the event the total amount of all benefits computed under (a)(2) of this section exceeds the maximum benefit provided in AS 23.30.175 of this chapter, the maximum benefit under AS 23.30.175 of this chapter shall be pro-rated among entitled survivors.

AS 23.30.220

DETERMINATION OF SPENDABLE [AVERAGE] WEEKLY WAGE

Problems:

1. The utilization of 66 2/3 percent of average weekly wage allows high wage earners to bring home practically the same after tax dollars while injured than they would working. A disincentive to return to work.

For low income wage earners who have fewer discretionary dollars, they are bring home considerably less than their normal after tax income when injured. (see Exhibit VII)

2. The average weekly wage is presently computed utilizing the highest earnings recorded over the past 3 calendar years. Employers who have jobs available avoid hiring employees who have work histories showing high prior earnings. Employers ordinarily willing to employ workers under a rehabilitation or retraining program can be hit with shock losses for subsequent injuries with compensation based on prior earnings.

3. Somewhat unique to Alaska are the North Slope jobs which utilize an extraordinary shift (3 weeks on, 3 weeks off). Normal formulas for computing average weekly wage can produce a windfall to the employee or the employer, or be detrimental to either.

4. Workers who are employed on a permanent basis working 8 A.M. - 5 P.M., five days a week, are paid based upon last year's wage, but should be paid on existing wage. All workers are entitled to compensation based upon existing rather than last year's wage.

5. Workers' compensation premiums are paid on existing wages but benefits paid often show no relationship to premiums which introduces

variability into the rating scheme.

6. Employees holding two jobs or who are self employed on a part- time basis, can draw benefits from one employer far in excess of normal wages paid. Employer's should know before hand of outside wages.

7. Employees who have no wage history because they are new to the work force, are always paid the minimum of $65 per week by carriers until the board hears the case and assigns a compensation rate.

Solutions:

1. As recommended in the model law drafted by The Council on State Governments, the Workmen's Compensation and Rehabilitation Law, Revised, when the maximum benefit exceeds 100 percent of the state average weekly wage (Alaska is 200 percent), average weekly wage should be dropped in favor of spendable weekly wage. Spendable weekly wage is gross wage less federal income and social security tax.

ACE recommends the use of 80 percent of the spendable weekly wage. (see Exhibit VIII) In comparing this benefit level with the existing benefit level, be aware that the recommended benefit is 80 percent of the current spendable weekly wage. The existing law bases average weekly wage on last year's wage which is generally lower than existing wages. The utilization of this formula will insure the same income replacement level for all wage earners, high and low.

2, 3 & 4. Utilizing an employees highest earnings during any of the three previous calendar years has some good and bad features depending upon the evaluator's point of view. Numerous possibilities were discussed, including basing temporary disability benefits on current wage and permanent disability benefits upon the average of the past 3 years. They were discarded in favor of the recommendation because of our desire to base the benefit on current wage rates rather than previous wages. An employee earning $35,000 on a new job is entitled to receive compensation based upon the existing wage, not $25,000, the salary earned in a previous job.

The recommendation covers every employee as fairly as possible, from the worker on annual, monthly, weekly, or hourly rates of pay; even the worker employed on an exceptional North Slope shift. If a current wage rate is not applicable and prior year wages need to be utilized, prior year wages are divided by 50 rather than 52 to approximate the effect of inflation. (see subsection (d)).

5. Compensation paid is more directly related to existing wage rates bringing a closer correlation between benefits and premiums.

6. The recommendation excludes a reference to self employment income in the computation of average weekly wage. However, subsection (n) makes the employer liable for compensation derived from other employment if the employer is aware of the other employment.

7. Employees who have no wage history, will now have compensation rates based upon actual earnings over the previous 13 weeks, or what he would have earned had he worked the past 13 weeks, eliminating the necessity for board hearings and the issuance of $65 minimum payment checks during the initial weeks of disability.

Justification:

The majority of this recommendation has been adopted from the model act prepared by The Council on State Governments, the Workmen's Compensation and Rehabilitation Law, Revised. Also adopted by Kansas, Kentucky, Idaho, and others.

Recommendation:

AS 23.30.220 DETERMINATION OF SPENDABLE [AVERAGE] WEEKLY WAGE

Except as otherwise provided in this chapter, the spendable weekly wage of the injured employee at the time of the injury is the basis for computing compensation, and shall be the employee's average weekly wage minus the deductions for federal income and social security taxes that the employee would pay if he were to receive his average weekly wage for a year and if he were to take the standard income tax deductions for the maximum number of dependents to which he is entitled for federal income tax purposes. The Division shall annually prepare formulas which shall be used to calculate an employee's spendable weekly wage on the basis of his average weekly wage and of his number of dependents.

(a) If at the time of the injury the wages are fixed by the week, the amount so fixed shall be the average weekly wage;

(b) If at the time of the injury the wages are fixed by the month, the average weekly wage shall be the monthly wage so fixed multiplied by twelve and divided by fifty-two;

(c)(1) If at the time of the injury the wages are fixed by the day, hour, or by the output of the employee, the average weekly wage shall be the wage most favorable to the employee computed by dividing by thirteen the wages said employee earned in the employ of the employer in the first, second, third, or fourth period of thirteen consecutive calendar weeks in the fifty-two weeks immediately preceding the injury.

(2) If the employee has been in the employ of the employer less than thirteen calendar weeks immediately preceding the injury, his average weekly wage shall be computed under the foregoing paragraph, taking the wages for such purpose to be the amount he would have earned had he been so employed by the employer the full thirteen calendar weeks immediately preceding the injury and had worked, when work was available to other employees in a similar occupation.

(d) Notwithstanding (a), (b), and (c) above, if an employee is scheduled to work a pre-determined number of days, weeks, or months and receives a pre-determined number of days, weeks, or months off, the employee's average weekly wage shall be determined by accumulating wages earned from the scheduled work and dividing by the total number of scheduled days, weeks, or months worked and given off.

(e) If at the time of the injury the wages are fixed by the year, the average weekly wage shall be the yearly wage so fixed divided by fifty-two;

(f) If at the time of the injury the hourly wage has not been fixed or can not be ascertained, the wage for the purpose of calculating compensation shall be taken to be the usual wage for similar services where such services are rendered by paid employees.

(g) In occupations which are typically seasonal or characterized by intermittent periods of employment and unemployment, and therefore normally cannot be carried on throughout the year, the spendable weekly wage shall be computed using one fiftieth of the total wages which the employee has earned from all occupations during the immediately preceding calendar year.

(h) When the employee is working under concurrent contracts with two or more employers and the defendant employer has knowledge of such employment prior to the injury, his wages from all such employers shall be considered as if earned from the employer liable for compensation.

(i) If the employee was a minor, apprentice or trainee when injured, and it is established that under normal conditions his wages should be expected

to increase during the period of disability, that fact may be considered in computing his average weekly wage.

AS 23.30.235
CASES IN WHICH NO COMPENSATION IS PAYABLE

Problems:

1. Requires that intoxication be the "sole" cause of the injury, which is almost impossible to show.
2. Intoxication is not defined.
3. Entire section is not effective in cases involving alcohol.
4. Employers go to great expense to establish safety rules to protect employees. Employees can wilfully violate rules and still receive compensation.
5. Employees can misrepresent his physical condition when applying for a job. When such misrepresentations result in the employer assuming an increased amount of risk, there is no recourse for the employer.

Solutions:

1, 2, & 3. Subsection (a) in the recommendation deletes the word "solely" in conjunction with the cause of alcohol related injuries. In its place is a double standard:

(a) "if the injury was occasioned by an employee under the influence of alcohol".

(b) "if there was at the time of injury 0.10 percent or more by weight of alcohol in the employee's blood ..."

This change will have broad implications for employee's on business trips or employees working in remote sites in Alaska, as many alcohol related injuries will not be covered by compensation. It should be remembered by the reader that employees will not be destitude because of this change as such accidents will be covered by non-occupational accident and sickness programs that virtually every employee has in his non-occupational benefit package.

This recommendation is adopted from Florida where it has been proven to be effective for several years

4. Almost every state includes provisions concerning a reduction or forfeiture of compensation when safety rules are willfully disregarded or ignored or when an employee injures himself while not using available safety devices. The wording employed by many states is similar, and the recommendation adopts common wording. Reviewing Larson, Workers' Compensation Laws on this subject reveals very limited success in proving willful intent.

5. The State of Alaska, for workers' compensation, is a "last employer" state. The last employer takes the employee as he finds him and any preexisting physical impairment which causes subsequent disability is the risk of the new employer.

Employers believe they have a right to be informed of an employee's actual physical condition when hired, as the unexpected cost of injury related to preexisting conditions can be a major loss. Employees, fearful of not being hired, often misrepresent their physical condition in employment applications. The provisions of this recommendation in subsection (c) allow an employer to discontinue the payment of compensation where an employee misrepresented his pre-hire physical condition which subsequently contributed to a claim. With an apportionment provision (Section 196) reducing the employer's liability when preexisting conditions are involved in an injury, and the registration of the employee and handicap with the second injury fund, the employer's willingness to hire the handicapped should improve considerably, thereby eliminating the need for an employee to misrepresent his physical condition.

This provision has been adopted from the Kansas law and conversations with adjusters there indicate it is only effecitve in those cases involving "gross" misrepresentation - our target.

Justification:

1, 2, & 3. Adopted from the Florida Workers' Compensation Act, Section 440.09(3).

4. Standard wording in almost all workers' compensation acts.

5. Kansas Workers' Compensation Act, Section 44.567 (2)(c).

Recommendation:

Sec. 23.30.235 CASES IN WHICH NO COMPENSATION IS PAYABLE OR IS REDUCED

(a) No compensation shall be payable if the injury was occasioned by an

employee under the influence of alcohol; by the influence of any narcotic drugs, barbiturates, or other stimulants which affected the employee to such an extent that the employee's normal faculties were impaired; or by the willful intention of the employee to injure or kill himself, herself, or another. If there was at the time of the injury 0.10 per cent or more by weight of alcohol in the employee's blood, it shall be presumed, in the absence of substantial evidence to the contrary, that the injury was occasioned primarily by the intoxication of the employee. Per cent by weight of alcohol in the blood shall be based upon grams of alcohol per 100 milliliters of blood.

(b) When the injury is caused by the willful disobedience of a safety rule or the willful failure to use a safety device, compensation as provided in this chapter shall be reduced 25 per cent.

(c) No compensation is payable if an employee, in connection with an application for employment or an employment medical examination or otherwise in connection with obtaining or retaining employment with the employer, knowingly

(1) misrepresents himself or herself as not having an impairment or handicap;

(2) misrepresents himself or herself as not having had any previous accidents;

(3) misrepresents himself or herself as not having previously been disabled or compensated in damages or otherwise because of any prior accident, injury or disease;

(4) misrepresents himself or herself as not having had any employment terminated or suspended because of any prior accident, injury or disease;

(5) misrepresents himself or herself as not having any mental, emotional or physical impairment, disability, condition, disease or infirmity; or

(6) misrepresents or conceals any facts or information which is reasonably related to the employee's possible subsequent claim for workers' compensation.

AS 23.30.236

RESIDENT EMPLOYEES

(A NEW SECTION)

Problem:

Employees working in remote sites are covered by workers' compensation 24 hours per day, and for employers whose primary business is at remote sites, the cost of claims resulting from injuries occurring during off duty hours is enormous. Testimony before legislative committees during the past two years has repeatedly brought to light the unfairness of charging the employer with such claims. The testimony, whether from employers, attorneys, or unions, was unanimous in that the employer should not have those claims charged to compensation. (see Exhibit IX, testimony, Alascom Inc., January 16, 1981)

Solution:

The situation in Alaska is the result of Supreme Court decisions, who undoubtedly had no other recourse as the workers' compensation act gave no legislative guidance in these cases. Therefore, in order to change the situation, legislative guidance is required.

The problem was analyzed as one which combines two common workers' compensation problems which have ample case law history; resident employees and recreational and social activities. Larson, Workers' Compensation Law, devotes section 22 to recreational and social activities and section 24 to resident employees. His summation of the laws of the states is easy to read and is concise. Larson states:

> § 22.00 Recreational or social activities are within the course of employment when
>
> 1. They occur on the premises during a lunch or recreation period as a regular incident of the employment; or
>
> 2. The employer, by expressly or impliedly requiring participation, or by making the activity part of the services of an employee, brings the activity within the orbit of the employment; or
>
> 3. The employer derives substantial direct benefit from the activity beyond the intangible value of improvement in employee health and moral that is common to all kinds of recreation and social life.
>
> § 24.00 When an employee is required to live on the premises, either by his contract of employment or by the nature of the

employment, and is continuously on call (whether or not actually on duty), the entire period of his presence on the premises pursuant to this requirement is deemed included in the course of employment. However, if the employee has fixed hours of work outside of which he is not on call, compensation is awarded usually only if the source of injury was a risk associated with the conditions under which claimant lived because of the requirement of remaining on the premises.

These two summations were combined into the recommended Section, 236 Resident Employees. Others have recommended that injuries which occur outside of normal work hours be excluded from coverage altogether but a cursory review of Larsons, Workers' Compensation Laws, reveals that many legitimate claims would be excluded at remote sites that would be covered under the same circumstances in urban employment.

Justification:

No other state has severe problems in this area which precluded ACE from seeking guidance from other state statutes. The recommendation is original, but the words are time tested.

Recommendation:

AS 23.30.236 RESIDENT EMPLOYEES

(a) When an employee is required to live on the premises, either by his contract of employment or by the nature of the employment, and is continuously on call, the entire period of his presence on the premises pursuant to this requirement is deemed included in the course of employment except when the source of the injury derives from an activity that is strictly personal to the employee. However, if the employee is not continuously on call, compensation and medical and related benefits shall not be paid unless

(1) the accident occurs on the premises during a lunch or recreational period which is a regular incident of the employment, or

(2) the employer has expressly or impliedly required participation, or made the activity part of the services of an employee bringing the activity within the orbit of employment, or

(3) the employer derives a substantial direct benefit from the activity beyond the intangible value of

(A) improvement in employee health or morale that is common to all kinds of recreation and social life, or

(B) recreation as an economic factor in industrial relations, and

(4) the source of the injury was a risk distinctly associated with the conditions under which the employee lived because of the requirement of remaining on the premises.

(b) In any case, notwithstanding (a), compensation for disability shall be limited to reasonable travel time both to and from the point where adequate medical treatment can be obtained and the number of days the employee was under the care of the physician.

AS 23.30.238
COORDINATION WITH OTHER BENEFITS
(A NEW SECTION)

Problem:

Employee's often submit claims that are denied by employers or carriers, and on appeal to the board or courts, the controversion is reversed and benefits awarded. In making a case for occupational benefits, the employee defeats a non-occupational claim under a group program. As a result, the employee finds both workers' compensation and group insurance non-responsive to the claim for injury. All benefits are denied and the appeal process can take weeks, months, or years. Occasionally, non-occupational plans step in and voluntarily pay but are hurt financially when employees fail to return the benefits when compensation is finally awarded. Employers and carriers cannot honor a group insurance company's request for reimbursement out of compensation due.

Solution:

The purpose of this section is to assure employees who submit controverted claims, that if compensation is denied, non-occupational group plans will pay, while at the same time protecting the non-occupational group insurer's access to future compensation awarded.

Justification:

Delaware model Workers' Compensation Act. Section 14.

Recommendation:

Sec. 23.30.238 COORDINATION WITH OTHER BENEFITS

(a) Sickness and/or Accident Health Insurance.

1. In any case where, due to a dispute over whether benefits are due to an employee under this chapter, benefits are not being paid by the employer or its workers' compensation carrier and the employee is covered by a sickness and/or accident insurance policy provided by the employer or a collective bargining unit of a type which would pay him benefits only if the injury is determined not to be compensable under this chapter, the sickness and/or accident carrier shall make all payments it would normally be required to make to the employee under its policy if the injury had been determined not to be compensable under this chapter, pending a final determination of compensibility; provided, however, that it shall be required to make such payments only to the extent they would also be required under this chapter if the injury is compensable.

2. If the injury is subsequently and finally determined to be compensable under this chapter, the party required to pay the workers' compensation claim shall, upon notification of the amount due, promptly pay to the sickness and/or accident carrier all sums paid by it to the injured employee, along with the carriers reasonable costs and attorneys' fees necessary to enforce this right if not promptly so paid; provided, however, that the obligation of the workers' compensation carrier to make such payment shall be solely limited to the payments required under this chapter.

3. All sums paid by the sickness and/or accident carrier pursuant to this subsection shall count toward the total compensation, if any, due to the injured employee under this chapter.

4. In no case shall this section be interpreted to relieve the sickness and/or accident carrier from any liability for payment otherwise due under its contract of insurance, including but not limited to its obligation to make supplemental payments in workers' compensation claims to the extent required by that contract of insurance.

AS 23.30.239

EMPLOYEE ELIGIBLE FOR BENEFITS UNDER THIS CHAPTER WHO HAS RECEIVED OR IS ENTITLED TO RECEIVE UNEMPLOYMENT COMPENSATION

(A NEW SECTION)

Problem:

The Workers' Compensation Act has been called upon throughout the years to compensate employees after they reach the date of maximum medical improvement and before that point in time when employment opportunities improve and jobs become available. The practice is based upon the theory that a compensable injury caused a loss of the job, and therefore the unemployment is the result of the industrial injury and workers' compensation is proper until a new job is available.

Solution:

In such cases it is the belief of ACE that the primary benefit should be unemployment compensation and that workers' compensation, if still payable, shall be supplemental to the unemployment compensation. This provision is successful in other states in reducing employer costs.

Justification:

Adopted from the Florida Workers' Compensation Act, Section 440.15(11).

Recommendation:

Sec 23.30.239 EMPLOYEE ELIGIBLE FOR BENEFITS UNDER THIS CHAPTER WHO HAS RECEIVED OR IS ENTITLED TO RECEIVE UNEMPLOYMENT COMPENSATION

(a) No compensation shall be payable for temporary total disability or permanent total disability under this chapter for any week in which the injured employee has received, or is receiving, or is eligible for unemployment compensation benefits.

(b) If an employee is entitled to both compensation for wage-loss pursuant to AS 23.30.190(b) and unemployment compensation benefits, such unemployment compensation benefits shall be primary and the compensation for wage-loss shall be supplemental only, the sum of the two benefits not to

exceed the amount of wage-loss compensation which would otherwise be payable. For purposes of termination of wage-loss pursuant to AS 23.30.190(b)(3)(A), the term "payable" shall be construed to include payment of unemployment compensation benefits in lieu of compensation for wage-loss as provided in this section.

AS 23.30.250
PENALTY FOR MISREPRESENTATION

Problems:

1. Provision would apply only to someone providing false information to "obtain" a benefit; an employee. The provision should also apply to an adjuster who might mislead an injured employee.

2. The existing statute is not an effective tool in prosecuting someone suspected of defrauding the system.

Solution:

Reviewing the statutes of other states in conjunction with the information contained in Larsons, Workers' Compensation Laws, reveals that statutes vary widely. Their biggest attribute is the deterrent they pose to the person who might otherwise consider utilizing a deceptive tactic to further his own desire.

The recommendation should be adopted, and the provisions and penalty advertised, as people pay attention to the word "felony".

The provision is infinitely more complete than the existing statute which will contribute a great deal in enforcing the provision when needed.

Justification:

Adopted from the Florida Workers' Compensation Act, Section 440.37(1) and (2)(a).

Recommendation:

Sec. 23.30.250 PENALTY FOR MISREPRESENTATION

(a) Any person who wilfully makes a false or misleading statement or representation for the purpose of obtaining or denying any benefit or payment under this chapter, or who presents or causes to be presented any written or oral statement as part of, or in support of, a claim for payment or other

benefit pursuant to any provision of this chapter, knowing that such statement contains any false or misleading information concerning any fact or thing material to such claim, or who prepares or makes any written or oral statement that is intended to be presented to any employer, insurance company, or self-insured program in connection with, or in support of, any claim for payment or other benefit pursuant to any provision of this chapter, knowing that such statement contains any false or misleading information concerning any fact or thing material to such claim, is guilty of theft as defined in AS 11.46.100(3) and punishable as provided in AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

(b) All claim forms as provided for in this chapter shall contain a notice that clearly states in substance the following: "Any person who, knowingly and with intent to injure, defraud, or deceive any employer or employee, insurance company, or self-insured program, files a statement of claim containing any false or misleading information is guilty of a felony."

AS 23.30.265
DEFINITIONS

ACE has added five (5) new definitions and has altered the definitions of three terms.

The word "accident" was defined as it is now used in the definition of injury.

The phrase "date of maximum medical improvement" is added because it becomes a significant date in the wage-loss program; specifically section 190, Permanent Impairment and Wage-Loss. That date triggers the time period (20 day) limitation after which any lump sum impairment award is due and payable. In the wage-loss subsection it is the date when the wage-loss benefit begins as the employee is entitled to total temporary disability prior to that time.

The term "primary duties" is used in section 094, Rehabilitation. The term is used to differentiate between employees entitled to vocational rehabilitation and those who are not. If an employee can perform the primary duties of his occupation or any other occupation for which he is

qualified by education, training, and experience, he is not entitled to vocational rehabilitation.

The term "suitable gainful employment" is used in the Rehabilitation section to define the goal of the rehabilitation effort and add direction to future rehabilitation programs.

The term "substantial earning capacity" is primarily used in section 180, Permanent Total Disability. If after injury and after reaching the date of maximum medical improvement, an employee has a "substantial earning capacity", disability is not considered permanent and total. The wage-loss benefit would be payable in these cases rather than the permanent total benefit.

The definition of "injury" was also modified in that portion which addresses breakage or damage to prosthetic devices. The problem with the current definition is that it is not necessary to have an accident to the body in conjunction with or simultaneously with damage to teeth or prosthetic devices. Fillings falling out of teeth are covered at remote site operations, glasses falling off an employee's face are covered, all without an accident to the body. (see Exhibit IX) ACE believes the intent of the Workers' Compensation Act has been exceeded and requires tightening.

Originally requested in H.B. 159 by the Workers' Compensation Division, "pain clinic services" has been added in the definition of medical and related benefits. The definition of medical and related benefits also specifically included "physical rehabilitation", apparently to the exclusion of "vocational rehabilitation". Section 094, Rehabilitation covers both, and both should be considered medical, therefore necessitating the deletion of the word "physical".

The definition of "wages" has also been altered to clarify its meaning in regard to board, rent, housing, lodging or similar advantages received in remote site work and for clarification of the status of employee benefits.

The value of lodging in remote site work is substantial and including that value in wages would materially affect the employer's compensation costs. The value of lodging is normally included in wage calculations when the salary has been reduced to offset the cost of on-site housing when on-site housing is to the advantage of the employer. Wage rates have not been reduced for remote site employment and therefore the wage base for workers' compensation should not include such value.

Clarification of the status of employee benefits is also deemed desirable as it has not been addressed by the legislature or courts in Alaska. It has been discussed in terms of wages lost when an employee is totally and permanently disabled and thereafter looses his employer funded benefit package. Excluding benefits from the definition of wages allows employers and employees to bargain solutions to any remaining problem.

The words "in force at the time of hiring" have also been deleted as recommended in H.B. 159 proposed by the Workers' Compensation Division.

Recommendation:

Sec. 23.30.265 DEFINITIONS. as used in this chapter

(1) "accident" means only an unexpected or unusual event or result, happening suddenly, the results of which are neither expected or intended from the standpoint of the employee.

(2) "adoption" or "adopted" means legal adoption before the time of the injury;

(3) "board" means the Alaska Workers' Compensation Board;

(4) "child" includes a posthumous child, a child legally adopted before the injury of the employee, a child in relation to whom the deceased employee stood in loco parentis for at least one year before the time of injury, and a stepchild or acknowledged illegitimate child dependent upon the deceased, but does not include married children unless wholly dependent on him;

(5) "grandchild" means a child as defined in (4) of this section of a child as defined in (4) of this section;

(6) "brother" and "sister" include stepbrothers and stepsisters, half brothers and half sisters, and brothers and sisters by adoption, but do not include married brothers and married sisters unless wholly dependent on the employee;

(7) "child," "grandchild," "brother," and "sister," include only persons who are under 19 years of age, persons who, though 19 years of age or over, are wholly dependent upon the deceased employee and incapable of self-support by reason of mental or physical disability, and persons of any age while they are attending the first four years of vocational school, trade school, or college, and persons of any age while they are attending high school;

(8) "compensation" means the money allowance payable to an employee or his dependents as provided for in this chapter, and includes the funeral benefits provided for in this chapter;

(9) "date of maximum medical improvement" means the date after which further recovery from, or lasting improvement to, an injury or disease can no longer resonably be anticipated, based upon reasonable medical probability;

(10) "death" as a basis for a right to benefits means only death resulting from an injury;

(11) "disability" means incapacity because of injury to earn the wages which the employee was receiving at the time of injury in the same or any other employment;

(12) "employee" means an employee employed by an employer as defined in paragraph (13);

(13) "employer" means the state or its political subdivison or a person employing one or more persons in connection with a business or industry coming within the scope of this chapter and carried on in this state;

(14) "injury" means accidental injury or death arising out of and in the course of employment, and an occupational disease or infection which arises naturally out of the employment or which naturally or unavoidably results from an accidental injury, and includes breakage or damage to eyeglasses, hearing aids, dentures, teeth, and [OR] any prosthetic devises which function as part of the body, but only when damage is shown to be part of, or in conjunction with and as a result of, an accident in the normal course of employment, and further includes an injury caused by the willful act of a third person directed against an employee because of his employment.

(15) "insurance director" refers to the person who heads the insurance division or section of the Department of Commerce and is charged with the administration of the state insurance laws;

(16) "married" includes a person who is divorced but is required by the decree of divorce to contribute to the support of his former spouse;

(17) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services,

hospital supplies, medicine and prosthetic devices, [PHYSICAL] rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

(18) "parent" includes stepparents and parents by adoption, parents-in-law, and a person who for more than three years before the death of the deceased employee stood in the place of a parent to him, if dependent on the injured employee;

(19) "permanent impairment" means any anatomic or functional abnormality or loss, existing after the date of maximum medical improvement, which results from injury;

(20) "physician" includes doctors of medicine, surgeons, chiropractors, osteopathys, dentists, and opteomyelits;

(21) "primary duties" are those activities which comprise the substantial amount of time for, and are essential to, the performance of that position after the employer has made reasonable accommodations for the worker's physical impairments;

(22) "reserve rate" means the unencumbered second injury fund balance on October 31 of each year as a percentage of disbursements from the second injury fund during the twelve month period ending on June 30 of the same calendar year.

(23) "self-insurers" means an employer who, instead of insuring his liability under this chapter as it provides, elects to pay directly the benefits provided for, and who has furnished to the board satisfactory proof of his financial ability to make the direct payments;

(24) "suitable gainful employment" means employment or self employment which is reasonably attainable in light of the injured individual's age, educational background, previous occupation, and injury and which offers an opportunity to restore the individual as soon as practical and nearly as possible to his average weekly earnings at the time of his injury;

(25) "substantial earning capacity" means that an employee is engaged in, or is physically capable of engaging in, gainful employment, including light work;

(26) "widow" includes only the decedent's wife living with or dependent for support upon him at the time of his death, or living apart for

justifiable cause or by reason of his desertion at such a time;

(27) "widower" includes only the decedent's husband living with or dependent for support upon her at the time of her death, or living apart for justifiable cause or by reason of her desertion at such a time;

(28) "prosthetic devices" includes but is not limited to eyeglasses, hearing aids, dentures, and such other devices and appliances, and the repairment or replacement of the devices necessitated by ordinary wear and arising out of an injury;

(29) "volunteer fireman" means an individual whose name is registered with the state fire marshal as a member of a regularly organized volunteer fire department or who serves with a full-time fire department on a temporary, voluntary basis;

(30) "regularly organized volunteer fire department" means a volunteer fire department registered with the state fire marshal which has official recognition and financial support from the political subdivision where it is situated;

(31) "volunteer policeman" means an individual who serves as a peace officer with a full-time police department of a general law or home rule municipality on a temporary, voluntary basis;

(32) "volunteer ambulance attendant" means an individual who serves as an ambulance attendant on a temporary, voluntary basis with a volunteer or full-time fire department or municipal ambulance service of a general law or home rule municipality;

(33) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring, [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value to the employee of board, rent, housing, lodging, or similar advantage received from the employer, gratuities received in the course of employment from <u>other</u> [OTHERS] than the employer, <u>except the value of board, rent, housing, lodging or similar advantage received from an employer in conjunction with remote site employment, and excluding in any situation the cost or value of employee benefits provided voluntarily or by labor agreement by an employer;</u>

OCCUPATIONAL DISEASES

During the Legislative hearings considerable testimony was presented describing the inadequacy of the Workers' Compensation Act in meeting the needs of workers who suffer from an occupational disease known as asbestosis. The disease results from the inhalation of asbestos fibers causing damage to the lungs which is practically impossible to diagnose prior to death.

In the Alaska Workers' Compensation Act, the word "injury", by definition, includes occupational disease. For a normal or regular occupational disease the coverage provided appears adequate and responsive. Because of the peculiar traits of asbestosis, the coverage provided under the act has been demonstrated to be non-existent in time of need.

The ACE study has not been able to cope with this disease in that people experienced and knowledgable in this disease do not reside in Alaska. Further study is needed in order to make intelligent and meaningful recommendations on how it should be integrated into the workers' compensation system.

Therefore, we recommend that the Alaska legislature will continue to study this desease and its effects on Alaskan residents, and put together a recommended program for this group of Alaskans who so desperately need help.

FLORIDA'S NEW WORKERS' COMPENSATION SYSTEM: AN INTERIM REPORT

March 1981

(WITH OCTOBER 1981 ADDENDUM)

Prepared By:

BUREAU OF ECONOMIC ANALYSIS
DIVISION OF ECONOMIC DEVELOPMENT
FLORIDA DEPARTMENT OF COMMERCE

ADDENDUM

October 1981

Since the completion of this report in March 1981 there has been a second Workers' Compensation premium reduction ordered by the State Insurance Commissioner. This reduction can be described briefly.

The effective date of the rate reduction was July 1, 1981. On average, Workers' Compensation premiums paid to private insurance carriers were decreased 15.6%. Since the volume of premiums paid in a year in Florida is about $1 billion, that would mean a savings of $156 million for Florida employers annually.

The actual premium reduction varied by employment class. All 600 classes were guaranteed at least a 5% reduction. The manufacturing classes averaged a 22.7% decrease with rates for some manufacturing classes falling by as much as 48%.

This latest action was the third Workers' Compensation premium decline since the 1979 reforms. The first, a 15% across-the-board reduction was enacted by the Legislature as a part of the 1979 reform package. The Insurance Commissioner ordered an 11.4% rate reduction in January 1981 which actually translated into a 5.1% premium dollar reduction when other changes were considered.

Cumulatively, the impact of these premium reductions has been to lower premium rates by 36.4% and save Florida employers $325 million annually in premiums. The average Workers' Compensation premium rate is now at its lowest point since September 1975 and places the State only 23rd highest in the nation. Before the reforms, Florida had ranked among the five most expensive states in this regard.

Further premium reductions may be in the offing. As is indicated on pages 21-24 of this report, early indications of claims activity, total claim costs, attorney involvement and other factors are quite promising. The State Insurance Commissioner has requested another Workers' Compensation premium rate filing later this year to take effect January 1, 1982.

I. OVERVIEW

At one time, Florida's Workers' Compensation program was a system seriously in need of fundamental reform. Injured workers genuinely entitled to assistance received inadequate benefits. Employers were overburdened with premiums while insurance carriers lost millions of dollars annually attempting to provide Workers' Compensation coverage. The State's efforts to attract new industry were severely hampered by the reputation of the Florida Workers' Compensation system as extremely costly to employers.

Study of the system indicated that its very structure encouraged subjectivity in benefit determination. This fact, in turn, provided incentives for exaggerated if not invalid claims, and for the unusually frequent involvement of attorneys and medical specialists. The inadequate authority and resources accorded those government agencies charged with overseeing Workers' Compensation further contributed to the problem.

These problems were directly addressed in sweeping changes to the Workers' Compensation law effective August 1, 1979. These reforms were aimed at making Florida's Workers' Compensation system affordable, equitable and efficient. Perhaps the most important change was a switch to the "wage-loss" concept in benefit determination. Under this concept, a worker disabled by an injury on the job would receive (in addition to coverage of his medical expenses) compensation based on the actual decrease in average wages he suffered as a result of his disability.

Among the more important additional changes were: 1) an increase in statutory benefit levels for injured workers; 2) fundamental revisions in the authority and responsibilities of the Bureau of Workers' Compensation; 3) an enhancement of the ability of both the citizenry and its government to participate in the rate-making process; 4) a shift, to the claimant, of responsibility for paying attorneys' fees; 5) the discouragement of lump sum settlements of claims; and, 6) an across-the-board 15 percent reduction in premium rates with further reductions anticipated as experience was gained under the new law.

Any future reductions in Workers' Compensation premium rates are likely to be ordered by the Florida Insurance Commissioner based on his evaluation of rate filings made by the insurance industry. (Direct action by the Legislature is always a theoretical possibility.) Not until June 1981 will the insurance industry make its first premium rate adjustment filing based directly on experience under the new law.

Nevertheless, the early indications are quite positive in regard to the Legislative objective of reducing the cost of the Workers' Compensation system. Substantial progress already has been made; available information encourages the belief that further premium rate reductions are a distinct possibility. At this point, the following observations are warranted:

1. The Workers' Compensation insurance industry has been able to absorb two sizable premium rate reductions. Estimates made at the time these rate reductions were put into effect suggest that they will result in combined premium savings of approximately $170 million annually for Florida employers. The two rate reductions marked the reversal of a long-term trend of rapidly increasing Workers' Compensation premiums in the State. Before the 1979 legislative action, Florida ranked 5th in the nation in terms of its premium rates for Workers' Compensation coverage. It now has fallen to 13th.

2. These significant premium reductions have occurred even while statutory benefits available to injured workers were being increased substantially. The maximum weekly benefit amount has gone from $130 in 1978 to $226 in 1981, moving Florida's rank among the states from 41st to 18th. The maximum period for benefit collection has been extended; the inflation adjustment used in benefit calculation, increased; and the schedule of fees for medical services, revised upward by nearly 30 percent.

3. Available analyses suggest that the new law is having its intended effects in terms of the costliness of Workers' Compensation claims.

   - A study commissioned by the Insurance Committee of the Florida House of Representatives found that, during the first five months of operation of the new law, the percentage of claims of the particularly expensive "permanent partial" injury type had declined significantly. So too had indemnity costs and the percentage of claims involving attorney representation. The proportion of workers returning to their same employer after recovery from their injury had increased.

   - A November 1980 analysis by the National Council on Compensation Insurance (NCCI) also found a decrease in the frequency of permanent partial injury claims. While concluding that available data did not yet provide an adequate basis for a premium rate adjustment decision, one preliminary finding was an indication of significant insurance carrier cost reductions resulting from experience under the new law.

   - A Division of Workers' Compensation comparison of 1979 and 1980 data revealed that, during the first full year under the new law, there was a 4 percent reduction in total premiums paid by employers in the State. The number of formal claims declined by 48 percent. The number of joint petition settlements of Workers' Compensation claims fell by 36 percent while benefits paid in these claims dropped by 18 percent--a savings of $15.7 million. The amount of attorneys' fees awarded in Workers' Compensation cases decreased by 10.6 percent.

As the first state in the nation to adopt the wage-loss concept as the basis for determining permanent disability benefits for injured workers, Florida is serving as an experimental model watched closely by other states. Perhaps the best guarantee that Florida's Workers' Compensation reforms will succeed is the number of determined and careful monitoring programs being conducted both inside and outside government.

II. WORKMEN'S COMPENSATION IN FLORIDA (1935-1979)

A System in Need of Reform

In 1935, the State of Florida established a Workmen's Compensation system designed to lend stability and predictability to an employer's obligations to his injured employees while, at the same time, insuring that the injured worker would receive prompt and adequate compensation for his injury.[1] By the 1970s, Workmen's Compensation had evolved into a system which was unsatisfactory from virtually every perspective.

Consider the plight of the parties directly involved in the Workmen's Compensation system prior to its reform in 1979:

The Injured Worker--The benefits available to the average injured worker in Florida were quite low compared to those available in other states. An analysis conducted by the National Council on Compensation Insurance (NCCI) revealed that Florida's "statutory benefits", that is the maximum benefit amounts and collection periods set by law, ranked the state 37th in the nation.[2] For example, while in most states an injured worker received 66-2/3 percent of his average weekly wage while disabled, in Florida he received 60 percent.

Furthermore, compensation claims were taking a long time to resolve. The Miami Herald, in a comprehensive analysis of Florida's Workmen's Compensation system, reported that many injured workers were forced to hire attorneys because their legitimate claims were not being paid on time.[3]

The Employer--The cost to Florida employers of carrying the required Workmen's Compensation insurance was extremely high. Florida's premium rates (the decimal fractions applied to payrolls to calculate premiums due) were the fifth highest in the nation in 1979 according to NCCI data.[4] These premium rates had increased 229 percent from 1970 to 1978 and further rate increases were being requested by the insurance industry.[5] In 1979, the total premiums paid by Florida employers ranked it seventh in the nation according to figures from the National Association of Insurance Commissioners.[6]

These ever-increasing premiums did more than just force up the cost of doing business in Florida. They also put the State's businesses at a disadvantage when bidding for contracts against out-of-state firms. Bids submitted by Florida firms reflected the unusually high Workmen's Compensation premiums.[7]

The Insurance Companies--During the five-year period extending from 1973 through 1977, insurance companies offering Workmen's Compensation coverage in the State experienced $205.1 million in net losses according to NCCI data.[8] Although investment returns did result in a 3 percent net profit in 1978, there had not been an underwriting profit in Florida Workmen's Compensation since the 1950s.[9]

The impact of this unsatisfactory system extended beyond those directly involved. Ultimately, all Floridians felt the effects of the escalating premiums. Producers of goods and services passed their increased operating costs on to consumers.

State efforts to diversify the Florida economy, to further develop the industrial base, were severely hampered by the costly Workmen's Compensation system. Premium rates paid by Florida employers were nearly triple those paid by Alabama, North Carolina and South Carolina--states very much in competition with Florida in efforts to attract new industries. The NCCI reported that the cost of claims from permanently and totally disabled Florida workers was double that of seven other southern states.[10] An "Economic Development Study" prepared by the Fantus Company for the Florida Council of 100 cited high Workmen's Compensation premium rates as a competitive disadvantage for the State in its effort to recruit industry.[11]

In their efforts to attract new industry to Florida, officials often were confronted with questions about the reputation of Florida's Workmen's Compensation system. Former Commerce Department Secretary Phil Ashler once described a standard industrial recruitment scenario demonstrating the obstacle posed by Florida's high Workmen's Compensation premiums. According to Ashler, a prospective employer typically would ask a series of questions about the adequacy of labor supply and other business conditions. As State officials responded to these questions, the attractiveness of Florida to the prospect would grow--until the issue of Workmen's Compensation was encountered. At that point, Florida's image suffered a setback.[12]

The Miami Herald reported that the Governor and Lieutenant Governor had similar experiences. While delivering a promotional speech in Chicago, Governor Bob Graham was interrupted by a firm's indignation over Florida's Workmen's Compensation rates. Lieutenant Governor Wayne Mixson lamented the effects of a costly Workmen's Compensation system on industrial recruitment.

> Several prospects that we've had, specific prospects that we've talked to in other states that have had the kind of industry or business that we would desire to locate in Florida, have been reluctant to make any commitment because of that, the workmen's comp.[13]

Further Defining the Problem

Florida's Workmen's Compensation system was costing employers and insurance companies far more than the typical benefits paid to the vast majority of injured workers warranted. Why was this the case?

In 1978, a study was conducted by the National Council on Compensation Insurance (NCCI) with the results printed by the Florida Association of Insurance Agents.[14] This analysis, which compared Florida's claim and benefit figures to those of Alabama and Georgia, identified the major elements of Florida's Workmen's Compensation problem.

1. Total medical benefits paid to injured workers in Florida were significantly higher than those paid in other states.[15] The average medical benefits paid, the proportion of cases in which specialized medical practitioners were used, the frequency with which injured workers were confined to a hospital and the average hospital bill in Florida were invariably higher than in Alabama and Wisconsin.

2. Benefits paid for impairment or disability in Florida were higher than for Alabama and Wisconsin despite Florida's comparatively low statutory benefits.

3. Workmen's Compensation activity in Florida featured an unusually great amount of litigation. The percentage of Florida cases in which attorneys were involved on the plaintiff side (20.8 percent) was far above that of Alabama (2.8 percent) and Wisconsin (3.0 percent). Attorneys typically became involved at an earlier point in Florida cases; Florida cases normally took a longer time to be resolved; and, a greater number of cases were reopened by plaintiff attorneys. According to the Division of Workers' Compensation, Florida Compensation lawyers took in $19.7 million in fees during 1978.[16]

4. The proportion of cases which involved "permanent partial" disabilities was far higher in Florida than in Alabama or Wisconsin. Furthermore this injury category was responsible for a disproportionately large share of the Workmen's Compensation benefits paid in the State.

Because this fourth item was perhaps the key finding, it deserves more detailed attention. In the table below, Florida's

distribution of Workmen's compensation by injury type is compared to those of Alabama and Wisconsin.

TABLE 1

PERCENTAGE DISTRIBUTION OF RESOLVED WORKMEN'S COMPENSATION CASES BY INJURY TYPE: FLORIDA, ALABAMA AND WISCONSIN (November-December 1977)

Injury Type	Florida	Alabama	Wisconsin	
Death	0.4	0.2	0.4	0.89
Permanent Total	0.8	0.1	0.5	0.15
Permanent Partial	30.0	7.1	9.0	24.16
Temporary Total	68.5	90.6	89.0	74.60
Temporary Partial	0.3	2.1	1.2	0.13

SOURCE: Florida Association of Insurance Agents, 1977 Workmen's Compensation Closed Claim Study, conducted by the National Council on Compensation Insurance, March, 1978.

Note that the proportion of resolved Florida cases which fall into the permanent partial category was more than three times the proportion recorded in Wisconsin and more than four times the Alabama figure.

The disproportionately large role of permanent partial injuries is just as striking when the distribution of benefits by injury type is examined as in Table 2.

TABLE 2

PERCENTAGE DISTRIBUTION OF BENEFITS PAID IN RESOLVED WORKMEN'S COMPENSATION CASES BY INJURY TYPE: FLORIDA, ALABAMA AND WISCONSIN (November-December 1977)

Injury Type	Florida	Alabama	Wisconsin	
Death	1.6	2.1	5.4	19.14
Permanent Total	10.8	1.9	2.2	2.73
Permanent Partial	67.2	37.5	40.8	66.91
Temporary Total	20.3	57.4	50.8	11.21
Temporary Partial	0.0	1.0	0.8	0

SOURCE: Florida Association of Insurance Agents, 1977 Workmen's Compensation Closed Claim Study, conducted by the National Council on Compensation Insurance, March, 1978.

As the table reveals, permanent partial injury cases accounted for 67.2 percent of medical and indemnity benefits paid in Florida but only 37.5 percent and 40.8 percent of Alabama and Wisconsin benefits, respectively.

Causes Underlying the Problems

The responsibility for these problems appeared to rest with the structure of Florida's Workmen's Compensation system itself. More specifically, it was a system which placed too much reliance on the subjective judgments required of doctors and of Judges of Industrial Claims. It was a system which encouraged the active involvement of attorneys and the granting of lump sum settlements by insurance companies. It was a system which provided government agencies with insufficient authority and resources with which to regulate the program in the public interest. Finally, it was a system which provided indemnity benefits to injured workers who had not actually suffered any loss in wages.

The subjectivity of procedures was most evident at the point of "maximum medical improvement" or MMI, i.e., the point of which a doctor decided that the injured worker had recovered to the greatest extent possible. At that point, it would be determined whether the worker had either: 1) no disability, 2) a partial disability which was nonetheless permanent (permanent partial), or 3) a permanent and total disability (permanent total).

As noted previously the permanent partial category was responsible for an unusually large number of cases and a disproportionately high level of benefits in Florida. If a worker had received a permanent partial disability in the form of an injury specified in the Florida Statutes (a "scheduled" injury), he received a specific number of weeks of compensation at 60 percent of his average weekly wage. These benefits were paid whether or not the worker had been able to resume employment at his previous wage or even higher.

For "unscheduled" injuries within the permanent partial category, a doctor assigned a percentage disability rating to the worker. This percentage disability rating then was multiplied <u>first</u> by a specified number of weeks (175 for a 1-to-10 percent rating, 350 for an 11-to-50 percent rating, and 525 for a 51-to-100 percent rating) and <u>then</u> by 60 percent of the worker's average weekly wage.

This rating system was not only highly judgmental, it also provided a strong incentive for attempting to increase the disability rating. Fred Karl, speaking for the Florida Association of Insurance Agents, provided an example of this. At the time his example was formulated, the maximum weekly benefit amount available to an injured worker was $130. Note the difference in benefits paid if the worker's disability rating were to be raised from 10 percent to 11 percent.

10% x 175 weeks @ $130 per week = $2,275
11% x 350 weeks @ $130 per week = $5,005

A one percentage point revision in the disability rating raised the benefits paid to twice the original amount. This was because, as was explained earlier, the 11 percent disability rating marked a threshold in the benefit structure. The disability rating increased by one percentage point, but, more significantly, the number of weeks of benefits paid jumped from 175 to 350. This latter change was primarily responsible for the huge jump in the benefit amount. A similar threshold existed at the 51 percent rating level.

The subjectivity did not stop with the doctor's disability rating however. In recognition of the fact that the same injury could affect the careers of two people in different occupations to a much different extent (for example, compare the ramifications of the loss of a finger to a lawyer as opposed to a pianist), the system had a second form of disability rating, wage diminution. The worker's lifelong wage earning capacity could be diminished by his injury. This contention would be presented to a Judge of Industrial Claims who would determine a diminution of wage earning capacity rating based on such factors as the age, occupation, education of the worker and other circumstances. In the end, the higher of the two disability ratings, the wage diminution rating from the judge or the physical disability (impairment) rating from the doctor, would determine the worker's benefits.

In other words, the system provided the injured worker with an incentive to obtain a higher disability rating. This incentive, combined with the subjectivity of the ratings themselves, resulted frequently in the use of legal counsel and the involvement of medical specialists. The NCCI study of two months' of resolved permanent partial cases in 1977 revealed that 71 percent of injured Florida workers were represented by an attorney. This proportion was more than twice the Alabama figure and four times that of Wisconsin.[17] Medical specialists, as opposed to general practioners, were involved in 63.4 percent of the Florida cases in which physicians were consulted. The corresponding percentages for Alabama and Wisconsin were 30.8 percent and 39.3 percent, respectively.[18] This suggested what the Miami Herald called "doctor shopping", an attempt to find the physician who would give a higher disability rating.[19]

While the role of subjective judgments in benefit determination was perhaps the most central deficiency in the system, there were other, often related problems.

1. Attorneys' fees were related to benefit and settlement amounts. Until 1978, the claimant paid no attorney's fees. Legislation in that year required that claimants pay 25 percent of the fees with certain exceptions. Thus, attorneys had an incentive to strive for the largest award possible unencumbered by concern about the claimant's ability to pay an attorney's fee.

2. According to the Miami Herald, many Judges of Industrial Claims tended to give the benefit of the doubt to the Workmen's Compensation claimants. That publication reported instances of compensation awards when there was, in fact, no injury.[20]

3. Insurance companies frequently faced lengthy and costly litigation. To extricate themselves, they tended to offer lump sum settlements or washouts of medical expenses to injured workers.[21]

4. The government agencies involved lacked the authority and resources to remedy the situation. The Bureau of Workmen's Compensation was too overwhelmed with paperwork to advise claimants on rights and procedures or to see that benefits were paid equitably and in a timely manner. The Department of Insurance had to rely on the National Council on Compensation Insurance, an insurance industry organization, to provide the statistical basis for evaluating rate adjustment requests.[22]

III. THE MAJOR ELEMENTS OF THE 1979 CHANGES TO THE WORKMEN'S COMPENSATION LAW

The Intent of the Legislature

It had become clear that rather fundamental changes were needed in Florida's Workmen's Compensation system. A joint Senate-House Select Committee was appointed and the Workmen's Compensation issue was identified as the key issue facing the 1979 Legislature.[23]

The overall goal of the legislative effort was to reduce the cost of Workmen's Compensation to employers. However, the aims of restoring equity in benefit awards and of reducing the delays in claims resolution were also important. In other words, it was hoped that the system could be made affordable, efficient and equitable.

Two major targets of reform were identified. The first was comprised of the indemnity benefit determination provisions in the existing law which required subjective estimates of disability by doctors and by Judges of Industrial Claims. This subjectivity had led to extensive litigation which, in turn, had been a major factor in the high cost of the system. The second target consisted of the administrative provisions used in handling a claim. The ineffectiveness of these provisions had resulted in delays in claims processing and had contributed to the extensive litigation characteristic of the system. An improved administrative structure was seen as increasing the equity of benefit determination by reducing the system's dependence on ". . . the vagaries of the adversary process."[24]

The Changes in the Law

By the end of the 1979 Legislative sessions, Florida had a new "Workers'" Compensation law. The major changes were the following.[25]

1. Florida became the first state to adopt a "wage-loss" concept for a considerable proportion of Workers' Compensation benefit determination. The switch to a wage-loss concept was intended to decrease dramatically the subjectivity involved in benefit determination.

   This change concerned the indemnity component rather than the medical services component of Workers' Compensation benefits. Recall that, under the old system, injured workers suffering a permanent and partial disability either were eligible for benefits specified by statute (scheduled injuries) or were compensated based on a disability rating (unscheduled injuries). Within the unscheduled category, workers received the higher of the physical impairment and the diminution of earning capacity ratings.

Under the new system, impairment benefits would be paid for certain severe injuries: amputation, 80 percent loss of vision (after correction), or serious head or facial disfigurement. However, indemnity benefits in the majority of cases were to be determined solely by the actual loss in wages experienced by the injured worker due to his disability.[26] Under the wage-loss concept, the injured worker would receive 95 percent of the difference between 85 percent of his pre-injury wages and his wages after maximum medical improvement. This rule translates into the proposition that the worker must have experienced at least a 15 percent wage loss. After the worker had collected wage-loss benefits for two years, his post-injury wages would be discounted to adjust for inflation.

2. The statutory benefit levels for injured workers were raised. The maximum weekly benefit amount was increased from 66-2/3 percent of the statewide average weekly wage to 100 percent of that figure.

3. The structure and authority of the agency responsible for overseeing the operation of the Workers' Compensation were changed in the interest of making that agency more administratively effective. The Bureau of Workmen's Compensation was upgraded to a Division within the Department of Labor and Employment Security. This Division was instructed to ". . .assume an active and forceful role" in administering the system.[27] Under the new law, the employer would report employee injuries directly to the Division rather than indirectly to the Division through the insurance carrier. Steps were to be taken to ensure that injured workers were fully and promptly informed of proper procedures and their rights under the law. For example, injured workers were to be mailed an informational brochure while those suffering injuries which might permanently disable them were to be contacted personally. The Workers' Compensation Division would become more actively involved in controverted claims issuing advisory opinions as to benefits payable in each case. The judges of industrial claims were retitled deputy commissioners. Appeals of rulings by the deputy commissioners would now go to the First District Court of Appeals rather than to the Industrial Relations Commission, abolished by the 1979 legislation. The main burden of workers rehabilitation was shifted from the Division to the insurance carrier and employer. Finally, the Division was required to examine claims files, report annually on carrier promptness of payment and notify the Department of Insurance of patterns of questionable claims handling techniques by carriers.

4. The ability of citizenry and government to participate in the rate-making process was increased. A Bureau of Workers' Compensation Rating was established within the Department of Insurance to provide analytical support to the Insurance Commissioner in his review of insurance industry rate filings. Insurance company reporting requirements were changed in order to facilitate analysis by the Department of Insurance. Meetings by insurance industry rate-making authorities were required to take place in Florida and in the "sunshine." Excessive profits by insurance companies were prohibited.

5. The responsibility for paying attorneys' fees was shifted entirely to the claimants. Previously the claimant was to pay 25 percent of the fees while the remaining 75 percent was paid by the employer or insurance carrier. Certain exceptions to the rule of claimant payment were set forth. For example, attorneys' fees for recovery of medical benefits were to be paid by the employer or insurance carrier.

6. "Washouts" of benefits were to be strongly discouraged. Prior to the 1979 legislation, all parties could agree to a one-time payment to the claimant for benefits, thereby ending or "washing out" the employer's liability. Washouts of medical benefits would be prohibited. Lump sum settlements of disability benefits would be barred until six months after maximum medical improvement and then permitted only in special circumstances.

7. A 15 percent, across-the-board reduction in premium rates was mandated by the statute. The Legislature expected changes in the Workers' Compensation law--particularly the switch to a wage-loss system of disability benefit determination--to result in a substantial decline in insurance carrier costs. This decline was expected to more than counter-balance the increases called for in compensation benefits. To avoid excessive insurance carrier profits, the 15 percent premium rate reduction was ordered.

IV. THE EARLY PERFORMANCE OF FLORIDA'S NEW WORKERS' COMPENSATION SYSTEM

Examining the Impact

The fundamental reforms made in the Workers' Compensation law in 1979 were intended to make the system more equitable and efficient in meeting the genuine needs of injured workers while at the same time, making the system less costly to employers and insurance carriers. The reforms have been in effect for twenty months as of this writing. Although the new system will not have been given a fair test until it has been in operation for a number of years, an examination of the early performance of the law is warranted. Essentially, the question to be asked is this: Does the new Workers' Compensation law appear to be having its intended effects?

The scope of this analysis will be limited to the effects on employer costs (which reflect insurance carrier costs to a substantial extent). Certainly, the new system will not be considered a success unless it results in the fast, efficient and equitable delivery of compensation and services to the injured worker. However, an evaluation of that aspect of the system's performance is considerably more complicated than an assessment of the impact of the new law on employer costs. An examination of available statistics--benefits paid, numbers of claimants, premium rates and amounts--can provide a good preliminary indication of the impact of the new law on costs.

Reductions Already Accomplished in Employer Premiums

As was reported in Section III, one element of the 1979 legislation was a 15 percent, across-the-board reduction in Workers' Compensation premium rates. Simplifying somewhat, premium rates are multiplied by the employer's payroll to determine his Workers' Compensation insurance premium. At the time this rate reduction was enacted, a legislative staff analysis estimated that it would save Florida employers $135-142 million annually.[28]

As of yet, the insurance industry has not filed for a premium rate adjustment based directly on performance of Florida's new Workers' Compensation law. Nevertheless, an insurance industry rate filing submitted in December 1980 is worth noting. That filing concerned changes to the expense program used in calculating premiums and to the transition program for switching to a "total payroll" concept in computing premiums. As approved by the State Insurance Commissioner on January 1, 1981, this filing resulted in average premium rate reductions of 11.4 percent overall.[29] The Department of Insurance estimated that this premium rate reduction would result in savings of $34 million to Florida employers.[30] The NCCI determined that Florida's average manual premium rate following this change would rank it 13th among the 45 states permitting private Workers' Compensation insurance in the nation.[31] As was noted earlier, Florida had ranked fifth in the nation prior to the 1979 legislation. While the 11.4 percent rate reduction was

not based directly on experience under the new law, it does seem to suggest an improved economic state for insurance carriers after over a year and a half under the new law.

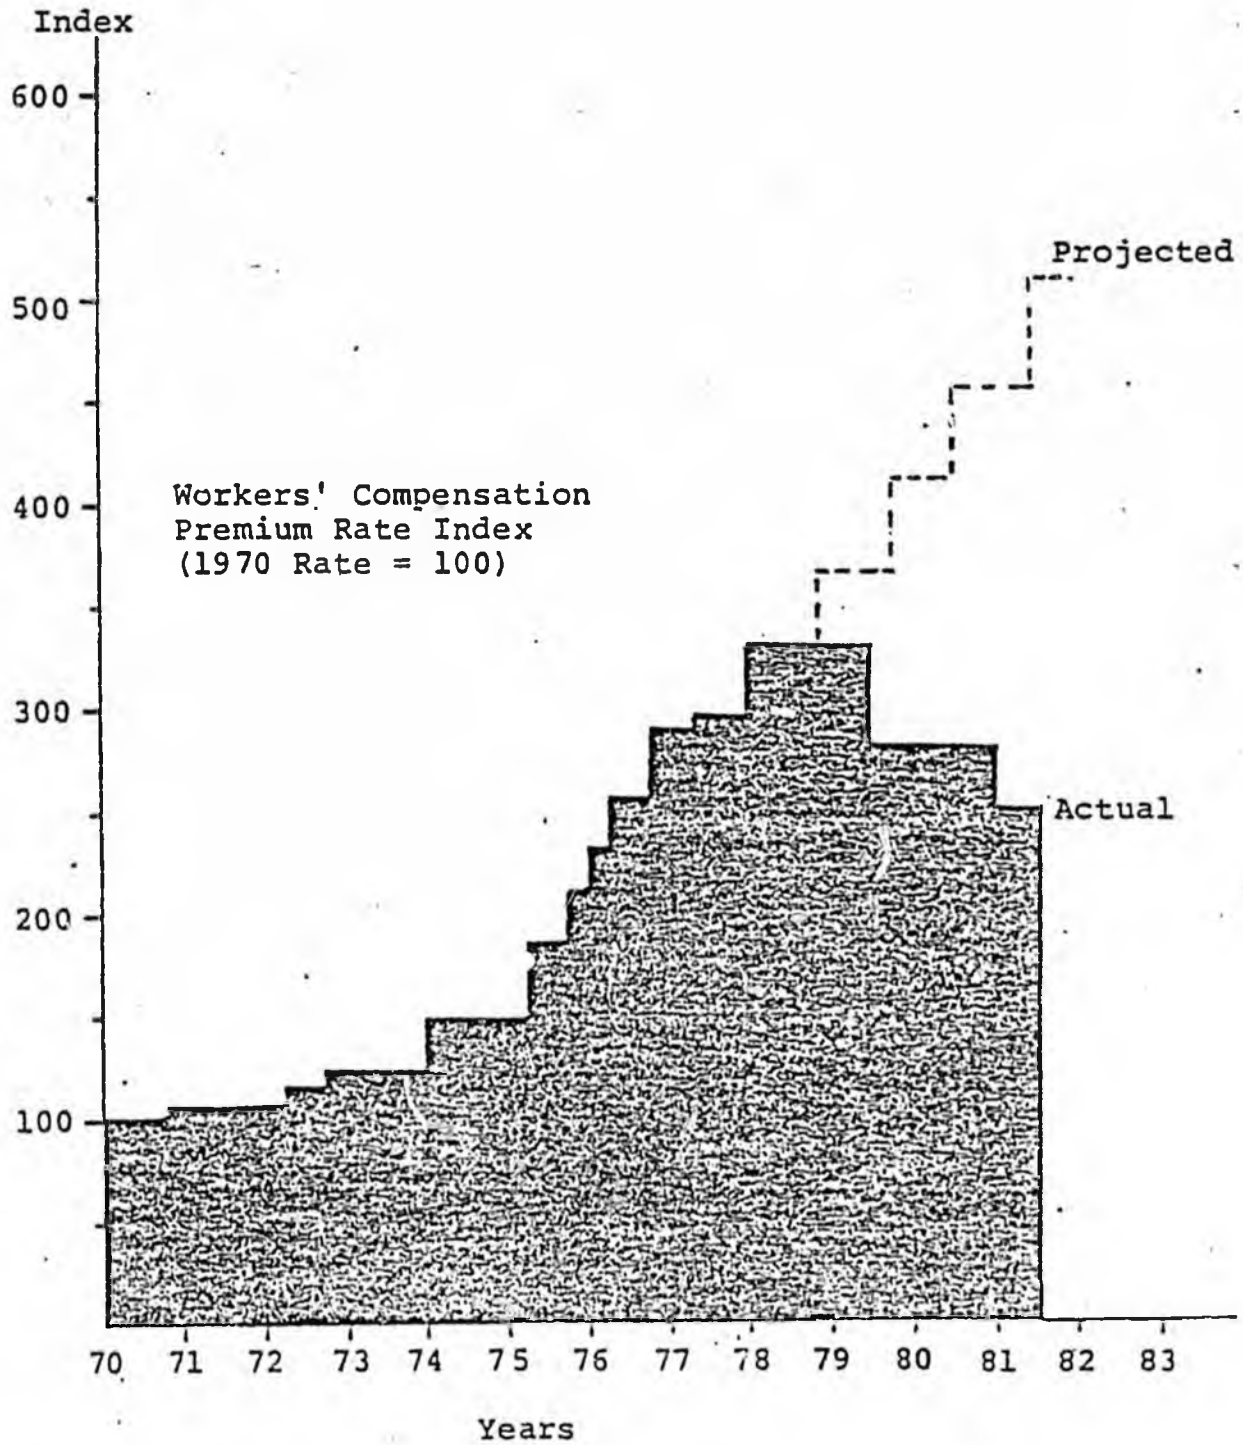
These premium rate reductions give early indication that the long-term trend of ever-increasing Workers' Compensation insurance premiums in Florida has been ended or perhaps even reversed. To demonstrate this development, an index of the overall Workers' Compensation manual premium rate has been developed. The average manual premium rate for all covered Florida employers, excluding those with self-insurance arrangements, as of January 1970 was set equal to 100.[32] Changes in the index over time then were calculated by applying the percentage changes in the overall manual premium rate reported at the time of the legislative action or the approved industry filing.[33] For example, an insurance industry filing for a rate increase was approved by the Insurance Commissioner and made effective August 1, 1970. This increase was estimated to have the effect, on the average, of raising Workers' Compensation premium rates by 7.2 percent. Thus, the value of the index was increased from 100 to 107.2 (100 + 7.2 percent) as of August 1, 1970.

In Figure 1, the trend in the manual premium rate index from 1970 to the present is portrayed. (The actual index trend is portrayed by the darkened area. The dashed lines are explained subsequently.) Note the rapid--even accelerating--rate of increase prior to the 1979 legislation. The 15 percent rate reduction ordered by the legislation was the first rate reduction of the decade. The second rate reduction, effective January 1, 1981, brought the premium rate index to its lowest level since September, 1976.

The reduced premium rate levels stand in stark contrast to what might have been the case had the Workers' Compensation legislation not been enacted. From January 1970 through July 1979, there were eleven premium rate increases affecting most or all classifications. That constitutes an average of one rate increase every 10.5 months. The average rate increase was 11.5 percent, compounded. Assuming that this trend had continued from the date of the final premium rate increase (effective January 1, 1978) prior to the 1979 legislation, the Workers' Compensation premium rate index would have stood at 457.0 in March 1981 rather than at its actual level of 248.3. The dashed-line bars in Figure 1 portray this possible path of the index had the 1979 changes to the Workers' Compensation law <u>not</u> been put into effect.

FIGURE 1

OVERALL TREND IN FLORIDA WORKERS' COMPENSATION PREMIUM RATES, 1970-1982: IMPACT OF NEW LAW



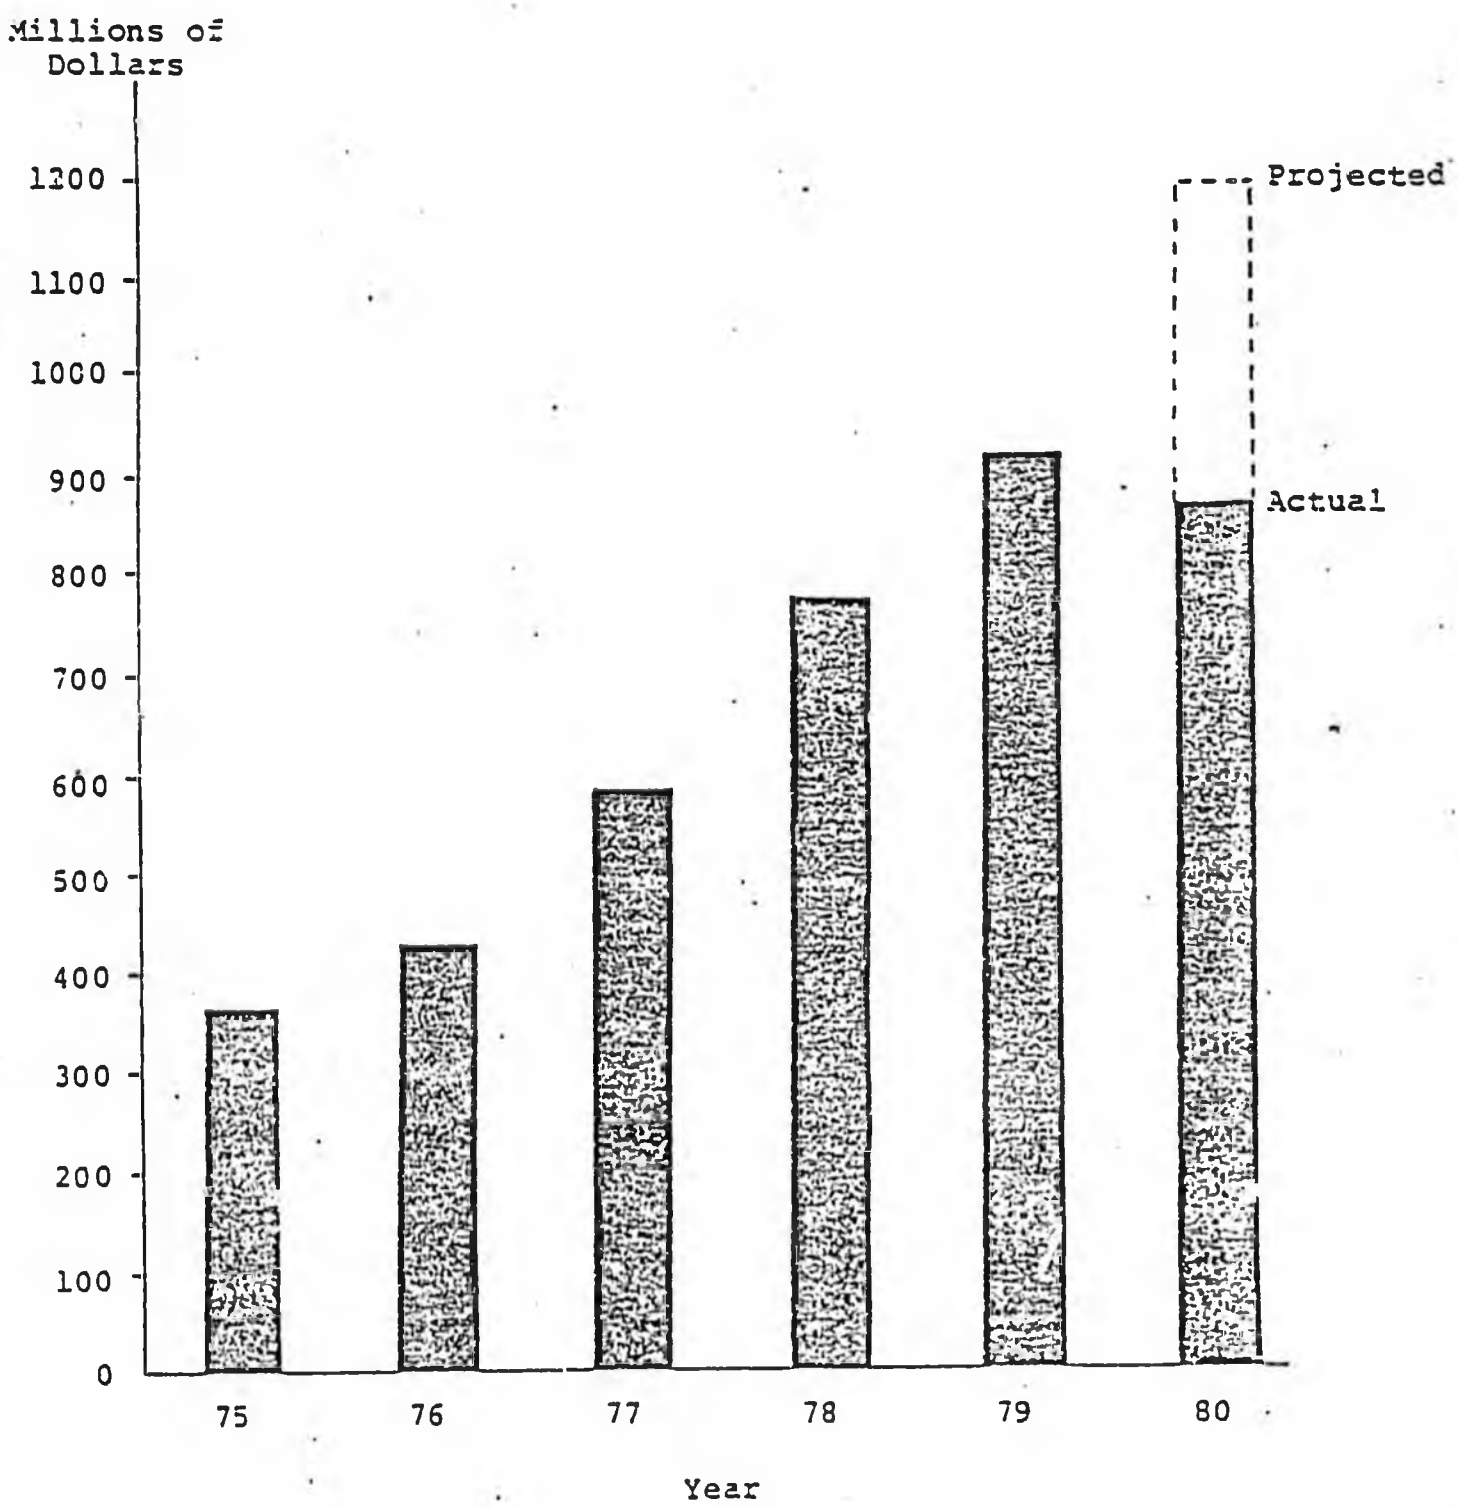
SOURCE: Historical rate increase data series provided upon special request by Bureau of Workers' Compensation Rating, Florida Department of Insurance. All index values, including hypothetical projections, calculated by Bureau of Economic Analysis, Florida Department of Commerce.

These premium rate reductions already have had an effect on actual Workers' Compensation premiums paid by Florida employers. Each year, the Division of Workers' Compensation within the Department of Labor reports the total premiums paid for Workers' Compensation coverage in the State.[34] In Figure 2, the historical trend in total premiums paid is shown. The darkened bars represent the actual premium totals for each year. Note the decrease in total value of premiums reported in 1980--the first full year affected by operation of the new law. This reduction occurred despite a 4.2 percent rise from 1979 to 1980 in the number of employees covered by Workers' Compensation and a 8.1 percent increase in the official average weekly wage in the State.

The dashed-line extension of the 1980 bar represents an estimate of the premium level which would have been attained without the 1979 legislation. The estimate assumes that the average annual percentage increase in premiums paid from 1975 through 1979 would have occurred once more in 1980. That average annual increase was 26.3 percent, compounded. Such an increase would have resulted in a 1980 premium total of $1.2 billion rather than the actual $877.6 million.

FIGURE 2

TREND IN WORKERS' COMPENSATION PREMIUMS REPORTED, 1975-1980: IMPACT OF THE NEW LAW

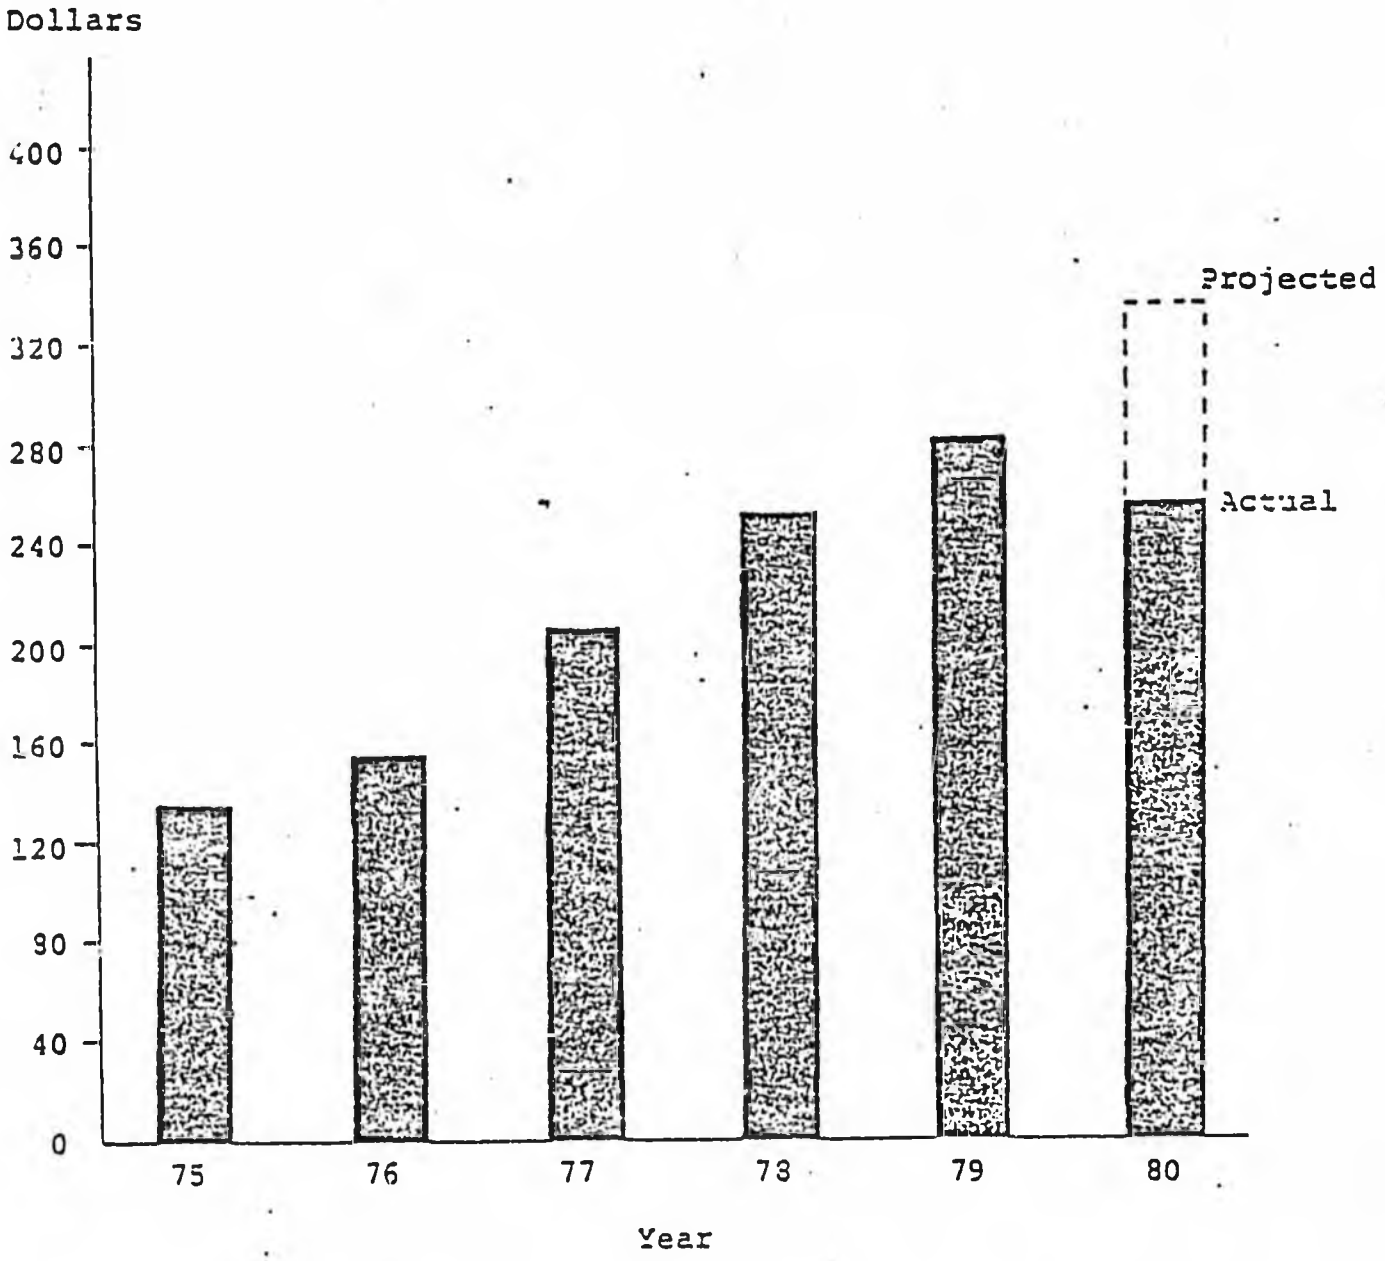


SOURCE: Actual historical data from 1977-1978 Cases Causes Costs, Division of Workers' Compensation, Department of Labor and Employment Security, 1979, p. 214 and by special request. 1980 projection by Bureau of Economic Analysis, Florida Department of Commerce.

Because the number of employees covered by Workers' Compensation is a major determinant of premiums paid, it might be expected that "controlling for" Florida's rapid employment growth might significantly alter the trend in Workers' Compensation costs. However, Figure 3 demonstrates that this is not the case. When the Workers' Compensation premiums paid per covered employee figure is plotted over time, the trend appears quite similar to that of total premiums paid (Figure 2). Once again, the rapid rise in premiums from 1975 to 1979 is clearly evident as is the positive effect of the 1979 legislation. On the average, Florida employers paid substantially less in Workers' Compensation premiums for each of their employees in 1980 than they would have without the new law.[35]

FIGURE 3

TREND IN WORKERS' COMPENSATION
PREMIUMS PER COVERED EMPLOYEE, 1975-1980:
IMPACT OF THE NEW LAW



SOURCE: Actual historical data from 1977-1978, Cases Causes Costs, Division of Workers' Compensation, Department of Labor and Employment Security, 1979, p. 214 and by special request. 1980 projection by Bureau of Economic Analysis, Florida Department of Commerce.

Increasing Benefits While Decreasing Premiums

It is important to note that these positive developments in terms of employer costs have taken place at the same time that benefits available to injured workers were being increased rather dramatically. The fact that the maximum weekly benefit amount was increased from 66-2/3 percent of the statewide average weekly wage to 100 percent of that figure has been mentioned. This maximum benefit amount was increased from $195 to $211 as of January 1, 1980, and increased again to $228 as of January 1, 1981. The NCCI has reported that these changes moved Florida from 37th place to 18th place in the nation in this regard.[36]

Other benefit increases were a direct or indirect result of the 1979 legislation. The maximum period for collecting wage-loss benefits, following maximum medical improvement, was raised from 350 to 525 weeks. The annual inflation adjustment used in calculating wage-loss benefits was increased from 3 percent per annum to 5 percent per annum. An overall 29.3 percent increase was made in the schedule of medical fees.[37] The medical fee schedule is to be revised annually.

Many of these benefit changes concern "maximum" benefits available. They are aimed at ensuring that injured workers receive just and adequate medical benefits and disability compensation for their injuries. Continued monitoring and careful examination of experience of the new law will be necessary in order to determine whether the wage-loss concept and the other benefit changes are indeed achieving the objectives for which they were established.

The Possibility of Further Premium Reductions: Early Signals

It was the hope of the Governor and the Legislature that the 1979 amendments to the Workers' Compensation law would result in further premium reductions in subsequent years. More specifically, the use of an objective wage-loss system of disability benefit determination and the deemphasis of subjective disability ratings were expected to result in considerable cost savings through a reduction in controverted claims, the decreased use of attorneys and medical specialists, a lower frequency of unjustified claims, and so on. These savings would be reflected in the experience of insurance carriers and ultimately result in premium reductions.

Comprehensive data pertaining directly to the possibility of further premium rate reductions will be available in June of this year. At that time, the insurance industry, through the National Council on Compensation Insurance, will make its first "experience filing" under the new law. This request for a rate adjustment (or, if no adjustment is requested, this "informational filing") will reflect 100 percent of the first full calendar year's experience under the new law and 83 percent of the 1979 policy year experience, five month's of which came under the new law.[38] It is, in effect, the average of the experiences during these two conceptual years which will serve as the basis for any rate adjustment. The final determination on any Workers' Compensation premium rate adjustment, unless the Legislature decides to directly mandate a reduction as in 1979, will be made by the State Insurance Commissioner, after considering supporting material submitted by

the NCCI, public comments and the advice of the Workers' Compensation Rating Bureau within the Department of Insurance.

Until those data are available it is necessary to rely on information from other sources to obtain an indication of possible future rate reductions. Three sets of preliminary data were available at the time of this writing

Data Call by Florida House of Representatives, Committee on Insurance--In January, 1980, the Committee on Insurance of the Florida House of Representatives issued to the top fifteen Workers' Compensation Carrier Groups in the State a request for claims data.[39] Two samples of data were requested, one consisting of 30 percent of the population of time claims with injury dates between August 1, 1979 and December 31, 1979; the second, the same proportion of claims having injury dates ranging between August 1, 1978 and December 31, 1978. The former sample thus concerned the first five months of operation of the new law. The latter sample covered the same months in the preceding year, while the old law was still in effect. The five insurance carriers responding had written 22 percent of Florida's Compensation Insurance. The actuarial consultant hired by the Committee to conduct the study, Dr. Lena Chang, described the sample of respondents as a "good cross representation" with regard to the company size and the mix of mutual versus stock companies.[40]

In her report to the Insurance Committee, Dr. Chang compared the distribution of Workers' Compensation claims under the new law to that under the old law, for a number of different dimensions. She cited several instances in which the comparison indicated that the intent of the new law was being achieved.

1. The percentage of claims of the permanent partial injury type appeared to have decreased dramatically under the new law. Such claims comprised 24.0 percent of all claims for the five-month survey period under the old law (1978), but only 6.7 percent of claims under the new law. As was discussed in Section II, the permanent partial category was the foremost problem area under the old system accounting for an inordinate amount of Workers' Compensation claim costs.[41]

2. Total indemnity costs, including wage-loss and impairment benefits, were 25.8 percent lower in the new law period.

3. The percentage of claims involving attorney representation decreased from 13.0 percent prior to the new law's enactment to 4.1 percent during the first five months of operation under the new law.

4. The time lag from the date of injury to the first reporting date was reduced by seven days. This suggested faster notification and initial processing of Workers' Compensation claims.

5. The proportion of workers returning to their same employer after recovery from their injury increased 9 percent (from 74 percent to 83 percent). Dr. Chang theorized that the new wage-loss system may have been responsible for this development.

Several other findings were presented in Dr. Chang's report. Some further supported the impression that the 1979 amendments were having their intended effects in terms of cost reductions. Other findings showed no definite trend. One comparison, that concerning medical costs, appeared to contradict the intent of the law. However, Dr. Chang attributed at least a part of this unexpected trend to technical adjustments by the insurance companies which would not ultimately affect premium levels.[42]

Early Analysis by the National Council on Compensation Insurance (NCCI)--On November 12, 1980, the NCCI staff presented to the Florida Classification and Rating Committee (an insurance industry board) an analysis of the need for a Workers' Compensation premium rate adjustment.[43] The analysis was based on a supplementary data call to insurance carriers issued during the summer.

On the advice of the NCCI staff, the Classification and Rating Committee decided to postpone a decision on whether to file for a rate adjustment based on experience under the new law until May 1981. The major reason for this was the fact that, at that time, data concerning only 51 percent of experience under Florida's new law was available for analysis. The insurance industry representatives preferred to wait until a more complete picture of the effects of the new law was available.

Despite this decision, the preliminary analysis prepared by the NCCI did include notable findings. First, as with the study prepared for the Florida House of Representatives discussed previously, the data indicated a significant drop in the proportion of Workers' Compensation claims of the permanent partial injury type. According to a NCCI statistical table, the proportion of claims in the permanent partial injury category fell from 20.0 percent prior to enactment of the 1979 legislation to 6.9 percent under the new law. Thus, further evidence was provided of a lower frequency for this particularly costly type of claim. Second, the analysis suggested that, if it were possible to consider experience alone, a 17.3 percent premium level reduction would have been warranted. This indicates considerable claim costs reductions from the perspective of the insurance carriers. However, it is not possible to consider experience alone. At the time the analysis was prepared, it was estimated that the expense of a series of scheduled benefit increases would slightly outweigh the cost savings stemming from claim cost experience.

1980 Data From the Division of Workers' Compensation--The Secretary of the Department of Labor and Employment Security presented a report to the Commerce Committee of the Florida Senate on March 3, 1981. This report included a discussion of the progress made by

the Division of Workers' Compensation in implementing the reforms mandated by the 1979 legislation. It also contained evidence of the effects of the new law on Workers' Compensation claims activity.

This statistical evidence was in the form of comparisons between calendar year 1980 and calendar year 1979 figures.

1. The number of formal Workers' Compensation claims filed fell dramatically from 1979 to 1980.[44] During the former year, 24,082 such claims were reported while only 12,472 were received during the latter year. That is a decline of 11,610 or 48.2 percent.

2. A substantial decrease was also experienced in the number of joint petitions and washouts. The number of such petitions fell from 15,422 in 1979 to 9,806 in 1980--a 36.4 percent drop.

3. The amount of benefits awarded in these joint petitions fell from $91.7 million in 1979 to $76.0 million in 1980. This amounted to an 17.1 percent reduction and a $15.7 million savings in benefits paid.

4. The amount of attorneys' fees awarded in controverted claims for Workers' Compensation fell from $18.9 million in 1979 to $16.9 million in 1980, a 10.6 percent decline.[45] The 1980 figure was 20.3 percent below the highest yearly attorney fee figure ever recorded, $21.2 million in 1977. In 1978, the Legislature began to shift to the claimant the responsibility for attorney fee payment. This trend was continued in the 1979 legislation as has been discussed.

Again, it is important to remember that the further premium rate reductions in all probability will be decided by the State Insurance Commissioner based primarily on his evaluation of a rate filing by the insurance industry. The positive trends suggested by the House Insurance Committee Report, the NCCI analysis and the 1980 data from the Division of Workers' Compensation will not necessarily translate into further rate reductions when all factors are considered. Nevertheless, those desiring further Workers' Compensation premium rate reductions in Florida should be encouraged by the data available at this point.

V. THE FUTURE OF FLORIDA'S WORKERS' COMPENSATION SYSTEM: MAKING SURE IT WORKS

Florida as a Model

The 1979 amendments to Florida's Workers' Compensation law were fundamental reforms to the system. As has been noted, Florida became the first state to adopt the wage-loss concept as the basis for long-term disability benefits for injured workers.

The nature of such reforms has given the Florida Workers' Compensation system the status of an experimental model. The ultimate success of that model is of great interest to other states. Representatives from the States of Washington, California and Delaware have visited Florida to observe the Workers' Compensation system in operation. The Director of the Division of Workers' Compensation has been invited to appear before legislative committees in several states to explain the wage-loss system and administrative reforms.[46]

Monitoring the System's Effectiveness

Perhaps the most important factor in determining the ultimate success of Florida Workers' Compensation system will be the determination of those who participated in its reforms--both inside and outside government--to monitor closely its operation. The Florida Legislature assured continued monitoring of the Workers' Compensation system by statute and by the Legislature's own activities. Several business, professional and labor organizations also have demonstrated their intent to continue their scrutiny of the system.

An example of a monitoring program established by statute is the Medical Utilization and Peer Review program.[47] Under this program, Workers' Compensation claim histories would be examined for possible instances of needless medical tests or treatment and of excessive charges for medical services. Ultimately, physicians involved in over-utilization of medical services would be subject to review by a committee of their peers. By February of this year, the Division of Workers' Compensation was able to report substantial progress toward establishing this program. A program budget had been prepared, positions established and a program director hired. The Division had entered into a contractual agreement with the Florida Medical Foundation to provide peer review services.[48]

The activities of Legislative Committees constitute another form of governmental monitoring of the Workers' Compensation system. Following the passage of the 1979 legislation, the Speaker of the House of Representatives officially charged the Committee on Insurance with the responsibility for legislative oversight of the implementation of the new law. The Insurance Committee Chairman delegated this responsibility to the Subcommittee on Oversight. That subcommittee has met periodically over the months since then obtaining detailed progress reports from the

Division of Workers' Compensation and hearing testimony from other interested parties.[49] The subcommittee has issued two calls for claims data from the insurance carriers. The results of the first call have been discussed in some detail earlier in this report.

The Senate Commerce Committee also has maintained an active program of monitoring the success of the Workers' Compensation system. The Division of Workers' Compensation data reported in Section IV was largely taken from testimony offered before that committee.[50]

Just as important to the success of the new system will be the efforts of organizations outside government. Naturally, the insurance industry, through the National Council on Compensation Insurance, will play a central role in future developments--particularly as regards future premium rate changes. The direct and continuing role of the NCCI has been apparent in the frequent reference to that organization throughout this report.

Associated Industries of Florida, which describes itself as "the voice of business" in the State, was very much involved in the 1979 reforms to the Workers' Compensation law and has remained in close touch with the implementation process. This business association issues periodic newsletters on potential problems in the law and recently has commissioned an analysis of a sample of Workers' Compensation claims filed during the first year of the new law's operation.[51]

The Florida Association of Insurance Agents, very active in promoting the adoption of the wage-loss concept, has begun a two-year program of monitoring the total effectiveness of Florida's Workers' Compensation system. The efficiency of claims processing, rehabilitation services and safety programs are early subjects of study.[52]

Having participated directly in the efforts leading to the 1979 Workers' Compensation legislation, the Florida AFL-CIO has continued its involvement in the Workers' Compensation program. The labor organization's major emphasis has been in monitoring the efficiency and equity with which injured workers have been provided their benefits. The current monitoring technique used is to randomly select case files then to telephone the claimants asking whether they have been satisfied with the way their case has been handled by the employer, the insurance carrier and the Division of Workers' Compensation.[53]

Notes

[14]National Council on Compensation Insurance, 1977 Workmen's Compensation Closed Claim Study (Tallahassee: Florida Association of Insurance Agents, 1978).

[15]Previously, the comparatively low statutory benefits in Florida were noted. Here, the medical benefits paid to injured workers are described as ". . .unusually high compared to those paid in other states." This apparent paradox is resolved by noting that the benefits were claimed more often, and more frequently up to their maximum allowable limits, than in other states. As a result, the total amount of benefits paid was much higher in Florida.

[25]The following discussion of the major changes in the Workers' Compensation law is based on Sadowski et al., "The 1979 Florida Workers' Compensation Reform," pp. 654-686 and two "Staff Analyses and Economic Impact Statements," prepared by the Senate staff, April 18 and June 4, 1979.

[26]Actually, those workers who suffer the impairment injuries previously described would be able to collect wage-loss benefits in addition to their impairment benefits.

[27]Florida Statutes, Section 440.44.

[28]Senate, "Staff Analysis," April 18, 1979, p. 9.

[29]The 11.4 percent reduction in the manual premium rate was partially counter-balanced by other changes affecting other determinants of the premiums paid by employers. When all changes are considered, the actual reductions in premiums paid was an estimated 5.1 percent.

[30]Florida Department of Insurance, "Commissioner Gunter Approves Workers' Compensation Rate Cut of $34 Million," statement released to the press January 6, 1981.

[31]Letter from Bob Hilton of National Council on Compensation Insurance to Florida Insurance Commissioner Bill Gunter, December 2, 1980.

[32]An index is used here rather than the actual average manual premium rate. The National Council on Compensation Insurance estimates the overall premium rate impact, in terms of a percentage change, for each approved rate filing. However, the

National Council is hesitant to provide a calculated average manual rate due to the complications which would arise in attempting to weigh the different premium rates for each of the 500 or so employment classifications and due to the possibility of misleading comparisons with the overall rates of other states. The historical trend of the index used here is, in all probability, identical to the trend of the actual manual rate if that data were available.

[33]Florida Department of Insurance, History of Rate Revisions.

[34]Data provided Bureau of Research and Planning, Division of Workers' Compensation, Department of Labor and Employment Security, Special Request, March 16, 1981.

[35]The hypothetical 1980 value was calculated by applying the average compounded rate of increase from 1975 through 1979 in premium amount paid per employee to the 1979 value for premium per employee.

[36]Letter from Bob Hilton to Bill Gunter, December 2, 1980 (previously cited). This ranking also was confirmed in a letter from Clifford Wess, National Council on Compensation Insurance, to Dennis Harmon, Florida Department of Commerce, March 4, 1981.

[40]Ibid, pp. 2-3.

[41]The decrease in the claims share accounted for by the permanent partial category was accompanied by an increase in the proportion held by the temporary total category. The number of claims in this category also increased absolutely. Historically, the temporary total injury type claim has not had the extreme claim costs associated with it that has the permanent partial category. Nevertheless, trends in this category probably will be closely watched for problems.

[42]Chang memorandum to Sadowski, p. 4.

[43]NCCI Memorandum to Florida's Classification and Rating Committee. This committee is comprised of representatives of insurance carriers which sell Workers' Compensation insurance in Florida. The insurance industry bases its rate filing decisions on the recommendations of this committee.

[44]A formal claim is a claim filed by an injured worker with the Division of Workers' Compensation. The filing of such a claim indicates that the worker is dissatisfied with the benefits he has received.

[45]If the unrounded data are used, this percentage change is 10.3 percent. This particular data was provided upon special request by the Bureau of Research and Planning, Division of Workers' Compensation, Department of Labor and Employment Security, March 19, 1981.

Foreword

Early in this century the States pioneered in the development of workmen's compensation laws. The enactment and administration of such laws thus became a standard state function and a traditional state responsibility. By the same token, the Council of State Governments has long had an interest in helping the States to improve and perfect their programs for workmen's compensation.

A little more than a decade ago the Council, through its Committee on Suggested State Legislation, drafted a "Workmen's Compensation and Rehabilitation Law," with the advice and guidance of an outstanding advisory committee. Portions appeared in both the 1963 and 1965 volumes of *Suggested State Legislation;* and the fully integrated act was subsequently published in a single volume, together with a comprehensive commentary.

In early 1973, sensing the need for further action by the States to improve their workmen's compensation laws in light of the findings of a National Commission on State Workmen's Compensation Laws, the Council again established an Advisory Committee on Workmen's Compensation Laws with representation from nationally recognized experts in the field. Senator Wilfrid J. Ullrich of Indiana was designated as Chairman of the Advisory Committee, thus assuring coordination with the Council's Committee on Suggested State Legislation (of which Senator Ullrich is also Chairman).

The Advisory Committee's first task was to prepare a report for immediate consideration by the States, including specific amendatory legislation that adequately met all major recommendations of the National Commission. That report, *Workmen's Compensation: A Challenge to the States,* was issued in February 1973 while there was still time in most States for preliminary legislative review. As a further step, the Advisory Committee agreed to review the entire text of the Council's earlier model act and to incorporate therein appropriate amendments which would assure that a State enacting them would meet in full all recommendations of the National Commission.

This further work of the Advisory Committee is incorporated in the present report, providing an integrated and updated Workmen's Compensation and Rehabilitation Law for consideration by State Legislatures. No attempt was made to revise the earlier commentary, which is still in print and available to those who are not familiar with it. As will be noted later, in Introductory Comments by the Advisory Committee, it has not been our intention to change basic provisions of the earlier version of the draft law. To do so would have delayed for at least a year the printing of this report, and it was believed that the original version still stood the test of time in most respects.

The hard work and superb assistance and guidance rendered by members of the Advisory Committee are most deeply appreciated by the Council of State Governments. Without these dedicated persons there would be no report to issue, and all of us would be the losers.

Introductory Comments by the Advisory Committee

All members of the Council of State Governments' Advisory Committee on Workmen's Compensation, whose names appear on the opposite page, are pleased to have been of assistance to the Council in preparing this revised version of the *Workmen's Compensation and Rehabilitation Law* and the predecessor report entitled *Workmen's Compensation: A Challenge to the States.* We hope that our efforts will be of assistance to all those who are interested in an equitable and adequate workmen's compensation program.

Purpose of the Committee

The Council's Advisory Committee wants to make clear the purposes of this revision effort. In the mid-1960s, an earlier Advisory Committee on Workmen's Compensation prepared a *Workmen's Compensation and Rehabilitation Law.* This law was drafted over a period of four years and was published with a Section by Section Commentary by Arthur Larson, chairman of the Advisory Committee. This law has been of great value during the last decade.

The Occupational Safety and Health Act of 1970 established the National Commission on State Workmen's Compensation Laws, which submitted its *Report* to the Congress and to the President on July 31, 1972. The *Report* criticized many aspects of state workmen's compensation programs and made 84 specific recommendations for a modern workmen's compensation program. Nineteen of the recommendations were designated as essential. The National Commission urged that compliance of the States with the 19 recommendations should be evaluated on July 1, 1975, and, if necessary, Congress with no further delay in the effective date should guarantee compliance with these essential recommendations.

The *Report* of the National Commission has had a salutary effect on state workmen's compensation programs. The National Commission, however, did not attempt to translate its recommendations into statutory language. Further, a number of the recommendations were either not covered in, or were at least partially inconsistent with, the language in the *Workmen's Compensation and Rehabilitation Law* as published in the 1960s. This new Advisory Committee was constituted to revise the original law solely to the extent necessary to accommodate the recommendations of the National Commission. No effort was made to duplicate the substantial task which faced the original Advisory Committee when it drafted an entirely new statute. Nor did this Advisory Committee consider the merits of the recommendations of the National Commission. Our purpose was strictly to provide language which would permit a State to follow the recommendations of the National Commission if it wished to do so. While our responsibility was therefore narrowly defined, we believe that the result will be of value in many States.

Because of the immediacy of the July 1, 1975, deadline when States will be evaluated in terms of their compliance with the 19 essential recommendations of the National Commission, our first priority was the preparation of statutory language encompassing these recommendations. The result was the February 1973 publication of *Workmen's Compensation: A Challenge to the States.* Our second task was the preparation of language covering all 84 of the recommendations of the National Commission, and the result is the current publication, entitled the *Workmen's Compensation and Rehabilitation Law* (Revised). Unlike the original edition, we have not prepared a commentary. However, the great bulk of the original draft was not affected by our revision efforts and, therefore, the commentary on the original law will be useful to many using the revised edition. The original law with the accompanying commentary is still available from the Council of State Governments.

medical opinion is necessary.

(3) Advise on the gathering of statistics, the maintaining of records and the rendering of reports under this act and under rules and regulations adopted by the Director.

(4) Assist in keeping physicians currently informed of this act and of rules and regulations adopted by the Director and of their responsibilities thereunder.

(5) Advise and assist in the achievement of impartiality in medical testimony in workmen's compensation cases.

(6) Encourage the expansion and improvement of existing rehabilitation facilities and the development of additional facilities to insure optimal rehabilitation in workmen's compensation cases.

(7) Recommend improvement in the methods of measuring physical impairment in workmen's compensation cases.

(8) Recommend improvements in this act and in rules and regulations adopted by the Director and in their administration to insure optimal medical care and rehabilitation.

(9) Advise the Director with respect to the constitution and operation of the Disability Evaluation Unit.

(f) The Director, after consultation with the Medical Advisory Committee, shall establish a Disability Evaluation Unit[5] under the supervision of the Medical Director. The Unit shall, at the request of the Director, report to him its findings and determination on such questions as the etiology of a disease and the extent of a worker's impairment or disability due to a work-related injury or disease.

Section 13. [*Rehabilitation.*]

(a) One of the primary purposes of this act shall be restoration of the injured employee to gainful employment. To this end there is hereby created a Rehabilitation Unit within the Agency which shall be composed of specialists in medical and vocational rehabilitation to be appointed by the Director.

(b) The Unit shall continuously study the problems of rehabilitation, both physical and vocational, and shall investigate and maintain a directory of all rehabilitation facilities, both private and public. The Director, in consultation with the Unit, shall approve as qualified such facilities, institutions and physicians as are capable of rendering competent rehabilitation service to seriously injured employees. No facility or institution shall be considered as qualified unless it is specifically equipped to provide rehabilitation services for persons suffering either from some specialized type of disability or general type of disability within the field of occupational injury and is staffed with trained and qualified personnel, and

---

5. The establishment of a Disability Evaluation Unit may not be necessary in those States where the volume of claims does not warrant such an organizational component.

with respect to physical rehabilitation, unless it is supervised by a physician qualified to render such service. No physician shall be considered qualified unless he has had the experience and training specified by the Director.

(c) An employee who has suffered an injury covered by this act shall be entitled to prompt medical rehabilitation services. When as a result of the injury he is unable to perform work for which he has previous training or experience, he shall be entitled to such vocational rehabilitation services, including retraining and job placement, as may be reasonably necessary to restore him to suitable employment. If such services are not voluntarily offered and accepted, the Director on his own motion, or upon application of the employee or carrier, after affording the parties an opportunity to be heard, may refer the employee to a qualified physician or facility for evaluation of the practicability of, need for, and kind of service, treatment or training necessary and appropriate to render him fit for a remunerative occupation. Upon receipt of such report, and after affording the parties an opportunity to be heard, the Director, in consultation with the Unit, may order that the services and treatment recommended in the report, or such other rehabilitation treatment or service he may deem necessary, be provided at the expense of the employer.

(d) Where rehabilitation requires residence at or near the facility or institution away from the employee's customary residence, reasonable cost of his board, lodging or travel shall be paid for by the employer.

(e) Refusal to accept rehabilitation pursuant to an order of the Director shall result in loss of compensation for each week of the period of refusal.

(f) The Director and the Rehabilitation Unit shall cooperate on a reciprocal basis with the vocational rehabilitation section of the [Department of Education] and the employment service of the [Division of Employment Security].

Section 14. [*Burial Expense.*] If death results from the injury, the employer shall pay the cost of burying in an amount not to exceed [$] to any person who performed such service or incurred the liability for the service, whether or not the employee leaves dependents within the meaning of this act. Any such person is hereby authorized to file a petition with the Director for the fixing of the amount of the service and for an order requiring the employer to pay the cost of the service. If death occurs while the employee is away from his usual place of business or residence, the employer will be liable for the reasonable cost of transportation of the body to the employee's place of residence within the United States or Canada.

GUIDES TO THE EVALUATION OF PERMANENT IMPAIRMENT

American Medical Association

Committee on Rating of
Mental and Physical Impairment

Foreword

The ad hoc Committee on Medical Rating of Physical Impairment was created by the Board of Trustees of the American Medical Association in September 1956. The Committee was directed to establish a series of practical guides for the rating of physical impairment of the various body systems. As the work of the Committee progressed, it was determined that the name was restrictive; in November 1963 the name was changed to Committee on Rating of Mental and Physical Impairment.

With the assistance of the outstanding consultants and members of subcommittees listed ahead, a series of thirteen "Guides to the Evaluation of Permanent Impairment" was developed and published in the Journal of the American Medical Association. The subject matter, with dates of publication in JAMA, includes: Extremities and Back, Special Edition, February 15, 1958; Visual System, 168: 475-485, September 27, 1958; Cardiovascular System, 172:1049-1060, March 5, 1960; Ear, Nose, Throat, and Related Structures, 177:489-501, August 19, 1961; Central Nervous System, 186:24-35, July 6, 1963; Digestive System, 188:159-171, April 13, 1964; Peripheral Spinal Nerves, 189:128-142, July 13, 1964; Respiratory System, 194:919-932, November 22, 1965; Endocrine System, 198:195-208, October 10, 1966; Mental Illness, 198:1284-1296, December 19, 1966; Reproductive and Urinary Systems, 202:624-636, November 13, 1967; Skin, 211:106-112, January 5, 1970; and Hematopoietic System, 213:1314-1324, August 24, 1970.

During the past 14 years, physicians and others have requested over 225,000 reprints of the individual "Guides." This wide acceptance and use of the "Guides" has been most gratifying.

The "Guides" have been reviewed periodically to insure their continuing value. The revised material as published in this single volume supersedes all previous individually published "Guides."

The text of the extremities and back guide has undergone the most revision, with new material on the carpometacarpal joint of the thumb, flexion-extension of the elbow joint and knee joint, vertebral fractures, and percentages of impairment in the cervical region. The percentages of impairment for respiratory disorders have also been changed. A new table for rating hearing impairment has been derived for use when hearing tests are recorded on audiometers calibrated in accordance with the new American National Standard Institutes–specifications for audiometers (ANSI, S3.6-1969). Other changes also have been made throughout the book.

With the publication in this single volume of the entire series of updated "Guides" which cover all the body systems–the whole man–the Association is providing authoritative material to assist physicians and others in discharging a responsibility to their patients, clients, or applicants who are seeking benefits from the various agencies and programs serving the disabled.

COMMITTEE ON RATING OF MENTAL AND PHYSICAL IMPAIRMENT

Raymond M. McKeown, M.D., Chairman; Coos Bay, Ore.
Donald J. Birmingham, M.D.; Detroit, Michigan
George F. Gsell, M.D.; Wichita, Kansas
Henry H. Kessler, M.D.; West Orange, New Jersey

*deceased

Preface

Evaluation or rating of permanent disability has long been recognized as an important and complex subject. In the past much confusion has resulted from inadequate understanding by physicians and others of (a) the scope of medical responsibility in the evaluation of permanent disability and (b) the difference between "permanent disability" and "permanent impairment."

It is vitally important for every physician to be aware of his proper role in the evaluation of permanent disability under any private or public program for the disabled. It is equally important for him to have the necessary authoritative material to assist him in competently fulfilling his particular responsibility—the evaluation of permanent impairment. It is the purpose of this and other reports of the Committee on Rating of Mental and Physical Impairment to correct a past confusion of terms and to provide a series of practical guides to the evaluation of various types of permanent impairments.

The following explanation of generally used terms in programs for the disabled is provided.

(1) *Permanent Impairment.*—This is a purely medical condition. Permanent impairment is any anatomic or functional abnormality or loss after maximal medical rehabilitation has been achieved, which abnormality or loss the physician considers stable or nonprogressive at the time evaluation is made. It is always a basic consideration in the evaluation of permanent disability.

(2) *Permanent Disability.*—This is not a purely medical condition. A patient is "permanently disabled" or "under a permanent disability" when his actual or presumed ability to engage in gainful activity is reduced or absent because of "impairment" which, in turn, may or may not be combined with other factors. A permanent condition is found to exist if no fundamental or marked change can be expected in the future.

(3) *Evaluation (Rating) of Permanent Impairment.*—This is a function that physicians alone are competent to perform. Evaluation of permanent impairment defines the scope of medical responsibility and therefore represents the physician's role in the evaluation of permanent disability. Evaluation of permanent impairment is an appraisal of the nature and extent of the patient's illness or injury as it affects his personal efficiency in one or more of the activities of daily living. These activities are self-care, communication, normal living postures, ambulation, elevation, traveling, and nonspecialized hand activities.

(4) *Evaluation (Rating) of Permanent Disability.*—In the last analysis, this is an administrative and not solely a medical responsibility and function. Evaluation of permanent disability is an appraisal of the patient's present and future ability to engage in gainful activity as it is affected by such diverse factors as age, sex, education, economic and social environment, in addition to the definite medical factor—permanent impairment. The first group of factors has proved extremely difficult to measure. For this reason, permanent impairment is in fact the sole or real criterion of permanent disability far more often than is readily acknowledged. However, in actual practice the final determination of permanent disability is an administrative decision as to the patient's entitlement.

Competent evaluation of permanent impairment requires adequate and complete medical examination, accurate objective measurement of function, and the avoidance of subjective impressions and such factors as age, sex, or employability.

The Committee on Rating of Mental and Physical Impairment believes that permanent impairment cannot vary because of the circumstances of its occurrence or the geographical location of the patient at the time. Furthermore, unlike disability, permanent impairment can be measured with a reasonable degree of accuracy and uniformity, as it is evidenced by loss of structural integrity, loss of functional capacity, or persistent pain that is substantiated by clinical findings.

The Committee is familiar with the various formulas developed in the past for use in evaluation of permanent disability. These formulas are usually administrative devices which equate specific medical criteria to specific percentages of permanent partial or total disability (loss of working or earning capacity). From the medical standpoint the medical criteria may undeniably represent various anatomic or functional impairments. However, it is unrealistic to presume that all of these impairments, especially those of a minor nature, will necessarily at some time result in disability. Although a number of valuable contributions have been made in the past, the Committee has found no comprehensive practical system of the type necessary for the evaluation of permanent impairment by individual body systems or of the whole man. For this reason, the Committee undertook to prepare a series of "Guides." All of the "Guides" have been developed after careful study of the literature and views of recognized authorities.

Each guide contains recommended percentage values related to the criteria provided. The use of numerical values is preferred because of difficulty in communication and variability in interpretation of such terms as "slight," "marked," and "moderate." Numerical values provide a practical means of expressing and calculating the extent of permanent impairment and encourage accurate, equitable, and uniform evaluation. Methods of calculating impairment

are uniform, are explained in detail with examples, and require a minimum of computation. Generally, when a single impairment is involved, the percentage value may be read directly from the text or transposed to a relative value of a unit of the body or of the whole man by referring to appropriate tables.

When two or more impairments are involved, however, the value of each impairment must be ascertained and transposed to a common denominator, such as the whole man. Thereafter, these values must be combined rather than added. A Combined Values Chart is provided by which any combination of impairments may be easily assessed. The method generally used to combine various impairments is based on the principle that each impairment acts not on the whole part but on the portion which remains after the preceding impairment has acted. For purposes of computation, the source and chronology of the impairment values are immaterial.

After the values of all impairments involved have been computed and transposed to a common denominator, the final impairment value, whether the result of single or combined impairments, should be expressed in terms of the nearest 5%.

associated loss of sensation. However, consideration was not given for loss of sensation in establishing the values for ankylosis and restricted motion for the hand, which is both a prehensile and sensory organ. Therefore, when evaluating impairment of the hand, it is necessary to refer to Chapter II page 49 The Peripheral Spinal Nerves, in addition to the following material.

Special Consideration–Since the basic tasks of everyday living are more dependent upon the preferred upper extremity, dysfunction of the non-preferred upper extremity results in less impairment than dysfunction of the preferred extremity. Therefore, when the impairment of an upper extremity has been determined to be between 5% and 50%, this value should be reduced by 5% if the impairment is of the non-preferred upper extremity. If the value is 51% to 100% impairment of the upper extremity, the value should be reduced by 10% for the non-preferred extremity before converting to whole man impairment.

TABLE 1 – AMPUTATIONS

	Impairment of:			
	Digit	Hand	Upper Extremity	Whole Man
Forequarter amputation				70%
Disarticulation at shoulder joint			100%	60%
Amputation of arm above deltoid insertion			100%	60%
Amputation of arm between deltoid insertion and elbow joint			95%	57%
Disarticulation at elbow joint			95%	57%
Amputation of forearm below elbow joint proximal to insertion of biceps tendon			95%	57%
Amputation of forearm below elbow joint distal to insertion of biceps tendon		100%	90%	54%
Disarticulation at wrist joint		100%	90%	54%
Midcarpal or mid-metacarpal amputation of hand		100%	90%	54%
Amputation of all fingers except thumb at metacarpophalangeal joints		60%	54%	32%
Amputation of thumb at metacarpophalangeal joint or with resection of carpometacarpal bone	100%	40%	36%	22%
At interphalangeal joint	75%	30%	27%	16%
Amputation of index finger at metacarpophalangeal joint or with resection of metacarpal bone	100%	25%	23%	14%
At proximal interphalangeal joint	80%	20%	18%	11%
At distal interphalangeal joint	45%	11%	10%	6%
Amputation of middle finger at metacarpophalangeal joint or with resection of metacarpal bone	100%	20%	18%	11%
At proximal interphalangeal joint	80%	16%	14%	8%
At distal interphalangeal joint	45%	9%	8%	5%
Amputation of ring finger at metacarpophalangeal joint or with resection of metacarpal bone	100%	10%	9%	5%
At proximal interphalangeal joint	80%	8%	7%	4%
At distal interphalangeal joint	45%	5%	5%	3%
Amputation of little finger at metacarpophalangeal joint or with resection of metacarpal bone	100%	5%	5%	3%
At proximal interphalangeal joint	80%	4%	4%	2%
At distal interphalangeal joint	45%	2%	2%	1%

Ring, Little	15%	14%	12%	15%
Little	5%	5%	4%	5%

SHOULDER JOINT

When Two or More Ranges of Motion are Involved

Restricted Motion:

1. Calculate *separately* and record impairment of upper extremity contributed by each range of motion.

2. ADD impairment of upper extremity values contributed by ALL ranges of motion. The sum of these values is impairment of upper extremity contributed by shoulder joint.

Example–Two Ranges of Motion	*Impairment of Upper Extremity*
30 degrees active *FORWARD ELEVATION*	= 13%
30 degrees active *BACKWARD ELEVATION*	= 1
20 degrees active *ABDUCTION*	= 14
20 degrees active *ADDUCTION*	= 1
(13 + 1 + 14 + 1 = 29)	29%
Example–Three Ranges of Motion	
20 degrees active *INTERNAL ROTATION*	= 3%
20 degrees active *EXTERNAL ROTATION*	= 11
FORWARD ELEVATION, BACKWARD ELEVATION, ABDUCTION, and *ADDUCTION* restricted as above	= 29
(3 + 11 + 29 = 43)	43%

Ankylosis

1. Calculate *separately* and record impairment of upper extremity contributed by ankylosis in each position.

2. The *largest* ankylosis impairment value is impairment of upper extremity contributed by shoulder joint.

Example	*Impairment of Upper Extremity*
Shoulder joint ankylosed at:	
60 degrees *FORWARD ELEVATION*	= 55%
20 degrees *EXTERNAL ROTATION*	= 40

The largest ankylosis impairment value is 55%; therefore, upper extremity is 55% impaired by ankylosed shoulder joint.

UPPER EXTREMITY

When Two or More Units are Involved

1. Calculate *separately* and record impairments of upper extremity contributed by each unit (hand, wrist joint, elbow joint, and shoulder joint).

2. Combine impairment values, using combined values chart, to ascertain impairment of upper extremity contributed by two or more units.

Example–Two Units	*Impairment of Upper Extremity*
Hand	= 40%
Wrist	= 30
(40 combined with 30 = 58)	58%

TABLE 22–AMPUTATIONS–LOWER EXTREMITY

	Impairment of			
	Digit	Foot	Lower Extremity	Whole Man
Hemipelvectomy				50%
Disarticulation at hip joint			100%	40%
Amputation above knee joint with short thigh stump (3" or less below tuberosity of ischium)			100%	40%
Amputation above knee joint with functional stump			90%	36%
Disarticulation at knee joint			90%	36%
Gritti-Stokes amputation			90%	36%
Amputation below knee joint with short stump (3" or less below intercondylar notch)			90%	36%
Amputation below knee joint with functional stump			70%	28%
Amputation at ankle (Syme)		100%	70%	28%
Partial amputation of foot (Chopart's)		75%	53%	21%
Mid-metatarsal amputation		50%	35%	14%
Amputation of all toes at metatarsophalangeal joints		30%	21%	8%
Amputation of *Great Toe*				
With resection of metatarsal bone		30%	21%	8%
At metatarsophalangeal joint	100%	18%	13%	5%
At interphalangeal joint	75%	14%	10%	4%
Amputation of *Lesser Toe* (2nd-5th)				
With resection of metatarsal bone		5%	4%	2%
At metatarsophalangeal joint	100%	3%	2%	1%
At proximal interphalangeal joint	80%	2%	1%	0%
At distal interphalangeal joint	45%	1%	1%	0%

COMBINED VALUES CHART

These combined values are based on the formula: A% + B% (100% − A%) = combined value of A% and B% (where A% and B% are written as decimals). The guides to the chart are percents ranging from 1 to 100 printed down the side of the page, and across the bottom. To combine any two values locate the larger of the two on the side of the page and read along that row until you come to the column indicated by the second value at the bottom of the page. At the intersection of this row and column is printed the combined value. For example, to combine 35% and 20% read down the side of the page until you come to the larger value, 35%. Then read across the row you have located until you come to the column indicated by 20% at the bottom of the page. At the intersection of this row and column is the number 48. We say that 35% and 20% combine to 48%. Due to the construction of this chart, the larger value must be read at the side of the page.

If three or more values are to be combined, select any two and find their combined value as above. Take this combined value and the third value and find their combined value. This process can be repeated indefinitely with the value obtained in each case being the combination of all the previous values.

*Worker and spouse.

++Worker, spouse, and 2 children.

**All benefits listed are prior to Minimum and Maximum limitations and any reduction due to receiving Social Security Benefits. Benefits are 80% of spendable income. Spendable income is gross wages less Federal Income Tax and FICA only. FICA tax for 1981 is 6.65% of annual wages not exceeding $29,700. Federal Income Taxes effective October 1, 1981 are used.

EXHIBIT IX

ALASCOM, INC.'s PAPER

IN SUPPORT OF THE POSITION OF

WORKER's COMPENSATION COMMITTEE OF ALASKA

Alascom management has had an opportunity to review the position paper, dated December 13, 1980, of the Worker's Compensation Committee of Alaska (WCCA). Alascom supports the position taken by the WCCA.

Perhaps, for the record, it should be explained that Alascom is Public Utility. Its chief source of revenue is long distance telephone calls. In its ten years of existence, its number of employees has tripled to approximately 1400 and the number of calls it handles increased almost six-fold to over 32,000,000 calls a year.

At Alascom, the Safety Administrator is directly involved in the administration of all worker's compensation claims. So, as Safety Administrator, I've been asked to bring to your attention four (4) different Alascom cases that illustrate excesses permitted by the current statutes and are relevant to WCCA's position. The four cases are representative. They do not constitute the total experience of Alascom. A brief description of those four cases follows:

1. Too Liberal Bunk House Rules Interpretation

An Alascom employee, assigned to a remote site, drove off the road and was injured after "bartending" at a friend's party. The employee claimed he had had only three beers and fell asleep while driving.

The Workmen's Compensation Board awarded full benefits. Their decision was based on several comparable cases and decisions. We feel the interpretation was liberal to the point of removing employee incentive to remain healthy.

In our opinion, when an employee disregards his own safety, and defies the laws of self-preservation, the employer should not be held responsible for actions committed outside his regular work assignment.

2. A Search for a Physician to Support Claim

An Alascom employee reported a hip injury, claiming his foot slipped from a step ladder. Medical examination indicated he had had hip surgery as a fourteen year old and additional surgery was again indicated because of the natural growth of the bones (and body). At the request of the employee, a second medical opinion confirmed the original diagnosis and again indicated that there was no connection between the alleged slip from the ladder and the distress the employee was suffering.

Unsatisfied with these medical opinions, the employee started his search for a doctor who would support his claim. We do not know how many doctors the employee talked to before he found one willing to support his claim, but he did find one in Southern California and brought suit against Alascom.

Alascom prevailed and the Workmen's Compensation Board made no award to the employee. Time and expenses incurred by Alascom, however, were not recoverable.

3. Unqualified Medical Opinion and Treatment

Alascom's relationship with the medical profession has been very good. It is the rare exception in which we are in disagreement with any of their decisions or recommendations for any of our employees.

Within the last year however, we had an employee who selected a chiropractor to treat a disease that was, in the opinion of qualified medical people, not related to the chiropractor's speciality. Despite qualified medical opinion to the contrary, both the employee and the chiropractor claimed the disease was the result of an industrial accident. Alascom feels that expenses incurred in incidents of this type are wasteful.

4. Double or Greater Payments

Alascom has had an employee who was collecting allowable absence (sick) pay while working at a job with similar physical requirements outside the Company. He filed for workmen's compensation payments covering the same period of time. Despite the outcome, Alascom once again suffers costs that are wasteful.

Finally, Alascom's position is virtually identical to that of the WCCA. We wish to see the legitimate entitlement of the injured Alaskan worker preserved. We do, however, question the wisdom of any act that makes it financially attractive to be injured, or levies wasteful burdens upon the employer. All of Alascom's worker's compensation expenses are passed along to the consumer. As a public utility we feel a strong obligation to the consumer to control, reasonably, all costs.

In conclusion, we ask that you review those provisions of the Worker's Compensation Act that permit injured employees to abuse a worthwhile benefit. We hope your consideration will lead to an equitable fine tuning of the law.

John Marcum

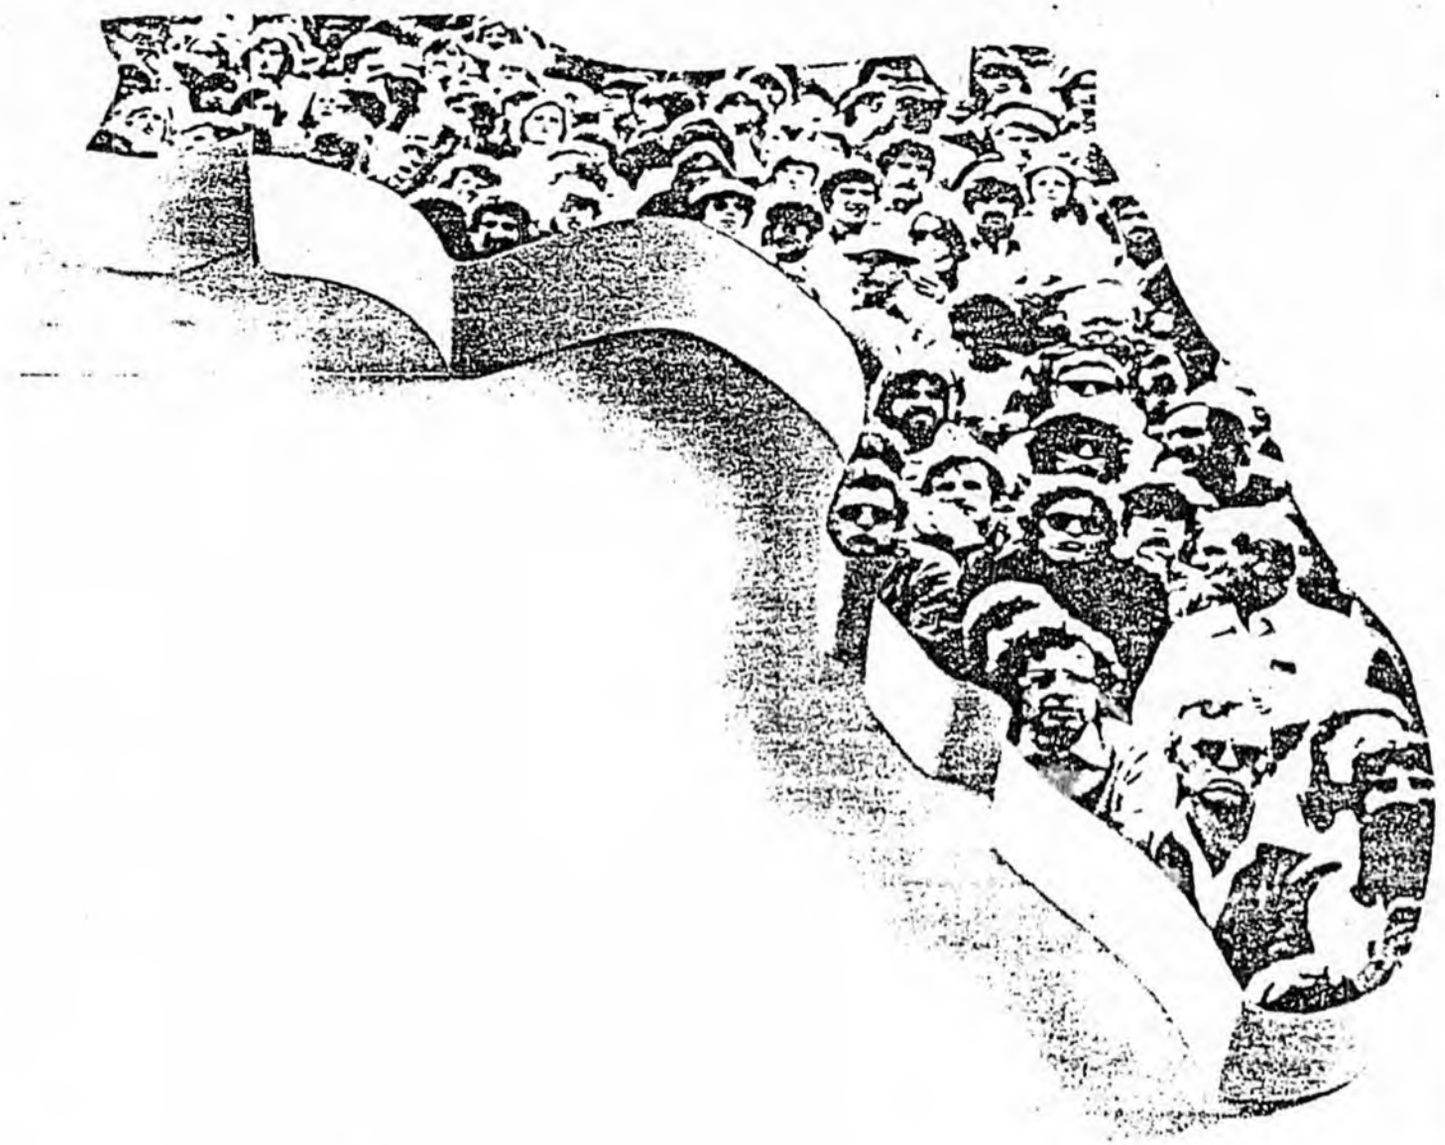
Preliminary Report on The Wage-Loss Law in Florida



Copyright 1981 National Council on Compensation Insurance

Preface

There has been a great deal of interest expressed concerning the effect which the August 1, 1979 wage-loss law has had on the workers' compensation system in Florida. While it is still too soon to come to any definitive conclusions about how the wage-loss law is working and will work in the future, the National Council on Compensation Insurance (NCCI) will present in this report information about the Florida workers' compensation system which we have gathered continuously since August 1, 1978. We must caution that this information is only of a preliminary nature and will be subject to change as time allows more information to become available. At the same time, the following information does allow the reader to draw some early impressions on how the new system is working.

The workers' compensation system is concerned with injuries to people. The extent of each injury cannot be immediately assessed, since each individual is unique and makes unique demands on the employer and/or its insurance company, whose job it is to protect the worker's economic and medical welfare after his or her injury has occurred. Because of these unique needs it is always difficult for an insurance company to estimate what economic and medical assistance an injured worker will require in the future. This problem is compounded in Florida since the companies have so little experience, at this time, with the wage-loss system. Therefore we must again stress that these observations about the workers' compensation system in Florida are only preliminary.

The NCCI gathers information about the workers' compensation system continuously under the Call for Detail Claim Information. As more information becomes available and as the insurance companies have a longer time in which to evaluate each individual claim, the NCCI will be able to make more definitive observations about how the Florida wage-loss law is working. While everyone would like to know what is happening under the wage-loss law it is not possible at this time for anyone to make more than preliminary observations.

Even outside Florida there is interest in the effect of the wage-loss law on the workers' compensation system. Interested parties in other states would like to know how wage-loss would effect the workers' compensation system in their state. However, even these preliminary observations which we have made concerning the effect of the August 1, 1979 Florida wage-loss law cannot be assumed to apply to other states. Each state's workers' compensation system has statutory and administrative differences. Also the economic, political, and social conditions in each state have an immeasurable effect on the workers' compensation system. Thus, another state could adopt exactly the same law as is currently in effect in Florida and have an entirely different experience.

When viewing individual claim characteristics of wage-loss and/or impairment cases, one must remember that both the immaturity of such cases, as well as the relatively small number of cases to date, means that such observations cannot be regarded as conclusive.

We believe that one goal of the new legislation governing the workers' compensation system which became effective August 1, 1979 was to increase benefits to the more seriously injured worker while decreasing other system costs through more efficient administration. While it is too early to be conclusive, based on our observations, which follow, it appears that the Florida workers' compensation system has significantly moved in that direction.

Finally we would like to express our appreciation to all the insurance company claims people who have devoted substantial time and effort to supplying the NCCI with complete and accurate information under the NCCI Call for Detailed Claim Information.

General Background

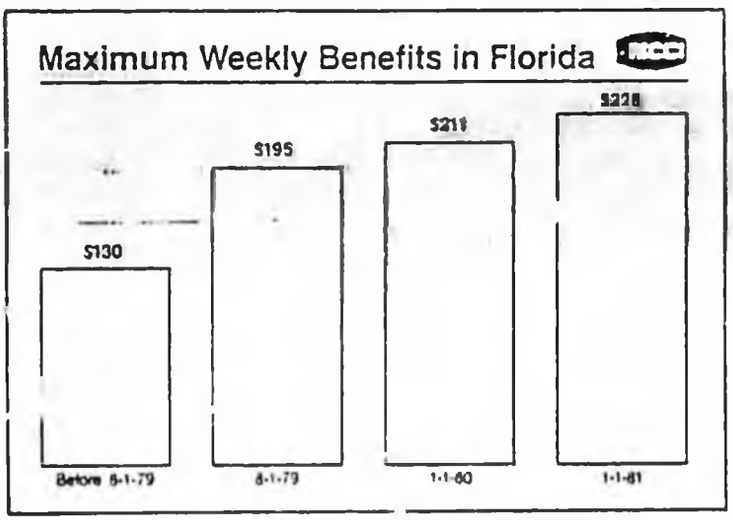
Florida and the Wage-Loss Law

This is a preliminary report on the use of the Detailed Claim Call in Florida to monitor the effects of the new legislation governing the workers' compensation insurance system which became effective August 1, 1979. This law change was intended to improve an existing situation in which a number of workers with relatively minor injuries were receiving large awards under the permanent partial award provisions of the law. Under the old statute, additional doctor visits and attorney litigation were encouraged since the worker could receive greatly increased benefits with a higher disability rating. These problems had been identified in various studies including the 1977 NCCI Closed Claim study in Florida. Anyone interested in an in-depth review of the Florida workers' compensation system prior to the August 1, 1979 law will find the summary of this study by the Florida Association of Insurance Agents to be extremely helpful. We believe that one goal of the new law is to increase benefits to the truly injured employee while cutting overall costs by decreasing excessive litigation and administrative costs. In this connection the maximum weekly benefit, for example, was increased from $130 to $195 August 1, 1979, and has continued to be further increased each January 1.

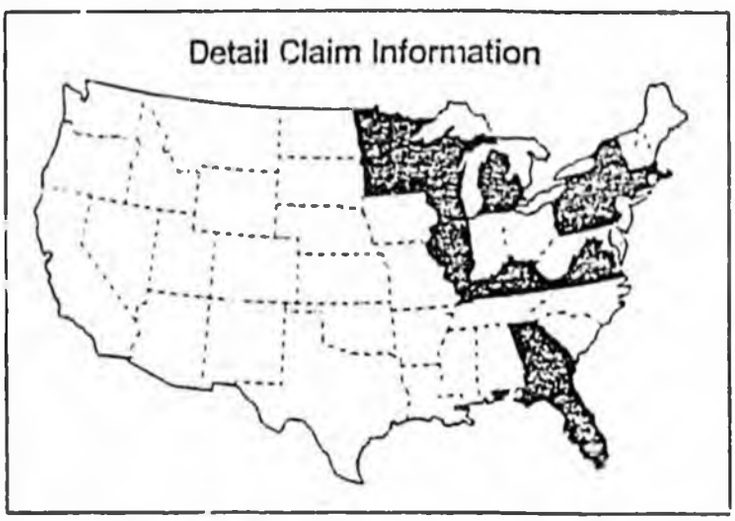


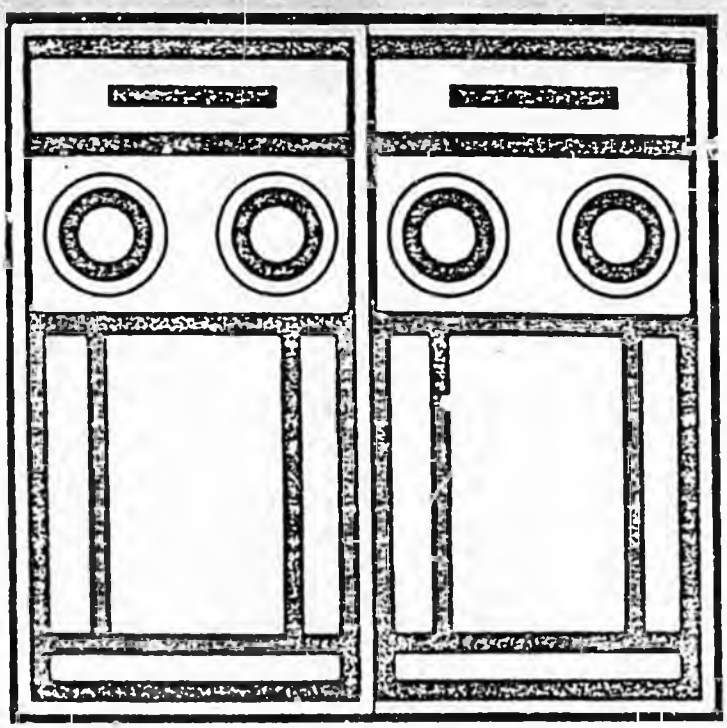
Availability of Data

Traditional Data Systems The traditional statistical data used for ratemaking purposes is primarily designed to accumulate information covering the costs and premiums of the workers' compensation system. This ratemaking data does not explain the social aspects which affect costs.

National Council on Compensation Insurance Detail Claim Information System With the Detailed Claim Information, derived from the call, we are concerned with cost factors, but we are also able to look beyond pure statistics to an analysis of causative factors.

Background A "call" is a request for specific information which the NCCI directs to its member and subscriber companies also known as carriers. The Call for Detailed Claim Information, which began April 1, 1979, is a continuous random sampling of workers' compensation lost time claims. Twelve states—Connecticut, Florida, Georgia, Illinois, Kentucky, Massachusetts, Michigan, Minnesota, New York, Pennsylvania, Virginia and Wisconsin—were chosen for the survey. To provide sufficient data for a meaningful analysis of the Florida workers' compensation system prior to the August 1, 1979 law, the Call for Detailed Claim Information began, in Florida, on August 1, 1978. In order to achieve a representative bias free scientific random sampling and lend credibility to statistical tests which were to be used on the data, all insurance companies whose contributions added up to 99.5% of the premium volume for all those employers whose workers are covered by insurance companies in each state were required to participate. To reduce costs the Call for Detailed Claim Information utilizes a mathematical technique known as sampling. Information about the entire population of claims is extracted from a representative sample of all claims. The sample is scientifically constructed to insure that the sample will be truly representative of the population as a whole. Presently in Florida companies are required to select at random 10% of their indemnity claims to be included in the Call for Detailed Claim Information. The procedure for insuring random scientific sampling is monitored by the NCCI.





Modifications to Call for Detailed Claim Information In order to gather data which will enable a meaningful analysis of the working of the new Florida law, modifications were made in Florida to the Call for Detailed Claim Information. First, an additional retroactive call was made for claims reported between August 1978 and March 1979. This retroactive call was necessary to provide a meaningful base of information about the claims experience in Florida under the provisions of the old law.

Second, the rules for completing the standard call applicable to Florida claims occurring after August 1, 1979 were changed. The classification of benefits as permanent partial was removed. The new benefit classifications which became effective August 1, 1979, namely wage-loss and no impairment benefit, wage-loss and impairment benefit, and impairment and no wage-loss benefit were added. To qualify for a wage-loss benefit a worker must suffer a permanent impairment which results in a loss of at least 15% of his preinjury wages, after the worker has reached the point of maximum medical improvement. In the case of a permanent impairment due to amputation, loss of 80% or more of vision, after correction, or serious facial or head disfigurement the injured worker will receive a lump sum benefit determined by the percentage of permanent bodily impairment which the worker suffers after he has reached the point of maximum medical improvement. An injured worker is eligible to receive either or both of these benefits. Of course, for all three catagories, the injured worker will also receive temporary total disability benefits during his healing period as well as full medical benefits. Thus there are three benefit classifications for injured workers receiving one or both of these benefits. An injured worker with a loss in wages and no lump sum permanent impairment award is a wage-loss only case. An injured worker who receives a lump sum award but has no loss in wages is an impairment only case. Finally an injured worker who has a loss in wages and receives a lump sum impairment award is a wage-loss and impairment case.

Third, each case with wage-loss and/or impairment benefits and each temporary partial case which occurred in Florida after August 1, 1979 must carry a supplementary form. This supplementary form asks for specific information about wage-loss and impairment benefits for each sampled claim.

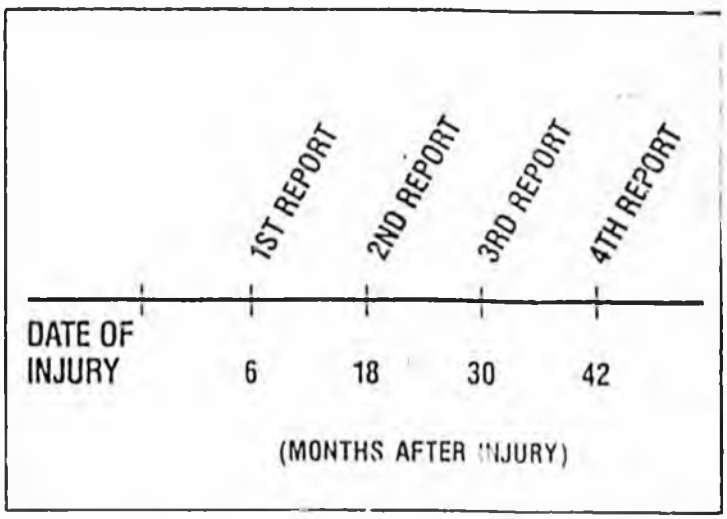
Attached as exhibits are the forms used in the Florida Call for Detailed Claim Information. Form C19940F is used for all sampled claims with injuries occurring after August 1 1979. Form C19945F is the Florida Supplementary Call for Detailed Claim Information.

Timeliness and Validation of Data Sampled claims are evaluated six months after the date of report of the injury, and then reevaluated at 18, 30 and 42 months unless closed beforehand. The claims included in this study were for workers injured between August 1978 and August 1980.

A meaningful comparison from one claim to the next can only be made for claims which are evaluated at the same length of time after the claim is reported. Since only six month evaluations are available for workers injured under the new law, we have confined our observations to a comparison of claims evaluated six months after the report, when looking at the conditions prior to August 1, 1979, as compared to after August 1, 1979.

In further analyses, to be done in the future, we will be able to make comparisons based upon 18, 30, and 42 month evaluations.

All sampled claim reports are subjected to intensive editing at NCCI. Claims are tested for completeness of information, logical relationships between claim elements, and reconciliation with statutory requirements. Claim reports which are rejected by the editing process are returned to the carrier for correction.



Highlights

Participation by Insurance Companies

There are 76 insurance companies included in the NCCI Detailed Claim Information report on Florida wage-loss. This considerable number of participating carriers provides a broad basis of experience for our observations on the workers' compensation system in Florida.

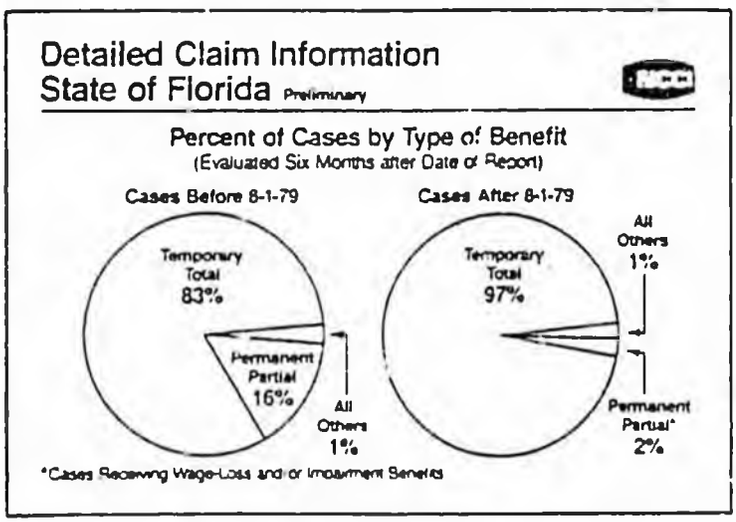
Preliminary Nature of Detailed Claim Information

As previously stated, this report is based on claims evaluated by the insurance companies six months after the injuries were first reported to each company. At that time some details may have not yet been known about the claimants' injuries, such as the number of times the injured workers had visited a doctor. Only a rough estimate of the eventual cost of the workers' injuries could be made at such an early date.

The lack of experience of insurance companies with the wage-loss system has created uncertainty for these companies regarding which injured workers will eventually be entitled to wage-loss payments. Because of this inexperience a number of insurance companies may not always be able to classify an injured worker as a wage-loss case until the worker actually begins to receive wage-loss benefits (for example, while claimants are receiving temporary total benefits). Therefore there is a corresponding delay in the recognition of the eventual costs associated with these claims.

Changes in Patterns of Claims by Type of Benefit

There appears to be a trend toward the reduction of the system-wide costs of benefits associated with partially injured workers. This savings results from a reduction in benefits paid to those who have suffered only a very minor injury which more than offsets the increased benefits paid to those significantly injured workers who suffer an injury qualifying for wage-loss payment or who receive a permanent impairment award due to their injury.



Distribution of Injured Workers by Benefit Type It appears that under the new Florida workers' compensation insurance law an increased number of injured workers will receive only temporary total benefits as their lost tim benefits. Only those workers injured seriously enough to qualify for wage-loss, impairment, or permanent total awards will receive additional lost time benefits. A worke with a relatively minor injury, who, under the provisions of the previous workers' compensation law would have received a permanent partial award, even though he could return to work, is no longer eligible for additional benefits after he has fully recovered from his injury.

As previously stated, because of a lack of experience with the wage-loss system the number of reported injuries qualifying for wage-loss benefits is undoubtedly too conservative and will be revised upward at a future date. This distorts the reported ratio of wage-loss and/or impairment cases to permanent partial cases under the old law.

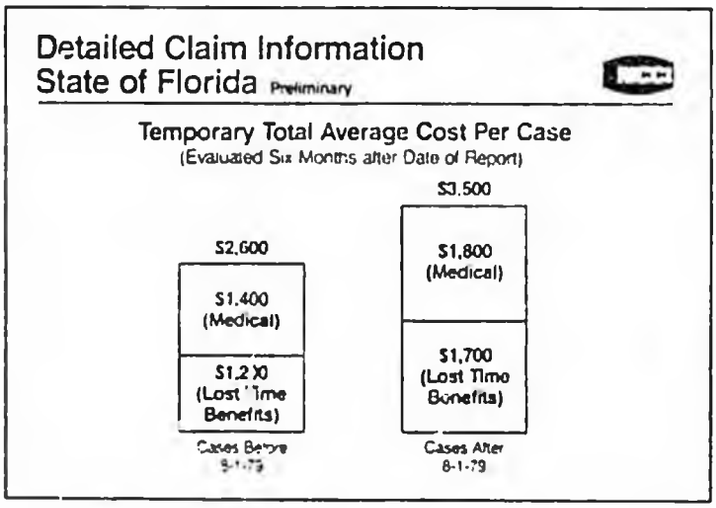
Under the provisions of the new law which was introduced on August 1, 1979 wage-loss benefits are not payable until after an injured worker has reached maximum medical improvement, which averages 31 weeks. In view of the fact that the NCCI Detailed Claim Information available at the present time has been calculated from the initial six month injury report, it is logical to anticipate that subsequent reports will reveal some additional wage-loss cases.

Currently our analysis of wage-loss and impairment cases is based on a relatively small volume of claims. This small sample size necessitates a cautious approach to any inferences about the typical wage-loss or impairment case. As time goes on two things will happen to enable more conclusive observations to be drawn. First we will have subsequent valuations of the already sampled claims (i.e., at 18, 30, and 42 months after the date of report, rather than just six months). Second, there will be more claims involved in the study.

Benefit Dollars

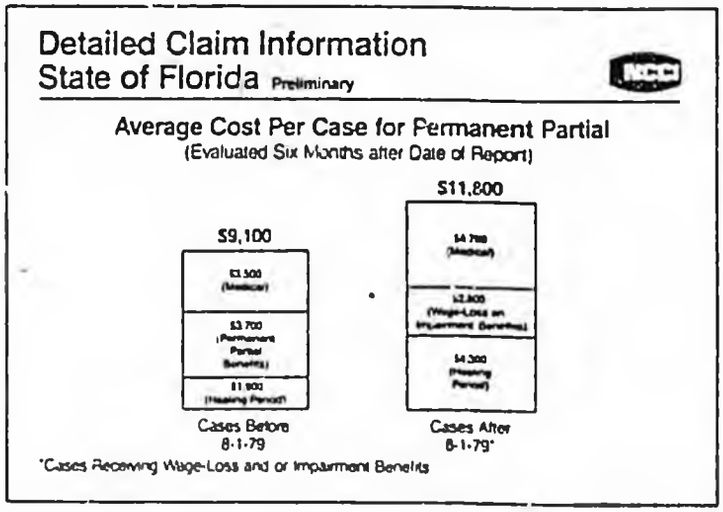
Temporary Total Cases A temporary total injury is one in which a worker suffers a complete inability to work for a period of time but is expected to regain full productivity. An injured worker is considered a temporary total case only if there appears to be no likelihood that in the future the worker will receive any permanent total, wage-loss, or impairment benefits. The average cost per case for temporary total cases has increased approximately 35% since August 1, 1979. One reason for this increase is that the maximum weekly benefit payable to a worker who has sustained an injury classified as temporary total increased by 50% and the percentage rate of compensation also increased on August 1, 1979. Another reason for the increase is that a worker with a relatively minor injury, who would have been classified as a permanent partial disability case before the new wage-loss concept became effective on August 1, 1979, will now receive only temporary total lost time benefits. The inclusion of these [illegible] the temporary total category, some of which may be more serious than the previously typical temporary total case, results in an increase in the average cost per temporary total case.

The average medical cost for a worker with a temporary total disability has increased by approximately $400 since August 1, 1979. The Florida Medical Fee Schedule, which is determined by the Department of Labor and Employment Security, sets the permissible fee which may be paid for medical procedures for an injured worker covered by the Florida workers' compensation law. On July 1, 1980 the Department of Labor and Employment Security approved a new medical fee schedule which, on the average, increased permissible medical fees approximately 30%. A change in the medical fee schedule affects all injured workers who receive medical treatment after the change is effective, regardless of the date of the injury. Since an injured worker is more likely to receive medical treatment soon after the injury has occurred, this increase in the medical fee schedule has probably affected those workers injured after August 1, 1979 to a greater extent than those workers injured before August 1, 1979. Thus this may be one reason that the cost of medical benefits has increased, on the average, for temporary total cases.



Permanent Partial Cases The average permanent partial cost per case has increased about 30% subsequent to August 1979. Obviously, it is generally only those workers who are significantly injured who are receiving these increased benefits. Many fewer workers suffer wage-loss or a permanent impairment injury under the new law than received a permanent partial award under the old law. Thus while the benefit paid to the individual significantly injured worker has increased there has been an overall reduction in cost associated with permanent partial injuries.

Workers qualifying for wage-loss and/or impairment benefits, on the average receive more lost time benefit dollars during their healing period, at which time the worker receives lost time benefits based on the benefits applicable for a temporary total disability, than did workers classified as permanent partial cases prior to the introduction of the new workers' compensation system on August 1, 1979. This may be the result of the more serious nature of injuries for those workers who qualify for wage-loss benefits or who suffer a permanent impairment. There also may be a tendency for an injured worker to prolong the period for which he or she may receive temporary total benefits rather than benefits based on his lost wages.

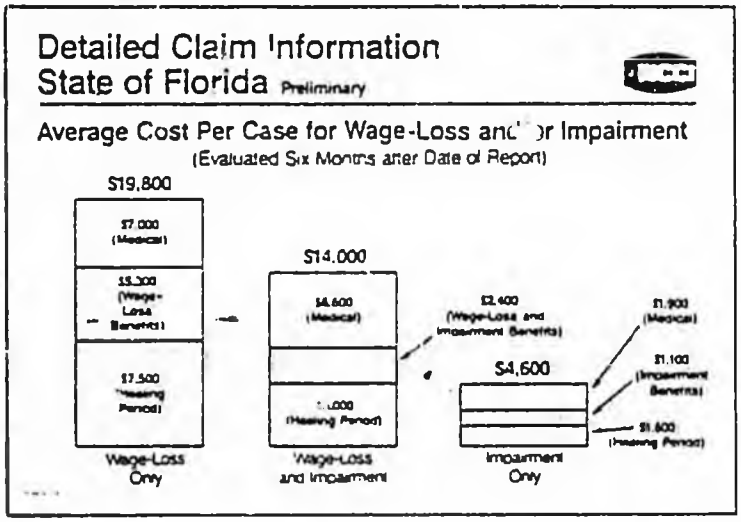


Wage-Loss and Impairment Cases When a claim is evaluated six months after it is first reported it appears that cases which involve only wage-loss injury and which do not involve a permanent impairment, on the average, have greater lost time and medical costs than cases with both wage-loss and impairment injuries or impairment only cases. One reason for this may be that wage-loss only claims often involve serious injuries to the back, neck and head and are not eligible to receive impairment benefits. The high cost of these injuries tends to increase the average cost of wage-loss only cases.

The impairment benefit only cases, on the average, are the least costly, probably because these workers are less seriously injured than workers who suffer wage-loss injuries.

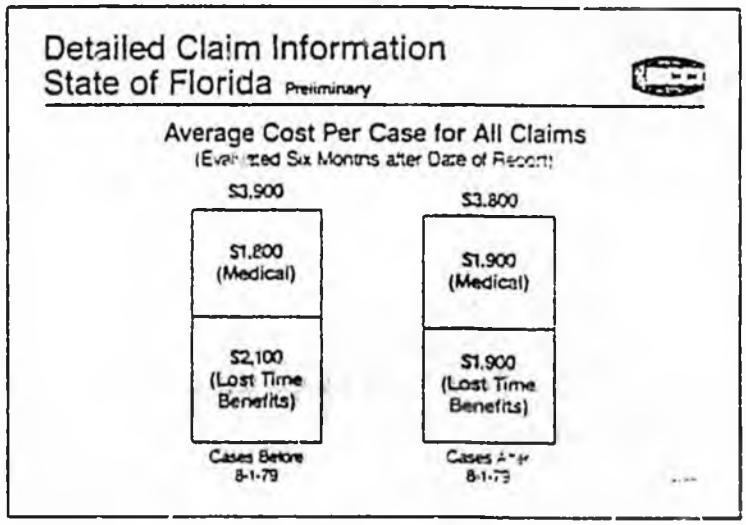
The small sample size of wage-loss and impairment cases deters any general conclusions covering all workers who suffer wage-loss or a permanent impairment injury.

It should be noted tnat during the healing period the injured worker receives lost time benefits based on the benefits applicable for a temporary total disability.



All Lost Time Cases The average cost per case for all claims has decreased 3% since the new Florida workers' compensation insurance legislation became effective August 1, 1979. This occurred despite the 50% increase in the maximum weekly lost time benefit and an increase in the rate of compensation for a weekly lost time benefit mandated by the law, effective August 1, 1979. Thus the decrease in the average lost time benefits may indicate that workers are returning to employment sooner. As with other estimates of costs which are made six months after each claim is reported, it can only be an approximation of the final cost which will be incurred in connection with a reported injury.

While the average cost per case for both temporary total cases and permanent partial cases increased, the average cost per case for all cases decreased. This reduction occurred because of the shift of cases with minor injuries, which would have received permanent partial benefits prior to August 1, 1979, into the category of temporary total cases.



Percentage of Total Lost Time and Medical Benefit Dollars by Benefit Type The portion of lost time and medical benefit cost attributable to wage-loss and impairment cases under the new law has decreased drastically from the percentage attributable to permanent partial injuries under the old law. This shift indicates that total benefit costs for partially injured workers have decreased, while benefits for significantly injured workers have increased, because workers with only minor injuries are no longer able to receive permanent partial benefits.

When later evaluations are conducted we expect to see an increase in the percentage of total costs attributable to wage-loss cases as more cases are recognized by the insurance company. As mentioned previously a number of carriers may not be able to classify a worker as a wage-loss case until he has actually begun to receive wage-loss benefits. Also at later evaluations we expect we may see an increase in costs for wage-loss and impairment cases since there will be an opportunity for a more accurate evaluation of costs after carriers have gained more experience with wage-loss cases.

Administration of Claims

Attorney Representation The percentage of injured worker represented by an attorney has decreased about 50% since August 1, 1979. This appears to indicate that one intent of the law, to decrease excessive litigation to obta undeserved permanent partial benefits, has been met.

One thing which must be kept in mind when considering the percentage of cases represented by an attorney at the time of the initial six month evaluation o claim is the likelihood that a claimant will choose to see attorney representation sometime in the future. A NCC study in Florida found that the number of claimants represented by an attorney increased more than 50% in the period subsequent to the initial six months from the date of injury. Consequently we expect to see some increase in attorney representation when these claims ai evaluated in a later report. This is true for claims occurring both before and after August 1, 1979.

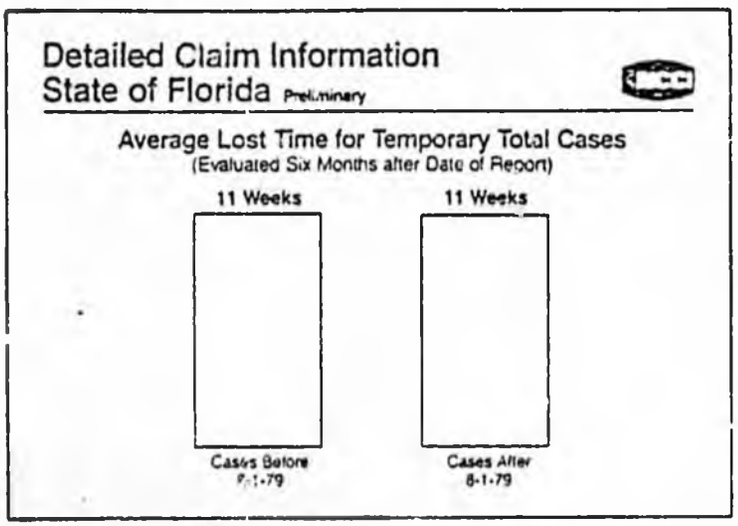
Temporary Total	9%	6%
All Claims	13%	6%

*Cases Receiving Wage-Loss and/or Impairment Benefits

Additional Observations

Further Changes In Patterns of Claims by Benefit Type

Time Lost from Employment by Temporary Total Cases There has been no significant change in the duration of temporary total cases since the August 1, 1979 law change. Since more serious injuries are included among the temporary total cases after August 1, 1979 it may be that for equivalent injuries employees are actually returning to work sooner. As previously noted an injured worker is considered a temporary total case if there appears to be no likelihood that in the future the worker will receive any permanent total, wage-loss, or impairment lost time benefits.

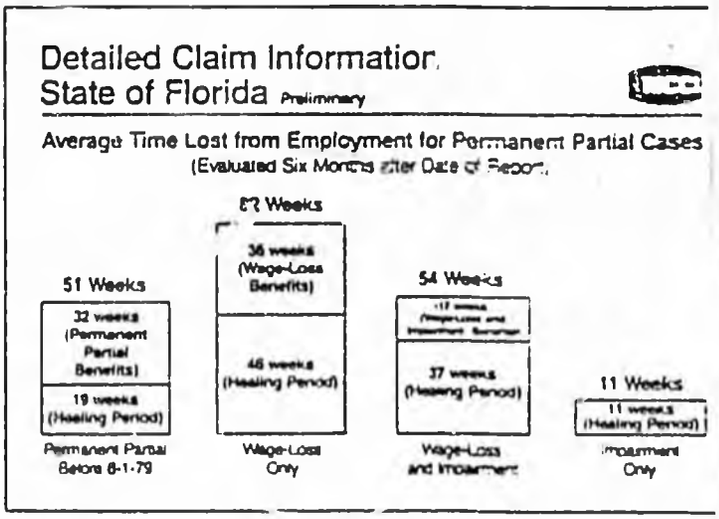


Time Lost for Permanent Partial Cases The average time lo from employment for wage-loss cases is greater, on the average, than time lost by permanent partial cases prio to the August 1, 1979 law change. These wage-loss case are more serious, on the average, and require benefits a longer period of time.

On the average, at the time of the six month evaluation, a wage-loss case has not begun to receive wage-loss benefits. Because of this, claims people can only make a rough estimate of the time lost from employment as a result of an injury classified as one subject to wage-loss benefits.

The impairment only cases receive lost time benefi during the healing period, based on the benefits applicable for a temporary total disability, on the avera for 11 weeks. However, after this period of time the injured worker receives an additional lump sum benefi based on the nature of his or her permanent impairmer On the average, it appears that impairment only cases a returning to work relatively soon.

The sample size of wage-loss and impairment case too small to allow us to make any conclusive observations.



Doctor Visits On the average, workers with wage-loss or permanent impairment injuries, visit the doctor less frequently than workers who suffered an injury which was classified as a permanent partial disability under the old law. This decrease in the frequency of doctor visits is striking since, on the average, it seems that wage-loss and impairment cases involve more seriously injured workers than those with permanent partial injuries under the old law.

At the initial six month evaluation period of claims a number of injured workers have not yet submitted any doctor or medical bills. Prior to receiving a bill the insurance company is not aware of the number of doctor visits made by the injured worker. In order to reach a better estimate of the average number of visits to a doctor we have excluded from the average all claimants who have not yet reported any doctor visits.

Detailed Claim Information
State of Florida Preliminary

Average Number of Doctor Visits

Permanent Partial	16	13*
Temporary Total	9	10
All Claims	10	10

*Cases Receiving Wage-Loss and or Impairment Benefits

Hospital Confinement Since the August 1, 1979 law change there has not been a significant change, on the average, in the time spent in the hospital by injured workers. This is not surprising since the change in the law should not have any effect on the severity of injuries which occur in Florida.

On the average, a wage-loss or impairment case is more likely to be confined in a hospital than a permanent partial case under the old law. This has probably occurred because, on the average, a wage-loss or impairment case, involves a more seriously injured worker than a permanent partial case under the old law.

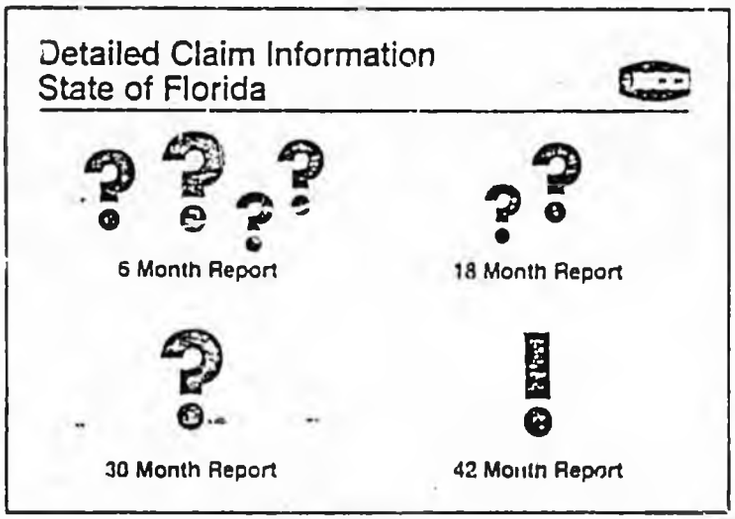
Future Development of NCCI Detailed Claim Information

The information contained in this report gives a preliminary overview of the changes in the Florida workers' compensation system due to the law changes of August 1, 1979. As a result, these findings may be different when the claim of each injured worker is reevaluated at a later date. As previously stated, each claim will be reevaluated 18 months, 30 months, and 42 months after the date the injury is reported to the insurance company. These later reports will allow time for the companies to make a much more informed judgment of individual claim features such as the type of benefit the injured worker will eventually receive, the total lost time costs, total medical costs, and the time lost from employment.

These claim features will be judged with increasing precision at each later evaluation date.



Importance of Consistent and Appropriate Claims Evaluation

There are several important factors which must be considered when choosing a method for gathering workers' compensation claims information. Three of these are particularly significant. First, it is necessary that reasonable and appropriate comparisons may be made concerning the gathered information. Second, the absolutely highest integrity of information must be maintained through the intensive validation of all submitted information. Third, information must be gathered from a broad base so that it is representative of experience in the entire state.

In order to insure that reasonable and appropriate comparisons could be made of our gathered information the NCCI Call for Detailed Claim Information requires that each claim is initially evaluated at six months after the claim is reported to the insurance company. Then each claim is reevaluated 18, 30, and 42 months after the report of injury. By initially evaluating each claim six months after the report of the injury we allow time for a equivalent amount of knowledge to be gathered by the insurance company about each claim. This is essential, since the initial estimates of benefit costs can be modifie after the claimant's medical condition has had additiona time to stabilize. With each claim evaluated at the same period of time after the accident we obtain a basis of information about which meaningful comparisons can be made.

There is an alternative method for gathering claim information which does not result in this comparison of corresponding information. An example of this method would be to evaluate workers' compensation claims for workers injured between July 1 and December 31 based on the information available on December 31. Howe er this method results in an attempt to evaluate some claim the day the injury occurs and other claims up to 6 montl after the injury occurs. The result of evaluating each clai on the same calendar date is to compare claims about which we have an unequal depth of knowledge. In fact, since there is a time lag before an injury is reported, the insurance company will not even be aware yet of all the injuries which occurred in the six month period.

NCCI ensures the highest integrity of its Detail Claim Information by a system of intensive editing and validation procedures. When a compilation of informatio is not intensively edited, there is no guarantee that human error, such as adding a zero to the end of a number incorrectly, will not cause incorrect observations to be made about the Florida workers' compensation system.

In order to ensure a broad basis for our observations of the Florida workers' compensation system, the Call for Detailed Claim Information has gathered information from virtually all of the insurance companies writing workers' compensation in Florida. This provides an appropriate representation of large, small, local and national insurance companies in our gathered information. If information is gathered from a small number of companies it would be possible for any one insurance company, whose experience is not typical for Florida as a whole, to disproportionately affect observations of the Florida workers' compensation system. By using a large number of carriers we get a picture of how the system is functioning for all regions and industries in Florida where workers are insured by their employer through an insurance company.

January 26, 1982

Abstract, Summary of Recommendations, Overview

ABSTRACT

This study was conducted to determine the effectiveness of the delivery system for rehabilitation benefits to injured workers covered by the Alaska Workers' Compensation Act. Factors examined in evaluating the system included the average time from the date of injury to the date of referral to rehabilitation, the percentage of lost-time cases receiving rehabilitation benefits, the percentage successfully rehabilitated, the average time spent in rehabilitation programs, and the average cost of such programs. The primary sources of information and data were the state Division of Vocational Rehabilitation and one of the private rehabilitation firms doing business in Alaska. Another source of data was a survey of injured workers who had previously participated in rehabilitation programs, and of workers who had signed compromise and release agreements in which the right to participate in such programs as part of the compensation system was waived. The rehabilitation programs used in two other state workers' compensation systems were evaluated, in order to show examples of the potential savings to be derived from a properly structured and managed system, and to examine procedures to be considered in developing an effective delivery system for rehabilitation. Gathering quantifiable data from all sources was difficult, due to the incomplete nature of the available records.

The study found that the delivery system is not providing timely and adequate rehabilitation services to a substantial number of those workers who could benefit from them, for two primary reasons. First, the system does not afford prompt referral of appropriate cases to rehabilitation facilities. Second, the Division of Workers' Compensation is not consistently advising workers of their potential entitlement to these services, nor is it monitoring the services being provided, primarily due to a lack of resources and trained personnel, as well as the absence of established guidelines and procedures for monitoring the system.

RECOMMENDATION 1

That insurers/employers report to the Division of Workers' Compensation:

a. All injured workers who experience continuous time loss of 90 to 120 days from the date of injury, depending on the staffing level of the Division, and

b. All acutely injured workers where an immediate determination can be made that the worker will not likely be able to return to the job held at the time of injury.

RECOMMENDATION 2

That the Workers' Compensation Division screen reports no later than 5 working days from the date each report is received.

RECOMMENDATION 3

That subsequent to, or during the screening process, the Workers' Compensation Division contact each reported worker. The purpose for contact is to explain the benefits to which the worker may be entitled, and to set the tone for a positive rehabilitation outcome by explaining the objective of rehabilitation, the worker's rights and responsibilities in the rehabilitation effort.

RECOMMENDATION 4

That the Workers' Compensation Division establish and publish the procedural mechanism to support the reporting, screening and contact activities.

RECOMMENDATION 5a

That pursuant to the adoption of regulations on vocational rehabilitation, (See Exhibit 1) the Workers' Compensation Division establish, publish and distribute guidelines for providers of rehabilitation services in accordance with recommendation 5b through 5e, and the following time frames:

- Completion of Vocational Evaluation and Plan Recommendation - 6 weeks
- Complete Development of Plan - 6 weeks
- Direct Placement Program - 3 months
- On-The-Job Training - 3 to 6 months, depending on the skills to be acquired coupled with the skill level of the injured worker.
- Vocational Training - 52 weeks (extensions subject to prior approval by the Board)

RECOMMENDATION 5b

That rehabilitation providers issue a report within 30 days of initial contact with an injured worker. Background information regarding the worker's age, education, work history, and general medical condition, as well as a summary of activities conducted during the 30 day period should be included in the report. Information regarding the next immediate plan of action should also be included.

RECOMMENDATION 5c

That plans submitted for approval contain pertinent information as outlined in proposed regulations on Vocational Rehabilitation 8 AAC 47.040(b)(1) through (9).

RECOMMENDATION 5d

That subsequent to implementing plans, rehabilitation providers issue monthly progress reports sufficient in content and scope to inform all interested parties of the progress being made toward achieving the vocational goal of the plan.

RECOMMENDATION 5e

That approval by the Board must be obtained prior to amendment, suspension or termination of an approved rehabilitation plan.

RECOMMENDATION 6

That insurers provide assistance to employers in developing programs for re-employment of injured workers.

RECOMMENDATION 7

That insurers/employers arrange for counselor services to include on-site-job analyses and assistance in modification of jobs to enhance reemployment opportunities of an employer's injured employees.

RECOMMENDATION 8

That the Workers' Compensation Division encourage the development and implementation of reemployment programs by providing positive monitoring/ endorsement of the efforts of parties.

RECOMMENDATION 9

That contractual agreements be negotiated for reemployment/rehabilitation of injured union members.

RECOMMENDATION 10

That insurers/employers increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits.

RECOMMENDATION 11a

That in the case of workers experiencing time loss, who may need rehabilitation services, insurers/employers assign a counselor to contact the worker as soon as this determination can reasonably be made.

RECOMMENDATION 11b

That insurers/employers consider hiring a rehabilitation professional to enhance their ability to effectively communicate with, and timely provide services for injured workers.

RECOMMENDATION 12a

That insurers assist employers by providing loss control services to assure appropriate rating consistent with their safety record and reemployment practices.

RECOMMENDATION 12b

That to supplement the loss control services provided by insurers, employers seek the assistance of the States Division of Insurance in rating matters and methods.

RECOMMENDATION 13

That counselors enhance their efforts to place injured workers by informing employers of Targeted Jobs Tax Credit provisions and by providing assistance necessary to facilitate employer participation in the program.

RECOMMENDATION 14

That language in AS 23.30.040(e) be changed to remove the dollar amount and provide for necessary costs of rehabilitation services subject to Board approval.

RECOMMENDATION 15

That the Workers' Compensation Division increase employer awareness and encourage employer use of the Second Injury Fund in employment of industrially injured workers. Increased publicity and eligibility interpretation will enhance this effort.

RECOMMENDATION 16

That cooperative agreements involving transfer of Second Injury Fund monies to the Division of Vocational Rehabilitation be discontinued.

RECOMMENDATION 17

That criteria for development, recommendation and implementation of rehabilitation plans, in accordance with recommendations 5a through 5e, be applied to all providers of vocational rehabilitation services to injured workers covered by the state compensation laws.

RECOMMENDATION 18

That as a general policy, the Board deny settlement of claims, prior to an injured worker's completion of a supervised rehabilitation program.

RECOMMENDATION 19

That the Division of Workers' Compensation acquire the necessary staff to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

OVERVIEW OF REHABILITATION IN WORKERS' COMPENSATION

A. HISTORY OF REHABILITATION PROVISIONS FOR INDUSTRIALLY INJURED WORKERS.

Rehabilitation in workers' compensation programs in the United States has been paid increasing attention over the past 10 years following publication of the 1972 Report of the National Commission on State Workmen's Compensation Laws. However, the realization that workers' compensation laws should include provisions of rehabilitating industrially injured workers was manifested by the Massachusetts Industrial Accident Board as early as 1914, when a member of that board went to study the German program. Pursuant to that study, and a meeting in 1916 of the International Association of Industrial Accident Boards and Commissions (IAIABC), during which the delegates were advised that a primary goal of workers' compensation programs would be the rehabilitation of disabled workers, the first state vocational rehabilitation law was enacted in 1918 in Massachusetts. The law, administered by the Industrial Accident Board, covered only those persons disabled by industrial accidents and occupational diseases. Following Massachusetts' lead, other states enacted laws with similar rehabilitation provisions. Congress, through the passage of Public Law 236 in 1920, created the State/Federal Vocational Rehabiliation Program. Its statement of purpose provided for the promotion of vocational rehabilitation of industrially disabled workers. Thus, persons with occupational disability were the prime target for vocational rehabilitation services. Subsequent Congressional mandates, however, shifted the attention to other specific disability groups and resulted in obscuring the focus on industrially injured workers. This shift in focus, coupled with the existence of the common law tort liability in the compensation system with its inherent litigation, resulted in the failure of both systems to adequately provide rehabilitation services to the industrially disabled: a condition which still exists today, according to the report of the National Commission (National Commission on State Workmen's Compensation Laws, 1972) and Larson, who suggests that one-half of 1% of industrially injured workers are rehabilitated under the federal/state programs. Larson further suggests that 10% of workers currently being injured could benefit from vocational rehabilitation services. (Larson, 1980).

B. REHABILITATION DEFINED.

The increased emphasis on the inclusion of rehabilitation benefits in a modern workers' compensation system has prompted attempts by those in the system to define rehabilitation. A noteworthy observation is made by Sawyer in this regard, wherein he makes a distinction between the philosophical differences in rehabilitation of the workers' compensation system and the state/federal program. He observes that the objective of workers' compensation rehabilitation is to restore the industrially injured worker to a state of employability equal to, or as near as possible to that of his pre-injury status, through the provision of only those services necessary to achieve this objective. On the other hand, Sawyer notes, the state vocational program seeks to rehabilitate disabled persons to their maximum potential through the provision of

educational and other services deemed necessary by the disabled worker to achieve a chosen vocational objective. (Sawyer, 1978).

A further distinction can be made through examination of the primary funding source of each program. The state vocational rehabilitation program is supported by federal and state funds, while the cost of rehabilitation in a workers' compensation system is borne by private industry through contributions to a special or second injury fund and direct payment to private rehabilitation providers. The employer further contributes to the rehabilitation of industrially injured workers through payment of compensation benefits during the period of rehabilitation.

A third distinction, perhaps more revealing than the first two, is the difference in population served by each system. As was previously discussed, Congressional mandates have directed the focus of the state/federal program to give priority to specific disability groups classified as severely disabled. These include developmental disabilities, congenital, orthopedic and neurological conditions, and catostrophic injuries resulting in paraplegia and quadriplegia. The bulk of individuals in these disability categories are adolescents and young adults, most of whom have never participated in the world of work. Therefore, the process employed in making them work ready is habilitation, as opposed to rehabilitation. Since their backgrounds do not include significant work experience which would have imparted marketable skills, their plans usually include long-term pre-vocational and vocational preparation centered around academic training toward a specific career goal chosen by the individual. Contrast this to the industrially injured group, who for the most part, have not been severely disabled by their injuries according to state/federal guidelines, and whose pre-injured work experiences have imparted skills which can usually be marketed in the workplace. On the whole, their natural orientation is not likely to be toward academic or classroom training, as they did not choose this method to enter the world of work to begin with, and they have not usually chosen to engage in academic pursuits at any point in their work life prior to the injury and subsequent visits to the state vocational rehabilitation office. It is reasonable to conclude that the approach taken in assisting them to return to the workplace will differ considerably from that taken for the other group.

The socially underlying concept of rehabilitation embraced by rehabilitation professionals is the intrinsic dignity of man, his feeling of self-worth and his right to life, liberty and the pursuit of happiness. In a workers' compensation system, this concept cannot realistically exist independent of economic wisdom. The timely return of an industrially injured worker to a safe employment status, commensurate with that held at the time of injury, through the investment of necessary resources, is a logical goal in a workers' compensation system. The end result is an economic as well as a social asset to the injured worker, the compensation system and society. Well-managed, cost-effective rehabilitation will enable many disabled workers to return to productive jobs and thus reduce compensation costs.

C. THE APPROPRIATENESS OF REHABILITATION IN A WORKERS' COMPENSATION SYSTEM.

In 1976, the Rehabilitation Committee of the International Association of Industrial Accident Boards and Commissions conducted research on rehabilitation in state compensation agencies. The Committee called for the inclusion of rehabilitation services in all state workers' compensation programs and went

on to submit a model program of medical care and rehabilitation which was adopted by the IAIABC in 1977. The stated purpose of the model program was the assurance and coordination of efficient and timely delivery of services necessary to restore the industrially disabled employee to optimum physical and vocational well-being. (Ross, 1976).

The need for rehabilitating injured workers was stressed in the 1977 report of the President's Interdepartmental Workers' Compensation Task Force. The report which stressed reemployment, advocated increased private rehabilitation efforts by employers and insurance companies. (Interdepartmental Workers' Compensation Task Force, 1977).

The Insurance Rehabilitation Study Group is an organization whose purpose is to provide a forum for members of the insurance industry to explore and develop concepts and programs of rehabilitation and medical administration applicable to all phases of insurance. The group undertook a project to develop guidelines and language dealing with rehabilitation and subsequently published a report which in part stated:

> While insurance losses and benefits are usually stated in monetary terms, the full consequences of human disability cannot be measured by money alone. Earnings lost due to accident or sickness can be replaced and medical expenses can be reimbursed, but there is no meaningful way to financially translate the value of an arm or a leg, or the personal dignity of being able to contribute to society as a useful member rather than merely existing disabled and dependent.
>
> The study group went on to state that:
>
> If insurance is to protect against these human losses, it must do more than provide financial compensation alone. It must also strive to restore such losses. Insurance should provide the means for disabled workers to return to gainful employment whenever possible, and to regain as much functional independence as they can, even if they cannot return to work. Compensation cannot accomplish these goals without rehabilitation. (Insurance Rehabilitation Study Group, 1975).

The Study Groups' report included its model rehabilitation program.

Based on the cited research and studies conducted by recognized authorities in workers' compensation, it is clear that the consensus among those in the compensation system supports the premise that rehabilitation is an effective tool which should be included in workers' compensation if the system is to fulfill its total responsibility to the industrially injured worker and to society within the economy.

D. WHO SHOULD FUND REHABILITATION IN WORKERS' COMPENSATION

Leading insurance companies, employers and other members of the workers' compensation community support the belief that all costs of the system should

be borne by the employer and not by the general public. Sawyer suggests:

> While some individual insurers and self-insured employers still approach the subject of rehabilitation with varying degrees of acceptance, the matter of involvement is no longer an option. Through a tion of either basic legislative changes or administrative regulation, the responsibilities of carriers and employers to provide rehabilitation services specifically directed toward returning injured workers to suitable gainful employment are spreading to all jurisdictions. (Sawyer, 1981.)

E. THE ROLE OF THE STATE WORKERS' COMPENSATION AGENCY IN REHABILITATION.

The National Commission on State Workers' Compensation Laws suggested that a state agency has six primary obligations in a workers' compensation program. Those obligations are applicable to rehabilitation and will be used for the purpose of this discussion.

First, the agency must ensure that the basic objective of rehabilitation is met by taking the initiative to administer the laws relative to rehabilitation.

Second, the agency must continually review the performance of the rehabilitation program and make procedural changes to improve the program when change is indicated.

Third, the workers' compensation agency is obliged to advise workers of their rights and obligations under the law and to assure that they receive the rehabilitation benefits to which they are entitled.

Fourth, the agency should apprise employers and carriers of their responsibilities and rights under the law. Physicians and attorneys must also be informed of their obligations in the rehabilitation process.

Fifth, the agency should assist in voluntary and informal resolution of rehabilitation issues and assure that such resolutions are consistent with the law.

Sixth, in the absence of voluntary resolutions, the workers' compensation agency must make adjudicatory decisions to resolve issues affecting rehabilitation.

The compensation agency must have sufficient authority and staff to fulfill these six obligations. Moreover, the skills and background of the staff must be consistent with the functions to be served and the tasks to be performed.

PART ONE

Five Specific Goals of Rehabilitation

in a

Workers' Compensation Program

PART ONE

Five Goals of Rehabilitation in a Workers' Compensation Program

I. Early Identification of Injured Workers Who Potentially Need Rehabilitation

Workers who may not be able to return to regular employment after suffering job related injuries should be referred to rehabilitation as soon as this determination has been made or can be reasonably predicted. Proponents of the early involvement theory share the common realization that time can be a deadly enemy to successful rehabilitation. Benign neglect of what originally may be a minor disability can result in a protraction of the condition to the point where an unwholesome outlook regarding return to work becomes permanent and fixed, and the psychological hurdle required to overcome this is extremely difficult if not impossible to achieve.

Needs:

1. A funding source (employer/insurer)
2. A non-adversary approach (employer/carrier)
3. Effective administration by workers' compensation
   a. Screen reports
   b. Contact workers
   c. Monitor services
   d. Settle disputes

II. Use of Competent Rehabilitation Providers

The unusual characteristics of workers compensation and the different approach required for successful rehabilitation, as this report has previously elaborated, are strong arguments for the use of counselors trained in industrial rehabilitation. While this training does not require an intimate knowledge of the law, it should include the ability to recognize the needs of the industrially injured population and the compensation community alike. The backgrounds of most rehabilitation professionals include formal training in rehabilitation or a behavioral science. However, institutions have traditionally failed to include substantial courses on workers' compensation in rehabilitation programs. Thus, the degree of competence required to achieve success in a workers' compensation rehabilitation program has generally been acquired through well designed, in-service programs and practical hands on training.

Critical Elements Needed:

1. Sound background in basic rehabilitation principles

2. Ability to work with multiple parties

3. Willingness to deliver according to needs of the system

   - direct placement approach
   - on-the-job training
   - appropriate evaluation (timely and limited)
   - timely developed training (as needed only)
   - timely issued reports (information)

4. Respect for, and responsive to Board authority

III. Provide Opportunities for Return to Direct Employment

The success of rehabilitation in a workers' compensation program rests on the attainment of one of its most critical goals: the earliest possible return of workers to direct employment. Members of the workers' compensation community share the widely held belief that the fewer changes made in the life of an injured worker in the rehabilitation process, the more successful that process is likely to be. Conversely, a more complex rehabilitation plan requiring numerous changes in the life of the injured worker, and requiring a proportionate period of time to implement, diminishes the chance of a successful outcome.

Needs:

1. Employer Responsibility

   - modify old job
   - offer new job
     (Use on-site job analysis)

2. Employee Responsibility

   - cooperate w/employer efforts
   - timely accept job offer
   - maintain flexibility

3. Union Support and Involvement

   - go to bat for member (negotiate)
   - negotiate contract agreements to support light duty and rehabilitation

4. Counselor Role

   - consult physician for sound work restrictions
   - perform on-site job analysis
   - counsel worker toward accepting job
   - keep all interested parties informed

5. Attorney Obligation (for both parties)

   - remain on side line and advise respective clients to cooperate

6. Workers' Compensation Agency

   - advise, assist, monitor

7. Board

   - settle disputes

IV. Maintenance of Atmosphere Conducive to Rehabilitation

Rehabilitation is a process which does not occur in isolation. The conditions and atmosphere surrounding this process are primary determinants of its eventual outcome. The screening and early identification of injured workers who potentially need rehabilitation services will not necessarily result in a successful outcome if the process is fraught with hostilities, mistrust and excessive litigation. Certain elements which may be conveniently termed the "Four C's" must be present to ensure successful rehabilitation.

1. Concern - employer/carrier for worker
2. Communication - employer/carrier - worker - workers' compensation agency - counselor - physician - attorney
3. Coordination - counselor
4. Commitment/Cooperation -- all parties

V. Provide Incentives, Remove Disincentives to Rehabilitation

A rehabilitation program which makes early identification of workers needing rehabilitation, provides for early return to direct employment, uses competent rehabilitation providers and maintains an atmosphere conducive to rehabilitation, may fall short of fully achieving the primary objective of a workers' compensation system unless it maintains sufficient incentives and removes disincentives in its rehabilitation program. Caution must be exercised so that expectations regarding rehabilitation are not solely based on the premise that good faith efforts will spontaneously occur. There must be a realization that basic human nature usually requires the existence or application of stimuli necessary to create sufficient incentives before actions are taken to achieve a desired goal.

A. Incentives

1. Proper Rating of Employers.

Authorities in workers' compensation have suggested that internalizing the costs of workers' compensation by properly rating small, as well as large employers would provide an incentive for reemploying injured workers.

a. Experience Rating - provides for a before tne fact look at safety and reemployment record for recent years. A good record results in credit toward future premium.

b. Retro Rating - employer pays advance premium based on classification rate times estimated payroll. Losses are assessed after period of months (pre-determined). Depending on experience, employer may get reimbursed.

2. Targeted Jobs Tax Credit

- Incentive for private employers who hire certain targeted groups (vocational rehabilitation clients included)

  50% of first $6000 wages for first year

  25% of first $6000 wages for second year

3. Second Injury Fund

- Widely publicized
- Adequate eligibility interpretation
- Effectively managed - guard against abuse

4. Additional maintenance for extra expense during rehabilitation

5. Monitoring by workers' compensation agency

B. Removal of Disincentives

1. Prevention of premature and inappropriate compromise and release settlements

2. Eliminate excessive litigation

C. Other Stimuli

1. Penalty for non-cooperation (Both Parties)

2. PPD determination should reflect non-cooperation

PART TWO

Findings, Conclusions, Recommendations

SUMMARY AND INTERPRETATION OF DATA

The primary providers of vocational rehabilitation services to injured workers in Alaska are the state vocational rehabilitation agency and two private rehabilitation firms. The state agency and one of the private firms, offered data retrieved from their automated data systems. Collection of data from the other private firm was precluded due to incomplete records which lacked essential information pertinent to the study. Limitations do exist for the purpose of comparing data collected from the two sources.

First, data for the state rehabilitation program reflects a three year period from FY 78 through FY 81. Data supplied by the private rehabilitation firm is for the FY 81 period.

Second, terms common to rehabilitation of disabled persons have several definitions for the purposes of statistics, depending on who collects the data. For example, a workers' compensation rehabilitation program, for purposes of closure statistics, defines a successfully rehabilitated worker as one who has 1) maintained paid employment for at least sixty days; 2) in a job consistent with the restrictions imposed by the disabling condition. The state rehabilitation program defines a successfully rehabilitation person as one who has completed a rehabilitation program and has 1) maintained paid employment for at least 60 days in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) has not returned to work, but has been restored to an optimum level of function as an unpaid home maker. In this case, the private rehabilitation firm describes a successful case as one in which the injured worker 1) returned to paid employment in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) whose claim was closed or denied as a result of the involvement of the rehabilitation firm. Again, it is important to keep these limitations in mind when making comparisons between data presented for the two sources.

Tables 1 and 2 present data received from the state vocational rehabilitation program. Tables 3 and 4 present data received from the private rehabilitation firm.

Although data limitations do not allow us to make any unequivocal conclusions concerning workers' compensation rehabilitation in Alaska, several widely accepted ideas are supported by the figures presented here. For both the state/federal program and the private sector rehabilitation firm, the earliest referrals become, on average, the least expensive cases. While there is an anomaly in the trend at 19-24 months (where both providers experienced an unexplainable dip in cost), the general direction is one of increased costs as the time between date of injury and date of referral increases. There do appear to be differences between the state program and the private firm in terms of average cost. In Table 3a, the private rehabilitation firms shows 75% of the sample cases with costs below $2500. The comparable figure for the state is 64% below $2500, seen in Table 2a. This difference can be explained several ways. First, as seen in Table 1, the average time between date of injury and date of referral for the state/federal program is 16.8 months. A similar figure for the private firm is 11.8 months. Given the relationships expressed in Tables 2b and 3b, one would then expect the state program's average costs to be higher. A second factor affecting costs is the average time spent in the rehabilitation

process. Table 1 shows the state program's clients spending 27 months, on average, in rehabilitation in FY 80. A similar figure from the private firms was 7.4 months, on average, between referral and closure. A third explanation for cost differences between the State program and the private firm is found in Table 1 which shows a significant percentage of the state/federal program's cases received college training in FY 80. While no similar figure exists for the private rehabilitation firm, meetings and discussions revealed that very few of their clients received college training. Given rising tuition costs, this would clearly add significant expense to the State program's services.

Table 1 shows that as the percent of clients receiving college training has decreased since FY 78, the percent of clients successfully rehabilitated has increased. This inverse relationship supports studies which have been conducted outside Alaska and concluded that shorter, less expensive programs tend to be more successful than longer and more expensive rehabilitation plans.

Table 1 also shows 54% of DVR's eligible referrals experienced successful outcomes in FY 80, although it is not known how many unpaid homemakers, or workers whose jobs were not consistent with restrictions imposed by the disabling condition, were included in this figure. A similar figure in the private firm's survey, seen in Table 4, is 55%. However, it is important to note that in the private firm survey, 34 cases were closed "via cash settlement/account denies coverage," and were classified as "successful" even though it was not known whether these persons returned to productive employment consistent with restrictions imposed by the disability. Subtracting these cases from the total number of successful cases then, reduces the success factor to 20.7%.

While many inferences and suggestions can be drawn from the data presented in Tables 1-4, one must remember that the percentage of clients involved in rehabilitation with respect to the total number of time-loss cases is quite small. For FY 81, the Second Injury Fund officer estimated 200-250 cases were determined eligible for second injury rehabilitation funds. From FY 78 - FY 80, the Workers' Compensation Division processed an average of 6838 time-loss cases. Because of the referral time lag mentioned earlier, it cannot be stated that a certain percentage of time-loss cases from a given year will receive rehabilitation. However, an estimated 3 to 4 percent of time-loss cases in a given year, eventually become eligible for rehabilitation. The Second Injury Fund officer has also reported that in a recent purge of 45 active rehabilitation files, only 17 (38%) had completed a program and returned to work. He cited the signing of compromise and release agreements as a major reason for workers dropping out of a program. In fact, the survey of 142 workers eligible for rehabilitation found almost 70% of them had signed compromise and release agreements, and most of these were after rehabilitation had begun.

What conclusions do these figures suggest? Because they represent such a small number of injured workers, a pure statistician could take any one piece of data mentioned here and find it is not statistically valid. But when all pieces are considered together, the data begins to support itself. Early referrals should cost less, and they do in Alaska. A longer period between injury and referral should raise costs, and it appears to do so for both programs.

GOAL I

Early Identification of Injured Workers Potentially Needing Rehabilitation.

CONCLUSION

There is no universally accepted, hard and fast rule regarding the point at which an injured worker should be referred to rehabilitation. Among the workers compensation agencies with organized rehabilitation units, the range is 60 to 120 days of continuous time loss from the date of injury. Immediate reporting is encouraged for workers with acute or catostrophic injuries.

Based on available data, it appears that the average time from the date of injury to referral of injured workers to rehabilitation is 14.3 months in Alaska. (See Tables 1 & 3) In light of the existing trends among those agencies with organized rehabilitation units, coupled with the results of two of the units discussed in the main report, it appears that the Alaska system could benefit from changes which would enhance its efforts to achieve the early identification goal.

RECOMMENDATION 1

That insurers/employers report to the Division of Workers' Compensation:

a. All injured workers who experience continuous time loss of 90 to 120 days from the date of injury, depending on the staffing level of the Division, and

b. All acutely injured workers where an immediate determination can be made that the worker will not likely be able to return to the job held at the time of injury.

RECOMMENDATION 2

That the Workers' Compensation Division screen reports no later than 5 working days from the date each report is received.

RECOMMENDATION 3

That subsequent to, or during the screening process, the Workers' Compensation Division contact each reported worker. The purpose for contact is to explain the benefits to which the worker may be entitled, and to set the tone for a positive rehabilitation outcome by explaining the objective of rehabilitation, the worker's rights and responsibilities in the rehabilitation effort.

RECOMMENDATION 4

That the Workers' Compensation Division establish and publish the procedural mechanism to support the reporting, screening and contact activities.

GOAL II

Provision of Rehabilitation Services by Competent Counselors

CONCLUSION

Counselors presently providing rehabilitation services to injured workers covered by the Act are presumed to have sound backgrounds in basic rehabilitation principles. However, a review of rehabilitation plans, reports and correspondence, as well as views expressed by these counselors, raises questions regarding whether the remaining three critical elements are sufficiently present to meet the objective of a workers' compensation rehabilitation program. (See discussion of Critical Elements Needed Under Goal II in Part One). First, some counselors appear not to understand tneir roles as they attempt to interpret laws regarding a worker's entitlement to rehabilitation benefits to the Board and they inappropriately make recommendations to the Board regarding settlement of workers' claims.

Second, it appears that some counselors are unable/unwilling to deliver services in a manner consistent with supporting the objective of the system. Services are not timely delivered (six months to complete a vocational evaluation and make recommendations). Training plans are developed prior to pursuing opportunities for direct return to employment. Some plans do not clearly define the vocational objective of the worker, or provide information regarding the type, scope and time frames within which services are to be provided. In cases where the vocational goal is defined, subsequent reports do not reflect specifically what has been accomplished toward achieving the goal.

Third, some counselors believe the system should afford a "pure" environment within which rehabilitation services can be provided to workers: They should not be required to interact with insurance adjusters, attorneys or the Board, as this interferes with their ability to effectively deliver services.

Finally, some counselors seem unprepared/unwilling to accept the Board's authority to make decisions regarding the rehabilitation of injured workers covered by the Act. Board requests for information in support of recommended plans are questioned and in some cases ignored. In some instances, attempts to coerce Board approval of second injury fund expenditures are made simultaneous to the counselor's overt resistance to Board requests for information needed to support a plan recommended by the counselor.

Clearly, the lack of regulations, definitive procedures and guidelines for vocational rehabilitation, has affected the performance of counselors providing services to injured workers covered by the Act.

RECOMMENDATION 5a

That pursuant to the adoption of regulations on vocational rehabilitation, (See Exhibit 1) the Workers' Compensation Division establish, publish and distribute guidelines for providers of rehabilitation services in accordance with recommendation 5b through 5e, and the following time frames:

- Completion of Vocational Evaluation and Plan Recommendation - 6 weeks

TABLE 1

DVR[1/]

	Eligible Cases Closed	Avg. Time in Rehab. Process	% College Training	Successful Rehabs.	Avg. Cost Per Eligible Case	Avg. Cost/ Successful Case
FY80	61	27(mos.)	21%	33 (54%)	$2280	$3505
FY79	50	23	36%	22 (44%)	1615	2821
FY78	48	32	38%	20 (42%)	1468	3021

* Through 7/1/81 -
Average time between date of injury and date of referral (includes cases still open) 16.8 Months.

1/Table 1 is data received from DVR off the R-300 form.

TABLE 2

DVR[2/]

For 72 Eligible Closed Cases Referred through 7/1/80:

a. Cost	#
0-500	18
500-1000	9
1000-1500	9
1500-2000	7
2000-2500	3
2500-3000	3
3000-3500	2
3500-4000	7
4000-4500	1
4500-5000	3
5000-and over	10

64% below $2500

b. Referral Period	#	Avg. Cost/Case
0-6 Months after inj.	14	$2168
7-12	26	2391
13-18	10	2494
19-24	7	975
25-30	10	2532
30-36	4	2492
36 and over	1	8258

The average time between injury and referral was derived from DVR data and injury dates produced from AK Workers' Comp. files.

2/ Since these figures reflect only closed rehabilitation files, an average referral period derived from Table 2b will not correlate with the corresponding figure presented in Table 1 of 16.8 months.

Other	20	10.0

- Complete Development of Plan - 6 weeks
- Direct Placement Program - 3 months
- On-the-Job Training - 3 to 6 months, depending on the skills to be acquired coupled with the skill level of the injured worker.
- Vocational Training - 52 weeks (extensions subject to prior approval by the Board)

RECOMMENDATION 5b

That rehabilitation providers issue a report within 30 days of initial contact with an injured worker. Background information regarding the worker's age, education, work history, and general medical condition, as well as a summary of activities conducted during the 30 day period should be included in the report. Information regarding the next immediate plan of action should also be included.

RECOMMENDATION 5c

That plans submitted for approval contain pertinent information as outlined in proposed regulations on Vocational Rehabilitation 8 AAC 47.040(b)(1) through (9).

RECOMMENDATION 5d

That subsequent to implementing plans, rehabilitation providers issue monthly progress reports sufficient in content and scope to inform all interested parties of the progress being made toward achieving the vocational goal of the p n.

RECOMMENDATION 5e

That approval by the Board must be obtained prior to amendment, suspension or termination of an approved rehabilitation plan.

GOAL III

Provide for Early Return to Direct Employment

The extent to which injured workers are provided opportunities for return to direct employment is a primary determinant of the ultimate success of rehabilitation in a workers' compensation program. Administrators of rehabilitation programs for the Idaho Industrial Commission and the Office of Workers' Compensation Programs (OWCP) as well as others in the industrial rehabilitation community, support this premise. The Idaho program states as its primary goal: the earliest possible return of the injured worker to meaningful safe work. (See Exhibit 2). The OWCP, in an effort to improve its rehabilitation program has developed/endorsed return to work programs for injured workers covered by the Longshoremen's and Harbor Worker's (LHCA) and the Federal Employee's Compensation Acts (FECA). According to information received from the OWCP, 763 injured workers were successfully rehabilitated under the FECA for FY 81. Sixty eight percent of these workers were reemployed by their previous employers. Savings in compensation payments alone totaled 7½ million dollars. During the same fiscal year, 368 workers were successfully

rehabilitated under the LHCA, resulting in actual savings of 3½ million dollars in compensation payments. Twenty-three percent of these rehabilitated workers were reemployed by their previous employers. (See Table 5 for comparative figures on the rehabilitation programs of the Federal Acts, the States of Idaho and Alaska Compensation Acts)

Insurance companies can be exceedingly instrumental in helping their insureds develop reemployment programs. A carrier for a large employer covered under the LHCA reports services provided the employer in establishing a reemployment program approved by the OWCP, resulted in the employer rehiring 18 injured workers over a nine month period during FY 82. A 1¼ million dollar savings in projected compensation payments resulted from this effort. Additionally, the employer reported higher morale and reduction in suspected fraudulent claims as additional payoffs. That tremendous benefits are derived by the reemployment of injured workers by employers at the time of injury is too obvious for further elaboration.

CONCLUSIONS

There is little evidence in support of Alaska employers providing measurable opportunities for reemployment of injured workers. Only one self-insured reported having an organized return-to-work program. Figures to substantiate this effort were not afforded. The risk manager of a major employer indicated an extensive feasibility study has been conducted over the past year in preparation for developing a comprehensive reemployment program. A precious few employers reported a limited effort of temporarily assigning employees to light duty. On the whole, employers readily proclaimed the nature of their business precludes rehiring their injured employees: Their operations simply cannot accommodate workers with less than full body integrity. Insurer's comments contributed little to modify or change the complexion of this proclamation. Neither party admitted to having particular knowledge on how to improve this present state of affairs, although the suggestion of some insurers regarding performance of on-site-job analyses in cases of reemployment, dispells the notion of complete unawareness in this matter.

RECOMMENDATION 6

That insurers provide assistance to employers in developing programs for reemployment of injured workers.

RECOMMENDATION 7

That insurers/employers arrange for counselor services to include on-site-job analyses and assistance in modification of jobs to enhance reemployment opportunities of an employer's injured employees.

RECOMMENDATION 8

That the Workers' Compensation Division encourage the development and implementation of reemployment programs by providing positive monitoring/endorsement of the efforts of parties.

A few union representative claimed favorable dispositions to contractual agreements providing for reemployment of injured workers. However, previous

TABLE 5

Comparison Data for Four Workers' Compensation Acts with Provisions for Rehabilitation Benefits

Program	No. of Time Loss Workers	Received Rehabilitation Services		Worker's Successfully Rehabilitated			
		No.	% of Time Loss	No.	% of Workers Received Services	% of Time Loss Workers	% of Return to Work w/previous employer

3/ Office of Workers' Compensation Programs
4/ Federal Employees' Compensation Act
5/ Longshoremens Harbor Workers' Compensation Act

efforts in this regard were reportedly rebuffed by management and were thus abandoned by labor. Trust fund sponsored, on-the-job training programs are provided for injured union members by at least two locals.

RECOMMENDATION 9

That contractual agreements be negotiated for reemployment/rehabilitation of injured union members.

GOAL IV

Maintenance of Atmosphere Conducive to Rehabilitation

CONCLUSIONS

The element of concern is sufficiently intangible to render itself unmeasurable in a quantifiable way. It is therefore difficult to present an elaborate discussion on the extent to which insurers/employers are concerned about their injured employees during the course of their claims. This would require a detailed examination of randomly selected files maintained by carriers, with particular notations made of such items as timeliness of first and subsequent compensation payments, timely and adequate provision of medical and rehabilitation services, the extent to which claimants were advised of their entitlement to benefits, etc. Moreover, the quality of contacts between the injured worker and the insurer/ employer would be difficult if not impossible to capture. The elements of communication, coordination and commitment lend themselves to more discussion, particularly in regards to rehabilitation.

In general, the extent and timeliness of communication with injured workers seem inadequate for the purpose of supporting a successful rehabilitation program. First, the lag between date of injury to date of referral as previously noted, supports the conclusion that injured workers are not timely contacted and advised of their entitlement or potential need for rehabilitation services. Second, rehabilitation reports and other correspondence reflect communication is sporadic and generally inadequate to ensure the rehabilitation effort of a successful and cost effective outcome. Progress in rehabilitation plans is not timely monitored or timely reported. Concurrently, coordination of activities necessary to develop realistic return to work plans is insufficient, so that inordinate delays and interruptions occur to the detriment of injured workers, the rehabilitation program and the compensation system alike.

As to the extent of commitment to rehabilitation in the Alaska system, the time lag from date of injury to referral for services, and the percent of time-loss workers provided services, (approximately 5.4), coupled with the percent of time-loss workers successfully rehabilitated, (approximately 1.1%) indicate this element too, is woefully inadequate to support a rehabilitation program.

RECOMMENDATION 10

That insurers/employers increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits.

RECOMMENDATION 11a

That in the case of workers experiencing time loss, who may need rehabilitation services, insurers/employers assign a counselor to contact the worker as soon as this determination can reasonably be made.

There is a developing trend among leading insurance companies to hire a rehabilitation staff member who serves as a communication link between the injured worker and insurance company, as well as other appropriate parties in the system. This staff member assists in creating an atmosphere conducive to an early return to work and facilitates coordination and development of rehabilitation plans for those workers who may not be able to return to direct employment.

RECOMMENDATION 11b

That insurers/employers consider hiring a rehabilitation professional to enhance their ability to effectively communicate with, and timely provide services for injured workers.

GOAL V

Provision of Incentives, Removal of Disincentives

CONCLUSIONS

Incentives

A. Experience and Retro Rating

The extent to which these methods are used in rating Alaska employers is unknown and is beyond the presentation of this report. Their suggested use by authorities in workers' compensation has been sufficient to present them as incentives for employers to reemploy their injured workers.

RECOMMENDATION 12a

That insurers assist employers by providing loss control services to assure appropriate rating consistent with their safety record and reemployment practices.

RECOMMENDATION 12b

That to supplement the loss control services provided by insurers, employers seek the assistance of the States Division of Insurance in rating matters and methods.

B. Targeted Jobs Tax Credits

According to the Division of Employment Security, Alaska employers rarely take advantage of this tax credit when employing the industrially injured worker. Several factors, such as eligibility criteria and employer awareness may be influencing this. Whether counselors adequately advise employers of this incentive when attempting to place injured workers is unknown.

RECOMMENDATION 13

That counselors enhance their efforts to place injured workers by informing employers of Targeted Jobs Tax Credit provisions and by providing assistance necessary to facilitate employer participation in the program.

C. Additional Maintenance

Injured workers undertaking a rehabilitation program can receive up to two hundred dollars in additional maintenance to defray extra expenses incurred during their rehabilitation program. This provision appears to be adequately serving the purpose for which it was established.

D. Second Injury Fund

The Alaska Workers' Compensation Act has provisions for a Second Injury Fund to be administered in accordance with orders and awards of the Board. AS 23.30.040(a). Subsection (e) authorizes expenditures for rehabilitation expenses and maintenance during the period of rehabilitation which may not exceed $10,000 for one person. When it comes to placing limitations on rehabilitation benefits in a workers' compensation system, there is an inherent problem in stating these limitations in monetary terms: Expectations and rehabilitation plans are designed around the upper limits of the dollar amount, rather than around what services are actually needed to make the injured worker employable. The worker believes his is an undeniable right to a program which costs $10,000, even though a less expensive program may be more appropriate to restore his employability. The counselor views the $10,000 as the worker's personal account which he has a right to exhaust by charging the costs of items and services superfluous to his rehabilitation program. In settlement negotiations, the attorney seeks to include $10,000 in the total figure for rehabilitation benefits, which he argues is his client's right.

All parties appear to have forgotten a basic tenet in a workers' compensation rehabilitation program: An injured worker's <u>right</u> to rehabilitation services coexists with the <u>need</u> of the worker for such services. The type, scope and duration of a rehabilitation program will vary with each injured worker, depending on such factors as skill level, education, age and extent of disability. It is therefore, a reasonalbe assumption, that the costs of services will vary for individual programs. Provisions for rehabilitation should be made with this in mind which is the current practice in most state compensation programs.

RECOMMENDATION 14

That language in AS 23.30.040(e) be changed to remove the dollar amount and provide for necessary costs of rehabilitation services subject to Board approval.

This provision would enhance continual efforts of the Board to provide necessary expenditures for workers seeking to rehabilitate themselves back to the work place and at the same time, protect the investment of insurers/employers who support the Fund.

There appears to be a lack of employer awareness regarding the existence or purpose of the Second Injury Fund and its provision for pre-existing conditions, under AS 23.30.205. This incentive will not realize its basic purpose if employers are not aware of its nature or not encouraged to use it.

RECOMMENDATION 15

That the Workers' Compensation Division increase employer awareness and encourage employer use of the Second Injury Fund in employment of industrially injured workers. Increase publicity and eligibility interpretation will enhance this effort.

Provisions also exist for the Board to make cooperative arrangements with insurance companies, private organizations and institutions, and state or federal agencies to provide rehabilitation services to injured workers covered by the Act. Through the end of FY 81, the Board maintained a cooperative agreement with the Alaska Division of Vocational Rehabilitation. The agreement permitted transfer of lump sum funds from the Second Injury Fund on a fiscal year basis, to the Division of Vocational Rehabilitation, for the provision of rehabilitation services to injured workers in the compensation system. Currently, a cooperative agreement does not exist between the two agencies due to unresolved differences surrounding the Board's authority to approve rehabilitation plans submitted by counselors of the Division of Vocational Rehabilitation requiring Second Injury Fund expenditure. The wisdom of transferring lump sum Second Injury Funds to the agency, and attempting to renew a cooperative agreement between the two agencies is questionable for at least three reasons.

First, the traditional basis for forming cooperative agreements between a compensation and state rehabilitation agency may no longer exist. During the formative years of no fault workers' compensation, the sole provider of vocational rehabilitation services to the disabled population was the state vocational rehabilitation agency. However, the National Commission, as well as other authorities in workers' compensation, has detailed the past failures of state programs in general, to meet the needs of the workers' compensation system due to the philosophical differences of the two agencies. Additionally, there has been an emergence of private rehabilitation providers, who appear more able to gear their services to the needs of the compensation system. In view of these factors, cooperative agreements between the two agencies may well be obsolete.

Second, removal of Second Injury Fund monies from the administration of the Commissioner of Labor, by transferring them to another agency which has no administrative oversight in the workers' compensation system, undermines the commissioner's ability to effectively administer the Fund in accordance with the orders and awards of the Board.

The last reason has legal implications. As the law clearly assigns the administrative responsibility of the Fund to the commissioner, and transfer of monies from the Fund undermines the commissioner's ability to discharge that responsibility, it would appear that meeting the requirement of the law is precluded by a cooperative agreement. This issue is of particular

importance in view of the reluctance of the Division of Vocational Rehabilitation to respect the Board's authority to approve rehabilitation plans submitted by its counselors requiring expenditure of Second Injury Fund monies.

RECOMMENDATION 16

That cooperative agreements involving transfer of Second Injury Fund monies to the Division of Vocational Rehabilitation be discontinued.

RECOMMENDATION 17

That criteria for development, recommendation and implementation of rehabilitation plans, in accordance with recommendations 5a through 5e, be applied to all providers of vocational rehabilitation services to injured workers covered by the state compensation laws.

Disincentives

A. Premature Compromise and Release Settlements

Larson and other authorities in workers' compensation, are strong opponents to settlements which prematurely preclude an injured worker's participation in a supervised rehabilitation program. There is real concern for the worker who settles his claim and releases his rehabilitation benefits. He may quickly exhaust his settlement funds and find himself with inadequate skills to earn a living.

That workers submit applications for settlements to fund proposed self employment ventures, in lieu of participation in a supervised rehabilitation program, is common knowledge. Almost equally as common, and particularly disturbing in the Alaska system, and probably elsewhere, is the recommendation for such plans, without adequate documentation to support the soundness or feasibility of the proposals. The parties involved have varying motivations for this unfounded recommendation.

The injured worker views it as an opportunity to do what he has always wanted to do: Besides, he will not have to work as hard if he can work at his own pace.

The insurer/employer suggests it as a mutual agreement which affords an equitable solution toward the disposition of the claim: It will also relieve the insurer/employer of any future liability related to compensation and rehabilitation benefits.

Claimant's attorney argues it will allow his client to get on with resuming a normal life: It will also afford the attorney an immediate appreciable fee.

The rehabilitation counselor opines that: Given the workers vocational evaluation results, his interests and motivation to succeed, the proposed venture will afford him a realistic vocational goal: It will also provide the counselor with much needed relief from the task of developing a sound

rehabilitation plan, which has been difficult if not impossible to achieve in light of the worker's resistence to any plan other than the self employment venture.

In instances such as this, all parties seem to lose sight of the end goal of rehabilitation: The return of the injured worker to productive employment by restoring his ability to earn a living. The injured worker's desire to start his own business is inappropriately equated with the goal of rehabilitation. A self employment plan may restore the worker to productive employment which will afford him a livable wage, and thus is a means to an end. However, an unsound plan may not afford him a sufficient income and thereby fails to achieve the end goal of rehabilitation.

This is not to suggest that all self employment plans are unsound and thus should not be considered, or that all workers must participate in an approved rehabilitation plan before a claim can be settled. It is suggested however, that each plan must be carefully evaluated for its soundness and potential for successfully returning the worker to productive employment. In cases not involving self employment plans, claims should be settled only after a determination has been made that to do so is in the best interest of justice.

RECOMMENDATION 18

That as a general policy, the Board deny settlement of claims, prior to an injured worker's completion of a supervised rehabilitation program.

B. Excessive Litigation

Rehabilitation professionals providing services to inured workers in Alaska, readily attest to the activities of both the plaintiffs' bar and defense attorneys, as interfering in the rehabilitation process. Indeed this seems to be borne out by testimony during public hearings on Workers' Compensation and in the claims files of injured workers. Excessive litigation serves little if any useful purpose in the rehabilitation process and if allowed to exist, will undermine the primary objective of rehabilitation. It causes the focus to shift from restoring the worker's competative earning ability to highlighting his disability. In the ensuing process, rehabilitation is not used as an effective, productive tool for the long range benefit of the injured worker. It becomes a bargaining stick employed by the claimant's attorney in his quest to obtain his client's pot of gold, and it is simultaneously used as a trade-off carrot by the defense attorney to limit the employer's/insurer's future liability. To an appreciable extent, the Board can provide a remedial solution to this problem. Regulations, guidelines and well defined procedures regarding rehabilitation, will remove much of the need and opportunity to litigate issues surrounding the rehabilitation process. (See recommendations 1 through 5e).

C. Other Stimuli

Parties who refuse to cooperate or who sabotage the rehabilitation effort by passive-aggressive means, should be encouraged to cooperate through the application of remedial penalties acting upon both the insurer/employer and

the injured worker similarly. The Board has the authority to apply such remedies. A review of its more recent decisions and orders reflects an increased effort to make sufficient applications in support of the rehabilitation objective.

Delivery of Rehabilitation in Alaska's Workers' Compensation System

The Alaska Workers' Compensation program must have an effective rehabilitation delivery system if it is to meet its six obligations as outlined in the overview section of this report, and achieve the five specific goals of rehabilitation. Administrative monitoring and positive assistance to injured workers and all other members of the workers' compensation community, require the adoption of the recommendations set forth in this report. Despite the on-going efforts of the Division of Workers' Compensation to improve its delivery system to the workers' compensation community, it continues to lack the resources and staff necessary to achieve a successful rehabilitation program which will ultimately reduce the cost of the compensation system.

The savings experienced in other compensation programs cited in this report, resulted from the delivery of well managed, cost effective rehabilitation benefits. These results did not occur independent of the economic wisdom of administrators for those programs, who realized that a relatively small investment of resources would yield tremendous gains in the reduction of compensation costs to employers, injured workers and society.

RECOMMENDATION 19

That the Division of Workers' Compensation acquire the necessary staff to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

PHYSICIANS' CONCERNS

1. Rehabilitation counselors should consult with treating physician before contacting injured worker. The counselor often gives advise which conflicts with physician's planned course. Physician can pave the way and make the prospects of rehabilitation less threatening if he is aware of the counselor's contact in advance.

2. Workers should be advised of benefits from day one of injury. Rights and responsibilities of worker should be spelled out. This would reduce adversary atmosphere.

3. Employers engage in inappropriate hiring practices to begin with. Thorough pre-hiring physical exam should be conducted. Conditions incompatible with physical demands of certain jobs would be detected at that time.

4. Workers' compensation should take natural aging process into account. Wear and tear process should not be financed by workers' compensation system.

5. Remedies should be more vigorously applied to workers who fail to follow doctor's orders.

6. Attorneys are too involved in the rehabilitation process. Counselor, physician and injured worker should be primary parties involved.

7. Rehabilitation benefits should be consistent and uniformly delivered. There is no control in the present system. Physician and patient need rules to play by.

8. Employer must assume more responsibility to provide light duty work until worker can resume regular job.

9. Union dispatch precludes loyalty to the employer - Union regarded as the "employer".

10. Union rules should be more flexible to support rehabilitation.

11. Unions must assure worker's who are dispatched are physically able to perform the duties of the job.

12. Professional rehabilitation providers inadequate. A more clearly defined system would encourage more providers to practice in Alaska's system.

13. Services provided by DVR are not particularly geared to industrial workers - more effective with catostrophically disabled population.

14. Insurance adjusters have inadequate backgrounds in medicine and human behavior. Inappropriate actions against claimants result in adversary behavior by claimant; (foot dragging and going against doctor's recommendations.) Adjusters must use more amiable approach.

REHABILITATION COUNSELORS' CONCERNS

1. Attorneys often interfere with rehabilitation. Some attorneys forbid their clients to see counselors, insist on being present at every counseling session, attempt to dictate what program should be developed for the injured worker, and often advise their clients not to cooperate with the counselor by using passive aggressive tactics. Counselors would like to see guidelines or regulations developed which forbid attorneys to interfere or attempt to run the rehabilitation process.

2. The workers' compensation system expects counselors to be miracle workers. Successfull rehabilitation of injured workers in the compensation system is difficult if not impossible in light of the following:

   a. Inadequate requirements of workers to cooperate with the counselor.

   b. Ineffective enforcement of the vague rules presently existing in the system when evidence clearly shows the worker has been uncooperative.

   c. Some insurance companies act in good faith in attempting to arrange rehabilitation services for workers who need them. Other companies fail to make such arrangements and may even interfere when workers seek services on their own.

   d. Those companies that support the rehabilitation effort are often penalized as the Board allows uncooperative workers too many chances to cooperate. Limitations should be placed on these chances.

3. The Workers' Compensation agency should be staffed with rehabilitation professionals who determine which agency will provide services to injured workers in disputed cases. This would reduce the level of excessive "rehabilitation shopping" by all parties which presently exists, and it would eliminate dual assignment of rehabilitation providers by both sides.

4. Counselors have too little time as it is to provide adequate services to the disabled population. Requiring counselors to appear in hearings and other judicial processes further reduces the time counselors should be devoting to rehabilitating the disabled population.

INJURED WORKERS' CONCERNS AND REACTIONS

1. The system has gotten so complex that an attorney is absolutely necessary in proceeding with many cases. Yet, some injured workers were not advised that they needed an attorney until it was too late.

2. Injured workers have reported receiving "high pressure" from carriers to settle for smaller settlements than required by law. This included threats of holding up final settlement unless the injured worker agrees to carrier's terms.

3. Injured workers who realized later that they needed rehabilitation assistance, were not given any indication that the option was available, at the time of injury.

4. Benefits are either cut-off without notice or held up as part of pressure tactics. In cases of jobs which pay by commission, an injured worker reported that benefits stopped immediately upon taking the job, although it was 4 months before he received his first commission check.

5. There were positive reactions to some insurance companies' case management, in addition to positive feelings about some injured workers' rehabilitation experience.

6. There is concern expressed that DVR does not cooperate with the injured worker's interest in rehabilitation. This point was expressed in a case where the injured worker reported the counselor stalled 6 months in getting the program started and took 2 months in getting the purchase of a calculator approved.

7. Concern has been expressed over the proper medical treatment. The use of chiropractors is more helpful in some cases, yet is discouraged by some doctors.

8. Injured workers are frustrated that some of the jobs they are retrained for are not available on the job market when the rehabilitation program is completed. They wind up returning to their old job or taking a position which has a high probability of reinjury.

INSURER/EMPLOYER CONCERNS

1. The Act requires insurers/employers to provide rehabilitation services to injured workers. Thus, the insurer/employer should be able to determine which rehabilitation agency the worker will be referred to for these services. This would eliminate the current practice of workers/attorneys shopping around to find the counselor who will recommend the longest training program.

2. Claimants' attorneys should be restricted from practicing "rehabilitation" and submitting training/rehabilitation plans for their clients.

3. Insurers/employers should not be required to provide rehabilitation services to workers who refuse reemployment offers by employers. There should be a limit placed on the time an injured worker has to accept the offer.

4. When training plans are presented for approval, the Board should make every effort to ensure the need for training before approving the plan and requiring the insurer to continue total compensation payments. Training should be approved on the basis of <u>need</u> as opposed to the <u>desire</u> of workers who merely want a new career.

5. Counselors should be used to perform on-site-job analysis to determine if the job is compatible with the worker's restrictions. Presently, the physician, who does not have sufficient knowledge of the world of work, makes this decision based on the whims of the patient, who often misrepresents physical demands of a given job.

ATTORNEYS' CONCERNS

1. Alaska has an inadequate number of competent rehabilitation counselors. Often, workers do not have a choice and must use DVR.

2. Particular counselors are inconsistent in serving injured workers; engage in power playing to control worker's life; dabble in claims and legal matters; incorrect information given worker, sometimes intentionally, if worker has not followed the counselor's "rules".

3. Present system does not have mechanism to make rehabilitation work. No one to monitor system and keep parties in line, particularly counselors who behave in questionable manner.

4. Disputes regarding rehabilitation should be promptly heard and decisions timely issued. Delays destroy motivation for rehabilitation.

5. Artifical rehabilitation hurts workers with serious injuries.
   EX: Sixty-one year old worker w/65% rating. Has fifth grade education and no work skills other than heavy labor. Ineligible for retirement by 4 years. Placed in pie shop as a part-time wrapper. Paid $4.00/hr = $60/week = approx. $200/month. Counselor issued a report of "successful rehabilitation" so worker was found PPD, thus $60,000 limit applied. Questionable whether worker will be able to continue in work force due to severity of injury, age, and limited skills. If unable to continue working, $60,000 inadequate source of income for worker's remaining lifetime. If PTD, rating is precluded by "successful rehabilitation" stamp.

6. Board should penalize insurers/employers who misrepresent the law. Failure to advise worker of entitlement to rehabilitation is misrepresentation.

APPENDIX OF EXHIBITS

CHAPTER 47
VOCATIONAL REHABILITATION

Section

10. Goal of vocational rehabilitation
20. Duties of the parties
30. Evaluation analysis
40. Vocational plans
50. Modification, suspension, or termination of vocational plans
60. Vocational rehabilitation definitions

CHAPTER 47

VOCATIONAL REHABILITATION

8 AAC 47.010. GOAL OF VOCATIONAL REHABILITATION. The board shall direct and provide for the vocational rehabilitation of employees entitled under the Act. Vocational plans formulated under the Act and this chapter must be designed to restore the injured employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.020. DUTIES OF THE PARTIES. (a) The employer, the self-insurer, the insurance carrier, and the employee shall promptly recognize the need for the evaluation of vocational rehabilitation and shall initiate necessary action to restore the injured employee to gainful employment as expeditiously as possible.

(b) The employee shall cooperate in all phases of vocational rehabilitation. The employee shall promptly and responsibly participate in a board-approved vocational plan when ordered to do so by the board. If the employee does not choose to enroll in a vocational plan, nothing in this chapter is to be interpreted so as to require the employee to do so. However, in cases where the employee chooses not to enroll in a vocational plan, or unreasonably refuses to complete a vocational plan, the degree of permanent partial disability will be determined as though the employee had enrolled in, and successfully completed, the vocational plan. The employee shall notify the board and the employer within 14 days of the first consultation with a vocational rehabilitation representative.

(c) The vocational rehabilitation representative shall notify the board and all interested parties within 14 days of the first consultation with an employee. Thereafter, the vocational rehabilitation representative shall file regular monthly reports with the board during the consultation period. Within 14 days of the final consultation, the vocational rehabilitation representative shall file a report of consultation which must contain the findings, conclusions and recommendations regarding vocational rehabilitation. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.030. EVALUATION ANALYSIS. (a) No vocational plan may be initiated until board approval has been secured. Board approval may be secured by any party by filing a petition for initiation of a vocational plan, accompanied by a written evaluation analysis. Copies of the petition and the evaluation analysis must be served upon all parties and the administrator of the Alas'a Second Injury Fund, in accordance with 8 AAC 45.060.

(b) A written evaluation analysis must be accompanied by copies of all medical reports referred to in the analysis and must, in addition, include

(1) an assessment of the employee's employable skills, including a synopsis of his work history and educational background;

(2) a summary of the disabilities limiting the employee's employment opportunities; and

(3) a specific accounting of the employee's pre-injury wage and an assessment of his post-injury wage-earning capacity.

(c) After the complete, written evaluation analysis has been filed the board will review the factors discussed in the analysis and will determine whether the employee is able to return to his previous employment or to modified employment or whether, instead, direct job placement, on-the-job training or formal retraining is necessary in order to return the employee to gainful employment.

(d) If the board determines that formal retraining is necessary, it shall direct the employer or the employee, or both, to initiate a vocational plan in accordance with 8 AAC 47.040. The board will give preference to direct job placement and on-the-job training over a formal retraining program. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.040. VOCATIONAL PLANS. (a) Following evaluation in accordance with 8 AAC 47.030, a vocational plan may be initiated by direction of the board or by any person. Vocational plans must be developed by a qualified rehabilitation representative designated by either the employer, the carrier, the self-insurer, the employee, or the board.

(b) Proposed vocational plans must be submitted to the board in the form of a petition by the person responsible for initiating the vocational plan. The petition must be in writing and must include

(1) the gainful employment objectives of the vocational plan, including estimated earnings and reasonable availability of gainful employment;

(2) the name and location of the educational institution, public or private vocational training agency, or company or business involved in the vocational plan;

(3) the nature, extent, and duration of services to be provided during the period of rehabilitation;

(4) the dates of commencement and expected completion of the vocational plan;

make a determination by means of a hearing or hearings of the services necessary to restore the employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.050. MODIFICATION, SUSPENSION, OR TERMINATION OF VOCATIONAL PLANS. Any party may petition the board for modification, suspension, or termination of a plan. The petition shall be treated as any other petition under § 050 of this chapter. The board shall order the modification, suspension, or termination if it finds

(1) satisfactory progress is not being made in the approved plan; or

(2) the plan is not likely to prepare the employee for gainful employment due to unexpected contingencies; or

(3) the employee refuses to complete the vocational plan approved by the board; or

(4) a more suitable plan becomes available. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.060. VOCATIONAL REHABILITATION DEFINITIONS. As used in this chapter

(1) "Gainful employment" means employment which is reasonably attainable and which offers an opportunity to restore the employee as soon as possible to maximum self-support, due consideration being given to the employee's qualifications, physical and mental condition, interests, motivation and incentives, pre-injury earnings and future earning capacity, and the present and future labor market.

(2) "Implementation of a plan" means commencement by the employee of an actual return-to-work plan of direct job placement, on-the-job training or vocational training in accordance with an approved vocational rehabilitation plan.

(3) "Initiation of a plan" means the creation and drafting of a written vocational rehabilitation plan.

(4) "Vocational rehabilitation" means a program of services, not limited to medical services, designed to restore an injured or disabled employee to gainful employment.

(5) "Vocational rehabilitation representative" means a person who possesses the special skills, knowledge, education, training, and experience necessary to develop and implement vocational rehabilitation plans.

(6) "Vocational rehabilitation plan" means the planning and providing of services, not limited to medical services, reasonably necessary to restore an employee to gainful employment. Such services include, but are not limited to, vocational evaluation, counseling, retraining, on-the-job training, and job placement assistance. (Eff. / / , Register).

Worker Rehabilitation

Idaho
Industrial Commission
Rehabilitation Division

Exhibit 2

The Rehabilitation Division was established by the 1978 Legislature in an effort to reduce the period of temporary disability resulting from industrial injury or disease and to aid in restoring the disabled employee to gainful employment with the least possible physical impairment.

Who Benefits From Our Services?

- Disabled workers
- Employers
- Attorneys
- Physicians
- Society

What Are Our Goals?

- To provide for the earliest possible return of the injured worker to meaningful, safe work
- To return the injured worker to as near his pre-injury status as possible
- To reduce the period of temporary benefits paid injured workers

What Services Are Provided?

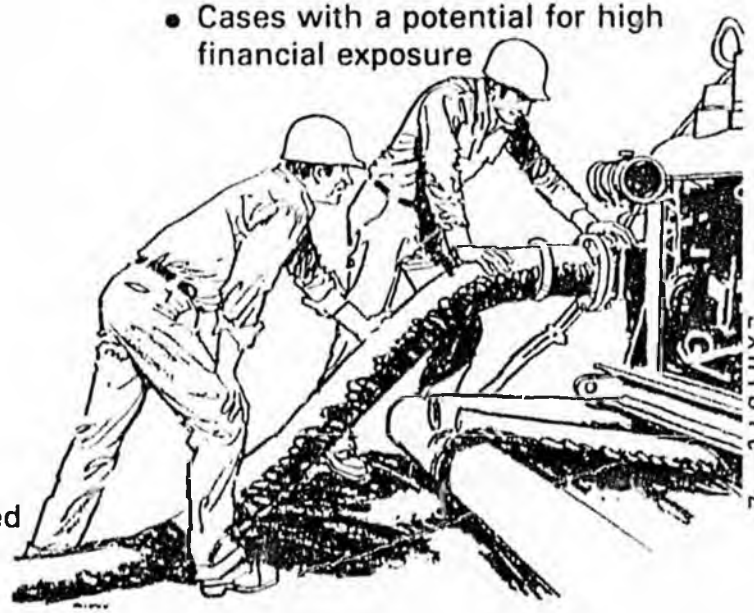
Services provided are those necessary to return the worker to a job with his former employer, or to a job similar to the one held prior to becoming injured.

Services available include:

- Vocational evaluation
- Job site evaluation
- Vocational counseling
- Assistance in job modification
- Training in job seeking skills
- Placement
- Follow-up
- Reporting system to those involved in the rehabilitation process

Who Should Be Referred?

- Workers requiring a change of occupation
- Cases with long periods of disability
- Injuries resulting in restrictions of function
- Cases with a potential for high financial exposure



Who Is Eligible For Our Services?

Workers receiving Idaho Workmen's Compensation benefits for whom the Rehabilitation Division can be of assistance in reducing the period of temporary disability or aiding the worker in a return to employment compatible with his disability.

AN INTERIM REPORT ON THE ALASKA WORKERS' COMPENSATION SYSTEM

John H. Lewis
P.O. Box 330550
Miami, Florida 33133
(305) 443-8111

January 27, 1982

INTRODUCTION

The purpose of this document is to analyze the major areas of concern within the Alaska workers' compensation system. The items discussed were chosen because of their economic significance, and in some instances because of existing controversies as to their proper role in the compensation system. Although many issues remain for additional discussion, those contained in this report represent the critical questions which must be resolved in order to develop an appropriate legislative response to the current workers' compensation controversy.

THE BUNKHOUSE RULE

The major criteria for determining the compensability of an accidental injury is whether it arose out of and in the course of the employment (AOE/COE). This phrase is contained in the Alaska Workers' Compensation Act as well as 48 others. Obviously this test must be interpreted in those instances in which compensability is disputed, and as a result, there is a huge volume of case decisions from across the country, providing additional and more specific guidelines for determining when the AOE/COE test has been met. Since the Alaska Workers' Compensation Act is relatively new, it did not go through the developmental period in which these rules were structured, and simply adopted existing guidelines, in many cases selecting the most far-reaching of available options. The bunkhouse rule is one of these guidelines.

Normally an injury must occur during the hours of employment and be caused by some incident of the work to meet the AOE/COE test. However, years ago the courts determined that when a worker is required to live away from home, particularly for extended periods of time, the test should be broader. This gave rise to the bunkhouse rule. The rule has many variations, all of which to one extent or another make the point that under these circumstances, injuries outside of normal working hours can still be deemed compensable, since the requirements of the job "forced" the employee to be in the circumstances which led to the injury. Despite some very unusual results, the bunkhouse rule has never been considered enough of a threat to the integrity of the workers' compensation system in any state to justify legislative intervention. In Alaska, due to the large number of remote work sites, the relatively high number of bunkhouse rule cases and the cost of even a minor injury, some question has been raised as to the continued application of the rule in its present form. However, any attempt at statutory modification of the rule should be undertaken with caution and something less than extreme optimism, because new language means new court tests, with unpredictable results. It may well be the fear of the unknown that has led other states to accept the certainty of existing case law rather than embark on the uncertain path of legislative action and subsequent court decisions.

A major consideration is whether the magnitude of the problem is worth the legislative effort. To date it appears that bunkhouse cases, at least those that raise questions about their propriety, do not constitute a significant expense when compared to the compensation system as a whole. However, they may very well constitute a significant portion of compensation expense for a number of employers.

Another consideration is the implications of modification of the rule. Assuming that a legitimate injury occurs at a remote site, but is not compensable due to the operation of a modified bunkhouse rule, the injured party will almost certainly incur considerable expense in returning to an area where medical treatment is available. There are a number of obvious solutions to this problem, but it cannot be ignored. One should also consider the impact on employers of a modification of the bunkhouse rule. The obligation to provide workers' compensation coverage grants the employer immunity from civil action by an employee only when an injury is compensable. A significant narrowing of the bunkhouse rule will increase the possibility of civil suits, which tend to be more expensive than workers' compensation cases. Given the standards which presently govern the question of liability in civil cases, many "minor" compensation cases could become "major" civil cases. Even the lowly broken tooth suffered during mealtime could find its way to the courts, if caused by a foreign or improper object in the employee's food.

A final consideration is a virtually unverifiable opinion expressed by a number of individuals familiar with the problem that most "abuses" of the bunkhouse rule result from a desire to return to civilization for various purposes and that any solution other than a better leave policy on the part of employers will simply lead to either "abuses" of the new rule or the development of other, equally expensive ways of getting back home.

The list of alternatives is practically endless. The following is a limited range of alternatives all of which can be modified and combined with others to reach the desired conclusion.

1. Limit compensable injuries at remote sites to accidents occurring during actual working hours.

2. Limit compensable injuries to those accidents occurring on the premises of the camp, regardless of the hour of occurrence or the activity engaged in.

3. Limit compensable injuries to those accidents occurring during working hours and those resulting from a special hazard directly related to the conditions of remote site living, such as a fire or weather related incident.

4. Eliminate from the range of compensable accidents those resulting from personal activities such as eating, and/or recreational activities.

MEDICAL BENEFITS

A number of concerns have been expressed, primarily by those on the employer/carrier side, over the impact on costs of the current physician selection mechanism, which leaves the choice of treating physician to the employee. On its face this is a totally appropriate method, but there are a number of competing interests which at least deserve consideration. A factor weighing most heavily in favor of employee choice, a method used by approximately half the states, is that it is the employee who is being treated, and who should be given the opportunity to select physicians he trusts. On the other hand it is the employer who is paying the bills, which leads to legitimate concerns over paying for doctors who may not be the best available, or whose primary reason for selection may be a willingness to give a high disability rating, which in turn may lead to increased compensation benefits. Obviously the employee may have reason to be equally as concerned about an employer/carrier choosing a physician primarily on the basis of a willingness to testify "properly."

Perhaps the most effective solution to this dilemma lies with the Board. Given the small number of health care providers in Alaska, the Board should be well aware of the abilities of each. If a party feels improper treatment is being provided, an expedited hearing will give the Board the opportunity to order a change in treating physician, if necessary. If a physician is consistently one-sided in his testimony, the Board should be able to take this factor into consideration in reaching decisions on questions such as causation and extent of disability. The only potential problem here is with the appellate courts, which in their decisions tend to limit the Board's authority to accept or reject testimony based upon evaluation of a witness's credibility. If the Board is to be encouraged to take steps to minimize problems in medical care, it may be necessary to provide specific legislative direction to the courts, to insure that the Board's authority is not diluted.

The use of physicians in contested cases simply because of their extreme views can also be limited by encouraging the Board to select impartial examining physicians to help resolve medical disputes, and by explicitly relying on experts in whom the Board has a high degree of faith. Once again some legislative direction may have to be given to the courts to permit the Board to accept such testimony in appropriate cases rather than that presented by the litigants. This type of action can send a message to litigants that it does not pay to use medical testimony from witnesses who are biased, and can also result in a moderation of positions taken by medical experts.

In conjunction with the foregoing, there are a number of methods of physician selection in use in various states which can be considered.

1. Pure employee selection, as presently exists in Alaska.

2. Pure employer/carrier selection, tempered by the ability of the employee to apply to the Board on an expedited basis for change.

3. Initial employee selection for a limited period of time, such as ten days, with the employer having the right to change at the end of the period.

4. Initial employer/carrier selection for a limited period, with the employee having the right to change at the end of the period.

5. Employee selection from a panel selected by the employer/carrier.

6 Employer/carrier or employee selection from a panel designated by the Board. This typically involves initial inclusion of all practitioners in the state, with removal from the panel by the Board for cause.

SECOND INJURY FUND

The sole purpose of a second injury fund is to encourage the employment of physically impaired persons, or perhaps more accurately, to minimize the disincentives to their employment. A simple example will clearly explain the theory behind the operation of second injury funds. If an employer hires a worker with no physical impairment, who then loses an eye in a compensable accident, the compensation payable in Alaska for that loss will be for a period of 140 weeks. However, if that individual had suffered the loss of one eye prior to employment, the result of loss of the remaining eye would be permanent total disability, with benefit payments continuing for life rather than 140 weeks. In order to eliminate this financial disincentive to hiring, the Second Injury Fund, as it is used in Alaska, would pay all compensation payments subsequent to the first 104 weeks of disability.

Unfortunately, attempts have been made, sometimes successfully, to use funds as tools to reduce an employer/carrier's liability after the fact, when the preexisting impairment was questionable, or the employer's knowledge of its existence doubtful. This type of improper fund use typically leads to stringent controls which in turn lead employers to question whether the fund will work in their favor even when they act properly. In the face of such uncertainty, it is doubtful that even the best intentioned employer will rely on a fund and consider its benefits when contemplating the hiring of a physically impaired worker. Alaska has suffered from this syndrome and now appears to be in the phase which makes it more difficult to obtain reimbursement from its Second Injury Fund.

If the Second Injury Fund is to serve its purpose, two elements must exist. First, benefits from the Fund must flow only to those employers who hire or retain in employment individuals with significant permanent impairments which would otherwise be an obstacle to employment. Secondly, employers must at the time of hiring be as secure as possible in the knowledge that should an injury occur they will be financially protected by the Fund. Presently, uncertainty exists in Alaska as to both elements, and as a result there is considerable doubt as to whether the existence of the Fund provides much incentive for hiring physically impaired workers.

A relatively simple change in procedure may provide the certainty needed in both areas to make the Fund an effective tool. In order to establish knowledge of the impairment at the time of hiring, the employer of a permanently impaired worker could be required to file a simple form with the Fund, settling that question without a doubt, and precluding "after the fact" attempts to prove the requisite knowledge at the time of hiring. To simplify the filing process, each individual who sustained a permanent impairment in a compensable accident could, when ready to reenter the job market, be given a simple two-part form to present to prospective employers. The form would educate the employer as to the protection offered him by the Fund and would also provide the documentation of employment to be forwarded to the Fund. In such cases the employer would be guaranteed the protection of the Fund, should a subsequent injury occur, and would thus be given the incentive to hire. If necessary, a similar mechanism could be used to provide documentation for employees whose injuries would qualify them for Fund protection in the future but were not the result of a compensable accident.

AVERAGE WEEKLY WAGE

For a number of reasons related primarily to the pipeline, Alaska uses a method of computing average weekly wage which is different than those used in the other 49 states. In determining average weekly wage, and in turn the weekly benefit, the injured employee is permitted to pick the calendar year out of the three calendar years immediately preceding the injury in which total wages were the highest, and then divide by 52 to arrive at an average weekly wage. In some cases, this can result in unfairness to one side or the other. For example, an employer with an injured worker may find himself paying weekly benefits in excess of actual wages because of a high paying job with another employer three years prior to the accident. Similarly, an employee with a new but permanent high paying job may find his weekly benefit a small fraction of wages being earned at the time of injury, because of low earnings in the prior three years. Even for those with consistent annual earnings the rule can work a hardship. For example, a worker in extremely seasonal employment who earns a substantial income while working half the year, and nothing the remainder of the year, will have his earnings based upon a 52 week average. If he is injured and is totally disabled during a portion of the season his actual income loss will be twice as high as the average weekly wage on which the benefit is based.

Due to the impact of seasonality, no solution which is even remotely equitable for all concerned can be found unless the various segments of the benefit system, such as temporary total disability and permanent partial disability, are dealt with separately. Therefore, most of the average weekly wage question will be dealt with in those sections of the report which deal with benefits.

There is one aspect of average weekly wage which can be considered independently of benefits. That is, what elements of remuneration should be considered in determining the amount of pre-injury earnings. In Alaska the major concerns in this category are room and board, and fringe benefits. Conceptually, room and board are to be considered as part of average weekly wage only to the extent that they reduce the amount an employee would have expended for these items if he was not working. For example, with regard to room, if an employee is away from home for a few days, and the employer provides living facilities, there is no reason for the value of the facility to be included in average weekly wage computations. This is because the employee was still paying for his own home or rental while away, and did not experience an increase in net income because of the employer's payments. In the case of the worker who may be at a remote site for many months, and live in a facility provided by the employer, resolution of the question is not so simple. Theoretically, the value of living facilities should be included in the wage calculation only if the employee does not maintain another residence while at the remote site, since if he continued to make mortgage or rent payments at home, there would be no net economic benefit derived from living at the employer's facility. Whether a dual system of this type is acceptable, with employees being treated somewhat differently based upon their living arrangements at home, is a matter that is of purely legislative concern, with each of the alternatives somewhat arbitrary in its application.

The question of board is much easier to deal with, at least as to the initial determination as to whether it should be included in the weekly wage at all. Since a meal provided by the employer means a meal that the employee does not have to pay for, the provision of board will always result in a net economic benefit to the employee, and thereby justifies its inclusion in the wage computation. The value of the meal, as well as the value of living facilities, is another matter.

If it is an accurate assumption that room and board cost more to provide on the North Slope than in Anchorage, the valuation of these items presents a real question. Once again on a conceptual basis, the value to the employee is not what it costs the employer to provide room and board, but rather the amount of net economic to the employee. This requires valuation on the basis of how much would have been spent for these items had the employee remained at home. Obviously theory is of little help in this instance, since applying as esoteric an economic theory as this would create an administrative nightmare. Unless the legislature is willing to leave the question of valuation to contractual agreement or litigation on a case by case basis, legislative action is required. The most efficient mechanism may be to give the Board rule making authority to establish room and board values on a statewide or regional basis, to be included in the average weekly wage computation in appropriate cases. This authority provides a great deal of flexibility, in that changes in economic conditions can be quickly reflected in the rules, and adjustments made without the need for additional legislative or court action.

A much more difficult question is how to treat fringe benefits such as hospitalization insurance and employer-funded pension plans. At the present time, almost by practice rather than case decision, these items are not included in the computation of average weekly wage in Alaska. This occurs despite the fact that a reasonable argument can be made for the proposition that the statute is broad enough to permit their inclusion. The issue is of more than academic interest. If at some point a court holds that fringe benefits must be included in the wage computation, many open cases from past years will be entitled to have the weekly benefit increased retroactively, which would result in an enormous economic impact on employers and carriers. This is in addition to the financial impact such a ruling would have on new cases, particularly in view of the high level of fringes in some employments.

From the standpoint of the worker, fringes which are not continued after injury represent an economic loss, and therefore, a basis exists for the inclusion of their value in weekly wage computation. From the standpoint of the compensation system, their inclusion creates administrative problems (which are not entirely insurmountable) and more importantly would provide most workers with weekly compensation benefits substantially in excess of their take home pay, a situation which may be considered something less than optimum in view of the disincentives which it creates. The arguments on both sides are endless, and if the legislature decides to deal with this question it will hear each and every one. Suffice it to say that virtually every other state has avoided including this type of fringe benefit in the wage computation, except on an isolated basis, and Alaska has managed to operate its compensation system without their inclusion. Unless the state is willing to take on the economic and social problems which would be created by fringe benefit inclusion, the legislature should act to clarify the law and avoid the potential for court decision.

TEMPORARY TOTAL DISABILITY

The purpose of temporary total disability benefits is quite simple. They are intended to replace lost income during the time that the injured worker is recovering and unable to return to work. In most states this is also the easiest type of loss to deal with, by simply replacing a portion of the income lost during the period of total disability, with duration measured primarily from a medical standpoint. However, the impact of seasonality on a substantial portion of the Alaska work force creates a situation which cannot be dealt with by traditional means. Therefore, the following analysis and proposed solution may very well be viewed as radical within the context of existing workers' compensation systems. It may also be the only way to establish equity for those receiving and those paying temporary total disability benefits in Alaska.

As previously discussed, the "best of three" method for determining average weekly wage, and thereby temporary total disability benefits, creates problems for all concerned. If one accepts the proposition that temporary total disability benefits are intended to replace lost income during the period of recovery, then the wage basis used to compute these benefits must reflect the income which would have been earned during this period, rather than the level of income earned three years previously. This can be accomplished more accurately by applying the traditional average weekly wage formula used in a significant number of states. The period of comparision, rather than one of the preceding three years, would be the 13 weeks immediately prior to the injury. If the injured employee was not employed for substantially the whole of 13 weeks, the wages of a similar employee who was so employed are used, and if no similar worker is available, then the average weekly wage would be based upon the contemplated full-time wages of the injured worker. Since workers in seasonal employment tend to be highly paid, use of this mechanism may also require an increase in the maximum weekly benefit, so that the higher paid worker is not deprived of adequate income replacement due to the application of an inappropriate weekly maximum.

Of course there is another side to the coin. For the seasonal worker, this level of income replacement is only proper during the period of time that income would actually have been earned. To take the extreme case, is it correct to provide temporary total disability benefits when the injury occurs on the last day of the job, and recovery takes place during a period of time when the employee would have been receiving unemployment benefits? If the answer is no, then temporary total disability benefits in Alaska should be more closely matched to periods of gainful employment, rather than merely relying on the employee's physical condition, with unemployment benefits replacing workers' compensation benefits during what normally would be a period of unemployment. Obviously this method creates new opportunities for litigation, which may make it unacceptable. The only way to determine if the cure is worth the price is through an open discussion involving those primarily concerned, employees and employers. The answer depends upon the extent to which employees are currently being deprived of proper benefits due to the operation of the existing law, the extent to which employers are currently paying what may be considered excessive benefits during periods of seasonal unemployment, and the difficulties which will have to be overcome if "income matching" is to be accomplished in a significant number of cases.

PERMANENT PARTIAL DISABILITY

In every workers' compensation system the most expensive element, and the most controversial, is that of permanent partial disability benefits. Much can and has been written about the history, development and philosophy of permanent partial disability benefits, and some of it is quite interesting. However, what is necessary at this time is simply an understanding of the various benefit alternatives available for compensating permanent partial disability, a philosophical decision as to the reasons for which Alaska wishes to provide such benefits and, based upon that decision, the development of a mechanism and formula to distribute those benefits appropriately.

Permanent partial disability results when an individual is injured and having recovered to the greatest extent possible is left with a physical problem which did not exist prior to injury. If the condition is severe enough to totally destroy the individual's ability to obtain and retain gainful employment, the result is classified as permanent total disability. What we are concerned with here is that class of cases in which a permanent physical problem exists, but the ability to earn has not been totally destroyed. At this point there are three basic criteria which can be used to determine who is to receive permanent partial disability benefits, and in what amount.

The first theory is based upon permanent physical impairment, and is often referred to as the "whole man theory." Pursuant to this theory, the amount of benefits payable for permanency is determined on the basis of the degree of permanent physical impairment suffered, a purely medical determination, without reference to its effect upon the individual's life, employment or economic status. Assuming equal average weekly wages, a lawyer and a machinist who both suffered equally serious hand injuries would receive the same amount of money for their injuries, despite the probable difference in economic impact.

The second theory deals with loss of wage earning capacity, which takes into consideration not only the degree of physical injury, but also its probable impact on the ability of the individual to earn a living. This requires that in the event of a dispute, the fact finder must predict, usually quite soon after release from active medical care, what effect the injury will have on the individual's ability to compete in the open labor market. The test does not require any economic loss to occur and in fact, because the concern is with loss of capacity, a substantial award for partial loss of that capacity is in no way inconsistent with a factual situation in which the employee remains with the same employer and on the same job track until normal retirement, with no economic loss resulting from the injury. Typically, if this prediction, which usually takes the form of an award, proves wrong, nothing can be done to modify it in the absence of a change in the employee's actual physical condition.

The final alternative for paying permanent partial disability benefits is what is commonly known as the "wage loss" method. This system involves paying benefits based solely upon actual loss of income resulting from the effects of an injury, with the amount of the loss determined as it actually occurs, rather than on a "prediction" basis as would take place under the earning capacity loss theory described above.

Alaska follows a pattern used in well over half the states, with a few unique twists, starting with a combination of the impairment theory and the earning capacity loss theory. If a permanent injury is limited to a[illegible] of the extremi-

ties (fingers, toes, hand, leg, etc.) or the eye or hearing, the amount of the benefit paid is based solely upon the physical impairment sustained, which in turn is based almost solely upon medical evaluation of the loss. The actual benefit calculation is accomplished by first determining the workers' weekly benefit rate, which is 66 2/3% of his average weekly wage, subject to a maximum of $942 per week. Sec. 23.30.190 of the Act is then consulted, which contains a schedule indicating the weeks of benefits, at the rate just described, for total loss or total loss of use of the particular bodily member involved. For example, total loss of an arm results in benefits being paid for 280 weeks, at the individual's weekly benefit rate. If the loss is less than total, the worker is paid benefits for the proportionate number of weeks. For example, a 50% loss of use of the arm would result in benefits paid for 50% of 280 weeks or 140 weeks. This method of benefit computation, known as "the schedule", is used to one extent or another in most states in the manner just described, but Alaska has complicated the picture to some extent by adding another limitation, that of a maximum dollar amount. For example, while the loss of an arm is theoretically 280 weeks of compensation, it is also subject to a dollar maximum of $43,680.00. This means that anyone whose weekly benefit is in excess of $156 (over 75% of injured Alaskan workers) will not receive the full 280 weeks provided initially by the statute. In fact, the average injured worker will only receive 136.5 weeks of compensation for total loss or loss of use of an arm. The same result holds true, within a few dollars and a few percentage points, for all of the other injuries covered by the schedule.

For those injuries not covered by the schedule, primarily back and head injuries, the benefit is based upon loss of wage-earning capacity, which is determined by computing the difference between earning capacity prior to injury and after injury, and replacing 66 2/3% of the difference, on a weekly basis. Theoretically these benefits are payable for life, but in reality are subject to a maximum dollar amount of $60,000.00. Although, as previously mentioned, earning capacity loss does not require actual loss of earnings, the Alaska statute does require that determination of the amount of loss in the first instance be accomplished by considering actual post injury earnings, but if actual earnings are found not to "fairly and reasonably" represent earning capacity, other factors can be considered, and an award made which is at variance with the actual economic loss sustained. Application of this "adjustment factor" varies from time to time, primarily due to changes in the philosophy of the Board, which must determine the degree of loss in contested cases. At the present time, the Board appears to place heavy reliance on actual earnings, and in many instances applies the law in a manner approaching that of a wage loss system, with benefits determined on a weekly basis as actual loss of income occurs.

Each of these methods contains a number of flaws, in both the amount of benefits which may be paid to an individual worker, and in the problems inherent in determining the amount to be paid. From the standpoint of getting the money to the people who need it, the impairment method is the weakest of the three. Historically, workers' compensation has placed major emphasis on paying benefits to replace economic loss, and since the schedule or impairment method does not consider economic loss at all, it misses the mark in most cases. Its primary justification is ease of application, since there is supposedly very little to argue about when determining the extent of physical impairment. However, it has been found that it is relatively easy to locate doctors who will be 20 to 30 percentage points apart when evaluating the same injury, and as a result use of a schedule does not guarantee an absence of litigation.

It is possible to minimize these shortcomings in two ways. First, if guidelines are adopted for the determination of the extent of impairment, such as those published by the American Medical Association, it is relatively easy to avoid significant disagreement among medical experts. Secondly, some degree of economic reality can be incorporated in the schedule, as is done in California, by modifying the weeks to be paid in a number of ways. On the assumption that the economic impact of an injury increases geometrically, rather than proportionately as severity increases, the schedule can be "stepped" so that one week of benefits may be payable for each of the first 10 points of impairment (1-10% impairment), two weeks paid for each of the next 10 points, three weeks for each of the next 10, and so on. In this manner an individual with a 10% loss of use of the arm would receive 10 weeks of compensation and someone with a 20% loss would receive 30 weeks, reflecting an assumption, of limited validity, that the economic impact of a 20% loss is more than twice as severe as that from a 10% loss.

The weeks payable can also be modified to take into consideration other factors such as age, type of occupation (physical vs. sedentary), and amount of education, with a percentage increase or decrease in the rating depending upon the answers given to relevant questions contained in a rating formula. Obviously this significantly increases the liklihood of litigation, so that a price is paid for attempting to make the schedule more economically realistic.

Use of a schedule basis raises an interesting question as to the development of average weekly wage, particularly if an unmodified schedule based totally on physical impairment is used. Since economic impact is being ignored, there is no reason to tie the amount of benefit to average weekly wage. The fact that one worker makes more than another does not mean that his arm is also "worth" more, and in fact the opposite may be true. As a result, if an impairment schedule is used, the amount of benefits to be paid can be established legislatively as a specific dollar amount for each loss, to be paid in every case regardless of the individual's earnings.

Application of an earning capacity loss system also presents a number of problems, primarily on the operational side. From a philosophical standpoint, it more closely follows the basic workers' compensation premise of dealing with economic loss, although as previously described it is entirely possible to pay benefits for loss of capacity in cases in which no actual economic loss ever occurs. In fact, the few studies which have been undertaken tend to show that only a minority of cases demonstrated significant economic loss several years after injury, although in most of those cases the loss was significant.

Another finding from these studies demonstrates a more serious problem with earning capacity loss systems. For most of the cases with significant losses, the compensation paid was totally inadequate to deal with the economic loss incurred, while in the remaining cases the amount of compensation paid was far in excess of the loss. This resulted primarily from the fact that the award must by its very nature be a prediction, and an estimate, a task which is probably beyond the ability of mere mortals. There are simply too many variables determining the effect an injury may have on a given individual, and attempts to make the award fit the case are something less than accurate. Also inherent in this uncertainty is the need for lawyers and litigation in order to arrive at a "correct" decision. Since a determination of loss of earning capacity is strictly a judgment call, a claimant would be foolish to simply accept a determination made by the employer/carrier, and would be equally foolish to go before the Board without an attorney to present his case. Unfortunately there is little that can be done to eliminate these problems without virtually switching to another benefit system.

For purposes of determining loss of earning capacity, the computation of average weekly wage should simply reflect a realistic and established preinjury earning capacity. Since in this type of system we are not concerned with matching benefit payments with actual loss of income, it is possible and preferable to base the wage on average earnings for a recent but extended period of time, such as the previous twelve months. Given a willingness to accept the opportunity for additional litigation, the Board could be given the authority to modify the figure arrived at in this manner, if it can be established that because of extraordinary circumstances the figure is significantly high or low.

The third and final alternative is a wage loss system. In its purest form, it provides benefits only in the event of actual loss of income attributable to the injury. This immediately raises a question as to its fairness, since in the extreme case an individual who suffered a loss of limb but was able to return to full employment would receive nothing in the way of benefits for his injury. While this may not be inconsistent with historical workers' compensation philosophy, it does leave a great deal to be desired when applied in real life. This problem can be cured by paying an impairment award, preferably limited to serious injuries, regardless of any wage loss benefits which may also be due.

Another problem may result from comparing preinjury wages with inflated post-injury wages, an obvious inequity. This can be limited to a great extent by adjusting the comparison to take into consideration the change in wage rates through time, although given the experience under the Longshore Act, it is questionable whether an unlimited adjustment would be acceptable.

For Alaska, use of a wage loss system would raise two very significant questions. First, a wage loss system can only be successful, from a cost standpoint, if the great majority of workers can be returned to jobs which pay the same or almost the same as those held at the time of injury. If the frequently heard statement that "there is no light duty in Alaska" is true, adoption of a wage loss system would be an economic disaster. Similarly, if union rules are so strict that a worker with a permanent injury cannot be given preferential treatment in obtaining work within his capabilities, the ability to return people to gainful employment would be greatly reduced, and the benefits of a wage loss system eliminated.

Secondly, serious consideration must be given to the system's ability to determine when an income loss is "due to the injury" rather than some other factor, such as the end of the season. As in the case of temporary total disability, use of a wage loss system depends on matching benefit payments with actual economic loss, so that factors such as end of season, a return to a state with lower wage levels, and an individual's desire to reduce his workweek must all be taken into consideration in determining wage loss. If this cannot be accomplished with a fair degree of accuracy, the system would be a total disaster.

While research is continuing in an attempt to determine the ability of Alaska employers to return injured individuals to the workplace, in the final analysis a decision on these potential problems can only be reached by joint labor/management discussions. It is doubtful that anyone else can or should determine whether this type of system can be used effectively in Alaska and without their concurrence an attempt to implement a wage loss system would probably result in economic disaster.

If a wage loss system is adopted, the computation of average weekly wage would closely follow that recommended for temporary total disability. The wage base should reflect the weekly wages actually earned during the period of employment, whether it be six months or a year, so that the comparison of pre- and post-injury wages will reflect the actual loss incurred. Therefore, a 13 week average, or something in that range, would be appropriate, with the safeguards described in the temporary total disability section.

PERMANENT TOTAL DISABILITY

Statistically, permanent total disability benefits do not constitute a significant proportion of the overall cost of workers' compensation in Alaska, although the state does rank sixth nationally in frequency of permanent total cases. This does not mean that permanent total disability does not significantly impact on the compensation system. Its importance is hidden to a great extent, because its effects are felt in the area of permanent partial disability benefits. This is due to the threat of a case becoming a permanent total, with lifetime benefits and no dollar maximum, which results in cases being settled at levels approaching their maximum permanent partial disability value, $60,000.00, instead of being litigated, and possibly resulting in a finding of total disability.

As mentioned previously, permanent total disability occurs in those circumstances in which the injury is so severe as to totally destroy, for all practical purposes, the ability of an injured worker to obtain anything other than intermittent and financially insignificant employment. In cases in which the physical injury is severe, there is usually no question as to the individual's entitlement to total disability benefits. However, of concern to the Alaska compensation system is the worker who retains relatively substantial physical abilities, but claims to be or is actually unable to work because of the limited job opportunities in the area. For example, should an injured worker who cannot find employment in Eagle, where he lives, have his workers' compensation status determined on the basis of Eagle alone, or should the availability of suitable employment in other parts of the state be considered? And if there is no suitable employment in Alaska for someone injured shortly after moving to the state, or who has indicated in some manner that working in Alaska is temporary rather than permanent, should employment opportunities in the lower 48 be considered? Again there is no correct answer, only issues that are appropriate for legislative decision on a policy basis.

At the present time the statutory provision dealing with permanent total disability, Sec. 23.30.180, provides virtually no indication of the factors to be considered in determining total disability status. This is left to the courts, and results in a great deal of uncertainty as to the possible outcome of individual cases. Although no statute can eliminate the potential for court involvement, the legislature can create a great deal more certainty by enacting amendments to Sec. 23.30.180 which provide clear policy guidelines to those who must apply the law.

WCCA

Position Paper

SECTION I: LEGISLATIVE CHANGES

MAXIMUM BENEFITS:

Currently, maximum weekly benefits allowed under Alaska Law (AS 23.30.175) are based upon 66-2/3% of actual wages, but never more than 167% of the average weekly wage in the state. In 1981, the average weekly wage factor will increase to 200%.

This formula does not recognize that workers whose salaries are much higher than the state average weekly wage have considerable discretionary income.

WCCA POSITION: that the following benefit schedule be used in place of the current method of calculating benefits:

1. 66-2/3% of wages up to 150% of the average weekly wage, PLUS,
2. 40% of wages falling between 150% and 200% of the average weekly wage, PLUS,
3. 20% of wages falling between 200% and 300% of the average weekly wage.
4. No benefits for wages in excess of 300% of the average weekly wage.

The following table shows what will happen to benefit payments based upon a $393 average weekly wage under the current formula using the 200% factor to be applied in 1981. To the right is the benefit payment indicated by the recommended new formula.

WEEKLY WAGE Time of Injury	WEEKLY BENEFIT Existing	WEEKLY BENEFIT Proposed
$ 200.00	$133.00	$133.00
393.00	262.00	262.00
600.00	400.00	397.00

$ 800.00	$533.00	$475.00
1,000.00	667.00	515.00
1,179.00	786.00	550.00

PERMANENT TOTAL DISABILITY:

Based upon medical facts and the worker's occupation, an injured worker may be classified as having a permanent injury. Permanent injuries are then further distinquished as being totally disabling or partially disabling, and long term wage loss benefits are paid accordingly.

Currently a worker can be classified as totally disabled rather than partially disabled in two ways: One (1) Automatically presumes a worker to be totally disabled if he/she loses both or any mix of two hands, arms, feet, legs or eyes, and Two (2), a determination is made of the actual facts of the injury case in question.

Actual case histories show that some workers who have lost the use of two or more limbs can, and have, returned to their former employment successfully.

WCCA POSITION: that the Alaska Statue (AS 23.30.180) which automatically presumes a worker to be totally disabled be repealed and (second) that an actual case by case determination sha establish the level of disability of the injured.

PERMANENT PARTIAL BENEFITS-UNLIMITED

Currently, a worker with a permanent partial injury can collect benefits for an unlimited period of time. This results in a loss to the workforce for workers who can return to some form of work but are not encouraged to do so since benefit payments continue.

WCCA POSITION: that a worker with a permanent partial injury be entitled to benefits for a thirty-six (36) month maximum period. To receive benefits beyond thirty-six (36) months, the worker must qualify for a permanent total disability status, in which case benefits would extend for life.

AVERAGE WEEKLY WAGE CALCULATION

When calculating the wage loss benefit payable to an injured worker, an average weekly wage is determined by finding the highest annual wage earned by the worker in any one of the three years prior to injury and dividing that total by fifty-two (52). As a result, wages earned during a "boom" period over the last three years can significantly increase the wage loss benefit payable to the injured. That benefit may be even greater than the worker's wages at the time of injury.

WCCA POSITION: AS 23.30.220 One (1) be amended to read as follows, "The formula for calculating average weekly wage be the total of the injured worker's preceding years wages (including self-employment wages) divided by fifty-two (52)."

FILING TIME LIMITATIONS

The time limitation (AS 23.30.105) for filing a Workers Compensation Claim in Alaska is as follows:

A. Within one year after job-related death
B. Within two years after knowledge of a job-related disability
C. Within two years after the last compensation payment
D. No time limit for latent injuries (example-asbestos related cancer).

Those (above listed) limitation are signifcantly broader than those of other states.

WCCA POSITION:

A. No change
B. No change
C. An injured must file within one year after the last compensation payment (for a recurring/disabling injury).
D. No change

OFFSETS TO WORKER'S COMPENSATION BENEFITS

Current law allows for duplication of benefits in some instances. Although these situations are rare, the law should be amended to prevent benefit duplications.

1) If a worker is receiving unemployment benefits and files a worker's compensation claim (for an on-the-job injury), he can legally collect both benefits.

WCCA POSITION: that if worker's compensation benefits are currently being paid, then unemployment benefits should cease. It is the intent of the law that benefits are intended to pay wagge loss only for the period of time a worker is unable (due to injury) to work.

2) It is possible for an injured worker to collect both sick pay benefits and worker's compensation benefits for a short period of time.

WCCA POSITION: that the sum of these weekly payments be limited to 100% of the worker's wage, with the worker's compensation benefit being paid first.

3) An injured worker may currently collect retirement benefits to which he/she is entitled in addition to worker's compensation benefits.

WCCA POSITION: that worker's compensation benefits be reduced by the amount being paid in retirement benefits.

CHOICE OF PHYSICIAN

In order to ensure quality medical treatment and to contain costs at the same time, the treating physician should give direction to the injured worker's care. Alaska's liberal policy of free and open choice of physicians sometimes result in duplicate treatment, lack of coordination between treating physicians and specialists, or an occasional "shopping spree" by the injured for the elusive "cure" to pain. A malingering worker may search for a physician who will support his claim to injury.

With exceptions (which follow), the employer or insurer should be allowed to provide an injured worker with a list of at least two physicians in the geographic area for treatment. These physicians should be specialists (where necessary) based upon the nature of the injury. They should not be selected based upon their fees charges, but on their interest in the industrial injured and desire to provide efficient medical services to return the work to a productive life.

The exceptions to the use of physicians as described above are twofold:

1. If an injured worker has seen a family physician or a physician in the specialty required to treat his injury in the prior twelve (12) months, he may be treated by that physician.

2. If the injured worker is not responding to treatment or is otherwise dissatisfied with the first selected physician, he may choose another physician from a list of three other physicians in the geographical area. This list will also be provided by the employer or insurer.

WCCA POSITION: sufficient change in the law to reflect the preceding statement and/or policies.

PAIN CLINICS

In addition to the pain associated with an injury during treatment and healing, pain often persists after complete healing in the form of chronic or "learned" pain behavior. To the worker experiencing such "learned" pain, it is real and often prevents the worker from feeling prepared to return to work.

Pain clinics existent in Alaska have developed techniques for treating such pain. The Worker's Compensation Board and the adjustors of insurers should be encouraged to utilize pain clinics to eliminate any significant extensions of benefit payments period, and costly, time-consuming legal arguments over the preparedness of a worker to return to work.

WCCA POSITION: that the applicable Alaska Statutes be amended to reflect the above position.

HEARING REPRESENTATIVES

The role of the Worker's Compensation Board is to expedite the resolution of disputes between the injured and employers of their insurers. This system in intended to provide rapid and fair determination on the factual issues being disputed.

It is intended that the Board itself be a point of initial review of disputes and cases can later be appealed to Suprior or a higher Court. Often there is no need for either party to be represented by counsel. However, a large per cent of disputes heard by the Board involve attorney representation.

It would be determined that when appearing before the Board the injured needs to be or not to be reprensented by counsel. The insured should be encouraged not to utilize counsel but rather hearing representatives (trained claims people). In short, a fairness in adequacy of representation should be examined, and procedures at the hearing be established. Better hearing procedures can and should result in a significant expense savings due to reduced attorney costs for both employer or insurer and the injured.

WCCA POSITION: that the appropriate Alaska States be changed to reflect the preceding statements and opinions.

EXTRAORDINARY CONSTRUCTION

The development of the Trans Alaska Pipeline System resulted in a tremendous increase in the number of workers in the sate. In addition, wages paid to many workers were much higher than those previously paid. Worker's Compensation claims costs for pipeline development injuries were much higher than for other work-related injuries in Alaska during 1977 and 1978. The cost of all pipeline injuries included in loss experience data supplied to the Division of Insurance for company premium rate purposes drove the cost of all insurance for all Alaska employers to a new high.

If another extraordinary construction project (Alaska-Canada Gas Pipeline or the Capitol Relocation) occurs in the future, the Division of Insurance should segregate the actual premiums

and losses of this (these) project from other Alaska experience. This will allow other employers in the state a fair rate from which to pay benefits to the injured worker.

WCCA POSITION: that the applicable Alaska Statutes be amended to reflect the above position.

SECTION II: ADMINISTRATIVE CHANGES

COMPROMISE AND RELEASE AGREEMENTS

A permanently and totally disabled worker will receive wage loss benefits and medical expense payments on a continuing basis unless the worker and the employer or insurer agree to a compromise and release agreement in a lump sum payment in lieu of weekly wage loss benefits.

Currently, compromise and release agreements are not permitted on the future medical expense portion of benefits.

WCCA POSITION: that such agreements be allowed on medical expenses with approval of the Worker Compensation Board to ensure that the settlement amount is in the best interest of the injured worker.

PHYSICIANS' FEES

Physicians treating injured workers often incur additional costs to provide employers or insurers with written reports on the treatment given. These costs are passed on as additional fees which is appropriate and equitable. However, there are not adequate means of limitation on the many fees charged by different physicians for the identical services.

WCCA POSITION: that the Division of Worker's Compensation accumulate and publish "average or customary" fees charged for specific treatments by physicians. This publication should be used to evaluate the propriety of fees charged for worker's compensation injuries.

DELAYS IN HEARINGS AND RULINGS

The Division of Worker's Compensation has not been provided a sufficient budget to staff the Board sufficiently to expedite hearings and rulings. As a result, a worker can be without income for extended period of time until the backlog before the Board is cleared. Disputes between workers and employers or insurers over benefits must be resolved quickly to prevent any undue hardship.

WCCA POSITION: that the Division of Worker's Compensation should be funded to hire additional qualified (as needed) hear- officers to expedite decisions. It is further recommended that initial hearings should be conducted by one hearing officer and that appeals should be presented to the entire Board in a timely manner.

BROCHURE

Small employers and most workers within the state do not have a clear understanding of the benefits and responsibilities accruing from the Worker's Compensation Laws in Alaska. This is tre in almost all other states as well.

The State of California has addressed this problem by developing an easy-to-read brochure for workers describing the benefit plans, claim filing procedures, grievances and differences with insurers. Although voluntary, insurers have provided these brochures to insured employers for distribution to workers.

WCCA POSITION: developing and distributing such a brochure (voluntary) in Alaska will improve the knowledge of workers

regarding the benefits and procedures applicable under Alaska Worker's Compensation Laws. This should result in reduced hearings to resolve compensation disputes and also reduce the need for attorneys costs on behalf of injured workers unsure of certain legal rights.

SELF INSURANCE

Self-insurance is a legitimate means for a large organization to provide benefits to injured workers directly from the assets of the company or corporation rather than purchasing insurance coverage from an insurer. The Worker's Compensation Division is granted the authority to approve self-insurance plans but lacks the staff and technical knowledge necessary to evaluate the ability of a self-insured organization to absorb the cost of claims. Without appropriate evaluation, there is a substantial risk that an organization will not be able to fulfill its financial responsibilities to the injured.

WCCA POSITION: that the Worker's Compensation Division develop a unit to monitor activity and effectively regulate self-insured organization to ensure that injured workers will receive all benefits due them.

CASH FLOW PROGRAMS

A Cash Flow Program is an alternative to self-insurance enabling the large employer to reimburse the insurer for all claims costs whenever those costs are paid. Re-insurance is usually purchased for costs exceeding a specific amount, (usually $100,000.00 or more) on any one claim.

Under this concept, premiums are not paid to the insurer until after the claims payments have been made. The employer (by irrevocable bond or bank letter of credit) is generally required to guarantee payment of premiums when due.

Currently, the State of Alaska does not allow premiums receivable (under Cash Flow Programs) to be included in the assets of an insurer.

WCCA POSITION: that the Division of Insurance develop regulations which will allow Cash Flow Programs to be utilized as outlined above by large employers and insurers.

HEALTH CARE INSURERS

Large employers must administer plans for health and disability insurance through Health Care Insurers. Worker's Compensation on the other hand, is administered through Casualty Insurers. Large employers may also utilize self-insurance plans.

Employers are not presently permitted to utilize Health Care Insurance for the purchase of Worker's Compensation insurance. Although there is not assurance that cost savings may result from combining health and disability insurance and Worker's Compensation insurance into a single plan with one insurer, employers should be allowed an opportunity to pursue such combined insurance plans.

WCCA POSITION: that the Division of Insurance develop regulations permitting coverage as outlined above on a combined basis.

ACCIDENT YEAR STATISTICS

The National Council on Compensation Insurance (NCCI) is a

statistics gathering organization licensed by the Division of Insurance. NCCI computes Worker's Compensation costs in Alaska and proposes premium rate levels for each of the (approximately) five hundred (500) classifications of work activity. Each insurer is required to submit its Worker's Compensation data for Alaska to the organization on a timely schedule.

The NCCI currently uses two methods to record and analyze Worker's Compensation experience:

A. POLICY YEAR DATA: using this method, premiums and cumulative losses attributable to claims occurring during a particular policy year are then collected (over time) to provide indications of necessary rate changes.

B. CALENDAR YEAR DATA: using this method, premiums collected and claims costs incurred during a calendar year are reviewed to provide indications of necessary rate changes.

Policy year data is considered more accurate than calendar year data. Calendar year data however, requires a period of at least eighteen (18) months for an accurate picture of loss payout, (for a twelve (12) month period). Claims remaining open after eighteen (18) months must continue to be reported by insurers for each year they remain active.

In 1977, a study conducted by order of Legislative Affairs Agency recommended that a third method of analyzing experience be used, the accident year method. Experience in other states shows that the accident year method is more accurate than the calendar year data and more recent than policy year data.

WCCA POSITION: that the Division of Insurance direct the NCCI to accumulate accident year data and to utilize this data for premium rate level analysis in lieu of any other method.

SAFETY GROUPS

Employer trade associations can reduce their insurance costs through the effective use of safety groups. Under the Safety Group Concept, employers may purchase needed insurance through one insurer and receive a portion of the profit as returnable premiums or dividends should the experience warrant same. In the event the group has been unprofitable for the insurer, additional charges would result. The Trade Association would aid in monitoring and promoting safety programs for member employers to reduce costs through fewer or less serious injuries.

Safety Groups are more common in other sates, and have been a benefit to the consumer insurance market.

WCCA POSITION: that industry Trade Groups investigate and explore opportunities for Safety Group Programs more fully for use in Alaska.

ASSIGNED RISK POOL SERVICING CARRIERS

Currently, insurers who act as servicing carriers for the assigned risk pool are paid 37.5% of assigned risk premium for the expense of handling assigned risk accounts. Rates developed for voluntary risks, however, reflect an allowance of 31.6% of premiums.

WCCA POSITION: that the Division of Insurance reduce the expense allowance for assigned risk pool servicing carriers to the per cent allowed for expenses for voluntary risks; currently 31.6% of premiums.

SECTION III: SECOND INJURY FUND

SECOND INJURY FUND

The term "second injury" classifies a worker's injury as the result of a pre-existing impairment from a prior work-related injury.

A Second Injury Fund exists in Alaska to pay the benefits for second injuries after a period of one hundred four (104) weeks. The funds to pay these benefits are contributed by insurers and for each permanent partial injury benefit paid (for second injury), an additional eight per cent (8%) surcharge is paid into the Second Injury Fund.

The purpose of the Fund is to encourage the hiring of previously disabled workers by funding the long term costs of a second injury, should it occur.

Review by claims adjustment personnel and Second Injury Fund Management, indicates some question as to the ability of the fund to pay potential claims.

WCCA POSITION: that rather than increasing the surchage which in turn increases premium rates, general fund revenues should be utilized for anticipated costs which exceed current surcharge premium levels.

MEDICAL EXPENSES UNDER SECOND INJURY FUND

Currently only wage loss payments are covered by the Second Injury Fund. However, there is no clear evidence as to the reason for non-inclusion of medical expenses to be paid from the fund.

WCCA POSITION: that medical expenses be covered by the Second Injury Fund for any claims which otherwise meet the criteria for Second Injury Fund Payment.

SECOND INJURY FUND, FIRST INJURY PROOF

In order to use the Second Injury Fund, an employer or insurer is required to show written evidence of a prior injury before the second injury occurs. This results in additional costs to screen, document and preserve the medical history of all injured workers.

WCCA POSITION: that the employer or insurer not be required to prove written documentation preceding the second injury. If the above can prove the existence of a prior injury at any time before or after the second injury, then use of the Second Injury Fund shall be allowed.

LUMP SUM SETTLEMENT FROM SECOND INJURY FUND

WCCA POSITION: that the Second Injury Fund be allowed and be properly funded to make lump sum reimbursements to any carrier or employer who provides a lump sum payment to an injured worker, this to include self-insured as well.

HB 159/SB 179
Section by Section Analysis

Section 1-2. Section analysis by the Department of Commerce and Economic Development, Division of Insurance.

Section 3. This section prevents discriminatory employment practices on the part of employers towards employees who have filed a claim for workers' compensation benefits. The same prohibition is cross-referenced in AS 23.30.263 under Section 61.

Section 4-7. Section analysis by the Department of Commerce and Economic Development, Division of Insurance.

Section 8. This section adds an additional panel to the Alaska Workers' Compensation Board which may sit in any judicial district in the event regular panel members are unable to attend scheduled hearings. Members of the board, except the Chairman or his designees, are citizens appointed pursuant to AS 23.30.005 and at times have scheduling conflicts with their own occupational duties. The amendment will insure that disputed claims are heard expeditiously by a full board panel and will provide the resources to conduct additional board hearings when the workload requires.

Section 9-12. The term "benefits" is substituted for "compensation" to achieve consistency throughout AS 23.30 in conformity with court and board interpretations. The term "benefits" is defined in AS 23.30.265(28) under Section 66 to mean "compensation and medical and related benefits." The definitions for "compensation" and "medical and related benefits" already exist under AS 23.30.265(8) and (16). This amendment will clarify current misunderstandings in interpreting these terms.

Section 13-14. Section analysis by the Department of Commerce and Economic Development, Division of Insurance. Section 14 also includes substitution of "benefits" for "compensation" where applicable

Section 15. The repeal and reenactment of AS 23.30.040 is necessary if the second injury fund is to continue to meet its statutory obligations to rehabilitate the injured and disabled worker and to reimburse employers/carriers on subsequent injury claims.

This section expands the base for contributions to the second injury fund and incorporates a contribution schedule which will insure the solvency of the fund. It changes the base for payments to the fund from permanent partial disability to permanent total, permanent partial, temporary

total and temporary partial disabilities. Under Section 69, an initial contribution rate of 6 percent is established, which will build reserves before a sliding rate scale takes effect in 1983. It also allows a more realistic maintenance allowance of $200 a month and total maximum expenditures for retraining to $10,000 in order to adequately cover the inflationary rise in expenses encountered for rehabilitation or retraining. The section also transfers the administrative expenses of the state from the resources of the second injury fund to the general fund.

Section 16-17. Substitution of "benefits" for "compensation" where applicable.

Section 18. This section allows placement of disabled employees who are being rehabilitated for gainful employment into work situations where the employer is willing to pay some wages to the trainee but does not want the risk of new injury to the handicapped person and the consequent increase in employer's insurance premiums; or if no other employees, having to obtain workers' compensation insurance just for the trainee. Successful rehabilitation will result in getting the handicapped employee back to a self sustaining, tax paying citizen of the state and is worth the investment by the state in accepting the risk of his being re-injured while learning a new occupation. This amendment will also encourage employers to pay wages to the trainee and reduce costs to the rehabilitation agency sponsoring the trainee.

The section also permits the Department of Labor to place eligible persons in rehabilitation programs with an employer in the event a request is not made through the office of vocational rehabilitation.

Section 19-20. Section analysis by the Department of Commerce and Economic Development, Division of Insurance.

Section 21-26. Sections include substitution of "benefits" for "compensation" where applicable and analysis by the Department of Commerce and Economic Development, Division of Insurance.

Section 27. Adds a subsection which stiffens the penalties to employers who fail to insure or provide security for workers' compensation liability to their employees and provides the Board with the means to enforce that statutory requirement through stop order authority. Failure to enforce the requirement that all employers secure liability for workers' compensation results in a disparity to the employer who does insure and must figure the costs of insurance into his costs of doing business and forces the injured worker to rely on medical care and funds from public assistance programs.

Section 28-30. Section analysis by the Department of Commerce and Economic Development, Division of Insurance. Also includes substitution of "benefits" for "compensation" where applicable.

Section 31. This section deletes wording which makes it necessary for an injured employee to appeal to the Alaska Workers' Compensation Board if the need for medical treatment due to work injury extends beyond two years. The board has repeatedly held that if continued medical treatment is required due to the injury, the costs should be paid by the employer's insurance carrier regardless of whether the need for medical treatment has lasted for over two years, yet, some adjusters continue to stop medical costs and advise the employee that the law provides for only two years of medical coverage. The employee then either hires an attorney or petitions the board for help and often the matter must be heard and ruled on by the board before the carrier will pay additional medical costs. As a result the board is required to hold unnecessary hearings, the carrier incurs unnecessary attorney fees and the general costs of the workers' compensation program is unnecessarily increased.

The section also deletes wording that requires an employee, if he wishes to change doctors, to do so "in accordance with rules prescribed by the board." The board is adverse to setting out rules, which would in any way, hamper the recovery process or the employee's right to the selection of the treating physician. If the employee abuses this right, the employer/carrier may seek relief through board hearing.

Section 32. This section encourages prompt reporting of treatment by doctors treating injured workers. Some doctors now file a report of first treatment but fail to notify the carrier of follow-up treatment. When the doctor gets around to billing some months later, the bill is considerable. Some doctors have continued to treat an employee after sending a first report indicating further care was not necessary, or would be minimal. By the time the carrier gets a bill and a follow-up report, the bill is for many hundreds of dollars. This change will also provide the board and employer/carrier with the current medical status on the employee so that his progress can be better monitored.

Section 33. This section deletes language left over in the Act from the days when the employer selected the physician. Experience has shown that the employee never exercises this right except upon the urging of his doctor or attorney. This situation delays resolution of disputed claims and allows some doctors to unnecessarily increase the costs of workers' compensation while they stand around watching another doctor perform an examination of an injured worker. This process is duplicative, involves at least 4 parties and wastes time. Section also includes substitution of "benefits" for "compensation" where applicable.

Section 34-36. Substitutes "benefits" for "compensation" where applicable.

Section 37. This section deletes ambiguous language which is the result of incomplete amending in 1962 to the statute of limitations provision for filing a claim.

In W. R. Grasle Co. v. Alaska Workmen's Compensation Board, 517 p.2d 999 (Alaska 1974), the Supreme Court found no time frame in which the four-year statute may operate subsequent to the 1962 amendment.

The section also includes substitution of "benefits" for "compensation" where applicable.

Section 38-40. Substitutes "benefits" for "compensation" where applicable.

Seciton 41. This section provides realistic time frames in the board hearing process and rids the statute of board authorization to rule on a claim without benefit of the parties to be heard. The change from 10 to 20 days for service of notice of hearing will allow sufficient time for the parties to properly prepare the case for board hearing, thereby reducing the number of continuances or further hearings, and will enable conformance with 8 AAC 45.070(b). Due to the time required for the board to adequately research the difficult legal issues involved in many cases and the geographic separation of some members, the board has consistently been unable to comply with the statutory requirement of 20 days for issuance of its written decision and order. The change from 20 to 30 days is proposed to grant sufficient research time for the board to set forth its findings and conclusions according to proper statutory criteria, thereby reducing the number of hearings resulting from remands or requests for modification of award, and to allow additional time for the order to be sent to the board members for their review and signature.

The section also deletes the portion of the provision authorizing the board to rule on a claim without benefit of hearing. This portion has never been used by the board as it precludes the right of the parties to be heard or the opportunity for cross-examination on the issues of the claim.

Includes substitution of benefits for compensation where applicable.

Section 42-45. Substitutes "benefits" for "compensation" where applicable.

Section 46. The amendments in AS 23.30.155 are essentially "housekeeping" changes and are aimed primarily towards reducing litigation and administrative delays in processing claims. These changes address serious problems or gaps in the Act which mislead or confuse employees, employers, and insurance carriers and which result in needless litigation. This section 1) clarifies a controverted claim and the requirements under which a notice of controversion must be filed; 2) requires notice be filed with the board whenever payment of compensation has begun, terminated or changed and provides penalties for failure to file such notice; 3) includes substitution of "benefits" for "compensation" where applicable; 4) requires board approval for reimbursement of advance payments or overpayments of compensation from unpaid installments; 5) requires that compensation be paid by a check or draft which may be immediately cashed; 6) authorizes the board to order lump sum payments for both scheduled and unscheduled permanent partial disabilities under AS 23.30.190, whenever it is in the interest of the injured employee and will not cause substantial hardship to the employer (the board currently is authorized to order lump sum settlements for unscheduled permanent partial disability under AS 23.30.190(20)); and 7) requires periodic reporting of all payments made on claims which will be used to provide the public and private sectors with current and accurate injury statistical data.

Section 47-49. Substitutes "benefits" for "compensation" where applicable.

Section 50. This section changes the method by which the average weekly wage is determined in all jurisdictions for purposes of computing compensation and provides for a consistent and equitable means to adjust compensation rates for claims being paid to out-of-state recipients.

Section 51. This section clarifies the rules under which compensation rates are adjusted for recipients not residing in Alaska consistent with legislative intent and regulations, insures adequate benefit levels for those recipients and provides for an annual adjustment in the compensation rate commensurate with changes in average weekly wages.

Section 52. This section deletes language now provided for in AS 23.30.155(n) under Section 46.

Section 53. This section provides for payment of compensation to an injured worker at his temporary total disability rate while undergoing rehabilitation or retraining. This change is consistent with interpretations set forth in Supreme Court decisions and with current board practice.

AS 23.30.191 was enacted in 1963 when there was a limit on compensation paid for both temporary and permanent partial disabilities. It was often the case that an injured worker would be paid the maximum, but required rehabilitation to return to the work force. To provide rehabilitation to those no longer entitled to temporary disability compensation, payment of one-half the rate was paid under Section 191. For injuries after May 22, 1975, there is no maximum limit for payment of temporary disability and such compensation should be continued while undergoing rehabilitation if the worker is incapacitated from earning the wages as before injury.

In Phillips Petroleum Company v. Alaska Industrial Board, 17 Alaska (1958), the Supreme Court stated:

> "The period of temporary total disability is defined as: the healing period or the time during which the workman is wholly disabled and unable by reason of his injury to work."

Our statute defines "disability as the incapacity because of injury to earn the wages which the employee was receiving at the time of injury. When such a condition is temporary, AS 23.30.185 requires the payment of temporary total disability compensation during the continuance of the disability.

The intent of the Act is to encourage injured workers who are totally or partially incapacitated for their normal occupation, to undergo vocational rehabilitaiton efforts aimed toward return to gainful employment. This not only benefits the worker, but reduces the future liability of the employer for payment of permanent partial or permanent total disabilities. To reduce the compensation rate by one-half when the worker does undertake such a program discourages rather than encourages participation in retraining.

Section 54. This section provides for the modification of a compromise and release agreement to the degree that a board order can be modified.

AS 23.30.210(b) grants the employee and the employer the right to enter into an agreement to resolve a disputed claim. The board must approve the compromise and release for the agreement to be valid and, if approved, the agreement is enforceable the same as an order of the board. If the language of the Act is strictly construed, however, the agreement cannot be modified within one year for a mistake of fact or a change in condition as is allowed in the board's orders. Fraud, actual or constructive, is the only ground for modification. The board, based on its experience with hardships and harsh results in cases involving change of condition, latent injury or mistake of fact in cases where compromise and release agreements have been approved, believes an agreement should be modifiable at least to the degree that an order can be modified.

Section also includes substitution of "benefits" for "compensation" where applicable.

Section 55. This section provides for inflationary increases in funeral expenses on death claims. The current limit for reasonable and necessary funeral expenses are not adequate and result in a hardship to the family of the deceased or the employer for payment of the additional costs.

Section 56-57. Sections substitute "benefits" for "compensation" where applicable.

Section 58. This section provides stiffer penalties for employees who wilfully misrepresent a claim to collect benefits.

Section 59-60. Sections substitute "benefits" for "compensation" where applicable.

Section 61. See Section 3.

Section 62. Section substitutes "benefits" for "compensation" where applicable.

Section 63. Section amends definition of "medical and related benefits" to include pain clinic services.

Section 64. Section analysis by the Department of Commerce and Economic Development, Division of Insurance. Also includes substitution of benefits for Compensation where applicable.

Section 65. This section clarifies the definition of "wages" for purposes of computing an employee's average weekly wage. The deletion of "in force at the time of the injury" is necessary to make the definition consistent with the method by which the average weekly wage is determined under AS 23.30.220 as a result of the 1977 amendments.

Section 66. This section is amended to include a definition for "benefits" as explained in Section 9-12, and defines the term "reserve rate" as used in Section 15.

Section 67. Section deletes inconsistent and ambiguous language in the Act and those provisions that are repealed by the proposed legislation.

Section 68. This section clarifies that the amount of payment to the second injury fund and the conditions under which payment is required, is in accordance with the version of AS 23.30.040(b) that was in effect on the date of injury to the employee.

Section 69. See Section 15.

Section 70. This section provides for an effective date for the bill of July 1, 1981.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

This fiscal note provides that the state administrative costs for rehabilitation under the proposed AS 23.30.041 be paid from the Second Injury Fund. This includes the costs of four new positions, plus the cost of four existing positions which entails a transfer in funding source from General Funds to Second Injury Funds.
(Continued page 2)

IV. DATE 3/2/82 PREPARED BY Nico Bus

AGENCY Labor

PHONE 465-2720

Original: Legislative Finance

cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/81)

1. Assumes an inflation rate of 10% per annum after FY '83.

2. Assumes an effective date of July 1, 1982.

3. The total cost for FY'83 for the four new positions is detailed on attached forms 13. In addition the following items are included in the FY '83 costs.

A Workers' Compensation Officer I reclassification to a Workers' Compensation Officer II with related travel and contractual services. Cost $16.6

100 Personal Services	$ 5.5
200 Travel	5.0
300 Auto, Lease, Indirect, etc.	6.1
	$16.6

The data processing operations cost will increase by $14.0 because of enhancements for a tickler system, running two systems parallel and the files expansion to retain tne addresses of all claimants.

The printing of 10,000 Workers' Compensation Acts and 25,000 Employee Information booklets. $35.0

The design and printing of new forms. $2.5

Computer program modifications to implement the changes introduced by the bill. $20.0

Equipment expense for computer terminals, panelling, cabinets, and files. $6.0

Included one-time items in FY '83

Equipment	$10.4
Booklets and Acts	35.0
Design and printing of new forms	2.5
Computer programs	20.0
	$67.9

Funding Change

Items included in the FY 83 Governor's budget that will change funding sources from General Fund to the Second Injury Fund.

4 positions (including benefits)	$141.3
Non-personal service costs relating to these 4 existing positions	
200: travel	9.9
300: contractual	25.8
400: commodities	2.3
	179.3

FY'83 Component Breakdown:

Workers' Compensation Administration		Second Injury Fund
PS		$161.8
Travel		20.0
Contract*	$47.0	75.3
Commodities		3.4
Equipment		10.4
TOTAL	$47.0	$270.9

Funding	General Fund	Second Injury
Funding transfer	(179.3)	179.3
Rehabilitation Services/ delivery system	47.0	270.9
	(132.3)	450.2

*$3,000 Workers Compensation Acts and Information Booklets; $12,000 Data Processing

**Second Injury Fund is currently being reviewed to determine whether revenues are sufficient to cover the cost of rehabilitation. It may be necessary to amend AS 23.30.040 to increase the maximum percentage contribution rate.

JUSTIFICATION:

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

The rehabilitation administrator is necessary to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

Extensive travel within the state is necessary to provide assistance to approximately 12,000 employers in developing programs for re-employment of injured workers and coordinating counselor services with workers, insurers/employers, labor unions, and rehabilitation providers.

9. Travel: $10,000 (20 trips @ $500 per trip)
10. Contractual: Space $3,100 (to be transferred to DOA)
Auto Lease & Operating Costs $5,600
Indirect (11.46% x 44,568 = $5,107)
Other costs which include communications, equipment rental, etc., $1,800
11. Commodities: Cost per position
12. Equipment: Desk, desk chair, side chairs, bookcase, file - $1,600

JUSTIFICATION:

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

The workers' compensation officer is necessary to coordinate with workers, employers, insurers and rehabilation providers to expedite the retraining and reemployment of injured workers. Travel within the Fairbanks and Northern regions will be necessary to coordinate this effort.

9. Travel: $5,000 (10 trips @ $500 per trip)

10. Contractual: Space $3,100 (to be transferred to DOA)
Auto Lease, Maintenance Agreement & Operating Costs $5,600
Indirect Costs (11.46% x 38,988 = $4,468)
Other costs which include communications, equipment rental, etc. $1,800

11. Commodities: Cost per position

12. Equipment: Desk, desk chair, side chair, file, worktable, bookcase $1,395

01 1136 (7/81)

RECOMMENDED CHANGES TO HB 159

SECTION 3. (p.2 l.19)

Change "AS 20.30.041" to "AS 23.30.041"

SECTION 5. (p. 3 l.26)

AS 23.30.041 Rehabilitation Program

Note (Insert in place of HB 159 Section 23.30.041(c), (d),(e),(f), and (g))

(c) When an employee suffers a permanent disability which precludes his return to suitable gainful employment, he shall be entitled to be fully evaluated for participation in a rehabilitation program within 90 days after date of injury. The full evaluation shall be performed by a qualified rehabilitation professional. The reasonable costs of the evaluation shall be at the expense of the employer. If in the opinion of the qualified rehabilitation professional, the medical, physical or emotional state of the employee is such that a full evaluation cannot then be made, the rehabilitation professional shall prepare a preliminary evaluation.

(d) The full evaluation by the qualified rehabilitation professional shall determine if the employee would benefit from a rehabilitation program. The determination shall be based on the following criteria:

(1) The rehabilitation program will restore the employee to a position to accept suitable, gainful employment equal to or as near as possible to that of his pre-injury employment. An employee is restored to a position of suitable gainful employment if he can return to (in the order of preference)

i) work at the same or similar job with the same employer or employer in the same industry as the employer at the time of injury.

ii) A job using essentially the same skills as the job at time of injury but in a different industry.

iii) A job using different skills but the academic achievement level as attained at the time of injury.

iv) A job requiring an academic achievement level which is different from that attained at the time of injury, but which rehabilitation evaluation determines is attainable by the employee and which job is believed to be available to the employee in his community at the time academic training is completed.

RECEIVED
MAR 22 1982
ELY, CUFFS & RUDD
Juneau Office

(2) The employee cannot be restored to a position to accept suitable gainful employment without the rehabilitation program.

(3) The cost of the rehabilitation program, including all costs to be incurred by the employer for and during the rehabilitation program, plus an estimate of continuing benefits due to the employee after the conclusion of the rehabilitation program are equal to or less than the benefits due the employee under this Act, assuming no rehabilitation program is implemented and assuming no discounting or lump-sum payment of benefits.

(4) The rehabilitation program may consist of any of the following, however, if the employee may be restored to a suitable gainful employment with rehabilitation programs of high preference, then a rehabilitation program of a lower preference need not be offered by the employer.

In order of preference rehabilitation programs are:

i) Prosthetic devices and training enabling work at the same or similar employment as at the time of injury.

ii) Work site modification and vocational training to the same or similar occupation.

iii) On the job training for a new occupation.

iv) Vocational training for a new occupation.

v) Academic training for a new occupation.

(5) A vocational rehabilitation program may not exceed 37 weeks, except that such services may be extended an additional 37 weeks if the rehabilitation administrator determines that special circumstances exist. Nothing in this subsection prohibits an employer or carrier from providing extended vocational rehabilitation services on a voluntary basis. If rehabilitation requires residence away from the employee's customary residence, reasonable cost of board, lodging, and travel shall be paid by the employer. Temporary disability under AS 23.30.185 or AS 23.30.200 shall be paid throughout the rehabilitation process.

(e) A preliminary evaluation shall include the reasons why a full evaluation cannot be rendered, an opinion as to when the employee will be eligible for a full evaluation, any information which would be included in a full evaluation which can be determined and reported by the rehabilitation professional at the time of the preliminary evaluation.

(f) If the full evaluation or preliminary evaluation is not timely scheduled for an employee entitled thereto by the employer, the employee or the Board may designate a qualified rehabilitation professional to perform the evaluation, the reasonable costs of which shall be paid by the employer.

(g) Refusal by an injured employee to participate in an evaluation or a rehabilitation plan offered by the employer results in forfeiture of disability compensation for the period the refusal continues. However, if an employee begins participation in an evaluation or rehabilitation plan within two months from the date of refusal, and successfully completes the evaluation and rehabilitation plan and becomes employed for a period of 30 consecutive business days following the completion of the rehabilitation program, the employee shall receive a lump-sum payment of 25 percent of the compensation forfeited by him. The lump-sum payment is available only once to an employee refusing rehabilitation. The Board may find that an employee refuses to participate in an evaluation or rehabilitation plan if the employee fails to cooperate with the qualified rehabilitation professional.

(h) The employer responsible for the benefits under this Act shall be liable for, and any subsequent employer hiring the employee during and as part of the rehabilitation program shall not be liable for, benefits under this Act for injuries occurring to the employee while engaged in job training, work readiness, work therapy experience or work sampling which is part of the rehabilitation program offered by the employer and the earnings for which, if any, are credited to gross wages upon which compensation benefits are calculated.

(e) In this section

1) "Suitable gainful employment" means employment that is reasonably attained in light of an individual's age, education, previous occupation,and injury, and that offers an opportunity to restore the individual as soon as practical to a remunerative occupation and as nearly as possible to his average weekly wage as determined at the time of injury.

ii) "Qualified rehabilitation professional" means a person who by education, professional training and experience has the skills to make judgements, administer and interpret tests, counsel, and make recommendations with respect to a persons medical, intellectual, emotional, physical or motivational capacity to accept and perform suitable gainful employment, and to design, implement and supervise programs which tend to enhance a person's medical, intellectual, emotional, physical or motivational capacity to accept suitable gainful employment.

SECTION 7.

Remove.

SECTION 12.

Remove and adopt a new section to read:

add to Chapter 23.30 a section to read "AS 23.30.096."

Upon the filing of a claim under this Act, an employee thereby authorizes all providers of medical treatment pertaining to the injury or rendered prior to the date of injury to release information to the employer. If requested by the employer, the employee shall execute all releases to facilitate access to that information.

SECTION 14.

Acceptable except add to subsection (c) the following additional sentence to read:

"If a claim is controverted by the employer and the employee does not request a hearing for a period of two years following the date of controversion, the claim is deemed denied by the Board."

SECTION 15. (p. 8 l.25)

Strike "occasioned solely" and insert in lieu "proximately caused".

SECTION 16. (p. 9 l.3)

Add after ". . . is conclusive" and before "even if . . ." a phrase to read:

", provided there is some evidence of record to support the finding,"

SECTION 17.

Strike and instead add a section to read:

"AS 23.30.155(j) if an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed out of any unpaid installment or installments of compensation due up to an amount equal to twenty per cent of each of the subsequent installments. If the employer seeks to offset by more than twenty per cent of the amount of each subsequent installment, prior Board approval is required.

SECTION 24.

Add to subsection (12) (p. 13 l.3) a clause to read:

"but no benefit is payable for loss of hearing above 3,000 cycles per second unless hearing above 3,000 cycles per second is a requirement of the job held at the time of injury."

SECTION 31. (p. 18 l.13)

Change "occasioned solely" to "proximately caused"

SECTION 35. (p. 20 l.10)

Add after ". . . of injury" and before ";" a phrase to read:

"up to the amount which when added to all other components of gross earnings brings gross weekly earnings up to the state's average weekly wage"

SECTION 35. (p. 20 l. 19-21)

Should be amended to read:

"and (b) the amount that is or would be deducted or withheld as of January 1, preceding the injury under the Social Security Act of 1935 from the earnings of"

SECTION 39.

Add new section to read:

SEC. 23.30.125 add new subsection

23.30.125(e) An order of determination of the propriety of a rehabilitation program pursuant to AS 23.30.041 issued by the Commissioner or his designated representative acting alone, may be heard before a full panel upon the petition of employee or employer filed within 10 days after issuance of the order.

The Board shall give priority in calendaring its cases for hearing to hearings to determine the propriety of a rehabilitation program pursuant to AS 23.30.041.

SECTION 40.

SEC. 3.30.005(f) is amended to read:

(f) Two members of a panel constitute a quorum for hearing claims, and the action taken by a quorum of a panel is considered the action of the full Board; the Commissioner or his designated representative acting alone shall constitute a quorum for making determinations of propriety of a rehabilitation program pursuant to AS 23.30.041.

SECTION 41.

This Act shall take effect July 1, 1982, and shall effect only claims occurring on or after the effective date hereof.

March 19, 1982

Honorable Albert P. Adams
Chairman, House Finance Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Re: HB 159

Dear Chairman Adams:

On behalf of the American Insurance Association, a trade association of casualty and property insurers, I wanted to write you and alert you and the members of the Finance Committee to a concern with regard to Section 2 of the above Bill. Section 2 adds a subsection to AS 23.30.025 to permit deductible insurance to be offered in worker's compensation policies.

Our concern is directed primarily to the situation where a deductible policy is taken out by a small employer. Because the amount of the deductible will be paid ultimately by the employer, it is likely that in many cases an employer will delay in making reports, or make no report at all, to the insurer in the case of an injury. This would be true because the employer would thereby improve his statistics for the purposes of a rate modification based on his experience. Experience rating is based much more upon frequency than it is upon severity of injury. Accordingly, if many of the small injuries are not reported, the employer will know that his rates will go down. To the extent that this is a valid concern, it also may mean that claims will be handled in house by people who are not experienced and competent at managing industrial claims. Proper management and expedient vocational rehabilitation management and counseling are essential to the best recovery of a worker.

In addition, an insurer may have collectability problems with small employers, unless the insurer requires a letter of credit or other absolute assurance that the money will be available.

We understand that there is presently a plan approved by the Director for an Alaskan company writing worker's compensation insurance. That plan requires that in order to qualify, an employer having net worth of not less than $5,000,000.00.

We also suggest that it would be very useful to have the statute set forth priorities for the kinds of rehabilitation to be sought in the case of an industrial injury. Properly drafted, such a priority system would encourage an employer to take an injured employee back; would tend to make the system work more quickly and effectively; and would tend to make the system less expensive. The following language could be inserted at an appropriate point in the rehabilitation sections of the Bill:

> "The following priorities are hereby established for use in developing alternative rehabilitation plans. No higher numbered priority may be utilized unless all lower numbered priorities have been determined by the rehabilitation administrator to be unlikely to result in returning the employee to suitable, gainful employment.
>
> Priority #1. Modification of previous job with the same employer, including a transitional return to work.
>
> Priority #2. A new job with the same employer in keeping with any limitations or restrictions of the employee.
>
> Priority #3. Modification of previous job with a new employer.
>
> Priority #4. A new job with a new employer as a result of direct job placement based upon transferable skills.
>
> Priority #5. A new job with a new employer involving on-the-job training.
>
> Priority #6. Retraining and job placement consistent with the purposes of rehabilitation.

These priorities, we believe, are consistent with the testimony of the persons with expert knowledge on such matters before the Committee on Labor and Commerce.

Please let us know if we can provide further information that would be of assistance with regard to this Bill. Thank you for your time.

Sincerely,

M. T. Thomas

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Sec 66 P44

Section 1. AS 18.80.220(4) is amended to read: Same as New Sec

(4) an employer, labor organization or employment agency to discharge, expel or otherwise discriminate against a person because he has

(A) opposed any practices forbidden under AS 18.80.200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30;

Sec 13 P13

* Sec. 2. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation

under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

* Sec. 3. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

* Sec. 4. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

* Sec. 5. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER-DISABLEMENT.

IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a health care provider [LICENSED PHYSICIAN] inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another health care provider [PHYSICIAN]. Upon procuring the services of a health care provider [PHYSICIAN], the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

* Sec. 6. AS 23.30.095(b) is amended to read:

(b) If the employee is unable to designate a health care provider [PHYSICIAN] and the emergency nature of the injury requires immediate medical care, or if he does not desire to designate a health care provider [PHYSICIAN] and so advises the employer, the employer shall designate the health care provider [PHYSICIAN]. Designation under this subsection, however, does not prevent the employee from subsequently designating a health care provider [PHYSICIAN] for continuance of required medical care.

Sec 31 P24,25

* Sec. 7. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following the first treatment ~~and following the time set by the board for notice of subsequent treatments~~, the health care provider [PHYSICIAN] giving the treatment or the employee receiving it furnishes to the

employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

Sec 32 P24

* Sec. 8. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a health care provider [PHYSICIAN OR SURGEON] authorized to practice [MEDICINE] under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a health care provider [PHYSICIAN OR SURGEON] who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the

state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

Sec 36 P26

* Sec. 9. AS 23.30.105(a) is amended to read:

(a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of compensation has been made without an award on account of the injury or death, a claim may be filed within two years after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

Sec 40 P30

* Sec. 10. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim

or make an award in respect to it. If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

Sec 45 P33

* Sec. 11. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

Sec 46 P33

* Sec. 12. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) If the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

Sec 51 P36

* Sec. 13. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

Sec 52 p 36,37

* Sec. 14. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those wages earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

Sec 53 p 37

* Sec. 15. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

Sec 55 p 38,39,40

* Sec. 16. AS 23.30.190(a)(20) is amended to read:

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same

employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;] Sec 56 P40

* Sec. 17. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation, may receive compensation necessary for his rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

Sec 58 P41

* Sec. 18. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding ~~$2,500~~ [$1,000];

* Sec. 19. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing (156) 456 [52] into the total wages earned, including self-employment, in the highest paid three consecutive years out of [ANY ONE OF] the five [THREE] calendar years immediately preceding the injury; Sec 63 P43

* Sec. 20. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of theft as defined in AS 11.46.100(3) and is punishable as provided in

AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

Sec 66 P45

* Sec. 21. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

Sec 70 P45

* Sec. 22. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

Sec 71 P45,46

* Sec. 23. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "health care provider" means a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned

or operated hospital; a corporate entity covered under AS 21.88.050-(b)(12); an employee of a health care provider acting within the course and scope of his employment; and persons comparably licensed in other jurisdictions to provide health care;

(31) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours off a site provided by the employer that are not under the supervision or control of the employer.

Sec 72 P44

* Sec. 24. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), and 23.30.225(b) are repealed.

2 adjust to current Rev. statutes.

Sec 73 P46

* Sec. 25. This Act takes effect July 1, 1982.

HOUSE LABOR & COMMERCE COMMITTEE Worker's Compensation HEARING DATE: 1/25/82

call Jackie Mc clintock

WCCA NEWSLETTER

HELPING ALL ALASKANS THRU A BETTER WORKERS COMPENSATION LAW

February 1982

WCCA has been involved with a joint effort of management and labor to correct some of the problems in HB159 now under consideration by the House Labor and Commerce Committee. Labor representatives include the AFL-CIO, District Council of Laborers, the Ironworkers, and the Teamsters. Management representatives of WCCA are from WIEN, Unit Construction, and Air Van Lines on the smaller joint labor-management subcommittee which meets nearly daily following the larger WCCA meeting which set direction on February 5, 1982.

While the area of workers' compensation is large and complex, the following five topics have been selected for detailed examination and hopefully consensus and legislative response in this session:

- Bunkhouse rule, which covers a worker at a remote site.
- No compensation payable to a worker injured while under the influence of intoxicating beverage or drugs not taken according to prescription direction.
- Determination of the wage base for setting compensation in an equitable manner for employee and employer (the average weekly wage setting process).
- Use of a spendable income approach in setting compensation to reduce disincentive to return to work due to higher compensation payments than net take-home pay. Iowa has addressed this issue.
- Establish a Vocational Rehabilitation monitoring capability within the Division of Workers' Compensation to obtain a quick response of all parties in a case involving rehabilitation. Guidelines for vocational rehabilitation services would be developed to assure a high quality of service.

Both labor and management representatives would like to have an expanded membership participation on the working committee and be able to address other aspects of workers' compensation in the future. These could include the use of modified work including union members and an examination of a wage loss system.

Due to the imminent legislative committee action, please contact one of the following board members with your ideas or concerns:

Richard Cattanach 349-4568 Jack Thompson 272-0536

" OUR SUPPORT DEPENDS ON YOUR SUPPORT "

LABOR/MANAGEMENT WORK DRAFT

FEBRUARY 13, 1982

Original Sponsor: Rules/Legislative Council

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.30.025 is amended by adding a new subsection to read:

See 2 No change

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

* Sec. 2. AS 23.30.040(e) is repealed and reenacted to read:

NEW

(e) The board may authorize payment from the second injury fund of:

(1) up to $200 per month for maintenance to an employee being rehabilitated under § 41 of this chapter who suffers an extreme financial hardship;

(2) rehabilitation expenses exclusive of costs for provider services and testing.

* Sec. 3. LEGISLATIVE INTENT. It is the intent of the legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to his gross earnings at the time of the injury. The legislature recognizes five rehabilitation goals in a workers' compensation program:

NEW

(1) Early identification of injured workers who will eventually need rehabilitation;

(2) Use of competent rehabilitation providers;

(3) Opportunities for return to direct employment;

(4) Maintaining an atmosphere conducive to rehabilitation;

(5) Providing incentives and removing disincentives to rehabilitation.

The Department of Labor shall adopt regulations in accordnce with AS 23.30.005 to accomplish these goals.

NEW

* Sec. 4. The board shall select and employ a rehabilitation administrator and may authorize the rehabilitation administrator to select and employ rehabilitation monitors.

NEW

* Sec. 5. The rehabilitation administrator is a partially exempt service under AS 39.25.120. The monthly salary of the rehabilitation administrator is equal to Step A, Range 22 of the salary schedule in AS 39.27.011(a) for Anchorage.

* Sec. 6 AS 23.30 is amended by adding a new section to read:

Sec. 23.30.041. REHABILITATION OF INJURED WORKERS. (a) The rehabilitation administrator shall implement the provisions of this section. The rehabilitation administrator shall continuously study the issue of rehabilitation, both physical and vocational, and shall investigate and maintain a directory of all qualified rehabilitation facilities, agencies, and providers, both public and private.

(b) When an employee suffers an injury covered by this chapter which precludes his return to suitable gainful employment, he shall be entitled to prompt rehabilitation services. The employer or carrier, at its own expense, shall provide for necessary and appropriate rehabilitation services. If rehabilitation services are not voluntarily offered, the rehabilitation

administrator, if he deems the services necessary and appropriate, may retain a rehabilitation provider at the expense of the employer or carrier.

(c) Rehabilitation services shall not exceed 37 weeks, provided, however, the rehabilitation services may be extended an additional 37 weeks if the rehabilitation administrator determines that special circumstances exist. Nothing in this subsection precludes an employer or carrier from providing rehabilitation services beyond such period on a voluntary basis. Where rehabilitation requires residence at or near a facility or institution, away from the employee's customary residence, reasonable cost of board, lodging and travel shall be paid by the employer.

(d) Temporary disability benefits paid pursuant to §§ 185 or 200 of this chapter shall include such period as may be reasonably required for training in the use of artificial members and appliances, and shall be paid throughout the rehabilitation process.

(e) The rehabilitation provider shall file a plan for approval with the rehabilitation administrator in accordance with board regulations. Within ten (10) days of the rehabilitation administrator's decision any party may seek review of the decision by requesting a hearing in accordance with § 110 of this chapter. A decision by the rehabilitation administrator is presumed valid absent a showing of clear error.

(f) Refusal by an injured employee to participate in an evaluation or a plan approved by the rehabilitation administrator shall result in a forfeiture of disability compensation for the period such refusal persists. However, if an employee commences participation in an evaluation or plan of rehabilitation within two months from the date of such refusal, and successfully completes such rehabilitation plan or evaluation by becoming employed for a period of thirty consecutive business days following the completion of the rehabilitation program, he shall receive a lump sum payment of 25% of the compensation forfeited by him. Such lump sum payment is available only once to an employee refusing rehabilitation. The rehabilitation administrator may find that an employee refuses to participate in an evaluation or vocational plan if, the employee fails to cooperate with the rehabilitation provider, or if the employee, or anyone acting on the employee's behalf, interferes with the rehabilitation process.

* Sec. 7. AS 23.30.045 (a) is amended to read:

(a) An employer is liable for and shall secure the payment to his employees of the compensation payable under §§ 41, 50, 95, 145, and 180 - 215 of this chapter. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the compensation to employees of the subcontractor unless the subcontractor secures the payment.

* Sec. 8. AS 23.30.045 (c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

* Sec. 9. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board SHALL issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. The failure of an employer to file evidence of compliance as required by AS 23.30.085 shall create a rebutable presumption that the employer has failed to insure or provide security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for three years following the violation of the stop order.

* Sec. 10. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR

EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the compensation provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

* Sec. 11. AS 23.30.095 is amended by adding a new section to read:

(j) the board shall adopt and use a schedule for determining the existance and degree of permanent impairment based upon medically or scientifically demonstrable findings.

* Sec. 12. AS 23.30 is amended by adding a new section to read:

AS 23.30.097. RELEASE OF INFORMATION. Upon request the employee shall provide written authority to the employer, carrier, rehabilitation provider and rehabilitation administrator to obtain medical and rehabilitation information relative to his injury.

* Sec. 13. AS 23.30.~~105~~100(d)(2) is amended to read:

2. If the board excuses the failure on the ground that for some satisfactory reason notice could not be given; however, when the delay in giving notice is so excused, notwithstanding the provisions of AS 23.30.120, the burden of proof as to the validity of the claim shall shift to the employee;

* Sec. 14. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary with [IN] respect to [OF] the claim, and upon application of an interested party shall provide an opportunity for [ORDER] a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing record closes [IS HAD], by order, reject the claim or make an award in respect to it. If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

* Sec. 15. AS 23.30.120(3) is amended to read:

(3) The injury was not proximately caused by the employee being under the influence of an intoxicating liquor or drugs [OCCASIONED SOLELY BY THE INTOXICATION OF THE INJURED EMPLOYEE];

* Sec. 16. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.122. CREDIBILITY OF WITNESSES. The board has the sole power to determine the credibility of a witness. A finding by the board concerning the weight to be accorded any witnesses testimony, including medical testimony and reports, is conclusive even though the evidence is conflicting or susceptible to contrary conclusions. The findings of the board shall be subject to the same standard of review as a jury's finding in a civil action.

* Sec. 17. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

* Sec. 18. AS 23.30.155 is amended by adding new subsection to read:

(n) If the board determines that it is in the interest of an injured employee, and the parties agree, the liability of the employer for all or part of compensation payable under AS 23.30.190 (a)(1)-(11) may be discharged by the payment of a lump sum.

* Sec. 19. AS 23.30.175(a) is amended to read:

(a) The weekly rate of compensation for disability or death for a recipient residing in Alaska may not exceed the percentage of the Alaska average weekly wage in effect on the date of injury as determined by the table contained in this subsection and initially may not be less than $110 [65] a week. However, if the board determines that the employee's spendable [AVERAGE] weekly wages are less than $110 [65] a week as computed under § 220 of this chapter, it shall issue an order decreasing the weekly rate of compensation to a rate equal to the employee's spendable [AVERAGE] weekly wages, and payments made earlier in excess of the decreased rate shall be deducted from the unpaid compensation in the manner the board determines. In any case, the employer shall pay timely compensation.

On	The Rate Shall Be
July 1, 1975	80% of the Alaska Average Weekly Wage
January 1, 1976	100% of the Alaska Average Weekly Wage
January 1, 1977	133.3% of the Alaska Average Weekly Wage
January 1, 1979	166.6% of the Alaska Average Weekly Wage
January 1, 1981	200% of the Alaska Average Weekly Wage

* Sec. 20. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

* Sec. 21. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's weekly compensation rate calculated in accordance with § 180, 185,190, 200 or 215 of this chapter times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the spendable weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those gross earnings earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $110 a week except as provided in (a) of this section.

* Sec. 22. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

* Sec. 23. AS 23.30.180 is amended to read:

Sec. 23.30.180. PERMANENT TOTAL DISABILITY. In case of total disability adjudged to be permanent 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the total disability. Loss of both hands, or both arms, or both feet, or both legs, or both eyes, or of any two of them, in the absence of conclusive proof to the contrary, constitutes permanent total disability. In all other cases permanent total disability is determined in accordance with the facts.

* Sec. 24. AS 23.30.185 is amended to read:

Sec. 23.30.185. COMPENSATION FOR TEMPORARY TOTAL DISABILITY. In case of disability total in character but temporary in quality 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the disability.

* Sec. 25. AS 23.30.190 is amended to read:

Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with §§ 185 or 200 of this chapter, respectively, and shall be paid to the employee as follows:

(1) arm lost, 280 weeks compensation, not to exceed $59,000 [$43,680];

(2) leg lost, 248 weeks compensation, not to exceed $54,400 [$40,320];

(3) hand lost, 212 weeks compensation, not to exceed 45,400 [$33,600];

(4) foot lost, 173 weeks compensation, not to exceed 39,700 [$28,700];

(5) eye lost, 140 weeks compensation, not to exceed $30,200 [$22,400];

(6) thumb lost, 51 weeks compensation, not to exceed $14,000 [$10,400];

(7) first finger lost, 28 weeks compensation, not to exceed $8,700 [$6,440];

(8) great toe lost, 26 weeks compensation, not to exceed $7,200 [$5,320];

(9) second finger lost, 18 weeks compensation, not to exceed $5,700 [$4,200]; third finger lost, 18 weeks compensation, not to exceed $4,700 [$3,500];

(10) toe other than great toe lost, 8 weeks compensation, not to exceed $3,000 [$2,240];

(11) fourth finger lost, 7 weeks compensation, not to exceed $2,800 ~~$2,000~~ [$2,100];

(12) loss of hearing of one ear, 52 weeks compensation, not exceeding $9,800 [$7,280]: loss of hearing of both ears, 200 weeks compensation, not to exceed $37,800 [$28,000] No benefit is payable for loss of hearing above 3,000 cycles per second;

(13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(15) compensation for loss of binocular vision or for 80 per cent or more of the vision of an eye is the same as for loss of the eye;

(16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 80 [66-2/3] per cent of the difference between his spendable [AVERAGE] weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to modification [RECONSIDERATION OF THE DEGREE OF THE IMPAIRMENT] by the board on its own motion or upon application of a party in interest; Whenever the board determines that it is in the interest of justice, the liability of the employer for compensation, or any part if it as determined by the board, may be discharged by the payment of a lump sum;

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this section, not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this section applies.

(b) Total compensation paid under (a)(20) of this section may not exceed

$75,000 [60,000].

* Sec. 26. AS 23.30.200 is amended to read:

Sec. 23.30.200. TEMPORARY PARTIAL DISABILITY. In case of temporary partial disability resulting in decrease of earning capacity the compensation shall be 80 [66-2/3] per cent of the difference between the injured employee's spendable [AVERAGE] weekly wages before the injury and his wage earning capacity after the injury in the same or another employment, to be paid during the continuance of the disability, but not to be paid for more than five years.

* Sec. 27. AS 23.30.210 is amended to read:

Sec. 23.30.210. DETERMINATION OF WAGE-EARNING CAPACITY. (a) In a case of partial disability under § 190(20) or 200 of this chapter the wage-earning capacity of an inured employee is determined by his actual spendable weekly wage [EARNINGS] if the actual spendable weekly wage [EARNINGS] fairly and reasonably represents his wage-earning capacity. If the employee has no actual spendable weekly wage [EARNINGS] or his actual spendable weekly wage [EARNINGS] does not fairly and reasonably represent his wage-earning capacity, the board may, in the interest of justice, fix the wage-earning capacity which is reasonable, having due regard to the nature of his injury, the degree of physical impairment, his usual employment, and any other factors or circumstances in the case which may affect his capacity to earn wages in his disabled condition, including the effect of disability as it may naturally extend into the future.

* Sec. 28. AS 23.30.215(a) is amended to read:

(a) If the injury causes death, the compensation is known as a death benefit and is payable in the following amounts to and for the benefit of the following persons:

(1) reasonable and necessary funeral expenses not exceeding $2,500 [$1,000];

(2) if there is a widow or widower or a child or children of the deceased, the following percentages of the spendable [AVERAGE] weekly wages of the deceased:

(A) 80 [66-2/3] per cent for the widow or widower with no children;

(B) 40 [33-1/3] per cent for the widow or widower with one child and 40 [33-1/3] per cent for the child;

(C) 25 [20] per cent for the widow or widower with two or more children and 55 [46-2/3] per cent divided equally among the children'

(D) [deleted]

(E) 80 [66-2/3] per cent for an only child when there is no widow or widower;

(F) [deleted]

(G) 80 [66-23/] per cent, divided equally, if there are two more more children and no widow or widower:

(3) if the widow or widower remarries, she or he is entitled to be paid in one sum an amount equal to the compensation to which the widow or widower would otherwise be entitled in the two years commencing on the date of remarriage as full and final settlement of all sums due the widow or widower;

(4) if there is no widow or widower or child or children, then for the support of father, mother, grandchildren, brothers, and sisters, if dependent upon the deceased at the time of injury, 40 [35] per cent of the spendable [AVERAGE] weekly wage of the deceased to such beneficiaries, share and share alike, not to exceed $20,000 in the aggregate.

* Sec. 29. AS 23.30.215(b) is amended to read:

(b) In computing death benefits, the spendable [AVERAGE] weekly wage of the deceased shall be computed under § 220 of this chapter and shall be paid in accordance with § 155 of this chapter and subject to the weekly maximum limitation in the aggregate as provided in § 175 of this chapter, but the total weekly compensation may not be less than $75 [45] for a widow or widower nor less than $25 [15] weekly to a child or $50 [30] for children.

* Sec. 30. AS 23.30.220 is repealed and reenacted to read:

Sec. 23.30.220 DETERMINATION OF SPENDABLE WEEKLY WAGE. Except as otherwise provided in this chapter, the spendable weekly wage of the injured employee at the time of the injury is the basis for computing compensation, and shall be the employee's gross weekly earnings minus payroll tax deductions. The gross weekly earnings shall be calculated as follows:

(1) if at the time of the injury the employee has been in the gainful employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing by thirteen the gross earnings said employee earned in the employ of the employer in that reporting quarter.

(2) if at the time of the injury the employee has not been in the employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing 100 into the gross earnings of the employee in the two calendar years immediately preceding the injury.

(3) if the board determines that the gross weekly earnings at the time of the injury cannot be fairly calculated under (1) or (2) of this section, or cannot otherwise be ascertained without undue hardship to the employee, the gross weekly earnings for calculating compensation shall be the usual gross earnings for similar service rendered by paid employees under similar circumstances as determined by the board;

(4) if an employee is a minor or an apprentice, or a trainee, as determined by the board, when injured, and under normal conditions his wages would increase during the period of disability, this fact may be considered by the board in computing his gross weekly earnings;

(5) if the employee is injured while performing his duties as a volunteer ambulance attendant, policeman or fireman, the gross weekly earnings calculating compensation shall be the minimum gross weekly earnings paid a full-time ambulance attendant, policeman or fireman employed, at a reasonable figure previously set by the subdivision to make this determination and in no case may the gross weekly earnings for calculating compensation be less than the minimum wage computed on the basis of 40 hours work per week.

* Sec. 31. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.227. OTHER BENEFITS. No compensation shall be payable to an employee under §§ 180 or 185 of this chapter for any week in which the employee receives unemployment benefits (AS 23.20).

* Sec. 32. AS 23.30.235 is repealed and reenacted to read:

Sec. 23.30.235 CASES IN WHICH NO COMPENSATION IS PAYABLE. No compensation under this chapter shall be allowed for an injury:

(1) proximately caused by the employee's willful intent to injure himself or to willfully injure another;

(2) proximately caused by the employee being under the influence of an intoxicating liquor or drugs unless such drugs are being taken in quantities prescribed by employee's physician.

* Sec. 33. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for th purpose of obtaining a benefit or payment under this chapter is guilty of <u>theft as defined in AS 11.46.100(3) and is punishable as provided in AS 11.46.120 - 11.46.150</u> [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

* Sec. 34. The board shall publish Sections 32 and 33 of this Act in a booklet defining the employee's rights and obligations under the Alaska Workers Compensation Act. The booklet shall be mailed to an injured worker upon notice of an injury.

* Sec. 35. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "arising out of and in the course of employment" includes employer required or supplied travel to and from a remote job site; activities performed at the direction or under the control of the employer; and employer sanctioned activities at employer provided facilities; but excludes activities of a personal nature away from employer provided facilities.

(30) "under the influence of an intoxicating liquor or drugs" means not only all well-known and easily recognized conditions and degrees of intoxication, but any abnormal mental or physical condition which is the result of indulging intoxicating liquors or drugs, and which, to an appreciable degree, deprives one of that clearness of intellect and control of himself which he would otherwise possess.

(31) "drugs" means a controlled substance or cannabis as further defined in AS. 11.81.900.

(32) "gross earnings" means recurring payments by employer to the employee for employment before any authorized or lawfully required deduction or withholding of funds by the employer, excluding irregular bonuses, reimbursement of expenses, expense allowances, and any benefit or payment to the employee which is not taxable to the employee during the pay period. The value of room and board to the employee may be considered in determining gross earnings for those employees with gross weekly earnings which are less than the Alaska average weekly wage at the time of injury.

(33) "payroll taxes" means the following:

(a) An amount equal to the amount which would be withheld pursuant to withholding tables in effect on July 1 preceding the injury under the Internal Revenue Code of 1954, and regulations pursuant thereto, as amended, as though the employee had elected to claim the maximum number of dependants for actual dependency, blindness and old age to which the employee is entitled on the date on which he was injured; and,

(b) An amount equal to the amount required on July 1 preceding the injury by the Social Security Act of 1935 as amended to be deducted or withheld from the amount of earnings of the employee at the time of the injury as if the earnings were earned at the beginning of the calendar year in which he was injured; and,

(c) And any other legislative mandated deductions including but not limited to ESC and FUTA;

(d) The Commissioner shall annually prepare formulas which shall be used to calculate an employee's spendable weekly wage on the basis of his gross weekly earnings, number of dependants, marital status and payroll tax deducations.

(34) "reporting quarter" means one of the 3 month periods (January through March, April through June, July through September, October through December) used to report employee wages to the Internal Revenue Service.

(35) "Suitable Gainful Employment" means employment which is reasonably attainable in light of the individuals age, education, previous occupation, and injury, and which offers an opportunity to restore the individual as soon as practical and as nearly as possible to is gross earnings as determined at the time of injury.

* Sec. 36. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), AS 23.30.191 and AS 23.30.265(20) are repealed.

* Sec. 37. AS 39.25.120 is amended by adding a new paragraph to read:

(20) the rehabilitation administrator of the Workers' Compensation Board.

* Sec. 38. This act takes effect July 1, 1982.

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Should be in Title 21 - Insurance Code

Estimate of Savings

* Section 1. AS 23.30.025 is amended by adding a new subsection to read:

this or substance is already being done.

present in 1/25/82

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

Recovery unsuccessful if ...

* Sec. 2. AS 23.30.040(e) is repealed and reenacted to read:

(e) The board may authorize payment from the second injury fund of:

OK in addition to T.T.D.

(1) up to $200 per month for maintenance to an employee being rehabilitated under § 41 of this chapter who suffers an extreme financial hardship;

(2) rehabilitation expenses exclusive of costs for provider services and testing.

1) What type of deductibles - how to be enforced

Leave for special Letter of Intent

* Sec. 3. LEGISLATIVE INTENT. It is the intent of the legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to his gross earnings at the time of the injury. The legislature recognizes five rehabilitation goals in a workers' compensation program:

(1) Early identification of injured workers who will eventually need rehabilitation;

(2) Use of competent rehabilitation providers;

(3) Opportunities for return to direct employment;

(4) Maintaining an atmosphere conducive to rehabilitation;

(5) Providing incentives and removing disincentives to rehabilitation.

The Department of Labor shall adopt regulations in accordnce with AS 23.30 005 to accomplish these goals. list responsibilities — Reg w/s Leg

Zee Jackson report

* Sec. 4. The board shall select and employ a rehabilitation administrator and may authorize the rehabilitation administrator to select and employ rehabilitation monitors.

5% of one fund to Rehab —

Zee Jackson report

Sec. 5. The rehabilitation administrator is a partially exempt service under AS 39.25.120. The monthly salary of the rehabilitation administrator is equal to Step A, Range 22 of the salary schedule in AS 39.27.011(a) for Anchorage. by region of residency

Zee Jackson report

* Sec. 6 AS 23.30 is amended by adding a new section to read:

Sec. 23.30.041. REHABILITATION OF INJURED WORKERS. (a) The rehabilitation administrator shall implement the provisions of this section. The rehabilitation administrator shall continuously study the issue of rehabilitation, both physical and vocational, and shall investigate and maintain a directory of all qualified rehabilitation facilities, agencies, and providers, both public and private.

(b) When an employee suffers an injury covered by this chapter which precludes his return to suitable gainful employment, he shall be entitled to prompt rehabilitation services. The employer or carrier, at its own expense, shall provide for necessary and appropriate rehabilitation services. If rehabilitation services are not voluntarily offered, the rehabilitation

administrator, if he deems the services necessary and appropriate, may retain a rehabilitation provider at the expense of the employer or carrier.

(c) Rehabilitation services shall not exceed 37 weeks, provided, however, the rehabilitation services may be extended an additional 37 weeks if the rehabilitation administrator determines that special circumstances exist. Nothing in this subsection precludes an employer or carrier from providing rehabilitation services beyond such period on a voluntary basis. Where rehabilitation requires residence at or near a facility or institution, away from the employee's customary residence, reasonable cost of board, lodging and travel shall be paid by the employer.

(d) Temporary disability benefits paid pursuant to §§ 185 or 200 of this chapter shall include such period as may be reasonably required for training in the use of artificial members and appliances, and shall be paid throughout the rehabilitation process.

(e) The rehabilitation provider shall file a plan for approval with the rehabilitation administrator in accordance with board regulations. Within ten (10) days of the rehabilitation administrator's decision any party may seek review of the decision by requesting a hearing in accordance with § 110 of this chapter. A decision by the rehabilitation administrator is presumed valid absent a showing of clear error.

(f) Refusal by an injured employee to participate in an evaluation or a plan approved by the rehabilitation administrator shall result in a forfeiture of disability compensation for the period such refusal persists. However, if an employee commences participation in an evaluation or plan of rehabilitation within two months from the date of such refusal, and successfully completes such rehabilitation plan or evaluation by becoming employed for a period of thirty consecutive business days following the completion of the rehabilitation program, he shall receive a lump sum payment of 25% of the compensation forfeited by him. Such lump sum payment is available only once to an employee refusing rehabilitation. The rehabilitation administrator may find that an employee refuses to participate in an evaluation or vocational plan if, the employee fails to cooperate with the rehabilitation provider, or if the employee, or anyone acting on the employee's behalf, interferes with the rehabilitation process.

* Sec. 7. AS 23.30.045 (a) is amended to read:

(a) An employer is liable for and shall secure the payment to his employees of the compensation payable under §§ 41, 50, 95, 145, and 180 - 215 of this chapter. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the compensation to employees of the subcontractor unless the subcontractor secures the payment.

* Sec. 8. AS 23.30.045 (c) is amended to read:

prov. 159

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

* Sec. 9. AS 23.30.080 is amended by adding a new subsection to read:

prov. 159

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board [may] shall issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. The failure of an employer to file evidence of compliance as required by AS 23.30.085 shall create a rebutable presumption that the employer has failed to insure or provide security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for three years following the violation of the stop order.

x insert prov. Sec. 7 of 159

* Sec. 10. AS 23.30.095(e) is amended to read:

prov. Sec. 8

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR

EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the compensation provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

new — maybe needs staff language

* Sec. 11. AS 23.30.095 is amended by adding a new section to read:

(j) the board shall adopt and use a schedule for determining the existance and degree of permanent impairment based upon medically or scientifically demonstrable findings.

consistent with Am. Med. Assn. Guides

new sec

* Sec. 12. AS 23.30 is amended by adding a new section to read:

AS 23.30.097. RELEASE OF INFORMATION. Upon request the employee shall provide written authority to the employer, carrier, rehabilitation provider and rehabilitation administrator to obtain medical and rehabilitation information relative to his injury.

? → clarify to claimant employers

* Sec. 13. AS 23.30.~~105~~100(d)(2) is amended to read:

2. If the board excuses the failure on the ground that for some satisfactory reason notice could not be given; however, when the delay in giving notice is so excused, notwithstanding the provisions of AS 23.30.120, the burden of proof as to the validity of the claim shall shift to the employee;

Be sure that there is proof that employers shows he has received claim of injury from employee.

* Sec. 14. AS 23.30.110(c) is amended to read:

from Dorsey bill Sec 10 of present draft

(c) The board shall make the investigation which it considers necessary with [IN] respect to [OF] the claim, and upon application of an interested party shall provide an opportunity for [ORDER] a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing record closes [IS HAD], by order, reject the claim or make an award in respect to it. ~~If~~ if a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

* Sec. 15. AS 23.30.120(3) is amended to read:

AS 23.30.225

(3) The injury was not proximately caused by the employee being under the influence of an intoxicating liquor or drugs [OCCASIONED SOLELY BY THE INTOXICATION OF THE INJURED EMPLOYEE];

* Sec. 16. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.122. CREDIBILITY OF WITNESSES. The board has the sole power to determine the credibility of a witness. A finding by the board concerning the weight to be accorded any witnesses testimony, including medical testimony and reports, is conclusive even though the evidence is conflicting or susceptible to contrary conclusions. The findings of the board shall be subject to the same standard of review as a jury's finding in a civil action.

Dorsheff prev. Sec. 11

* Sec. 17. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due. 2? maybe consider electing — off set as subsequent payments

* Sec. 18. AS 23.30.155 is amended by adding new subsection to read:

Dorr's Bill. (n) If the board determines that it is in the interest of an injured employee, and the parties agree, the liability of the employer for all or part of compensation payable under AS 23.30.190 (a)(1)-(19) may be discharged by the payment of a lump sum.

Jerke? ——→

Consider for HB659

* Sec. 19. AS 23.30.175(a) is amended to read:

(a) The weekly rate of compensation for disability or death for a recipient residing in Alaska may not exceed the percentage of the Alaska average weekly wage in effect on the date of injury as determined by the table contained in this subsection and initially may not be less than $110 [65] a week. However, if the board determines that the employee's spendable [AVERAGE] weekly wages are less than $110 [65] a week as computed under § 220 of this chapter, it shall issue an order decreasing the weekly rate of compensation to a rate equal to the employee's spendable [AVERAGE] weekly wages, and payments made earlier in excess of the decreased rate shall be deducted from the unpaid compensation in the manner the board determines. In any case, the employer shall pay timely compensation.

On	The Rate Shall Be
July 1, 1975	80% of the Alaska Average Weekly Wage
January 1, 1976	100% of the Alaska Average Weekly Wage
January 1, 1977	133.3% of the Alaska Average Weekly Wage
January 1, 1979	166.6% of the Alaska Average Weekly Wage
January 1, 1981	200% of the Alaska Average Weekly Wage

Dav's Sec. 14, 15, 18 of 159

* Sec. 20. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

Sec. 14 of 159

* Sec. 21. AS 23.30.175(c) is repealed and reenacted to read:

Dav's (c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's weekly compensation rate calculated in accordance with § 180, 185,190, 200 or 215 of this chapter times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The ratio rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the spendable weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those gross earnings earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $110 a week except as provided in (a) of this section.

* Sec. 22. AS 23.30.175(d) is repealed and reenacted to read:

Dav's (d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

* Sec. 23. AS 23.30.180 is amended to read:

Sec. 23.30.180. PERMANENT TOTAL DISABILITY. In case of total disability adjudged to be permanent 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the total disability. Loss of both hands, or both arms, or both feet, or both legs, or both eyes, or of any two of them, in the absence of conclusive proof to the contrary, constitutes permanent total disability. In all other cases permanent total disability is determined in accordance with the facts.

* Sec. 24. AS 23.30.185 is amended to read:

Sec. 23.30.185. COMPENSATION FOR TEMPORARY TOTAL DISABILITY. In case of disability total in character but temporary in quality 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the disability.

* Sec. 25. AS 23.30.190 is amended to read:

Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with §§ 185 or 200 of this chapter, respectively, and shall be paid to the employee as follows: 35% increase in ceilings

(1) arm lost, 280 weeks compensation, not to exceed $59,000 [$43,680];

(2) leg lost, 248 weeks compensation, not to exceed $54,400 [$40,320];

(3) hand lost, 212 weeks compensation, not to exceed 45,400 [$33,600];

(4) foot lost, 173 weeks compensation, not to exceed 39,700 [$28,700];

(5) eye lost, 140 weeks compensation, not to exceed $30,200 [$22,400];

(6) thumb lost, 51 weeks compensation, not to exceed $14,000 [$10,400];

(7) first finger lost, 28 weeks compensation, not to exceed $8,700 [$6,440];

(8) great toe lost, 26 weeks compensation, not to exceed $7,200 [$5,320];

(9) second finger lost, 18 weeks compensation, not to exceed $5,700 [$4,200]; third finger lost, 18 weeks compensation, not to exceed $4,700 [$3,500];

(10) toe other than great toe lost, 8 weeks compensation, not to exceed $3,000 [$2,240];

(11) fourth finger lost, 7 weeks compensation, not to exceed ~~$2,000~~ 2,800 [$2,100];

(12) loss of hearing of one ear, 52 weeks compensation, not exceeding $9,800 [$7,280]: loss of hearing of both ears, 200 weeks compensation, not to exceed $37,800 [$28,000] No benefit is payable for loss of hearing above 3,000 cycles per second;

(13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(15) compensation for loss of binocular vision or for 80 per cent or more of the vision of an eye is the same as for loss of the eye;

(16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 80 [66-2/3] per cent of the difference between his spendable [AVERAGE] weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to modification [RECONSIDERATION OF THE DEGREE OF THE IMPAIRMENT] by the board on its own motion or upon application of a party in interest; Whenever the board determines that it is in the interest of justice, the liability of the employer for compensation, or any part if it as determined by the board, may be discharged by the payment of a lump sum;

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this section, not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this section applies.

(b) Total compensation paid under (a)(20) of this section may not exceed

$75,000 [60,000].

* Sec. 26. AS 23.30.200 is amended to read:

Sec. 23.30.200. TEMPORARY PARTIAL DISABILITY. In case of temporary partial disability resulting in decrease of earning capacity the compensation shall be 80 [66-2/3] per cent of the difference between the injured employee's spendable [AVERAGE] weekly wages before the injury and his wage earning capacity after the injury in the same or another employment, to be paid during the continuance of the disability, but not to be paid for more than five years.

* Sec. 27. AS 23.30.210 is amended to read:

Sec. 23.30.210. DETERMINATION OF WAGE-EARNING CAPACITY. (a) In a case of partial disability under § 190(20) or 200 of this chapter the wage-earning capacity of an inured employee is determined by his actual spendable weekly wage [EARNINGS] if the actual spendable weekly wage [EARNINGS] fairly and reasonably represents his wage-earning capacity. If the employee has no actual spendable weekly wage [EARNINGS] or his actual spendable weekly wage [EARNINGS] does not fairly and reasonably represent his wage-earning capacity, the board may, in the interest of justice, fix the wage-earning capacity which is reasonable, having due regard to the nature of his injury, the degree of physical impairment, his usual employment, and any other factors or circumstances in the case which may affect his capacity to earn wages in his disabled condition, including the effect of disability as it may naturally extend into the future.

* Sec. 28. AS 23.30.215(a) is amended to read:

(a) If the injury causes death, the compensation is known as a death benefit and is payable in the following amounts to and for the benefit of the following persons: for 19 of 159

(1) reasonable and necessary funeral expenses not exceeding $2,500 [$1,000];

(2) if there is a widow or widower or a child or children of the deceased, the following percentages of the spendable [AVERAGE] weekly wages of the deceased:

(A) 80 [66-2/3] per cent for the widow or widower with no children;

(B) 40 [33-1/3] per cent for the widow or widower with one child and 40 [33-1/3] per cent for the child;

(C) 25 [20] per cent for the widow or widower with two or more children and 55 [46-2/3] per cent divided equally among the children'

(D) [deleted] ~~Sec. 155~~ Sec- deleted in 159

(E) 80 [66-2/3] per cent for an only child when there is no widow or widower;

(F) [deleted] ~~$~~ Sec- deleted

(G) 80 [66-23/] per cent, divided equally, if there are two ~~more~~ or more children and no widow or widower;

(3) if the widow or widower remarries, she or he is entitled to be paid in one sum an amount equal to the compensation to which the widow or widower would otherwise be entitled in the two years commencing on the date of remarriage as full and final settlement of all sums due the widow or widower;

(4) if there is no widow or widower or child or children, then for the support of father, mother, grandchildren, brothers, and sisters, if dependent upon the deceased at the time of injury, 40 [35] per cent of the spendable [AVERAGE] weekly wage of the deceased to such beneficiaries, share and share alike, not to exceed $20,000 in the aggregate.

* Sec. 29. AS 23.30.215(b) is amended to read:

(b) In computing death benefits, the spendable [AVERAGE] weekly wage of the deceased shall be computed under § 220 of this chapter and shall be paid in accordance with § 155 of this chapter and subject to the weekly maximum limitation in the aggregate as provided in § 175 of this chapter, but the total weekly compensation may not be less than $75 [45] for a widow or widower nor less than $25 [15] weekly to a child or $50 [30] for children.

* Sec. 30. AS 23.30.220 is repealed and reenacted to read:

Sec. 23.30.220 DETERMINATION OF SPENDABLE WEEKLY WAGE. Except as otherwise provided in this chapter, the spendable weekly wage of the injured employee at the time of the injury is the basis for computing compensation, and shall be the employee's gross weekly earnings minus payroll tax deductions. The gross weekly earnings shall be calculated as follows:

(1) if at the time of the injury the employee has been in the gainful employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing by thirteen the gross earnings said employee earned in the employ of the employer in that reporting quarter.

(2) if at the time of the injury the employee has not been in the employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing 100 into the gross earnings of the employee in the two calendar years immediately preceding the injury.

current act. (3) if the board determines that the gross weekly earnings at the time of the injury cannot be fairly calculated under (1) or (2) of this section, or cannot otherwise be ascertained without undue hardship to the employee, the gross weekly earnings for calculating compensation shall be the usual gross earnings for similar service rendered by paid employees under similar circumstances as determined by the board;

current but clear (4) if an employee is a minor or an apprentice, or a trainee, as determined by the board, when injured, and under normal conditions his wages would increase during the period of disability, this fact may be considered by the board in computing his gross weekly earnings;

(5) if the employee is injured while performing his duties as a volunteer ambulance attendant, policeman or fireman, the gross weekly earnings calculating compensation shall be the minimum gross weekly earnings paid a full-time ambulance attendant, policeman or fireman employed, at a reasonable figure previously set by the subdivision to make this determination and in no case may the gross weekly earnings for calculating compensation be less than the minimum wage computed on the basis of 40 hours work per week.

amend #4

* Sec. 31. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.227. OTHER BENEFITS. No compensation shall be payable to an employee under §§ 180 or 185 of this chapter for any week in which the employee receives unemployment benefits (AS 23.20).

* Sec. 32. AS 23.30.235 is repealed and reenacted to read:

Sec. 23.30.235 CASES IN WHICH NO COMPENSATION IS PAYABLE. No compensation under this chapter shall be allowed for an injury:

(1) proximately caused by the employee's willful intent to injure himself or to willfully injure another;

a high degree of proof in some to be need to prove for protection of employee.

(2) proximately caused by the employee being under the influence of an intoxicating liquor or drugs unless such drugs are being taken in quantities prescribed by employee's physician.

prev-Sec. 20 of 159

* Sec. 33. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of theft as defined in AS 11.46.100(3) and is punishable as provided in AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

* Sec. 34. The board shall publish Sections 32 and 33 of this Act in a booklet defining the employee's rights and obligations under the Alaska Workers Compensation Act. The booklet shall be mailed to an injured worker upon notice of an injury.

→ Support Leg. intent.

* Sec. 35. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "arising out of and in the course of employment" includes employer required or supplied travel to and from a remote job site; activities performed at the direction or under the control of the employer; and employer sanctioned activities at employer provided facilities; but excludes activities of a personal nature away from employer provided facilities.

Black's Law Dictionary

(30) "under the influence of an intoxicating liquor or drugs" means not only all well-known and easily recognized conditions and degrees of intoxication, but any abnormal mental or physical condition which is the result of indulging intoxicating liquors or drugs, and which, to an appreciable degree, deprives one of that clearness of intellect and control of himself which he would otherwise possess.

may be better definition.

See Title 17 for cross reference.

(31) "drugs" means a controlled substance or cannabis as further defined in AS 11.81.900. check new drug laws - make sure same number.

(32) "gross earnings" means recurring payments by employer to the employee for employment before any authorized or lawfully required deduction or withholding of funds by the emp'oyer, excluding irregular bonuses, reimbursement of expenses, expense allowances, and any benefit or payment to the employee which is not taxable to the employee during the pay period. The value of room and board to the employee may be considered in determining gross earnings for those employees with gross weekly earnings which are less than the Alaska average weekly wage at the time of injury.

(33) "payroll taxes" means the following:
check w update language - check with Dept. of Rev.

(a) An amount equal to the amount which would be withheld pursuant to withholding tables in effect on July 1 preceding the injury under the Internal ~~check date~~ Revenue Code of 1954, and regulations pursuant thereto, as amended, as though the employee had elected to claim the maximum number of dependants for actual dependency, blindness and old age to which the employee is entitled on the date on which he was injured; and,

(b) An amount equal to the amount required on July 1 preceding the
check for those who have opted out of SS
injury by the Social Security Act of 1935 as amended to be deducted or withheld from the amount of earnings of the employee at the time of the injury as if the earnings were earned at the beginning of the calendar year in which he was injured; and,

(c) And any other legislative mandated deductions including but not limited to ESC and FUTA;

(d) The Commissioner shall annually prepare formulas which shall be used to calculate an employee's spendable weekly wage on the basis of his gross weekly earnings, number of dependants, marital status and payroll tax deducations.

(34) "reporting quarter" means one of the 3 month periods (January through March, April through June, July through September, October through December) used to report employee wages to the Internal Revenue Service.

(35) "Suitable Gainful Employment" means employment which is reasonably attainable in light of the individuals age, education, previous occupation, and injury, and which offers an opportunity to restore the individual as soon as practical and as nearly as possible to his gross earnings as determined at the time of injury.

* Sec. 36. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), AS 23.30.191 and AS 23.30.265(20) are repealed.

* Sec. 37. AS 39.25.120 is amended by adding a new paragraph to read:

(20) the rehabilitation administrator of the Workers' Compensation Board.

* Sec. 38. This act takes effect July 1, 1982.

Alaska State Chamber of Commerce · HB159
Legislative Position Papers — 1982

WORKERS' COMPENSATION

Encouraged by the preliminary work of the legislature's Workers' Compensation Study Commission, the Alaska State Chamber of Commerce supports the commission's efforts to (1) improve the administration of the system, (2) make the compensation insurance program more competitive and (3) encourage changes in the rate-making process which would create more competition within the insurance industry.

The Chamber further believes that the commission's recommendations must also encourage realistic benefit revisions necessary to restore the incentive for injured workers to return to productive employment and remove the excesses in employers' workers' compensation costs.

ATT: Honorable Terry Martin, Chairman

RE: HB 159 - Proposed Amendments to the Current Requirements for Reporting to the Division of Workers' Compensation

Dear Representatives:

In the last session, the Legislature adopted in Chapter 59 of 1981 Laws (CSHB 94 (Fin)am) which, among other things, amended Section 155 of the Alaska Workers' Compensation Act to materially extend the requirements imposed upon insurance companies to file reports of current cases with the Workers' Compensation Board.

The legislation went into effect July 11, 1981, and spawned one of the most prolific paper burdens faced by the insurance industry today.

It will be the purpose of this letter to urge the Committee to include in HS 159 the attached proposed amendments which would have the effect of materially reducing the reporting obligations of insurance carriers to the Board, but will recognize the need for continuing the provision of relevant information to claimants.

It is my understanding that the Division of Workers' Compensation, shortly after the adoption of that amendment and I believe pursuant to some discussions prior to the legislative enactment of those provisions, developed an extremely complex computer system for digesting all of the reported information.

At the invitation of Jackie McLintock, the Director of the Division of Workers' Compensation, I visited their office and reviewed the computer system, watched it work and tested the data it contains.

Frankly, I must state to the Committee that the computer system works well, provides a wide array of information and is basically a well conceived interacting data processing system for manipulation and presentation of the data that goes into the computer. Although I am frank to admit the workability of the system, I have no information as to its cost or as to the practicality of its function except as I will set forth below.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Shortly after the adoption of the legislation, the Division of Workers' Compensation promulgated some early proposed instructions on how to prepare the necessary forms to make the system operative. The book which is 107 pages long explains in intimate detail how to fill out each of the blanks on each of the several forms.

Even with our limited experience in handling workers' compensation claims under the new system, we can tell you that the precision that is required in filling these forms out and the time consumed in answering the several questions contained on these complex forms is enormous. There is even a provision in the statute and implemented by the Division's set of instructions that requires a form be filed on the anniversary date of the claim even though there has been no change in the status of that claim.

We have two very serious concerns about this new law and the way it is being administered:

1. There is an overriding major concern which we have concerning the recent activities and proposals from the Division of Workers' Compensation and the Board. It is our belief that primary responsibility for the day to day management of all workers' compensation claims lies with the insurance carrier or the self-insurance workers' compensation claims administrator. The Division of Workers' Compensation should exercise its responsibility to resolve disputes through the Board hearing process. We also recognize that the Division of Workers' Compensation has a responsibility to assure that the system is working equitably.

   Although we recognize that the Division has specific complaints about particular insurance carriers' handling of some claims, or the handling of some claims by workers' compensation self-insurance claims administrators, we believe that on balance most all of the workers' compensation claims in the state are being handled quickly and fairly and in accordance with the law. The Division of Workers' Compensation has authority, as does the Division of Insurance, to investigate insurance carriers and workers' compensation self-insurance claim administrators and to review claim files to determine that they are being handled properly, and we believe that to be a more effective enforcement mechanism than inordinate reportings by all carriers in all cases.

   We reject the notion that the Division of Workers' Compensation should thrust itself into the position of becoming the entity primarily responsible for assuring the rights of the injured worker. If that is carried to its logical extreme, the Division of Workers' Compensation will have as many claim adjusters as there are in the whole industry.

It is our view that the Division of Workers' Compensation, the Board and the Division of Insurance need to have the ability to audit for compliance with the laws and the tools to enforce the laws, but they should not be put into the position of usurping the responsibilities of the private insurance sector in the day to day handling and administering of a very complex act.

2. The whole new reporting mechanism is adding a substantial burden of time and expense to the already expensive cost of handling a workers' compensation case. This additional cost must be loaded into the price of workers' compensation insurance and passed on to the employers. This ordinarily would prove to be no problem to the insurance carrier, however, we are concerned that with the substantially increasing costs on the benefit side of the premium dollar, more and more employers are being forced into alternatives to purchasing workers' compensation insurance. While we cannot attribute last year's legislation and the implementation by the Division of Workers' Compensation concerning these reports as the sole contributing factor to these phenomena, we have observed that the overall increase in cost for workers' compensation has driven employers to either:

   a. Ignore the law and not purchase workers' compensation insurance;

   b. Force themselves in some way to qualify for self-insurance status to avoid having to purchase insurance;

   c. Become involved with groups or alternatives to purchase of single insurance with questionable financial responsibility, or

   d. In some cases go out of business.

While we recognize that there ought to be periodic reconsideration of the benefit structures and a balancing in light of new public policy of the interest of the injured workers against the cost to employers, we do not feel that it is appropriate to continually increase the expense of the system unless there is some compelling reason to impose new administrative burdens.

We are, of course, concerned that in the last month or so in which the reports have been submitted to the Division, I have been given to understand that the Division has returned forms for minor technical errors and has indicated to the insurance carrier that until the forms were resubmitted correctly the penalty periods would be running. The impact is that for minor technical flaws in filling out the report an insurance carrier could be subjected to severe financial penalties.

We think it is ludicrous that an insurance carrier could be penalized more for failure to submit a report to the Board than for failure to submit the payment to the injured employee.

I have made some effort to try to determine what value this new computer system offers injured workers in the State of Alaska or the Division of Workers' Compensation.

The Division is quick to offer several specific examples of how they have been able to use the terminal access facility to answer questions of claimants who make phone calls to the Division. They also indicate that at some point in time the computer system will enable them to digest data for statistical purposes and also enable them to have immediate access to benefit history for a claimant in order to evaluate compromise and release agreements and other matters coming before the Board.

We believe that the limited value derived from having the computer available does not warrant its substantial expense.

Values of The System

1. Ability to answer claimant's questions.

   It is indeed of some value to have access to the history of claim payments when a claimant asks a question of the Division of Workers' Compensation. It should be observed, however, that first not all of the claim payment history is or ever will be in the computer since only changes in payments are required to be reported except at anniversary time. Accordingly, when claimants call prior to an anniversary date only inadequate data will be on the computer and it still will be necessary for the Division to refer a claimant to his insurance carrier to get the full information. Furthermore, the frequency of claimant inquiries at the Division, which they regard as substantial, is miniscule when compared to the number of injured workers in the workers' compensation system.

2. Statistical Data

   It is true that the Division has been asked by the legislature and by interested groups to provide statistics on frequency and severity of loss by different classifications in the State of Alaska. In fact, while I was Director of the Insurance Division, I argued that the Division of Workers' Compensation should have that information and in the Richard L. Block & Associates' report of 1980 I recommended that the Division have access to that information. My position in this regard has not changed, and I believe it is appropriate that the Division be able to accumulate relevant statistical information on accident frequency and severity. The computer system which they have devised certainly has the capacity for accumulating that data,

but I would point out that absolutely none of the interim reports filed by the carrier contribute in any way to that information. The only information submitted by a carrier which could be used for statistical purposes is the first notice to the Board of the existence of the accident and the last report filed by the carrier which gives a complete description and evaluation of payments, benefits, cause of loss, etc.

3. Ability to evaluate the propriety of compromise and release claims and other inquiries made by the parties.

The value that the computer will have to determine the propriety of matters coming before the Board on specific cases is, at best, questionable. The fact is that compromise and release claims are submitted to the Board for a variety of factors only a minority of which have anything to do with the amount of payments which have in fact been made to date. A compromise and release agreement submitted to the Board must be approved on the merits of each individual case based on information only some of which will be statistical or financial submitted by the employer and the employee. It is ludicrous to establish a complex computer system to accumulate data on every single claim processed in the State of Alaska in order to provide a facility to approve the few lump-sum compromise and release agreements submitted to the Board when those submitting those agreements can provide that information themselves.

Cost of The System

There is little available information on the true cost of operating this computer system, however, a review of the Division's budget would indicate that there are several employees either in the Division of Administration or in the Division of Workers' Compensation who have dedicated their time to processing the paper work to make the computer system operative.

In addition and not reflected in the Division of Workers' Compensation's budget is the computer time and computer programming costs which would be more properly buried in the Data Processing Division's budget.

Further, there is the time of employees devoted to working the system for interested inquirers.

I have been advised by Jackie McLintock that they are up to date currently in processing the paper work which has come in; but, as the system becomes more mature and claim frequencies increase, there is going to have to be a substantial additional burden placed on the Division of Workers' Compensation to process all of these reports. After all, if there are to be three or four reports for every claim, then the claim

processing capabilities of the Division of Workers' Compensation would have to essentially be equal to the claim data processing capabilities of all of the carriers processing workers' compensation claims in this state at any point in time.

It is our conclusion that this expense, whatever it may be, is not justified to obtain the limited benefits which are gained from that system.

There are some other issues upon which I can only speculate.

I did observe in reviewing the system that there is a substantial amount of confidential information in the computer. I am troubled by the fact that because it is in the possession of the State it comes under the freedom of information provisions and thus the privacy of every workers' compensation claimant is potentially violated. It is possible, for example, for anyone to go into a Department of Labor office and ask for information concerning a claimant and find out his wages, what physicians he has been seeing in connection with his injury, what his workers' compensation entitlements are and other pertinent information, all of which would not be available if the information were not filed with the State.

I was interested to observe also that the Division is maintaining a master list of attorneys and keying each attorney into the cases he is handling. It is thus possible to write a program to access a report showing all fees paid to the lawyers in the State, who their clients are and other information which I believe the members of the Bar would be concerned to learn is now publicly available information. Each lawyer is now designated in the system as an employers' lawyer or an employees' lawyer.

A further collateral issue has to do with the maintenance of the law digest portion of their program.

Frankly, the work done in preparing the law digest function on the computer appear to be extremely well done, and they are to be complimented for putting together a very good program. My concern is not that they have built this aspect of the system, but rather they have concentrated their efforts on making available to their own internal staff an excellent means of accessing opinions of the Workers' Compensation Boards in order to help draft future opinions, but they have devoted no time whatsoever to making printed versions of the workers' compensation opinions available to anyone else.

The history of access to Board opinions in this regard is that for those lawyers who had contacts with the Juneau office, photo copies of mimeographed versions of their opinions could be obtained; but no one else in the State could have access to them except the parties to each case. Now I understand that the Juneau office will not make them available even to lawyers in Juneau. This means that the Board intends to rely on prior cases in drafting its future opinions, but the lawyers who must argue before the Boards will not have access to those opinions in any way. It seems to me that it would be more appropriate for the Division of Workers' Compensation to have created a facility to make the opinions available to a private publishing firm in Alaska, who could have developed the digest and made it commercially available to all lawyers and other interested parties. It may be that the Division is considering making the opinions and the digest available to interested parties which would be a step forward, but it strikes me as completely inappropriate that such a function that could be well done by private concerns is being done by a state agency.

Alternative Suggestion

While I believe it is inappropriate for the State to be accumulating this information, there are certain things which I do believe are appropriate for the employee to have and it is interesting to note that no one has drafted any statute requiring this information be made available to the employee. It is true that in the set of instructions promulgated by the Board, they ask that the original report go to the employee.

It is further our concern that the reports are so complex that in their current form they are probably more confusing to the employee then they are helpful.

I attach a proposed alternative to be included in Section 155.

Its salient points are these:

1. The carrier must report to the employee at every change in compensation.

2. The form upon which such reports are made to the employee must meet minimum standards established by the Board but are not prepared on Board forms. This will permit each carrier to design a simple form which meets minimum standards but which are readable and understandable by the claimant.

3. There are penalties imposed upon the carrier for not submitting the reports in a timely fashion, but instead of the penalties being automatic they are imposed upon application by the employee, are paid to the employee and are determined ultimately by the Board.

4. The Board will receive only a first notice from the carrier acknowledging receipt of some information concerning the existence of a claim and a final notice which provides whatever statistical information the Board believes is relevant to monitoring the workers' compensation system. This, of course, is in addition to the notice of injury submitted by the employee.

It is our opinion that with the information the Board will be in a position to know all claims have been acknowledged by a carrier and who that carrier is, enabling the Board to refer an injured worker to the proper person handling the workers' compensation claim should any inquiries come to the Division of Workers' Compensation.

Under current law, which we do not propose be changed, an injured worker could file a specific request for hearing before the Board on their workers' compensation claim if they feel they are not being treated properly by the carrier, or may file a claim with the Division of Insurance to investigate whether the insurance company is properly handling the workers' compensation claim and giving it its due attention.

All of the interim reports currently required by Section 155 to be filed with the Board by the carrier would be eliminated.

We regard the change in direction as extremely important and hope the Committee will see fit to adopt the proposed amendment.

Yours cordially,

Richard L. Block
President

RLB/crl

23.30.155 (c) Repeal

23.30.155 (h) Repeal

23.30.155 (m) Repeal

23.30.155 (g) Add

(i) Within 14 days after receipt of any document which evidences the existence of a claim under this Act, the employer or carrier shall file with the Board and provide to the employee an acknowledgment of claim which shall be on a form prescribed by the Board and which shall be for the purpose of providing both the Board and the claimant with the name and point of contact in the state of Alaska for information concerning the claim, proposed disposition of the claim, and claimants rights and entitlements under the Act.

(ii) The employer shall notify the claimant of any change in compensation to be paid to claimant. The notice shall be delivered to claimant within 14 days after a last payment before termination or suspension of payments, or with any payment that is less than, more than or being paid pursuant to a different statutory entitlement than any previous payment or which is a resumption of payments. The notice shall be on a form prepared by the employer but which meets minimum standards set by the Board and shall contain:

1) Nature of the change in payment.

2) Reason for the change.

3) Amount of the change.

4) Method of calculation.

5) Statutory entitlement being paid, terminated, suspended or modified.

(iii) Within 14 days after final payment of compensation has been made, the employer shall send to the Board a notice on a form prescribed by the Board stating:

1. Reason for closing the case

2. Total amount paid for compensation, medical, rehabilitation and allocated loss expense.

3. Other statistical information as is necessary to determine accident frequency and severity, trends, and which is prescribed by regulation.

4. Other information which the Board determines necessary to properly administer the workers' compensation system.

(iv) If the employer fails to notify the employee, the Board, upon application of the employee, may assess a civil penalty, payable to the employee of up to $100.00 for each notice not timely rendered.

As of 10-79	$ 554,828
As of 10-80	902,697

The question is often raised, "Weren't we over-reserved when dividend shares were first distributed?" The answer is, **"no!"**

The original reserve for incurred, but unreported claims (variations in claims values, unreported claims) was 12%. As of October, 1981 the shortfall in reserves for 1977 amounted to a net 15% after deducting the incurred-but-unreported original reserve. Who makes up the difference? The insurer. This is done through investment earnings on the reserves held for the account of the Group. Certainly, if this income merely decreases the loss short-fall, it certainly cannot be considered a profit to the insurer.

As of October, 1981 the 1977 Group Year carries 21 open cases valued at $554,000, all of which are still in the medical care stage of development. Next year the medical fee schedule will increase by 33% as a result of medical fee price fixing action in 1981.

Why aren't all claims for 1977 closed? Lots of reasons, mainly due to the character of the injuries themselves. Take the case of the driver who overturned and went off the road in a blizzard in December 1977. His nearly frozen body was found half a day after he was trapped in his truck with head injuries. The extent of his injuries took nearly three years to assess. Permanent brain damage requires institutional care for the rest of his life. The injury is irreversible. Lifetime medicals, lifetime pension, and ultimately, a death benefit. The man is 47 years old, otherwise physically in fairly good shape. What began as a routine frostbite and anoxia case turns out to be a massive neurological disability.

The CMSA Group Isn't The Only Victim Of Claim Maturation.

The California 8293, Mover's, Classification experience over the years shows a constant picture of upward cost development each year. Here is a seven year history disclosed by the California Workers' Compensation Insurance Rating Bureau:

Year	Six Months After Year End Loss Ratio	Thirty Months After Year End Loss Ratio
1971	40.8%	56.5%
1972	45.7	57.9
1973	46.1	45.0
1974	46.5	64.5
1975	52.6	68.4
1976	54.8	63.8
1977	58.3	65.2*

*Only 18 months development

Five Percent Of Mover's Injury Claims Cost Two-Thirds Of The Money.

Severe injuries, deaths, permanent partial and permanent total disabilities comprise only about 5% of all reported work injuries in the moving industry. Yet the dollar outlay for their care involves twice as many claims dollars as are involved in the other 95% of the injuries. The four major causes of loss in the moving industry are:

Strains, sprains including back:	38.3% of cost
Struck by, striking stationary objects:	5.3% of cost
Falls:	16.2% of cost
Moving vehicle accidents:	12.2% of cost

Vehicle overturns generate the largest individual claim cost, ($23,300 each on the average), striking fixed objects claims are at the lower end of the disabling injury average claims cost scale ($400 each on the average). Non-disabling claims, so-called medical only claims, represent 54% of all occurrences, currently cost an average of $157.

Nothing is inexpensive in the injury business. That's why renewed effort at loss frequency and severity reduction is imperative. The progress shown in the 1979-1980 year as well as the industry as a whole, despite inflating costs of services and benefit increases. How do you accomplish this objective? Better activity planning, preventative oriented supervision, training, and fitness (qualification).

How Do You Cope With An Insurance Subject In Which The Cost Of Goods Sold Cannot Be Determined For Years After The Service Has Been Sold At A Fixed Price?

At times it seems that all insurance executives are finance experts. It all looks so easy. If it is so easy, why are most of the nation's major insurers and a large number of the not-so-great companies suffering substantial underwriting losses? Inflation beats out the rising cost of claims after the protection has been sold. To offset the impact of inflation on claims costs, many insurers have made heavy investments in the short-term high earnings money market. Mostly in U.S. Government paper. What is going to happen as short money earnings continue to fall? Plenty. All the cut rates will disappear, it will be back to paying claims out of underwriting, not investment earnings. For a lot of folks that got highly discounted deals from companies using cash flow to fuel competitive strategies aimed at cornering all the cash, there is going to be a considerable shock. There will be no free lunches for the buyer, and the sellers will have

to retreat from the market, their surplus in jeapordy.

Competition can be a great leveller, a destroyer. The extent to which the cash-flow insurance theorists are going reflects their desperation. Take the hysterical effort to get open workers' compensation rating. Most of the insurers clamoring for open rates have never made a case for displayed ability to earn a consistent underwriting profit through good claims management and through efficient administration. Deferred payment plans, cash-flow plans, paid-loss-retrospective plans are systems which appeal to those who believe that there is money to be made on reserves. Large buyers may be benefitted, but at the cost to small insurance buyers. By reducing the spread of risk, economically, by distorting loss information upon which any rate system depends through impecunious claims management, the smaller buyers will suffer.

For years the objective of insurance company regulation was centered on the idea of maintaining solvency of insurers. Today the prevailing idea is that freedom of enterprise must prevail—freedom to compete and freedom to fail. The idea became fashionable as insolvency guarantee associations emerged that require surviving insurers to pick up the losses of failing and insolvent insurers. And so the number of endangered insurers have increased as weak small competitors emerged and conglomerate manipulation of well-established companies raped conservative companies for cash-flow profit. The quick buck, easy solution business is flourishing.

What this all has to do with the Group is simply this. This Group is the alternative to buffeting by all the side shoe deals that wax and wane in the industry.

Group starts out with protecting the equities of the buyer, not the fueling of impossible cross subsidies of insurer's cash-flow dilemmas. It provides quality services, stability, a constant, fair division of underwriting profits on a clear, clean-cut basis, and provides you, as a buyer, with expertise and performance overview that counts. Your Group operates through a system of contractual arrangements with an insurer that makes a commitment to support your Association's objective of a lower net cost system of outstanding protection quality. A lot of the companies now looking at your business today were in hiding years ago. They only come out in the fair weather. Look at their long-term actual performance records, then compare what our Group has done for your industry. Your Group can give more bang for your protection dollar than anyone—even the government-owned, non-profit, non-taxpaying enterprises. Your continued support of your Group means your Group's continued support of your interests. Our plan is working!

California Leads The Nation As User Of Work Comp Benefit System.

The California Workers' Compensation Institute reports that 15% of the nation's work injury benefits were paid to California workers, with a $1.422 **billion** outlay in 1979. Nationwide the payout for job injuries totaled $11.9 **billion**, up from 22% the previous year.

Drawn from Social Security research, the study deals with paid claims only, not incurred but unreported or other reserves. Tracking of work injury payments by the federal agency began in 1949. About 20% of all work comp benefits paid in the nation are covered by federal work injury programs.

Rand Institute Releases Its Report On "The Law And Economics Of Workers' Compensation".

The Rand Corporation performs independent objective policy analysis and research on a vast range of subjects, including the Civil Justice System. The report does not attempt to establish a public policy position but it does identify issues about which more should be learned. One conclusion of the report is that the dream of a self-administering system has not been realized because state agencies have not sufficiently participated in clarifying statutes and settling disputes. The clear inference is that litigation has become a popular pastime in the comp business, that's why sharper legal definitions and statutes are never realized. The report cites the fact that 17% of the cost of benefits paid go to the adjudication process. The view of the Rand people is that many workers, weary of the litigation of comp claims are looking to other social insurance programs instead for benefits.

The researchers point out that most of the alternatives to the existing system aren't so hot, either. For example, Tort suits against employers. Suits against third parties. All of which would please the legal profession but put greater distance between the injured worker and basic benefits when he most needs help. Linda Darling-Hammond and Thomas Kneisener, project authors, identify areas in which answers must be found before true work comp reform can be realized:

1. How do the practices of various actors within the system – administrators, insurers, employers, lawyers, employees, and unions – affect the system's outcome, (e.i., who pays and is paid, how much is paid and how promptly)?
2. How do statutes, administrative rulings, and judicial interpretations of the laws affect the outcomes of the system?
3. How do the rules that govern compensation affect the behaviour of the key actors? How do the actors seek to cope with uncertainties created by changes in the rules?

In 1982 there is a strong likelihood that another attempt will be mounted to reform the California Workers' Compensation System. If you would like more information about the findings of the Rand research, write Rand Corporation, 1700 Main Street, Santa Mon-

ica, California 90406 for information about their report R-2716/1CJ.

Year before last when State Senator Greene introduced his bill that was aimed at "making all the changes that would be required for the next 20 years" the only result was a substantial increase in benefits with no reform over the judicial process. Regarded in the Legislature as a matter too technical, even for legislators, the tendency has been to relegate change to the lawyers, the unions, and the government itself. What this Group seeks is to establish an effective advocacy in behalf of employers who are supposed to fund the benefits which must and should be paid to the legitimately injured with as little need for outside predators as possible. How about it? Are you ready for mounting an effort to be heard? **Support your Group, urge your peers in the moving industry to join.**

Promptness Of Payments Semi Annual Report.

The Department of Industrial Relations released its January to June, 1981 ranking of insurers and self insurers as to the promptness of first payments.

Long recognized as the critical point in which the injured worker makes the decision whether to approach his injury benefit needs on an adversary basis or on a basis of understanding and trust in the system that's supposed to operate simply, the fourteenth day following the injury is pretty important. If the worker doesn't get his first disability benefit payment by the fifteenth day, the odds are he'll get help—and that seldom includes help from a concerned employer. In 104,181 disability cases handled between January and June this year, the average number of days from disability to first payment was 19.4. The law expects the first payment will be made within 14 days. The previous six months record was an average of 18 days.

Your Group urges you to report all claims promptly. Without your report, nothing happens. If you really care, check with your injured, off duty employee to see if his benefits are coming through. If not, call your responding Claims Office or your Agent of Record. Late claims bear with them a penalty loading of 10% of the delinquent benefit. If you don't report promptly, you have no complaints when your loss costs increase. If you don't tell us when the insurer isn't apparently doing his job, we can't free up snarls. Don't wait for the doctor's first report. Simply complete the claim form and get it in. If you are short details, say so but send what you have and let us follow through. **Follow the Action Plan** in your Information To Members Booklet. If you have questions or unusual problems, let's hear about them early on. It will save you a lot of money. **Get involved, stop being a mere spectator.**

EYES LEFT!

As the 1980 legislative products of California pass in review one of the late items to graduate into law may be the harbringer of substantial increases in workers' compensation benefits next year. Senate Bill 347 (Greene) amends the Unemployment Insurance Code Section 2655 to read "weekly benefit amount from $30 to $154 to $50 to $175." That pretty well establishes the level to which permanent partial disability benefits and permanent total disability benefits will rise. If this comes to pass without any restraint or better definition of disability conditions or judicial process and review reform, the cost of just one benefit increase could represent as much as a 22% increase in insurance rates. It is difficult to argue that the truly disabled are seriously disadvantaged in the growing spread between actual wages and time-loss benefits earned while unable to work because of a job injury. But what worries everyone is that no one can yet establish, without extensive litigation and arguments in a judicial environment that shuns precedential rule making, just how injured someone is. Doctors disagree, lawyers disagree, insurers disagree, employers disagree, and suddenly the injured worker is the hostage in a system in which everyone but him profits from the uncertainty of it all. Your Group works hard at minimizing the costs of claims, increasing the promptness of benefit payment, and attempts to inform Group Members of the reasons behind questioned conclusions. Your average insurer is interested in moving claims as fast as possible, and is protected by a minimum rate law that raises the ante as costs rise. Your Group doesn't have votes. You do. You can first vote for a safe workplace or you can vote for rising costs. You can't vote or cause to be enacted effective reform legislation unless you are informed and properly led. You need the leadership of your Group, your Association. Your equities in the system aren't going to be protected by anyone else.

Group Renewal For 1981 Under Way.

Your Association has filed its statement of intent to renew the CMSA Group under the underwriting management of the Truck Insurance Exchange with the Department of Insurance and the Workers' Compensation Rating Bureau.

Renewal face sheets should be in the mail prior to December 1, 1981, together with new manual rates. Members should contact your Group by telephone or by mail to indicate changes of address, changes of ownership, or additional workplaces.

Also, if Members have changed accounting firms, the Group should be notified so that a new audit authorization can be prepared for signature.

If you require new **Information To Members** booklets, additional **Action Plan** cards, or claims supplies, call or write your Group Agent of Record, L.E. August, at (213) 986-4610, PO Box 256, Encino, California, 91316. Your Group is now beginning its fifth consecutive year of service to the Members of CMSA.

INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

One

SUBSTANCE:

Grants specific authority to file and use a deductible workers' compensation policy.

POSITION:

Not opposed to the substance but redrafting is indicated.

ACTION:

Obtain redrafting of the language then do not oppose.

BACKGROUND:

This company has already filed and obtained approval for a deductible plan; this provision is not objectionable. The provision is more appropriately found in the Insurance Code with some language revisions.

SUGGESTED ALTERNATIVE:

SECTION 1: AS.21.42. is amended by adding a new section to read:

> "21.42.165 - An insurer issuing a workers' compensation insurance policy pursuant to AS 23.30.025 may contain a provision requiring the insured to pay a portion of the benefits due under AS.23.30. provided the provision making that requirement has the prior approval of the Director and provided further the policy provides that as to the employee and the Workers' Compensation Board the policy meets all the requirements of 23.30.025 and 23.30.030. Filing for apporval under this section is not a deviation under AS.21.39.070.

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTIONS

Two through Eight

SUBSTANCE:

Substantially modifies the approach to providing rehabilitation benefits.

POSITION:

Opposed.

ACTION:

All of the sections must be removed from the bill. If the sections are not withdrawn from the bills the bill must be opposed. Preventing adoption of these sections is considered of highest priority.

BACKGROUND:

Rehabilitation has always been regarded as an important part of the workers' compensation system, however, there has not been agreement as to what constitutes effective and reimbursable rehabilitation programs.

Typically, rehabilitation is provided where it is believed vocational retraining will return the injured worker to the level of gainful employment enjoyed prior to injury in a work setting as closely approximating his work setting prior to injury as his new physical condition will permit.

On the other hand, there are those who believe that the rehabilitation program ought to be used to reorient the injured worker to a life or work style unnecessarily different from that he enjoyed prior to injury.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

To develop appropriate cost effective and responsive rehabilitation programs, most carriers use professional rehabilitation counselors who determine the need for, and probable value of rehabilitation programs, develop plans and implement them, all at the expense of the employer.

This legislation would usurp the primary responsibility for making professional determinations concerning rehabilitation from the trained professionals operating in and funded by the private sector and transfer that responsibility to a new, unqualified and expensive state bureau at an initial cost of over one quarter of a million dollars.

More particularly:

Section 2 removes any limit for rehabilitation benefits paid from the Second Injury Fund at the same time the Board is granting full temporary total benefits to workers while they are on rehabilitation.

Section 3 establishes a set of principles to guide rehabilitation efforts. While the principles are essentially not objectionable, they are of no value in a statute unless other statutes in fact accomplish those objectives. It is our view that the other sections do not tend toward the intended objectives.

Sections 4, 5, 6 set up the bureaucracy to implement the intended objectives. The Director of the Division of Workers' Compensation testified that the initial cost to the state would be $350,000. It is our belief that the more difficult to assess but substantially larger cost would be in the increased costs to employers to fund unnecessary, premature, redundant, ill conceived or unwelcome rehabilitation programs designed and mandated by state designated rehabilitation specialists.

Section 6 [23.30.041 (b)], further provides that the Rehabilitation Bureau may impose a rehabilitation program when ever it deems it appropriate which could be in every permanent total disability case. The costs which could be imposed under this and following subsections could be astronomical. They include:

a) Extention of the rehabilitation program beyond the first 37 weeks at the direction of the rehabilitation administrator with no defined limit.

b) Travel to and lodging at any location away from the employees residence for the full rehabilitation period.

c) Temporary total benefits for the full period of rehabilitation.

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Eleven

SUBSTANCE:

Adds a new subsection to give the Board specific definition of permanent impairment.

POSITION:

Not opposed.

ACTION:

No action except to seek modification as indicated.

BACKGROUND:

The Board currently has no specific guidelines for determining the degree of permanent impairment. The proposed section would give the Board authority to establish a schedule for determining the existence and degree of permanent impairment. We believe that the authority to adopt such a schedule is a useful device to add certainty to the system. We would urge however that giving the Board carte blanche authority to adopt a schedule without guidelines is inappropriate.

The Board is currently using, without specific statutory authority to do so, the American Medical Association Guide To Permanent Impairment, a document to which the American Medical Association has devoted a great deal of time and study. We believe this is a satisfactory, impartial, fair, easy to administer, and objective definition of permanent impairment and one with which the medical profession, which must actually render the impairment ratings, is familiar.

We believe that the Board should be directed to use this standard.

SUGGESTED ALTERNATIVE:

We would urge the language be modified as follows:

> "(j) the board shall adopt and use the American Medical Asociation Guide To Permanent Impairments as the basis for determining the existence and degree of permanent impairments".

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Twelve

SUBSTANCE:

Requires an injured employee to grant specific authority to release medical information to the employers, carriers and so forth.

POSITION:

Favor, but would suggest an improvement.

ACTION:

Seek an improvement in the measure, but support in any event.

BACKGROUND:

When a workers' compensation claim is filed it is necessary for the insurance company to obtain medical information from the treating physicians, examining physicians, or physicians who have rendered medical care in prior cases for the injured worker.

Doctors are understandably reluctant to give out medical information without having a specific release from the employee in order not to violate their responsibilities of privacy.

This statute requires the employee to execute whatever authorities are required by other physicians in order to obtain release of medical information.

We believe that this is an important addition to the workers' compensation statute.

SUGGESTED IMPROVEMENT:

If a provision were placed in the law which had the effect of pro tanto granting the authority would eliminate the need for getting specific written authority and protect the physicians and hospitals.

Further, the authority in the proposed language relates to medical information only relative to his injury.

It is vital that we have access to medical information concerning prior medical treatments.

7021 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

For example, it is relevant to any adjustment of a case for injury to the employee to have access to medical records concerning prior injuries or prior illness since it bears on the method of handling the medical treatment of the existing case.

We would suggest the following language:

> "Upon the filing of a claim under this Act an employee thereby authorizes all providers of medical treatment pertaining to the injury or rendered prior to the date of injury to release information to the employer. If requested by the employer, the employee shall execute all releases to facilitate access to that information."

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTIONS

15 & 32

SUBSTANCE:

These two sections of the bill change the degree to which the presence of alcoholism or drugs can defeat the injured employees rights to compensation.

POSITION:

Support.

ACTION:

No action.

BACKGROUND:

These two sections read together change the burden of proof for the employer with respect to alcoholism from the requirement that they demonstrate liquor solely caused the accident to liquor proximately caused the accident, and adds a similar provision with respect to drugs.

We have some cases in which alcoholism was definitely present and a contributing factor to the accident, however, it is clearly the case that no single factor could ever be argued as the sole factor in a accident.

If we could demonstrate that although it wasn't the sole factor it was the proximate cause of the accident it would be useful in defeating some alcoholism and drug related claims.

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Seventeen

SUBSTANCE:

Same as Section 11 of CSHB 159 (Sofo) January 25, 1982.

ADDITIONAL COMMENT:

We would point out that if the Legislature is concerned about those carriers which will offset for over payment or advance payments by making no payments at all, we would not be adverse to a provision which reads as follows:

> "(j) if an employer has made advance payments or over payments of compensation, he is entitled to be reimbursed, out of any unpaid installment or installments of compensation due up to an amount equal to fifty percent of each of the subsequent payments. If the employer seeks to offset by more than fifty percent of subsequent payments such additional offsets require the prior approval of the Board."

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Eighteen

SUBSTANCE:

Authorizes lump sum payments.

POSITION:

Support.

ACTION:

Support.

BACKGROUND:

This is similar to Section 12 of CSHB 159, January 25 (Sofo), with this material change; the legislature has added the words "and the parties agree". This means that if the parties agree the Board may authorize the lump sum payment but it cannot do so without the parties concurrence. This was my principle concern with the drafting in the other bill.

IMPORTANT DRAFTING NOTE:

In Section 25 of the proposed legislation there is substantial modification to AS 23.30.190. They neglected to remove the last phrase of subsection (20). In view of the adoption of this section in the bill the last phrase in subsection (20) is unnecessary and should be removed.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

19, 23, 24, 26, 27, 28 & 29

SUBSTANCE:

Makes changes to reflect a change basis for calculating benefits from 66 2/3% of gross wages to 80% of spendable wages.

POSITION:

Support.

ACTION:

Support.

BACKGROUND:

Changing compensation from 66 2/3% of a workers gross wages to 80% of his spendable wages will probably have salutory effect on the benefit levels particularly with respect to higher wage earners.

The exact magnitude of the savings to be effected by such a change cannot now be determined but it is believed that there will be a reduction in benefits as a result.

SUBJECT: Worker's compensation
(CSHB 159 (L&C))

TO: Representative Terry Martin
Chairman, House Labor and
Commerce Committee

FROM: Billy G. Berrier
Director
Division of Legal Services

Paragraph (e) on page 4, lines 17 to 20 of the bill provides:

> (e) The employer and employee may agree on a vocational rehabilitation plan. If the employer and employee fail to agree on a vocational rehabilitation plan, a plan may be filed for approval with the rehabilitation administrator.

The second sentence is in the passive form and does not indicate who can file a plan. This leaves an ambiguity.

I have left the paragraph as it is since I understand final determination of who can file a plan has not been made. When that determination has been made the paragraph should be corrected to reflect the decision of the committee.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

1. Assumes an inflation rate of 10% per annum after FY '83.

2. Assumes an effective date of July 1, 1982.

3. The total cost for FY'83 for the four new positions is detailed on attached forms 13. In addition the following items are included in the FY '83 costs.

JUSTIFICATION:

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

The rehabilitation administrator is necessary to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

Extensive travel within the state is necessary to provide assistance to approximately 12,000 employers in developing programs for re-employment of injured workers and coordinating counselor services with workers, insurers/employers, labor unions, and rehabilitation providers.

9. Travel: $10,000 (20 trips @ $500 per trip)
10. Contractual: Space $3,100 (to be transferred to DOA)
Auto Lease & Operating Costs $5,600
Indirect (11.46% x 44,568 = $5,107)
Other costs which include communications, equipment rental, etc., $1,800
11. Commodities: Cost per position
12. Equipment: Desk, desk chair, side chairs, bookcase, file - $1,600

Court orders equal spouses' benefits

By JERRY GEISEL

RICHMOND, Va.—A federal appeals court ruling mandating equitable pregnancy benefits for spouses could boost thousands of employers' health insurance costs.

In a case with national significance, the U.S. Fourth Circuit Court of Appeals said Newport News Shipbuilding violated the 1978 Pregnancy Discrimination Act by refusing to provide equitable pregnancy benefits to wives of male employees in its group health insurance plan.

The appellate court decision is a victory for the Equal Employment Opportunity Commission. It had appealed a lower court decision that said the Pregnancy Discrimination Act only requires employers to offer equal pregnancy benefits to employees—and not to employees' spouses, too (*BI*, Feb. 23, 1981).

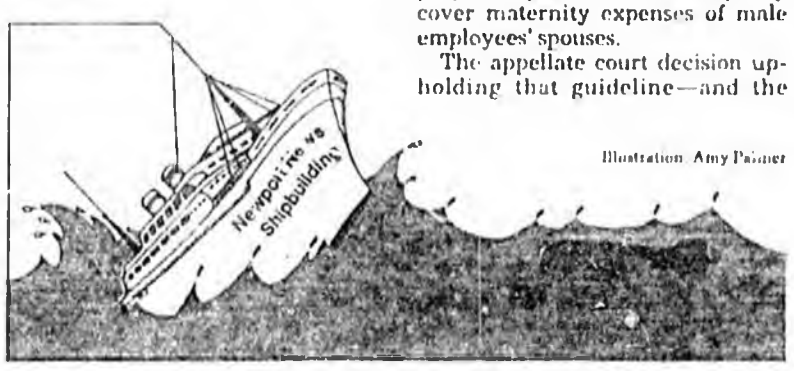

Illustration: Amy Palmer

The EEOC says if an employer's health insurance plan covers the medical expenses of female employees' spouses, it must equally cover maternity expenses of male employees' spouses.

The appellate court decision upholding that guideline—and the first appellate level ruling on the Pregnancy Discrimination Act—is a costly blow to employers, like Newport News Shipbuilding, that said EEOC had no legal authority to require equitable pregnancy coverage for male employees' wives.

Newport News Shipbuilding, which has asked the appellate court to reconsider its decision, says equalizing pregnancy benefits for male employees' wives will hike the company's health insurance costs about $700,000 a year, said Bob Ponton, manager of equal employment opportunity for Newport News which has 23,000 employees.

Nationwide, the cost of equalizing spouses' pregnancy benefits could run into the tens of millions of dollars for the thousands of employers who do not provide equal pregnancy benefits in their dependent health insurance plans.

"We are talking about massive amounts of money," said Steve Bokat, senior labor counsel for the National Chamber Litigation Center in Washington, D.C.

Employers' dependent health insurance premiums could rise 3% to 14% if they were forced to provide equitable pregnancy benefits for spouses of male employees, according to insurance company actuaries. Firms with predominantly male workforces would face the greatest increases.

However, employers who r...

Continued on page 31

Court orders equal benefits for pregnancy

Continued from page 1

quire their employees to pay some or all of the cost of dependent health care coverage would be shielded from much of this cost.

Although the appellate court decision only applies in Maryland, North Carolina, South Carolina, Virginia and West Virginia, where the 4th Circuit Court has jurisdiction, it could be cited as a precedent in other states where the EEOC is suing employers for failing to provide equitable pregnancy benefits.

For example, EEOC is suing Emerson Electric Co. because the St. Louis, Mo.-based electronics giant's group health insurance plan provides greater benefits to husbands of female employees than to wives of male employees (*BI*, Sept. 7, 1981).

And with the appellate court victory under its belt, the EEOC will continue to sue companies that won't heed its guidelines on pregnancy benefits for spouses, according to Michael Connolly, EEOC general counsel.

The EEOC maintains that the Civil Rights Act of 1964 makes it clear that there must be equality of benefits for spouses in group health insurance plans. The Pregnancy Discrimination Act amends the Civil Rights Act.

"If an employer makes available to female employees insurance that covers the cost of all the medical conditions of their spouses, but provides male employees with insurance coverage for only some of the medical conditions (i.e., all but pregnancy-related) of their spouses, male employees are receiving a less favorable fringe package," the EEOC says.

The Newport News Shipbuilding case, which benefit managers around the country were watching closely, involved a 1980 suit filed by the firm challenging the pregnancy benefit guideline issued by the EEOC.

In its largest group insurance plan covering hourly employees, Newport News Shipbuilding pays all reasonable and customary expenses for spouses of female employees, but it places a $500 cap on their pregnancy hospitalization benefits for spouses of male employees.

In the February 1981 ruling, federal Judge Calvitt Clarke Jr. agreed with Newport News Shipbuilding's argument that the Pregnancy Discrimination Act only applied to employees and not to spouses.

"The clear legislative intent behind the Pregnancy Discrimination Act was to ensure that *working women are protected against all forms of employment discrimination based on sex*," Judge Clarke wrote.

But the appellate court disagreed with this decision. It argues that the Pregnancy Discrimination Act also applies to spouses' pregnancy benefits because those benefits are employment related.

"When an employer considers extension of medical benefits to spouses of employees, it does so with an 'employment-related purpose' just as it does when it considers the extension of such benefits to employees," the appellate court said. "Benefits would never be extended to spouses if the extension did not serve an employment-related purpose."

The appellate court decision "will go a long away to ensuring that employees, both male and female, are compensated equally without regard to distinctions based on pregnancy," said Mr. Connolly. ■

Workers' compensation can pay off big—and in some strange situations

YOUR HIDDEN BENEFITS

by Andrew Tobias

A secretary unhinged by the discovery of her boss' dead body was awarded workers' compensation benefits. So was the widow of a judge whose death was held to have been related to the enormous size of his case backlog. So, too, a foundry worker who hurt his arm banging a recalcitrant vending machine during his coffee break, and an attorney who injured his back stretching across his desk to pick up a pen. (The injury laid him up for 90 days.)

Eighty-eight percent of all salaried and wage-earning Americans in 1981 were covered by workers' compensation insurance against job-related injuries and illnesses. And the definition of "job-related" grows ever broader.

A 37-year-old employee of an American auto parts manufacturer, on assignment in Birmingham, England, collapsed and died in March 1979 following sexual intercourse with a female co-worker. It was determined that vapors from a space heater in her flat had been the cause. Even though their meeting had been held after normal working hours and occurred off company premises, a Michigan administrative law judge ruled that the man's family was eligible for workers' compensation benefits. ("The deceased's work assignment in England exposed him to situations and hazards that were different in nature and degree from those in Michigan," wrote the judge.)

One could write at length about the dreadful ways insurance companies will occasionally abuse their patrons (one large insurer until recently denied that the cost of a cemetery plot, a clergyman or flowers were allowable "funeral expenses"); or, on the other hand, about the dreadful ways policyholders cheat their insurance carriers (an extreme being the man who blew up an airliner to collect on his mother's flight insurance). But here and there in the contentious, inefficient, half-trillion-dollar world of insurance, one finds a relatively bright spot. Workers' compensation insurance, although not without flaws, is one such spot. Most of us have it—we are covered, automatically, by our employers—but few of us think about it. In short, you may be better insured than you think.

Each state has its own rules, but in most, disabled workers receive two-thirds of their pre-disability wage, up to certain limits—*tax-free* (see Table A). In all but a few states, the same weekly benefits are paid during periods of *temporary* total disability, as well as to the spouse and children of workers killed on the job. Table B shows some of the lump sum payments made *in addition to* weekly benefits.

If a safety inspector in Pittsburgh falls into a blast furnace or a Philadelphia bank executive is murdered by an irate loan applicant, his or her spouse will collect $13,624 a year in workers' comp benefits, tax-free, for life (or until remarriage). That is, *unless* the deceased happened to be an employee of the federal government (a *federal* safety inspector or an executive of the Philadelphia Federal Reserve Bank), in which case the spouse would collect $37,596 a year. Federal employees, in whatever state they are employed, have their own special schedule of weekly and lump sum benefits.

A normal Nebraskan thumb is worth $10,800. If it hangs from the hand of a Nebraskan on the federal payroll, it's $54,209. Similarly, the loss of a foot brings $16,870 to a Californian, but $148,170 to a Californian on the federal payroll.

Prior to the enactment of workers' (formerly workmen's) compensation laws, beginning in 1911, an injured worker had to prove negligence on the part of his or her employer in order to recoup medical expenses and lost wages, let alone collect damages. The employer, on the other hand—presumably better equipped to wage and wait out a protracted legal struggle—had only to prove that the employee's injury was his own fault ("We never asked Charlie to stick his hand in the machine") or the fault of a fellow worker ("Caspar shouldn't have turned the thing on while Charlie was looking around inside it") or even merely that the worker had taken the job knowing it could result in his injury ("Whoever said coal mining was safe?"). It was a miserable system, not unlike the auto insurance system we still have.

Under the new laws (rather like what no-fault auto insurance ought to be but isn't), workers gave up their right to sue employers for damages in return for a guarantee of swift and certain benefit payments, regardless of fault. Benefit levels have naturally risen many times since 1911 and continue to rise with inflation. Today, coverage is mandatory everywhere but South Carolina, New Jersey and Texas, with very limited exceptions. Claims—millions of them—range from things like paper cuts and ankles sprained in company softball games to mangled limbs and worse. There were 13,000 on-the-job fatalities in 1980.

Workers' compensation insurance cost employers some $25 billion in 1981, and, like any other cost of business, it was passed on to consumers: about $300 per household. In Florida not long ago, it accounted for $2000 of the cost of building a $55,000 house,

CAR COMPUTER PREVENTS DEAD CAR BATTERIES
& Other Electrical Failures!

SOLID-STATE "AUTO-COMPUTER" ANALYZES YOUR CAR'S ENTIRE ELECTRICAL SYSTEM IN JUST SECONDS!!

Computerized Electronic Brain
With Instant L.E.D. Readout

ANALYZES

- **BATTERY**
- **ALTERNATOR**
- **REGULATOR**
- **CARBURETOR**
- **IGNITION**

***HELPS PREVENT WASTED GAS! See Details Below**

With Fantastic 1 Year Money-Back GUARANTEE!

Thousands sold for up to $14.95

Our Low Price *only* **$9.95**

Some day Don it will install this in every car and probably charge an extra $100.00 or more for it. But now, with our solid-state computerized Auto Analyzer you can check the condition of your car's battery in seconds, anytime . . . anywhere. Just plug this electronic "brain" into your vehicle's cigarette lighter and instantly you'll get a bright L.E.D. Readout as to the condition of your entire electrical system including battery, regulator, alternator plus important information regarding your carburetor and ignition . . . all from inside your car. ***HELPS PREVENT WASTED GAS!** The Auto-Computer helps cut down gas wasted when you try starting with a weak battery, faulty ignition or improper timing. These problems mean difficult starting and gas wasting flooded carburetors.

Most auto dealers and repair shops have expensive computerized analyzers and charge plenty for the same information. Now at our low price of only $9.95 you can have your own computerized analyzer with instant readouts. Lets you spot the source of potential problems **before they happen!** Assures you instantly that repair or replacement is really necessary. Saves you towing charges. No wires or cables to hook-up, no poking around under hood. Computer has advanced integral circuit . . . no mechanical parts to require service. You'll probably never have to depend on unreliable or strange mechanics again. Stores in glove compartment. For all 12V systems on cars, vans, campers or trucks.

Don't delay . . . order today - save money on extras for family and friends. Makes a great gift. So certain are we that you'll be pleased with the "Auto-Computer" that we sell each one with a one year Money-Back Guarantee. You must be completely satisfied or you may return it anytime within 365 days for an immediate refund or purchase price (less postage and handling).

***HIDDEN BENEFITS** /continued*

5 cents of every dollar's worth of garbage collection and $1.75 of every $25 bag of groceries!

What made the system so expensive? One worker hurt his hand so badly in a Disney World tram accident, he maintained, that he could no longer drive a bus. He received $3810 for his disability. Yet he reportedly managed to play pinball right after the tragedy, then to drive back to West Palm Beach. Another worker filed a workers' comp claim the day he was told the CETA program under which he was employed would expire. According to his boss, his injury had been sustained when he deliberately dove out of a moving car.

Florida's own former insurance commissioner—later convicted of extortion and mail fraud—collected over $19,000 for a heart attack, arthritis, ulcers and depression. The heart attack occurred in his rush to catch a flight to Las Vegas to attend a convention.

Florida's system has been tightened considerably in the last couple of years, but it typifies the sort of abuses to which *any* insurance scheme is liable. Which is one of the reasons insurance in America is as unfair and inefficient as it is—but that's another story. P

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

19, 23, 24, 26, 27, 28 & 29

SUBSTANCE:

Makes changes to reflect a change basis for calculating benefits from 66 2/3% of gross wages to 80% of spendable wages.

POSITION:

Support.

ACTION:

Support.

BACKGROUND:

Changing compensation from 66 2/3% of a workers gross wages to 80% of his spendable wages will probably have salutory effect on the benefit levels particularly with respect to higher wage earners.

The exact magnitude of the savings to be effected by such a change cannot now be determined but it is believed that there will be a reduction in benefits as a result.

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Eighteen

SUBSTANCE:

Authorizes lump sum payments.

POSITION:

Support.

ACTION:

Support.

BACKGROUND:

This is similar to Section 12 of CSHB 159, January 25 (Sofo), with this material change; the legislature has added the words "and the parties agree". This means that if the parties agree the Board may authorize the lump sum payment but it cannot do so without the parties concurrence. This was my principle concern with the drafting in the other bill.

IMPORTANT DRAFTING NOTE:

In Section 25 of the proposed legislation there is substantial modification to AS 23.30.190. They neglected to remove the last phrase of subsection (20). In view of the adoption of this section in the bill the last phrase in subsection (20) is unnecessary and should be removed.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Seventeen

SUBSTANCE:

Same as Section 11 of CSHB 159 (Sofo) January 25, 1982.

ADDITIONAL COMMENT:

We would point out that if the Legislature is concerned about those carriers which will offset for over payment or advance payments by making no payments at all, we would not be adverse to a provision which reads as follows:

> "(j) if an employer has made advance payments or over payments of compensation, he is entitled to be reimbursed, out of any unpaid installment or installments of compensation due up to an amount equal to fifty percent of each of the subsequent payments. If the employer seeks to offset by more than fifty percent of subsequent payments such additional offsets require the prior approval of the Board."

INSURANCE COMPANY

A policy of service and protection

March 17, 1982

Honorable Terry Martin
House of Representatives
Pouch 4
Juneau, Alaska 99811

Dear Terry:

For the past two weeks, I have been working delingently with representatives of the Labor and Management Coalition to work out language which meets the concerns which we all have for curing the problems in rehabilitation but doing so in the context of the existing mechanisms for case management.

As you know Terry, I am very strongly opposed to setting up a new function or staff in the bureaucracy to do that which is, by and large being properly handled and, which with some changes in the law, can work well, in the private sector.

As of last night (3/16/82) we have come close to concurrance in principle on the items which heretofore have divided us.

I have, at the request of the Labor and Management Coalition drafted language to make HB 159 acceptable to me and still meet all of the objectives of the Labor and Management Coalition. They have not had time to review this last draft (RLB 3/17/82).

Briefly, these changes:

1) Impose a statutory requirement for a rehabilitation evaluation within 90 days of injury or, if not appropriate, a preliminary evaluation.

2) Define those entitled to rehabilitation exactly as in the Labor and Management Coalition' version.

3) Set standards for qualifying a rehabilitation program.

4) Impose a mechanism for quickly resolving disagreements concerning rehabilitation.

5) Provide for no new functions or positions in Division of Workers' Compensation. Thus, there is genuinely no fiscal impact on the General Fund or the Second Injury Fund.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

6) Cleans up a number of concerns which do not deal with rehabilitation shared by all of us. All proposed changes not dealing with rehabilitation have been agreed to by labor, management and the insurers.

One final point.

I have been led to believe that Jackie McKlintock has expressed concern that she does not now have the staff to carry the current work load, any future obligations placed on the Board. I would make the following observations:

1) The recommended changes will reduce the work load because rehabilitation funding from the Second Injury Fund is eliminated. Use of DVR is eliminated and only disputed cases will go to the Board.

2) Because DVR's role in workers' compensation cases is eliminated by these changes, whatever money is released in DVR can be transferred in the budget approval process to the Division of Workers' Compensation to hire additional hearing representatives.

Terry, I believe it is imperative that the proposed changes be inserted as presented into HB 159.

Your cooperation over these last few weeks is very much appreciated. I believe, as a result of our mutual efforts a very fine bill will result.

Yours cordially,

Richard L. Block
President

RLB/cv

RLB 3/11/82

PROPOSED CHANGES
TO
CSHB 159 (L & C) 3/3/82

SECTION 1. (p. 1 l. 19)

Eliminate subsection (4)

SECTION 2.

Remove

SECTION 3. (p. 2 l. 19)

Change "AS 20.20.041" to "AS 23.30.097"

SECTION 4.

Remove and substitute a new section 4.

SEC. 23.30.005 (f) is amended to read.

(f) Two members of a panel constitute a quorum for hearing claims, and the action taken by a quorum of a panel is considered the action of the full Board; the Commissioner or his designated representative acting alone shall constitute a quorum for making determinations of propriety of a rehabilitation program pursuant to AS 23.30.097.

SECTION 5.

Remove and add proposed new section to add AS 23.30.097 to read:

AS 23.30.097 Rehabilitation Program

(a) When an employee suffers a permanent disability which precludes his return to suitable gainful employment, he shall be entitled to be fully evaluated for participation in a rehabilitation program within 90 days after date of injury. The full evaluation shall be performed by a qualified rehabilitation professional. The reasonable costs of the evaluation shall be at the expense of the employer. If in the opinion of the qualified rehabilitation professional, the medical, physical or emotional state of the employee is such that a full evaluation cannot then be made, the rehabilitation professional shall prepare a preliminary evaluation.

(b) The full evaluation by the qualified rehabilitation professional shall determine if the employee would benefit from a rehabilitation program. The determination shall be based on the following criteria:

(1) The rehabilitation program will restore the employee to a position to accept suitable, gainful employment equal to or as near as possible to that of his pre-injury employment. An employee is restored to a position of suitable gainful employment if he can return to (in the order of preference)

i) Return to work at the same or similar job with the same employer or employer in the same industry as the employer at the time of injury.

ii) A job using essentially the same skills as the job at time of injury but in a different industry.

iii) A job using different skills but the same academic achievement level as attained at the time of injury.

iv) A job requiring an academic achievement level which is different from that attained at the time of injury, but which rehabilitation evaluation determines is attainable by the employee and which job is believed to be available to the employee in his community at the time academic training is completed.

(2) The employee cannot be restored to a position to accept suitable gainful employment without the rehabilitation program.

(3) The cost of the rehabilitation program, including all costs to be incurred by the employer for and during the rehabilitation program, plus an estimate of continuing benefits due the employee after the conclusion of the rehabilitation program are equal to or less than the benefits due the employee under this Act, assuming no rehabilitation program is implemented and assuming no discounting or lump-sum payment of benefits.

(4) The rehabilitation program may consist of any of the following, however, if the employee may be restored to a suitable gainful employment with rehabilitation programs of high preference, then a rehabilitation program of a lower preference need not be offered by the employer.

In order of preference rehabilitation programs are:

i) Prosthetic devices and training enabling work at the same or similar employment as at the time of injury.

ii) Work site modification and vocational training to the same or similar occupation.

iii) On the job training for a new occupation.

iv) Vocational training for a new occupation.

v) Academic training for a new occupation. The employer is not obligated to provide academic training for a period longer then two consecutive school semesters, except that the Board may, after successful completion of the first two semesters authorize up to two more consecutive semesters.

(c) A preliminary evaluation shall include the reasons why a full evaluation cannot be rendered, an opinion as to when the employee will be eligible for a full evaluation, any information which would be included in a full evaluation which can be determined and reported by the rehabilitation professional at the time of the preliminary evaluation.

(d) If the full evaluation or preliminary evaluation is not timely scheduled for an employee entitled thereto by the employer, the employee or the Board may designate a qualified rehabilitation professional to perform the evaluation, the reasonable costs of which shall be paid by the employer. If the full evaluation shows that the employee would benefit from a rehabilitation program, the program shall be provided at the expense of the employer.

(e) Refusal by an injured employee to participate in an evaluation or a rehabilitation plan offered by the employer results in forfeiture of disability compensation for the period the refusal continues. However, if an employee begins participation in an evaluation or rehabilitation plan within two months from the date of refusal, and successfully completes the evaluation and rehabilitation plan and becomes employed for a period of 30 consecutive business days following the completion of the rehabilitation program, the employee shall receive a lump-sum payment of 25 percent of the compensation forfeited by him. The lump-sum payment is available only once to an employee refusing rehabilitation. The Board may find that an employee refuses to participate in an evaluation or rehabilitation plan if the employee fails to cooperate with the qualified rehabilitation professional.

(f) The employer responsible for the benefits under this Act shall be liable for, and any subsequent employer hiring the employee during and as part of the rehabilitation program shall not be liable for, benefits under this Act for injuries occurring to the employee while engaged in job training, work readiness, work therapy experience or work sampling which is part of the rehabilitation program offered by the employer and the earnings for which, if any, are credited to gross wages upon which compensation benefits are calculated.

(g) Compensation payable pursuant to AS 23.30.185 or AS 23.30.200 shall be paid, in lieu of any other compensation except compensation due under AS 23.30.190 during the period the employee is actively engaged in a rehabilitation program.

(h) In this section

i) "Suitable gainful employment" means employment that is reasonably attainable in light of an individual's age, education, previous occupation, and injury, and that offers an opportunity to restore the individual as soon as practical to a remunerative occupation and as nearly as possible to his average weekly wage as determined at the time of injury.

ii) "Qualified rehabilitation professional" means a person who by education, professional training and experience has the skills to make judgements, administer and interpret tests, counsel, and make recommendations with respect to a persons medical, intellectual, emotional, physical or motivational capacity to accept and perform suitable gainful employment, and to design, implement and supervise programs which tend to enhance a person's medical, intellectual, emotional, physical or motivational capacity to accept suitable gainful employment.

SECTION 6.(p. 5 l. 15)

Change "AS 23.30.041" to "AS 23.30.097"

SECTION 7.

Remove

SECTION 8.

No changes

SECTION 9.

No changes

SECTION 10.

No changes

SECTION 11.

No changes

SECTION 12.

Remove and adopt a new section to read:

add to Chapter 23.30 a section to read
"AS 23.30.096."

Upon the filing of a claim under this Act, an employee thereby authorizes all providers of medical treatment pertaining to the injury or rendered prior to the date of injury to release information to the employer. If requested by the employer, the employee shall execute all releases to facilitate access to that information.

SECTION 13.

No changes

SECTION 14.

Acceptable except add to the subsection (c) the following additional sentence to read:

"If a claim is controverted by the employer and the employee does not request a hearing for a period of two years following the date of controversion, the claim is deemed denied by the Board."

SECTION 15. (p. 8 l.25)

Strike "occasioned solely" and insert in lieu "proximately caused".

SECTION 16. (p. 9 l. 3)

Add after "...is conclusive" and before "even if..." a phrase to read:

", provided there is some evidence of record to support the finding,"

SECTION 17.

Strike and instead add a section to read:

"AS 23.30.155(j) if an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed out of any unpaid installment or installments of compensation due up to an amount equal to twenty per cent of each of the subsequent installments. If the employer seeks to offset by more than twenty per cent of the amount of each subsequent installment, prior Board approval is required.

SECTION 18.

No change

SECTION 19.

No change

SECTION 20.

No change

SECTION 21.

No change

SECTION 22.

No change

SECTION 23.

No change

SECTION 24.

Add to subsection (12) (p. 13 l. 3) a clause to read:

"but no benefit is payable for loss of hearing above 3,000 cycles per second unless hearing above 3,000 cycles per second is a requirement of the job held at the time of injury."

SECTION 25.

No change

SECTION 26.

No change

SECTION 27.

No change

SECTION 28.

No change

SECTION 29.

No change

SECTION 30.

No change

SECTION 31. (p. 18 l. 13)

Change "occasioned solely" to "proximately caused"

SECTION 32.

No change

SECTION 33.

No change

SECTION 34.

No change

SECTION 35 (p. 20 l. 10)

Add after "---of injury" and before ";" a phrase to read:

"up to the amount which when added to all other components of gross earnings brings gross weekly earnings up to the state's average weekly wage "

SECTION 35 (p. 20 l. 19-21)

Should be amended to read:

"and (b) the amount that is or would be deducted or withheld as of January 1, preceding the injury under the Social Security Act of 1935 from the earnings of"

SECTION 36.

Remove and insert new section to read:

SEC. 23.30.145 (a) is amended to read as follows:

Fees for legal services rendered in respect to a claim are not valid unless approved by the Board, and the fees may not be less than 25 percent on the first $1,000 of compensation or part of the first $1,000 of compensation, and 10 percent of all sums in excess of $1,000 of compensation. When the Board advises that a claim has been controverted, in whole or in part, the Board may direct that the fees for legal services be paid by the employer or carrier in addition to compensation awarded; the fees may be allowed only on the amount of compensation controverted and awarded. For purposes of this section a hearing before the Board on the propriety of a rehabilitation program pursuant to AS 23.30.097 is not a controversion of a claim. When the Board advises that a claim has not been controverted, but further advises that bonafide legal services have been rendered in respect to the claim, then the Board shall direct the payment of the fees out of the compensation awarded. In determining the amount of fees the Board shall take into consideration the nature, length and complexity of the services performed, transportation charges, and the benefits resulting from the services to the compensation beneficiaries.

SECTION 37.

Add sections to be repealed as follows:

23.30.040(e)
23.30.191

SECTION 38.

Remove

SECTION 39.

Add new section to read:

SEC. 23.30.125 add new subsection

23.30.125 (c) An order of determination of the propriety of a rehabilitation program pursuant to AS 23.30.097 issued by the Commissioner or his designated representative acting alone, may be heard before a full panel upon the petition of employee or employer filed within 10 days after issuance of the order.

The Board shall give priority in calendaring its cases for hearing to hearings to determine the propriety of a rehabilitation program pursuant to AS 23.30.097.

SECTION 39.

This Act shall take effect October 1, 1982, and shall effect only claims occurring on or after the effective date hereof.

ARCTIC SLOPE AS/AG ALASKA GENERAL

ARCTIC SLOPE ALASKA GENERAL CONSTRUCTION COMPANY, INC.

April 29, 1982

Representative Terry Martin
Pouch V
Juneau, AK 99811

Dear Representative Martin:

Just this morning I was alerted to the possibility of the State Legislatures voting to make changes in the Workmen's Compensation Act.

Due to the finality of legislative changes in the Act, full public understanding of all changes (and how they affect employees and employers alike) is extremely important.

Since this cannot be done before adjournment,I am asking you to help defeat passage and re-submit this bill in the next session.

Very truly yours,

ARCTIC SLOPE ALASKA GENERAL

Cliff Tomlinson

Representative Terry Martin

Pouch V
Juneau, Ak 99811

Dear Representative Martin:

I have just learned that HB 159 is scheduled for a vote this session. Certainly a bill of this magnitude should be given more time and consideration.

With the session so close to adjournment, we feel that defeat of this bill is the only sensible course of action for you to take.

Please do not consider voting on HB 159 this session.

Sincerely,

ARCTIC SLOPE ALASKA GENERAL

C. L. Conger

Dear Representative Martin:

I hope this letter reaches you before HB 159 comes up for passage or defeat.

Any change in the Alaska Workmen's Compensation Act should be carefully considered, changes or amendments debated then compromised.

Voting on this bill at this late date (when adjournment is receiving much publicity) would not be in the best interests of workers or their employers.

I ask you to vote for defeat of this bill.

Very truly yours,

ARCTIC SLOPE ALASKA GENERAL

Irene Bartee

Dear Representative Martin:

Before HB 159 comes up for vote in this session (if in fact it does get out of committee) I wish to enlist your help to defeat this bill in its entirety.

I am in the Safety field and after several calls to other people that also deal in Workmen's Compensation Cases, none of us have any idea of what the bill encompasses.

I know there has been a lot of pressure to adjourn, and I don't want a bill that affects the future of so many to be rushed through.

Please defeat this bill if it comes up for vote.

Very truly yours,

ARCTIC SLOPE ALASKA GENERAL

The Honorable Terry Martin
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Re: David Butler/Municipality of Anchorage

Dear Mr. Martin:

The attached decision from the Workers' Compensation Board is a classic example of the serious problems inherent in our current Workers' Compensation laws.

This employee, who had a minor hearing loss, basically corrected by a hearing aid, was kept on full salary through non-cashable sick leave for the period 4/1/80 through 12/8/80 while he was awaiting action on his request for retirement from the Municipality, which was subsequently granted. After he was retired and after he had received full payment in the amount of $27,658.67 from his employer for the period 4/1/80 through 12/8/80, he filed for worker's compensation for the same period of time and the Board has now ruled that the employer must also pay him compensation benefits of an additional $21,668.04 for the exact same period of time loss. The employee has therefore recovered in excess of 200% of his normal salary for a period of 9 months. Full payment by an employer, regardless of what fund it is paid from, or what they call it, should certainly satisfy the requirements of the Workers' Compensation Board.

Your comments will be appreciated.

Very truly yours,

SCOTT WETZEL SERVICES, INC.

Renee Murray

DAVID W. BULTER,
Employee,
Applicant,

vs.

MUNICIPALITY OF ANCHORAGE
(Self-Insured),
Employer,
Defendant.

DECISION AND ORDER
Case No. 80-04-0548.

On December 10, 1981 the defendant requested modification of the Board's November 19, 1981 Decision and Order. No opposition was submitted by the employee and the Board deemed the record closed on January 15, 1982.

Defendant alleges the Board erred in a determination of fact. The defendant asserts that employee is not entitled to compensation between April 1, 1980 and December 8, 1980 because he was being paid his full salary.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

There was no mistake in a factual determination. Evidence was presented at the November 12, 1981 hearing that employee received sick leave payments in the amount of his full salary between April 1, 1980 and December 8, 1980. Evidence was also presented, and the defendant does not dispute, that employee was disabled.

There is no provision in the Alaska Workers' Compensation Act permitting for offsets of amounts received by an injured worker from any private source as a result of the same injury. A special exception is made for Social Security payments. See AS 23.30.225

In the instant case the employee was paid his full salary from his non-cashable sick leave reserve. We have no knowledge of the terms of the Municipality's sick leave program nor do we have jurisdiction over it. If sick leave payments were made to the employee in error the defendant must seek another forum for his recovery.

ORDER

Defendant's petition for Modification is denied and dismissed.

Dated at Anchorage, Alaska, this 4th day of February 1982.

ALASKA WORKERS' COMPENSATION BOARD

/s/ William F. Reeves
William F. Reeves, Designated Chairman

/s/ Jim Robison

/s/ Ann Pittenger
Ann Pittenger, Member

WFR/cw

APPEAL PROCEDURES

A compensation order may be appealed through proceedings in Superior Court brought by a party in interest against the Board and all other parties to the proceedings before the Board, as provided in the Rules of Appellate Procedure of the State of Alaska.

A compensation order becomes effective when filed in the office of the Board, and unless proceedings to appeal it are instituted, it becomes final on the 31st day after it is filed.

CERTIFICATION

I hereby certify that the foregoing is a full, true and correct copy of the Decision and Order in the matter of David Bulter, employee/applicant; vs. Municipality of Anchorage/Police Department employer; Case No. 80-04-0548; dated and filed in the office of the Alaska Workers' Compensation Board in Anchorage, Alaska, this 4th day of February 1982.

Cynthia Williams
Clerk

David Cottrell, C.P.A. Special Master

Terry - Although the legislature has appropriated $300,000 the word I've gotten so far is that "there isn't enough money to pay me my claim." I've been offered $4,000+ if I'll sign a release. I'm told, if I don't sign the release, I may not get any money. Since the claim in this letter is [illegible]

just a portion of my loss, I don't feel I should accept any less. (I wonder where all the money has gone??) There will be a hearing to try to settle outstanding employee claims which will be on either Feb. 18th or 19th in Anchorage. I'm ready to do battle!

Wish me luck. Do you have any other suggestions on how I can get my money?

Chris

FLORIDA'S NEW WORKERS' COMPENSATION SYSTEM: AN INTERIM REPORT

March 1981

(WITH OCTOBER 1981 ADDENDUM)

Prepared By:

BUREAU OF ECONOMIC ANALYSIS
DIVISION OF ECONOMIC DEVELOPMENT
FLORIDA DEPARTMENT OF COMMERCE

ADDENDUM

October 1981

Since the completion of this report in March 1981 there has been a second Workers' Compensation premium reduction ordered by the State Insurance Commissioner. This reduction can be described briefly.

The effective date of the rate reduction was July 1, 1981. On average, Workers' Compensation premiums paid to private insurance carriers were decreased 15.6%. Since the volume of premiums paid in a year in Florida is about $1 billion, that would mean a savings of $156 million for Florida employers annually.

The actual premium reduction varied by employment class. All 600 classes were guaranteed at least a 5% reduction. The manufacturing classes averaged a 22.7% decrease with rates for some manufacturing classes falling by as much as 48%.

This latest action was the third Workers' Compensation premium decline since the 1979 reforms. The first, a 15% across-the-board reduction was enacted by the Legislature as a part of the 1979 reform package. The Insurance Commissioner ordered an 11.4% rate reduction in January 1981 which actually translated into a 5.1% premium dollar reduction when other changes were considered.

Cumulatively, the impact of these premium reductions has been to lower premium rates by 36.4% and save Florida employers $325 million annually in premiums. The average Workers' Compensation premium rate is now at its lowest point since September 1975 and places the State only 23rd highest in the nation. Before the reforms, Florida had ranked among the five most expensive states in this regard.

Further premium reductions may be in the offing. As is indicated on pages 21-24 of this report, early indications of claims activity, total claim costs, attorney involvement and other factors are quite promising. The State Insurance Commissioner has requested another Workers' Compensation premium rate filing later this year to take effect January 1, 1982.

FIGURE 3: TREND IN WORKERS' COMPENSATION PREMIUMS PER COVERED EMPLOYEE, 1975-1980: IMPACT OF THE NEW LAW 20

I. OVERVIEW

At one time, Florida's Workers' Compensation program was a system seriously in need of fundamental reform. Injured workers genuinely entitled to assistance received inadequate benefits. Employers were overburdened with premiums while insurance carriers lost millions of dollars annually attempting to provide Workers' Compensation coverage. The State's efforts to attract new industry were severely hampered by the reputation of the Florida Workers' Compensation system as extremely costly to employers.

Study of the system indicated that its very structure encouraged subjectivity in benefit determination. This fact, in turn, provided incentives for exaggerated if not invalid claims, and for the unusually frequent involvement of attorneys and medical specialists. The inadequate authority and resources accorded those government agencies charged with overseeing Workers' Compensation further contributed to the problem.

These problems were directly addressed in sweeping changes to the Workers' Compensation law effective August 1, 1979. These reforms were aimed at making Florida's Workers' Compensation system affordable, equitable and efficient. Perhaps the most important change was a switch to the "wage-loss" concept in benefit determination. Under this concept, a worker disabled by an injury on the job would receive (in addition to coverage of his medical expenses) compensation based on the actual decrease in average wages he suffered as a result of his disability.

Among the more important additional changes were: 1) an increase in statutory benefit levels for injured workers; 2) fundamental revisions in the authority and responsibilities of the Bureau of Workers' Compensation; 3) an enhancement of the ability of both the citizenry and its government to participate in the rate-making process; 4) a shift, to the claimant, of responsibility for paying attorneys' fees; 5) the discouragement of lump sum settlements of claims; and, 6) an across-the-board 15 percent reduction in premium rates with further reductions anticipated as experience was gained under the new law.

Any future reductions in Workers' Compensation premium rates are likely to be ordered by the Florida Insurance Commissioner based on his evaluation of rate filings made by the insurance industry. (Direct action by the Legislature is always a theoretical possibility.) Not until June 1981 will the insurance industry make its first premium rate adjustment filing based directly on experience under the new law.

Nevertheless, the early indications are quite positive in regard to the Legislative objective of reducing the cost of the Workers' Compensation system. Substantial progress already has been made; available information encourages the belief that further premium rate reductions are a distinct possibility. At this point, the following observations are warranted:

1. The Workers' Compensation insurance industry has been able to absorb two sizable premium rate reductions. Estimates made at the time these rate reductions were put into effect suggest that they will result in combined premium savings of approximately $170 million annually for Florida employers. The two rate reductions marked the reversal of a long-term trend of rapidly increasing Workers' Compensation premiums in the State. Before the 1979 legislative action, Florida ranked 5th in the nation in terms of its premium rates for Workers' Compensation coverage. It now has fallen to 13th.

2. These significant premium reductions have occurred even while statutory benefits available to injured workers were being increased substantially. The maximum weekly benefit amount has gone from $130 in 1978 to $228 in 1981, moving Florida's rank among the states from 41st to 18th. The maximum period for benefit collection has been extended; the inflation adjustment used in benefit calculation, increased; and the schedule of fees for medical services, revised upward by nearly 30 percent.

3. Available analyses suggest that the new law is having its intended effects in terms of the costliness of Workers' Compensation claims.

   - A study commissioned by the Insurance Committee of the Florida House of Representatives found that, during the first five months of operation of the new law, the percentage of claims of the particularly expensive "permanent partial" injury type had declined significantly. So too had indemnity costs and the percentage of claims involving attorney representation. The proportion of workers returning to their same employer after recovery from their injury had increased.

   - A November 1980 analysis by the National Council on Compensation Insurance (NCCI) also found a decrease in the frequency of permanent partial injury claims. While concluding that available data did not yet provide an adequate basis for a premium rate adjustment decision, one preliminary finding was an indication of significant insurance carrier cost reductions resulting from experience under the new law.

   - A Division of Workers' Compensation comparison of 1979 and 1980 data revealed that, during the first full year under the new law, there was a 4 percent reduction in total premiums paid by employers in the State. The number of formal claims declined by 48 percent. The number of joint petition settlements of Workers' Compensation claims fell by 36 percent while benefits paid in these claims dropped by 18 percent--a savings of $15.7 million. The amount of attorneys' fees awarded in Workers' Compensation cases decreased by 10.6 percent.

As the first state in the nation to adopt the wage-loss concept as the basis for determining permanent disability benefits for injured workers, Florida is serving as an experimental model watched closely by other states. Perhaps the best guarantee that Florida's Workers' Compensation reforms will succeed is the number of determined and careful monitoring programs being conducted both inside and outside government.

II. WORKMEN'S COMPENSATION IN FLORIDA (1935-1979)

A System in Need of Reform

In 1935, the State of Florida established a Workmen's Compensation system designed to lend stability and predictability to an employer's obligations to his injured employees while, at the same time, insuring that the injured worker would receive prompt and adequate compensation for his injury.[1] By the 1970s, Workmen's Compensation had evolved into a system which was unsatisfactory from virtually every perspective.

Consider the plight of the parties directly involved in the Workmen's Compensation system prior to its reform in 1979:

The Injured Worker--The benefits available to the average injured worker in Florida were quite low compared to those available in other states. An analysis conducted by the National Council on Compensation Insurance (NCCI) revealed that Florida's "statutory benefits", that is the maximum benefit amounts and collection periods set by law, ranked the state 37th in the nation.[2] For example, while in most states an injured worker received 66-2/3 percent of his average weekly wage while disabled, in Florida he received 60 percent.

Furthermore, compensation claims were taking a long time to resolve. The Miami Herald, in a comprehensive analysis of Florida's Workmen's Compensation system, reported that many injured workers were forced to hire attorneys because their legitimate claims were not being paid on time.[3]

The Employer--The cost to Florida employers of carrying the required Workmen's Compensation insurance was extremely high. Florida's premium rates (the decimal fractions applied to payrolls to calculate premiums due) were the fifth highest in the nation in 1979 according to NCCI data.[4] These premium rates had increased 229 percent from 1970 to 1978 and further rate increases were being requested by the insurance industry.[5] In 1979, the total premiums paid by Florida employers ranked it seventh in the nation according to figures from the National Association of Insurance Commissioners.[6]

These ever-increasing premiums did more than just force up the cost of doing business in Florida. They also put the State's businesses at a disadvantage when bidding for contracts against out-of-state firms. Bids submitted by Florida firms reflected the unusually high Workmen's Compensation premiums.[7]

The Insurance Companies--During the five-year period extending from 1973 through 1977, insurance companies offering Workmen's Compensation coverage in the State experienced $205.1 million in net losses according to NCCI data.[8] Although investment returns did result in a 3 percent net profit in 1978, there had not been an underwriting profit in Florida Workmen's Compensation since the 1950s.[9]

The impact of this unsatisfactory system extended beyond those directly involved. Ultimately, all Floridians felt the effects of the escalating premiums. Producers of goods and services passed their increased operating costs on to consumers.

State efforts to diversify the Florida economy, to further develop the industrial base, were severely hampered by the costly Workmen's Compensation system. Premium rates paid by Florida employers were nearly triple those paid by Alabama, North Carolina and South Carolina--states very much in competition with Florida in efforts to attract new industries. The NCCI reported that the cost of claims from permanently and totally disabled Florida workers was double that of seven other southern states.[10] An "Economic Development Study" prepared by the Fantus Company for the Florida Council of 100 cited high Workmen's Compensation premium rates as a competitive disadvantage for the State in its effort to recruit industry.[11]

In their efforts to attract new industry to Florida, officials often were confronted with questions about the reputation of Florida's Workmen's Compensation system. Former Commerce Department Secretary Phil Ashler once described a standard industrial recruitment scenario demonstrating the obstacle posed by Florida's high Workmen's Compensation premiums. According to Ashler, a prospective employer typically would ask a series of questions about the adequacy of labor supply and other business conditions. As State officials responded to these questions, the attractiveness of Florida to the prospect would grow--until the issue of Workmen's Compensation was encountered. At that point, Florida's image suffered a setback.[12]

The Miami Herald reported that the Governor and Lieutenant Governor had similar experiences. While delivering a promotional speech in Chicago, Governor Bob Graham was interrupted by a firm's indignation over Florida's Workmen's Compensation rates. Lieutenant Governor Wayne Mixson lamented the effects of a costly Workmen's Compensation system on industrial recruitment.

> Several prospects that we've had, specific prospects that we've talked to in other states that have had the kind of industry or business that we would desire to locate in Florida, have been reluctant to make any commitment because of that, the workmen's comp.[13]

Further Defining the Problem

Florida's Workmen's Compensation system was costing employers and insurance companies far more than the typical benefits paid to the vast majority of injured workers warranted. Why was this the case?

In 1978, a study was conducted by the National Council on Compensation Insurance (NCCI) with the results printed by the Florida Association of Insurance Agents.[14] This analysis, which compared Florida's claim and benefit figures to those of Alabama and Georgia, identified the major elements of Florida's Workmen's Compensation problem.

1. Total medical benefits paid to injured workers in Florida were significantly higher than those paid in other states.[15] The average medical benefits paid, the proportion of cases in which specialized medical practitioners were used, the frequency with which injured workers were confined to a hospital and the average hospital bill in Florida were invariably higher than in Alabama and Wisconsin.

2. Benefits paid for impairment or disability in Florida were higher than for Alabama and Wisconsin despite Florida's comparatively low statutory benefits.

3. Workmen's Compensation activity in Florida featured an unusually great amount of litigation. The percentage of Florida cases in which attorneys were involved on the plaintiff side (20.8 percent) was far above that of Alabama (2.8 percent) and Wisconsin (3.0 percent). Attorneys typically became involved at an earlier point in Florida cases; Florida cases normally took a longer time to be resolved; and, a greater number of cases were reopened by plaintiff attorneys. According to the Division of Workers' Compensation, Florida Compensation lawyers took in $19.7 million in fees during 1978.[16]

4. The proportion of cases which involved "permanent partial" disabilities was far higher in Florida than in Alabama or Wisconsin. Furthermore this injury category was responsible for a disproportionately large share of the Workmen's Compensation benefits paid in the State.

Because this fourth item was perhaps the key finding, it deserves more detailed attention. In the table below, Florida's

distribution of Workmen's compensation by injury type is compared to those of Alabama and Wisconsin.

TABLE 1

PERCENTAGE DISTRIBUTION OF RESOLVED WORKMEN'S COMPENSATION CASES BY INJURY TYPE: FLORIDA, ALABAMA AND WISCONSIN (November-December 1977)

Injury Type	Florida	Alabama	Wisconsin
Death	0.4	0.2	0.4
Permanent Total	0.8	0.1	0.5
Permanent Partial	30.0	7.1	9.0
Temporary Total	68.5	90.6	89.0
Temporary Partial	0.3	2.1	1.2

SOURCE: Florida Association of Insurance Agents, 1977 Workmen's Compensation Closed Claim Study, conducted by the National Council on Compensation Insurance, March, 1978.

Note that the proportion of resolved Florida cases which fall into the permanent partial category was more than three times the proportion recorded in Wisconsin and more than four times the Alabama figure.

The disproportionately large role of permanent partial injuries is just as striking when the distribution of benefits by injury type is examined as in Table 2.

TABLE 2

PERCENTAGE DISTRIBUTION OF BENEFITS PAID IN RESOLVED WORKMEN'S COMPENSATION CASES BY INJURY TYPE: FLORIDA, ALABAMA AND WISCONSIN (November-December 1977)

Injury Type	Florida	Alabama	Wisconsin
Death	1.6	2.1	5.4
Permanent Total	10.8	1.9	2.2
Permanent Partial	67.2	37.5	40.8
Temporary Total	20.3	57.4	50.8
Temporary Partial	0.0	1.0	0.8

SOURCE: Florida Association of Insurance Agents, 1977 Workmen's Compensation Closed Claim Study, conducted by the National Council on Compensation Insurance, March, 1978.

As the table reveals, permanent partial injury cases accounted for 67.2 percent of medical and indemnity benefits paid in Florida but only 37.5 percent and 40.8 percent of Alabama and Wisconsin benefits, respectively.

Causes Underlying the Problems

The responsibility for these problems appeared to rest with the structure of Florida's Workmen's Compensation system itself. More specifically, it was a system which placed too much reliance on the subjective judgments required of doctors and of Judges of Industrial Claims. It was a system which encouraged the active involvement of attorneys and the granting of lump sum settlements by insurance companies. It was a system which provided government agencies with insufficient authority and resources with which to regulate the program in the public interest. Finally, it was a system which provided indemnity benefits to injured workers who had not actually suffered any loss in wages.

The subjectivity of procedures was most evident at the point of "maximum medical improvement" or MMI, i.e., the point of which a doctor decided that the injured worker had recovered to the greatest extent possible. At that point, it would be determined whether the worker had either: 1) no disability, 2) a partial disability which was nonetheless permanent (permanent partial), or 3) a permanent and total disability (permanent total).

As noted previously the permanent partial category was responsible for an unusually large number of cases and a disproportionately high level of benefits in Florida. If a worker had received a permanent partial disability in the form of an injury specified in the Florida Statutes (a "scheduled" injury), he received a specific number of weeks of compensation at 60 percent of his average weekly wage. These benefits were paid whether or not the worker had been able to resume employment at his previous wage or even higher.

For "unscheduled" injuries within the permanent partial category, a doctor assigned a percentage disability rating to the worker. This percentage disability rating then was multiplied first by a specified number of weeks (175 for a 1-to-10 percent rating, 350 for an 11-to-50 percent rating, and 525 for a 51-to-100 percent rating) and then by 60 percent of the worker's average weekly wage.

This rating system was not only highly judgmental, it also provided a strong incentive for attempting to increase the disability rating. Fred Karl, speaking for the Florida Association of Insurance Agents, provided an example of this. At the time his example was formulated, the maximum weekly benefit amount available to an injured worker was $130. Note the difference in benefits paid if the worker's disability rating were to be raised from 10 percent to 11 percent.

10% x 175 weeks @ $130 per week = $2,275
11% x 350 weeks @ $130 per week = $5,005

A one percentage point revision in the disability rating raised the benefits paid to twice the original amount. This was because, as was explained earlier, the 11 percent disability rating marked a threshold in the benefit structure. The disability rating increased by one percentage point, but, more significantly, the number of weeks of benefits paid jumped from 175 to 350. This latter change was primarily responsible for the huge jump in the benefit amount. A similar threshold existed at the 51 percent rating level.

The subjectivity did not stop with the doctor's disability rating however. In recognition of the fact that the same injury could affect the careers of two people in different occupations to a much different extent (for example, compare the ramifications of the loss of a finger to a lawyer as opposed to a pianist), the system had a second form of disability rating, wage diminution. The worker's lifelong wage earning capacity could be diminished by his injury. This contention would be presented to a Judge of Industrial Claims who would determine a diminution of wage earning capacity rating based on such factors as the age, occupation, education of the worker and other circumstances. In the end, the higher of the two disability ratings, the wage diminution rating from the judge or the physical disability (impairment) rating from the doctor, would determine the worker's benefits.

In other words, the system provided the injured worker with an incentive to obtain a higher disability rating. This incentive, combined with the subjectivity of the ratings themselves, resulted frequently in the use of legal counsel and the involvement of medical specialists. The NCCI study of two months' of resolved permanent partial cases in 1977 revealed that 71 percent of injured Florida workers were represented by an attorney. This proportion was more than twice the Alabama figure and four times that of Wisconsin.[17] Medical specialists, as opposed to general practioners, were involved in 63.4 percent of the Florida cases in which physicians were consulted. The corresponding percentages for Alabama and Wisconsin were 30.8 percent and 39.3 percent, respectively.[18] This suggested what the Miami Herald called "doctor shopping", an attempt to find the physician who would give a higher disability rating.[19]

While the role of subjective judgments in benefit determination was perhaps the most central deficiency in the system, there were other, often related problems.

1. Attorneys' fees were related to benefit and settlement amounts. Until 1978, the claimant paid no attorney's fees. Legislation in that year required that claimants pay 25 percent of the fees with certain exceptions. Thus, attorneys had an incentive to strive for the largest award possible unencumbered by concern about the claimant's ability to pay an attorney's fee.

2. According to the Miami Herald, many Judges of Industrial Claims tended to give the benefit of the doubt to the Workmen's Compensation claimants. That publication reported instances of compensation awards when there was, in fact, no injury.[20]

3. Insurance companies frequently faced lengthy and costly litigation. To extricate themselves, they tended to offer lump sum settlements or washouts of medical expenses to injured workers.[21]

4. The government agencies involved lacked the authority and resources to remedy the situation. The Bureau of Workmen's Compensation was too overwhelmed with paperwork to advise claimants on rights and procedures or to see that benefits were paid equitably and in a timely manner. The Department of Insurance had to rely on the National Council on Compensation Insurance, an insurance industry organization, to provide the statistical basis for evaluating rate adjustment requests.[22]

III. THE MAJOR ELEMENTS OF THE 1979 CHANGES TO THE WORKMEN'S COMPENSATION LAW

The Intent of the Legislature

It had become clear that rather fundamental changes were needed in Florida's Workmen's Compensation system. A joint Senate-House Select Committee was appointed and the Workmen's Compensation issue was identified as the key issue facing the 1979 Legislature.[23]

The overall goal of the legislative effort was to reduce the cost of Workmen's Compensation to employers. However, the aims of restoring equity in benefit awards and of reducing the delays in claims resolution were also important. In other words, it was hoped that the system could be made affordable, efficient and equitable.

Two major targets of reform were identified. The first was comprised of the indemnity benefit determination provisions in the existing law which required subjective estimates of disability by doctors and by Judges of Industrial Claims. This subjectivity had led to extensive litigation which, in turn, had been a major factor in the high cost of the system. The second target consisted of the administrative provisions used in handling a claim. The ineffectiveness of these provisions had resulted in delays in claims processing and had contributed to the extensive litigation characteristic of the system. An improved administrative structure was seen as increasing the equity of benefit determination by reducing the system's dependence on ". . .the vagaries of the adversary process."[24]

The Changes in the Law

By the end of the 1979 Legislative sessions, Florida had a new "Workers'" Compensation law. The major changes were the following.[25]

1. Florida became the first state to adopt a "wage-loss" concept for a considerable proportion of Workers' Compensation benefit determination. The switch to a wage-loss concept was intended to decrease dramatically the subjectivity involved in benefit determination.

   This change concerned the indemnity component rather than the medical services component of Workers' Compensation benefits. Recall that, under the old system, injured workers suffering a permanent and partial disability either were eligible for benefits specified by statute (scheduled injuries) or were compensated based on a disability rating (unscheduled injuries). Within the unscheduled category, workers received the higher of the physical impairment and the diminution of earning capacity ratings.

Under the new system, impairment benefits would be paid for certain severe injuries: amputation, 80 percent loss of vision (after correction), or serious head or facial disfigurement. However, indemnity benefits in the majority of cases were to be determined solely by the actual loss in wages experienced by the injured worker due to his disability.[26] Under the wage-loss concept, the injured worker would receive 95 percent of the difference between 85 percent of his pre-injury wages and his wages after maximum medical improvement. This rule translates into the proposition that the worker must have experienced at least a 15 percent wage loss. After the worker had collected wage-loss benefits for two years, his post-injury wages would be discounted to adjust for inflation.

2. The statutory benefit levels for injured workers were raised. The maximum weekly benefit amount was increased from 66-2/3 percent of the statewide average weekly wage to 100 percent of that figure.

3. The structure and authority of the agency responsible for overseeing the operation of the Workers' Compensation were changed in the interest of making that agency more administratively effective. The Bureau of Workmen's Compensation was upgraded to a Division within the Department of Labor and Employment Security. This Division was instructed to ". . .assume an active and forceful role" in administering the system.[27] Under the new law, the employer would report employee injuries directly to the Division rather than indirectly to the Division through the insurance carrier. Steps were to be taken to ensure that injured workers were fully and promptly informed of proper procedures and their rights under the law. For example, injured workers were to be mailed an informational brochure while those suffering injuries which might permanently disable them were to be contacted personally. The Workers' Compensation Division would become more actively involved in controverted claims issuing advisory opinions as to benefits payable in each case. The judges of industrial claims were retitled deputy commissioners. Appeals of rulings by the deputy commissioners would now go to the First District Court of Appeals rather than to the Industrial Relations Commission, abolished by the 1979 legislation. The main burden of workers rehabilitation was shifted from the Division to the insurance carrier and employer. Finally, the Division was required to examine claims files, report annually on carrier promptness of payment and notify the Department of Insurance of patterns of questionable claims handling techniques by carriers.

4. The ability of citizenry and government to participate in the rate-making process was increased. A Bureau of Workers' Compensation Rating was established within the Department of Insurance to provide analytical support to the Insurance Commissioner in his review of insurance industry rate filings. Insurance company reporting requirements were changed in order to facilitate analysis by the Department of Insurance. Meetings by insurance industry rate-making authorities were required to take place in Florida and in the "sunshine." Excessive profits by insurance companies were prohibited.

5. The responsibility for paying attorneys' fees was shifted entirely to the claimants. Previously the claimant was to pay 25 percent of the fees while the remaining 75 percent was paid by the employer or insurance carrier. Certain exceptions to the rule of claimant payment were set forth. For example, attorneys' fees for recovery of medical benefits were to be paid by the employer or insurance carrier.

6. "Washouts" of benefits were to be strongly discouraged. Prior to the 1979 legislation, all parties could agree to a one-time payment to the claimant for benefits, thereby ending or "washing out" the employer's liability. Washouts of medical benefits would be prohibited. Lump sum settlements of disability benefits would be barred until six months after maximum medical improvement and then permitted only in special circumstances.

7. A 15 percent, across-the-board reduction in premium rates was mandated by the statute. The Legislature expected changes in the Workers' Compensation law--particularly the switch to a wage-loss system of disability benefit determination--to result in a substantial decline in insurance carrier costs. This decline was expected to more than counter-balance the increases called for in compensation benefits. To avoid excessive insurance carrier profits, the 15 percent premium rate reduction was ordered.

IV. THE EARLY PERFORMANCE OF FLORIDA'S NEW WORKERS' COMPENSATION SYSTEM

Examining the Impact

The fundamental reforms made in the Workers' Compensation law in 1979 were intended to make the system more equitable and efficient in meeting the genuine needs of injured workers while at the same time, making the system less costly to employers and insurance carriers. The reforms have been in effect for twenty months as of this writing. Although the new system will not have been given a fair test until it has been in operation for a number of years, an examination of the early performance of the law is warranted. Essentially, the question to be asked is this: Does the new Workers' Compensation law appear to be having its intended effects?

The scope of this analysis will be limited to the effects on employer costs (which reflect insurance carrier costs to a substantial extent). Certainly, the new system will not be considered a success unless it results in the fast, efficient and equitable delivery of compensation and services to the injured worker. However, an evaluation of that aspect of the system's performance is considerably more complicated than an assessment of the impact of the new law on employer costs. An examination of available statistics--benefits paid, numbers of claimants, premium rates and amounts--can provide a good preliminary indication of the impact of the new law on costs.

Reductions Already Accomplished in Employer Premiums

As was reported in Section III, one element of the 1979 legislation was a 15 percent, across-the-board reduction in Workers' Compensation premium rates. Simplifying somewhat, premium rates are multiplied by the employer's payroll to determine his Workers' Compensation insurance premium. At the time this rate reduction was enacted, a legislative staff analysis estimated that it would save Florida employers $135-142 million annually.[28]

As of yet, the insurance industry has not filed for a premium rate adjustment based directly on performance of Florida's new Workers' Compensation law. Nevertheless, an insurance industry rate filing submitted in December 1980 is worth noting. That filing concerned changes to the expense program used in calculating premiums and to the transition program for switching to a "total payroll" concept in computing premiums. As approved by the State Insurance Commissioner on January 1, 1981, this filing resulted in average premium rate reductions of 11.4 percent overall.[29] The Department of Insurance estimated that this premium rate reduction would result in savings of $34 million to Florida employers.[30] The NCCI determined that Florida's average manual premium rate following this change would rank it 13th among the 45 states permitting private Workers' Compensation insurance in the nation.[31] As was noted earlier, Florida had ranked fifth in the nation prior to the 1979 legislation. While the 11.4 percent rate reduction was

not based directly on experience under the new law, it does seem to suggest an improved economic state for insurance carriers after over a year and a half under the new law.

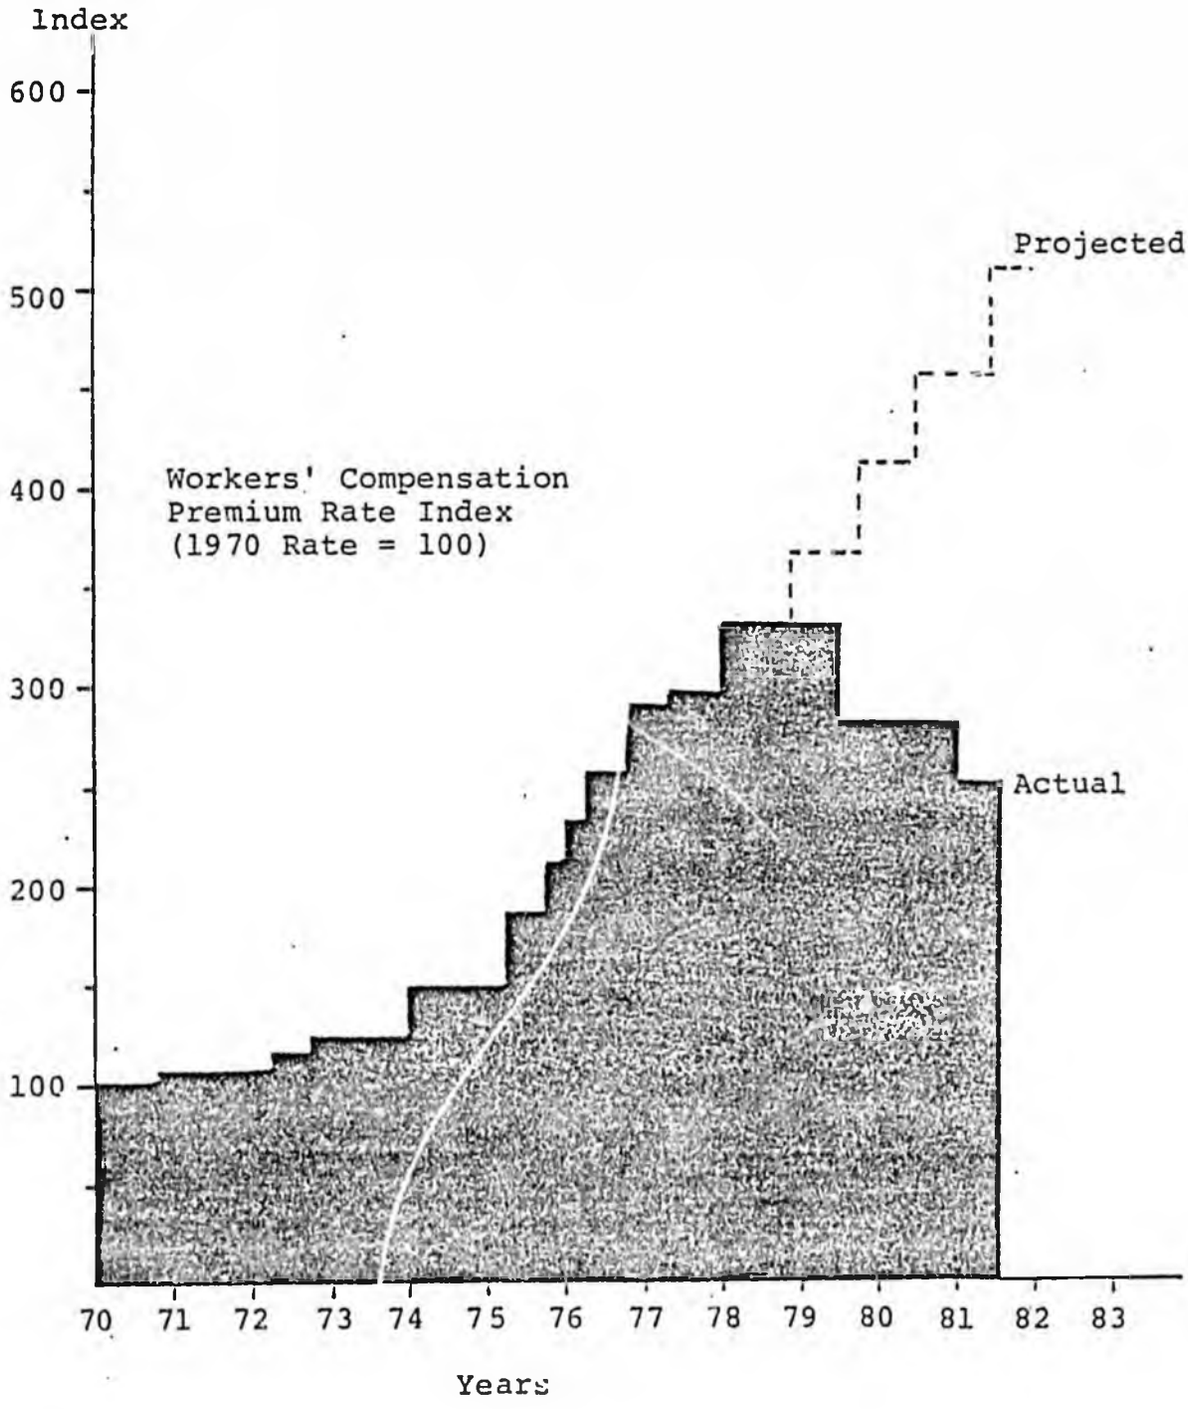
These premium rate reductions give early indication that the long-term trend of ever-increasing Workers' Compensation insurance premiums in Florida has been ended or perhaps even reversed. To demonstrate this development, an index of the overall Workers' Compensation manual premium rate has been developed. The average manual premium rate for all covered Florida employers, excluding those with self-insurance arrangements, as of January 1970 was set equal to 100.[32] Changes in the index over time then were calculated by applying the percentage changes in the overall manual premium rate reported at the time of the legislative action or the approved industry filing.[33] For example, an insurance industry filing for a rate increase was approved by the Insurance Commissioner and made effective August 1, 1970. This increase was estimated to have the effect, on the average, of raising Workers' Compensation premium rates by 7.2 percent. Thus, the value of the index was increased from 100 to 107.2 (100 + 7.2 percent) as of August 1, 1970.

In Figure 1, the trend in the manual premium rate index from 1970 to the present is portrayed. (The actual index trend is portrayed by the darkened area. The dashed lines are explained subsequently.) Note the rapid--even accelerating--rate of increase prior to the 1979 legislation. The 15 percent rate reduction ordered by the legislation was the first rate reduction of the decade. The second rate reduction, effective January 1, 1981, brought the premium rate index to its lowest level since September, 1976.

The reduced premium rate levels stand in stark contrast to what might have been the case had the Workers' Compensation legislation not been enacted. From January 1970 through July 1979, there were eleven premium rate increases affecting most or all classifications. That constitutes an average of one rate increase every 10.5 months. The average rate increase was 11.5 percent, compounded. Assuming that this trend had continued from the date of the final premium rate increase (effective January 1, 1979) prior to the 1979 legislation, the Workers' Compensation premium rate index would have stood at 457.0 in March 1981 rather than at its actual level of 248.3. The dashed-line bars in Figure 1 portray this possible path of the index had the 1979 changes to the Workers' Compensation law <u>not</u> been put into effect.

FIGURE 1

OVERALL TREND IN FLORIDA WORKERS' COMPENSATION PREMIUM RATES, 1970-1982: IMPACT OF NEW LAW



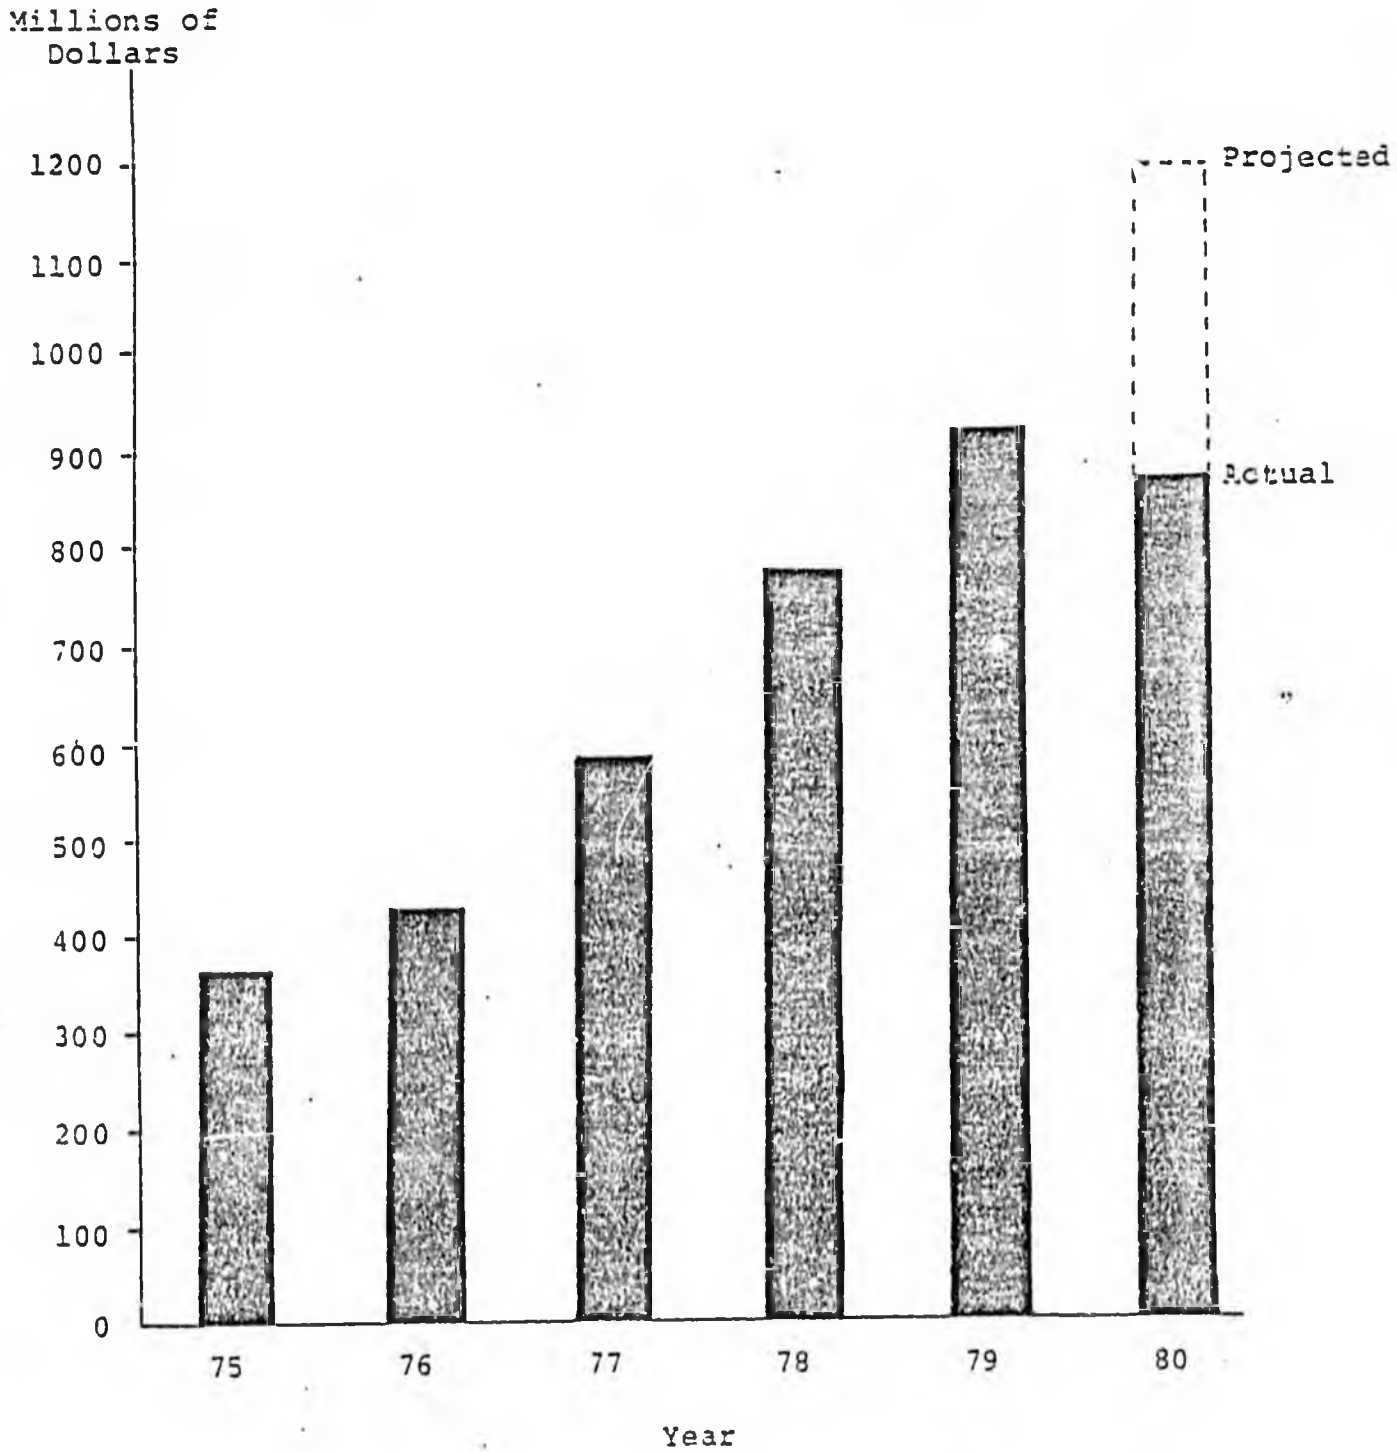
SOURCE: Historical rate increase data series provided upon special request by Bureau of Workers' Compensation Rating, Florida Department of Insurance. All index values, including hypothetical projections, calculated by Bureau of Economic Analysis, Florida Department of Commerce.

These premium rate reductions already have had an effect on actual Workers' Compensation premiums paid by Florida employers. Each year, the Division of Workers' Compensation within the Department of Labor reports the total premiums paid for Workers' Compensation coverage in the State.[34] In Figure 2, the historical trend in total premiums paid is shown. The darkened bars represent the actual premium totals for each year. Note the decrease in total value of premiums reported in 1980--the first full year affected by operation of the new law. This reduction occurred despite a 4.2 percent rise from 1979 to 1980 in the number of employees covered by Workers' Compensation and a 8.1 percent increase in the official average weekly wage in the State.

The dashed-line extension of the 1980 bar represents an estimate of the premium level which would have been attained without the 1979 legislation. The estimate assumes that the average annual percentage increase in premiums paid from 1975 through 1979 would have occurred once more in 1980. That average annual increase was 26.3 percent, compounded. Such an increase would have resulted in a 1980 premium total of $1.2 billion rather than the actual $377.6 million.

FIGURE 2

TREND IN WORKERS' COMPENSATION PREMIUMS REPORTED, 1975-1980: IMPACT OF THE NEW LAW

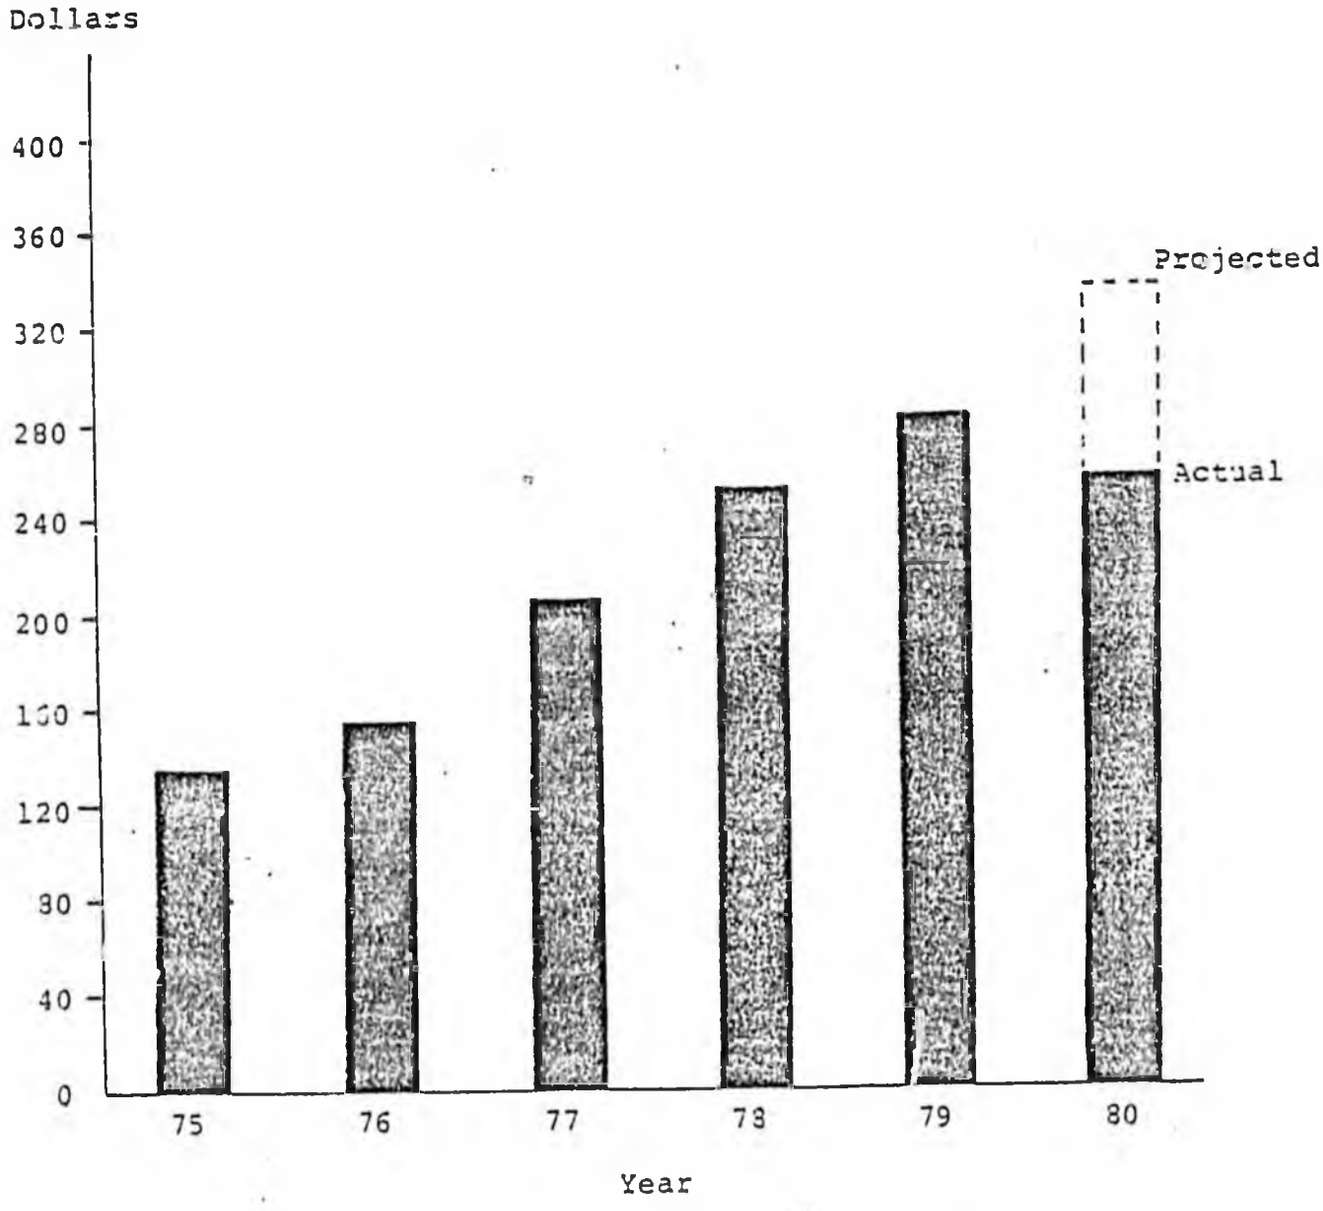


SOURCE: Actual historical data from 1977-1978 Cases Causes Costs, Division of Workers' Compensation, Department of Labor and Employment Security, 1979, p. 214 and by special request. 1980 projection by Bureau of Economic Analysis, Florida Department of Commerce.

Because the number of employees covered by Workers' Compensation is a major determinant of premiums paid, it might be expected that "controlling for" Florida's rapid employment growth might significantly alter the trend in Workers' Compensation costs. However, Figure 3 demonstrates that this is not the case. When the Workers' Compensation premiums paid per covered employee figure is plotted over time, the trend appears quite similar to that of total premiums paid (Figure 2). Once again, the rapid rise in premiums from 1975 to 1979 is clearly evident as is the positive effect of the 1979 legislation. On the average, Florida employers paid substantially less in Workers' Compensation premiums for each of their employees in 1980 than they would have without the new law.[35]

FIGURE 3

TREND IN WORKERS' COMPENSATION
PREMIUMS PER COVERED EMPLOYEE, 1975-1980:
IMPACT OF THE NEW LAW



SOURCE: Actual historical data from 1977-1978, Cases Causes Costs, Division of Workers' Compensation, Department of Labor and Employment Security, 1979, p. 214 and by special request. 1980 projection by Bureau of Economic Analysis, Florida Department of Commerce.

Increasing Benefits While Decreasing Premiums

It is important to note that these positive developments in terms of employer costs have taken place at the same time that benefits available to injured workers were being increased rather dramatically. The fact that the maximum weekly benefit amount was increased from 66-2/3 percent of the statewide average weekly wage to 100 percent of that figure has been mentioned. This maximum benefit amount was increased from $195 to $211 as of January 1, 1980, and increased again to $228 as of January 1, 1981. The NCCI has reported that these changes moved Florida from 37th place to 18th place in the nation in this regard.[36]

Other benefit increases were a direct or indirect result of the 1979 legislation. The maximum period for collecting wage-loss benefits, following maximum medical improvement, was raised from 350 to 525 weeks. The annual inflation adjustment used in calculating wage-loss benefits was increased from 3 percent per annum to 5 percent per annum. An overall 29.3 percent increase was made in the schedule of medical fees.[37] The medical fee schedule is to be revised annually.

Many of these benefit changes concern "maximum" benefits available. They are aimed at ensuring that injured workers receive just and adequate medical benefits and disability compensation for their injuries. Continued monitoring and careful examination of experience of the new law will be necessary in order to determine whether the wage-loss concept and the other benefit changes are indeed achieving the objectives for which they were established.

The Possibility of Further Premium Reductions: Early Signals

It was the hope of the Governor and the Legislature that the 1979 amendments to the Workers' Compensation law would result in further premium reductions in subsequent years. More specifically, the use of an objective wage-loss system of disability benefit determination and the deemphasis of subjective disability ratings were expected to result in considerable cost savings through a reduction in controverted claims, the decreased use of attorneys and medical specialists, a lower frequency of unjustified claims, and so on. These savings would be reflected in the experience of insurance carriers and ultimately result in premium reductions.

Comprehensive data pertaining directly to the possibility of further premium rate reductions will be available in June of this year. At that time, the insurance industry, through the National Council on Compensation Insurance, will make its first "experience filing" under the new law. This request for a rate adjustment (or, if no adjustment is requested, this "informational filing") will reflect 100 percent of the first full calendar year's experience under the new law and 83 percent of the 1979 policy year experience, five month's of which came under the new law.[38] It is, in effect, the average of the experiences during these two conceptual years which will serve as the basis for any rate adjustment. The final determination on any Workers' Compensation premium rate adjustment, unless the Legislature decides to directly mandate a reduction as in 1979, will be made by the State Insurance Commissioner, after considering supporting material submitted by

the NCCI, public comments and the advice of the Workers' Compensation Rating Bureau within the Department of Insurance.

Until those data are available it is necessary to rely on information from other sources to obtain an indication of possible future rate reductions. Three sets of preliminary data were available at the time of this writing.

Data Call by Florida House of Representatives, Committee on Insurance--In January, 1980, the Committee on Insurance of the Florida House of Representatives issued to the top fifteen Workers' Compensation Carrier Groups in the State a request for claims data.[39] Two samples of data were requested, one consisting of 30 percent of the population of time claims with injury dates between August 1, 1979 and December 31, 1979; the second, the same proportion of claims having injury dates ranging between August 1, 1978 and December 31, 1978. The former sample thus concerned the first five months of operation of the new law. The latter sample covered the same months in the preceding year, while the old law was still in effect. The five insurance carriers responding had written 22 percent of Florida's Compensation Insurance. The actuarial consultant hired by the Committee to conduct the study, Dr. Lena Chang, described the sample of respondents as a "good cross representation" with regard to the company size and the mix of mutual versus stock companies.[40]

In her report to the Insurance Committee, Dr. Chang compared the distribution of Workers' Compensation claims under the new law to that under the old law, for a number of different dimensions. She cited several instances in which the comparison indicated that the intent of the new law was being achieved.

1. The percentage or claims of the permanent partial injury type appeared to have decreased dramatically under the new law. Such claims comprised 24.0 percent of all claims for the five-month survey period under the old law (1978), but only 6.7 percent of claims under the new law. As was discussed in Section II, the permanent partial category was the foremost problem area under the old system accounting for an inordinate amount of Workers' Compensation claim costs.[41]

2. Total indemnity costs, including wage-loss and impairment benefits, were 25.8 percent lower in the new law period.

3. The percentage of claims involving attorney representation decreased from 13.0 percent prior to the new law's enactment to 4.1 percent during the first five months of operation under the new law.

4. The time lag from the date of injury to the first reporting date was reduced by seven days. This suggested faster notification and initial processing of Workers' Compensation claims.

5. The proportion of workers returning to their same employer after recovery from their injury increased 9 percent (from 74 percent to 83 percent). Dr. Chang theorized that the new wage-loss system may have been responsible for this development.

Several other findings were presented in Dr. Chang's report. Some further supported the impression that the 1979 amendments were having their intended effects in terms of cost reductions. Other findings showed no definite trend. One comparison, that concerning medical costs, appeared to contradict the intent of the law. However, Dr. Chang attributed at least a part of this unexpected trend to technical adjustments by the insurance companies which would not ultimately affect premium levels.[42]

Early Analysis by the National Council on Compensation Insurance (NCCI)--On November 12, 1980, the NCCI staff presented to the Florida Classification and Rating Committee (an insurance industry board) an analysis of the need for a Workers' Compensation premium rate adjustment.[43] The analysis was based on a supplementary data call to insurance carriers issued during the summer.

On the advice of the NCCI staff, the Classification and Rating Committee decided to postpone a decision on whether to file for a rate adjustment based on experience under the new law until May 1981. The major reason for this was the fact that, at that time, data concerning only 51 percent of experience under Florida's new law was available for analysis. The insurance industry representatives preferred to wait until a more complete picture of the effects of the new law was available.

Despite this decision, the preliminary analysis prepared by the NCCI did include notable findings. First, as with the study prepared for the Florida House of Representatives discussed previously, the data indicated a significant drop in the proportion of Workers' Compensation claims of the permanent partial injury type. According to a NCCI statistical table, the proportion of claims in the permanent partial injury category fell from 20.0 percent prior to enactment of the 1979 legislation to 6.9 percent under the new law. Thus, further evidence was provided of a lower frequency for this particularly costly type of claim. Second, the analysis suggested that, if it were possible to consider experience alone, a 17.3 percent premium level reduction would have been warranted. This indicates considerable claim costs reductions from the perspective of the insurance carriers. However, it is not possible to consider experience alone. At the time the analysis was prepared, it was estimated that the expense of a series of scheduled benefit increases would slightly outweigh the cost savings stemming from claim cost experience.

1980 Data From the Division of Workers' Compensation--The Secretary of the Department of Labor and Employment Security presented a report to the Commerce Committee of the Florida Senate on March 3, 1981. This report included a discussion of the progress made by

the Division of Workers' Compensation in implementing the reforms mandated by the 1979 legislation. It also contained evidence of the effects of the new law on Workers' Compensation claims activity.

This statistical evidence was in the form of comparisons between calendar year 1980 and calendar year 1979 figures.

1. The number of formal Workers' Compensation claims filed fell dramatically from 1979 to 1980.[44] During the former year, 24,082 such claims were reported while only 12,472 were received during the latter year. That is a decline of 11,610 or 48.2 percent.

2. A substantial decrease was also experienced in the number of joint petitions and washouts. The number of such petitions fell from 15,422 in 1979 to 9,806 in 1980--a 36.4 percent drop.

3. The amount of benefits awarded in these joint petitions fell from $91.7 million in 1979 to $76.0 million in 1980. This amounted to an 17.1 percent reduction and a $15.7 million savings in benefits paid.

4. The amount of attorneys' fees awarded in controverted claims for Workers' Compensation fell from $18.9 million in 1979 to $16.9 million in 1980, a 10.6 percent decline.[45] The 1980 figure was 20.3 percent below the highest yearly attorney fee figure ever recorded, $21.2 million in 1977. In 1978, the Legislature began to shift to the claimant the responsibility for attorney fee payment. This trend was continued in the 1979 legislation as has been discussed.

Again, it is important to remember that the further premium rate reductions in all probability will be decided by the State Insurance Commissioner based primarily on his evaluation of a rate filing by the insurance industry. The positive trends suggested by the House Insurance Committee Report, the NCCI analysis and the 1980 data from the Division of Workers' Compensation will not necessarily translate into further rate reductions when all factors are considered. Nevertheless, those desiring further Workers' Compensation premium rate reductions in Florida should be encouraged by the data available at this point.

V. THE FUTURE OF FLORIDA'S WORKERS' COMPENSATION SYSTEM: MAKING SURE IT WORKS

Florida as a Model

The 1979 amendments to Florida's Workers' Compensation law were fundamental reforms to the system. As has been noted, Florida became the first state to adopt the wage-loss concept as the basis for long-term disability benefits for injured workers.

The nature of such reforms has given the Florida Workers' Compensation system the status of an experimental model. The ultimate success of that model is of great interest to other states. Representatives from the States of Washington, California and Delaware have visited Florida to observe the Workers' Compensation system in operation. The Director of the Division of Workers' Compensation has been invited to appear before legislative committees in several states to explain the wage-loss system and administrative reforms.[46]

Monitoring the System's Effectiveness

Perhaps the most important factor in determining the ultimate success of Florida Workers' Compensation system will be the determination of those who participated in its reforms--both inside and outside government--to monitor closely its operation. The Florida Legislature assured continued monitoring of the Workers' Compensation system by statute and by the Legislature's own activities. Several business, professional and labor organizations also have demonstrated their intent to continue their scrutiny of the system.

An example of a monitoring program established by statute is the Medical Utilization and Peer Review program.[47] Under this program, Workers' Compensation claim histories would be examined for possible instances of needless medical tests or treatment and of excessive charges for medical services. Ultimately, physicians involved in over-utilization of medical services would be subject to review by a committee of their peers. By February of this year, the Division of Workers' Compensation was able to report substantial progress toward establishing this program. A program budget had been prepared, positions established and a program director hired. The Division had entered into a contractual agreement with the Florida Medical Foundation to provide peer review services.[48]

The activities of Legislative Committees constitute another form of governmental monitoring of the Workers' Compensation system. Following the passage of the 1979 legislation, the Speaker of the House of Representatives officially charged the Committee on Insurance with the responsibility for legislative oversight of the implementation of the new law. The Insurance Committee Chairman delegated this responsibility to the Subcommittee on Oversight. That subcommittee has met periodically over the months since then obtaining detailed progress reports from the

Division of Workers' Compensation and hearing testimony from other interested parties.[49] The subcommittee has issued two calls for claims data from the insurance carriers. The results of the first call have been discussed in some detail earlier in this report.

The Senate Commerce Committee also has maintained an active program of monitoring the success of the Workers' Compensation system. The Division of Workers' Compensation data reported in Section IV was largely taken from testimony offered before that committee.[50]

Just as important to the success of the new system will be the efforts of organizations outside government. Naturally, the insurance industry, through the National Council on Compensation Insurance, will play a central role in future developments--particularly as regards future premium rate changes. The direct and continuing role of the NCCI has been apparent in the frequent reference to that organization throughout this report.

Associated Industries of Florida, which describes itself as "the voice of business" in the State, was very much involved in the 1979 reforms to the Workers' Compensation law and has remained in close touch with the implementation process. This business association issues periodic newsletters on potential problems in the law and recently has commissioned an analysis of a sample of Workers' Compensation claims filed during the first year of the new law's operation.[51]

The Florida Association of Insurance Agents, very active in promoting the adoption of the wage-loss concept, has begun a two-year program of monitoring the total effectiveness of Florida's Workers' Compensation system. The efficiency of claims processing, rehabilitation services and safety programs are early subjects of study.[52]

Having participated directly in the efforts leading to the 1979 Workers' Compensation legislation, the Florida AFL-CIO has continued its involvement in the Workers' Compensation program. The labor organization's major emphasis has been in monitoring the efficiency and equity with which injured workers have been provided their benefits. The current monitoring technique used is to randomly select case files then to telephone the claimants asking whether they have been satisfied with the way their case has been handled by the employer, the insurance carrier and the Division of Workers' Compensation.[53]

Notes

[1]For an excellent discussion of the theory underlying Florida's Workmen's Compensation system and Worker's Compensation systems in general, see: William E. Sadowski, Jack Herzog, R. Terry Butler and Ruth L. Gokel, "The 1979 Florida Workers' Compensation Reform: Back to Basics," Florida State University Law Review 7 (Fall 1979): 641-649.

[14]National Council on Compensation Insurance, 1977 Workmen's Compensation Closed Claim Study (Tallahassee: Florida Association of Insurance Agents, 1978).

[15]Previously, the comparatively low statutory benefits in Florida were noted. Here, the medical benefits paid to injured workers are described as ". . .unusually high compared to those paid in other states." This apparent paradox is resolved by noting that the benefits were claimed more often, and more frequently up to their maximum allowable limits, than in other states. As a result, the total amount of benefits paid was much higher in Florida.

[16]Division of Workers' Compensation, 1977-1978 Cases Causes Costs: Analysis of Work Injuries Covered by Workers' Compensation (Tallahassee: Department of Labor and Employment Security, 1979), p. 23.

[17]NCCI, Closed Claim Study, p. 6.

[18]Much of the discussion of compensation determination is based on an analysis presented by Fred Karl, Florida Association of Insurance Agents, Wage-Loss Conferences, pp. 30-33. The data for medical specialist involvement is from the NCCI Closed Claim Study, p. 2.

[19]"Payoff for Pain," Miami Herald, p. 16.

[25]The following discussion of the major changes in the Workers' Compensation law is based on Sadowski et al., "The 1979 Florida Workers' Compensation Reform," pp. 654-686 and two "Staff Analyses and Economic Impact Statements," prepared by the Senate staff, April 18 and June 1, 1979.

[26]Actually, those workers who suffer the impairment injuries previously described would be able to collect wage-loss benefits in addition to their impairment benefits.

[27]Florida Statutes, Section 440.44.

[28]Senate, "Staff Analysis," April 18, 1979, p. 9.

[29]The 11.4 percent reduction in the manual premium rate was partially counter-balanced by other changes affecting other determinants of the premiums paid by employers. When all changes are considered, the actual reductions in premiums paid was an estimated 5.1 percent.

[30]Florida Department of Insurance, "Commissioner Gunter Approves Workers' Compensation Rate Cut of $34 Million," statement released to the press January 6, 1981.

[31]Letter from Bob Hilton of National Council on Compensation Insurance to Florida Insurance Commissioner Bill Gunter, December 2, 1980.

[32]An index is used here rather than the actual average manual premium rate. The National Council on Compensation Insurance estimates the overall premium rate impact, in terms of a percentage change, for each approved rate filing. However, the

National Council is hesitant to provide a calculated average manual rate due to the complications which would arise in attempting to weigh the different premium rates for each of the 500 or so employment classifications and due to the possibility of misleading comparisons with the overall rates of other states. The historical trend of the index used here is, in all probability, identical to the trend of the actual manual rate if that data were available.

[33]Florida Department of Insurance, History of Rate Revisions.

[34]Data provided Bureau of Research and Planning, Division of Workers' Compensation, Department of Labor and Employment Security, Special Request, March 16, 1981.

[35]The hypothetical 1980 value was calculated by applying the average compounded rate of increase from 1975 through 1979 in premium amount paid per employee to the 1979 value for premium per employee.

[36]Letter from Bob Hilton to Bill Gunter, December 2, 1980 (previously cited). This ranking also was confirmed in a letter from Clifford Wess, National Council on Compensation Insurance, to Dennis Harmon, Florida Department of Commerce, March 4, 1981.

[38]Ibid.

[39]Memorandum from Lena Chang, Actuarial Consultant, to the Honorable William Sadowski, Chairman, Committee on Insurance, Florida House of Representatives, August 8, 1980, "Preliminary Report on Committee Study of the New Workers' Compensation Law."

[40]Ibid, pp. 2-3.

[41]The decrease in the claims share accounted for by the permanent partial category was accompanied by an increase in the proportion held by the temporary total category. The number of claims in this category also increased absolutely. Historically, the temporary total injury type claim has not had the extreme claim costs associated with it that has the permanent partial category. Nevertheless, trends in this category probably will be closely watched for problems.

[42]Chang memorandum to Sadowski, p. 4.

[43]NCCI Memorandum to Florida' lassification and Rating Committee. This committee is compr ed of representatives of insurance carriers which sell Workers' Compensation insurance in Florida. The insurance industry bases its rate filing decisions on the recommendations of this committee.

[44]A formal claim is a claim filed by an injured worker with the Division of Workers' Compensation. The filing of such a claim indicates that the worker is dissatisfied with the benefits he has received.

[45]If the unrounded data are used, this percentage change is 10.3 percent. This particular data was provided upon special request by the Bureau of Research and Planning, Division of Workers' Compensation, Department of Labor and Employment Security, March 19, 1981.

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTIONS

15 & 32

SUBSTANCE:

These two sections of the bill change the degree to which the presence of alcoholism or drugs can defeat the injured employees rights to compensation.

POSITION:

Support.

ACTION:

No action.

BACKGROUND:

These two sections read together change the burden of proof for the employer with respect to alcoholism from the requirement that they demonstrate liquor solely caused the accident to liquor proximately caused the accident, and adds a similar provision with respect to drugs.

partly probable cause of the accident

We have some cases in which alcoholism was definitely present and a contributing factor to the accident, however, it is clearly the case that no single factor could ever be argued as the sole factor in a accident.

If we could demonstrate that although it wasn't the sole factor it was the proximate cause of the accident it would be useful in defeating some alcoholism and drug related claims.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Twelve

SUBSTANCE:

Requires an injured employee to grant specific authority to release medical information to the employers, carriers and so forth.

POSITION:

OK Favor, but would suggest an improvement.

ACTION:

Seek an improvement in the measure, but support in any event.

BACKGROUND:

When a workers' compensation claim is filed it is necessary for the insurance company to obtain medical information from the treating physicians, examining physicians, or physicians who have rendered medical care in prior cases for the injured worker.

Doctors are understandably reluctant to give out medical information without having a specific release from the employee in order not to violate their responsibilities of privacy.

This statute requires the employee to execute whatever authorities are required by other physicians in order to obtain release of medical information.

We believe that this is an important addition to the workers' compensation statute.

SUGGESTED IMPROVEMENT:

If a provision were placed in the law which had the effect of pro tanto granting the authority would eliminate the need for getting specific written authority and protect the physicians and hospitals.

Further, the authority in the proposed language relates to medical information only relative to his injury.

It is vital that we have access to medical information concerning prior medical treatments.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

For example, it is relevant to any adjustment of a case for injury to the employee to have access to medical records concerning prior injuries or prior illness since it bears on the method of handling the medical treatment of the existing case.

We would suggest the following language:

> "Upon the filing of a claim under this Act an employee thereby authorizes all providers of medical treatment pertaining to the injury or rendered prior to the date of injury to release information to the employer. If requested by the employer, the employee shall execute all releases to facilitate access to that information."

INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

Eleven

SUBSTANCE:

Adds a new subsection to give the Board specific definition of permanent impairment.

POSITION:

Not opposed.

ACTION:

No action except to seek modification as indicated.

BACKGROUND:

The Board currently has no specific guidelines for determining the degree of permanent impairment. The proposed section would give the Board authority to establish a schedule for determining the existence and degree of permanent impairment. We believe that the authority to adopt such a schedule is a useful device to add certainty to the system. We would urge however that giving the Board carte blanche authority to adopt a schedule without guidelines is inappropriate.

The Board is currently using, without specific statutory authority to do so, the American Medical Association Guide To Permanent Impairment, a document to which the American Medical Association has devoted a great deal of time and study. We believe this is a satisfactory, impartial, fair, easy to administer, and objective definition of permanent impairment and one with which the medical profession, which must actually render the impairment ratings, is familiar.

We believe that the Board should be directed to use this standard.

SUGGESTED ALTERNATIVE:

We would urge the language be modified as follows:

"(j) the board shall adopt and use the American Medical Association Guide To Permanent Impairments as the basis for determining the existence and degree of permanent impairments".

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTIONS

Two through Eight

SUBSTANCE:

Substantially modifies the approach to providing rehabilitation benefits.

POSITION:

Opposed.

ACTION:

All of the sections must be removed from the bill. If the sections are not withdrawn from the bills the bill must be opposed. Preventing adoption of these sections is considered of highest priority.

BACKGROUND:

Rehabilitation has always been regarded as an important part of the workers' compensation system, however, there has not been agreement as to what constitutes effective and reimbursable rehabilitation programs.

Typically, rehabilitation is provided where it is believed vocational retraining will return the injured worker to the level of gainful employment enjoyed prior to injury in a work setting as closely approximating his work setting prior to injury as his new physical condition will permit.

On the other hand, there are those who believe that the rehabilitation program ought to be used to reorient the injured worker to a life or work style unnecessarily different from that he enjoyed prior to injury.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (090) 25-456

To develop appropriate cost effective and responsive rehabilitation programs, most carriers use professional rehabilitation counselors who determine the need for, and probable value of rehabilitation programs, develop plans and implement them, all at the expense of the employer.

This legislation would usurp the primary responsibility for making professional determinations concerning rehabilitation from the trained professionals operating in and funded by the private sector and transfer that responsibility to a new, unqualified and expensive state bureau at an initial cost of over one quarter of a million dollars.

More particularly:

Section 2 removes any limit for rehabilitation benefits paid from the Second Injury Fund at the same time the Board is granting full temporary total benefits to workers while they are on rehabilitation.

Section 3 establishes a set of principles to guide rehabilitation efforts. While the principles are essentially not objectionable, they are of no value in a statute unless other statutes in fact accomplish those objectives. It is our view that the other sections do not tend toward the intended objectives.

Sections 4, 5, 6 set up the bureaucracy to implement the intended objectives. The Director of the Division of Workers' Compensation testified that the initial cost to the state would be $350,000. It is our belief that the more difficult to assess but substantially larger cost would be in the increased costs to employers to fund unnecessary, premature, redundant, ill conceived or unwelcome rehabilitation programs designed and mandated by state designated rehabilitation specialists.

Section [23.30.041 (b)], further provides that the Rehabilitation Bureau may impose a rehabilitation program when ever it deems it appropriate which could be in every permanent total disability case. The costs which could be imposed under this and following subsections could be astronomical. They include:

a) Extention of the rehabilitation program beyond the first 37 weeks at the direction of the rehabilitation administrator with no defined limit.

b) Travel to and lodging at any location away from the employees residence for the full rehabilitation period.

c) Temporary total benefits for the full period of rehabilitation.

Alaska National
INSURANCE COMPANY

A policy of service and protection

LEGISLATIVE POSITION PAPER

LEGISLATION: Labor and Management Compromise substitute for CSHB 159

SECTION

One

SUBSTANCE:

Grants specific authority to file and use a deductibl workers' compensation policy.

POSITION:

Not opposed to the substance but redrafting is indicated.

ACTION:

Obtain redrafting of the language then do not oppose.

BACKGROUND:

This company has already filed and obtained approval for a deductible plan; this provision is not objectionable. The provision is more appropriately found in the Insurance Code with some language revisions.

Maybe consider for HB659

SUGGESTED ALTERNATIVE:

SECTION 1: AS.21.42. is amended by adding a new section to read:

> "21.42.165 - An insurer issuing a workers' compensation insurance policy pursuant to AS 23.30.025 may contain a provision requiring the insured to pay a portion of the benefits due under AS.23.30. provided the provision making that requirement has the prior approval of the Director and provided further the policy provides that as to the employee and the Workers' Compensation Board the policy meets all the requirements of 23.30.025 and 23.30.030. Filing for apporval under this section is not a deviation under AS.21.39.070.

7001 Jewel Lake Road • Post Office Box 3440, Anchorage, Alaska 99510 • Telephone (907) 248-2642 • Telex (910) 25-456

5. AMENDMENTS PROPOSED

A. On page 7, line 24, a stay of revocation provision is included which provides the stay "until the hearing process is completed." This is ambiguous language since no definition provides when the process is completed. We would suggest removing the words "hearing process is completed" and add "the time noted in the order issued by the director following the hearing but not sooner than five days following the order."

B. On page 9, line 5, a requirement for workers compensation insurance groups is the filing and approval of a rating program. Safety groups do not have standing to make such filings, but insurers do. A minor insertion would clarify the situation. Following the word "has," insert the words "through an insurer."

C. On page 16, lines 22-29 and page 17, line 1, AS 23.30.030(7) is revised to change "insurance commissioner" to "director of insurance." The section is however not workable. Form filings are made by a rating organization on behalf of all its member and subscriber companies, so that it is not possible to disapprove the form in the manner outlined. The director of insurance does not presently accept or receive proofs of insurance from any insurer so this language is meaningless. The approach here would penalize all other insured employers of the insurance company and could leave them uninsured. A better approach would be to allow specific penalty to be determined on the basis of the severity of the specific situation. This could range from a fine to suspension of authority. We would suggest the following language:

"(7) If the insurer fails or refuses to pay a final award or judgement (except during the pendency of an appeal) made against it, or its insured, or if it fails or refuses to comply with a provision of this chapter, the director of insurance [COMMISSIONER SHALL REVOKE THE APPROVAL OF THE POLICY FORM, AND MAY NOT ACCEPT FURTHER PROOFS OF INSURANCE FROM IT UNTIL IT HAS PAID THE AWARD OR JUDGEMENT OR HAS COMPLIED WITH THE VIOLATED PROVISION OF THIS CHAPTER, AND HAS RESUBMITTED ITS POLICY FORM AND RECEIVED THE APPROVAL OF THE FORM BY THE INSURANCE COMMISSIONER] may suspend or revoke the insurer's Certificate of Authority pursuant to AS 21.09.150 or impose a fine upon the insurer of not less than $25 and not more than $100 for each day the insurer fails or refuses to pay a final award or judgement (excluding the period permitted for appeal) made against it, or its insured, or it fails or refuses to comply with a provision of this chapter."

D. On page 23, line 28, omit the word "board" and insert the words "director of insurance."

E. On page 25, line 13, following the word "State," add "provided that the contracting agency has obtained proof of self-insurance from the employer designating the contracting agency as a person to receive notice under this section."

5. AMENDMENTS PROPOSED (continued)

F. On page 38, line 21, remove the words "or draft."

G. Provide a different effective date for sections 1, 2, 19, 20, part of 25, part of 26, 29, and part of 64. The effective date for these sections should be July 1, 1982.

The change on page 23, lines 14, 18, 20, 22, 23 and 24 should be effective July 1, 1981.

The change on page 23, lines 17 and 19 should be effective on July 1, 1982.

The change on page 46, lines 19, 21 and 22 should be effective on July 1, 1981.

The change on page 46, line 20 should be effective on July 1, 1982.

THE CHANGE ON PAGE 24, LINES 2, 4, 7 AND 8 SHOULD BE EFFECTIVE ON JULY 1, 1981.

THE CHANGE ON PAGE 23 LINE 28 (SEE PROPOSED AMENDMENT D) SHOULD BE EFFECTIVE ON JULY 1, 1982.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

This fiscal note provides that the state administrative costs for rehabilitation under the proposed AS 23.30.041 be paid from the Second Injury Fund. This includes the costs of four new positions, plus the cost of four existing positions which entails a transfer in funding source from General Funds to Second Injury Funds.

IV. DATE 3/2/82 PREPARED BY Nico Bus

AGENCY Labor

PHONE 465-2720

Original: Legislative Finance

cc: Budget and Management

Prime Sponsor (First Legislator Named)

1. Assumes an inflation rate of 10% per annum after FY '83.

2. Assumes an effective date of July 1, 1982.

3. The total cost for FY'83 for the four new positions is detailed on attached forms 13. In addition the following items are included in the FY '83 costs.

A Workers' Compensation Officer I reclassification to a Workers' Compensation Officer II with related travel and contractual services. Cost $16.6

100 Personal Services	$ 5.5
200 Travel	5.0
300 Auto, lease, Indirect, etc.	6.1
	$16.6

The data processing operations cost will increase by $14.0 because of enhancements for a tickler system, running two systems parallel and the files expansion to retain the addresses of all claimants.

The printing of 10,000 Workers' Compensation Acts and 25,000 Employee Information booklets. $35.0

The design and printing of new forms. $2.5

Computer program modifications to implement the changes introduced by the bill. $20.0

Equipment expense for computer terminals, panelling, cabinets, and files. $6.0

Included one-time items in FY '83

Equipment	$10.4
Booklets and Acts	35.0
Design and printing of new forms	2.5
Computer programs	20.0
	$67.9

Funding Change

Items included in the FY 83 Governor's budget that will change funding sources from General Fund to the Second Injury Fund.

4 positions (including benefits)	$141.3
Non-personal service costs relating to these 4 existing positions	
200: travel	9.9
300: contractual	25.8
400: commodities	2.3
	179.3

FY'83 Component Breakdown:

	Workers' Compensation Administration	Second Injury Fund
PS		$161.8
Travel		20.0
Contract*	$47.0	75.3
Commodities		[illegible]
Equipment		10.4

III. Analysis

A Workers' Compensation Officer I reclassification to a Workers' Compensation Officer II with related travel and contractual services. Cost $16.6

100 Personal Services	$ 5.5
200 Travel	5.0
300 Auto, Lease, Indirect, etc.	6.1
	$16.6

The data processing operations cost will increase by $14.0 because of ennancements for a tickler system, running two systems parallel and the files expansion to retain the addresses of all claimants.

The printing of 10,000 Workers' Compensation Acts and 25,000 Employee Information booklets. $35.0

The design and printing of new forms. $2.5

Computer program modifications to implement the changes introduced by the bill. $20.0

Equipment expense for computer terminals, panelling, cabinets, and files. $6.0

Included one-time items in FY '83

Equipment	$10.4
Booklets and Acts	35.0
Design and printing of new forms	2.5
Computer programs	20.0
	$67.9

JUSTIFICATION:

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

The rehabilitation administrator is necessary to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

Extensive travel within the state is necessary to provide assistance to approximately 12,000 employers in developing programs for re-employment of injured workers and coordinating counselor services with workers, insurers/employers, labor unions, and rehabilitation providers.

9. Travel: $10,000 (20 trips @ $500 per trip)
10. Contractual: Space $3,100 (to be transferred to DOA)

CHAIRMAN

H 60 (Rev. 12/78)

TO: MEMBERS OF THE HOUSE LABOR AND COMMERCE COMMITTEE

REGARDING: HB 161

FROM: Joseph Merrill, Ph.D, CPA
Vice President - RAI Public Utilities
Consultants, Inc., Anchorage

Below is a brief summary of why we feel a bill supporting a Public Utilities Revolving Loan Fund is necessary - that is, the problems that such a bill can help resolve -

1. Public utilities are regulated as to the rate of return they are allowed to earn. When the regulated rate is less than the interest rate a utility is required to pay for construction, the result is obvious - no construction.

2. Most rural telephone systems in Alaska have obtained their construction funds from the federal REA program at interest rates of 2% - 5%. However, the process is slow and recently doubts have arisen as to the reliability of the long-term aspects of that program. Because of the delays in dealing with Washington, construction seasons are missed, costs increase and the nature of the program makes interim (short-term) financing difficult, if not impossible.

3. The type of collateral offered by a utility makes potential lenders leery. For example, who wants to repossess 30 miles of underground telephone cable?

4. When a utility is organized as a co-op, requiring co-signers on a bank note is not relevant, resulting in a hesitancy to loan on the part of many lenders.

5. Short construction seasons, barged freight, etc., make delays of a few weeks, delays of a year in practice.

6. An example of the effect of differing interest rates is given below. Assume a $1,000,000 loan and 200 telephone subscribers, with a 30 year loan amortization schedule.

Continued on Page 2

Interest Rate	Total annual payment to amortize loan	Monthly amount per subscriber
5%	$ 65,000	$27.08
8%	88,800	37.00
10%	106,000	44.16
15%	152,300	63.45
20%	200,800	83.66

A state program designed to resolve these types of problems should incorporate the following features:

1 - An awareness of the common aspects of all utilities as well as the unique aspects of each type (i.e. telephone, power, etc.).

2 - A process whereby construction - period funding can be handled more speedily than permanent long-term financing, yet deal with both.

3 - Distinctions between co-ops and privately owned corporations.

4 - The recognition of the unique collateral and equity circumstances of utilities.

5 - An awareness of the need for loans at interest rates well below the rate of return permitted under regulated circumstances.

Accordingly, we would recommend that the program be administered and serviced through banks with a minimum amount of their direct participation and be goverened by a special board under the Department of Commerce and consisting of -

A banker (of a participating bank).
A lawyer.
An accountant and finance person.
A representative from the public utilities commission.
An engineer of the specialty of the type of utility applying for the loan.
A public representative.
A representative of the Department of Commerce.

These brief notes are not meant to be comprehensive explanations but rather to highlight the aspect of an ideal bill.

Our firm is representing the support of such a bill by the Alaska Telephone Association, and our clients.

Gordon Parker
Executive Director

March 25, 1981

Honorable Vern Hurlbert
Alaska State House
Pouch V
Juneau, Alaska 99811

Dear Representative Hurlbert:

At the request of Ken Spray, I have compiled a set of figures to demonstrate the possible loss of revenue caused by cuts in REA funding. It is still unclear how deep the cuts will go, therefore these figures represent the worst possible damage. They consist of dollars applied for but not yet approved and approved but not received. In other words, the figures include all money which could be lost.

United Utilities, Inc.	26.4 million
Cordova Telephone Cooperative	3.45
OTZ Telephone Cooperative, Inc.	3.74
Interior Telephone Company, Inc.	2.2
Matanuska Telephone Association	16.0
Nushagak Telephone Cooperative, Inc.	.3
Bush-Tell, Inc.	5.0

We appreciate your assistance with this problem. I plan to be in Juneau on April 7 and hope to discuss it further with you. If you need any assistance before then, I am available at any time.

Sincerely yours,

Gordon Parker

LETTER OF INTENT

CSHB 165 (Labor & Commerce)

Dear Mr. Speaker:

Your committee on Labor and Commerce has had under consideration HB 165, " An act creating the public utility revolving loan fund; and providing for an effective date."

We have approved a committee substitute that still addresses the intention of the orginal legislation: that is, to create a revolving loan fund for public telecommunications.

During public testimony the committee was convinced that administration of the fund should be on a priority basis so those public telecommunications utilities desiring to expand services to unserviced areas would be given a priority.

The committee believes such priority would best serve the rurual areas of the state that are in desperate need of a communications system and this in turn would best serve the state as a whole.

Respectively submitted,

Vern Hurlbert

Rep. Vern Hurlbert
Chairman

PER YOUR REQUEST, THE IMPACT OF INCREASING THE ANNUAL PERCENTAGE RATE FROM 5% TO 12% UPON THE SUBSCRIBERS OF MTA. ASSUMING $6,000,000 LOAN WOULD BE APPROXIMATELY $322,000. THIS EQUATES TO ABOUT $30 PER CUSTOMER PER YEAR. TO OFFSET THIS WOULD REQUIRE AN INCREASE IN RATES OF 15% TO 20%. EACH YEAR THAT MTA WOULD BE REQUIRED TO BORROW AT THE HIGHER RATE WOULD REQUIRE ANOTHER INCREASE OF THE SAME MAGNITUDE. IF I CAN PROVIDE ADDITIONAL DATA, PLEASE CALL.

Re: Proposed House Bill 165

Dear Mr. Spray:

Interior Telephone Company, Inc., currently provides telecommunications services to nine rural Alaskan communities, serving approximately 1,425 customers.

Our 1981 capital expansion budget has been drastically reduced from $680,000 to $210,000 because of the non-availability of low interest Rural Electrification Administration (REA) loan funds. We project that approximately 88 new customers will be served during 1981 after our construction efforts connect them to the telephone network.

Interest rates on loan funds for construction have a direct effect on rates we charge our customers. Should HB 165 incorporate a 12% interest rate instead of 5%, we would have to pass on to our customers a $.66 per month increase in basic telephone rates. This increase assumes a 20 year pay back on a $210,000 loan, spread over 1,413 customers.

We respectfully request your thoughtful consideration to the sensitivity of interest rates as they relate to the bills our customers pay each month. We feel that basic telephone rates paid by rural Alaskans should be kept as low as possible to insure the continuing development of the State and its resources.

Sincerely yours,

FIRST REPORT AND ORDER

Adopted: January 14, 1981 Released: April 17, 1981

By the Commission: Commissioner Fogarty issuing a separate statement.

I. INTRODUCTION

1. On November 16, 1978, the Xerox Corporation (hereinafter "Xerox") filed a Petition for Rulemaking ("Petition") requesting the reallocation of the 130 MHz of radio frequency spectrum between 10.55 and 10.68 GHz and the adoption of the necessary rules and policies to permit the establishment of nationwide common carrier digital telecommunications networks that would provide for the high-speed, end-to-end, two-way transmission of digitally encoded information. As proposed by Xerox, these networks would consist of intercity facilities employing satellites and terrestrial point-to-point microwave and intracity facilities which would include Digital Termination Systems (DTS) 1/ and intermodal links. Xerox proposed that these facilities be employed to provide a new end-to-end common carrier radio service (which we call Digital Electronic Message Service or DEMS) which would meet the needs of widely dispersed business and governmental organizations for document distribution, data communications, and teleconferencing within and among the major U.S. cities.

2. In response to the Petition and the comments filed regarding it, the Commission, on August 29, 1979, issued a Notice of Proposed Rulemaking and Inquiry (hereinafter "Notice"). 2/ In that

1/ The term Digital Termination System (DTS) refers to two-way point-to-multipoint microwave radio facilities made up of local collection and distribution stations, each providing two-way transmission links to multiple outlying stations located at user premises.

2/ FCC 79-464, released August 29, 1979, 44 Fed. Reg. 51257 (1979).

To: Al Adams

From: Ken Spry AR

Subj: CSHB165T

As you are aware CSHB165 is in the House Finance Committee & there is apparently a problem with the Finance Chair on the Bill.

I am supply you with Our Justification for the successful passage of this Bill.

REA funding is apparently going to be eliminated by the Reagan Admin & by doing so severely jeopardizes continued AP well as expanded phone service to the state particularly Bush communities.

A letter of intent was approved by the L&C Committee hopes that those companies expanding services to underserved areas would receive priority.

On April 2nd, 1981 we Teleconference this Bill to all stations & the Testing Firm companies as well as the public with support of the Bill. There was no testing that opposed the Legislation.

The Legislation allows for 5% loans of up to 5 million per loan, with terms of 20 years.

My perception of Rep Cotton's objections are as follows.

1. Revolving Loan Fund - (another specialized)
2. AEPA
3. ~~Not restrictive~~ Limit on loans is not restricted enough.

I would hope that we could work in a Bill that would eliminate these objections & hopefully that the Bill moved from Finance.

I not sure how to get around a 'Revolving Loan Fund, but there must be ways in which to do it.

The T.C.'s do not object to who administers the fund but it was believed that ATRIA could use, its ~~The Exempt Body~~ Body capabilities to the success of an established Long Term Program. ARDA Has An Advantage to leverage themselves.

I have ~~Attached~~ disclosed 2 copies of a letter from ATA which shows what companies were participating fully Pre-REA. The proposed legislation does not ~~Solve~~ completely resolve this funding but it is sufficient to at least keep these companies afloat.

I have also included the letter of intent.

Rep. Al Adams

RE: CS/HB 165

Dear Rep. Adams:

As you are aware CS/HB 165

of DTS facilities and the services provided thereby, since, even if DTS facilities may have some voice capacity, it will not be "telephone exchange service" within the meaning of that section. The purpose of Section 221(b) was to reserve to the states jurisdiction over local telephone exchanges which serve single multi-state areas. North Carolina Utilities Commission v. FCC, 552 F. 2d 1036,1045 (4th Cir.), cert. denied, 434 U.S. 874 (1977).

VI. MISCELLANEOUS ISSUES

81. A few commenters asserted that there has not been sufficient notice of the actions contemplated to develop a factual basis for the adoption of rules at this time. We believe, however, that our Notice of Proposed Rulemaking was sufficient to allow us to adopt rules without any further notice. Section 553(b) of the Administrative Procedure Act, 5 U.S.C. § 553(b), provides in pertinent part that a notice of rulemaking must include "the terms or substance of the proposed rule or a description of the subjects and issues involved." The D.C. Circuit has interpreted this to mean that the notice need only be "sufficiently descriptive of the 'subjects and issues involved' so that interested parties may offer informed criticism and comments." Ethyl Corp. v. EPA, 541 F.2d 1, 48 (D.C. Cir.), cert. denied, 426 U.S. 941 (1976). See also Buckeye Cablevision, Inc. v. FCC, 387 F.2d 220 (D.C. Cir. 1967). In this proceeding, notice was given of at least the subject matter of all the rules that we adopt today. Furthermore, evidence of the sufficiency of the notice is shown by the fact that so many parties commented at length on the issues.

82. Finally, with respect to Alascom's request that Alaska be excluded from this proceeding, we note that with the possible exception of MTS and WATS, for which the question is still open, see MTS and WATS Market Structure Inquiry, 81 F.C.C. 2d 177 (1980), we generally believe that Alaska should be treated no differently than the contiguous 48 states. See DHL Communications, Inc., File No. W-P-C 2000 (released Dec. 30, 1980); See also Integration of Rates and Services, 61 F.C.C. 2d 380 (1976), reconsideration, 65 F.C.C. 2d 324 (1977). We see no reason for establishing a different policy here.

lottery proceeding would hinder long-range planning, especially if applied to contested renewals.

G. Miscellaneous Issues

The comments generally agreed that DTS would create minimal environmental impact. Some commenters stated that no environmental impact statements should be required. Others commented that existing rules adequately covered the issue.

TDS worried in its comments about possible adverse affects of DEMS on rural areas. First, service might not be available in rural areas. Second, if it were available, it might result in loss of revenues to rural telephone companies.

Alascom commented that, in its view, the market for telecommunications services in Alaska was too thin to support yet another service. It requested that Alaska be excluded from this proceeding.

NASA commented on its concern that DTS be compatible with its remote sensing programs. Those remote sensing programs are located in the 10.6 GHz band where DTS is also proposed to be located.

III. LEGAL ISSUES

A. Necessity for a Further Notice of Proposed Rulemaking

A few of the comments were directed to the legality of adopting specific rules without a further Notice of Proposed Rulemaking proposing specific rules for comment. GTE Service stated that unless the comments were uniformly favorable, a two-step Notice of Inquiry-Notice of Proposed Rulemaking process would be necessary. AT&T was of the opinion that it would be improper to make rules on the basis of the record in this proceeding. There was, in AT&T's view, inadequate time and notice of specific actions contemplated to permit the development of the necessary facts addressing these issues.

Xerox, on the other hand, stated that the Commission should adopt final rules for DTS without a further Notice of Proposed Rulemaking. In support of this position, Xerox cited the Administrative Procedure Act, 5 U.S.C. §§ 511-599, 701-706. In particular, Section 553(b) of that Act states that it is not necessary to propose specific rules. Either the terms and substance of the proposed rules or a description of the subjects and issues involved would be sufficient. The Notice, in Xerox's opinion, meets this standard. Furthermore, the Commission's statement of intent to adopt rules without further comment gives notice to all parties, and the record in this proceeding is sufficient to support final action.

1. Orig – Interim financing 20 prime +3
2. Reagan cuts
3. must now replace –
4. 5% – 10% –

---

5. AIDA – Leverage
TAx exempt municipalities

---

1. original Bill – was to provide Interim financing – somehow most interim $ is prime + 3
2. Reagan cuts. (Pending 57 mill)
3. which changed the complexion of the bill – it is now going to Fold the void of REA funds Lesser
3. AIDA – TAx exempt Bonds municipals – and, Frank, Kit, the committee leverage the money –

4. Interest at 5% – is what the phone companies use to – however if REA Funds for phones was going to continue it would be at 10.5% –

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 165 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act creating the telecommunications revolving loan fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. DECLARATION OF POLICY AND PURPOSE. The legislature finds that

(1) the availability of adequate public telecommunications services and facilities at reasonable rates in the state is a proper matter of public concern;

(2) the ability of privately, municipally and cooperatively owned public telecommunications utilities in the state to finance service to the public and to finance capital improvements required to extend and improve service on terms that will enable service rates to remain at reasonable levels in the foreseeable future is seriously impaired by the unavailability of low-cost federal loans;

(3) as a matter of public policy, to ensure the sound development of the state and its resources and to provide an acceptable level of telecommunications services to its residents at reasonable rates, the state should assist telecommunications utilities in acquiring the money that is essential to operate, maintain and expand facilities and services.

* Sec. 2. AS 44.83 is amended by adding new sections to read:

ARTICLE 08. TELECOMMUNICATIONS REVOLVING LOAN FUND.

Sec. 44.83.400. REVOLVING LOAN FUND CREATED. The telecommunications revolving loan fund is created in the Alaska Power Authority.

Sec. 44.83.410. POWERS AND DUTIES OF THE AUTHORITY. (a) The

authority shall formulate procedures and adopt regulations to implement AS 44.83.400 - 44.83.490 in consultation with the Alaska Public Utilities Commission. ~~The procedures and regulations, including economic and financial requirements for loans, will conform, to the extent possible, to procedures and regulations adopted by or applicable to the federal Rural Electrification Agency in accordance with the Rural Electrification Act of 1936, as amended (7 U.S.C. sec. 921 et seq.).~~

(b) The authority may

(1) subject to approval by the Alaska Public Utilities Commission, make loans from the telecommunications revolving loan fund to a public telecommunications utility to finance or refinance capital improvements, plant and facilities, and to improve and expand services, if other credit is not readily available from private or federal lending institutions;

(2) make loans, subject to approval by the Alaska Public Utilities Commission, from the telecommunications revolving loan fund to a public telecommunications utility to meet short-term or interim capital needs before receipt by the utility of long-term loans;

(3) consult with appropriate federal agencies and other lending institutions which make loans to public utilities in the state concerning policies, regulations and procedures to carry out the provisions of AS 44.83.400 - 44.83.490;

(4) designate agents and delegate powers to them as is necessary;

(5) require bonds and undertakings from persons employed by the authority as necessary, and pay the premiums on the bonds and undertakings;

(6) establish amortization plans as provided in AS 44.83.-440(c).

Sec. 44.83.420. ELIGIBILITY FOR LOANS. A public telecommunications utility is eligible for a loan under AS 44.83.410 if

(1) it is a public utility for furnishing telecommunications service under AS 42.05.701(2)(B);

(2) at the time of application for a loan it is serving the public under a certificate of public convenience and necessity issued by the Alaska Public Utilities Commission;

(3) in the judgment of the authority

(A) the public telecommunications utility shows a definite potential for providing improved or expanded service in the community or service area it serves, or otherwise requires the financing to maintain adequate, efficient and safe service;

(B) the utility will be able to repay the loan;

(C) the utility has satisfied requirements imposed by regulation of the authority.

Sec. 44.83.430. APPROVAL OF LOANS. (a) A loan may not be made by the authority under AS 44.83.410 until the loan has been approved by the Alaska Public Utilities Commission upon findings that

(1) the applicant is willing and able to provide the services for which the facility to be financed by the loan is needed;

(2) the facility to be financed by the loan and the services to be provided are required for the convenience and necessity of the public and will result in an improvement of service; and

(3) granting the loan will not result in an unreasonably adverse impact on a rate or rate structure regulated by the Alaska Public Utilities Commission.

(b) Findings under this section shall be made in accordance with regulations adopted under AS 42.05.151. The Alaska Public Utilities Commission shall approve or deny a loan application within 90 days

after it is submitted.

Sec. 44.83.440. CONDITIONS AND LIMITATIONS ON LOANS. (a) A loan to a public telecommunications utility under AS 44.83.410 may not exceed $5,000,000.

(b) A loan made under AS 44.83.410 shall be on terms and conditions established by regulation of the authority and ~~shall~~ be secured by collateral equal in ~~fair~~ market value to at least ~~75 percent~~ of the loan.

(c) Amortization plans for the repayment of a loan made under AS 44.83.410 may not exceed 30 years. The rate of interest charged on the unpaid balance may not exceed the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan.

(d) A loan may not be made until an investigation and an economic feasibility study are conducted and, as a result of the investigation and study, the authority determines that the loan is economically sound, that the utility will be financially self-sustaining, and the loan will be fully amortized in accordance with the terms and conditions of the loan. The economic feasibility study shall be conducted by the authority staff or by consultants, engineers or other technical experts approved by the authority.

(e) To facilitate its determination under (d) of this section the authority may by regulation require an applicant for a loan to furnish systems studies, long-range economic forecasts, financial data, and technical information, and, if a loan is participated in by a financial institution in an amount not less than ~~20 percent~~ of the total amount of the loan, the authority may consider the investigation and economic feasibility study made or accepted by the financial institution as a basis for its participation.

(f) If a financial institution participates in a loan made under AS 44.83.410, it may elect to administer and service the loan for a reasonable fee not exceeding one-half of one percent of the total loan amount.

(g) The state and the participating financial institution shall each have a 1st lien on the collateral or share the collateral to the extent of their respective parts of the total loan. The authority may subordinate a 1st lien on collateral securing a loan under this chapter to a lien of the federal Rural Electrification Administration.

(h) Notwithstanding (d) of this section, if an application for a loan to a public telecommunications utility has been approved by the federal Rural Electrification Administration and, due to lack of money, the loan will not be made as approved, the authority may accept approval of the loan by the federal Rural Electrification Administration as evidence of economic feasibility and as a basis for awarding a loan under AS 44.83.410. A loan awarded under this section may not be for an amount greater than the amount of the loan which was approved by the Rural Electrification Administration.

Sec. 44.83.450. ADMINISTRATION. Money loaned under AS 44.83.410 shall be delivered to the borrower in the form of a warrant drawn on the treasury, and charged against the telecommunications revolving loan fund. Upon repayment of a loan in accordance with the prescribed terms, or upon liquidation by foreclosure or other process, or upon receipt of interest or other revenue, the money received shall be turned over to the authority for deposit in the telecommunications revolving loan fund.

Sec. 44.83.460. SALE OR TRANSFER OF NOTES, MORTGAGES AND OTHER COLLATERAL. (a) The authority may sell or transfer at par value or at a premium or discount to a bank or private purchaser for cash or other consideration the notes, mortgages and collateral held by the authority

as security for loans made under AS 44.83.400 - 44.83.490.

(b) The authority may sell or transfer at par value to the Department of Revenue the notes, mortgages and other collateral held by the authority as security for loans made under AS 44.83.400 - 44.83.490. The Department of Revenue may purchase the notes, mortgages and other collateral so offered, allowing the authority a one-half of one percent service fee.

(c) The authority shall proceed to recover its interests in a loan which is in default in accordance with regulations adopted by the authority. The authority shall sell or transfer all physical collateral obtained through default to a nongovernmental entity within 45 days after receiving title. During the pendency of a default proceeding, the authority, another public corporation, a state agency, or a political subdivision of the state may not operate facilities which are held as collateral, but a private entity may be designated by the authority upon approval of the Alaska Public Utilities Commission to operate facilities held as collateral during the pendency of a default proceeding.

Sec. 44.83.470. GUARANTEES OF LOANS. (a) The authority may enter into agreements with state departments and agencies, private banks, other lending institutions, and individuals for the purpose of guaranteeing loans made to qualified public telecommunications utilities. The guarantees may not exceed 90 percent of the amount loaned and the loans shall be secured in the same manner as provided for direct loans under AS 44.83.400 - 44.83.490.

(b) A loan made under AS 44.83.410 and guaranteed by the state shall bear an interest rate on the unpaid balance not exceeding the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan.

Sec. 44.83.480. PROCEEDINGS AND REGULATIONS. The Administrative Procedure Act (AS 44.62) governs all proceedings, and the adoption of regulations, under AS 44.83.400 - 44.83.490.

Sec. 44.83.490. DEFINITION. In AS 44.83.400 - 44.83.490 "authority" means the Alaska Power Authority.

* Sec. 3. This Act takes effect July 1, 1981.

ECONOMIC AND SOCIAL BENEFITS OF THE REA TELEPHONE LOAN PROGRAM

EDWIN B. PARKER, Ph.D.

(Former Professor of Communication,
Stanford University)

March 24, 1981

ECONOMIC AND SOCIAL BENEFITS OF THE REA TELEPHONE LOAN PROGRAMS

By

EDWIN B. PARKER, Ph.D.
FORMER PROFESSOR OF COMMUNICATION, STANFORD UNIVERSITY

March 24, 1981

I. QUALIFICATIONS OF THE AUTHOR

Since receiving my Ph.D. in 1960, I have been on the faculty at the University of Illinois and at Stanford University, where I was Professor of Communication until 1979. I am now vice-president of Equatorial Communications Company, a company committed to the development and implementation of satellite and computer technologies in ways that should lower the cost of rural and other "thin route" data communications.

During the last ten years of my academic career I specialized in measuring the social and economic benefits of rural telecommunications, including a major program in the 1970s that led to 100 rural Alaska communities receiving telephone service for the first time. I authored or edited

three books, including Handbook of Communication, and over fifty articles and am on the editorial board of Telecommunications Policy. I have served as a consultant on communications policy to national and state governments, including the U.S. delegation to the World Administrative Radio Conference, and international bodies, including the International Telecommunication Union.

II. INTRODUCTION

My research and the research of my colleagues on the role of telecommunications services in economic and social development have provided certain findings which may assist you in your analysis of the Rural Electrification Administration's Telephone Loan Programs. I will briefly summarize these findings under three points. First, there are demonstrable benefits for regional and national economies from investments in rural telecommunications facilities in terms of increased efficiency in the organization of economic activity leading to increased productivity. I have estimated that the benefits of these programs to the United States economy are between six and seven times their costs. Next, there are demonstrable benefits for the quality of life in regions and nations from investments in rural telecommunications facilities in terms of increased availability and cost-effectiveness in the delivery of social services such as health and education. Finally, because these benefits are, to a considerable extent, what economists call external

(as opposed to internal or private) benefits, government intervention, such as in the form of the REA Telephone Loan Programs, is required for the optimal amount of investment in rural telecommunications facilities to be made.

III. CONTRIBUTIONS OF RURAL TELECOMMUNICATIONS TO ECONOMIC EFFICIENCY AND PRODUCTIVITY

Rural telecommunications systems increase economic efficiency and productivity. Telephones improve the organization of economic activity.[1/] Efficient production and marketing requires the coordination of economic units, which depends on the availability of effective, fast, and reliable communications systems at low prices. A subscriber increases his efficiency and productivity through telephone services; these gains are his private benefits from subscribing. Also, subscribers throughout a nation increase their productivity from their ability to communicate with one subscriber through telephone services; these gains are the external benefits from that subscriber's decision to

1/ See, e.g., E. Parker, An Information-Based Hypothesis, 28 J. Communication 81 (1978); A. Hardy, The Role of the Telephone in Economic Development, 4 Telecommunications Policy 278 (1980); B. Wellenius, Telecommunications in Developing Countries, 1 Telecommunications Policy 289 (1977); H. Hudson, D. Goldschmidt, E. Parker, and A. Hardy, The Role of Telecommunications in Socio-Economic Development: A Review of the Literature with Guidelines for Further Investigation (1979).

join the network. Numerous case studies have shown that telephones contribute to regional and national economic development. Both developing and developed countries have realized economic benefits from investments in telephone facilities.

I recently supervised the Ph.D. dissertation of Andrew Hardy. Hardy's analysis of the economic benefits of telephone services focused on their impacts on gross domestic product, which captures both private and external benefits. His work went beyond the previously established correlation between the number of telephones per capita and the size of the gross domestic product. He was able to demonstrate the causal sequence of that relationship, establishing that an increase in the amount of telephone service at one point in time leads to an increase in the size of the economy at a later time. He found that a one percent increase in the number of telephones per capita in the United States and Western Europe in the period 1950-1955 accounted for a three percent increase in per capita income in the period 1955-1962.[2/]

Improvements in telecommunications services are likely to yield greater economic benefits in rural than in urban areas. Transportation and other communications media are better substitutes for telecommunications in higher density

---

2/ A. Hardy, The Role of the Telephone in Economic Development Appendix C (Ph.D Dissertation, Stanford University, 1979).

areas. Increases in the cost of energy have heightened the economic benefits of substituting telecommunications for costly travel and thereby conserving energy resources.[3/] Furthermore, the information flows facilitated by telecommunications services can make other uses of energy more efficient.

Hardy showed that the impact of telephone service on gross domestic product increases as density declines.[4/] Using World Bank and other statistical data from sixty countries over the period from 1960 through 1973, Hardy established that an increase of one telephone per hundred people in locations already having eighty telephones per one hundred people led to a .01% increase in gross domestic product (GDP) the following year. The same increase of one telephone per hundred people in areas with twenty telephones per hundred led to a much larger .09% increase in gross domestic product in the following year.

A somewhat rough, but suggestive application of Hardy's analysis to the U.S. suggests that the benefits of the REA program are substantial. REA Telephone Loan Programs have advanced about $3.9 billion in funds at reduced interest

---

3/ See, e.g., National Transportation Policy Study Commission, The Impact of Telecommunications on Transportation Through The Year 2000 45 (1978); Hudson, supra, 25.

4/ Hardy, supra, Appendix C. Note that the statistical analysis reported here was on data for a different set of countries and years than the analysis reported on page 4, supra.

rates toward initial telephone service for 2,882,568 subscribers and improved service for 1,657,622 subscribers.[5/] REA borrowers served 6,335,312 telephones; 3.6 percent of the telephones in the United States in 1979.[6/] If one assumes that, but for the REA Telephone Loan Programs, the initial subscribers served by REA borrowers would not now be receiving service and if one assumes, quite conservatively, that each of these subscribers accounts for only one telephone, the stock of telephones in the U.S. would be reduced by 1.1 per one hundred people.[7/]

Hardy's analysis shows that a penetration level of 80%--close to the U.S. national ratio of telephones to population--implies that such a reduction in the stock of telephones would reduce the GDP growth by approximately 0.011 percentage points. That is, if the 1979 stock of telephones in the U.S. had been lower by 1.1 per one hundred people, 1980 GDP would have been about $283 million less than the actual

---

5/ REA, 1979 Annual Statistical Report: Rural Telephone Borrowers xxiv, xxiii, xxiv. The number of subscribers who actually received initial telephone service as a result of the REA Telephone Loan Programs at the end of 1979 is estimated for purposes of the following analysis at 2.4 million, due to the time required to complete construction.

6/ Ibid, xv; Federal Communications Commission, Statistics of Communications Common Carriers: 1979 7.

7/ The U.S. population in 1979 was 221 million and the national ratio of telephones to population was 79%. FCC, supra, 7. The estiamte of 1.1 telephones per 100 people in 1979 was based on the assumption of 2.4 million initial subscribers. See note 5, supra.

level of $2,576.5 billion.[8] This loss of GDP would increase each year. The increments in GDP attributable to the REA Telephone Loan Programs mean more jobs and higher productivity for Americans.

Since the penetration of telephones is lower in rural areas than in the nation as a whole,[9] the 80% penetration estimate may be inappropriate for evaluating the value of telephone service provided by REA borrowers. I have not found data on the population of areas served by telephone companies borrowing from the REA; but, available data show that the ratio of telephones to main stations in the REA areas is 23% lower than the national average.[10] Suppose that the ratio of telephones

---

8/ U.S. Department of Commerce, Fourth Quarter 1980 Gross National Product (Revised)(March 18, 1981). The calculation of GDP gain in 1980 attributable to the REA Telephone Loan Programs may understate their economic benefits in three ways. First, in contrast to the one telephone per new subscriber assumed by this calculation, the average number of telephones per subscriber served by telephone companies borrowing from REA in 1979 was 1.56. REA, supra, xv. Second, in contrast to the assumption that the REA programs have only had an impact on the number of telephones for subscribers receiving initial service, clearly the loans for improved telephone service have also affected the number of telephones in rural areas. Third, Hardy's analysis shows that the increment in telephones attributable to the REA programs prior to 1979 would affect 1980 GDP directly as well as through their effects on 1979 GDP and on GDP in earlier years; only the former effect was accounted for in this calculation.

9/ L. Perl, Economic and Demographic Determinants of Residential Demand for Basic Telephone Service Table 4 (1978).

10/ REA, supra, xv; FCC, supra, 32.

to population in areas served by REA borrowers is 60% rather than the national average of 79%. Then, using Hardy's results, the GDP gain attributable to the REA Telephone Loan Programs would be about $850 million in 1980 and growing each year.

Moreover, the benefits of the Telephone Loan Programs are substantial even if attention is restricted to recently approved REA telephone financing. In 1978, the REA approved financing of $311 million toward initial service for 180,518 subscribers and improved service for 71,199 subscribers.[11/] Supposing that 180,518 new telephones in 1979 are attributable to these loans, the resulting 1980 GDP gains are estimated by $20 million at 80% penetration and $60 million at 60% penetration.

Analyses such as Hardy's have led me to write that telecommunications may be the most important component of regional economic infrastructure, possibly more so than transportation or electrification, for rural economic growth.[12/] The benefits to rural economic growth are of two forms. First, new activities and enterprises are made possible in rural areas by investments in telecommunications facilities. Second, improved telecommunications services increase the efficiency of existing agricultural and non-farm rural enterprises.

11/ REA, supra, vii.

12/ Parker, supra, 83.

The economic benefits from telephone services require, as a necessary condition, connection to the telephone network. However, access alone does not exhaust the economic benefits that can be derived from telephone services. Increased economic efficiency can be gained by: (1) improving the reliability of telephone services, such as by installing buried cable; (2) improving the availability and confidentiality of telephone services, such as by providing single-party services; and (3) improving the capabilities of telephone services, such as by providing broadband (cable) and digital services.

Clearly, the ability of rural telephone companies to borrow from the REA at reduced interest rates for financing investments to provide service to new subscribers and to improve the quality and range of services to others has had important benefits to the nation's economy. As noted above, the REA Telephone Loan Programs may have raised 1980 GDP by as much as $850 million. This sum far exceeds any estimate of the cost of the program. Suppose that the cost to the Federal Government in interest support for the REA Telephone Insured Loans was 5.6% and for the Rural Telephone Bank Loans

was 1.2% for outstanding loans at the end of 1979.[13/] The outstanding principal balances at the end of 1979 of REA Telephone Insured Loans and RTB Loans were $2.16 billion and $0.77 billion, respectively.[14/] From these data, the cost to the federal government in interest support for the Telephone Loan Programs can be estimated at $130 million in 1979. The possible benefits in expanded gross domestic product from the Telephone Loan Programs are between six and seven times as large as the cost to the federal government in interest support.

13/ The 5.6% interest support for the REA Telephone Insured Loans was estimated by the difference between the 2.5% weighted average for total funds advanced through this program at the end of 1979 and the 8.1% interest charged on total interest bearing public debt in 1979. REA, supra, vii; U.S. Treasury Department, Treasury Bulletin Table F D-2 (Feb. 1981). The 1.2% interest support for the Rural Telephone Bank Loans was estimated by the difference between the 7.3% average interest rate for RTB funds advanced from January 1, 1975 to January 1, 1980 and the 8.5% average interest charge paid by the RTB for funds obtained from January 1, 1975 to January 1, 1980. (Data supplied by REA.) Funds advanced through the REA Telephone Guaranteed Loan Program are charged a rate of interest slightly greater than the Federal Financing Bank's cost of capital and there have been no defaults, resulting in no costs to the federal government for this program.

14/ REA, supra, xxv, xxvi.

As impressive as this result is, the costs of the programs to the federal government were overstated in this calculation. The REA Telephone borrowers paid $196 million in taxes in 1979 to local, state and federal governments.[15/] The REA Telephone Loan Programs have increased the taxable income of rural telephone companies by expanding the number of subscribers served, raising the quality and utilization of their services, and lowering their capital costs. Consequently, a substantial portion of the annual interest cost to the federal government is returned through higher income tax payments by the borrowers. Furthermore, the stimulus of the loans to economic activity results in additional tax revenues to the federal government, possibly making the REA Telephone Loan Programs net contributors to the federal treasury.

As the United States attempts to increase its economic efficiency and productivity or "re-industrialize," full advantage should be taken of the ability of improved rural telephone services to contribute to economic development and energy conservation.

---

15 REA, supra, xxiv.

IV. CONTRIBUTIONS OF RURAL TELECOMMUNICATIONS TO EFFICIENT DELIVERY OF SOCIAL SERVICES

Telecommunications services can increase the social benefits from resources devoted to such activities as health care and education.[16/] Social service delivery can be increased and made more cost-effective with telephone and cable services by extending the geographic range of institutions such as hospitals and colleges, providing training and consultative support for field personnel, and enhancing the coordination of community and regional activities. With telecommunications services, scarce resources can be utilized more efficiently and by more people with reduced travel expenses and time requirements.

My studies in Alaska found a significant increase in the quality of health care resulted from the addition of reliable voice communications linking village paraprofessional health aides with distant supervising physicians of the U.S. Public Health Service.[17/] These considerations favor investments in rural telecommunications facilities especially because rural areas are characterized by a

---

16/ See, e.g., Hudson, supra, 8-10; The Cabinet Committee on Cable Communications, Cable: Report to the President 46-47 (1974).

17/ H. Hudson and E. Parker, Medical Communication in Alaska by Satellite, 289 New England J. Medicine 1351 (1973).

deficiency in the supply of social services and great distances for people to obtain the services that are supplied.

The Reagan Administration has proposed substantial cutbacks in the federal government's social expenditures. Improvements in telecommunications facilities increase the benefits from social service expenditures and should be considered in the search for ways to derive the maximum social benefit from resources devoted to social services. Improved telecommunications services can lead to productivity gains in public sector services as well as private sector enterprises.

V. REQUIREMENT OF GOVERNMENT INTERVENTION TO OBTAIN THE OPTIMAL INVESTMENT IN RURAL TELECOMMUNICATIONS FACILITIES

The economic and social benefits of investment in telecommunications facilities are not confined to individual subscribers or users of telecommunications services. Entire regions and nations derive benefits from the investments.[18/] The contributions of these investments to improved productivity for geographically widespread existing and future enterprises, health, and education result in what economists refer to as external benefits.

18/ See, e.g., Hudson, supra, 39-42; Hardy, supra.

The commercial marketplace responds to private, rather than public (private plus external), benefits. In the absence of government intervention, the telecommunications industry makes investment decisions by considering only what potential subscribers or users would be willing to pay for a service. The commercial marketplace will make investments when the private benefits exceed the facilities' costs, but not when the public benefits exceed the costs and the private benefits are less than the costs. This calculation can lead to underinvestment in terms of social welfare since the public benefits from additional investments in telecommunications facilities far exceed the private benefits.

Despite the efforts of the REA Telephone Loan Programs, underinvestment in telecommunications facilities is suggested by the state of telecommunications facilities and services in rural areas in the United States. Some rural areas have no telephone service or provide services at rates not affordable to rural citizens.[19/] Some subscribers are limited to multiparty service provided by unreliable, inefficient facilities. The quality of telephone services in

---

19/ A recent study by REA showed that monthly single-party residence telephone rates in areas served by telephone companies borrowing from REA are 23% higher on average than rates for comparable service in rural areas served by the Bell System and various independent telephone companies not borrowing from REA. See Background Paper of National REA Telephone Association (March 13, 1981).

rural areas generally lags behind the services received by urban residents and businesses. Technological innovations often are adopted by urban telephone systems long before they spread to rural areas.[20/]

While the per subscriber cost of providing telephone service is usually higher in rural areas, the public benefits of rural services are also higher. Certain economic and social benefits to the nation could not be realized if the nation relied solely on the commercial marketplace to supply capital for investments in rural telecommunications facilities.

The conclusion that economists reach in this situation is that government intervention is required to obtain the optimal amount of investment. It is widely recognized that, because of the economic and social external benefits of telecommunications, there is a strong case for public investment in rural telecommunications facilities.[21/] The REA Telephone Loan Programs have been designed to correct a failure of the commercial marketplace to serve the public interest. Low-

20/ See, e.g., W. Baer, Telecommunications Technology in the 1980s, in G. Robinson (ed.), Communications for Tomorrow: Policy Perspectives for the 1980s 61, 105 (1978).

21/ See, e.g., G. Robinson, Communications for the Future: An Overview of the Policy Agenda, in Robinson, supra, 467, 482-83; Hudson, supra, 40.

interest REA loans decrease the cost of investments and increase the likelihood that investments which are desirable from the perspective of the nation will be made. REA loans enable rural telephone companies to make economically and socially desirable investments.

Capital is needed to expand and improve rural telecommunications services currently and in the future. The existing knowledge on the role of telecommunications services in economic and social development indicates that curtailment of low-interest loans from the REA Telephone Loan Programs would be against the public interest.

PUBLIC SERVICE ANNOUNCEMENT
FOR IMMEDIATE RELEASE

The House Labor and Commerce Committee will be holding a public hearing, that will be teleconferenced statewaide as well, on Friday, April 24, 1981. It will begin at 1:00 p.m.; ending at 3 p.m. Pacific Standard Time.

Testimony will be received on HB 165, "An act creating the telecommunications revolving loan fund." This bill provides telephone companies a source of funding in anticipation of the possibility that federal REA funding will either be eliminated or severely reduced; it also provides for long-term, low interest loans.

Persons wishing to provide public testimony on the subject matter are invited to attend in Juneau, Behrends Bldg. conference room, or at the local Legislative Information Office or Teleconference Center in their community.

For more information, contact the House Labor and Commerce Committee, 465-3873, Representive Vern Hurlbert, Chairman.

STATE OF ALASKA

THE ALASKA PUBLIC UTILITIES COMMISSION

Before Commissioners: Carolyn S. Guess, Chairman
Gordon J. Zerbetz
Marvin R. Weatherly
Susan M. Knowles
Stuart C. Hall

In the Matter of the Application of UNITED UTILITIES, INC., for a Certificate of Public Convenience and Necessity To Furnish Telecommunications Services in the Calista Region	U-77-28 ORDER NO. 9
In the Matter of the Investigation into the Financial Viability of Phase III Village Construction in the Calista Region by UNITED UTILITIES, INC.	U-81-22 ORDER NO. 1

ORDER DENYING WITHOUT PREJUDICE PERMANENT CERTIFICATION AND INSTITUTING INVESTIGATION INTO THE FINANCIAL VIABILITY OF PHASE III VILLAGE CONSTRUCTION

On January 2, 1981, the Commission received a filing from UNITED UTILITIES, INC. (United), requesting that the temporary conditional certificate for Phase III granted in Order No. 7 of this proceeding be changed to permanent certification. The United filing set forth seven points which it believes justifies permanent certification. It requested that the Commission grant permanent certification by January 31, 1981. On January 30, 1981, United filed additional documentation in support of its request.

On February 4, 1981, the Commission received a memorandum, a copy of which is attached hereto as Appendix A, from the Commission Staff (Staff) setting forth a review and analysis of the United request.

ALASKA PUBLIC UTILITIES COMMISSION

DISCUSSION

In support of its request, United alleges that its uncollectibles are reasonable; that its financial condition is sound; that most of its current financing needs are met through low-interest Rural Electrification Administration (REA) loans; and that inadequate toll connect facilities resulted in service not being extended to four villages. On its face, these appear to be assertions of management rather than documented facts.

In addition, United avers that Phase III certification is a requirement in order to allow United to secure REA financing for these communities. This has not been the Commission's experience. The REA has proceeded with requests of Alaskan telephone utilities that have received temporary or conditional certification. Only toward the end of the processing time of a loan application is the requirement for permanent certification a necessity. The Commission acknowledges the long leadtime required for construction in rural Alaska as documented in United's January 2, 1981, request. However, the utility is aware that the Commission has articulated its concern regarding the viability of Phase II and Phase III construction in Order Nos. 7 and 8 in this Docket. The Commission in Order No. 8 in this matter denied permanent certification of Phase III villages and stated:

> The financial sensitivity of United's operation requires a longer and more stable track record before the Commission can determine when the Phase III construction program should commence.

To date, the utility has been and is involved in an ambitious construction operation in twenty-four villages.

1108 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

Six village exchanges have been operational for less than two years; six village exchanges have been in service for approximately six months; construction in four villages is partially complete; and eight villages are scheduled for construction in 1981. This does not provide evidence that a "more stable track record" has been established.

On the contrary, the United filings of January 2 and 30, 1981, provide information that reinforces the Commission's concern expressed in Order No. 8, supra, that the financial sensitivity of the utility's Phase II operation is dependent on a number of factors that are not in evidence: (1) the availability of long-term financing for Phase II at a 5 percent or lower interest rate; and (2) the use of interim financing for Phase II villages at a higher rate only if there is assurance that low-interest financing can be secured within a year.

The Commission is concerned about the financial viability of United's Phase II operation as it affects the utility's entire undertaking. A loan characteristic letter was submitted by United in its January 30, 1981, filing. The letter indicates that REA has made a determination of the loan required to finance United's Phase II village construction. It does not grant approval of the loan. In addition, the letter states that a composite interest rate of 5.4 percent will be required for the "B" loan. The Commission is aware that United is currently financing its Phase II construction with interim debt in excess of the prime rate of interest. If its interim financing is in

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

effect for more than a year, another concern, noted in the Staff analysis of the financial feasibility of Phase II, has surfaced.

The very real question before the Commission at this time is whether United can survive the impact of interim financing levels currently in effect for its Phase II villages and what effect the proposed REA budget reductions by the current Federal administration will have on proposed interest rates and the approval of its Phase II loan and whether or not the utility intends to finance its Phase III village construction with REA financing and at what interest rate. The Commission has received confirmation from REA of those loans approved and signed for Alaska telephone utilities. Only United's "A" loan appears on the list that is appended to this Order as Appendix B.

The events to date reemphasize the responsibilities of the utility and the Commission to determine that the Phase III villages are a financially feasible part of United's operation before permanent certification is awarded. There is no evidence on the record at this time to support such a finding.

In its February 4, 1981, memorandum, the Staff set forth its recommendation regarding United's request for permanent certification for Phase III villages. A copy of this report was sent to the utility's counsel by letter dated February 11, 1981. The suggested course of action recommended by Staff on page 2 of its report appears to be a reasonable approach to determine whether the utility has the resources necessary for the Commission to make a finding

ALASKA PUBLIC UTILITIES COMMISSION
1168 MACKAY BUILDING
338 DEN. LI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

that permanent certification should be granted for the Phase III villages. The Staff review should not be limited to Phase III but should include a review of the total company including Phases I and II. United will be required to provide to the Commission the documentation required in recommendation Nos. 1, 3 and 4 of Staff's memorandum. In addition, the Commission will require United to provide proof of its debt financing for all three construction phases; the anticipated interim and long-term interest rates and source of debt for each phase along with documentation that its interest estimates, where applicable, are valid. Therefore, an order instituting an investigation into the request of United for permanent certification of its Phase III villages should be established. Because of the reconstitution of the Commission, Docket U-77-28 will be closed; all outstanding issues in that Docket will be subsumed in U-81-22, and official notice will be taken of the applicable record in U-77-28, under 3 AAC 48.150(g):

The Commission concurs with Staff that a financial and operational audit of the utility should be made and that Staff should review the quality of service presently being provided to United's consumers. The Commission assumes that the financial and operational audit of the utility will provide a composite proforma revenue requirement for Phase I (including Gambell and Savoonga) and Phase II as well as a stand-alone proforma revenue requirement.

The Commission agrees with United regarding the urgency to develop telecommunications to meet the needs in

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
323 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

the rural areas of Alaska. To this end, the Commission believes it has extended every effort to United to assure its successful operation.

In Order No. 8 in this proceeding, the Commission offered the assistance of Staff to address the severe communication problems that exist in the Phase III communities and encouraged United and ALASCOM, INC. (Alascom), to begin discussions and creatively explore more immediate viable alternatives that could be provided on an interim basis to partially alleviate the telecommunications difficulties in those villages. Order No. 8, pp. 5 and 6. The Commission is not aware that United has requested Staff's assistance in this regard nor has it, either together with or separate from Alascom, explored the possibility of interim telecommunications alternatives in the Phase III area.

The Commission is aware of the successful efforts of Alascom in developing the toll concentrator in St. Paul and believes that this is an alternative that should be explored by United in the Phase III villages. The Commission agrees with United that there is an urgent need for expanded communications in these villages and, therefore, will require United to identify those villages in Phase III which have an urgent telecommunications need that could be satisfied possibly on an interim basis by the installation of toll concentrators under the Alascom tariff. United should send this list of villages to the Commission and Alascom.

The Commission observes that the foundation of the proper development of telecommunications within the State of Alaska is based on a spirit of trust and cooperation. This

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

ensures that the public interest, the responsibility of the Commission, will be served. To this end the Commission will once again urge United and Alascom to work together to find solutions to the demanding telecommunication needs in rural Alaska.

THE COMMISSION FURTHER FINDS AND CONCLUDES:

1. United is a public utility as defined by AS 42.05.701 and is subject to the Commission's regulatory jurisdiction.

2. The United request for permanent certification for Phase III is lacking in necessary detail or documentation to meet concerns previously expressed by the Commission. Therefore, the request of United to receive permanent certification for the Phase III villages is denied without prejudice to refiling in Docket U-81-22.

3. An order instituting an investigation into the request of United for permanent certification of its Phase III villages should be established. Because of the reconstitution of the Commission, Docket U-77-28 will be closed; all outstanding issues in that Docket will be subsumed in U-81-22 and official notice will be taken of the applicable record in U-77-28.

The Staff should pursue the elements of its recommendation in the Staff memorandum of February 4, 1981, entitled "Staff views regarding United Utilities' request for permanent certification for Phase III villages. (U-77-28)." The Staff monitoring or review should not be limited to Phase III but should include a review of the total company including Phases I and II as outlined in the body of this Order.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-0222

4. United should identify those villages in Phase III that have an urgent telecommunications need. The Commission should request Alascom to survey those villages to determine the financial viability of the installation of toll-concentrators under the Alascom tariff.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The request of United Utilities, Inc., for permanent certification of Phase III villages is denied without prejudice to its refiling in Docket U-81-22.

2. The Commission Staff shall be a party in U-81-22 and shall conduct an investigation into the request of United Utilities, Inc., to expand its operation into Phase III villages, including the current financial obligations of serving Phase II villages.

3. Commission Staff shall include in its investigation, in addition to the course of action recommended in its February 4, 1981, memorandum, proforma revenue requirements on a composite and stand-alone basis for United's Phase I (included Gambell and Savoonga) and Phase II operations.

4. Commission Staff shall inform the Commission within 60 days from the date of this Order when its analysis of the Phase III villages will be completed.

5. United Utilities, Inc., shall identify the villages in Phase III which have urgent telecommuncations needs and present that listing to the Commission and Alascom, Inc., within 30 days from the date of this Order.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

6. Alascom, Inc., shall be granted intervenor status in U-81-22 limited to the quality and level of service in Phase III villages. Upon receipt of the above list, Alascom shall conduct a survey of those villages to determine the economic feasibility of providing expanded telecommunications to those villages, on an interim basis pending final determination of Phase III certification, through the use of a toll-concentrator and notify the Commission of its results at the earliest possible date.

7. Docket U-77-28 is closed. Any outstanding issues in this Docket shall be subsumed in the investigation proceeding.

DATED AND EFFECTIVE at Anchorage, Alaska, this 9th day of April, 1981.

BY DIRECTION OF THE COMMISSION
(Commissioner Gordon J. Zerbetz nunc pro tunc.
Commissioners Susan M. Knowles and
Stuart C. Hall, not participating.)

FILE NO.:

SUBJECT: Staff views regarding United Utilities' request for permanent certification for Phase III villages. (U-77-28)

United Utilities letter of December 26, 1980 requested that the Commission change the temporary certification to provide local exchange telecommunication service for Phase III villages to permanent certification before January 31, 1981. It concluded: "United feels certain that with the Commission's blessing, it can perform the goal it set for itself in having adequate telephone service for all communities in United's certificated area before 1984."

The Staff has reviewed the 13 reasons United cites in support of its request and believes that considerable additional substantiation is needed before staff can make a responsible recommendation. Staff's concerns are as follows:

1. In its February 22, 1980 recommendation to grant permanent certification for Phase II villages, Staff concluded that United continued to be in a sensitive financial condition and that construction in Phase II villages should only proceed if long term debt at an interest rate below 5% could be obtained within a year. United proceeded to obtain high interest (above 20%) interim financing to construct facilities in Kipnuk, Kotlik, Mountain Village, Pilot Station, Tooksook Bay, and Tununak. According to its 1/12/81 report, United also partially constructed outside plant in Chevak, Goodnews Bay, and Qunihagak (The 12/26/80 letter adds Kwethluk to the list of locations with partially constructed facilities). United is still paying exorbitant interest rates for the funds used to construct Phase II and only at the end of January has obtained tentative approval of a 5.4% REA loan. The REA interest rate and the duration of the interim loan are both at the very limit where staff's studies have shown Phase II to be feasible.

2. United states in its letter that its financial condition is sound, yet Staff questions the basis for this conclusion. The utility is in a construction mode and operational costs have not yet stabilized. The utilities' financial soundness depends largely on toll settlements which have not yet been "trued up" for any year since the company's inception. Based on United's over-estimation of toll trunking it could have over-estimated its toll revenues. [Attached is toll usage data for 1980 which contradicts United's estimates of inadequate trunking].

3. United states that it found an alternate central office to the Stromberg ECDO 400 costing half the price and occupying one third the space. This new central office is to be field trialed this spring. If the switch indeed meets these expectations, it should be the one used for Phase III. New switches, even when well engineered, require a prolonged "shake down" period. A thorough field trial is therefore absolutely essential since United cannot afford to debug a plurality of such switches in remote villages.

Recommendation

United seems to misunderstand the basis of the Commission's statutory requirement for granting permanent certification. It is not a question of "blessing" United, rather it is a mandate to determine that the applicant is fit, willing and able to provide service of a reasonable level of quality. Before making this determination Commission Staff should determine to the best of its ability whether the utility has the necessary resources to expand to Phase III villages. Staff, therefore, should:

1) Obtain from the utility and analyze 1980 financial statements and the 1980 annual report to the Commission.

2) Conduct a financial and operational audit of United.

3) Review a completed cost study done for toll settlement purposes. To date no such study has been submitted to Alascom.

4) Obtain and analyze the ACD to be submitted to REA for Phase III financing.

5) Review the quality of service that United and Alascom provide to United's customers.

6) Monitor the field trial of the new switch as well as the progress made in constructing Phase II facilities including on-site visits to some villages.

Staff realizes that the public in the Phase III villages urgently requires telephone service. To provide such service,

the utility could now apply for an REA loan and aim at 1982 construction if the loan is approved. In the past, REA has reviewed, and is currently reviewing loan applications where utilities have been temporarily or conditionally certificated by this Commission (United Phase II, Bush Tell). A delay in permanent certification to the second half of 1981, should therefore cause no delay in obtaining the necessary financing. Meanwhile, in 1981, United should establish reliable service in the remaining Phase II villages (Akiachak, Chevak, Goodnews Bay, Kasigluk, Kwethluk, Napakiak, Nunapitchuk, Quinhagak) and staff should determine whether United is "fit, willing and able" to provide Phase III villages with reliable service.

Sec. 42.08.020. Subsection (a) is amended to read as follows:

"Sec. 42.08.020. POWERS AND DUTIES OF THE DEPARTMENT.

(a) The Daprtment shall formulate procedures and adopt regulations to implement this chapter.

(b) No loan shall be made under this chapter until the Alaska Public Utilities Commission finds that the applicant is fit, willing and able to provide the utility services applicable to the facility for which the loan is applied for and that the facilities for which the loan is applied for shall result in improvement of service and shall be in the financial interests of the ratepayer of the state of Alaska. The application for loan shall be forwarded to the Alaska Public Utilities Commission for such finding and shall be in the form and contain the information required by the Alaska Public Utilities Commission by regulation sufficient to make its finding. For purposes of the finding of the Commission procedures and regulations adopted under A.S. 42.05.151 shall be applicable.

(c) The Department may

(1) make a loan from the public utility revolving loan fund to a public utility to finance or refinance capital improvements, plant and facilities, and to improve and expand services, if other credit is not readily available from private lending institutions at a rate of interest less than the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan under this chapter;

The Honorable Vernon Hurlbert
Chairman
House Labor and Commerce Committee
Pouch V
Juneau, AK 99811

Reference: Proposed Amendment to House Bill 165, Utility Revolving Loan Fund, for a $20 Million 1981 Appropriation for Utilities Affected by Federal Budget Cuts.

Dear Mr. Hurlbert:

In reference to the subject amendment United Utilities (U.U.I.) is furnishing herein additional information on the impact of the recent 1981 Reagan Administration's budget cuts. These budget cuts have prevented the release of a $10.4 million Rural Electrification Administration (REA) loan to U.U.I. which the REA had tentatively approved at a composite interest rate of 5.4% for a period of 35 years. The items funded in this REA loan application include local telephone exchange and toll interconnect facilities at Akiachak, Chevak, Gambell, Goodnews Bay, Kasigluk, Kipnuk, Kotlik, Kwethluk, Mountain Village, Napakaik, Nunapitchuk, Pilot Station, Quinhagak, Savoonga, Toksook Bay, and Tununak. A copy of the REA's Tentative Budget and Telephone Loan Feasibility Study is attached.

For the facilities included in the $10.4 million loan request we have borrowed on an interim basis $1.5 million, at an interest rate of prime plus 3½%, and we also have an outstanding order for $560,000 of electronic switching equipment which will take approximately $440,000 to place into operation in eight locations. If U.U.I. were able to secure a low cost long term loan for $2.5 million we would be able to retire the outstanding interim debt and install these new exchanges. Should the $2.5 million not be available we will need to cancel these equipment orders and incur costly penalties from the manufacturer. In addition we will continue to incur exorbitant interest expenses that could place the cost of telephone service out of the reach of most of our subscribers.

The remaining balance of the REA loan application of $7.9 million ($10.4 million less $2.5 million) is for telephone system improvements including toll interconnect facilities. Our analysis of the $7.9 million indicates that the most critical of these requirements is $2.1 million for toll interconnect facilities at Akiachak, Napakiak, Chevak, Goodnews Bay, Kwethluk, Nunapitchuk and Quinhagak. These locations now have only a single toll circuit to interface with the telephone exchanges installed with the $2.5 million mentioned previously.

In summary, the proposed federal budget cuts have resulted in the withholding of United Utilities $10.4 million REA loan which was tentatively approved and scheduled for 1981. Within this loan request there's an immediate need for $2.5 million to retire the interim debt and to purchase and install equipment that is now on order. In addition, to provide toll interconnect facilities required for the new locations receiving the switching equipment another $2.5 million will be required. A total of $4.6 million is the amount United Utilities would propose to fund from the $20 million appropriation included in the amendment to HB 165. The remaining $5.8 million could potentially be deferred until 1982 and be funded from the permanent Utility Revolving Loan Fund.

Regarding the interest rate, collateral and term of the loans I believe that all loans made from the $20 million appropriation should be made under the same terms and conditions as those previously provided for by REA. All loans made from the Revolving Loan Fund's $40 million appropriation should be made under the provisions of HB 165, including those amendments submitted in our February 18, 1981 correspondence (copy attached).

Respectfully submitted,

Steve Hamlen
Controller

MEMORANDUM

TO: James C. Miller, Administrator for the Office of Information and Regulatory Affairs

Jim Tozzi, Deputy Administrator for the Office of Information and Regulatory Affairs

FROM: Alan Y. Naftalin *

RE: Proposed Uses of Low Interest REA Telephone Loan Funding to Replace Available Commercial Financing of Toll Telephone Facilities

This memorandum is intended to outline an existing area of REA policy promoting use of low interest REA loan funding in a manner contrary to the initiatives of the President's "Program for Economic Recovery" promoting reliance upon commercial financing of telephone construction projects (pp. 4-5 through 4-7).

As described hereafter in detail existing REA policy is to promote the use of low interest REA loan funding for its borrowers in Alaska to acquire earth station facilities which are already funded from commercial financing sources and, in some instances, to construct new or replacement earth station facilities for which commercial financing is either already in place or otherwise committed which would make use of REA loan funding unnecessary. On a fully developed basis, this REA policy could involve as much as $80 million of low interest REA loan financing being committed in Alaska in circumstances where commercial financing sources can be reasonably relied upon.

We request that steps be taken promptly to prevent the REA from making further unnecessary loan commitments and that the REA announce as a matter of policy before the Federal Communications Commission in CC Docket No. 80-584 that it

*Counsel for Alascom, Inc.

does not intend to make loan funding available to borrowers in circumstances where it is clear that commercial financing sources can reasonably be relied upon.

The REA policy addressed here developed as an REA staff initiative during the Carter Administration to address a special situation existing in Alaska. Alascom, Inc., the long lines carrier in the state, had constructed and was operating in excess of 100 domestic satellite earth stations to furnish message telephone communications in the Alaskan bush. Although it had been operating these earth station facilities in some cases for many years (relying upon commercial financing), Alascom had not obtained permanent operating authority from the FCC. When approached by an REA borrower interested in contesting Alascom's continued right to own and operate those earth station facilities, REA decided as a matter of policy that it would commit low interest loan funding to support the financial qualifications of REA borrowers in competitive proceedings before the FCC contesting Alascom's continuing authority to construct and operate such facilities.

In recent years the REA has actively supported a number of borrowers in Alaska who have proposed to use low interest REA loan funding to acquire Alascom's earth station facilities in specific areas and to finance construction of new facilities which would bypass or replace Alascom's existing toll network facilities.

Because this is a relatively new REA policy few loan commitments for REA loan funding of earth station facilities in Alaska have been made. United Utilities, Inc. obtained conditional approval of $1.2 million of 2% loan funding for earth station facilities on June 21, 1979. Recently the Mukluk Telephone Company obtained a similar REA commitment for 5% loan funding covering approximately $650,000 on December 22, 1980. Other loan requests remain pending including an additional request for loan funding by United Utilities, Inc. covering approximately $4.8 million for earth station facilities which are in the final stages of review by the Acting Administrator of the REA.

We raise these matters regarding REA existing commitments and pending loan requests because they have direct impact in the fiscal 1981 REA telephone budget. We understand that as much as $108 million of the $125 million revised REA low interest telephone budget has been committed. Clearly the public interest would not be served by permitting the REA to continue making commitments of the loan funds remaining in its revised

1981 budget for earth station facilities which Alascom is providing with the use of commercial financing. Unnecessary commitments of this kind obviously preclude availability of REA loan funding in areas where commercial financing is not readily available, a clearly unjustifiable result.

The second part of our request arises because of formal comments dated January 28, 1981 filed by the Administrator of the REA supporting adoption of a Notice of Proposed Rulemaking in CC Docket No. 80-584 which would limit the eligibility for the licensing of earth station facilities to certificated local exchange carriers in the Alaskan bush, effectively disenfranchising Alascom. The effect of the REA position in CC Docket No. 80-584, if adopted, would be to restrict the ownership of these facilities to the REA borrower group operating telephone exchanges in these bush areas so that Alascom which relies upon commercial financing would be barred even from competing for the right to own and operate these facilities. This position is firmly opposed in the formal comments of the Alaska Public Utilities Commission and the Federal Aviation Administration in CC Docket No. 80-584.

The REA policy which is at the heart of the position taken in its formal comments before the FCC is clearly contrary to the President's Economic Recovery Program. This is particularly true when it is considered that the REA is proposing to finance the acquisition of earth station facilities which are already in place, operational and financed from commercial financing sources.

Finally we should add that the period for formal comments before the Federal Communications Commission in CC Docket No. 80-584 will remain open until April 2, 1981. The filing of comments by the REA in that proceeding reversing its previous position regarding the availability of low interest loan funding would be a timely and effective demonstration of the President's budget initiatives and the underlying policies supporting those initiatives.

Comments of REA in CC Docket No. 80-584

cc(w/att): Chuck Ellett

MAR 1 . 1981

Mr. Charles Ellett, Desk Officer
Regulatory Analysis Program
Office of Management and Budget
New Executive Office Building
Washington, D. C. 20503

Dear Mr. Ellett:

This is in response to your request for information regarding the memorandum of March 6, 1981, submitted by Alan Y. Naftalin, Counsel for Alascom, Inc., concerning Rural Electrification Administration (REA) financing of telephone systems in Alaska. The memorandum incorrectly alleges that REA policy promotes the use of REA loan funding in place of available commercial financing contrary to the initiatives of the President's "Program for Economic Recovery."

The second paragraph on page one of the memorandum contains several inaccuracies. First, it states that ". . . existing REA policy is to promote the use of low interest REA loan funding for its borrowers in Alaska to acquire earth station facilities . . ." The Federal Communications Commission (FCC) in CC Docket No. 80-584, Notice of Proposed Rulemaking (released October 29, 1981) is the Federal agency which has the sole responsibility for deciding policies governing ownership and operation of Alaskan earth stations. The FCC expects eligible applicants for licenses to own and operate earth stations to demonstrate their technical and financial qualifications. If a rural telephone system has regulatory authority to own and operate toll facilities, REA has the authority to provide funding for such facilities.

The second inaccuracy in the second paragraph is the statement that REA would commit loan funds "to construct new or replacement earth station facilities for which commercial financing is either already in place or otherwise committed..." The Rural Electrification Act (RE Act) of 1936, as amended, states that "When it is determined by the Administrator to be necessary in order to furnish or improve telephone service in rural areas, such loans may be made for the improvement, expansion, construction, acquisition and operation of telephone lines, facilities, or systems without regard to their geographical location." The RE Act also states that "Loans under this section shall not be made unless the Administrator finds and certifies that in his judgment the security therefor is reasonably adequate nor shall such loans be made in any state which now has or may hereafter have a state regulatory body having authority to regulate telephone service and to require certificates of convenience and necessity to the applicant unless such certificate from such agency is first obtained."

Paragraph six of the aforementioned FCC Notice states that of the 160 Bush communities served by Alascom, approximately 100 receive only "lifeline service." This service consists of two channels, one of which provides interstate and intrastate long distance telephone service and the other which is a private line connected to the Alaska Native Health Service, a provider of emergency and health assistance to the villages. In many cases, there is only one telephone which accesses message toll service and it is semi-public and may be inaccessible outside of business hours. As the FCC Notice states, "Thus, the residents sometimes do not have ready access to the phone, must be summoned by a messenger for an incoming call, and due to the public location of the phone, enjoy minimal privacy during their conversations."

Finally, the second paragraph of the memorandum states that "this REA policy could involve as much as $80 million of low interest REA loan financing being committed in Alaska in circumstances where commercial financing sources can be reasonably relied upon." The $80 million figure is highly questionable. Alascom never breaks it down into its component parts - the price per earth station multiplied by the total number of earth stations. In 1975, an earth station cost $105,000. Currently, 100 stations are in operation. Even assuming a doubling in price per station and a doubling in the number of earth stations to 200, the total cost would be $42 million, about half of Alascom's projection. Earth station technology is much improved since 1975, however, and we have no reason to believe costs would have escalated so tremendously.

The other questions about the $80 million figure involves Alascom's assurance that it has commercial financing available in that amount. That is an exceptionally large amount of capital to invest and thus far Alascom has not backed up its assertion that such financing is available with hard figures and proposed sources of funds.

The third paragraph on page one requests that REA be prevented from making "further unnecessary loan commitments . . ." No unnecessary loan commitments have been made and none will be made. REA routinely funds toll terminating facilities in borrowers' exchanges, whether they be carrier, microwave, cable or earth stations. Such a policy provides better security for REA loans, improves feasibility and in many instances allows provision of better service. Loan commitments are not "unnecessary" when they fulfill REA's goal of providing quality telephone service to rural areas at reasonable rates.

The first full paragraph on page two alleges, again incorrectly, that "The REA policy addressed here developed as an REA staff initiative during the Carter administration to address a special situation existing in Alaska." REA's policy of financing all of the telephone facilities within a borrower's service area has been

in existence for almost 30 years. As such, it cannot be considered a new or recent policy and was not developed to specifically address the situation existing in Alaska. To the contrary, long standing REA policy has been applied to Alaska just as it has been applied to the lower 48 states. The first REA loan which included funds for toll facilities was made during the Eisenhower administration in 1952.

The first paragraph on page two of the memorandum contains contradictory statements as to Alascom's "right" to own and operate the earth station facilities in question. The memorandum itself states, "Although it had been operating these earth station facilities in some cases for many years . . . Alascom had not obtained permanent operating authority from the FCC." That statement is absolutely correct. The purpose of FCC Common Carrier Docket No. 80-584 is to decide the question of ownership and to possibly allow small independent telephone companies in Alaska to own and operate all of the facilities within their franchised service areas, just as is done in the rest of the United States. Further, in the same paragraph of the memorandum, Alascom alleges a "continued right to own and operate those earth station facilities." As Alascom itself admits, no such "continued right" exists. Alascom was permitted to operate the earth stations on an interim basis until the FCC decided the issue of ownership. The only earth stations which Alascom has a "continued right" to operate are those located in the 32 largest cities where Alascom now operates "mid-route" stations. The FCC has excluded these from its rulemaking procedure and REA has not committed nor does it intend to commit financing for earth stations in these cities.

Again in the same paragraph the issue is further confused by the statement ". . . REA decided as a matter of policy that it would commit low interest loan funding to support the financial qualifications of REA borrowers in competitive proceedings before the FCC . . ." The proceedings before the FCC are of a rulemaking, not "competitive" nature. Local telephone companies in Alaska and Alascom are not competitors but instead are providers of a joint service. The question is not competition at all but rather which entities will be involved in the ownership of facilities.

The second full paragraph on page two of the memorandum states that REA funding is being proposed "to finance construction of new facilities which would bypass or replace Alascom's existing toll network facilities." The nonduplication provision of the RE Act, referred to earlier, prevents loan funds from being used to "bypass" the existing network. One of REA's concerns has always been preserving the integrity of the network. REA may commit loan funds to replace facilities but only when those facilities are inadequate and are an obstacle to the provision of quality telephone service.

The third paragraph on page two again states that funding entire systems is a "new REA policy." It must be reiterated that this is a policy which has been in existence for almost three decades. REA loans are made to borrowers to provide telephone service in the rural areas of America. The loans are made only after extensive studies have been completed. The existing need for quality telephone service in the rural areas of Alaska, as stated by the Governor of Alaska, the Alaska Public Service Commission and residents of Alaska shows that these loans have been necessary.

The final paragraph on page two shows Alascom's concern about REA's budget and alleges that "unnecessary commitments of this kind obviously preclude availability of REA loan funding in areas where commercial financing is not readily available, a clearly unjustifiable result." REA is well aware of the overall budget constraints imposed by the President's "Program for Economic Recovery," and is even more familiar with the limitations placed on the availability of REA loan funds. REA is capable of establishing priorities for the use of its own limited resources to make quality telephone service available to rural Americans. It should be understood that the small independent telephone operating companies in Alaska may be capable of obtaining financing for these facilities from commercial lenders.

The first full paragraph on page three alleges that the Administrator of REA filed formal comments ". . . supporting adoption of a Notice of Proposed Rulemaking in CC Docket No. 80-584 which would limit the eligibility for the licensing of earth station facilities to certificated local exchange carriers in the Alaska Bush, effectively disfranchising Alascom." The Assistant Administrator - Telephone actually filed comments concurring in the FCC's stated aim of allowing telephone companies in Alaska the same treatment that those in the lower 48 states receive - the opportunity to own and operate all the facilities within their franchised area. Secondly, there is no way that Alascom could be "effectively disfranchised" since they were never franchised in the first place. The "continued right" which Alascom repeatedly refers to, never existed.

Further in the same paragraph, the Alascom memorandum stated "Alascom . . . would be barred even from competing for the right to own and operate these facilities." As previously stated, Alascom is being awarded ownership of others via a waiver procedure if local telephone companies are unable or unwilling to provide the facilities.

Finally, REA stands by its concurrence in CC Docket No. 80-584. We agree with the following excerpt from the FCC's Notice:

". . . the public interest will be best served by adopting rules which require local exchange certification as a qualification to own and operate earth station facilities in rural Alaska communities

to provide MTS service. As a practical matter, this means that native Alaskans will play a larger role in network planning in Bush areas and will exercise more effective control over the operation and maintenance of satellite earth stations serving their communities. We expect this will increase the availability of satellite services to those areas, and therefore promote safety of life, efficient service, more adequate facilities and other objectives of Section I of the Communications Act. Apart from these substantive benefits, we believe that this rulemaking proceeding provides the most effective procedural tool for deciding the ownership policy question which has plagued the Bush applications for more than 5 years. We expect its resolution will permit expeditious action on the applications currently pending as well as those that will be filed in the future."

The FCC goes on to say:

"By virtue of their actual presence in the Bush communities, the local exchange carriers would appear to be better equipped to remedy the problems. This on-site availability would likely reduce or eliminate the service outages due to the recurring minor repair problems which now require Alascom to dispatch a maintenance staff from a centralized metropolitan location."

Finally, and most importantly, the FCC states:

"Moreover, local ownership is likely to produce a more effective means of predicting and satisfying growing communications requirements. It would appear that local ownership represents the more efficient and economic alternative for meeting the unusual service needs of the Bush earth stations."

The attitude expressed in Mr. Naftalin's letter is somewhat strange because it contradicts the views of management officials of an affiliated corporation of Alascom. Alascom is owned by a corporation which in turn is owned by Pacific Power and Light Company. This latter corporation owns through another intermediate subsidiary, an operating independent telephone company named Eastern Oregon Telephone Company (EOTC). EOTC applied for and received a low interest (2 percent) REA loan last year in the amount of $9,500,000 which included funding of $876,000 for the ownership of toll facilities which perform the same function as the earth stations in Alaska cited by Mr. Naftalin. Feasibility studies prepared by REA indicated that the company could afford financing from the Rural Telephone Bank which, at the time, had an interest rate of 9.0 percent. Management officials for EOTC were asked to "volunteer" for a loan from the Bank but they refused and insisted on financing from the Rural Electrification and Telephone Revolving Fund, at 2 percent, because the company had an existing and proposed density of less than three subscribers —

per mile of line. Under the RE Act, telephone systems with three subscribers per mile of line or fewer are eligible for financing from REA at the special interest rate of 2 percent. In the past, some other companies in this situation have volunteered to take a loan from the Rural Telephone Bank.

EOTC presently has on file with REA a loan application in the amount of $7,000,000, which includes a request for funding of toll facilities in the approximate amount of $1.2 million. While officials of one subsidiary of Pacific Power and Light Company are criticizing REA funding for toll facilities in Alaska, officials of another subsidiary of Pacific Power and Light Company are repeatedly asking REA to expedite the processing of an REA loan for toll facilities in Oregon at an interest rate of 2 percent.

It should be noted that the Administration has already submitted proposed legislation to the Congress which would eliminate the availability of 2 percent financing under the RE Act.

Sincerely,

John H. Arnesen

IN THE HOUSE BY HURLBERT, VASKA, AND CHUCKWUK

HOUSE BILL NO. 165

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act creating the ~~public utility~~ public communications revolving loan fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. DECLARATION OF POLICY AND PURPOSE. The legislature finds that

(1) the availability of adequate public utility services and facilities at reasonable rates in the state is a proper matter of public concern;

(2) the ability of privately, municipally and cooperatively owned public utilities in the state to finance service to the public and to finance capital improvements required to extend and improve those services on terms that will enable utility service rates to remain at reasonable levels in the foreseeable future is seriously impaired by the unavailability of low-cost private financing and by the delays experienced in obtaining low-cost federal loans;

(3) as a matter of public policy, to ensure the sound development of the state and its resources and to provide an acceptable level of utility services to its residents at reasonable rates, the state should assist these public utilities in acquiring the money that is essential to operate, maintain and expand utility facilities and services.

* Sec. 2. AS 42 is amended by adding a new chapter to read:

CHAPTER 08. PUBLIC UTILITY REVOLVING LOAN FUND.

Sec. 42.08.010. REVOLVING LOAN FUND CREATED. The public utility revolving loan fund is created in the Department of Commerce and Eco- APA

nomic Development.

Sec. 42.08.020. POWERS AND DUTIES OF THE DEPARTMENT. (a) The department shall formulate procedures and adopt regulations to implement this chapter in consultation with the Alaska Public Utilities Commission.

(b) The department may

(1) make a loan from the public utility revolving loan fund to a public utility to finance or refinance capital improvements, plant and facilities, and to improve and expand services, if other credit is not readily available from private lending institutions at a rate of interest less than the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan under this chapter;

(2) make loans from the public utility revolving loan fund to a public utility to meet short-term or interim capital needs before receipt by the public utility of long-term loans;

(3) consult with appropriate federal agencies and other lending institutions which make loans to public utilities in the state concerning policies, regulations and procedures to carry out the provisions of this chapter;

(4) designate agents and delegate powers to them as is necessary;

(5) require bonds and undertakings from persons employed by the department as in the commissioner's judgment are necessary, and pay the premiums on the bonds and undertakings;

(6) establish amortization plans as provided in AS 42.08.-040(c).

Sec. 42.08.030. ELIGIBILITY FOR LOANS. A public utility is eligible for a loan under this chapter if

(1) it is a public utility as defined in AS 42.05.701(2)-(A) - (E);

(2) at the time of application for a loan it is serving the public under a certificate of public convenience and necessity issued by the Alaska Public Utilities Commission;

(3) in the judgment of the department

(A) the public utility shows a definite potential for providing improved or expanded service in the community or service area it serves, or otherwise requires the financing to maintain adequate, efficient and safe service; and

(B) the utility will be able to repay the loan.

Sec. 42.08.040. CONDITIONS AND LIMITATIONS ON LOANS. (a) A loan to a public utility under this chapter may not exceed $1,000,000.

(b) A loan made under this chapter shall be on terms and conditions the department determines appropriate and, if secured by collateral, may not exceed 75 percent of the value of the collateral offered.

(c) Amortization plans for the repayment of a loan made under this chapter may not exceed 30 years. The rate of interest charged on the unpaid balance may not exceed the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan under this chapter.

(d) Unless a loan made under this chapter is participated in by a financial institution as provided in (e) of this section, the loan may not be made until an investigation and an economic feasibility study is conducted and, as a result of the investigation and study, the department determines that the loan is economically sound, that the utility will be financially self-sustaining, and the loan will be fully amortized in accordance with the terms and conditions of the loan. The economic feasibility study shall be conducted by the department staff

under accepted Standards of RQA

Handle APA Similar Program must expertise

or by consultants, engineers or other technical experts approved by the department. To facilitate its determination of economic feasibility, and its determination of the ability of the utility to be fully self-sustaining and to amortize the loan, the department shall require the applicant for a loan under this chapter to furnish the systems studies, long-range economic forecasts, financial data, and technical information that the department considers necessary.

(e) If a loan under this chapter is participated in by a financial institution in an amount not less than 20 percent of the total amount of the loan, the department may accept the investigation and economic feasibility study made or accepted by the financial institution as a basis for its participation.

(f) If a financial institution participates in a loan made under this chapter, it may elect to administer and service the loan for a reasonable fee not exceeding one-half of one percent

(g) The state and the participating financial institution shall each have a lien on the collateral or share the collateral to the extent of their respective parts of the total loan to a public utility.

Sec. 42.08.050. ADMINISTRATION. Money loaned under this chapter shall be delivered to the borrower in the form of a warrant drawn on the treasury, and charged against the public utility revolving loan fund. Upon repayment of loans in accordance with the prescribed terms, or upon liquidation by foreclosure or other process, or upon receipt of interest or other revenue, the money received shall be turned over to the commissioner of revenue for deposit in the public utility revolving loan fund.

Sec. 42.08.060. SALE OR TRANSFER OF NOTES, MORTGAGES AND OTHER COLLATERAL. (a) The commissioner may sell or transfer at par value or at a premium or discount to a bank or private purchaser for cash or

other consideration the notes, mortgages and collateral held by the department as security for loans made under this chapter.

(b) The commissioner may sell or transfer at par value to the Department of Revenue the notes, mortgages and other collateral held by the Department of Commerce and Economic Development as security for loans made under this chapter. The Department of Revenue may purchase the notes, mortgages and other collateral so offered, allowing the Department of Commerce and Economic Development a one-half of one percent service fee.

Sec. 42.08.070. GUARANTEES OF LOANS. (a) The commissioner may enter into agreements with other state departments and agencies, private banks, other lending institutions, and individuals for the purpose of guaranteeing loans made to qualified public utilities. The guarantees may not exceed 90 percent of the amount loaned and the loans shall be secured in the same manner as provided for direct loans under this chapter.

(b) A loan made under this chapter and guaranteed by the state shall bear an interest rate on the unpaid balance not exceeding the rate of interest which the state agreed to pay on the most recent general obligation bonds issued before the application for the loan.

Sec. 42.08.080. PROCEEDINGS AND REGULATIONS. The Administrative Procedure Act (AS 44.62) governs all proceedings, and the adoption of regulations, under this chapter.

Sec. 42.08.090. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of commerce and economic development;

(2) "department" means the Department of Commerce and Economic Development.

* Sec. 3. This Act takes effect July 1, 1981.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT
ALASKA PUBLIC UTILITIES COMMISSION

March 3, 1981

The Honorable Vernon Hurlbert
Chairman
House Labor and Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Hurlbert:

Re: HB 165

HB 165 addresses the short term, interim financing needs of certificated public utilities. Currently the cost of interim debt is above the prime rate of interest. Since that expense is passed through to the rate payers, a decrease in interim interest expense should benefit the utility's customers.

This legislation does not address the realistic long-term capital needs of larger public utilities because of the ceiling on the loan amount. The public interest would be served if long-term capital, not available from private lending institutions, were available to public utilities. Based on the experience of the APUC, one of the most graphic examples is the unavailability of long-term debt to private water and sewer utilities. Assets, whose life exceed 20 years, must be purchased with debt that must be repaid in a maximum of eight years. The benefits of both short and long-term interest rates should inure to the consumers of public utilities. The magnitude of those benefits depends on the capital intensiveness of the utility.

Sincerely,

for Carolyn Guess
Commissioner

Senator Frank R. Ferguson
Pouch V
Juneau, Alaska 99811

Dear Senator Ferguson:

We're most appreciative of your efforts to establish a Public Utility Revolving Loan Fund. Your Senate Bill No. 107 provides a very viable framework within which to create and administer this fund. While we're generally very pleased with this bill we have two items that we feel are very important to small utilities serving bush communities. These items are shown below:

Sec. 42.08.040. CONDITIONS AND LIMITATIONS ON LOANS

(d) Add the following:

Should the utility desire to obtain short term financing pending the receipt of a long term loan from the Rural Electrification Administration (REA) the Department may accept the REA's approval of the interim loan as evidence sufficient enough to establish the economic feasibility of the short term loan.

(g) Add the following:

A lien or collateral for short term loans to REA borrowers may be subordinated to any existing REA mortgage agreements that the utility may have that requires REA to have a first mortgage on all of the utilities existing and future properties.

A major problem that United Utilities, as well as other bush utilities has faced, is the lengthy period of time it takes REA to approve and release long term financing. We believe that by adding the above to

MAILING ADDRESS: P. O. BOX 4-2730 ANCHORAGE, ALASKA 99509

Senate Bill No. 107 that it will strengthen the ability of bush utilities to secure interim financing from the revolving loan fund on a timely basis.

Please let me know if we can assist you any further and, again, thank you for your support.

Regards,

SUBJECT: Inquiries about the President's Budget

TO: REA Staff

Recent news stories about possible changes in the REA programs for 1981 and 1982 have prompted a number of requests for information about REA.

All inquiries from the press, Congress, borrowers and others concerning the President's budget should be referred to the Office of Information and Public Affairs or the Assistant Administrators.

OIPA may, from time to time, refer some calls or written requests from the press or members of Congress for basic data or general information about the REA programs to other staff personnel. In these instances, a brief memo summarizing the telephone call or a copy of any written material shall be provided both my office and OIPA.

JOE S. ZOLLER
Acting Administrator

REDUCTION IN FEDERAL FINANCIAL ASSISTANCE TO COOPERATIVES AND PRIVATE COMPANIES ASSISTED BY THE RURAL ELECTRIFICATION ADMINISTRATION (REA)

As part of a general effort to reduce the share of Federal lending in U.S. credit markets, and to reduce Federal costs, the President proposes the following changes in the REA program:

-- Beginning in 1982, discontinue Federal Financing Bank direct lending to electric generation and transmission cooperatives and to telephone companies and cooperatives. Provide Federal guarantees of loans from private sources instead. This action will reduce Treasury borrowing by $5,145 million in 1982.

-- Reduce REA direct lending $187 million in 1981 and $350 million in 1982 by eliminating loans to telephone companies and cooperatives and reducing loans to electric cooperatives.

-- Discontinue 2% direct loans; substitute an equivalent amount of 5% loans.

-- Discontinue 5% direct loans for generation and transmission facilities; substitute an equivalent amount of guaranteed private loans.

These changes will be achieved by:

-- directing the Secretary of the Treasury to discontinue Federal Financing Bank direct lending to REA borrowers; 1/

-- seeking legislation to permit charging higher interest rates for REA direct loans;

-- instructing the Secretary of Agriculture to target REA direct loans to those most in need (more remote areas) and encouraging other borrowers to seek credit from private lenders; and

-- proposing budget rescissions and amendments to bring REA direct lending into line with these proposed changes.

1/ The Administration is proposing a broad reform of Federal Financing Bank operations that will affect other agencies as well, including the Farmers Home Administration and the Tennessee Valley Authority.

These proposed actions are based on the fact that the REA has largely accomplished its purpose -- to provide the basic investment capital necessary to provide electric and telephone service in rural areas. More than 99% of all farms now have electric service. The bulk of borrowing is now for power generation and system improvements, costs that should be borne by system users.

In the absence of restraint, REA would continue to expand the reliance of rural utility companies on federally-provided and sponsored credit. It has been estimated that the REA would be underwriting nearly 15% of total U.S. investment in electrical generation by 1995, if left unchecked.

The major reason that these systems have not converted to using the private sector as a major capital source is the highly favorable term structure -- for both the direct and guaranteed lending -- offered by REA. As a consequence, the availability of these subsidies reduces the necessity for recipients to improve their financial positions in order to attract private capital. Customers of REA-financed utilities receive power and telephone services at rates that average 8-12% below customers of non-REA-financed utilities.

Taking these actions will result in a dramatic reduction in direct Federal lending -- $5.5 billion in 1982, and over $32 billion between 1982 and 1986. In addition, Federal interest subsidy costs would be reduced by about $27 million in 1982 and by about $400 million over 1982-86. At the same time, rural electric and telephone consumers served by these systems should continue to receive adequate service at rates comparable to those charged to customers of non-REA-financed utilities.

The changes are expected to result in the following changes in funding 1/:

	(in millions of dollars)					
	1981	1982	1983	1984	1985	1986
Current base:						
Loan guarantee commitments.....	6,245	6,245	6,745	7,280	7,870	8,500
Budget authority and outlays.....	4,774	5,752	7,387	7,571	7,520	7,800
Policy reduction:						
Loan guarantee commitments.....	-187	-5,495	-5,935	-6,405	-6,925	-7,480
Budget authority and outlays.....	-38	-1,142	-2,328	-3,603	-4,975	-6,450
Proposed budget:						
Loan guarantee commitments.....	6,058	750	810	875	945	1,020
Budget authority and outlays.....	4,736	4,610	5,059	3,968	2,545	1,350

1/ The loan guarantees of the REA are converted to direct loans when they are purchased by the Federal Financing Bank. These outlays are excluded from the budget totals by law. Although these reductions are not included in the budget totals, they represent significant savings in Federal borrowing costs.

PROPOSED AMMENDMENT TO HOUSE BILL #165

IMMEDIATE APPROPRIATIONS OF $20M FOR UTILITIES
AFFECTED BY 1981 FEDERAL BUDGET CUTS

Utilities who are REA borrowers and have pending loan applications to the REA that may be subject to Federal Budget cuts, will be able to apply to the state for refinancing their current debt obligations. Loans made under this section will be for an amount not to exceed the amount requested in the REA application.

Senator Frank R. Ferguson
Pouch V
Juneau, Alaska 99811

Dear Senator Ferguson:

We're most appreciative of your efforts to establish a Public Utility Revolving Loan Fund. Your Senate Bill No. 107 provides a very viable framework within which to create and administer this fund. While we're generally very pleased with this bill we have two items that we feel are very important to small utilities serving bush communities. These items are shown below:

Sec. 42.08.040. CONDITIONS AND LIMITATIONS ON LOANS

(d) Add the following:

Should the utility desire to obtain short term financing pending the receipt of a long term loan from the Rural Electrification Administration (REA) the Department may accept the REA's approval of the interim loan as evidence sufficient enough to establish the economic feasibility of the short term loan.

(g) Add the following:

A lien or collateral for short term loans to REA borrowers may be subordinated to any existing REA mortgage agreements that the utility may have that requires REA to have a first mortgage on all of the utilities existing and future properties.

A major problem that United Utilities, as well as other bush utilities has faced, is the lengthy period of time it takes REA to approve and release long term financing. We believe that by adding the above to

MAILING ADDRESS: P. O. BOX 4-2730 ANCHORAGE, ALASKA 99509

Senate Bill No. 107 that it will strengthen the ability of bush utilities to secure interim financing from the revolving loan fund on a timely basis.

Please let me know if we can assist you any further and, again, thank you for your support.

Regards,

Vinod Batra
President

COMMITTEE ON APPROPRIATIONS
WASHINGTON, D.C. 20510

June 4, 1981

Honorable Vernon L. Hurlbert
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Vern:

I understand you called my Washington office and spoke with Mark Schneider and Joe Darnell. As they told you, the Conference Committee on the Supplemental-Rescission bill for the 1981 fiscal year budget adopted the Senate position on the Rural Electrification Administration (REA) insured loan program.

This means that the insured loan program for telephone and electric cooperatives is authorized at its full 1981 level as set by the Appropriations Act for agriculture, P.L. 96-528.

If we can be of further assistance, please let us know.

With best wishes,

Cordially,

TED STEVENS

Motor Carriers

HOUSE BILL NO. 169, by Reps. Randolph and Fanning. Amends definition of "common carrier" (AS 42.10.420(2)(B)) to read: "(2) 'common carrier' included (B) a person who leases, rents, or provides a motor vehicle for the use of another in transporting property, and who provides, procures, or arranges for, directly or indirectly, or by course of dealing, a person other than himself to operate [DRIVER OR OPERATOR FOR] the motor vehicle or the necessary authority for the use of it on a public highway, except when the motor vehicle is leased to an authorized common carrier or contract carrier or by a construction contractor as defined in (12) of this section to another construction contractor as so defined, under rules and regulations to be prescribed by the commission;". Amends definition of "private carrier" (AS 42.10.420(7) by addition of a new subparagraph which states "(7) 'private carrier' is (C) a person who rents, leases, or otherwise provides a motor vehicle for the use of others in transporting passengers or property upon the condition that he be employed to operate the vehicle;". Does not provide for an effective date.

Introduced February 17 and referred to Labor & Commerce.

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER POUCH N – JUNEAU 99811

February 10, 1982

POSITION PAPER - HB 169

Any program effects of this bill would be with the Alaska Transportation Commission, not Department of Public Safety.

The Department of Public Safety collects weight fees at time of vehicle registration. However, the determination of whether the vehicle is classed as a common carrier or private carrier is made by the Alaska Transportation Commission.

The reclassification which this bill requires would bring about a reduction of revenue to the state in reduced weight fees. An estimate of the amount of reduction would more appropriately be compiled by the Alaska Transportation Commission.

This bill as currently written would have no fiscal impact of the Department of Public Safety.

William R. Nix
Commissioner

RE HB169 WE ARE STRENUOUSLY OPPOSED TO THIS BILL WHICH IS BEING CONSIDERED BY YOUR COMMITTEE THE ULTIMATE CONSEQUENCES OF THIS BILL AND THEIR EFFECT ON THE TRANSPORTATION SYSTEM AVAILABLE FOR SHIPPERS OF THE STATE NEED TO BE EXAMINED CAREFULLY. LARGE VOLUME SHIPPERS WIN UNDOUBTEDLY BENEFIT AT THE EXPENSE OF SMALL BUSINESSMEN WHO WILL FIND SERVICES MORE EXPENSIVE AND PROBABLY LESS CONVENIENT. IT PLACES REGULATED CARRIERS AT THE DISADVANTAGE OF COMPETING WITH PRIVATE CARRIERS WHO WOULD NOW HAVE SIMILAR RIGHTS BUT WITHOUT THE OBLIGATIONS TO PROVIDE A VARIETY OF SERVICES OR WITHOUT HAVING TO BARE THE BURDEN OF REGULATED RATES, ROUTES AND REPORTS. WE URGE YOU TO TAKE A STRONG POSITION AGAINST THE PASSAGE OF HB169.

RE: HB 173

Dear Governor Hammond:

The House Labor and Commerce Committee met on February 18, 1981, to consider the above referenced bill.

The Committee is submitting a Committee Substitute deleting Sections 2 and 3, since there presently exist current funds to carry out those programs, even though we believe when and if the programs are actually made available to the public the demand will exceed the amounts budgeted.

We propose to increase Secion 1, from $140 million to $150 million, to cover the cash shortfall of the Alaska Housing Finance Corporation, for the Special Mortage Loan Purchase Program (AS 18.56.098).

During our deliberations it became evident that the programs for NON-conforming and Energy Conservation Housing Loans (AS 18.56.098) and (AS 44.47.380) needs your personal involvement and commitment to speed up delivery of the fruits of the programs to the Alaskan Citizen.

It is our belief that Administration could make these programs a higher priority, to make the programs more available to the citizens as soon as possible,. Additional Administrative support and direction is needed to help the responsible agencies implement the intent of these programs created last year.

The Committee would appreciate your offices attention to this matter.

Sincerly,

Vernon Hurlbert

Dear Chairman Hurlburt:

You wrote me indicating that there was a need for my involvement to speed up delivery of the Non-conforming and Energy Conservation Housing Loans program within the Department of Community and Regional Affairs. It is my understanding at this time that they are processing loans and appear to be underway. There was, perhaps, a delay in implementing the program, but much of the problem was due to statutory constraints under which the Department had to operate the program, such as bilingual staff and the setting up of four regional offices, as well as facilitating bank participation in this program.

I understand your concerns, but feel that the program is operating and on its way to satisfy its goals. Thank you for alerting me to your concerns.

Sincerely,

Jay S. Hammond
Governor

RE; HB 258

Dear Representative Cotton:

The Labor and Commerce committee passed out HB 258 an approppiation to ASHA.

During testimony Mr. James Crawford Deputy Director testified that ASHA needed the 15 million in order to operate the handicapped construction fund.

It was brought to our attention that the Director of ASHA in a communications with Rep. Cuddy stated that ASHA needed only 5 million.

The bill passed out with the 15 million figure, but it was the wishes of the committee to inform you of the difference of opion on the amount.

If you have any questions please feel free to call me.

JUNEAU, ALASKA 99811

March 31, 1981

Jim Crawford
Deputy Executive Director
Alaska State Housing Authority
P.O. Box 80
Anchorage, Alaska 99510

Dear Mr. Crawford:

We have reviewed your letter, dated March 9, 1980, commenting on our letter of February 23, 1980 to the Legislative Budget and Audit Committee. Your remarks are thought provoking indeed but, we think, not precisely pertinent to the subject addressed in our letter.

For example, with regard to the time period allowed ASHA to decide on dissemination of federal funds, you cite a letter from HUD calling for a decision in five days. The HUD allocations referred to are for existing housing units and rebuilding of low-income housing units. Neither of these require new construction of units, which is the main purpose of your request for the two $15 million funds.

The recommendation in our audit report, and subsequent letter, described a federal allocation for construction of 130 new units of family housing which was lost due to construction bids which exceeded available funds. We maintain ASHA could have sought additional funds through a budget request to the Legislature, since, according to HUD correspondence dated August 18, 1977, the federal allocation was reserved for ASHA from January 1973 through June 1977, at which time it was cancelled. We believe four years should have been sufficient for ASHA to obtain supplementary funding for this project and similar projects in the future.

Moreover, during that same time period, two elderly housing projects received HUD allocations but could not be started because of insufficient funds to cover high construction

bids. ASHA, however, was able to proceed with assistance from the Senior Citizens Housing Development Fund established by the Legislature in 1976.

Although not funded, the Housing Development Revolving Loan Fund, created at the same time as the Senior Citizens Fund, is a practical vehicle for ASHA to obtain funds to cover shortfalls in federal allocations. From the point of view of efficient cash management, these funds are preferred over creating new funds outside the State Treasury totalling $30 million. They are subject to Legislative appropriation as well as remaining in the State Treasury until disbursement by ASHA.

We therefore reaffirm our position that separate funds within ASHA are not necessary for new construction allocation shortfalls. Funding vehicles currently exist which can be utilized within the time period HUD allocations are available.

Sincerely,

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

cc: Senator Arliss Sturgulewski

TESTIMONY TO THE HOUSE LABOR AND COMMERCE COMMITTEE
BY: JAMES CRAWFORD, ALASKA STATE HOUSING AUTHORITY
APRIL 29, 1981

My name is Jim Crawford, I am the Deputy Executive Director of the Alaska State Housing Authority (ASHA). The Alaska State Housing Authority is a nonprofit pubic corporate authority funded through rental project revenues and subsidies from the United States Department of Housing and Urban Development (HUD). ASHA presently manages or owns and manages over 3,000 apartment units throughout the State of Alaska. The corporate authority is governed by a five member Board of Directors appointed by the Governor. The Commissioner of the Department of Commerce and Economic Development is a member of our Board of Directors.

My responsibilities at ASHA include, but are not limited to, arranging for financing through the tax exempt bond market and other methods of funding for new construction activities. As background to the preparation of the legislation under hearing today, please let me explain the audits of ASHA's fiscal year ended March 31, 1980. Because ASHA showed no apparent financial problems, HUD approved ASHA's contract with an independent auditing firm for compliance testing and the normal financial audit of federal and non federal programs. ASHA last year contracted with Peat, Marwick, Mitchell & Co. for that audit. No material findings were reported in the audit of ASHA activities either in the federal programs or the non federally funded activities. Next, HUD auditors did a performance review, again with much the same result. Finally, Division of Legislative Audit completed a special review and a full performance review of ASHA.

Subsequent to the recommendations contained in the audit report and within our Chairman's response to those recommendations, House Bills 256 through 260 were presented in draft form to the Legislative Budget and Audit Committee. We found the recommendations of the legislative auditors to be encouraging and the bills as redrafted by Legislative Budget and Audit will, if passed by the Legislature, be a positive step toward the greater production of needed senior, family and handicapped housing within the State of Alaska.

Specifically, with regard to House Bill 257 and 258, these bills establish and fund the Family and Handicapped Housing Development and Construction Fund in compliance with recommendation number 2 of the Division of Legislative Audit which states "ASHA should seek additional sources of funding of housing projects to assure that federal allocations are not lost." As stated in the audit report "In 1977, ASHA had no choice but to return to the Federal Government two allocations totalling approximately $3,460,000 due

to the infeasibility of the projects. The allocations were for family housing in Juneau (80 units), and Ketchikan (50 units)."

ASHA has two main programs with which we deal with the construction of new federally subsidized housing within Alaska. The conventional low rent program which is a totally HUD financed program contains provisions for nationally applicable maximum prototype costs for each project. In a letter received from HUD on the cancellation of the Juneau and Ketchikan projects, HUD stated that they "were aware that these projects have not been able to be constructed because of the prototype costs in these areas have been too low and it is not reasonable for you to issue construction comments...". Therefore, when attempting to construct family and handicapped federally subsidized housing under the low rent conventional program, a construction shortfall occurs between available federal dollars and actual project cost. The passage of HB257 and 258 will allow for grants or loans to these projects in order to cover the construction shortfall.

Capital funds may also be used for the enhancement of the family and handicapped projects for the benefit of the program recipients. An example of the enhancement previously provided by ASHA in family projects is the barrier free handicapped units. Most of the changes made in ASHA projects which add amenities are at the request of local advocacy or advisory groups monitoring the construction of our projects. A central motivation of both the groups advocating senior housing and handicapped housing is the philosophy of age integration. The handicapped have continually stressed the need to lead as normal a life as possible and have facilities, though barrier free, integrated in a family atmosphere. The seniors have stated a definite desire to provide alternative housing for handicapped other than in senior projects as is presently the case.

The next program ASHA deals with is the Section 8 New Construction program which requires independent financing. The initial financial feasibility of an ASHA tax exempt bond financed project entails a determination from HUD of the per unit annual subsidy and fair market rent. When the fair market rent has been determined, ASHA subtracts its management and maintenance costs and therefore nets to a figure available for amortization. The figure available for amortization times the number of units in the structure equals the amount that may be financed through the tax exempt bond market. Again, due to the high cost of construction in Alaska, the figure available for amortization is insufficient to cover to total construction cost. Therefore, the need of a Housing Development and Construction Fund to cover, in the Section 8 instance, the financing gap and thereafter construction shortfall.

Flexibility and timeliness are primary reasons for the creation of capital funds. Our construction activities are tied directly to the availability of federal funding and the exigencies of the bond market. Our facilities must be completed within Alaska's short construction season. Our efforts, as illustrated by the proposed legislation, are to speed the construction of needed housing within the State. ASHA basically has two options when faced with a construction short fall as in the case of our present Juneau senior project:

1. Cut the project size as in the current Juneau instance from 24 to 20 units and cut amenities; or

2. Alternatively to admit the financial infeasibility of the project and defer construction.

Another reason for the creation of the funds is the actions of the Federal Government. According to an analysis of HUD budget cuts in the Wall Street Journal of March 14, 1981, conventional new construction subsidized housing will be cut 32.7% from 260,000 units previously proposed to 175,000; new construction authorization in the Section Eight program would be cut 39.4% from 130,000 to 78,750 for the entire country. Obviously then ASHA must stretch available federal dollars to their maximum and supplement those funds by leveraging in the bond market and also ask the legislature's consideration of the problem by proposing HB257 and 258.

Of additional concern to ASHA is the proposed elimination of the Indian Housing Program utilized by the regional housing authorities. A substantial portion of the need for family housing is centered in the rural areas of the State. In order for the regional housing authorities to meet the needs of their program recipients, capital funding must be available which will augment those funds still available through the U.S. Department of Housing and Urban Development and the Farmers Home Administration.

The particular needs of handicapped individuals and their incumbent greater cost in the development of housing could be accommodated by the passage of HB257 and 258.

ASHA is presently working with the State Department of Labor and the Census Division to isolate the need for housing then prepare a prioritized five year construction allocation recommendation for HUD concurrence. In the event the capital construction funds are established and funded, ASHA will be able to more aggressively perform marketing plans statewide for the benefit of ASHA's program recipients and those program recipients of the

regional housing authorities. Existing information concentrates on available housing stock and does not isolate the need for housing. It is our intention to work closely with the regional housing authorities to assist them in their fulfillment of the housing needs in the rural areas of the State as well as providing for the urban needs of Alaska's families and handicapped. Particularly in the face of a wildly fluctuating bond market a gap between available construction dollars and actual construction costs will force the delay or even cancellation of needed housing projects. Nationally established construction maximums do not reflect Alaska's costs. Consequently, otherwise worthy projects may not be built. We believe that HB257 and 258 are consistent with the recommendations of the Legislative Budget and Audit Committee auditors and that the legislation, if enacted, will be a positive step for the greater production of housing for families and handicapped within Alaska.

Pursuant to a request from Senator Fischer when corrolary bills were under hearing in Senate State Affairs I have attached to my testimony a listing of anticipated family and handicapped projects throughout the State. The listing details the location, cost and potential source of funding for the projects in total. Several assumptions are critical to the analysis of the attached list. Those assumptions are

1. Square footage cost is estimated at an average $95.00 per square foot. Naturally, cost differentials exist between urban and rural construction, however, economies of scale on a larger project should offset the greater costs of smaller projects and therefore meet the average.

2. Based on rates available in the current tax exempt bond market and present fair market rents as set by the U.S. Department of Housing and Urban Development (HUD), we anticipate that approximately one-third of the total cost would be required as a State subsidy at the time of construction and two-thirds could be covered by direct HUD/Farmers Home loans/bonds or tax exempt bonding by ASHA.

3. The list was determined based upon projects that have been proposed, anticipated demand as evidenced by ASHA's waiting lists in our existing project and the current activities and plans of regional housing authorities.

4. Projects listed have yet to be analyzed for actual financial feasibility and therefore represent estimated needs only.

5. The lists are alphabetized and <u>no priority</u> has been given to the projects.

6. Square footage estimated for family and handicapped housing is 1,067 square feet for mixed two, three and four bedroom units. Presently ASHA has 27 handicapped units in our senior projects.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

LIST OF PROJECTS

ESTIMATED FAMILY AND HANDICAPPED DEMAND

NAME OF COMMUNITY	NUMBER OF UNITS
1. Anchorage	125
2. Bethel	50
3. Cordova	20
4. Fairbanks	75
5. Juneau	50
6. Kodiak	75
7. Kenai/Soldotna	50
8. Nome	50
9. Sitka	24
10. Valdez	25
11. Regional Housing Authority demand	594
TOTAL	1,138

Assuming the need for 1,138 units of family and handicapped housing, the estimated cost is as follows:

1,138 X 1,067 square feet (mixed two, three and four bedroom units) X 1.2 common area X $95.00 per square foot =	$144,505,944.00
Land cost at $3,000 per unit =	3,564,000.00
Fees for architects and engineers, etc. (8% construction) =	11,560,475.00
Contingency and cost of bond issuance, etc. =	11,500,000.00
Interim interest (assume have money ½ year before project completion) =	12,000,000.00
ASHA administration (may be more or less for Regional Housing Authority projects)	8,100,000.00
TOTAL	$191,230,419.00

Assuming total cost of $191,230,419.00

TOTAL ESTIMATED DEMAND	STATE CONSTRUCTION SUBSIDY	HUD/FARMER'S HOME OR ASHA FINANCING
$191,230,419.00	$63,679,729.53	$127,550,689.47

SUBJECT: Automobile repair problems as perceived by the state Consumer Protection Office

FROM: WILSON L. CONDON
ATTORNEY GENERAL

By: Connie J. Sipe
Assistant Attorney General
Chief, Consumer Protection
Section AGO/Anchorage

Putting it simply to start with, automobile repair complaints filed by consumers with our office are, and have been for at least six years, the most numerous, the most persistent, among the most costly, and the least solveable consumer problems that we see. A legislative audit in 1979 helped us identify the extent of this problem: automobile repair complaints were our most numerous complaints, numbering 281 out of 2,229 complaints filed by Alaskans in FY79, 13% of all of our complaints. In FY79, our office was able to obtain a satisfactory resolution for consumers in 39.2% of all the cases we handled, but only approximately 16.5% of automobile repair complaints we handled had any sort of consumer satisfaction as a result of our efforts. This low mediation rate prevails today, even though auto repair complaints are often ones on which our office spends the most time and effort in personal contact with both business and consumer in mediation attempts. 1/

Alaskans are not unique in their problems with auto repair. The Federal Trade Commission has found that auto repair complaints are the number 1 complaint in 49 out of 50 states. The U.S. Comptroller General's Report, January 11, 1980, 2/ cites a 1978 estimate that 20 billion consumer dollars a

---

1/ FY 80/81 figures are not available, since the section has only a manual record-keeping system. The data is available, but we have not compiled it. We are certain auto repair problems have maintained their prominence in our case load.

2/ "Public and Private Coordination Needed If Auto Repair Problems Are To Be Reduced."

year are lost in the country on auto repair of 124 million vehicles. The Comptroller's report, based on a study of county, state, federal, and industry, auto repair enforcement and conciliation programs, found the following auto repair problems to the most common:

(1) faulty repairs, where a problem reoccurs or is not improved at all by repair efforts;

(2) unnecessary repairs, made either through mistaken or incompetent diagnosis, or because of fraud;

(3) unanticipated repair costs, or what's known as the "5 o'clock surprise" when a consumer comes to pick up the car and is asked to pay for unauthorized work or a price in excess of either the formal or informal estimate earlier given.

These are also the most common problems for Alaskans, as well as this fourth:

(4) deceptive repair charges--we are fairly certain that some Alaskans are charged for parts or services which have not been provided at all, or which differ from what was actually provided (e.g., charged for a "new" part when a "rebuilt" was installed).

Also, it should be remembered that the cost of auto repairs is extremely high, not only in terms of cash paid for the repair, but also in terms of lost time and convenience. Many of the repair complaints we see involve charges over $500.

Alaska does not license auto mechanics nor auto repair shops. A few states do this, but our office would not recommend this step at this time, since the state wishes to stay out of the regulation area. It is often suggested by community business groups that the Consumer Protection Office should seek out and prosecute the "bad apples" in an industry, and through prosecution of those shops or mechanics, create an effective deterrence for the rest of the industry. However, without mechanical expertise on the Consumer Protection staff, or the money to hire objective experts who can assess the repair work which has been done on an automobile, most automobile repair complaints degenerate into "swearing matches" between a consumer and a mechanic.

Many states have passed auto disclosure type laws, such as the one that became effective in Alaska January 1, 1977, AS 45.45.130-240. This law requires shops to post signs saying that the consumer has a right to a binding price estimate and the return of all replaced parts, if the consumer so requests before repairs are started. However, experience has shown that this statute appears to have made little difference in the volume or type of repair complaints we receive. The office has repeatedly checked repair shops and found that most of them do post the sign. However, shops and mechanics actively resist giving consumers written estimates. The Alaska law does not state that the estimate given must be "written," so unless the consumer takes one step beyond what the law dictates, and actually asks for a "written" estimate, the shop will usually give a verbal estimate. If the shop is willing to live by a verbal estimate, that is no problem, but in a dispute over what the verbal estimate was, the lack of a written estimate is crucial, and usually fatal to our attempts to mediate the complaint for the consumer.

We have filed, in the Anchorage office, two lawsuits regarding automobile repair complaints: one for not following the procedures set out in the statute and for the mechanic's self-help repossession of an automobile after a bill dispute, and the other for more serious practices verging on intentional fraud. Again, there are problems with these cases, since we must take them to the superior court, which means a long wait for a trial, and we have hired mechanics as independent expert witnesses. 3/

Our office finds that many auto repair complaints are legitimate and serious. We also know that these may only be the tip of the iceberg, since many consumers do not detect repair problems, do not complain at all, or only complain to the shop, without realizing that the services of our office are available. Also, the law may appear to be stacked against the consumer, since Alaska's lien statutes allow a mechanic to keep an automobile until the consumer pays in full for charges. Thus, when a consumer wants to challenge

---

3/ Just finding an auto repair mechanic to testify is difficult, since other members of the industry are understandably very reluctant to testify against each other. Several times mechanics have told consumers or our office that a consumer has been a victim of unnecessary or fraudulent repair by another shop, but will immediately add that he is not willing to put that in writing or to testify to it.

charges made, he or she runs a great risk of losing either the use of the vehicle while s/he takes the matter to court, or the complete loss of the vehicle since the mechanic can sell it for payment after 90 days, without any type of hearing. 4/

Recommendations

Other states report that the most effective way to provide monitoring and deterrence of the auto repair industry is to have an undercover car operation. Some states have auto repair experts on staff, as in their motor vehicle division, their mechanic licensing division, or even in their state car fleet repair pools, and do not face the same financial and practical problems of locating experts that our section does.

Undercover or inspection car operations are usually aimed at "target" shops who have had a high number or ratio of serious and unresolved consumer complaints about auto repairs. An expert for the state repairs an automobile to nearly perfect condition, leaving one easily-detected, easily-diagnosed fault. Then the automobile is taken to the target shop or shops, and a written estimate is sought as to the nature of the problem and the cost for repair. The shop is then asked to do the repair, and the car is taken back to the state's experts to check whether the work was properly done, whether unnecessary work was done, or whether in some instances the shop may have charged for work that it did not do at all. Then a civil lawsuit may be brought and the result widely publicized, providing deterrence in the rest of the industry.

This ability, to take cars to shops, is probably the best system for Alaska, rather than licensing or certification. When a consumer believes that unnecessary work has been done on his car, it is usually already too late to prove a legal case, since the state did not see the car before it went into the shop, and hence cannot fully evaluate what was done in the shop. However, having someone on staff, as an investigator, perhaps a retired automobile repair mechanic, or just someone who can develop an expertise in this area, would give this office the ability to pursue repair problems quickly and with technical efficiency.

4/ In fact, the courts in California have declared a similar California lien statute to be unconstitutional, since the consumer can be deprived of his motor vehicle, partially through the cooperation of the State Motor Vehicle Department in transferring title pursuant to the lien law, without any type of hearing, and without adequate time to guarantee that the consumer can obtain a court hearing.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
These costs reflect the resources to be used to employ an auto fraud investigator (Associate Attorney II, R-19) at Anchorage. The position will be responsible for designing a statewide auto repair fraud program. The position will also be responsible for investigating all major auto fraud complaints and oversee and organize investigative efforts of subordinate staff handling auto fraud complaints of lesser magnitude, $10,000 will be used to pay for testimony and trial preparation time of auto mechanical and engineering expert witnesses. $2,800 will be used for purchase of auto repair parts, supplies and services being investigated.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
These costs reflect the resources to be used to employ an auto fraud investigator (Associate Attorney II, R-19) at Anchorage. The position will be responsible for designing a statewide auto repair fraud program. The position will also be responsible for investigating all major auto fraud complaints and oversee and organize investigative efforts of subordinate staff handling auto fraud complaints of lesser magnitude, $10,000 will be used to pay for testimony and trial preparation time of auto mechanical and engineering expert witnesses. $2,800 will be used for purchase of auto repair parts, supplies and services being investigated.

HB 297

"An Act making a supplemental appropriation to the Department of Labor and a transfer to the Department of Military Affairs; and providing for an effective date."

Jackie McClintock

Sec. 1. Appropiates $64,500 to the Workers' Compensation program for the hiring of 1 and ½ positions for regulation review and at least 1 and ½ for contractual Hearing Officers to help remove the back logged Workers' Compensation hearings.

Appropiates $600,000 to the Second Injury Fund, this will make the fund solvent. The $600,000 is what is presently owed to Employers and will pay compensation to workers.

Sec. 2, 3, and 4 transfers $488,100 from the Department of Administration to the Department of Military Affairs, Alaska National Guard. In 1980 the legisature passed FCCS SB 26, increasing the benefit amount for National Guard retirees. The $488,100 increase was appropiated to the Department of Administration. This bill would place the money correctly in the account form which benefits for the National Guard Retirement System are paid.

Sec. 5. the unexpended and unobligated part of the appropiation made in sec. 1 of this Act lapses into the general fund June 30, 1981.

Sec. 6 Effective date of legislation.

April 1, 1981

STATEMENT BY DONALD F. NIELSEN
IN SUPPORT OF HOUSE BILL NO. 325

My name is Donald F. Nielsen. I am the Vice President of Bristol Bay Native Corporation. Today, I am speaking on behalf of Bristol Bay Native Corporation and the Alaska Federation of Natives. Both organizations support House Bill No. 325 entitled "An Act relating to orders under the Alaska Securities Act of 1959." This bill would expand the remedies the State has in dealing with false and misleading statements made in proxy solicitations of Native corporation shareholders.

By way of background, let me state that Alaska Native Claims Settlement Act corporations are exempt from federal securities laws. Instead, their proxy solicitations are governed solely by the State of Alaska. Recently, the State took a major step to insure fairness in proxy solicitations of Native shareholders. The mechanism to insure fairness was regulations under Alaska Statute 45.55.139 and .160. These new regulations require that proxy solicitations give Natives shareholders the type of information that is necessary for them to make an informed judgment before voting on matters presented for their consideration, such as election of directors or approval

of proposals. These regulations are comprehensive and reasonable. However, without adequate enforcement, they are meaningless.

At present, the State is sure of only two enforcement alternatives: (1) a criminal proceeding under Alaska Statute 45.55.210 with a fine, jail term or both, or (2) a civil proceeding with injunctive relief. One is, in many cases, too harsh a remedy, and the other is time consuming.

A prompt enforcement alternative is needed with a range of lesser penalties. Such a solution is embodied in House Bill No. 325. First, it applies to administrative hearings which are less expensive and time consuming for all. Second, its penalties are not harsh fines or jail sentences, but pre-distribution review of solicitation materials and/or voiding of proxies where there is a finding of false or misleading statements.

Bristol Bay Native Corporation believes that the new proxy regulations need to be enforced promptly for the protection of Native shareholders. We believe that House Bill No. 325 creates the opportunity for such prompt enforcement. Therefore, we support the passage of House Bill No. 325.

Title Analysis

HB 325

The intention of adding the two new sections, B and C, to AS 45.55.200(a) is to provide proper enforcement for violations of Section 160 by companies described in Section 139 only. The legislation, as introduced, does not limit the Administrator's authority to proxy solicitations by ANCSA corporations. In fact, it would permit the Administrator to take action against the GM's and IBM's even though the Alaska Securities Act does not otherwise provide such authority as their proxy solicitations are already fully regulated under the Federal Securities Act of 1934.

With the proposed language added, the Division of Banking and Securities would be in support of this legislation to clarify and provide adequate authority over misleading and fraudulent proxy solicitations by Native corporations.

FISCAL NOTE HB 325

When AS 45.55.139 was enacted in 1977, the Division of Banking and Securities had no prior history or other documentation to show the potential impact of administering proxy laws and regulations relative to the Alaska Native Claims Settlement Act. Based on investigative time and costs incurred in this area since 1977 and on the fact that 31 regional and village corporations currently come under the provisions of AS 45.55.139 and this proposed legislation, the projected costs are reasonable.

Travel costs include investigative travel of securities staff for hearings and witness travel costs. Contractual cost is for additional persons as required by the Department of Administration pursuant to the memorandum of February 5, 1981.

Any questions on this Fiscal Note please call L.P. Carroll 2521.

report to its stockholders containing subsantially all the information contained in annual reports of corporations subject to the 1934 Act. Such reports by Native corporations would not be filed with or reviewed by the SEC, but the Committee believes that the Native leadership will comply fully with the intent of this provision and will submit annual reports to their stockholders which are as effective in disclosing corporate activities as those prepared by companies regulated under the 1934 Act by the SEC. Finally, the Committee understands that the general provisions of Alaska law provide protection for Native stockholders from any corporate mismanagement and misrepresentations or omissions to represent in connection with sales of securities, and that Alaska courts would look to precedents under federal securities laws for appropriate standards of conduct by management and other persons connected with securities transactions. Native corporations have assured the Committee that they do not intend to seek an exemption from state securities laws on the basis of this exemption from federal laws and intend to pursue the passage of State legislation to the extent necessary to provide any appropriate additional protection. Therefore, it is not necessary at this time to impose additional federal requirements.

It should be noted that these corporations are being exempted from the federal securities laws on the understanding that federal regulation of Settlement Act corporations is not necessary to protect Native stockholders or the public during the twenty-year period when Native-owned stock cannot be sold. However, if this assumption proves invalid in light of experience, the Committee is prepared to re-impose such provisions of the federal laws as may be necessary. In short, the twenty-year exemption should be viewed by the Natives as an experiment which will be stopped if it is abused.

SECTION 4

Subsection (a) merely makes clear the congressional intent that payments and grants under the Settlement Act are not to be deemed a substitute for any governmental program or benefit which is otherwise available to Alaska Natives as citizens of the United States and Alaska.

Subsection (b) makes clear that benefits under the Settlement Act shall not be considered as income or other resources for purposes of the Food Stamp program. The background to subsection (b) is provided in an August 6, 1974, memorandum prepared by the Congressional Research Service of the Library of Congress:

THE LIBRARY OF CONGRESS, WASHINGTON, D.C. 20540

THE COUNTING OF INCOME FROM PAYMENTS UNDER THE ALASKA NATIVE CLAIMS SETTLEMENT ACT IN DETERMINING ELIGIBILITY FOR AND THE AMOUNT OF FOOD STAMP AND CASH WELFARE BENEFITS

Food Stamps

In March 1974, the State of Alaska notified the Federal offices of the Food Stamp Program (in the USDA's Food and Nutrition Service) that it was Alaska's interpretation that

Juneau, Alaska 99811

Amendment to HB 336
Department of Revenue
Amendment Requests: $4,534 GF
To Pay Shared Taxes Owed to City of Houston

Dear Representative Cotten:

Please revised HB 336 to appropriate $4,534 GF to the Department of Revenue to pay Shared Taxes owed to the City of Houston for the years 1975 - 1978.

At the time the Legislature created the Municipal Assistance Fund in 1978, the City of Houston had not been receiving shared taxes under the Gross Business Receipts Tax Law because businesses within the Houston City limits were reporting taxes to be shared to another municipality. The City of Houston requested an audit in FY 81 which disclosed that $4,534 should have been shared with Houston for the years 1975 - 1978. Under the previous law, Revenue would have simply adjusted future payments to the overpaid municipality. However, since that law was repealed and a substantial amount of time has elapsed, a supplemental appropriation is requested.

Please add a new section to HB 336 to read as follows:

> The sum of $4,534 is appropriated from the general fund to the Department of Revenue for the purpose of paying shared taxes owed to the City of Houston for the years 1975 - 1978.

Sincerely,

Dr. Ronald D. Lehr
Director

Re: Amendment to H.B.336
Amendment Request: $21,547 GF
Department of Revenue, ARRC.
Purpose: To fund outstanding prior year obligation.

Dear Representative Cotten:

Please revise H.B.336 to appropriate $21,547 in general funds to fund a prior year obligation of the Alaska Renewable Resources Corporation.

During FY 80, ARRC contracted for technical assistance on a fisheries development project. In the middle of FY 80, the Legislature expressed a desire to reappropriate a portion of ARRC's funds to establish new development projects. When ARRC provided the Legislature with a listing of unobligated funds available for reappropriation, the amount estimated for the fisheries project did not include the technical assistance contract. The Legislature acted on the reappropriation in Chapter 93/ SLA 1980 and sufficient funds were not available to pay the bill. ARRC did not lapse sufficient funds at the end of FY 80 to allow payment of the obligation from FY 81 funds.

Please add a new section to H.B 336 to read as follows:

> The sum of $21,547 is appropriated from the general fund to the ~~Department of Revenue, Alaska~~ Renewable Resource. Corporation, to pay a prior year obligation in the Fisheries Project.

Sincerely,

Dr. Ronald D. Lehr

Wind Power Syste

Dear Representative Cotten:

Please amend H.B. 336 to add a new section that would change the intent language for $90,000 appropriated in Chapter 50/SLA 80, page 66, line 7 from "Lime Village Wind Power System" to "Lime Village Alternative Energy System." This adjustment is necessary because the Division of Energy and Power Development has expended $1,500 of the available funds and determined that wind power is not feasible at Lime Village. The Division proposes to use the remaining funds for an alternative energy system combining solar power and biomass.

Please add a new section to H.B. 336 to read as follows:

Section 286, Chapter 50, SLA 1980, page 66, line 7 is repealed and re-enacted to read:

	Appropriation Item	Other Funds
Lime Village Alternative Energy System	$90,000	90,000

Sincerely,

Ronleh

Dr. Ronald D. Lehr
Director

Director
Division of Administrative Service

SUBJECT: Lime Village Wind Appropriation

From: Clarissa Quinlan
Director
Division of Energy and Power Development

During the last legislative session the Division of Energy and Power Development received an appropriation of $90,000 to study wind potential at Lime Village, Alaska.

After installation of an anemometer and subsequent wind recording, the potential for wind electric use in this remote village appears minimal. (See attached)

The Division hereby requests that a Delete/Add supplemental appropriation be considered changing the mandate of the legislative intent for the Lime Village appropriation to include solar and biomass. Several options appear to be viable and will be explored once the mandate has been changed. The major emphasis will be focused on subsistence electrical needs and its use in refrigeration. These items were identified by Representative Hurlbert and the villagers themselves as being priorities.

The concensus that solar and/or biomass should be explored is the result of cursory exploration of alternatives by staff and consultants. Attached you will find some of the options explored to date.

The Division will need approximately 3 months for procurement and installation of materials after the Delete/Add action has taken place.

Dear Don:

I am enclosing a recent report which should give you some ideas as to the present state of the photovoltaics (PV) technology, as well as some ideas as to projects which have been done that might be of interest. This report also contains a list of PV manufacturers.

As I mentioned on the phone, I am very interested in this project and am looking into the possibility of formally establishing myself and a colleague, Ms. Kay Firor, as consultants to this potential project. Please let me know if this is acceptable to you and I will inform you of our managements' feelings.

Sincerely,

Steve Hogan

Refrigeration -

Don Markle

DOEPD

Here's a handful of info. on Solar refrigeration. Was fairly comprehensive last year when compiled, however I suspect there are newer systems available. Some of the best are made overseas.

still believe that thermal pile - eutectic salt storage is much simpler & cheaper despite initial failures statewide (would like to find reports on those attempts for analysis).

I Must have these back, so make copies and return to above address.

Re: Lime Village

Dear Don,

Attached please find some information on photovoltaic systems. The system I would recommend looking at strongly is the model H812 which will give you about 264 watts according to their rated power output or basically enough power in the summer time to operate a refrigerator and some other appliances. The type of refrigerator we should be looking at would be one similar to the Arco Solar, which is a very efficient model, and is designed to be operated with a photovoltaic system. This is in contrast to the Instamatic 1E-12 which is designed to be operated on an RV for occasional use. So with the photovoltaic system and a refrigerator, in the summer time you could have enough power for refrigerating foods. In the winter time you wouldn't have as much power for refrigeration because of lack of sunlight. But with a system of that size you certainly would have enough for at least a CB radio and since you can store food outside in the arctic entryway, you no longer need the cold storage. I've scribbled the prices for the systems which doesn't include some accessories that we might consider like the ground-mounting hardware ($160) and the meter panels ($165), and certainly battery enclosures ($11) and possibly extra batteries ($150 ea) would be worth while looking at.

The data logging sheets for the anemometer have been sent to Lime Village as per your request.

Sincerely,

Mark A. Newell
President

Dear Don:

I'm enclosing the information we discussed on the telephone; I hope it is of use. I feel that unless weather conditions are drastically different at Lime Village (such as heavy cloud cover due to nearby mountains) than at Bethel, the insolation data for Bethel may be used, and the installation of monitoring equipment is not necessary.

The process of deciding on system sizing is highly dependent on the loads. Hence, it is very important that you define precisely what loads are anticipated, the energy required (a function of the instantaneous power and time), and the required storage which depends on the back-up supply time needed. When these figures are decided upon, the minimum necessary array size may be determined using the worst-case winter insolation data. You can then determine what excess would be available for summer usage.

As always, please feel free to get in touch should there by any way I can help.

Sincerely,

Steve Hogan

Re: Lime Village Wind Project

Dear Don,

After over three months of data collection from the anemometer located at Lime Village the average wind speed looks dismal. With a 4 mph average it looks doubtful a wind system is practical. The winter winds may prove to be substantially higher than the summer and fall recorded, however a battery storage system would not be practical for the expected period of calm. In brief my recommendation is that a wind system in Lime Village would be a disappointment and should not be attempted. If the legislative intent could be reinterpreted, a photovolaic system may hold some promise. It would be prudent to install a pyronometer as soon as possible to get some baseline data for design purposes. We would be happy to explore this possibility with you at your convenience.

Sincerely,

Re: Amendment to H.B.336
Amendment Request: $21,547 GF
Department of Revenue, ARRC.
Purpose: To fund outstanding prior year obligation.

Dear Representative Cotten:

Please revise H.B.336 to appropriate $21,547 in general funds to fund a prior year obligation of the Alaska Renewable Resources Corporation.

During FY 80, ARRC contracted for technical assistance on a fisheries development project. In the middle of FY 80, the Legislature expressed a desire to reappropriate a portion of ARRC's funds to establish new development projects. When ARRC provided the Legislature with a listing of unobligated funds available for reappropriation, the amount estimated for the fisheries project did not include the technical assistance contract. The Legislature acted on the reappropriation in Chapter 93/ SLA 1980 and sufficient funds were not available to pay the bill. ARRC did not lapse sufficient funds at the end of FY 80 to allow payment of the obligation from FY 81 funds.

Please add a new section to H.B 336 to read as follows:

> The sum of $21,547 is appropriated from the general fund to ~~the Department of Revenue, Alaska~~ Renewable Resource. Corporation, to pay a prior year obligation for the Fisheries Project.

Sincerely,

Dr. Ronald D. Lehr
Director

Office of the Governor

DATE: March 3, 1981

RECEIVED

FILE NO: SO80409 MAR 6 1981

TELEPHONE NO: 465-2336

BUDGET AND MANAGEMENT

FROM Norene Hirsh, Finance Officer
Administrative Service Division
Department of Revenue

SUBJECT: Supplemental Appropriation
for Alaska Renewable Resources
Fisheries Capital Account

The Alaska Renewable Resources Corporation requests a supplemental appropriation to fund a prior year obligation for $21,546.86 (copy of invoice attached).

Under Ch 80 SLA79 (copy attached) ARRC was authorized $11,149,800 appropriated from the Development Fund for specific projects. These projects and their appropriations were:

Fisheries Project	$4,817,900
Timber Project	$2,753,000
Agriculture Project	$2,753,000
Renewable Energy Project	$825,000

During the last legislative session, new legislation was introduced under Ch 93 SLA80 (copy attached) to reappropriate $5.6 million of the unobligated portions of these appropriations to establish funding for the Forest Products Producers Assistance Fund and the Commercial Fish Processors Assistance Fund.

When residuals from the appropriations authorized in Ch 80 SLA79 were ear-marked for the reappropriation, ARRC alloted too great a portion from the Fisheries Project account, not recognizing that there was still an outstanding obligation against that project. What should have occurred was $1,440.00 should have been transferred from the Fisheries Project account instead of $1,469.00, thus leaving an excess to pay the outstanding obligation.

As the appropriation lapsed June 30, 1980 and was not sufficient to pay this bill, advice was solicited from the Attorney General's Office.

By copy of their attached response the Alaska Renewable Resources Corporation hereby requests a supplemental appropriation to meet a fiscal year 1980 Capital obligation.

APPROVED: Thomas K. Williams

ATTN: Norene Hirsh, Fiscal Officer
Division of Admin. Services

TELEPHONE NO: 465-3666

FROM: WILSON L. CONDON
ATTORNEY GENERAL

SUBJECT: Payment of Perkins, Coie bill to ARRC

By:
Rodger W. Pegues
Assistant Attorney General

This responds to your request for advice on this matter.

There is no question that the billing for technical assistance was payable out of the appropriation to ARRC for capital projects for fiscal year 1980. However, to the extent that it exceeds the amount which was lapsed from that appropriation (or if not lapsed, available to pay it), it can only be paid by a supplemental appropriation to ARRC.

The state law on the subject is quite explicit:

> An indebtedness arising from a prior year for which the appropriation has lapsed shall be paid from the current year's appropriations, if this expenditure does not exceed the balance lapsed . . . .

AS 37.25.010(b). This statute has consistently been applied to mean just what it says: A prior year's bill cannot be paid from a current appropriation unless an amount sufficient to have paid it was left over from the prior year's appropriation. The purpose of the statute, to prevent agencies from incurring obligations in any year in excess of their appropriations for that year, can only be achieved by applying the statute in precisely this way, and Director of Finance Mullin informs us that it has always been so applied.

Accordingly, if -- as it appears -- there was an over-expenditure and no way to reallocate money in the appropriation for fiscal year 1980 to cover it, the Perkins Coie billing cannot be paid from the appropriation for fiscal year 1981.

Amendment to HB 336
Department of Revenue
Amendment Requests: $4,534 GF
To Pay Shared Taxes Owed to City of Houston

Dear Representative Cotten:

Please revised HB 336 to appropriate $4,534 GF to the Department of Revenue to pay Shared Taxes owed to the City of Houston for the years 1975 - 1978.

At the time the Legislature created the Municipal Assistance Fund in 1978, the City of Houston had not been receiving shared taxes under the Gross Business Receipts Tax Law because businesses within the Houston City limits were reporting taxes to be shared to another municipality. The City of Houston requested an audit in FY 81 which disclosed that $4,534 should have been shared with Houston for the years 1975 - 1978. Under the previous law, Revenue would have simply adjusted future payments to the overpaid municipality. However, since that law was repealed and a substantial amount of time has elapsed, a supplemental appropriation is requested.

Please add a new section to HB 336 to read as follows:

> The sum of $4,534 is appropriated from the general fund to the Department of Revenue for the purpose of paying shared taxes owed to the City of Houston for the years 1975 - 1978.

Sincerely,

Dr. Ronald D. Lehr
Director

MEMORANDUM State of Alaska

TO: Ronald D. Lehr, Director
Division of Budget and Management
Office of the Governor

DATE: March 20, 1981

FILE NO: S080413

TELEPHONE NO: 465-2300

FROM: Thomas K. Williams Joseph Dondero for
Commissioner of Revenue

SUBJECT: Supplemental Appropriation Request

At the time the legislature created the Municipal Assistance Fund (AS 43.20.016), the City of Houston had not been receiving shared taxes under the previous gross receipts tax law (AS 43.70.080). This was due to the businesses within the Houston city limits reporting taxes to be shared to another Municipality. The City of Houston requested an audit in FY 81 which disclosed that $4,534 should have been shared with Houston for the years 1975-1978.

Under the sharing provisions of the previous law (AS 43.70.080), our practice was to adjust future payments to the overpaid municipality. However, since the law was repealed, we are requesting supplemental funds to reimburse Houston, and since there is no appropriation available we propose that no adjustment be made against the overpaid municipality.

FROM: Eric P. Yould EPY
Executive Director
Alaska Power Authority

SUBJECT: Takatz Study

The Power Authority requests that $50,000 in funding for the Takatz Study be requested for supplemental FY 81 funding if it can be accomplished in this Legislative session. If not, please reinstate funding for the study in FY 82. The City of Sitka strongly desires to accomplish preliminary analysis of the future power needs beyond Green Lake, and to identify if Takatz is the best project to satisfy those needs. The project development process is very time consuming, and it would require at least 5 to 6 years from completion of this initial study before the project would be completed. Your timely consideration of this request would be appreciated.

Juneau, Alaska 99811

Dear Mr. Chairman:

Enclosed is documentation regarding the necessity for covering legal expenses on behalf of applicants and investees in FY 80. Although the attachments explain the predicament in detail, the essence may be summarized as follows:

The 1980 Legislature, through FCCSHB 1023 (CH 93 SLA80), transferred $5.6 million from the ARRC FY 80 Capital Appropriation (CH 80, SLA 1979) to the Forest Products Producers Assistance Fund ($5.2) and Commercial Fish Processors Assistance Fund ($.4).

RESULT: Legal expenses incurred on behalf of clients for TECHNICAL SERVICES (AS 37.12.115) could not be paid to provider because the Capital Account had been depleted by the above action.

REQUIREMENT: The sum of $21,547 be appropriated from the general fund to pay the prior year (FY 80) obligation.

Again, I want to thank you for your interest in this matter and appreciate your efforts to see that the our obligations are appropriately met.

Sincerely,

William E. Spear
Chairman

MEMORANDUM State of Alaska

TO: Hon. T.K. Williams, Commissioner
Department of Revenue

DATE: December 29, 1980

FILE NO: (Rev.) 4768/4767

ATTN: Norene Hirsh, Fiscal Officer
Division of Admin. Services

TELEPHONE NO: 465-3666

FROM: WILSON L. CONDON
ATTORNEY GENERAL

SUBJECT: Payment of Perkins, Coie bill to ARRC

By:
Rodger W. Pegues
Assistant Attorney General

This responds to your request for advice on this matter.

There is no question that the billing for technical assistance was payable out of the appropriation to ARRC for capital projects for fiscal year 1980. However, to the extent that it exceeds the amount which was lapsed from that appropriation (or if not lapsed, available to pay it), it can only be paid by a supplemental appropriation to ARRC.

The state law on the subject is quite explicit:

> An indebtedness arising from a prior year for which the appropriation has lapsed shall be paid from the current year's appropriations, if this expenditure does not exceed the balance lapsed . . . .

AS 37.25.010(b). This statute has consistently been applied to mean just what it says: A prior year's bill cannot be paid from a current appropriation unless an amount sufficient to have paid it was left over from the prior year's appropriation. The purpose of the statute, to prevent agencies from incurring obligations in any year in excess of their appropriations for that year, can only be achieved by applying the statute in precisely this way, and Director of Finance Mullin informs us that it has always been so applied.

Accordingly, if -- as it appears -- there was an over-expenditure and no way to reallocate money in the appropriation for fiscal year 1980 to cover it, the Perkins Coie billing cannot be paid from the appropriation for fiscal year 1981.

Re: Amendment to H.B.336
Department of Commerce
& Economic Development
Supplemental request for
$1,661,100 general funds
for the Energy Audits and
Refunds and Grants.

Dear Representative Cotten:

Please amend H.B.336 to appropriate $1,661,100 in general funds to the Department of Commerce & Economic Development for the Energy Audits and Energy Grants and Refunds programs. This appropriation adjustment is necessary because program funds have been depleted and demand for the program continues at an extremely high level.

This supplemental appropriation will fund about 3500 audits for the period from April 1 to June 30, 1981.

Please add a new section to H.B.336 to read as follows:

> The sum of $1,661,100 is appropriated from the general fund to the Department of Commerce & Economic Development for the energy audits program under AS.46.11.030 and energy refunds and grants under AS.45.89.020.

Sincerely,

Ron Lehr

SUBJECT: Request for $1,621.1 Supplemental Funds for the Residential Energy Conservation Program

From: Clarissa Quinlan, Director
Division of Energy and Power Development
Department of Commerce and Economic Development

BACKGROUND

The Residential Energy Audit Program was mandated by the 1980 Legislature in SB 438. The legislation was quite comprehensive and provided for a great many new and innovative programs in the energy field. A new program providing for the subsidized performance of residential energy audits by State trained and certified auditors was a part of Legislation. Additionally grants or refunds were to be made available to homeowners for up to $300 for single-family residences and $200 for each multi-family residence for those energy conservation measures having a seven year pay back or less as substantiated by a residential energy audit.

There were numerous problems in implementing the three interrelated phases of this program. The program was completely implemented by December 1, 1980. Prior to that in October the program was initiated with provisional procedures in those communities where commercial energy audits were already available. The Division, in the original fiscal note accompanying the Bill, had projected that approximately $1.28 million would be required to subsidize approximately 10,000 audits at a cost of $128 per audit.

It was found, when we began actual implementation of the program, that the costs of the audits have justifiably varied from community to community with $128 being the lowest cost. In order for the higher cost (rural) areas of Alaska to participate in this statewide program, less than 10,000 audits could be accomplished.

Demand for paricipation in the State sponsored energy auditor training has been overwhelming. Classes in the urban centers were filled within one day after open registration and waiting lists have been long. The Division was also recruiting and training instructors as well as establishing new curricula for Residential Energy Auditing course work. The public's response to this program has far exceeded the financial resource allocations in the original legislation.

Since the implementation of the program and with only four months remaining in FY 81, we will have expended $1.0 million in contracts (either completed or in process) and obligated the remaining balance by the end of March for the performance of approximately 7,700 audits.

A new occupation has been developed through this program and many individuals have been provided with employment since December, 1980. The Division has been inundated with calls demanding energy audit training and requesting information about residential energy audit contracting procedures. The existing contractors are approximately three to four weeks backlogged with requests from residents for energy audits. The demand for more State auditors is clearly present.

At this time, the program has momentum, good public acceptance and high participation from the audit contractors and the general public. It would be detrimental to the program to be forced to terminate the training and contracting due to lack of funds, especially since the contractors in all except some very rural areas will have performed the maximum allowed under their contracts on or before March 31, 1981. Without supplemental funding the energy audit program will be in limbo until FY 82 funding becomes available in July 1981.

BENEFIT GAINED BY CONTINUED OPERATION

1. Energy audits alone can (if stated energy conservation "practices" shown in the energy audit are implemented) save the average homeowner approximately 25% in annual energy costs. The 25% savings is verified by the Department of Energy in their brochure entitled "Low Cost No Cost". They state that:

   > By following all the suggestions, or whichever ones apply to you, we think you can save 25% of your fuel oil, gas and electricity bills. At current energy prices, these suggestions will put from $100 to $500 a year back into your pocket in a typical home ... Due to higher fuel costs this year, your energy bill will probably go up--however, if you follow low cost/no cost your bill could be reduced by 25%. Savings in this brochure are based on costs of 5¢ per kwh for electricity, 37¢ per therm for gas and 80¢ per gallon for oil. If your costs are higher your savings will be too.

2. A homeowner's "awareness" of possible energy conservation practices and measures is considerably heightened and a great deal of energy education occurs during the course of the home audit.

3. Newly obtained employment will be continued.

4. Energy conservation measures will continue to be installed in homes statewide thus saving the individual homeowner dollars expended for energy often decreasing the use of fossil fuel.

Due to the above, we request the supplemental appropriation in order to maintain continued operation of this highly valuable energy conservation program. Supplemental request is based on inclusion of staffing requested in previously submitted revised program request.

Are you using too much fuel to heat your home?

Home Energy Audits are now available in the Nome area.

Having your home checked out can mean:

1. That you can find out where your house is losing heat and ways to cut your fuel consumption;
2. That you may be eligible for up to $300.00 in grants from the State of Alaska to make repairs, insulate and cut heat loss;
3. That you may be eligible to borrow up to $5000. at 5% interest from the State to make major weatherization repairs on your home.

For more information contact Frank DICostanzo, State certified home energy auditor at 2739.

Energy Audits Funds Low

ANCHORAGE (AP) — The $1.2 million appropriated by the 1980 Legislature for residential energy audits in fiscal 1981 will be obligated by mid-March, the Division of Energy and Power Development says.

Director Clarissa Quinlan said during the last eight weeks alone the division has contracted for some 6,300 residential energy audits at a cost of $1 million.

The program provides for state-financed energy audits of homes, with grants, refunds and low-interest loans available for energy conservation measures recommended by the audits.

Gov. Jay Hammond has asked the Legislature to continue the program at a similar level of funding for fiscal 1982.

Popular state energy audits draw huge response from homeowners

By JEANNE ABBOTT
Daily News homes editor

The biggest bargain in town has homeowners beating a path to the doors of a new collection of businesses called energy auditors.

For only $10, a homeowner (or renter) can have his home analyzed for energy efficiency. Although the audit costs an average of $125 to perform, the state picks up most of the cost. Most auditors are swamped with requests for the service.

"We've had an overwhelming response," says Dana Hedden of Heat Loss Analysis, one of 20 firms in Anchorage certified to perform the state-subsidized audits. "There are more requests for audits than money allocated for them."

The legislature appropriated 1.2 million for the residential audits for fiscal year 1981. According to Steve Vaden of the Alaska Energy and Power Development office, the money for the audits has already been contracted out.

"When the auditors complete their contract, we won't be able to renew unless the legislature appropriates more money," Vaden said this week.

"But because we've committed the money doesn't mean a homeowner can't get an audit. If the quota hasn't been filled, an auditor can provide the service until his money runs out."

> The grants are going faster than the loans, because it's upfront money.

Based on the strong response, it is expected that most quotas will be filled by mid-March. The audits only began eight weeks ago.

Says Vaden: "Some contracts will run out faster than others."

When a homeowner or renter calls a company to request an audit, the appointment will generally be arranged for a two-to-three hour period.

During the appointment, an auditor will make an on-site inspection of the heating system, insulation, caulking and weatherstripping plus looking at the history of energy bills.

Vaden says all of the auditors were trained in November and passed an examination to be certified.

"An auditor will write up a report indicating how much energy a home is losing, and what can be done to improve the situation," he says.

The state legislature also appropriated money for outright grants and loans to undertake measures recommended by the audit.

Some $2.2 million was allocated for the grants which provide $300 per housing unit ($200 for a duplex) to fund the simpler measures — insulation, caulking, weatherstripping.

For major projects, like heat conversion, there are loans of up to $5,000 available at low interest. The loans are administered through the state Division of Business Loans. They are part of a $1.6 million program.

Vaden said 79 grants had been awarded through the energy office, and 42 of those were dedicated in January. The total amount awarded is $22,000.

"The grants are going faster than the loans, because it's upfront money," says Vaden. With the grants, an audit must show that the money can be recouped in energy savings within seven years.

"Out of the $22,000 we can already project a $16,800 savings within the first year alone," he says. "That's pretty encouraging."

There are a total of 68 auditors certified statewide in Anchorage, Fairbanks, the Mat-Su Valley, Kodiak, Kenai, Juneau and Ketchikan. Training programs are yet to be held in Valdez, Bethel and Barrow.

Vaden said Gov. Jay Hammond has asked the legislature to continue the program, with an 8 percent increase in funding.

Numbers to call for an audit are:

- Alaska Energy Audits — 277-9342.
- Alaska Home Evaluators — 276-9254.
- Anchorage Community Development Corp. — 276-1625.
- Garnet-Adams — 349-4729.

State takes conservation lead with residential energy au

By Empire Staff

Alaska took the lead in residential energy conservation last spring when the Legislature created a comprehensive energy act.

Part of the legislation provides for state-financed energy audits of residences with grants-rebates and low-interest loans available to the homeowner who wants to implement the improvements recommended by the audit. There is no obligation to make any of the improvements suggested by the audit.

For $10 a resident can have his home inspected by a specially contracted auditor—not a state employee—to find out where heat losses are occuring and receive recommendations on how to make the home more energy efficient.

The two to three hour audit costs about $128, but the state pays for all by $10 of the audit.

People interested in having an energy audit of their home should contact Steve Shannon, an energy specialist with the Division of Energy and Power Development at 465-2591 or write to him at Pouch "D", Juneau, Alaska 99811.

An auditor will make a variety of recommendations ranging from no-cost energy-saving projects a homeowner can do himself to massive undertakings such as installing insu

MEMORANDUM

TO: Dian Bergstran

FROM: Cooper Geraty

RE: Mathew; Legislative Refund

DATE: March 3, 1981

The rationale for refunding the money paid to ASHA by class members is quite simple:

(a) Class members contracted with ASHA for a safe, sanitary, habitable house. They did not receive the benefit of their bargains. They were forced to live in substandard housing and had major out-of-pocket costs (especially extremely high heating bills due to substandard insulation, materials, design, and construction);

(b) Refunding the money is good public policy. A refund will encourage these residents and other residents of government-subsidized housing to pay their bills. If no refund is provided, then those persons who did not make their payments will be rewarded, and those persons who did make their payments will be penalized;

(c) Class members will receive new mutual-help housing pursuant to the companion case, Erik v. HUD. However, the class members will have to pay for the new houses. In addition, due to inflation the new houses will be very much more expensive than the old ASHA houses. (Note: In making this argument remember that no person will have to pay more than approximately 25% of their income in house payments.)

(d) Finally, a repayment will restore the State's proper reputation for dealing ethically, morally, and justly with its Bush residents.

CG/csn

Natives win another round in court battle over homes

Continued from Page A-1

ago in federal court claimed hundreds of remote homes financed by HUD and built by ASHA in 1969 and 1970 were defective and substandard. About $2 million was spent on the homes in 18 villages.

Hastily constructed homes built during the life of the program almost immediately began developing problems including leaking roofs, inadequate plumbing and poor insulation.

"It was not a successful program," Curtis said Wednesday.

The construction program — called the Bartlett program after former Sen. Bob Bartlett, who led the drive for funding, originally envisioned 10 years of assistance to Native Alaskans to upgrade homes. The program, however, was dropped after two years.

A federal court judge in 1978 dismissed the case against ASHA but lawyers refiled the lawsuit against the state agency in state court. ASHA has consistently denied the allegations in the suit.

Under the terms of last week's federal court settlement, HUD agreed to begin a three-year, $31 million program to build or repair 347 homes.

The settlement of the state court suit against ASHA pledges ASHA to cancel all the debts incurred by the Natives in buying the houses and to turn over title to the homes.

In return, the Natives represented in the suit agree to waive all legal claims arising from the housing program.

The settlement also permits Alaska Legal Services lawyers to ask the state legislature to give back the money Natives have already paid on the homes.

See Back Page NATIVES

journey that began in federal court in 1976.

Representatives of both sides were pleased with the agreement.

"We think it is a just settlement," said Cooper Gerety, a legal services lawyer.

ASHA director John Curtis said the settlement, which follows the U.S. Department of Housing and Urban Development's pledge last week to pay $31 million to replace or refurbish the homes, is good for the state.

"Our interest is in providing housing in the state. If HUD decided it's a good idea to build $30 million worth of homes in the Bush, that's the business HUD is in. We see it as a good thing for Alaska," Curtis said.

The lawsuit filed five years

PUBLIC INFORMATION

Many people in Alaska and throughout the nation do not know what renewable energy is, what it can do, or where to find information, equipment or contractors. This lack of knowledge is not confined to consumers. Builders, construction people and utilities are all important to the use of renewable energy but are often poorly informed about it.

Consumers need information on available energy options, and industry people need training.

Educating consumers requires public relations as well as information. Public relations makes people aware of possibilities. It can get them thinking about technologies and let them know what subsidies, loan funds and technical assistance are available. The best-designed incentives will be useless if people are unaware of them, a fact that many state incentive programs have not taken into account: incentives have been legislated, and forgotten.

One effective way to promote conservation and renewable energy is through direct mail advertising. The U.S. Department of Energy initiated the Low Cost/No Cost energy conservation program in 1979. DOE mailed a package of information directly to consumers in the Northeast. The response was good and several other states, including Colorado, have initiated similar programs.

People who already are interested in installing renewable energy systems need a place to go for more detailed information. Lists of installers and suppliers, books on design, cost estimates and resource assessments are all needed by the potential user of renewable energy. The Energy Extension Service and the Alaska Western SUN office provide this information.

People who sell, install, finance and insure renewable energy systems need information, too. Much of this can be acquired on the job, but organized educational programs are valuable as well. Educational institutions, unions, industry groups and nonprofit institutions around the country have begun to offer training programs on the installation, servicing and financing of renewable energy systems.

In Alaska, the Residential Energy Conservation Program is training energy auditors, and five Alaskan colleges--Alaska Methodist University and the community colleges of Anchorage, Soldotnua, Nome and Fairbanks--all offer at least one course on renewable energy.

> Option. State schools should be encouraged to provide both general and vocational courses on renewable energy.
>
> Option. Coordination of educational programs offered in the state would help prevent duplication and identify gaps in the types of education available.

Government employees often need to be educated about renewable energy. Administrators of loan programs, tax officials, and building inspectors, for example, all have important roles to play in increasing the use of renewable energy, yet often know too little about renewable energy to give it the

consideration it deserves. Workshops and seminars can help remedy this problem.

The Alaska Energy Center should prove very helpful in providing information about Alaska's energy problems. It is important that the Center coordinate its efforts with those of other research organizations and that it work to disseminate its results. It is also important that the Center spend a sufficient portion of its budget and effort on renewable energy.

State efforts to lower costs, improve consumer protection, and provide more information will stimulate the use of renewable energy systems in the private sector. So will some other measures that the state can take directly: making key changes in state procurement policy, coordinating state efforts with federal programs, and implementing state programs.

STATE PROCUREMENT

The state owns buildings and conducts operations that could benefit from energy conservation and the use of renewable energy sources. State use of renewable energy would lower state energy bills and also demonstrate the feasibility of using renewable energy.

Alaska already requires that new state buildings meet the standards of energy efficiency developed by the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE).

Option. The state could, however, establish more stringent standards, such as the Building Efficiency Performance Standards (BEPS) proposed by DOE, that may be more appropriate to Alaska's climate.

The omnibus energy bill requires that state buildings undergo an energy audit as soon as possible and every seven years thereafter. The results, which should show ways to lower the life-cycle cost of each building, are to be presented to the legislature every year by February 1.

Option. The legislature can reduce state energy bills by each year allocating funds for energy-efficient capital improvements.

Option. The use of life-cycle costing could be extended from buildings to other areas of state procurement (e.g., the purchase of vehicles or major equipment).

Option. Further, the state could purchase biomass fuels such as gasohol, methane, or wood waste products to meet some of its energy needs. This would not only reduce the state's dependence on non-renewable fuels but also help create a market for those products.

COORDINATION WITH FEDERAL PROGRAMS

Many federal energy programs require implementation by the states. Others call for cooperation. To use federal programs to the best advantage, Alaska needs to be well informed about them and alert to the opportunities they present. For example, by providing funds to institutions that lacked the matching funds required by the federal Institutional Buildings Program, Alaska doubled the value of its expenditures by attracting federal dollars on a one-for-one basis.

Option. Alaska could leverage its investments in energy by allocating more matching funds to attract more federal funds.

Option. One way to do this would be to create an ombudsman's office to coordinate state energy efforts with federal programs.

The ombudsman would collect information on all federal programs related to renewable energy, then pass this information along to individuals or groups seeking federal funding for projects or to state agencies charged with implementing federal programs.

The Public Utility Regulatory Policies Act of 1978 (PURPA) is one federal law that requires state implementation and that can have significant impact on the use of renewable energy. PURPA requires state public utility commissions to examine a series of rate structures and other policies to determine if they are appropriate for the utilities of that state. One issue the commissions are to examine: the price at which utilities will buy and sell power from small power producers. (A family that uses a wind turbine with utility power as a backup is, for example, a small power producer.)

Option. The legislature could encourage the Alaska Public Utilities Commission to adopt policies that are favorable to renewable energy sources.

Finally, Alaska needs to make sure that the effectiveness of its energy laws is not diluted by federal laws. An example of such dilution is the federal prohibition of "double benefits" found in the Windfall Profit Tax Act (see page 35).

COMMITTEE REPORT FOR CSHB 455

CSHB 455 amends AS 08.18 by adding two new sections related to the regulation of bidding procedures by contractors. This bill is designed primarily to eliminate the practice of "bid shopping." Currently, general contractors force principal subcontractors to lower the amount originally stated for services, or services and materials, in a bid by bid shopping after the bid is awarded. This results in increased and unwarranted profits for the general contractors, and creates an untenable economic climate for subcontractors.

In order to prevent general contractors from bid shopping, this bill requires that general contractors make contracts with the principal subcontractors before the bid is awarded and that those contracts contain a liquidated damage provision equal to 15 percent of the amount of the principal subcontractor's services, or services and materials, which have been included in the general contractor's bid. If after the bid is awarded the general contractor breaches the contract without cause, the general contractor will be required to pay this fixed amount to the principal subcontractor. By requiring that all contracts with principal subcontractors contain a liquidated damage clause, the amount of profit a general contractor may gain by bid shopping will be offset by the amount of damages that contractor will be required to pay.

CSHB 455 ensures compliance with this contract by providing that a general contractor must file a list of principal subcontractors with the commissioner when the bid is submitted. This will allow the parties, after the award of the contract, to verify whether a principal subcontractor was included in the original bid. This provision does not give the state enforcement powers. Rather, the private parties will be required to enforce their rights under this statute. However, it will provide a mechanism for verification in a subsequent dispute. Furthermore, because a bid is void if the filing is not made, the general contractor will be forced to file with the commissioner and to enter into contracts with the principal subcontractors before the award of the bid.

Because the requirements imposed by AS 08.18.065 and 08.18.067 are self-enforcing, CSHB 455 also makes inapplicable to AS 08.18.065 and 08.18.067 the provision in AS 08.18.161 making a violation of AS 08.18 a misdemeanor. Definitions of the terms "registered contractor" and "principal subcontractor" have also been included in CSHB 455 in order to clarify the applicability of the new requirements.

Re: HB 455 (regulation of contractors)
Our file no. J-77-120-81

Dear Representative Hurlbert:

Attached are a proposed committee substitute for HB 455 and a committee report on it. The proposed committee substitute will correct the constitutional infirmities noted in my April 27, 1981 letter on HB 455, a copy of which is also attached.

The proposed committee substitute for HB 455 requires that registered contractors file with the commissioner a list of all principal subcontractors whose services, or services and materials, are included in the registered contractor's bid. This filing requirement will enable the state to ensure that the registered contractor complies with the other requirements imposed by this version of the bill.

The constitutional problems noted in regard to HB 455 have been corrected in the proposed committee substitute by requiring that registered contractors have contracts with the principal subcontractors before the bid is awarded. Additionally, this proposed committee substitute allows termination of the contract with a principal subcontractor for any reason, but requires that all contracts contain a liquidated damage provision allowing a subcontractor to collect fifteen percent of the amount of that subcontractor's services or services and materials, included in the registered contractor's bid if the registered contractor breaches the contract without cause. This requirement will operate to prevent "bid shopping" because any advantages gained by bid shopping will be offset by the damages which the principal subcontractor will be entitled to under the contract.

03-C5LH

Lastly, the proposed committee substitute establishes that violation of these requirements will not constitute a misdemeanor under AS 08.18.141. Because of the damage provisions in proposed AS 08.18.067, it is unnecessary to further penalize the conduct through the misdemeanor provision, and the uncertainty of a justifible or unjustifible breach of contract, would be unconstitutionally vague.

Sincerely,

WILSON L. CONDON
ATTORNEY GENERAL

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

April 27, 1981

Honorable Vernon L. Hurlbert
Alaska State Legislature
Pouch V, State Capitol
Juneau, AK 99811

Dear Senator Hurlbert:

You have asked this department to comment on the constitutionality of HB 455. This bill requires general contractors to submit the names of all principal subcontractors included in a contract bid. Upon award of the bid to the general contractor, the general contractor may change a principal subcontractor, which was included in the bid, only for cause.

HB 455 raises three constitutional issues which are: (1) whether a general contractor may in light of the right to privacy be required to submit the names of all principal subcontractors in a bid; (2) whether the provision that allows termination only for cause violates the constitutional right to freedom of contract; and (3) whether limiting the bill to cover only general contractors violates the equal protection clause.

The right to privacy guaranteed by Art. I, § 22 of the Alaska Constitution must be balanced against the regulatory interest in requiring disclosure of the information. This bill requires disclosure of the principal subcontractors in order to prevent the general contractor from obtaining a bid, and then pressuring the subcontractors to work for less than the amount included in the bid. Therefore, the regulatory motivation behind this disclosure requirement is to prevent "bid shopping" by general contractors. Because the information sought relates only the business activities of the general contractor, the regulatory interest in requiring disclosure of the names of the principal subcontractors may outweigh the privacy interest of the general contractor in not disclosing the names.

The second constitutional issue raises far more serious questions. The fourteenth amendment of the U. S. Constitution and Art. I, § 7 of the Alaska Constitution guarantee the rights of liberty and property. The right to freely contract may be impinged upon only when there is a legitimate state interest. For example, contracts against public policy may be forbidden by law because there is a legitimate police power interest in prohibiting persons from entering into these type of contracts. However, in this instance the bill requires that the general contractor enter into contracts with principal subcontractors which can be terminated only for cause upon award of the bid. The requirement severely limits a general contractor's right to choose which subcontractors to contract with and what kind of contracts to make with those subcontractors. In Opinion of the Justices, 108 N.E. 807, (Mass 1915), the question of whether a statute may impose a requirement that an employee of a railroad corporation be given a full hearing before discharge was discussed. In holding that that statute constituted an unwarranted infringement upon the right to contract, the Justices focused on the employer's basic right to discharge employees. However, the Justices did state that the requirement of hearing before discharge could be imposed upon civil service employers. Similarly we think that the contractual restrictions contemplated by HB 455 could be imposed in connection with bids for state contracts. The imposition of the requirement that the general contractor execute a contract, only terminable for cause, with all principal subcontractors included in the bid violates the constitutional right to freedom of contract.

The third constitutional issue raised by HB 455 involves the equal protection clause of the constitution. Art. 1, § 1 of the Alska Constitution and the fourteenth amendment of the U.S. Constitution guarantee equal treatment under law for all persons. However, a regulatory statute may pertain only to one group of persons provided that there is a resonable basis for the classification. The application of the requirements of HB 455 only to general contractors in the State meets the rational basis test under Art. I, § 1 of the Alaska Constitution and the Fourteenth Amendemnt of the U.S. Constitution.

Therefore, we conclude that the only significant constitutional problem with HB 455 is the limitation it imposes upon a general contractor's right to freely contract. On this basis we think HB 455 is unconstitutional.

Sincerely,

WILSON L. CONDON
ATTORNEY GENERAL

HOUSE BILL NO. 455

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the regulation of contractors."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.18.141 is ~~amended to read:~~

~~Sec. 08.18.141. MISDEMEANOR. A person~~ who violates ~~[ACTING IN THE CAPACITY OF A CONTRACTOR IN VIOLATION OF] this chapter is guilty of a misdemeanor.~~

* Sec. 2. AS 08.18 is amended by adding a new section to article 4 to read:

Sec. 08.18.155. SUBCONTRACTORS TO BE NAMED IN A BID. When submitting a bid for a contract, including a bid for a state contract, a general contractor shall name each principal subcontractor he intends to use in performing the contract. After a contract is awarded, a general contractor may change a principal subcontractor named in the bid only for cause. For purposes of this section "principal subcontractor" means a specialty contractor who, in the performance of a contract awarded to the general contractor, supplies materials and services with a value equal to at least five percent of the total value of the contract.

FROM: Representative Vern Hurlbert, Chairman
House Labor and Commerce Committee

The House Labor and Commerce Committee just passed HB 509 relating to analysis of employment and unemployment in the state; and providing for an effective date.

I would appreciate a hearing as soon as possible on this bill and would suggest your committee give the bill a fiscal review as the job can probably be accomplished with a smaller fiscal impact. Also, I might suggest that the household survey be done by local entities and not the state.

Thank you.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Assumes an effective date of July 1, 1981.
2. Personal Services based on current salary schedule, with allowance of vacancy factor in FY '82.
3. Travel, Contractual Services, Commodities and Equipment are based on cost per position with the exception of Data Processing cost of $130,000 which is based on an estimate for a Time Sharing operation and a contract of $494,000 to do the survey.
4. Assumes an annual inflation factor of 8% for all line items.
5. To meet the requirements of this legislation, funding for the following information components is requested:

REGIONAL ECONOMIC FORECAST BY INDUSTRY $222,778 (FY '82)

The large geographic size of Alaska makes it probable that some regions could have severe shortages of workers while other areas lack economic activity. For the past three years the Research and Analysis Section has developed and improved the employment data base for

IV. DATE May 1, 1981 PREPARED BY Nico Bus, Finance Officer
AGENCY Labor

cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/80)

six regions of the state. This permitted more accurate sub-state regional estimates of employment by industry, labor force and unemployment. Both published and nondisclosable (due to confidentiality restrictions of Alaska's Unemployment Insurance Law) data are contained in this data base.

This component would provide staff to analyze and forecast employment, labor force, and unemployment information for the six regions of the State. With computer assistance, staff would determine the trend and level of economic activity by industry and enable the operation of an industry/occupation matrix to provide occupational forecasts by industry for the six regions.

Purchases: Labor Economist III, 2 Labor Economists II's, Clerical & Data Processing Services

EXPANDED OCCUPATIONAL EMPLOYMENT STATISTICS $91,809 (FY '82)

For much of the past decade Research and Analysis has estimated and projected employment (staffing levels) by occupation. Occupational data from an employer survey is merged with the employment forecast by industry to prepare forecasts of occupational employment.

This component would provide staff to provide occupational forecasts by industry for the six regions of Alaska. Industrial detail used would be expanded to provide for more accurate estimates. For example, more detail in the mining industry, would isolate coal and hard rock mining from oil and gas extraction. This would permit more accurate forecasts of the occupations involved if those sub-industries grew at different rates.

Purchases: 1 Labor Economist II, Data Processing and Clerical Services

HOUSEHOLD SURVEY $617,715 (FY '82)

Each year a statistically valid sample of Alaskan households would be surveyed to determine labor force and demographic status, length of residency, occupation, and skill level. Several survey items would be valid at the regional level, while more complex interrelationships between variables would be studied on a statewide basis only. Future legislative and agency requirements could be added onto this survey for an incremental cost which would be lower than multiple surveys.

Purchases: 1 Labor Economist III, 1 Labor Economist II, Data Processing & Clerical Services and Contractual Survey Cost of $494,000

ANALYSIS OF UI AND ES DATA BASES $41,637 (FY '82)

In the first year of the legislation only, the agency proposes a small increment to analyze how best to utilize the Unemployment Insurance (UI) and Employment Service (ES) data bases for dynamic indicators of unemployment and employee turnover. Potentially, these two data bases could give insight into the mobility and labor force attachment of Alaska's population. Both cross sectional (one point in time) and longitudinal (between different time periods) analysis is feasible. However, some of this analysis has only been done in a few states and the uniqueness of each state's unemployment insurance data base makes it appropriate to limit the study to determining feasible methodologies in the first year.

Purchases: 0.5 Labor Economist III, Clerical and Data Processing Support

MIGRATION STUDY $78,312 (FY '82)

Any analysis of Alaska's labor force supply would be inadequate without considering the impact of migration (both inmigration and outmigration). Migration flows are triggered both by push (lack of available opportunities in the area from which migration emanates) and pull (more lucrative opportunities in the area which receives the migration) factors. Interstate analysis of the factors which correlate with migration would be necessary (for example, construction employment in other western states). Modeling the migration component would give insight into the appropriate timing of large capital projects.

Purchases: 1 Labor Ecomonist II and Clerical and Data Processing Support

These components are interrelated with each other and with other information systems within our Research and Analysis unit. Integration of this complete information system would provide an excellent framework for Alaska's policymakers to determine both the needs of their constituents and the impact of proposed solutions. The output from these components would be prepared annually to meet the continuing information needs of legislative and other governmental officials at local and state levels and for Alaska's businesses and industries both existing and those starting again or expanding in Alaska.

This position is required for the preparation of regional employment forecasts consistent with the needs of the occupational employment estimates program structure. These forecasts must be by detailed industry category information for an occupational matrix used to generate detailed estimates of occupational demand. This Labor Economist must regionalize the employment estimates so that detailed occupational demand figures for six regions are available for the matrix. The estimates of regional employment growth must be consistent with statewide totals of industry growth which will require that the development of closely coordinated employment projections.

In order to produce detailed and reliable forecasts extensive and continuing analyses of the labor market areas will be required. Research into historical data, current trends and econometric techniques will be an integral part of the positions work.

This position will be stationed in Juneau and will be responsible for forecasts of the Alaska Southeast region.

The average non-personal services costs for the Labor Market Information program are indicated the major costs, in the contractual area are rent, indirect, and printing.

This position assists in the development and dissemination of information obtained from the statewide household survey relating to employment status and job skills of the Alaskan working age population. Primary responsibility would involve assistance in tabulating and analyzing survey data and preparation of publications. This labor economist would respond to information requests and may assist a Labor Economist III in coordinating the statewide survey.

This position would expedite intra office exchange of labor force characteristic data so that all programs in the jobs information system have quick access to the data.

The average non-personal services costs for the Labor Market Information Program are included. The major costs in the contractual area are rent, indirect and printing.

This position's primary function is to develop occupational demand estimates for sub-state regions. The existing occupational information program (which has been in place and operating for almost a decade) provides detailed occupational estimates for the state as a whole and the Anchorage and Fairbanks labor market areas. The services of a Labor Economist II is required in order to develop occupational estimates and projections for additional geographic areas. These smaller regions (in terms of employment) present major problems and work elements with regard to methodology development, production of estimates, continual monitoring and measuring of estimating accuracy and development of revised estimating proceedures. This information and services provided through the efforts of this position is crucial to effective regional manpower planning.

The average non-personal services costs for the Labor Market Information Program are included. The major costs in the contractual area are rent, indirect and printing.

This position is responsible for overseeing the development maintenance and utilization of econometric modeling systems and techniques used in production of employment projections by industry and region. This position will hire, train and direct the work of two to three professional staff members. In conjunction with subordinate staff, this position will provide for collection and analysis of current economic development information and maintenance of a data base used in the production of statewide and regional employment forecasts. These forecasts are a prerequisite to development of regional occupational forecasts. Thus, analysis of the effect various policy options would have on the state's labor force is contingent and successful development of this informational component.

The average non-personal services costs for the Labor Market Information Program are included. The major costs in the contractual area are rent, indirect, and printing.

This position will be responsible for coordination of a statewide household survey program which will generate data on the employment status and job skills of the Alaskan working age population. Data will be generated for six Alaskan regions with analysis and tabulations of current industry of attachment, level of education, occupational skills, and employment status. This data would be an integral part of the Alaska Jobs Information Bank.

This labor economist would be responsible for contracting and coordinating with surveyors, assuring the reliability and accuracy of survey data, consolidation and analysis of data and the dissemination of this occupational supply information component of the jobs information program.

Supervision of reports preparation from the tabulated data and analysis would be a prime responsibility of this position.

The average non-personal services costs for the Labor Market Information Program are included. The major costs in the contractual area are rent, indirect and printing.

ATTN: House Representative Hurlbert

SUBJECT: House Bill #518

Dear Mr. Hurlbert:

The following comments are submitted for your consideration regarding House Bill #518.

Contracts are normally written to allow 30 to 45 days from submission of a pay request to payment. The same limitations should apply to interest. Interest should not accrue until a minimum of thirty (30) days after submission or until payment is due.

Chapter 90, SEC 36.90.001 b. should be revised to read: Interest accrues thirty (30) days after the date of approval of a pay estimate until the date of payment to the contractor or application toward the obligation of the contrac[illegible] under the contract.

Your consideration is appreciated.

Sincerely,

Stan Thompson

IV. DATE 5/6/81 PREPARED BY Ron Lind
AGENCY DOTPF
PHONE 465-3900

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

The change made in this bill is supposed to make it so interest is required only on retainage and not on regular payments. It appears that AS 36.90.001(b) should be changed to clarify that interest is required only on retainage by adding the words "on retainage" between "accrues" and "from".

If interest is required on all payments, the cost would have been approximately $1.9 million, including four positions for calculation of the interest, regionalization of the payment process, and acceleration of the payments. This is based upon a 24 day payment average.

If interest is only required on retainages, the total cost to DOT/PF would be approximately $65,000 per year. Currently the department has approximately $600,000 held in retainage. These amounts are mainly related to older agreements for work by utility firms for the movement of utility lines in conjunction with construction projects. Since we do not have inspectors there during the working period by the utility, we do not have a good method to assure that their billings are correct until audit. We expect to continue to hold retainage on these types of agreements even if we are required to pay interest.

TESTIMONY FOR HB 524

PRESENTED BY DOUGLAS S. BISBEE May 11, 1981

MY NAME IS DOUGLAS BISBEE AND I AM HERE TODAY AS AN EMPLOYEE OF BENEFICIAL FINANCE, AND SPEAKING IN FAVOR OF THIS BILL.

HB 524 EFFECTS ONLY FINANCE COMPANIES LICENSED TO DO BUSINESS IN ALASKA. AT THE PRESENT TIME, THERE ARE TWO SUCH COMPANIES, BENEFICIAL AND HOUSEHOLD FINANCE, WITH BRANCH OFFICES IN FAIRBANKS AND ANCHORAGE. DUE TO INFLATED OPERATING COSTS IN RECENT YEARS, OUR BUSNESS HAS CONTRACTED INSTEAD OF EXPANDED. BENEFICIAL HAS CONSOLIDATED ITS NINE BRANCHES SERVING SEVERAL COMMUNITIES TO, TWO. THIS BILL WOULD HELP THAT PROBLEM AND INSURE THAT MONEY IS AVAILABLE TO NEEDY BORROWERS OF SMALL AMOUNTS BY ADDING SUBSECTION (D) TO 06.20.230 WHICH DOES THE FOLLOWING:

1. INDEXES THE ~~BRACKED~~ Bracketed AMOUNTS (PRESENTLY 500-1000) TO THE ANCHORAGE COST PRICE INDEX IN INCREMENTS OF 10%.

2. DOES NOT CHANGE EXISTING RATE AND ELIMINATES THE NEED FOR LEGISLATURE TO CONSIDER FUTURE RATE INCREASES.

3. PROVIDES FOR THE DEPARTMENT OF BANKING TO REVIEW THE CPI AT THE END OF EACH YEAR, EVALUATE THE CHANGES AND NOTIFY LICENSEES OF CHANGES.

SEC 3 OF THE BILL ALLOWS FOR THE COLLECTION OF A LATE OR DEFAULT CHARGE ON A LATE PAYMENT. FINANCE COMPANIES ARE THE ONLY LENDERS IN ALASKA NOT ALLOWED THIS FEE WHICH COMPENSATES FOR THE ADDITIONAL WORK REQUIRED TO COLLECT THE PAYMENT.

YOUR FAVORABLE CONSIDERATION IS REQUESTED

H 60 (Rev. 3/81)

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y · STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

MEMORANDUM May 7, 1981

SUBJECT: CSHB 526 (Labor and Commerce)

TO: Representative Vernon L. Hurlbert

FROM: John B. Chenoweth
Legislative Counsel

I have limited operation of the exemption in AS 10.25.540(b) to an exemption from the state's income tax (AS 43.20) and municipal property tax (AS 29.53.010 - 29.53.410). The state levies a property tax only on certain oil company property under AS 43.56, while municipalities are precluded from levying income taxes by AS 43.20.290. I have no idea what the current "excise tax" exemption reference is to and, because it is unclear, I have deleted it.

The original bill generally repealed taxes and probably did not present a "single-subject" violation problem under Article II, section 13. Given the changes you are making to the telephone and electrical cooperative tax, it is not certain that this committee substitute is not in violation of the single-subject rule. Indeed, given the committee's proposed action on the bill, you are advised to divide into separate legislation the provisions the changes with respect to both taxes in order to avoid a single-subject argument.

There was a notation on the bottom of the page of marked copy suggesting that this legislation was to have a retroactive effect, and I have so drafted this committee substitute.

Dear Mr. Hurlbert:

Re: House Bill No. 526

House Bill No. 526, an Act repealing the electric and telephone cooperative tax and the coin-operated amusement and gaming devices tax, was introduced in the House on April 24, 1981 and was referred to the House Labor and Commerce and Finance Committees.

For the consideration of the House Labor and Commerce Committee, I am enclosing copies of Fiscal Notes prepared by Mr. Gary L. Jenkins, Director, Audit Division; Mr. Phillip A. Wall, Director, Administrative Services Division and Mr. Bill Yankee, Research Section of the Department of Revenue concerning the proposed legislation.

Sincerely,

R. D. Stevenson

The organizations affected by this bill would no longer be required to file a return under AS 10.25, however, they would be required to file a copy of their Forms 990 & 990 T, which they are required to file with the Internal Revenue Service. Thus, the number of returns which would be processed by this division will remain unchanged.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The administrative effect of repeal of the Electric/Telephone Cooperative Tax is about 17 man hours per year (for $200 per year). These hours are used by four different employees in performing the mail-out, posting, research, balancing, voucher preparation, filing, and warrant mail-out associated with the annual sharing from this program.

The administrative effect of repeal of the Coin-operated and Amusement and Gaming Device Tax is about 50 man hours per year (for $545 per year). These hours are used by four different employees in performing the functions described above which are required for the semi-annual sharing of receipts from this program.

There is no meaningful reduction in administrative costs assigned with repeal.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The FY 82 figure of $50 thousand is for approximately one half of the year's estimated collections for the amusement and gaming devices tax. Subsequent years show an approximate revenue loss of $100 thousand per year due to a repeal of AS 43.35.

It is assumed that the 1981 tax levied due to AS 10.25 will still be payable in early 1982 and therefore, no relief from the telephone and electric co-op tax would be evident until FY 1983.

3 AAC 64.010. LEASING REQUIREMENTS. (a) Common or contract carriers may lease vehicles, but may not lease any vehicle to any person other than another common or contract carrier and, except for vehicles exchanged between authorized motor carriers in interchange service as provided in sec. 15 of this chapter, authorized carriers may perform transportation with vehicles which they do not own only under the conditions set out in this section. The lease for the use of a vehicle

(1) must be made between the carrier and the owner of the vehicle;

(2) must be in writing and signed by the carrier and the owner of the vehicle, or by their regular employees or agents authorized to act for them in the execution of leases;

(3) must specify the period of time for which it applies, which may not be less than 30 days; however, this subparagraph does not apply to vehicle lease agreements between permit holders;

(4) must provide that the lessee have exclusive possession, control, use and complete responsibility for the vehicle and its operation for the duration of the lease, except that,

(A) provision may be made in the lease for considering the lessee as the owner for the purpose of subleasing under this section to other authorized carriers for the duration of the lease;

(B) when entered into by carriers of household goods, for the transportation of household goods, as defined by the Interstate Commerce Commission, the provisions of (A) of this subsection need only apply during the period the vehicle is operated by or for the authorized carrier;

(5) must specify the compensation to be paid by the lessee for the rental of the leased vehicle;

(6) must specify the time and date upon which the possession and control of the vehicle will be taken by the lessee, the conditions upon which the lease begins, the time or the conditions upon which the possession of the vehicle will be returned to the lessor and the conditions upon which the lease otherwise expires; the duration of the lease shall coincide with the time of giving receipts for the vehicle as required by (b) of this section;

(7) must be executed in quadruplicate; the original must be retained by the carrier in whose service the vehicle is to be operated, one copy shall be retained by the owner of the vehicle, one copy must be filed with the commission within seven days of the effective date of the lease, and one copy must be carried on the vehicle specified in the lease during the entire period of the lease; provided that the carrier or its regular employee or agent may prepare a statement certifying that the vehicle is being operated under the terms of a written lease filed with the commission, which certificate must contain the names of the lessor and lessee, a complete description of the vehicle, the effective date and duration of the lease, any restrictions

(a) Connecting Carriers Considered As Owners. An authorized carrier receiving a vehicle in connection with a through movement under this section is considered the owner of the vehicle for the purpose of leasing the vehicle to other authorized carriers in furtherance of the movement to the destination or of the return of the vehicle after the movement is completed. (Eff. 9/26/76, Reg. 59)

Authority: AS 42.10.230

3 AAC 64.130. EXEMPTIONS TO LEASING REQUIREMENTS. The provisions of secs. 10--120 of this chapter do not apply to the bona fide lease or rental of a vehicle:

(1) by an equipment rental or leasing company to a common, contract, or private carrier where the driver or operator of the leased vehicle is not provided, procured or arranged for, directly or indirectly or by course of dealing, by the leasing company. A vehicle lease under the provisions of this section shall be in compliance with the requirements of secs. 260--290 and secs. 490--500 of this chapter; or

(2) by a construction contractor to another construction contractor when the vehicle is leased for the purpose of transporting construction materials by the lessee in construction work being performed by the lessee. This exemption applies only to vehicles acquired by the lessor as necessary to his performance of previous construction work and which the lessor leases only on occasion to use in performance of contracts secured within the

OF THE ALASKA TRANSPORTATION COMMISSION Exhibit 1

Notice is hereby given that the Alaska Transportation Commission, under the authority vested in AS 42.07.141(a) and (b) proposes to amend regulations in Title 3 of the Alaska Administrative Code to implement AS 42.07.121, AS 42.10.070, AS 42.10.080 and AS 42.10.010 as follows:

---

3 AAC 64.070 is amended as follows:

Compensation. The amount of compensation to be paid by the authorized carrier for equipment must be clearly stated in the lease and may be expressed as a percentage of gross revenue, a flat rate per mile, a variable rate depending on the direction traveled or the type of commodity transported or by any other method of compensation mutually agreed upon by the parties to the lease. The compensation stated in the lease applies only to equipment and not to the driver's service unless otherwise ordered by the Commission.

(Adopted by Dan Quist)

Notice is also given that any person interested may present oral or written statements or arguments relevant to the action proposed at a hearing to be held in the Grand Jury Second Floor Room of the Alaska State Court Building, Fairbanks, Alaska, 3:00 p.m. on Thursday, January, 24, 1980.

The Alaska Transportation Commission, upon its own motion or at the instance of any interested person, may at the hearing or after it adopt the above proposals substantially as set out above without further notice.

DATED at ANCHORAGE, ALASKA, this 18th day of December, 1979.

Page 1, lines 6 - 7:

Delete "permits for overweight and oversize vehicles"

Insert "motor vehicles and carriers"

Page 1, after line 8:

Insert the following new material:

* Section 1. AS 42.07 is amended by adding a new section to read:

Sec. 42.07.123. OWNER OPERATORS. The commission shall supervise and regulate owner operators in the state and shall prescribe regulations concerning the filing of reports by owner operators, the issuance of permits to owner operators based on public convenience and necessity, and the maximum and minimum rates that may be charged by owner operators. In this section "owner operator" means a person who rents, leases, or otherwise provides a motor vehicle for the use of others in transporting passengers or property upon the condition that the person be employed to operate the vehicle and includes common and contract carriers and construction contractor operators but does not include taxicabs.

* Sec. 2. AS 42.10.280(b) is amended to read:

(b) A common carrier shall file with the commission, and print and keep open to public inspection, schedules showing the <u>maximum and minimum</u> rates, charges, and classifications for the transportation of

property within the state between each point upon its route, and between each point upon its route and each point upon every route leased, operated, or controlled by it, and between each point upon its route or upon any route leased, operated, or controlled by it and each point upon the route of a common carrier, whenever a through route and joint rate has been established or ordered between two such points. If no joint rate over a through route has been established, the carriers in a through route shall file, print, and keep open to public inspection the separately established rates, charges, and classifications applied to the through transportation. The schedules of contract and common carriers shall plainly state the places between which property will be carried, and the schedules of common carriers shall also contain classifications of property in force, and state separately all terminal, storage, icing, and other charges which the commission requires to be stated, all privileges or facilities allowed, and rules and regulations which affect or determine any part or the aggregate of the rates and charges, or the value of the service given to the shipper or consignee. The schedules shall be plainly printed in large type. The carrier shall keep a copy of each schedule readily accessible for inspection by the public in every station or office where property is received for transportation when the station or office is in charge of an agent, and in every station or office of the carrier where bills of lading or receipts for property are issued. The carrier shall produce a schedule for inspection upon the demand of any person. The carrier shall keep posted in two public and conspicuous places in each station in which a schedule is kept a notice, printed in bold type, which

states that the schedules are on file with the agent and open to inspection by any person, and that the agent will assist the person to determine rates or rules and regulations. The commission shall prescribe the form of schedules. The form shall conform as nearly as practicable to the form of schedules required by the Interstate Commerce Commission.

* Sec. 3. AS 42.10.420(7)(A) is amended to read:

(A) a person who transports by motor vehicle, [WITH OR] without compensation, property which is owned or is being bought or sold by him, or property of which he is the seller or [,] purchaser [, LESSEE OR BAILEE,] and the transportation is incidental to and in furtherance of some other primary business conducted by the person in good faith;

STATE OF ALASKA

DEPARTMENT OF PUBLIC SAFETY
OFFICE OF THE COMMISSIONER

JAY S. HAMMOND, GOVERNOR
William R. Nix
Commissioner
P. O. BOX 6188 ANNEX
ANCHORAGE, ALASKA 99502

February 10, 1982 465-4322

Representative Terry Martin, Chairman
House Labor & Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Martin:

Re: HB 586

Due to preparation for House budget hearings scheduled for tomorrow, the Department's spokesman is unable to attend today's hearing on HB 586.

Since this Bill does have an impact on the Division of Alaska State Troopers, I respectfully request that your Committee take no action on this Bill until testimony is heard from the Department of Public Safety which does oppose transfer of the functions delineated in HB 586.

Sincerely,

William R. Nix
Commissioner

Overweight Vehicles (permits for)

HOUSE BILL NO. 586, by Rep. Rogers. Transfers from the Dept. of Public Safety to the Dept. of Transportation & Public Facilities the responsibility for issuing permits for overweight vehicles and for operating motor vehicle weighing stations and establishing regulations for the enforcement of size, weight, and load limitations. Secs. 1 & 2 amend AS 19.10.060 (Regulation of Weight and Load of Vehicles and Use of Highway During Certain Seasons) by adding that DOT&PF may issue permits for overweight vehicles, etc. Repeals AS 28.05.011(8) (duty of the Commissioner of Public Safety to adopt regulations governing "the operation of motor vehicle weighing stations and the enforcement of size, weight and load limitations, including the issuing of special permits and prescribing fees for special permits . . ."). Does not provide for effective date. (Note: see SB 58, similar.)

Introduced May 20 and referred to Labor & Commerce.

January 28, 1981

Senate Transportation Committee
Juneau, Alaska

Gentlemen:

We are not satisfied with the issuance of "Overweight and Overlegnth Permits" as presently being done by the Department of Public Safety, Alaska State Troopers; nor are we satisfied with the operation of the scales by the State Troopers.

1. There seems to be different criteria used at different Permit issuing offices at different locations throught the State.

2. Some of the personnel (State Troopers) operating the scales and issuing citations were not completely familar with the Regulations and in most instances refused to check with his supervisor as to the correct interpretation.

We believe this operation could better be performed by the Department of Transportation.

Very truly yours,

M-B Contracting Co., Inc.

Attention: Jeanie Kline

Dear M's Kline:

First let me say we have owned and operated trucks since 1968 and have been involved in trucking industry since 1966 in Anchorage. Operating one to twenty-five trucks, primary earthmoving but have also hauled freight.

Due to the harassment of the Alaska State Troopers we have consider just quitting. The cost of equipment and men being detained unnessarily is a factor that cann't be figured in hauling cost and beable to obtain work. And the cost is an unwarranted cost, the majority of our work in some manner is paid for by the State and most of our work is performed on State Highway and Road projects.

Attached is copies of permit and ticket issued last week. We were moving our D-6 Cat. from Eagle River to Anchorage. We purchased a wide load permit as a D-6 is a legal weight load; when reaching the scales the cat was not moved forward enough to place the weight properly on the axles. The back axle is legal for 42,000 lbs. When weighted, the back axle actually weighted 46,060 lbs. There was no scales to check the placement of the cat before reaching the scales. The wide-load permit was taken from the driver. A ticket was issued for 4,080 lbs. @.05 per lb. $204.00. Another permit had to be obtained for overwidth and if we did not want to unchain and re locate the cat 8" forward approximately, we could get an overload permit, which we did and took permit to the Glenn Highway, Mile 11 scales. Time involved was over two hours.

Due to not knowing exactly the weight distribution of the D-6 on the lowboy, the cost of a driver, permits, someone to deliver is $354.00, not counting time for equipment just sitting that rents for $95.00 per hour. The total cost for moving the D-6 should have been about $210.00, labor, permits and equipment rental. Instead we have costs of over $550.00.

Troopers maintain we should know weights and distribution on lowboy of each piece of equipment. ATC, also maintains the same. They are not considering the amount of fuel in equipment, dirt and mud on frame, dirt that builts up in the belly pans, all change the weight over the 2%, if they are in a good mood and allow the 2%. A truck can be cleaned and have a bare weight of 3,000 lbs. less than before cleaned. How much experience has anyone in Troopers and ATC had with moving heavy equipment and trucking?

In 1977, I had a trooper come to our office and compliment me on our trucking operation. Good equipment, legal loads, courteous drivers. He also commented that if all truckers and trucking companies followed our example, enforcement would not be needed. Our policys and most of the drivers are the same, only we have six trucks now and had twenty then and we have more lost time due to troopers now.

The fall of 1978 we had to sell all our trucks in order to survive. We had a contract with Rogers and Babler to haul gravel from Eklutna to their plant on Tudor Road, in Anchorage. Which meant going through the Glenn Highway, Mile 11, scales with over ten trucks approximately seven times a day. We didn't anticipate any problems. The first day we were written over $4,000.00 in tickets. Rogers and Babler did not have scales at the Eklutna pit, we were weighting the trucks and material at the plant. Rogers and Babler needed the material for crushing very badly so we kept trying to haul but hauling less per load to get the axle weight. By noon the second day all work had to stop. The time at the scales inspecting and weighting just could not be absorbed and it wasn't getting better. Some trucks being inspected two and three times in one day. Just different troopers that were on duty, they had two and sometimes three in the scales. We stopped hauling, I called the troopers office and tried to make an appointment with the supervisor, he wasn't available to talk via of phone or have a meeting. I went to the troopers office and met with a sargent. It was arranged to have trucks all inspected at our yard so not to have drivers sitting two hours waiting and mechanics being sent to the scales. The inspection never took place after three days the sargent called and said they could not inspect in our yard because then they would have to inspect everyones like that if requested using Sea-Land and freight companies as an example.

Rogers and Babler put in scales at the gravel pit in Eklutna, they were platform scales but we did have gross weight and would split weight them to try and get axle weight correct. This took additional time and at a commerical scales they will not take the time to do this.

We suffered serious losses in labor cost and non-production. A truck would be held up with driver two hours, we would

not be notified till the time had been lost. We had company radio's installed to try and help. Trucks would be held at the scales till repaired, a mechanic sent 24 miles one way, we were located in Sand Lake. Reflector and clearence lights to be replaced during the day time and had happened that day. We inspected every night, lights, tires and etc. The summer was a night mare and we had good equipment, and a good reputation for having our equipment in extra good working order. We were lucky a buyer from Washington and Oregon come in and bought all our trucks savings us from bankruptsy.

The work season of 1979, we bought and operated four trucks. We hauled mostly in the Sand Lake area, we did haul on the Rabbit Creek project for Stephan and Sons and our trucks had very little trouble. There was occasions when trucks would be stopped more than one time just to pull them over, look at weight ticket and check truck over. On one occassion a truck was stopped three times with a load from Glenn Highway, Mile 11 to Rabbit Creek. The truck was not cited any of the three times.

The 1980 season we have hauled and had to cross scales only on one job in October and again a nightmare. The gross weight legal, axle weight off, and no way to check at the scales before going to State scales. We were hauling approximately 25 ton and should have been hauling 29 ton if had been able to check axle weight at the loading area. The operators at the pit become upset when they are loading the same truck two and three times to try and get the load so the driver is not afraid to go to State Scales. We were hauling from a commerical pit and do not have control of the loading.

The cost to anyone needing gravel or anything hauled that entails a truck going through the scales is going to pay extra money and I think any gravel supplies from Eagle River and that area hauling into town is going to find that no one even wants to haul if anything else he can do. I found last fall couldn't get trucks to haul due to the scales and just harassment they had to contend with.

We have a lowboy and haul our heavy equipment. I have many calls asking us to do their hauling as unable to get equipment moved at a reasonable price and due to scales, the added cost, the price is so high when they are quoted they just cann't afford to pay twice what it should cost.

Again, moving our D-6 last week my husband was stopped. driving the truck our son usually drives. The truck was pulled over by Officer Dial, he looked surprised when he saw who was driving. There was no reason to be stopped, like moving violation, he wanted to see the permit, then stated the flagging was wrong and had to be shown on the permit that

the flagging was correct, the blade was measured and equipment inspected. A pilot car and lowboy were stopped ahalf hour to move the equipment one mile. The truck was stopped on a icy narrow side street with a wide load which in my judgement was unsafe and if equipment had been stalled in such a manner would have been very concerned for the safety of others. I feel the truck was stopped just for a personal vindetta, a number of citations have been issued to our son and he has obtained an attorney which Officer Dial has made remarks about to other truckers.

I have drivers tell me while they were stopped the officer discussing what he is going to do to such and such next time. What kind of enforcement of the law is that? Officers threating what they are going to do and a guy just driving a truck for wages and afraid he will lose his license.

After three years a[illegible] the problem seems to have turned into a monster. While ha[illegible]ing for another trucker on the Elmendorf Access project a truck was weighted by the State at the pit at approximately 95,000 and legal. State scales weight him at 125,000+, he showd the weight ticket he had and it was fortunate the owner of trucking firm that we were hauling for was there and had to sweet talk trooper into weighting the truck again, they [illegible]ure wouldn't have done it for him the driver stated as he had told them something had to be wrong. Next time over the scale with the same load he weighted 112,000 by 3rd or 4th time weight at scales reflected approximately the same weight as the state project scales. The time lost was approximately two hours. After the incident the scales were closed and troopers left. I have personal knowledge of two other cases the same thing has happened and in one case the trucker was cited and went to court.

While hauling on International Airport Road project a trooper followed a truck onto the project and at the dump site stopped him for an inspection, the finding was he couldn't move the truck, the brake shoes had to be replaced they were wore out. The driver radioed and the shop, advised him the brake shoes were new just replaced. The trooper let him go back to work.

The Dept. of Transportation and Highways will not buy gravel with axle weight. A scales most be platform and all axles on the scales at one time. Yet they can ticket a truck overwight at .05¢ per lb. from axle scales. The variance in pit scales and trooper axle scales also will reflect less weight as well as overweight we have found.

I have not been able to obtain from troopers a book or whatever that they come up with some of their regulations from. ATC gave me a book saying we have adopted part of these regulations. The book is a ICC book. One item in question is to check air for braking power. The engine is shut off and brakes applied. The air pressure can't drop over so much per minute or the truck is unsafe. The pounds per minute and etc. changes with the trooper.

Our son is the one on the road and if drivers stopped and a real problem, he intercedes, he is very knowledgeable of weights, equipment mechanics and the workings of a truck. He has stated that for his own benefit he is going to carry a small tape recorder to document threats and that regulations change with the troopers.

The personnel that is being used for enforcement I feel has allot to do with the problems. It's a out to get you thing and somewhere this has to be started and I hope now Stopped.

After reciting the figures you quoted this morning on the telephone that enforcement will double as dollars are going to double my husband stated if this is going to be the case we are going to take another avenue for our business.

We have a small family business and the employees we have are Alaska residents that have lived here a number of years. The pressure of everyday business is hard and we have felt the pressure from the trooper enforcement harder than anyother problem we have had, and I feel a unnessary burden on the business, drivers and cost for state projects and private development.

Sincerely,

WORLD EQUIPMENT, INC.

SENATE COMMITTEE ON TRANSPORTATION

Meeting Minutes
January 29, 1981

The January 29, 1981 meeting of the Senate Committee on Transportation was called to order at 1:30 p.m. in the Butrovich Room located in the Capitol Building in Juneau, Alaska, by Senator Bill Ray, Chairman.

Present at the meeting were: Senators Ray, Gilman, Dankworth and Kerttula.

Absent from the meeting was: Senator Sackett (due to illness).

Senator Ray asked for testimony on Senate Bill 58, "An act relating to permits for overweight vehicles."

John Dean, representing H & H Trucking Co., Inc., testified in favor of the bill and brought up several points of concern. He felt there should be regular procedures for inspection of trucks because of lost money on time spent in Troopers inspections. He felt the jump scales used by the troopers are not accurate and not being used in an accurate method. There is also a problem with overweight Trooper inspection with the scales used. Senator Kerttula suggested that possibly a system could be devised to solve the overweight problem on the spot during inspections. Senator Dankworth asked if moving the permit section from Public Safety to DOT would solve the problems or did the regulations need to be revised. Mr. Dean felt they should and stated that moving the section wouldn't solve all their problems.

Lt. Kolivosky, representing the Department of Public Safety, testified in opposition to the bill. He states that the axle weight is the largest cause of road deterioration. He also stated that by regulation the Troopers are bound to go by the most restricted method. The jump scales, or portable scales, used were said to be accurate by the State of Washington, and Nevada also uses the scale. The scale house doesn't issue permits, the permit office does, because the scale house doesn't have road condition information needed and also there is a problem with keeping accurate records. He stated that the problems weren't going to be solved by moving the permit section.

Charlotte Emerson, representing World Equipment Inc., testified in favor of the bill. She objected to the time spent in obtaining permits and felt that since the Department of Public Safety is not responsible for anything after the permits are issued, the trucking company is, it didn't matter who issued permits. She thought truckers were over-regulated and over-policed and suggested that a current publication be available listing all of the rules and regulations concerning trucking. She also felt truckers should be allowed to adjust their loads and make them legal at the scale house, instead of having to go back to the permit office. Senator Dankworth again asked if moving the permit section is going to help or do the regulations need to be rewritten. Ms. Emerson said it didn't matter who gave out permits but she didn't think the permit section being in Public Safety was helping matters any. Ms. Emerson also reiterated several points brought out in the written testimony she had previously submitted.

Ms. T. J. Thrasher, representing the Alaska Trucking Association, testified in opposition to the bill. She felt the problems are with the regulations and they won't be solved by moving the permit section from one department to another. She would rather see the regulations improved, with a review of trucking operations.

Senator Ray asked if the Department of Transportation wanted the permit section within their department. DOT Commissioner Ward stated that he didn't feel the move would resolve any of the problems and he was more concerned with the regulations. He added that if the permit section was moved to his department, the enforcement efforts would continue because of his concern with the road conditions.

Senator Ray appointed Senator Kerttula to a subcommitte of one to investigate the City of Seward.

Senator Ray stated that Senate Bill 40 and Senate Bill 58 would be rescheduled for hearing on Tuesday, February 3.

There being no further business, the meeting was adjourned on January 29, 1981 at 3:25 p.m.

Addendum

The additional trucking problems explained by the witnesses weren't part of the testimony on Senate Bill 58.

Lear Senator Ray:

I would like to take this opportunity to thank you and the other members of the committee for your genuine interest of the problems facing transportation of sand and gravel in the State of Alaska. As I testified before your committee, the double standards that we must satisfy are impossible to comply with because of the strict enforcement of the Department of Transportations' unit weight policies and the State Troopers' axle weight policies. It is not that the sand and gravel truckers are trying to circumvent the law, it is just an impossibility to serve two masters with total loyalty to both.

It was exceedingly gratifying to encounter a branch of government that is genuinely interested in the problems facing its constituents.

Thank you again for my opportunity to testify. I stand ready to do anything that would help correct this problem.

Sincerely,

H & H TRUCKING

January 26, 1981

Associated General Contractors
134 North Franklin Street
Juneau, Ak. 99801

Attn: Jean Kline

Dear Jean:

We have not had many problems obtaining trip permits from the Anchorage office. However, we can go to Palmer and obtain a permit to road a 988 Caterpillar Loader with bucket from Palmer to Chugiak. But we cannot get a like permit from the Anchorage Office. They make us remove the bucket. This is very costly to remove the bucket and some organizations do not have any lifting capabilities at the location where they would have to reinstall the bucket. Another rig would have to be hired just increasing costs to all. Some Contractors are required to remove rippers from tractor dozers. We don't think this is necessary, just an additional cost.

As far as the scales go here in Anchorage, everybody has problems. As an example: 1) We will obtain a permit to move a piece of equipment and when we get to the scale if we are off on one axle weight, but the total axles are okay, they can jerk the permit then issue a ticket for not having a permit and another ticket for being over weight. We had to go to court on this example and one of the tickets was resended. 2) Another problem is that the D.O.T. Highways require the Contractors to weigh the loads on a scale with sufficient length that the total rig is weighed at one time. Then when the rig arrives at the scale, individual axles are weighed and if one axle is over then a ticket is issued. One inspector made a driver shift 500#'s of gravel because one axle was over but the total weight was okay. We have had the same truck & trailer inspected 3 times in a single day, taking a lot of time and costing at least $60.00 to $70.00 per hour. That is $1.00 per minute.

They also require the Contractors to have indentification signs on their trucks. The letters are to be 2½" in size. If you look at the DOT, Municipality, and the ARR trucks, their letters on their trucks are not 2½" in size. They are smaller.

We are not against safety, but believe the inspections are carried too far. In fact the legislature voted out the car inspections but still all trucks have to have all glass, lights, horn, wipers, & etc. in perfect condition at all times.

Some times when it is raining heavy we loose light bulbs in marker and tail lights. A ticket is issued if they burn out during the day.

Truckers are refusing to quote the Contractors by the ton haul from Eagle River, Chugiak or Eklutna due to the harassment at the scales. Assuming that 150,000 tons of aggregate is hauled into Anchorage the price has increased at least $1.00 per ton due to the harassment. This is costing the D.O.T., Municipality and other agencies in additional dollars which we all are forced to pay our share. The trucking industry doesn't care about permits, harassment, and etc. because they pass the costs on to the consumer.

Hope this helps you.

Very truly yours,

ROGERS & BABLER

TRC/fmc

HB 586 - SB 58

OVERSIZE & OVERWEIGHT COMMERCIAL VEHICLES, PERMITS

Supplied by

BACKGROUND:

A.G.C.: The Alaska Chapter, Associated General Contractors represents a membership of over 550 firms within the state directly involved or associated with the Alaska construction industry. Highway and vehicle safety are of prime concern with the industry as shown through A.G.C. sponsored accident prevention programs, safety seminars and voluntary on-site project inspections.

During the 1981 legislative session HB 586 and SB 58 were introduced as vehicles with which to focus legislative attention on a specific industry problem in the hope of securing statutory relief.

B.V.E.: Currently oversize, overweight permits, weigh stations and commercial vehicle inspections are under the jurisdiction of state troopers in the Bureau of Vehicle Enforcement, Department of Public Safety.

Formerly the permit section was operated by the Department of Highways, Division of Maintenance and the weigh stations/inspection fell under the authority of Weights and Measures Section, Department of Commerce.

PROBLEM:

Permits: (a) inconsistency in issuance (b) different and often conflicting criteria (c) ridigity of attitude and approach

Weigh Stations & Inspections: (a) restrictive interpretation of statutes and regulations (b) excessive, non-productive "nit-picking" enforcement (c) needless multiple inspections of vehicles (d) rigidity of attitude and approach

NOTE: specific examples are detailed in attached back-up which were offered in testimony supporting passage of a like bill (SB 58) during a Senate Transportation Committee hearing last session.

EFFECT ON USERS:

The initial response is of ire and frustration with governmental bureaucracy.

The net result is one of cost. Cost not only reflected in fees but lost time dollars in man hours and delayed delivery which, in turn, may mean the difference between profit or loss to the small contractor. Those unable to absorb lost time dollars may also be faced with a reduction of work force and work. The indirect results will be noted in inflated material and project cost to the paying public.

CONCLUSIONS:

By definition, state trooper duty is one of rigid adherence to policy and prosecution even within service delivery categories concerning victimless violations.

Commercial vehicle permitting and inspection could be appropriately assumed within a civil enforcement category with a more common sense approach and built in flexibility in regulatory and enforcement fields.

ACTION:

Transfer BRU from Public Safety to DOT/PF. This is a logical move as under AS 28.05.011 (8), Public Safety operates permits and enforcement "...based upon directives of the Department of Transportation and Public Facilities for proscribing or restricting conditions for the driving of vehicles when necessary to protect against undue damage to road foundations, surfaces or structures."

DOT/PF maintains continuous data on load limit and surface conditions for both road and bridge structures; up to date working knowledge of commercial vehicle type and size.

ALTERNATIVES:

(1) transfer sections to former agency control, i.e. permit section to DOT/PF and weigh station/inspection to Weights & Measures Section, DC&ED.

(2) consider long range reorganization of departments (DOT/PF - DC&EC) to allow reform .

(3) regulatory revision in Publis Safety to address possibilities as pre-arranged multiple vehicle inspection with identifying safety sticker, weigh station ability to modify or issue permits.

POSITION:

Alaska Chapter, Associated General Contractors supports an immediate transfer to DOT/PF as stated in HB 586.

HB 586 - SB 58

January 28, 1981

Senate Transportation Committee
Juneau, Alaska

Gentlemen:

We are not satisfied with the issuance of "Overweight and Overlength Permits" as presently being done by the Department of Public Safety, Alaska State Troopers; nor are we satisfied with the operation of the scales by the State Troopers.

1. There seems to be different criteria used at different Permit issuing offices at different locations throught the State.

2. Some of the personnel (State Troopers) operating the scales and issuing citations were not completely familar with the Regulations and in most instances refused to check with his supervisor as to the correct interpretation.

We believe this operation could better be performed by the Department of Transportation.

Very truly yours,

M-B Contracting Co., Inc.

SENATE COMMITTEE ON TRANSPORTATION

Meeting Minutes
January 29, 1981

The January 29, 1981 meeting of the Senate Committee on Transportation was called to order at 1:30 p.m. in the Butrovich Room located in the Capitol Building in Juneau, Alaska, by Senator Bill Ray, Chairman.

Present at the meeting were: Senators Ray, Gilman, Dankworth and Kerttula.

Absent from the meeting was: Senator Sackett (due to illness).

Senator Ray asked for testimony on Senate Bill 58, "An act relating to permits for overweight vehicles."

John Dean, representing H & H Trucking Co., Inc., testified in favor of the bill and brought up several points of concern. He felt there should be regular procedures for inspection of trucks because of lost money on time spent in Troopers inspections. He felt the jump scales used by the troopers are not accurate and not being used in an accurate method. There is also a problem with overweight Trooper inspection with the scales used. Senator Kerttula suggested that possibly a system could be devised to solve the overweight problem on the spot during inspections. Senator Dankworth asked if moving the permit section from Public Safety to DOT would solve the problems or did the regulations need to be revised. Mr. Dean felt they should and stated that moving the section wouldn't solve all their problems.

Lt. Kolivosky, representing the Department of Public Safety, testified in opposition to the bill. He states that the axle weight is the largest cause of road deterioration. He also stated that by regulation the Troopers are bound to go by the most restricted method. The jump scales, or portable scales, used were said to be accurate by the State of Washington, and Nevada also uses the scale. The scale house doesn't issue permits, the permit office does, because the scale house doesn't have road condition information needed and also there is a problem with keeping accurate records. He stated that the problems weren't going to be solved by moving the permit section.

Charlotte Emerson, representing World Equipment Inc., testified in favor of the bill. She objected to the time spent in obtaining permits and felt that since the Department of Public Safety is not responsible for anything after the permits are issued, the trucking company is, it didn't matter who issued permits. She thought truckers were over-regulated and over-policed and suggested that a current publication be available listing all of the rules and regulations concerning trucking. She also felt truckers should be allowed to adjust their loads and make them legal at the scale house, instead of having to go back to the permit office. Senator Dankworth again asked if moving the permit section is going to help or do the regulations need to be rewritten. Ms. Emerson said it didn't matter who gave out permits but she didn't think the permit section being in Public Safety was helping matters any. Ms. Emerson also reiterated several points brought out in the written testimony she had previously submitted.

Ms. T. J. Thrasher, representing the Alaska Trucking Association, testified in opposition to the bill. She felt the problems are with the regulations and they won't be solved by moving the permit section from one department to another. She would rather see the regulations improved, with a review of trucking operations.

Senator Ray asked if the Department of Transportation wanted the permit section within their department. DOT Commissioner Ward stated that he didn't feel the move would resolve any of the problems and he was more concerned with the regulations. He added that if the permit section was moved to his department, the enforcement efforts would continue because of his concern with the road conditions.

Senator Ray appointed Senator Kerttula to a subcommitte of one to investigate the City of Seward.

Senator Ray stated that Senate Bill 40 and Senate Bill 58 would be rescheduled for hearing on Tuesday, February 3.

There being no further business, the meeting was adjourned on January 29, 1981 at 3:25 p.m.

Addendum

The additional trucking problems explained by the witnesses weren't part of the testimony on Senate Bill 58.

Staff Analysis of testimony and documents presented.

Overview: The fundamental question of regulation and licensing is whether the licensing and/or regulation process is necessary to protect the public from serious and likely harm. In the case of an already existing Board or Commission the question on a viable alternative to the Board or present licensing practice should be considered.

Public Need: The Board of Welding Examiners received an audit by the Division of Legislative Audit on June 8, 1979, and a follow-up audit on November 24, 1980. Both audits reached the same conclusion: "In our opinion, there is not a sufficient public need for continuing either the Board or State licensing of welding personnel."

Public testimony has been critical of the performance of the Board and questions the need of the licensing of welding personnel by the State of Alaska. As the legislative audit (June 8, 1979, p9) points out, "that only one other state to date requires licensing of WI's." Further, there have been questions raised about conflicts of interest by certain of the Board members, and that the sole reason for the continuance of the Board is for their personal financial gain.

Analysis of Arguments: Perhaps it would be easiest to keep this report short to refer to Mr. Lockman's letter of January 25, 1982 (exhibit #1) and address each of his question and concerns.

First is "some vital areas which control the public's safety as it applies to welding." Since the Board has adopted the AWS QC1-78 (Exhibit #2) as the basis of testing and regulation perhaps it should be noted what these Standards state. "1.2 This Standard is intended to supplement any requirements of an employer, code, standard or specification and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of such work." It would appear to be in the Public Interest for the liability

and responsibility of welding problems accrue to the responsible employer and not to the State.

Next, t[illegible]stions that Mr. Lockman asks, "If the Licensed Welding Inspecto[illegible]bolished,". Perhaps it would be more accurate to say, if the Board of Welding Examiners is abolished.

"1. Who will certify the welders for Alaska work?" Who certifies the welders for Alaska work now? The Board requires a $50 examination fee for the welder inspector applicant. This fee is paid directly to the American Welding Society who administers, grades and certifies the test. In addition, the applicant must take an all position welding qualification test in at least one welding process. This is one of the areas that the conflict of interest has been raised. These tests are given by licensed Welding Inspectors or Certified Test Labs. The Board itself does not witness the test and has no knowledge if the individual whose application they review has, in fact, ever taken a test or is the same individual whose application they are certifying as a licensed Welding Inspector.

"3. How do we safeguard agai[illegible]t false welder certification papers?" The real question is, How is t[illegible] safeguard being provided now? The AWS QC1 program, as administered, seems to be providing the sole protection that is being afforded. There is no physical control by the Board over the physical test being administered by the licensed Welding Inspectors. Elimination of the Board and adoption of the AWS QC1 standards would not change what is being done at the present time, except that it would be less expensive for the employers and the Public.

"4. Can a welder come into Alaska without proving his ability and take a job welding?" Under the current Board regulations there is no requirement for an individual to have ever been in Alaska to be certified as a Welder or a Welding Inspector. The only figures available are found in the Legislative Audit of June 8, 1979 (p2') and show that 45% of the licensed Welding Inspectors are out-of-state residents. From the regulations of the Board, the requirement is that

an individual be AWS QCl certified and have paid the necessary fees to a licensed Alaska Welding Inspector. Exhibit #3, Sunday Times of 2/28/82 would seem to indicate that it would be easier for residents of Denver to become certified as welders and welding inspectors than it would be for Alaska residents who do not live in Anchorage.

This practice raises a policy question of whether or not the license is or could be used as a means to restrict entry of qualified individuals into the market. If there would be another large scale project, like the gas line, would it b desirable to restrict the licensing of Alaska Welding Inspectors to some facilities, such as the one in Denver? If so, which areas and who should be chosen? The Alyeska letter of April 12, 1977 (Exhibit #4) raises this and some other questions.

Further considerations. It would be easy to go point by point through all of the materials that have been presented but that would miss the main aspect. The fundamental questions raised by the Legislative Audit have not been addressed. The Public Need has not been demonstrated. If the Legislative Audits are to be given credence, then attention should be directed to their recommendation that "Welder qualification certificates can be required by statute and, if desired, the AWS certification program for WI's could be adopted by reference." In fact, except for the requirement of a test by a licensed Alaska Welding Inspector, this is the procedure that is being followed today.

Under any set of facts, the procedure adopted should not be structured in a manner that it be construed as a preemption of the employer's responsibility for the work or for the performance of such work.

Final Note. There seems to be some question over the validity on some of the testimony and "public input". The advertisement of 2/21/82 (Exhibit #5) purported to be by, or sanctioned by the American Welding Society was repudiated by the American Welding Society and should not be construed as indicative of their position Exhibit #6). Likewise the letter of January 29, 1982 (Exhibit #7) has been viewed by the American Welding Society as a breach of their position on legislative matters

(Exhibit #9) and a possible breach their ethical code (Exhibit #8). The unsolicited testimony, input from the public and the Legislative Audits would appear to indicate that there is a rational to adopt the codes and the standards by reference.

#2.

January 25, 1982

Representative Terry Martin, Chairman
Legislative House Labor & Commerece Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

In your consideration to reestablish or abolish the Board of Welding Examiners, I would like you to consider some vital areas which control the public's safety as it applies to welding.

If the Licensed Welding Inspector is abolished,

1. Who will certify the welders for Alaska work?

2. Do the persons who will be doing the welder certifications know how to comply with the national codes used in Alaska?

3. How do we safeguard against false welder certification papers?

4. Can a welder come into Alaska without proving his ability and take a job welding?

5. Who will inspect these welds?

6. Is it in the public's best interest to <u>not</u> test the knowledge of a Welding Inspector?

7. If the Welding Inspector is tested who will give the test and what test will be used?

There is no question about the need for a welder to be certified, the question is (1) certified to what? (2) certified by who?

We have today a proven mechanism to safeguard the public against bad welding. To abolish this mechanism or trade it for some other that may not work or damage the quality of future projects is certainly not in the <u>public's</u> best interest.

I have worked hard to create good welding in the public's interest and will certainly leave the Board if that will help.

I'm sure you see the future of Alaska is dependent upon good people doing quality work.

Sincerely,

Donald M. Lockman

Donald M. Lockman, Chairman
Board of Welding Examiners

#2

AWS QC1-81

Standard for Qualification and Certification of Welding Inspectors

Introduction

The purpose of welding inspection is to determine that the welded product meets the criteria of a specific code, standard or specification. These criteria usually contain references to an appropriate code, standard or specification, and detailed drawings that outline specific and general requirements of the work. The Welding Inspector must be thoroughly familiar with welding processes, welding procedures, welder qualifications, materials, and the limitations of weld testing; and must be able to read drawings, keep records, make reports and make responsible judgements. For weld inspection to be effective, it must be performed in a manner that is consistent with the specification(s) requirements and the technical and ethical principles involved.

1. Application and Scope

1.1 This Standard establishes the requirements for the qualification and certification of welding inspection personnel and describes how these personnel may become qualified and the principles of conduct and practice by which certification may be maintained.

1.2 This Standard is intended to supplement any requirements of an employer, code, standard or specification and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of such work.

2. Levels of Qualification

2.1 There shall be two levels of qualification for welding inspection personnel.

2.1.1 Welding Inspector — A person who has been certified as meeting the requirements of Section 6.1 of this Standard.

2.1.2 Associate Welding Inspector — A person who has been certified as meeting the requirements of Section 6.2 of this standard.

3. Definitions

3.1 Terms used in this document are defined as follows:

3.1.1 Certificate — The document issued the applicant upon successful examination.

3.1.2 Certification — Written testimony of qualification.

3.1.3 Committee — The AWS Qualification and Certification Committee.

3.1.4 Welding Inspectors

3.1.4.1 Certified Welding Inspector (CWI) — A person who has been qualified and certified to the requirements of Section 5.1 and 6.1 of this Standard.

3.1.4.2 Certified Associate Welding Inspector (CAWI) — A person who has been qualified and certified to the requirements of Sections 5.2 and 6.1 of this Standard.

3.1.5 All other terms defined by AWS A3.0, "Welding Terms and Definitions."

4. Function

4.1 Primary

4.1.1 The CWI performs inspections or verifies that the work inspected and records maintained conform to the requirements of the applicable codes, standards and specifications.

4.1.2 The CAWI performs inspections, under the direction of a CWI, as defined in Section 4.2. It is the CWI, however, who has responsibility for determining if weldments conform to workmanship and acceptance standards.

4.2 Detail — The Welding Inspector

4.2.1 Interprets drawings and specifications.

4.2.2 Verifies that the base materials and consumable welding materials conform to the specification requirements and that the specified welding filler metals are used on each base metal or combination of base metals.

4.2.3 Verifies that the welding equipment to be used for the work is appropriate for use with the welding procedure and has the capability to produce the specified welds.

4.2.4 Verifies that the welding procedures are as specified and qualified and that the welding is performed in accordance with the applicable procedure.

4.2.5 Verifies that the welders, welding operators and tackers have been properly qualified in accordance with the applicable codes, standards and specifications, and that their qualifications permit them to use the welding procedures specified for the work.

4.2.5.1 Assures that the qualification tests are properly performed.

4.2.5.2 Rec
or welding operator

welding materials, and

4.2.5.2 Requires requalification if there is evidence the welder's or welding operator's work does not conform to the requirements of the applicable code, standard or specification.

4.2.5.3 Requires requalification if the welder's or welding operator's qualification is not current by the requirements of the applicable code, standard or specification.

4.2.6 Inspection of Work

4.2.6.1 Verifies that only specified and properly qualified welding procedures are used for the work.

4.2.6.2 Verifies that the joint preparation and fit-up meet the requirements of the welding procedure and drawings.

4.2.6.3 Verifies that the specified filler metals are used and that filler metals are maintained in proper condition for use as specified.

4.2.6.4 Verifies that the technique and performance of each welder, welding operator and tacker are as specified.

4.2.6.5 Verifies that the work conforms to requirements of the applicable code, standard, specification and drawing.

4.2.6.6 Verifies that the work inspected is identified with specified marking methods or with appropriate records.

4.2.7 Nondestructive Examination

4.2.7.1 Performs the required visual inspections.

4.2.7.2 Verifies that the required visual and other nondestructive examinations have been performed by qualified personnel in the specified manner. The resulting information shall be reviewed to assure that the results are complete.

4.2.7.3 Performs nondestructive examinations that are required, providing qualifications are in accordance with the specified requirements.

4.2.8 Records

4.2.8.1 Prepares clear and concise reports and verifies that records of the welding procedure, the welding procedure qualifications, the welder's, welding operator's and tacker's qualifications, the control of welding materials, and the results of inspections and tests are maintained.

5. Education and Experience Requirements

5.1 Each applicant for certification as a **Certified Welding Inspector** (CWI):

5.1.1 Shall be a high school graduate or hold a state or military approved high school equivalency diploma.

5.1.2 Shall have no less than five years experience in an occupational function that had a close relationship to weldments fabricated to a code, standard or specification, and directly involved in one or more of the following:

5.1.2.1 Preparation of plans and drawings for weldment construction—**design.**

5.1.2.2 Planning and control of welding materials, welding procedures and welding operations for weldment fabrication—**production.**

5.1.2.3 Fabrication and erection of weldments—**construction.**

5.1.2.4 Detection and measurement of weld discontinuities; verification of fabrication requirements as described in Section 4.2—**inspection.**

5.1.2.5 Repair of welds that were determined defective—**repair.**

5.1.3 Alternatives to 5.1.1 and 5.1.2 with proper supporting documentation (e.g., copies of transcripts, letters of reference, etc.):

5.1.3.1 Eighth grade level schooling with no less than 10 years work experience in welding functions.

5.1.3.2 Less than an eighth grade education with no less than 15 years work experience in welding functions.

5.1.3.3 A maximum of two years of post high school education may be substituted for an equal number of years of the required five years experience, provided studies are relevant to any of the functions covered in 5.1.2. Credits are given as follows:
(1) Associate or higher degree. Two years maximum in engineering technology, engineering, physics or sciences.
(2) Engineering/Technical School Courses. Two years maximum of successfully completed courses* in a curriculum that can be (or could have been) applied to (1) above.
(3) Trade/Vocational School Courses. One year maximum of successfully completed courses* in a curriculum related to welding that can be (or could have been) applied to (1) above.

*NOTE: "Successfully completed courses" means completed the quarter or semester term with credit in that course. "Courses in the curriculum" means courses within a body of courses offered toward a degree, or can be applied to a degree in (1) above.

5.1.3.4 Three yea
stituted for two years of the
documentation (e.g., photo
certificates, and letters of

cedures, and welding oper

5.2.2.3 Fabricatio

5.2.2.4 Detection
ification of fabrication requ
tion.

5.2.2.5 Repair of

5.1.3.4 Three years of relevant teaching experience may be substituted for two years of the five years experience requirement with proper documentation (e.g., photocopied summaries of subjects taught, teaching certificates, and letters of reference). Relevant experience will be considered on the following basis: Teaching full time in a trade, area or technical school, college or university, the occupational skill of welding or subjects related to welding: its application, control, materials, and processes.

5.1.4 Shall be familiar with and understand the fundamentals of the following processes:

SMAW	GTAW	OFW	thermal cutting
FCAW	SAW	SW	mechanical cutting
GMAW	ESW	B	

Note: Cutting processes refer only to those processes that are applied to the fabrication and repair of weldments.

5.1.5 Shall be thoroughly familiar with, and capable of performing, the functions outlined in Section 4.

5.2 Each applicant for certification as a Certified Associate Welding Inspector (CAWI):

5.2.1 Shall be a high school graduate or hold a state or military approved high school equivalency diploma.

5.2.2 Shall have no less than two years experience in an occupational function that had a close relationship to weldments fabricated to a code, standard, or specification, and directly involved in one or more of the following:

5.2.2.1 Preparation of plans and drawings for weldment construction—**design.**

5.2.2.2 Planning and control of welding materials, welding procedures, and welding operations for weldment fabrication—**production.**

5.2.2.3 Fabrication and erection of weldments—**construction.**

5.2.2.4 Detection and measurement of weld discontinuities; verification of fabrication requirements as described in Section 4.2—**inspection.**

5.2.2.5 Repair of welds that were determined defective—**repair.**

5.2.3 Alternatives to 5.2.1 and 5.2.2 with proper supporting documentation (e.g., copies of transcripts, letter of reference, etc.):

5.2.3.1 Eighth grade level schooling with no less than four years experience as a qualified welder in any welding process.

5.2.3.2 Less than an eighth grade education with no less than six years work experience in welding functions.

5.2.3.3 Eighth grade level schooling with no less than one year of vocational education and training in a welding curriculum and three years experience in welding fabrication or inspection activities.

5.2.3.4 Two years post high school education in a welding curriculum or engineering technology, engineering or physical sciences, and six months actual welding inspection experience, as defined in 5.2.2.4.

5.2.4 Shall be familiar with and understand the fundamentals of the following processes:

SMAW	FCAW	B
GTAW	SAW	thermal cutting
GMAW	OFW	mechanical cutting

Note: Cutting processes refer only to those processes that are applied to the fabrication and repair of weldments.

5.2.5 Shall be familiar with, and capable of performing under the direction and/or supervision of the CWI, specific functions outlined in Section 4.

6. Examination Requirements

6.1 The CWI

6.1.1 Shall pass an eye examination, with or without corrective lenses, to prove (1) near vision acuity on Jaeger's J1 letters or Snellen English at 12 inches, (2) far vision acuity of 20/40, or better, and (3) color perception.

6.1.1.1 Eye examination must be administered by an Optometrist, Medical Doctor or Registered Nurse no more than 7 months prior to the date of the welding inspector examination or recertification.

6.1.2 Shall pass an open book test on the requirements of a code or standard.

6.1.3 Shall pass a test on fundamental principles of such topics as welding processes, NDE methods, mechanical properties of materials, heat treatment, and duties.

6.1.4 Shall pass a test on practical application of welding inspection fundamentals such as interpretation of weld discontinuities, symbols, welding procedures and drawings, and basic on-the-job arithmetic, etc.

6.1.5 CWI — Shall pass all tests with a minimum score of 72% on each test.

CAWI — Shall pass all tests with a minimum score of 50% on each test.

7. Certification

7. Certification

7.1 The American Welding Society will issue to each CWI or CAWI applicant who complies with the requirements of Sections 5.1 or 5.2 and 6, as applicable, a serialized (unique number) certificate and pocket work card stating that the applicant has met the AWS certification requirements. Certification shall be valid for three years unless revoked by reasons defined in Section 8.6 and the authority of Section 9 of this Standard. The certificate shall indicate the date of certification. The pocket work card shall indicate the expiration date of certification and any need for corrective lenses.

8. Code of Ethics

Preamble: In order to safeguard the public's health and well-being and to maintain integrity and high standards of skills, practice, and conduct in the occupation of welding inspection, the American Welding Society CWI and CAWI shall be cognizant of the following principles and the scope to which they apply with the understanding that any unauthorized practice is subject to the Committee's review and may result in suspension or revocation of certification.

8.1 Integrity—The CWI and CAWI are obligated to act with complete integrity in professional matters and to be forthright and candid to the Committee or its representatives on matters pertaining to this Standard.

8.2 Responsibility to the Public—The CWI and CAWI are obligated to preserve the health and well-being of the public by performing the duties required of weld inspection in a conscientious and impartial manner to the full extent of the inspector(s) moral and civic responsibilities and qualifications. Accordingly, the CWI and CAWI shall:

8.2.1 Undertake and perform assignments only when qualified by training, experience and capability.

8.2.2 Be completely objective, thorough, and factual in any written report, statement or testimony of the work and include all relevant or pertinent testimony in such communiques or testimonials.

8.2.3 Sign only for work that the inspector has inspected, or for work over which the inspector has personal knowledge through direct supervision.

8.2.4 Neither associate with nor knowingly participate in a fraudulent or dishonest venture.

8.3 Public Statements

8.3.1 The CWI or CAWI will issue no statements, criticisms or arguments on weld inspection matters connected with public policy which are inspired or paid for by an interested party, or parties, without first identifying the party, the speaker, and disclosing any possible pecuniary interest.

8.3.2 The CWI or CAWI will publicly express no opinion on a weld inspection subject unless it is founded upon adequate knowledge of the facts in issue, upon a background of technical competence pertinent to the subject, and upon honest conviction of the accuracy and propriety of the statement.

8.4 Conflict of Interest

8.4.1 The CWI and CAWI shall avoid conflict of interest with the employer or client and will disclose any business association, interests, or circumstances that might be so considered.

8.4.2 The CWI and CAWI shall not accept compensation financial or otherwise, from more than one party for services on the same project, or for services pertaining to the same project, unless the circumstances are fully disclosed and agreed to by all interested parties or their authorized agents.

8.4.3 The CWI and CAWI shall not solicit or accept gratuities, directly or indirectly, from any party, or parties, dealing with the client or employer in connection with the CWI's and CAWI's work.

8.4.4 The CWI and CAWI shall, while serving in the capacity of an elected, retained or employed public official, neither inspect, review nor approve any work on projects relating to his public office.

8.5 Solicitation of Employment

8.5.1 The CWI and CAWI shall neither pay, solicit, nor offer, directly or indirectly, any bribe or commission for professional employment with the exception of the usual commission required from licensed employment agencies.

8.5.2 The CWI and CAWI shall neither falsify, exaggerate, nor indulge in the misinterpretation of personal academic and professional qualifications, past assignments, accomplishments, and responsibilities, or those of the inspector's associates.

8.5.3 The CWI and CAWI are cautioned against functioning as an independent in public fields out of his or her capability, without first investigating for possible industry or public requirements and additional education/experience requirements. (e.g., industrial labs, in the concrete and soil testing field, etc.)

8.6 Unauthorized Practice

8.6.1 Any violation of any required standard of conduct prescribed by this Standard if related to a CWI's or CAWI's occupation, including any violation of the Code of Ethics contained in this Standard, shall constitute an unauthorized practice subject to the imposition of sanctions.

(Available from the AWS Q&C Department.)

9.2 The Committee may apply to any court of competent jurisdiction for an enforcement of its administrative decisions and rulings.

10. Reinstatement

10.1 Reinstatement of a revoked certification will be allowed with no penalty or prejudice to the individual, provided the reason for such revocation has been rectified to the Committee's satisfaction.

11. Upgrading of Certification

11.1 The CAWI may, by his own choice, remain at the same classification, or level. Should he desire to upgrade his classification, or level, to that of the CWI, he must comply with the requirements of Sections 5.1 and 6.1.

12. Recertification

12.1 The Qualification and Certification Department shall notify by mail each CWI and CAWI of the expiration of certification and requirements of recertification. Such notice shall be mailed approximately 45 days in advance of the expiration date* of certification.

12.2 The CWI and CAWI shall be recertified by renewal or reexamination every three years; however, recertification without examination is limited to two consecutive three-year periods.

12.2.1 Applicants requesting renewal of their certification must attest to two years activity, of their three year certification, in the practice of welding inspection and/or related activities as defined in Section 5.1.2 and 5.2.2. (Applicants shall complete a "Renewal Application" form.)

12.2.2 Applicants for renewal of certification that has expired or those choosing recertification by examination will be considered as new applicants. (Applicants shall complete an "Application for Welding Inspector Examination" form.)

12.2.3 Applicants must pass an eye examination. The requirements for this examination are listed in Section 6.1.1.

12.3 The CWI and CAWI shall maintain a current address with the AWS Q&C Department for the mailing of correspondence relative to the inspector's application, examination, certification/recertification.

*Certification becomes effective on the first day of the month following the date of examination.

Attention: Karen Crouse, Regulations Specialist

Re: Board of Welding Examiners-Proposed Welding Regulations

Gentlemen:

In regard to the subject welding regulations, representatives of Alyeska attended the public hearing which was held on February 3, 1977 and we have thoroughly reviewed the proposed regulations. In our judgment the proposed regulations are unnecessary. Notwithstanding this opinion the following comments are made as to the proposed regulations which are based on our recent experience in building the trans-Alaska pipeline, which involved the greatest amount of welding on one project in the history of construction.

Article 1-Codes: We concur that welders must be qualified to the applicable codes or standards as determined by the job specification designated by the project owner and incorporated in the construction contract. We do not agree with the requirement of Section 72.005 that the American Welding Society D1.1 Structural Welding Code all position fillet weld test is suitable in the absence of any code requirement in a job specification. A welder who is certified by the Board pursuant to this code only would not necessarily be qualified to do other types of welding, such as pipeline or tank construction. Yet if the welder has been issued a card or other evidence of competency by the Board, it is likely that possession of such a card will be deemed to be evidence of qualification for performing any kind of welding in the State of Alaska. In contrast to this, the standard practice in the industry is that welders are re-tested for each job to the requirements of the code which applies to that job. Meeting the requirements of one code is no guarantee that a welder can meet the requirements of some other code.

Article 2-Welders: We agree that welders must be qualified prior to performing on weldments whose failure whould involve a hazard to life or property. However, we do not agree that it is necessary for welders to be qualified in a State approved facility licensed by the Board. While welder qualification must be monitored to assure that the applicable

procedures are being followed, there are many circumstances where testing can be done in the field. It is normal industry practice to test welders at a job site, where the test can be administered under actual field conditions and where the contractor's engineering and technical personnel are available. Testing at a central laboratory facility usually requires additional travel time, often at the contractor's expense, for welders who are tested, as well as a delay in getting welders on the job. (See also our comments on Article 4).

Article 3-Welding Inspectors: We agree that improved welding inspection is a desirable goal. However, we disagree with the Board's proposal to establish unique and unusual qualifications and requirements for welding inspectors which deviate from industry practice with which Alyeska is familiar. We believe that one way to accomplish the goal of upgrading welding inspection in Alaska, without posing unusual and unnecessary requirements on the industry, would be to accept certification by the American Welding Society (through its newly adopted national certification program for welding inspectors) as evidence of qualification to act as a welding inspector in Alaska. Although the American Welding Society certification program is relatively new, we believe that there would be a great advantage to Alaska in fitting into such a nationally recognized program, rather than developing its own, different requirements. It might be noted that if another large scale project, such a gas pipeline, comes to Alaska, there could be a need for hundreds of qualified welding inspectors. The only feasible way for these persons to be available when needed would be for the Board to accept certification under a nationally recognized program rather than waiting for a sufficient number of applicants to be processed through Alaska's program.

Article 4-Test Facilities: As previously stated, welder qualifications can be properly done under field conditions, as well as in a laboratory. In fact, laboratory conditions, e.g., test booths and controlled temperatures, tend to make the conditions somewhat artificial. Certainly where large numbers of welders are to be tested, a central test facility may be the only practical approach, and the Board may want to inspect and approve such a facility. However, we urge the Board to give contractors the latitude to arrange for testing welders in the field, where the contractor deems this to be desirable and feasible.

Article 5-General Provisions: We have no comments on this article.

In conclusion, we understand and sympathize with the Board's legitimate concern with developing some type of regulation of welding operations, such as gas stations, logging operations, and small fabricating shops, which presently are not committed (as are pipeline and other large scale projects) to meet any nationally recognized codes or standards. However, the proposed regulations are so broad and sweeping that they would encompass projects such as the trans-Alaska pipeline and other projects which invariably incorporate as part of their building specifications nationally recognized welding codes and standards. Alyeska fears that the proposed regulations, if broadly applied, as they appear intended to

apply, would pose serious obstacles and unnecessary and unproductive regulation to those firms which already have committed themselves to operate under and comply with the strictest nationally recognized codes and standards. Thus Alyeska urges the Board to revise the proposed regulations to permit members of the industry which operate under nationally recognized codes and standards, in the areas of testing, welding procedures and inspection, to continue to operate pursuant to these recognized industry practices.

Very truly yours,

J. Whitley for J

Welding Regulations

The American Welding Society in Alaska is supporting the Legislative House Bill #595 currently in the Labor & Commerce Committee for passage this session. This bill will retain the current welding statutes, regulations and Welding Board as it is today. These State regulations today say that Welders doing work in Alaska must be properly certified by an Alaska Licensed Welding Inspector and when welding is inspected it shall be inspected under the direct supervision of an Alaska Licensed Welding Inspector.

These regulations are in the best interest of the public to create safe welded projects in Alaska.

If this Bill, #595, is not passed, there could be no Alaska welding regulations and will open the door to welders from other areas who may not have the abilities to do quality welding.

It will also open the door to anyone calling themselves a welding inspector to work in Alaska without the requirement of passing a test to prove their abilities.

Today persons wishing to do welding inspection in Alaska must pass a written test which is a national standard administered nationally by the American Welding Socity and be certified in at least one all position welding certification. In Alaska today, welders being certified to do welding are tested these Licensed Welding Inspectors to determine their abilities.

If you wish Alaska to continue with these minimum standards you can call the State Information Center in Anchorage at 278-3668 and have a 50 word or less message transmitted to the Legislative House and Senate Labor & Commerce Committee expressing your opinion.

The Committee meeting to determine the recommended pass or fail vote to the Legislators is scheduled for the 26th of this month in Juneau. Your opinions should be expressed before that date. You could also write the Committee Chairman, Representative Terry Martin, Legislative House Labor & Commerce Committee, Twenfth Alaska State Legislature, Pouch V, Juneau, Alaska 99811.

It's easy to have your opinion heard, just pick up the phone, give your name, mailing address, telephone number and your message in 50 words or less to be transmitted to the Legislative House and Senate Labor & Commerce Committee. They can respond back to you acknowledging your opinion and relate other information about the bill.

This is an effort by the Alaska Section of the American Welding Society to help create better welding for the users of welded products in Alaska.

Pd. for by The American Welding Society of Alaska Donald M. Lockman, Chairman, 2114 Railroad Ave., Anchorage, AK 99501

January 29, 1982 #7

AWS Member:

There is a House Bill (HB 595) in Juneau in the Legislative House Labor & Commerce Committee to reestablish the State Board of Welding Examiners which is being abolished by the Sunset Legislation. If this bill is <u>not</u> passed, there will be no regulations in Alaska for the certification of welders or inspection of weldments. If the licensed Welding Inspector is abolished;

1. Who will certify the welders in Alaska for Alaska work?
2. A welder will be able to come into Alaska without proving his or her ability and take an Alaska job.
3. How would we safeguard against false welder certification papers?
4. Who will be the responsible persons to inspect welds?
5. Is it in the public's best interest to <u>not</u> test the knowledge of a Welding Inspector?

There is no question about the need for a welder to be certified, the question is always (1) Certified for what application? (2) Certified by who?

We have today a proven mechanism to safeguard the Alaskan public against bad welding. To abolish this mechanism or trade it for some other that may not work or damage the quality of future projects is certainly <u>not</u> in the public's best interest.

The American Welding Society's total existance is to create better welding for the public's safety.

The Executive Board of tne AWS met 1-29-82 and is soliciting your support in passage of HB 595. This support must be heard before 2-20-82 in Juneau before the next committee meeting.

You can call 278-3668, the State Information Center and at no cost, in 50 words or less have a message transmitted to the House Labor & Commerce Committee. Or, you can write to:

Representative Terry Martin, Chairman
Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Action on your part is required to keep Alaska safe, don't just let the other guy do it, he may not.

Sincerely,

Donald M. Lockman
Chairman

attn alaska drilling Co

DATE: November 13, 1981

TO: All State Licensed Welding Inspectors
and interested parties.

FROM: Donald M. Lockman, Chairman
State Board of Welding Examiners

SUBJECT: State Board of Welding Examiners and State Licensing of Welding Inspectors future existence.

Every four or five years all State boards come under a sunset legislative law that automatically terminates those boards and subsequent regulations. This is the case with the Board of Welding Examiners and licensing of welding inspectors. The termination date of the Board and licenses is June of 1982. The House Bill #595 that was introduced last year to extend the Board did not get out of committee and was not acted upon. This bill can be inacted between the beginning of the new legislative term in January 1982 and the June deadline if it is properly moved through the various committees to the floor.

Enclosed are several documents containing information pertaining to this issue.

1. An overview of the sunset process.
2. Copy of the House Bill #595 currently in the Labor & Commerce Committee.
3. A probable successful route of HB 595.
4. A list of the legislative standing committees for 1981-82.
5. A list of the Alaska House and Senate Legislators for 1981-82 with addresses when the Legislature is not in session.

If interested in keeping the State Board of Welding Examiners and subsequently the licensing of welding inspectors, please write your Representatives and Senators and the respective Committees illustrating your opinions.

If, in fact, the HB 595 is not acted upon before June 1982, the Board and licensing will be terminated and the State will have no guidelines for welding quality in Alaska.

If you feel there are items in the State Regulations that should be modified, please send your proposed wordings to myself for consideration at our next State Board Meeting to be held in January 1982.

If there are any questions about the enclosed documents, please feel free to contact me at 2114 Railroad Avenue, Anchorage, Alaska 99501
(907) 276-3440

1- HB 595 was introduced on 5/20/81 and referred to the Labor and Commerce Committee.

2- If the House Labor and Commerce Committee approves HB595 as is, it will be referred to the House Finance Committee.

3- If the House Finance Committee approves it as is, it will be sent to the House rules Committee for calendaring for a vote on the floor of the House.

4- If the full House approves the bill, it will be sent to the Senate for its consideration.

5- It will be referred to the Senate Labor and Commerce Committee for consideration.

6- If Senate Labor and Commerce Committee approves it, it will be sent to the Senate Finance Committee for consideration.

7- If the Senate Finance Committee approves it, it will be sent to the Senate Rules Committee for calendaring for a floor vote in the Senate.

8- If the Senate approves it as it was sent over from the House, it will be sent to the Governor for signature or veto. If the bill has been changed in the Senate from the form and content it was approved originally in the House, it would then be sent back to House for its concurrance in any changes prior to going to the Governor for his consideration.

OVERVIEW : SUNSET REVIEW PROCESS

State law requires that licensing boards justify their existance approximately every five years.

The sunset review process involves the following basic steps.

1- A termination date is set by statute for an existing board.

2- A performance audit of the board is conducted by the Division of Legislative Audit during the calendar year prior to the termination date.

3- During the session immediately preceding the termination date the legislature sets up a committee* to hold hearings and make recommendations to the legislature on the board under review. At these hearings the Department of Commerce and Economic Development and the interested public give testimony.

4- Based on the hearing testimony, the findings of the performance audit and any other factors that the legislature wishes to consider, a decision is made to :

A) eliminate the licensing process,
B) modify the licensing process, or
C) continue the licensing process unchanged.

The fundamental questions that underlie the sunset review process are :

1- Is the licensing process necessary to protect the public from serious and likely harm? What alternatives to the present licensing process exist?

2- Is the board necessary to the licensing process? Is board licensing the most effective way to protect the public? Is board licensing the most economical way of protecting the public? Is board licensing the most desireable way to protect the public?

Other less fundamental, but often equally important, questions are raised during the sunset review process, usually by the performance audit. These questions usually include :

1- How efficiently has the board been operating?

2- How responsive has the board been to the public?

3- Has the board been unnecessarily restricting entry into the profession?

4- How conscientious has the board been in meeting its statutory and other obligations?

* committee of reference

January 18, 1982

Labor & Commerce and Finance Committee
Legislature of the State of Alaska
Twelfth Legislature - Second Session

The State of Alaska Board of Welding Examiners will cease to exist in June, 1982, in accordance with current Sunset requirements.

The members of the board would like to re-cap some of the goals and accomplishments of the past few years and give an opinion of what will happen if the board ceases to exist.

In 1976, members of the board observed that regulations were being largely ignored by the industry. A review of the regulations governing welders and weld inspection revealed them to be unworkable. In 1976/77, a new set of regulations (12AAC72) were formalized. For the most part, this new regulation met with statewide industry acceptance. There was little opposition noted during the public hearings, held in 1977 and 1978.

Several hundred manhours were spent writing these regulations. This time was, of course, spent at the individual board member's own expense. Each board member considered the time well worth the effort, once the statutes and regulations became effective August 21, 1978.

These regulations became a nationwide standard, with at least two other states adopting similar regulations. Most large construction companies, as they became aware of the new regulations, started having their welders certified in accordance with approved guidelines. Until this time, most working welders considered themselves "certified" which was a term without true meaning. Once the welders learned they would have to certify, or re-certify, to prove their proficiency, they obtained additional training as required to meet the various welding codes used in Alaska.

The additional requirement of licensed welding inspectors so enhanced the overall quality of major construction projects that many companies (including the major oil companies) who had established quality control groups made the acquisition of this license mandatory for employment or promotion. Alyeska Pipeline Service Company felt this program was important enough to set up an extensive (and expensive) welding inspector training program for their inspectors. Industry in the "lower 48" has started to follow the example set in Alaska for certifying welders via welding inspectors. This standard has considerably increased the level of expertise in weld inspection.

As you know, one of the major reasons for expensive repair work on the Trans-Alaska Pipeline was due to inadequate and/or incompetent weld inspection. This one item caused millions of dollars of additional expense to the consumer.

The high weld reject rate and lack of knowledgeable, qualified welding inspectors on this project was one of the main reasons the State of Alaska elected to regulate welders and inspectors in the first place. With the forthcoming construction of the natural gas pipeline, the same problems will arise if there is no regulation to govern them. Welders will be qualified incorrectly (or not at all), and welding inspection will be done by the "brother-in-law" system or by individuals the contractors believe will cause the least amount of weld repairs. This possible situation is not an exaggeration; these things did occur during the construction of the Trans-Alaska Pipeline and will occur on the gas line if not closely governed.

As with any regulation or law, there are "special interest" groups that may either benefit or be adversely affected by the law. This analogy certainly applies here. There is little doubt that the three or four testing inspection laboratories in Alaska derive a certain amount of business because of the regulations. However, if these labs were not available locally, the work would simply be provided by "lower 48" companies.

This board has found that most individuals who are opposed to the regulations either can't pass the professional examination (or certification) or have a contrary special interest. One special interest group is working to set up a separate State organization for personal benefit called a Welding Bureau. This was suggested in Senate Bill No. 121, submitted by Senator Bill Summner in 1979.

Industry's opposition to the present regulation has been extremely light. In fact, most negative feedback from the industry involves suggested revisions to the regulations, rather than opposition to the regulation itself. We agree that it does need revision. The proposed changes will make it easier for industry to comply with the regulations.

During the public Sunset hearings, many individuals from within the industry testified in favor of continuing the board and its regulations. Of all the testimonies submitted, only two were negative. Neither individual was licensed as an inspector, and both worked for the State in educational areas. It is hard to understand why a professionsl board was allowed to be Sunsetted when almost all the public input was positive. The board believed then, and still does, that it exists as a board to protect the public. We satisfied both the public and industry but, apparently did not satisfy the members of the Sunset committees.

A significant result of present regulation that the legislative audit did not and could not cover is the fact that the overall welding quality in the State has taked a significant step forward since the enactment of the welding inspector regulation. Better welding quality translates directly into economic and safety benefits for the public.

There ar many welding projects throughout the State that have been brought to a safe standard by the conscientious inspection of licensed welding inspectors. These cases do not reach the public's awareness because they are not given the publicity that a catastrophic failure would create. The public benefits are all around us in our everyday use of welded products and facilities.

Our point is this: Industry has accepted this regulation as an important tool for controlling quality. To let the board, and subsequently the regulation, cease to exist at a time when industry is interested in (and receptive to) a governing regulation, is certainly not in the public's best interest.

Your consideration of re-establishing the professional and vocational regulations, as defined in 12AAC72, and continuing the existance of the Board of Welding Examiners, as defined in State Statute AS 08.99 and House Bill No. 595, is sincerely solicited.

This is a unanimous opinion from the board.

Respectfully Submitted,

Donald M. Lockman

THE HONORABLE REPRESENTATIVE TERRY MARTIN, CHAIRMAN
STATE HOUSE LABOR & COMMERCE COMMITTEE
POUCH V
JUNEAU, ALASKA 99811

RE:HB595, CONTINUANCE OF THE BOARD OF WELDING EXAMINERS

DEAR REPRESENTATIVE MARTIN:

WE ARE WRITING AS ONE OF YOUR CONSTITUANTS IN THE MOUNTAIN VIEW AREA TO URGE YOU AND YOUR COMMITTEE TO ALLOW THE BOARD OF WELDING EXAMINERS TO TERMINATE. WE DO NOT ENDORSE ITS EXISTANCE PROVIDED REGULATIONS ARE CHANGED; WE ARE ADAMANTLY OPPOSED TO ITS BEING IN ANY FORM, FOR THE FOLLOWING REASONS:

1. STEEL FABRICATORS SUCH AS OURSELVES, HAVE STRUCTURED OUR ORGANIZATIONS TO COMPLY WITH AND TO CONFORM TO NATIONALLY RECOGNIZED CODES PRIMARILY BECAUSE THE CUSTOMER BASE WE SEEK DEMANDS THE TYPE OF QUALITY REQUIRED BY THESE CODES IN THEIR PROJECTS. THE END USERS OF FABRICATIONS WHERE SAFETY AND/OR ECOLOGICAL REGULATIONS MUST BE COMPLIED WITH, ARE REQUIRED BY EXISTING LAWS TO SPECIFY CERTAIN NATIONALLY ACCEPTED CODES AND STANDARDS TO WHICH THESE PRODUCTS MUST BE MANUFACTURED. THESE REQUIREMENTS MUST BE ADHERED TO BY FABRICATORS WITHOUT EXCEPTION. IT IS OUR EXPERIENCE THAT THIS TYPE OF CUSTOMER REQUIRES PROOF OF

QUALIFIED SHOP WELDING PROCEDURES AND PERFORMANCE QUALIFICATION OF WELDERS PRIOR TO THE START OF ANY WELDING FABRICATION. IN ADDITION, THESE CUSTOMERS REQUIRE THAT WE PROVIDE ACCESS TO OUR FACILITY FOR INSPECTION OF THE WELDING BY THEIR OWN INSPECTION PERSONNEL DURING MANUFACTURE OF THEIR PRODUCT. IT IS THEREFOR READILY APPARENT, THAT WITH ADHERANCE TO NATIONALLY RECOGNIZED CODES AND STANDARDS, AS WELL AS CUSTOMER INSPECTION OF CRITICAL WELDMENTS DURING FABRICATION, ADDITIONAL INSPECTION BY STATE LICENCED PERSONNEL ACCOMPLISHES NOTHING EXCEPT TO ADD ADDITIONAL AND UNNECESSARY EXPENSE TO THE PROJECT.

2. IT IS OBVIOUSLY IN OUR BEST INTEREST AS A FABRICATOR TO INSURE THE QUALITY OF OUR PRODUCT SO THAT WE CAN OBTAIN THE WORK WE DO, THEREBY ENABLING US TO KEEP OUR CUSTOMERS AND AVOID THE PROBLEMS INVOLVED WITH POOR QUALITY WORK. WE ACCOMPLISH THIS BY CONFORMING TO NATIONALLY ACCEPTED CODES AND STANDARDS AND THROUGH IN HOUSE TRAINING AND QUALIFICATION OF OUR WELDING PROCEDURES AND WELDERS AS PROVIDED BY THESE CODES. OUR TRAINING AND QUALIFICATION IS CONDUCTED AND PERFORMED BY INDIVIDUALS AND TESTING FIRMS OF OUR CHOICE WHO HAVE DEMONSTRATED THEIR CAPABILITY TO COMPLY WITH OUR OWN AND OUR CUSTOMERS STRINGENT REQUIREMENTS. HOWEVER, BECAUSE OF THE REGULATIONS OF THIS STATE, PROMULGATED BY THE BOARD OF WELDING EXAMINERS, WE ARE COMPELED TO HIRE A STATE LICENCED WELDING INSPECTOR TO WITNESS OUR WELDER QUALIFICATION ACTIVITY IN ORDER FOR HIM TO SIGN OFF ON THE PERFORMANCE QUALIFICATION TEST RECORD. IT MUST BE RECOGNIZED THAT HE, THE STATE LICENCED WELDING INSPECTOR,MAKES ABSOLUTILY NO CONTRIBUTION TOWARD UPGRADING OUR WELDERS. NON THE LESS, WE ARE SADDLED WITH THIS UNNECESSARY INTRUSION AND EXPENSE.

3. STATE LICENCED WELDING INSPECTORS,(INCIDENTLY, THE ONLY REQUIRED LICENCEES BY THE STATE AT THIS TIME), DO NOTHING TO FURTHER THE ADHERANCE TO A PARTICULAR CODE AND DO NOTHING TO ENHANCE THE QUALITY OF WORK PERFORMED. ANY

PERSON WHO MEETS THE REQUIREMENTS OF THE AMERICAN WELDING SOCIETY CERTIFICATION PROGRAM FOR WELDING INSPECTORS SHOULD BE ACCEPTED BY THE STATE AS COMPETANT TO ACT AS SUCH. THIS ELIMINATES THE NECESSITY OF LICENCING THESE INDIVIDUALS BY THE STATE AND THE PUBLIC EXPENSE ASSOCIATED THEREWITH.

4. YOUR COMMITTEE HAS BEFORE IT, A REVIEW AND FOLLOW-UP REVIEW OF THE BOARD OF WELDING EXAMINERS, PERFORMED BY THE DIVISION OF LEGISLATIVE AUDIT WHICH CONCLUDES:

> ''IN OUR OPINION, THERE IS NOT A SUFFICIENT PUBLIC NEED FOR CONTINUING EITHER THE BOARD OR STATE LICENCING OF WELDING INSPECTORS.''

WE BELIEVE THAT LEGISLATIVE AUDITS AND SUNSET LAWS WERE PROVIDED BY LEGISLATORS SUCH AS YOURSELF WHO SAW THE NECESSITY OF DISCONTINUING UNNECESSARY REGULATORY BOARDS AND COMMISSIONS. WE BELIEVE ALSO THAT WHEN AN OPINION IS THIS SUCCINCTLY AND UNAMBIGUOUSLY WRITTEN, THERE MUST BE OVERWHELMING ADVERSE EVIDENCE TO REFUTE THE AUDIT BEFORE A COMMITTEE SHOULD EVEN CONSIDER REVERSING THEIR FINDINGS.

5. FINALLY, AS 08:01.025 STATES:

> ''NO PUBLIC MEMBER OF A BOARD MAY:
> (1)BE ENGAGED IN THE OCCUPATION WHICH THE BOARD REGULATES
> (3)HAVE A DIRECT FINANCIAL INTEREST IN THE OCCUPATION WHICH THE BOARD REGULATES.''

AS A MATTER OF FACT, THE CHAIRMAN OF THE BOARD OF WELDING EXAMINERS WHO IS ALSO APPARENTLY THE STRONGEST SUPPORTER THEREOF, VIOLATES BOTH OF THESE PROVISIONS BY OWNING AND OPERATING A WELDER TRAINING AND TESTING FACILITY WHICH ACTIVELY TESTS FOR LICENCING, STATE WELDING INSPECTORS. HOWEVER, STATE REGULATIONS SHOULD NOT REQUIRE THE NEED FOR TRAINING AND QUALIFICATION FACILITIES SUCH AS THIS, FOR THE LICENCING OF WELDING INSPECTORS WHEN THE MECHANISM IS

AVAILABLE ON A NATIONAL LEVEL FROM THE AMERICAN WELDING SOCIETY.

IN CONCLUSION,WE ASK YOU AND YOUR COMMITTEE, AFTER REVIEWING THESE AND OTHER FACTS, TO HOLD HB 595 IN YOUR COMMITTEE AND THEREBY ALLOW THIS BOARD TO TERMINATE

VERY TRULY YOURS

ANCHORAGE TANK & WELDING, INC.

LOWELL D, MACNUTT, VICE-PRESIDENT

February 25, 1982

Representative Terry Martin
Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

I am writing this letter to voice my opposition to the re-establishment of H.B. 595. I fully agree with the legislative audit of 1979, and its follow-up in 1980 that the need for the continuation of the State of Alaska Board of Welding Examiners does not exist.

I feel that the state should allow private industry to manage its own welding and welding inspection programs in accordance with the widely used and nationally recognized codes and standards. It appears to me that the Board and its continuations is wanted solely because of personal gains, and not really in the publics' best interest.

I have considerable experience in welding, both as a welder and now a Welding Engineer, and I have never seen such a mess and dealt with so many incompetent welding inspectors.

Please do us all a favor and abolish the State of Alaska Board of Welding Examiners.

Sincerely,

Lee A. Gabrielson

The Honorable Terry Martin - Chairman
Legislative House Labor and Commerce Committee
Twenty Fifth Alaska State Legislator
Pouch V (Interdepartmental Mail Stop 3100)
Juneau, Alaska 99811

Subject: Sunseted Board of Welding Examiners Statutes AS08.99 and Regulations 12ACC72, House Bill 595, and Senate Bill 757.

Dear Honorable Terry Martin:

Recently I have had occasion to study the statutes and Regulations contained in the subject Board of Welding Examiners and House Bill 595 for continuation of the Board. In addition, I have reviewed the Legislative "Follow-up" Review Audit conducted 11-24-80 by your Legislative Auditor Gerald L. Wilkerson.

After studying the statutes and Regulations covered in the subject item along with my indepth review of the audit findings as well as taking special note of the rebuttal to the audit report signed by the Chairman of the Board of Welding Examiners; I find that we at Stack Steel, are in total agreement with the underscored conclusions of the Legislative Auditor, identified as: "Prior Audit Recommendation No. 1 Page -5-.

In review of the Chairman of the Boards rebuttal to the audit findings it is noted, that his primary argument for maintaining the Board of Welding Examiners is based solely on the need for "State licensing" of the welding inspector as the single instrument that will maintain quality and protect the public.

It should be noted by you and your committee panel members, that in the Chairman of the Boards rebuttal no comment or apparent thought is given to the many other significant items that must be taken into account, with a view toward public safety before, the welding inspector is even assigned to the job of inspection. For example, items which the

design engineer and the welding engineer (assuming a welded fabrication) must attend to in compliance with the existing National Accepted Codes, Federal and State Government Regulations and Practices, which are relevant to the item to be fabricated. Some of those items which the design engineer and welding engineer must take into consideration and attend to, are:

1) Establish the necessary quality criteria for the job under consideration.

2) Determine what Codes, Standards, and Government regulations apply.

3) Prepare design drawings of the item to be fabricated.

4) Prepare fabrication specifications, which identifies: the applicable Codes/Standards to be used. Identifies the base materials, welding materials, and welding processes. Establishes the quality requirement and the level of inspection required for the specific job.

From the criteria identified in the fabrication specifications, the welding inspector and/or other inspectors (dependent on the type of fabrication) can be assigned by their employer to his specific inspection task. Most certainly the inspectors performance on the job will and must be measured by his employer whether a State license is required or not.

A very important item that should be considered is the fact that the State licensing of the individual inspectors places no assurance or warranty for the inspectors on-the-job, performance. In that consideration, and assuming that the inspector lacks insuficient welding inspection knowledge but still holds the State license, one of two things can happen. That is, dependent on the caliber of the firm which employs that type of an inspector; 1) his employment will be terminated or 2) he may be retained by the employer simply for window dressing because of the State license.

In either case the State license requirement will not have made any contribution toward guaranteeing or assuring welding quality.

We in private industry dealing in welded fabrications are concerned with economics in this competitive market. Being concerned we know that we will not stay in business if the welded fabrication or welded products which we produce do not meet our customers quality requirement. Therefore we work with the existing National Accepted Codes/Standards Federal, State, Borough, and Municipality Regulations which are already in place and required.

We have not seen in the past, any significant benifit in welding quality or added protection of the public from the Board of Welding Examiners regulation. As the regulations are now written in the present Board Statutes and considering the existing and apparent conflicts of interest by some Board members, we believe it would be in the best interest of the State to terminate the Board of Welding Examiners and cease any further expendature of public funds other than allowing the Board time to gather up records to send to archive files and close up shop!

Thank you for your attention and consideration to this matter.

I will be looking forward to your reply.

Respectfully,

DENNIS R. PFEIFFER

WELDING APPLICATIONS METHODS, INC.

2700 Porcupine Drive
Anchorage, AK. 99501 (907) 272-3543

October 6, 1981

The Honorable Charles Anderson
House of Representatives
1841 E. 24th Ave.
Anchorage, AK. 99504

Subject: Current Status of: The Sunsetted Board of Welding Examiners.

Dear Honorable Charles Anderson:

My apology for the delay in sending you a copy of the Follow-up Review and Legislative audit of the Board of Welding Examiners, which you requested during our phone conversation of 9-16-81. The delay results from putting in long hours and long work weeks for my present clients.

Following your recommendations during our last discussion, I made a phone call to the State Attorney General's Office-Juneau. The objective of course was to get a letter confirming the information which you had given me regarding; "the sunsetting of the Board of Welding Examiners on June 30,1981. and for that reason it was no longer in force."

I would like to take the liberty at this time to inform you of the results of my phone call to the Attorney General's Office and the phone call which I received the same day from the Division of Occupational Licensing:

1) Phone call to the Attorney General's Office. Conversation with Susan Burke. Date of call; 9-17-81

2) Phone call from Division of Occupational Licensing-Juneau. Conversation with; Mr. Richard Long Chief Investigator. Date of call 9-17-81

My phone conversation with (Miss/Mrs.) Susan Burke did not prove very fruitful in as much as she was not, by her statement, very well informed about the current status of the Board of Welding Examiners. She did state however, that she would do some checking and get back to me later. As yet, I have not been contacted by her or anyone from the Attorney General's Office.

The same day, 9-17-81 I received a phone call from Mr. Richard Long. Mr. Long indicated that he had been contacted by the Attorney General's Office regarding my earlier phone call to that office.

Mr. Long informed me that, to the best of his knowledge the Board of Welding Examiners Law was still in force even though House Bill 595 was held in committee and the Board was sunsetted June 30, 1981. He also mentioned a provision in the Law which grants a year of continuation for the sunsetted Board, to conclude its affairs and during that time period the powers of the Board remain in force.

I informed Mr. Long of my phone conversation with you on 9-16-81 wherein you advised me that the Board was sunsetted and for that reason was no longer in force nor could it be, without new Legislative acts which would be required to permit the Board to be reenacted. Mr Longs comment was, that he was not aware of any Legislative act which removed the statute permitting the years extention and continuation of enforcement for the additional years time period. However, he stated that he would do some further research and contact me again.

The following day, 9-18-81, Mr. Long called me again to advise me of new information which he found and which infact, supported what he had stated in his first phone call to me 9-17-81. I asked Mr. Long for a letter concerning that information and the present status of the Board of Welding Examiners. In return he asked me for a letter concerning other portions of his and my phone conversation in which I discussed the following items:

1) My activity under Alaska State Business License No. BL023144 SIC4299 DBA Owner WAM-Welding Application Methods, Providing a service as; Welding Consultant, Technical Welding Services, Welder Training and Qualification and Manufacturer's Representative.
2) Known infractions of the Board's Law (if in fact the law is still in force), by unlicensed Welding Inspector's of another Firm.
3) What may be considered to be a direct conflict of interest (again if the Board is still in force. See Section 08.01.025. Public Members), by two memebers of the Board of Welding Examiners who own or are actively engaged in Welder Testing Facilites.
4) My personal views (which are supported by my business clients & others--Owners and Managers of Fabrication Firms in Alaska) concerning the merit of the Board of Welding Examiners and its potential impact on Alaska Industry.

I have been in the process of drafting the letter to Mr. Long however, I decided to break away from that letter in order to get this one out to you and transmit the Legislative audit to you. In addition I am enclosing a copy of the letter I received 9-25-81 from Mr. Long, which I feel you may be interested in.

I would like to propose a meeting with you at your earliest convenience to discuss possible Legislative means of preventing additional public funds from being spent to continue enforcement of any part of the Board of Welding Examiners rules and permitting only the limited use of public funds for completly shutting down the activity and the closing of their affairs! Inaddition to discuss other recommendations and alternative methods which the Legislature and the Govenor may consider, to assist rather than hamper private industry in continuing to upgrade the quality of welded fabrications within this state.

An example of what may be considered:

1) The state has accepted the American Society of Mechanical Engineers, like so many other states have, as the governing Code for Code stamped Pressure Vessels and Pressure Piping Systems and has established an Office of the State Boiler Inspector. In addition, staffed that office with individuals

who are fully knowlegable with welding and Code welding requiremnts within that Code catagory and others. It seems logical then, if the Legislator and Govenor feels that there is need to expand on the control and upgrading of welded fabrication which fall within other Codes and Standard catagories, that the existing State Boiler Inspectors office would be the place to expand rather than setting up some other agency or Board. Wherein another agency or Board may end up in direct conflict with the existing and functional State Boiler Inspectors office.

I look forward to a reply from you on this matter.

Thank you for your attention and cooperation.

Respectfully yours,

Louie J. Rousseau

WELDING APPLICATIONS METHODS, INC.
2700 Porcupine Road
Anchorage, AK 99501 (907) 272-3543

October 4, 1981

Mr. Richard H. Long,
Chief Investigator
Division of Occupational Licensing
Pouch "D"
Juneau, Alaska 99811

Subject: (1) Sunsetted Board of Welding Examiners Welding Statutes AS08.99 and Board of Welding Examiners Regulations 12AAC72.

(2) Termination, continuation, and reestablishment of Regulatory Boards AS08.03.

References: (1) Telephone conversation concerning current status of the Board of Welding Examiners, from Mr. Richard Long to Louie Rousseau. Date: 9-17-81.

(2) Follow-up telephone conversation concerning new evidence on current status of the Board of Welding Examiners, from Mr. Richard Long to Louie Rousseau. Date: 9-18-81.

Dear Mr. Long:

This letter will acknowledge receipt of your letter of 9-22-81 concerning the Subject items (1) and (2); and to respond to your request to me for setting down some of the other items which we briefly discussed during our phone conversations, references (1) and (2).

In review of my daily notes and daily log, our phone conversation briefly covered the following items which I shall list and follow-up with the item-by-item discussion:

Mr. Richard H. Long
Chief Investigator
Division of Occupational Licensing
October 4, 1981
Page Two.

Item 1) Personal business activities: Welding Consultant, Technical Welding Services, Welder Training and Qualification, Manufacturers Representative. Doing business as, Owner, WAM - Welding Application Methods, under Alaska State Business License No. BL 02314 SIC 4299.

Item 2) Conflicting information received concerning status of the Sunsetted Board of Welding Examiners from the Office of Legislative Affairs - Anchorage, and the Division of Occupational Licensing - Juneau.

Item 3) Comments on: the follow-up review of the Board of Welding Examiners, November 24, 1980 Legislative Audit Control Number 08-21-1004-R.

Item 4) Information on possible infractions of the Board's Laws and Regulations, and other statutes, if in fact those regulations are still in force.

Discussion:

Item 1) Since my demobilization from Alyeska Pipeline Service Company on February 2, 1978, and after completion of my assignment as Welding Engineer, I have been actively engaged as a Welding Consultant to a number of welding fabrication firms and others within the state.

Following is a list of some of the firms who have engaged my services:

*Technical Welding Laboratory, Fairbanks - 1978
*Alaska Welding Center, Anchorage & Fairbanks - 1978/1979
*H.C. Price Const. Co., Fairbanks - 1978
*Stack Steel Co. of AK, Anchorage - 1978/1979/1980/1981
*Anchorage Tank & Welding, Anchorage - 1980/1981
*Arctic Foundations, Anchorage - 1981
*Arctic Welding Supply, Anchorage - 1981

With the exceptions of my services to Technical Welding Laboratory and H.C. Price Co., my activities as I stated during our phone conversation, have been directed toward on-the-job (or in-house) welder training and welder qualifications and upgrading overall welding methods for my various clients.

The primary objective, of course, in that activity, is to upgrade their welding quality and the methods of application, which in turn will permit their firms to produce welded fabrications which meet the design criteria and code/standards requirements that are imposed on the fabrications by their customers.

In August of 1978, I was made aware that the Board of Welding Examiners introduced a stipulation into their rules which became a state law requiring that only a State Licensed Welding Inspector could qualify welders. Since I was not at that time and still not in ag eement with what the Board of Welding Examiners was attempting to do, plus the fact that I do not sell my services as a welding inspector, I elected to not contribute to that activity by not applying for the welding inspector license. However, in order to not jeopardize my client's position or their welders, it was necessary that I inform them prior to entering into a work agreement that I could not legally, because of the law, sign off on the Welders Qualification Test Record following his training. For that reason if the prospective client wished my services, it would be necessary to call in a state licensed welding inspector to witness the welder qualification testing activity and sign off over my signature on the Test Report.

In every case, that was the arrangement agreed upon between my clients and I before we launched into any in-house activity to train and qualify their welders. It must be recognized that such an arrangement, in having to pay for the licensed inspectors time, resulted in additional costs to my client for something that was not directly contributing to the upgrading or improvement of

their welding requirements. Never the less, that was the working arrangement up until the time that we were informed by the Office of Legislative Affairs-Anchorage that: "The Board of Welding Examiners was sunsetted June 30, 1981, and for that reason, the law is no longer in force."

Item 2) Following receipt of that information from Legislative Affairs, I proceeded to conduct my welder training activity and welder qualification testing activities as I have done for several major corporations over my past 27 years of welder training and qualification testing. That of course resulted in my signature on the welder performance Qualification Test Report, as required by the National Codes and Standards, to which the tests were conducted. At that time, I was not aware of any stipulation in the law which would permit the rules of the Board to remain in force for any period of time. Nor was I advised by the Legislative Affairs of any such stipulation. In fact, as already noted, the information received from that office was totally the reverse of that.

On 8-5-81, I received a phone call from Mr. Larry Cherveny, Welding Engineer, Peter Kiewit & Sons Co., at Valdez, who I was qualifying welders for under a purchase order agreement. (Peter Kiewit Co. is working under contract to Alyeska Pipeline Service Co. at the Valdez terminal). Mr. Cherveny advised me that during an inspection of their welding documentation by Alyeska inspectors, they informed him my signature on their Welder Qualification Test Records was not valid since I was not a State Licensed Welding Inspector. For that reason, their welder would have to be requalified. I informed Mr. Cherveny of the past information received from Legislative Affairs, concerning the Sunsetted Board and the need for an inspect r's license was no longer required. His commen was that he informed the Alyeska inspectors of that, however, their response was that they knew the Board was sunsetted, but the rules were still in force for another year. I informed Mr. Cherveny

that I would do some more checking on the situation and get back to him as soon as possible. Following that, I again called Legislative Affairs Office - Anchorage and again, received the same information as previously noted. I immediately called Mr. Cherveny that same day and advised him of Legislative Affairs confirming their past information.

The following day, 8-6-81, I received another phone call from Mr. Cherveny. He informed me that Alyeska Inspection Services was insisting that the requirement for a State Licensed Welding Inspector to qualify welders was still in force. For that reason, he would be compelled to cancel our purchase order agreement.

Since the cancellation of that purchase order amounted to a considerable financial loss to my company, I decided to try and find out how a law could be sunsetted (to use Legislative Affairs term, "and dead"), yet still be in force. I started contacting personnel of different state agencies and state representatives to try and find out what exactly was going on.

My first contact and meeting was with the Commissioner of Economic Development and Commerce, Mr. Charles Webber. After discussing the Board of Welding Examiners rules and my resulting problems, Mr. Webber assured me that he would be contacting his Director of the Division of Occupational Licensing, Mr. Harry Treager, in order to try and find out the current status of the Board and its rules.

On 8-26-81, I received a phone call from Mr. Treager. During our brief discussion concerning the questionable usefulness of the Boards' rules and regulations, and why those laws would continue in force, Mr. Treagor indicated that he shared some of my concerns, and following our phone conversation would be contacting the Attorney General in order to get a legal disposition on the matter.

On 9-15-81, I called Mr. Treagor to find out if he had received any information from the Attorney Generals office concerning the disposition of the Sunsetted Board. Mr. Treagor indicated that he had not received any information from the Attorney General, as yet.

On 9-17-81, I called the Attorney Generals office and inquired who I may talk to in regard to the Sunsetted Board of Welding Examiners. My call was transferred to Susan Burke. (Miss/Mrs.) Burke indicated that she was not familiar with its statutes, however, would do some checking and contact me later.

The preceeding information in item 1 and 2 brings us up to the time (same date) of your first phone call to me and your follow-up phone call on 9-18-81, concerning the status of the Sunsetted Board.

Item 3) Comments on the Legislative Audit No. 08-21-1004-R

A review of the Legislative audit and a review of the attached rebuttal to the Audit Report, prepared by the Chairman of the Board of Welding Examiners, simply serves to reinforce my early contentions regarding the questionnable usefulness of the Board and to be in total agreement with the audits findings and its recommended conclusions.

Item 4) Information on possible infractions of the Boards Laws and Other Statuates.

As I had indicated during our last phone conversation of 9-18-81, I received information from Peter Kiewit & Sons Co., at the Valdez terminal that the last welder which I had qualified for them was requalified by an Alyeska inspector. A short time later, it was learned that of the three Alyeska inspectors assigned to the Valdez terminal, (one of whom conducted the welder requalification tests), none were AWS certified welding inspectors (which is a prerequisite), nor, at that time, did they possess the Alaska State Welding Inspector License.

I was also made aware that the two requalification pipe test coupons were sent to Alaska Industrial X-Ray in Anchorage for radiography, sectioning, and removal of the required guided bend test specimens for bend testing. After the test coupons were received by AIX, I received a phone call from that firm inquiring how I removed the guided bend specimens which are welded with stainless steel weld filler, from a carbon steel test pipe.

At this time I am not sure of who signed off on the Peter Kiewit Co. Welder Qualification Test Record. However, I believe it can be assumed that it was not the inspector who conducted the requalification tests. On that assumption, it would appear that Alyeska Inspection Services was engaging in an activity which seems to be as much an infraction of the Boards laws (even with their recognition that the law was still in effect) as what they earlier prevented me from doing.

In regard to what appears to be an infraction to another statuate covered in the booklet of the Board of Welding Examiners under AS08.01.020, "Business and Professions" Sec. 08.01.025, "Public Members", which states, "No public member of a Board may:

(1) Be engaged in the occupation which the Board regulates.
(2) Be associated by legal contract with a member of the occupation which the Board regulates except as a consumer of the services provided by a practitioner of the occupation; or
(3) Have a direct financial interest in the occupation which the Board regulates.

It is known that the Chairman of the Board and one other board member are either owners, or actively and financially engaged in facilities which perform welder qualification testing and is considered part of the occupation which the Board regulates. What is not understood is why there seems to be no action taken to enforce the above statuate if in fact any other portion of the Laws and Statuates are being enforced by or in behalf of the Board.

Conclusion:

In my considered judgment, there has not been any major contribution made by the Board of Welding Examiners toward upgrading the overall quality of welding within the state since its inception. In fact, it appears that the only accomplishment of the Board has been in the area of acquiring a quite large number of individuals who now possess an Alaska State Welding Inspectors License.

Since it is acknowledged throughout industry that quality cannot be inspected into a fabricated item, but must be trained into the individuals who are performing the work on the fabrication, it seems unreasonable to place so much emphasis on the need for increased inspection.

It is acknowledged that industry has adopted standards which require certain welded fabrications to be inspected prior to going to the consumer, however, it is also acknowledged that need is lessened when the individuals are trained to perform the task.

In view of the foregoing, it is again recommended that the Sunsetted Board of Welding Examiners Laws be deactivated and that the use of public funds to continue enforcement of the board laws and rules for the years grace period be discontinued.

Thank you for your assistance and attention to this matter.

HOUSE COMMITTEE OF LABOR & COMMERCE
CAPITAL ROOM 517
POUCH V STATE CAPITAL
JUNEAU, AK. 99811

HB595

DEAR VERN;

PLEASE EXCUSE THE COMPUTER LETTER, IT'S OUR ONLY TYPEWRITER.

WHILE YOU MAY NOT REMEMBER ME I HAVE TALKED TO YOU AT LENGTH ABOUT TWO SUBJECTS. ONE WAS A COUPLE OF YEARS AGO ABOUT THE STATE LAND LEASING POLICIES WITH A FELLOW NAMED JOE WILHOUR. THE OTHER WAS WHEN I WROTE YOU A LETTER LAST YEAR ABOUT THE INCOME TAX REPEAL, AND YOU CALLED ME AT HOME ABOUT IT.

NOW THAT I AM WITH ANCHORAGE TANK & WELDING, SOMETHING HAS COME TO MY ATTENTION WHICH IS ANOTHER REGULATORY BURDEN TO THE SMALL BUSINESSMAN. I'VE ENCLOSED SOME INFORMATION WHICH I HOPE YOU WILL LOOK AT.

THE CONTINUED EXISTANCE OF THE BOARD OF WELDING EXAMINERS IS UP FOR REVIEW UNDER THE SUNSET LAW. IT'S CLEAR HOWEVER THAT LEGISLATIVE AUDITORS DON'T THINK ITS WORTH KEEPING. THIS IS THE GENERAL CONCERN OF THOSE OF US IN THE FABRICATION BUSINESS. ALSO, IT SHOULD BE ALLOWED TO DIE BECAUSE IT REALLY DOESN'T PROVIDE ANY PUBLIC SAFETY NOT ALREADY CALLED FOR ON PROJECTS BY SPECIFICATION.

IT DOES, HOWEVER INSURE THE CONTINUATION OF THE WELDING SCHOOL OWNED AND OPERATED BY ITS CHAIRMAN AND THEREFORE HB595 TO CONTINUE THE BOARD HAS BEEN REFERRED TO YOUR COMMITTEE.

IF YOU FEEL THIS BILL COMMANDS THE PRIORITY TO BE BROUGHT OUT OF YOUR COMMITTEE, PLEASE GIVE ME A CALL AS YOU DID BEFORE. I AM SURE I CAN GIVE YOU A LOT MORE DETAIL IN SUPPORT OF OUR POSITION IN JUST A FEW MINUTES.

IF YOU FEEL IT DOES HAVE TO SURFACE, I WOULD ALSO LIKE TO HAVE YOUR OFFICE CONTACT ME AS, IF NECESSARY, WE WOULD COME DOWN TO TESTIFY AT A HEARING.

THANKS FOR YOUR TIME AND CONSIDERATION.

JANUARY 25, 1982

CHAIRMAN TERRY MARTIN
LEGISLATIVE HOUSE LABOR & COMMERCE COMMITTEE
TWELFTH ALASKA STATE LEGISLATURE
POUCH V
JUNEAU, ALASKA 99811

Dear Sir:

It has come to our attention that this important piece of Legislative Business has been put on the back burner of importance by the last Legislature. As was brought to everyone's attention by the construction of the Oil Pipeline, a serious lacking of qualified Alaskan Welding Inspectors was apparent. With the possibility of pending construction of the gas pipeline, and other major construction projects, the deletion of this legislation would be of no benefit to the State of Alaska, and in fact a tremendous disservice to Alaska and Alaskans.

It is our opinion that the State Board of Welding Examiners and State licensing of welding inspectors has been effective and has done a valuable service to the citizens of the State of Alaska by increasing the quality of welders and quality of construction. We also support the necessity of the Board of Welding Examiners as they are the only means of policing the regulations.

Licensing Welding Inspectors in our opinion is the only feasible way to protect the public without increasing the bureaucracy.

As you know, if HB 595 is not acted upon before June 1982 the Board and licensing will be terminated and the State will have no guidelines for welding quality in Alaska and this would be another serious disservice to the Alaskan public.

Enclosed are several documents containing information pertaining to this issue:

1. An overview of the sunset process.
2. A copy of HB #595 currently in the Labor and Commerce Committee.
3. A probable successful route for HB #595.

With your support, this legislation can be inacted between the beginning of the new legislative term in January and the June of 1982 deadline, if it is moved properly through the various committees to the floor.

At your February meeting we implore you to act in favor of retaining the Board and licensing as it presently exists.

Sincerely,

HARRY F. BARNES

OVERVIEW : SUNSET REVIEW PROCESS

State law requires that licensing boards justify their existance approximately every five years.

The sunset review process involves the following basic steps.

1- A termination date is set by statute for an existing board.

2- A performance audit of the board is conducted by the Division of Legislative Audit during the calendar year prior to the termination date.

3- During the session immediately preceding the termination date the legislature sets up a committee* to hold hearings and make recommendations to the legislature on the board under review. At these hearings the Department of Commerce and Economic Development and the interested public give testimony.

4- Based on the hearing testimony, the findings of the performance audit and any other factors that the legislature wishes to consider, a decision is made to :

A) eliminate the licensing process,
B) modify the licensing process, or
C) continue the licensing process unchanged.

The fundamental questions that underlie the sunset review process are :

1- Is the licensing process necessary to protect the public from serious and likely harm? What alternatives to the present licensing process exist?

2- Is the board necessary to the licensing process? Is board licensing the most effective way to protect the public? Is board licensing the most economical way of protecting the public? Is board licensing the most desireable way to protect the public?

Other less fundamental, but often equally important, questions are raised during the sunset review process, usually by the performance audit. These questions usually include :

1- How efficiently has the board been operating?

2- How responsive has the board been to the public?

3- Has the board been unnecessarily restricting entry into the profession?

4- How conscientious has the board been in meeting its statutory and other obligations?
