Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature

Mr. Martin:

I just received notice of the possibility of your doing away with the State Licensing of Weld Inspectors. I personally, am most decidedly against this both professionally and personally. I am a licensed Inspector in your state and it took many hours of toil and study to accumulate the various certifications required.

It bothers me to think that you consider the job of Weld Inspector so lightly that you make it possible for the various companies to go back to the brother-in-law system where I, with 8 years of experience could work equally or underneath a man who is putting in his first day in Weld Inspection.

There are various environmental groups who could and would make very good use of you discontinuing this program. I have seen a lot of problems in various nuclear plants that would have been lessened or eliminated if they would have had a good competent crew of Inspectors.

I certainly hope that you don't make this mistake.

Sincerely,

Jon Elliott

THE HONORABLE REPRESENTATIVE TERRY MARTIN, CHAIRMAN
STATE HOUSE LABOR & COMMERCE COMMITTEE
POUCH V
JUNEAU, ALASKA 99811

RE:HB595, CONTINUANCE OF THE BOARD OF WELDING EXAMINERS

DEAR REPRESENTATIVE MARTIN:

WE ARE WRITING AS ONE OF YOUR CONSTITUANTS IN THE MOUNTAIN VIEW AREA TO URGE YOU AND YOUR COMMITTEE TO ALLOW THE BOARD OF WELDING EXAMINERS TO TERMINATE. WE DO NOT ENDORSE ITS EXISTANCE PROVIDED REGULATIONS ARE CHANGED; WE ARE ADAMANTLY OPPOSED TO ITS BEING IN ANY FORM, FOR THE FOLLOWING REASONS:

1. STEEL FABRICATORS SUCH AS OURSELVES, HAVE STRUCTURED OUR ORGANIZATIONS TO COMPLY WITH AND TO CONFORM TO NATIONALLY RECOGNIZED CODES PRIMARILY BECAUSE THE CUSTOMER BASE WE SEEK DEMANDS THE TYPE OF QUALITY REQUIRED BY THESE CODES IN THEIR PROJECTS. THE END USERS OF FABRICATIONS WHERE SAFETY AND/OR ECOLOGICAL REGULATIONS MUST BE COMPLIED WITH, ARE REQUIRED BY EXISTING LAWS TO SPECIFY CERTAIN NATIONALLY ACCEPTED CODES AND STANDARDS TO WHICH THESE PRODUCTS MUST BE MANUFACTURED. THESE REQUIREMENTS MUST BE ADHERED TO BY FABRICATORS WITHOUT EXCEPTION. IT IS OUR EXPERIENCE THAT THIS TYPE OF CUSTOMER REQUIRES PROOF OF

QUALIFIED SHOP WELDING PROCEDURES AND PERFORMANCE QUALIFICATION OF WELDERS PRIOR TO THE START OF ANY WELDING FABRICATION. IN ADDITION, THESE CUSTOMERS REQUIRE THAT WE PROVIDE ACCESS TO OUR FACILITY FOR INSPECTION OF THE WELDING BY THEIR OWN INSPECTION PERSONNEL DURING MANUFACTURE OF THEIR PRODUCT. IT IS THEREFOR READILY APPARENT, THAT WITH ADHERANCE TO ATIONALLY RECOGNIZED CODES AND STANDARDS, AS WELL AS CUSTOMER INSPECTION OF CRITICAL WELDMENTS DURING FABRICATION, ADDITIONAL INSPECTION BY STATE LICENCED PERSONNEL ACCOMPLISHES NOTHING EXCEPT TO ADD ADDITIONAL AND UNNECESSARY EXPENSE TO THE PROJECT.

2. IT IS OBVIOUSLY IN OUR BEST INTEREST AS A FABRICATOR TO INSURE THE QUALITY OF OUR PRODUCT SO THAT WE CAN OBTAIN THE WORK WE DO, THEREBY ENABLING US TO KEEP OUR CUSTOMERS AND AVOID THE PROBLEMS INVOLVED WITH POOR QUALITY WORK. WE ACCOMPLISH THIS BY CONFORMING TO NATIONALLY ACCEPTED CODES AND STANDARDS AND THROUGH IN HOUSE TRAINING AND QUALIFICATION OF OUR WELDING PROCEDURES AND WELDERS AS PROVIDED BY THESE CODES. OUR TRAINING AND QUALIFICATION IS CONDUCTED AND PERFORMED BY INDIVIDUALS AND TESTING FIRMS OF OUR CHOICE WHO HAVE DEMONSTRATED THEIR CAPABILITY TO COMPLY WITH OUR OWN AND OUR CUSTOMERS STRINGENT REQUIREMENTS. HOWEVER, BECAUSE OF THE REGULATIONS OF THIS STATE, PROMULGATED BY THE BOARD OF WELDING EXAMINERS, WE ARE COMPELED TO HIRE A STATE LICENCED WELDING INSPECTOR TO WITNESS OUR WELDER QUALIFICATION ACTIVITY IN ORDER FOR HIM TO SIGN OFF ON THE PERFORMANCE QUALIFICATION TEST RECORD. IT MUST BE RECOGNIZED THAT HE, THE STATE LICENCED WELDING INSPECTOR,MAKES ABSOLUTELY NO CONTRIBUTION TOWARD UPGRADING OUR WELDERS. NON THE LESS, WE ARE SADDLED WITH THIS UNNECESSARY INTRUSION AND EXPENSE.

3. STATE LICENCED WELDING INSPECTORS,(INCIDENTLY, THE ONLY REQUIRED LICENCEES BY THE STATE AT THIS TIME), DO NOTHING TO FURTHER THE ADHERANCE TO A PARTICULAR CODE AND DO NOTHING TO ENHANCE THE QUALITY OF WORK PERFORMED. ANY

PERSON WHO MEETS THE REQUIREMENTS OF THE AMERICAN WELDING SOCIETY CERTIFICATION PROGRAM FOR WELDING INSPECTORS SHOULD BE ACCEPTED BY THE STATE AS COMPETANT TO ACT AS SUCH. THIS ELIMINATES THE NECESSITY OF LICENCING THESE INDIVIDUALS BY THE STATE AND THE PUBLIC EXPENSE ASSOCIATED THEREWITH.

4. YOUR COMMITTEE HAS BEFORE IT, A REVIEW AND FOLLOW-UP REVIEW OF THE BOARD OF WELDING EXAMINERS, PERFORMED BY THE DIVISION OF LEGISLATIVE AUDIT WHICH CONCLUDES:

> ''IN OUR OPINION, THERE IS NOT A SUFFICIENT PUBLIC NEED FOR CONTINUING EITHER THE BOARD OR STATE LICENCING OF WELDING INSPECTORS.''

WE BELIEVE THAT LEGISLATIVE AUDITS AND SUNSET LAWS WERE PROVIDED BY LEGISLATORS SUCH AS YOURSELF WHO SAW THE NECESSITY OF DISCONTINUING UNNECESSARY REGULATORY BOARDS AND COMMISSIONS. WE BELIEVE ALSO THAT WHEN AN OPINION IS THIS SUCCINCTLY AND UNAMBIGUOUSLY WRITTEN, THERE MUST BE OVERWHELMING ADVERSE EVIDENCE TO REFUTE THE AUDIT BEFORE A COMMITTEE SHOULD EVEN CONSIDER REVERSING THEIR FINDINGS.

5. FINALLY, AS 08:01.025 STATES:

> ''NO PUBLIC MEMBER OF A BOARD MAY:
> (1)BE ENGAGED IN THE OCCUPATION WHICH THE BOARD REGULATES
> (3)HAVE A DIRECT FINANCIAL INTEREST IN THE OCCUPATION WHICH THE BOARD REGULATES.''

AS A MATTER OF FACT, THE CHAIRMAN OF THE BOARD OF WELDING EXAMINERS WHO IS ALSO APPARENTLY THE STRONGEST SUPPORTER THEREOF, VIOLATES BOTH OF THESE PROVISIONS BY OWNING AND OPERATING A WELDER TRAINING AND TESTING FACILITY WHICH ACTIVELY TESTS FOR LICENCING, STATE WELDING INSPECTORS. HOWEVER, STATE REGULATIONS SHOULD NOT REQUIRE THE NEED FOR TRAINING AND QUALIFICATION FACILITIES SUCH AS THIS, FOR THE LICENCING OF WELDING INSPECTORS WHEN THE MECHANISM IS

AVAILABLE ON A NATIONAL LEVEL FROM THE AMERICAN WELDING SOCIETY.

IN CONCLUSION,WE ASK YOU AND YOUR COMMITTEE, AFTER REVIEWING THESE AND OTHER FACTS, TO HOLD HB 595 IN YOUR COMMITTEE AND THEREBY ALLOW THIS BOARD TO TERMINATE

VERY TRULY YOURS

ANCHORAGE TANK & WELDING, INC.

LOWELL D, MACNUTT, VICE-PRESIDENT

February 25, 1982

Representative Terry Martin
Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

I am writing this letter to voice my opposition to the re-establishment of H.B. 595. I fully agree with the legislative audit of 1979, and its follow-up in 1980 that the need for the continuation of the State of Alaska Board of Welding Examiners does not exist.

I feel that the state should allow private industry to manage its own welding and welding inspection programs in accordance with the widely used and nationally recognized codes and standards. It appears to me that the Board and its continuations is wanted solely because of personal gains, and not really in the publics' best interest.

I have considerable experience in welding, both as a welder and now a Welding Engineer, and I have never seen such a mess and dealt with so many incompetent welding inspectors.

Please do us all a favor and abolish the State of Alaska Board of Welding Examiners.

Sincerely,

Lee A. Gabrielson

The Honorable Terry Martin - Chairman
Legislative House Labor and Commerce Committee
Twenty Fifth Alaska State Legislator
Pouch V (Interdepartmental Mail Stop 3100)
Juneau, Alaska 99811

Subject: Sunseted Board of Welding Examiners Statutes AS08.99 and Regulations 12ACC72, House Bill 595, and Senate Bill 757.

Dear Honorable Terry Martin:

Recently I have had occasion to study the statutes and Regulations contained in the subject Board of Welding Examiners and House Bill 595 for continuation of the Board. In addition, I have reviewed the Legislative "Follow-up" Review Audit conducted 11-24-80 by your Legislative Auditor Gerald L. Wilkerson.

After studying the statutes and Regulations covered in the subject item along with my indepth review of the audit findings as well as taking special note of the rebuttal to the audit report signed by the Chairman of the Board of Welding Examiners; I find that we at Stack Steel, are in total agreement with the underscored conclusions of the Legislative Auditor, identified as: "Prior Audit Recommendation No. 1 Page -5-.

In review of the Chairman of the Boards rebuttal to the audit findings it is noted, that his primary argument for maintaining the Board of Welding Examiners is based solely on the need for "State licensing" of the welding inspector as the single instrument that will maintain quality and protect the public.

It should be noted by you and your committee panel members, that in the Chairman of the Boards rebuttal no comment or apparent thought is given to the many other significant items that must be taken into account, with a view toward public safety before, the welding inspector is even assigned to the job of inspection. For example, items which the

design engineer and the welding engineer (assuming a welded fabrication) must attend to in compliance with the existing National Accepted Codes, Federal and State Government Regulations and Practices, which are relevant to the item to be fabricated. Some of those items which the design engineer and welding engineer must take into consideration and attend to, are:

1) Establish the necessary quality criteria for the job under consideration.

2) Determine what Codes, Standards, and Government regulations apply.

3) Prepare design drawings of the item to be fabricated.

4) Prepare fabrication specifications, which identifies: the applicable Codes/Standards to be used. Identifies the base materials, welding materials, and welding processes. Establishes the quality requirement and the level of inspection required for the specific job.

From the criteria identified in the fabrication specifications, the welding inspector and/or other inspectors (dependent on the type of fabrication) can be assigned by their employer to his specific inspection task. Most certainly the inspectors performance on the job will and must be measured by his employer whether a State license is required or not.

A very important item that should be considered is the fact that the State licensing of the individual inspectors places no assurance or warranty for the inspectors on-the-job, performance. In that consideration, and assuming that the inspector lacks insuficient welding inspection knowledge but still holds the State license, one of two things can happen. That is, dependent on the caliber of the firm which employs that type of an inspector; 1) his employment will be terminated or 2) he may be retained by the employer simply for window dressing because of the State license.

In either case the State license requirement will not have made any contribution toward guaranteeing or assuring welding quality.

We in private industry dealing in welded fabrications are concerned with economics in this competitive market. Being concerned we know that we will not stay in business if the welded fabrication or welded products which we produce do not meet our customers quality requirement. Therefore we work with the existing National Accepted Codes/Standards Federal, State, Borough, and Municipality Regulations which are already in place and required.

We have not seen in the past, any significant benifit in welding quality or added protection of the public from the Board of Welding Examiners regulation. As the regulations are now written in the present Board Statutes and considering the existing and apparent conflicts of interest by some Board members, we believe it would be in the best interest of the State to terminate the Board of Welding Examiners and cease any further expendature of public funds other than allowing the Board time to gather up records to send to archive files and close up shop!

Thank you for your attention and consideration to this matter.

I will be looking forward to your reply.

Respectfully,

Attn: Representative Terry Martin

Gentlemen:

I am writing in support of HB 595. It is my opinion that there is a continuing need for State involement in the area of welding regulation and inspection to assure that adequate standards are maintained and that high quality weldments are produced. There is no margin for error - failure is generally catastrophic, and often times fatal to those involved.

I feel that the current system of State licensing of welding inspectors is realistic and workable although there are several areas in the existing regulations where modifications are desirable. I will not elaborate here. My primary concern is that if the Board is not reconstituted the existing regulations will have no statutory basis and in essence we will have no State regulation. If the Legislature should not choose to inact HB 595 then the existing regulations should be adopted in the statues by reference. The problem with this alternative is that there would be no convenient forum readily available for modifying and improving existing regulations.

Other alternatives such as the creation of a WELDING BUREAU would be a step in the opposite direction since it would create a new layer of government regulation with the strong probabiiity of bureaucratic bungling and regulatory abuse. I don't think we need, nor can we afford, a super "watchdog agency" monitoring every "Joe Dokes" welding operation that takes place in Alaska. It is my opinion that the Welding Board represents a low budget, high talent organization and is the logical body to give direction, provide guidance and disseminate information to the welding industry in Alaska. In fact, I believe Alaska is far ahead of those states who have not adopted welding standards. At least we have a uniform statewide standard to quide the welding fraternity and not a maze of conflicting and varying standards that exist between many of the cities and counties of our sister states.

It is rather obvious that a serious technological gap presently exists in Alaska between the engineer or the designer and the person who is actually performing the welding operation. To be certain there are good designers and good welders but few professional structural engineers are knowledgeable about the technical and practical aspects of welding. By the same token few welders have knowledge of the engineering technology associated with the design of welded structures. The certified welding inspector fulfills this technological gap. Although there are not nearly enough of these technicians available considerable progress has been made in recent years simply because of the Boards adoption of the American Welding Society Certified Welding Inspector program. As I see it, non-continuation of the board would constitute a general de-emphasizing of the importance of welding and weld quality in Alaska and would constitute a step backward rather than a step forward.

It has been suggested that industry is capable of self regulation. This may be true in some instances but it certainly is not universal. Even the largest companies with well managed quality control programs have their share of problems involving weld deficiencies. The Alyeska pipeline project was no exception.

The problem is that the small fabricator and construction firm does not normally possess, not can he afford, the luxury of quality assurance personnel. Here is where the public need exists. As a long time employee of the Department of Transportation and Public Facilities I can personally attest to numerous instances of weld failure and poor weld quality in public structures. In fact, the Department has recently been involved in litigation on two major projects over poor weld quality accomplished by supposedly knowledgeable contractors. Some of the weldments produced were so bad that they simply defy explanation. Bear in mind that these structures were designed by professional engineers and welded by certified welders. Had it not been for the presence of a Department of Transportation and Public Facilities certified welding inspector on one project and early structural failure on the other who knows what the future implications might have been.

Another major problem with this whole business of welding and weld quality is the general lack of understanding of the process by the average man on the street. To him, the welder is a magical type who, with his electric wand, joins solid steel together to the dismay of all concerned! The consumer is not normally able to identify a good weld from a bad weld but pay the same price for both. If a welded trailer hitch fails and kills someone in the car behind whose fault is it, or if the marquee falls on your head who do you sue, the designer, the store owner, the contractor who built the building or the welder? Obviously, it makes little difference to the injured party or the survivors of the deceased. They only know that if the welds had held it would not have happened. The point I am trying to

make is that some vehicle is needed for setting the standards of weld quality in the state. In my opinion the Board of Welding Examiners fullfills this requirement.

In summary, I strongly support the retention of the Board and recommend that the committee endorse HB 595. The system and regulations are workable, cost efficient, non bureaucratic and essential to the public welfare.

Thank you for the opportunity to testify.

Sincerely,

Don D. Statter
C.W.I.

Staff Analysis of testimony and documents presented.

Overview: The fundamental question of regulation and licensing is whether the licensing and/or regulation process is necessary to protect the public from serious and likely harm. In the case of an already existing Board or Commission the question on a viable alternative to the Board or present licensing practice should be considered.

Public Need: The Board of Welding Examiners received an audit by the Division of Legislative Audit on June 8, 1979, and a follow-up audit on November 24, 1980. Both audits reached the same conclusion: "In our opinion, there is not a sufficient public need for continuing either the Board or State licensing of welding personnel."

Public testimony has been critical of the performance of the Board and questions the need of the licensing of welding personnel by the State of Alaska. As the legislative audit (June 8, 1979, p9) points out, "that only one other state to date requires licensing of WI's." Further, there have been questions raised about conflicts of interest by certain of the Board members, and that the sole reason for the continuance of the Board is for their personal financial gain.

Analysis of Arguments: Perhaps it would be easiest to keep this report short to refer to Mr. Lockman's letter of January 25, 1982 (exhibit #1) and address each of his question and concerns.

First is "some vital areas which control the public's safety as it applies to welding." Since the Board has adopted the AWS QC1-78 (Exhibit #2) as the basis of testing and regulation perhaps it should be noted what these Standards state. "1.2 This Standard is intended to supplement any requirements of an employer, code, standard or specification and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of such work. It would appear to be in the Public Interest for the liability

and responsibility of welding problems accrue to the responsible employer and not to the State.

Next, the questions that Mr. Lockman asks, "If the Licensed Welding Inspector is abolished,". Perhaps it would be more accurate to say, if the Board of Welding Examiners is abolished.

"1. Who will certify the welders for Alaska work?" Who certifies the welders for Alaska work now? The Board requires a $50 examination fee for the welder inspector applicant. This fee is paid directly to the American Welding Society who administers, grades and certifies the test. In addition, the applicant must take an all position welding qualification test in at least one welding process. This is one of the areas that the conflict of interest has been raised. These tests are given by licensed Welding Inspectors or Certified Test Labs. The Board itself does not witness the test and has no knowledge if the individual whose application they review has, in fact, ever taken a test or is the same individual whose application they are certifying as a licensed Welding Inspector.

"3. How do we safeguard against false welder certification papers?" The real question is, How is that safeguard being provided now? The AWS QC1 program, as administered, seems to be providing the sole protection that is being afforded. There is no physical control by the Board over the physical test being administered by the licensed Welding Inspectors. Elimination of the Board and adoption of the AWS QC1 standards would not change what is being done at the present time, except that it would be less expensive for the employers and the Public.

"4. Can a welder come into Alaska without proving his ability and take a job welding?" Under the current Board regulations there is no requirement for an individual to have ever been in Alaska to be certified as a Welder or a Welding Inspector. The only figures available are found in the Legislative Audit of June 8, 1979 (p21) and show that 45% of the licensed Welding Inspectors are out-of-state residents. From the regulations of the Board, the requirement is that

an individual be AWS QC1 certified and have paid the necessary fees to a licensed Alaska Welding Inspector. Exhibit #3, Sunday Times of 2/28/82 would seem to indicate that it would be easier for residents of Denver to become certified as welders and welding inspectors than it would be for Alaska residents who do not live in Anchorage.

This practice raises a policy question of whether or not the license is or could be used as a means to restrict entry of qualified individuals into the market. If there would be another large scale project, like the gas line, would it be desirable to restrict the licensing of Alaska Welding Inspectors to some facilities, such as the one in Denver? If so, which areas and who should be chosen? The Alyeska letter of April 12, 1977 (Exhibit #4) raises this and some other questions.

Further considerations. It would be easy to go point by point through all of the materials that have been presented but that would miss the main aspect. The fundamental questions raised by the Legislative Audit have not been addressed. The Public Need has not been demonstrated. If the Legislative Audits are to be given credence, then attention should be directed to their recommendation that "Welder qualification certificates can be required by statute and, if desired, the AWS certification program for WI's could be adopted by reference." In fact, except for the requirement of a test by a licensed Alaska Welding Inspector, this is the procedure that is being followed today.

Under any set of facts, the procedure adopted should not be structured in a manner that it be construed as a preemption of the employer's responsibility for the work or for the performance of such work.

Final Note. There seems to be some question over the validity on some of the testimony and "public input". The advertisement of 2/21/82 (Exhibit #5) purported to be by, or sanctioned by the American Welding Society was repudiated by the American Welding Society and should not be construed as indicative of their position Exhibit #6). Likewise the letter of January 29, 1982 (Exhibit #7) has been viewed by the American Welding Society as a breach of their position on legislative matters

(Exhibit #9) and a possible breach their ethical code (Exhibit #8). The unsolicited testimony, input from the public and the Legislative Audits would appear to indicate that there is a rational to adopt the codes and the standards by reference.

Testing Institute of Alaska, Inc.
2114 Railroad Avenue
Anchorage, Alaska 99501

Attention: Donald M. Lockman, Chairman
State Board of Welding Examiners

Subject: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existence

Dear Sir:

I recently learned of the possibility of terminating the State Board of Welding Examiners and thereafter doing away with the licensing of welding inspectors in the state of Alaska.

High integrity and the proper qualifications of a welding inspector are essential for maintaining the guidelines of codes and specifications on construction projects.

During the past ten years I have been involved in numerous major construction projects in Alaska and in the continental United States. During this time I have witnessed the lack of enthusiasm, neglect, and carelessness of the inexperienced inspector. Also, I have seen and experienced the pride of knowledge and confidence surrounding a highly qualified inspector, and the pride of a job well done.

I am an AWS certified inspector now and plan to have my Alaska license within the next few months. In order to accomplish this goal I have put forth considerable time, effort and expense as have all others who reach this goal.

I believe the continuation of the State Board of Welding Inspectors is essential in order to maintain the proper qualifications and professionalism needed in the quality control field to insure the high standards you now have in the state of Alaska.

Sincerely,

Melvin L. Vosburg

Melvin L. Vosburg

MLV:ps

January 27, 1982

Testing Institute of Alaska, Inc.
2114 Railroad Avenue
Anchorage, Alaska 99501

Attention: Donald M. Lockman, Chairman
State Board of Welding Examiners

Subject: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existence

Dear Sir:

Over the past sixteen years I have been involved in numerous major construction projects throughout Mexico, Alaska, and the continental United States. I have observed activities of construction people on almost every project which has bordered on criminal neglect. Many times their lack of knowledge of their profession, due to inadequate training is to blame, often they are caught up in the Construction Company's "let's get this job done" euphoria, and most tragic of all, many sell their integrity for a few quick dollars.

The average inspector has no idea how many pipeline and pipeline related deaths occur each year, and the millions of dollars wasted yearly due to lackadaisical inspection. A pipeline explosion in Baytown, Texas two years ago revealed a weld with no bead, latticed with defects, which had had in process and final visual inspection by a qualified welding inspector, radiography performed by a qualified Non-destructive Technician, and accepted by both. Three people died in this explosion.

To become certified by the State of Alaska one must take considerable time, effort, and expense to meet the qualifications. The Alaskan State Welding Board, and the enforcement of its regulations, guarantees to a much greater degree, that its members will conduct themselves with the professionalism and integrity that will ensure that the above-mentioned tragedies happen less and less.

My hope is that each and every state adopts such a visionary program as the State of Alaska.

Very truly yours,

William C Biddy

William C. Biddy

Subject:- "State Board of Welding Examiners and State Licensing of Welding Inspectors future existence."

118 Cedar Street
Bakersfield, California
93304

Dec. 8, 1981.

Mr Don Lockman
2132- Railroad Avenue
Anchorage, Alaska, 99501.

Dear Don,

It disturbs me to understand that Alaska is toying with the idea of the elimination of your "State Board of Welding Examinators and the State Licensing of Welding Inspectors.

Quality in welding and its designs is something I feel very strongly about. In my Art criticisms regarding welds done properly. On the other hand you will see welds done & just get by visually and internally be "slop". This upset me. Usually its because someone does not care enough to be there and over see the job, and you end up with a potential calamity after it is put to use, or a continual problem until all the deficiencies are corrected in time. This causes dissatisfaction time lost and money to all parties.

A good example of this was when I purchased

One of America's top line luxury Automible, and for one 6 month I had to do the inspection of this car. It had a variety of problems from trim falling off the outside & inside of the car, moulding around the rear glass on out side of the car, you could put your fingers in, and a starter that was faulty and left us out in the country to walk home.

I learn now why Detroit is having problems with slump in sales, and the increase in car sales made over seas. I asked a man at a car rental, "what car give you the best maintenance free and less break down" - he said, "Toyota"!! This made me mad, because here we in America once lead the world in the production & quality in car through all makes. Why the change? Quality, Inspection, and not caring what comes off the assembly line. The owner knows will find it, and we sold ourselves down the road.

For the past 53 years I have been studying & working in the welding business, and since 1941 doing welding inspection related ; the production and the explanation of oil, on and offshore facilities

There is one thing that stands paramount in my mind. Welding gets sloppy, when a company, or any official body having construction or fabrication being preformed,

fails to have welding inspectors, who are qualified be present at the pre-job meeting, go over the specifications and see they are in order for the material to be used, and that the shop or contractor has his house in order according to his shop manual along with qualified welders and shop personnel. Then when the work begins, to have these inspectors on the job during the progressing of welding phases.

I hope this is the path that Alaska will go and keep your "State Board of Welding of Welding Examiners" and "State Licensing of Welding Inspectors." When I was Chief Inspector of the Prudhoe Bay Facility on the North Slope, I attented a few of your meetings. They were very good.

Having knowledgable men in the welding field working with management in your constructing and fabricating facilities, following through the work cycle, I feel is essential to produce a good product or structure, or what ever it may be.

I had some pictures I took of a tank-truck used to haul hydrocarbons, and it was taken to a repair shop for a crack that had developed due to a support saddle reinforcement pad that had cut square rather than the 180° radius cut

like now is used in this type welament. The welder knew the tank had been steamed and free of gas - (it was not purged w/ CO_2) and unbeknown to him a earlyer repair was made inside with a patch and the patch was square cut and it had developed a crack at the corner of the patch. — When the welder started to weld the outside of the reinforced area, he heard a hissing sound. He dropped the arc stinger leads and ran. Yelling a warning. The tank exploded, tearing the roof off and both doors to this steel reinforced building.

The tank fragments flew in many directions and what was left was a complete loss.

The conclusion being if a qualified inspector had checked the inside and seen the internal patch, and the patch was made with radius corners (this crack propagated filling it with the gases which was ignited by the arc caused this accident) he could have recomended the patch to be drilled, purged and then make the repair in a correct method.

No one was hurt, but to look at the truck and the building, its hard to believe.

Now I hope your State officals understands the complications, and the problems it will cause, if they don't continue to keep your "State Board of Welding Examiners & State Licensing of Welding Inspectors." I for one hope they don't eliminate you all -

Thank you for letting me voice my opinion -

Yours truly Jim Walters

Weld Qualifier
Inspector #AA0067

Honorable Terry Martin, Chairman,
House Labor & Commerce Committee:
Pouch V, Interdepartmental Mail Stop 3100
Juneau, Alaska. 99811

The last four years have been a time of advancement in integrity and safety for the welding industry and programs in Alaska. Standards have been selected and utilized by those Alaskans who have a deep and sincere concern for others as well as themselves.

Advancement, efficiency, and sucess belong to those who are willing to set high standards and live by them. The remaining segment of the welding society; those who are satisfied to exist as flotsam and jetsam or hanger-ons, may not desire to adhere to a set of demanding standards but, will nonethe-less be benefited by the results of those who do.

My desire is to see the State Board of Welding Examiners and State Licensing of Welding Inspectors continued as it is to day.

Thanking you kindly I remain,

Yours truly,

House Bill #595
" An Act continuing the existence of the Board of Welding Examiners; and providing for an effective date."

The Alaska State Board of Welding Examiners, since its inception during the " Pipeline Days", has been performing an exceptional job of protecting the environmental interests and promoting the safety of the people of our State.

To insure quality and integrity, all structural, pipe, and pressure vessel welding must conform to the specifications of nationally accepted welding codes; all welders must qualify to the specifications of tested welding procedures; and State Licensed Welding Inspectors must inspect this work for conformance to job specifications and appropriate welding codes.

A prodigious amount of construction - dams, docks, refineries, pipelines and facilities, buildings, boilers, etc. - is either already in progress or in the planning and engineering stages.

Alaska is a leader in the United States in demanding quality and integrity in a field directly affecting public and environmental safety. Other states are following our example. I ask that you vote in favor of House Bill #595.

Sincerely,

James R. Jonas

I have been involved in the welding industry since 1961. During this time I have been employed as; a welder, welding inspector, quality control inspector and a quality assurance engineer.

The board, currently in operation, consists of competent individuals, familiar with the industries needs and requirements.

Alaska is a leader in the United States in demanding quality and integrity. I am proud to be an Alaskan and feel it is a neccessity we retain the Board of Welding Examiners.

I ask that you vote in favor of House Bill No. 595

Subject: House Bill # 595 "An Act continuing the existence of the Board of Welding Examiners; and providing for an effective date."

Attention: Honorable Terry Martin, Chairman,

For Feb

If House Bill #595 is not passed, during this session, the Board of Welding Examiners will cease to exist in June 1982. If this board is allowed to expire, the entire construction industry will suffer a severe set-back.

Since the new regulations (12 AAC 72) became effective in August, 1978, weld quality has improved immeasurably. This regulation met with state-wide industry acceptance primarily because of the project quality guaranteed by the better qualified technician performing the work.

The additional requirement for welding inspectors to become licensed by the state so enhanced the overall quality of major construction projects that many companies (including the major oil companies) who had established quality control groups made acquiring this license mandatory for employment or promotion.

These regulations have become a nation-wide standard with Alaska as the leading state in demanding quality in construction and integrity in inspectors. With other states following our lead we should be fine-tuning our regulations to become even better, not eliminating what has taken so long to formulate and have industry recognize and accept.

No one needs to remind Alaskans of the unnecessary cost incurred in building the Trans Alaska Pipeline. One of the major causes of the great expense was excessive weld repairs caused by unqualified welders and inspectors. In many cases these inspectors had never been involved in or around construction prior to this project, and knew absolutly nothing of welding or inspection.

On May 26, 1981, Representitives Brown and Anderson submitted House Bill No. 595 in the Legislature of the State of Alaska, Twelfth Legislature - First Session. This bill was tabled in the House.

If this bill is not enacted by the legislature during the present session, the Alaska Board of Welding Examiners will no longer exist. What people don't realize is; when the board ceases to exist, so does regulation requiring welders to be certified and weld inspectors to be licensed. As a manager, directly involved with welding and inspection, on major oil company construction projects, I sincerely feel the continuation of this board and regulation is essential for quality welding in Alaska.

Your support in re-establishing the professional and vocational regulations, as defined in 12 AAC 72, and continuing the existance of the Board of Welding Examiners as defind in State Statute AS 08.99 and House Bill 595, is sincerely appreciated.

Very Truly Yours,

Ken Lomax

January 27, 1982

Representative Terry Martin
Chairman Labor & Commerce Comittee
Pouch V, Mail Stop 3100
Juneau, Alaska 99811

Dear Representative Martin:

I would like to request your support of Pending House Bill 595 for an Act Entitled: "An Act Continuing The Existence of the Board of Welding Examiners; and Providing for an Effective Date."

The existing welding regulations (12 AAC 72) were adopted in 1978 and have proven to be a reasonably comprehensive program that industry can live with. Union Chemicals Division has spent considerable time and money training and licensing welding inspectors and qualifying welders to comply with these regulations.

My company has found that the existing regulations are quite workable and have been very effective in increasing the competency and general level of knowledge of both welders and quality control people in the field.

I would not want to see this effort wasted and have the State start over with some different program. It would be far better and more economical to keep the existing program and attempt to correct the minor deficiencies that presently exist.

I think you will find that some "special interest" groups are always opposed to any given regulatory program and I believe this is the case with the small, very vocal group submitting negative comments regarding the Board of Welding Examiners. Virtually all of the negative comments that I have received have come from individuals or companies that were unable to comply with the regulations because of lack of competency. I believe that industry as a whole supports the existing regulations.

It is my understanding that some "special interest" groups would like to see the Board of Welding Examiners terminated and replaced by a "Welding Bureau" patterned after the Canadian Welding Bureau as evidenced by Senate Bill 121 submitted by senator Bill Sumner in 1979. I also understand there is ongoing

discussion in Juneau at this time along these lines.

My company does not support a "Welding Bureau" concept and feels it would, in all likelyhood, be a burdensome, expensive and unworkable concept.

We request your support of House Bill 595.

Thank you,

Union Chemicals Division
Union Oil Company of California

George Fox

February 5, 1982

House, Labor & Commerce Committee
Chairman: Terry Martin
Pouch V, Juneau, AK 99811
(Inter Departmental Mail Stop 3100)

It is my ~~understanding~~ that there is a bill presently before the House (HB595) that is to reestablish the state board of welding examiners and the regulations governing welders qualifications.

It is my desire as a welder that HB595 be passed. My reasons for this are, as a welder, I realize the value in proper certification and qualification of welders and certainly the value of them to be properly licensed.

The welding quality in the state of Alaska has improved considerably since these laws went into effect in 1978. If this board is allowed to expire, welding quality within the state will suffer severely. I have personal knowledge of people that weld in small welding and fabrication shops that are not certified but yet they weld items that affect us in every day life such as trailer hitches, cranes, walkways, support beams, hand rails, guard rails & etc.

Your support of HB595 will be sincerely and deeply appreciated.

Sincerely,

Robert C. Donnell Jr.

Dear Mr. Martin:

This letter is to let you know that I totally support the continuation of the State Board of Welding Examiners.

I feel it is of great importance to the people of our state that we continue to strive toward safety and excellance in the welding field. The continuation of the State's policy of licensing welding inspectors is the only way to carry on our record of excellance and safety. Without the state licensing of welding inspectors we will no longer be assured of the unbiased and high quality of welding inspection we now have within our State.

Yours truly,

Dave K. Wiman

Dear Mr. Martin:

It has come to our attention that the Alaska House Labor Committee is currently deciding on a House Bill that would eliminate the State of Alaska Board of Welding Examiners and accordingly the State licensing of welding inspectors. We urge the Committee to decide in favor of continuing the services of the State Board of Welding Examiners.

For years, industry has recognized the requirement for testing and certifying welding procedures and welders. But, not until the past few years has the weakest link in the welded product chain been fortified by the testing and licensing or certifying of welding inspectors. It seems illogical to verify the adequacy of a welding procedure, test the skill of a welder, yet allow an individual of unproven competency to make the ultimate decision as to acceptability of a weld. It is akin to passing traffic laws for safe driving, licensing drivers and then employing law enforcement officers of unknown training and experience.

On a national level, industry has adopted a self-proposed examination and certification program for structural steel welding inspectors. This act in itself should be sufficient to convince the Committee of industry's recognition of this "weak link". Their self-imposed requirement of welding inspector certification offers indirect support for the continuance of the State of Alaska Board of Welding Examiners.

Sincerely,

PARSONS CONSTRUCTORS INC.

Dear Mr. Martin:

I am convinced that a high level of quality is required in a number of specialized fields. Specifically welding inspection as well as welders themselves.

It is my opinion that people would prefer assurance that functions as those stated above are being performed by individuals with the ability and experience currently required by the State of Alaska.

Very truly yours,

Charles N. Paulus

I STRONGLY SOLICIT YOUR SUPPORT IN PASSING HB-595 REESTABLISHING THE STATE BOARD OF WELDING EXAMINERS. THE ONLY WAY WE CAN PROTECT THE PUBLIC AGAINST THE DISASTERS CAUSED BY INADEQUATE WELDING AND INSPECTION IS TO BE SURE THAT WELDERS AND INSPECTORS ARE CERTIFIED BY MERIT AND NOT BY POLITICS.

January 18, 1982

Labor & Commerce and Finance Committee
Legislature of the State of Alaska
Twelfth Legislature - Second Session

The State of Alaska Board of Welding Examiners will cease to exist in June, 1982, in accordance with current Sunset requirements.

The members of the board would like to re-cap some of the goals and accomplishments of the past few years and give an opinion of what will happen if the board ceases to exist.

In 1976, members of the board observed that regulations were being largely ignored by the industry. A review of the regulations governing welders and weld inspection revealed them to be unworkable. In 1976/77, a new set of regulations (12AAC72) were formalized. For the most part, this new regulation met with statewide industry acceptance. There was little opposition noted during the public hearings, held in 1977 and 1978.

Several hundred manhours were spent writing these regulations. This time was, of course, spent at the individual board member's own expense. Each board member considered the time well worth the effort, once the statutes and regulations became effective August 21, 1978.

These regulations became a nationwide standard, with at least two other states adopting similar regulations. Most large construction companies, as they became aware of the new regulations, started having their welders certified in accordance with approved guidelines. Until this time, most welders considered themselves "certified" which was a term without meaning. Once the welders learned they would have to certify, or re-certify, to prove their proficiency, they obtained additional training as required to meet the various welding codes used in Alaska.

The additional requirement of licensed welding inspectors so enhanced the overall quality of major construction projects that many companies (including the major oil companies) who had established quality control groups made the acquisition of this license mandatory for employment or promotion. Alyeska Pipeline Service Company felt this program was important enough to set up an extensive (and expensive) welding inspector training program for their inspectors. Industry in the "lower 48" has started to follow the example set in Alaska for certifying welders via welding inspectors. This standard has considerably increased the level of expertise in weld inspection.

As you know, one of the major reasons for expensive repair work on the Trans-Alaska Pipeline was due to inadequate and/or incompetent weld inspection. This one item caused millions of dollars of additional expense to the consumer.

The high weld reject rate and lack of knowledgeable, qualified welding inspectors on this project was one of the main reasons the State of Alaska elected to regulate welders and inspectors in the first place. With the forthcoming construction of the natural gas pipeline, the same problems will arise if there is no regulation to govern them. Welders will be qualified incorrectly (or not at all), and welding inspection will be done by the "brother-in-law" system or by individuals the contractors believe will cause the least amount of weld repairs. This possible situation is not an exaggeration; these things did occur during the construction of the Trans-Alaska Pipeline and will occur on the gas line if not closely governed.

As with any regulation or law, there are "special interest" groups that may either benefit or be adversely affected by the law. This analogy certainly applies here. There is little doubt that the three or four testing inspection laboratories in Alaska derive a certain amount of business because of the regulations. However, if these labs were not available locally, the work would simply be provided by "lower 48" companies.

This board has found that most individuals who are opposed to the regulations either can't pass the professional examination (or certification) or have a contrary special interest. One special interest group is working to set up a separate State organization for personal benefit called a Welding Bureau. This was suggested in Senate Bill No. 121, submitted by Senator Bill Summner in 1979.

What is wrong with this?

Industry's opposition to the present regulation has been extremely light. In fact, most negative feedback from the industry involves suggested revisions to the regulations, rather than opposition to the regulation itself. We agree that it does need revision. The proposed changes will make it easier for industry to comply with the regulations.

During the public Sunset hearings, many individuals from within the industry testified in favor of continuing the board and its regulations. Of all the testimonies submitted, only two were negative. Neither individual was licensed as an inspector, and both worked for the State in educational areas. It is hard to understand why a professionsl board was allowed to be Sunsetted when almost all the public input was positive. The board believed then, and still does, that it exists as a board to protect the public. We satisfied both the public and industry but, apparently did not satisfy the members of the Sunset committees.

What about Budgets and Board.

A significant result of present regulation that the legislative audit did not and could not cover is the fact that the overall welding quality in the State has taked a significant step forward since the enactment of the welding inspector regulation. Better welding quality translates directly into economic and safety benefits for the public.

There are many welding projects throughout the State that have been brought to a safe standard by the conscientious inspection of licensed welding inspectors. These cases do not reach the public's awareness because they are not given the publicity that a catastrophic failure would create. The public benefits are all around us in our everyday use of welded products and facilities.

Our point is this: Industry has accepted this regulation as an important tool for controlling quality. To let the board, and subsequently the regulation, cease to exist at a time when industry is interested in (and receptive to) a governing regulation, is certainly not in the public's best interest.

Your consideration of re-establishing the professional and vocational regulations, as defined in 12AAC72, and continuing the existance of the Board of Welding Examiners, as defined in State Statute AS 08.99 and House Bill No. 595, is sincerely solicited.

This is a unanimous opinion from the board.

Respectfully Submitted,

CHAIRMAN TERRY MARTIN

LEGISLATIVE HOUSE LABOR & COMMERCE COMMITTEE
TWELTH ALASKA STATE LEGISLATURE
POUCH V
JUNEAU, ALASKA 99811

Dear Sir:

It has come to our attention that this important piece of Legislative Business has been put on the back burner of importance by the last Legislature. As was brought to everyone's attention by the construction of the Oil Pipeline, a serious lacking of qualified Alaskan Welding Inspectors was apparent. With the possibility of pending construction of the gas pipeline, and other major construction projects, the deletion of this legislation would be of no benefit to the State of Alaska, and in fact a tremendous disservice to Alaska and Alaskans.

It is our opinion that the State Board of Welding Examiners and State licensing of welding inspectors has been effective and has done a valuable service to the citizens of the State of Alaska by increasing the quality of welders and quality of construction. We also support the necessity of the Board of Welding Examiners as they are the only means of policing the regulations.

Licensing Welding Inspectors in our opinion is the only feasible way to protect the public without increasing the bureaucracy.

As you know, if HB 595 is not acted upon before June 1982 the Board and licensing will be terminated and the State will have no guidelines for welding quality in Alaska and this would be another serious disservice to the Alaskan public.

Enclosed are several documents containing information pertaining to this issue:

1. An overview of the sunset process.
2. A copy of HB #595 currently in the Labor and Commerce Committee.
3. A probable successful route for HB #595.

With your support, this legislation can be inacted between the beginning of the new legislative term in January and the June of 1982 deadline, if it is moved properly through the various committees to the floor.

At your February meeting we implore you to act in favor of retaining the Board and licensing as it presently exists.

Sincerely,

HARRY F. BARNES

RANDOLPH L. BARNES

B. MULCAHY (SEN.)
J. HAMMOND (GOV.)

OVERVIEW : SUNSET REVIEW PROCESS

State law requires that licensing boards justify their existance approximately every five years.

The sunset review process involves the following basic steps.

1- A termination date is set by statute for an existing board.

2- A performance audit of the board is conducted by the Division of Legislative Audit during the calendar year prior to the termination date.

3- During the session immediately preceding the termination date the legislature sets up a committee* to hold hearings and make recommendations to the legislature on the board under review. At these hearings the Department of Commerce and Economic Development and the interested public give testimony.

4- Based on the hearing testimony, the findings of the performance audit and any other factors that the legislature wishes to consider, a decision is made to :

A) eliminate the licensing process,
B) modify the licensing process, or
C) continue the licensing process unchanged.

The fundamental questions that underlie the sunset review process are :

1- Is the licensing process necessary to protect the public from serious and likely harm? What alternatives to the present licensing process exist?

2- Is the board necessary to the licensing process? Is board licensing the most effective way to protect the public? Is board licensing the most economical way of protecting the public? Is board licensing the most desireable way to protect the public?

Other less fundamental, but often equally important, questions are raised during the sunset review process, usually by the performance audit. These questions usually include :

1- How efficiently has the board been operating?

2- How responsive has the board been to the public?

3- Has the board been unnecessarily restricting entry into the profession?

4- How conscientious has the board been in meeting its statutory and other obligations?

* committee of reference

PROBABLE SUCCESSFUL ROUTE OF HB 595

1- HB 595 was introduced on 5/26/81 and referred to the Labor and Commerce Committee.

2- If the House Labor and Commerce Committee approves HB595 as is, it will be referred to the House Finance Committee.

3- If the House Finance Committee approves it as is, it will be sent to the House rules Committee for calendaring for a vote on the floor of the House.

4- If the full House approves the bill, it will be sent to the Senate for its consideration.

5- It will be referred to the Senate Labor and Commerce Committee for consideration.

6- If Senate Labor and Commerce Committee approves it, it will be sent to the Senate Finance Committee for consideration.

7- If the Senate Finance Committee approves it, it will be sent to the Senate Rules Committee for calendaring for a floor vote in the Senate.

8- If the Senate approves it as it was sent over from the House, it will be sent to the Governor for signature or veto. If the bill has been changed in the Senate from the form and content it was approved originally in the House, it would then be sent back to House for its concurrance in any changes prior to going to the Governor for his consideration.

HB 595

Comment on State Board of Welding Examiners

I was the first resident licensed Welding Engineer in Alaska. I consulted and wrote welding procedure when Haines to Fairbanks pipeline was laid, wrote successful procedures and tested welders for Elmendorf hospital welding after 2 months of failure by contractors to meet national strength tests.

I organized the Alaska Section of the American Welding Society and a sub-section in Kenai. Greatly concerned about the weld quality we were getting and the hanky-panky used by transient and local contractors, I spent thousands of dollars conferring with American Welding Society officials, the Canadian Welding Board (a business sponsored program to assure qualified weldors, foremen, procedures and inspection), Australian Welding Society, and met with Hawaiin officials. I organized the drive for the State Welding Board and was first chairman, also attended all meetings until the pipeline was started. I organized the 2-year-degree Materials Science Department at Anchorage Community College covering metals, plastics, joining methods, destructive and non-destructive metals testing. I set up the welding department with the best radiographic system north of Sacramento and tested some 1,000 welders during the years I ran the only qualified test lab in Alaska.

The system that has now evolved does not at all equal that of Canada, Australia or England in my judgment. Furthermore manual and semi-automatic welding has been substantially eliminated on high technology production. New aircraft replace metal by plastics. Welding is largely automated in manufacturing in Japan and other advanced technology areas. In Boston I saw machines used by Westinghouse, GE and Raytheon that automatically made 200 welds per second.

I saw robotic welding in Clinton, Massachusetts some

weeks ago that had only two middle age women in a giant clean room watching signal lights. Materials are stocked on the top floor, manufactured in enclosed machines on the second floor, and bundled or packaged on a lower floor. That company, with plants in Taiwan, Hong Kong, Australia, Europe, and South America will be 100 per cent robotized world wide in seven years. Turbine engine welding is essentially eliminated or robotized in the U.S.

Some manual welding will continue but quality of most welding is determined before the arc is started. Inspection by humans has never guaranteed quality and doesn't now. There are grievous flaws in procedure, inspection, and quality. (For example on the new Arco building) under present law.

Quality control must be built in, not inspected in. I've seen inspectors "trained" from scratch and certified under present Alaska law in six weeks, and I am convinced by what I see and by what reports I get from some of the finest men out in the field that the system we ended up with hasn't assured welding quality.

Our original intent to improve quality by incentives to private enterprise as some other countries do has turned into larger government.

With deepest regret, after all the selfless efforts and thousands of unpaid hours put in by many on the program, I now feel that it is not really worth the cost and the delays it causes.

Howard Long PE

DEAR MR. MARTIN,

AS A CERTIFIED WELDOR AND SECTION CHIEF FOR AIRCRAFT AND MISSLE WELDING AT ELMENDORF AFB DOING ALL CERTIFIED WELD REPAIR ON ALL MILITARY AIRCRAFT IN ALASKA I CAN ATTEST TO THE FACT THAT THE STATE OF ALASKA HAS A RESPONSIBILITY TO ITS PEOPLE TO PROVIDE A STRINGENT GOVERNING BODY TO REGULATE STANDARDS AND PROCEDURES TO CERTIFY WELDORS IN THIS STATE. MENTAL AND CABLE FRACTURES ALONE SHOULD MANDATE THE REESTABLISHMENT OF THE STATE BOARD OF WELDING EXAMINERS.
I THANK YOU FOR YOUR DILIGENT, RESPONSIVE CONSIDERATION IN THIS MATTER.
IF I MAY BE OF HELP IN THIS MATTER PLEASE FEEL FREE TO CONTACT ME.

SINCERELY,

Rex J. Close

REX J. CLOSE

HOME 333-8881
WORK 552-5425

DATE: January 25, 1982

TO: All State Licensed Welding Inspectors

FROM: Donald M. Lockman, Chairman
State of Alaska Board of Welding Examiners

SUBJECT: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existance.

On January 20, 1982 a committee meeting was held in Juneau by the House Labor and Commerce Committee headed by Chairman, Terry Martin and attended by Vice Chairman Bylsam and Committee members Randolph, Rogers and Gardiner. Mr. Ken Lomax and myself were present at the meeting and the outcome was as follows:

1. In talking with Representative Anderson, he illustrated that correspondence received in his office was negative which opposed continuing the board. However, he did not have but a few letters in receipt. He was projected a positive direction by Mr. Lomax and myself and decided to evaluate future letters before making a decision on HB #595.

2. Two persons in attendance were Mr. Louis Russo and Mr. Erv Long of Arctic Foundations who testified against the Board and painted a very detrimental picture of welding inspection not being needed by licensed individuals.

3. The Labor and Commerce Committee had correspondence which appeared to address a need for a Welding Bureau and possibly licensing of welders being controlled out of the State Department of Labor.

4. There were various letters opposing the Board from several companies associated with Mr. Russo and references of opposition to the Board from the Department of Labor.

5. There was a telephone campaign in Anchorage to companies to call Juneau to oppose the Board. A few called the Testing Institute to find out what they were supposed to be opposed to.

As you see, a few that holler the loudest can be heard the most. It appears at this point there will be no future need for welding inspectors in Alaska or if so, they will be from the brother-in-law system.

We did persuade the Committee to meet again in February so a more responsive opinion could be made. However, if the people who are in favor of the Board don't correspond with this Committee, the outcome will be the same.

If you believe in quality welding in Alaska, then you must tell this committee either in person or by letter. This is your last chance to keep a quality standard of welding for the protection of the public. If this committee decides to support the bill it will probably clear the other committees also, but if this Committee decides against the board, we will all probably function under a welding bureau.

AMERICAN WELDING SOCIETY

January 29, 1982

AWS Member:

There is a House Bill (HB 595) in Juneau in the Legislative House Labor & Commerce Committee to reestablish the State Board of Welding Examiners which is being abolished by the Sunset Legislation. If this bill is <u>not</u> passed, there will be no regulations in Alaska for the certification of welders or inspection of weldments. If the licensed Welding Inspector is abolished;

1. Who will certify the welders in Alaska for Alaska work?
2. A welder will be able to come into Alaska without proving his or her ability and take an Alaska job.
3. How would we safeguard against false welder certification papers?
4. Who will be the responsible persons to inspect welds?
5. Is it in the public's best interest to <u>not</u> test the knowledge of a Welding Inspector?

There is no question about the need for a welder to be certified, the question is always (1) Certified for what application? (2) Certified by who?

We have today a proven mechanism to safeguard the Alaskan public against bad welding. To abolish this mechanism or trade it for some other that may not work or damage the quality of future projects is certainly <u>not</u> in the public's best interest.

The American Welding Society's total existance is to create better welding for the public's safety.

The Executive Board of the AWS met 1-29-82 and is soliciting your support in passage of HB 595. This support must be heard before 2-20-82 in Juneau before the next committee meeting.

You can call 278-3668, the State Information Center and at no cost, in 50 words or less have a message transmitted to the House Labor & Commerce Committee. Or, you can write to:

Representative Terry Martin, Chairman
Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Action on your part is required to keep Alaska safe, don't just let the other guy do it, he may not.

Sincerely,

Donald M. Lockman
Chairman

Juneau, Alaska 99811

In reference to your consideration to abolish or reestablish the Board of Welding Examiners, I feel it is necessary to consider the possibility of negligence in areas of welding inspection by persons who have not given proper proof of their inspector qualifications. I feel the only authorative body in this area is the Board of Welding Examiners.

By abolishing the Board of Welding Examiners the eventuallity of loss in lives and property by inadequate welding inspection can not be overlooked.

I feel it is imperative to reestablish the Board to allow no leeway for incompetence or abuse.

Sincerely,

William R. Holt

CHAIRMAN TERRY MARTIN
LEG. HOUSE LABOR & COMMERCE COM.
12TH ALASKA STATE LEG.
POUCH V
JUNEAU, ALASKA 99811

DEAR CHAIRMAN,

I AM WRITING TO YOU IN RESPONSE TO YOUR MEETINGS CONCERNING THE STATE BOARD OF WELDING EXAMINERS. I DON'T VOICE MY OPINION TOO OFTEN, BUT THIS CAUSE, AND THE STATE OF ALASKA ARE SOMETHING I FEEL VERY STRONGLY ABOUT. I FEEL I SHOULD DO EVERYTHING I CAN TO CHANGE YOUR OPINION OF DISCONTINUING THE WELDING EXAMINERS BOARD. I HOPE THIS LETTER IS NOT TOO LATE.

BY TRADE I AM AN N.D.E. TECHNICIAN (A RELATED INSPECTION FIELD), Q.A., Q.C. INSPECTOR. I HAVE WORKED IN ALASKA ON THE NORTH SLOPE PROJECTS BOTH AS AN N.D.E. TECH. AND A LICENSED WELDING INSPECTOR. ALASKA IS A GREAT PLACE TO BE ABLE TO WORK. WHEN I'M NOT IN ALASKA, I WORK IN THE STATE OF WASHINGTON. WORKING ON THE W.P.P.S.S. NUCLEAR PROJECTS. AS YOU ARE AWARE, ALASKA PROBABLY DRAWS MOST OF IT'S "EXTRA" WORK FORCE FROM WASHINGTON.

OVER THE PAST THREE YEARS I'VE BEEN ABLE TO BE PART OF THE WELDING FIELD HERE IN WASHINGTON. IN MY EXPERIENCES AS AN INSPECTOR, I'VE FOUND IT TO

BE TRUE THAT THERE IS A COMPARITIVELY FEWER NUMBER OF CAPABLE INSPECTORS THAN THERE ARE PEOPLE IN THE INSPECTION FIELD. I WOULD LIKE TO SEE ONLY BEST WORKING IN ALASKA. ESPECIALLY IN SUCH A DRASTIC WORKING-LIVING CHANGE AS THE NORTH SLOPE IS.

THE WELDING INSPECTION BUSINESS IS A RELATIVELY EASY FIELD TO GET INTO, ESPECIALLY IN A NON-UNION AREA. A PERSON CAN BE TRAINED AT WILL, AND MANIPULATED TOWARDS THE JOB. IF HE IS TRAINED WELL, THAT IS GOOD, BUT NOT ENOUGH. IN THE UNIONS (PIPEFITTERS LOCAL 598) THE APPRENTICESHIP PROGRAM IS GETTING BETTER ALL THE TIME. THE JOURNEYMAN INSPECTORS COME FROM ALL AREAS AND ALL BACKGROUNDS. MANY JUST BARELY MAKING IT. MANY WITH PUMPED UP CREDENTIALS. MANY SHOW A LACK OF AMBITION AND NO INITIATIVE.

I BELIEVE THAT ALASKA IS TRUELY THE LAST FRONTIER. IT IS MEANT FOR THE YOUNG, AMBITIOUS, THE HARDY, AND THE SURVIVORS. IF WE ARE GOING TO DEVELOPE WITH MODERN TECHNOLOGY, LET'S DO IT RIGHT! LETS <u>DON'T</u> DO WHAT WE'VE DONE TO THE NUCLEAR FIELD.

WE NEED THE ELEMENTARY FOUNDATION, THE STEPPING STONE TO PROFESSIONALISM. WE NEED A GROUP, THE COMMITTEE, TO AT LEAST HAVE A MECHANISM TO SCREEN AND WEED OUT THE UNDESIRABLES. TO TAKE ONLY PEOPLE THAT HAVE PROVED TO THE PROFESSION

THAT THEY HAVE THE BASIC KNOWLEDGE, AND THE ASSERTIVENESS TO PERFORM IN A PROFESSIONAL MANNER. BY PASSING WHAT IS NOW REQUIRED BY THE BOARD IS A VERY GOOD TEST OF PROFESSIONALISM AND CHARACTER.

WE DON'T NEED THE SUPERVISOR FATHER SENDING FOR HIS COLLEGE KID SON, TAKING HIS TESTS FOR HIM ON THE JOB, THEN SENDING HIM OUT IN THE FIELD AT THE EQUIVALENT RATE OF A THIRD YEAR APPRENTICE. OR, A CONSTRUCTION COMPANY OWNER SENDING HIS LOCAL OKLAHOMA BUDDIES UP TO ALASKA FOR PAYMENT FOR BUILDING SOME BARNS ON HIS OKLA. HORSE RANCH.

AS FOR MYSELF, I PLAN TO MOVE TO ANCHORAGE, AS SOON AS I FIND A SEMI-PERMANENT JOB.

SINCERELY,

Tony Morales

Juneau, Alaska 99811

Dear Mr. Martin:

Persuant to the continuation of the State Board of Welding Examiners, I forward my approval and support of the Board.

I have been a State of Alaska Welding Inspection since the summer of 1978, and I do support now as ~~I did prior to testing~~ and obtaining my American Welding Society Nation Welding Inspectors Certificate and State of Alaska Welding Inspector's License, the present system for assuring that those that are presently licensed by the State of Alsaka have passed a minimum requirement of five (5) years welding related experience and the A.W.S. C.W.I. examination. Although I do agree that there may be a need for some minor language changes to the present State Board of Welding Examiners Regulations, I feel they are quite adequate.

My present position is North Slope Fabrication Supervisor for Sohio Alaska Petroleum Company and my most recent prior position was the Quality Control Manager for Morrison-Knudsen on the Arco Alaska, Kapurak project. Both of these positions, as others I have held. have brought me to a front line position where welding quality is of prime concern.

My observations have proven that persons licensed under the present State of Alaska welding inspector's licensing system are far more experienced and qualified than others that may have acquired jobs as Welding Inspectors via osmosis or other appointed or brother-in-law systems.

Granted, true welding engineers (8 years schooling) have excellent qualifications. They are few and far between. While other engineers may possess excellent qualifications also, they have little or no welding knowledge. I have backed this statement many times while working in this field, as many engineers have come to myself and other Alaska licensed Welding Inspectors for assistance and direction in welding related matters.

Many of those persons opposing the present system may find the present requirements and testing to be too much for their welding related knowledge and would like to see the Board abolished and an appointment system enacted.

I thank you for your efforts in this matter.

Truly yours

January 26, 1982

Representative Terry Martin
Chairman, Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

I was just notified that the sunset law on the Alaska Welding Board is due to run out, and that it is possible the board may be eliminated. This would be a mistake in my judgment.

In 1974 I became Inspection Supervisor for Brown & Root Construction Company working for British Petroleum Company, North Slope, Alaska. At the peak of activities I had 32 inspectors either on the slope or on R&R. Out of 32 I could only count on ten (10%) percent for acceptable knowledge and integrity; the other 90% were company "good old boys", I was not allowed to fire or hire as per company policy . After the implementation of licensing, about 20 of the "good old boys" were unable to qualify and were slowly removed from inspection.

The licensing of inspectors, by the board guidelines, demonstrates a certain level off proficiency and knowledge. The trend of licensed inspectors is not to buckle under to company pressure for production; thereby increasing the quality, and decreasing the chances of product failure.

Sincerely,

James W. Harris

ATTN: Chairman Terry Martin

Dear Mr. Martin:

This letter is to let you know that I totally support the continuation of the State Board of Welding Examiners.

I feel it is of great importance to the people of our state that we continue to strive toward safety and excellance in the welding field. The continuation of the State's policy of licensing welding inspectors is the only way to carry on our record of excellance and safety. Without the state licensing of welding inspectors we will no longer be assured of the unbiased and high quality of welding inspection we now have within our State.

Yours truly,

Bob McDonald

REQUEST YOUR SUPPORT FOR HB595. ALASKA IS A HEAVY INDUSTRIALIZED PETROLEUM STATE. COMMON SENSE DICTATES AND PUBLIC SAFETY DEMANDS STRINGENT WELDER CERTIFICATION AND WELDMENT INSPECTION. QUALITY CONTROL FOR WELDING IS EQUALLY IMPORTANT IN THE OIL INDUSTRY AS IT IS IN THE NUCLEAR FIELD. THIS WAS PROVEN BY THE FACT EVERY WELD ON THE ALYESKA 48 INCH MAINLINE WAS X-RAYED AND VISUALLY INSPECTED. THOSE SEEKING TO ABOLISH THE STATE BOARD OF EXAMINERS ARE WELDERS AND CONTRACTORS UNWILLING, UNQUALIFIED OR BOTH TO OPERATE UNDER STRICT CODES AND INSPECTION.

Subject: Welding Regulation Hearing
February 26, 1982

Gentlemen;

We are writing in response to the paid advertisement on Sunday, February 21, 1982, in regards to Legislative House Bill #595.

Arctic Alaska Drilling Company is an Oil & Gas Well Drilling Contractor in Alaska. We hire welders to help us assemble, repair, and maintain our Drilling Rigs. We hire only Certified Welders. It is our policy to do our own quality control with people who are highly skilled in the welding industry. We are now bulding Rig #7, and to date we have not experienced any welding failure of any type, in our considerable years of operation.

This Bill #595 appears to be another Regulatory Commission that will need to be funded by the consumer, as business never pays for anything. At this day and time when Government is trying to control spending and help the people trying to cut costs, we feel this bill should not be passed.

Very truly yours

NEW ADDRESS

February 25, 1982

The Honorable Terry Martin, Chairman
House Labor and Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Martin:

I have examined and carefully considered House Bill 595 -- State licensing of welding inspectors -- and respectfully urge you to vote against passage.

In this highly competitive industry, a welder's performance must be measured by his company to assure not only quality, but also compliance with Federal, State and Municipality codes and standards already in existence. Whether that inspector is licensed by the State is of little consequence as his performance will be dictated by his own integrity and the integrity of his employer.

The public will gain little protection against shoddy work by the licensing of welding inspectors. Rather, the public will ultimately be protected by the unhindered workings of the free marketplace in that companies or individuals offering an inferior product will be forced out of business.

Thank you for your time and consideration.

Very truly yours,

Charles F. Moore
President

HB 595

FROM: THOMAS J. MARTIN
1107 W 53RD AVE
ANCHORAGE 99502 (H) 279-2368

QUALITY IN WELDING DOES NOT COME THROUGH INSPECTION ALONE. QUALITY BEGINS ON THE DRAWING BOARD AND IT IS AN ENGINEERING FUNCTION. QUALITY IS PRODUCED BY QUALIFIED SUPERVISION WHEN WELDMENTS ARE MADE. ONE CANNOT INSPECT QUALITY INTO WELDMENTS, IT'S TOO LATE THEN. INSPECTION MERELY PROVES THAT WHAT WENT ON BEFORE WAS CORRECT. HB 595 PLACES THE CART BEFORE THE HORSE AND IS WHOLLY INADEQUATE FOR GOOD WELDING.

Speaker of the House
[redacted] Dav. J. Hammond
Lt. Dav. Terry Miller
Prest. of the Senate
Sen. Bob Mulcahy.

Dear Mr. Speaker. [Dav. Ham; etc
separate letters

I wish to confer to you that the House Labor & Commerce Committee has review the Board of Weldings Examiners and has voted to sunset this Board. This has come as a surprise to most of us who in our first hearing felt the Board could be extended. However during the past month considerable public response has come to the Committee in opposition to extention. it the reported

required by AS 44.66.050(d) Attach for your review the important correspondences that explicitly discribe the concerns of professional and lay Alaskans if the Welding Board were extented.

It is our firm conviction that the Welding Board serves no public service.

Yours very truly

TABLE OF CONTENTS

	Page
Purpose of the Review	1
Organization and Function	2
Report Conclusion	3
Prior Audit Recommendations	5
Agency Response:	
State Board of Welding Examiners	14

PURPOSE OF THE REVIEW

In accordance with the provisions of Alaska Statutes 24.20.271(1) and 44.66.050 (sunset legislation), a follow-up review of the Board of Welding Examiners was conducted to determine whether the recommendations presented in the report entitled, A Performance Review of the Board of Welding Examiners, June 8, 1979, have been implemented, and, if not, whether those recommendations are still pertinent.

ORGANIZATION AND FUNCTION

The Board of Welding Examiners was established by the 1968 Session Laws of Alaska. It is organized under the Department of Commerce and Economic Development which provides administrative and investigative support through the Division of Occupational Licensing.

The Board consists of seven members with extensive experience in welding who are appointed by the Governor for staggered five-year terms. At least three members must be engineers, i.e., with engineering degrees or registration as an engineer and at least five years engineering experience.

The functions of the Board are addressed in AS 08.99. Among the powers and duties cited, the statute directs the Board to: promulgate rules and regulations regarding the certification of welders; examine, certify and renew certification; define tests and certification methods; report annually to the Legislature and Governor.

Under regulations which became effective in August, 1978, the Board of Welding Examiners is licensing "welding inspectors" (WI). Among the functions of the WI are testing weldments and issuing welder qualification certificates. Such certificates are required under the regulations for welders performing operations in which weldment failure would be hazardous to life or property.

Requirements for WI licensure are based on the American Welding Society (AWS) program for certification of WI's. The written examination required for licensure is administered by AWS. In addition to other requirements for AWS certification, an applicant for State WI licensure must have passed a welder qualification test, demonstrating practical skills.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these issues, the legislative oversight committees should consider the findings and alternatives presented in this report in reaching their decisions.

Report Conclusion

In our opinion, there is not a sufficient public need for continuing either the Board or State licensing of welding personnel.

Most consumers (e.g., engineers, construction and pipeline companies) of welding services possess adequate knowledge to properly evaluate the qualifications of those offering the service. To assist in identifying qualifications, the American Welding Society administers a certification program for welding inspectors, the only classification of welding personnel being licensed by the State. If it is determined that State regulation of welding is desirable, less restrictive alternatives--such as statutory requirements for welder, qualification certificates--are viable (see Prior Audit Recommendation No. 1).

In the event that the Board is reestablished by the Legislature, certain changes should be implemented in order for the Board to more effectively serve the public.

The Board has made some progress in the implementation of our prior audit recommendations. Specifically, they now review applications prior to licensing, have adopted goals and objectives, and have prepared an annual report (See Prior Audit Recommendations No. 2 and No. 6).

The Board has proposed changes to regulations and statutes in response to some of our prior recommendations. However, the regulations have not been adopted nor have the statutes passed (See Prior Audit Recommendations No. 3, No. 4, and No. 5).

The Board has also proposed regulations which would expand their jurisdiction over compensated welding operations that involve economic loss. The Board has not defined "economic loss" nor has it defined other terms which need clarification (See Prior Audit Recommendation No. 5).

Other problems noted in our prior report have not been rectified. For example, application forms have not been revised, the terms and sources of nominations for Board membership has not changed and a Board vacancy has not been filled (See Prior Audit Recommendations No. 2 and No. 3).

PRIOR AUDIT RECOMMENDATIONS

Prior Audit Recommendation No. 1

We recommend that the Board of Welding Examiners be allowed to terminate, and that the State licensing of welding personnel be discontinued.

In determining whether there is a continued public need for the Board of Welding Examiners, several factors should be considered.

The primary goal of regulating occupations is to protect the public. Licensing is desirable when:

1. The unlicensed practice of an occupation poses a serious risk to the life, safety, health, or economic well-being of a relatively large number of consumers.

2. The consumers of a service are at a disadvantage in evaluating the qualifications of a provider.

3. There is evidence of abuse by providers of the service to which the consumer has inadequate recourse through the general law.

Because of its relationship to the integrity of a structure, inferior welding has the potential of resulting in physical, economic, or environmental harm. However, we believe the potential has a public impact only in cases of large-scale projects, such as public structures, commercial buildings, or ventures like the pipeline.

Persons responsible for the construction of such projects, who are actually the "consumers" of welding services, can be expected to have the experience and knowledge needed to evaluate the qualifications of welding personnel. This is especially true now that the American Welding Society (AWS) certified Welding Inspectors (WI) program provides a means of identifying qualified inspectors. Furthermore, the AWS program includes a code of ethics and procedures for handling consumer complaints.

It should be noted that if an interstate gas pipeline is built, construction activities would be under the jurisdiction of the Federal Power Commission. The State Board's authority to impose welding regulations over such a pipeline is doubtful.

Also noteworthy is: (a) AWS's lack of support for State licensure of welding personnel, and (b) that only one other state to date requires licensing of WI's.

We found no evidence that State licensing of WI's affords significant additional protection to consumers. Furthermore, of the few complaints filed with State agencies against the welding occupation, only one alleged inferior welding practices, the remainder concerned unlicensed practice of the occupation or problems encountered in obtaining a license.

If, as a result of the "sunset" process, the Legislature determines that regulation of welding is needed, less restrictive alternatives are, in our opinion, viable. Welder qualification certificates can be required by statute and, if desired, the AWS certification program for WI's could be adopted by reference.

While we recognize the time and effort contributed by Board members, we do not believe that a sufficient public need exists for continuing the present licensing and regulatory structure.

Legislative Audit's Current Position

Chapter 153 of the 1980 Session Laws of the State of Alaska extended the date of termination of the Board until June 30, 1981.

In our opinion, there is not a sufficient public need for continuing either the Board or State licensing of welding personnel.

However, in the event that the Board is reestablished, we recommend the following changes be made in its operation.

Prior Audit Recommendation No. 2

The Board should assume a more active role in the licensing process.

During our test of licensing files we noted the following:

1. Application forms do not request all the information necessary to determine if requirements for licensure have been met. There is no provision for documenting qualifications for initial licensure (as defined in 12 AAC 72.065(a)(1-8), except through the submission of AWS QC-1 certificate. Applicants for renewal are not asked to provide evidence of the required visual examination. Consequently, none of the licenses renewed in 1979 documented that this requirement had been met.

2. At the direction of the Board, the licensing examiner was issuing licenses to applicants prior to a review of qualifications by the Board. In August 1978, the Board began licensing "welding inspectors" and discontinued licensing "weld qualifiers". The change produced a certain degree of confusion on the part of the licensees, as well as the examiner, regarding the qualifications for licensure. As a result, licenses were issued to 4 (out of 48 tested) applicants who did not submit adequate proof of meeting the qualifications of a welding inspector.

AS 08.01.070(6) requires licensing boards to pass on the qualifications of applicants for licensure. As evidenced by the above described findings, current review procedures are not effective. As a result, the public is not being protected from unqualified practitioners, which is the primary objective of occupational licensing. We therefore recommend that no license be issued until the Board has thoroughly reviewed the qualifications of an applicant and has determined that all requirements for licensure or renewal have been met.

Legislative Audit's Current Position

The Board now reviews applications prior to the issuance of a license. However, the application form still does not request all the information necessary to determine if requirements for licensure have been met. In addition, the Board is not requiring a visual examination. The Board has proposed regulations that would eliminate the requirement for an eye examination.

We recommend the Board revise the application form to require the information necessary to determine if requirements for licensure have been met.

Prior Audit Recommendation No. 3

To ensure adequate representation of the regulated occupation and the general public: (a) the composition, terms, and sources of nomination for Board membership should be reviewed and amended; (b) the Office of the Governor should make appointments in compliance with statutory requirements and in a timely manner.

As provided in AS 08.99.010-050, the Board of Welding Examiners consists of seven members with extensive welding experience, three of whom must be engineers. Members are appointed by the Governor for staggered five-year terms from nominations submitted by the Alaska Chapter of the American Welding Society and the Alaska Society of Professional Engineers.

Board Composition and Nominations

Over 20% of the licensed welding inspectors as well as one in five Board members responding to Legislative Audit questionnaires felt that the statutory requirements do not ensure adequate representation of the occupation. Their comments included opinions that the present Board consists of too many persons involved with test labs and that more than one member from the same firm should not serve concurrent. It was suggested that the Board should represent the various areas of the occupation: engineers, test labs, construction, fabrication, and petrochemicals.

Furthermore, it was expressed that nominations should be accepted from the entire industry rather than two societies to which many qualified, interested persons are not known.

In addition to statute changes in Board membership suggested by licensees, in our opinion the Board should include at least one lay member who has no direct financial interest in the regulated occupation. Although lay members lack technical expertise, they can and should contribute to policy formulation and enforcement decisions. The importance of a representative of the primary interest group, the public, should definitely be addressed.

Terms of Board members

Responses to licensee questionnaires also pointed to a significant opinion that Board member terms should be: (1) shorter (54% of those responding) and (2) limited to no more than two consecutive terms (80% of those responding). The reason most frequently expressed was to create a more responsive, active Board.

Size of the Board

In addition, we believe that the Board is unnecessarily large when compared with other State boards and considering it currently licenses only 50 persons.[1] We recommend a reduction in size to five members to increase operating efficiency and coordination with the Division of Occupational Licensing (OL) and to reduce associated travel costs.

Appointments

Our examinations of records in the Office of the Governor and the Division of Occupational Licensing showed that since 1973 the Board has had between three and eight properly appointed members at a given time. In fact, it met the requirement for seven members for only nine months during

---

[1] As of November 1980, about 100 persons were licensed.

the period reviewed. Of the "current" board, we finally determined--after receiving much conflicting information--that three terms expired in December 1978. In addition, only two of the seven members of the most recent board are engineers, as defined in the statutes.

In conclusion, we recommend that the Board seek changes in the statutes which will result in improved representation and efficiency of operation. Furthermore, as recommended in our October 30, 1978 performance review of OL, we urge the Office of the Governor to make more timely appointments to the occupational boards to ensure compliance with statutory requirements.

Legislative Audit's Current Position

The Board has not submitted the necessary statutory changes to implement our recommendations except for a proposed statute change that would add a public member to the board.

The Board now has three engineers; however, the Governor still has not appointed a replacement for a vacancy that occurred in the Spring of 1980.

We again recommend that the Board seek changes in the statutes which will result in improved representation and efficiency of operation.

Prior Audit Recommendation No. 4

The Board should propose revisions to the statutes in order to clarify: (a) the intended powers and duties of the Board; (b) how welding regulations are to be enforced.

A. Authority for the Board of Welding Examiners is found in AS 08.99, which was last amended in 1970. Since that time, changes in Board membership, activities, and regulations have occurred. As a result, several subsections of AS 08.99.080(a) no longer pertain to operations of the Board.

1. § 6 requires the Board to approve fees for welder certification tests. The Board no longer engages in this activity. However, this section was cited as the authority for charging fees for licensing welding inspectors.

2. § 10 states that the Board shall approve test facilities. The revised regulations omit this activity and instead address licensing of welding inspectors.

3. § 9 requires the Board to designate reporting procedures necessary to certify compliance with quality standards. No reporting methods are addressed in the regulations.

B. Statutes provide for the enforcement of welding regulations by both the Department of Labor (AS 08.99.080(b) and the Department of Commerce and Economic Development (AS 08.01.087). The dual assignment of enforcement responsibility has resulted in confusion. The assignment of investigative duties needs clarification so that regulations are adequately enforced, and consumer complaints are properly handled.

Legislative Audit's Current Position

The Board has requested the Division of Occupational Licensing to submit legislation to clarify the power and duties of the Board. In addition, the Board requested the Division to submit legislation to consolidate enforcement activity in the Department of Commerce and Economic Development. However, this legislation has been withdrawn because of opposition by the Department.

Prior Audit Recommendation No. 5

The Board should continue its efforts in revising administrative regulations.

One of the primary activities of the Board over the past several years was the substantial revision of 12 AAC 72, the administrative regulations governing the occupation of welding in Alaska. The changes became effective August 21, 1978.

In the course of our review, we noted several areas of 12 AAC 72 which merit further consideration and possibly amendment.

1. Requirements for welder qualification (12 AAC 72.015) and welding inspector licensure (12 AAC 72.055) apply to all compensated welding operations in the State "in which weldment failure would involve hazard to life or property". The applicability of the regulations needs clarification to simplify interpretation and to make their enforcement manageable.

2. 12 AAC 72.045 requires "continuous employment" - a process (without interruption of more than 90

consecutive days) as a condition of maintaining a current welder qualification certificate. We believe this is unduly restrictive because:

a. The regulations also require that a certificate be current under the code or job specifications under which it was issued.

b. A welder qualified in several processes may be assigned by his employer to only one process for several months. Before he could be assigned to another process, additional time and expense would be required for retesting.

c. The limited construction season in Alaska causes many welders to be without work for more than 90-day periods.

3. 12 AAC 72.105 requires an annual renewal of welding inspector licenses. This conflicts with AS 08.01.100 which requires biennial renewal of occupational licenses. It also creates additional administrative effort for both the Division of Occupational Licensing and the licensee, with no demonstrable benefit to the public.

4. 12 AAC 72.085 provides for quarterly examinations for welding inspector license. The provision, which exceeds the regular semi-annual administration of the exam by the American Welding Society (AWS), was included to give sufficient opportunity to become licensed under the revised regulations. While we concur with the Board's reasoning, we feel they should review this policy in light of increased costs and the relatively small number (an average of 9) who take the exam each quarter.

In reviewing questionnaire responses from licensed WI's, we noted concern regarding the interpretation, acceptance, and enforceability of the regulations. Doubts concerning the enforceability were likewise expressed by Board members who responded to a separate questionnaire: three believed they could not be enforced, especially among small operators; two said they could be enforced if State funding for investigation was adequate.

We believe that the cited opinions of members of the occupation support our contention that additional revisions to the regulations are needed to make them clear, reasonable, and within the scope of the Board's purpose.

Legislative Audit's Current Position

The Board has proposed regulations to delete the continuous employment requirement and to have renewals based upon the expiration of an individual's AWS QC-1 certificate (3 years). The Board has decided to continue with the present four examinations per year. Furthermore, the Board has not clarified hazards to life or property and has proposed a regulation that would broaden the scope of their authority to include all compensated welding operations which involve "economic loss".

In our opinion, the addition of the proposed regulation on economic loss would substantially restrict the practice of welding without a corresponding benefit to the public. In addition, the Board still needs to clarify the meaning of "hazard to life or property" in order to simplify interpretation and to make their enforcement manageable.

Prior Audit Recommendation No. 6

With the assistance of the Division of Occupational Licensing, the Board should develop procedures for defining its objectives and reporting its performance to the Governor and the Legislature.

As part of the "sunset" process of determining whether there is a continued public need for its existence, each Board must identify formal objectives. Where practical, these objectives should be quantifiable so that the Board's performance can be measured.

The budget process is the vehicle by which State agencies usually identify goals and objectives. While OL prepares such documents on a division-wide basis, objectives and measurements have not been developed for individual boards (see our October 30, 1978 performance review of (OL).

Furthermore, although required by AS 08.99.080(a)(8), the Board has not been submitting annual reports to the Governor and the Legislature. We recommend such reports be prepared and contain, at a minimum, the following information:

1. Board's purpose and objectives.
2. Operating receipts and expenditures.
3. Participation by Board members.
4. Changes in statutes and regulations.
5. Significant activities and concerns.

The process of identifying objectives and reporting performance not only allows outside parties to evaluate the need for the Board, it also provides an important tool for the Board to evaluate itself and adjust its priorities for the most effective use of its resources.

Legislative Audit's Current Position

The Board has prepared an annual report for Fiscal Year 1980 and has developed goals and objectives for Fiscal Year 1981.

March 6, 1982 AS-13778

The Honorable Terry Martin (R)
House of Representatives
Alaska State Capitol
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

Subject: Alaska Senate Bill 757, Act Concerning the Continuance of Board of Welding Examiners.

With the impending vote on the Alaska Senate Bill 757, which calls for the continuance of the Board of Welding Examiners, I wish to voice my views on this bill. I currently hold an Alaska State Welding Inspector's license and have actively been involved in the welding field for thirteen years, with seven of the thirteen years spent on the North Slope working for the petroleum industry.

I am in favor of the continuance of the Alaska Board of Welding Examiners as set forth by the State of Alaska, Regulation 12AAC72. The main argument for continuing the Board is:

The present regulation, 12AAC72, as it is currently structured, allows private industry, through the selection of appointed members by the Governor, to enforce and carry out guidelines set down in the State Welding Regulations. This approach is:

1. Cost effective to the State due to the fact that policing to assure compliance, is borne by current revenues from licensing fees. On the other hand, if the Welding Board were abolished, it is likely that the Department of Labor would be empowered to enforce state welding regulations. Thus, additional "Qualified" Department of Labor welding inspection personnel would have to be employed to assure statutory compliance. This would require additional state revenues to operate at a time when state budgetary cuts are necessary.

2. Historically, the more qualified welding personnel have been employed in the private sector due to economics. Therefore, it is questionable whether a state board or bureau under the Department of Labor could operate more effectively than the currently appointed board.

ARCO Oil and Gas Company is a Division of Atlantic Richfield Company

3. Private Industry, especially the petroleum industry, must meet several code requirements and parameters (A.P.I., A.N.S.I., ASME) as it relates to welder qualifications and welding inspector qualifications during construction as well as maintenance operations. Here, again, these codes are the result of the public sector and industry in the adoption and their enforcement.

4. Lastly, the public who are intimately involved in the welding field take a professional approach in assuring that proper welding practices, code requirements, company specifications, and State and Federal regulations are adherred to.

The State of Alaska Board of Welding Examiners has done a thorough job in creating and adopting the current regulations, and to abolish this existing board and set up a State regulated and operated bureau or board, would serve no useful purpose.

Thank you for your time and consideration on this matter.

Sincerely,

David H. Derrer

Representative Terry Martin
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

SUBJECT: Alaska Senate Bill 757, an Act Concerning the Continuance of the Board of Welding Examiners

Dear Representative Martin:

The purpose of this letter is to express ARCO Oil and Gas, Prudhoe Facilities Project Group's position regarding Senate Bill 757.

We support the passage of this bill for the following reasons:

1. The Welding Board is comprised of members of private industry. Private industry therefore plays an active role in formulating and enforcing welding regulations through this Board.

2. Killing of Alaska State Senate Bill 757 would likely move jurisdiction of enforcement of welding qualification regulations to the Department of Labor. This, in turn, would create the need for added personnel in the department to carry out the duties of the current Welding Board and private industry. This would impose additional financial drains from State revenues and duplicate more than adequate industry efforts.

3. The movement of control to the Department of Labor would require the hiring of highly competent, highly qualified individuals within the Department of Labor to enforce the welding regulations. The hiring of these individuals would further deplete the supply of these highly qualified persons from the private sector.

In summary, ARCO supports the passage of Alaska State Bill 757. The Bill's passage would maintain the current Board of Welding Examiners. It would preclude the need for assumption of welding regulations by the Department of Labor and reduce costs that would be incurred by the State. Further, it would serve to reduce competition with the current competent private petroleum industry and construction contractors.

Thank you for your time and consideration in considering our opinion to this very important matter.

SUBJECT: Alaska State Bill 757 - Concerning the Continuance of the Board of Welding Examiners

Dear Representative Martin:

In reference to the above mentioned legislation, I am writing to voice my views and concerns. With over 14 years experience in the industrial construction and oil & gas industry of which the last 7 have been with the Prudhoe Facilities Project, I feel a need to address this issue. I presently hold an Alaska Welding Inspectors License and basically agree with the concept of this program and the laws that govern it. However, being directly involved with welding and piping inspection as my primary responsibility, I do not entirely agree with the acceptance criteria for persons applying for licensing approval, along with appointees of the Board itself. The basic concept of the Welding Board, made up of members of the industry, is a good one; the majority members of most design code committees are representatives of the industry they are policing.

The integrity of the facilities that industry is constructing is dependent upon it's own ability to police itself. In light of the fact that the State is facing a probable increase in major construction projects where critical welding could be a volatile area of concern, to abolish the Board now would be a mistake.

The obvious alternative for monitoring this activity would be for the State to establish a welding board or bureau under the Department of Labor. The citizenry of the State of Alaska are far more attuned toward a decrease in government bureaucracy than to create another taxing organization.

The simple economics of the issue show that there is no way that government can compete with private industry to attract the most qualified personnel. For the State to get into the business of policing the welding industry other than in specific areas, I think would be a practical and economic failure.

With some changes to policy and conditions of appointment, the Welding Board as it is now could be our least costly and most effective vehicle to guard against any major distractions like those that plagued the Alyeska Pipeline project.

Thank you for your time and consideration of these views.

Sincerely,

John P. Rosen

Subject: House Bill 595...Continuation of State Welding Board

Mr. Martin:

It has recently been brought to my attention the means being used to kill the Welding Board, is to hold it in your committee and not let it go to the floor of the house. This is simply a political ploy for you to get off the hook and not have to commit yourself on something that may be a little controversial, and cause you some political discomfort, Well I intend to make it known to as many of the voters of this state, and the voters of your particular district what is going on and what is at stake here.

It is my opinion that with the current Welding Board the legislature has laid the ground work for a safer more physically sound and ecologically safe future for this state. I was under the impression that we had learned by the mistakes and errors of the older states and that it was our intentions to keep clear of the same pitfalls. The newspapers report incidents daily of storage tanks and waste tanks that have been buried and sprung leaks contaminating surrounding areas for miles affecting drinking water ruining the soil for a long time. This is something we can control it may be impossible to completely stop, but it can be affectively reduced. The Welding Board is just one tool at our disposal. There are other ways and means to work at this but why stop something that is already in place and working, let's make it more affective let's put some teeth in it.

In the next few years the state is going to realize a large building boom. The outside interests with their money wells dried up are already converging on this state. They see this as a opportunity to make some fast money. It isn't to their particular interest to really give a damn how well built their structures are, because they hope by the time anything happens they will be long gone. It remains up to us, and the state legislature in particular, to see to it the standards of our building industry are kept high.

If you are able to kill this the way you seem to plan to do, what do we have left?

1. We will have a building industry without any set standards for welding quality. The standards will be left up to the goodness of the individual builders.

2. The only control will be if the individual designer requests or requires certain standards.

3. You will open the door for unrestricted building without any standardized testing and certification.

4. Here we are in a state that is highly active with earthquakes and we have members of our legislatures that don't care enough to pass a bill out of committee. You don't even have the courage of your convictions to come out against it, because you couldn't probably honestly justify them.

Since I started writing this I have found you are now sitting on S.B. 757, which has made it through to the House. If this bill is totaly stopped because of not getting out of your committee I promise I will do everything I can to get you out of office. This is a promise since you are affecting my future and I feel the future of safe construction for this state. I could have a lot more respect for y ur opinion if I felt you had one, but this way of handling it is no opinion. You have held this up for one year, it seems that some legislatures want it as the Senate Bill got through.

Sincerely,

Philip R. Hughes

February 1, 1982

Representative Terry Martin, Chairman
Legislative House Labor & Commerce Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, AK 99811;

Dear Representative Martin and Committee members:

Regarding the upcoming Sunset Legislation on the abolition of the Board of Welding Examiners, I would like to make a few comments. I am a State licensed welding inspector, and am very much affected by the actions of the board. I urge you to vote in favor of continuing the Welding Board for several reasons, including:

1. It protects the public. Welded construction is utilized in virtually every public building, bridge, and other structure. Without a reasonable amount of control on welding operations, serious flaws could occur that would needlessly endanger lives.

2. It protects the Alaskan inspector. Although some of my colleages groan about having to file for licenses, etc., I feel the Board is to all our advantage. It assures that qualified Alaskans get a fair shot at jobs in industry, and maintains a minimum standard of competence among its licensees.

3. It provides tighter control over who is allowed to perform a welding operation in Alaska. Many people who presume themselves to be good welders are in fact not, and many can and do perform work that endangers lives. By requiring any person who performs a welding operation to pass an applicable welding performance test, as administered by a State approved inspector, better control is maintained over the quality of welded construction within our state.

Now, granted, the Board of Welding Examiners is not perfect, nor can it hope to please all of the people involved with welding in the state. And, although I sense there may be some friction between several prominent members of the Alaskan welding community, I feel these problems should be resolved from within. So, with your vote to extend the existence of the Welding Board, you shall also be voting for the overall safety of the general public.

Sincerely yours,

John D. Phillips

Sir:

Regarding HB No. 595, continuing the Board of Welding Examiners: Let the sun set on it.

As a past chairman of the Board (1975-1976, during the pipeline boom), I never understood how it served to protect the life, safety and welfare of the public. I still don't believe that it does. In fact, it doesn't even ensure that a small number of welding technicians will be provided the lucrative livelihood which seems to be promised by the regulations promulgated by its members.

Civil engineers and architects, owners of structures, and contractors generally are cognizant of the need for inspection during construction. The American Welding Society has developed an excellent procedure for qualifying welding examiners, and there are several excellent firms offering such services in Alaska. I'm not convinced that we would even need a statute requiring this AWS qualification because I doubt if any engineer or architect would risk his reputation by hiring an examiner of lesser competence. (Incidentally, virtually all welding design and welding is accomplished through the use of AWS specifications.) With far less inspection than is exercised nowadays, the buildings in Anchorage survived the '64 earthquake to a remarkable degree.

Strangely enough, there is no Board regulating concrete construction, a structural system of greater complexity than steel, and definitely more prone to deficiencies in material, mixing, construction and, yes, even design. This observation also applies to lumber construction, and especially to locally manufactured wooden trusses now widely used in buildings.

My concern about the very existence of this Board is not a sudden whim; I enclose (without its enclosures) a copy of a letter I sent to the Board during 1977, receipt of which was not even acknowledged.

In closing, as a professional engineer with 27+ years experience in Alaska, including the design of welded, steel structures, I see no useful purpose in the Board of Welding Examiners. I recommend that it be discontinued.

Very truly yours,

John L. Cerutti

Board of Welding Examiners
Dept. of Commerce & Economic Development
State of Alaska
Pouch D
Juneau, Alaska 99811

Gentlemen:

I have reviewed your proposed amendments for Professional and Vocational Regulations, Chapter #72, Board of Welding Examiners. Some of the changes are excellent and others are of dubious worth.

12 AAC 72.01 . certificate required. This is fine in theory. In actuality, it will prove to be a monstrous nightmare and will cost the State far more than it's worth. To administer the paper work required will take a fair-sized staff -- probably three staffs because if this were centered in Juneau, it couldn't keep up with the welders. Note that the public is fed up with the ever increasing costs of government and that Gov. Hammond seems to be trying to keep the State payroll from expanding.

In the past I have held that the safety of the public can be assured just as well by requiring that all welding be done under the supervision of a qualified welder or a welder qualifier (as you now designate as a licensed welding inspector?). I reiterate that this procedure will be just as effective and I believe that it can be administered by the Board and the Division of Occupational Licensing without the addition of any personnel.

12 AAC 72.045 ... maintaining current ... "(2) the welder has been continuously employed on the welding process for which he is qualified". Doesn't this contradict all codes which permit a period of unemployment, especially API 1104 which, as I recall, extended the period from 90 days to a year?

12 AAC 72.055 Welding inspector license required. "A person may not ... inspect a welding operation ... unless he or she holds a current, valid welding inspector license."

I am enclosing a Xerox copy of the Alaska Statute covering licensing of architects, engineers and land surveyors, and I call your attention to Sec. 08.48.341(8) wherein registered professional engineers are empowered to practice a broad range of work, including "... and professional observation structures," and "... design ...,"

Your amendment is illegal as it applies to professional engineers because your Board doesn't have the authority to promulgate changes in any statute, especially in ones which are of no concern to you.

Furthermore, even if this requirement were enforceable on an engineer, it would be a peculiar creature of law; an engineer, in designing a structure, decides how its parts will be fastened together; if welding is the method selected, he then chooses the welding process and whatever changes he may wish to incorporate; he approves, or may even specify the welding procedure; and finally he approves the completed work -- he may, if he is satisfied that he has sufficient knowledge, elect to conduct all inspection of the welding himself, or he may retain a qualified person to perform such work. Note that when an engineer accepts work, it is his reputation and financial futures which are at stake. In another sense, the engineer would be put in the position of being forced to rely upon another party, which party would have virtually no liability in the event of a structural failure.

12 AAC 72.065 Requirement for welding inspector license. "(1) be a high school graduate ... etc." So long as a person is capable of reading and understanding whatever is necessary to ply his trade, what is the purpose of this extremely demeaning requirement?

The Board should not administer tests that it composes.

12 AAC 72.115 Duties and responsibilities of a welding inspector. "(18) be obligated to act with complete integrity in professional matters ..."As I recall, I saw an advertisement in the Anchorage Times, several months ago, wherein a Welding Institute stated that in addition to weld testing, it offered "engineering services". I call the Board's attention to Sec. 08.48.281; prohibit practice, of the same engineering statute cited earlier. I suggest that the Board look into this because it is an absolute violation of the law if that firm is not properly incorporated as an engineering corporation. A Xerox copy of this article is enclosed. See also Sec. 08.48.321, also copied and enclosed.

Very truly yours,

John L. Cerutti, P.E.

Chapter 99. Board of Welding Examiners.

Section
10. Creation and membership of board
20. Term of office
30. Source of appointments
40. Removal from office
50. Qualifications of board members
60. Meetings
70. Quorum
80. Powers and duties of the board
90. Applicability of Administrative Procedure Act
100. Expenses
110. Codes
120. Penalty

Sec. 08.99.010. Creation and membership of board. There is created the Board of Welding Examiners, consisting of seven members appointed by the governor. (§ 1 ch 151 SLA 1968)

Sec. 08.99.020. Term of office. Board members serve a term of five years. However, of the members first appointed, one shall be appointed for a term of one year, one for two years, one for three years, one for four years, and three for terms of five years. (§ 1 ch 151 SLA 1968)

Sec. 08.99.030. Source of appointments. The governor shall appoint board members from a list of persons prepared by the Alaska Chapter of the American Welding Society and the Alaska Society of Professional Engineers and submitted at least 30 days before the expiration of a term and not more than 60 days after a vacancy occurs in an unexpired term. The list shall contain not less than two recommended candidates for each appointment. The governor shall make appointments within 30 days after receiving the list. (§ 1 ch 151 SLA 1968; am § 1 ch 151 SLA 1970)

Sec. 08.99.040. Removal from office. Each member holds office at the pleasure of the governor notwithstanding the member's term. (§ 1 ch 151 SLA 1968)

Sec. 08.99.050. Qualifications of board members. Each member of the board shall be a citizen of the United States and a resident of the state. At least three members shall be persons with engineering degrees or registration as an engineer and each engineer member shall have at least five years engineering experience. All members shall have extensive experience in welding. (§ 1 ch 151 SLA 1968; am § 2 ch 151 SLA 1970)

Sec. 08.99.060. Meetings. The board shall meet at least once a year. (§ 1 ch 151 SLA 1968)

Sec. 08.99.070. Quorum. A majority of the board constitutes a quorum. (§ 1 ch 151 SLA 1968)

Sec. 08.99.080. Powers and duties of the board. (a) The board shall

(1) establish and promulgate rules and regulations concerning certification of welders in the state;

(2) establish and define certification tests as they apply to various types and categories of work designations for the state;

(3) work with federal and private agencies and specifying engineers to establish uniform testing and certifying methods for all welders throughout the state;

(4) work with federal agencies and the agencies of other states to establish reciprocal agreements;

(5) set up criteria and define experience and documentary requirements which may be accepted in lieu of physical certification tests in the state;

(6) set the fees for the welder certification tests;

(7) examine, certify, and renew the certification of qualified applicants;

(8) keep a record of its proceedings, and submit annual reports to the governor and the legislature;

(9) promulgate regulations concerning the quality of welds and qualifications of welders required in specific areas of industry and construction and designate reporting procedures necessary to certify compliance with these quality standards;

(10) designate and approve persons qualified to administer welding tests, and designate and approve shops, laboratories, or other establishments qualified for testing coupons and weldments.

(b) The board may request technical personnel from the Department of Labor for the purpose of reviewing and analyzing reports and may request field inspection by the department for the purpose of assuring compliance with, and enforcement of the regulations, rules and orders promulgated under §§ 10 — 110 of this chapter. (§ 1 ch 151 SLA 1968; am §§ 3 — 5 ch 151 SLA 1970)

Sec. 08.99.090. Applicability of Administrative Procedure Act. The board shall comply with the Administrative Procedure Act (AS 44.62). (§ 1 ch 151 SLA 1968)

Sec. 08.99.100. Expenses. Members of the board are entitled to the per diem and travel expenses allowed by law. (§ 1 ch 151 SLA 1968)

Sec. 08.99.110. Codes. The United States of America Standards Institute Codes listed below are established as the piping codes for the state:

(1) B 31.1.0 — 1967 power piping;

(2) B 31.2 — 1968 fuel gas piping;

(3) B 31.8 — 1968 gas transmission and distribution piping system;

(4) B 31.3 — 1966 petroleum refining piping;

(5) B 31.4 — 1966 and B 31.4a — 1968 liquid petroleum transportation piping systems. (§ 6 ch 151 SLA 1970)

Revisor's note (1970). — For copies of the codes referred to in AS 08.99.110, write to the U.S.A. Standards Institute, Dept. PB 31, 10 East 40th Street, New York, New York 10016.

Sec. 08.99.120. Penalty. A person who violates a regulation adopted under §§ 10 — 110 of this chapter is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500. (§ 7 ch 151 SLA 1970)

Board or Commission	Appointee	Term

BOARD OF WELDING EXAMINERS
AS 08 99 - 7 members; 5 year term; serves at the pleasure of the Governor.

Address: _____

CHAPTER 72. BOARD OF WELDING EXAMINERS

Article
1. Codes (12 AAC 72.005–12 AAC 72.010)
2. Welders (12 AAC 72.015–12 AAC 72.045)
3. Welding Inspectors (12 AAC 72.050–12 AAC 72.125)
4. General Provisions (12 AAC 72.899–12 AAC 72.900)

ARTICLE 1. CODES

Section
5. Rating for welders
10. (Repealed)

12 AAC 72.005. RATING FOR WELDERS. Ratings for welders shall be governed by the code requirements in the job specifications. In the absence of code requirements, welders shall be certified in accordance with the applicable American Welding Society Code. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1),(2) and (9)

12 AAC 72.010. CERTIFICATE REQUIRED. Repealed 8/21/78.

ARTICLE 2. WELDERS

Section
15. Welder qualification certificate required
20. (Repealed)
25. Requirements for welder qualification certificate
30. (Repealed)
35. Welder qualification certificate issued
40. (Repealed)
45. Requirements for maintaining a current welder qualification certificate

12 AAC 72.015. WELDER QUALIFICATION CERTIFICATE REQUIRED. A person may not perform a welding operation in the state for compensation, in which the failure of the weldment would involve hazard to life or property or cause economic loss, unless he or she holds a current, valid welder qualification certificate in the appropriate rating. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(1),(2),(5) and (9)

12 AAC 72.020. DURATION AND RENEWAL. Repealed 8/21/78.

12 AAC 72.025. REQUIREMENTS FOR WELDER QUALIFICATION CERTIFICATE. (a) Testing of welders shall be done under the direct supervision of a licensed welding inspector.

(b) An applicant for a welder qualification certificate or a company desiring to have a welder qualified shall

(1) submit to the welding inspector the welding procedure specifications or the welding performance specifications, or both when indicated, for the appropriate rating; and

(2) complete the welding test for the appropriate rating according to the terms of the welding procedure specifications or the welding performance specifications, or both when indicated.

(c) Prequalified procedure specifications may be used for test administration according to applicable codes. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1),(2),(5) and (9)

12 AAC 72.030. TEST SELECTION. Repealed 8/21/78.

12 AAC 72.035. WELDER QUALIFICATION CERTIFICATE ISSUED. The welding inspector shall issue the welding qualification certificate in the appropriate rating to the applicant or company upon the applicant's successful completion of the examination. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1),(7) and (10)

12 AAC 72.040. QUALIFICATION. Repealed 8/21/78.

12 AAC 72.045. REQUIREMENTS FOR MAINTAINING A CURRENT WELDER QUALIFICATION CERTIFICATE. (a) A welder qualification certificate is valid if it is kept current in compliance with the code under

AWS - QC1-81

which it is issued unless stated otherwise in the job specification.

(b) The expiration or revocation of one rating does not affect any remaining rating. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(1),(5) and (10)

ARTICLE 3.
WELDING INSPECTORS

Section

50. (Repealed)
55. Welding inspector license required
60. (Repealed)
65. Requirements for welding inspector license
70. (Repealed)
75. Application for welding inspector license
80. (Repealed)
85. Examination for welding inspector license
90. (Repealed)
95. Welding inspector license issued
105. Welding inspector license expiration and renewal
115. Duties and responsibilities of welding inspector
125. Prohibited conduct of welding inspector

12 AAC 72.050. TEST FACILITIES. Repealed 8/21/78.

12 AAC 72.055. WELDING INSPECTOR LICENSE REQUIRED. A person may not test a welder for the purpose of issuing a welder qualification certificate or inspect a welding operation in the state in which weldment failure would involve hazard to life or property or cause economic loss, unless he or she holds a current, valid welding inspector license. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(7) and (10)

12 AAC 72.060. WELD QUALIFIER. Repealed 8/21/78.

12 AAC 72.065. REQUIREMENTS FOR WELDING INSPECTOR LICENSE. (a) An applicant for a welding inspector license must

(1) be a high school graduate or hold a state or military approved high school equivalency diploma;

(2) have not less than five years' experience at the technical level in an occupational function that directly involved

(A) design experience such as preparation of plans and drawings for weldment construction according to a code, standard or specification;

(B) construction experience such as actual construction or fabrication and erection of weldments in accordance with a code, standard, specification or drawing;

(C) maintenance experience such as detection and measurement of weld inadequacies or discontinuities in accordance with specified procedures; and

(D) repair experience such as repair or replacement of welds that were determined inadequate or defective by reference to a code, standard, specification or drawing;

(3) be familiar with and understand the fundamentals of shielded metal arc welding, stud arc welding, submerged arc welding, flux cored arc welding, gas metal arc welding, gas tungsten arc welding, electroslag welding, oxyfuel gas welding, brazing, thermal cutting and mechanical cutting;

(4) be capable of writing clear and concise reports and maintaining records;

(5) pass an eye examination to prove natural or corrected near distance acuity for reading J-1 letters at a distance of not less than 12 inches on Jaeger's standard test type chart for near vision, or equivalent test, and natural or corrected far distance acuity of 20/40 as evidenced by a written, signed statement from a physician or an optometrist;

(6) pass a closed-book test on welding inspection fundamentals such as welding processes, nondestructive testing methods, and interpretation;

(7) pass an open-book test on general code or standard requirements such as fabrication tolerances and preheat requirements;

(8) pass a demonstration of competency in

the use of tools, gauges, and instruments pertaining to weld inspection; and

(9) submit evidence of having previously passed an all position welding qualification test in at least one welding process.

(b) The requirements of (a)(1)–(8) of this section will be waived for an applicant possessing a current welding inspector certificate issued by the American Welding Society in accordance with AWS QC 1-78, "Standard for Qualification and Certification of Welding Inspectors."

(c) An applicant may substitute up to two years of post-high-school education for two years of the five-year experience relevant to any of the functions covered by (a)(2) of this section and approved by the board. (Eff. 8/21/78, Reg. 67; am 7/22/79, Reg. 71)

Authority: AS 08.99.080(a)(5) and (10)

12 AAC 72.070. TEST FEES. Repealed 8/21/78.

12 AAC 72.075. APPLICATION FOR WELDING INSPECTOR LICENSE. Application for a welding inspector license must be made to the department on a form provided by the department and must be accompanied by a fee of $50. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(6) and (10)

12 AAC 72.080. CODES. Repealed 8/21/78.

12 AAC 72.085. EXAMINATION FOR WELDING INSPECTOR LICENSE. Examinations for welding inspector licenses will be conducted four times a year. Additional examinations may be conducted if the applicant furnishes all necessary facilities and pays all expenses incurred by the examiners. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1),(2), (7) and (10)

12 AAC 71.090. DEFINITIONS. Repealed 8/21/78.

12 AAC 72.095. WELDING INSPECTOR LICENSE ISSUED. The department will issue a welding inspector license to an applicant who meets the requirements of 12 AAC 72.065. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7) and (10)

12 AAC 72.105. WELDING INSPECTOR LICENSE EXPIRATION AND RENEWAL. (a) A welding inspector license is valid until March 1 of each even-numbered year unless revoked for reasons stated in 12 AAC 72.125 or unless the license lapses under (d) of this section.

(b) Application for renewal of a welding inspector license must be made to the department on a form provided by the department no later than March 1 of each even-numbered year and must be accompanied by a fee of $50.

(c) An application for renewal of a welding inspector license must contain

(1) proof of a current welding inspector certificate issued by the American Welding Society as specified in 12 AAC 72.065(b); or

(2) evidence of compliance with the requirement of 12 AAC 72.065(a)(5); and

(3) evidence of employment as a welding inspector in the form of

(A) a signed statement of an employer;

(B) payroll records indicating the position held; or

(C) affidavits of two fellow employees attesting to employment activity of the applicant.

(d) A license issued to a welding inspector on the basis of American Welding Society QCI certification under 12 AAC 72.065(b), or renewed on that basis under (c)(1) of this section, lapses 60 days after the date of expiration of the inspector's American Welding Society certification unless, before the 60th day, the inspector provides proof to the department of renewal of that certification.

(e) Application for renewal of a welding inspector license that has lapsed for any reason is considered a new application. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(1)(7) and (10)

12 AAC 72.115. DUTIES AND RESPONSIBILITIES OF A WELDING INSPECTOR. (a) A welding inspector shall, when applicable

(1) keep the department advised of his current address for the mailing of renewal notices;

(2) verify that the work inspected conforms to the requirements of the applicable codes, standards and job specifications;

(3) verify that the base materials and consumable welding materials conform to the specification requirements and that the specified welding filler metals are used on each base metal or combination of base metals;

(4) verify that the welding equipment to be used for the work is that which is specified in the welding procedure and has the capability to produce the specified welds;

(5) verify that the welding procedures are as specified, and are qualified and available to the welders for reference;

(6) verify that the welders have been properly qualified in accordance with the applicable codes and standards and that their qualification authorizes them to use the welding procedures specified for the work;

(7) observe the qualification tests when qualifying welders;

(8) verify that only specified and properly qualified welding procedures are used for the work;

(9) verify that the joint preparation and fit-up meets the requirements of the welding procedure and drawings;

(10) verify that the specified filler metals are used and that the filler metals are maintained in proper condition for use as specified;

(11) observe the technique and performance of each welder;

(12) examine the work for conformance to the requirements of the applicable codes, standards, specifications and drawings;

(13) identify the work inspected with specified marking methods or appropriate records;

(14) perform the necessary visual inspections;

(15) verify that the required visual and other nondestructive examinations have been performed by qualified personnel in the specified manner and review the resulting information to assure that the results are complete;

(16) perform nondestructive examinations that are specified, if he or she is qualified in accordance with the specified requirements;

(17) prepare clear and concise reports and keep necessary records of the welding procedure, the welding procedure qualifications, the welder qualifications, the control of welding materials and the results of inspections and tests;

(18) act with complete integrity in professional matters and be forthright and candid to the board or its representative on matters pertaining to this standard;

(19) to preserve the health and well-being of the public by performing the duties required of weld inspection in a conscientious and impartial manner to the full extent of his or her responsibilities and qualifications;

(20) undertake and perform assignments only when qualified by training, experience, and capability;

(21) be objective, thorough and factual in any written report, statement or testimony of the work and include all relevant or pertinent information in such communiques or testimonials;

(22) sign only for work that he or she has inspected, or for work over which he or she has personal knowledge through direct technical control; and

(23) conscientiously avoid conflict of interests with the employer or client and disclose any business association, interests, or circumstances that might be so considered.

(b) If there is evidence that the welder's work does not conform to the requirements of the applicable code, standard or specification, the welding inspector may require requalification of the welder. The welding inspector shall require a requalification of a welder if that person's qualification is not current by the requirements of the applicable codes, standards or specifications.

(c) If the welding inspector is to perform nondestructive examinations other than visual, and there are no specified qualification requirements, he or she must be qualified and certified in accordance with the Recommended Practice No. SNT-TC-1A, "Personnel Qualification and Certification for Nondestructive Testing," June 1975. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7),(9) and (10)

12 AAC 72.125. PROHIBITED CONDUCT OF WELDING INSPECTOR. (a) A welding inspector licensed under this chapter is prohibited from performing acts including

(1) signing a blank welder-qualification certificate;

(2) issuing a welding qualification certificate to a welder not tested under his or her direct supervision;

(3) delegating his or her responsibility in testing of welders;

(4) paying, soliciting, or offering, directly or indirectly, any bribe or commission for professional employment with the exception of the usual commission required by employment agencies;

(5) falsifying, exaggerating, or indulging in the misrepresentation of personal academic and professional qualifications, past assignments, accomplishments, and responsibilities or those of his or her associates;

(6) issuing statements, criticisms, or arguments on weld inspection matters connected with public policy which are solicited or paid for by an interested party or parties, without first identifying the party and the speaker and disclosing any possible pecuniary interest;

(7) expressing an opinion on a weld inspection subject unless it is founded upon adequate knowledge of the facts in issue, upon a background of technical competence pertinent to the subject and upon honest conviction of the accuracy and propriety of the statement;

(8) accepting compensation, financial or otherwise, from more than one party for services on the same project, or for services pertaining to the same project, unless the circumstances are fully disclosed and agreed to by all interested parties or their authorized agents;

(9) soliciting or accepting gratuities, directly or indirectly, from any party or parties dealing with the client or employer in connection with the welding inspector's work; and

(10) associating with or knowingly participating in a fraudulent or dishonest venture.

(b) The board will suspend, refuse renewal of or revoke the welding inspector's license, place the license holder on probation, or reprimand the holder, if he or she is found to have engaged in prohibited conduct. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7),(9) and (10)

ARTICLE 4.
GENERAL PROVISIONS

Section
899. Weld qualifier license
900. Definitions

12 AAC 72.899. WELD QUALIFIER LICENSE. A weld qualifier license issued under the authority of this chapter as it existed between August 2, 1973 and the effective date of this section is valid until six months after the effective date of this section and may not be renewed. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7)

12 AAC 72.900. DEFINITIONS. (a) In this chapter

(1) "appropriate rating" means that rating which is required by the specific code designated in the job specifications; when there is no job specification or a specific code is not designated in the job specification, appropriate rating is not less than the all-position certification issued in accordance with the current edition of the American Welding Society Code;

(2) "board" means the Board of Welding Examiners;

(3) "code" means nationally recognized welding, nondestructive testing or engineering principles or rules published as guides or requirements or both by societies or agencies charged with establishing such guidelines;

(4) "continuous employment" means employment without interruption of more than 90 consecutive days unless otherwise specified in the code under which the certificate is being renewed;

(5) "coupon" means a piece of metal cut and sectioned for testing;

(6) "cutting process" means a process in which the severing or removing of metals is effected;

(7) "department" means the Department of Commerce and Economic Development;

(8) "direct supervision" means being physically present at the work site and in personal charge of the work being performed;

(9) "job specifications" means the written document setting out the specific construction standards to be adhered to for the project;

(10) "rating" means a particular skill level in the art of welding;

(11) "responsibility" means being accountable to the board or its agents or both for one's action relating to the requirements of this chapter;

(12) "standards" means minimum acceptable guidelines established by societies or agencies or both charged with the responsibility for promulgating such guidelines;

(13) "technical level" means a level of work in welding using mathematics and science such as would require at least two years of post-high-school study at an accredited engineering school or technical institute or equivalent study;

(14) "valid" means having legal force and properly executed and binding under the law and is in compliance with the appropriate code, standard or specification;

(15) "weld testing methods" means the destructive or nondestructive means of evaluating the integrity of the weld metal or heat affected zone of the base material or both;

(16) "welder" means welder, welding operator and tacker;

(17) "welding" means the metal joining process used in making welds;

(18) "welding inspector" means a person meeting the requirements of secs. 55 – 125 of this chapter;

(19) "welding performance specification" means a document required before testing, setting the criteria for demonstration of a welder's ability to produce welds meeting prescribed standards;

(20) "welding procedure" means a written document specifying the essential variables as listed in the appropriate welding or engineering code or both;

(21) "welding procedure specification" means a document required before welding on any structure, specifying the parameters and requirements which control the quality of the welding for that structure;

(22) "welding process" means the method of application of heat or filler metal or both to complete the joining process;

(23) "welding qualification certificate" means a certificate issued under the authority of the board by a licensed welding inspector to a person verifying that he or she has successfully performed one or more of the specific welding tests required for a certification to a particular welding or engineering code;

(24) "weldment" means an assembly whose component parts are joined by welding.

(b) Terms not defined in this section shall be construed in accordance with American Welding Society A3.0-76, "Terms and Definitions." (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1) and (9)

Testimony of Harry Treager
Before the Senate Labor and Commerce Committees
On February 26, 1982

Thank you for the opportunity to comment on SB 757, "An act continuing the existence of the Board of Welding Examiners; and providing for an effective date." The Department of Commerce and Economic Development has reviewed the present system of licensing welding inspectors and would like to make the following recommendations and observations for the consideration of the committee.

The Department finds that the present system of licensing welding inspectors is a reasonable and economical way of protecting the public by reducing the likelihood of the serious harm that normally results from weldment failures. While the department endorses the present approach to providing public protection, it feels that the system can be streamlined. The following specific recommendations address how the the licensing process should be continued.

Recommendation No. 1: Continue the licensing of welding inspectors with the same duties and responsibilities that exist under the present statutes and regulations.

Welding inspectors have two main areas of responsibility: the certification of welders and the inspection of welds.

IN CERTIFYING A WELDER THE WELDING INSPECTORS DETERMINE WHETHER A SPECIFIC WELDER HAS THE TECHNICAL SKILLS TO PERFORM A SPECIFIC WELDING JOB IN ACCORDANCE WITH APPLICABLE CODES AND STANDARDS. IT IS NECESSARY THAT WELDERS BE PROPERLY QUALIFIED FOR SPECIFIC JOBS BECAUSE:

1. WELDING PROCEDURES VARY FROM JOB TO JOB IN ACCORDANCE WITH HOW CODE REQUIREMENTS APPLY TO THE SPECIFIC JOB; AND

2. WELDERS ARE OFTEN WILLING TO PERFORM JOBS FOR WHICH THEY ARE NOT QUALIFIED, IN PART BECAUSE THEY MAY NOT KNOW THE LIMITATIONS OF THEIR OWN SPECIFIC SKILLS.

IT IS IN THE PUBLIC INTEREST THAT WELDERS BE PROPERLY QUALIFIED BECAUSE WELDMENTS THAT FAIL DO SO BECAUSE THEY ARE NOT FABRICATED ACCORDING TO THE PROPER PROCEDURE.

ACCORDING TO ADVICE FROM THE BOARD, IT IS IMPRACTICAL TO LICENSE WELDERS DIRECTLY BECAUSE PROCEDURES VARY SO MUCH FROM JOB TO JOB. LICENSING WELDERS FOR GENERAL SKILL LEVEL WOULD NOT WORK BECAUSE THE NECESSARY REQUIREMENTS FOR SPECIFIC JOBS VARY SO GREATLY AS MENTIONED ABOVE. LICENSING WELDERS FOR SPECIFIC PROCEDURES WOULD RESULT IN BUREAUCRATIC GROWTH AND A VERY UNWIELDY SYSTEM OF PAPERWORK.

FURTHERMORE, IN MOST INSTANCES WELDERS SHOULD BE QUALIFIED TO SPECIFIC PROCEDURES IMMEDIATELY PRIOR TO THE JOB TO ASSURE THAT THE REQUIRED SKILL LEVEL IS STILL PRESENT. IF THE SKILLS ARE RUSTY, A SMALL AMOUNT OF REMEDIAL TRAINING CAN USUALLY MAKE THE BASICALLY COMPETENT WELDER QUALIFIED TO THE SPECIFIC PROCEDURE. IT IS DEFINITELY IN THE PUBLIC INTEREST THAT THIS REMEDIAL WORK OCCUR PRIOR TO THE ACTUAL WORK INTENDED FOR PUBLIC USE.

THE SECOND MAJOR RESPONSIBILITY OF WELDING INSPECTORS IS THE INSPECTION OF WELDS TC ASSURE THAT THEY ARE PROPERLY FABRICATED ACCORDING TO PROCEDURE. A NUMBER OF POINTS OF CLARIFICATION NEED TO BE MADE HERE TO AVOID THE CONFUSION THAT OFTEN ARISES WITH RESPECT TO WELDING INSPECTION.

THE PRESENT SYSTEM THAT WE ARE RECOMMENDING BE CONTINUED DOES NOT REQUIRE THAT ALL WELDS IN THE STATE BE INSPECTED. IT WOULD BE UNREALISTIC TO REQUIRE THAT ALL WELDS BE INSPECTED. THE PRESENT LICENSING APPROACH PROVIDES FOR A MINIMAL LEVEL OF PUBLIC PROTECTION THROUGH THE STATUTORY REQUIREMENT THAT ALL WELDERS BE PROPERLY CERTIFIED.

IF INSPECTIONS OF WELDS ARE CALLED FOR BY CONTRACTUAL AGREEMENT BETWEEN THE CLIENT AN THE PROVIDER OF WELDING SERVICES, THE PRESENT STATUTE REQUIRES THAT A LICENSED WELDING INSPECTOR MUST PERFORM THE INSPECTIONS. THIS PROTECTS THE PUBLIC AND THE PURCHASER OF THE WELDING INSPECTION

SERVICES BY ASSURING THAT THE WELDING INSPECTOR IS A QUALIFIED AND COMPETENT INDIVIDUAL REQUIRED BY LAW TO MEET CERTAIN ETHICAL AND PERFORMANCE STANDARDS IN THE EXECUTION OF HIS RESPONSIBILITIES.

CONTRARY TO THE POSITION TAKEN BY THE DIVISION OF LEGISLATIVE AUDIT IN THEIR REPORTS, THE PURCHASERS OF WELDING SERVICES ARE NOT NORMALLY CAPABLE OF JUDGING THE QUALIFICATIONS OF WELDERS AND WELDING INSPECTORS. THIS IS ESPECIALLY SO WHEN THE PURCHASER OF THE SERVICES IS A SMALL COMPANY WITH NO QUALITY CONTROL PROCEDURES OR WHEN THE PURCHASER IS INEXPERIENCED BECAUSE OF AN OCCASIONAL NEED TO PURCHASE SUCH SERVICES.

THIS SYSTEM OF REGULATION PLACES THE MAJOR SHARE OF THE ENFORCEMENT RESPONSIBILITIES ON PRIVATE INDUSTRY RATHER THAN ON GOVERNMENT, THEREBY ELIMINATING A POTENTIALLY EXPENSIVE BUREAUCRATIC LAYER OF GOVERNMENT INSPECTORS.

THE PRINCIPAL WEAKNESSES OF THE WELDING INSPECTOR SYSTEM ARE IN THE AREAS OF ENFORCEMENT AND INVESTIGATIONS. THERE ARE NO REALISTIC WAYS OF IDENTIFYING ABUSES BY WELDING INSPECTORS IN CERTIFYING OF A WELDER OR IN THE INSPECTION OF WELDS. WELDING INSPECTORS ARE AT LEAST TWICE REMOVED FROM THE RESPONSIBILITY FOR THE CONSEQUENCES OF WELDMENT FAILURE (THE WELDER AND THE CONTRACTOR). IN OTHER WORDS, THERE IS NO ENFORCEMENT SYSTEM RELATING THE WELDING INSPECTOR'S PERFORMANCE TO ACTUAL EVENTS OF DAMAGE TO THE PUBLIC.

RECOMMENDATION NO. 2: SUNSET THE BOARD OF WELDING EXAMINERS AND TRANSFER LICENSING RESPONSIBILITIES TO THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT.

AT PRESENT THERE ARE TWO PRIMARY REQUIREMENTS FOR LICENSURE AS A WELDING INSPECTOR. TO RECEIVE A LICENSE AN APPLICANT MUST POSSESS A CURRENT AWS QC1 CERTIFICATE AND PRESENT DOCUMENTATION OF ALL POSITION WELDING QUALIFICATION IN ONE WELDING PROCESS.

IN ALL INSTANCES A LICENSE EXAMINER CAN CORRECTLY EVALUATE THE AWS-QC1 DOCUMENTATION. IN MOST INSTANCES, WITH THE PROPER TRAINING, A LICENSE EXAMINER CAN EVALUATE CORRECTLY THE ALL POSITION WELDING DOCUMENTATION. IN THE PAST, THE BOARD DELEGATED TO THE LICENSE EXAMINER RESPONSIBILITY FOR THE COMPLETE REVIEW AND APPROVAL OF ROUTINE APPLICATIONS. ONLY IN CASES WHERE THE ALL POSITION WELDING QUALIFICATION DOCUMENTATION WAS ATYPICAL IN FORM OR CONTENT WAS THE APPLICATION SENT TO THE BOARD FOR EVALUATION PRIOR TO THE ISSUANCE OF A LICENSE. THIS PROCEDURE WAS STOPPED IN DEFERENCE TO CRITICISM BY THE DIVISION OF LEGISLATIVE AUDIT IN THEIR 1979 REPORT.

IF THE BOARD OF WELDING EXAMINERS IS SUNSETTED, THE DEPARTMENT COULD LICENSE WELDING INSPECTORS BASED ON THE PRESENT CRITERIA OR BASED SOLELY ON PROOF OF AWS CERTIFICATION. IN EITHER CASE THE DEPARTMENT WOULD MAINTAIN A REGISTRY OF WELDING INSPECTORS AND PROVIDE INVESTIGATIVE AND ENFORCEMENT

SERVICES. IN EITHER CASE, THERE WOULD BE A SIGNIFICANT REDUCTION IN THE COST OF LICENSING. TRAVEL AND PER DIEM FOR BOARD MEETINGS WOULD BE ELIMINATED; FOR FY '82 THIS REPRESENTS APPROXIMATELY $4,500.

THERE WOULD ALSO BE A REDUCTION IN STAFF TIME SPENT ON THE LICENSURE PROCESS AND LICENSES WOULD BE ISSUED MORE RAPIDLY. AT PRESENT WE ESTIMATE THAT OVER A TWO YEAR PERIOD (THE RENEWAL CYCLE) A LICENSE EXAMINER SPENDS ABOUT 15% OF HIS/HER TIME ON WELDING BOARD ACTIVITIES, INCLUDING PREPARING FOR AND STAFFING BOARD MEETINGS, PROCESSING NEW AND RENEWAL APPLICATIONS, ANSWERING INQUIRIES, FILLING OUT REPORTS, ETC. UNDER DIRECT LICENSURE BY THE DEPARTMENT, WE ESTIMATE THAT A LICENSE EXAMINER WOULD SPEND APPROXIMATELY 5% OF HIS/HER TIME ON THE PROCESSING OF WELDING APPLICATIONS. FOR FY '82 THIS WOULD REPRESENT A SAVINGS OF APPROXIMATELY $2,800.00 IN SALARY AND BENEFITS.

IT SHOULD ALSO BE NOTED THAT ACTIVITY IN THIS LICENSING AREA MAY BE INCREASING. IN THE PAST TWO MONTHS THERE HAS BEEN A SLIGHT INCREASE IN THE NUMBER OF NEW APPLICATIONS RECEIVED AS WELL AS AN INCREASE IN TELEPHONE REQUESTS FOR APPLICATIONS FROM THE LOWER FORTY-EIGHT STATES.

THE DEPARTMENT FEELS THAT THE GREATEST BENEFIT FROM DIRECT LICENSURE BY THE DEPARTMENT WOULD BE IN THE REDUCTION IN TIME NECESSARY FOR AN APPLICANT TO BE LICENSED. AT PRESENT IT TAKES APPROXIMATELY THREE WEEKS TO A MONTH FOR A

DECISION TO BE MADE ON A ROUTINE APPLICATION. UNDER DIRECT DEPARTMENT LICENSING A ROUTINE APPLICATION COULD BE PROCESSED THE SAME DAY AND WOULD REQUIRE ONE HALF HOUR PROCESSING TIME.

IF ALL POSITION WELDING DOCUMENTATION WERE RETAINED AS A REQUIREMENT FOR LICENSURE SOME MECHANISM WOULD NEED TO BE SET UP TO ASSIST THE LICENSE EXAMINER TO MAKE A DETERMINATION IN THE CASE OF ATYPICAL ALL POSITION WELDING DOCUMENTATION. THIS FUNCTION COULD BE ACCOMPLISHED BY A THREE MEMBER ADVISORY BOARD. SUCH A BOARD COULD NOT ONLY ADVISE ON ATYPICAL APPLICATIONS BY ALSO PROVIDE GENERAL POLICY ADVICE TO THE DEPARTMENT ON WELDING MATTERS AND ASSIST IN THE INVESTIGATION PROCESS. THE EXPENSE FOR SUCH A BOARD WOULD BE MINIMAL ($1,000 - $1,500 A YEAR).

A FEW COMMENTS ARE IN ORDER ON THE REQUIREMENT FOR ALL POSITION WELDING QUALIFICATION IN ONE PROCESS. IN ORDER TO RECEIVE AN AWS QC1 CERTIFICATE, THE AMERICAN WELDING SOCIETY REQUIRES THAT AN INDIVIDUAL HAVE FIVE YEARS OF EXPERIENCE IN THE WELDING FIELD. THIS EXPERIENCE MAY <u>NOT</u> INVOLVE ANY PRACTICAL EXPERIENCE IN WELDING. IT IS THE PRESENT BOARD'S FEELING THAT THE ALL POSITION WELDING QUALIFICATION REQUIREMENT IS REASONABLE, NECESSARY AND DESIRABLE. THE DEPARTMENT DOES NOT HAVE A POSITION ON THIS REQUIREMENT AND WOULD URGE THE COMMITTEE TO ENCOURAGE COMMENTS FROM MEMBERS OF THE INDUSTRY ON THIS SUBJECT.

RECOMMENDATION NO. 3: REVISE THE EXISTING STATUTES SO THAT THEY ARE CLEAR AND SUCCINCT.

THE DEPARTMENT WOULD JUST LIKE TO UNDERSCORE THE NEED FOR STATUTE REVISION. THE DEPARTMENT ENDORSES THE DIVISION OF LEGISLATIVE AUDIT'S RECOMMENDATIONS IN THIS AREA. IF THE PRESENT SYSTEM OF WELDER CERTIFICATION AND WELD INSPECTION IS RETAINED, THE DEPARTMENT WOULD RECOMMEND THAT AS 08.99.080 BE APPROPRIATELY REVISED TO DIRECTLY REFLECT THIS APPROACH. SIMILARLY ALL REFERENCES TO OBSOLETE LICENSING FUNCTIONS SHOULD BE PURGED FROM THE STATUTES, FOR EXAMPLE: THE SETTING OF FEES FOR WELDER CERTIFICATION TESTS AND APPROVAL. SINCE THE NEED FOR STATUTORY REVISION APPEARS TO BE EXTENSIVE AND SINCE THE PRESENT LICENSING PROCESS MAY CHANGE SUBSTANTIALLY, THE DEPARTMENT WOULD AT THIS TIME LIKE TO INDICATE ITS WILLINGNESS TO WORK WITH THE COMMITTEE AND ITS STAFF ON THESE REVISIONS IN ANY WAY THAT YOU FEEL IS NECESSARY AND APPROPRIATE.

IN CLOSING, I WOULD LIKE TO NOTE THAT THE PRESENT BOARD HAS AN EXCELLENT RECORD OF LICENSING QUALIFIED APPLICANTS WHO FOLLOW THE EXISTING PROCEDURES. THERE ARE PRESENTLY 219 WELDING INSPECTORS LICENSED BY THE BOARD, 136 OF WHICH ARE CURRENTLY IN ACTIVE STATUS. THIS IS SUBSTANTIALLY MORE THAN IS REPORTED IN EITHER OF THE DIVISION OF LEGISLATIVE AUDIT'S REPORTS AND REFLECTS, WE BELIEVE, THE BOARD'S EFFORTS TO LICENSE QUALIFIED PEOPLE.

In FY '81 the Board generated $2,495 in licensing fees and spent $2,593 on travel and per diem for Board members and licensing examiner staff support at meetings.

Thank you.

Attention: Donald M. Lockman, Chairman
State Board of Welding Examiners

Subject: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existence

Dear Sir:

I have been a Quality Assurance/Quality Control Inspector for five years and in the welding field for eight years. I have worked to reach a high standard of excellence in the field of welding inspection.

Over the past few years I have been involved with several major projects. PeMex pipeline of Mexico, the Louisiana Offshore Oil Port and the Sour Gas Line in the Agean Sea. On these projects, there have been several occasions where unqualified inspectors have made decisioins which were incomprehensible to a knowledgeable inspector with integrity. The Louisiana Offshore Oil Port is a good example. Faulty and incompetent inspection cost around 5.5 million dollars to correct.

Alaska's high standard for welding inspectors is by far the most stringent in the United States at the present time. I hope that these standards are maintained, not only for the safety of the people of Alaska, but for the beautiful fragile scenery.

In closing, it is my wish that the lower forty-eight also encompass the same standards as the State of Alaska. Until the industry itself takes note of its own warnings, the governing bodies of the individual states themselves must ensure there are no more Kansas City, Hyatt Regency disasters.

Very truly yours,

F. M. Bennett

Attention: Donald M. Lockman, Chairman
State Board of Welding Examiners

Subject: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existence

Dear Sir:

Over the past sixteen years I have been involved in numerous major construction projects throughout Mexico, Alaska, and the continental United States. I have observed activities of construction people on almost every project which has bordered on criminal neglect. Many times their lack of knowledge of their profession, due to inadequate training is to blame, often they are caught up in the Construction Company's ,"let's get this job done" euphoria, and most tragic of all, many sell their integrity for a few quick dollars.

The average inspector has no idea how many pipeline and pipeline related deaths occur each year, and the millions of dollars wasted yearly due to lackadaisical inspection. A pipeline explosion in Baytown, Texas two years ago revealed a weld with no bead, latticed with defects, which had had in process and final visual inspection by a qualified welding inspector, radiography performed by a qualified Non-destructive Technician, and accepted by both. Three people died in this explosion.

To become certified by the State of Alaska one must take considerable time, effort, and expense to meet the qualifications. The Alaskan State Welding Board, and the enforcement of its regulations, guarantees to a much greater degree, that its members will conduct themselves with the professionalism and integrity that will ensure that the above-mentioned tragedies happen less and less.

My hope is that each and every state adopts such a visionary program as the State of Alaska.

Very truly yours,

William C. Biddy

Subject: House Bill # 595 "An Act continuing the existence of the Board of Welding Examiners; and providing for an effective date."

Attention: Honorable Terry Martin

If House Bill #595 is not passed, during this session, the Board of Welding Examiners will cease to exist in June 1982. If this board is allowed to expire, the entire construction industry will suffer a severe set-back.

Since the new regulations (12 AAC 72) became effective in August, 1978, weld quality has improved immeasurably. This regulation met with state-wide industry acceptance primarily because of the project quality guaranteed by the better qualified technician performing the work.

The additional requirement for welding inspectors to become licensed by the state so enhanced the overall quality of major construction projects that many companies(including the major oil companies) who had established quality control groups made acquiring this license mandatory for employment or promotion.

These regulations have become a nation-wide standard with Alaska as the leading state in demanding quality in construction and integrity in inspectors. With other states following our lead we should be fine-tuning our regulations to become even better, not eliminating what has taken so long to formulate and have industry recognize and accept.

No one needs to remind Alaskans of the unnecessary cost incurred in building the Trans Alaska Pipeline. One of the major causes of the great expense was excessive weld repairs caused by unqualified welders and inspectors. In many cases these inspectors had never been involved in or around construction prior to this project, and knew absolutly nothing of welding or inspection.

On May 26, 1981, Representitives Brown and Anderson submitted House Bill No. 595 in the Legislature of the State of Alaska, Twelfth Legislature - First Session. This bill was tabled in the House.

If this bill is not enacted by the legislature during the present session, the Alaska Board of Welding Examiners will no longer exist. What people don't realize is; when the board ceases to exist, so does regulation requiring welders to be certified and weld inspectors to be licensed. As a manager, directly involved with welding and inspection, on major oil company construction projects, I sincerely feel the continuation of this board and regulation is essential for quality welding in Alaska.

Your support in re-establishing the professional and vocational regulations, as defined in 12 AAC 72, and continuing the existance of the Board of Welding Examiners as defind in State Statute AS 08.99 and House Bill 595, is sincerely appreciated.

Very Truly Yours,

Dear Sir:

I have been licensed in the State of Alaska both as a Welder Qualifier and Welding Inspector since 1976 and feel that even tho the Welding Board has it short coming (lack of enforcement money and personnel) It should be continued and that State Licensing should remain a requirement.

If this program is to continue , I feel that the State should provide a better method to police the companies working in the state.

Sincerly yours

SUBJECT: State Board of Welding Examiners and State Licensing of Welding Inspectors Future Existance

As an Alaska State Licensed Welding Inspector, American Welding Society Welding Inspector, member of United Association Local 375 and a welder foreman on pipeline construction at Prudhoe Bay, I feel we need our State Welding Board and we need our licensed welding inspectors. Please do what you can to retain these two functions.

I have worked pipeline construction for 29 years and I believe we need qualified welding inspectors as Alaska is taking over the lead of all the states in pipeline construction.

I also believe the State should spend some money for the Board to help police companies to check the credentials of welding inspectors. We can not afford an oil spill due to a defective weld.

Thank you.

Dear Mr. Martin:

I am writing to express my concern over the possibility of ending the State Licensed Welding Inspection Program.

I have been in the welding field 25 years and in the inspection field 8 years, and there is no equal to this program.

The certification is the industry standard; and, with the future proposed pipe lines in the state, it should contribute considerably to the quality of that program.

I strongly hope that the State takes a long, hard look at this program because it is the best in the industry and one I feel the rest of the states will use as a pattern for programs of the future.

Sincerely yours,

HB 595

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
January 20, 1982
1:10 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Randolph
Rep. Gardiner
Rep. Rogers

Members Absent: No members absent.

COMMITTEE CALENDAR

HB 146 — Re payment procedures/public contracts

HB 595 — An act continuing the existence of the Board of Welding Examiners; and providing for an effective date.

WITNESS REGISTER

Representative Brown
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-3744
Position Statement: Gave background on both bills.

Nick Cotti, Management Analyst
Division of Occupational Licensing
Department of Commerce & Economic Development
Juneau, Alaska 99811
465-2534
Position Statement: Supported HB 595.

Donald Lockman
Testing Institute of Alaska and
State Board of Welding Examiners
Anchorage, Alaska
276-3440
Position Statement: Supported HB 595.

Ken Lomax
ARCO Oil and Gas Company
Anchorage, Alaska
338-1271
Position Statement: Supported HB 595.

Louie Rousseau
Welding Application-Methods

Anchorage, Alaska
272-3543
Position Statement: Opposed HB 595.

Erwin Long
Arctic Foundations, Inc.
Anchorage, Alaska
276-5575
Position Statement: Opposed HB 595.

PREVIOUS ACTION

HB 146	Referred to committee 3/11/81; no previous action. No action taken by committee this date.
HB 595	Referred to committee 5/26/81; no previous action. No action taken by committee this date.

ACTION NARRATIVE

Tape #003 Recording Number 1190	The meeting was called to order by Chairman Martin at 1:10 p.m. All members were present. The committee schedule called for the consideration of HB 595 and HB 146. Testifying before the committee regarding both bills was Representative Fred Brown, prime sponsor.
Number 1201	Rep. Brown, sponsor of HB 595 and HB 146, gave background on both bills. Chairman Martin limited further testimony and committee consideration to HB 595.
Number 1259	Nick Coti, Division of Occupational Licensing, Department of Commerce and Economic Development, spoke from prepared testimony in favor of continuing the Board of Welding Examiners.
Number 1371	Donald Lockman, of the Testing Institute of Alaska and the State Board of Welding Examiners, testified in favor of HB 595. Rep. Rogers questioned Lockman about his testimony.
Number 1634	Ken Lomax, of ARCO Oil and Gas Company, testified in favor of the bill, and presented written statements and letters to

the committee.

Number 1710 — Louie Rousseau, of Welding Application-Methods, a technical services business in Anchorage, testified against the bill.

Number 0136, Side B — Erwin Long, of Arctic Foundations, Inc., a manufacturer of pressure vessels and geo-tech equipment, also testified against the bill. He said he does contract work for the Corps of Engineers, and finds the State Board of Welding examinations and certifications to be in conflict with federal requirements that certification must be done according to the American Society of Mechanical Engineers (ASME) code.

Number 0312 — Donald Lockman gave rebuttal testimony in favor of the State Board of Welding Examiners.

Number 0348 — No action was taken on HB 595, and the Chairman adjourned the meeting at 3:00 p.m. Hearing on HB 595 will be continued in February.

A PERFORMANCE REVIEW
OF THE
BOARD OF WELDING EXAMINERS

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of Alaska Statutes 24.20.271(1) and 44.66.050 (sunset legislation), a review of the Board of Welding Examiners was conducted to review Board activities and accomplishments to determine if the Board has been operating in an effective, efficient and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Board will be reestablished. The law currently specifies that this Board will terminate on June 30, 1980, but will continue until June 30, 1981 for the purpose of concluding its affairs.

Scope

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint and affirmative action functions. Our review consisted of analyzing and evaluating the following:

(1) Applicable statutes and Board regulations;

(2) discussions with the Board and questionnaires sent to Board members;

(3) tests of records and documents of the Board and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development, for the years 1976-1978;

(4) interviews with OL employees;

(5) complaints filed with OL, the Ombudsman's Office, Consumer Affairs Agency and the Human Rights Commission during the period 1976-1978;

(6) questionnaires sent to State licensed welding inspectors; and

(7) interviews with personnel and review of publications of the American Welding Society (AWS).

Scope Constraints

This review was hampered by the following constraints:

(1) The Board has not established and reported financial and program plans as required by AS 37.07.050 nor has it developed and reported

performance information regarding its effectiveness and accomplishments as required by AS 37.07 .090 and AS 08.99.080(a)(8).

(2) OL has not adequately collected, recorded and maintained pertinent files and statistics relating to the Board to effectively and efficiently carry out its administrative responsibilities.

ORGANIZATION AND FUNCTION

The Board of Welding Examiners was established by the 1968 Session Laws of Alaska. It is organized under the Department of Commerce and Economic Development, which provides administrative and investigative support through the Division of Occupational Licensing.

The Board consists of seven members with extensive experience in welding who are appointed by the Governor for staggered five year terms. At least three members must be engineers, i.e., with engineering degrees or registration as an engineer and at least five years engineering experience.

The functions of the Board are addressed in AS 08.99. Among the powers and duties cited, the statute directs the Board to: promulgate rules and regulations regarding the certification of welders; examine, certify and renew certification; define tests and certification methods; report annually to the Legislature and Governor.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these issues, the legislative oversight committees should consider the findings and alternatives presented in this report in reaching their decisions.

Report Conclusion

In our opinion, there is not a sufficient public need for continuing either the Board or State licensing of welding personnel.

Most consumers (e.g. engineers, construction and pipeline companies) of welding services possess adequate knowledge to properly evaluate the qualifications of those offering the service. To assist in identifying qualifications, the American Welding Society administers a certification program for welding inspectors, the only classification of welding personnel being licensed by the State. If it is determined that State regulation of welding is desirable, less restrictive alternatives--such as statutory requirements for welder, qualification certificates--are viable (see Recommendation No. 1).

In the event that the Board is reestablished by the Legislature, certain changes should be implemented in order for the Board to more effectively serve the public.

The Board should thoroughly review applications before licenses are issued (see Recommendation No. 2).

To better represent the public and the industry, statutory requirements for membership on the Board should be expedited (see Recommendation No. 3).

Statutes governing the Board should be reviewed and amended to clarify duties, enforcement responsibility, and the applicability of administrative adjudication procedures (see Recommendation No. 4).

Additional revision of Board regulations is needed to make them clear, reasonable and within the scope of the Board's purpose (see Recommendation No. 5).

The Board should develop formal objectives and report performance as required by AS 37.07.050 and AS 08.99.080 (see Recommendation No. 6).

FINDINGS AND RECOMMENDATIONS

Findings and Recommendations No. 1 through No. 6 are addressed to the Board of Welding Examiners, with Recommendation No. 3 also being addressed to the Office of the Governor.

Recommendation No. 1

We recommend that the Board of Welding Examiners be allowed to terminate June 30, 1980 and that State licensing of welding personnel be discontinued.

Under regulations which became effective in August, 1978, the Board of Welding Examiners is licensing "welding inspectors" (WI). Among the functions of the WI are testing weldments and issuing welder qualification certificates. Such certificates are required under the regulations for welders performing operations in which weldment failure would be hazardous to life or property.

Requirements for WI licensure are based on the American Welding Society (AWS) program for certification of WI's. The written examination required for licensure is administered by AWS. In addition to other requirements for AWS certification, an applicant for State WI licensure must have passed a welder qualification test, demonstrating practical skills.

In determining whether there is a continued public need for the Board of Welding Examiners, several factors should be considered.

The primary goal of regulating occupations is to protect the public. Licensing is desirable when:

1. The unlicensed practice of an occupation poses a serious risk to the life, safety, health or economic well-being of a relatively large number of consumers;

2. the consumers of a service are at a disadvantage in evaluating the qualifications of a provider; and

3. there is evidence of abuse, by providers of the service, to which the consumer has inadequate recourse through the general law.

Because of its relationship to the integrity of a structure, inferior welding has the potential of resulting in physical, economic or environmental harm. However, we believe the potential has a public impact only in cases of large-scale projects, such as public structures, commercial buildings, or ventures like the pipeline.

Persons responsible for the construction of such projects, who are actually the "consumers" of welding services, can be expected to have the experience and knowledge needed to evaluate the qualifications of welding personnel. This is especially true now that the AWS certified WI program provides a means of identifying qualified inspectors. Furthermore, the AWS program includes a code of ethics and procedures for handling consumer complaints.

It should be noted that if an interstate gas pipeline is built, construction activities would be under the jurisdiction of the Federal Power Commission. The Board's authority to impose welding regulations over such a pipeline is doubtful.

Also noteworthy is: (a) AWS's lack of support for State licensure of welding personnel, and (b) that only one other state to date requires licensing of WI's.

We found no evidence that State licensing of WI's affords significant additional protection to consumers. Furthermore, of the few complaints filed with State agencies against the welding occupation, only one alleged inferior welding practices, the remainder concerned unlicensed practice of the occupation or problems encountered in obtaining a license.

If, as a result of the "sunset" process, the Legislature determines that regulation of welding is needed, less restrictive alternatives are, in our opinion, viable. Welder qualification certificates can be required by statute and, if desired, the AWS certification program for WI's could be adopted by reference.

While we recognize the time and effort contributed by Board members, we do not believe that a sufficient public need exists for continuing the present licensing and regulatory structure.

However, in the event that the Board is reestablished, we recommend the following changes be made in its operation.

Recommendation No. 2

The Board should assume a more active role in the licensing process.

During our test of licensing files we noted the following:

1. Application forms do not request all the information necessary to determine if requirements for licensure have been met. There is no provision for documenting qualifications for initial licensure (as defined in 12 AAC 72.065(a) 1-8), except through the submission of AWS QC-1 certificate. Applicants for renewal are not asked to provide

evidence of the required visual examination. Consequently, none of the licenses renewed in 1979 documented that this requirement had been met.

2. At the direction of the Board, the licensing examiner was issuing licenses to applicants prior to a review of qualifications by the Board. In August, 1978, the Board began licensing "welding inspectors" and discontinued licensing "weld qualifiers". The change produced a certain degree of confusion on the part of the licensees, as well as the examiner, regarding the qualifications for licensure. As a result, licenses were issued to 4 (out of 48 tested) applicants who did not submit adequate proof of meeting the qualifications of a welding inspector.

AS 08.01.070(6) requires licensing boards to pass on the qualifications of applicants for licensure. As evidenced by the above described findings, current review procedures are not effective. As a result, the public is not being protected from unqualified practitioners, which is the primary objective of occupational licensing. We therefore recommend that no license be issued until the Board has thoroughly reviewed the qualifications of an applicant and has determined that all requirements for licensure or renewal have been met.

Recommendation No. 3

To ensure adequate representation of the regulated occupation and the general public: (a) the composition, terms and sources of nomination for Board membership should be reviewed and amended; (b) the Office of the Governor should make appointments in compliance with statutory requirements and in a timely manner.

As provided in AS 08.99.010-.050, the Board of Welding Examiners consists of seven members with extensive welding experience, three of whom must be engineers. Members are appointed by the Governor for staggered five year terms from nominations submitted by the Alaska Chapter of the American Welding Society and the Alaska Society of Professional Engineers.

Board Composition and Nominations

Over 20% of the licensed Welding Inspectors, as well as one in five Board members, responding to Legislative Audit questionnaires felt that the statutory requirements do not ensure adequate representation of the occupation. Their comments included opinions that the present Board consists of too many persons involved with test labs and that more than one member from the same firm should not serve concurrently. It was suggested that the Board should represent the various areas of the occupation: engineers, test labs, construction, fabrication and petrochemicals.

Furthermore, it was expressed that nominations should be accepted from the entire industry rather than two societies to which many qualified, interested persons are not known.

In addition to statute changes in Board membership suggested by licensees, in our opinion the Board should include at least one lay member, who has no direct financial interest in the regulated occupation. Although lay members lack technical expertise, they can and should contribute to policy formulation and enforcement decisions. The importance of a representative of the primary interest group, the public, should definitely be addressed.

Terms of Board members

Responses to licensee questionnaries also pointed to a significant opinion that Board member terms should be: (1) shorter (54% of those responding) and, (2) limited to no more than two consecutive terms (80% of those responding). The reason most frequently expressed was to create a more responsive, active Board.

Size of the Board

In addition, we believe that the Board is unnecessarily large when compared with other State boards and considering it currently licenses only 50 persons. We recommend a reduction in size to five members to increase operating efficiency and coordination with the Divison of Occupational Licensing (OL), and to reduce associated travel costs.

Appointments

Our examination of records in the Office of the Governor and the Division of Occupational Licensing (OL) showed that since 1973 the Board has had between 3 and 8 properly appointed members at a given time. In fact, it met the requirement for seven members for only nine months during the period reviewed. Of the "current" board, we finally determined--after receiving much conflicting information -- that three terms expired in December, 1978. In addition, only two of the seven members of the most recent board are engineers, as defined in the statutes.

In conclusion, we recommend that the Board seek changes in the statutes which will result in improved representation and efficiency of operation. Furthermore, as recommended in our October 30, 1978 performance review of OL, we urge the Office of the Governor to make more timely appointments to the occupational boards to ensure compliance with statutory requirements.

Recommendation No. 4

The Board should propose revisions to the statutes in order to clarify: (a) the intended powers and duties of the Board; (b) how welding regulations are to be enforced; and (c) the applicability of administrative adjudication procedures.

A. Authority for the Board of Welding Examiners is found in AS 08.99, which was last amended in 1970. Since that time, changes in Board membership, activities and regulations have occurred. As a result, several subsections of AS 08.99.080(a) no longer pertain to operations of the Board.

1. § 6 requires the Board to approve fees for welder certification tests. The Board no longer engages in this activity. However, this section was cited as the authority for charging fees for licensing welding inspectors.

2. § 10 states that the Board shall approve test facilities. The revised regulations omit this activity and instead address licensing of welding inspectors.

3. § 9 requires the Board to designate reporting procedures necessary to certify compliance with quality standards. No reporting methods are addressed in the regulations.

B. Statutes provide for the enforcement of welding regulations by both the Department of Labor (AS 08.99.080(b)) and the Department of Commerce and Economic Development (AS 08.01.087). The dual assignment of enforcement responsibility has resulted in confusion. The assignment of investigative duties needs clarification so that regulations are adequately enforced and consumer complaints are properly handled.

C. Although AS 08.01.090 states that the Administrative Procedures Act (AS 44.62) applies to proceedings held under the Centralized Licensing Chapter, the Board of Welding Examiners is excluded from a listing of agencies to which administrative adjudication procedures apply (AS 44.62.330). As a result of the omission, the applicability of the adjudication procedures is in doubt. The Board should be included in the listing in AS 44.62.330 through an amendment to the statutes.

Recommendation No. 5

The Board should continue its efforts in revising administrative regulations.

One of the primary activities of the Board over the past several years was the substantial revision of 12 AAC 72, the administrative regulations governing the occupation of welding in Alaska. The changes became effective August 21, 1978.

In the course of our review we noted several areas of 12 AAC 72 which merit further consideration, and possibly amendment.

1. Requirements for welder qualification (12 AAC 72.015) and welding inspector licensure (12 AAC 72.055) apply to all compensated welding operations in the State "in which weldment failure would involve hazard to life or property". The applicability of the regulations needs clarification to simplify interpretation and to make their enforcement manageable.

2. 12 AAC 72.045 requires "continuous employment" on a process (without interruption of more than 90 consecutive days) as a condition of maintaining a current welder qualification certificate. We believe this is unduly restrictive because:

   a. The regulations also require that a certificate be current under the code or job specifications under which it was issued.

   b. A welder qualified in several processes may be assigned by his employer to only one process for several months. Before he could be assigned to another process, additional time and expense would be requried for re-testing.

   c. The limited construction season in Alaska causes many welders to be without work for more than 90 day periods.

3. 12 AAC 72.105 requires an annual renewal of welding inspector licenses. This conflicts with AS 08.01.100 which requres biennial renewal of occupational licenses. It also creates additional administrative effort for both the Divisior of Occupational Licensing and the licensee, with no demonstrable benefit to the public.

4. 12 AAC 72.085 provides for quarterly examinations for welding inspector license. The provision,

which exceeds the regular semi-annual administration of the exam by the American Welding Society (AWS), was included to give sufficient opportunity to become licensed under the revised regulations. While we concur with the Board's reasoning, we feel they should review this policy in light of increased costs and the relatively small number (an average of 9) who take the exam each quarter.

In reviewing questionnaire responses from licensed WI's, we noted concern regarding the interpretation, acceptance and enforceability of the regulations. Doubts concerning the enforceability were likewise expressed by Board members who responded to a separate questionnaire: three believed they could not be enforced, expecially among small operators; two said they could be enforced if State funding for investigation was adequate.

We believe that the cited opinions of members of the occupation support our contention that additional revisions to the regulations are needed to make them clear, reasonable and within the scope of the Board's purpose.

Recommendation No. 6

With the assistance of the Division of Occupational Licensing (OL), the Board should develop procedures for defining its objectives and reporting its performance to the Governor and the Legislature.

As part of the "sunset" process of determining whether there is a continued public need for its existence, each Board must identify formal objectives. Where practical, these objectives should be quantifiable so that the Board's performance can be measured.

The budget process is the vehicle by which State agencies usually identify goals and objectives. While OL prepares such documents on a division-wide basis, objectives and measurements have not been developed for individual boards (see our October 30, 1978 performance review of (OL).

Furthermore, although required by AS 08.99.080(a)(8), the Board has not been submitting annual reports to the Governor and the Legislature. We recommend such reports be prepared and contain, at a minimum, the following information:

1. Board's purpose and objectives;

2. operating receipts and expenditues;

3. participation by Board members;

4. changes in statutes and regulations; and

5. significant activities and concerns.

The process of identifying objectives and reporting performance not only allows outside parties to evaluate the need for the Board, it also provides an important tool for the Board to evaluate itself and adjust its priorities for the most effecitve use of its resources.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analysis of Board activities relates to the public need factors defined in the "sunset" law. This analysis is not intended to be all inclusive, but addresses those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The Board revised its regulations (effective August, 1978), incorporating a nationally recognized program for certifying welding inspectors. However, we found that the regulations: (1) duplicate efforts of the national organization; (2) are vague with regard to applicability; (3) difficult to enforce (see Recommendatons No. 1 and No. 5).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

A. Due to statutory membership requirements and appointment delays, neither the public nor the occupation is assured of adequate representation on the Board (see Recommendaton No. 3).

B. The responsibility for enforcement of Board regulations is not clearly defined (see Recommendation No. 4).

C. The Board has not developed written plans or reported achievements by which to evaluate its performance (see Recommendation No. 6).

D. The Division of Occupational Licensing (OL) has not maintained updated statistics for Board use (see the OL Performance Audit Report).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. Statutes governing the Board have not been revised since 1970. We noted several sections which have become obsolete, yet the Board has not proposed any changes (see Recommendation No. 4).

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, and availability of service which it has provided.

A. We found no documentation of Board efforts to encourage input on the effect of its regulations and decisions, except as noted in V below.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. In accordance with the Administrative Procedures Act, the Board solicited written and oral testimony from persons interested in its proposed regulation revisions.

B. Board meetings are held four times per year and are announced in Anchorage, Fairbanks, Juneau and Ketchikan newspapers. However, they are not advertised in a timely manner (see the OL Performance Audit Report).

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. No formal complaints concerning Board activities have been filed with OL.

B. Of the two complaints filed with the Ombudsman during the last three years, both were closed and considered rectified.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A. The Board has not adequately reviewed applications for licensure. As a result licenses were issued to several persons whose qualifications were not adequately documented (see Recommendation No. 2).

B. Few complaints have been received against members of the regulated occupation. All but one dealt with unlicensed (rather than unethical or substandard) practice.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. We found no complaints or other evidence to indicate discriminatory practices by the Board. However, application forms request information on age. The question is of a potentially discriminatory nature and should be eliminated unless it is based on a bona fide occupational qualification.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

A. Please refer to the previous section, Findings and Recommendations.

APPENDIXES

APPENDIX A

BOARD OF WELDING EXAMINERS
REVENUES COMPARED WITH EXPENDITURES
Fiscal Year 1978
(UNAUDITED)

Revenue (See Note 1)	$ -0-
Expenditures (See Note 2)	(11,289)
Excess of Expenditures Over Revenues	$(11,289)

Note 1

Prior to the revision of its regulations in August, 1978, the Board did not assess any fees for licensure. Examination fees are remitted directly to the American Welding Society which administers the examination. Therefore no revenue was reported for the Board prior to the Fiscal Year 1979.

Note 2

Expenditures include those made by Board members, such as travel and per diem and an allocated percentage (estimated) of total administrative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Board and OL.

APPENDIX B

ADMINISTRATIVE STATISTICS

Licensed Welding Inspectors as of 3/12/79 (see Note 1)	Number	As % of Total
Alaska residence	27	55%
Out-of-state residence	22	45%
Total	49	100%

Total No. Examined	81
Divided by No. of Examinations given	9
Average No. per exam	9

Board Meetings in Calendar Years 1976-1978	
Average Number of Meetings per calendar year (see Note 3)	4.7 meetings
Average Number of Board members per meeting	4.6 members

Note 1

We were unable to determine, from information on file with OL, the legal residence of licensees. The above figures reflect mailing addresses.

Note 2

Numbers of individuals taking examinations were provided by the American Welding Society.

Note 3

At its January 27, 1978 meeting, the Board adopted a policy to hold meetings four times per year, on Fridays preceeding examinations. All meetings have been held in Anchorage.

APPENDIX C

QUESTIONNAIRE SENT TO BOARD MEMBERS

1. What are the goals and objectives of the Board?

Description	Number of Board Members' Responses (See Notes 1 and 2)
Decrease hazards to public/environment by improving the quality of welded products.	3
Improve quality of welded products.	1
Should be quality control, but currently involves self-prctective business interests.	1

2. What are the past accomplishments and future plans of the Board for meeting its goals?

Description	Number of Board Members' Responses
Past accomplishments:	
Revised regulations to license welding inspectors, thereby improving welding in general.	4
Economic self-interest.	1
Future plans:	
Maintain quality of criteria.	2
Give technical advice to State departments.	1
Should support Bureau concept; too much ill will towards present Board.	1
Continue pre-joint activity.	1

3. In what ways would the absence of regulation of welding in Alaska be detrimental to the public interest?

Description	Number of Board Members' Responses
Quality of component inspection and welder certification would suffer; non-code work would increase to detriment of the public.	3
Not detrimental; profesisonal societies have certification programs; private industry monitors itself.	1
Left unmonitored, quality would be circumvented to increase profits.	2
Higher cost because weldment failure is more expensive after a product is operating.	1

4. What alternatives to Board regulation of welding exist? Are the alternatives viable? Why?

Description	Number of Board Members' Responses
Bureau such as introduced by SB121; not viable; too expensive, bureaucratic.	1
Require extensive insurance coverage, relying on insurance companies to enforce standards; too expensive.	1
Eliminate Board; let industry police itself:	
Viable.	1
Not viable; not effective in past; only some large companies have developed quality control programs.	2
Utilize procedures other than welding; not practical.	1

5. Are existing statutes (AS 08.01 and AS 08.99) obsolete, vague, unduly restrictive, and/or inadequate to provide the Board with the authority to meet its objectives? What changes would you suggest?

Description	Number of Board Members' Responses
Adequate; no changes suggested.	2
Inadequate; need Bureau to perform physical function.	1
Somewhat vague, restrictive; Board's authority is doubtful but interest in welding has increased.	1
Obsolete; should address licensing of inspectors rather than welders, test facilities and code writing.	1

6. Are the recently amended regulations:

		Number of Board Members' Responses
A.	too restricitve; too lenient?	
	No; satisfactory.	4
	Yes.	1
B.	easily interpreted?	
	Yes.	4
	No.	1
C.	enforceable?	
	No, especially among small operators	3
	Yes, if State adequately funds investigations.	2
D.	accepted by those being regulated?	
	Yes.	2
	Partially or generally.	2
	Voluntary compliance.	1

7. What procedures are followed in the event a complaint against the Board or a licensee is received?

Description	*Number of Board Members' Responses*
Forward to OL for investigation; Board can act in advisory capacity.	*1*
Investigation; possible revocation of license.	*1*
No complaints reveived as yet against licensee.	*2*
Forward to Department of Labor to investigate.	*1*

8. In what ways, if any, could the Department of Commerce and Economic Development improve its service to the Board in the areas of administrative support and enforcement?

Description	*Number of Board Members' Responses*
No need for improvement.	*2*
OL does not understand Board function well enough to enforce.	*1*
Administrative support is excellent; Department of Labor is responsible for enforcement.	*1*
Need more funding for inspectors and to advertise regulations.	*1*

9. Should continuing education or re-examination be required for licensees? Why or why not?

Description	*Number of Board Members' Responses*
American Welding Society requires re-examination if licensee does not remain active in inspection. This requirement is sufficient for now.	*5*

10. Other comments to assist us in evaluating the need for the Board and its performance:

Description	*Number of Board Members' Responses*
Regulations are workable for large companies; small operators can not afford licensed inspector.	*1*
Create Bureau to perform Board's physical function; need internal regulations to prevent several Board members from one business from serving concurrently.	*1*
Board has been active in revising regulations; now responsible for maintaining standards.	*1*
Need additional funding for enforcement; should publicize regulations.	*1*

Note 1

Questionnaires were mailed to seven Board members. Replies were received from five.

Note 2

Because certain questions received several answers from Board members, total numbers of replies may exceed the number of Board members who responded.

APPENDIX D

QUESTIONNAIRE SENT TO LICENSED WELDING INSPECTORS

The following questions were sent to licensed welding inspectors (see Note 1). For each question we have noted the number of responses. We have also indicated the most typical written comments following each question as compiled from the questionnaire (see Note 2).

			Number of Licensees Responding		
			Yes	No	No Opinion
1.	(a)	Is certification of welding inspectors necessary to protect the public's health, safety and welfare?	35	2	0

Comments:

Yes--Quality of product is controlled establishing minimum qualifications for welding inspectors.

If inspections were not required, some contractors would use cheaper, unqualified welders.

No---Licensing does not ensure adequate protection;

Should not be limited to AWS-certified inspectors.

(b) If your reply to "a" was yes, which of the following methods of certification would be best:

	check one:
i. license issued by the Board	14
ii. license issued by the State	6
iii. only AWS certification	12
iv. other:	4

1. (Cont'd)

Comments:

Board - is better judge of qualifications due to knowledge of, and experience in welding; is flexible; can exercise closer control.

State - less likely to be prejudiced.

AWS - has expertise, good program; usable in all states; more efficient.

Other - Employer training program results in known abilty.

	Number of Licensees Responding		
	Yes	No	No Opinion
2. Are current requirements for obtaining a welding inspector license (education, experience, written and practical tests) fair and reasonable measures of technical knowledge and ability?	32	5	0

Comments:

Yes--Exam is fair test of knowledge; practical skill is necessary.

No---Qualification as welder is not necessary to inspect; need more specific practical experience; no proof of employment.

3. Has the Board given sufficient notice to the public and/or the profession regarding:			
a. exams?	26	5	6
b. meetings?	20	10	7
c. proposed regulation changes?	18	12	7

Comments:

Yes--the small number of licensees allows for adequate communication with Board
No---many are unaware of Board's existence; newspaper notices are not effective.

		Number of Licensees Responding		
		Yes	No	No Opinion
4.	Are the recently amended regulations of the Board (12 AAC 72):			
	a. too restrictive?	2	23	12
	b. too lenient?	3	20	14
	c. enforceable?	19	8	10
	d. easily interpreted?	23	3	11
	e. accepted by industry?	15	10	12

Comments:

Board not needed since firms must comply with codes.

Regulations are not being observed, especially by small contractors; are not enforceable.

Regulations are too general; need to clarify applicability.

Inadequate publicity on regulations; needed to protect public; industry more interested in profit than quality.

5.	In what ways can the Board assure the public of continued proficiency of licensed welding inspectors:			
	a. evidence of continued employment in the field?	33	1	3
	b. periodic re-examination of practical skills?	9	16	12
	c. periodic written re-examination?	3	20	14
	d. continuing education?	18	8	11
	e. Other?	6	—	31

		Number of Licensees Responding		
		Yes	No	No Opinion
5.	(Cont'd.)			
	Comments:			
	Re-examination is necessary only if there is a sustained absence from inspection.			
	Other ways include eye exams, inspection for compliance, maintenance of AWS certificate.			
6.	Are you aware of any discriminatory practices by the Board with regard to an individual's race, religion, color, national origin, age or sex?	1	35	1
7.	Do you feel the support provided by the Department of Commerce and Economic Development, Division of Occupational Licensing, has been adequate:			
	a. in the area of administrative services?	26	5	6
	b. in investigating complaints?	10	8	19
	Comments:			
	Not enough knowledge of welding.			
	Need funding for Department of Labor to enforce.			
	Not aware of support or complaints.			
	Need to inform affected parties.			
8.	By statute, the Board of Welding Examiners consists of seven members with extensive welding experience, three of whom must be engineers. Members are appointed for five year terms from nominations submitted by the Alaska Chapter of the American Welding Society and Alaska Society of Professional Engineers. Do you believe the Board:			
	a. is too large?	3	25	9
	b. is to small?	1	25	11

		Number of Licensees Responding		
		Yes	No	No Opinion
8.	(Cont'd.)			
	c. adequately represents the regulated profession?	25	7	5
	d. members should have shorter terms?	14	12	11
	e. members should serve a limited number of terms?	20	5	12
	f. should be served by a public member, not directly involved in welding?	4	25	8

Comments:

Should represent various segments of industry, including active welders; too many on Board represent test labs.

Shorter terms would create a more responsive Board.

No more than one or two terms.

Board is working well under current structure; conscientious.

9. Other comments to assist us in evaluating the public need for the Board and/or its performance:

Comments:

Good regulations but problems in implementation and enforcement.

Dubious need for Board.

Board has improved quality of welding; unqualified people used in past.

Need to consider products fabricated outside of State, safety standards, reports on Board activity.

Reputable company training programs should be accepted in lieu of license.

Note 1

Number of questionnaires sent to licensees	44
Number of responses	37
Response rate	84%

Note 2

Comments were reviewed and considered in the performance of our audit and are briefly summarized in this appendix.

Juneau, Alaska 99811

Dear Mr. Wilkerson:

We have reviewed the enclosed agency response to your preliminary report entitled:

"A Performance Review of the Board of Welding Examiners - June 8, 1979"

Additionally, we have reviewed and are enclosing copies of responses by the following Board Members:

Donald M. Lockman
Don Delk
Peter A. Millar

We believe the Department of Commerce's response appropriately sets forth the position of the Executive Branch of State government affecting continued existence of the Board. Member responses attached for your information, provide additional insight and reaction to your report recommendation.

Sincerely,

Richard A. Smith
State Internal Auditor

Dear Mr. Wilkerson:

The following comments are in response to the Performance Review of the Board of Welding Examiners, as submitted by the Division of Legislative Audit.

The department is still evaluating the viability of alternative methods of regulation and reserves the right to make additional findings and conclusions which may affect the continued existence of this board. This information will be presented to the Legislature during sunset hearings.

Thank you for the opportunity to respond to this report and for the time and effort expended by you and your staff.

Sincerely,

for Bertram L. Wagnon
Acting Commissioner

LEGISLATIVE
AUDIT

Dear Ms. Garrett:

In response to the recently received Performance Review of the Board of Welding Examiners submitted by Gerald L. Wilkerson, CPA, Legislative Auditor, Division of Legislative Audit dated August 23, 1979, I submit the following statements.

In reviewing the aforementioned Audit Report, it is quite obvious that the Audit Committee lacks the welding knowledge to fully understand the needs of the public in reference to protection against hazards from poor or inadequate weldments within the State.

In the beginning of the Boards existence, the largest issue was addessed to the licensing of weldors within the State. It was recognized by the Board that a weldor licensing would be a monumental task that would require a tremendous personnel and monetary effort on the State's part. The personnel requiring the expertise in this profession would not be available to the State as persons of this level are sought after by the industry on a continuing basis. Besides the lack of qualified persons available, the funds for such a task was also not available. It was recognized by the Board that qualified people from industry could control the certification of weldors if these qualified people could be responsible by proving their qualifications as Welding Inspectors.

The Board of Welding Examiners then began formulating a program to examine the qualifications of Welding Inspectors, although funds were not available from the State to adequately put a program of this nature together. At this same time, unbeknown to the Board, the American Welding Society had recognized the same need for testing Welding Inspectors and had implemented a testing procedure. The Board then adopted the AWS Testing Program guideline and the licensing of Welding Inspectors was born within the State.

The State licensed Welding Inspector holds a responsibility to the public to certify weldors within the guidelines of the nationally recognized Welding Codes used in Alaska. This responsibility protects the public from gross negligence of improper weldments that could fail, but only to the extent of those weldors actually certified by the Welding Inspectors.

As this method of assurance is still in the infancy stage due to the newness of the application, it is immature to criticize the effectiveness of the program. As more Welding Inspectors are licensed within the State, the greater the public protection will become.

There have been many instances of weld failures of crane booms, trailer hitches, store awnings, fishing boat hulls, school playground equipment, recreational equipment as well as building structures and harbor facilities, all of which are hazardous to the general public. Only trained personnel can recognize a poor or inadequate weldment and determine the abilities of a certifiable weldor.

It has been proven over the years that industry does not generally control the quality of production, evidenced by the need of welding codes to guide the users to implace restrictions of fabrication to assure quality. This is also evidenced by the need of societies to indoctrinate testing programs and Alaska to create the Board of Welding Examiners.

The Board has made acknowledgeable strides in creating a regulation that closely fits the needs of public interests, although additional revisions and clarifications of the regulations are clearly recognized by the Board members. These Board members serve without payment for their services, so progress is naturally slower than paid employees would be, although the expertise of these members would be more costly than the State would care to absorb if they would be available for hire. The cost to the State is at a minimum and should be recognized by the Audit Committee.

The size of the Board should be enlarged to accommodate the availability of donated services and to expand the current expertise level needed to properly evaluate the publics needs and industry's acceptance to those safeguards. As Board member nominations are received from two societies, they are not restricted to the societies membership by any means.

The Board's future activities will be guided by the public's desires of creating more effective regulations that are enforceable pursuant to the public's needs. These goals are yet to be formalized and categorized to a general public need. With the forthcoming projects of the petrochemical industry in the State, a greater need will be emphasized for the Board's guidance in revising regulations to insure the Alaskan public will be protected from inadequate welding by assuring Welding Inspectors are properly tested and are qualified to pass judgement on the certification of weldors.

There has already been a Senate Bill proposed to create a welding bureau within the State which would be more of a bureaucratic administration of welding than a regulation, which if nothing else, emphasizes the need for the Board of Welding Examiners to create a better regulation guideline.

Sincerely,

Donald M. Lockman

Donald M. Lockman, Chairman
Board of Welding Examiners

BOARD OF WELDING EXAMINERS

September 25, 1979

RECEIVED

SEP 28 1979

LEGISLATIVE AUDIT

Mr. Don Lockman
Chairman
Board of Welding Examiners
8235 Endicott Street
Anchorage, Alaska 99501

Dear Mr. Lockman:

Enclosed are my responses to the preliminary audit report on the Board of Welding Examiners.

1. Report Conclusion

a. I concur that most consumers (e.g., engineers, construction and pipeline companies) of welding services possess adequate knowledge to properly evaluate the qualifications of those providing services.

b. However, from personal experience, it has been observed that those who have the knowledge are not the individuals out in the field doing inspection and quality assurance work. Examples: 1) the Ketchbaw-Alyeska controversy would, in all probability, not have occurred if the project was being adequately controlled by qualified welding inspection. I personally know senior managers on the project that had very limited knowledge of welding or inspection. I know of one inspector who was a used car salesman with no qualifications; 2) movies of the first pipeline run on the North side of Cook Inlet clearly show that pipeline inspection consisted of a truck mirror on a three-foot handle and a flashlight. Clearly inadequate; 3) the roof of the Bethel Hospital and the walkway between the campuses at Alaska Community College and the University of Alaska in Anchorage demonstrate a complete lack of inspection. Untold dollars were spent on correcting the projects to ensure safety to the public.

08-H8LH

c. In short, millions of dollars have been spent to correct deficiencies that would not have occurred with adequate welding inspection. Also, hazards claiming lives have occurred within the State which could have been prevented if adequate inspection had been available to correct safety violations or defect code violations. Examples: Building 6-900 on Elmendorf burning in the 1960's and killing a welder and helper. A welder killed when working off of empty gasoline drums during construction of the parks highway.

d. I believe that the knowledge is possessed by the consumers but that it, in many cases, is not, or inadequately applied.

e. I agree that the AWS welding inspection program is the best thing since light bread, however, at this time, there is nothing that requires companies to use qualified inspectors (except 12 AAC 72), that has been the direction that the board has taken to provide higher quality inspection to welding projects, thereby saving the public untold dollars in rework and to increase the safety during welding operations and in the final product.

2. Recommendation No. 1

I admit that the board has problems that must be corrected. I, however, believe that the board is needed as shown in the preceding comments. I also feel that, for the last year, the board has made very little progress since almost all energy has been expended on Sunset Review. If we can ever get this review completed and get back to work on revising statutes, regulations and implement corrections to problems, we will make great strides toward protecting the public (our main job).

This audit has been very helpful in pointing out problem areas, but we must now have time to work in implementing the recommendations instead of continuing to prepare for the review.

Recommendation No. 2

1. The State does not need to look at visual examinations since it is virtually impossible to obtain or maintain an AWS QC-1 Certificate without the results of the exam being received by AWS. We do not need to increase the bureaucracy by requesting something that has already been requested and supplied.

2. I concur that the board should review qualifications prior to issuing licenses.

Recommendation No. 3

1. I agree. However, I consider myself a lay member since I work for the Federal Government as an aircraft maintenance officer. I have very little chance to gain monetarily from any actions of the board. I also am technically qualified to make good input to the board's operations. If appointments are made from the entire industry some method must be set up to solicit applications.

b. The Office of the Governor must respond in a timely manner in order to be effective.

Recommendation No. 4

a. Concur.

b. Concur.

c. Concur.

Recommendation No. 5

1. Concur.

2. This one is tough, but should be looked at.

3. Concur.

4. Concur.

Recommendation No. 6

1. Concur.

2. Concur.

3. Concur.

4. Concur.

5. Concur.

Additional Comments

I was asked for more information than I could supply simply because of one reason: time. It seems that every time a response is required from me by the Division of Legislative Audit, I am working 14-hour days and on my way out of State. Twenty days to respond is inadequate. If we could respond during the next scheduled board meeting, we could work for a couple of days and come up with the type of response that you are

looking for. All board members are busy and need additional time to meet together to comply with your wishes.

Appendix A

If the board has collected no revenues, the companies that have paid for test lab licenses in the past, as well as myself, paying for welder qualifier and welding inspector licenses are surely getting ripped off. I suggest homework should be done. I also feel that the expenditures by the board are insignificant for the amount of work that has been done by the board.

Appendix D

It appears to me that properly qualified welding inspectors (if not qualified they could not pass AWSQC-1), more or less support the board. Individuals who cannot qualify under AWS QC-1 will not (for obvious reasons), support the board.

I appreciate the opportunity to reply to the Division of Legislative Audit, but, again, request more of the item that I have the least of, time.

Very truly yours,

Don Delk / bjf

Don H. Delk

DHD/sa2/6

RECEIVED
SEP 28 1979
LEGISLATIVE AUDIT

August 9, 1979

To: Don Delk
Secretary, Board of Welding Examiners

Re: Comments in regards to Judy White's letter of June 20, 1979 to the Board of Welding Examiners

In general the letter received by Judy White, Auditor Division of Legislative Audit, in regards to Sunset Legislation is very well written and pinpoints exactly many of the problems of the Board of Welding Examiners.

I would like to take exception, however, to the following points:

a) AWS's lack of support for State licensure: Robert Foxall, AWS National Chairman, 1978; John Moeller, AWS Chairman, 1977 and Ken Fordyce, AWS National Certification Chairman have been present at Anchorage AWS meetings and have spoken highly of the Board of Welding Examiners' work in regards to licensing inspectors.

b) It may be true that only one state requires licensing of Welding Inspectors, however the AWS certification program has only been in effect since 1976 and thus it is understandable that very few states have adopted the requirement of certification.

c) Certification of welders instead of inspectors was discussed previously by the board. It was felt that it is easier to monitor and license 100 welding inspectors than 2,000 welders. I do agree that monitoring either welding inspectors or welders by state agencies is not feasible, however I do believe many individual welding inspectors have vastly upgraded their knowledge and ability in meeting the state license requirment.

d) In regards to the state license files, there are discrepencies all of which are minor and easily corrected. I do believe that the public is being protected from "unqualified practitioners" to a greater extent than ever before.

e) In regards to the make up of the Board of Welding Examiners size, appointments, etc. I would agree that we need a more diverse group, however I would think that seven members is a workable number. Meetings of twice or once yearly I would think is a better solution for cutting costs than limiting the numbers of members to five. We may only affect 50 to 100 inspectors, however the regulations affect thousands of welders.

f) In regards to revising the statutes, revising administrative regulations, developing board objectives and document administrative procedures; many good points were brought up. I would like to see the Auditor, Judy White, attend our next meeting if possible in order that we might make some progress in these areas.

In conclusion, I would say that although the present statutes are probably unenforceable to a large extent they never the less have made a very positive impact in the area of welding in Alaska with many inspectors being licensed

through the American Welding Society. Personally I do not believe the Board should be terminated in 1980, however I do not feel that further regulation of the industry by government is necessary either.

RE: A Performance Review of the Board of Welding Examiners, June 8, 1979.

Dear Mr. Wilkerson:

Your letter of September 10th has requested a reply within twenty (20) days. In order to meet this deadline, we two board members have had several meetings and discussions. We have not had time to get together with the entire board or to circulate a reply, so that all of the board could participate in this answer.

At the time of the Legislative committee hearing, the welding board contemplates "presenting its case." Our discussions indicate that this case will be in three parts:

1) an orientation in respect to welding

2) recommendations of prominent authorities throughout the United States with respect to State regulation of welding, and

3) a series of specific proposals including but not limited to those raised by the preliminary audit report.

By way of the requested written reply, to the findings and recommendations of the written audit report, we set forth the following:

1) Re: Recommendation No. 1. Termination of the Board. We disagree. The performance review sets forth good criteria to determine whether licensing is desirable. Essentially we agree that licensing is desirable when a) unlicensed practice poses a serious risk; b) consumers are at a disadvantage in evaluating the welder; and c) there has been abuse with inadequate recourse through the general law. Here the unlicensed practise can mean failure of the weld with the attendant sinking of the vessel, collapse of a structural steel member, bursting of a pipe, leakage of carbon monoxide from a muffler into the interior of an automobile, etc. It is safe to say that the general public does not know enough about welding and welders to be able to evaluate a person's qualifications as a welder. The sinking of barges, collapse of crane booms and leakage of pipelines and car mufflers, have resulted in loss of life and environmental damage; in addition to the structural damage and loss of time which can be compensated through the general law. Therefore, licensing is desirable.

Performance review is correct in indicating that the State of Alaska has not been in a financial position to regulate, by licensing, all welding personnel in the past. It is also correct in indicating that only one other State to date has elected the stop gap measure currently used by the Board of Welding examiners, of licensing welding inspectors. We respectfully suggest, that that time is at hand when public safety and environmental necessity merit the regulation of welding in a more thorough manner. We further suggest that the logical means to do this is through a State Board of Welding Examiners, who will be able to be more active than the Board has been allowed to be in the past.

2) Re: Recommendation No. 2. The Board more active in Licensing. We agree with this recommendation. The performance review makes excellent points in this regard and its suggestions together with others to be proposed by ourselves should be adopted within the next year. To implicate these will require action by the Board in promulgating regulations and a budget which will permit actual work in the field. It is to be hoped that both of these processes could be completed by the beginning of fiscal 1980-81.

3) Re: Recommendation No. 3. Assuring adequate representation on the Board. We concur with the bulk of this recommendation. The performance review is good as far as it goes, in reviewing the Board composition, terms, etc. We feel that there are additional factors which should be considered in the make-up of the Board and the terms to be served. This is a Legislative process and we will be presenting specific recommendations to the Legislature in this regard. Because it is the turn of the Welding Board for review under the sunset law it would be hoped that these matters could be completed by the Legislature at its next session. The harder portion of the recommendation to implicate, concerns the direction that the Governor act in a more timely manner in making appointments to the Board. The Board itself would be glad to participate as requested in screening and recommending appointments. It is beyond the ability of the Board to direct the Governor in the course of making appointments. We agree with the recommendation but are not in a political position to be able to implicate it.

4) Re: Recommendation No. 4. Board recommendation of statutory revisions. We concur with this recommendation. As mentioned above we feel that the time has come when the State no longer need use the Board of Welding Examiners as a stop-gap measure to "do the best it can", to protect public safety and environmental concern. We favor the review of powers and duties of the Board. The Board has long requested fiscal support for the enforcement of welding regulations, since it is obviously quite difficult to be a fierce tiger when you are toothless. We certainly have no objections to the applicability of the administrative procedures act. Implementation of this should be by Legislative action and it can be completed by the effective date of Legislation affecting the welding board during 1980.

This paper is not the place to present a series of detailed recommendations. These will be provided at the Legislative hearing.

5) Re: Recommendation No. 5. Continuing revision of administrative regulations. We concur with the recommendation although we may differ on some of the detailed suggestions. Once again these suggestions are good, they represent needs that should be met and that the Board has been endeavoring to meet over the past couple of years. We propose that the Board continue its process of review and address the specific points raised. This should be implicated by board action with a target date of July 1, 1980.

6) Re: Recommendation No. 6. Defining objectives and reporting to the Governor and Legislature. We concur with the recommendation, feeling that part of the defining of objectives is established by the Legislature, and that staff time will have to be provided to permit the requested reporting to be done. Because this recommendation is partially budgetary it will have to be accomplished through both board action and legislative action and would probably become effective July 1, 1980 when the new budget becomes effective. We hope that the presentation that we will be making to the Legislative committees as part of the "sunset" process, will be of considerable help in arriving at the implication of this recommendation.

We hope that we will be notified of the time of the Legislative committee hearing at the earliest possible date. A good presentation requires lead time to make people available and work concepts into shape. We look forward to cooperating with you in the future in this process.

Respectfully submitted,

J. C. WINGFIELD

HB595

Jan-28, 1982
Box 977
Wasilla, AK.
99687

Hello Mr. Terry Martin,

I'm writing in regards to the states of the Board of Welding Examiners. I am a firm believer in minimal government and related agencies, however, at this time I recommend retaining the Board for these reasons:

1. It has proven extremely frugal with practically no cost to the State - it has taken in approx. $2,000 over the past year to offset the approx $2,000 expenditures of its activities.
2. I, as a welding inspector, have seen several cases of extremely poor welding which would have endangered life or property if not stopped from being put into service before correction:
   a) These include the welder

bases of H-Beam piling supports for electric transmission lines along the busy Glenn Highway.
b) Also the Airport Control Tower at Bethel had serious defects which were found in time by a Liscensed welding inspector.

If we had a swift, effective judicial system which could hold people and companies responsible for slubby work before the damages were done, then I'd say we need no such watch dog for weld quality. But such isn't the case and in fact, it appears to me that a few people want to start a Welding Bureau which I believe would be no more effective and would grow into a full blown Tax eating hog.

Some of the same people who want the Welding Bureau have not been able to pass the rather stringent Welding Inspectors Test which also requires 5 years of experience in the welding field.

In these days of hundreds of millions of dollars in the state budget it is amazing that the Board of Welding Examiners have worked within such a small budget and been effective.

I believe strongly in the "sunsetting" concept but would even go further - so that when an agency is found to be ineffective and/or costly compared to a possible alternative, the legislature should be able to liquidate it without waiting for the 5 year period for sunset consideration.

Thank you for your attention to this matter.

Sincerely
John D. Ward

February 20, 1982

Representative Terry Martin, Chairman
House Labor & Commerce Legislation Committee
Twelfth Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Sir:

We understand that your committee is in charge of reporting out for House Bill 595 to reestablish the Alaska State Board of Welding Examiners. In context we support an Alaskan need for some credible entity acting in an overview capacity on welder certifications. We are not familiar with this special bill. We understand that the bill would reestablish the retiring board of welding examiners where we served a short term. We could not concur totally with the past approach which suffered extensively from imput from our resident testing laboratories. The board and ensuing regulations, however, are vital to qualifying a welder's ability. This is especially interesting in the Alaska's petroleum industry where "the State" is so heavily involved and the joining of metals (i.e. welding) can be so closely associated with liability. Without some type of homogeneous examination and certification any novice welder may profess efficiency in a number of welding procedures totally outside his capabilities. We believe the present certification process has been and will continue to be in the best interest of Alaska and Alaskans. We would appreciate a copy of the draft legislation for review and comment.

Sincerely,

James W. Crippen

The Honorable Mr. Terry Martin
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

It has come to my attention in recent weeks that there is an effort under way in Alaska to dissolve the State License requirements for welding inspectors. I think this would be a great disservice to the people of Alaska. At present, a welding inspector has to go through considerable time and effort to be licensed in Alaska. This helps to insure that welding inspectors are indeed qualified to make the determinations in the field that may affect the life and property of Alaskans.

I have been involved in the Welded Construction Industry since 1958 and have seen too many cases of unqualified inspectors allowing work schedules or favors from the contractor doing the construction to sway their decisions. I feel Alaska has taken a giant step into the future by licensing welding inspectors and setting down a code of ethics for welding inspectors. I hope all other states adopt such a forward looking program. For anyone to degrade or dilute this program would be a loss for Alaska and the other states considering such a program.

Sincerely,

James A. Schooley Jr

Mr. Pete Jeans
Deputy of Commerce
State Office Building
9th Floor Pouch "D"
Juneau, Alaska 99811

Dear Pete:

Enclosed is a copy of Associated Grocers' Bakery Order Guide. I have circled the 36 products not available to consumers in Alaska due to current weight regulations as we discussed on the phone.

The bakery industry in the past few years has gone to other than 16 on increments in many breads. Due to the ingredients in variety breads and because consumers want smaller loaves for freshness, many breads are 14, 15, and 22½ oz. loaves.

If I can be of any other service, don't hesitate to contact me.

Sincerely,

Ed Pooley

Here are the current laws and subsection changes that HB597 effects.

Sec. 45.75.200. Declarations of quantity and origin on packages. (a) Except as otherwise provided in this chapter, a commodity in package form introduced or delivered for introduction into or received in intrastate commerce, kept for the purpose of sale, or offered or exposed for sale in intrastate commerce shall bear on the outside of the package a definite, plain, and conspicuous declaration of

(1) the net quantity of the contents in terms of weight, measure, or count;

(2) in the case of a package kept, offered, or exposed for sale, or sold in a place other than on the premises where packed, the name and place of business of the manufacturer, packer, or distributor; and

(3) the identity of the commodity in the package unless it can easily be identified through the wrapper.

(b) In the declaration required under (a)(1) of this section the qualifying term "when packed" or other words of similar import, or a term qualifying a unit of weight, measure, or count such as for example "jumbo," "giant," "full," and the like that tends to exaggerate the amount of commodity in a package, may not be used.

(c) Under (a)(1) of this section the director shall, by regulation, establish (1) reasonable variations or tolerances to be allowed, which may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure, (2) exemption as to small packages, and (3) exemptions as to commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at the time of sale to the consumer. (§ 23 ch 101 SLA 1961; am § 2 ch 78 SLA 1969)

This section is amended by adding subsection (d).

Sec. 45.75.250, Bread. Each loaf of bread and each unit of a twin or multiple loaf made or procured for sale, kept, offered, exposed for sale, or sold, whether or not the bread is wrapped or sliced, shall weigh one-half pound, one and one-half pounds, or a multiple of one pound, avoirdupois weight, within reasonable variations or tolerances established by regulation by the director. This section does not apply to biscuits, buns, or rolls, weighing four ounces or less, or to stale bread sold and expressly represented at the time of sale as such. The marking provisions of AS 45.75.200 do not apply to unwrapped loaves of bread. (§29 ch 101 SLA 1961)

This section is repealed.

tend to exaggerate the amount of commodity in the package. (§ 3 ch 1 SLA 1969)

Cross reference. — As to unlawful acts and practices with regard to advertising, see AS 45.50.471.

Sec. 45.7 .230. Misrepresentation of price. When a commodity or service is sold, or is offered, exposed, or advertised for sale, by weight, measure, or count, the price shall not be misrepresented, and the price shall not be represented in a manner calculated or tending to mislead or deceive an actual or prospective purchaser. When an advertised, posted, or labeled price per unit of weight, measure, or count includes a fraction of a cent, all elements of the fraction shall be prominently displayed and the numeral expressing the fraction shall be immediately adjacent to, of the same general design and style as, and at least one-half the height and width of the numerals representing the whole cents. (§ 27 ch 101 SLA 1961)

Sec. 45.75.240. Meat, poultry, and sea food. (a) Except as provided in (b) of this section, meat, meat products, poultry, and sea food except shellfish, offered or exposed for sale or sold as food, shall be offered or exposed for sale and sold by weight. When meat, poultry, or sea food is combined with or associated with some other food element to form either a distinctive food product or a food combination, the food product or combination shall be offered or exposed for sale and sold by weight. The quantity representation may be the total weight of the product or combination, and a quantity representation need not be made for each of the several elements of the product or combination.

(b) This section does not apply to meat, meat products, poultry or sea food which is for immediate consumption on the premises where sold, or as one of several elements comprising a ready-to-eat meal not to be consumed on the premises where sold. (§ 28 ch 101 SLA 1961; am § 4 ch 78 SLA 1969)

Sec. 45.75.250. Bread. Each loaf of bread and each unit of a twin or multiple loaf made or procured for sale, kept, offered, exposed for sale, or sold, whether or not the bread is wrapped or sliced, shall weigh one-half pound, one pound, one and one-half pounds, or a multiple of one pound, avoirdupois weight, within reasonable variations or tolerances established by regulation by the director. This section does not apply to biscuits, buns, or rolls, weighing four ounces or less, or to stale bread sold and expressly represented at the time of sale as such. The marking provisions of AS 45.75.200 do not apply to unwrapped loaves of bread. (§ 29 ch 101 SLA 1961)

Sec. 45.75.260. Butter, oleomargarine, and margarine. Butter, oleomargarine, and margarine shall be offered and exposed for sale and

(3) the identity of the commodity in the package unless it can easily be identified through the wrapper.

(b) In the declaration required under (a)(1) of this section the qualifying term "when packed" or other words of similar import, or a term qualifying a unit of weight, measure, or count such as for example "jumbo," "giant," "full," and the like that tends to exaggerate the amount of commodity in a package, may not be used.

(c) Under (a)(1) of this section the director shall, by regulation, establish (1) reasonable variations or tolerances to be allowed, which may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure, (2) exemption as to small packages, and (3) exemptions as to commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at the time of sale to the consumer. (§ 23 ch 101 SLA 1961; am § 2 ch 78 SLA 1969)

Sec. 45.75.210. Declarations of unit price on random packages. In addition to the declarations required by AS 45.75.200, a commodity in package form, which is one of a lot containing random weights, measures, or counts of the same commodity and bearing the total selling price of the package, shall bear on the outside of the package a plain and conspicuous declaration of the price per single unit of weight, measure, or count. (§ 24 ch 101 SLA 1961)

Sec. 45.75.220. Misleading packages. No commodity in package form may be so wrapped, or put in a container so made, formed, or filled as to mislead the purchaser as to the quantity of the contents of the package, and the contents of a container may not fall below the reasonable standard of fill which the director prescribes for the commodity. (§ 25 ch 101 SLA 1961)

Sec. 45.75.225. Advertising packages for sale. (a) When a commodity in package form is advertised in any manner and the retail price of the package is stated in the advertisement, there shall be clearly and conspicuously associated with the statement of price a declaration of the basic quantity of contents of the package as is required by law or regulation to appear on the package.

(b) When the law or regulation requires a dual declaration of net quantity to appear on the package, only the declaration that is required to appear first and without parentheses on the package need appear in the advertisement.

(c) There may not be included as part of the declaration required by this section such qualifying terms as "when packed," "minimum," "not less than," or other terms of similar import nor terms qualifying a unit of weight, measure, or count such as "jumbo," "giant," "full," which

Section
270. Fluid dairy products
280. Flour, corn meal, and hominy grits
282. Bulk deliveries sold in terms of weight and delivered by vehicle
288. Furnace and stove oil
290. Coal, coke, and charcoal
300. Textile products
310. Berries and small fruits
320. Construction of contracts

Sec. 45.75.190. Method of sale of commodities. (a) Commodities in liquid form may be sold only by liquid measure or by weight. Except as otherwise provided in this chapter, commodities not in liquid form may be sold only by weight, by measure of length or area, or by count. However, liquid commodities may be sold by weight and commodities not in liquid form may be sold by count only if the method gives accurate information as to the quantity of commodity sold.

(b) The provisions of this section do not apply to

(1) commodities when sold for immediate consumption on the premises where sold;

(2) vegetables when sold by the head or bunch;

(3) commodities in containers standardized by a law of this state or by federal law;

(4) berries and small fruits when sold by dry measure in accordance with AS 45.75.310;

(5) commodities in package form when there exists a general consumer usage to express the quantity in some other manner;

(6) concrete aggregates, concrete mixtures, and loose solid materials such as earth, soil, gravel, and crushed stone, when sold by cubic measure; or

(7) unprocessed vegetable and animal fertilizer sold by cubic measure.

(c) The director may issue reasonable regulations necessary to assure that amounts of commodity sold are determined in accordance with good commercial practice and are so determined and represented as to be accurate and informative. (§ 22 ch 101 SLA 1961)

April 14, 1981

Arthur H. Peterson
Assistant Attorney General
Department of Law
Pouch K
Juneau, Alaska 99811

Subject: Regulations Pertaining to Section 45.75.250 "Bread" of the Weights and Measures Act.

Dear Art:

Per our conversation on above subject. Following is the background material you requested.

I have been asked to draft regulations allowing bread to be sold within the State of Alaska in 15 oz. and 22½ oz. increments.

I would like a legal interpretation if regulations may be established under the portion of this section that reads "within reasonable variations or tolerances established by the director."

This request originated because the State of Washington allows bread to be baked and sold in several increments other than half or even pound. Some suppliers of bread products to several Alaskan communities do not bake most brands in the even increments required in our statutes and the purchasers are forced to seek several sources to supply their needs.

A regulation allowing bread to be sold in increments in other than those required by the statute would solve the problem. However, before I draft regulations of this nature I would like to have the Attorney General's interpretation of "reasonable variations or tolerances."

For additional information please find enclosed a copy of Chapter 34 of the AAC, Article 2, Section 30; and Chapter 33, Article 9, Sections 630 and 640, pertaining to reasonable variations.

Sincerely,

Joseph L. Swanson
Chief, Weights and Measures

Enc.

cc: Deputy Commissioner Pete Jeans
Representative Ernie Haugen
Art Hammer

Sec. 45.75.240. MEAT, POULTRY, AND SEAFOOD. (a) Except as provided in (b) of this section, meat, meat products, poultry, and seafood except shellfish, offered or exposed for sale or sold as food, shall be offered or exposed for sale and sold by weight. When meat, poultry, or seafood is combined with or associated with some other food element to form either a distinctive food product or a food combination, the food product or combination shall be offered or exposed for sale and sold by weight. The quantity representation may be the total weight of the product or combination, and a quantity representation need not be made for each of the several elements of the product or combination.

(b) This section does not apply to meat, meat products, poultry or seafood which is for immediate consumption on the premises where sold, or as one of several elements comprising a ready-to-eat meal not to be consumed on the premises where sold. (§ 28 ch 101 SLA 1961; am § 4 ch 78 SLA 1969)

Effect of amendment--The 1969 amendment designated the former section as subsection (a) and added subsection (b). In subsection (a) the amendment added "Except as provided in (b) of this section" at the beginning of the first sentence, deleted "unit or" preceding "weight" in the first and second sentences, and added the last sentence.

Sec. 45.75.250. BREAD. Each loaf of bread and each unit of a twin or multiple loaf made or procured for sale, kept, offered, exposed for sale, or sold, whether or not the bread is wrapped or sliced, shall weigh one-half pound, one pound, one and one-half pounds, or a multiple of one pound, avoirdupois weight, within reasonable variations or tolerances established by regulation by the director. This section does not apply to biscuits, buns, or rolls, weighing four ounces or less, or to stale bread sold and expressly represented at the time of sale as such. The marking provisions of § 200 of this chapter do not apply to unwrapped loaves of bread. (§ 29 ch 101 SLA 1961)

Sec. 45.75.260. BUTTER, OLEOMARGARINE, AND MARGARINE. Butter, oleomargarine, and margarine shall be offered and exposed for sale and sold by weight and only in units of one-fourth pound, one-half pound, one pound, or multiples of one pound, avoirdupois weight. (§ 30 ch 101 SLA 1961)

Sec. 45.75.270. FLUID DAIRY PRODUCTS. Fluid dairy products, including but not limited to whole milk, skimmed milk, cultured milk, sweet cream, sour cream, and buttermilk, shall be packaged for retail sale only in units of one gill, one-half liquid pint, 10 fluid ounces, one liquid pint, one liquid quart, one-half gallon, one gallon, one and one-half gallon, two and one-half gallon, or multiples of one gallon. However, packages in units of less than one gill are permitted. (§ 31 ch 101 SLA 1961; am § 5 ch 7 SLA 1969)

Effect of amendment--The 1969 amendment inserted "one and one-half gallon, two and one-half gallon" in the first sentence.

Sec. 45.75.280. FLOUR, CORN MEAL, AND HOMINY GRITS. When in package form, and when packed, kept, offered, or exposed for sale or sold, wheat flour, whole wheat flour, graham flour, self-rising wheat flour, phosphated wheat flour, bromated flour, enriched flour, enriched self-rising flour, enriched bromated flour, corn flour, corn meal, and hominy grits shall be packaged only in units of 2, 5, 10, 25, 50, or 100 pounds, avoirdupois weight. However, packages in units of less than two pounds or more than 100 pounds are permitted.

ARTICLE 2. BREAD

Section
30. Variances and tolerances
40. Sizes of baking pans

3 AAC 34.030. VARIANCES AND TOLERANCES. (a) Any bread manufactured for sale, offered or exposed for sale or sold, shall meet the weight requirements of AS 45.75.250 except that the following variances and tolerances are acceptable:

(1) the one pound loaf (standard loaf) may weigh not less than 15 ounces;

(2) the one and one-half pound loaf (standard large loaf) may weigh not less than 22 ounces and not more than 25 ounces;

(3) any loaf weighing more than those described in subsection (a) and (b) of this

section, shall be in multiples of one pound and the variances and tolerances may be not more than a minus one ounce per pound or more than a plus one ounce per pound.

(b) The statement of quantity required by AS 45.75.200(a)(1) to appear on the label shall not include the variances and tolerances permitted in subsections (1), (2) and (3) of this section. (Eff. 12/18/64, Reg. 17; am 7/24/70, Reg. 35)

Authority: AS 45.75.050
AS 45.75.190
AS 45.75.200

3 AAC 33.630. VARIATIONS FROM DECLARED NET QUANTITY. Variations from the declared net weight, measure, or count shall be permitted when caused by unavoidable deviations in weighing, measuring, or counting the contents of individual packages that occur in good packaging practice, but such variations shall not be permitted to such extent that the average of the quantities in the packages of a particular commodity, or a lot of the commodity that is kept, offered, or exposed for sale, or sold, is below the quantity stated, and no unreasonable shortage in any package shall be permitted, even though overages in other packages in the same shipment, delivery, or lot compensate for such shortage. Variations above the declared quantity shall not be unreasonably large. (Eff. 7/24/70, Reg. 35)

Authority: AS 45.75.050
AS 45.75.190
AS 45.75.200

3 AAC 33.640. VARIATIONS RESULTING FROM EXPOSURE. Variations from the declared weight or measure on individual packages shall be permitted when caused by ordinary and customary exposure to conditions that normally occur in good distribution practice and that unavoidably result in change of weight or measure, but only after the commodity is introduced into intrastate commerce; provided, that the phrase "introduced into intrastate commerce" as used in this paragraph shall be construed to define the time and the place at which the first sale and delivery of a package is made within the state, the delivery being either

(1) directly to the purchaser or to his agent; or,

(2) to a common carrier for shipment to the purchaser. This paragraph shall be construed as requiring that, so long as a shipment, delivery, or lot of packages of a particular commodity remains in the possession or under the control of the packager or the person who introduces the package into intrastate commerce, exposure variations shall not be permitted. (Eff. 7/24/70, Reg. 35)

Authority: AS 45.75.050

DATE: May 18, 1981

FILE NO: J-66-693-81

TELEPHONE NO: 465-3600 x 56

THRU: Pete Jeans
FROM: Deputy Commissioner
Department of Commerce and Economic Development

SUBJECT: Regulation of Bread; AS 45.75.250

WILSON L. CONDON
ATTORNEY GENERAL

By:
Sarah T. Kavasharov
Assistant Attorney General

You have asked whether 3 AAC 34.030 may be construed to allow sale on a regular basis of loaves of bread weighing 15 oz. and 22.5 oz. 3 AAC 34.030, in effect since 1964, interprets AS 45.75.250, which sets standards for sizes of loaves. 1/ We understand that the most common standard loaf sizes regularly offered for sale are 16 oz. (1 lb.) and 24 oz. (1 1/2 lb.) However, we understand from you that the State of Washington allows regular marketing of loaves marked 1 lb. or, and 22.5 oz., and that Southeastern grocers have asked if they may stock and sell loaves of these sizes which are shipped from that state.

1/ AS 45.75.250 provides:

> Bread. Each loaf of bread and each unit of a twin or multiple loaf made or procured for sale, kept, offered, exposed for sale, or sold, whether or not the bread is wrapped or sliced, shall weigh one-half pound, one pound, one and one-half pounds, or a multiple of one pound, avoirdupois weight, within reasonable variations or tolerances established by regulation by the director. This section does not apply to biscuits, buns, or rolls, weighing four ounces or less, or to stale bread sold and expressly represented at the time of sale as such. The marking provisions of AS 45.75.200 do not apply to unwrapped loaves of bread.

3 AAC 34.030 provides, in relevant part, that:

> (a) Any bread manufactured for sale, offered or exposed for sale or sold, shall meet the weight requirements of AS 45.75.250 except that the following variances and tolerances are acceptable:

AS 45.75.250 provides, in part, that "reasonable variations or tolerances" from the statutory standard may be allowed by regulation adopted by the director of the division of weights and measures. 3 AAC 34.030 defines "variations or tolerances" to allow a 16 oz. loaf to weigh not less than 15 ozs. and a 24 oz. loaf to weigh not less than 22.5 ozs. We understand that it has been suggested to you that the regulation might be construed to allow regular marketing of the 15 oz. and 22.5 oz. loaves shipped from Washington.

We believe that approving the regular marketing of 15 oz. and 22.5 oz. loaves would be changing rather than interpreting the statute. Variation would still have to be allowed for individual loaves because of the problem that no one particular loaf can be expected to meet any standard to the exact ounce. We understand that it was to meet this problem that "reasonable variation" is allowed at all. Therefore, variation in the neighborhood of an ounce would still have to be allowed, with the result that loaves which should meet the 16 oz. standard could weigh only 14 oz. This would accomplish a shrinking of the statutory standard by executive action, which is not a reasonable exercise of the regulatory power.

AS 44.62.030 provides in part, that "no regulation adopted is valid or effective unless consistent with the statute and reasonably necessary to carry out the purpose of the statute." The apparent purpose of the statute is to protect reasonable public expectation that bread loaves will be of a standard size. The statute establishes a standard which consumers may reasonably expect to be followed. To allow a "variation" from the standard in this fashion -- a variation which would be virtually invisible to the consumer and yet not so small that it would not be significant -- would not be consistent with the statute. And, far from being reasonably necessary to carry out the purposes of the statute, it would operate to undermine the public protection purpose of the statute. A change of this nature should be made only with full notice to the public and opportunity for comment. At the least, this would require adoption of an amendment of

---

1/ (continued)

(1) the one pound loaf (standard loaf) may weigh not less than 15 ounces;

(2) the one and one-half pound loaf (standard large loaf) may weigh not less than 22 ounces and not more than 25 ounces;

(3) any loaf weighing more than those described in subsection (a) and (b) of this section, shall be in multiples of one pound and the variances and tolerances may not be more than a minus one ounce per pound or more than a plus one ounce per pound.

the current regulation through procedures established by the Administrative Procedure Act (AS 44.62). However, we believe that it would be an abuse of the regulatory power even to do this, because it would amount to change in the statutory standard by regulation.

In short, our view is, that the legislature has set a standard and only the legislature should change it. To deviate from the standard more than is reasonably necessary to accommodate the problem that individual loaves cannot be precisely uniform would be essentially to change the standard.

Re: Bread Weight Modification Bill

Due to the importance of your hearing I wish that I was in attendance, but a conflict made that impossible. The benefits to the people of Alaska are significant, if the Bill of Representatives Terry Martin and Ernie Haugen is adopted. To express these benefits during your hearing is the reason this letter is written.

In this era of rising costs and economic squeeze, conscientious manufacturers must increase productivity and decrease costs and the ultimate price of their product for the benefit of the public.

Currently the laws covering the bread weights of Alaska, Oregon and Washington vary. This increases costs due to production run stoppage for weight changes, costly small volume purchases of packaging material, and duplicated packaging inventories. Bread bag costs range from 1.7¢ to 4¢ depending some on ink coverage, but mainly on quantity runs. Modification of the Alaska law so that these extra costs can be eliminated will give your citizens a better buy on a very basic food - bread.

It is also the opinion of the Baking Industry that with the public's interest in many new varities of bread the weight of the dough must vary to bake the best quality product. The expansion of the dough differs greatly, from the regular white and blend wheat breads to the heavier multi-grain natural products which the public is interested in today. Therefore, quality can be improved and prices reduced by using less bread dough for some types of products.

Thank you,

LeConie Stiles C.

TESTIMONY OF MR. CHARLES E. TORKKO
President, Consulting Engineers Council of Alaska

Mr. Chairman and members of the Committee, my name is Charles E. Torkko. I am the President of the Consulting Engineers Council of Alaska. The Council is an association of active engineering firms dedicated to advancing the quality of engineering in Alaska. I would like to speak today in support of legislation ensuring that the selection of registered professional architects, engineers, and land surveyors for public projects will be made on the basis of professional qualifications and competence and not on premature fee or price bids. To assist the Committee, I have prepared copies of my remarks which I would like to leave with you, Mr. Chairman, at the conclusion of my testimony.

Traditionally, the selection of architects, engineers, and land surveyors--like many other learned professions--has been conducted through an evaluation process based on demonstrated competence and professional qualifications to perform the specific work that is desired. In this regard the selection of an engineer differs form the selection of a vendor for parts or supplies and from selection of construction contractors in that the choice of a vendor or contractor is generally based on detailed specifications and a quoted price, and contracts are generally awarded on a "low-bid" basis. The reason for this difference lies in the fact that the

professional architect or engineer offers a service that calls for applying state-of-the-art techniques to problems which are invariably unique and result in procurement specifications for vendors and construction contractors. I have been a professional engineer for over 20 years, and I can represent to this Committee that in those years I cannot remember solving the same design problem twice. Given these circumstances, the sole consideration in selecting an architect or engineer for a project must be whether the education, skills, and experience represented are best suited to the specific design problems of a proposed project.

No one in this room today--if he or she were ill--would think of asking for bids from physicians and expecting the low bidder to cure a person's illness while restricting the physician's resources. Nor would anyone with a particular complex legal problem--let's say an antitrust matter--ask for bids from the entire legal profession hoping that the most qualified attorney will just happen to submit the cheapest price. Similarly, in the design of a building or other public project, the first and foremost consideration must be the relative skill and experience of persons proposing to do the work. Only after a person or firm has been selected as the best qualified, and after the full requirements of the job have been assessed, should an attempt be made to negotiate a fair and reasonable price for the desired work. I stress the terms "fair" and "reasonable" because I do not mean to suggest that the cost of professional services should be ignored. It must always be the duty of the state or local official responsible for a public project to ensure that fees for professional

architectural or engineering services are amply justified. However, the only time that such a determination can properly be made is after the full scope and complexity of the project are understood, through negotiation. The selected firm must often be given clarifying assistance in the development of the project's objectives.

Many of you might ask what is wrong with requesting preliminary fee bids or estimates of charges for architectural and engineering services. Who loses if a contract is awarded based on, or substantially influenced by, such fee bids?

First and foremost--it is the public who loses--as the ultimate consumer for the proposed project. The public loses in that a few dollars saved at the critical design stage through shortcuts or unimaginative design solutions will result in increased construction costs and--more importantly--in increased operating, maintenance, and other life-cycle costs for the project over the many years of its useful life.

The public loses again in terms of receiving less than maximum value or utility from the project. A "bargain" price is no bargain if the item purchased does not do the job or does it at reduced efficiency.

Second, the professions of architecture and engineering suffer. Human nature being what it is, if fee bids or price estimates are injected prematurely into a competition process, the temptation to "lowball" the bid

will often be irresistible. A job obtained through a "bare bones" bid will produce one of two results. Either the client, and in this case the public, gets a less than optimal project and pays manyfold for the few dollars saved in design costs, or the design costs are later escalated upward through change orders as the client discovers the true cost of quality, professional work. This is, of course, unfair to others in the competitive process who may have refused to sacrifice professional quality for price.

The concept that I have outlined for you today, and which is represented in the legislation before this Committee, is neither new nor radical. As I mentioned at the beginning of my remarks, the generally accepted method for selecting architects and engineers has been to defer negotiation of fee until after a selection has been made based on qualifications. The federal government recognized the need to ensure that this concept is protected by passage of the Brooks Act in 1972. Many other states have followed this precedent and have enacted similar legislation. I have attached a list of these jurisdictions to my written remarks for the information of the Committee. Also, the American Bar Association, after years of effort, has adopted its Model Procurement Code, which calls for competitions to be based on qualifications and for the best qualified person or firm to be selected before fee or price is negotiated. Finally, the Alaska State Board of Registration for Architects, Engineers and Land Surveyors, established under Title 8 of the Alaska Statutes, has adopted, as a regulation with the force of law, 12 AAC 36.230, which prohibits registered professional architects and engineers from soliciting

or submitting proposals for services based on fee or price bids.

Although the substantial majority of public contracts for architectural and engineering services in Alaska are presently being advertised and awarded in accordance with the concept I have described, there have, unfortunately, been cases in which, either intentionally or inadvertently, registered professionals have been requested to submit fee bids. When a registered architect or engineer is faced with such a request, he or she must either decline to submit a proposal for the public job or be placed in a situation which violates the code of professional conduct established by regulation. The legislation which the Consulting Engineers Council of Alaska supports would specify that for contracts with registered architects or engineers issued by the state or a political subdivision, the initial selection of a person or firm must be made on the basis of professional qualifications and demonstrated competence to perform the desired work. I would, however, like to stress that the state or local official would, under this proposal, be free to establish whatever procedures or criteria they deem best in selecting a qualified person or firm. The only requirement under the proposed bill is that an attempt be made to negotiate a fair and reasonable fee with a person or firm selected as best qualified to perform the needed work. If negotiations with that person or firm are unsuccessful, state or local officials remain free to negotiate with other qualified applicants or to reject all or part of the remaining proposals. The recommended legislation would only apply to contracts with registered professional architects, engineers, and land

surveyors and would not affect bids for construction or other types of services or supplies by the state or its local governments. Also, contracts awarded in response to an emergency condition would be exempt from provisions of the bill.

By adopting the proposed bill, Alaska will join with many other states in ensuring that the public receives the highest possible quality of architectural and engineering services while preserving flexibility for state and local officials. I urge this Committee to act favorably on the proposed bill, and I will be happy to attempt to answer any questions. Thank you for the opportunity of testifying before the Committee today, and I thank you for your consideration of the proposed bill.

Sofo

CS FOR HOUSE BILL NO. 612 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public contracts for architectural and engineering services."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 35.15 is amended by adding a new section to read:

Sec. 35.15.055. CONTRACTS FOR ARCHITECTURAL AND ENGINEERING SERVICES. (a) The department may award a contract for architectural or engineering services only to a person or firm that the department determines is capable and qualified. ~~Notwithstanding AS 35.15.050,~~ after selecting a capable and qualified contractor for architectural or engineering services the department shall establish a reasonable fee for the services through negotiations with the contractor. The fee shall be based on the scope and complexity of the services required.

(b) A person or firm that (submits) provides architectural or engineering services may annually submit to the department a statement of qualifications and performance data. Before awarding a contract under (a) of this section, the department shall review the statements of qualifications and performance data on file with the department together with statements of qualifications and performance data submitted by others in response to an advertisement or request for proposals for bids under AS 35.15.030.

Mitch Gravo submitted this for consideration & discussion by committee

This passed as CS.

DISCUSSION DRAFT
(Second Draft)

1/12/82

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to contracts for architectural, engineering and land surveying services, and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS Title 36 is amended by adding a Chapter to read:

Chapter 30. Professional Service Contracts

Section 36.30.010. Contracts for Architectural, Engineering and Land Surveying Services. (a) It shall be the policy of the state and all political subdivisions, including any agencies thereof, to select persons or firms for the performance of architectural, engineering or land surveying services and to award contracts for such services only on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices.

(b) In issuing any request for services of an architect, engineer, or land surveyor registered under AS 08.48 and in awarding contracts to such registered professionals, the state and all political subdivisions shall select a person or firm deemed best qualified to perform the desired work on the basis of demonstrated competence and professional qualifications, and an attempt shall be made to negotiate a contract with such person or firm at a price which is fair and reasonable. Prior to such selection and negotiation, the state or a political subdivision shall not request or consider any statement, bid or estimate of fees or charges for architectual, engineering or surveying services for the proposed project or request any other submission or action which would constitute a violation of any provision of AS 08.48 or any regulation adopted thereunder.

(c) This section shall not be construed to require any particular procedure for the selection of architects, engineers or surveyors or for the award of contracts except as provided in subsection (b) above. Nothing in this section shall prevent the state or a political subdivision from publicly ranking proposals or offers recieved in response to a request for services or from attempting to negotiate a fair and reasonable price with the proponent deemed best qualified to perform the desired work or from attempting to negotiate such a price with other proponents, in order of ranking, if negotiations with the first ranked proponent are not successful or from rejecting all or part of any proposals. This section shall not apply to contracts awarded on an emergency basis when the person responsible for execution of the contract on behalf of the state or a political subdivision has certified in writing that an emergency exists.

Section 2. AS 36.95.010 is amended by adding subsections to read:

Section 36.95.010 Definitions. In AS 36.95.010 - [36.25.025] 36.30.010 unless the context requires otherwise:

( ) "emergency" means a condition which results in imminent danger of harm to the public health, safety or welfare or which requires immediate action to prevent harm to any person or property.

Section 3. AS 19.10.170(a) is amended to read:

(a) Except as provided in AS 36.30.010 and AS 44.33.300, it shall be the general policy of the department to require the construction of all highways under bid contract. However, subject to the provisions of (b) of this section, when the estimated cost of a construction project is less than $100,000 or when it appears to be in the best interests of the state, the department may perform the work notwithstanding any other provisions of law.

Section 4. AS 35.15.010(a) is amended to read:

(a) Except as provided in AS 36.30.010 and AS 44.33.300, it shall be the general policy of the department to require the construction of all public works under bid contract. However, when the estimated cost of a construction project is less than $100,000, or when it appears to be in the best interests of the state, the department may perform the work, notwithstanding any other provisions of law. A complete record shall be kept by the commissioner or his designee of all transactions entered into under this section including names of employees involved in the transactions.

Section 5. AS 37.05.230 is amended by adding a new subsection (9) to read:

(9) Requests and acceptance of bids, or other proposals for professional services of an architect, engineer or land surveyor registered under AS 08.48 shall comply with AS 36.30.010.

Section 6. AS 37.05.240 is amended by adding a new subsection to read:

(6) Requests and acceptance of bids, requests or other proposals for professional services of an architect, engineer or land surveyor registered under AS 08.48 shall comply with AS 36.30.010.

Section 7. This Act shall apply to all requests or advertisements for bids or proposals or other requests for professional services issued after the effective date hereof.

Section 8. This Act takes effect immediately in accordance with AS 01.10.070(c).

Note: States may appear in more than one category. Prohibition of or exemption from competitive bidding requirements for procurement in general may be provided in general statutes for A/E services. A specific procedure for selection of A/E services may be spelled out in another law.

States which prohibit competitive bidding for A/E services in Law:

Tennessee

Texas

States which exempt A/E services from general bidding requirements:

California
District of Columbia
Hawaii
Illinois
Kentucky
Mississippi-by attorney general's ruling
New Jersey
New York-by state comptroller's opinion
Ohio
Oklahoma
Pennsylvania
Wyoming

States calling for selection based on qualification: (with procedure requiring ranking of firms, negotiation on scope of project and fee with the top firm. If no contract can be reached, negotiations are terminated and taken up with the second ranked firm. Same procedure required for third ranked firm (and lower ranked firms if required by law) if no agreement can be reached with the second.

California	(1973)	Minnesota	(1975)

Part E—Architect-Engineer Services

§5-501 Architect-Engineer Services.

(1) *Applicability.* Architect-engineer services shall be procured as provided in this Section except as authorized by Section 3-204 (Small Purchases), Section 3-205 (Sole Source Procurement), and Section 3-206 (Emergency Procurements).

(2) *Policy.* It is the policy of this [State] to publicly announce all requirements for architectural and engineering services and to negotiate contracts for architectural and engineering services on the basis of demonstrated competence and qualification for the type of services required, and at fair and reasonable prices.

(3) *Architect-Engineer Selection Committee.* In the procurement of architectural and engineering services, the Chief Procurement Officer or the head of a Purchasing Agency shall encourage firms engaged in the lawful practice of their profession to submit annually a statement of qualifications and performance data. [The Chief Procurement Officer or the head of a Purchasing Agency, the Procurement Officer, and [the State Architect]] shall comprise the Architect-Engineer Selection Committee for each architect-engineer services contract over [S_____]. The Selection Committee for architect-engineer services contracts under this amount shall be established in accordance with regulations promulgated by the Policy Office. The Selection Committee shall evaluate current statements of qualifications and performance data on file with the [State], together with those that may be submitted by other firms regarding the proposed contract. The Selection Committee shall conduct discussions with no less than three firms regarding the contract and the relative utility of alternative methods of approach for furnishing the required services, and then shall select therefrom, in order of preference, based upon criteria established and published by the Selection Committee, no less than three of the firms deemed to be the most highly qualified to provide the services required.

(4) *Negotiation.* The Procurement Officer shall negotiate a contract with the highest qualified firm for architectural and engineering services at compensation which the Procurement Officer determines in writing to be fair and reasonable to the [State]. In making this decision, the Procurement Officer shall take into account the estimated value, the scope, the complexity, and the professional nature of the services to be rendered. Should the Procurement Officer be unable to negotiate a satisfactory contract with the firm considered to be the most qualified, at a price the Procurement Officer determines to be fair and reasonable to the [State], negotiations with that firm shall be formally terminated. The Procurement Officer shall then undertake negotiations with the second most qualified firm. Failing accord with the second most qualified firm, the Procurement Officer shall formally terminate negotiations. The Procurement Officer shall then undertake negotiations with the third most qualified firm. Should the Procurement Officer be unable to negotiate a contract at a fair and reasonable price with any of the selected firms, the Procurement Officer shall select additional firms in order of their competence and qualifications, and the Procurement Officer shall continue negotiations in accordance with this Section until an agreement is reached.

COMMENTARY:

(1) This Section applies to procurement of all services within the scope of architecture, professional engineering, or registered land surveying as defined by the laws of the State whether or not construction is involved.

(2) The principal reasons supporting this selection procedure for architect-engineer services are the lack of a definitive scope of work for such services at the time the selection is made and the importance of selecting the best qualified firm. In general, the architect-engineer is engaged to represent the [State's] interests and is, therefore, in a different relationship with the [State] from that normally existing in a buyer-seller situation. For these reasons, the qualifications, competence, and availability of the three most qualified architect-engineer firms is considered initially, and price negotiated later.

(3) It is considered more desirable to make the qualification selection first and then to discuss the price because both parties need to review in detail what is involved in the work (for example, estimates of man-hours, personnel costs, and alternatives that the architect-engineer should consider in depth). Once parameters have been fully discussed and understood and the architect-engineer proposes a fee for the work, the recommended procedure requires the [State] to make its own evaluation and judgment as to the reasonableness of the fee.

(4) If the fee is fair and reasonable, award is made without consideration of proposals and fees of other competing firms. If the fee cannot be negotiated to the satisfaction of the [State], negotiations with other qualified firms are initiated. Thus price clearly is an important factor in the award of the architect-engineer contract under this procedure. The principal difference between the recommended procedure for architect-engineer selection and the procedures used in most other competitive source selections is the point at which price is considered.

(5) If an enacting jurisdiction desires to use a different selection process, then it may consider the following language:

> "The Procurement Officer shall negotiate with the highest qualified firms for a contract for architectural and engineering services at compensation which the Procurement Officer determines in writing to be fair and reasonable to the [State]. In making such determination, the Procurement Officer shall take into account, in the following order of importance, the professional competence of offerors, the technical merits of offers, and the price for which the services are to be rendered."

SUBJECT: Analysis of CSHB 612 (L&C)

TO: Representative Terry Martin, Chairman
House Labor and Commerce Committee

FROM: Thomas A. Sofo
Legislative Counsel

You have asked for a review and comparison of CSHB 612 with drafts of legislation prepared by attorney, Ted Berns. CSHB 612 and the two drafts provided by Mr. Berns all share in common the objective of taking architectural engineering and land surveying service contracts out from under the requirement that they be let to the lowest responsible bidder. CSHB 612 provides that such contracts should be awarded only to persons or firms that are "capable and qualified". After selecting a capable and qualified contractor, CSHB 612 provides that the fee for the services should be reached through negotiations with the contractor. CSHB 612 also allows for various contractors to have on file with the state material showing their qualifications and performance data. Both drafts provided by Mr. Berns require that contracts for architectural, engineering and land surveying services be awarded "only on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices". The drafts provided by Mr. Berns similarly require that only after the qualified contractor has been selected shall negotiations for the contract price be entered into. The discussion drafts both require that the contract be awarded to the contractor "best qualified to perform the desired work on the basis of demonstrated competence and professional qualifications". It may be argued that the use of that phrase results in limiting the number of potentially qualified contractors depending on how the phrase "demonstrated competence" is interpreted. One may argue that "demonstrated competence" can only apply to those persons or firms who

have been in field for a certain amount of time or who have worked for the state before. On the other hand, "demonstrated competence" does not necessarily demand such a restrictive interpretation.

Although the second discussion draft includes one or two items not included in the first discussion draft, such as an exception for emergency situations and an affirmative statement that no particular procedure is mandated in the awarding and selection of contractors, the distinguishing characteristic between the two discussion drafts and CSHB 612 is the distinction to be made, if any, between the criteria of "capable and qualified" contained in CSHB 612, and "best qualified to perform the desired work on the basis of demonstrated competence and professional qualifications" contained in both discussion drafts. The possible different interpretations of these two phrases is the distinguishing factor between the bulk of the material contained in CSHB 612 and the two discussion drafts. Second to that point would be the exception allowed for emergency situations noted at the bottom of subsection (3) on page 2, of the second discussion draft. CSHB 612 and both discussion drafts would apparently apply both to the state and municipalities. This office has no objection to using Title 36 as a vehicle for the inclusion of the new material which the committee is considering (as done in the discussion drafts). The mechanics of making the required amendments do not present a problem.

The most important factor for the committee's review seems to be the criteria used in selecting a contractor. It may be that there is no contractor who would qualify under CSHB 612 who would not otherwise qualify under the criteria used in the discussion drafts. The converse may not be true. However, I would look forward to hearing comments from proponents of the discussion drafts as to their preference for the "demonstrated competence" language in the discussion drafts as opposed to the "capable and qualified" language in the most recent version of the committee substitute.

Juneau, AK 99811

Dear Mr. Martin:

Re: House Bill No. 623

House Bill No. 623, an Act relating to games of chance and contests of skill, was introduced in the House on January 11, 1982, and was referred to the House Labor & Commerce and Judiciary Committees.

For consideration of the House Labor & Commerce Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. Ervin B. Jones, Supervisor, Audit Division, Department of Revenue, concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

HB 623
(Labor and Commerce)

This bill proposes to amend three sections of AS 05.15.

The effect of these proposed changes is to considerably broaden the privileges granted with the issuance of a games of chance and skill permit. The original language of AS 05.15.100 limited the games of chance to only those activities listed (i.e., bingo, raffles, lotteries, ice classics, rain classics, dog mushers' contests and fish derbies). New games of chance would have to then be allowed under one of those listed. The proposed language removes that limitation and taken in context with sections 2 and 3 of the bill, would allow any game of chance which could be contrived where the element of chance and luck is foremost, regardless of whether those games of chance existed in Alaska prior to statehood. Since the original intent of the legislation was to permit continuance of those gaming activities after statehood which existed in territorial days, this change is a considerable divergence.

The only remaining limitation would be the limitation on use of gambling implements found in AS 05.15.180(a). This would presumably prevent the introduction of casino type hardware and coin operated video games as games of chance, but would not prevent the legal introduction of games of chance such as can be contrived by profit-seeking individuals and nonprofit organizations striving to maximize their take in an extremely competitive industry. Additionally, this bill would allow for large scale betting as it imposes no limitation on the allowable charge to participate in a pull-tab game. With no limit, and given the competitive nature of the industry, the prizes and charges to participate can be expected to escalate.

If the author's intent is simply to legalize pull-tabs, I would recommend this bill to legal counsel to arrive at a simpler way of accomplishing that goal without opening Pandora's box.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Create an Alaska Housing Loan Authority (AHLA) in Dept. of Commerce & Economic Development to coordinate, supervise and give final approval for purchases of home loans by Alaska Housing Finance Corp. (AHFC) and several other programs, AHFC and others must make credit analysis, etc. and all their work is subject to approval of AHLA; therefore, staffing and budget presented above is similar in size and scope to AHFC budget since all AHFC and other work is subject to second review and approval.

BILL ANALYSIS
HOUSE BILL 630 (1/11/82)

1. Creates an Alaska Housing Loan Authority (AHLA) in Department of Commerce and Economic Development to coordinate, supervise and give final approval for purchase of loans by:

   a. Alaska Housing Finance Corporation (AHFC).
   b. Nonconforming Housing Loan Fund.
   c. Senior Citizens Housing Development Fund.
   d. Residential Energy Conservation Fund.

   Authority may employ executive director and staff as necessary.

2. Amends the various statutes of AHFC and loan funds stipulated in (1) above subjecting their lending activity to AHLA approval.

3. Nonconforming Housing Loan Fund is allowed to purchase, as a secondary lender, loans but is not allowed to directly originate loans.

4. Alaska Industrial Development Authority is renamed the Alaska Business Loan and Industrial Development Authority (ABLIDA). Powers of ABLIDA are expanded to purchase or insure business loans to agricultural and fishing enterprises.

5. Residential Energy Conservation Fund can purchase loans but can no longer originate them.

6. After July 1, 1982 no further loans may be made for or under:

   a. Alaska Agriculture Loan Account.
   b. Loans for purchase of Alaska limited entry permits.
   c. Fisherman's Mortgage and Note fund.
   d. AHFC Housing Development Fund.
   e. Veterans Loans from Department of Commerce and Economic Development.
   f. Child Care Facility Revolving Loan Fund.
   g. Residential Care Facility Revolving Loan Fund.
   h. Alaska Commercial Fishing and Agriculture Bank.

7. The following programs are repealed:

   a. Housing Development Revolving Loan Fund. (Low and Moderate income on rentals for low and moderate income).
   b. Moderate cost and rental housing of the Alaska State Housing Authority.

There are 38 loan programs,
What about miners loans = #30 M's.

2/8/82

c. Housing Development Fund of AHFC; provides loans for persons of lower and moderate income.
d. Loans for relocation assistance to encourage and facilitate the construction and rehabilitation of housing of displaced persons.
e. Alaska Economic Disaster Impact Fund.
f. Alaska Renewable Resources Corporation (repeals entire account).
g. Native corporation loan fund. (This is no longer needed as native claim payments have been settled).
h. Temperate Social Activities Revolving Loan Fund.
i. Nonconforming Housing Loan Fund. (Repeals eligible locations statute).
j. Alaska Commercial Fishing and Agriculture Bank (entire statute).

Common Wealth North request.

SPECIALIZED PROFESSIONAL SERVICES, INC.

P.O. BOX 194

(907) 586-4100

AUKE BAY, ALASKA 99821

January 18, 1982

Representative Terry Martin
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Martin:

As this session of the Legislature gets under way, it is already apparent that some very hard decisions will have to be made regarding funding of all the various needs around the state. One of the areas which will require careful review is the state loan programs. Since there are currently 54 loan and related grant programs currently in the statutes, it is virtually impossible to be knowledgable of the specifics of the various programs. Also, there are just under 100 bills pending from last year regarding loan programs with more already having been introduced this session.

As you may recall from some of our previous advertising, we have compiled and published a Guide to State of Alaska Loan Programs. This guide is current and would be a very valuable tool for you and your staff during this legislative session. Having it available will help you and your staff:

(1) when considering new legislation on loan programs, to review all existing programs with a similar purpose to insure that the new legislation is not duplicative of other programs;

(2) when considering funding proposals for existing programs, to determine if you feel the program objectives justify more, less or the same funding as it has had in prior years; and

(3) when receiving inquiries from your constituants, to quickly review the programs of interest to them and explain the basic terms and conditions as well as advising them who to contact for more specific information.

Enclosed is a sample Executive Summary for one of the loan programs and a brochure explaining the loan guide in more detail. Please note that the guide is printed and will be delivered immediatley upon receipt of your order. If you have any questions regarding the guide, feel free to call me.

Very truly yours,

Gary L. Jenkins
President

FISHERIES ENHANCEMENT LOANS
FISHERIES ENHANCEMENT REVOLVING LOAN FUND
EXECUTIVE SUMMARY

IS THERE ANY MONEY AVAILABLE TO BORROW:	Please see the current funding summary in the Funding Status Section of this guide.
PURPOSE FOR WHICH MONEY MAY BE BORROWED:	I. Hatchery planning, construction and operation. II. Other fishery rehabilitation activities such as lake fertilization and habitat improvement.
HOW MUCH MAY BE BORROWED:	I. $6,000,000 II. $1,000,000
FOR HOW LONG MAY IT BE BORROWED:	30 years for all loans. NOTE: Payment of principal and interest may be deferred a minimum of 6 years and a maximum of 10 years. Interest does not accrue during this deferral period.
AT WHAT INTEREST RATE(S):	9.5% for all loans.

LOAN APPLICATION ASSISTANCE SERVICE

Recognizing that the majority of businessmen in Alaska do not have ready access to the State agencies or financial institutions who are processing loan applications, that many of you do not have the time to personally prepare and submit an application, and that most of the time agencies tend to be responsive to those people who have daily contact with them, we will provide an application assistance service. The services provided will include preparing or assisting in the preparation of the application, gathering and compiling any necessary supplementary information and submitting and monitoring the application as it is being processed. Charges for this service will be strictly on the basis of time spent with no minimum fee. Complete information, to include the rates for the various types of services will be provided in a separate section of the loan guide.

WHO IS SPECIALIZED PROFESSIONAL SERVICES, INC.

Specialized Professional Services, Inc. is wholly owned by Gary L. Jenkins. Professionally, I am a Certified Public Accountant. For the past eight years I have been working for the Alaska Department of Revenue, the last six as Director of the Audit Division. I have chosen to leave State employment because I wanted to develop services like this one to aid businesses and to provide specialized tax and management services. As Director of the Audit Division I have worked extensively with legislation, have written regulations, concentrating on making them as understandable as possible, and have had many occasions to work with a large number of other state agencies. I've discovered that there are many ways to get things done in spite of the bureaucracy and all of the roadblocks thrown up by those people working in it. This experience will give me a tremendous advantage in getting information regarding the various loan programs and dealing with the respective agencies.

My associates have been carefully selected and have proven to be effective and efficient at working within the State system.

SPECIALIZED PROFESSIONAL SERVICES, INC. PRESENTS
A GUID" TO STATE OF ALASKA LOAN PROGRAMS

There is now available a guide to all the loan programs which have been established by the Alaska Legislature. This guide will allow you to be the among the first to know all the details about every State of Alaska loan program in existence, including personal loans, and which loan programs have funds available.

The guide is organized to provide you the information you want in the most efficient way. Within the major sections of the guide, organized on the basis of general purpose, each separate loan will have a tab which will identify the basic purpose of that loan program. Behind each tab will be information on that specific loan program which will include

AN EXECUTIVE SUMMARY which will provide all pertinent details about that program such as what specific purposes the money is available for, how much money may be borrowed, what interest rates will be charged, how to apply and who to contact for more specific information:

A LISTING of the information needed to apply for a loan; and

A GUIDE on how to complete your application so that it is immediately processable when it is submitted, thus, keeping it from being returned for missing information.

In addition, as part of the basic service you will also receive

A PERIODIC REPORT detailing any proposed changes in the various loan programs, the status of funds availability and information on any proposed new loan programs:

UPDATED REPLACEMENT PAGES for any loan program where there have been changes made by legislation, regulation or policy:

NEW LOAN PROGRAM information ready to be added to your binder which will provide the same information specified above for all new programs and which will be sent to you as quickly as possible after the program has been established, giving you the opportunity to be among the first applicants to obtain funds from that program; and

AN INFORMATION SERVICE so that if you have a question on a loan program that is not answered by the information provided or adequately by the staff of the responsible agency, call and we will get the answer for you.

For your convenience an order form is included on the back of this brochure.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Create an Alaska Housing Loan Authority (AHLA) in Dept. of Commerce & Economic Development to coordinate, supervise and give final approval for purchases of home loans by Alaska Housing Finance Corp. (AHFC) and several other programs. AHFC and others must make credit analysis, etc. and all their work is subject to approval of AHLA; therefore, staffing and budget presented above is similar in size and scope to AHFC budget since all AHFC and other work is subject to second review and approval.

BILL ANALYSIS
HOUSE BILL 630 (1/11/82)

1. Creates an Alaska Housing Loan Authority (AHLA) in Department of Commerce and Economic Development to coordinate, supervise and give final approval for purchase of loans by:

   a. Alaska Housing Finance Corporation (AHFC).
   b. Nonconforming Housing Loan Fund.
   c. Senior Citizens Housing Development Fund.
   d. Residential Energy Conservation Fund.

   Authority may employ executive director and staff as necessary.

2. Amends the various statutes of AHFC and loan funds stipulated in (1) above subjecting their lending activity to AHLA approval.

3. Nonconforming Housing Loan Fund is allowed to purchase, as a secondary lender, loans but is not allowed to directly originate loans.

4. Alaska Industrial Development Authority is renamed the Alaska Business Loan and Industrial Development Authority (ABLIDA). Powers of ABLIDA are expanded to purchase or insure business loans to agricultural and fishing enterprises.

5. Residential Energy Conservation Fund can purchase loans but can no longer originate them.

6. After July 1, 1982 no further loans may be made for or under:

   a. Alaska Agriculture Loan Account.
   b. Loans for purchase of Alaska limited entry permits.
   c. Fisherman's Mortgage and Note Fund.
   d. AHFC Housing Development Fund.
   e. Veterans Loans from Department of Commerce and Economic Development.
   f. Child Care Facility Revolving Loan Fund.
   g. Residential Care Facility Revolving Loan Fund.
   h. Alaska Commercial Fishing and Agriculture Bank.

7. The following programs are repealed:

   a. Housing Development Revolving Loan Fund. (Low and Moderate income on rentals for low and moderate income).
   b. Moderate cost and rental housing of the Alaska State Housing Authority.

2/8/82

c. Housing Development Fund of AHFC; provides loans for persons of lower and moderate income.
d. Loans for relocation assistance to encourage and facilitate the construction and rehabilitation of housing of displaced persons.
e. Alaska Economic Disaster Impact Fund.
f. Alaska Renewable Resources Corporation (repeals entire account).
g. Native corporation loan fund. (This is no longer needed as native claim payments have been settled).
h. Temperate Social Activities Revolving Loan Fund.
i. Nonconforming Housing Loan Fund. (Repeals eligible locations statute).
j. Alaska Commercial Fishing and Agriculture Bank (entire statute).

LABOR AND COMMERCE COMMITTEE

To: Russ Meekins, Chairman
Special Banking Committee

From: Terry Martin, Chairman
House Labor & Commerce Committee

Date: February 8, 1982

Subject: HB 630 referral

Pursuant to hearing and discussion by this committee, the members have agreed that the Special Banking Committee should review HB 630 before action by the Labor & Commerce Committee. Areas we request your committee review are:

1) to include all state loan programs under the proposed Alaska Business Loan and Industrial Development Authority:

a) consolidation of social loan programs;

b) include the Alaska Power Authority in the loans being addressed by this legislation;

2) review contractual and constitutional rights of loan participants under those loan programs being eliminated; and,

3) evaluate the bureaucracy potentially created by this legislation.

Labor & Commerce Committee members Bylsma and Rogers have been appointed by the committee chairman to work with your committee on reviewing HB 630. After review by the Special Committee on Banking, we request HB 630 be returned to the House Labor & Commerce Committee for expedited consideration.

Terry Martin by

State Loan Programs (term. & consol.)

HOUSE BILL NO. 630, by Rep. Metcalfe. Relates to the involvement of the state in lending activities, specifically the state loan programs now in existence. The bill provides: ". . .It is the purpose of this Act (1) to terminate those state loan programs that are inactive, as well as several loan programs that have questionable objectives; (2) to consolidate two major areas of state loan activity, housing and buisness loans, into two authorities that will increase the accountability, consistency, and efficiency in these areas; (3) to use the existing mechanism of the Alaska Industrial Development Authority, renamed the Alaska Business Loan and Industrial Development Authority, to facilitate business loans to agricultural and fishing enterprises; (4) to remove the state from the private lending market and to return that function to competent private financial institutions."

Creates the Alaska Housing Loan Authority under AS 44 (State Government), within the Department of Commerce and Economic Development. Provides the Authority shall administer loans under the Senior Citizens Housing Development Fund (AS 18.54.070), the Alaska Housing Finance Corporation (AHFC) (AS 18.56), the Nonconforming Housing Loan Fund (AS 44.47.380), and the Residential Energy Conservation Fund (AS 45.89). States: "The authority shall assess the need and monitor the supply of residential housing in the state and develop a comprehensive plan to make decent, safe, low and moderately priced residential housing available to all persons by purchasing or participating in the purchase of loans made by financial institutions qualified under AS 06." (AS 06--Banks and Financial Institutions).

Amendments which pertain to existing loan programs include:

--Amends the Housing Development Revolving Loan Fund (administered by the Dept. of Community & Regional Affairs, Community Planning Division), providing that loans or grants to municipalities or eligible corporations be subject to approval of the Alaska Housing Loan Authority. Adds new subsection stating that the department may only purchase or participate in the purchase of a loan to a public or nonprofit private corporation. Deletes language relating to the loan fund which states it may ". . .make or participate in the making of mortgage loans to sponsors, developers, builders and purchasers of residential housing, if the corporation determines that mortgage loans are not otherwise available, wholly or in part, from private lenders upon reasonably equivalent terms and conditions." Also states that other powers of the Fund are subject to the approval of the Alaska Housing Loan Authority (hereafter referred to as AHLA)

--Amends the Nonconforming Housing Loan Fund, placing similar restrictions relating to the powers of the Director of the Division (administered by the Dept. of Community & Regional Affairs, Division of Housing Assistance), providing those powers are subject to approval by the AHLA. Deletes language which provides the Division may "originate" loans. Deletes language which states the Director may execute service agreements with private lending institutions to service loans originated by the Division.

--Amends sections relating to the Alaska Industrial Development Authority (AS 44.88), changing the name of the Authority to the

HB 630, (cont'd)

Alaska Business Loan and Industrial Development Authority. Also adds new sections giving the ABLIDA power ". . .to purchase or insure loans for fishing vessels to be used by a small enterprise; (20) to purchase or insure loans to purchase a limited entry permit required under AS 16.43.140." Deletes reference under "Legislative findings & policy" section relating to ABLIDA "making" loans (all loans now having to be approved by AHLA). (Note: does not delete any of the powers of the Authority as set out in AS 44.88.080, Powers of the Authority).

--Amends sections relating to the Residential Energy Conservation Fund, providing for approval of grants and loans "purchased" (currently "made") by the Fund by the AHLA.

The bill provides that after July 1, 1982 no further loans may be made under the following programs:

--AS 03.10 (Alaska Agricural Loan Act); AS 16.10.333 (Fish and Game. Loans for purchase of Alaska Limited Entry Permits); AS 16.-10.650 - 16.10.720 (Fishermen's Mortgage and Note Fund); AS 18.56.-100 (AHFC. Housing Development Fund); AS 26.15 (Alaska World War II Veterans Act); AS 44.33.240 - 44.33.275 (Child Care Facility Revolving Loan Fund); AS 44.33.320 - 44.33.380 (Residential Care Facility Revolving Loan Fund); AS 44.81 (Commercial Fishing and Agriculture Bank).

Programs repealed by the bill include:

--AS 18.54.010 - 18.54.060 (Housing Development Revolving Loan Fund--does not repeal section relating to the Sr. Citizen Housing Development); AS 18.55.300 - 18.55.470 (Moderate Cost and Rental Housing); AS 18.56.210(5) (definition of "housing development fund"); AS 34.60.135 (Relocation Assistance and Real Property Acquisition Practices. Planning loans for additional housing); AS 37.11.100 (Renewable Resources Funds. Alaska economic disaster impact fund); AS 37.12 (Alaska Renewable Resources Corporation); AS 44.25.030 - 44.25.038 (Dept. of Revenue. Loan program; PL 92 - 203 corporations Declaration of purpose); AS 44.47.310 - 44.47.350 (The Temperate Social Activities Revolving Loan Fund); AS 44.47.385 (Div. of Housing Assistance. Eligible locations); AS 44.81 (Commercial Fishing and Agriculture Bank).

Provides Act takes effect July 1, 1982.

Introduced January 11 and referred to Labor & Commerce, State Affairs, then to Finance.

Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, Alaska 99811

Dear Mr. Hayes:

As required by AS 37.05.035, the Department of Commerce and Economic Development, Division of Loans and Veterans' Affairs, submits for your review the following report on loans closed during FY '81:

- Loans made by loan type

The prevailing market rates used were obtained from the Department of Revenue, Division of Treasury.

Because of the number of assumptions made during FY '81 and the use of subsidized loan funds, a separate section on assumptions was included with the report of loans made by loan type. The prevailing market rate at the time of the assumption was used to determine the amount of subsidy provided by the State for this type of loan.

Sincerely,

Charles R. Webber
Commissioner

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Contractual costs include $25 thousand for a one-time revision of the SBS annuity subsystem (data processing) and $10 thousand for benefit consulting in drafting and implementing the required amendments to the Supplemental Annuity Plan.

2. This bill would also result in some adverse impact on annuity earnings for all SBS participants because of the need for increased liquidity.

A BILL

For an Act entitled: "An Act relating to supplemental employee benefits; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.30.150 is amended by adding a new subsection to read:

(d) Upon termination of employment by an employee, the amount contributed by the employee that was used to purchase supplemental annuities may be refunded to the employee on application by the employee.

* Sec. 2. The plan administrator of the State of Alaska Supplemental Annuity Plan shall apply to the United States Internal Revenue Service for a ruling that an amendment to the plan to allow participants to receive an annuity benefit as provided in AS 39.30.150(d) at any age will not adversely affect the deferral of taxes and, on receipt of a favorable ruling, shall amend the plan in accordance with the provisions of this Act.

* Sec. 3. Section 1 of this Act takes effect on amendment of the plan by the plan administrator after receipt of a favorable tax ruling by the United States Internal Revenue Service.

* Sec. 4. Section 2 of this Act takes effect immediately in accordance with AS 01.10.070(c).

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 639 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to supplemental employee benefits; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.30.150 is amended by adding a new subsection to read:

(d) Upon termination of employment by an employee, the amount held on behalf of the employee in the supplemental benefits account established under AS 39.30.160 may, on application of the employee, be paid to the employee under the terms of the State of Alaska Supplemental Annuity Plan.

* Sec. 2. The plan administrator of the State of Alaska Supplemental Annuity Plan shall apply to the United States Internal Revenue Service for a ruling that an amendment to the plan to allow participants to receive an annuity benefit as provided in AS 39.30.150(d) at any age will not adversely affect the deferral of taxes and, on receipt of a favorable ruling, shall amend the plan in accordance with the provisions of this Act.

* Sec. 3. Section 1 of this Act takes effect on amendment of the plan by the plan administrator after receipt of a favorable tax ruling by the United States Internal Revenue Service.

* Sec. 4. Section 2 of this Act takes effect immediately in accordance with AS 01.10.070(c).

Effect of amendment. — The 1980 amendment, effective September 17, 1980 substituted "workers' compensation" for "workmen's compensation."

Article 4. Supplemental Employee Benefits on Withdrawal from Social Security.

Section		Section	
150.	Contributions	160.	Benefits in place of social security
155.	Duties of the public employees retirement board	170.	Participation in program
		180.	Definitions

Sec. 39.30.150. Contributions. (a) In place of contributions to the federal social security system which would have been required on behalf of an employee had the participating employer belonged to the social security system, the participating employer shall contribute 12.26 percent of the wages of the employee up to the taxable wage base then in effect in the social security system. All costs of establishing and administering the benefit program established by AS 39.30.160 shall be paid from the contributions made by the participating employers under this section. The balance of the contributions made by the participating employers shall be paid into special individual employee benefit accounts in the Department of Administration to be used to provide supplemental employee benefits provided in AS 39.30.160.

(b) Employees of the division of marine transportation included in the public employees' retirement system through the process of collective bargaining under AS 39.35.680(21)(D) may, under the terms of a collective bargaining agreement, utilize contributions made under (a) of this section on their behalf to offset the costs of inclusion in the public employees' retirement system; however,

(1) the state is placed under no obligation to continue making contributions under this section if the state resumes participation in the federal social security system;

(2) the bargaining agreement must provide a mechanism for satisfying any residual liabilities which might exist if the state resumes participation in the federal social security system; and

(3) no funds contributed under (a) of this section on behalf of employees who are not covered by maritime union contracts may be obligated or expended to pay any costs associated with the inclusion of marine transportation employees in the public employees' retirement system.

(c) An employee of a participating employer is considered to have agreed to have his wages reduced by an amount equal to one-half the total contribution which the participating employer is required to make on behalf of the employee under this section. (§ 5 ch 58 SLA 1979; am §§ 2, 3 ch 135 SLA 1980; am §§ 16, 17 ch 146 SLA 1980)

Revisor's note. — Under the provisions of § 7, Chapter 58, SLA 1979 the state employees voted in September, 1979, to withdraw from the federal Social Security

System. AS 39.30.150 — 39.30.160 thereafter became effective on January 1, 1980, as provided in § 8, Chapter 58, SLA 1979.

Effect of amendments. — The 1980 amendments, retroactive to January 1, 1980, both substituted "participating employer belonged to the social security" for "state remained in the" in the first sentence of subsection (a), substituted "participating employer" in both the singular and the plural forms for "state" where it appeared in subsection (a), and added subsection (c).

Sec. 39.30.155. Duties of the public employees retirement board. (a) The Public Employees Retirement Board (AS 39.35.030) shall

(1) hold regular and special meetings it considers necessary to carry out its responsibilities relating to the supplemental employee benefit program; all meetings are open to the public and the board shall keep a full record of all its proceedings;

(2) adopt, with modifications it considers proper, regulations recommended by the administrator for carrying out the supplemental employee benefit program, and regulations providing employees the opportunity to periodically change distribution of contributions among the supplemental benefit options listed in AS 39.30.160(a);

(3) consider matters referred to it by the administrator in connection with changes in policy and revisions of the supplemental employee benefit program;

(4) act as an appeals board, hold hearings at the request of an employer, employee, surviving spouse, or a beneficiary on decisions made by the administrator that relate to the payment of benefits under the supplemental employee benefit program, and submit its findings to the administrator;

(5) prescribe policies for the operation of the supplemental employee benefit program and take other action which it considers necessary to carry out the purposes of that program;

(6) advise the Department of Administration concerning the features to be included in the benefit options provided under AS 39.30.160(a).

(b) In this section "administrator" means the administrator of the public employees' retirement system appointed under AS 39.35.050. (§ 18 ch 146 SLA 1980)

Sec. 39.30.160. Benefits in place of social security. (a) The Department of Administration shall, in accordance with policies prescribed by regulations of the Public Employees Retirement Board, provide to employees for whom benefit accounts are established under AS 39.30.150 the following benefit options:

(1) supplemental health benefits,

(2) supplemental death benefits,

(3) supplemental disability benefits,

(4) supplemental survivor benefits, and

STATE OF ALASKA
DEPARTMENT OF REVENUE
OFFICE OF THE COMMISSIONER

JAY S. HAMMOND, GOVERNOR

POUCH S
JUNEAU, ALASKA 99811
PHONE: (907) 465-2300

March 2, 1982

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

The annual report on Games of Chance and Skill, as required by AS 05.15.090; is enclosed. Also enclosed is a supplemental report for 1980 which summarizes all 1980 financial statements received through March 2, 1982.

A total of 622 permits were issued for 1981 with 347 permittees having filed the required financial statements. The Department is requiring financial statements from those who have not reported.

Permit fees and the 1% net proceeds are projected to exceed $40,000 for 1981. The permit fee scale continues to cover the cost of Administration and no change is recommended.

The Department adopted Emergency Regulations 15 AAC 105.(5)(L) and (M) on September 11, 19823. This Regulation allowed Pull Tabs to be used for the period ending December 31, 1981. Pull Tabs used in the past were illegal. Some Pull Tab fees had been reported under Bingo activity. The Regulation created some confusion in the reporting of Pull Tab fees for 1981 with some fees still reported under Bingo and others under Raffles and Lotteries. The proper reporting of Pull Tab fees under Raffles and Lotteries has caused some permittees to exceed the $30,000 prize limit established by 15 AAC 105.120(4). The Department is presently reviewing reports to determine the extent of this problem. No decision has been reached on handling violations. The estimated gross receipts from Pull Tabs reported thus far is $1,990,528 or 15% of the total gross receipts reported for 1981.

A supplemental report for 1981 will be prepared and submitted next year.

Sincerely,

Thomas K. Williams
Commissioner
Department of Revenue

LOYAL ORDER of MOOSE

ANCHORAGE LODGE NO. 1534

4211 ARCTIC BLVD.
99503
Anchorage, Alaska [redacted]

21 January 1982

Anchorage, Alaska

Representative Dick Randolph
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Randolph:

Thank you very much for your letter explaining the problems surrounding the use of "pull-tabs" and other games of skill and chance for raising funds for charitible purposes.

We certainly agree with your analysis of the problem and the value of changing the regulations. Our Lodge has in the past made a considerable number of contributions, quite significant in their total, to local community service and charitible groups. These funds have come almost exclusively from the proceeds of our pull-tab program. In point of fact, all proceeds were used exclusively for charitible contributions.

We wish to encourage you to take those steps you feel appropriate to the end, to modify the regulations that prevent us from conducting a pull-tab program.

Due to the lack of any evidence of any clear and present danger to the citizens of our State posed by a pull-tab game of chance and our desire to use the proceeds for the betterment of the citizens of our State, we whole-heartedly support a change in the regulations to allow there use.

Certainly, we would be willing to cooperate and comply with any reasonable reporting requirements for the purpose of insurring the proceeds are indeed being used to cover only the expenses associated with the program and those charitible purposes already noted.

If we can help in any way, please contact us at 4211 Arctic Blvd, Anchorage, 99503, 272-4752.

Respectfully yours,

Melvin L. Bunch

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER

POUCH S
JUNEAU, ALASKA 99811

January 20, 1982

The Honorable Terry Martin, Chairman
House Labor & Commerce Committee
Room 211 - Behrends Building
Juneau, AK 99811

Dear Representative Martin:

HOUSE BILL NO. 640 AND HOUSE BILL NO. 623

Pursuant to your request at the committee hearing yesterday, I have prepared the attached schedule, reflecting the estimated effect of continuing the ban on the sale of pull-tabs by games of chance and skill permits. The figures are based on the financial statements submitted by such permittees for calendar years 1978, 1979 and 1980, and indicate an estimated net proceeds from pull-tabs of slightly less than $1 million a year. This is of necessity a very rough estimate.

Since pull-tabs have not been recognized as a legal game of chance, the Department has no firm data on the dollar volumes generated by pull-tabs for those years. This information was requested for 1981, and the available information received to date indicates pull-tabs as approximately 26% of the total gross receipts. We do not feel that this is a true representation of the whole, and find no reason to disagree with the testimony presented and the correspondence received by the Department indicating that pull-tabs represent approximately 50% of gross receipts to those permittees selling pull-tabs. The projected net proceeds reflect an assumption that the expenses related directly to the sale of pull-tabs are proportional to the expenses related directly to bingo. Since most permittees previously included their pull-tab receipts in either bingo or lottery receipts, I have applied the 50% assumed ratio to the total of gross receipts and net proceeds from those two categories.

I would like to take this opportunity to add my agreement with those testifying as to the effect of Section 3 of House Bill No. 640. The current version would provide a limitation on the price to participate in any lottery which is presumably not the intent of the legislation.

Thank you again, for the opportunity to comment on this legislation.

Sincerely,

Joseph K. Donohue

Joseph K. Donohue
Deputy Commissioner, Taxation

HB 640
(Labor and Commerce)

This bill proposes to amend three sections of AS 05.15.

The effect of these proposed changes is to considerably broaden the privileges granted with the issuance of a games of chance and skill permit. The original language of AS 05.15.100 limited the games of chance to only those activities listed (i.e., bingo, raffles, lotteries, ice classics, rain classics, dog mushers' contests and fish derbies). New games of chance would have to then be allowed under one of those listed. The proposed language removes that limitation and taken in context with sections 2 and 3 of the bill, would allow any game of chance which could be contrived where the element of chance and luck is foremost, regardless of whether those games of chance existed in Alaska prior to statehood. Since the original intent of the legislation was to permit continuance of those gaming activities after statehood which existed in territorial days, this change is a considerable divergence.

The only remaining limitation would be the limitation on use of gambling implements found in AS 05.15.180(a). This would presumably prevent the introduction of casino type hardware and coin operated video games as games of chance, but would not prevent the legal introduction of games of chance such as can be contrived by profit-seeking individuals and nonprofit organizations striving to maximize their take in an <u>extremely</u> competitive industry.

If the author's intent is simply to legalize pull-tabs, I would recommend this bill to legal counsel to arrive at a simpler way of accomplishing that goal without opening Pandora's box.

HOUSE BILL NO. 640

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to games of chance and contests of skill; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 05.15.100 is amended to read:

Sec. 05.15.100. COMMISSIONER OF REVENUE MAY ISSUE PERMITS. The commissioner of revenue may issue a permit to a qualified organization. The permit gives the organization the privilege of conducting games of chance and contests of skill including bingo, raffles and lotteries, ice classics, rain classics, dog mushers' contests, and fish derbies [AND CONTESTS OF SKILL].

* Sec. 2. AS 05.15.180(b) is amended to read:

(b) With the exception of ga of chance [RAFFLES, LOTTERIES AND RAIN CLASSICS], no activity may be licensed under this chapter unless it existed in the state in substantially the same form and was conducted in substantially the same manner before January 1, 1959.

* Sec. 3. AS 05.15.210 is amended by adding a new paragraph to read:

(22) "game of chance" means a game in which the skill and experience of the player is secondary to purely fortuitous or accidental circumstances incidental to the game and includes ~~raffles and lotteries and~~ pull-tab and punchboard games in which the price of each chance is $1 or less, and raffles and lotteries.

* Sec. 4. Sections 1 - 3 of this Act are retroactive to January 1, 1982.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Alaska Natural Resource Trust (establishing)

HOUSE BILL NO. 642, by Reps. [illegible]

Alaska Natural Resource Trust, a means of distributing the natural resource wealth to state resident "shareholders". Under the terms set out in the bill, residents would be issued certificates for a certain number of "units of beneficial interest" in the Trust (the number of units being determined by the Commissioner of Revenue, trustee). Amounts to be distributed are determined on the basis of

HB 642, (cont'd)

cash proceeds of royalties, and the sale or lease of state land. In order to receive "units" an individual must be a certified resident of the state (must provide proof of residence) on the date established in the portfolio plan under which units are distributed. Legal requirements fora setting up the Trust are outlined in length. Repeals the Alaska Renewable Resources Development Fund and the Alaska Renewable Resources Permanent Fund (AS 37.11.010 - 37.11.090).

Introduced January 11 and referred to Labor & Commerce, Judiciary, then to Finance.

Jerry Sanders as F/N mentions HJR 81 attached for your info. only

Introduced: 2/8/82

IN THE HOUSE

BY RANDOLPH, ROGERS, GARDINER, AND BEIRNE

HOUSE JOINT RESOLUTION NO. 81

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

Proposing amendments to the constitution of the State of Alaska relating to the creation of a natural resource trust.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Article IX, sec. 7, Constitution of the State of Alaska, is amended to read:

SECTION 7. DEDICATED FUNDS. The proceeds of any state tax or license shall not be dedicated to any special purpose, except as provided in section 15 and section 17 of this article or when required by the federal government for state participation in federal programs. This provision shall not prohibit the continuance of any dedication for special purposes existing upon the date of ratification of this section by the people of Alaska.

* Sec. 2. Article IX, Constitution of the State of Alaska is amended by adding a new section to read:

SECTION 17. NATURAL RESOURCE TRUST. Const. Amendment In order to transfer part of the natural resource wealth of the State to individual Alaskans all income received by the State from the sale or lease of land and renewable and nonrenewable natural resources owned by the State, excluding income from fish or fisheries products or income from timber or timber products, not otherwise dedicated to the permanent fund by section 15 of this article, shall be placed in a natural resource trust.

* Sec. 3. The amendments proposed by this resolution shall be placed before the voters of the state at the next general election in conformity

with art. XIII, sec. 1, Constitution of the State of Alaska, and the election laws of the state.

FACT SHEET ON HB 642
THE ALASKA NATURAL RESOURCE TRUST
REPRESENTATIVE DICK RANDOLPH

This bill is intended as an ongoing means of directly distributing a substantial portion of state government held wealth to individual Alaskans. The justification for the trust is that Alaska's natural resource wealth belongs to all Alaskans so long as government claims ownership of the natural resources involved. Therefore, the only way Alaskans can receive any equitable direct benefit from the wealth which belongs to them is to have it distributed to them as individuals who are capable of using that wealth in the most beneficial manner.

The bill requires that the Commissioner of Natural Resources convey to the trust the right to income from natural resources which accrues to the state, including royalties other than those already dedicated to the permanent fund and proceeds from the sale or lease of state land or minerals. The bill is not intended to include any tax revenues. Since this conveyance amounts to a dedication of revenue, HJR 81, a companion piece of legislation, is necessary to implement this concept. Together these pieces of legislation will insure that Alaskans receive substantial equitable benefit from state wealth rather than to have that wealth used to increase government programs which produce inequitable results.

Shares in the Natural Resource Trust would be granted at no cost to "residents" of the state on a one time basis. Modification of the bill should be made to prevent a rush to Alaska by outsiders to secure shares.

The number of "units" (shares) will be determined by the Commissioner of Revenue and they will be divided by the total number of eligible individuals to determine the number of units (shares) each beneficiary will own. Natural resource revenues will be distributed per unit (share) on a prorata basis each quarter and the units (shares) are freely transferable.

The Natural Resource Trust is irrevocable and is only terminated upon termination of the production of income from the assets that have been transferred to and retained by the trust. The assets of the trust consist of the interests in natural resources of the state conveyed to the trust.

ANALYSIS
HB 642

HB 642 establishes the Alaska Natural Resources Trust. This Fiscal Note presents the Administrative costs related to the creation of ownership certificates in the Trust, the distribution of the certificates and cash, and related activity.

Assumptions: 420,000 ownership certificates will be created year application period beginning January, 1984. 126,000, miscellaneous transactions (address changes, transfers, etc.) per year
Quarterly distribution of cash and reports
Annual Report distribution
525,000 application forms
Quarterly Report mailed with Quarterly distribution, IRS 1099 data on the 4th quarter distribution.

Program Summary:

Design and distribute application forms and instructions with 90 days of eligibility date. Design and implement quarterly computer assisted application processing. Design Certificate of Beneficial Interest form and miscellaneous transaction forms. Design and implement quarterly processing. Assist applicants through phone, letters and field services in applying for ownership certificates. Opening of mail, batching, data capture and comnputer processing of applications. Dear Mr. Martin:

Re: House Bill No. 642

House Bill No. 642, an Act establishing the Alaska natural resource trust, was introduced in the House on January 11, 1982 and has been referred to the House Labor and Commerce; Judiciary and Finance Committees.

For the consideration of the House Labor and Commerce Committee, I am enclosing copies of Fiscal Notes prepared by Mr. Anselm Staack, Comptroller, Treasury Division, Department of Revenue concerning the proposed legislation.

At a later date, a further Fiscal Note will be submitted by Mr. Phillip A. Wall, Director, Public Services Division, Department of Revenue concerning costs of administration. Mr. Wall is presently on official business in Anchorage and will return to his post of duty in Juneau on March 1, 1982.

Sincerely,

R. D. Stevenson

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)
Legislation establishes an Alaska Natural Resources Trust which is to receive the state's interest in income from natural resources, including royalties, etc., subject to prior amounts dedicated to permanent fund and other previously established claims. Trust to distribute ownership certificates to beneficiaries as defined by the legislation and make dividend payments.
Above revenue estimated for the trust is based upon royalties only, not including severance and conservation taxes that result from natural resources as companion legislation, HJR 81, a constitutional amendment to effect dedication to the trust appears to speak to royalties only and some related amounts but not specifically to taxes. Since the constitutional amendment is necessary to effect transfer of funds to the trust FY 84 is the first year of transfer after election takes place.
SEE OTHER FISCAL NOTES FOR ADMINISTRATIVE COSTS.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Municipal Bond Bank Revolving Loan Fund (RLF) established by Sec. 4 of the legislation would require an appropriation to the RLF in the future. More than likely this would be an appropriation of program receipts.

No additional administrative costs are anticipated.

HOUSE BILL NO. 694

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Municipal Bond Bank Authority."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.25.120 is amended by adding a new paragraph to read:

(20) employees and agents, other than the executive secretary and legal counsel, of the Alaska Municipal Bond Bank Authority.

* Sec. 2. AS 44.85.070 is amended to read:

Sec. 44.85.070. STAFF. The bond bank authority shall employ an executive secretary who may with the approval of the bond bank authority select and employ additional staff as necessary. Employees and agents of the bond bank authority other than legal counsel and the executive secretary are in the partially exempt [CLASSIFIED] service under AS 39.-25. In addition to its staff of regular employees, the bond bank authority may contract for and engage the services of the bond counsel, consultants, experts, and financial advisors the bond bank authority considers necessary for the purpose of developing information, or conducting studies, investigations, hearings or other proceedings.

* Sec. 3. AS 44.85.100(b) is amended to read:

(b) The bond bank authority shall include in the report required by (a) of this section an estimate of the amount of revenue bonds of the bond bank authority to be issued during the fiscal year following the fiscal year in which the report is submitted [12-MONTH PERIOD]. The bond bank authority may not issue revenue bonds, other than refunding bonds, in excess of $50,000,000 during any 12-month period beginning after

Schedule for second week in March

HB 694 by the Rules Committee by request of the Governor

An Act relating to the Alaska Municipal Bond Bank Authority.

Labor + Commerce - Finance

Placed for 3-8-82

AK Municipal Bond Bank Authority

HOUSE BILL NO. 694, by the Rules Committee by request of the Governor. Proposes several amendments to statutes governing the Alaska Municipal Bond Bank Authority. Would place employees of the Authority, other than the director and legal counsel, in the partially exempt service (currently in classified service). Amends language regarding the Authority's estimate of the amount of revenue bonds it expects to issue (see Governor's letter) and places a limit of $50 million on the amount of revenue bonds the Authority may issue in one year without legislative approval. Establishes in the Dept. of Revenue a "Municipal Bond Bank Revolving Loan Fund." Loans may be made to municipalities for projects for which bonds have been authorized by law, but not yet sold; for expenditures authorized under a state or federal grant made after grant is authorized but before it is received; or for expenditures authorized by a municipal governing body in anticipation of tax revenues expected to be received during the period of the loan. The loans shall be for a period of one year or less and each municipality is entitled to borrow up to $1 million from the fund. The interest rate will be determined by the Authority and must not be less than the market rate which the Authority would have to pay at the time of the loan

The Department of Fish and Game currently has 712 permanent seasonal positions that were created in response to Alaska Statute 39.25.195. These seasonal positions range in time from two weeks to ten months each year. The regulations required us to create seasonal positions because our activities are both planned and reoccuring each year. For positions that last more than four months in a year, the seasonal system has produced some positive benefits for Fish and Game. For these longer term positions, a higher percentage of the incumbents return in succeeding years providing us with trained, knowledgeable employees. However, these benefits are unfortunately overshadowed by the problems we encounter with the system on those positions that last less than 120 days. The difficulties occur in two major areas: cost and local hire.

First the cost.

Attachment No. 1 outlines the salary plus benefit costs for 712 seasonal positions. 56% or 399 of these 712 positions are employed for less than 120 days a year. These 399 positions represent a salary cost of 2.4 million dollars to which you must add $656,000 for benefits as permanent seasonals. These same 399 positions would need only $185,000 as non permanents—a difference of $471,000. Keep in mind these employees are on our payroll for two weeks to four months per year.

That is only part of the cost. To that you must add the cost of recruiting these people. We did a survey of those positions hired out of our Anchorage Regional office for just the Division of Commercial Fisheries. In 1979, prior to the passage of the non permanent hire law, we spent $3,900 on telegrams and long distance phone calls, during April, May and

June, to hire 175 temporary employees. In 1980, after the non permanent hire law, to hire these same 175 employees we spent $14,600 on telegrams and long distance phone calls--a difference of $10,000. In 1981 our $14,000 in long distance calls and telegrams only got us 40 employees. The total cost for telegrams and long distance phone calls for recruiting in 1981 was $28,000.

The third cost associated with these seasonal employees is another recruiting cost--manpower. Commercial Fisheries estimates it took about 50 man days in 1979 to recruit 175 seasonals. In 1980 it took 217 man days to recruit 175 seasonals. In 1981 the personnel doing the recruiting were more organized, more knowledgeable about the new regulations and more efficient and it still took in excess of one man day of effort to hire each seasonal employee. When we hit the peak recruiting months of April, May and June in Anchorage, everyone from a range 8 clerk typist to range 20 management biologists recruit seasonal personnel. At an average salary of $12 per hour plus benefits, 217 man days represents a cost of $25,000. Even at this we haven't begun to measure the cost of lost productivity in their regular jobs.

Another area of particular concern to the Department is the ability to hire local residents. In the past, if one of the Fisheries Divisions needed some basic biological information in a rural area, they sought someone in the area who understood the local fishery to gather the data. Now, when that need arises, the Divisions must go to a register and hire from the top five. In most cases they hire someone from an entirely different area. This is compounded by some rural residents who don't want to bother with the

bureaucracy so don't bother to get on registers or, during the one month in the year when the register is open, doesn't think he will want to work for us in six months so again doesn't get on the register.

Those are the major problems but, in addition, there are the little ones:

- Comm Fish tries to get this seasonal hiring organized early and on May 1 offers John Smith a Fish Tech II job for two months beginning on June 1. John says, "I'll be there." On May 27, Sport Fish offers John Smith a Fish Tech III job for three months beginning June 1 and John Smith accepts. Comm Fish then finds themselves with an expired register and no employee to begin work in 4 days. An emergency hire is only good for 30 days so, if you hire that way, you will have to replace the person mid stream. It will take a week to get a new register, another week to work it and, if you are successful, there is only a two week delay which probably means some data is lost forever.

- College students who want summer jobs have to be on the registers when we go through our big recruiting effort in April and May. Individuals have told us they have received in excess of 100 telegrams from Fish and Game. Each one must be responded to or their name will be removed from the register.

In summary, Fish and Game supports permanent seasonal positions for jobs that last more than 120 days per year. However, we believe the Department could operate more efficiently, less expensively, to greater satisfaction of all parties and to the benefit of State if AS 39.25.195 applied only to positions in excess of 120 days.

Department of Fish and Game
Seasonal Positions
FY 1982

		Pos	Mos	Salary $
Commercial Fisheries	Salmon	326	868.2	1,419.4

		712	2,286.2	4,029.3

56% of these positions are for less than 120 days.
$4,029.3 (total salaries) x .56 = $2,256.4

Benefits as Non Permanents
$2,256.4 x .0819 (FY 82 benefit rate) = $184.8

Benefits as Permanent Seasonals
$2,256.4 x .1575 (FY 82 benefit rate) = 355.4
$1,128.2 x .0966 (50% covered by police retirement = 109.0
1,280.3 mm x $150 (insurance premium x months) = 192.0
Total benefits $656.4

Difference $471.6

Temporary State Employees (hiring of)

HOUSE BILL NO. 697, by Rep. Bylsma. Would allow the state to hire temporary employees if the hiring of permanent employees for a work assignment of 120 days or less would result in "additional costs or the hiring of inappropriate individuals." Adds new section to AS 39.25 entitled "Procedure for Certain Nonpermanent Employees" which allows above exception to current prohibition on the hiring of temporaries contained in AS 39.25.195. Directs the Commissioner of a department that hires temporaries under provisions of bill to adopt regulations "to ensure that employees are appointed in the most efficient manner possible so that the needs of the department regarding these work assignments of 120 days or less are met. The regulations shall require that each employee meet the minimum qualifications established by regulation for a particular work assignment." Effective immediately.

Introduced January 27 and referred to Labor & Commerce and State Affairs.

ALASKA BROADCAST SERVICES
308 G STREET, SUITE 311 • ANCHORAGE, ALASKA 99501 • (907) 276-4282

Subject: Telecommunications

With the State of Alaska's increased role in the establishment and operations of telecommunications services has come a tremendous increase in the budgets for such services. This year, the state is facing revenue short-falls yet services to the public must continue. There is perhaps, no other area that can stand the budget ax and be a positive incentive to the private sector as in the area of telecommunications.

At present the state funds:

1. A public broadcasting system
2. A Public radio network
3. A commercial satellite system
4. An educational satellite system
5. A program on the happening of the legislature
6. A program on Alaska (Alaska Review)

A rough guess would put all of these programs in the neighborhood of $30-$40 million dollars for state funding per fiscal year. I believe that significant reductions in these areas can be made without effecting the overall service to the public.

In addition to the above mentioned funding components, a critical look should be made into the contracting area for telecommunications services for all executive branch agencies. Past practices have indicated that purchasing regulations carry little force with agencies of the executive branch. The Office of the Governor, I should mention, is a prime offender (i.e. state image and film contract).

Should you wish to pursue such an investigation I would estimate that the time frame would be 6 to 8 weeks, with a final report available in 8 to 10 weeks. The final report will have all finding, and proposed legislation, if needed, to correct problems and save money.

I would estimate that the cost would be $400 per day plus travel and expenses not to exceed a total of $30,000.

Please contact me if I can be of further service.

Sincerely,

Michael F. Porcaro

Department of Education
Position Paper
House Bill 703

While the State Board of Education has not had the opportunity to discuss the provisions of Sections 1, 2 and 5, the department administration supports the provisions of Section 4.

As a practical matter, the department has found audio conferencing to be a very effective means of information exchange at a very low cost. This bill could result in substantial savings over the cost of face to face testimony acquisition in public meetings and administrative proceedings, although those savings would not necessarily accrue to the state.

HOUSE BILL NO. 703

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the use of communications media under the Administrative Procedure Act."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.62.210(a) is amended to read

(a) On the date and at the time and place designated in the notice the agency shall give each interested person or his authorized representative, or both, the opportunity to present statements, arguments, or contentions in writing, with or without opportunity to present them orally. The state agency <u>may accept matter presented by means of any form of communication and</u> shall consider all relevant matter presented to it before adopting, amending or repealing a regulation.

* Sec. 2. AS 44.62.310(a) is amended to read:

(a) All meetings of a legislative body, of a board of regents, or of an administrative body, board, commission, committee, subcommittee, authority, council, agency, or other organization, including subordinate units of the above groups, of the state or any of its political subdivisions, including but not limited to municipalities, boroughs, school boards, and all other boards, agencies, assemblies, councils, departments, divisions, bureaus, commissions or organizations, advisory or otherwise, of the state or local government supported in whole or in part by public money or authorized to spend public money, are open to the public except as otherwise provided by this section. <u>Public attendance and participation at meetings may be by communications media.</u> Except when voice votes are authorized, the vote shall be conducted in

asol- agency meetings also not only public teleconference meetings etc.

Re: HB 703 (use of communications media under APA)

Dear Representative Martin:

A member of your staff called this afternoon to ask for a "position paper" on this bill, for your committee's consideration tomorrow. Here are some quick comments:

1. The basic purpose of the bill appears to be the recognition of technological advances in communications and the promotion of the use of that technology in conducting the state's business for the benefit of the public. We support that.

2. I am unable to predict the fiscal impact of this, and can only observe that technology usually costs money.

3. The amendment in sec. 1, allowing an agency to accept matter presented by any form of communication, when following the regulation-adoption procedures, is good.

4. (A) The amendment in sec. 2, amending the basic "open meeting" statute (AS 44.62.310), looks good to the extent that it might increase the possibility of public participation. However, the statute being amended in sec. 2 of the bill covers many different kinds of meetings and hearings. In some of them, it is important for the members of the agency conducting the hearing to be able to actually see the witness, and, in others, it is important for public participants to see each other. Your definition of "communications media" in sec. 7 of the bill is not limited to video technology; in fact, it is not limited to any of

the more advanced methods of communication; the definition leads off with the word "includes." Without getting into the various rules of construction that would be applied to interpret your definition, I will simply observe that that definition could cause problems in applying the amendment in sec. 2.

(B) In addition, since "communications media" includes telephones, there is the potential for people to disrupt an otherwise orderly meeting or hearing, unless it is made clear in the statute that the body conducting the meeting or hearing may establish reasonable ground rules for the use of whatever media are to be employed. This is especially important in light of AS 44.62.310(f), which says that action taken contrary to AS 44.62.310 is void.

(C) One additional point: The amendment only refers to "[p]ublic attendance and participation" at meetings. It says nothing about the agency members themselves being able to conduct a meeting through communications media (which is especially important in emergency situations). This omission in the bill should be corrected, since not dealing with the permissibility of agencies themselves conducting meetings through communications media may be interpreted by the courts as an implied prohibition on such meetings.

5. The statement of intent in sec. 3, regarding broad dissemination of information, is good. However, in mentioning only the "convenience of the public," it overlooks the legitimate needs of the governmental bodies involved to get on with the business of the public as a whole. The interests and convenience of various segments of the public will often conflict with each other. The bill should be amended in this regard too.

6. The amendment in sec. 4 relates to hearings in the course of administrative adjudication. Speaking of the "mutual convenience of the parties" is okay, but it overlooks the constitutional right to due process and to confront and cross-examine witnesses against an individual. The statute should not appear to give an agency the right to consider the

convenience of perhaps its own staff and of a witness, while disregarding the rights of a central figure in the hearing. Consider, for example, a license revocation hearing for which the complaining witness would find it more convenient to phone in from his home. The hearing officer or administrative law judge would not be able to observe the demeanor of the witness, and the accused party would be seriously hindered in his questioning of the witness.

7. Basically, the amendment in sec. 5, allowing voting by communications media, in an administrative adjudication, is okay, especially since agency members are currently authorized to vote by mail (which, actually, under your definition of "communications media," could be considered as included in the new term). However, the sentence being added to AS 44.62.600 only requires recordation of the vote in a manner that identifies each person who has voted. That is a good point to cover, but nothing is said about recording how each person voted (not by what means, but on which side of the issue). This additional point should be covered; it would be consistent with the next-to-last sentence of the current AS 44.62.310(a).

8. The catch-all provision in sec. 6 of the bill is okay, but should also say something about the protection of constitutional and statutory rights of individuals. The variety of meetings and hearings covered by the Administrative Procedure Act must be borne in mind.

Thank you for the opportunity to comment on this bill. It would be very helpful to us if you could provide a bit more advance notice, however.

Yours truly,

WILSON L. CONDON
ATTORNEY GENERAL

POSITION PAPER

Requested by: Representative Martin

Subject: H.B. 703 - An Act Relating to the use of Communications Media Under the Administrative Procedures Act.

Departmental Position: Favorable

Remarks:

The department supports the proposed statutory change and feels that it will enhance the public's opportunity for input into the governmental decision making process. Moreover, the voting provision allows individuals who are unable to attend meetings in person to vote by communications media. This can only serve to expedite decision-making.

such a manner that the public may know the vote of each person entitled to vote. This section does not apply to any votes required to be taken to organize the afore-mentioned bodies.

* Sec. 3. AS 44.62.312(a) is amended by adding a new paragraph to read:

(6) the use of communications media under the provisions of this chapter is for the convenience of the public and to provide the broadest dissemination of information as is practicable.

* Sec. 4. AS 44.62.410 is amended by adding a new subsection to read:

(b) For the mutual convenience of the parties, the agency may use communications media in the conduct of a hearing under this section.

* Sec. 5. AS 44.62.600 is amended to read:

Sec. 44.62.600. VOTING PROCEDURE [MAIL VOTE]. A member of an agency qualified to vote on a question may vote by mail or by communications media. A vote by communications media shall be recorded in a manner that identifies each person who has voted. and to show how they voted.

* Sec. 6. AS 44.62 is amended by adding a new section to read:

Sec. 44.62.635. COMMUNICATIONS MEDIA. In addition to the specific authorizations in this chapter of the use of communications media, an agency may use communications media for the benefit or convenience of the parties or the public in connection with any proceeding or act authorized under this chapter.

* Sec. 7. AS 44.62.640 is amended by adding a new subsection to read:

(c) In this chapter "communications media" includes telecommunications equipment or services that provide for the exchange of information by audio, video, or computer teleconferencing.

Hanagan suggested.

TELELINK
COMMUNICATIONS INC.

INFOCOM DIVISION

March 3, 1982

Rep. Terry Martin
Chairman
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Rep. Martin:

Thank you for the opportunity to testify on HB703. We appreciate the work that you and your staff have done on this bill, and hope that it will receive favorable consideration by the full legislature, this year.

TELELINK Communications, Inc. is seeking passage of this bill, to permissively expand the capacities of state agencies to act on matters that otherwise require expensive, time-consuming, face-to-face meetings.

While the use of electronic communications will not completely replace travel and the need to "press the flesh", we believe that contemporary advances in communications technology will imitigate the loss of productivity and revenues engendered by the need to be physically present during rate and tariff proceedings; employment security appeals and the like.

We believe that it is in the public interest to permit persons in remote corners of the state to enter opinions and matters of fact into the public record, without the requirement that they spend hundreds or thousands of dollars traveling away from home to interact with the policy makers.

The Legislature's substantial success with the Legislative Teleconference Network, and the Department of Education's Learn/Alaska network are examples of the gains that positively benefit Alaskan society.

HB703 will act to further expand the information collection and decision-making capability of the state whether through increased participation in Public Utility Commission hearings; Regional Fish and Game advisory board meetings; DOT/PF bid awards; or consultant bidder's conferences.

Sincerely,

Allen D. Blume
Marketing Associate

Bill No. House Bill 703

Date March 3, 1982

Title "An Act relating to the use of communications media under the Administrative Procedure Act"

Contact: Judy Knight
Judy Knight
465-2700

The provisions of House Bill 703 which provide for expanded use of telecommunications type media in public proceedings, public meetings and administrative adjudication proceedings will be advantageous to both the public and to state agencies.

The Department of Labor presently conducts telephonic hearings in connection with unemployment insurance appeals, and such hearings have been well accepted by both claimants and attorneys. In fact, many of these people prefer such a hearing because they feel it removes them from any prejudices the hearing officer may have with respect to their personal appearance. Our hearing officers have also found telephonic hearings to be satisfactory.

We have also used the state's teleconference facilities on a limited basis in the development of workers' compensation proposals; and again have found it to be a very efficient and effective means of conducting public meetings.

If the opportunity were available, the Department of Labor would definitely expand its use of this type of communications media; and we, therefore, support the passage of this bill.

March 3, 1982

POSITION PAPER

HOUSE BILL NO. 703

AN ACT RELATING TO THE USE OF COMMUNICATION MEDIA
UNDER THE ADMINISTRATIVE PROCEDURES ACT

HB 703 would amend AS 44.62 to allow the use of communications at public meetings and hearings. Since this Bill would allow the Department to accept testimony by any form of communications, expanding the parameters by which the public could provide input on proposed regulations provided for under the Administrative Procedures Act, the Department of Public Safety supports passage of HB 703.

It should be noted, however, that support for this Bill is contingent upon receiving the necessary funding to purchase the communications equipment required to implement this Bill, if enacted. A Fiscal Note will be provided the Finance Committee outlining the projected costs anticipated if this Bill were to become law.

William R. Nix
Commissioner

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL #703

"An Act relating to the use of communications media under the Administrative Procedure Act."

House Bill No. 703 allows the use of communications media for hearings and meetings under the Administrative Procedure Act.

Analysis

This bill would enhance the opportunity for public input into state administrative deliberations by allowing use of communications media. People living in remote locations, whether members of administrative bodies or interested citizens, will be able to participate in hearings or meetings with much less trouble and expense if this bill passes. It is a cost effective and efficient way for the department to conduct business and take public testimony on an issue.

Department Position

The Department of Health and Social Services strongly supports House Bill No. 703.

FROM: Thomas A. Sofo TAS
Legislative Counsel

In preparing the attached work draft regarding the use of electronic media under the Administrative Procedure Act, I reviewed a memo from Ray Tyson which outlined some suggested changes to AS 44.62. I originally proceeded by strictly adhering to the outline suggested until it became apparent that several well placed amendments would accomplish the objectives of the committee without actually amending each individual suggestion which the outline listed. An example of this type of result can be seen by reviewing the amendment contained in Sec. 1 of the draft (authorizing the use of electronic media at public proceedings under AS 44.62.210) and the second amendment suggested on the outline to AS 44.-62.230. A review of the latter section indicates that there is no need to state again that electronic media may be used as method of hearing petitions since AS 44.62.230 refers back to the public hearing process of AS 44.62.210. Unless the committee further desired that the petition itself could be submitted by electronic media no further adjustment in AS 44.62.230 is needed.

As to the possible suggestion that petitions as well as accusations and notices of defense, etc., be submitted through the use of electronic media, the committee should consider that the process seems to require that the initial contact be in written form. For similar reasons the sections pointed out for my review in sec. 6 of the outline did not seem to require further insertion of the term electronic media. As an example, AS 44.62.440 permits the use of

depositions "in the manner prescribed by law for depositions in civil actions". Depositions may be videotaped and, in appropriate instances, introduced into evidence in civil actions of this state. I think most of the changes which were suggested that are not found in this work draft can be explained by applying the rationale described above.

I do have one or two questions regarding suggested amendments to AS 44.62.310 (Agency Meetings Public) and AS 44.62.312 (State Policy Regarding Meetings). It was suggested under AS 44.62.310 that a roll call vote would be appropriate in the case of a voice vote taken by electronic means. This seems to create a higher standard of accountability for casting an affirmative or negative vote in the case of a voice vote taken at a meeting where electronic media is used. It can be argued that in the absence of being physically present in the room, an observer might not know which "voices" cast their votes either affirmatively or negatively. However, this is a defect inherent in the voice vote procedure and I am not sure the committee intended to create more accountability merely because electronic media were present. Similarly, the outline suggests adding a new section (f). Although the outline is inaccurate or poorly cross-referenced, I have taken the suggestion to mean that when the agencies meet in closed or executive sessions that an electronic transcript of that session be retained. This, of course, goes against the typical procedure for executive sessions which are by their very nature private. If the outline is suggesting that an electronic transcript be prepared of the proceedings of those bodies listed in subsection (d) of AS 44.62.310, the committee must be cautioned that this also would be inappropriate given the nature of those deliberative bodies. In the same manner, I cannot really make sense out of the request to add a section to AS 44.62.340 concerning the delegation of power by agencies. The concept of a delegation of power "per se" is ambiguous and will only serve to confuse matters under the Administrative Procedure Act. At best, this suggested amendment seems unnecessary.

I would like to particularly draw the committee's attention to our slightly revised definition of "communications media" which appears in the last section of this draft. I solicit your comments as to whether the revised definition accurately encompasses the telecommunications formats which are to be included.

As a result of this office's interpretation of the goals to be achieved in preparing this work order, the attached draft is probably somewhat shorter than you had anticipated. There may be several items which we still need to include if, after discussion, you do not feel that the general amendments suggested adequatly address the situation. I would recommend that we continue to attempt to accomplish the committee's objectives by using several general, well placed amendments in AS 44.62 rather than a wholesale amendment of each section in which electronic media might have some possible application.

If you have any questions, I would be happy to discuss them with you at your convenience.

TAS:ljb

Enclosure

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

(907) 465-3900

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

DEPUTY COMMISSIONER – ADMINISTRATION

POUCH Z
JUNEAU, ALASKA 99811

March 3, 1982

Honorable Terry Martin
Alaska State Representative
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Representative Martin:

In reply to a request from your office for a position paper from this department regarding House Bill 703, relating to the use of communications media under the Administrative Procedure Act, we wish to state that this department has no comment to make on this bill.

Sincerely,

Ron B. Lind
Deputy Commissioner

Department of Education
Position Paper
House Bill 703

While the State Board of Education has not had the opportunity to discuss the provisions of Sections 1, 2 and 5, the department administration supports the provisions of Section 4.

As a practical matter, the department has found audio conferencing to be a very effective means of information exchange at a very low cost. This bill could result in substantial savings over the cost of face to face testimony acquisition in public meetings and administrative proceedings, although those savings would not necessarily accrue to the state.

Marshall L. Lind, Commissioner

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL #703

"An Act relating to the use of communications media under the Administrative Procedure Act."

House Bill No. 703 allows the use of communications media for hearings and meetings under the Administrative Procedure Act.

Analysis

This bill would enhance the opportunity for public input into state administrative deliberations by allowing use of communications media. People living in remote locations, whether members of administrative bodies or interested citizens, will be able to participate in hearings or meetings with much less trouble and expense if this bill passes. It is a cost effective and efficient way for the department to conduct business and take public testimony on an issue.

Department Position

The Department of Health and Social Services strongly supports House Bill No. 703.

PROPOSED STATUTORY CHANGES IN AS 08.88 PRESENTED TO THE HOUSE LABOR AND COMMERCE COMMITTEE BY THE ALASKA REAL ESTATE COMMISSION, MARCH 1, 1982:

* Sec. 08.88.091 is amended by adding a new paragraph to read:

(3) The commission may make available to the public manuals, texts or other materials prepared with funds from the surety fund. When these materials are made available the commission may make a reasonable charge for them designed to recover the actual costs of the item provided. Funds collected under this section shall be paid at least once a month into the general fund. These payments shall be credited to the real estate surety fund.

* Sec. 08.88.101 (11) is repealed and reenacted to read:

(11) print and distribute duplicate license certificates to replace lost certificates;

* Sec. 08.88.101 (12) is amended to read:

(12) send notice 30 days before (, BEFORE DECEMBER 1 OF EACH YEAR,) the date that licenses must be renewed;

* Sec. 08.88.201 is repealed and reenacted to read:

08.88.201. REEXAMINATION. A person who fails an examination may apply for a subsequent examination, but shall pay the examination fee each time he applies.

* Sec. 08.88.221 is repealed and reenacted to read:

08.88.221. FEES. Fees for the following categories for a real estate broker, associate broker, or salesman licensee or applicant are established by regulations adopted under AS 08.01.065:

(1) examination;

(2) reciprocity;

(3) initial license;

(4) renewal of an active license;

(5) renewal of an inactive license;

~~(6) amending or transferring a license.~~

* Sec. 08.88.251 is amended to read:

(c) A person who is inactive may become active by applying for an active license and paying the required fees. In the application form he shall state the date on which he intends to become active. His active status begins on the date stated. The commission shall send him a license certificate. A person is entitled to change from an inactive to an active status without examination if he has not been inactive more than two (THREE) years. If he has been inactive more than two (THREE) years, he is required to take an examination.

* Sec. 08.88.261 is repealed:

* Sec. 08.88.361 is amended to read:

Sec. 08.88.361. WHEN COMMISSION IS EARNED. A commission or fee is earned when the real estate broker fulfills the terms of a written personal services contract.

* Sec. 08.88.401 (a) is repealed and reenacted to read:

Sec. 08.88.401 (a) a licensee may not in any way represent that he holds or has been awarded any degree or designation to which he is not entitled nor may he represent himself as being a member or affiliate of any professional organization to which he does not belong.

* Sec. 08.88.401 (b) is repealed and reenacted to read:

Sec. 08.88.401 (b) commissions or fees for performance of acts specified in Section 161 of this chapter may be paid only to a licensed Alaska real estate broker except when a real estate broker properly licensed in another state assists an Alaskan real estate broker, the out-of-state broker's commission or portion of the commission may be paid directly to the out-of-state broker by the seller or escrow holder. Commissions or portions of commissions paid to a licensed real estate salesman must be paid by the broker or under the authorization of the broker with whom the real estate salesman is licensed.

* Sec. 08.88.401 (c) is amended to read:

(c) knowlingly make, authorize, direct or aid in the publication of a false statement or misrepresentation concerning land or a subdivision of other real estate offered for sale or lease;

* Sec. 08.88.401 is amended by adding a new paragraph to read:

E (d) The commission or its executive director may issue a stop order to any person or firm who is or appears to be about to pay a commission or fee for acts specified in Section 161 of this chapter to a person who is not a licensed real estate broker in another state authorized to receive commissions under part (b) of this section.

(E) a person who violates this section or 161 of this chapter is guilty of a misdemeanor.

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of Alaska Statutes 24.20.271(1) and 44.66.050 (Sunset legislation), an audit of the Real Estate Commission was conducted to review Commission activities and accomplishments to determine if the Commission has been operating in an effective, efficient, and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Real Estate Commission should be reestablished. The law currently specifies that this Commission will terminate on June 30, 1982.

Scope

The major areas reviewed were the Commission's operations and its licensing, examination, administration, complaint and affirmative action functions. Our review consisted of analyzing and evaluating the following:

1. Applicable statutes and Commission regulations.

2. Interviews with Commission members.

3. Tests of records and documents of the Commission and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development.

4. Interviews with OL employees.

5. Complaints filed with OL, the Ombudsman's Office and the Consumer Affairs Agency.

ORGANIZATION AND FUNCTION

The Real Estate Commission (REC) was established and operates under Title 8, Chapter 88 of the Alaska Statutes. It is a regulatory commission composed of five real estate brokers or associate brokers, and two public members.

The Commission regulates licensed real estate agents (brokers, associate brokers, and salespersons) by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing or amending rules and regulations necessary to enforce State statutes.

3. Holding hearings to revoke or suspend the license of a person violating real estate statutes or regulations.

4. Prosecuting through the Department of Law, violators of real estate statutes and regulations.

REC is also authorized to conduct real estate clinics, meetings or educational institutes for the purpose of raising the standards of the real estate business and the competency of licensees.

Real estate brokers and associate brokers must pass an examination, be a resident of the State, have had 24 months of experience as a real estate salesperson, and not have engaged in conduct demonstrating their unfitness to be a broker. A broker differs from an associate broker in that a broker must be an owner of a real estate business or employed as a broker by a corporation. An associate broker has met the statutory qualifications of a broker, but is employed by a real estate broker.

A real estate salesp n must pass an examination, be a resident of the Stat e employed by the owner of a real estate brokerage and be have e gaged in conduct demonstrating unfitness to be a salesperson.

Real estate agents must pay a bond fee when obtaining or renewing their licenses. These fees are deposited in the Real Estate Surety Fund and are to be used for making settlements to victims of fraud, misrepresentation, and deceit by real estate agents. Settlements to damaged parties are made by REC after a hearing is held. If the Surety Fund balance reaches above $250,000, the excess may be appropriated for educational programs put on by REC.

Chapter 167 passed during the 1980 legislative session gave the Commission the power to appoint an executive director, employ assistants and approve the appointment of an investigator or auditor. However, these changes were not funded by the Legislature at that time. Prior to the enactment of this law, the Commission received staff support from the Division of Occupational Licensing (OL).

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these issues the legislative oversight committees should consider the findings and alternatives presented in this report, so that the potential impact of policy changes can be evaluated.

Report Conclusion

In our opinion, the Real Estate Commission (REC) should continue to regulate and license real estate professionals. The regulation and licensing of the profession is necessary because of the potential for substantial economic loss resulting from the business practices of unqualified, incompetent, and dishonest real estate practitioners.

Chapter 167, SLA 1980 significantly changed the powers and responsibilities of the Real Estate Commission. The Commission is now an agency separate from the Division of Occupational Licensing and has the power to hire its own personnel. The Commission has, however, not received sufficient funding for its operations. As a result, it is difficult to draw overall conclusions about the performance of REC.

REC has operated in the public's best interest through its examination and education efforts. For instance, the Commission has taken positive actions to inform and educate licensees and the public by publishing a newsletter. In addition, the Commission has proposed various statutory changes designed to clarify the law and improve services by licensees. Other Board actions have been made which appear to meet public needs and demands reasonably.

Chapter 167 gave REC the power to conduct its own investigations. Due to the lack of funding, REC had to have the Division of Occupational Licensing handle real estate investigations. We suggest that the Commission formalize its investigative procedures to be properly prepared when its investigative function is returned (see Recommendation No. 1).

The statutes specifying procedures for the Real Estate Surety Fund conflict with the Administrative Procedures Act. This is causing payments from the Fund to be delayed. Also, claims in process may become greater than the Fund total (see Recommendation No. 2).

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

Investigative procedures for real estate complaints should be developed to assure an accurate and proper system for handling complaints.

The Real Estate Commission has temporarily delegated its investigative function to the Division of Occupational Licensing due to budgetary constraints. Because of this transfer, REC has not yet established a formal system of handling complaints. In order to be properly prepared when the investigative responsibility is returned to the Commission, REC needs to develop and approve a formal system. The following items should be included.

1. The final disposition of a case should be formally recorded in the Commission's minutes. The case file should reflect these actions.

2. A log should be developed which will track each case from original receipt, through the investigation to the Attorney General's Office and hearing (if applicable), and to the formal Commission action. All cases which have been dropped or have become inactive should be identified.

3. A cross-reference system needs to be developed which will provide a history of complaints against particular individuals or firms. Many investigations involve oral misrepresentation with only the complainant as a witness. Identifying patterns of allegations against a particular company, broker or salesperson will give more effective evidence in cases that are sent to hearings.

4. A manual needs to be developed which documents the procedures used for investigating complaints and documenting case files. REC should define specific procedures to prevent potential conflict of interest situations with Board members and REC employees. The manual will be useful to evaluate staff personnel and help orderly transition in cases of employee turnover.

Recommendation No. 2

Legislation should be introduced to revise the Real Estate Surety Fund (RESF) statutes in order to allow payments to be made from the Fund in an equitable and timely manner.

Procedures for processing claims against RESF are controlled by the provisions of AS 08.88.450-.500 and the Administrative

Procedures Act (APA), AS 44.62.010-.650. APA allows a broker, associate broker or salesperson to file a written statement in opposition to a claim within 15 days after receiving notification of the claim. AS 08.88.465 allows the broker only 10 days to file a statement. Due to this conflict and others, the Attorney General's Office has notified REC not to pay any claims until the statutes have been changed.

RESF exists to protect the public against injuries resulting from malfeasance by licensed real estate agents. Chapter 167 of the 1980 Session Laws of Alaska gave REC the responsibility of making payments out of the RESF in order to get payments to claimants in a more timely manner. Until the statutes are changed to eliminate the conflict with APA, timely payments will not occur.

Time is of the essence in the passage of new legislation. REC has not completed a detailed financial analysis to determine the monetary liability against the Fund. However, we found that the number of claimants seeking reimbursement from RESF has increased in the last two years from five to twenty-four cases. Using the maximum reimbursement of $10,000 per case allowable by law, the twenty-four cases could cost as much as $240,000 or almost two-thirds of the Fund balance of $374,800 as of June 30, 1980. There is a potential that outstanding claims may soon amount to more than the Fund balance.

The maximum reimbursement of $10,000 allowable by law was enacted in 1976. The Surety Fund fees of $125 and $40 paid by brokers and real estate salespersons have also not been adjusted since 1976. "The Alaska Statistical Review 1980" prepared by the Alaska Department of Commerce and Economic Development shows that the Anchorage Consumer Price Index for urban consumers has increased since 1976 by more than 50%. We suggest that REC complete a financial analysis of the Fund and determine if the current fees and maximum reimbursement for claims are sufficient. Legislation should be introduced if changes need to be made.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses of Commission activities relate to the public need factors defined in the "Sunset" law. These analyses are not intended to be all-inclusive, but addresses those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

1. The Real Estate Commission (REC) has legally implemented several regulations concerning:

   a. Suspension, revocation, and issuance of licenses.

   b. Prohibited conduct by real estate agents.

   c. Accounting for trust accounts by real estate agents.

2. According to OL's files, REC met four times last year and advertised one public hearing on proposed regulations. Examinations were scheduled for each month except December and were held in eight locations around the State.

3. The Commission has sponsored seminars and publications on real estate matters.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

1. Chapter 167, Session Laws of 1980 gave the Board the power to hire its own personnel. Present staffing includes an Executive Director, a License Examiner and a Secretary. However, funding for REC was not substantially increased. As a result, the Commission has not hired an investigator or auditor, a key feature of this legislation. The Division of Occupational Licensing has continued to provide investigative support to REC. However, there is a severe backlog of cases totalling 145 as of January 22, 1981.

2. Chapter 167 also gave the Commission the power to make payments from the Real Estate Surety Fund. Because the procedures enumerated in Chapter 167 conflict with the Administrative Procedures Act, claims against the Fund are being delayed (see Recommendation No. 2).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally or benefit to the public interest.

1. The Commission proposed various changes to State statutes and many of these were enacted in Chapter 167, SLA 1980. REC is continuing its effort to improve the statutes. We believe these efforts are in the public's best interest.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

1. The Commission has held part of their meetings to specifically meet with interested persons.

2. The Commission published and distributed the "Alaska Real Estate Commission News" which included a plea for public input.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

1. REC, through OL, advertised in newspapers to encourage public participation and also sends notices to interested associations. All meetings and examinations in the past year were publicized.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

1. Recently the Ombudsman's Office received a complaint about a delay in authorizing payments from the Real Estate Surety Fund.

VII. The extent to which a board or commission which regulates entry into an an occupation or profession has presented qualified applicants to serve the public.

1. As of March 19, 1981, there were 2,386 persons licensed by REC.

2. From July 1, 1977 to February 27, 1981, REC and the Division of Occupational Licensing received 414 real estate complaints. During this time, the Commission denied, revoked or suspended 21 licenses. As of February 27, 1981, 145 cases were still pending investigation.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

1. We found no evidence of problems in this area.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

1. Please refer to the previous section, Findings and Recommendations.

Fiscal Year 1980
(UNAUDITED)

July 1979 Beginning Balance	$311,400
Fiscal Year 1980 Revenues	118,600
Fiscal Year 1980 Expenditures	55,200
June 30, 1980 Ending Balance	$374,800

Schedule 1
Types of Revenues

Revenues	Amount	Collection Time
Brokers and Associate Brokers		
Initial License Fee	$100	With issuance of license
Biennial Renewal - Active License	100	Biennially
Biennial Renewal - Inactive License	25	Biennially
Examination Fee	50	With taking examination
Reciprocity Fee	50	With granting of license through reciprocity
Fee for Amending a License	5	With license filing to amend license
Salespersons		
Initial License Fee	50	With issuance of license
Biennial Renewal - Active License	50	Biennially
Biennial Renewal - Inactive License	25	Biennially
Examination	50	With taking examination
Reciprocity Fee	50	With granting of license through reciprocity
Fee for Amending a License	5	With licensee filing to amend license

Note 1

Most of the real estate revenues are composed of renewal registration fees. These fees are collected once every two years and cause revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in fiscal years 1979 and 1980 in order to obtain an accurate representation of collected revenues.

Note 2

Expenditures include those made by Commission members, such as travel and per diem and an allocated percentage (estimated) of total administrative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Commission and OL.

Note 3

The Surety Fund is supported by payments from real estate licenses and provides for financial recovery by the public when injured by malfeasance of a licensee. When the Fund is over $250,000 the excess may be appropriated for real estate educational purposes. Fiscal Year 1979 revenue has reported as $17,774.

Note 4

As of April 29, there were 24 claimants seeking reimbursement from the Real Estate Surety Fund. These cases could amount to as much as $240,000. If the number of claims continues to increase, the amount of claims may become greater than the Fund total.

RECEIVED
1981
LEGISLATIVE
AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Alaska Office Building
Juneau, AK 99811

Mr. Wilkerson,

In response to your request, I am addressing the recommendations made in the preliminary report, "A Performance Review of the Real Estate Commission," dated 4 June 1981.

Recommendation No. 1: Agree. As you know, AREC has had difficulty for many years with investigation and handling of cases. The underlying reasons are many and have been debated at length. Under AREC's original Sunset review, major statutory changes were implemented in 1980 which would enable AREC to become a separate entity and hire its own staff. Unfortunately, funding was not available in FY '81 to implement these changes.

The FY '82 budget has given AREC sufficient funds to begin implementation of the proposed changes. The hiring process for an investigative position should be completed within a short period. AREC is aware of the proposed changes and has commenced planning of the investigative procedures and record keeping that will be required. AREC's Executive Director has been preparing for this transition; many policy and procedure decisions have been approved by the Commission. It should be noted that at this time case closures are being done at a more rapid rate, and that any decisions on a case are entered into our minutes.

Recommendation No. 2: Agree. I agree with the problem as it existed at the time of the writing of the report. However, since the time of Legislative Audit's investigation, there have been many changes that should allow AREC to commence Surety Fund hearings in October. The interpretation, by the Attorney General's office, has been that any Surety Fund hearings would fall under APA procedures. For this reason AREC made an attempt to get legislation passed that would provide relief from the APA problems--that attempt was unsuccessful. Since that time new AG opinions have provided AREC with a method to handle the claims hearings and to make payments that do not require conformance with the APA. Numerous meetings were held on this matter with the AG and with legal counsel of pending claimants. As of this writing, we are preparing to hold Surety Fund hearings at AREC's October meeting and, if warranted, should be able to begin making payments. I agree with the importance of monitoring the Surety Fund balance due to the amount of pending claims and possible future claims. This is being done and possible new legislation will be introduced during the next legislative session to assure that the fund remains healthy.

In conclusion, the report does address two of the major problems that exist with the Commission. It is my opinion that the Commission is very aware of these problems and is actively seeking, or has found, the necessary solutions. The funding problems created by the FY '81 budget hindered our implementation of changes; however, it is my feeling that AREC has performed admirably and is making great strides toward becoming an efficient and effective governmental agency. These accomplishments will be addressed in Sunset hearings next year.

I appreciate the opportunity to address the report and am available at any time to assist you in your investigation or to answer any questions that you may have.

Sincerely,

Lance Youngquist, Chairman
Alaska Real Estate Commission

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

AUDIT DIVISION
POUCH W—ALASKA OFFICE BUILDING
JUNEAU, ALASKA 99811

February 19, 1982

TO: Representative Terry Martin
Chairman
House Labor and Commerce
Committee

FROM: Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

SUBJECT: Discussion of Legislative
Oversight Responsibilities
as Related to Sunset Audits

As required by "sunset" legislation, your Committee has been assigned the oversight review of the Real Estate Commission and the Board of Electrical Examiners. In addition to the audit reports released earlier by this Division, the following information may be helpful.

According to AS 44.66.050, the standing committee of legislative jurisdiction as provided in Rule 20 of the Uniform Rules of the Legislature shall hold one or more hearings to receive testimony from the public and other parties that have associated responsibilities or interests. In addition, the Committee shall consider Legislative Audit's report, the agency's proposed budget, the agency's program performance report, and any other tools that might assist it in evaluating the conduct and activities of the agency being terminated.

* It is important to note that the terminating agency shall have the burden of demonstrating a public need for its continued existence during the public hearings.

The determination of "public need" for continued existence shall take into consideration the following factors set out in AS 44.66.050(c):

1. The extent to which the board, commission or program has operated in the public interest.

2. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

3. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to th public interest.

4. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

5. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

6. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

7. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

8. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

9. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The Legislative Audit reports have addressed these issues individually but only to the extent allowed by restricted audit scopes detailed within the reports.

The Law further states that the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding officer of each

house. The report is to include a summary of findings as to compliance with the "public need" factors enumerated above together with recommendations as to each of the following:

1. An identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address.

2. A statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments.

3. An identification of any other programs having similar, conflicting or duplicate objectives.

4. An assessment of alternative methods of achieving the purposes of the program.

5. An assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level.

6. A justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts.

7. Any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The committee of reference may introduce a bill providing for the reorganization or continuation of the agency being terminated as stipulated in AS 44.66.050(e).

If additional information is needed, please contact this office at 465-3830.

HOUSE BILL NO. 722

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to landlord remedies."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 34.03 is amended by adding new sections to read:

Remedy & other remedies

Sec. 34.03.225. REMEDY FOR DAMAGE. If a tenant vandalizes or deliberately causes unreasonably excessive damage to the dwelling unit, the landlord may terminate the rental agreement and immediately recover possession of the dwelling unit without regard to AS 34.03.140 or any other requirements of this chapter relating to access.

for destroying property

Sec. 34.03.226. REMEDY FOR BAD CHECKS. (a) If a tenant issues a check in payment of rent for a dwelling unit and that check is not honored by the drawee, the landlord may terminate the rental agreement and recover possession of the dwelling unit as provided in (b) of this section.

(b) If the conditions in (a) of this section are met, the landlord may terminate the rental agreement by giving written notice to the tenant of the dishonored check and of the landlord's intention to terminate the rental agreement effective four days after the notice is given unless the tenant immediately tenders the amount due. If the tenant does not tender the amount due within the four-day period, the tenancy terminates and the landlord may immediately recover possession of the dwelling unit without regard to AS 34.03.140 or any other requirements of this chapter relating to access.

Sec. 34.03.227. REMEDY FOR DISTURBANCES. (a) If a tenant conducts himself or allows other persons on the premises to conduct themselves in

a manner that unreasonably disturbs his neighbors' peaceful enjoyment of the premises, and if that disturbance is verified by a signed complaint from at least one-half of his neighbors in dwelling units immediately adjacent to or above or below the tenant's dwelling unit, the landlord may terminate the rental agreement and recover possession of the dwelling unit as provided in (b) of this section.

(b) If the conditions in (a) of this section are met, the landlord may terminate the rental agreement by giving written notice to the tenant of the disturbance and complaint and of the landlord's intention to terminate the rental agreement effective four days after the notice is given unless the tenant ceases the disturbing conduct within the four-day period. If the tenant does not cease that conduct within the four-day period, the tenancy terminates and the landlord may immediately recover possession of the dwelling unit without regard to AS 34.03.140 or any other requirements of this chapter relating to access. If the tenant ceases the disturbing conduct within the four-day period, but then begins that or similar conduct after the four-day period expires, and the conduct is verified as provided in (a) of this section, the tenancy terminates and the landlord may recover possession of the dwelling unit without regard to AS 34.03.140 or any other requirements of this chapter relating to access by giving written notice of termination to the tenant effective 24 hours after the notice is given.

INTRODUCTION OF BILLS (House)

Landlord Remedies

HOUSE BILL NO. 722, by Rep. Metcalfe. Offers legal remedies to landlords for damages, bad checks and disturbances by tenants:

--in the case of excessive damage or vandalism, the landlord may terminate the rental agreement and immediately take over the premisis without regard to statute which limits access without court order or if the tenant is absent for over a week.

--in the case of a bad check, the landlord may terminate the rental agreement and take possession of the rental by giving written notice to the tenant. Termination of agreement is effective after four days unless the tenant immediately tenders the amount due.

--the remedy outlined in the case of a disturbance provides that if the tenant or other persons on the premises conduct themselves in a manner that unreasonably disturbs his neighbors' peaceful enjoyment of the premises, and the disturbance is verified by a single complaint from at least one-half of his neighbors in units immediately adjacent to the tenant's unit, the landlord may terminate the rental agreement by giving written notice of his intention to terminate effective four days after notice is given unless tenant ceases the disturbing conduct within the four-day period. If the tenant does not cease, the tenancy terminates. If disturbances cease for four days, but resume, the tenancy terminates effective 24 hours after notice is given by the landlord.

Does not provide for an effective date.

Introduced February 5 and referred to Labor & Commerce, then to Judiciary.

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

January 22, 1982

MEMORANDUM

TO: Representative Ramona Barnes

FROM: David Teal
Research Staff

RE: Unemployment Insurance
Research Request Number 82-6

Dave Stancliffe requested this agency to examine the possibility of exempting shareholder/employees of a corporation from State unemployment insurance taxes. Provisions which currently accomplish this intent in several states are briefly described below.

California — Sole stockholders of corporations are exempt from State unemployment insurance taxes.

Colorado — Corporate officers with a majority or controlling interest in the corporation are exempt from State unemployment insurance taxes.

Iowa — Shareholder/employees are exempt from State unemployment insurance taxes only if the employer is not subject to the Federal Unemployment Tax Act (FUTA). Attachments to this memorandum define employee for the purpose of FUTA coverage.

Minnesota — Shareholder/employees of family agricultural corporations are exempt from State unemployment insurance taxes.

Delaware — Officers of corporations performing civil or social functions are exempt from State unemployment insurance taxes if the officers work on a part-time basis and are paid no more than $75 per week.

Washington — Corporate officers may elect exemption from State unemployment insurance taxes if the corporation is not a non-profit or government corporation.

Primary differences among State laws concern the requirements for exemption and whether the exemption is mandatory or optional. Corporate officer status and/or controlling, majority, or sole interest in the corporation are minimum qualifications in most states. The degree of corporate control required for exemption was not specified for Iowa.

In all cases, the exemption is accompanied by loss of FUTA tax credits on services performed by those exempted from State taxes. That is, if the exemption were in effect, the federal unemployment insurance tax rate would increase from a rate of .7 percent to a rate of 3.4 percent on the first $6,000 of earnings. Assuming annual earnings exceed Alaska's taxable wage base of $14,600, exemption would provide a net gain to the shareholder/employee of $118 to $650 per year, depending on the State tax rate assigned. The table below describes the effects of exemption on employers with minimum and maximum tax rates assigned by the Alaska Department of Labor.

Effect of Exemption from State Unemployment Insurance Taxes
Alaska 1982

	minimum tax rate (1.22%)		maximum tax rate (4.86%)	
	current law	with exemption	current law	with exemption
FUTA tax	$ 42	$204	$ 42	$204
employer share	178	0	710	0
employee share	102	0	102	0
TOTAL	$322	$204	$854	$204
net change	$118		$650	

As you are aware, unemployment insurance is an extremely complex subject. If the terminology or law require further explanation, I will be happy to offer my assistance.

Attachments

The employer covered is determined by the number of days or weeks a worker is employed or the amount of the employer's quarterly or yearly payroll. Originally, most State laws covered only those employers who, within a year, had eight or more workers in each of 20 weeks. This was due largely to the coverage provisions of the FUTA. As the States gained experience in administering unemployment insurance and as a result of the 1954 and 1970 amendments to the FUTA smaller firms have been brought under the acts in all States.

Thirty-one States have adopted the Federal definition of employer; i.e., a quarterly payroll of $1,500 in the calendar year or preceding calendar year or one worker in 20 weeks. Eight States provide the broadest possible coverage by including all employers who have any covered service in their employ. The other States have requirements of less than 20 weeks or payrolls other than $1,500 in a calendar quarter (Table 100).

110 Coverage by Reason of a Federal Requirement

The 1970 and 1976 amendments to the FUTA added to the types of services which, as a condition for approval of the State law, must be covered under the State law. This Federal requirement for the extension of coverage differs from an extension of coverage by reason of Federal coverage. If a State law fails to cover services that are covered under the FUTA, the employer must pay the full Federal tax and the employee may get no benefits based on such services, but certification of the State law is unaffected. If, however, a State law fails to cover services which the Federal law requires the State to cover, or excludes services from coverage, the State law would not be approved for purposes of tax credits against the Federal tax and no employer in the State would receive a tax credit for State contributions.

110.01 Coverage of nonprofit organizations.--Service for nonprofit organizations continues to be excluded from coverage under the FUTA, but some service is required to be covered under the State laws. Coverage under State laws is required for service for nonprofit organizations which employ four or more workers in 20 weeks, are organizations which are described in section 501 (c)(3) of the Federal Internal Revenue Code of 1954, and which are exempt from Federal income tax under section 501 (a) of the code. However, a number of States have covered nonprofit organizations under the regular coverage provisions. The State law is required to give each nonprofit organization that must be covered an option on financing benefits. Such nonprofit organizations must be given the right either to reimburse the State for benefits paid or pay contributions under the State law's regular tax provisions.

110.02 Coverage of governmental entities.--The Federal law requires that States cover most services for the State and its political subdivisions. When service is performed for an instrumentality owned by more than one State or political subdivision, coverage is determined based on the location of the work. See section 120. States are required to pay compensation based on service with a governmental entity or a nonprofit organization under the same terms and conditions as for other covered services. There are, however, special provisions applicable to school personnel between school terms. See section 450.03 for a discussion of these special provisions. The States are required to provide local governmental entities a choice of financing benefits either through reimbursement, contributions, or any other method deemed feasible by the State (Table 209).

Since the Federal law includes no size-of-firm restrictions for governmental entities as it does for nonprofit organizations, all governmental entities, regardless of size, must be covered. There are, however, certain types of services which the

MEMORANDUM State of Alaska

TO: A. G. Zillig, Director
Employment Security Division
Department of Labor

DATE: March 4, 1982

FILE NO:

TELEPHONE NO: 465-3603

FROM: WILSON L. CONDON
ATTORNEY GENERAL

SUBJECT: HB 726 and 863

By: Gary I. Amendola
Assistant Attorney General

You requested an opinion whether passage of HB 726 or HB 863 would cause our state unemployment laws to be out of conformity with a portion of the Federal Unemployment Tax Act, 26 U.S.C. § 3306(c).

26 U.S.C. § 3306(c) defines "employment" and exemptions therefrom for purposes of the federal act. AS 23.20.526 parallels the exemptions of the federal act and would be amended by passage of HB 726 or HB 863 as follows:

(a) In this chapter, unless the context otherwise requires, "employment" does not include

(21) service performed for a corporation by an employee of the corporation if

(A) the corporation is incorporated under AS 10.05;

(B) the corporation is not a government corporation;

(C) the employee owns directly or indirectly, or has the power to vote, 25 percent or more of any class of voting securities of the corporation (HB 726); or

(C) the employee is the sole owner of the corporation (HB 863); and

(D) the employee agrees that the services not be "employment" under this paragraph.

AS 23.20.005 and 010 state the purpose and policy of the Alaska Employment Security Act. One of Alaska's stated purposes is to cooperate with other state and federal programs to establish and promote employment systems throughout the several states and to obtain grants and privileges available from the federal government under the Federal Unemployment Tax Act.

The public policy of the State of Alaska is declared to be as follows:

> "Economic insecurity due to involuntary unemployment is a serious menace to the health, morals and welfare of the people of the state. Involuntary unemployment is therefore a subject of general interest and concern which requires appropriate action by the Legislature to prevent its spread ..." AS 23.20.010.

In State Department of Labor v. Boucher, 586 P2d 660 (Alaska 1978), the Supreme Court indicated that the primary purpose of the Alaska Employment Security Act is to ameliorate the negative effects that involuntary unemployment has on both the unemployed individual and society as a whole. See also Estes v. Department of Labor, 625 P2d 293 (Alaska 1981).

Another general purpose of the federal act (and the state act) and other social welfare acts of its kind is to protect those dependent upon others for employment during periods of high unemployment and times of unemployment due to other personal circumstances. Fahs v. Treegold Co-op Growers of Florida, 166 F2d 40 (CA5 1948); Usury v. Pilgrim Equipment Company, Inc., 527 F2d 1308 (CA Texas 1976).

Non-eligibility for certification under 42 U.S.C. § 503 or nonapproval of a portion of an employment security law of our state under 26 U.S.C. § 3304 would prevent the transfer of certain funds to Alaska from the federal government under 42 U.S.C. § 1103. It is our opinion that although HB 726 and HB 863 would create an additional exemption from the Alaska Employment Security Act, the exemption is not of such a nature that would cause any fiscal sanction against the State of Alaska.

The persons to be exempted from participation in the Alaska Employment Security Act, do not appear to be of the class of persons the act was meant to protect. These

persons are, by definition, substantial stockholders in the corporations in which they perform the services which they consent should not be deemed employment for the purposes of the act.

In conclusion, although HB 726 and HB 863, if passed, would expand the list of exemptions in the Act beyond that contained in its federal counterpart, the expansion is not such that would give rise to noncertification under 42 U.S.C. § 503 or nonapproval under 26 U.S.C. § 3304.

Commerce Committee

FROM: Diane T. Colvin
Legislative Counsel

You submitted to us a request for a Committee Substitute for HB 741, incorporating certain amendments approved by the Labor and Commerce Committee. It is not clear to me, after reviewing the draft you submitted and discussing the draft with your staff, the intent of the committee in regard to certificate renewal. It appears that you intend that a certificate be valid for a period of five years and when that period expires, to require the certificate holder to apply for a new certificate rather than simply renewing the certificate. I have drafted the CS accordingly.

JOAN did [illegible] JEFF

If this is not your intent, please contact us and we will prepare another draft for your review.

CS FOR HOUSE BILL NO. 741 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to certificates of fitness."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.62.010 is amended to read:

Sec. 13.62.010. CERTIFICATE OF FITNESS REQUIRED. A person may not perform, nor may a person employ another person to perform, work [IN CONNECTION WITH WORK PERFORMED] subject to the standards established in AS 18.60.580 and 18.60.705 [, A PERSON MAY NOT BE EMPLOYED] without a valid certificate of fitness to perform the work, except that a certificate of fitness may not be required of employees of an electric utility which does not have within its service area any portion of a city, or unified municipality having more than ~~2,500~~ 1,000 population.

* Sec. 2. AS 18.62.030 is amended to read:

Sec. 18.62.030. FEE. An applicant shall pay a [AN INITIAL] fee of $50 at the time of [$15 WITH HIS] application.

* Sec. 3. AS 18.62.040 is amended to read:

Sec. 18.62.040. DURATION OF CERTIFICATE. The department may cancel a certificate for cause. [Certificates, if not cancelled for cause, are renewable upon payment of a [AN ANNUAL RENEWAL] fee of $15 once every [three] five years [$5].]

* Sec. 4. AS 18.62.060 is amended to read:

Sec. 18.62.060. POWER OF THE DEPARTMENT. The department shall issue orders [, RULES] and adopt regulations necessary to carry out the purposes of this chapter.

* Sec. 5. AS 18.62.070 is amended by adding a new section to read:

Sec. 18.62.075. EXEMPTION FOR WORK ON RESIDENCE. Nothing in this chapter prohibits a person from performing electrical or plumbing work on that person's single-family residence. if the work is performed in accordance with the standards established in AS 18.60.580 and in AS 18.60.705.

* Sec. 6. AS 18.62.050(b) is repealed.

SUBJECT: Amendments relating to certificates of fitness (Work Order No. 12-2186)

TO: Representative Terry Martin, Chairman
House Labor and Commerce Committee
Attn: Ray Tyson, A.A.

FROM: Diane T. Colvin
Legislative Counsel

You asked us to draft a bill incorporating certain amendments to Chapter 62, Certificates of Fitness. The draft you submitted to us was not prepared by this office. The attached draft bill which we prepared follows closely, with one exception, your draft. We have made minor changes in wording for purposes of uniformity and clarity.

The exception referred to is sec. 5 of the draft you submitted. It added a new subsection to AS 18.62.070 to exempt from Chapter 62 persons who perform plumbing work on their own homes. This is not incorporated in the attached draft bill because it is already provided by law. AS 18.60.715(c) reads as follows:

> Nothing in secs. 705 - 740 of this chapter prohibits a person from performing plumbing work on his own property.

This exemption is contained in Chapter 60, Article 8, Plumbing Code. This is a more appropriate place for an exemption of this type than in Chapter 62.

If for some reason this exemption does not meet your requirements, or, if you believe AS 18.60.715(c) should be amended, please let us know.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The initial fee for Certificate of Fitness for plumbers and electricians will be increased by $35. The current new applications for both plumbers and electricians average 760 per year. This average number of new applications is used for our projection.

Assumes and effective date of July 1, 1982.

*The impact of this bill is estimated to generate $56.3 in revenues in FY '83 and FY '86. It is anticipated that the renewal fees will average out for the next five years.

33-001 (Rev. 12/81)

Certificates of Fitness (plumbers & electricians)

HOUSE BILL NO. 741, by the Labor & Commerce Committee. Amends statutes governing the issuance of Certificates of Fitness for plumbers and electricians.

Clarifies language in AS 18.62.010 stating when a certificate is required. Currently reads: "In connection with work performed subject to the standards established in AS 18.60.580 [minimum electrical standards] and 18.60.705 [plumbing code], a person may not be employed without a certificate of fitness . . ." Would be amended to read: "A person may not perform, nor may a person employ another person to perform, work subject to the standards in AS 18.60.580 and 18.60.705 without a valid certificate of fitness . . ."

Would increase application fee from $15 to $50 (amends AS 18.62.030, Fee) and would change renewal period from once a year ($5 fee) to once every three years ($15 fee).

Amends the powers of the Department of Labor in AS 18.62.060 by deleting the power to issue rules necessary to carry out the purposes of chapter (Dept. may still issue orders and adopt regulations).

HB 741 (cont'd)

Repeals AS 18.62.050(b) which allows the Department to issue Certificates of Fitness without an examination for those who can prove that they were engaged in their trade in Alaska for at least one year prior to January 1,1973.

Does not provide for an effective date.

Introduced February 9 and referred to Labor & Commerce and Finance.

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 806 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to hazardous or toxic substances."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.030 is amended by adding a new paragraph to read:

(12) adopt regulations further defining "hazardous substance" (AS 18.60.105(11)) and "toxic substance" (AS 18.60.105(12)) and excluding from those definitions, substances that because of their physical state, volume, or concentration do not pose a health risk upon exposure.

* Sec. 2. AS 18.60 is amended by adding new sections to read:

Sec. AS 18.60.051. MANUFACTURER TO PROVIDE HAZARDOUS OR TOXIC SUBSTANCE INFORMATION. (a) The manufacturer of a hazardous or toxic substance shall prepare and provide a person who purchases the hazardous or toxic substance from the manufacturer with information specified in (b) of this section that, to the best of the manufacturer's knowledge, is current, accurate, and complete, based on information then reasonably available to the manufacturer.

(b) The information that a manufacturer shall provide as required in (a) of this section includes

(1) the chemical name, common name, and the CAS number of the hazardous or toxic substance;

(2) the hazards or other risks in the use of the hazardous or toxic substance, including

(A) the potential for fire, explosion, or reactivity;

(B) the known or suspected acute and chronic health effects or risks from exposure;

(C) the potential avenues of exposure and symptoms of overexposure;

(3) the proper precautions, handling practices, necessary personal protective equipment, and other safety precautions in the use of or exposure to the substance;

(4) the emergency procedures for spills, fire, disposal, and first aid;

(5) a description in lay terms, if not otherwise provided, on either a separate sheet or with the body of the information specified in this section, of the specific potential health risks posed by the substance intended to alert a person reading the information;

(6) the month and year that the information was compiled and the name and address of the manufacturer responsible for preparing the information.

Sec. AS 18.60.052. WHOLESALER TO PROVIDE HAZARDOUS OR TOXIC SUBSTANCE INFORMATION. (a) Except as provided in (b) of this section, a wholesaler who sells a hazardous or toxic substance shall provide a purchaser of the hazardous or toxic substance at the time of sale with a copy of the most recent information listed under AS 18.60.051 unless the purchaser indicates that

(1) he possesses this information; or

(2) he does not intend to use the substance in a workplace frequented by persons other than the purchaser.

(b) The commissioner shall adopt regulations identifying the types of hazardous or toxic substances that are required by federal law to be labeled in a manner equivalent to the requirements of (a) of this section. Those types of hazardous or toxic substances are excepted from the provisions of (a) of this section.

Sec. 18.60.071. EMPLOYER TO PROVIDE HAZARDOUS SUBSTANCE INFOR-

MATION AND TRAINING. (a) An employer shall post in the workplace of his employees the information listed in AS 18.60.051 if, as a result of workplace operations, there is a hazardous or toxic substance present in the workplace in a manner that employees may be exposed

(1) under normal conditions of work; or

(2) in a reasonably foreseeable emergency resulting from workplace operations, including but not limited to equipment failure, rupture of containers, or failure of control equipment, that may or do result in a release of a hazardous or toxic substance into the workplace.

(b) An employer required to comply with (a) of this section shall furnish each new employee and, on request, any other employee with

(1) a copy of the information posted in accordance with (a) of this section; and

(2) training at the employer's expense calculated to candidly inform the employee of

(A) the location, properties, and known or suspected acute and chronic health effects of the hazardous or toxic substances to which the employee is routinely exposed in the workplace;

(B) the nature of the operations that could result in exposure to these hazardous or toxic substances as well as any necessary handling or hygienic practices or precautions;

(C) the purpose, proper use, and limitation of personal protective equipment required by another occupational safety and health standard or otherwise used in the workplace; and

(D) information required by AS 18.60.051.

Sec. 18.60.072. REPORTS TO BE FILED WITH DEPARTMENT. (a) A manufacturer, wholesaler, and employer who are subject to the requirements

of AS 18.60.051, 18.60.052, and 18.60.071, respectively, shall file with the department an annual report that includes

(1) the information provided to purchasers and employees in accordance with AS 18.60.051, 18.60.052, or 18.60.071 for each hazardous or toxic substance specified by the department under (d) of this section;

(2) the safety procedures and equipment actually used in the workplace;

(3) the quantities of hazardous or toxic substances being used or produced for those substances required by the department under (d) of this section to be reported; and

(4) other information considered appropriate by the department.

(b) A change in circumstances that would require modification of the report filed under this section shall be immediately reported to the department.

(c) The department shall comply with AS 18.60.099 to ensure protection of trade secrets divulged in the reports filed under this section.

(d) The department shall adopt regulations specifying the hazardous or toxic substances that are to be reported under this section.

Sec. 18.60.073. ACCESS TO RECORDS. (a) An employee, prospective employee, or former employee of a manufacturer or employer subject to AS 18.60.072 and physicians designated by any of these persons may examine and copy a report filed with the department under AS 18.60.072 except for that information considered a trade secret under AS 18.60.099.

(b) An employee, prospective employee, former employee, a representative of the commissioner, and physicians designated by any of these persons may examine and copy exposure measurements taken to monitor

employee exposure to hazardous or toxic substances in the workplace.

(c) The department may require an employee or former employee of a manufacturer or employer subject to AS 18.60.072 to furnish health and exposure records and other information pertinent to an investigation by the department of violations of AS 18.60.051, 18.60.052, or 18.60.071 - 18.60.073.

(d) The commissioner shall adopt regulations pertaining to access to records and information that is required by AS 18.60.051, 18.60.052, and 18.60.071 - 18.60.073. The regulations shall ensure that the department, a purchaser of hazardous or toxic substances, and an employee exposed to or who believes he is exposed to hazardous or toxic substances have ready access to all information that is relevant to the purposes of AS 18.60.051, 18.60.052, or 18.60.071 - 18.60.073 and not exempted from disclosure as trade secrets.

Sec. 18.60.074. PUBLIC DISCLOSURE OF HAZARDOUS OR TOXIC SUBSTANCE INFORMATION. The department may disclose to the public information concerning hazardous or toxic substances and the circumstances under which the public might be affected.

* Sec. 3. AS 18.60.105 is amended by adding new paragraphs to read:

(6) "CAS number" means the unique identification number assigned by the Chemical Abstracts Service to specific chemical substances;

(7) "chemical name" means the scientific designation of a substance in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry or the system developed by the Chemical Abstracts Service;

(8) "common name" means a designation or identification such as code name, code number, trade name, or brand name used to identify a substance other than by its chemical name;

(9) "expose" or "exposure" means a situation arising from work operation or usage where an employee or purchaser may ingest, inhale, absorb through the skin or eyes, or otherwise come into contact with a hazardous or toxic substance;

(10) "manufacturer" means a person who produces, synthesizes, extracts, or otherwise makes a hazardous or toxic substance in the state;

(11) "hazardous substance" means a chemical that

(A) is listed in the United States Department of Transportation Hazardous Materials Table, 49 C.F.R. 172.101; and

(B) meets one or more of the following criteria for hazard class:

(i) is a combustible substance;

(ii) is a compressed gas;

(iii) is an explosive;

(iv) is a flammable substance;

(v) is an organic peroxide; or

(vi) is an oxidizer; or

(C) is listed in a regulation adopted by the department under AS 18.60.030(12);

(12) "toxic substance" means a chemical that is

(A) listed in the Toxic and Hazardous Substances section of the regulations of the Occupational Health and Safety Act in 29 C.F.R. Part 1910, Subpart Z;

(B) listed in the most recent edition of the National Institute for Occupational Safety and Health Registry of Toxic Effects of Chemical Substances; or

(C) listed in a regulation adopted by the department under AS 18.60.030(12);

(13) "wholesaler" means a dealer, distributor, or jobber who sells a hazardous or toxic substance in the state to a person for use in a workplace in a manner that subjects an employer to the requirements of AS 18.60.071 or to a person who sells, or intends to sell, directly to the consumer.

SO 4. - Jan 1, 1953

Draft CS for HB 806 (L&C)

Sectional Analysis

HB 806 was drafted to conform with model "right-to-know" legislation from other states. The basis for the legislation is that Alaskan workers have the right to know about hazardous or toxic substances with which they work and that it is an employer's responsibility to supply that information.

18.60.051 requires an in-state manufacturer of a hazardous or toxic substance to make available certain information including the name of the substance, its hazards, proper handling procedures, and health risks.

18.60.052 requires a seller of a hazardous or toxic substance to provide the same information.

18.60.071 requires an employer to post in the workplace where a hazardous or toxic substance is present the same information, and to provide training at his own expense about the potential hazards and proper handling of the substances.

18.60.072 requires manufacturers, sellers, and employers to file annual reports with the Department of Labor. Trade secrets are protected.

18.60.073 allows past, present, and future employees access to reports filed with the department and to exposure measurements. The department may require employees to furnish health and exposure records pertinent to an investigation. Regulations shall be adopted to ensure that an employee has ready access to all relevant information about hazards and exposure.

18.60.074 allows for the department to disclose to the public information about hazardous and toxic substances and the circumstances under which the public might be affected.

Section 2 provides definitions.

ALASKA PUBLIC INTEREST RESEARCH GROUP
Post Office Box 1093/Anchorage, Alaska 99510/(907) 278-3661

26 March 1982

Representative Terry Martin
House Labor and Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Martin:

The Alaska Public Interest Research Group has had a long standing interest in the issue of toxic substances and public health and we are very supportive of the efforts being made by the House Labor and Commerce Committee to pass out a worker right-to-know act. It is our understanding that the hearings to date have generally produced favorable testimony on House Bill 806 and AkPIRG would like to add its support to this bill.

More specifically, it is our hope that you will take a personal interest in seeing that this bill does not get lost as the session heads into its final days. Quite realistically, the issue of worker right-to-know may not have the charisma of some of the issues before the legislature but there can be little dispute that a worker should have the right to be appraised of toxic substances encountered on the job.

Once again, we commend the efforts of the Labor and Commerce Committee and encourage you to make the Alaska worker's health a priority for this session.

Sincerely,
Margaret Ann Kehrer

Margaret Ann Kehrer, Director
Alaska Public Interest Research Group

TONY KNOWLES,
MAYOR

DEPARTMENT OF PLANNING

March 26, 1982

The Honorable Tony Knowles
Mayor, Municipality of Anchorage
Pouch 6-650
Anchorage, AK 99502

Dear Mayor Knowles:

At the March 24, 1982 meeting, the Anchorage Municipal Health Commission voted to approve a resolution on House Bill 806 "The Worker Right To Know". The Commission wishes to forward this resolution to the Anchorage legislative delegation in Juneau. The resolution reads as follows:

> "Whereas, the Municipal Health Commission has a responsibility to address issues on matters of Public Health;
>
> Whereas, the Commission believes in the right of an individual to know if he/she is exposed to any hazardous materials in the working environment;
>
> Whereas, H.B. 806 provides for the rights of workers and the community to know about hazardous and toxic materials to which they are exposed.
>
> Be it resolved that the Municipal Health Commission supports the intent and objectives regarding "The Workers Right To Know" as expressed in H.B. 806."

We appreciate the opportunity to provide you with this resolution. If we may be of any assistance, please let us know.

Sincerely,

Stephen P. Lesko
Chairman
Municipal Health Commission

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Assumes that the intent of the bill is to minimize harmful exposures to toxic and hazardous substances in work places in the state, and that the Department of Labor is to take a lead role in this effort.

As a result of this bill, two poisitions, an industrial hygienist and a seasonal (6 months) clerk typist, will be required.

This note assumes an effective date of January 1, 1983 and inflation rate of 10% per year.

JUSTIFICATION:

The Industrial Hygienist will evaluate and follow-up on the data filed with the department under the provisions of AS 18.60.072; will conduct research into which hazardous and toxic substances should be covered by the bill and develop the necessary regulations to carry out the intent of the bill; and will respond in a timely manner to the increase in requests for consultation and training services that will be experienced as a result of the focus this bill places on toxic and hazardous substances.

Included in the contractual services costs are $1,600 for space rent and 15.97% of salary for Management Services support.

One time costs are $4,000 for moving expenses, $500 in travel costs for training and $2,000 for equipment.

13 REQUEST FOR NEW POSITION

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
CS for House Bill No. 806 (L&C)

"An Act relating to hazardous or toxic substances."

House Bill No. 806 requires the manufacturer and seller of hazardous or toxic substances to provide to the purchasers of these substances complete information as to the characteristics and precautions required when using. Any employer utilizing a substance included under this act must post a copy of the information for the employees to review plus provide training and safety gear. The employer must file with the Department of Labor annually, complete disclosures with regards to his activities and usage of the hazardous and toxic substances.

This bill imposes reasonable guidelines concerning handling of toxic and hazardous substances in manufacture and selling.

Minor recommendations include the following:

1) Under Section 18.60.051 consider adding "significant levels of toxic impurities if they exist in a mixture."

2) Under Section 18.60.071 consider change of mandatory requirements depending on size of employer e.g. less than ten.

3) Under Section 18.60.105 consider substances manufactured outside of the State and shipped in.

4) Under Section 18.60.073c the confidentiality of medical records may be breached if it is left that the Department may "require."

The Department supports the passage of this Bill.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

All inflation at 10%

This fiscal note covers the travel costs, training seminars, commodities and testing equipment that must be utilized by our Epidemiologists in investigating the effects of exposure in humans. As the petrochemical industry develops in Alaska more and more problems will develop, very little of the acute and chronic health effects will be known and when the risks are known they tend to be understated. As problems develop it will be incumbent upon the Epidemiologist to do in depth investigations.

The fiscal impact of this bill on the Department of Health and Social Services is due to the fact that the Department of Labor uses the epidemiological section of this department as a consultant on the hazards of toxic substances.

Draft CS for HB 806 (L&C)

Sectional Analysis

HB 806 was drafted to conform with model "right-to-know" legislation from other states. The basis for the legislation is that Alaskan workers have the right to know about hazardous or toxic substances with which they work and that it is an employer's responsibility to supply that information.

18.60.051 requires an in-state manufacturer of a hazardous or toxic substance to make available certain information including the name of the substance, its hazards, proper handling procedures, and health risks.

18.60.052 requires a seller of a hazardous or toxic substance to provide the same information.

18.60.071 requires an employer to post in the workplace where a hazardous or toxic substance is present the same information, and to provide training at his own expense about the potential hazards and proper handling of the substances.

18.60.072 requires manufacturers, sellers, and employers to file annual reports with the Department of Labor. Trade secrets are protected.

18.60.073 allows past, present, and future employees access to reports filed with the department and to exposure measurements. The department may require employees to furnish health and exposure records pertinent to an investigation. Regulations shall be adopted to ensure that an employee has ready access to all relevant information about hazards and exposure.

18.60.074 allows for the department to disclose to the public information about hazardous and toxic substances and the circumstances under which the public might be affected.

Section 2 provides definitions.

Bill No. Committee Substitute for House Bill 806

Date March 12, 1982

Title "An Act relating to hazardous or toxic substances."

Contact: Judy Knight
465-270

Richard Arab
465-4856

As part of its occupational safety and health program, the Department of Labor enforces regulations to protect employees from certain hazardous and toxic substances, and provides consultation and training services to employers and employees on the safe handling and use of these substances. The department's occupational safety and health staff can presently only cover approximately seven percent of Alaska worksites during a year. Because it has historically been difficult to identify specific workplaces in the state where toxic and hazardous substances are present, the reporting provisions of this bill would enhance the department's efforts to direct its limited occupational safety and health resources to those workplaces where hazardous exposures actually exist.

Often employers and employees are not aware of the toxic or other harmful qualities of a particular substance being used or handled in the workplace. The labeling and training requirements provided in this bill would go a long way toward filling this void. This would, in turn, effect implementation of protective measures or controls by the employer to safeguard his employees.

Many employees would, no doubt, look to the Department of Labor for assisting them in providing the required training and in implementing effective protective measures. Accordingly, if this bill is passed, we would anticipate an increase in the demand for consultative and training services. A fiscal note is attached which reflects the costs associated with providing the increased services.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Assumes that the intent of the bill is to minimize harmful exposures to toxic and hazardous substances in work places in the state, and that the Department of Labor is to take a lead role in this effort.

As a result of this bill, two positions, an industrial hygienist and a clerk typist, will be required.

This note assumes an effective date of July 1, 1982 and inflation rate of 10% per year.

Page 2 of 2 REVISED DATE _____

FY 83

ARCO Alaska, Inc.
Post Office Box 360
Anchorage, Alaska 99510
Telephone 907 277 5637

March 24, 1982

Nancy Lord
Administrative Assistant
c/o Representative Brian Rogers
Pouch V
Juneau, Alaska 99811

Dear Ms. Lord:

To follow-up on our March 17 conversation after the public testimony on HB 806 I believe we agree on many aspects of the bill. However, there are portions of the bill that require changes which will retain the objective(s) of this bill but limit the unnecessary burden that is present in this bill. Enclosed is a copy of the testimony that has been forwarded to the committee. As my attempt to document the items we discussed, the following points are forwarded. Please realize these points have not been reviewed by ARCO and should be considered as ideas for suggested changes and not an ARCO position. These comments are submitted to address the draft dated March 15, 1982.

1. Page #1, line #15 - I support the change made to the 3/15/82 draft. The 2/15/82 draft seemed to develop another definition for "hazardous."

2. Page #2, line #9 - Recommend you add a reference to OSHA form number twenty (20) or its equivalent as an item number seven (7). OSHA form #20 is a reasonable format to follow and that guidance could be added to the bill. I stress "or its equivalent" because several manufacturers use a similar form which is equivalent and there should not be a need to rewrite that information on one standard state or federal form.

3. Page #2, line #10 - This section requires issuance of a MSDS for all wholesale and retail sales transactions. I don't believe the purpose of this bill is to require a gas station or grocery store operator to supply the customer with a MSDS. Clarification of what is desired would be valuable to the bill.

4. Page #2, line #23 - The requirement to "post" this information is burdensome, potentially expensive, and marginally effective. A reasonable alternative is to require that the information be made available to the employees, (e.g. ...employer shall supply, or make otherwise available, in the workplace ...)

5. Page #2, line #23 - My testimony on "workplace" applies.

6. Page #3, line #5 - The requirement to "furnish" this information "on an annual basis" is unnecessary. Suggest ...shall furnish, by providing the information, training or similar method, each new...

7. Page #3, line #7 - If comment #4 above is added to the bill, a similar change will be needed here. E.g. ...the information described by section (a); and ...

8. Page #3, line #25 - What is desired by this annual report? As written the bill requires information that may have been previously submitted by the "manufacturer, seller and employer" and part of the information required may have been submitted by another manufacturer, seller or employer. I realize you want adequate reports but the bill doesn't provide intent nor direction in order to determine what is adequate.

9. Page #4, line #10 - The "prospective" employee language of the bill may authorize anyone to review the medical files of all individuals working in Alaska. Also, I believe section 073 needs to be modified to allow access only by "documented, need to know" language. The section seems to over stress "freedom of information" and inadequately addresses "confidentiality of personnel records" including employee health records.

10. Page #5, line #25 - The term "hazardous substance" is a very popular but ill-defined term. I believe the bill is designed to protect employees and should address only those items that apply to the employee work place. There are several lists available which could apply but this bill should be limited to documented occupational hazard(s). Adding the DOT regulations to this bill may be a quick answer to a definition but it is also an incorrect answer. I recommend that you delete section (11)(B) and add guidance and authorization for DOSH to develop a list that is important in Alaska.

11. Page #6, line #7 thru 13 - The first portion of this definition seems good but subsection (C), beginning on line #14, is basically a catch-all statement which distracts from rather than enhances this bill. Many chemicals induced in man or experimental animals can have an affect on either man or animal but the concentration,

method of transfer, availability in the work place etc. aren't considered in this portion of the definition. I recommend you either delete subsection (C) or, if you believe it is necessary, expand on the idea so that it is interpretable by the employer and enforceable by DOSH.

Note on comments #10 & 11 - Words such as hazardous, toxic, environmental and subsistence are all terms that are constantly being used in Alaska. Unless meaning definitions are provided there is a good chance that misuse of these words will continue.

Sincerely,

P. N. Hellstrom

Peter N. Hellstrom

STATEMENT OF PETE N. HELLSTROM

FOR

ARCO ALASKA, INC.

TO

HOUSE LABOR AND COMMERCE COMMITTEE

MARCH 17, 1982

This testimony is submitted to confirm the verbal testimony that was given on March 17. There are several items contained in this material that were not included in my testimony and if there is any question about my verbal comments and this material, please consider this material to be the most accurate.

House Bill 806 is apparently aimed at the regulation of hazardous or toxic substances in the work place and the safe use of these substances by customers (wholesale and retail).

The limited background information I was able to gather on this bill makes me believe it is targeted toward what many call "Employee Right-to-Know." This bill is similar to other bills that are being considered in may other states. I believe California has recently passed a similar bill and West Virginia, New York and other states are reviewing language that is very close to House Bill 806. The disappointing aspect about the flurry of activity concerning this bill is: the Federal Government through OSHA is in the process of developing regulations for this same "right-to-know-concern." In some respects, the effects of this bill are or could be minimal to both ARCO Alaska, Inc. and ARCO Exploration Company. In fact, Atlantic Richfield Company has, for the past few months, been developing a policy statement for this subject.

My reason for providing testimony it two-fold. First, is a suggestion that the committee delay action on this bill until the Federal Regulation is published. Secondly, to request modification of the language of this bill, which will limit the degree of burden and expense that is duplicative and unnecessary.

The reason I suggest that the Labor and Commerce Committee delay action on this bill is a request that the State of Alaska wait and allow the Federal Government to issue what I hope will be overview regulations for the right-to-know concern. There are several advantages to this request, such as:

1. Allows regulatory consistency for all 50 states.

2. Allows DOSH to work with OSHA rather than starting from ground zero to develop their own regulations, and;

3. DOSH, after review of the OSHA regulations, can define any weak areas that remain a concern to Alaska and develop regulations that may be missed by OSHA but important to the State of Alaska.

The only disadvantage would be the priority that should be assigned to this concern. I believe DOSH should express and define their concerns and the associated priorities. If there is a high priority, as interim recourse for the priority, this committee could support emergency regulations and allow OSHA and DOSH to establish a manageable course of action for the remaining concerns that would not be duplicative.

While many of the requirements of this bill are or will be fulfilled by ongoing programs within Atlantic Richfield Company, the scope of this legislation is much too broad.

As it presently is worded, ARCO Alaska, Inc., and ARCO Exploration Company would be affected in all activities associated with the extraction of crude oil and natural gas as well as sale of arctic heating fuel (diesel fuel), jet fuel and gasoline on the North Slope. Even California has removed gasoline from the list of substances classified as hazardous, eliminating the requirement to distribute Material Safety Data Sheets (MSDS) during sales. Because diesel and jet fuel have lower flash points, I hope these products can continue to be treated as combustible materials but not classed as "hazardous."

To help reduce the impact of this proposed legislation on oil and gas operations, it is strongly recommended that the definition of "Manufacturer" be changed to exempt oil and gas exploration and production activities since there is no change in the "product" as sold from that found in nature. Additionally, it is recommended that the definitions of hazardous substance and toxic substance include references to lists developed by the Federal Government or State of Alaska after review of the scientific literature and not rely on lists, taken out of the federal regulations from the Transportation and Labor Departments, which have not undergone a current scientific review. These issues along with others will be addressed further in the specific comment portion of this letter.

Of further concern, is the potential that the hazardous substance definition included in House Bill 806 could become the basis of future state hazardous waste legislation. We would strongly object to such use of this definition. In this regard, it should be noted that the listing of drilling muds, produced waters and associated wastes as hazardous wastes under the Resource Conservation and Recovery Act (RCRA) has been deferred by Congress in its 1980 amendments to RCRA. Further, the federal EPA has been directed by Congress to conduct an in depth study of these wastes and report its finding to Congress for a final decision.

Following are specific comments on House Bill 806 on a section by section basis.

Section AS 18.60.051 Manufacturer to Provide Hazardous or Toxic Substance Information and Section AS 18.60.052 Seller Other Than Manufacturer to Provide Hazardous or Toxic Substance Information.

We strongly recommend that crude oil and natural gas not be covered by this bill but if they are, we recommend that their MSDS be generic and not be required to list each component, associated health, safety and environmental effects, and their physical and chemical properties. If such a requirement is promulgated, hundreds of addendum sheets would be necessary for each crude oil MSDS.

As requested, I have included the list of generic products which ARCO Oil and Gas Company produces:

Crude Oil	Propane
Diesel Fuel	Propane-Butane Mix
Residuum Oil	Isobutane
Naptha	Commercial Butane
Jet Fuel	Mixed Butane
Carbon Dioxide	Normal Butane
Sulphur	De-Propanized Gasoline
Plant Residue Gas	Gasoline
Ethane	Condensate
Ethane-Propane	Drip Gasoline
Propane	Propane-Butane Mix
Scrubber	

Additionally, ARCO Oil and Gas Company, in order to operate its Prudhoe Bay installations, runs a topping plant to produce diesel fuel, jet fuel and gasoline; the excess products are sold to others. The provisions in House Bill 806 would impact our operations by requiring that each

customer be given a MSDS each time they purchased gasoline, diesel fuel or jet fuel. Further, Section AS 18.60.052 would affect our operations since we blend octane enhancers with naptha to produce gasoline on the North Slope. While the impact on our operations as a result of the above sales might not be great, the impact of such sales statewide could have a substantial impact. Accordingly, we recommend that serious consideration be given to exempting such frequently sold fuels.

Section AS 18.60.071 Employer to Provide Hazardous Substance Information and Training.

This section would require posting in all work areas information for each hazardous substance utilitized in that work area. This would impose a burden since the oil and gas industry is scattered and diversified in its daily operations with low manpower requirements. Further, operations and an oil and/or gas facility could change daily requiring different substances be used that are not always stored at a work site. Accordingly, it is recommended that this section be changed since it would be more reasonable to require that the desired information be made available at the point where employee(s) report to work.

Concerning the training of employees and disclosure of hazards that may be encountered at the work place that this section addresses, we agree with the training provisions. However, the provision in the bill that requires that employees be provided annually with handouts on the substances, which might not be read, could prove to be highly burdensome and costly due to the volume of paper that would be handled. We support the concept of training and providing the information but we think it should be provided to the employee upon request. A central file or similar requirement would be more functional.

Section AS 18.60.072 Reports to be Filed with the Division.

This section's requirements to file all information supplied to purchasers and employees, the safety procedures utilized in the work place and the quantities of hazardous substances actually used or produced are overly burdensome and costly. As ARCO Alaska, Inc. uses some 2,000 purchased stock items, supplying the required information on each would require a significant increase to manpower by ARCO Alaska, Inc. and would result in no increase in worker safety. The value of sifting through the filed reports and making effective use of the data by the State is questionable, but the cost would also be high. For these reasons this section should be either deleted or modified extensively.

Section 18.60.073 Access to Records.

These access to record requirements should be modified to allow employees and their authorized representatives to obtain the records pertaining to that employee. These exposure records should not be used to establish a violation but used only to assist the division in incident investigation. This section also fails to specify the security and confidentiality concerns associated with employer records including health records. What will be used by DOSH or the employer to insure that the employees right to privacy will be maintained.

Section 2, AS 18.60.105 Definitions.

Because of the language contained in section AS 18.60.052, House Bill 806 appears to be aimed at the regulation of hazardous or toxic substances both in the work place and the safe use of those substances by customers (wholesale or retail). Additionally, if you combine the definitions of "manufacturers", "hazardous substance" and "toxic substance" these definitions could be confused with or misused as the

foundation to define hazardous waste. I don't believe the intent of this bill is to address sales or hazardous waste but this is a possible/probable secondary effect.

The definition of "Manufacturer" should be changed to adequately address or delete oil and gas exploration and development activities. By review of the previous testimony it is clear that we recognize the need to ensure a safe work place. However, since there is no change in the "product" as sold from that found in nature, it is difficult to interpret our operations as "a person who produces... or makes a hazardous or toxic substance." We believe the definition should be modified to exempt oil and gas exploration and production activities.

The definitions for hazardous and toxic substances are a conglomeration of Department of Transportation (DOT) and Department of Labor (DOL) definitions and create "new" definitions that are not correct for the use intended by House Bill 806. The DOT table was not intended to be used as a list of substances hazardous to employees. Its purpose was to list potentially hazardous material as they relate to the transportation, not employee "exposure." We recommend that section (11) (B) be deleted from the bill and, if necessary, DOSH be authorized/required to develop hazardous and toxic substance lists based on potential hazard to employees in the occupational environment. Hopefully, any item contained in a State of Alaska list will be defined as hazardous or toxic using a reasonable degree(s) of hazard and supported by scientific research.

HB
835

COMMITTEE REPORT

HOUSE

FURTHER: FINANCE

(5)

Date: 3-8-82

2/16/82

Mr. Speaker:

The Committee on LABOR & COMMERCE has had HB 835

LABOR AND COMMERCE COMMITTEE

AMENDMENTS TO HB 835

Passed by the House Labor & Commerce Committee on 3/8/82.

House Bill 835

Page 2, after line 26, add new subsection:

(5) make recommendations on methods to reduce Alaska's high rate of aircraft accidents.

Page 2, line 3, delete word "his" and insert "the commissioner's".

Bill No. House Bill No. 835

Date February 22, 1982

Title "An Act establishing the Alaska Safety Advisory Council."

Contact: Judy Knight
465-2700

At the present time, a number of state, federal, and local government agencies have responsibilities for providing safety and health protection to Alaskans in the work place, on the highways, in the home, and in recreational pursuits. Establishment of an Alaska Safety Advisory Council as proposed in House Bill 835 would provide a needed and effective vehicle for formal coordination of the efforts of the various government agencies which administer safety and health programs.

The bill provides for the council to be comprised of a cross section of Alaska's citizens. This is an excellent approach inasmuch as it will provide the council with the diversification needed when recommendations are formulated for addressing safety and health issues which are of concern to all Alaskans. Despite vigorous attempts by government agencies to involve Alaska's public in the development and delivery of safety and health programs, it is often difficult to obtain input from all segments of the population. The council, as proposed in this bill, is a positive step towards filling this void.

In the Department of Labor, our Workers' Compensation, Occupational Safety and Health, and Mechanical Inspection programs would all be favorably impacted by this bill.

The proposed annual safety conference will also provide an excellent forum for a meaningful exchange of information among Alaska's citizens and state, federal, and local government agencies who are concerned with or have responsibilities for safety and health in the state.

This bill should do much to assist the department in meeting its goal of protecting workers from work-related safety and health hazards. The department supports this bill and urges its passage.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This fiscal note is based on the following assumptions:

1. Contractual Costs: Administrative Costs 3.0 (note 2)
   Conference Costs 13.4 (note 5)

2. The Department of Labor will provide clerical/administrative support through its word processing center and its clerical staff.

   Cost 300: $1,500 Reimbursable service agreement with Department of Labor, Word Processing Center
   Code 300: $1,500 Telephone/mailing costs
   Code 400: $ 400 Office Supplies

   Total Administrative Costs $3,400

IV. DATE February 4, 1982 PREPARED BY Nico Bus

AGENCY Department of Labor

PHONE (907) 465-2720

Original: Legislative Finance

cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/81)

3. There should not be much need for the Council to request legal advice as it will not be involved, as the bill is presently drafted, in any adjudication.

4. Travel: It is anticipated that the Council will meet three times during the year. One of these meetings will be in conjunction with the annual safety conference. It is assumed that at least five of the ten members representing industry and labor will be from Anchorage and, therefore, for purpose of this fiscal note, we are assuming that five members will require transportation.

Three meetings x $350.00/trip x five members = $5,250.00

As far as the three members representing government agencies, we are assuming that two will be stationed in Anchorage, and, therefore, only one of these members will require transportation.

Three meetings x $350.00/trip x one member = $1,050.00

Industry and labor members will receive the current per diem rate. This per diem is paid all members regardless of whether travel is required to attend the meeting.

Per diem $80.00/day x three days x three meetings x ten members = $7,200.00

Government employees are paid per diem when on travel status.

$80.00/day x three days x three meetings x one member = $720.00

Travel:	Transportation	$ 6,300
	Per Diem	7,920
	Total	$ 14,220

5. Cost of annual Governor's Safety Conference.

The cost of holding an annual Governor's Safety Conference can vary depending on how many topics will be included, the quality of conference speakers, the length of the conference, and the facilities provided for the conference.

In order to come up with a realistic estimate, the following assumptions are made:

A. The conference will be held in one of the major hotels in Anchorage.

B. It will be two days in length.

C. Only the keynote speaker will be paid - all other speakers and trainers will volunteer their services.

D. A banquet and two luncheons will be included in the registration fee.

E. A reasonable registration fee will be assessed in order to encourage maximum participation.

Hotel facilities (main room and 3 training rooms)	2,400
Banquet	3,000
Luncheons (two)	2,000
Cost of keynote speaker	1,000
Printing of agenda & other conference materials	3,000
Miscellaneous costs such as coffee service, etc.	2,000
Total Cost for Conference	$13,400
Registration Fee $75.00	
Anticipated participation (150 x $75.00)	(11,250)
Cost to Council	2,150

6. We are assuming an inflation rate of eight percent in estimating costs after FY '83. In FY '84 we are assuming 175 conference participants, in FY '85 and FY '86, 200 participants and in FY '87, 225 participants.

7. Assumes an effective date of July 1, 1982.

ALASKA SAFETY ADVISORY COUNCIL

History:

In 1977 Commissioner Edmund Orbeck asked a group of industry leaders to organize a Governor's Safety Conference. Mr. Vern Smith of 3M Company and Mr. Richard Pittenger of the Alaska Associated General Contractors were instrumental in organizing a committee of industry and labor leaders to work with the departments of Labor and Transportation and Public Facilities to hold the first conference in 1977. Conferences were also held in 1978 and 1979.

Legislation to form an Alaska Safety Advisory Council was first introduced in 1978.

OSHA - Savings and Federal Relations:

The formation of an Alaska State Advisory Council will not replace the need for a state occupational safety and health program and, therefore, no direct money savings will occur. However, such a council will do much in assisting the Department of Labor in assuring more and better public participation in the development of regulations, policies, and procedures of its occupational safety and health program. It will also assist in helping the department to make employers and employees more cognizant of the importance for safety and health on the job. This will help in improving the voluntary consultative and training services that the Department provides.

This council will not change the state-federal relationship of the occupational safety and health program. This relationship is set out in Section 23 of the Federal Occupational Safety and Health Administration (OSHA) when the latter agency recommends changes that affect the operations of the state programs.

Rep. B. C. Bylsma - Vice-Chrm.
HOUSE LABOR-COMMERCE COMMITTEE

(4) the adjustment was not the result of erroneous information supplied by the member or beneficiary;

(5) before the adjustment was made, the member or beneficiary received confirmation from the administrator that his records were correct; and

(6) the member or beneficiary had no reasonable grounds to believe his records were incorrect before the adjustment was made.

(b) In order to obtain consideration of a waiver under this section, the affected member or beneficiary must appeal to the board in writing within 30 days after receipt of notice that his records have been adjusted. The board shall rule on his appeal in writing within 120 days after its receipt.

(c) The board may, at its discretion, conduct a hearing on an appeal under this section. In reaching a decision on an appeal, the board may issue subpoenas, administer oaths, compel the attendance and testimony of witnesses, compel the taking of depositions and the submission of affidavits, and compel the production of documents and records.

(d) The board may impose conditions on the granting of a waiver which it considers equitable. These conditions may include requiring the member or beneficiary to make additional contributions to the system.

(e) The board may reconsider a ruling under this section upon request of the member or beneficiary or the administrator if the request is received within 30 days after the initial ruling. Any modification of the initial ruling must be made within 30 days after receipt of a request for reconsideration.

(f) Rulings and modifications of rulings under this section shall be by a majority of a quorum of the board.

(g) Rulings on appeals and requests for reconsideration under this section may be appealed by an aggrieved member or beneficiary to the superior court for abuse of discretion. (§ 9 ch 174 SLA 1978; am § 41 ch 13 SLA 1980)

Effect of amendment. — The 1980 amendment inserted "or beneficiary" following "member" wherever it appeared throughout the section; in subsection (a), inserted "or any portion of an adjustment" following "adjustment" in the introductory paragraph, inserted "or portion of the adjustment" following "the adjustment" at the beginning of paragraph (1), added "or the beneficiary was eligible to receive or was receiving benefits under this chapter before the adjustment" at the end of paragraph (2), substituted "benefits" for "retirement" following "eligibility for" near the beginning of paragraph (3), and substituted "being" for "already" following "reduction of benefits" near the end of paragraph (3).

Sec. 39.35.525. Limitation on use of credited service as peace officer or fireman. For the purpose of computing benefits for an employee enrolled as a peace officer or fireman, no more than 30 years of credited service may be considered, except for the purpose of computing average monthly compensation and then the three consecutive years during the entire period of credited service which produced the highest total compensation shall be used. (§ 16 ch 109 SLA 1970)

Sec. 39.35.530. Limit on pension. No employee may simultaneously receive a pension under more than one section of this chapter. (§ 42 ch 143 SLA 1960)

Sec. 39.35.535. Medical benefits. Each person who is entitled to receive a monthly benefit from the retirement system shall be provided with major medical insurance coverage. Coverage shall become effective on the same date as retirement benefits commence and cease when the retired employee or survivor is no longer eligible to receive a monthly benefit. The level of coverage for persons over age 65 shall be the same as that available prior to reaching age 65 except that the benefits payable shall be supplemental to those afforded under the federal Old Age Survivor and Disability Insurance Program, if any. (§ 2 ch 200 SLA 1976)

Editor's note. — Provisions relating to federal old-age, survivors, and disability insurance benefits may be found in 42 U.S.C. § 401 et seq.

Sec. 39.35.540. Minimum benefit. The actuarial equivalent of minimum aggregate benefits payable to or on behalf of an employee may not be less than the total of the balances of his employee contribution account and voluntary savings account as of the date of the termination of his employment. (§ 43 ch 143 SLA 1960)

Sec. 39.35.545. Duplicate benefits.
Repealed by § 6 ch 81 SLA 1976.

Editor's note. — The repealed section derived from § 11, ch. 235, SLA 1968.

Sec. 39.35.546. Tax exemption. Benefits of this chapter are exempt from Alaska state and municipal income taxes. (§ 17 ch 109 SLA 1970; am § 50 ch 128 SLA 1977)

Effect of amendment. — The 1977 amendment inserted "Alaska."

Sec. 39.35.547. Effect of amendments. (a) An amendment of this chapter is not retroactive unless its retroactivity is expressly stated in the amendment.

(b) The monthly amount of a benefit payable under this chapter shall be determined in accordance with the provisions of this chapter in effect on the date of termination of the member's last segment of employment. (§ 5 ch 81 SLA 1976; am § 42 ch 13 SLA 1980)

(4) the adjustment was not the result of erroneous information supplied by the member or beneficiary;

(5) before the adjustment was made, the member or beneficiary received confirmation from the administrator that his records were correct; and

(6) the member or beneficiary had no reasonable grounds to believe his records were incorrect before the adjustment was made.

(b) In order to obtain consideration of a waiver under this section, the affected member or beneficiary must appeal to the board in writing within 30 days after receipt of notice that his records have been adjusted. The board shall rule on his appeal in writing within 120 days after its receipt.

(c) The board may, at its discretion, conduct a hearing on an appeal under this section. In reaching a decision on an appeal, the board may issue subpoenas, administer oaths, compel the attendance and testimony of witnesses, compel the taking of depositions and the submission of affidavits, and compel the production of documents and records.

(d) The board may impose conditions on the granting of a waiver which it considers equitable. These conditions may include requiring the member or beneficiary to make additional contributions to the system.

(e) The board may reconsider a ruling under this section upon request of the member or beneficiary or the administrator if the request is received within 30 days after the initial ruling. Any modification of the initial ruling must be made within 30 days after receipt of a request for reconsideration.

(f) Rulings and modifications of rulings under this section shall be by a majority of a quorum of the board.

(g) Rulings on appeals and requests for reconsideration under this section may be appealed by an aggrieved member or beneficiary to the superior court for abuse of discretion. (§ 9 ch 174 SLA 1978; am § 41 ch 13 SLA 1980)

Effect of amendment. — The 1980 amendment inserted "or beneficiary" following "member" wherever it appeared throughout the section; in subsection (a), inserted "or any portion of an adjustment" following "adjustment" in the introductory paragraph, inserted "or portion of the adjustment" following "the adjustment" at the beginning of paragraph (1), added "or the beneficiary was eligible to receive or was receiving benefits under this chapter before the adjustment" at the end of paragraph (2), substituted "benefits" for "retirement" following "eligibility for" near the beginning of paragraph (3), and substituted "being" for "already" following "reduction of benefits" near the end of paragraph (3).

Sec. 39.35.525. Limitation on use of credited service as peace officer or fireman. For the purpose of computing benefits for an employee enrolled as a peace officer or fireman, no more than 30 years of credited service may be considered, except for the purpose of computing average monthly compensation and then the three consecutive years during the entire period of credited service which produced the highest total compensation shall be used. (§ 16 ch 109 SLA 1970)

Sec. 39.35.530. Limit on pension. No employee may simultaneously receive a pension under more than one section of this chapter. (§ 42 ch 143 SLA 1960)

Sec. 39.35.535. Medical benefits. Each person who is entitled to receive a monthly benefit from the retirement system shall be provided with major medical insurance coverage. State of Alaska
Department of Revenue

TO: R. D. Stevenson
Special Assistant

DATE: February 24, 1982

FILE NO:

TELEPHONE NO:

FROM: Robert R. Kessel RK
Director, Audit Division

SUBJECT: HB 866

The bill would substantially expand the Investment Tax Credit for certain corporations. However, the bill falls short of its intended purpose to promote the development of farming, fishing, timber and mining and, in addition, is potentially very expensive.

There are many more qualified farmers than there is farmland available. The additional investment tax credit would give the existing farmers additional tax benefits but would do little to expand ownership to a new influx of farmers.

Most timber related companies already have more tax credits and carry-over losses than they can utilize. It is markets, not tax credits, that are needed.

For fisheries, all except bottom fishing appears overly crowded. That fact is witnessed by the limited entry system controlling the harvest of fishery resources. Tax credits would not expand the market nor provide higher prices.

Mining, in general, is a highly capital intensive industry. The expanded investment tax credit would serve the purpose of providing almost permanent assurance that no tax would be due because of the fifteen year carry-over provision available for the investment tax credit.

Finally, the expanded credit could be very costly particularly in one instance. If U. S. Borax develops its Ketchikan Molybdenum mine to the extent publicly indicated, the investment tax credit to that corporation would be $100,000,000 (based on investment cost of $1 billion). With the fifteen year carry-over provision for the investment tax credit, the investment tax credit of $100,000,000 could equate to the following revenue loss to Alaska:

Investment Credit applied against tax liability - per current law	
$1,000,000,000 x 10% Investment Credit amount x 18% currently allowed for Alaska corporations	$ 18,000,000
Investment Credit applied against tax liability per this bill	
$1,000,000,000 x 10%	100,000,000
Net Loss in revenue	$ 82,000,000

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

If it is assumed that the investment tax credit cannot exceed net income tax payable, then the maximum possible loss in revenue to the state would approximate 33 percent of the Department's revenue projections. The amounts would approximate $2.5 million in FY 82, $11.5 million in FY 83, and $13 million in FY 84. The FY 82 figure incorporates the retroactive provision of the proposed tax legislation which applies to only part of that year.

Investment Tax Credit (natural resources)

Monday March 29th

HOUSE BILL NO. 866, by Rep. Hayes. Would establish a special investment tax credit to promote the development of farming, fishing, timber, mining, wells, and other natural deposits (other than oil and gas), to provide increased employment opportunities, and provide an incentive for investment in the state. Provides a taxpayer may apply as a credit against his tax liability 100 percent of the investment credit allowed as to federal taxes under Internal Revenue Code sec. 38 (U.S.C. 38) upon the full amount of qualified investment put into use in the state for each taxable year for exploration, development, or mining of listed deposits (sec. 613(b) Internal Revenue Code) and for farming or clearing of land for farming, soil or water conservation, or for the prevention of erosion. Also would include fishing or cultivation and harvesting of timber. Provides Act is retroactive to January 1, 1982, and applies to taxable years beginning after 12/31/81. Provides Act takes effect immediately.

Introduced February 16 and referred to Labor & Commerce, then to Finance.

Date: March 18, 1982

To: Joe Hayes,
Speaker of the House

From: Steven C. Levi,
Staff

With specific regard to HB 866:

1) Legislative Finance has informed me that under the proposed language (yours), investment tax credits from previous year's projects may not be included under a previous year's coverage. Investment tax credits may be carried forward and backward but only if they have been generated after January 1, 1982.

2) Legislative Finance has informed me that the unitary structure of taxation, for which the Department of Revenue is pressing, has no bearing on investment tax credits. The unitary structure simply allows the State of Alaska to examine a multi-national industry as a total entity and assess taxes appropriately. Unitary taxation basically states that the companies total income, worldwide, will be examined and a appropriate tax on their total income will be assessed.

3) Legislative Finance has informed me that the under the proposed language (yours), investment tax credits may only be taken against corporate income taxes, not against the mining license tax. Legislative Finance could not find a "minimum tax." Staff suspects that a "minimum tax" is a state tax applied to mining operations in other states but not in Alaska.

4) The Fiscal Note gives the revenue loss to the State at $27 million for three fiscal years: $2.5 for FY82, $11.5 for FY83 and 13.5 for FY84. Please note that FY82 is artificially low because the proposed language only allows the investment tax credit to begin on January 1, 1982, the second half of FY82.

However, it should be stated that this amount is expected to rise simply because an investment tax credit will stimulate development which in turn will generate more investment tax credits.

5) On March 8, 1982, the Department of Revenue sent a memo to the Legislative Finance, attached. Staff response to the memo is as follows.

a) The contention that "the bill falls short of its intended purpose," is a speculative statement. The purpose of the bill is to stimulate long term taxable income. The memo, however, deals specifically with the short term economic impact of this bill as conditions are now.

The primary point missed in the first paragraph is that with each increment of advantage, the Alaskan theater of operations becomes more profitable. If, overnight, Anaconda could suddenly 'pick up' the option of an investment tax credit which would increase their aftertax revenue by several million dollars, operations in Alaska would become a higher priority. In short, the more profitable it is for the companies doing the investment, the more profitable it will be for the State of Alaska in the long run.

b) With regard to the farming industry, the memo stated that the investment tax credit would only benefit existing farmers and would not provide an incentive to new farmers. This statement is a a bit premature considering that more Delta plots have been put out to bid. If HB 866, as worded, passed, it would provide an added incentive to bid on land for the purpose of farming.

c) With regard to the timber industry, the memo stated that the primary problem realting to time was a lack of markets. The economic hardships faced in the timber industry are due more to a lack of a long term supply of lumber and State and Federal regulations than to a lack of markets. The turmoil over land conveyance, coupled with the disparity of timber regulations on Federal, State and private lands, has made it difficult for the industry to negotiate for long term timber contracts. An investment tax credit would, in the long run, make an investment in Alaskan timber a better bargain.

d) With regard to fishing, the memo states that "Tax credits would not expand the market nor provide higher prices." Staff notes that an expansion of the market is achieved through the dynamic process of supply or demand. An investment tax credit is not intended to 'expand the market.' An investment tax credit is not intended to provide higher prices either. Thus, staff notes, the statement by the Department of Revenue is true, but it has no bearing on the effect of an investment tax credit on the fishing industry.

e) Finally, the statement concerning U. S. Borax is one-sided. Mathematically the numbers are correct and the total 'loss' to the state would be $82 million over 15 years. But this does not take into account the amount of money that U. S. Borax would be pumping into the economy on the local level. Of course if U.S. Borax chooses to mine elsewhere, the State would not 'lose' $82 million. But it would not gain the corporate income tax and subsequent dollar turnover in the economy either.

MEMORANDUM

State of Alaska
Department of Revenue

TO: R. D. Stevenson
Special Assistant

DATE: February 24, 1982

FILE NO:

TELEPHONE NO:

FROM: Robert R. Kessel
Director, Audit Division

SUBJECT: HB 866

The bill would substantially expand the Investment Tax Credit for certain corporations. However, the bill falls short of its intended purpose to promote the development of farming, fishing, timber and mining and, in addition, is potentially very expensive.

There are many more qualified farmers than there is farmland available. The additional investment tax credit would give the existing farmers additional tax benefits but would do little to expand ownership to a new influx of farmers.

Most timber related companies already have more tax credits and carry-over losses than they can utilize. It is markets, not tax credits, that are needed.

For fisheries, all except bottom fishing appears overly crowded. That fact is witnessed by the limited entry system controlling the harvest of fishery resources. Tax credits would not expand the market nor provide higher prices.

Mining, in general, is a highly capital intensive industry. The expanded investment tax credit would serve the purpose of providing almost permanent assurance that no tax would be due because of the fifteen year carry-over provision available for the investment tax credit.

Finally, the expanded credit could be very costly particularly in one instance. If U. S. Borax develops its Ketchikan Molybdenum mine to the extent publicly indicated, the investment tax credit to that corporation would be $100,000,000 (based on investment cost of $1 billion). With the fifteen year carry-over provision for the investment tax credit, the investment tax credit of $100,000,000 could equate to the following revenue loss to Alaska:

Investment Credit applied against tax liability - per current law	
$1,000,000,000 x 10% Investment Credit amount x 18% currently allowed for Alaska corporations	$ 18,000,000
Investment Credit applied against tax liability per this bill	
$1,000,000,000 x 10%	100,000,000
Net Loss in revenue	$ 82,000,000

In a Time of Storm, Save the Safe Harbor

In this period of economic uncertainty, it is perhaps natural for patience to run thin and the hunt for scapegoats to intensify, and one should not be too surprised that this sometimes leads to superficial thinking and snap judgments. A case in point is the current storm over the leasing provisions of the Economic Recovery Tax Act that Congress passed and the President signed last year.

The subject is complicated and not easily explained, and this makes it liable to misleading analysis and false conclusions. But the mining industry shoud not throw up its hands in frustration and hope for the best, because its cause is right and its case is just. Its stake in the leasing provisions is enormous, and it must mount a vigorous defense of their retention.

The 1981 tax legislation liberalized depreciation rules for the purpose of accelerating capital investment by American industry, thereby making this nation more competitive in the marketplace of the globe, creating more and better jobs, and broadening the government's tax base in a vibrant and freshly reindustrialized economy.

A major problem with this worthy intention was that a number of highly capital-intensive industries, including mining, were earning little or no profits and consequently paying low corporate income taxes. More liberal depreciation rules would do little good for companies that couldn't afford to invest in the first place in needed new plants and equipment, and new tax breaks wouldn't mean much for those whose tax obligations were already low.

The leasing provisions were consciously devised to get around these problems by letting firms use their tax benefits through leasing that would generate the money for capital investments.

Since then, the press has carried sensationalist stories about companies "selling their tax breaks" to flourishing corporations, which reaped huge gains at the expense of the U.S. Treasury. Because the facts are complicated, these stories seldom gave an accurate account of the transactions and left some distinct and distasteful impressions.

Let's set the record straight.

- If capital-intensive enterprises with low earnings cannot gain access to financing, the incentives of the 1981 law become meaningless.

- The government itself has imposed tremendous capital requirements on many of these industries through such means as mandated pollution controls, which seldom contribute an iota to profitability.

- No matter how the tax credit is divided, it cannot exceed what the government allows for a capital investment.

- This capital investment—the very reason for the tax change—must be made, before any benefits accrue. And this is exactly what's been happening. Money is being infused into necessary improvements in the mining industry. Jobs are being preserved. Technology is being advanced. The industry is gradually gaining the firmer footing it requires to serve the needs of American society. It is a process that must not be reversed.

- The companies that make available the cash for the investment, often when it cannot be obtained from banks or other institutions, are entitled to a return on their money and some reward for their risks.

In times of widespread economic distress, it is easy to single out so-called faceless corporations for special abuse and call upon them to bear more of the burden. But this evades the problem, instead of going to the heart of it.

A *Wall Street Journal* survey earlier this month comparing fourth quarter 1981 earnings with those of 1980, showed a 91 percent drop for the mining and nonferrous metals industries.

As I've pointed out many times, these industries are at the bedrock of modern society. They are crucial to our national defense. All other industries and jobs ultimately depend on their vitality; they produce the stuff from which things are made. They have had the most severe proportional costs thrust upon them for environmental protection of all industries in the nation. They face increasing competition from foreign producers who labor under fewer burdens and often with governmental subsidies to yield foreign exchange.

In short, the mining industry of the United States is in serious straits and trying to ride out a rough storm. The leasing provisions of last year's tax legislation were aptly named a "safe harbor," and they now offer the chance for refuge and replenishment when these are needed most.

All members of the mining fraternity should immediately make vigorous representations to the Congress, especially where personal contacts and constituent interests obtain, on behalf of retaining the leasing provisions of the Economic Recovery Tax Act as they apply to the mining industry.

If this nation will not provide a "safe harbor" for its most basic industries in the troubled present, it may well end up scuttling its more promising future.

SUBSTITUTE FOR HOUSE BILL NO. 866

A BILL

For an Act entitled: "An Act establishing a special investment tax credit; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE FOR THE STATE OF ALASKA:

*Section 1. LEGISLATIVE FINDINGS AND INTENT. The legislature finds and declares that the establishment of a special investment tax credit will assist the state by diversifying its economy, provide increased employment opportunities, and provide an incentive for investment in the state.

*Sec. 2. AS 43.20.021(d) is amended to read:

(d) Except as provided in AS 43.20.036(b), where [WHERE] a credit allowed under the Internal Revenue Code is also allowed in computing Alaska income tax, it is limited to 18 percent for corporations of the amount of credit determined for federal income tax purposes which is attributable to Alaska.

*Sec. 3. AS 43.20.036(b) is amended to read:

(b) For purposes of calculating income tax payable under this chapter the taxpayer may apply as a credit against his tax liability 100 percent of the investment credit allowed as to federal taxes under Internal Revenue Code sec. 38 (26 U.S.C. 38) upon the full amount of qualified investment put into use in the state for each taxable year.

*Sec. 4. This Act is retroactive to January 1, 1982, and applies to tax years beginning after December 31, 1981.

*Sec. 5. This Act takes effect immediately in accordance with AS 01.10.070(c).

MEMORANDUM

TO: Steven Levi

FROM: Phil Holdsworth P.H.

SUBJECT: HB 866

Would suggest the following amendment to the subject bill to eliminate the potential problem of the "sale" of tax credits by the actual developer to others. A new Sec. 3 could be inserted between lines 17 and 18, page 2 as follows:

→ Limit to either State

Sec. 3. The investment tax credit allowed under sec. 2 of this Act may be claimed only by the taxpaying entity actually conducting the qualifying activity, and is not transferable.

(Renumber following sections accordingly)

Stops Transfers of these credits to others -

Yes bill gives 100% credit of Federal maybe delete this? decrease in State for investments not subject is current a % of investments.

AMENDMENT Proposed

ALASKA STATE CHAMBER OF COMMERCE
STATEMENT IN SUPPORT OF HB 866
HOUSE LABOR & COMMERCE COMMITTEE
MARCH 10, 1982

Mr. Chairman, my name is George Krusz. I am president of the Alaska State Chamber of Commerce. The ASCC is the largest statewide federation of Alaska business, with a membership of some 500 firms and individuals. Our membership represents the spread of Alaska business form individually owned and operated firms to the largest employers in the state. Georgraphically, representation ranges from Alaska and the Pacific Coast to the Southwest and East Coast. For more than twenty years, the State Chamber has been representing the interest of all Alaskan business in Juneau. The chamber traditionally has been supportive of legislation fair to large and small concerns alike.

Our support of HB 866 could probably be described as conceptual. We strongly support the concept of legislation allowing investment tax credit under 43.20.036 at 100% of the tax credit allowed under federal statutes. As a matter of fact, this very idea is part of the chamber's 1982 legislative program adopted at our annual Prelegislative Conference in December 1981.

However, it escapes us as to why this credit should be descriminatory as in HB 866. Why should it be limited just to the farming, fishing, timber, and mining industries and not to construction, manufacturing, and other Alaska businesses who

wish to invest heavily in Alaska's future. And that certainly includes the oil and gas industry.

To quote liberally from Section 1, HB 866:

"The Legislature finds and declares that the establishment of a special investment tax credit . . . will assist to state by diversifying its economy to make it less dependent on oil and gas, provide increased employment opportunities and provide an incentive for investment in the state." I'm sure even the oil and gas people would agree with that statement, so why not give all Alaska businesses the same investment incentives in order that we truly can diversity our economy and increase employment.

HB 866 is certainly a step in the right direction and for that reason, the ASCC does support it, but it would be so much stronger if it allowed all Alaska businesses to participate.

Thank you for this opportunity to express our viewpoint.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)
If it is assumed that the investment tax credit cannot exceed net income tax payable, then the maximum possible loss in revenue to the state would approximate 33 percent of the Department's revenue projections. The amounts would approximate $2.5 million in FY 82, $11.5 million in FY 83, and $13 million in FY 84. The FY 82 figure incorporates the retroactive provision of the proposed tax legislation which applies to only part of that year.

SUBJ: HB 886, "An Act relating to financial statements of corporations"

The phrase, "financial statements of the corporation," found in the Alaska State Business Corporation statutes (AS 10.05), needs to be defined to protect the directors, creditors, and shareholders of coporations from any liability associated with payment of excessive dividends. AS 10.05.219 (1) protects directors of Alaska business corporations from such liability, both jointly and severally, only if he relied in good faith on the financial statements of the corporation for his analysis in determining a legal dividend. Confusion exists in the present phrase "financial statement of the corporation," upon which the directors rely when determining dividend amounts. Under AS 10.15.216 (a), directors become liable to the corporation when excessive dividends are made.

Therefore HB 886 amends and adds a new subsection to AS 10.15.825, defining the phrase "financial statements of the corportation." The clarification and legal definition of the phrase would not only protect the directors, creditors and shareholders, but would also alleviate common concerns and fears of possible liability if excessive dividends were disposed according to the directors determination.

This concept has also been incorporated by the Code Revision Commission, in its working draft of the corporation statutes. The American Institute of Certified Public Accountants, the SEC and the Code Revision Commission, all endorse this concept because they produce economically meaningful data. Also, it protects the shareholders and creditors from the manipulation of financial data.

I urge your support for HB 886. Thank you.

Bristol Bay Native Corporation
445 E. 5TH AVENUE / P. O. BOX 220 / ANCHORAGE / ALASKA 99510 / PH. (907) 278-3602

March 10, 1982

Honorable Terry Martin
House of Represenatives
Chairman - Labor and Commerce Committee
State of Alaska
Pouch V, Mail Stop 3100
Juneau, Alaska 99811

Dear Mr. Martin:

I am writing to you in support of House Bill 886. House Bill 886 amends the profit corporation statutes to specifically define the phrase "financial statements of the corporation." Why is this definition needed?

"Financial statements of the corporation" is a key phrase in determining a director's defense against personal liability for dividend payments. AS 10.05.219(1). Yet the phrase is ambiguous. This ambiguity creates unnecessary risks for directors attempting to comply with statutory requirements. Clarity would serve to protect directors from ex post facto definitions and liability.

The definition of "financial statements of the corporation" in House Bill 886 contains two basic concepts. The first is that the financial statements will be prepared according to generally accepted accounting principles then applicable. The second is that the statements will be consolidated, where appropriate. Both of these concepts are basic to the published financial statements required by the Securities Exchange Commission to be sent to all shareholders. Both concepts have also been incorporated by the Code Revision Commission, in its working draft of the corporation statutes. The American Institute of Certified Public Accountants, the SEC and the Code Revision Commission, all endorse these concepts because they produce economically meaningful data and because they protect shareholders and creditors from the manipulation of financial data.

In short, I support the definition because it will protect directors and it will protect creditors and shareholders as well.

Very truly yours,

Elizabeth B. Johnston
General Counsel

cc: Representative Al Adams

HOUSE BILL 886

Alaska corporate law makes directors of a profit corporation jointly and severally liable for excessive dividend payments. AS 10.05.216(a). However, this same law also provides a defense or a safe harbor. A director is not liable for excessive dividends if he in good faith relied on the financial statements of the corporation for his analysis of a legal dividend source. AS 10.05.219(1).

The problem is that the scope of this defense is ambiguous. The meaning of "financial statements" is unclear and therefore, creates unnecessary risks for directors as they try to comply with dividend requirements.

The solution is to define the "financial statements of the corporation." The definition proposed in House Bill 886 includes, where appropriate, consolidated balance sheets and income statements prepared according to generally accepted accounting principles. While other financial documents are useful for other corporate purposes, only the preceding are useful for an analysis of a legal source for dividends under AS 10.05.219(1).

MONDAY BRIEFING

National

Joint space labs possible

Cocoa, Fla. — The administrator of the American space program says the United States may join with Japan and Europe within the next five years to build an orbiting space station. James Beggs of the National Aeronautics and Space Administration told the newspaper Cocoa TODAY in an interview published Sunday that the station would use European Space Agency technology in building spacelabs and Japanese computer expertise. He said habitable modules connected by steel beams would be designed at the Johnson Space Center in Houston and launched piece-by-piece from the Kennedy Space Center in Florida.

Nuclear sub protest planned

Tacoma, Wash. — A Roman Catholic archbishop says he will take part in a blockade designed to prevent a Trident nuclear submarine, the USS Ohio, from reaching the Bangor Naval Base. Raymond Hunthausen, archbishop of Seattle, said at a rally Sunday he would participate this summer in the effort to keep the submarine out of the the Kitsap Peninsula base west of Seattle.

Boat house collapses

Gilford, N.H. — Boats drawn out of Lake Winnipesaukee to protect them from winter ice fell victim to heavy snow when a boathouse collapsed on 169 pleasure craft valued at $3 million. Gerald Fagan, owner of the Gilford Marina building which collapsed Friday night, said it would take up to six weeks to remove the boats that were stored five-high on racks. Damage to the 300-foot metal shed was estimated at $700,000.

Car crashes into bus

Los Angeles — When a bus was struck in the rear by a car, bystanders in southwest Los Angeles jumped onto the Rapid Transit Authority vehicle and claimed to be injured, police say. The driver of the car, Shelton Eugene Knight, 34, was arrested Saturday for investigation of felony driving under the influence of drugs. Sgt Roger Lindsay said the injury count, which jumped to 26 when bystanders jumped on the bus, dropped to nine when they found out the bus driver was not at fault.

Factories emit cancerous gas

Akron, Ohio — There are no regulations to stop tire manufacturers from emitting thousands of pounds a year of a cancer-causing gas, a lobbying group says. The National Clean Air Coalition said in a report Sunday that Goodyear and B.F. Goodrich plants in Akron release more than 350,000 pounts of acrylonitrile a year. The companies acknowledged the substance is emitted from their plants, but said they were in compliance with all federal, state and local law.

CS for HOUSE RESOLUTION NO. 17
IN THE LEGISLATURE OF THE STATE OF ALASKA
TWELFTH LEGISLATURE - SECOND SESSION

RELATING TO

Requesting AHFC, AIDA, and the Department of Community and Regional Affairs to obtain certain data on state loan programs.

TEXT BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS the Alaska House of Representatives has received allegations that some lenders participating in state loan programs have discriminated against some loan applicants in violation of AS 18.80.250; and

WHEREAS the House of Representatives is concerned about the allegations, and believes it to be in the Public Interest to determine whether discrimination is actually taking place in state loan programs; and

WHEREAS the principal state loan programs in which discrimination is alleged to have occurred are those administered by the Alaska Housing Finance Corporation (AHFC), the Alaska Industrial Development Authority (AIDA), and the Department of Community and Regional Affairs, nonconforming housing loan program; and

WHEREAS AHFC, AIDA, and the Department of Community and Regional Affairs can generate statistical data on the financial

characteristics of qualified applicants for loans under their respective programs; and

WHEREAS acceptable statistical methods exist that can be used to indicate if there are patterns of discrimination toward applicants for state loans under AHFC, AIDA, and the Department of Community and Regional Affairs;

BE IT RESOLVED that the Alaska House of Representatives requests AHFC, AIDA, and the Department of Community and Regional Affairs nonconforming housing loan program to generate current statistical data on the subject and present the resulting information be made available no later than April 1, 1983 to the House Special Committee on Banking, established by House Resolve No. 3 of the Twelfth Legislature - Second Session.

Re: House Resolution No. 17

Dear Representative Martin:

The Equal Credit Opportunity Act became a national law in October 1974. There have been several amendments since that date. Section 701 of the law reads, in part:

"Prohibited discrimination; reasons for adverse action

(a) It shall be unlawful for any creditor to discriminate against any applicant, with respect to any aspect of a credit transaction--

(1) on the basis of race, color, religion, national origin, sex or marital status, or age (provided the applicant has the capacity to contract);

(2) because all or part of the applicant's income derives from any public assistance program; or

(3) because the applicant has in good faith exercised any right under the Consumer Credit Protection Act. ...."

In addition, Alaska lending institutions have, by policy, prohibited discrimination. We are always concerned and would appreciate any specific cases being brought to our attention.

Section 704 of the law reads, in part:

"Administrative enforcement

(a) Compliance with the requirements imposed under this title shall be enforced under:

(1) Section 8 of the Federal Deposit Insurance Act, in the case of --

(A) national banks, by the Comptroller of the Currency.

(B) member banks of the Federal Reserve System (other than national banks), by the Board.

(C) banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation.

(2) Section 5(d) of the Home Owners' Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation) in the case of any institution subject to any of those provisions.

(3) The Federal Credit Union Act, by the Administrator of the National Credit Union Administration with respect to any Federal Credit Union.

(4) The Acts to regulate commerce, by the Interstate Commerce Commission with respect to any common carrier subject to those Acts.

(5) The Federal Aviation Act of 1958, by the Civil Aeronautics board with respect to any air carrier or foreign air carrier subject to that Act.

(6) The Packers and Stockyards Act, 1921 (except as provided in section 406 of that Act), by the Secretary of Agriculture with respect to any activities subject to that Act.

(7) The Farm Credit Act of 1971, by the Farm Credit Administration with respect to any Federal land bank, Federal land bank association, Federal intermediate credit bank, and production credit association;

(8) The Securities Exchange Act of 1934, by the Securities and Exchange Commission with respect to brokers and dealers; and

(9) The Small Business Investment Act of 1958, by the Small Business Administration, with respect to small business investment companies. ...."

If specific instances of discrimination have occurred, complaints should be directed to the proper regulatory agency for investigation.

Sincerely,

Richard E. Dolman

PURPOSE OF THE REVIEW

In accordance with the provisions of Title 24 of the Alaska Statutes and Chapter 18 of the 1980 Session Laws of Alaska, a performance review of the Department of Commerce and Economic Development, Alaska Industrial Development Authority (AIDA), was conducted to:

1. Evaluate program goals and objectives relative to AIDA's statutory mandates.

2. Determine the extent to which program objectives are being accomplished.

3. Evaluate AIDA's operating efficiency and effectiveness.

ORGANIZATION AND FUNCTION

Title 44, Chapter 88 of the Alaska Statutes created AIDA in 1967, yet it was not functional until 1978. The intent was to provide a vehicle to import outside capital to Alaska, creating jobs and economic diversification. However, AIDA remained a concept which lacked funding, staff, and impetus for eleven years until revived in 1978 by legislation which expanded its purpose to include financing air and water transportation, pollution control, gas, and electrical facilities.

From 1978 to 1980 the Authority's sole means of providing financing to industrial and manufacturing enterprises was through the tax-exempt Stand-Alone Revenue Bond Program. Under the Stand-Alone Bond Program, AIDA acts as a conduit for businesses seeking to utilize the tax-exempt bond market. Revenue bonds are secured solely by the revenues of the financed project and not by the full faith and credit of AIDA. As of October 20, 1981, the Authority had funded 15 projects aggregating $120.5 million under this program.

In 1981 the Legislature authorized a similar program, the Supported Stand-Alone Bond Program. Under this program the originating financial institution must retain at least twenty percent of the loan and the bonds are an obligation of AIDA. No bonds have yet been issued under this program.

The Umbrella Bond Program was created following a $183.0 million appropriation to fund the Authority's Enterprise Development Fund on July 1, 1980. Under this program AIDA issues revenue bonds which are secured by the Authority's full faith and credit and uses the proceeds to purchase a portion of lending institutions' loans for projects up to a maximum of $1.0 million. Until prohibited from doing so by an Internal Revenue Service (IRS) ruling in August 1981, AIDA pooled the projects together into large bond issues. AIDA has held two bond sales under this program, aggregating $76,140,000 for 271 projects. The IRS has ruled that such poolings will be treated as a single large issue and the capital asset expenditure limitation of $10.0 million for the previous and subsequent three years will be applied to the combined borrowers rather than individually. This ruling has eliminated the large issues and the related economies. AIDA may offer this program on a much smaller scale, pooling five or six issues.

Uncertainty surrounding tax-exempt financing has caused AIDA to develop alternative strategies involving taxable financing. Another program has been developed under 1981 legislation which permits AIDA to purchase, from available funds, the Federally guaranteed portions of loans made by financial institutions up to a maximum amount of $500,000. No financings had been effectuated at the conclusion of our review under these two programs.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

AIDA should adopt a policy to defer bond sales if possible until market conditions are favorable.

AIDA issued its first general obligation bonds in April 1981, during a week in which it was reported that the bond market registered its biggest single day loss in 14 months with prices on government securities reaching all-time lows.

AIDA's second general obligation bond issue was held in the Fall of 1981 when the bond market was "bearish" and many would-be borrowers were refusing to issue new bonds because of high interest rates.

On both occasions, AIDA's financial strength was such that it was not necessary to issue bonds at that particular time. AIDA should time its bond sales to coincide with favorable market conditions.

Recommendation No. 2

AIDA should comply with the provisions of the Alaska Administrative Code.

1. Title 3, Chapter 99, Section 260(c) of the Alaska Administrative Code requires AIDA to determine loan interest rates after the related bond sales. AIDA placed a limit on the amount of interest that could be charged for 166 loans before bonds were sold to finance the loans. The effect of this decision was an estimated loss of approximately $7,000,000 as poor market conditions in 1981 resulted in higher bond interest rates than anticipated. This $7,000,000 subsidy represents the difference between actuarial loan and bond yields as calculated by AIDA personnel.

2. Title 3, Chapter 99, Section 300(b) of the Alaska Administrative Code requires lending institution originators of AIDA loans to provide a bond to ensure against errors, omissions and fraud. We could find no evidence that 6 of 19 originators had obtained this bond.

3. Title 3, Chapter 99, Section 120 of the Alaska Administrative Code requires Stand-Alone Revenue Bond applications to contain audited financial statements (unless waived by resolution), project descriptions, and business histories of persons owning at least 10% of the enterprise. Twenty of 43 files tested did not contain one or more of these items. Audited financial statements were waived for one project without a resolution.

4. Title 3, Chapter 99, Section 140(a) of the Alaska Administrative Code requires Stand-Alone Revenue Bond applicants to pay a $2,500 application fee. Twenty-nine of 43 fees tested amounted to less than $2,500 as follows: 12 twelve applicants paid no fee, 4 applicants paid $100, 12 applicants paid $500, and 1 applicant paid $2,100. No resolution was issued to waive or modify these 29 exceptions, which resulted in a loss of application fee revenue amounting to $59,000.

5. Title 3, Chapter 99, Section 230(b) of the Alaska Administrative Code requires Umbrella Bond applications to contain certain information, which can be waived. We reviewed 26 of 106 funded loan files and noted the following regulation exceptions:

   a. 65% did not contain financial statements prepared by a Certified Public Accountant;

   b. none contained soil tests;

   c. 25% of the files to which the requirement applies did not contain signed loan agreements with the bank;

   d. 27% of the files to which the requirement applies did not contain copies of lease agreements; and,

   e. 33% of the files to which the requirement applies did not contain a loan summary.

While AIDA has the authority to waive requirements, waivers should be documented and should be the exeption rather than the rule.

Recommendation No. 3

Members of AIDA's Board of Directors should comply with the provisions of the Alaska Statutes.

AS 39.20.180 authorizes transportation expenses for Board members according to the provisions of AS 39.20.110-170. AS 39.20.140 requires the lowest tourist class fare to be used for out-of-state travel. AIDA's Board members use first class fare when travelling outside of Alaska. AIDA's employees also travel using first class fare when on out-of-state trips. While no statutory prohibition prevents AIDA employees from doing so, such travel may not be appropriate for public representatives when tourist class is available.

Recommendation No. 4

Internal control over assets should be strengthened.

1. AIDA employees are permitted to charge personal travel to AIDA accounts. On one occasion AIDA paid for an employee's Hawaii airfare and did not discover the mistake until months later when the employee resigned. Personal and business travel charges should not be commingled.

2. Employees receive salary advances with unlimited time for repayment. During our review, records had to be reconstructed from disbursement and deposit records to determine which employees had advances. Three employees had advances which had been oustanding from five months to one year without repayment. Salary advance agreements should be obtained from employees and repayment required in monthly installments not to exceed six months.

3. Board, operating, and investment policies and procedures are unwritten, causing incorrect and inconsistent treatment of transactions. For example, an undefined investment policy resulted in the investment of $3,900,000 of bond proceeds in low-yield securities instead of AIDA's customary investment in repurchase agreements. Lost interest income is estimated at more than $19,000. We also noted inconsistent per diem payments to employees with six instances of overpayment and two of underpayment. We believe this resulted from varying policy assumptions of employees making the calculations.

4. Long distance telephone bills of approximately $1,000 per month are paid without verifying whether calls represent authorized business activity by AIDA personnel.

   Underwriters were paid $94,550 for out-of-pocket expenses without an accounting. This amount included $32,700 for travel and entertainment, and $4,250 for miscellaneous expenses. AIDA also paid its financial advisor $17,500 for travel and entertainment without requiring an itemized accounting of the dates, personnel, or activities which resulted in this expense.

In order to safeguard its assets, check the accuracy and reliability of its accounting records, ensure operational efficiency and effectiveness, and promote adherence to managerial policy, AIDA should review and improve its system of internal controls.

Recommendation No. 5

AIDA should adopt a loan assumption policy.

Federal law prohibits the use of tax-exempt bond proceeds for inventory, that is, items purchased for resale. AIDA sold tax-exempt bonds to finance the acquisition of a motel which appears to have been purchased for resale. According to records in AIDA's files, the borrower stated an intention to resell the facility several times before receiving the funds, yet AIDA made the loan. AIDA is presently attempting to respond to potential buyers of this facility, however they lack a definite assumption policy which, for example, would require a minimum holding period for loans. If AIDA allows an assumption, the loan could be declared an inventory loan and the bonds might lose their tax-exempt status, yet AIDA has no assumption regulations on which to base a denial.

Recommendation No. 6

AIDA should develop a Seller/Servicer Guide to assist lending institutions in complying with program requirements.

Four of 13 lending institutions responded as follows to the question of whether AIDA provides adequate information on its requirements for purchasing loans:

1. In many cases changes are made in commitment procedures and funding methods with no explanation.

2. There is no written communication on internal policy changes, which happen frequently.

3. Communication between AIDA and bank participants could be better. AIDA periodically changes its practices, and we find out only after the fact.

4. The requirements have been changed so many times we have difficulty in determining exactly what is needed on any one application.

Presently AIDA's only written program guidelines are its regulations, which are not consistently applied. To avoid confusion and ensure consistent treatment of borrowers, AIDA should provide lending institutions with written program requirements.

Recommendation No. 7

Electronic recording devices should be visible and their use should be disclosed to affected persons at the time of such use.

During the audit AIDA employees and other individuals expressed concern that conversations might be tape recorded by AIDA's Executive Director without the knowledge or consent of those affected. To alleviate these concerns and ensure compliance with Federal and State laws governing their use, electronic recording devices should be displayed and notification given of their use.

Juneau, AK 99811

Re: Preliminary Audit Report -- Alaska Industrial Development Authority (AIDA)

Dear Mr. Wilkerson:

This responds to your Preliminary Audit Report of November 23, 1981 on AIDA, which you transmitted to me with your cover letter of January 29, 1982.

Before discussing the recommendations of the Preliminary Audit Report, I would like to make a few observations about its description of AIDA's organization and function (pp. 2-3 of the Report). The first regards the statement,

> "However, AIDA remained a concept which lacked funding, staff, and impetus for eleven years until revived in 1978 by legislation which expanded its purpose to include financing air and water transportation, pollution control, gas, and electrical facilities."

While it is true that AIDA lay asleep like an enchanted maiden for 11 years before the legislation referred to was enacted, I believe the handsome prince who awoke AIDA from this slumber was AIDA's first Executive Director, David A. Rose. He was the right man in the right place for the first job, and without his ability and untiring efforts to make the program succeed, AIDA might still be lacking impetus.

My second observation concerns the statement, "No bonds have yet been authorized under [the Supported Stand-Alone Bond Program authorized by the Legislature in 1981]." This is true, but without any explanation of why this is so, it seems unnecessarily negative. The Supported Stand-Alone Bond Program was intended simply to allow "umbrella" bonds to be issued by AIDA for projects larger than $1,000,000 (just as it would in its regular "umbrella" bond program for projects of $1,000,000 or less), provided the originating financial institution retained at least 20 per-

cent of the loan to be financed. The reason no Supported Stand-Alone Bonds have been issued is the same as the reason described in the Preliminary Audit Report as having caused some difficulty in the regular "umbrella" bond program. Under the recent IRS Revenue Ruling, projects that are pooled together for an "umbrella" bond sale are aggregated and treated as a single project for purposes of the IRS limitations on capital expenditures in the three-year periods before and after the bond sale. While "umbrella" bonds still make sense for pools of projects not over $1,000,000, the larger size of the projects for the Supported Stand-Alone Bond Program (plus the usually larger size of the businesses proposing such projects) makes it virtually infeasible to combine these projects for an "umbrella" bond issue and still comply with the IRS rules limiting capital expenditures. However, these larger projects can be and are being financed under AIDA's original bond program, the ordinary Stand-Alone Bond Program.

My third observation pertains to the statement,

> "No financings had been effectuated at the conclusion of our review under these two programs [i.e., a taxable bond program which AIDA is developing, and a program to purchase from available funds within AIDA the federally guaranteed portions of business loans up to $500,000 in size]."

As long as AIDA is able to meet its customers' needs through its various tax-exempt financing programs, there is no need to finance projects by taxable bonds with their higher interest rates. As for AIDA's not purchasing any federally guaranteed loans when your review was concluded (which I presume was November 23, 1981), AIDA had the necessary regulations adopted and was ready to receive applications under this program in October 1981. By December 1, 1981, some 13 of these loans had been purchased by AIDA totaling $2,447,000 (of which the federally guaranteed portions, which is all AIDA is allowed to purchase, came to $2,202,300).

Having made these observations, I would not like to take up and address the various recommendations contained in the Preliminary Audit Report.

Recommendation No. 1. AIDA should adopt a policy to defer bond sales if possible until market conditions are favorable.

As a general rule, AIDA would like nothing better than to see the timing of its bond sales coincide with periods when interest rates are at their lows. Unfortunately, we did not have much success in achieving this objective with our first two "umbrella" bond sales, as the Preliminary Audit Report points out. However, we did have good reasons to proceed with the sales when we did, even though we were under no financial duress to do so.

AIDA's first "umbrella" bonds were sold in April 1981, eight months after the legislation enabling AIDA to issue such bonds took effect. This unusually long delay in implementing new legislation was particularly embarrassing for AIDA, which had made a firm commitment to the Legislature that it would get the "umbrella" bond program up and running quickly and successfully. In order to re-affirm its commitment and to demonstrate that such a bond program would work well for both AIDA and the Alaskan public served by AIDA, the AIDA board believed it was important that we proceed with our first "umbrella" bond sale as soon as we could.

Even though in retrospect it appears that we could scarcely have picked a worse week in which to go to the bond market, that sale was a significant success. The 50 projects that were financed by that sale all received interest rates significantly below the prevailing level for any other financing source, and -- equally important, I believe, to those borrowers -- the rates of interest were fixed for the entire period of the loans. Most other sources of financing would have required some type of floating interest rate. Thus, the borrowers were benefitted by the sale, and of course, the feasibility of an "umbrella" bond program was conclusively demonstrated.

Our second "umbrella" bond sale was held despite the adverse market last fall because of the considerable uncertainty that had arisen about the future of tax-exempt financing of the type done by AIDA. First, the Internal Revenue Service issued a Revenue Ruling (No. 81-216) that reverses a long-standing position by the IRS and considerably restricts the ability of bond issuers like AIDA to pool borrowers together for purposes of issuing "umbrella" bonds. At the same time several important Congressmen and Senators in Washington, D.C. were reported to be considering amendments to the Internal Revenue Code to severely limit or end altogether the tax-exempt status of industrial development bonds. The Reagan Administration was also rumored to be considering making a similar proposal as part of its comprehensive tax package.

In light of these threats to the AIDA "umbrella" program, the board decided to proceed as rapidly as possible to a bond sale for the applications that had been "in the mill" when the Revenue Ruling was issued, since under that Ruling those applications were "grandfathered." The sense of urgency was very strong because the proposed tax amendments were reliably reported to have effective date clauses running either from the date of their introduction or from the end of calendar year 1981. Thus, if AIDA didn't hold the sale promptly while it still could under the "grandfather" provision in the Revenue Ruling, there was a real risk that the new legislation would prevent the issuance of tax-exempt bonds for even the "grandfathered" borrowers once that legislation was introduced. Thus, even though we recognized that the bond market was indeed rather "bearish," we decided it was more important to get the bond sale

concluded before any more harm could be done by either Congress or the IRS.

Although so far no legislation limiting or ending the tax-exempt status of industrial development bonds has been introduced in Congress, there are still reliable reports that something is in the wings and will be introduced shortly. To be ready "just in case," AIDA has authorized an underwriting team to prepare the necessary documentation for a taxable bond program. Meanwhile, we have developed a modification of the "umbrella" bond program to allow it to continue under the restrictions imposed by the Revenue Ruling and have also created a "mini-stand-alone" program for additional flexibility under the present IRS rules.

Recommendation No. 2. AIDA should comply with the provisions of the Alaska Administrative Code.

The Preliminary Audit Report cites five areas in which AIDA did not appear to have complied with its own regulations. Let me discuss each of these areas in turn.

1. "Title 3, Chapter 99, Section 260(c) of the Alaska Administrative Code requires AIDA to determine loan interest rates after the related bond sales. AIDA placed a limit on the amount of interest that could be charged for 166 loans before bonds were sold to finance the loans. The effect of this decision was an estimated loss of approximately $7,000,000 as poor market conditions in 1981 resulted in higher bond interest rates than anticipated. This $7,000,-000 subsidy represents the difference between actuarial loan and bond yields as calculated by AIDA personnel."

I have the following comments to make regarding this area. First, I do not believe that 3 AAC 99.260(c) was actually violated by AIDA's practice of committing to loans at an interest rate not to exceed some specified rate. The regulation states in pertinent part:

> The rate of interest on the authority's participation in a real property or tangible personal property loan will be determined after sale of the authority's bonds and may not exceed the interest rate paid by the authority on the bonds by more than the percentage permitted under the arbitrage rules of the Internal Revenue Service. . . .

AIDA's commitment not to impose an interest rate higher than a specified amount did not, strictly speaking, "determine" at that time what the rate of interest would be for the loan. After the bonds were sold, it became apparent that the maximum rate permitted under the arbitrage rules would be greater than the "ceiling" rate that AIDA had promised, and conse-

quently, the loans were made at the "ceiling" rate. At no time before the bond sale was the rate for these loans actually fixed at the "ceiling," however, since there was always the possibility that the interest rates for bonds could drop and we could fulfill the commitment at a rate below the "ceiling."

While this practice does not therefore seem to have violated the letter of 3 AAC 99.260(c), I would nevertheless agree that it was a spiritual violation.

This brings me to my second comment, which is that the practice of committing to loans at not more than a specified rate of interest has been discontinued and will not be resumed.

Finally on this point, I would note that while AIDA's early calculations indicated that this practice had in fact cost the Authority about $7,000,000, subsequent analysis by Lehman Brothers Kuhn Loeb, Inc. (AIDA's financial advisor) indicates that the total cash flow from each "umbrella" bond sale is positive (i.e., there is no actual cash loss from either sale), although the return on AIDA's committed funds in both cases is significantly below what AIDA would have earned on those funds at then-prevailing market rates. The "loss" therefore is not a realized loss, but rather an opportunity cost in terms of foregone income from alternative action. But, had interest rates moved a little higher than they did, we might well have been looking at negative-value total cash flows, and then there would have been realized losses as well.

2. "Title 3, Chapter 99, Section 300(b) of the Alaska Adminrative Code requires lending institution originators of AIDA loans to provide a bond to ensure against errors, omissions, and fraud. We could find no evidence that 6 of 19 originators had obtained this bond."

The protection required by 3 AAC 99.300(b) is actually provided both by fidelity bonds and by errors and omissions insurance. It is true that no evidence of a fidelity bond was on file with AIDA for six institutions, although one of those six has never sold any loans to AIDA. Of the six, two did have adequate errors and omissions insurance on file with us. These deficiencies in our files are acknowledged and are being corrected.

One of the benefits of your audit has been the discovery that a number of the bonds and insurance policies on file with AIDA would seem to have expired, based solely on what was in AIDA's files. Consequently, a "tickler" system has been established to keep those records current and to ensure that there are no expirations of bonds or insurance in the future.

3. "Title 3, Chapter 99, Section 120 of the Alaska Administrative Code requires Stand-Alone Revenue Bond applications to contain audited financial statements (unless waived by resolution), project descriptions, and business histories of persons owning at least 10% of the enterprise. Twenty of 43 files tested did not contain one or more of these items. Audited financial statements were waived for one project without a resolution."

According to AIDA's Executive Director, all of the stand-alone files contain project descriptions.

In the case of the project for which the audited financial statements were allegedly waived without a resolution, we were advised by counsel that audited financial statements of one of the partners in the project satisfied the purpose of the regulation because they showed that the one partner alone was sufficiently creditworthy to finance the project. Thus, under this legal opinion, sufficient financial statements were on file and no waiver was in order.

It is true that business histories of persons owning at least 10% of a project are not present in all of the stand-alone files. The AIDA board will consider what to do about this situation at its next monthly meeting.

4. "Title 3, Chapter 99, Section 140(a) of the Alaska Administrative Code requires stand-alone revenue bond applicants to pay a $2,500 application fee. Twenty-nine of 43 fees tested amounted to less than $2500 as follows: 12 applicants paid no fee, four applicants paid $100, 12 applicants paid $500, and 1 applicant paid $2,100. No resolution was issued to waive or modify these 29 exceptions, which resulted in a loss of application fee revenue amounting to $59,000."

The regulation (3 AAC 99.140(a)) referred to reads as follows:

Unless waived by a resolution of the authority for good cause, an applicant shall pay a nonrefundable application fee of $2500 when the application is submitted. An application will not be finally considered by the authority until the application fee is paid. The amount paid as an application fee will be credited against the financing fee required under (b) of this section. (emphasis added)

This regulation is not skillfully drafted -- the first sentence explicitly declares that the nonrefundable application fee must be paid at the time the application is submitted to AIDA; however, the second sentence's

reference to final consideration implies that preliminary consideration could be given even though the fee is not paid. This ambiguity was discussed with AIDA's bond counsel, who opined that AIDA did not actually have to demand full payment of the $2500 by an applicant until AIDA was ready to give final consideration to the application (i.e., passage of the actual bond sale resolution). On the basis of this opinion, the AIDA board decided initially to process applications without payment of this fee in cases where it appeared likely that the project would be proceeding promptly to sale, at which time AIDA would collect a financing fee under 3 AAC 99.140(b) against which the application fee would be credited anyway.

Accordingly, until December 1, 1980, AIDA did not require the payment of application fees at the time stand-alone applications were submitted. At that time the board decided to change this policy, so as to require partial payment ($500) of the fee at the time of submission in order to defray AIDA's out-of-pocket costs for the legal review and preparation of the initial "SOSOA" resolution for the applicant (the SOSOA action is the first official action taken by the AIDA board in the course of processing an application and is important primarily for determining when expenditures for a project may begin to be incurred that are permitted under the Internal Revenue Code and IRS regulations to be eventually financed on a non-interim basis with the proceeds of tax-exempt bonds). The remaining $2000 was to be paid when AIDA was ready to conduct the financial review of the application, which would generally be followed shortly by the passage of the bond sale resolution (assuming everything still looked all right with the application after the financial review had been completed). The effect of the policy adopted in December 1980 is that applicants paid only for the services they received from AIDA, while assuring at the same time that AIDA was more or less reimbursed for its actual expenses in reviewing and processing the applications. This reimbursement was, after all, the purpose in adopting this regulation; without some such fee arrangement AIDA would simply be "out the money" for its costs of reviewing and processing an application if the applicant later changed his mind or for other reasons the project failed to go successfully to a bond sale.

The foregoing explains the 12 instances in which the applicant paid no application fee and the 12 other ones where $500 was paid. This leaves the four occasions where a $100 fee was paid and the one case of $2100.

The first two of the $100 fee payments were for stand-alone projects whose SOSOA resolutions were approved on October 3, 1980. Note that this was before the board adopted the policy of requiring $500 at the time of submission, with payment of the balance to be made when AIDA is ready to begin its financial review of the project. Until that time no fees had been collected from earlier stand-alone applicants. The departure from the no-fee practice reflected the AIDA board's growing

uneasiness about the possibility of incurring significant costs in reviewing applications and then never actually being reimbursed for them if the projects did not proceed all the way to a bond sale. In a sense, then, these cases might be characterized as reflecting a transitional phase in the board's policy on the matter. However, I agree that a greater formality in modifying the policy or in adapting it on a case by case basis would have been preferable to what actually happened in these cases.

The other two instances where $100 fees were paid were projects whose SOSOA resolutions were approved in October 1981. On August 31, 1981, the AIDA board adopted emergency regulations repealing subsection (a) of 3 AAC 99.140, amending subsection (b) to provide for a financing fee of $10,000 payable at the time bonds are issued, and amending subsection (c) to require the applicant to pay "other costs and fees prescribed by law or agreement". See Register 79 of the Alaska Administrative Code, Appendix A (p. ER-3). By "agreement" these two applicants paid $100 to AIDA at the time they submitted their applications.

This leaves the unique instance in which only $2100 was collected. I admit that this case was irregular -- $2500 is what should have been paid. I am advised by Norm Levesque that AIDA encountered difficulty in collecting this particular fee from the applicant. Proper procedure should have been not to allow the project to come to the board for a bond sale resolution until the fee had been fully paid. This was not done, however, and on July 27, 1981, a bond sale resolution for the project was approved by the board. This did not result in a loss of revenue to the Authority, however, since the applicant paid a financing fee to AIDA pursuant to 3 AAC 140(b) when the bond sale closed. This financing fee was greater than the $2500 that should have been received as the application fee. Since the application fee under 3 AAC 140(a) is credited against the financing fee, AIDA ultimately received (at the bond closing) the full sum to which it was entitled as its fee for conducting the transaction.

5. "Title 3, Chapter 99, Section 230(b) of the Alaska Administrative Code requires Umbrella Bond applications to contain certain information, which can be waived. We reviewed 26 of 106 funded loan files and noted the following regulation exceptions:

    "a. 65% did not contain financial statements prepared by a Certified Public Accountant;

    "b. None contained soil tests;

    "c. 25% of the files to which the requirement applies did not contain signed loan agreements with the bank;

"d. 27% did not contain copies of lease agreements.

"e. 33% did not contain a loan summary.

"While AIDA has the authority to waive requirements, waivers should be documented, and should be the exception rather than the rule."

AIDA generally waives the requirement for a C.P.A.-prepared financial statement in the case of individuals, sole proprietorships and Subchapter S corporations when the application is supported by copies of the applicant's federal income tax returns. The purpose of the requirement for a financial statement is to disclose to AIDA the financial condition of the applicant. In the cases described, tax returns most often do describe that financial condition. AIDA believes it would be unreasonable to expect small businessmen to bear the expense of retaining a C.P.A. when comparable and reliable information can be provided to AIDA through the income tax returns. I agree with the point made in the Preliminary Audit Report that waivers of regulatory requirements should be the exception rather than the rule, and perhaps AIDA should therefore consider amending the regulation to reflect more accurately the present practice.

Soil tests are required only when the appraisal, cost estimate or other information indicates that there is or may be a soil problem. AIDA relies on the originating financial institution to disclose to us any soil problems and to protect the Authority against any losses. Again, perhaps AIDA should consider a clarifying amendment to the present regulation.

The regulation in question does not require the submission of a "signed loan agreement"; the most similar phrase in the regulation is "signed loan application". See 3 AAC 99.230(b)(3). One file does indeed contain a copy of a signed loan agreement between the bank and the borrower, but this would not have been because of any regulatory requirement. I would also add that each closed file does contain a copy of the loan participation certificate by the originating financial institution.

The Preliminary Audit Report refers to three instances in the audit sample in which there was no lease agreement. In two of these cases the files were for the purchase of equipment which the applicant was going to use himself, rather than lease it out. No lease agreement would exist in those cases, and so it is only natural that AIDA would not have a copy of one in the file. The third case involved the acquisition of retail space and office space, of which one-third was reserved for the applicant's own use. The financial strength of the applicant was such that no further income from the leasing of the other two-thirds of the project was needed in order for the project to be acceptable financially

to the Authority. However, this decision should have been noted in the loan committee approval sheet in the file, but was not. AIDA staff have been instructed to be careful that such decisions are noted in the file in the future.

The Preliminary Audit Report refers to five files in the audit sample that did not contain loan summaries. Two of these files did in fact contain loan summaries, which we will be willing to show to you if you wish to return to the AIDA offices to inspect them. The other three files were for applications originated by First National Bank of Alaska, whose practice is to include a loan summary as part of the narrative in their letters of transmittal. Again, you are welcome to inspect those letters at AIDA if you wish.

Recommendation No. 3. Members of AIDA's Board of Directors should comply with the provisions of the Alaska Statutes.

The violation referred to in this Recommendation is the first-class airline travel by members of the AIDA board for out-of-state travel. AS 39.20.140(b), which may under AS 39.20.180(1) apply to travel by AIDA board members, states:

> The Department of Administration may not reimburse an official or employee or pay for more than the lowest tourist class fare for the most direct route unless (1) tourist class accommodation is not available; (2) waiting for tourist class accommodation would occasion a delay harmful to the state; or (3) the Department of Administration finds that travel by tourist class accommodation is not in the best interest of the state, and authorizes other accommodation.

I am seeking the advice of the Attorney General's office about whether these provisions in fact apply to travel by AIDA board members, and if they do, whether and how reimbursement should be sought from the board members involved. Meanwhile, I have instructed the Executive Director not to allow AIDA to pay any first-class fares for AIDA board members unless one of the three statutory exceptions applies to the particular case.

The Preliminary Audit Report also criticizes AIDA staff for flying first-class on Outside travel as well, although it acknowledges that there is no statutory provision which prevents this practice. All, or very nearly all, of the out-of-state travel by AIDA employees has been to New York City. The mere act of flying in an airplane for nine or 10 hours is exhausting in itself; when this is compounded by the fact that the staff also suffer the effects of a five-hour time difference, they are simply in no good condition to start dealing right away with the enormously complicated financial matters that they are in New York for.

Our choices are either to let them work on multimillion-dollar arrangements under this disadvantage and simply hope they don't make mistakes that are too serious, or else do whatever is reasonable to mitigate the effects of the long trip east. I believe the public interest is better served by the latter course of action, which can then be achieved through either of two basic ways. One, we can let them fly to New York two or three days early, so they can recover from their flight and the jet lag. Or two, they can fly first class, which I have found from my limited personal experience to be considerably less exhausting. Given the cost of New York hotels (those convenient to Wall Street run over $100 a night), I believe the latter option is more advantageous in terms of cost, provided of course that there is no undue indulging in the complimentary drinks offered on most first-class flights. Flying first class also gives more physical room, which would facilitate doing work while en route. Under these conditions first-class travel to the East Coast should be appropriate, even for "state representatives" like AIDA employees.

Parenthetically, I might add that in my entire career with the State I have travelled first class at the public's expense only once, and that was from Anchorage to Washington, D.C. to testify about North Slope oil pricing and no space in tourist class was available that would get me there in time for the hearing.

Recommendation No. 4. Internal control over assets should be strengthened.

The Preliminary Audit Report offers several areas of criticism with regard to this point. I shall discuss them each in turn.

1. "AIDA employees are permitted to charge personal travel to AIDA accounts."

This refers to a unique instance in which a member of the family of an AIDA employee travelled to Hawaii on an airline ticket (tourist class) that was charged to AIDA. The employee entered into AIDA's files a copy of a personal check made out to AIDA for the $583.40 price of the ticket. However, an examination of AIDA's deposit slips disclosed no evidence that this check was ever in fact cashed. After this employee was confronted with these circumstances and afforded a reasonable time in which to provide AIDA with a copy of the cancelled check (which was not provided by the employee), the employee resigned. AIDA was reimbursed for the $583.40 at the time of resignation. This matter was referred to the Attorney General for any further legal action that might be appropriate.

The policy of AIDA is that all travel for purely personal reasons be paid by the employee and not charged to the Authority. If the

employee travels on AIDA business and takes a side trip to conduct personal business, the ticket may be charged to AIDA provided that the employee reimburses the Authority for the additional cost of his personal travel at or before the time the airline ticket is picked up.

2. "Employees receive salary advances with unlimited time for repayment."

I agree that the standard practice for other State officials and employees should be followed in AIDA -- namely, that standard salary advance agreements be obtained from employees requesting such advances, with repayment to be made in monthly installments over a period not to exceed six months. I shall recommend to the AIDA board at its next monthly meeting that it formally adopt this policy.

3. "[A]n undefined investment policy resulted in the investment of $3,900,000 of bond proceeds in low-yield securities instead of AIDA's customary investment in repurchase agreements. Lost interest income is estimated at more than $19,000."

This refers to the fact that the proceeds of 13 series of bonds from the first "umbrella" sale were invested in special State and Local Government Securities (SLGS) offered by the U.S. Treasury to tax-exempt bonding institutions that need investments of limited yield for bond proceeds in order not to violate the arbitrage regulations for those bonds (such a violation would render the bonds taxable instead of tax-exempt). AIDA relied on the advice of its financial advisor (Lehman Brothers Kuhn Loeb, Inc.), bond counsel (Wohlforth & Flint), lead underwriter (John Nuveen & Co., Inc.) and bond trustee (Seattle-First National Bank) about the proper and required subscription and purchase of these SLGS.

The maturity dates of the SLGS were to have coincided with the dates submitted by the financial institutions originating the loans as the estimated closing dates, except that AIDA understood that no maturity date for the SLGS could be before July 6, 1981. For the 13 loans of interest here, the estimated closing dates ranged from June 15 to September 15, 1981.

AIDA had agreed that, for loans for projects that had been completed, it would fund them before the estimated closing dates. Thus, actual funding dates ranged from April 6 to May 14, 1981. At the time AIDA could foresee no loss from the early funding since interest rates had been on the decline, as evidenced by seven successive reductions in the prime rate up until then from its all-time high in December 1980. Our expectation at the time was for further modest declines in interest rates or a levelling off. This proved to be mistaken.

AIDA was not familiar with all the technicalities in subscribing for SLGS, and hence, was unaware that closing date changes for the SLGS

could be made, or even cancelled, under certain conditions. Had we known this, we would have cancelled the subscription for SLGS for Series 16 ($200,000) of the first "umbrella" sale, and the SLGS subscriptions for Series 27, 35, 48 and possibly 11, 32 and 45 (totaling $1,380,000) might also have been cancelled. The remainder of the 13 loans were all funded after the SLGS subscription date.

Later, during the closing for the second "umbrella" bond sale, AIDA discovered that, subject to certain limitations, various changes and cancellations may be made after the SLGS subscription date; however, not even the Federal Reserve Bank responsible for processing our SLGS subscriptions could give AIDA a complete answer about the procedures for changing or cancelling those subscriptions. Before AIDA holds another "umbrella" bond sale, this issue will have been thoroughly researched, or an alternative to SLGS will have been found that satisfies the arbitrage requirements.

4. "We also noted inconsistent per diem payments to employees with six instances of overpayment and two of underpayment."

These inconsistencies arose during a period when AIDA did not have a copy of the State Administrative Manual. A copy was finally obtained by the Authority in December 1981. All per diem and expenses are now to be paid in accordance with the procedures and guidelines set forth in that manual, which should prevent any futher inconsistencies from occurring in the future.

5. "Long distance telephone bills of approximately $1,000 per month are paid without verifying whether calls represent authorized business activity by AIDA personnel."

This point is well taken, and I have requested the Executive Director to draft a statement to advise all AIDA employees about our policy about not making personal long-distance telephone calls. I will also recommend to the board that it consider having periodic reports about the results of internal policing efforts to ensure that this policy is complied with.

6. "Underwriters were paid $94,550 for out-of-pocket expenses without an accounting. This amount included $32,700 for travel and entertainment, and $4,250 for miscellaneous expenses. AIDA also paid its financial advisor $17,500 for travel and entertainment without requiring an itemized accounting of the dates, personnel, or activities which resulted in this expense."

The payment of $94,550 to the underwriters was part of the underwriters' discount in the sale of the bonds. This discount is not only to reimburse the underwriters' costs in preparing the bond issue for

sale and marketing it, it also provides them with their profit from the transaction. In a competitive bond sale, the underwriters' discount is an important part of their bid because, if two bids have the same interest rates but one has a smaller underwriters' discount, the one with the smaller discount is the better bid since the debt service is the same but the bond seller realizes more of the total bond proceeds and less of those proceeds goes to the underwriters. In the case of a negotiated sale such as AIDA's two "umbrella" sales, the underwriters' discount is part of the negotiated price for the bonds, together with the rate of interest to be paid. In order to protect an issuer from conceding too much for the underwriters' discount, the transaction is reviewed by the issuer's financial advisor as to the reasonableness of the discount and of the interest rates on the bonds. One must rely on the integrity and reputability of the financial advisor, as well as the advisor's expertise, in deciding whether to accept the underwriters' offer or not in a negotiated sale.

AIDA has requested and received from its financial advisor a detailed statement of the personnel, dates and activities involved with respect to the billing for $17,500. It will be our procedure in the future to request such an itemization for future billings from our financial advisor.

From the foregoing discussion of Recommendation No. 4, it is apparent that AIDA should strengthen its system of internal controls. Our staff are reviewing our present procedures with an eye toward doing exactly that. Some improvements have already been made, and I am confident that additional ones will be forthcoming shortly.

Recommendation No. 5. AIDA should adopt a loan assumption policy.

The concerns expressed on this point in the Preliminary Audit Report are well founded, and I am pleased to be able to state that the AIDA board at its last monthly meeting formally adopted and approved written guidelines about the assumption of AIDA-financed loans. A copy of those guidelines is attached.

Recommendation No. 6. AIDA should develop a Seller/Servicer Guide to assist lending institutions in complying with program requirements.

This Recommendation is well taken. A Seller/Servicer Guide is being developed. I shall be asking the Executive Director at our regular monthly board meetings for updates on the status of the guide until it is completed and ready for approval by the board.

Recommendation No. 7. Electronic recording devices should be visible and their use should be disclosed to affected persons at the time of such use.

The electronic recording devices referred to are sensitive microphones in the ceiling of the AIDA conference room and of the Executive Director's office, which are connected by hidden wiring to tape recorders. This equipment allows the proceedings of the AIDA board to be recorded and is considerably more convenient and safer than having microphones and wires running all around the room. Our regular monthly meetings are held in the conference room, while our weekly teleconference meetings are conducted through a speaker-phone in the Executive Director's office.

At the present time there is nothing visible in either room that would indicate whether the microphone and recording equipment are operating. I have asked the Executive Director to explore the possibility of installing something like a red signal light in each room that would automatically go on whenever the recording equipment is activated. This would prevent any inadvertant or intentional recording of private conversations in those rooms without the knowledge of the participants. Meanwhile, until such a signaling system can be installed, I have requested that the following written notice be placed at the doors of both rooms:

> NOTICE: THIS ROOM IS EQUIPPED WITH ELECTRONIC RECORDING EQUIPMENT WHOSE OPERATION CANNOT BE DETECTED BY PERSONS WITHIN THE ROOM. PLEASE CHECK TO BE SURE THIS EQUIPMENT IS OFF WHENEVER YOU USE THIS ROOM FOR WORK OR MEETINGS THAT ARE NOT REQUIRED BY LAW TO BE PUBLIC.

Let me assure you, however, that this written notice will not, in my opinion, be satisfactory as a permanent measure. If some automatic signalling system cannot be installed or can only be installed at unreasonable expense, then I will want to explore how best to replace the present recording system with one whose operation is more readily apparent to persons in the room.

Before I close, I would like to note for the record a number of the positive things about AIDA's operations to date, which lie outside the proper scope of comment for the write-up of a program audit and therefore could not be mentioned in the Preliminary Audit Report. First of all, setting up the "umbrella" program and getting it to run successfully was no mean accomplishment. Rather, it was the result of considerable hard work and dedication on the part of AIDA staff, bond counsel, financial advisor and the underwriters. As a result of their efforts some 184 projects totaling $53,265,000 have been funded at fixed, tax-exempt rates through the "umbrella" program as of December 31, 1981. Another $234,023,000 worth of projects were "in the mill" as of that

date. Moreover, this program has been able to continue to work smoothly and with minimal disruption of services to the public, even though a major ground rule was changed in mid-stream by the IRS. While certainly not without its problems, AIDA's "umbrella" program has been a remarkable success in the short time it has been in operation.

The accomplishments in the "umbrella" area have not meant that AIDA neglected its original program, the stand-alone bonds. During 1981 some $90,955,760 of stand-alone bonds were issued for 22 different projects.

Also during 1981, AIDA was charged by the Legislature with responsibility for implementing a loan program for small business working capital and inventory loans, under which AIDA was to purchase the federally guaranteed portion of the loans (usually guaranteed by the Small Business Administration). In the five months in 1981 after that legislation took effect, loans totaling $4,228,575 had been made under this program, of which the guaranteed portions purchased by AIDA came to $3,805,717. According to the applicants' own estimates, these loans accounted for some 32 jobs that would otherwise not exist. More than 30 percent of the number of loans were to borrowers seeking less than $100,000.

And, as one last toot on AIDA's horn, I would point out that AIDA has taken the precaution of developing a contingent, taxable-bond program that will be ready for quick implementation in the event Congress amends the federal tax laws so as to end or greatly curtail the tax-exempt status of industrial development bonds such as those which AIDA issues. In contrast to the situation that developed with Alaska Housing Finance Corporation in 1979 when Congress started changing the rules for tax-exempt housing financing, AIDA's program will not be dead in the water if adverse legislation is introduced or passed. The ability of AIDA to continue operations through the taxable bond market if necessary, albeit at higher interest rates for the borrower, will prevent the Legislature from coming into session in a crisis atmosphere, as was the case with AHFC.

Finally, and in closing, let me take this opportunity to congratulate you on the thoroughness of your audit. Despite the minor flaws which I have pointed out earlier, the Preliminary Audit Report has been of great usefulness, and I am sure that the Authority will be better off

as a consequence of it. Thank you for affording me this opportunity to respond and at such length.

Very truly yours,

Thomas K. Williams
Chairman, AIDA

H. A. Hoffman
Executive Director, AIDA

MEMORANDUM

TO: H.A. Hoffman
Executive Director

FROM: Wayne A. Williams
Deputy Director (Credit)

DATE: December 29, 1981

SUBJECT: Proposed Policy Guidelines

ASSUMPTION POLICY GUIDELINES - UMBRELLA LOANS

In considering an assumption policy on AIDA loans the Authority has three major concerns:

1) AIDA must not be used as a refinancing vehicle.
2) AIDA must not be involved in inventory type financing.
3) AIDA must retain its security position on all loans.

To satisfy these concerns, assumption requests will be considered on a case by case basis, conforming to the following guidelines:

1) The assumption will not effect the tax-exempt status of the bonds after specific inquiry to bond counsel.
2) The assumptor shall be an equal or stronger credit than the original AIDA borrower.
3) The party or entity assuming the mortgage, the assumptor, cannot have been a party or owner of interest in the seller of the property, if a sales transaction was involved in the original loan.
4) No assumption will be allowed during the first 25% of the term of the loan and in no event during the first two years, regardless of term.
5) The use of the property shall remain substantially the same after the assumption so as to retain the profitability of the property.

Amendment included in Mr. Coffman's motion to approve the policies appraised in these guidelines.

SUBORDINATION POLICY - APPROPRIATED LOANS

Loans within the appropriated loan portfolio may be subordinated to an AIDA loan provided the request involves the same financial institution and provided the total debt against the property meets all AIDA loan guidelines. Also, such subordinations will be approved only if the Financial Advisor and Bond Counsel have no objections.

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

HOUSE CONCURRENT RESOLUTION NO. 56

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

Relating to the policy of the legislature concerning telecommunications.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a significant [and increasing] amount of public money is being invested in telecommunications systems; and

WHEREAS the private sector that deals in Alaska telecommunications has faced increasing competition from government as a result of [increasing] state wealth and expenditures for telecommunications; and

WHEREAS the private sector is the foundation and vitality of the American economic system; and

[WHEREAS state government should encourage private enterprise and incentive; and]

WHEREAS the Alaska State Legislature has not adopted a policy regarding the burgeoning telecommunications system;

BE IT RESOLVED that the Alaska State Legislature shall consider the following guidelines when considering telecommunications [appropriations: legislation. issued]

(1) to the extent possible, the divisions of telecommunications should procure [cost effective services] from private enterprise or certified and franchised utilities and contract for the construction, management, operation, and maintenance of telecommunications systems;

(2) [to the extent possible,] the divisions of telecommunications should [reduce or] eliminate airwave interference of state-owned or financed stations with privately owned and operated cable television stations;

(3) unnecessary regulatory and government barriers which impede growth and development of [new and innovative] services by the private sector

should be removed;

(4) companies owned [and] operated by residents of Alaska and based in Alaska should be considered before companies from other states when telecommunications goods or services are needed from the private sector;

(5) Alaska's villages should have the opportunity to own, operate, and maintain their own satellite earth stations;

(6) in-state programming beneficial to both urban and rural residents should be cost effective and the production of these programs should be available to the private sector on a contract or bid basis; and be it

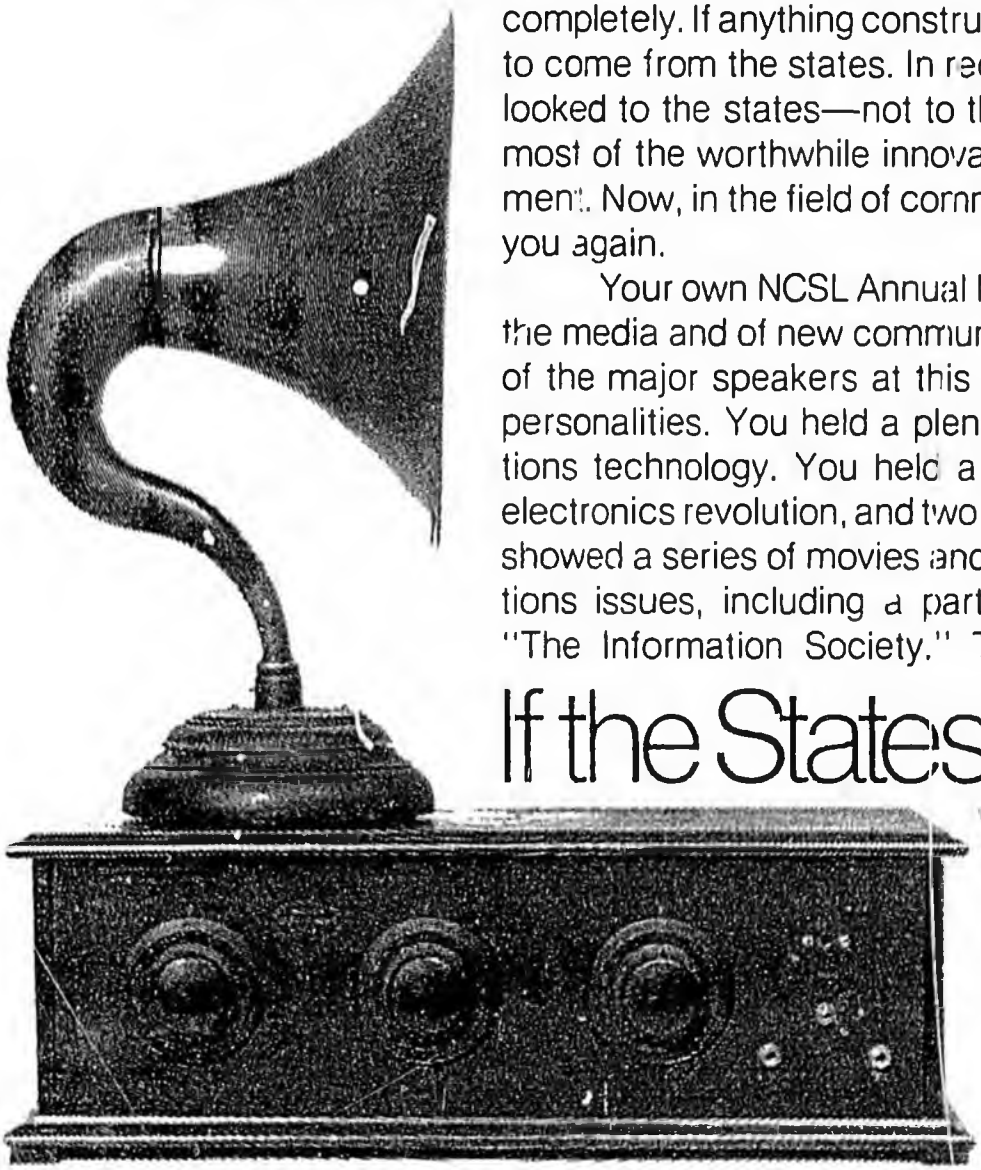
FURTHER RESOLVED that the legislature encourages commercial radio and television news coverage of the legislative sessions [by making equipment, space, and satellite time available to the private sector.]

A consumer advocate and former FCC commissioner argues that the federal government is turning its back on one of this decade's most fundamental issues. He says it's time for the states to respond.

Communications Policy:

I'm happy to see that state legislators are beginning to look carefully at the issues raised by communications technology and the mass media—because the job of dealing with those issues may be up to you.

The federal government appears ready to abdicate its responsibility for communications. Congress and the Federal Communications Commission are stumbling over each other to see which can deregulate most rapidly and most completely. If anything constructive is to happen, it will have to come from the states. In recent years, of course, we've looked to the states—not to the federal government—for most of the worthwhile innovations in politics and government. Now, in the field of communications, we must look to you again.



Your own NCSL Annual Meeting shows the impact of the media and of new communications technologies. Most of the major speakers at this year's meeting were media personalities. You held a plenary session on communications technology. You held a concurrent session on the electronics revolution, and two sessions on fiber optics. You showed a series of movies and videotapes on communications issues, including a particularly notable one called "The Information Society." The Legislative Information

If the States Don't Act, Who Will?

Nicholas Johnson

Needs Committee of your Assembly on the Legislature held a session on electronic media. Your computer applications staff section is addressing communications issues. The NCSL Denver office operates a computer-based Legislative Information System, which is being used more and more by legislatures across the country.

It's clear that state legislatures are starting to *use* new technology in their own operations. The next step, I think, is for legislatures to address some of the communications *policy* questions before this country. I realize that the states have not been called upon to address these issues in the past, but the times require that you address them now. We have already seen that communications technology has the power to reshape an entire culture—sometimes for the better, sometimes clearly for the worse. Surely *someone* has to confront the implications of that power. If that someone is not you, who will it be?

As you enter the world of communications policy, let me suggest a few basic points for your consideration.

The first may already be familiar to some of you, but it deserves emphasis here: We have become an information society. Over half of the gross national product in America is related to the information business; over half of the work force is employed in the information field. Information is what we do today, as a society and as an economy. It is the business of America. That fact has an impact on your job and how you do it; it has an impact on your children and their future; and, not least, it has an impact on your constituents—their lives, their work, their future.

The ways in which it has an impact are almost limitless, because every new technology has unintended consequences. When the automobile came along, Henry Ford didn't invent assembly-line processing in order to alter teenage courtship patterns in this country; that was a consequence of his innovation, but it wasn't the purpose of it. So it is with today's communications technology. Many of the people who produce and market this technology may simply be trying to make a buck—but in the process, they're causing a revolution as vast as those associated with the telephone and the automobile.

The point could be illustrated with any number of examples. Let us turn for a moment to the most obvious and significant one: broadcast television.

Television has taken over. It has become *what we do* as a people. Americans are watching television for an average of 30 hours a week per person—which means, of course, that many people are watching even more. That 30 hours is almost the equivalent of a full-time job; and the number of people who watch television—the number of people whose viewing habits are reflected in that average—is three times the national workforce. We work, we sleep, we eat—and we watch television. That is what we do as a human species, and that has obviously had an impact on us.

As technology develops, the impact will multiply. We have already seen the impact of television on the family. We will see the impact of new technology on education. We will see that it can be an alternative to transportation. (While in Atlanta to attend the NCSL Annual Meeting, I participated in more than 20 other conferences around the United States, via computer terminal—and you could do the same. At the same meeting, we saw a satellite demonstration that linked Atlanta with Alaska. And with the coming of holography, you can bring a three-dimensional image to the stage at your meeting—a speaker who can turn around and walk across your stage, but who will actually be in Los Angeles, Washington, Iowa, or any other point in the country.)

The potential of communications technology as an alternative to transportation means that it will also have—and is already having—an impact on work. More and more of the work done in an information society could as well be done out of the home. Why does a business person have to get into a $400 suit, climb into a $12,000 car and drive down a $10 million highway to go up in a $35 million office building to sit on the top floor and . . . answer the phone? Or do dictation? Or stand around and watch the computer? We can do all of those things at home. These facts are true for an ever-increasing number of American workers. The implications are not uniformly benign (a lot of people don't *want* their spouses at home all day long), but the facts are inescapable.

There are other kinds of impact: on medicine, on business, on farming—and on politics and governing.

Representative democracy is no longer technologically necessary. In the past, one primary reason for representation was the simple fact that not everyone could get on his horse and go down the muddy road to the state capitol. Today, of course, that consideration no longer applies. We still have a representative system of government; we still live in a world where most citizens do not choose to spend the time that elected officials spend on politics or on the in-

tricacies of complex political issues. But they could do it, and could make their votes heard—by radio, closed-circuit television, or computer teleconferencing. We *could* have direct democracy. That fact alters the way in which you approach your jobs.

As citizens begin to use more information, more often, one of the major problems we begin to confront is the gap between the information-rich and the information-poor. It used to be that the public library made available to everyone in our society, equally and at no charge, the informational riches of the kings. The library is still there, but it has been joined by a host of other information resources—not all of which are so readily available.

Not long ago I sat in front of a computer terminal called Lexis, which provides access to a body of legal material. It costs $125 an hour to use. How is a poor person going to get access to information like that? Will it be made available at the library? For free? If not, who will pay for it?

If no one is going to pay for it, and if the poor person can't get access to it, then you will have a widening gap between those who have information, which means power, and those who do not have information—or power.

One other issue must be mentioned, because it may be the single most pressing issue in communications today: the takeover of the democratic process by those who own and operate the means of distribution.

"Means of distribution" refers not just to over-the-air broadcasting, but also to cable television and satellites. The same thing is happening in each case, and it has an adverse impact on everyone: the poor, the working class, the consumers for whom I speak—and even the largest corporations in this country. We're talking about a situation where Mobil Oil can't buy time on NBC. We're talking about a situation where MCA, which owns Universal, can't buy space on a satellite.

Information is what we do today, as a society and as an economy. It is the business of America.

The current Administration talks about "unleashing the marketplace." Let me illustrate for you what the communications "marketplace" can look like. In Iowa City, Iowa, I sit on the Broadband and Telecommunications Commission. There are people in that city who would like to get Ted Turner's Cable News Network. It costs 15 cents a month. They're more than willing to pay 15 cents a month, so you've got a willing buyer and a willing seller. Under the free enterprise system, we ought to be able to pay 15 cents and get the Cable News service, right?

Wrong. The people running that cable system in Iowa City don't want to offer Cable News Network. And the cable system is controlled by a company in Denver, which in turn is controlled by a company in New York, and all of them have decided that Cable News Network will not be on that system. For the Cable News Network, there is no marketplace in Iowa City.

Somebody has to address this kind of problem, and it has to be the states—because nobody in Washington is doing anything about it. It's the communications issue of the hour: Will the people of this country—big business, small business, citizens, all of us—have *access* to these over-the-air stations, these cable systems, these satellites? Those who own the means of distribution say, in effect, "No, you won't have access. The power belongs to us. If you want to ship out your message by satellite, go buy your own rocket and launch your own satellite. If you want to broadcast a message over the air, go buy your own $50 million television station."

I say that's unacceptable. It may be permitted under a narrow and obsolete interpretation of the First Amendment, but it is totally at odds with the principles underlying the First Amendment. And I think our understanding of the First Amendment has to be modified and updated to suit this age of giantism in communications distribution networks.

In this case, as in many others, communications technology poses some of the sharpest questions before our country today. I hope that the states will be full partners in the search for answers.

***Nicholas Johnson**, an attorney who served as an FCC commissioner from 1966 to 1973, is chairman of the National Citizens Communications Lobby. TELELINK
COMMUNICATIONS INC.

INFOCOM DIVISION

February 3, 1982

The Hon. Terry Martin
Chairman
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Mr. Chairman:

My name is Allen Blume, and I represent TELELINK Communications Inc., a new, Alaska-based firm that specializes in teleconference service delivery and general telecommunications consulting. The principals in TELELINK have better than twenty years experience in technical, economic, regulatory and user applications of telecommunications.

We strongly support the provisions of HCR56, especially sections (1), (3), (4) and the legislative coverage provision. Our testimony today will focus on these points, and what we feel are competitive trade barriers that we have met in attempting to do business with the state.

Item 1: The state should secure services from private enterprise or certified and franchised utilities and contract for system operations.

We agree. In the six months that TELELINK has been operational, we have contacted at least eighty of the divisions, sections, boards and commissions of the state to offer demonstrations of our Conference Message Exchange (CMX) teleconference service.

Our service provides:

- Moderated teleconferences
- On-line user training
- Optional automated teleconferencing
- Direct-dial access from any standard telephone
- Digital facsimile, computer text and slow-scan television interconnects
- Complete interconnectability with the Legislative Teleconference Network and Learn/Alaska.

By providing working demonstrations and free half-hour blocks of time to potential users we thought to encourage examination of our product, and stimulate innovation in problem solving by the agencies.

Mr. Chairman, it is no secret that the cost of state government has gone off the map, because of increased demand for services by the public. It is also no secret that one of the greatest single costs of government, in a state as large as Alaska, is travel in support of government operations.

This year the Governor and the Alaska Legislature have made public pronouncements about their intent to "hold the line" or "cut" this runaway spending. Yet, in none of these statements is there an offer or demand to look for efficiencies that will avoid impairing the necessary delivery of programs.

It is small businesses such as TELELINK, the growing mini-computer industry and other direct providers of telecommunications goods and services that will make the budget cuts feasible, without damaging essential programs.

Sec. 1 of HCR56 is a vital first step, but it must be carried out with enthusiasm and commitment. Agencies of the executive, legislative and judicial branch should be encouraged to use contemporary communications technology and providers to evaluate their existing medium with an eye towards improvement; and where they insist on traditionally inefficient techniques - be appropriately penalized.

In this same light, and although the measure is not before this committee today, we support HB 506 appropriating $40 million to a telecommunications revolving loan fund, with some changes.

Item 3: Regulatory and government barriers should be removed.

We agree. Yesterday we requested of the Director of Legislative Affairs Agency a memoranda outlining the applicability of provisions of Executive Order 50 realigning state telecommunications services, to the operations of the Legislative Teleconference Network.

While we recognize that the legislature is an entity unto itself for certain purposes, it seems inconsistent that some levels of government would be bound by standards of fairness and economic equity, while others are not.

We would hope that the provisions of Sec. 3 would be equally applied to all branches of government.

Item 4: Alaskan firms should receive first consideration.

Again, we agree. We would not rule out use of other qualified firms, but obviously it is in the state's economic and social interest to promote local enterprise.

Legislative Coverage: In this we also concur, but would suggest that this scope of activity be broadened to encourage other technologies to enhance the operations of legislative reporting services; individual newspapers and other related community information programs.

Sincerely,

Allen D. Blume
Marketing Associate

TELELINK
COMMUNICATIONS INC.

CONFERENCE MESSAGE EXCHANGE (CMX)

TELELINK's new CMX service is an innovative approach to providing business and government with a cost-effective alternative to escalating travel expenses and lost executive productivity. CMX is a teleconferencing system reached by dialing from any standard telephone set, and, does not require the use of operator handled calling, eliminating special charges and delays. Besides helping managers to save on tight travel budgets, CMX may actually increase office productivity because of it's time saving nature.

TELELINK's CMX services are tailored to assist both large and small organizations in an easy to use, affordable manner. Our on-line telemoderator assists the customer in teleconference set-up, monitors line quality, and assures a successful conference. With TELELINK's CMX service, access to a world of new and timely methods for conducting business are as close as your telephone.

SERVICES

CONFER-CALL -- CONFER-CALL is used for general teleconferencing. It is oriented towards staff, board, committee, sales, or field office meetings needing fast, economical connections from multiple locations. CONFER-CALL is also ideally suited for special applications such as; new product promotions, political caucuses, workshops, seminars, and training sessions.

AUTO-CALL -- AUTO-CALL provides CMX users with cost saving teleconferencing during off peak hours. AUTO-CALL is for CMX users who do not require a telemoderator. Associations, professional groups or others not needing teleconferencing during the normal working day can use the fully automated CMX AUTO-CALL service.

DATA-CALL -- DATA-CALL is used to enhance an audio teleconference with computer graphics, visual materials and is especially use ful for conference notes, agendas, and records. Customers use their own data terminals, word processors or facsimile machines. DATA-CALL can be used in conjunction with other CMX services providing the hard copy needed during meetings.

RATES

CONFER-CALL -- $.380 per minute, per location with 1/2 hour minimum. Reservations are required at least 72 hours in advance. A $50 fee will be charged for cancellations within 24 hours of scheduled times.

AUTO—CALL -- $.275 per minute/per location with a maximum of 16 participants. AUTO-CALL is available from 8:00 pm PST until 6:00 am PST. Reservations are required.

DATA—CALL -- Prices for DATA-CALL are quoted separately and may vary according to the type of data equipment used.

OTEER CMX SERVICES AND RATES

RECORDING AND CONFERENCE TRANSCRIPTION -- TELELINK will provide users of CMX services with a master cassette tape or type transcriptions of teleconferences. $12 per cassette or $10 per transcribed page.

CALL—OUT CONFERENCE REMINDERS -- Teleconference reminders or conferee additions can be handled by our CALL-OUT service. $2 per call and any long distance charges.

CUSTOM TELECONFERENCE INSTALLATIONS -- TELELINK will install customized, in-house teleconference equipment selected from several types of equipment and systems. Lease or purchase options are available.

TELEPHONE COMPANY CHARGES -- TELELINK is not responsible for telephone company local or long distance charges. TELELINK has made every possible effort to configure it's CMX service so that customers telephone calling charges are minimized. On request, TELELINK will make arrangements for customers with special billing requirements.

JUNEAU EMP

"The Voice of Alaska's Capital City"

75 NO. 246 JUNEAU, ALASKA, THURSDAY, DECEMBER 17, 1981

Firm sets up phone conferences

By Empire Staff

Stuart Browne and Allen Blume say they are selling a "mechanism of efficiency" in the form of a new, direct-dial teleconferencing service for Alaska and the Pacific Northwest.

The Conference Message Exchange provided by Telelink "is specifically designed for busy executives, agency directors or citizen participants who find themselves on the road to meetings and conferences, when they need to stay at their desk doing work," Browne said.

Telelink provides a teleconferencing bridge capable of linking up to 13 separate locations into a common conversation by simply placing a direct-dial long distance or local call, said Blume. When the system is fully operational, it will have the capability to tie in 23 locations at once.

No special equipment, just a telephone is required, to be connected into the system for a teleconference call. It can work "any place in the world there's a telephone," said Blume.

The service is "not absolutely replacing travel. ... You still need eyeball-to-eyeball contact," said Blume. Use of the system, however, can greatly reduce travel time, expenses and intangibles such as employee fatigue, said Blume.

The system works much like the Legislature's teleconference system, but it does not require individual teleconference locations — just a telephone

Estimates of a teleconference cost per-port, per-hour is generally between $60 and $75 based on the long-distance tolls for the points connected. Thus, a teleconference including Anchorage, Fairbanks, Kodiak, Bethel, Kotzebue, Barrow and Juneau would cost roughly $310 in long-distance tolls, plus $150.60 for Telelink's service, said Blume.

Contrast that with travel expenses that include round-trip airfare, ground transportation, hotel accomodations, meals, entertainment and factors such as lost performance in the office, missed travel connections and last minute changes in meeting locations or agendas, says Blume.

Telelink's office in the Assembly Building acts as a nerve center for the teleconferencing.

Participants call Telelink and then carry the long-distance charges themselves, said Blume.

There are limitations to the use of the teleconference system, Blume added. Those include the loss of visual cues, the need for agendas to be prepared and circulated in advance, and a need for the person presiding over the meeting to be sensitive to the participants. Blume and Browne advise that one-way presentations not exceed five minutes without some inquiry for questions and comments.

Demonstrations to state agencies and private business have been met with a "very enthusiastic response," said Blume. "We're looking at shrinking the distance in Alaska through this kind of medium."

Browne, who is president of Telelink, is a former telecommunications planner with the Department of Transportation and Public Facilities. Blume is a former legislative employee.

Alaska gets teleconference service

Direct-dial teleconferencing service for Alaska and the Pacific Northwest has been inaugurated by Telelink Communications Inc. of Juneau.

Stuart Browne, president, said the new Conference Message Exchange (CMX) service is designed for executives, agency directors or citizens who find themselves on the road to meetings and conferences "when they need to stay at their desk doing work."

The service, he said, is capable of linking 25 separate locations to a common meeting point by placing a direct-dial long distance or local call.

"In normal use, we can offer four separate and simultaneous conferences using either voice or data as the communications medium," Brown said. "The equipment automatically compensates for low signal levels, and gives the impression that teleconferees are not hundreds of miles away but in the next room."

The firm said the service has been demonstrated to a variety of state and private sector users with favorable reactions.

"A lot of people tend to see teleconferencing as a threatening, complicated process, when it is not," Brown said.

He describes the CMX as an extension of the telephone "a most essential tool in the office.

"Instead of placing one call at a time, we offer the opportunity for you to talk to many people simultaneously, saving time, confusion and money."

Browne said the firm will continue to offer free half-hour working demonstrations of the service. He said requests should be directed to him or Allen Blume of the firm.

Teleconference gets messages out quickly

by Martin Merzer
Knight-Ridder Newspapers

How can you reach a lot of people, in many cities, all at the same time and in a memorable manner?

By satellite, that's how.

The same technology that has made it possible to laugh with the Chicago Cubs and cry over the New York Mets in the privacy of your own home now offers public relations and marketing types a new vehicle for reaching thousands of people simultaneously in scores of cities.

Called "teleconferences," these closed-circuit, satellite-beamed affairs are being used by companies of all descriptions to transmit their sales-motivational sessions and promotional messages.

The programs can originate in virtually any city. Then, they are bounced off satellites (the same satellites that transmit programming to cable-TV companies) and are received in any other large or medium-sized city in the United States.

"This is the coming thing," says Steve Sinsheimer, satellite network coordinator for Jim Sant'Andrea Inc. of New York City. "It's growing and growing every day."

Sinsheimer's company, one of several that now specialize in producing these affairs, last fall handled a 59-city extravaganza for Norwegian Caribbean Lines.

The company was interested in promoting its 1982 cruise schedule and marketing programs, and more than 6,000 travel agents throughout the United States were exposed to that information simultaneously and in high style, according to Fran Sevcik, an NCL spokeswoman.

"Traditionally, a lot of cruise lines, including NCL, have done road shows, but to hit so many places would have taken months," she says. "This way, we not only were able to broadcast the information, but we also had a phone-in system so we could get questions and other feedback."

A similar two-way system was used by the Ford Motor Co. to link up 102 cities for a press conference that promoted the company's 1982 automobiles. An estimated 700 reporters attended the sessions, which were broadcast over a hook-up operated by Hi-Net Communications, a division of Holiday Inns Inc.

"This is a new technology, a new way of doing business," says Mike Davis, a Ford spokesman. "It costs a good bit of money, but we get to a lot of people."

Sinsheimer says costs vary, depending on the scope and nature of the program, but a simple show, beamed to 20 cities, can be bought for about $100,000.

In fact, he says, almost any company can afford it.

BY THE LABOR AND COMMERCE COMMITTEE

HOUSE CONCURRENT RESOLUTION NO. 56

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

Relating to the policy of the legislature concerning telecommunications.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a significant and increasing amount of public money is beirg invested in telecommunications systems; and

WHEREAS the private sector that deals in Alaska telecommunications has faced increasing competition from government as a result of increasing state wealth and expenditures for telecommunications; and

WHEREAS the private sector is the foundation and vitality of the American economic system; and

WHEREAS state government should encourage private enterprise and incentive; and

deleted

WHEREAS the Alaska State Legislature has not adopted a policy regarding the burgeoning telecommunications system;

BE IT RESOLVED that the Alaska State Legislature shall consider the following guidelines when considering telecommunications ~~appropriations~~ legislation:

(1) to the extent possible, the divisions of telecommunications should procure ~~services~~ from private enterprise or certified and franchised utilities and contract for the construction, management, operation, and maintenance of telecommunications systems; cost effective

(2) ~~to the extent possible~~, the divisions of telecommunications should ~~reduce or~~ eliminate airwave interference of state-owned or financed stations with privately owned and operated cable television stations;

(3) unnecessary regulatory and government barriers which impede growth and development of new and innovative services by the private sector

should be removed;

(4) companies owned ~~and~~ or operated by residents of Alaska and based in Alaska should be considered before companies from other states when telecommunications goods or services are needed from the private sector;

(5) Alaska's villages should have the opportunity to own, operate, and maintain their own satellite earth stations or contract with private sector for operation & maintenance;

(6) in-state programming beneficial to both urban and rural residents should be cost effective and the production of these programs should be available to the private sector on a contract or bid basis; and be it

FURTHER RESOLVED that the legislature encourages commercial radio and television news coverage of the legislative sessions, ~~by making equipment, space, and satellite time available to the private sector.~~

February 2, 1982

Representative Terry Martin
Pouch V
Juneau, AK 99811

Dear Representative Martin:

Please consider giving your support to the Alaska Public Broadcasting Commission's Capital Improvements Budget Request for fiscal year 1983. The amount of this request is $2, 29,500.00. It will fund improvements at existing public radio and television stations all over the state.

KSKA is, as I hope you know, Public Radio in Anchorage. Our portion of this budget request amounts to $108,000.00. We will use this money for the following things:

1. "Translators" for Bird, Indian, Willow, Wasilla, and Talkeetna. A combination of geography and radio technology now makes it impossible for these communities to hear KSKA. We have had numerous requests for service from residents of these communities. These translators will bring our signal to them.

2. A new production studio - we have in the last year made a major effort to increase public involvement in the sound of KSKA. We now have approximately 75 individuals producing our programming as unpaid volunteers. About 37% of KSKA's air time is filled with programming produced by Anchorage citizens. Most of these volunteers pre-tape their shows prior to broadcast. This is done in our existing production studio. This facility is presently being used almost constantly from 8:00 [illegible] to 11:00 P.M., seven days a week. We need an additional production studio to allow even more Anchorage residents to produce public radio at KSKA.

3. A remote broadcast kit - this will allow us to broadcast live entertainment and public affairs events in the Anchorage area. This is part of an attempt on our part to become more responsive to the community we serve.

I think it is also important for me to point out that we are not just seeking our funding from government sources. Below is this years revenue mix for KSKA:

APBC	185,300	44%
CPB (FED)	55,000	13%
PRIVATE SOURCES	182,000	43%

Grant Hall, A.P.U., Anchorage, Alaska 99504 Telephone (907) 276-3000
Aurora Community Broadcasting, Inc., a non-profit corporation funded in part by the Alaska Public Broadcasting Commission

In addition, we are attempting to raise from private sources $100,000.00 this year to purchase a new transmitter. As you may know, one of KSKA's biggest problems has been a weak signal. We expect very soon to receive approval from the F.C.C. to greatly increase our signal strength. As I said, we hope to accomplish this without seeking funds from the state.

I have enclosed copies of our program guide, and our portion of the APBC Budget Request. If I can help you in any way, please call KSKA at 276-3000. Also, Charlie Northrip, Executive Director of APBC, will be happy to provide any additional information you need.

Thank you for your attention. I hope you can help us in some way.

Sincerely,

M. MENSE

Mike Mense,
President
Aurora Community Broadcasters, KSKA

PROJECT DESCRIPTION

This project will create a second production control room at KSKA, which will result in increased local program production.

It will also provide improvements in equipment in already existing production facilities at the station, thereby increasing the capabilities of those facilities as well.

A separate and unique portion of the project will purchase equipment that will provide a radio reading service for the blind. This special program service will be broadcast as a part of the station's main signal but will only be capable of reception by special receivers.

The largest single portion of the project will allow the purchase and installation of translators to make the KSKA signal available to the following areas: Bird; Indian; Willow; Wasilla; and Talkeetna.

The project will also provide funds for the purchase of a remote production kit, for use by all public stations in the State.

Project Justification

DISCUSSION OF THE NEED FOR THE PROJECT

KSKA's current on-air and production facilities require the replacement of turntable preamps, audio tape recorder heads and other items in order to maintain a level of technical quality expected of FM broadcasting. In addition, the station's major commitment to news and public affairs requires the purchase of additional equipment to be used in electronic news gathering.

KSKA, existing as it does in the State's largest population area, deals with large numbers of volunteers who participate in the production of KSKA programs. That large volume now requires a second production facility in order to utilize all of the talent available.

Similarily, because of its location in a large population area, a significant number of blind citizens are within KSKA's listening area. The subcarrier generator proposed by KSKA to provide a reading service for the blind will provide the only such service in the entire state.

As stated in forms 31 and 32, the APBC's philosophy is to use translators wherever possible to extend the reach of public broadcasting. KSKA proposed to extend its service to the communities of Bird, Indian, Willow, Wasilla and Talkeetna. Without the translators, those communities would not receive an acceptable public broadcast signal.

The remote production kit will be held by KSKA (due to its central location) and provided to any public station requesting its use for the production of remote programs that could be provided, via the Public Radio Network, to all other stations.

Total Annual Expenditure (Capital Cost)	108.8	108.8	0	0	0	0	0

Project Justification

With all stations interconnected by a high fidelity stereo satellite system, concerts, cultural events, and dramatic presentations could be taped or broadcast live from one location to all others in the State.

DOCUMENTATION OF ESTIMATED CAPITAL COST

The estimated costs for this project are based on list prices.

ANALYSIS OF OPERATIONAL EXPENSE

The $10,000 estimated is to cover the cost of routine maintenance on the translator facilities. It is anticipated that KSKA would contract this maintenance to individuals in the vicinity of each translator at a cost not to exceed $2,000 per year.

IDENTIFICATION OF ALTERNATIVES CONSIDERED

Alternatives for additional production facilities and for the reader service for the blind would call for separate stations to serve the blind population and to create additional programs. That alternative is obviously far more expensive than the one selected. Similarily, separate independant stations could provide public broadcast programming to the communities proposed for signal translators. Again, the cost for separate independent stations is far greater than the cost of translating the KSKA signal.

Telephone (907) 747-5220

January 22, 1982

Representative Terry Martin, Chairman
House Labor and Commerce Committee
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Representative Martin:

I have been provided a copy of your December 14, 1981 memorandum to Bill Barrier of Legal Services ". . . requesting a draft of a House Consurrent Resolution spelling out the committee's policy on statewide telecommunications." I recognize this was written as a draft and that legislation might differ significantly in its final form.

In addition to teaching television, managaing a TV translator station and having a pending application for another license, I am a subscriber to a quality TV cable service. We have good service in Sitka and we appreciate it. Howe. r, I believe there must be a balance maintained between commercial and state-supported telecommunications systems. As I read the memo, it truly reflects the interest of the commercial enterprises rathern than the bests interest of the general public.

I have some reservations about many of the individual suggestions in the memo. However, I would like to address two that appear to violate the best interests of Alaskans - especially those in rural Alaska.

First, the reduction of airwave interference baetween state-owned and private facilities appears on the surface to be a good suggestion. However, we must consider what has prompted this suggestion. Licensed stations have priority and legal rights to specified channels in a community. Cable channels are flexible and can be switched as they wish. However, when all channels are used (as most are now with most cable companies), then a scrambling for space on the dial results. The request of the cable companies to put translator and low power stations on UHF is telling the educational/instructional staitions they are really step childs. People just won't search on the UHF dial (channels 14-83) which would render their outstanding services useless.

Sure, there should be less interference (normally caused by cable stations transmitting on the same channel as the over-the-air broadcasts. However this problem could be resolved by having cable companies expand their channels as is being done in many "down south" communities.

Secondly, smaller stations should have the right to carry commercials. To have to delete all the pre-recorded commercials from programs originating elsewhere would be totally impractical and is not required by their licenses. Also, the new TV licenses being received by the Learn/Alaska network are for Low Power which allows stations to originate local programming including commercials. Although we don't plan to originate commercials on our two low power stations in Sitka, it would be unwise to impose "artifical regulatory and government barriers" on local incentive. Commercials, in addition to generating some local funds to operate these small stations, can be beneficial to viewers wanting or needing this information.

To ban all commercial advertisements on state-funded facilities is impractical and unwise. To do so will either prompt violations or they will be called by another name such as "corporate underwriting."

Thanks for listening. I would be most pleased to provide additional information if you need it.

With best regards,

Dan Etulain Ph.D.
Director of Telecommunications

DRE/d

Commission

MEMORANDUM State of Alaska

TO: Members of the Alaska Legislature
State of Alaska

DATE: February 3, 1982

FILE NO:

TELEPHONE NO: 465-2846

FROM: Charles M. Northrip
Executive Director
Alaska Public Broadcasting Commission
Department of Administration

SUBJECT: NFCB Newsletter Supplement

The National Federation of Community Broadcasters recently published a special supplement dealing with Alaska public stations. Enclosed with thi memo are copies of "Community Radio In Alaska" for your information. The supplement provides an excellent summary of the services public radio stations provide to their communities.

Some portions of the supplement refer to the Alaska Public Broadcasting Commission's long-range plan for Public Broadcasting in the State. The first edition of that plan has now been approved by the Commission and is being printed. As soon as they are available, copies of that document will be made available to you, as well.

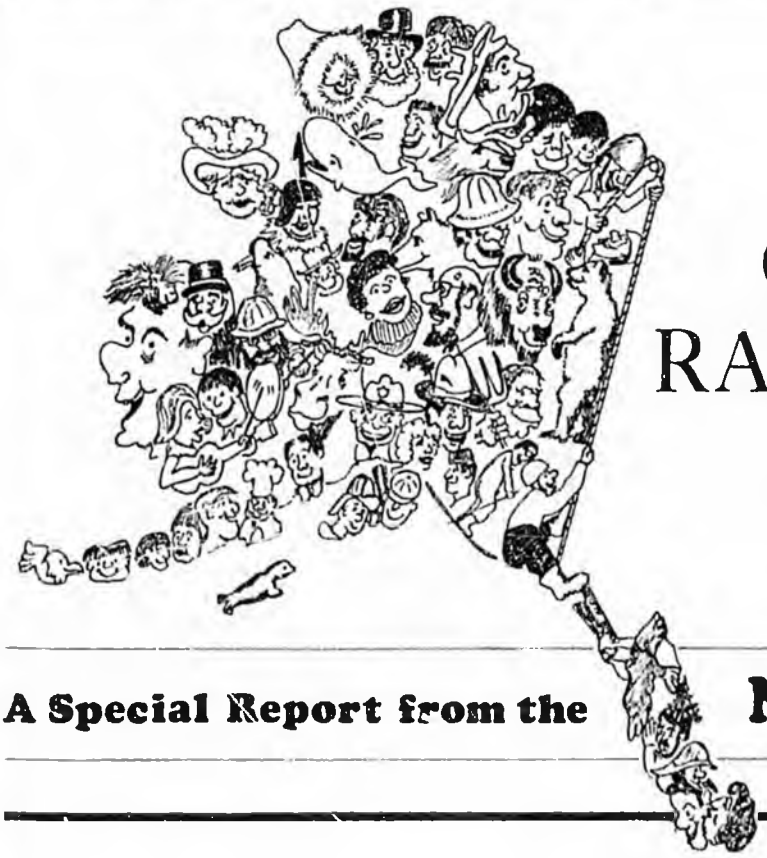
Speaking of our commission



COMMUNITY RADIO IN ALASKA

A Special Report from the NFCB NEWSLETTER

In Alaska, there are radio stations found where roads do not go, and where airplanes deliver groceries. They provide the listeners with the only mass media available, and are often called upon to provide more than traditional radio services. They are called bush stations.

BUSH RADIO

BY LES ROBINSON
Manager, KDLG, Dillingham

Each day, KDLG's powerful AM transmitter beams its signal over the mountains to dozens of remote villages, and across Alaska's Bristol Bay and the Bering Sea to small islands and lonely ships. Thousands of radios are tuned to the only signal coming from and reaching into this isolated part of the world. The station's studios are located inside the high school building, on one of the unnamed dirt streets, in the tiny village of Dillingham. The rest of the station — its listeners — is found scattered over an area larger than Ohio.

Molly works for the Fish and Game office in Dillingham but spends her lunch hours at KDLG translating news, social events, and flying doctor announcements into the language of the Eskimo. Although many speak English, Yupik Eskimo is the first language for most.

From Dillingham, it is a fifty-minute airplane ride to the village of Togiak. Twilly is on the high school wrestling team there. His school sent him off to study KDLG for a week. By Friday, he was an old hand at broadcasting the news. Whenever Togiak wrestles in Dillingham, Twilly takes a break between matches and sends the scores home via the radio station.

The village of Manokotak has given Mr. Arkanakyak the responsibility of gathering from each resident the date upon which they were born. He then arranges the names according to dates, and delivers the list to the radio station. He does this each month, to ensure that no villager's name is omitted from the *Birthday Show*.

There is only one teacher at the Aleknagik schoolhouse. Both he and his students monitor the radio each day at recess time. If the announcer reports a temperature colder than forty-four below, the disappointed youngsters must spend their play time inside.

Virginia works at the hardware store. Each summer she complains that there are no more batteries for sale. The fishing people buy them all up. Thousands of commercial fishing vessels aim their antennae at the Dillingham station to hear State of Alaska fishing announcements, and the all-important marine weather forecasts. One woman wrote that after three months on the water, she would have gone "bananas" without the radio.

K.C. spends her day answering the KDLG telephone.

Continued on next page

Continued from preceding page

She takes hundreds of messages and announcements which arrive from crackling radio telephones found in some spots, and from pilots who hand carry notes from village to village. When the weather is bad the radio is called upon to deliver the mail. "To Bill in Koliganek: From Martha at Kanakanak Hospital . . . You are a daddy, we had a baby girl this morning. We are both fine. Love and miss you," is typical.

As the only station, people depend on radio as their primary source of news. National Public Radio programs bring the outside world closer. Alaska Public Radio Network programs help tie the listeners to other parts of the state. Local news is gathered by telephone, mail, snow machine, the news director's airplane, bush pilots, and occasionally by sled dog.

Danial is the election supervisor in a village one hundred and fifty miles from KDLG. One day in the fall he appeared at the station to announce that Jimmy Carter had carried his town by two votes. Unconcerned that election day was not until tomorrow, Danial explained that the citizens were worried the results would not reach the radio station in time to be reported on election day. Everyone had agreed to vote a day early.

People use the bush stations as their newspaper, telephone, mail service, jukebox and bulletin board. The radio is no good unless people can use it. The work of the bush station is to make that easy.

HISTORY OF PUBLIC RADIO IN ALASKA

BY CHARLES M. NORTHRIP *Executive Director, Alaska Public Broadcasting Commission*

While noncommercial broadcasting in the United States can trace its origins to the earliest turn-of-the-century experimentation in radio, public broadcasting in Alaska is a fairly new development. Several commercial broadcasting pioneers operated stations in Alaska's territorial days, but the first public station did not begin service until three years after statehood.

THE BIRTH OF ALASKA PUBLIC BROADCASTING

KUAC, an FM station licensed to the University of Alaska in Fairbanks, signed on in September, 1962. The station began as a joint effort of the University's Departments of Speech and Drama and Electrical Engineering. It was among the first 65 stations in the US to qualify to receive support from the new Corporation for Public Broadcasting in 1969. It was also a charter member of National Public Radio.

Interest in public broadcasting on a statewide level was sparked in 1962 by the passage of the first federal assistance program for public television: the Educational Television Facilities Act. While this funding was not pursued, during the ensuing years several proposals to create an Alaska Educational Broadcasting Commission were presented to the state legislature.

After the proposed legislation failed in 1967 and 1968, the governor appointed an educational broadcasting committee instead, with Charles M. Northrip of KUAC-FM as its first Executive Director. Short-term funding for the committee's work was provided by the Department of Education and by the Rockefeller Foundation, and free office space offered by the University of Alaska in Fairbanks.

In 1969, the possibilities of satellite distribution of educational material provided a higher level of visibility for the committee's work, and legislation virtually identical to that which failed in 1967 and 1968 passed the state legislature in 1970. Funding for the Alaska Educational Broadcasting Commission began in July, 1970.

PRECEDENTS FOR STATE SUPPORT

The need for radio service in Alaska's rural areas was apparent to the new Commission. In December of 1969, still working as a governor-appointed committee, they had begun discussion of an idea for a public radio station in Bethel to serve the vast and sparsely-populated area of southwest Alaska. By April of 1970, a nonprofit corporation had been formed to act as licensee for the new station, the governor's office had requested state funds for a portion of the equipment costs, and Northrip had submitted an application to the FCC for an AM radio station construction permit and an application to the new, broadened Educational Broadcasting Facilities Program (EBFP) for federal assistance in the purchase of equipment for the station.

The creation of a nonprofit corporation to serve as the licensee for the Bethel station set an important precedent for the way in which state support for public broadcasting would be accomplished in Alaska. State

funds for equipping and operating stations were to be appropriated to the new Alaska Educational Broadcasting Commission (AEBC). The creating legislation, however, prohibited the AEBC from being the owner, operator or licensee of any station or production facility unless "no other competent contracting agency exists."

The formation of the community nonprofit corporation in Bethel created an entity which could receive funds for the station from the state. More importantly, such a corporation — formed solely to operate a public station, and governed by a board of local people whose primary interest was the service such a station could provide to the local area — set a pattern for similar developments in other communities, and provided the solid community-oriented base that is now one of the outstanding features of public broadcasting in Alaska.

A DECADE OF DEVELOPMENT

With the state legislature's commitment to public broadcasting in 1970, the ensuing decade was a period of extraordinary development. KYUK in Bethel went on the air in May, 1971. The station used an AM frequency to cover the many villages within a hundred-mile radius of the transmitter. News and other programs both in the Yupik Eskimo dialect and in English were among the unique aspects of its program schedule.

Plans were also starting for other stations. In early 1971, a meeting arranged by the Alaska Educational Broadcasting Commission in Kotzebue resulted in the formation of a local committee to explore ways to bring public radio to that area. KOTZ, patterned on the Bethel organizational model, signed on in March, 1973.

First "Community" Stations. Capital Community Broadcasting in Juneau was incorporated in 1972 and was the first local nonprofit corporation to offer membership in the governance of its proposed station to the general public. In early 1974, KTOO-FM began operating at a power of 10 watts. The station became CPB-qualified in 1977, increased its power, and upgraded its studio facilities in 1978.

In 1974, the Alaska legislature took the initiative in station development and appropriated start-up funds to the AEBC for two new stations, without a request from the Commission. KBRW in Barrow went on the air at 10,000 watts in December, 1975 and KMXT-FM in Kodiak began broadcast at 3000 watts in June of 1976. Kodiak Public Broadcasting, Inc. operated as a membership nonprofit corporation, while Silak-Kuagvik Communications, Inc. in Barrow followed the Bethel and Kotzebue model of a nonmembership local corporation.

The only exceptions to the rule that Alaska public stations are owned by local nonprofit corporations are KUAC, the university station in Fairbanks, and the Dillingham public radio station. KDLG-AM is owned by the Dillingham City School District and operates at 5000 watts. Since its inception, however, the station has had a community advisory board to oversee its programming to the Bristol Bay area. The station began broadcasting in July of 1975, with a grant from the Elementary and Secondary Education Act. Its operating costs are now partially supported by the Commission, much as is the case with all other public stations in the state.

Continued Growth. The most rapid period of growth has been in the last five years, with eight new public stations beginning operations.

- KRBD in Ketchikan signed on in May, 1976 as a ten-watt local membership-supported operation, and increased power to 7000 watts in 1979.
- KSTK in Wrangell began in July, 1977 as another ten-watt FM based on the KTOO model, and raised its power to 3000 watts in 1979.
- Petersburg's KFSK signed on in August, 1977.
- KSKA, the 3000-watt station of Aurora Community Broadcasting in Anchorage, signed on a year later.
- Katchemak Bay Broadcasters in Homer put 5000-watt KBBI-AM on the air in 1979.
- Lynn Canal Broadcasting, a membership nonprofit corporation, started KHNS in Haines at 3000 watts in the fall of 1980.
- KSKO, Kuskokwim Public Broadcasting's 5000-watt station in McGrath, began broadcast in July, 1981.
- KCAW, owned by Raven Radio, is scheduled to sign on in Sitka at 10,000 watts at the start of 1982.

STATE SUPPORT GUARANTEED

In 1980, the Alaska Public Broadcasting Commission (the AEBC became the APBC in 1976), instituted its "Essential Service Level" formula for providing public stations with operating support. The ESL formula guarantees that the APBC will request sufficient funds for each station, so that when those funds are combined with all other sources of station income, each station will meet all Corporation for Public Broadcasting qualification criteria.

With almost all Alaska population centers served by public broadcasting, the APBC is now concentrating on providing translator or repeater service to those areas not yet served. The Commission is also committed to maintaining its ESL funding standard for all existing full-service stations.

"The most important thing that the Alaska Public Radio Network can accomplish is to decentralize the way information is disseminated in Alaska," says APRN Executive Director Marcia Alvar. "For years, most of the news in the state came from Anchorage and Juneau. The Alaska Public Radio Network, and its daily thirty-minute news program Alaska News Nightly, represent the first time that communities from all over the state can speak for themselves, through the member stations, on issues and ideas of importance to local communities."

VOICES OF ALASKA— APRN

BY BRUCE THERIAULT
President, Alaska Public Radio Network

Alaska Public Radio Network is really a cooperative. It is governed by a board of directors elected by the fifteen member stations, and operated on a daily basis by a four-person staff. A committee structure helps with decision-making, including an active Program Advisory Committee consisting of program and news directors from the stations.

APRN is funded by the stations, which pass through a portion of their grants from the Alaska Public Broadcasting Commission to operate the network. Its programming comes from all its stations.

Since *Alaska News Nightly* went on the air in 1979, there has been a continuing extra effort to ensure that a significant portion of the program comes from the local stations. Stations have contributed over 1100 pieces to *Alaska News Nightly* during each of the two years the program has been on the air — around 40% of the program's content.

Alaska News Nightly, and the other cooperative programming of APRN — live coverage of news, sports and cultural events — has done much to acquaint Alaskans with one another. APRN has also helped the stations concentrate more closely on coverage of local events, since they can rely on program material from their sister stations, fed through the network, to cover part of their daily program schedule. Stations contribute programs to APRN without monetary compensation.

HISTORY OF ALASKA PUBLIC RADIO NETWORK

APRN's first broadcasts were in 1975, when Elaine Mitchell and others of Juneau station KTOO-FM broadcast live coverage of the Alaska state legislature. These broadcasts continued in various forms for several years. In November of 1976, APRN first broadcast statewide election coverage, using feeds from around the state. After receiving funding from the Alaska Public Broadcasting Commission in 1977, the Network did the first live two-way hearing from the Alaska state legislature. APRN also began feeding National Public Radio and other state programs to stations on a regular basis.

For the next year, programming consisted largely of NPR feeds, although APRN continued the tradition of election coverage with live broadcasts on both primary and general election nights in 1978. That year also marked the debut of *Capital Connection*, a daily legislative coverage news program.

Early in 1979, discussion began in earnest about producing a daily, statewide APRN news and public affairs program. There was much debate about what type of news programming was desired. Some stations wanted on-the-hour coverage; some a daily, in-depth program. In the summer of 1979, stations met and opted for the daily, in-depth format.

PRESENT INTERCONNECTION; FUTURE PLANS

APRN and member stations are presently interconnected by a 3Khz circuit leased from Alascom at a cost of approximately $34,000 per year. The audio quality of this interconnection is, quite simply, wretched — one of the reasons for the excitement over the development of satellite interconnection.

In 1980, the Alaska legislature appropriated $165,000 for a satellite uplink. Ten of the fifteen Alaska public stations already have downlinks. Funding received from the federal Facilities Program will complete satellite interconnection and APRN will be on satellite in the summer of 1982.

* * * * *

The Alaska Public Radio Network is unique in this country. It is one of only four state public radio networks providing daily news coverage. It is the only network making such an extensive use of independent station-based, non-network reporters for a large percentage of its material. It covers live events around the state when they happen, and truly gives the stations in "the bush" a chance to be one of the "Voices of Alaska."

TOO CLOSE FOR COMFORT

BY JON NEWSTROM
News Director, KCAW, Sitka

According to the US census, Alaska's population is a mere 400,000, with almost half of that number living in Anchorage. Only four out of the fifteen stations in the Alaska Public Radio Network are in communities of over 10,000. Excluding these four, the stations have an average of under 4,000 potential listeners.

Those small communities are what makes reporting in Alaska interesting, and the fact that only four out of fifteen have roads to them makes reporting in Alaska unique. Without distraction of a road to any place other than where you are, the town becomes close. For news reporters, too close for comfort.

In early November, almost forty reporters from the fifteen APRN stations attended a weekend workshop entitled *Reporting in a Small Town: Too Close for Comfort*. This seminar was held in Bethel, a "bush" community of about 3,000 people on the Kuskokwim River. Much like an NFCB National Conference, we held sessions in legal problems of reporting and the basics of journalism. Unlike participants at a national conference, however, we had all heard each other on *Alaska News Nightly*.

Ted Hall, publisher of the *Rainy Lake Chronicle* in Rainier, Minnesota (population 250 or so), led the first discussion. His viewpoint as a reporter working in a small town provided a perspective we all needed.

How do you report that your friend and neighbor made a fool of himself, without making him angry and yet reporting the truth? "With the skill that won him the Navy Cross as a World War II fighter pilot, the father of the bride untangled himself from her train."

And how do you deal with the problem of reporting on a small town government? Often the city council member who complains about your news is the one who delivers oil to your house on cold winter nights — or your doctor, landlord, accountant or best friend.

The long-term commitment and understanding of the people and the area in which the reporter is working was stressed by Tom Richards, former editor of Alaska's only Native newspaper. He and Bill McCaughan of the University of Alaska conducted a simulation game on village reporting. The exercise brought up important considerations for small town reporters in Alaska — Native stereotypes in the media, and the necessity of sensitivity at the station to Native and rural issues.

Also joining reporters in Bethel was Bob Rhodes of the Canadian Broadcasting Corporation. Rhodes' Northern Service covers three million square miles, with four regional production centers feeding repeaters.

There are notable similarities in these two northern services, the CBC and APRN. The geographic size of Rhodes' area dwarfs even Alaska; the natives of the Arctic areas are direct relatives of Alaska natives. Some of the Alaskan stations are programming in Eskimo dialects, as are most of the Northern Service stations. Small towns in Alaska sometimes resent stations hiring Outsiders; Rhodes has the same problem.

At it for a few more years, the CBC provides APRN with valuable examples. When Rhodes sends reporters to a village, he sends three. One is an English speaker, and two speak various Native dialects. When they return to the production center, bilingual stories are prepared.

In Alaska, the public news stations are much more important than in other parts of the country, because they are the sole service . . . and not one of a bunch of stations on the band. They're the only place to go!

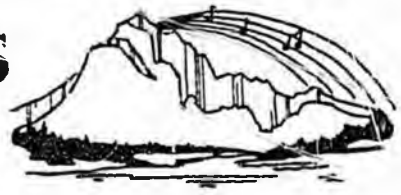
The CBC spends a considerable amount of time looking to the future and planning programs to prepare people for changes the future will bring. That idea caught hold in Alaska. At a recent teleconference meeting of the APRN Program Advisory Committee, a project was started in which each station will host a town meeting or call-in program. The topic: the future of Alaska. These meetings or programs will be edited to fifteen half-hour programs which will be carried by APRN, followed by a statewide call-in program.

Programming ideas weren't the only ones that the Alaskan reporters took away from their meeting with Rhodes. The CBC has started a program of training local people instead of hiring "carpetbaggers." Of course, not everyone is from the local area, but when they hire someone from the Outside, they don't ask if they want to *live* in the community, but if they want to *die* there.

The Bethel workshop was the beginning of what we hope will be a long history of cooperation between the CBC and APRN. A Whitehorse production staff will probably attend the All-Alaska Symposium (an NFCB regional meeting) in Petersburg this winter. Alaskans will probably attend a workshop in Mackenzie as well.

Too Close for Comfort was organized by Marcia Alvar, APRN's Executive Director. It was the first time the network's reporters had been able to meet as a group to discuss the uniqueness of their work. "In Alaska," notes Alvar, " the public news stations are much more important than in other parts of the country, because they are the sole service . . . and not one of a bunch of stations on the band. They're the only place to go!"

COMMUNITY RADIO KHNS



BY DEBRA J. SCHNABEL *Manager, KHNS, Haines*

. . . if your idea of community radio means an alternative to the commercial sound, it would be misleading to describe KHNS as community radio. KHNS is the alternative to NO radio.

The truth of the matter is that when a group of hams got together in 1978 to talk about a radio station for the community of Haines, they didn't have in mind community radio as we know it now.

In fact, the idea of "going public" was considered only after realizing the grim fact that the group could not guarantee the FCC that a privately-owned station (a recurring dream for 25 years) could survive a year in a city of 1900 people and two grocery, two hardware and four liquor stores. And what finally forced the timely decision to incorporate as a public, non-profit corporation was personal reaction to the rumor that a religious group had designs for the local air waves.

"Going public" broadened the financial base and the service area for Lynn Canal Broadcasting. The Alaska legislature agreed to fund the radio project on the condition that the community of Skagway – isolated by fifteen miles of fjord, population 750 – also be served by the signal and the programming. Service to Klukwan, a native village of 250 people located 22 miles north on the Highway, must also be provided.

Today, having spent 48 months, $309,500 in state funds and $142,750 in NTIA funds, KHNS is broadcasting the gamut of information and entertainment programming that is expected of community radio, to 3,000 people, with 3,000 watts.

But if your idea of community radio means an alternative to the commercial sound, it would be misleading to describe KHNS as community radio. KHNS is the alternative to *no* radio. And because of that, we must exercise a degree of discipline not usually found in community radio.

KHNS sounds different than most community radio stations because we are not alternative radio. As such, we must be accessible to the broad base of the community for at least a part of each day. We feel strongly, however, that we should not sacrifice service to specialized needs in the attempt to achieve accessibility.

We chose to make the daytimes the more broadly accessible listening time. We play a cross of popular, rock and country music during the weekdays, and rotate short-format features of special interest within the program format. The entire programming puzzle maintains maximum audience flow from one program to another. Produced promotional and public service announcements are integrated throughout the entire program schedule, much like commercials are placed in the commercial format.

The KHNS community, collectively, is fairly typical of Alaskan communities of its size and larger. (Come to think of it, that's not more than 25 places.) The white/native ratio is probably about 8:1. Generally, the economy is still controlled by a conservative element that immigrated to Alaska following World War I. Since the '60s, Alaskan communities have seen an influx of younger, politically liberal pioneers. They escaped the cities and came to Alaska, just as the state was opening up to large-scale resource development. They came seeking alternatives, and they have influenced the communities they live in by forcing an assessment of values. This has often meant political struggle.

Many community radio stations are an outgrowth of that struggle, and they come to represent alternative values within the community. But stations such as KHNS must embody that struggle, and act as a cohesive force. They must react to the natural tendency of the community to split into factions. And they must avoid becoming a polarizing force themselves.

A community radio station in this situation must be deliberate in every choice it makes. KHNS must be careful to balance the collective consciousness of the community in its administration and its programming. The staff (local hire, but professional, please) must collectively represent the communities' values.

Of course we heed the individuals. The mayor dismisses *Folk Tradition* as two hours of music no one *ever* heard before. Someone else believes that a "public" station shouldn't feature popular or image artists at all. One hears too much, and then not enough, classical music. A listener wants to do away with the local *Evening Report* and hear "that other half hour of *All Things Considered*," while a corporate director is contemplating doing away with *All Things Considered* because he thinks it is not. She wants Mother Jones; he, William F. Buckley.

But the emphasis is always the community. Essentially, KHNS is just another community member, but one that reflects all community members on some facet. And in that way, within that concentrated discipline, we take on a life of our own. We are community radio KHNS.

Alaska provides a model for state support and nurturing of citizen-controlled and -programmed radio. It is an exciting place to be.

PLANNING FOR THE FUTURE

BY RICH McCLEAR *Manager, KCAW, Sitka*

Alaska is a state of many very unique local communities, with a lot of very different problems, needs and strengths – not to mention climates, languages and cultures. These communities stretch over four time zones in an area which, if superimposed over a map of the US, would reach from Atlanta, Georgia to International Falls, Minnesota to Los Angeles, California. Alaska has fewer people needing access to the public broadcast media than the city of Minneapolis, but these people don't have buses or even roads to bring them to their local stations.

With the isolation of individuals and of whole communities, and the dramatic cultural differences between communities, local public broadcasting has taken on a crucial role in everyday life. As Les Robinson's article on *Bush Radio* demonstrates, radio in Alaska can be central to people's livelihood, safety, and ties with friends and community. And, as in the rest of the country, it gives citizens the opportunity to understand in detail the problems of their local communities, and encourages them to participate both in solving those problems and in celebrating their strengths.

To meet Alaskans' needs for public broadcasting, the long-range planning committee of the Alaska Public Broadcasting Commission was established. In recent meetings, the committee has drawn up a planning report that will be submitted to the full Commission at the beginning of 1982. This draft report gives some indication of where public radio in Alaska may be going.

COVERAGE

The planning committee has called for public radio service to every community of over 25 people in the state. Each service is to be controlled by a local board of directors and supported, in part, by local financial and volunteer resources. The committee envisions three types of service to the communities.

The first class of station is the *full service regional station*, CPB-qualified and with fully-equipped studios that allow them to produce at least ten hours a week of local programming. This local programming will include local news, public affairs, music (other than local record shows), documentary and drama.

Selected programming from the full service stations will be placed on satellite to serve the second level of station, which is the *local access repeater*. The repeater will be licensed as a regular public radio station, but will have a small staff of one or two, and a small local-access studio. These stations will choose programs from the full-service regional stations, and will also provide local news and access programming.

In this way, communities which cannot support full-service stations will be guaranteed some local service. As local support grows, local programming at these stations will grow also. Communities currently being proposed for this class of service are in the 600-1200 population range.

The third class of station proposed is the *translator station*. The translator will repeat one of the full-service or repeater stations for smaller, isolated communities. Some translators will be served from satellite feeds.

The planning committee has proposed the establishment of one more regional center (there are currently fifteen), seven local access repeaters and several new translators for radio by FY85. For each type of station, the community will provide at least 15% of the station's operating resources (including volunteer time). Larger communities will be asked to provide more support.

TRAINING

Since local citizen control is the keystone of Alaska public broadcasting, the planning committee has set board training as the highest priority. They call on the Alaska Public Broadcasting Commission to offer stations the opportunity to have *board training workshops*, funded by the Commission and held in the station's community, and to develop board training materials for all stations.

As its second priority, the Commission will assist in funding one *statewide training workshop* and one *training resource "round robin"* person to visit stations each year. The workshops are to train staff, and the round robins are to train both staff and volunteers at their own stations.

Both the workshops and the round robins, while funded by the Commission, are to be planned and controlled by the stations themselves.

The third priority set in the draft report is to aid stations in providing a *match for the women's and minority training grants* awarded by the Corporation for Public Broadcasting. Lower priorities call for the Commission to respond to other training proposals from the stations if funds are available.

Continued on next page

PLANNING FOR THE FUTURE

Continued from preceding page

PROGRAMMING

The nature of Alaska public radio is local, and the Alaska Public Broadcasting Commission is prohibited by law from being directly involved with programming. The long-range planning committee thus focused on assisting the stations' local programming efforts, and set two long-range objectives.

The first is to *provide each full-service station with the resources to produce at least ten hours of local programming a week*, excluding record programs. The second is to set up a *program fund* to enable stations and producers to create programs for regional, statewide and national distribution. By FY86, this fund would contribute 25% of what the stations themselves spend on programming.

One of the goals of the program fund would be to support new ideas and experimental programs. The draft committee report states, "APBC funds . . . must be free of any conditions that would limit programming freedom. Program producers should be able to "fail" without severe consequences."

CONCLUSIONS: AN EXCITING PLACE TO BE

These plans are still in draft form. They have not yet been presented to the Alaska Public Broadcasting Commission, or to the governor and legislature. The long-range planning report is a document produced by the APBC staff, and a committee consisting of three of the nine APBC commissioners and four station managers. However, it *is* based on what is already in place in Alaska.

This state, more than any other, supports the idea of community radio. With only two exceptions (one university and one school district), our stations are controlled by local boards of directors, most elected by members. One-third of the stations have Native Alaskans in control of their boards. Most stations make extensive use of volunteers on the air.

This system developed because it was state policy to develop community radio. Already, Alaska has fifteen regional centers, with one more planned. The first local access repeater has been funded by the legislature, and the APBC has been involved in funding staff training.

Alaska provides a model for state support and nurturing of citizen-controlled and -programmed radio. It is an exciting place to be.

With the isolation of individuals and of whole communities, and the dramatic cultural differences between communities, local broadcasting has taken on a crucial role in everyday life. Radio in Alaska can be central to people's livelihood, safety, and ties with friends and community.

NFCB Participant Members in Alaska include KCAW (Sitka), KFSK (Petersburg), KMXT (Kodiak), KRBD (Ketchikan) and KTOO (Juneau).

NFCB Associate Members are Alaska Public Radio Network, Educational Media Services (Fairbanks), KDLG (Dillingham), KHNS (Haines), KOTZ (Kotzebue), KSKA (Anchorage), KUAC (Fairbanks), KYUK (Bethel), Media Two (Anchorage) and Western Media Concepts (Anchorage).

Telecommunications

Comments, September 24, 1981

Rodger Davis to the House Labor and Commerce Committee

Representing: Executone of Alaska, ACI Office Systems, EOA Services, Member of the Office Systems Group.

Background: Former Branch Marketing Support Manager for Xerox in Alaska.

Present President of Executone of Alaska, Inc. Alaska's largest supplier of non-utility Telecommunications Equipment.

Present Officer and Board Member of ACI Office Products -- a broad based Word Processing, Data Processing, and Office Products Company.

Board Member in the recently founded EOA Services, Inc., a Data Networking Company.

Issue: The Industrial Age is over, the Information Age has just begun. Those who control the distribution of information control our age.

General: Fact: None of us would be here today, the Governor would not have issued Executive Order No. 50, and all of the wonders of Communications technology that make this hearing worthwhile would not even be an issue without competition in the Telecommunications industry.

Still today, the operating utilities control over 90% of all terminal equipment in the industry, after more than ten years of competition. In Alaska, the percentages are at least the same. This is only possible because the operating utilities have used their legislated Monopoly power to stifle competition. These methods include predatory tariffs, disparagement, Customer Harassment, interference with Monopoly services to customers using competitive equipment, and unsubstantiated reports of Market Sharing between utility parties. In spite of this, competition with the utilities continues because the goods and services being provided are needed in the Market Place. The Legislature will have to play a key role in ensuring survival of competition against incredible pressure to eliminate it by the utilities.

On Items 4,5,9,10, we are not qualified to testify and defer to those who are.

COMMENTS: Item 1: Is there a danger of Government crowding out private business? -- absolutely. All business exists in Alaska within a very confined market. The State represents over 20% of our firm's business, and is the single largest potential customer for four out of five telecommunications projects that we now have in development. Any direct action by the State can and will have a major impact on our business.

Generally, State actions are well intentioned, but ill-informed. Two examples came to my attention in the past week:

1. The Department of Community and Regional Affairs reacting to reports of high construction costs in Iliamna, purchased for the village heavy equipment, virtually running the existing contractor out of business.

2. The same Department, reacting to high transportation costs for goods brought into the village of Pedro Bay, purchased for the village a new heavy truck to transport goods, potentially destroying the business of a family providing the service for 50 years.

In both cases, the existing businesses have to buy their own equipment, pay the absurd present interest rates to suppliers, and pay taxes. Their new competitors do not.

Whether the State sets up other competitors not burdened by the costs of doing business or compete themselves, they can be devastating.

Item 3: Is there a danger of a telecommunications monopoly developing? -- absolutely. Pacific Power and Light, doing business in Alaska as Alascom, or Telecom, or Pacom, is committed to being the Bell System of Alaska. While they gobble up small independent utilities, their monopoly-generated revenues cross-subsidize their penetration of unregulated markets.

In areas where their Pacom Division, (the Division that sells and services station equipment), could aggressively compete with local utilities, they have approached the utilities with offers to curtail their efforts to compete in exchange for the utilities' support before the Commission of PP&L's efforts to stifle competition for long-distance services. This agreement does not, however, curtail Pacom from competing where the customer calls them in, or in competition for existing non-utility supplied customers where they sell at rates that no company not receiving Monopoly revenues from other sources could sell at and still survive. Interestingly, the only two utilities who agreed to this arrangement, that we are aware of, were both government owned and operated.

Unfortunately, the utilities appear to be making headway in their efforts to help Alascom stifle long distance competition. The notification attached as Exhibit A, indicates that ATU has succeeded in making any competition in Anchorage extremely expensive.

My final comments are directed at the Alaska Public Utilities Commission. First, let me affirm my confidence in the quality of staffing of the Commission. Let me also acknowledge that they are grossly understaffed to regulate an industry changing as fast as Telecommunications. Before the FCC's deregulation order goes into effect in March of 1982, they desperately need more accounting, tariff, and legal staffing.

Beyond the staffing problems, they need to develop a policy in tune with the National recognition that new technology in a competitive environment is the best possible means of holding down the costs of services to Alaska.

While the Federal Courts have repeatedly held that utilities may not use revenues from Monopoly services to cross-subsidize or hold down artificially the cost of services where they have competition, the APUC has passively allowed it to go on and on.

They appear to be taking the position that somehow Alaska is different from the rest of the world and competition really won't work here. The justification has been that, by allowing artificially high long distance rates and exceptional revenues pass through from Alascom to the local utilities, they are holding down the cost of local services. In reality, the costs for almost all local services have gone up substantially in the past year, except those where the utilities have competition; that is, Business Telephone Services. In effect, the commission allows local users to cross-subsidize business telephone expense.

Item 6: The State can dramatically improve its data transmission system. Competing sources of long-line transmission offer the State better networking capabilities. Simply unifying all "handshake" formats would have an immense benefit. The Department of Administration is presently attempting to find a way of insuring that all word processing, data processing, and data transmission systems are compatible.

Item 7: What kinds of new technology should the State be using? There is no one answer. The best system is a correct mixture of present and developing technologies based on the specific need of the project or the department. The risk is that the State will hire a consultant who is high on one technology and will make a decision based on too little input. Equally risky is the possibility that no short-term decisions will be made, while the State studies and studies its options, looking for one non-existant right decision.

Item 8: The Division of Telecommunications definition establishes State Policy on Telecommunications. Broad guidelines should first be set by the Legislature.

The Division of Telecommunications Systems; specifically is tasked with design, acquisition, and management of systems for agencies. In eleven years of working with the State in Systems Design, I've observed a four-phase developmental cycle in single task divisions:

1) The last-vendor-out-of-the-door phase.

2) The expert-consultant phase.

3) The don't-do-anything-until-we-clean-up-this-mess phase.

4) The active-solicitation-of-vendor-consulting phase.

If this Division can operate based on establishing very broad guidelines within which competition can offer choices, it will be successful. If it gets into actual specifications writing, two things will happen:

1) The State will begin buying technology that is challenging to the designers, whether or not it is right for the agencies applications or cost effective.

2) The State will pick a technology that it is comfortable with and stagnate with it.

There is no question that most agencies need some assistance in planning the office of the future. The new Division of Telecommunications systems can fill a vital role, if they actively encourage competition for the State's business and keep in mind there is no one answer.

Item 2: Below I've noted some provisions that we encourage be adopted as part of the State's Telecommunications Policy:

1) Competition is healthy for the industry.

2) The State of Alaska can create entire markets with its decisions.

3) The State has a responsibility to actively prosecute illegal efforts on the part of the Utility Monopoly to stifle competition.

4) The State should be a subscriber to services, not a provider of services.

Thank you.

George M. Sullivan,
Mayor

Anchorage Telephone Utility

600 EAST 36TH AVENUE, ANCHORAGE, ALASKA 99503
TELEPHONE (907) 277-7561
Telex 090-25-100

Owned by the Municipality of Anchorage

September 21, 1981

Executone of Alaska, Inc.
601 West 41st Avenue, #101
Anchorage, AK 99503

Gentlemen:

The Anchorage Telephone Utility has received approval from the Alaska Public Utilities Commission to tariff an access charge to be assessed to nontoll users who have access to local exchange service of ATU, but are not physically located within the exchange area. We wish to take this opportunity to make you aware of this newly tariffed rate and explain the types of services to which the access charge will apply.

The charge will apply to Other Common Carriers who wish access to ATU exchange service for the purpose of offering toll equivalent service to their customers. The rate for Other Common Carrier access to local exchange service is $265 per month.

An access charge will also apply to services furnished to customers who wish nontoll access to the local exchange from an area beyond the local exchange boundaries. This type of service includes, but is not limited to: (A) Foreign Exchange Service (FX), (B) Off Premise Stations (OPX) when the stations are located in an exchange which is beyond the boundaries of the exchange in which the main station or PBX is located and the OPX has nontoll access to the local exchange network, (C) Tie Lines (TL) between a customer's Private Branch Exchanges when the PBX's are not located in the same exchange area, (D) Common Control Switching Arrangements (CCSA) when any point of the arrangement is located beyond local exchange boundaries and the system has nontoll access to the local exchange network.

The rate for exchange access for FX, OPX, TL, and CCSA services is $99 per month.

We refer to the access rate as ESIS, Exchange System used by Interexchange Services. We are informing you of the ESIS charges, as some of your customers may currently have chargeable circuits and question you about their Utility statement. Any ESIS chargeable circuit arrangements should be reported to the Utility. We hope this information is useful to you and should you have any questions in reference to ESIS, please feel free to contact our office.

Cordially,

ANCHORAGE TELEPHONE UTILITY

Edward Wright

September 18, 1 81

Rep. Terry Martin
Chairman, Labor & Commerce
Alaska Stute Legislature
House of Representatives
House Labor & Commerce Committee
921 West 6TH Avenue
Suite 250
Anchorage, AK 99501

Dear Mr. Martin,

We are writing to you regarding your memo of 8/18/81. We would like to thank you for your interest in letting us know about the Telecommunications Hearings.

We probably won't be able to attend but we certainly interested and have some input.

We would like to identify ourselves and give you some background. We currently own and operate Two (2) small Cable Systems. 1 in Haines, Alaska and 1 in Skagway, Alaska. Both systems are capable of 5 channel operation, except Ch. 3 & 9 in Haines which are inoperable because of State Translator's and Channel 13 in Skagway. E. D. & D. Inc., is a Design Company and these Cable Systems were purchased in part as a Test Bed for various systems. We are also a Communications Company, Land Mobile, Marine, Security, Consumer Products, TVRO Systems, Cable TV Components, Custom Electronic Systems, Sales & Service of all items. We do the Engineering and Maintenance for KHNS FM 102.3 Radio Station in Haines and handle Alternate Energy Systems.

We would like to address all items from your memo.

1) Yes. Though it is difficult to assess loss of revenue due to the many factors involved (people moving, general economic conditions, etc.) we appear to be down $1500-$ 300 per year or [illegible] of seasonal people we know come to town every summer and hook up to Cable, but now have Antennas on Travel Trailers and can pick up State Programming out of the air. Residents disconnect and buy TV

Antennas and this is enough to slow down the development of these Two (2) Cable Systems. The rate in Haines recently increased approximately 18% over the price which has been charged for approximately the last 10 years. The increase due in part to the competition imposed by the State of Alaska. This is a modest increase in that the hours of Programming have increased 3 times what it was 10 years ago. It will be impossible to continue to provide service and upgrade systems at the current rate if the State insists on competing with us. In addition to the hard subscriber loss count we can not calculate potential loss of Advertising Revenue (lower subscriber count= less viewers for advertising - less attractive for the advertiser.). We plan to upgrade the system for minimum of 12 TV Channels and other two way services. The state operates two (2) translators one on Channel 3 and one on Channel 9, rendering these channels unusable by us on our Cable and we understand they (The State) are planning on additional translators.

We don't know who the States TV Project is funded by but if from Oil Reverues, How is the TV Project going to be supported when the Oil Revenue is ended? What is current cost, per site and total and what is projected cost of completed system and yearly upkeep? In our opinion the State of Alaska has no business whatsoever in the Commercial TV Business. State television should be used for NEWS, Two-way Video Teleconferences for Education, Emergencies and to make Government more accessable and subjects of interest to Alaska - other than Commercial Programming, could be provided. As a Taxpayer I would be willing for my taxes to be spent in this manner, not for Commercial TV, especially where this service is already provided by Private Enterprise at less cost and higher quality and volume.

2) Not to get involved or as little involvement as possible.

3) Yes. First the Small Cable systems are hit with a loss of revenue, then they have to raise their rates to compensate. People don't like the higher rates and a percentage disconnect, then the rate again must go up to compensate and a dangerous cycle is started and Consumers end up with lower quantity and quality of Entertainment. This ensures that they will never gain the benefits possible over a Two-way Cable system.

4) The Villages should own and maintain their own Systems. A TVRO site, requires virtually no maintenance unless a physical trip by a qualified Technician is made to each site per month and the sole purpose of the trip is TVRO Maintenance. The cost should be more like $1000.00 per year plus parts for each site. (1 trip per year) A single frequency Agile Receiver, 6 Meter TVRO Antenna System with Modulator and Mini Two-Way Cable System can be purchased for $30,000.00-$40,000.00 depending on size of Village. Every set would have a quality picture and no mini-transmitter would be required. The system would also have potential use as intercom and Signaling system as well as all Two-way Cable Services, up to 12 Channels can be added. The State could make the Village a loan for equipment and installation. The State would have no say in programming. (It would be decided by the Village).

5) Yes. While we have the money. Improve the Phone System.

6) As we don't know anything about how they do it now, we can not offer an opinion for improved Data Transmitting.

7) Without knowing the particular needs of the State we can't pick any technology unless you have a given need. However, Digital Trasmission can be used for Two-way TV Transmission, but would suggest letting the very newest systems be tried and tested a year or two before purchasing.

8) N/A

9) The State should not encourage any Commercial Programming on State Television. This is strictly an expense and has no possibility of generating a return on our (the Taxpayers) investment.

A word about "BUSH". We moved down from Barrow, Alaska which is probably classified "BUSH". We engineered the Cable System in Barrow during our 3 years in business on the Slope. This Cable System supplies 12 Channels of programming and Services to Barrow, Prowerville and the Naval Arctic Research Lab. The Translator there is redundant, can only be picked up by a few people, and is a waste of Alaskans money. It (The Translator) only causes interference to the Cable. This Cable System has built-in Two-way capabilities. Similar situations exist in many "BUSH" communities. This has all been done totally without State help at lower cost than the State's TV Project. Is this an example of responsible spending of our Oil Revenue by our State Government. According to the Juneau Paper for Week of 9/14/81 Headlines read: "Oil Revenues Shrink-State spends $1 billion to much" How much of this is for State TV Project?

If the State insists on trying to out us (Cable Systems) out of business, We feel it is only fair we be reimbursed for each and every channel we can not use because of the State.

Thank you, and we look forward to hearing from you after the hearings.

Yours Truly,

Larry E. Blackin Pat'y A. Blackin

MR. WILLIAM J. TRICARICO
SECRETARY, F.C.C.
1919 M STREET NW
WASHINGTON, D.C. 20554

RE: LOW BAND MINI-TV TRANSMITTER LICENSING

DEAR MR. TRICARICO,

THIS LETTER IS IN REGARDS TO FILES NUMBER

BPTVL810303EI
CHANNEL 11, SKAGWAY, ALASKA 99840
K11OE

KPTVL8103031J
CHANNEL 7, HAINES, ALASKA 99827
KO7RF

AS PER MY TELEPHONE CONVERSATION WITH MRS. PEGGY REED OF THE F.C.C., SHE ADVISED US THE LICENSING DEPARTMENT OF THE F.C.C. HAS NOT GRANTED THE ABOVE LICENSES. WE WOULE LIKE FOR YOU TO TAKE A FEW MINUTES TO READ THE ATTACHED LETTERS OF CONCERN FROM US AND DENY LOW BAND MINI-TV TRANSMITTERS IN HAINES AND SKAGWAY, ALASKA, OR FOR HAINES HAVE THE EXISTING TRANSLATOR SHUT DOWN AND MOVED ACROSS THE HILL SO THAT LUTAK INLET CAN RECEIVE THE SIGNAL AND IF ITS EDUCATIONAL LET US CONNECT DIRECT TO IT AND WE WILL SUPPLY IT FROM OUR CABLE TO THE TRANSMITTER TO THE PEOPLE OF HAINES AND SKAGWAY, ALASKA FOR FREE.

PLEASE DO NOT GET US WRONG, WE ARE FOR EDUCATIONAL PROGRAMMING, ALASKAN NEWS, ALASKA PRODUCED PROGRAMS OR SPORTING EVENTS THAT WE DO NOT CARRY ON OUR SATELLITE, BUT WE DON'T UNDERSTAND WHY THE STATE CAN COMPETE WITH US OR ANY PRIVATE ENTERPRISE.

WE FEEL THE STATE CAN REMOVE COMMERCIAL PROGRAMMING ON THE TRANSLATOR ALREADY RUNNING AND ADD THE EDUCATIONAL PROGRAMS. FOR EVERY CHANNEL THAT IS ADDED BY THE STATE ON LOW BAND MINI-TV TRANSMITTORS OVER THE VHF AIRWAYS RENDERS EACH CHANNEL UNUSABLE BY US OR ANY CABLE SYSTEM AND FOR EVERY CHANNEL THE STATE BROADCASTS ON AND WE REBROADCAST, WE HAVE TO BROADCAST ON A DIFFERENT CHANNEL ON OUR SYSTEM BECAUSE OF THE INTERFERENCE ON THE CHANNEL THEY BROADCAST ON WHICH CAUSES US TO PROVIDE LESS SERVICE TO OUR CUSTOMERS, COSTS US MONEY EVERY MONTH, CAUSES OUR RATES TO GO UP DUE IN PART FROM LOSS OF REVENUE AND COMPETITION FROM THE STATE AND THIS AMOUNTS TO OUR SUBSCRIBERS FOOTING THE BILL FOR PROGRAMMING THAT WE ALREADY SUPPLY ON OUR CHANNELS, AND THE STATE CHANNEL RUNS TIL THE EARLY MORNING HOURS WHILE THE PEOPLE ARE SLEEPING AND THIS IS A WASTE OF ALASKANS MONEY. ALL WE ARE TRYING TO DO IS HELP OUR COMMUNITY AND IF WE ARE TO CONTINUE TO GROW AND PROVIDE BETTER SERVICE WE NEED TO HAVE YOUR SUPPORT.

WE HAVE STARTED A PETITION IN OUR TOWNS AND WILL FORWARD TO YOU IN THE NEXT COUPLE OF DAYS.

THANK YOU FOR YOUR HELP AND WE LOOK FORWARD TO HEARING FROM YOU.

YOURS TRULY,

Patty A. Glackin

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF ADMINISTRATION

OFFICE OF THE COMMISSIONER

POUCH C
JUNEAU, ALASKA 99811

DEPARTMENT OF ADMINISTRATION

TELECOMMUNICATIONS

POLICY STATEMENT

BACKGROUND -

The State of Alaska presently operates low power television transmitters in a large number of Alaskan communities. These "mini-TV" transmitters are, in many cases, a part of the Satellite TV project, which carries commercial entertainment programming. Recently, we have installed a number of mini-TV transmitters in connection with the LEARN ALASKA educational television project. Thus, a community may have two mini-TV transmitters, one for entertainment and one for education.

What happens when Private Enterprise provides satellite

Some of the State's mini-TV transmitters operate in communities that are also served by cable television (CATV) systems. Although CATV systems are supposed to be closed systems and not susceptible to interference, signals from mini-TV transmitters sometimes penetrate the CATV systems and cause interference. This interference is not generally caused by any defect in the mini-TV signal, and, from a legal perspective, the State has no obligation to remedy such interference.

POLICY

Although there is (no legal obligation ? ethical) to do so, the Department of Administration will endeavor to take necessary steps to eliminate or reduce interference wherever it is both possible and practical to do so. The Department will cooperate with CATV companies where there is the potential for television interference and will strive for solutions as detailed below.

Where no CATV system exists in a community, both entertainment and educational television will be delivered on VHF* channels wherever possible.

In communities which are served by CATV, entertainment television will be delivered on VHF channels wherever possible, with CATV distribution of the same signal on the same VHF channels. Delivery of education will be by the following options, listed in order of decreasing preference:

1) Mini-TV on VHF channel, CATV on same VHF channel

2) Mini-TV on UHF* channel, CATV on same UHF channel

3) Mini-TV on UHF channel CATV on mid-band* channel

In each community, the most preferable (lowest numbered) option which is compatible with both the capability and usage of the CATV system will be used.

W. R. HUDSON, COMMISSIONER
DEPARTMENT OF ADMINISTRATION

October 23, 1981

INTERIOR REGION EMERGENCY MEDICAL SERVICES COUNCIL, INC.

P. O. BOX 2120 • FAIRBANKS, ALASKA 99707
PHONE (907) 456-3978

October 28, 1981

COMMUNICATIONS PRIORITIES *

1. Expansion of the microwave system along the Parks Highway to complete the Anchorage to Fairbanks system.

2. Placing a base station on Reindeer Hill site near Cantwell for 155.160 State EMS Communication.

3. Identify and acquire a site for a microwave link between Delta and Paxson.

4. Priority to complete the microwave system between Harding Lake and the Border.

5. Extending communications along the pipeline haul road, including 155.160.

6. Expand dispatch capabilities in Tok to ensure 24 hour coverage.

7. Assist communities within the region with the development or expansion of central dispatch capabilities.

8. Ensure back-up power source for communications in communities.

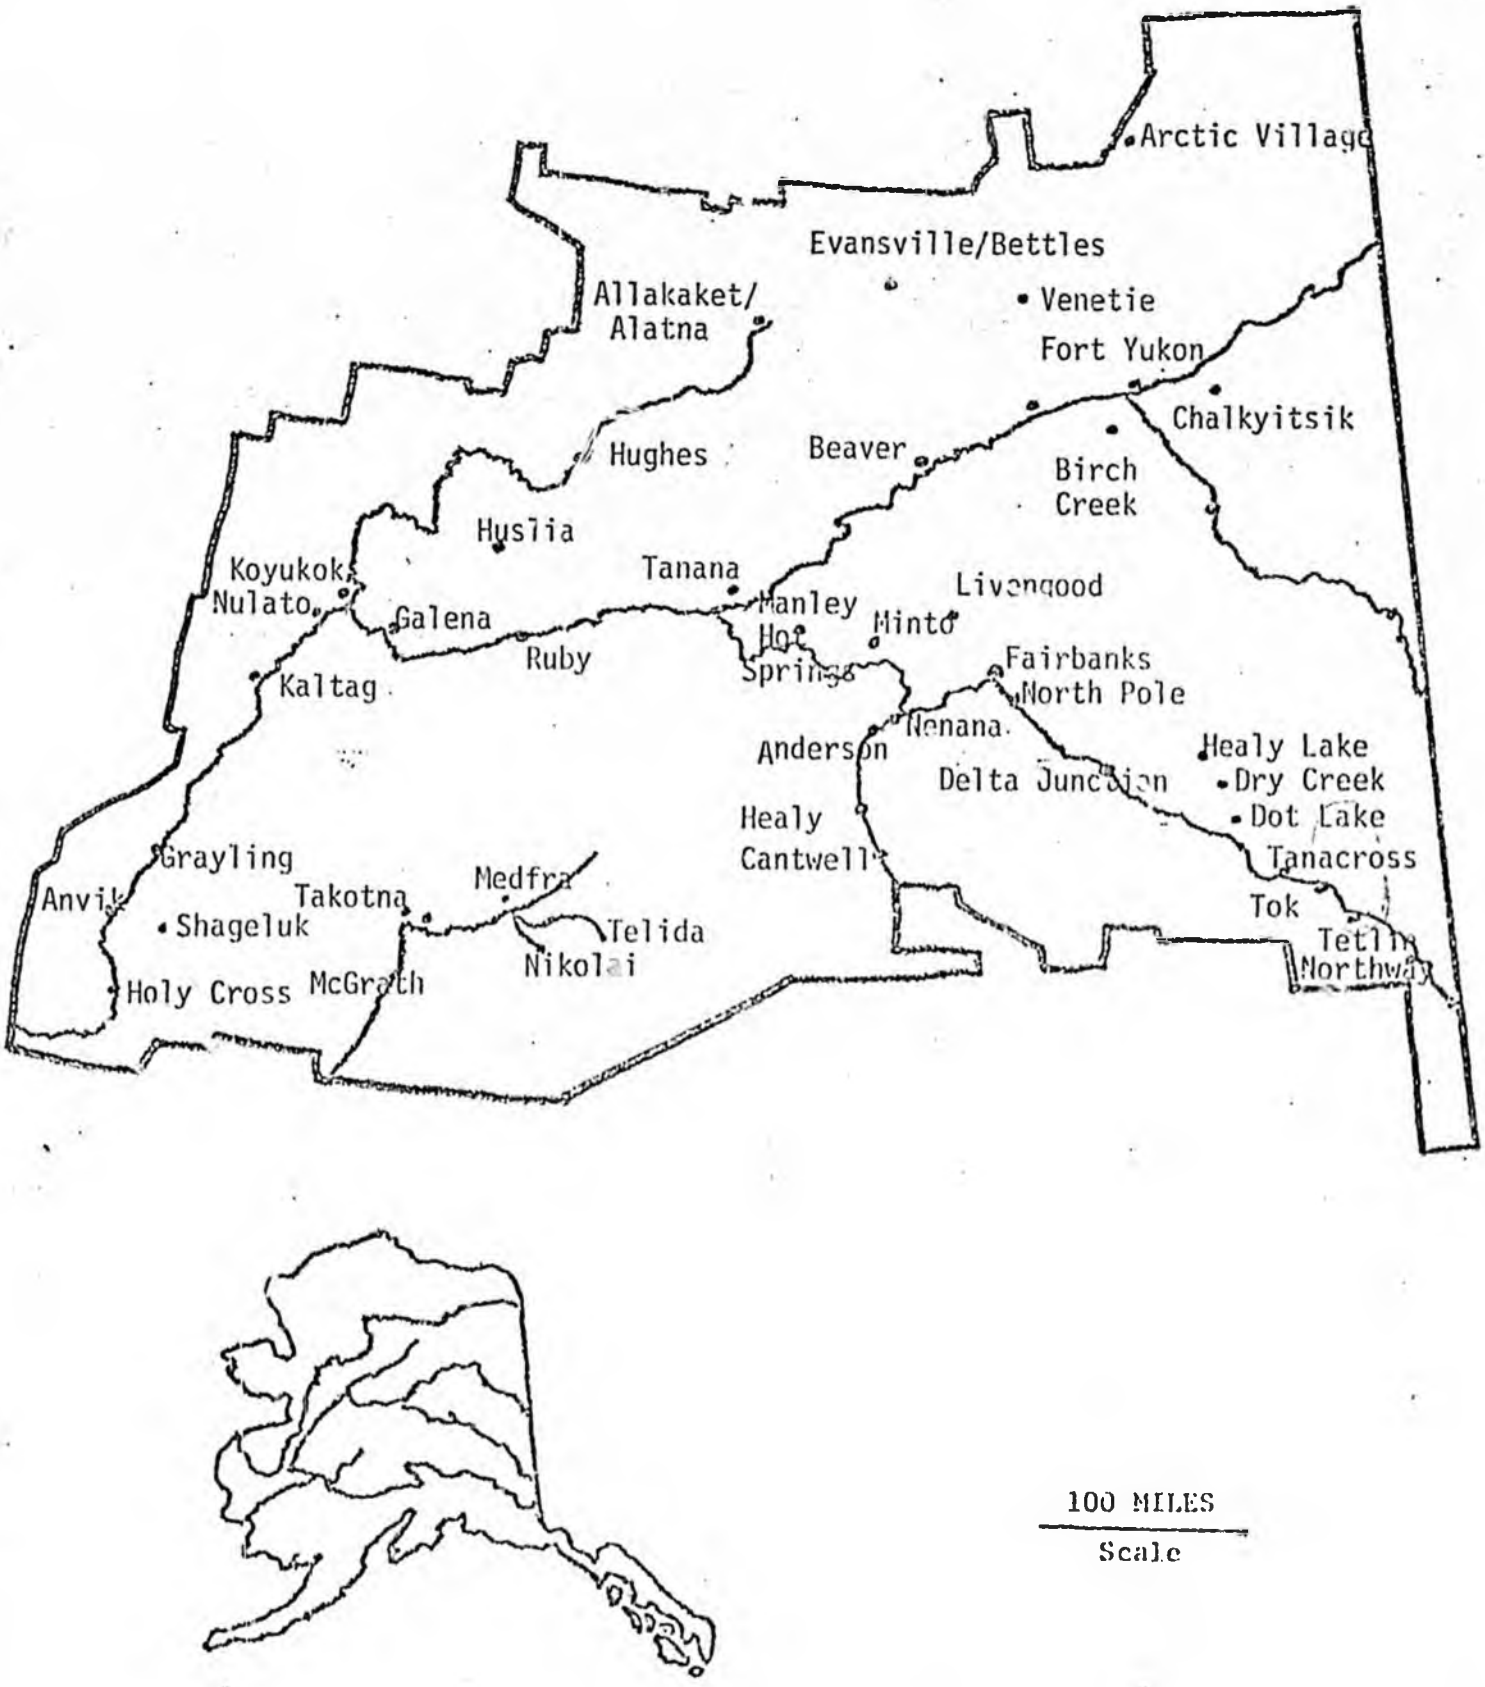
9. Explore the feasibility of no-charge emergency phone use on pay phones. Explore with A.P.U.C. the possibility of expansion of 911 system.

10. Expansion of console at Fairbanks Memorial Hospital, to include Civil Defense, outlying subregional clinics.

11. Develop telemetry capability from outlying clinics and ambulances to Fairbanks Memorial Hospital.

* These are not numbered in priority.

INTERIOR REGION



Five year Medical Control Plan

for Interior Region

Once emergency access and response is assured, the most important goal that the communications system can meet is that of providing medical control for prehospital patient care when needed.

On the following diagram, the status of the Interior Region EMS Council's five year plan to improve medical control throughout the region, and the proposed implementation plan for the segments not yet in place are shown.

PROJECT DESCRIPTION (8) Plans for the public use and development of the North Slope Haul Road/Utility Corridor region of Alaska are currently underway by BLM and the state of Alaska. In anticipation of these actions, the standard services supplied by various government agencies such as road maintenance, law enforcement and emergency medical services which exist in other areas of the state must be extended to meet the public needs and demands in this area.

The situation at present has allowed the various affected agencies to plan for their future needs in this undeveloped area and work with other agencies which share similar needs in order to consolidate services and prevent the proliferation of redundant systems.

The system would establish a multitude of communication facilities on mountain tops scattered along the corridor to service the needs of the many inter-agency users.

The agencies' requirements are quite similar: 1) The extension of their existing mobile communication system to allow the continuation of agency standards, 2) The existance of and access to a highly reliable telephone system at the nodal camp facilities. The use of a telephone would allow communicaiton for general emergency purposes and would permit temporary and transit personel access to home offices for check in and or message follwup.

Many agencies are experiencing communication needs now and feel that are both jeopardizing the safety of their personal in this area and compromising their efforts because of this. In many instances the efficiencies of the operations could be improved dramatically by the existence and use of a reliable communication system. For these reasons the Division of Maintenance and Operations within DOT/PF, which is responsible for maintenance of the state facilities along the Haul Road/Utility Corridor submitted this request for $4,800. in their FY 82 operating budget to establish a communication network.

PROJECT DESCRIPTION (8)

This project will provide for design, purchase, and installation of essential Emergency Medical Services Communication equipment necessary to furnish the communications backbone between the EMT and a Physician or clinic/Hospital. There is a lack of appropriate EMS communication equipment along major transportation corridors, thus creating whole areas with minimal or no coverage. This project will fund equipment compatible with the current statewide EMS communication frequency (155.160) and provide for uniform statewide services.

ALLEN
BLUME
SERVICES, INC.

P.O. Box 1608 • 211 Assembly Bldg. • Juneau, AK 99802 • (907) 586-9685

Mr. Chairman, members of the committee:

Thank you for this opportunity to testify before your committee. For the record, my name is Allen Blume, President of Allen Blume Services, Inc. and representing Mr. Stuart Browne, President of TELELINK Communications, Inc.

TELELINK Communications, Inc. was formed in May to provide Alaskan customers with several telecommunications services which include:

- Customized audio teleconferencing through TELELINK's Conference Message Exchange (CMX) service
- Telecom systems analysis, design and planning consultation
- The supply of automated office components such as sub-minute facsimile equipment, data communications terminals and electronic mail

TELELINK is in the unique position of being an end user of common carrier supplied services at the same time providing end-point "add ons" for our customers. This means we will be actively stimulating the increased use of the state's local and long distance telephone network, creating revenues for the telco's and long lines carrier. We are advising our clients that through the use of modern, comprehensive telecommunications systems such as our Conference Message Exchange, in conjunction with existing networks; new levels of productivity, substantial dollar savings, and reductions in travel costs can be realized.

The fact that America's GNP is tied to productivity and that increased productivity is possible through the use of telecommunications is becoming more and more apparent. Major industrial strides have been made in the automation of factories and in streamlining the production process. Today, with a majority of the national economy based on information flow, retrieval and storage, its important to streamline and automate Alaskan offices and business procedures.

TELELINK hopes that we can stimulate business users of telecommunications to take advantage of new office oriented services: teleconferencing, word processing, electronic mail and other telecommunications based services. With 60% percent of our National GNP related to "knowledge workers", TELELINK's products and services are available to help executives and knowledge managers achieve the efficiencies possible through telecommunications.

In Alaska, there are several areas where the State Legislature can help stimulate the telecommunications industry and the efficiencies that are inherent in this media. I believe we need:

1. Permissive legislation that will encourage the performance of ministerial, executorial and problem solving functions of state government and via legally established audio, video and computer teleconferencing services.
2. Greater emphasis by State government (and particularly this committee) on the use of telecommunications and particularly teleconferencing as an adjunct and alternative to high cost, time consuming travel; and the attendant loss of personnel productivity due to fatigue, lost office time, etc.

Less travel stagnat time.

could we have a starter and steeper session there

I would like to note for the record that these hearings have created a substantial loss of my time and revenues, as well as TELELINK's, simply because they were not teleconferenced. Originally we had not planned to testify before the committee, but rather sought to "listen in" to see what was transpiring.

However, when public issues are dealt with in a relative information vacuum, it becomes necessary to "jump in".

For the length of time and dollar cost that I have expended for:

a. Round-trip air fare from Juneau to Anchorage
b. Two day car rental
c. One day of hotel charges
d. Meals;

plus my absence from my desk, I could have otherwise walked across the street (or driven across town) to monitor these proceedings.

I am sure there are others who have been likewise affected.

Finally, we would like to endorse the beginning efforts of the principals in the new Division of Telecommunications Services for their accessibility and energy.

The provisions of Executive Order 50 have established firm grounds for the expansion and improvement of telecommunications services in Alaska. We look forward to a productive relationship with the Division and this committee.

Allen D. Blume
President
Marketing Associate for
Telelink Communications, Inc.

(5)

TELECOMMUNICATION ISSUES TO BE CONSIDERED BY THE HOUSE LABOR AND COMMERCE COMMITTEE. They are:

1.) Is there a danger of government "crowding out" private businessmen by becoming involved in telecommunications?

2.) What should be the state's policy regarding telecommunications?

3.) Is there a danger of a telecommunications monopoly developing in Alaska?

4.) Who should own the satellite T.V. "dishes" in the villages? The state does now and it pays Alascom $582 per month to maintain them.

5.) Should the state set up a loan program for telephone co-ops to replace the 5 percent federal loan fund which is being phased out?

6.) Can the state improve on its present system for transmitting computer data from all of the various departments?

7.) What new kinds of technology in telecommunications can give the state "the most bang for its buck?" The big technological developments now relate to digital transmission and packet contention, and two way television.

8.) The Governor (Executive Order 50) recently centralized all telecommunications programs in the Department of Administration. The Committee may want to do some oversight on the establishment of two new telecommunications divisions which were established.

9.) Should the state encourage more in-state programming and more Bush programming, or should it stay away from being involved in what plays on state-funded satellite television?

10.) There is a little bit of work being done on what social impact the introduction of television has on rural villages. You may be interested in these sorts of social impacts.

11.) Other concerns expressed by public or private enterprise.

United Utilities, Inc. NATIVE OWNED CORPORATION
5400 A STREET ANCHORAGE, AK 99503 PHONE: (907) 276-1959

September 24, 1981

Representative Terry Martin
Chairman, Labor & Commerce Committee
Juneau, Alaska

Dear Representative Martin:

RECOMMENDATIONS FOR STATE POLICY ON TELECOMMUNICATIONS

1. State government should encourage and support reliable and quality universal service at affordable rates. We feel that a realistic goal of basic telephone and television service for communities over 25 residents by 1984 is achievable and is desirable.

2. Delivery of telecommunication services should be through private enterprise in a fully competitive but regulated environment. Local control should be prefered in owning, operating and maintaining these systems.

3. Artificial regulatory and government barriers for growth and development of new and innovative services should be removed.

4. No company through sheer market power and size should be allowed to manipulate state policies and objectives of universal service at reasonable rates.

5. Companies owned and operated by Alaskan residents and based in Alaska should be given competitive edge over outside interests.

6. Any revenue shortfalls that cannot be met through rate design, rate integration and revenue pooling concepts should be supported through direct appropriations in forms of grants and loans to the providers of these services.

7. Long term and short term capital needs of the telecommunications industry should be supported by loans and grants at reasonable interest rates under reasonable terms, available to all providers of these services in the ratio of their ability to pay back such loans and based on genuine need when alternate sources of financing are unavailable.

Vinod Batra
President

Representative Terry Martin
Chairman of Labor and Commerce Committee
921 West Sixth Avenue Suite 250
Anchorage, AK 99501

Dear Representative Martin:

Although Northern Television, Inc. will certainly try to have a representative at the Anchorage meetings September 23 and 24 regarding telecommunications, neither Mr. Hiebert nor I will be able to attend, so we are submitting our comments in writing. As President of the Anchorage Associated Broadcasters, many of these same questions continue to come up each session, so we are grateful for this opportunity to make comments.

Question 1: We see a definite danger of government "crowding out" private businessmen by the sheer magnitude of the state's involvement already in telecommunications. The state should only involve itself when the private sector is unable to provide service or determines it is not economically viable. In a situation where the state does provide telecommunications service, it is the opinion of both the Anchorage Associated Broadcasters and Northern Television, Inc. that the services should be contracted or subcontracted to the private sector.

Question 2: Responding to what the state's policy regarding telecommunications should be could take several pages, but my response above to Question 1 certainly relates to policy. Also very important is the concern those of us have over the state's involvement in distribution of program signals that those of us who are network affiliates in Anchorage are responsible for to our networks. Even in the recent legislature, legislation was introduced without any consultation whatever with any of the commercial broadcasters, let alone determining whether the network programming would be made available to the state for distribution. The entire state television project could quickly be discontinued if the networks pulled our authorization to the state due to concern over the lack of proper controls in distribution of their programming.

Question 3: There definitely is a great danger of a telecommunications monopoly in Alaska.

Question 4: The villages should have the opportunity to own their own satellite earth stations if they have the expertise to operate and manage them. Otherwise they should be owned by Alascom, a local telephone utility, or some other common carrier; not the state.

Question 5: A state loan program to telephone co-ops would be beneficial if this would enhance improved service to the general public. However, since there is considerable danger of fiscal abuse, the loaning of money must go hand-in-hand with continued oversight and regulation by the Alaska Public Utilities Commission.

Question 6: We are not privy to how efficient or effective the present method of data transmission for state agencies happens to be. If there is a serious question, then an unbiased, competent third party firm should be engaged to make a comprehensive study so that an intelligent course can be followed in the future. The transmitting of computer data for the various state departments is another service that should be provided by the private sector.

Question 7: There are dozens of state-of-the-art technology developments which will provide the state with the best service in a cost-effective manner. Alascom's commitment to own a satellite within the next two year time frame is a basic example of how the potential of present and future new technologies can be implemented, consistent with the growing and expanding needs of the state. Alascom's proposed satellite is to be situated at an ideal orbital slot to provide a perfect "footprint" over Alaska, and at the same time will be able to cover adequate (and necessary) locations in the South 48 states, Hawaii, and the Pacific Rim. This is especially significant considering Alaska's growing economic ties to the Pacific. Capabilities of satellite transmission are such that new and emerging technologies (such as digital) can be perfected and used as they become cost-effective and required, and with no concern as to whether or not the satellite is capable of transmitting these new techniques. Satellites are capable of handling any new technologies that are likely to be developed during the life of the bird.

Question 8: Lt. Governor Terry Miller approached the Anchorage Associated Broadcasters and the commercial stations individually prior to the final draft of Executive Order 50, and our largest concern was again the distribution of programming by the state as authorized by the affiliated stations on behalf of their respective networks. We were assured that this would never happen, and twice since Executive Order 50, to my knowledge, the problem has surfaced. As we mentioned in responding to Question 2, legislation was introduced in the last session that did not address or request the rights to distribute programming, and most recently plans were well underway to take network programming signals "off the air" from monitors at the state's communications center rather than have the programming recorded by the network affiliates, delivered to the state, and then returned to the affiliated station for the tape to be erased as required by the network's authorization conditions.

There is also concern by Northern Television, Inc. that any commercial broadcaster, including us, utilizes the state satellite system for "commercial" purposes. We have purposely stayed clear of any inference whatsoever that advertising can reach any of the areas of the state via the state satellite system so that state or taxpayer money was not being used to our benefit. However, there are examples of stations using the state satellite system to their own commercial advantage and the telecommunications division responsible for this area should be especially aware of this practice.

Question 9: In-state programming or Bush programming can be beneficial to many sectors of the Alaskan community. However, the Division of Telecommunications should make sure all projects are cost-effective and that regardless of the cost to produce this programming, it should be monitored as to its effectiveness. I believe the state should always try to make the production of this programming available on a contract or bid basis from the private sector.

Again I thank you for the opportunity to respond, and if the legislature and the Administration "before the fact" both stay in touch with the broadcasters who are deeply obligated to our respective networks, it will save a lot of headaches and avoid jeopardizing the state satellite project in the future.

Sincerely,

Ron L. Moore
President
Northern Television, Inc.

cc: A. G. Hiebert, Chairman

RLM/AGH:cag

Alaska Cable Television Association

5 Copies

The Alaska Cable Television Association has the ability to bring state government much closer to the people of Alaska. As President of ACTA, I am writing to propose the creation of a system to place full coverage of proceedings in the House and Senate, plus elected committee meetings, on cable television throughout Alaska. The system ACTA proposes would also make it possible for individual legislators to report to their constituents regularly via cable TV without leaving the Capitol, and provide a phone-in link to receive questions and input from home districts.

We are calling the proposed system A-SPAN (for Alaska Satellite Public Affairs Network). The basic idea is borrowed from C-SPAN (Cable Satellite Public Affairs Network), the non-profit, cooperative effort of the nation's cable TV industry, which now brings live gavel-to-gavel coverage of the U.S. House of Representatives into more than eight million homes in all 50 states. C-SPAN also airs phone-in programs to allow Representatives to talk directly with constituents, and covers both House and Senate hearings. A bill to allow C-SPAN's cameras into the U.S. Senate is currently pending. I have enclosed a copy of a C-SPAN ad for your information.

The proposed A-SPAN system would do much to improve the accessibility of state government to the average citizen. Your support for A-SPAN does not necessarily imply any feelings one way or another on the Capitol move issue, and we at ACTA believe it will have a positive effect on all persuasions. If we move the Capitol, this is a good interim measure while we wait. If we don't move it, it may prove to be a very viable alternative. Either way, this form of communications has and will continue to greatly improve the dialogue and understanding between constituents and representatives. The potential for implementing a more effective system is greatly enhanced by the use of this medium.

Once the MultiVisions system is completed in Anchorage (by the end of 1984), 90% of Alaska's citizens will have access to cable television. By providing cable service in schools and libraries, A-SPAN can be made readily available even for people who don't subscribe to cable TV. This would give Alaska the most open and responsive State government of all the fifty states.

A-SPAN would interpose no editor between government and the people and would only inform the audience of who the speaker is and what the referenced bill is about. A brief suggested format is attached for your perusal.

A-SPAN would not be an expensive project, considering the enormous benefits it would bring to the State of Alaska and its people, and the Alaska Cable Television Association is very committed to making A-SPAN a reality as a public service project. However, the overall cost of the program will exceed our means, and the project's benefits to the statewide public lead us to hope that state funding might be made available to help us create the system. Perhaps, like C-SPAN, A-SPAN could be organized as a private, non-profit corporation and receive funding both from the State, the ACTA, the ABA and other interested parties. If there is substantial support for our concept among legislators, ACTA will develop a detailed proposal and budget by November.

I hope you will want to help ACTA turn this drama into a reality. I believe that A-SPAN would be the most positive step the legislature could take to provide Alaskans with freer access to their state government. I hope to speak with you about A-SPAN, in person or by telephone, before ACTA's next bi-annual meeting this November. At that time, I will report to the Association's members on the response of Alaska's elected representatives to the A-SPAN concept. I look forward to discussing this idea with you.

POSSIBLE PRODUCTION FORMAT -- A-SPAN

House and Senate Chambers

10:00 a.m. - 12:00 p.m. (Hours will lengthen as session progresses)

Description: "Live" television coverage of House and Senate session in progress (two separate channels). Through the use of remotely operated TV Color cameras, legislators, Speakers, and voting machine display boards of both chambers will be covered. A technical director, one assigned to each chamber/channel, will switch between cameras located in each chamber to keep up with the activities. Each director will have access to a title generator to identify who is speaking.

Committee Hearings

1:30 p.m. - 4:30 p.m. (Hours may vary as session progresses)

Description: "Live" television coverage of one (1) House and one (1) Senate Committee Hearing will be covered daily when in progress, using two separate TV channels (these would be the same channels earlier designated for coverage of the House and Senate sessions). The schedule of what committee hearings will be covered will be announced the day before on the "Electronic Information Center" channel. Each hearing will be assigned a technical director who will run and switch remote TV color cameras to cover the event. A title generator will be used to identify those speaking.

Electronic Information Center

10:00 a.m. - 7:00 p.m.

Description: This channel will run continuous listings of current and upcoming legislative events using a sophisticated character generator (television typewriter) which can be updated daily or as often as needed. Items will include House, Senate, and Committee Hearing calendars, schedule for the "Legislator Access" channel, times and places for special community hearings - statewide, and other timely announcements.

Legislator Access

4:30 p.m. - 6:30 p.m.

Description: This channel will be open for scheduling by legislators for short (10-15 min.) presentations on any topic they feel would be of interest to their constituents (regional or statewide). The public will be given a chance to react or to ask questions of the legislator via a direct call-in telephone line. The frequency of activity on this channel will be dependent on legislator usage, therefore the hours of operation will vary. However, a requirement will be that legislators must give adequate notice of topics and times so that notice may be given to the public via the "Electronic Information Center" ahead of time.

CABLEVISION

10512 N.E. 68TH STREET — KIRKLAND, WASHINGTON 98033
(206) 822-0252

April 10, 1981

Ms. Jane Demmert
Director of Telecommunications
221 Northern Lights Blvd.
Anchorage, AK 99503

Dear Ms. Demmert,

I am writing to you as a result of conversations I have had with several other people involved in the Low Power Transmitter applications that have been filed by the State of Alaska with the FCC.

First let me quickly introduce ourselves. Alaska Cablevision, Inc. operates Cable Television systems in seven Alaskan communities: Petersburg, Wrangell, Valdez, Cordova, Kodiak, Kotzebue and Nome. We acquired these properties in the fall of 1980. Since then we have assumed a very aggresive posture in terms of technically upgrading these facilities and introducing new satellite delivered programming. In addition, the principals of Alaska Cablevision own and operate several Cable TV systems in the "Lower 48". Four of the five principal partners have been very "hands on" involved in the Cable TV industry since the mid Sixties.

Our concerns over the pending LPT applications stem from the following:

1) The Cable Television industry has 12 VHF channels available to deliver its programming (channels 2 thru 13). To expand beyond that requires devices (converters) be placed at each subscribers set. In view of the multitude of programming available via satellite this is precious space to us and we must be able to use all of it without handicap.

2) The State of Alaska currently has in our communities a VHF transmitter for the State channel. The State transmitters cause us technical problems. The Cable TV subscriber now has 2 transmissions of the same channel arriving at his set: one via coaxial cable and one via the State transmitter. The result is a picture with an interference problem, called co-channel interference.

3) There are certain things a Cable operator can do to help protect his customers when this situation arises.

A technique known as phase locking is used to reduce the viewing problem from one of co-channel (very objectionable) to one of a ghosting problem (less objectionable). Also, the Cable operator must maintain the ingress/egress integrity of the Cable facilities to prevent off-air signals from entering the Cable system at a point and being carried along, the cable, again causing co-channel interference.

These things having been done, we have reduced, but not eliminated the problems at the customers set. However, the built in tuner and/or the built in antenna within the customer set, can with varying degrees of effectiveness, receive the off-air signal and add it to the one being delivered via the Cable system coaxial cable causing interference. The type of television, sensitivity of the built in antenna, distance from the transmitter, type and direction of the transmitting anterna, quantity of signal delivered by the Cable TV company all are factors in determining the degree of significance of the problem. Our problems vary from community to community but they do exist; and naturally the people turn to the Cable company, not the State for answers.

Yet, you can eliminate this problem. It is our hope that you would ammend the applications for Wrangell, Petersburg, Cordova, Valdez, Kodiak, Kotzebue and Nome such that the transmitter would be at a UHF frequency. At UHF all of the above mentioned problems for the subscriber would vanish. Virtually all of the sets have UHF tuners as well as VHF tuners, so the customer could simutaneously use UHF for State programming and VHF for Cable programming.

Some re-engineering of your application would be necessary, however, there would be some duplication in the seven applications that would diminish the size of that project. I am sure that time is of the essence for you in this project, however, I feel that ammending the applications would create no slow down in your time table, since the LPT affair is moving somewhat slowly at the FCC.

I hope you consider this request with an appreciation for our deepest concern. We have a limited space to do business. One channel is already troubled and if nothing is done, another will soon be also. Please appreciate our absolute need to deliver signals to our customers of the very highest quality.

Please feel free to contact me at any time.

Sincerely,

Robert Allison,
Vice President

April 16, 1981

Ms. Jane Demmert
Director of Telecommunications
221 Northern Lights Blvd.
Anchorage, Alaska 99503

Dear Ms. Demmert:

I received a copy of Bob Allison's recent letter to you regarding VHF/UHF transmitters. Before the ACTA makes certain assumptions, I wonder if you would be able to take some time to write me and tell me the main goals and objectives of your recent findings and how you see our member companies interfacing and/or complementing your needs and those of the rural areas of Alaska. Obviously, it is of great interest and concern to the ACTA since we have a substantial investment in most communities within the State of Alaska. Your time and consideration would be most appreciated.

Sincerely,

R. N. Uchitel

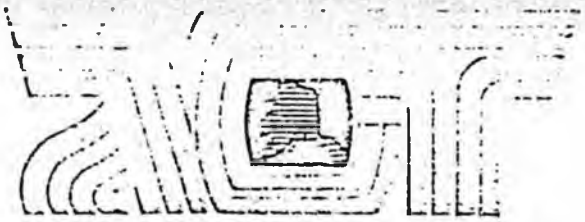
Alaska Cable Television Association



May 14, 1981

RE: Work session report between R.N. Uchitel and Jane Demmert, Director of the University of Alaska Instructional Telecommunications Consortium, and Bill McCaughan, Director of the Operations Center of the University of Alaska Instructional Telecommunications Consortium, and Tom McNulty, Director of Marketing for MultiVisions.

Gentlemen:

Getting to the crux of your concerns, more specifically, the concerns expressed in the enclosed letter from Bob Allison to Jane Demmert, I wanted to explore with Jane what it is that she does, why she is doing it, where she's going with it, and how, if possible, it can benefit all of us without hurting any one of us. I believe, that both she and Bill are friendly, aware, and understanding of our position and our concerns about the State sompeting with, rather than complimenting, our service. I throw out for your consideration and quick response to me, several ideas which came from the meeting.

In those areas where cable does exist, the State os Alaska need not put up any kind of transmitter of their own, but instead, transmit their programming on one cable channel in the following fashion:

The cable operators would commit to hardwiring all the homes, or the very vast majority of the homes, in their community.

The State would purchase all the necessary trapping hardware, so that if people simply warted to see the "Learn Alaska Channel" and nothing else on the cable, the subscriber would be prevented from seeing the cable channels if they chose not to pay for it; therefore, the cable would be in their home without charge to them for watching that one State subsidized channel fourteen hours a day.

The State in turn, on their channel, would thank the cable operator in his community for participating in the project and recommend that the viewer look at other cable channels that are being trapped out, if indeed they are being trapped out, because of the good programming on those channels that they are missing. Thusly, the State would be marketing on their channel, for free, the use of and advantages of the other channels on the cable system.

In those communities where there is no cable, the Alaska Cable Television Association would go along with the concept of allowing various cherry-picked programming from the satellite, that has traditionally been the programming source of the Cable Operator, and help them to show that programming in those communities until cable became a viable alternative. I see this as being potentially a great plus for us, because, it would finally show us to be the

conduit and broker that we prefer to be. Eventually, depending on regulation and proven costs, perhaps we could charge the State and other groups for the use of that cable channel.

Free marketing on the part of the State is a unique, and I believe, positive concept that can only lead to maximizing penetration in all markets. If we don't go along with the things that I have just suggested or other things that have been discussed, I believe that the relationship between the two organizations is still a healthy and viable one and that we haven't lost anything or given up anything and, of course, neither have they. Right now, they are willing to cooperate and will put up money to that end on our behalf. Let me know your thinking so that I may pursue it further or drop the whole issue. Thank you for your consideration, and I again hope to see you all during our Preview Presentation for Alaska 1984 in the first week of June.

Most sincerely,

Robert N. Uchitel
President

P.S. In a subsequent conversation with Augie Hiebert, he suggested and I concurred in our common alliance to protect ourselves from certain bills now before the House that potentially compete with us on a more serious basis than the above legislation. I would like to hear your feedback on that because the Broadcasters Association will be meeting shortly and would like our help on the pending problem. In addition, Augie would like to expand the idea to Satellite broadcasting of KBYR to Bethel and would like to have the participation of all cable systems throughout the State. He's indicated that he's gotten positive feedback from many of you and any thoughts I can pass along to him for you or you directly to him, I think he'd appreciate. Thanks again.

RNU:gh

encls:

(1) Put into Legislation - per John Lindauer

A Bill to get the state out of competing with private business and to stop state officials from using their offices and influence to control the news should have the following parts:

OK 1. No advertising or acknowledgements or name mentions shall be provided for any business product by public radio stations, public television stations, or public networks in response to money payments, grants, or donations.

OK 2. No commercial advertisements shall be carried in state funded or state subsidized programs or in programs transmitted by state funded or state subsidized satellite channels.

OK 3. No corporation doing business in Alaska shall charge higher prices to Alaska private broadcasters than it charges an Alaskan public broadcaster.

OK 4. The production of all news and other programming that would otherwise be provided by the Alaska Public Radio Network or any other similar organization shall be put out to competitive bid and awarded to the lowest qualified bidder. The cost of having the Public Radio Network or any other state-funded group provide the service shall be revealed in the bid request so that private bidders will know what price they have to beat in order to get the contract.

5. The state's public radio stations may buy any programming service they desire and no programming shall be pre-funded by the state in order to preempt their choices. Said programming services so desired will be put out to competitive bid and awarded to the lowest qualified bidder.

OK 6. It shall be felony bribery for an employee of the state or a public radio or television station to solicit any payment for the purpose of directly or indirectly influencing a public official or the content of any newscast or program carried by public stations or any commercial newscast carried by satellite at state expense.

7. ~~The~~ public radio stations in cities with populations in excess of 1800 people ~~shall~~ may be sold to the highest bidder who will contract to maintain or increase the current level of service and the proceeds will be used to increase services in communities not now served by public radio.

(3)

Chairman Martin, Members of the Committee:

Alaska is currently first in revenue per capita of the 50 states. Alaska is 50th in television reception. Alaska is the only state that does not have full time "live or real time" TV broadcast of the three major networks and the public broadcast system.

The loss to the people in education, health, information opportunities, reaction to current events, and entertainment is enormous - and uncalculable.

The loss to our rural citizens is even greater as they do not as a whole have daily newspaper coverage.

Currently the major networks are going more and more to special events and special commentations by top reporters, rather than carrying the story on the news. In most cases Alaska misses these specials.

During the last session, HB 517 was introduced by Representative Oral Freeman and was originally co-sponsored by 24 members of the House - to correct this deplorable situation.

The Freeman bill would bring 4 channels of "real time" television to 94% of the state's residents. It is designed to give Alaska citizens equal programming on major networks with all the people in the other 49 states.

Thousands of Alaskans would be receiving 4 channels live on real time television for the first time in the history of Alaska.

This program could be installed with the very latest in technical equipment at a cost of $50 per person statewide and an operation cost of $1.25 per person per month. Total cost for hardware was estimated at $25.5 million - operation $5 million.

The greatest benefit to live real time TV is its educational and informational value. It is without a doubt that TV is the greatest method to reach the people with information available today. Yet thousands of Alaskans have no television or delayed programs and our bush communities have no freedom of choice, receive only one channel. We in the major cities miss important news programs of vital events because a two-week delay makes the event no longer news.

And then the station must fill that gap by reruns of much older programs having received nothing from the Networks.

In the proposed project the private TV stations would indeed be benefitted as all programs would necessarily be channeled through the licensed network franchise and their individual advertising would be carried into a larger area by satellite.

This program while providing real time coverage of major network TV will not interfere with cable or pay TV. Every city in the other 49 states has live network TV and the cable business is flourishing.

At this point I might add that although I do represent one telecommunicati company their only request is to have an equal opportunity to bid on the various elements of this program and to encourage free competition in telecommunications in Alaska.

The question of state versus private enterprise in the case of tele-communications the answer is quite obvious. Even in the largest cities it is not economically feasible for private business to pay the transmission charges to Alaska. It is reasonable to assume that in smaller cities and rural areas it will perhaps never be feasible.

It is extremely beneficial to the state that the people be well informed. The costs are minimal when spread over the entire population.

The earth stations should be owned by local private telephone companies where one exists and by non-profit local co-ops where no telephone company exists.

Under this proposal the state would not be involved in programming as the four channels would give each household their individual choice of major network programs.

It is my hope that thru this committee that the state will provide this great service to all its people. The costs are small and each and every citizen, rich or poor, can benefit equally from this state expenditure.

Russ Me tins

(4)

Robert Wold Company of Alaska, Inc. testimony on Telecommunications before:

Alaska State Legislature

House of Representatives

Labor and Commerce Committee

September 23, 1981

Chairman Martin and Members:

I am Gene Deck, Vice-President and Associate Director for Robert Wold Company of Alaska. Mr. Wold, due to other commitments, is unable to attend and has asked me to relay his apologies. We thank you for this opportunity to appear before this committee on such an important issue as Alaska's telecommunications future.

Recently, we have seen Alaska's executive and legislative branches take the much-needed step to increase the efficiency of telecommunications functions in state government. We are in agreement with this step and laud you for it. We are encouraged by the intent to develope in this new organization policies which will:

- facilitate and develope basic and advanced telecommunications services and facilities.
- minimize the size and influence of state government by promoting private ownership and control of telecommunications facilities.
- recognizes the state's dependence upon innovative use of new telecommunications services and techniques.

We believe these policies will permit growth of telecommunications services and facilities, only if, competitive forces are allowed to thrive in Alaska's marketplace.

It is well known that Alaska's telecommunications atmosphere has been a monopoly since 1970 when private enterprise took over the Alaska Communications System. Monopolies are well known for exclusive control of a commodity or service in given markets which makes possible the fixing of prices and virtual elimination of free competition. Additionally, monopolies have no incentive or motivation to keep prices down or introduce innovative services and new techniques.

The other forty-nine states are presently benefitting from the government's well-established policies of promoting competition in terrestrial and satellite communications. While the established providers of these services and facilities understandably resisted such policies at the outset, there is almost unanimous agreement in the communication industry and in all other sectors that competition fosters efficient, economic, and well-directed communication services and that it has not adversely affected any group or segment in the society.

New technologies offered by new entrants into the telecommunications field are here and Alaska should take advantage of these technologies by making them available to its citizens. For instance:

- Digital television transmission techniques which permit a multiple number of TV channels in a single satellite transponder.
- Time Division Multiple Access techniques which permit a multiple number of users to access the same facilities for message telephone and data services.

These are only two of many which are available.

Open market competitive policies can make these technologies available to Alaska's citizens.

In summary, I would like to leave this message with you.

> "It should be the policy of Alaska's state government to rely wherever and whenever possible on marketplace competition and on the private sector to provide all telecommunications services. Marketplace competition will result in technological innovation, operating efficiencies, and availability of a wide variety of telecommunications techniques that are now or may become available in the future, and will promote the equitable and efficient use of such technologies to provide services to all geographical areas of Alaska."

Thank you.

H 60 (Rev. 3/81)

Bill No. House Joint Resolution No. 49

Date April 24, 1981

Title Relating to exclusion of state unemployment insurance trust funds from the federal unified budget.

Contact: Judy Knight J Knight
465-2700

Funds used for unemployment compensation are generated by payroll taxes enacted by State Legislatures. These funds can be used only to pay unemployment compensation in the state in which they were collected and are held in trust by the federal government and drawn as needed to pay benefits. Since 1969, these funds have been included in the unified budget. The "bottom line" impact of inclusion of state trust funds in the unified budget is that all unemployment compensation--including benefits paid completely from dedicated state funds--appear as federal outlays. This makes unemployment insurance programs the target for budget-balancing proposals such as taxation of benefits, pension offsets, removal of extended benefit claimants from the computation of unemployment rates, and other cost-cutting proposals like those included in the Omnibus Reconciliation Act of December 5, 1980.

In addition to those set out in the Resolution itself, there are a number of other reasons unemployment compensation trust funds should not be included in the unified budget, as follows:

1. The majority of the federal payroll tax is not collected from employers, but is credited if employers participate in an approved state program and are subject to contribution rates set by the state.

2. The operations of the U.S. Treasury do not require that the accounts be included in the unified budget. The Treasury currently handles accounts for several "off-budget" agencies.

3. Basic program decisions--level and duration of benefits, contribution mechanisms, eligibility, and many administrative functions--are almost entirely in the hands of state legislators.

Policy calling for removal of funds has been adopted by the National Governors' Association, the Interstate Conference of Employment Security Agencies, the Federal Advisory Council on Unemployment Insurance, and the National Commission on Unemployment Compensation. These policy positions were adopted recently and the issue is not yet well-known in Congress. One way to speed consideration of this important issue is to ensure that states' Congressional delegations recognize the impact of inclusion of state unemployment trust funds in the unified budget and are aware of the states' strong desire to remove the funds from the budget. The proposed resolution could be used to convey Alaska's sentiment on this issue to national policy-makers.

Position: The Department of Labor supports the proposed resolution and recommends immediate approval.

Terry Martin

MEMBERS HAVING
OTHER RECOMMENDATIONS:

_____

CHAIRMAN

H 60 (Rev. 12/78)

Fact Sheet: SB 19 "An Act relating to the legal rate of interest."

Purpose: Amend the usury statute (1) to reduce the number of loans on which the interest rate is set by law rather than by free market forces; and (2) to adjust the procedure by which the legal rate of interest is set, by making it more timely.

At present, the usury statute applies to all loans originated in Alaska under $100,000. For those loans, the interest rate may not exceed five percentage points above the discount rate set by the Federal Reserve Bank of San Francisco (12th District) on the 25th day of the month preceeding the commencement of the present calendar quarter.

The following chart illustrates how this works:

QUARTER:	DATE RATE SET:	USURY RATE:
January, February, March	December 25, 1979: 12%	17%
April, May, June	March 25, 1980: 13%	18%
July, August, September	June 25, 1980: 11%	16%
October, November, December	September 25, 1980: 10%	15%
January, February, March	December 25, 1980: 13%	18%

If SB 19, as amended, were to become law, two things would happen:
(1) the usury ceiling would only apply to those loans under $25,000; i.e. those loans between $25,000 - $100,000 upon which the interest rate is presently set by law, would be made at whatever the lender and borrower decided was the market rate (essentially the cost of the money to the lender plus a reasonable profit); and
(2) the usury rate would be based on the present discount rate at the time the loan commitment is made.

Rationale: Although usury ceilings were originally designed to protect borrowers from unduly high interest rates, it is more likely that in today's market, they tend to deny financing to relatively riskier (or smaller) borrowers. For example, in November of 1980, several Alaska banks were lent money from the Department of Revenue in the form of certificates of deposit yielding from 15.25% - 16%. That was the cost of money to the banks. In November, banks were restricted by the usury ceiling from charging interest on loans of less than $100,000 to 15%. The question is, why would a bank make such a loan? The answer is, they wouldn't.

The reason for adjusting the procedure by which the usury ceiling is set, is simply that the present formula doesn't reflect present fluctuations in the capital market. For example, the legal rate of interest during the fourth quarter of 1980 was set at five points above the discount rate in effect on September 25, 1980, i.e. 15%. During the fourth quarter, however, the discount rate went up one percent on September 26, one percent on November 17, and one more percent on December 5. If SB 19, as amended, were to become law, lenders could have charged, say on December 5, 18%. As it was, they were limited by law, to charging 15%. Our guess is that consumer lending was down during this period.

Footnote: On March 31, 1980, Congress passed 96-221, "Depository Institutions Deregulation and Monetary Control Act", the most significant banking legislation pas ed since the Great Depression. One of the features of the bill allows the federal government to preempt state usury ceilings. Consequently, since April 1, 1980 the actual usury ceiling for business and agricultural loans over $25,000 has been five points above the discout rate at the time the loan commitment is made. There are provisions in the law for state override of the federal preemption. The state should take advantage of those provisions, and it is expected that the Senate Commerce Committee will be considering a further piece of legislation on this matter later this session.

Amendment #2

Senator Patrick Rodey
Pouch V
Juneau, AK 99811

RE: Senate Bill No. 19

Dear Senator Rodey:

I would like to take this opportunity to offer some suggestions for amendments to Senate Bill No. 19, "An act relating to the legal rate of interest; and providing for an effective date," introduced January 13, 1981 under your sponsorship and presently referred to the Senate Labor and Commerce Committee.

Due to apparent oversight by the legislature in prior sessions, an inequitable anachronism has been carried forward in the statutes of Alaska. AS 09.55.440(a) provides that the rate of judgment interest awarded under a declaration of taking proceeding will equal six per cent per year on the amount finally awarded which exceeds the amount paid into court under the declaration of taking. This provision was enacted in 1962, and has never been amended (ch. 101, § 13.21, SLA 1962 .

By way of background, a declaration of taking is often used by the State of Alaska in lieu of a complaint for condemnation and the correlative court order for possession. It provides for immediate possession in the State; otherwise the State must await the execution of an order giving it possession. The impact upon Alaskan landowners is the same regardless of whether their land is taken by a declaration of taking or a complaint for condemnation. However, a different rate of interest is paid to the landowner depending upon which method is used by the State. When a complaint seeking condemnation and an order for possession is used,

interest due the landowner (on amounts not deposited by the State) is governed by AS 09.55.330 which provides that the "lawful" rate of interest (AS 45.45.010) applies. This provision was enacted along with the provision applying to declarations of taking in 1962 (ch. 101, § 13.10, SLA 1962). Accordingly, it can be seen that in 1962 the legislature provided for the payment of interest at the rate of six per cent whether a declaration of taking or complaint seeking condemnation and an order for possession was used. However, in 1976 the statute setting the "lawful" rate of interest in Alaska [AS 45.45.010(a)] was amended to increase the rate of interest from six per cent to eight per cent. However, it would appear that no one has brought to the attention of the legislature the fact that interest under a declaration of taking condemnation remains at six per cent. Subsequent increases in the legal rate of interest have similarly failed to be reflected in AS 09.55.440(a).

It has been my unfortunate experience to witness the inequitable application of the six per cent interest statute to many landowners whose land is taken for public use. Surely, the procedural means by which possession is taken by the State should not dictate the rate of interest to be paid landowners on compensation which is delayed. However, attorneys in the Office of the Attorney General for the State of Alaska, while apparently recognizing the inequity of such differential treatment, are bound by AS 09.55.440(a).

The inequity in treatment was recently noted by the Supreme Court for the State of Alaska in State of Alaska v. Alaska Continental Development Corporation and Alaska General Properties, Inc., No. 2254, December 31, 1980 (emphasis added):

> We note the disparity between the interest rate specified in AS 09.55.440(a) and the other statutes mentioned. We also are concerned about the inequity in awarding a higher rate of interest on judgments obtained in one form of eminent domain proceeding than in another, as may result from the current provisions of AS 09.55.440(a) and AS 09.55.330. We strongly urge the legislature to consider amending what appears

to be a defect in the current statutory scheme. But we decline to repeal by judicial action the clear and unambiguous provision of an enactment of the legislature on the grounds that it must be an oversight.

Although the Alaska Supreme Court's recognition of the doctrine of separation of powers is admirable, landowners in the State of Alaska remain in need of an amendment to bring the rate of interest under a declaration of taking eminent domain proceeding in line with the other interest rate provisions in the Alaska statutes.

Since Senate Bill No. 19 will focus the legislature's attention on interest rate matters, it would seem an amendment or amendments may be attached to the bill which will remedy the inequitable situation described above. I would recommend for your consideration amendments to Senate Bill No. 19 along the following lines:

1. Insert a new Section 3--"AS 09.55.440(a) is amended to read:

   (a) Upon the filing of the declaration of taking and the deposit with the court of the amount of the estimated compensation stated in the declaration, title to the estate as specified in the declaration vests in the plaintiff, and that property is condemned and taken for the use of the plaintiff, and the right to just compensation for it vests in the persons entitled to it. The compensation shall be ascertained and awarded in the proceeding and established by judgment. The judgment shall include lawful interest [AT THE RATE OF SIX PERCENT PER YEAR] on the amount finally awarded which exceeds the amount paid into court under the declaration of taking. The interest runs from the date title vests to the date of payment of the judgment.

2. Renumber present Section 3 of Senate Bill No. 19 as Section 4.

I am enclosing for your convenience a copy of the relevant section from State of Alaska v. Alaska Continental Development Corporation and Alaska General Properties, Inc., No. 2254, December 31, 1980, and a version of Senate Bill No. 19 with the suggested amendments. Please feel free to contact me should you have any questions or need for further information with respect to this matter. I thank you for your time and consideration.

Very truly yours,

Steven S. Tervooren

cc: Senator Mulcahy, Chairman
Senate Labor and Commerce Committee

Mr. Chairman, I am John E. Malarkey, State Bank Commissioner for the State of Delaware, and Vice Chairman of the Federal Legislation Committee of the Conference of State Bank Supervisors on whose behalf I am appearing today. The Conference is the nationwide organization of state officials who serve as the primary chartering, examining and regulatory authorities for approximately 10,500 state-chartered commercial and mutual savings banks with total assets of approximately $500 billion.

My comments this morning will focus on the proposal to establish a Consumer Usury Study Commission. Although I am not aware of the full details of your proposal, the Conference is very concerned about federal preemption of states in the usury area and the need for a broader recognition of the efforts of states to establish greater flexibility in the lending area in order to meet the credit needs of their residents.

I note that your proposed Study Commission would be directed to the question of federal preemption of state usury ceilings and to possible alternatives to further federal preemption as well as to a number of other related areas. The Conference always has stressed its position that in setting usury ceilings, the states are in a better position to more responsively reflect the needs of their respective citizens than is the federal government. That is still our basic position, even though we have seen in recent months usury ceilings in a number of states become anachronistic, in part because of underlying conditions over which states had no direct

Mr. Roger D. Moore, President
SECURITY NATIONAL BANK
Pouch 7-777
Anchorage, Alaska 99510

Dear Mr. Moore:

RE: Interest rates applicable under Depository Institutions Deregulation and Monetary Control Act of 1980

I am enclosing a copy of an Attorney General's Opinion #J-66-452-81, dated January 2, 1981, for your information and comment. You will note that the text of this opinion is specifically directed to state-chartered credit unions. However, this division has had further contact with Ms. Leslie Ludtke, and she has informed me that this opinion is applicable to all insured despository institutions. 3672

This opinion effectively establishes three loan categories which are as follows:

1. Loans under $25,000 which the maximum interest rate allowable is 8 percentage points above the Federal Reserve Discount Rate as calculated on the first of the month proceeding the end of the calendar quarter.

2. Loans from $25,000 to $100,000 which the maximum interest rate allowable is 5 percentage points above the Federal Reserve Discount Rate as calculated on the 25th of the month proceeding the end of the calendar quarter.

3. Loans in excess of $100,000 which have negotiable interest rates.

If there are any questions, please contact this division at 465-2521.

Sincerely,

Willis F. Kirkpatrick
Director

MEMORANDUM State of Alaska

TO: Julius Brecht
Banking & Securities
Dept. of Commerce and Economic Development

DATE: January 2, 1981

FILE NO: J-66-452-81

TELEPHONE NO: 465-3675

FROM: WILSON L. CONDON
ATTORNEY GENERAL

SUBJECT: Depository Institutions Deregulation and Monetary Act of 1980.

By: Leslie J. Ludtke
Leslie J. Ludtke
Assistant Attorney General

You have requested this department's opinion regarding interest rates applicable to state chartered credit unions under the Depository Institutions Deregulation and Monetary Control Act of 1980. (Public Law 96-221) You have asked whether 12 U.S.C. §1757(5)(A)(vi) (1980 Deregulation and Monetary Control Act §310) applies to state chartered credit unions. We conclude that it does not.

Section 1757 of the federal Credit Union Act applies only to federally chartered credit unions. 12 U.S.C. § 1757 states that "A federal credit union . . . shall have power." The term "federal credit union" is defined under 12 U.S.C.. § 1752 as "a cooperative association organized in accordance with the provisions of this chapter . . ." Therefore, the provisions of 12 U.S.C. § 1757 do not apply to state chartered credit unions. 12 U.S.C. § 1757(5)(A)(vi) provides in part:

> (vi) the rate of interest may not exceed 15 per centum per annum on the unpaid balance inclusive of all finance charges, except that the Board may establish
> (I) after consultation with the appropriate committees of the Congress, the Department of Treasury, and the Federal financial institution regulatory agencies, an interest rate ceiling exceeding such 15 per centum per annum rate, for periods not to exceed 18 months, if it determines that money market interest rates have risen over the preceding six-month period and that prevailing interest rate levels threaten the safety and soundness of individual credit unions as evidenced by adverse trends in liquidity, capital, earnings, and growth;

Recently, the National Credit Union Administration (NCUA) Board raised the interest rates under this section to 21 percent. This rate supercedes the otherwise applicable rate established in 12 U.S.C. § 1785(g)(1) (1980 Deregulation and Monetary Control Act § 523). In relevant part, this section states:

> (g)(1) If the applicable rate prescribed in this subsection exceeds the rate an insured credit union would be permitted to charge in the absence of this subsection, such credit union may, notwithstanding any State constitution or statute which is hereby preempted for the purposes of this subsection, take, receive, reserve, and charge on any loan, interest at a rate of not more than 1 per centum in excess of the discount rate on ninety-day commercial paper in effect at the Federal Reserve bank in the Federal Reserve district where such insured credit union is located or at the rate allowed by the laws of the State, territory, or district where such credit union is located, whichever may be greater.

Additionally § 528 of the 1980 Deregulation and Monetary Control Act provides that if one or more provision of the Act, or of any other law, applies to the same loan, the loan may be made at the highest applicable interest rate. The issue raised is therefore whether state chartered credit unions may charge 21 percent interest as authorized by 12 U.S.C. §1757(5)(A)(vi) or whether state chartered credit unions are limited to the rate set by 12 U.S.C. § 1785 when federally chartered credit unions are permitted to charge a higher rate under 12 U.S.C. § 1757(5)(A)(vi). Our conclusion that state chartered credit unions are not permitted to charge the higher rate established by the NCUA Board under 12 U.S.C. § 1757(5)(A)(vi) is based on three factors.

First, 12 U.S.C. § 1757 is not directly applicable to state chartered credit unions. This section sets out the powers which a federal credit union may exercise. The NCUA regulates the activities of federal credit unions by adopting rules to carry out this section. The activities of state chartered credit unions are not regulated by the NCUA and state chartered credit unions are not subject to the limitations nor are they granted the powers of federal credit unions under 12 U.S.C. § 1757. The conference report on the 1980 Deregulation and Monetary Control Act reinforces the conclusion that state chartered credit unions are not subject to 12 U.S.C. §1757.

The report states in part:

> The conferees adopted a provision which would allow federal credit unions to raise their loan rates up to an annual rate of 15 percent subject to rules issued by the National Credit Union Administration. The legislation would also permit the National Credit Union Administration to raise the loan ceiling above 15 percent for periods not to exceed 18 months, after consultation with appropriate Congressional committees, the Department of Treasury, and the other federal financial regulator agencies. 1980 Deregulation and Monetary Control Act. CCH Reports, paragraph 2036, pg. 211.

State chartered credit unions are, however, subject to regulation under 12 U.S.C. § 1785 which sets out the requirements governing federally insured credit unions. State chartered credit unions are federally insured. The Conference Report on 12 U.S.C. § 1785, 1980 Deregulation and Monetary Control Act § 523, states in part:

> State usury ce[illegible]gs on all loans made by Federally in[illegible]ed depository institutions (except national banks), and small business investment companies will be permanently preempted...

Because state chartered credit unions are federally insured depository institutions, the preemptive interest rate set out in 12 U.S.C. § 1785(g)(1) applies.

Secondly, 12 U.S.C. § 1785(g)(1) permits state chartered credit unions to charge interest at a rate of "not more than 1 per centum in excess of the discount rate on ninety-day commercial paper in effect at the Federal Reserve bank in the Federal Reserve district where such insured credit union is located or at the rate allowed by the laws of the State...where such union is located..." The phrase "at the rate allowed by the laws of the State" has been interpreted to mean at the highest rate allowed by the state to be charged by any lender for a particular type of loan.

For example, small loan licensees are permitted to charge a higher rate of interest under AS 06.20 for loans under $25,000 than other financial institutions may charge for these same loans.

Therefore, 12 U.S.C. § 1785(g)(1) would permit a federally insured state chartered credit union to charge the same rate as the small loan licensee for a loan under $25,000. 1/

The phrase "at the rate allowed by the laws of the State" is derived from the National Bank Act, 12 U.S.C. § 85, and is commonly referred to as the "most favored lender" doctrine. This doctrine originally was established to ensure parity between national banks and state chartered financial institutions. It allows a national bank, or in this instance a federally insured, state chartered credit union, to charge the same interest rate as any state chartered or licensed financial institution would be permitted to charge on a particular type of loan. 2/ The national bank, or state chartered credit institution, is granted parity by being permitted to charge the highest rate allowed for the state's most favored lender. The doctrine therefore focuses on the type of loan offered rather than establishing parity with the same type of financial institution. 12 U.S.C. § 1785(g)(i) incorporates this concept of most favored lender. It does not, however, establish a state chartered credit union's right to parity with a federally chartered credit union.

1/ The fact that a credit union is not licensed under AS 06.20 would not alter this result. See n.2, below.

2/ In Marquette Nat'l Bank v. First of Omaha Corp., 439 U.S. 299, 314 (1978) the Court stated that the "most favored lender" doctrine had "been interpreted for over a century to 'give advantages to National banks over their state competitors'." 12 C.F.R. § 7.7310 incorporates the "most favored lender doctrine", as expressed by case law, into the regulations of the Comptroller of the Currency. 12 C.F.R. § 7.7310 reads:

> §7.7310 Charging interest at rates permitted competing institutions . . .
>
> (a) A national bank may charge interest at the maximum rate permitted by State law to any competing State-chartered or licensed lending institution. If State law permits a higher interest rate on a specified class of loans, a national bank making such loans at such higher rate is subject only to the provisions of State law relating to such class of loans that are material to the determination of the interest rate. For example, a national bank may lawfully charge the highest rate permitted to be charged by a State-licensed small loan company or morris plan bank, without being so licensed.

The "most favored lender" doctrine refers to the highest permissible rate under state law. The authority to charge 21 percent on loans, under 12. u.s.c. § 1757(5)(A)(vi) is not a right granted by state law, but a right given by federal law. No law of Alaska specifically allows any financial institution to charge on a loan. Nor does state law incorporate any maximum rates set under federal law in establishing allowable state maximums. Therefore, although the concept of most favored lender is incorporated into 12 U.S.C. § 1785(g)(i), state chartered credit unions are not granted parity with federal credit unions. To construe the phrase "at the rate allowed by the laws of the State" to include the rate permitted by 12 U.S.C. 1757(5)(A)(vi) would constitute a misapplication of the "most favored lender" doctrine.

Third, Section 528 of the 1980 Deregulation and Monetary Control Act does not authorize state chartered credit unions to charge the rate set by the NCUA Board under 12 U.S.C. § 1757 (5)(A)(vi). This section reads:

> Sec. 528. In any case in which one or more provisions of, or amendments made by, this title, section 529 of the National Housing Act, or any other provision of law, including section 5197 of the Revised Statutes (12 U.S.C. 85) apply with respect to the same loan, mortgage, credit sale, or advance, such loan, mortgage, credit sale, or advance may be made at the highest applicable rate.

This section permits financial institutions to charge interest at the "highest applicable rate". Because we have concluded that 12 U.S.C. §1757(5)(A)(vi) does not apply to state chartered credit unions, Section 528 does not by its terms permit state chartered credit unions to charge a higher rate of interest than what would otherwise be permitted by 12 U.S.C. § 1785(g)(1). Section 528 authorizes the lender to charge the higher rate only when "one or more provisions. . .apply with respect to the same loan". 12 U.S.C. § 1757(5)(A)(vi) does not apply to loans made by state chartered credit unions.

It is our conclusion that state chartered credit unions are limited to charging the maximum interest rate established by 12 U.S.C. § 1785(g)(1). Although this provision incorporates the "most favored lender" doctrine, it does not grant state chartered credit unions most favored lender status with regard to interest rates set by federal law.

Additionally, it should be noted that the reference to state interest ceilings in 12 U.S.C. § 1785(g)(1) incorporates the relevant state law as to how interest may be computed and what charges are considered interest. 3/

ISSUES & COMMENTARY

ALASKA DEPARTMENT OF LABOR, RESEARCH AND ANALYSIS SECTION APRIL 1981

SHOULD ALASKA OPT OUT OF THE FEDERAL/STATE UNEMPLOYMENT INSURANCE SYSTEM?

By Scott T. Hannigan

The Social Security Act of 1935 established an Unemployment Insurance (UI) program in the United States under joint federal/state management. The major role of the federal partner was administration of a uniform employer tax to fund the program. States were encouraged by the Act to pass local UI legislation with the reserved right to set qualifications and standards for the payment of unemployment compensation. The Act contained provisions for employers to receive credit against the federal tax for contributions to a state UI plan and for states to receive grants to administer their programs. The availability of employer tax credits and state administrative grants were made contingent upon states' compliance with certain features in the Social Security Act. These features were generally found acceptable to the states and a nationwide federal/state UI program was in full effect by 1937. Over the ensuing years, however, numerous amendments to the Act and additional UI legislation by Congress (requiring conforming state legislation) has led to conflicts in the federal/state partnership. The federal government has generally held the upper hand in these conflicts by virtue of the enormous financial clout provided by the tax credits and administrative grants provisions of the Social Security Act. This paper will review the historical beginnings of the federal/state UI program, some of the conformity issues facing the states, and the possibility of future changes including complete separation of the federal and state systems.

Prior to 1935, states had no programs to provide assistance to the unemployed, with the notable exception of Wisconsin, which legislated a comprehensive UI law in 1934. The major obstacle to enactment of UI laws at the state level was directly related to taxes. Specifically, it was felt that a new tax burden on employers would have a detrimental effect on interstate competition. Congress eliminated this obstacle by passing (as part of the Social Security Act) Title IX, which levied a uniform tax on all employers in the country. Title IX allowed employers a 90 percent credit against the tax if they contributed to an approved state UI program. The remaining ten percent of the tax assessment was returned to the states in the form of administrative grants. These financial incentives in Title IX plus the deepening crisis of the 1930's depression strongly encouraged enactment of state UI laws and all states had unemployment insurance programs in operation by 1937. Provisions of Title IX were removed from the Social Security Act and were placed in the Internal Revenue Code by the Federal Unemployment Tax Act of 1939 (FUTA).

Original proponents of the Social Security Act vigorously debated the type of UI program to be recommended--a wholly federal system or a federal/state plan. Arguments for a national system included, among others, that a national system would provide uniform protection from the risks of unemployment, protect the interests of multi-state employers and workers, provide for a national pooling of reserves, and streamline reporting requirements and the payment of taxes. Those who favored a federal/state program argued that a national system would be cumbersome to operate, that centralization would tend to paralyze action, that controversial issues would not receive proper debate and discussion by the states, and that a federal/state system would allow states to tailor the program to fit their needs and would allow wide latitude for experimentation by the states and so aid in producing a better system.[1/] The federal/state plan was the one that finally emerged.

The issues of conformity have existed since the very start of the unemployment insurance program. The Social Security Act contained several provisions that the states were to comply with. Titles III and IX of the Act required state UI laws to include the following major provisions: (1) payment of UI benefits solely through public employment offices or other approved agencies, (2) opportunity for a fair hearing on denied claims, (3) payment of all tax monies collected to the U.S. Treasury (Unemployment Trust Fund), (4) expenditure of all money requisitioned from the Trust Fund for UI benefits only, (5) no benefits to be paid until two years after commencement of tax collections, and (6) several provisions protecting conditions of work acceptance by claimants. Other provisions refer to administrative and reporting requirements. To enforce state conformity to these provisions, the Social Security Act allows for the denial of all employer tax credits and the suspension of state administrative grants. On numerous occasions since the inception of unemployment insurance, Congress has passed amendments to the Act necessitating conforming legislation at the state level. A major example has been amendments that have extensively increased UI coverage to such worker groups as state and local government employees and employees of non-profit institutes.

More recent conformity issues have included pension offset provisions (P.L. 96-364) and provisions of the 1980 Omnibus Reconciliation Act (P.L. 96-499). The pension offset provision requires a reduction of a claimant's weekly benefit by the amount of any pension (attributable to a base period employer) received by the claimant. The Reconciliation Act requires conforming state legislation to deny the payment of extended benefits for voluntary quits and discharges for misconduct regardless of applicable state law for regular benefits (i.e., if state law reinstates benefit entitlement for regular benefits after a penalty period, the entitlement would be cancelled for extended benefits). Failure to accept suitable work (as defined by federal law) or failure to seek work also results in denial of extended benefits.

Even further encroachment by the federal government will occur if recent proposals of the Reagan Administration are adopted. These include (1) changes in the extended benefits program to eliminate the national trigger and to revise the methods of calculating state triggers (both of which determine when extended benefits are to be paid); (2) requirements that unemployed workers who have collected 13 weeks of state UI accept any job that meets minimum wage and safety standards if the wages are equal to or greater than their UI benefits; and (3) eliminate UI for those who leave the military voluntarily.

The rising spectre of federalism in unemployment insurance has caused concern in

---

1/ William Haber and Merril G. Murray, Unemployment Insurance in the American Economy, Richard D. Irwin, Inc. 1966.

Alaska and many other states. In most conformity issues, the states have grudgingly complied with federal legislation because they fear to lose tax credits for their employers and administrative grants for their programs. The mere threat of sanctions has kept states in line and the sanctions have never been fully applied. A specific instance where Alaska has run headlong against the federal government has been on the issue of interstate benefits. In 1955 and again 1960 Alaska reduced the maximum weekly benefit amount to out-of-state claimants in order to curtail the amount of UI dollars leaving the state.* The state was required to retreat from this position in 1972 when Congress decided the practice was discriminatory to the rights of workers to move from state to state seeking employment. This interstate question has become a point of concern in recent years as Alaska has seen one-third of all its UI dollars pouring out of the state, aiding the economies of other states instead of our own. An even larger problem looms in the future amid talk of federal benefit standards requiring a maximum benefit equal to 2/3 of a state's average weekly wages. Alaska traditionally pays more benefits per dollar of total wages than any other state. This standard would put employer costs through the ceiling and could possibly drain the state's trust fund.

Potential solutions to the partnership problem are varied and complex. Many people over the years have advocated complete federalization of unemployment insurance. Most states, however, take a dim view of this type of encroachment on their rights. Another course would be to maintain the present system with some sort of systematic court review of conformity sanctions.2/ The most extreme solution would be for a state to permanently refuse to comply with federal legislation.

The remainder of this paper discusses ramifications if Alaska chooses to remove itself from the federal/state system. The most direct effect would be monetary. Shown below are cost estimates for Alaska's UI program in 1982 comparing an out of conformity situation with a conforming one.

	Estimated Costs for 1982	
	In Conformity	Out of Conformity
State Taxes	$63.6 million	$63.6 million
FUTA Taxes	7.0 million	34.0 million
UI Administration	Federal Grants (From FUTA Taxes)	11.5 million
ES Administration	Federal Grants (From FUTA Taxes)	7.9 million
Extended Benefits (50% Federal)	Federal Reimbursements (From FUTA Taxes)	4.5 million
TOTAL	$70.6 million	$121.5 million

*Ch. 5, ESLA 1955 and Ch. 60, SLA 1960.

2/ Ibid.

The comparison shows that operating the current program while failing to conform to federal requirements would result in additional costs of $50.9 million. Most of the cost ($27 million) would be levied on employers as a result of lost FUTA tax credits. Employers might also be expected to pay administrative costs as well as funding full benefit outlays. If that were the case, employer costs would increase by approximately seventy percent. This burden could be reduced if employee contributions were increased and/or the state absorbed administrative costs.

One major question of the conformity issue concerns federal responsibility if employers opt to pay the full FUTA tax. The system was designed to pay benefits equal to 2.7 percent of taxable wages. Of the three percent FUTA tax, this 2.7 percent was to be dropped if employers contributed to the benefit fund of an approved state program. The implication is clearly that the 2.7 percent was to be used for paying benefits. Further, if employers opt to pay the full FUTA tax, the implication is that no state taxes would be necessary because the federal partner should be responsible for benefits.

The system was not--at least, should not have been--designed to coerce states into setting up their own unemployment insurance programs. Since costs would be three percent of taxable wages under a state or federal system, states would obviously find it attractive to design systems to fit their own social and economic conditions rather than accept standards determined in Washington. This "logical interpretation" does not coincide with the "legal interpretation." According to an unofficial opinion of the Solicitor General, the federal government has no power to implement an unemployment insurance program in any state. In other words, the system was designed to force states to implement unemployment insurance programs via making them pay for one whether they have one or not.

Failure to maintain an approved program would result in the 2.7 percent "credit" flowing into the federal administrative account rather than a benefit account, with the state receiving no funds in return. No state has informed the federal partner that it intends to drop its own program in favor of federalization and so the position remains unchallenged. It is conceivable that the "back door" federalization now in progress will change this situation in the future. The issue is not a simple one and raises a host of questions about the federal/state relationship. Some alternative relationships that might be considered for the operation of an unemployment insurance program in Alaska are discussed below.

The discussion centers on estimates of the average employer cost per worker (with annual earnings at or above the taxable wage base of $13,[illegible] and includes the current system for comparison purposes.

CURRENT SYSTEM		
FUTA Tax (0.7% of first $6,000)†	=	$ 42
State Tax (3.3% of first $13,300)	=	439
TOTAL TAX	=	$481

One (untested) alternative is to drop the state system in favor of a federal program funded from the maximum FUTA tax. Employers would then pay the full FUTA tax of $204 per employee and all program provisions would be determined in Washington.

FEDERAL SYSTEM		
FUTA Tax (3.4% of first $6,000)†	=	$204
TOTAL TAX	=	$204

A second alternative would supplement a federal system with a separate state system. Costs would be dependent on the level of benefits the state wishes to provide. The state system would also require administrative funds of approximately $19 million.

An independent state program is a third alternative. The cost figures below assume that the full FUTA tax is paid and that the state receives no funds in return. Obviously the combined cost of running a state system and paying penalty FUTA taxes could exceed the capabilities of many employers to pay. Some form of state assistance may be necessary (especially in light of expected increases in the taxable wage base for FUTA which will probably become effective in 1983 or 1984). The most plausible forms of state assistance are assumption of the liability for FUTA taxes and/or administrative costs and state support of benefits through appropriations to the UI Trust Fund.

INDEPENDENT STATE SYSTEM		
State Tax (3.3% of first $13,300)	=	$439
FUTA Tax (3.4% of first $6,000)	=	$204
Administrative Costs		$120
TOTAL TAX	=	$703

There are a number of areas where Alaska could effect some cost savings if the state were running an independent UI program. Some cost saving areas and approximate dollar amounts are listed below:

†The FUTA tax is set at 3.0 percent of the first $6,000 of each employees wages. The rate was temporarily increased to 3.4% to reduce the national debt in the FUTA account. If a state's UI law is in conformity with federal law, then employers receive a 90 percent credit on their FUTA taxes and pay in effect 0.7 percent (10% of 3.0% = 0.3 + 0.4 added tax = 0.7%).

Discussion of opting out is often the result of frustration with the expanding role of the federal partner and of a realization that this expansion cannot be successfully countered by piecemeal resistance to individual intrusions on state prerogatives.

Before taking a radical step, alternatives should be considered. The level of interference by the federal partner has increased substantially since the unemployment insurance trust funds were placed in the federal unified budget in 1969. In attempts to reduce budget deficits, Congress has enacted several changes to the UI system. Although the changes may have been proposed primarily for their budgetary effect, they have had profound impact on the program and on the nature of the federal/state cooperative arrangement. The key to a return to true partnership may lie in removal of state trust funds from the federal unified budget. Alleviating budgetary pressure may accomplish many of the desirable goals of opting out without some of the negative aspects. That is, removal of the trust funds from the budget could reverse the tendency toward federal intervention and would not carry the potential to destroy the existing federal/state partnership.

Briefing Paper: CSSB50
Conformity Amendments to Unemployment Insurance Law (AS 23.20)
April 28, 1981

Replacing current law with a benefit schedule that pays no extended benefits but pays 32 weeks of regular benefits is expected to cost about $16 million in 1982. Claimants would receive approximately $6 million of this additional cost. The cost analysis is easier understood if broken into three parts. These are explained in the following discussion and summarized in the table below.

Eliminating variable duration and adopting a fixed 26 week duration would give an additional $12.1 million to claimants. Naturally, employers must pay this cost, but additional costs would be incurred when some claimants shift from extended benefits (for which the state and feds pays equal shares) to regular weeks (for which the state pays the full amount). This cost would be approximately $2.7 million in 1982 and brings employer costs to $14.8 million.

In going from a 26 week program (still paying EB) to the 32 week proposal with no EB, benefit amounts would be unaffected but contributions would have to be increased to cover the federal share of weeks 27 through 32. This amounts to half of the $8.2 million payable to that group, or $4.1 million. Elimination of weeks 33 through 39 would save the trust fund $3 million, but claimants would lose $6 million of combined state and federal funds.

Effect of Replacing Current Law with a Program
Paying 32 Weeks of Regular Benefits and No EB
(Estimates for 1982)

	Employer Cost/(Savings)	Claimant Gain/(loss)
Elimination of variable duration	$14.8 million	$12.1 million
Federal share of weeks 27-32	4.1	0
Nonpayment of weeks 33-39	(3.0)	(6.0)
TOTAL	$15.9 million	$ 6.1 million

In considering this proposal, several other points should be discussed. Some of these are listed below.

1. The work search and acceptance requirements in CSSB50 are federal conformity issues. Alaska will be out of conformity if we fail to pass all of CSSB50, even if Alaska adopts a 32 week program and does not pay extended benefits. Whether we are out of conformity by a little or a lot makes no difference -- the penalty is the same. The impact of failure to conform is massive and was communicated in the latest "Issues and Commentary".

2. There are three variables which affect benefit outlays in the unemployment insurance program -- benefit amount, duration of benefits, and eligiblility. These variables were balanced in the law adopted last year and altering only one of the three will throw the system out of balance.

3. Interstate benefits would be payable for 32 weeks rather than the 21 week average payable (under the revisions included in CSSB50) to claimants in states not triggered on to the extended benefits program. This factor is not included in the estimates above, and would add about $1 million to costs.

4. The 32 week proposal would reduce potential duration for the 42 percent of claimants who presently qualify for more than 32 weeks.

5. With duration fixed at 32 weeks and no EB, people with strong attachment to the labor force would get 7 weeks less entitlement than today while claimants with very weak attachment would get 8 weeks longer duration than today. Some claimants could be entitled to more than they earned: e.g. claimants with earning of $1,000 would be entitled to ($34 x 32 =) $1,088 instead of $816 ($34 x 24) as today.

6. Coupled with the current benefit schedule, fixed duration provides a disincentive to work, particularly for claimants with weak attachment to the labor force. This increases the potential for abuse and causes additional costs which are hard to measure and have been omitted from the estimates.

Mr. John Quinn
Naval Security Group
Adak, Alaska 99695

Dear John:

Thank you for your comments on CSSB 50.

The bill was not referred to the Judiciary Committee before it passed the Senate. The bill is now in the House Labor and Commerce Committee, chaired by Representative Hurlbert. I have taken the liberty of forwarding a copy of your remarkes to him for his information.

I appreciate your thoughts on the matter.

Sincerely,

Senator Patrick M. Rodey
Chairman

RECEIVED
APR 16 1981

Dear Pat

I would like to know if CSSB50 which you opposed has been put through the judiciary committee to determine the bills constitutionality. It is very logical that a person would move to a state with very low unemployment inorder to seek meaningful work. Under this bill if I relocate to a high unemployment state, then I can be eligible for benefits. I would like to hear from you and wish your associates in the House will see the contradiction in the Bill outlined above.

Best Wishes

John Quinn

Bill No. Senate Joint Resolution No.

Date April 20, 1981

Title Relating to exclusion of state unemployment insurance trust funds from the federal unified budget.

Contact: Judy Knight JK 465-2700

Funds used for unemployment compensation are generated by payroll taxes enacted by State Legislatures. These funds can be used only to pay unemployment compensation in the state in which they were collected and are held in trust by the federal government and drawn as needed to pay benefits. Since 1969, these funds have been included in the unified budget. The "bottom line" impact of inclusion of state trust funds in the unified budget is that all unemployment compensation--including benefits paid completely from dedicated state funds--appear as federal outlays. This makes unemployment insurance programs the target for budget-balancing proposals such as taxation of benefits, pension offsets, removal of extended benefit claimants from the computation of unemployment rates, and other cost-cutting proposals like those included in the Omnibus Reconciliation Act of December 5, 1980.

In addition to those set out in the Resolution itself, there are a number of other reasons unemployment compensation trust funds should not be included in the unified budget, as follows:

1. The majority of the federal payroll tax is not collected from employers, but is credited if employers participate in an approved state program and are subject to contribution rates set by the state.

2. The operations of the U.S. Treasury do not require that the accounts be included in the unified budget. The Treasury currently handles accounts for several "off-budget" agencies.

3. Basic program decisions--level and duration of benefits, contribution mechanisms, eligibility, and many administrative functions--are almost entirely in the hands of state legislators.

Policy calling for removal of funds has been adopted by the National Governors' Association, the Interstate Conference of Employment Security Agencies, the Federal Advisory Council on Unemployment Insurance, and the National Commission on Unemployment Compensation. These policy positions were adopted recently and the issue is not yet well-known in Congress. One way to speed consideration of this important issue is to ensure that states' Congressional delegations recognize the impact of inclusion of state unemployment trust funds in the unified budget and are aware of the states' strong desire to remove the funds from the budget. The proposed resolution could be used to convey Alaska's sentiment on this issue to rational policy-makers.

Position: The Department of Labor supports the proposed resolution and recommends immediate approval.

POSITION PAPER/Department of Labor

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 50
SECTION BY SECTION ANALYSIS

Section 1: AS 23.20.362

This section repeals and re-enacts AS 23.20.362 with the following changes:

1) The pension deduction provision required by Sec 3304(a)(15), FUTA, is amended to conform with Public Law 96-364. Under this amendment, a pension would be deductible from benefits otherwise due only if the pension is provided under a plan maintained or contributed to by a base period employer, and the claimant's service in his base period increased the amount of, or affected his eligibility for, the pension or other retirement pay. In addition, that portion of the pension attributable to the claimant's own contributions will not be deducted from his benefit amount. Public Law 96-364 does not require these changes to state pension deduction provisions; rather, it allows the state this option of liberalizing the required provisions. However, the changes are equitable and would benefit Alaskan workers. For example, the previous provision required a 100% deduction even if part or all of the pension was based on employee contributions. This, in effect, penalized individuals for saving some of their wages by deducting amounts which had actually been earned long before the unemployment insurance claim was filed.

2) The proposed amendment also distinguishes between pension payments and payments received for dismissal pay, accrued vacation and sick leave, or holidays. The previous provision had the effect of prohibiting deductions for dismissal pay, vacation pay, or holiday pay unless the week <u>began</u> in a period for which such payment was made. The proposed amendment provides simply that any such payment attributable to a week will be deducted from benefits payable for that week. Sick leave has been added to the list of deductible payments. The rationale for deducting vacation pay, holidays, etc., applies to sick leave as well.

Section 2: AS 23.20.375(b)

This section repeals and re-enacts AS 23.20.375(b) to require a waiting week on all claims. The current provision waives the waiting week requirement on transitional claims. However, Public Law 96-499 now requires that any state which provides for payment "(at any time or under any circumstances) of regular compensation to an individual for his first week of otherwise compensable employment" will not be reimbursed for the federal share of the first week of extended benefits paid in the state. This requirement is not a standard for certification of state laws. The requirement must be met, however, if the state is to receive the 50% reimbursement of the federal share of the first week of extended benefits. This amendment conforms to Public Law 96-499.

Section 3: AS 23.20.390(b)

This section makes <u>both</u> "good faith" and "hardship" a requirement for waiver

of overpayments. The current provision allows an individual who has not acted in good faith to nevertheless be absolved from liability for repayment if he can show that great hardship would result from charging him with repayment.

Section 4: AS 23.20.406

This section amends AS 23.20.406 by adding new eligibi requirements for receipt of extended benefits. These requirements are c formity standards established by Public Law 96-499 and must be included in a state's law for weeks beginning after March 31, 1981, in order for the law to be certified by the Secretary of Labor on October 31, 1981, and thereafter.

The amendments require the following:

1) Denial of extended benefits to an individual who has been disqualified for regular UI benefits for voluntary quit, discharge for misconduct, or job refusal, unless the disqualification was terminated by subsequent employment.

2) Denial of extended benefits to an individual who does not actively seek, apply for, or accept suitable work when referred to such work. Suitable work is specifically defined in the provisions. The disqualification can be terminated only by new employment of at least four weeks and earnings of four times the weekly benefit amount.

Section 5: AS 23.20.408

This section amends AS 23.20.408 to specify that only the first two weeks of extended benefits are payable to an individual who files on an interstate basis from a state in which an extended benefit period is not in effect. This change is required, for certification of all state laws, by Public Law 96-364.

This amendment was requested by Alaska and introduced by Senator Stevens. House Joint Resolution No. 59 passed by Alaska's Legislature last year supported this change.

The provisions of Sections 1, 2, 4, and 5 are conformity issues to comply with federal law.

MEMORANDUM State of Alaska

TO: The Honorable Terry Gardiner
Representative

DATE: February 26, 1982

FILE NO:

TELEPHONE NO:

FROM: Mary Halloran MHalloran
Special Assistant to
the Commissioner
Department of Natural Resources

SUBJECT: Impact of Proposed Budget Reductions on DNR's Permitting Procedures

Per your request, this memorandum identifies the Department of Natural Resources' projects eliminated or reduced at the proposed $35.0 million funding level which would impact the agency's ability to issue permits.

The definition of "permit" under SB 84 (both the 2nd rules and the latest draft versions) includes all agency authorizations and approvals, including those in conjunction with disposals of an interest in land. Thus, the legislation is more encompassing than might be evident at first glance.

PERMIT-RELATED PROJECTS IMPACTED BY $35.0 MILLION FUNDING LEVEL

Priority	Original Request	Revised Request	Positions Eliminated	Projected Name & Consequences of Reduced Funding
20	1283.2	1184.2	2.0	Water Rights Admin.
	This revision would reduce number of water rights adjudicated particularly in placer mining area, reduce from 5 to 4 the number of basin wide adjudications, and will increase backlog in water permitting.			
48	31.0	-0-	0.5	Geothermal Lease Sales
	This revision would eliminate a proposed geothermal lease sale for FY 83 and will eliminate the issuance of 15 anticipated non-competitive permits and leases.			
69	374.3	-0-	7.7	Preference Rights
	This deletion would eliminate processing of preference rights applications. Consequently, claims would be resolved by lawsuit.			
83	59.7	-0-	1.0	Interagency Water
	This deletion would reduce coordinated reviews with ADF&G and DEC regarding water permits and projects which affect water use and quality; where reviews are done separately, they may require more time.			

Also affected indirectly would be another project:

91	203.6	60.6	4.0	Public Information

This revision would reduce the number of public information officers from 5 to 1 and would drastically reduce public responses and referrals and information dissemination by DNR. Public Information Officers serve as the Department's "intake" personnel for permits.

98	2[illegible].6	-0-	2.0	Water Mgmt. Plans

This deletion would eliminate computerizing water data for use in adjudication, increasing the time necessary for adjusication.

The above-listed figures do not include additional costs that will be incurred as the specific result of the adoption of SB 84. Those costs will be covered in a fiscal note to be submitted by the Department.

We hope this information is of help to you as the Legislature continues its deliberation of this legislation.

under the Appellate Rules of Procedure. Unless the applicant and the agency otherwise agree, [T]the time period may not be extended more than 120 days beyond the time period specified in AS 44.62.632(a).

Passed

AMENDMENT 3

Page 4, lines 6 -- 29

Delete all of sec. 44.62.635(a) and (b) and insert the following in its place:

(a) There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which include the conveyance of an interest in state land or water or at least one class II permit decision. The lead agency may vary for classes of activities, but shall be that agency that has principal responsibility for authorizing the overall activity. For classes of activities for which no agency with principal responsibility exists the governor shall designate a lead agency by administrative order no later than October 1, 1982. In performing its functions under this section the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40. The lead agency shall balance competing factors in reaching its decision. Substantive consideration shall be given to the comments of resource agencies within their primary areas of expertise.

(b) If a coastal resource district with an approved and applicable district coastal management program appeals the lead agency's consistency determination, AS 44.62.560--44.62.570 govern judicial review. However, notwithstanding

4640.100

AS 44.62.570(c), abuse of discretion is established if the reviewing court determines that the consistency determination is not supported by a preponderance of the evidence in the administrative record.

AMENDMENT 4

Page 5, ls. 1-2.

(c) Except as otherwise required by federal law, [N]no state agency other than the lead agency may comment to a federal permittingaagency.

AMENDMENT 5

Page 5, ls. 3-5.

Delete existing subsection (d) and insert the following:

(d) For activities involving both a disposal of interest in land, or plan of operations approval under a previous disposal, and a certification under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341), the lead agency shall be the Department of Natural Resources.

AMENDMENT 6

Page 5, lines 22 - 23.

Administrative appeals [EXCEPT AS PROVIDED IN THIS SECTION THE PROCEDURE IS] conducted under this section need not comply with AS 44.62.330 - 44.62.630.

(b) In performing its function under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40. The lead agency shall consider facts, data, opinion, conclusions or recommendations submitted by the commenting agency and the coastal resource districts within their areas of expertise. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise on the balancing of competing factors.

(c) In its consideration of the comments of other resource agencies, the lead agency shall give substantive consideration to the facts and data, and to the (opinions, conclusions or recommendations substantiated by said facts and data) which are submitted by commenting agencies within their primary areas of expertise. An opinion, conclusion or recommendation is adequately substantiated under this subsection if it is based on facts or data reasonably relied upon by experts in the field.

(d) If a coastal resource district with an approved and applicable district coastal management program appeals the lead agency's consistency determination, AS 44.62.560 -- 44.62.570 govern judicial review. However, notwithstanding AS 44.62.570(c), abuse of discretion is established if the reviewing court determines that the consistency determination is not supported by a preponderance of evidence in the administrative record.

The Honorable Jack Fuller
Chairman
Administrative Regulation Review Committee
Pouch V, State Capitol
Juneau, Alaska 99811

Re: Analysis of Uniform Permit Procedures Regulations

Dear Representative Fuller:

As promised in our letter of May 29, we are pleased to submit our detailed analysis of the Uniform Permit Procedures Regulations which are being adopted by the Administration.

Regulatory Reform History in Alaska

In early 1979, Governor Hammond initiated efforts within his Administration toward specific regulatory reform objectives. Wide public appeals were made for assistance in identifying troublesome and onerous regulations. AOGA was also concerned about unnecessary regulations and established a Regulatory Reform Coordinating Committee (RRCC) to work with the Administration.

During the past two years, AOGA's RRCC analyzed regulations and procedures which have a significant impact on our industry. It found a pattern of duplication, layering, unnecessary time delays and unreasonable operating requirements.

During the same period, Bill McConkey first undertook an analysis for the Administration and later for the Legislature and reached similar conclusions. In his December 1980 report to the Legislature, he recommended extensive revision of the regulatory process, including in particular the adoption of legislation establishing permitting time limits such as contained in CSSB 84.

In response to the effort of Mr. McConkey and others, and the support for SB 548 in last year's session, the Administration has proposed Uniform Permit Procedures Regulations (22 AAC 10) as an alternative to legislation. At a press conference on December 5, 1980, Governor Hammond stated that the permit regulations were being written to establish firm reasonable deadlines by which permit decisions must be reached in order that individuals and businesses do not waste time as a result of procedural delays. It is our judgment that these regulations are the antithesis of regulatory reform and do not meet the objectives of regulatory reform.

Regulatory Reform Objectives:

True regulatory reform should accomplish the following:

1. Streamline the coastal management consistency approval process.

2. Decrease permit processing time.

3. Provide certainty in the timely processing of permits to facilitate project planning.

4. Reduce duplication and redundancy.

5. Decrease permit processing costs to both applicants and government.

6. Simplify the permit process to require fewer state employees, and

7. Establish a lead agency.

Failure to meet Regulatory Reform Objectives:

In contrast to the above objectives, the regulations only succeed in accomplishing the direct opposite. The regulations fail to meet these objectives as follows:

1. The coastal zone consistency determination procedures are not streamlined. The regulations grant ultimate control to local districts over resource development projects on state land. This jeopardizes the freedom the state needs to encourage development of its natural resources in the coastal zone. The regulations undermine the objective of obtaining a single consistency determination for projects. The existing problems with joint state/federal permits

are perpetuated and intensified.

2. According to a memo from a Division in the Department of Natural Resources dated January 2, 1981, permit processing time will be increased. In fact, the Division estimates the new regulations will almost double the processing time. Although the estimate was made on an earlier draft, the Division indicates the estimates would not be changed significantly for the final regulations.

3. Substantially new and complex procedures are established which create uncertainty through the provisions for public hearing and appeals. In addition, the new regulations provides numerous opportunities for litigation by third parties. The regulations are so complicated that procedural errors are inevitable, hence creating the basis for legal challenges. Special interest groups are given extraordinary access to the day to day decisions of duly authorized agencies responsible for regulating development of the state's resources. They invite individuals to file capricious appeals, thereby blocking approval of development permits.

4. The new regulations institutionalize and expand existing duplication. The inter-agency review section and the relevant definitions are unduly complicated. Under these regulations, the same agency may review the same project in order to (a) issue a permit under its own authority; (b) comment on an application in the inter-agency review coditied by the regulations; and (c) comment on a federal permit application. Further, the regulations give the agency authority to create law by stipulation, a procedure not endorsed by state statute.

5. The permit processing costs to both industry and the state will be increased. One division of the Department of Natural Resources has estimated it will cost an additional $200,000 per year to implement the regulations affecting oil and gas operations. Since this estimate involves the regulation of only one industry by one division of one of the agencies, it seems likely that the total cost of implementation will be substantial. The increased complexity will require dedication of more people by industry to the permitting process. Delay in the permitting process will result in less efficient utilization of people and equipment on the project. Legal costs to both industry and government will be increased because of the appeals process. Increased lead times will add to the costs of projects as materials and equipment are held on a standby or non-productive basis while waiting on permit approval. The resulting

increased cost will ultimately be borne by the public.

6. More, rather than fewer, state employees will be required to implement these provisions. One division has estimated that four additional employees will be required to process permits and it seems reasonable to assume that other divisions and agencies will also require additional employees.

7. Although the regulations purport to establish the "lead agency" concept of handling permit applications, in fact no true lead agency is created. The lead agency is required to give "great weight" to the comments of other agencies. The definition of "great weight" requires the lead agency to prove by a preponderance of the evidence that a proposed stipulation is not justified. This definition is so onerous that a lead agency may elect to accept the stipulation rather than contest its merits. Unless the lead agency is given reasonable discretion to reject proposed stipulations by commenting agencies, it cannot be fairly alleged that a lead agency concept has been adopted.

The Administration claims that these regulations constitute genuine progress in ending some of the regulatory abuses which most annoy the public. We do not agree. The regulations are unworkable and should not be implemented.

Detailed Analysis

Our members have made an extensive and careful analysis of each draft of the regulations and have submitted comments to the Administration at every opportunity. Copies of some of these statements are attached. For the most part these comments have been ignored.

Our article by article comments follow:

ARTICLE I. GENERAL PROVISIONS

22 AAC 10.010 Scope of Chapter

This section requires each of the four departments adopting the regulations to modify its own regulations by classifying its permits and appeals. If these procedural regulations become effective before the individual agencies have revised their current regulations, the entire permitting process may very well come to a halt. Apparently there has been little effort to coordinate the promulgation of the procedural regulations

with the revision of individual agency regulations. These regulations should not be adopted until the substance of individual agency regulations is known.

22 AAC 10.020 Deadline on Permit Issuance:

Under subsection (a)(1), action on permit applications can be postponed for an unspecified period of time by finding that "unusual complex issues" exist. Although the Governor stated in his letter to you that major changes had been made in these regulations as a result of public comment, this open-ended provision has remained in the proposed regulations.

Also under subsection (a)(3), the deadline can be extended if the applicant agrees to "a more lengthy review period". Since the applicant needs the approval to conduct his business, he may have no choice but to agree to a longer period for permit review.

To summarize, there is no enforceable deadline for timely action on permit applications. Certainty in the timely processing should be a major objective of regulatory reform.

22 AAC 10.030 Additional Information

This section establishes two different time periods, depending on class, for agency assessment of the need for additional information. Upon receipt of an application for either a class I or class II permit the agency should immediately assess whether additional information is necessary in order to process the permit. Assessment should not require more time for class II permits than for class I permits. We believe that a 15 day period is adequate for both classes of permits.

This section allows an agency to delay action on a permit application by asserting that "additional information" is required of the applicant. Only one request for information should be allowed by an agency and the additional information required should be clearly specified. This section is another example of the Administration's unwillingness to put teeth in its regulatory reform regulations.

22 AAC 10.040 Signing of Applications

Even this seemingly innocuous provision lends itself to the snarling of the permitting process. Since there is no clear definition of who should be qualified to sign the permit application, the agency can arbitrarily assert that the applicant's representative is not "duly authorized" to sign the application.

This has not been a problem in the past. There is no need to formalize requirements for the signing of applications.

22 AAC 10.050 Oral Public Hearings

Public hearing rights are created by these regulations where none are required by statute. The regulations thus allow an agency to override an implicit finding of the Legislature that no hearings should be required.

A plan of operations for a lease never has required public notice. The new regulations require public notice. These activities are approved pursuant to leases already issued by the state, and are subject to the inter-agency review process set up by MOU's between the deciding agency and the commenting agencies. Plans of operations should not be subject to these regulations.

Under this section, new and complex requirements for public notice and hearings are created. These requirements will complicate and lengthen the permitting process and the approval of the lease plan of operations rather than simplify these procedures. We also point out that additional bureaucrats will have to be placed on the public payroll since the agencies will argue that the requirements for public hearings are a new and additional aspect of its work. Again, these requirements are fundamentally at odds with any genuine effort for regulatory reform.

22 AAC 10.060 Decision on Applications

There is no reason why the agency's decision should contain an invitation to contest the decision. Also, serving a decision on any person requesting a copy or who has made comments on the application is a burdensome requirement.

22 AAC 10.070 Permit Conditions

Delay is not the only problem an applicant faces. He also faces the prospect of having virtually any condition, however ill-conceived or contradictory, imposed on the permit approval. The proposed regulations fail to address this important reform. Under questionable statutory authority or regulations written by the agency, virtually any requirement or condition may be imposed unilaterally on the applicant. Meaningful reform of the regulatory process must place some limits on the conditions which can be placed on the permittee.

The state statutes do not authorize the deciding officer to attach design and operating stipulations to a permit.

22 AAC 10.080 Permit Limitations

Operations in Alaska often require changes from planned activities. Under this section, any minor deviation from the plan described in the application would require the applicant to cease operations under the old permit and go back to the agency for a new or amended permit.

The requirement for the agency to determine if a change in plans will result in "significant adverse impacts" brings in a whole new procedure. An affirmative finding would require a new permit. In the past, changes have been reviewed but not under these criteria. A prudent operator would have to shut down operations until such a finding has been made and a new permit issued in the event of an affirmative determination. Any deviation from the approved permit should only require an amendment to the original permit and not require a new permit.

22 AAC 10.085 Memoranda of Understanding

The regulations do not make clear that existing MOU's as well as subsequent MOU's must comply with the requirements of this chapter. All existing MOU's between agencies should either be revised to comply with the chapter or be withdrawn.

Rather than encouraging joint processing of permit applications, the regulatory reform effort should attempt to limit federal participation in the permitting process where possible. This section provides that such agreements, which extend any deadline, are authorized only where "procedural burdens on the applicant" are reduced. However, it will be the agency, without provisions for applicant imput, that decides whether or not such agreements are "good" for the applicant.

ARTICLE 2. CLASS I PERMIT

It is difficult to visualize any oil and gas activity which would be classed as Class I permit. DNR personnel have indicated an intent to designate oil and gas plans of operations as Class I but because of the numerous exceptions which they intend to apply to that classification, virtually all oil and gas plans of operations will be Class II.

If the applicant is aggrieved by a decision, his only recourse is the elaborate Class A or Class B appeals machinery under

Articles 6, 7 and 8. These are excessive measures for what should be a simplified process as discussed later on page 10.

ARTICLE 3. CLASS II PERMITS

Nearly every permit covering activities on oil and gas leases will fall into the Class II category. Although an agency decision on a permit application is due within 65 days, the regulations provide multiple methods for extending that period almost indefinitely. Public notice must be given when a Class II permit is received and the public is given a 30 day comment period. Oil and gas exploration and development in Alaska, until recently, has proceeded in a satisfactory manner without a public notice requirement.

Despite the history of environmentally safe oil and gas operations, the state administration now considers public notices to be necessary. It is difficult to understand what benefits the public can derive from these elaborate, time consuming measures. Public notices provide unlimited opportunity for protests, comments and demands from activist groups, whose objectives include stopping any development or progress.

The regulations make no provision for a specified time in which public notice must be given following receipt of a permit application.

These regulations would allow an expanded opportunity for commenting agencies to interfere with the legitimate right granted by an oil and gas lease. Such leases require the payment of rentals and place an obligation on the leaseholder to diligently explore for oil and gas during the lease term. If a leaseholder is proposing to conduct safe and prudent operations under a lease issued by a state agency, a commenting agency should not be able to deny the lessee the opportunity to exercise those rights.

Section 140 requires exhaustive and formal records and transcripts to be maintained during the public hearing and comment period. Section 150 requires that all oral communications on any "matters of substance" between the applicant and the agency must be reduced to writing. The regulations do not indicate any criteria for determining what are "matters of substance." Many more state employees must be added to the payroll to maintain a process which has no recognizable benefits.

ARTICLE 5.
COASTAL MANAGEMENT CONSISTENCY DETERMINATIONS

22 AAC 10.500 Single Determination Required for Certain Projects:

The regulations attempt to designate a lead agency. We endorse the concept of the lead agency being one with expertise in the matter. For oil and gas operations this would be DNR. We also endorse one consistency determination for state and federal purposes. There is currently a duplication of jurisdiction, and no method is provided in the new regulations to settle disputes between agencies. The following ambiguous language opens the door for an interpretation that the consistency determination is not in fact conclusive:

> "The determination made under sections 520-540 is conclusive to the extent of its coverage, but does not affect the jurisdiction of any agency over a proposed project under its own statutes and regulations. Nothing in sections 500-580 of this chapter may be construed as limiting local government jurisdiction over any project."

Other agencies and local governments may seek to impose consistency determination-type conditions on a project that has already received the "single consistency determination".

Any regulation must firmly establish that once a single consistency determination is made, other agencies or local governments having jurisdiction are bound by that determination, and may not seek to abrogate that determination under their own permitting or regulatory authorities.

22 AAC 10.510, 520 and 530

The OCS consistency determination should be a responsibility of DNR, the agency with the expertise, and not DPDP. These regulations do not give DNR the authority to make the consistency determination for all oil and gas activities including the OCS but splits the responsibility among three state agencies.

22 AAC 10.540 and 550

Section 540 states that consistency determinations on "other direct state and federal activities will be made by the appropriate state agency." This section opens the door for further confusion between the state agencies as to the appropriate agency for purposes of making a consistency determination.

While we do not express an opinion as to what NOAA's position will be on this matter, we would point out that these consistency determination regulations do not comply with Section 306 (c)(5) of the Federal Coastal Zone Management Act and its implementing regulations which require a designated agency for state consistency determinations. We believe that the split agency concept as well as all other consistency provisions of these regulations will require NOAA approval, and in view of the substantial deviation from NOAA's designated agency requirements, the state risks not receiving that approval.

22 AAC 10.570 Procedure for Consistency Determinations:

Local coastal resource districts should not be accorded the status of a state "resource agency".

Section 570(b) when read in conjuction section 130(c), requires a deciding agency to give "great weight" to the comments of Coastal Resource Districts with an approved coastal plan. This effectively grants local coastal districts a veto power over projects proposed in their district. Local agencies should not be allowed to block projects of statewide or national importance. The Uniform procedures do not comply with section 306(c)(8) of the Federal CZM Act, which requires the national interest to be accorded full consideration by an approved program, nor section 306(e)(2), which requires that approved programs have a mechanism for assuring that local regulations do not unduly restrict or exclude uses which are in the state and national interest.

22 AAC 10.580 Applicant Responsibility in Multiple Permit Cases:

The effect of this section is to condition the approval of one permit on the approval of another permit. Each permit should stand on its own merits.

ARTICLES 6, 7 & 8. APPEALS

Far from avoiding litigation, the appeals procedure invites protracted litigation on the part of any interested individual. Moreover, these procedures will impede orderly administration by the agencies.

Problems arising primarily from these areas are: (1) no limitation on the eligibility of those who can file appeals ("standing"); (2) the length of the appeals process; (3) complexity of the appeals process; (4) burden on permit applicants; and (5) conflicting appeal procedures.

1. Standing:

Section 060(b) of the regulations requires a copy of the permitting decision to be served upon any person who has commented on the permit application. Section 620 allows any person to serve notice of appeal. Section 640 specifies that a person has standing to appeal if (i) he would be injured in fact by the agency's decision; (ii) he has raised material issues; (iii) the specific issues presented on appeal were raised by the appellant in comment or hearing testimony; and (iv) the requirements of Section 620 have otherwise been met.

This standing requirement is so broad that it might allow state agencies to appeal the issuance of a permit. It is AOGA's position that state agencies ought not be permitted to appeal such decisions.

The test for standing for an individual challenge of an agency decision appears to be similar to that used by courts in allowing an individual to challenge agency actions by judicial means. Under that test, courts have gone so far as to allow individuals to challenge federally permitted hunting and capturing of wild horses simply on the basis that the individual had seen wild horses before and would like to continue seeing them. This test, if applied under the regulations, would allow virtually anyone to claim "injury in fact" and thereby gain standing to file an appeal. If thus interpreted, the regulations provide for an excessively broad spectrum of potential appellants.

Section 640(b) also allows individuals not served with the initial decision to petition for intervention in the appeal. AOGA firmly believes that no provision for intervention should be included in the regulations. While the agency should consider any portion of the prior record that it wishes, intervention should not be permitted during the agency appellate review.

2. Length of Appeals Process:

The appeal processes are excessively long. (See flow chart attached). A Class A appeal can take as long as 95 days without a hearing, and 125 days with a hearing, not including any extension of the allotted time periods. The Class B appeals can take as long as 175 days, and perhaps longer, depending upon the length of time required for the agency to certify the record. The length of the permit process, when combined with the length of the appeals process, establishes an impermissibly long period between the time the application is submitted and the time of final resolution. This, of

course, does not include any time which may be spent in the Superior Court and the Supreme Court in further appeals.

3. Complexity:

The appellate process is extremely complex and difficult to administer. Many of the provisions would require the best skills of an experienced trial judge to properly implement.

The sheer number of steps which the agency is required to follow is mind-boggling. In fact, the steps are not even set out in a logical sequence. Section 160 requires that three different sorts of findings be appended to every decision on a permit issued by any of the four agencies. Each of these findings is subject to attack on appeal. Copies of the decisions must be furnished to anyone who has requested it. The pre-hearing conference required by Section 810 will require the specialized services of an attorney. These are only a few of the many intricate legal steps which are beyond the capabilities of existing departmental personnel. More legal help will be required by each of the Departments. It is difficult to understand how such elaborate appeals procedures grew out of an effort to simplify the process.

4. Burden on Permit Applicants:

Section 640(a) requires the applicant to become a part of the appeals procedure even if he doesn't wish to.

The Class B appeal process is almost identical with a trial in the Superior Court. It includes publication of notice of appeal, intervention by third parties, discovery proceedings, pre-hearing conference and pre-hearing order, de novo hearing, formal evidence rules, full records certification, etc. These extraordinary requirements are beyond the appeals procedures outlined in the APA. They are a burdensome requirement to impose on the applicant.

All permit applicants will be required, as a practical matter, to hire additional legal help.

5. Conflicting Appeal Procedures:

These appeal procedures are certainly in conflict with existing agency regulations for administrative appeal. Existing regulations must be substantially reviewed and revised to eliminate conflicts with the new regulations. This will further complicate the efforts of the agency to bring its procedures into conformance with the new regulations within any reasonable time frame.

The regulations may conflict with the Administrative Procedures Act. Under that Act, the initiation of a hearing to determine whether a right, license, or other privilege should be granted, issued or renewed is made by filing a statement of issues, rather than a notice of appeal. A notice of hearing must be issued at least 10 days prior to the hearing. Finally, adjudicatory hearings are to be presided over by a hearings officer. The regulations may not be in agreement with the above provisions.

We thank you for the opportunity to comment. We urge your efforts to prevent implementation of these counter-productive regulations which nearly totally miss the mark of their intended objective of regulatory reform.

Anytime at your convenience we stand ready to discuss this matter and lend whatever assistance we can.

Very truly yours,

WILLIAM W. HOPKINS
Executive Director

MILE-HI EXPLORATION CO., INC. PACIFIC WEST EXPLORATION CO.

2-18-82

Norpac Exploration Services fully supports Senate Bill 84 concerning the processing of permits by state agencies. It has become abundantly clear in the last few years that the particular mechanisms now in place are used to delay and in some cases kill programs that might have been planned. The permitting process is entirely too lengthy and too broad. It would facilitate matters immeasurably if the process could be streamlined to reflect earlier days. During the 60's, only one permit was required for onshore seismic work and this could usually be obtained in a maximum time frame of 2 weeks, often the permit would be issued in 2 or 3 days. Now the review process must clear 3 or 4 agencies, both federal and state, before the permit is issued. Of particular importance in the subject Bill, is the time limits imposed upon the agencies to respond to exploration requests. Alaska exploration work requires more intricate forward planning than comparable work in the South 48 and a timely permit will mean the difference between go, or no go, on a project.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

TESTIMONY FOR SB 84

MY NAME IS VAL MOLYNEAUX. I AM REPRESENTING VECO, INC., AN ALASKAN CORPORATION, PROVIDING OIL FIELD SERVICES BOTH IN THE PRUDHOE BAY, BEAUFORT SEA AREA AND THE KENAI AREA IN ALASKA.

OUR WORK IS BECOMING PROGRESSIVELY MORE INVOLVED IN THE REGULATORY PERMIT SYSTEM IMPOSED UPON ALL NEW DEVELOPMENTS BY FEDERAL, STATE, AND MUNICIPALITY GOVERNMENT. NOT THAT WE CONSIDER PERMITTING UNNECESSARY, BUT WE FEEL THE CUMBERSOME DOCUMENTATION AND DUPLICATION OF PERMITS IS WITHOUT JUSTIFICATION, THE NUMBER OF AGENCIES AND THE TIME INVOLVED TO OBTAIN THE PERMITS IS EXCESSIVE, ALL OF WHICH RESULT IN HIGHER COSTS TO THE CLIENT AND ULTIMATELY THE CONSUMER.

IN THE DEVELOPMENT AND PLANNING STAGES OF A NEW PROJECT IT IS AT FIRST NECESSARY TO IDENTIFY THE PERMIT REQUIREMENT AND THE RESPECTIVE AGENCIES FOR THE SUBMITTAL OF PERMITS. IN SOME CASES VOLUMES OF PAPERS ARE REQUIRED WHICH NECESSITATE MANY MAN HOURS TO COMPILE, RESULTING IN EVEN MORE MAN HOURS OF DELAYS RESEARCHING GOVERNMENTAL AGENCY INQUIRIES.

IT APPEARS THAT THE GOVERNMENTAL AGENCIES GIVE NO CONSIDERATION FOR THE CONTROLLING COSTS RESULTING FROM THESE OVERBURDENSOME REQUIREMENTS.

PERMIT REQUIREMENTS HAVE IN SOME CASES CAUSED YEARS OF DELAY AND, IN OTHER CASES, CHANGE OF THE LOCATION OF LABOR PROJECTS. IT HAS RESULTED IN SPIRALING COSTS. WE MUST GIVE MORE CONSIDERATION TO THE COSTS OF THESE BENEFITS WHICH THE PERMITTING SYSTEM IS MEANT TO PROVIDE US WITH.

IT IS TO THIS END THAT WE SUPPORT THE SECOND HOUSE COMMITTEE SUBSTITUTE FOR COMMITTEE SYSTEM FOR THE SENATE BILL 84 LABOR AND COMMERCE.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

NORTHERN DRILLING SERVICES, INC.
Anchorage, Alaska

3216 Iliamna Avenue
Anchorage, AK 99502
907 243-6389

February 18, 1982

To Whom it May Concern:

My name is Ronald Jordan, President of Northern Drilling Services in Anchorage, Alaska.

We provide weather, radio, medical and labor services to the oil companies. We also lease and rent equipment to these oil companies.

This testimony is in favor of the Second House Committee Substitute for Committee Substitute for Senate Bill #84, Labor and Commerce.

A subcontractor usually knows of an upcoming contract from an oil company and therefore plans for it. Therefore, because of the regulatory agencies method of issuing permits to the oil companies, we, the subcontractors find it very difficult to plan the courses of action in dealing with these contracts. We have our obligations to fulfill, and planning ahead, as we do, costs us money when we have to shelf an item because of a delay in a permit that is not issued to an oil company.

It is very difficult to even think about a full time crew for each contract as we can not afford to pay for a crew to be on stand by while waiting for a contract which is depending on a permit.

I believe this Bill would eliminate duplication and speed up the processing of permits.

Sincerely,

Ronald L. Jordan

SUPPORT INDUSTRY
ALLIANCE
P.O. Box 100, Anchorage, Alaska 99510

TESTIMONY BEFORE THE HOUSE LABOR AND COMMERCE COMMITTEE

ON SENATE BILL 84

BY

JOE MATHIS, PRESIDENT, ALASKA SUPPORT INDUSTRY ALLIANCE

FEBRUARY 19, 1982

MR. CHAIRMAN AND MEMBERS OF THE HOUSE LABOR AND COMMERCE COMMITTEE. MY NAME IS JOE MATHIS. I AM OFFERING THIS TESTIMONY ON BEHALF OF THE ALASKA SUPPORT INDUSTRY ALLIANCE.

THE ALLIANCE IS A NON-PROFIT ORGANIZATION REPRESENTING INDIVIDUALS AND SUPPORT COMPANIES INVOLVED IN THE MINING, CONSTRUCTION AND PETROLEUM INDUSTRIES. THE PURPOSE OF OUR ORGANIZATION IS TO FOSTER AND PROMOTE THE INTERESTS OF THE SUPPORT INDUSTRY AND MORE PARTICULARLY TO IMPROVE PUBLIC UNDERSTANDING OF THE INTER-RELATIONSHIP OF POLITICAL DECISIONS, INDUSTRY ACTIVITIES AND THE ECONOMIC HEALTH OF ALASKA.

THIS BRINGS ME TO WHY THIS TESTIMONY IS BEING OFFERED. WE OF THE SUPPORT INDUSTRY HAVE SUFFERED--ALMOST UNNOTICED BY GOVERNMENT. OUR SUFFERING COMES NOT IN A DIRECT WAY, BUT AN INDIRECT--ALTHOUGH VERY REAL--WAY. EACH TIME BUREAUCRACY DELAYS THE PROGRESS OF MAJOR INDUSTRY BY OVER-REGULATING AND DUPLICATING OF PERMITTING REQUIREMENTS, IT IS CREATING A REAL HARDSHIP ON THE SUPPORT INDUSTRY AS WELL. THERE IS AN APPARENT LACK OF AWARENESS

ALASKA
SUPPORT INDUSTRY
ALLIANCE
P.O. Box 100, Anchorage, Alaska 99510

BY SOME REGULATORY AGENCIES AS TO THIS CHAIN OF EVENTS OF INDUSTRY ACTIVITY AND WHAT IMPACT THEIR INEFFICIENCY AND FOOT-DRAGGING HAS ON IT. THIS IS WHAT REGULATORY REFORM SHOULD SEEK TO HELP.

WE OF THE SUPPORT INDUSTRY NEED THE 2ND HOUSE COMMITTEE SUBSTITUTE FOR COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 84 AS MUCH AS, IF NOT MORE THAN, THE MAJOR INDUSTRIES OF THIS STATE.

SUPPORT INDUSTRY SURVIVES BY BEING EFFICIENT AND ABLE TO RESPOND TO THE NEEDS OF MAJOR INDUSTRY. AS SUBCONTRACTORS WE MAY NOT BE REQUIRED TO HAVE THE PERMITS, BUT WE MUST WAIT ALL THE SAME UNTIL THEY ARE GRANTED. UNNECESSARY DELAYS HAVE A REAL AND SUBSTANTIAL IMPACT ON THE SUPPORT INDUSTRY. THE IMPACT COMES IN THE FORM OF LOST TIME, HIGHER UNEMPLOYMENT, AND JUST PLAIN OLD ANXIETY AND WORRY DUE TO EQUIPMENT SITTING IDLE AND CREDITORS KNOCKING AT THE DOOR. THIS INABILITY TO PLAN, BUDGET, AND OPERATE EFFICIENTLY IS VERY MUCH A PROBLEM IN OUR INDUSTRY.

THIS PROBLEM IS CARRIED STILL FURTHER DOWN THE CHAIN. OUR EMPLOYEES HAVE CAR PAYMENTS, HOUSE PAYMENTS, AND FAMILIES TO CARE FOR AND ARE FACED WITH THESE SAME UNCERTAINTIES AND WORRIES ON AN INDIVIDUAL LEVEL.

AS YOU CAN SEE, LACK OF A COMPREHENSIVE AND EFFICIENT REGULATORY SYSTEM REACHES ALL THE WAY DOWN TO THE WAGE-EARNER.

ALASKA
SUPPORT INDUSTRY
ALLIANCE
P.O. Box 100, Anchorage, Alaska 99510

INDIFFERENCE BY REGULATORY AGENCIES NOT ONLY DOES INJUSTICE TO PRIVATE INDUSTRY, BUT IT ALSO AFFECTS THE ALASKAN WORKING PEOPLE.

WE AGREE THERE IS A NEED FOR REGULATION. WE FEEL THE BILL BEFORE YOU NOW WILL MORE THAN ADEQUATELY PROTECT THE INTERESTS OF THE PEOPLE OF ALASKA, AS WELL AS ASSIST MAJOR INDUSTRY AND THEREBY GREATLY AID THE SUPPORT INDUSTRY. THEREFORE, I URGE YOU TO SUPPORT THIS LEGISLATION WITHOUT DELAY OR AMENDMENT.

THANK YOU FOR YOUR TIME.

HOUSE LABOR AND COMMERCE COMMITTEE
REGARDING 2 HCS CSSB-84 (L&C)

MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE. MY NAME IS ETHEL H. NELSON, AND I AM AN EXPLORATION LAND REPRESENTATIVE FOR TEXACO INC., AND AM REPRESENTING THEM HERE TODAY.

WE APPRECIATE THE OPPORTUNITY TO COMMENT TO YOU ON THE PROVISIONS OF HCS CSSB 84. AS YOU KNOW, THE MATTER OF REGULATORYREFORM AND SPECIFICALLY PERMITTING REGULATORY REFORM HAS BEEN THE SUBJECT OF MANY PUBLIC HEARINGS DURING THE PAST THREE YEARS. THESE HEARINGS HAVE BEEN CONDUCTED ON THE UNIFORM PERMIT REGULATIONS PROPOSED BY THE ADMINISTRATION (22 AAC 10) AS WELL AS SB 84.

THERE HAS BEEN, IN THE PAST, A STALEMATE WITHIN INDUSTRY REGARDING SOME PORTIONS OF EARLIER DRAFTS OF THE BILL. HOWEVER, THE AREAS OF DISAGREEMENT BETWEEN COMPANIES HAVE BEEN SOLVED AND THERE IS NOW UNITED SUPPORT BY AOGA MEMBER COMPANIES OF THIS BILL.

INDUSTRY HAS MADE EXTENSIVE AND CAREFUL ANALYSES OF EACH DRAFT OF THE REGULATIONS,AND THE BILL, AND HAS SUBMITTED CONSTRUCTIVE COMMENTS, MADE IN GOOD FAITH, TO THE ADMINISTRATION AND TO VARIOUS LEGISLATIVE COMMITTEES AT EVERY OPPORTUNITY. THESE COMMENTS HAVE BEEN SELECTIVELY IGNORED BY THE ADMINISTRATION.

HEARING BY THIS COMMITTEE LAST WEEK.

THE ADMINISTRATION, HOWEVER, HAS REQUESTED SEVERAL AMENDMENTS TO THE BILL, SOME OF WHICH WE SUPPORT AND SOME OF WHICH WE FEEL ARE NOT IN THE BEST INTEREST OF THE STATE OR THE PUBLIC BECAUSE THEY DO NOT PROMOTE ORDERLY DEVELOPMENT OF THE STATE'S RESOURCES. IN THE INTEREST OF TIME, I WILL NOT DISCUSS THESE AMENDMENTS EXCEPT TO SAY THAT DESPITE THE FACT THAT THERE IS A GREAT DEAL OF COMPROMISE ALREADY REFLECTED IN THE VERSION BEFORE YOU, WE ARE, IN GOOD FAITH AND IN THE SPIRIT OF FURTHER COMPROMISE, WILLING TO JOIN WITH OTHERS IN ACCEPTING THIS BILL AS DRAFTED EVEN WITH THESE PROBLEM AREAS, AND THAT WE ARE IN FULL AGREEMENT WITH TESTIMONY WHICH WILL BE GIVEN BY MARC BOND ON BEHALF OF AOGA A LITTLE LATER.

SPECIFICALLY, I WOULD LIKE TO COMMENT ON SOME OF THE BENEFITS OF THIS BILL TO ALASKA AND ITS CITIZENS.

NUMBER ONE, ASSUMING WE CAN START ALL OVER WITH THE DRAFTING OF REGULATIONS TO IMPLEMENT THE BILL, IT GIVES THE STATE THE OPPORTUNITY TO IMPLEMENT UNIFORM PERMIT PROCEDURES AND GIVES SOME MEANINGFUL REGULATORY REFORM.

ALSO, FOR THE FIRST TIME IN THE HISTORY OF STATEHOOD, THIS BILL GIVES LOCAL RESOURCE AGENCIES THE <u>STATUTORY RIGHT</u> TO BE HEARD REGARDING PERMIT ACTIVITIES IN THEIR COMMUNITY AND THE RIGHT FOR SUBSTANTIVE CONSIDERATION BY THE STATE OF THEIR DOCUMENTED

AGAIN, ASSUMING REASONABLE TIME FRAMES ARE INCLUDED IN THE REGULATIONS IMPLEMENTING THIS BILL, THE PERMIT PROCESS TIME AND THE NUMBER OF STATE EMPLOYEES NECESSARY TO CARRY OUT THE PROCESS WILL BE CONSIDERABLY LESS THAN IT WOULD BE UNDER THE PROVISIONS OF EARLIER DRAFTS OF THE BILL AND THE PENDING UNIFORM PERMIT REGULATIONS.

MR. CHAIRMAN, THE PROBLEMS THIS LEGISLATION IS DESIGNED TO CURE ARE REAL PROBLEMS. THEY MAY SOMETIMES BE SIMPLE, BUT THEY ARE ALL PART OF THE COMPLEX BUSINESS WHICH IS REPRESENTED BY THE PETROLEUM INDUSTRY IN PARTICULAR AND OTHER MINERAL EXTRACTING INDUSTRIES IN GENERAL.

ALASKA'S WEALTH IS ALMOST ENTIRELY DEPENDENT ON THE PRODUCTION OF ITS MINERAL RESOURCES; THAT PRODUCTION IS, UNDER THE PRESENT PERMITTING PROCEDURES, TIME CONSUMING AT BEST AND COSTLY TO BOTH THE STATE AND THE INDUSTRY IT SHOULD BE SERVING.

I WOULD LIKE TO REITERATE THAT WE STRONGLY SUPPORT THE BILL AND ASK THIS COMMITTEE TO APPROVE IT.

AGAIN, WE THANK YOU FOR THE OPPORTUNITY TO DISCUSS THIS VERY IMPORTANT LEGISLATION WITH YOU.

THANK YOU.

Re: 2nd HCS CSSB 84(L&C)

Dear Jeff:

As promised, enclosed is a copy of the testimony which I had prepared for presentation to the committee last week. As you will note, this testimony deals exclusively with the amendments which the administration, via Attorney General Condon, had proposed to the Labor & Commerce Committee Substitute for SB 84.

Should you have any questions regarding these comments, please do not hesitate to contact me.

Very truly yours,

DELANEY, WILES, HAYES,
REITMAN & BRUBAKER, INC.

AOGA COMMENTS ON PROPOSED ADMINISTRATION
AMENDMENTS TO HCS CSSB 84 (L&C)

Presented by Marc D. Bond,
Counsel for Chevron U.S.A. Inc.

2-19-82

The bill that we support is "2nd House Committee Substitute for Committee Substitute for Senate Bill No. 84 (Labor & Commerce)". I will discuss amendments to that bill that have been proposed by Attorney General Wilson Condon. These comments are concurred in by all the members of AOGA who have worked on this issue.

1. Amendment #1.

This amendment would allow 85 days for the processing of a Class II permit, if a public hearing were held on the application. Initially it should be noted that this appears to be a replacement in the bill of the provision allowing for a 20-day extension for all classes of permit applications if a hearing was held. That provision was contained in § 633(c) of the 2nd Rules substitute which has not been superseded.

It is industry's position that this provision is unnecessary and unwarranted. When SB 84 was originally introduced, a 30-day maximum handling time was applied to all permit applications. Bowing to administrative persuasion, it was agreed that hearings, which are mandated by statute,

could not be held in the 30-day period. Accordingly, the bill was rewritten as it is now: § 632(a)(2) allows 65 days for applications upon which public notice on interagency review is mandated.

Since an additional 35 days were included expressly for the purpose of accommodating public hearings, the extra 20 days are unnecessary and a contradiction of the purpose behind the Class I, Class II permit distinction.

For these reasons we oppose this amendment.

2. Amendment #2.

This amendment would allow the applicant and the agency to agree to an extension of the application period beyond the 120 days (4 mos.) already permitted by § 633(a). This amendment is very similar to a provision in the 2nd Rules version which would have allowed the time period to be extended in all cases by mutual agreement.

What appears to be an innocuous provision is actually probably unnecessary and an express invitation to further delay. It appears that even without this provision, an applicant may be able to authorize an extension of the time limits if he felt it was in his best interests. On the other hand, stating this expressly in the bill provides the agency with a potential fulcrum to buy additional time. We therefore oppose Amendment #2.

3. Amendment #3.

This amendment rewrites all of § 635(a) and (b). This section is one of the key provisions of the bill insofar as it establishes the lead agency principle for coastal management consistency determinations and comments on federal permits. Before discussing the proposed amendments, it is important to set forth the objectives of this section.

Under current law, any permit that affects the coastal zone cannot be approved unless it is found to be consistent with the coastal management program. If more than one permit is required for the project, each permit involves a redundant CZM consistency determination. Contrary determinations can be reached by different agencies on the same project. In the same vein, any project that requires a water quality certification by the U.S. Army Corps of Engineers is subject to comment by all state agencies.

It is industry's view that the state should speak with one voice in both cases. In each case, the agency which has the principal responsibility for dealing with the overall activity should be the lead agency. In order to function as a true lead agency, the agency must have the discretion, after due consideration, to accept, reject or modify the comments made by other agencies. In order to assure that the state speaks with one voice, non-lead agencies must be prohibited from making separate comments to federal agencies.

The proposed amendment changes the bill in several significant and adverse ways:

a. It limits the lead agency concept to projects involving the conveyance of an interest in state land or water, or at least one Class II permit decision. There is no reason to so confine this idea. Only one decision on consistency and only one comment on federal permit applications should be made regardless of the class or number of permits needed for the project.

b. The proposed amendment does not specify that the lead agency must be a "resource agency" as defined in AS 44.62.640(c)(4). In permitting the use of land or water, no agency other than the "resource agencies" should become the lead agency, because no other agency has the necessary expertise.

c. The proposed amendment requires the lead agency to give "substantive consideration" to the "comments" of other resource agencies. Neither term is defined, and it appears that the administration would probably define "substantive consideration" by regulation in the same way it defined the term "great weight" in the proposed Uniform Permit Procedure Regulations, 22 AAC 10.920(7) - i.e., shifting the burden of proof to the deciding agency to reach a contrary conclusion.

The deciding agency should have this burden, if at all, only as to the documented factual statements and data produced by the commenting agency. The administration amendment would impose this burden on the deciding agency as to factual statements, comments, opinions and recommendations, since the term "comment" is not defined.

d. The proposed amendment places a heavier burden on the lead agency with respect to an appeal by a coastal resource district of a consistency determination. This section is burdensome, unnecessary and conflicts with the provisions of AS 46.40.100 of the Alaska Coastal Management Program:

i. No reason exists to give greater emphasis to the comments of coastal resource districts than to those of other state agencies. In effect this provision constitutes the districts as the lead agency for consistency review - a result not intended by the legislation and not in the best interests of the state.

It should be pointed out that the bill as drafted requires the lead agency to consider documented facts produced by coastal districts. This is not a requirement under current law, and thus gives more emphasis to the comments of local districts.

ii. The appeal right implicitly granted to districts by subsection (b) conflicts with the enforcement provisions

of AS 46.40.100. That section specifies how complaints concerning perceived violations of the district plan are to be handled. It allows a district, a citizen of the district or a state agency to petition the Alaska Coastal Policy Council for a hearing on the matter. The Council can then order an offending district or agency to comply with the plan in question. In addition, the section provides that such orders may be enforced by the superior court. No justification for circumventing this procedure is given by the administration. The bill as drafted would leave the enforcement provisions in AS 46.40.100 intact.

We believe the bill as drafted encompasses the concerns raised by the administration, and the agreement reached last fall concerning the relationship between local districts, state agencies and the lead agency.

For these reasons we oppose the proposed amendment.

4. Amendment #4.

This amendment would allow a state agency other than the lead agency to comment on a federal permit application where federal law so requires. Federal law sometimes requires that comments be solicited from a particular state agency concerning a project which is undertaken by a federal agency

or which requires a federal permit. An example is the Fish and Wildlife Coordination Act, which requires consultation with the head of the agency exercising administration over the wildlife resources of the state. 16 USC § 622(a). Cf. 42 USC § 4334.

We believe that federal law requiring the solicitation of comments from specific state agencies would override the section as written. Nevertheless, we support the proposed amendment in order to make the exception explicit.

5. Amendment #5.

The proposed amendment would specify DNR as the lead agency in certain instances. The amendment does not accomplish the intended result.

The amendment is confusing and difficult to understand. The provision could be interpreted to require DNR to complete § 401 certifications; DNR does not presently have the expertise to do this.

Our language is clear: the completion of § 401 certification by an agency does not alone constitute that agency as the lead agency.

6. Amendment #6 (Condon #7).

This proposed amendment attempts to state that appeals of permitting decisions are not subject to the normal

APA procedures. The proposed language states the appeals "need not comply with" the APA procedures. While we support the intent of the change, we propose that the amendment be modified to read as follows:

> "Administrative appeals [EXCEPT AS PROVIDED IN THIS SECTION THE PROCEDURE IS] conducted under this section are not subject to the procedures outlined in AS 44.62.330 - 44.62.630."

With this change, we support the amendment.

7. Amendment #7 (Condon #8).

The proposed amendment would allow the administrative appeals time limits to be extended "when applicable due process rights may require more formal administrative proceedings." We object to this amendment.

a. No agency or individual is set forth whose responsibility it is to determine when "applicable due process rights" require more time.

b. This undefined catch-phrase may become a vehicle by which administrative appeals may take longer than the specified time period as a matter of course, rather than exception.

c. "Due process" in the constitutional sense requires notice of an action affecting a person and an oppor-

tunity to be heard thereon. Kodiak-Aleutian Chapter of Alaska Conservation Soc. v. Kleppe, 423 F.Supp. 544 (D. Alaska 1976). No one has a vested right in any particular mode of procedure such that legislative change is prohibited. Arctic Structures, Inc. v. Wedmore, 605 P.2d 426, 436 (Alaska 1979). Due process requires only that a substantial and efficient remedy remain available. Id. There appears to be no reason why a constitutionally permissible appeal procedure could not be outlined by regulation and completed within 45 or 65 days.

d. If there are statutes which require a longer period of time, the phrase "Except as otherwise required by federal law," could be inserted in front of subsection (b).

8. Amendment #8 (Condon #9).

This proposed amendment would require every appellant of a permitting decision to seek an administrative appeal prior to initiating a court appeal. It would require the "exhaustion of administrative remedies."

We believe that the potential appellant should have the option to decide whether the administrative record is sufficient for a court appeal. In many cases, further administrative appeal will result only in a rubber stamp of the initial permitting decision. In other cases, a question of law may be raised that should be resolved with dispatch by a

court. In such cases, a mandatory administrative appeal only serves to waste time.

9. Amendment #9 (Condon #10).

This proposed amendment would effectively eliminate the preference right of a permit appeal on the civil calendar. The stated purpose of the amendment is to avoid the amendment of court rules in violation of Alaska Const. Art. IV, § 15. This section requires a two-thirds vote of the legislature to change court rules.

This section as contained in the draft bill does not change court rules. No court rule (with the possible exception of the "speedy trial" rule in criminal cases, Criminal Rule 45) establishes a preference for court cases. This has traditionally been done by legislation, and is a matter of substantive, rather than procedural law. Cf. lien foreclosure proceedings which are granted preference by statute. AS 34.35.005(c).

Aside from the non-amendment of court rules, the directory language "should have" has no defined legal meaning. It is technically inartful and legally meaningless.

10. Amendment #10 (Condon #6).

This proposed amendment would eliminate the time

limit on extensions by the requesting agency for commenting agencies to submit comments. We oppose this amendment.

This amendment would permit commenting agencies to submit comments on the day before a permitting decision is required, thus allowing the deciding agency, the applicant and others no time to respond to the comment. Some definite time limit must be set. It is submitted that 30 days, in addition to the 30 days initially given, is more than sufficient within which to generate a comment.

11. Amendment #11.

The proposed amendment would include the Alaska Coastal Policy Council as a "resource agency". This addition is unnecessary and duplicative. We oppose the amendment.

The Alaska Coastal Policy Council has no permitting responsibility and therefore should not be included in the permit reform bill.

Furthermore, the Council already has jurisdiction to review consistency determinations when petitioned to do so under AS 46.40.100. The Council should not have the function of being the lead agency on a consistency review, and then be called upon to review its own decision pursuant to AS 46.40.100.

August 25, 1981

TESTIMONY OF TIM BRADNER
SOHIO ALASKA PETROLEUM COMPANY
ON 2ND RULES COMMITTEE SUBSTITUTE
SENATE BILL 84

10/29
T152

Thank you for this opportunity to testify. My name is Tim Bradner. I am with Sohio's Government Affairs office in Anchorage. With me is Roger Herrera, Sohio's Alaska Exploration Operations Manager. I'm going to make a few opening remarks, Mr. Chairman, and then turn our presentation over to Mr. Herrera, who will discuss some of our permitting problems, using two North Slope exploration wells we drilled last winter as examples.

This is the second year in a row, Mr. Chairman, that a permit-reform bill -- essentially the same bill -- has been left on the House calendar the last day of the session. Senate Bill 524 died on the calendar in the closing hours of the session in 1980. This year Senate Bill 84 could not be acted on before adjournment and will appear automatically in third reading next January.

Sohio and other petroleum companies, as well as other resource groups have actively worked on permit-reform legislation development with the state administration and the legislature for several years now. Several important concepts from SB-524 in 1980, particularly the maximum time periods for issuing permits, have been carried over into 1981. But there are important new ideas, such as the lead agency concept, embodied in SB-84. Mr. Chairman, we would urge this committee to study those new ideas closely.

The permitting problem is very complicated, Mr. Chairman. It results from a complex and subtle interplay between two federal acts and state agency responses to those federal actions. There is no simple solution that will solve everything, but legislative enactment

of some form of SB-84 will be a good start in resolving at least the state's response to these federal acts.

Here's the basic problem: Until two or three years ago, our permit procedures with both state and federal agencies were fairly simple and straight forward. But then two things happened. First, the federal Corps of Engineers assumed permitting jurisdiction over wetlands; second, the federal Coastal Zone Management Act that required a state consistency determination before the federal permit could be issued. The problem comes in the manner in which state agencies have responded to the Corps solicitation for state comments. What was a fairly simple permit process has now become disorderly, confusing, and very time-consuming and costly.

In practical terms, we must get a Corps of Engineers permit for any road extension or gravel pad in the Prudhoe Bay field, which as many of you know, is in a coastal wetland. Almost all onshore North Slope development, as well as offshore, is subject to Corps permits, state consistency determinations and sometimes conflicting stipulations put forth by different state agencies in response to the Corps solicitation for comments. The Corps regulations does not permit that agency to arbitrate between conflicting state positions and stipulations, and the end result is usually that the Corps accepts all state agency comments as formal stipulations on the Corps permit.

The state administration has tried to smooth this process by requiring all state comments and stipulations to be put to the Corps through the governor's office, but this approach has had problems and the administration is now re-thinking this process.

The federal requirement for a consistency finding by the state is an added complication. Those of you familiar with Coastal Zone Management know that Alaska's CZM program is a general statement of values; environmental protection balanced with resource development, etc. But it becomes a matter of interpretation by a state entity, in

this case the Division of Policy Planning and Development, as to whether a particular Corp permit application, for a Prudhoe Bay road, pad, or an offshore gravel pad, is consistent or inconsistent with a general notion of environmental protection. If the finding is inconsistent, no Corps permit can be issued. What usually happens, however, is that a consistency finding is issued, but with several stipulations, such as seasonal drilling restrictions and other operational requirements. Some of these stipulations can be very difficult and costly to comply with.

In conducting this consistency interpretation, the governor's office receives comments in an unstructured manner from many state agencies. The lack of a clear set of regulations or a statute governing this interchange leads not only to great delay, but also to significant differences of opinion on the part of various agencies over specific projects.

In SB-84, Mr. Chairman, some needed order would be brought to this process by movement of this consistency finding to the primary state line agency dealing with the activity -- the "lead agency". In the case of petroleum, it would be the Department of Natural Resources.

My saying this implies no criticism of the way DPDP has handled these procedures, Mr. Chairman. It is a complex process thrust upon well-intentioned people who have had to arbitrate sharply different opinions among state agencies. Sohio has been pleased with responses of individuals in that division to our problems; our problem here is with basic organization of the process.

Sohio's primary concern, Mr. Chairman, has been the need to give structure and organization to the way state agencies respond to this federal consistency and Corps of Engineers stipulation process. The present system is disorderly, confusing and has led to problems in development activity in the Prudhoe Bay field and more serious problems in our exploration program.

To this extent, certain concepts in SB-84, like the lead agency, are more important to us as a North Slope operator than other concepts, such as maximum time-periods, although that is also important.

I would also like to say, Mr. Chairman, that the state administration has grown to recognize many of these problems, and has been working on ideas that are very similar to those developed by industry. We would urge the committee to review several proposed versions of SB-84 that have been worked on in draft form since the end of the session. These include an August 17 draft by the Alaska Oil and Gas Association as well as proposed amendments by the administration in meetings with several companies, including Sohio. We feel the administration amendments have some good ideas and should be looked at very carefully. The AOGA draft also deserves study. We look forward to working with you in future work-sessions of these committees.

With that, I will turn this over to Mr. Herrera.

Testimony by

Max D. Nalley

Exxon Company USA
February 19, 1982

before the

House Labor and Commerce Committee

regarding

2nd HCS CSSB 84 (L&C)

MR. CHAIRMAN, I AM MAX NALLEY, ALASKA PUBLIC AFFAIRS MANAGER FOR EXXON COMPANY, U.S.A. I AM PRESENTING THE COMMENTS OF MR. RICHARD H. WEAVER, EXXON'S ALASKA OPERATIONS MANAGER, WHO IS NOT ABLE TO BE HERE TODAY DUE TO A PRIOR COMMITMENT TO MEET WITH COMMISSIONER KATZ.

EXXON APPRECIATES THIS OPPORTUNITY TO COMMENT ON THIS DRAFT BILL WHICH WE VIEW TO BE OF GREAT IMPORTANCE TO THE STATE, ITS PEOPLE AND THE INDUSTRIES CONCERNED WITH RESOURCE DEVELOPMENT. EXXON SUPPORTS THE DRAFT COMMITTEE SUBSTITUTE FOR THE LATEST VERSION OF SB-84 (2nd HCS CSSB 84 (L&C)). IN THE INTEREST OF TIME, OUR COMMENTS TODAY WILL BE LIMITED TO THE SPECIFIC PORTIONS OF THE DRAFT BILL THAT RELATE TO THE TIME PERIODS REQUIRED FOR STATE RESOURCE AGENCIES TO RENDER FINAL DECISIONS ON PERMIT APPLICATIONS.

IT IS OUR BELIEF THAT THE TIME CONSTRAINTS ESTABLISHED IN THIS LEGISLATION ARE ADEQUATE AND WORKABLE. WE WOULD FURTHER OBSERVE THAT THIS LEGISLATION PROVIDES THE PROCEDURE FOR THE GOVERNMENT TO BALANCE THE LEGITIMATE INTERESTS OF THE PERMIT APPLICANT WITH THE INTERESTS OF THOSE WHO MAY BE IMPACTED BY THE ISSUANCE OF THE PERMIT. THIS LEGISLATION MAKES A REAL, CONCERTED, AND WELL DEFINED EFFORT TO INSURE THAT LEGITIMATE AND JUSTIFIABLE CONCERNS ARE CONSIDERED AND THAT THOSE CONCERNS INFLUENCE THE DECISION MAKING PROCESS.

LET ME JUST QUICKLY OUTLINE HOW THE TIME FRAMES CONTAINED IN THE BILL COULD WORK IN THE PERMITTING PROCESS:

THE DRAFT BILL REQUIRES THAT EACH STATE RESOURCE AGENCY MUST CLASSIFY THE PERMITS WITH WHICH IT DEALS INTO ONE OF TWO CLASSIFICATIONS AND ADOPT PROCEDURAL REGULATIONS RELATING TO THE PROCESSING OF EACH CLASS OF PERMITS.

CLASS I PERMITS ARE THOSE WHICH REQUIRE A FINAL DECISION WITHIN 30 DAYS, WHILE

CLASS II PERMITS - THOSE WHICH, BECAUSE OF REQUIREMENTS FOR PUBLIC NOTICE OR PUBLIC HEARING OR INTERAGENCY REVIEWS, DEMAND MORE TIME - REQUIRE A DECISION WITHIN 65 DAYS.

IT IS OUR BELIEF THAT THE GREAT MAJORITY OF PERMITS WHICH THE RESOURCE AGENCIES ISSUE ARE OF A RECURRING AND ROUTINE NATURE WITH WHICH THE AGENCIES HAVE CONSIDERABLE PRIOR EXPERIENCE. THESE PERMITS SHOULD EASILY BE PROCESSED WITHIN EITHER THE 30-DAY OR 65-DAY TIME FRAME.

ADDITIONALLY, A VERY KEY COMPONENT OF THE DRAFT BILL FOR THOSE CONCERNED THAT THE TIME FRAMES ARE TOO SHORT IS THE PROVISION THAT ALLOWS THE LEAD AGENCY TO EXTEND THE TIME PERIOD BY AS MUCH AS 120 DAYS IN THOSE INSTANCES WHERE THE PERMIT INVOLVES UNUSUALLY COMPLEX ISSUES. WE NOTE THAT THERE HAS BEEN NO ATTEMPT TO DEFINE "UNUSUALLY COMPLEX ISSUES" IN THE LEGISLATION AND THAT IS PROPER, BECAUSE THIS IS A DECISION THE AGENCY SHOULD HAVE THE AUTHORITY TO MAKE ON A CASE-BY-CASE BASIS.

THE TOTAL ELAPSED TIME FOR PERMIT DECISIONS ON COMPLEX, CLASS II APPLICATIONS CONCEIVABLY COULD THEN BECOME 185 DAYS--MORE THAN SIX MONTHS. THAT IS ENOUGH TIME, FOR EXAMPLE, FOR THE LEAD AGENCY TO SPEND ONE MONTH TO DETERMINE THAT THE PERMIT IS, IN FACT, COMPLEX; A MONTH TO GET THE INFORMATION OUT TO ANY AFFECTED COMMUNITIES AND OTHER RESOURCE AGENCIES; A MONTH TO GO OUT AND HOLD HEARINGS IN THE COMMUNITIES; ANOTHER MONTH TO COME BACK AND RECEIVE COMMENTS FROM ALL CONCERNED; AND TWO MORE MONTHS FOR THE LEAD AGENCY TO DIGEST ALL THE COMMENTS AND MAKE A DECISION ON ISSUANCE OF THE PERMIT.

WE FEEL THESE TIME FRAMES ARE ADEQUATE AND ALLOW AMPLE OPPORTUNITY FOR GATHERING INFORMATION FROM OTHER AGENCIES AND AFFECTED LOCAL AREAS, AS WELL AS TIME FOR SERIOUS CONSIDERATION BY THE PERMITTING AGENCY OF ALL THE FACTS PRESENTED, BEFORE MAKING A PERMIT DECISION.

THERE ARE TWO ADDITIONAL OBSERVATIONS WE WOULD MAKE CONCERNING THE TIME FRAME SPECIFIED IN THE DRAFT BILL:

FIRST, THE TIME CONSTRAINTS DICTATE THAT THE PERMITTEE PREPARE HIS APPLICATION IN A COMPLETE AND THOROUGH FASHION SO THAT HE HAS SOME DEGREE OF ASSURANCE THAT THE APPLICATION CAN BE REVIEWED AND APPROVED WITHIN THE TIME ALLOWED, SINCE THE ALTERNATIVE FOR THE APPLICANT IS DENIAL OF THE PERMIT

AS A MATTER OF PRACTICE, WITH CRITICAL PERMITS EXPERIENCE SHOWS THAT APPLICANTS AND AGENCIES WORK IN CONCERT LONG BEFORE THE PERMIT IS OFFICIALLY FILED TO DEFINE THE POINTS THAT NEED TO BE ADDRESSED AND TO PROPERLY COVER THEM IN THE INITIAL SUBMITTAL. THUS, THERE IS A DISCIPLINE IMPOSED UPON THE PERMITEE AS WELL AS THE AGENCY TO ASSURE THAT THE INFORMATION THAT IS PROVIDED IS ADEQUATE TO THE REQUIREMENTS FOR ISSUANCE OF THE PERMIT AND TO PRECEDE THE FORMAL PERMIT APPLICATION WITH DISCUSSIONS WITH THE APPROPRIATE RESOURCE AGENCIES IN ORDER TO STREAMLINE THE DECISION MAKING PROCESS BY THE LEAD AGENCY.

SECOND, IN RESPONSE TO WORRIES THAT HAVE BEEN RAISED THAT THIS DRAFT BILL WOULD ALLOW THE STATE TO RUN ROUGHSHOD OVER LOCAL CONCERNS, I EMPHASIZE THE DISTINCTION BETWEEN THIS BILL, WHICH RELATES TO PERMIT ISSUANCE, AND THE COMPLETELY SEPARATE PROCESS THAT ADDRESSES THE POLICY QUESTION OF WHETHER OR NOT A MAJOR PROJECT SHOULD BE UNDERTAKEN IN THE FIRST PLACE. FOR EXAMPLE, THE ISSUE OF EXPLORATION IN A PARTICULAR FRONTIER AREA WILL BE STUDIED LONG BEFORE THE FIRST PERMIT APPLICATIONIS MADE. THERE ARE REQUIREMENTS FOR STUDIES, HEARINGS AND OTHER SUCH ACTIVITIES WHICH PROVIDE INFORMATION TO AND IDENTIFY CONCERNS OF LOCAL COMMUNITIES THAT MAY BE IMPACTED BY THE PROPOSED DEVELOPMENT. FROM THE INFORMATION GAINED IN THIS LENGTHY AND DELIBERATE PROCESS

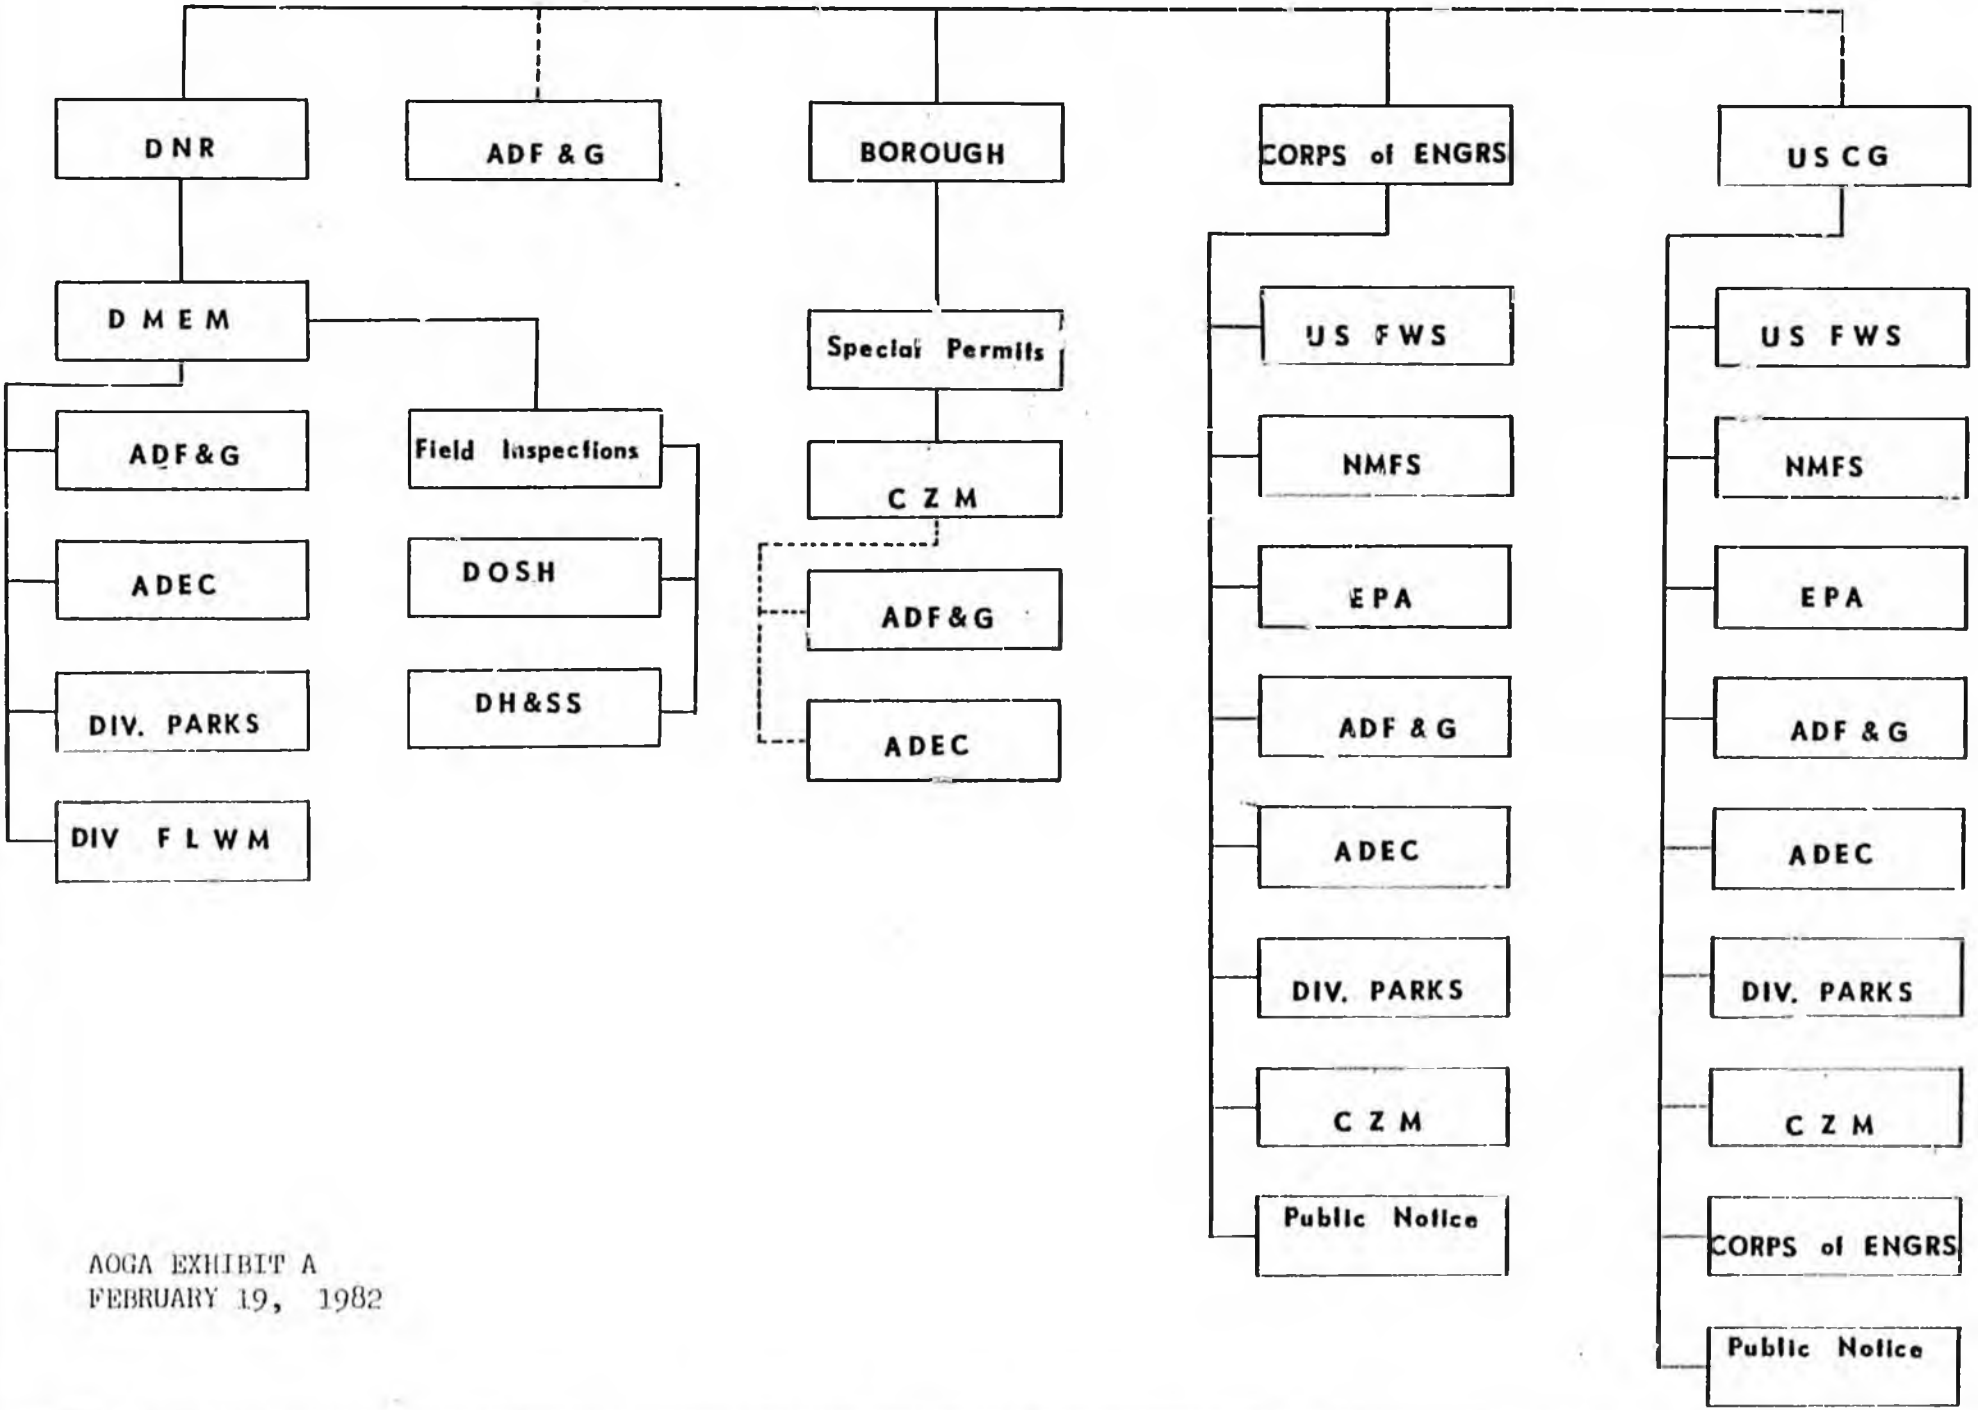
THE STATE WILL MAKE ITS POLICY DECISION REGARDING OIL AND GAS EXPLORATION AND DEVELOPMENT IN A GIVEN AREA. ONCE THAT OVERALL POLICY DECISION HAS BEEN MADE BY THE STATE, FROM THAT POINT ON THE ISSUE SHOULD BE HOW SPECIFIC PERMIT ACTIVITIES (BOTH INDIVIDUALLY AND COLLECTIVELY) AFFECT LOCAL AREAS, NOT WHETHER DEVELOPMENT IS GOING TO OCCUR. THE PERMIT PROCESS ESTABLISHED IN THIS DRAFT BILL IS NOT THE VEHICLE FOR THE STATE TO DECIDE ON BROAD POLICY QUESTIONS. RATHER IT ALLOWS FOR ORDERLY DEVELOPMENT TO PROCEED ONCE THE DEVELOPMENT QUESTION HAS BEEN RESOLVED.

IN SUMMARY, MR. CHAIRMAN, EXXON STRONGLY SUPPORTS THE DRAFT BILL BEFORE YOU TODAY. IN OUR VIEW, IT REPRESENTS A BALANCED APPROACH WHICH PROTECTS THE INTERESTS OF THE STATE OF ALASKA, ITS PEOPLE, AND THE RESOURCE INDUSTRIES. WE URGE ITS PROMPT ADOPTION.

THANK YOU VERY MUCH.

RHW/SPEECH/066/es

AGENCIES INVOLVED IN OPERATING PERMITS ON STATE LANDS



AOGA EXHIBIT A
FEBRUARY 19, 1982

Original sponsors: Bennett, Parr and Fahrenkamp

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

2d HOUSE CS FOR CS FOR SENATE BILL NO. 84 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to processing of permits by state agencies, and to administration of the Alaska Coastal Management program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that

(1) the orderly development of state resources is being unnecessarily delayed by the length of time required to obtain permits from state agencies, by the complexity of the permitting process, and by the number of agencies involved in the permitting process;

(2) the uncertainties created by the lack of specific time limits, the proliferation of agency reviews, the number of agencies involved in the permit process, and unjustified agency requirements upon the processing of permit applications have cost Alaskans millions of dollars in lost employment and higher prices;

(3) the public interest has not been advanced by protracted delay in the processing of permit applications by state agencies;

(4) by reducing the number of agencies and agency reviews involved in the permit process, and by requiring state agencies to process permit applications in an expeditious manner, the social, economic, and environmental health and well-being of Alaska citizens will be promoted; and

(5) there are many administrative orders and similar documents that have been promulgated by the executive branch relating to interagency review that conflict and overlap, retarding the permit issuing process.

* Sec. 2. AS 44.62 is amended by adding new sections to read:

ARTICLE 8A. PERMIT PROCESSING.

Sec. 44.62.632. PERMIT CLASSIFICATION. (a) Each state resource agency shall by regulation classify each of the permits issued by that agency within one of the two following categories:

(1) class I permits, for which the state agency must issue a final decision within 30 days after the date of receipt of a completed permit application; and

(2) class II permits, for which, because of a necessary public notice or interagency review period, a final decision cannot be issued within 30 days. A final decision on a class II permit must be issued within 65 days after the date of receipt of a completed permit application.

(b) Final regulations classifying its permits, and uniform procedural regulations providing for the processing of these permits, shall be adopted by each state resource agency by October 1, 1982, following appropriate notice and hearing. Permits applied for after October 1, 1982 must be issued in accordance with the time periods specified in (a) of this section, and the provisions of the implementing regulations.

Sec. 44.62.633. OTHER REGULATORY REQUIREMENTS FOR PERMIT PROCESSING. (a) Upon a finding by the head of a resource agency that a permit being considered involves unusually complex issues so that the agency cannot render a final decision within the time period specified in AS 44.62.632(a), the head of the agency may prescribe a time period within which the final decision will be made. The finding of the head of the agency may be appealed by the applicant to the superior court under the Appellate Rules of Procedure. The time period may not be extended more than 120 days beyond the time period specified in AS 44.62.632(a).

(b) The time period specified in AS 44.62.632(a) may be extended

if necessary to facilitate joint processing of a permit application by state and federal agencies, but only if adherence to the time periods established in AS 44.62.632(a) would cause an irreconcilable conflict with a federal statute or regulation.

(c) Subject to (a) and (b) of this section and AS 44.62.634, failure of a resource agency to make a final decision within 30 days after the receipt of a completed permit application for a class I permit, or within 65 days after the receipt of a completed permit application for a class II permit, is approval of the application. In an appeal of a permit issued by operation of this subsection, the record shall be considered in the light most favorable to the applicant, and the permit shall be accorded a presumption of regularity.

(d) A state agency may not condition the issuance of a permit upon the issuance of a permit from another governmental agency.

Sec. 44.62.634. ADDITIONAL INFORMATION. (a) If a resource agency receives a completed permit application that does not contain sufficient information concerning the project's compliance with the agency's statutes and regulations, the agency shall notify the applicant within 15 days after receipt of a completed permit application for a class I permit, and within 30 days after receipt for a class II permit.

(b) The notification must specify those particular facts or issues concerning the proposal upon which the agency requires additional information in order to determine whether the project will conform to the agency's statutes and regulations.

(c) If a timely request under (a) and (b) of this section is made, the time period specified in AS 44.62.632 is suspended from the date of request to the date of full compliance with the request. Subsequent requests for additional information may be made, but must relate only to new issues raised by the response to the initial noti-

fication. Subsequent requests do not extend the time periods specified in AS 44.62.632.

(d) Nothing in this section grants a resource agency the authority to request information beyond the authority given to it by other statutes.

Sec. 44.62.635. LEAD AGENCY. (a) There is established a lead agency that is solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications. The lead agency is that resource agency that has principal responsibility for authorizing the overall activity, including instances where an activity requires permits from more than one resource agency. For classes of activities for which no agency with principal responsibility exists the governor shall designate a resource agency to be a lead agency for each class by administrative order no later than October 1, 1982. In performing its functions under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40.

(b) Substantive consideration shall be given to the documented factual statements or data submitted by resource agencies and to the office of coastal management within their primary areas of expertise, and to the documented factual statements or data submitted by coastal resource districts made under an approved district coastal management program. The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

(c) No state agency other than the lead agency may comment to a federal permitting agency.

(d) An agency's completion of a review under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341) does not constitute that agency as a lead agency under this section.

Sec. 44.62.636. COMMENT PERIOD. A coastal resource district or state agency that receives a request for comment in connection with a permit application or plan review being processed by a resource agency shall submit these comments in accordance with the following schedule:

(1) comments on class I permits shall be submitted within 15 days after the agency's receipt of the request;

(2) comments on class II permits and federal permits shall be submitted within 30 days after the agency's receipt of the request;

(3) when under AS 44.62.633, the requesting agency has extended the time periods specified in AS 44.62.632, that agency may extend the time period specified in this section for up to an additional 30 days.

Sec. 44.62.637. ADMINISTRATIVE APPEALS. (a) The uniform procedural regulations adopted under AS 44.62.632(b) must provide for an administrative appeal from a final decision on a permit application. The administrative appeal is to the head of the resource agency involved. Except as provided in this section the procedure is conducted under AS 44.62.330 - 44.62.630.

(b) The administrative appeal must be resolved within 45 days after the final decision on a permit application, or, if a hearing is held on the administrative appeal, within 65 days after the final decision on the permit application.

(c) An appeal taken from a decision granting a permit may, but need not, stay the issuance of the permit.

(d) The head of the agency may summarily dismiss an appeal before the time established in this section, and the dismissal is the final agency action on the matter.

(e) In an appeal from the denial or conditioning of a permit the head of the agency may, if he determines that the public interest would be served, grant the permit or remove conditions of the permit until the appeal is determined.

Sec. 44.62.638. REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the superior court of a final decision issued under AS 44.62.632 - 44.62.637 may be had by filing a notice of appeal in the superior court in accordance with the applicable Rules of Appellate Procedure. The right to appeal is not affected by the failure to seek further review under AS 44.62.637. The review is governed by the provisions of AS 44.62.560(b) - (e) and AS 44.62.570.

(b) An appeal taken under this section has preference on the calendar of civil actions before the court and shall be decided without unnecessary delay.

* Sec. 3. AS 44.62.640 is amended by adding a new subsection to read:

(c) As used in AS 44.62.632 - 44.62.638,

(1) "date of receipt" means the date on which a state agency actually receives a completed application filed in accordance with agency regulations and at a place identified as appropriate for filing in the agency's regulations;

(2) "permit" means a permit, license, certification, consistency determination, or other authorization or approval issued by a resource agency as a written document that is required to be obtained or is solicited from a state agency before the construction or operation of a project; "permit"

(A) does not include the approval of a unit agreement,

a unit development plan, or a unit exploration plan, or conveyances of interest in state land or water;

(5) does include all authorizations and approvals, whether proprietary or regulatory, necessary to undertake a project under a previously conveyed property interest;

(3) "project" means a new activity or expansion or addition to an existing activity for which permits are required before construction or operation; "project" does not include pursuing a trade or profession, providing public health service, or operating a financial institution;

(4) "resource agency" includes the Department of Natural Resources, the Department of Environmental Conservation, and the Department of Fish and Game with respect to permits issued for the protection of fish habitat or the regulation of state sanctuaries, refuges, and critical habitat areas.

AMENDMENTS PROPOSED DURING HL&C COMMITTEE MEETING 2/19/82

Re: SB 84

Amendment #1

Main motion (amendment)

Rep. Randolph moved to amend SB 84 by accepting the draft entitled 2d House CS for CS for Senate Bill No. 84 (L&C).

Amendment #2

amendments to amendment

Rep. Rogers moved to amend the amendment to accept the bill with all the governor's proposed amendments.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #3

Rep. Rogers moved to accept the governor's proposed amendment #4. (p.5, lines 1-2)
Motion passed unanimously.
Amendment adopted.

Amendment #4

Rep. Rogers moved to accept the governor's proposed amendment #11.
For: kogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #5

Rep. Rogers moved to accept the governor's proposed amendment #10; Rep. Bylsma objected. Discussion. (p. 6, lines 15-17)
Motion passed unanimously.
Amendment adopted.

Amendment #6

Rep. Rogers moved, p. 6, lines 12-13 of draft CS, delete sentence, "The right to appeal is not affected by the failure to seek further review under AS 44.62.637." There was objection. Discussion.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #7

Rep. Rogers moved, p. 5, lines 16 and 17, delete "for up to an additional 30 days." and insert, after word "section", ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." Asked unanimous consent.
No objection.
Amendment passed.

Amendment #8

Rep. Rogers moved, p. 2, line 12, after word "application.", delete period, and insert ", unless a public hearing is held on the application, in which case a final decision must b3e issued within 75 days after the date of receipt." Discussion.
For: Rogers, Gardiner, Bylsma Against: Randolph, Martin
Amendment passed.

Amendment #9

Rep. Rogers moved, p. 2, line 28, add, ", unless the applicant otherwise agrees."
No objection.
Motion passed unanimously. should be after line 28

Amendment #10

Rep. Rogers moved, p. 4, line 6, delete first sentence and insert, after (a), "There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which involve the disposal of an interest in state land or water or a least one class II permit."
For: Gardiner, Rogers Against: Randolph, Martin, Bylsma
Motion failed.

Amendment #11

Rep. Rogers moved the governor's proposed amendment #3.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #12

Rep. Rogers moved, p. 5, lines 3-5, to delete subsection (d) and insert new subsection (d), using language from governor's proposed amendment #5. Rep. Randolph asked unanimous consent.
No objections.
Motion passed unanimously. ~~Should be Sec. 1, subsection (e)~~

Amendment #13

Rep. Rogers moved, p. 5, lines 22-23, to accept the governor's proposed amendment #7, as revised (see sheet entitled Changes to Proposed Administration Amendments to SB 84): Delete language "Except as provided in this section the procedure is", and insert "Administrative appeals" conducted under "this section are not subject to the procedures in" AS 44.62.330-44.62.630. Rep. Gardiner asked unanimous consent.
For: Rogers, Gardiner Against: Bylsma, Martin, Randolph
Motion failed.

Amendment #14

Rep. Rogers moved the committee rescind its action in failing to adopt previous amendment. Discussion.
Rep. Rogers withdrew his motion.

Amendment #15

Rep. Gardiner moved, p. 1, line 11, the delete word "being" and insert "many times". Discussion.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #16

Rep. Gardiner moved, p. 1, line 15, delete all of line 15 and insert "the unjustified delay of permits by". Discussion.
Rep. Gardiner withdrew his amendment.

Amendment #17

Rep. Gardiner moved, p. 1, line 15, begin sentence with language, "...e unjustified delay of permits caused by".
For: Gardiner, Rogers Against: Martin, Bylsma, Randolph
Motion failed.

Amendment #18

Rep. Gardiner moved, p. 1, line 10, delete word "protracted", insert word "unnecessary" Discussion.
For: Gardiner Against: Randolph, Bylsma, Martin
Motion failed.

Amendment #19

Rep. Randolph moved to pass 2d HCS CSSB84 (L&C) out of committee; motion was withdrawn.

Amendment #20

main amendment

Question was called on main amendment to accept 2d HCS CSSB 84 (L&C) as amended by committee.
For: Martin, Bylsma, Randolph Against: Gardiner
Motion passed.

Amendment #21

motion

Rep. Randolph moved to pass 2d HCS CSSB 84 (L&C) out of committee. Rep. Gardiner asked unanimous consent.
There was no objection.
Motion passed unanimously.

Amended - see pages 2, 5, 6

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

2d HOUSE CS FOR CS FOR SENATE BILL NO. 84 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to processing of permits by state agencies, and to administration of the Alaska Coastal Management program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that

(1) the orderly development of state resources is being unnecessarily delayed by the length of time required to obtain permits from state agencies, by the complexity of the permitting process, and by the number of agencies involved in the permitting process;

(2) the uncertainties created by the lack of specific time limits, the proliferation of agency reviews, the number of agencies involved in the permit process, and unjustified agency requirements upon the processing of permit applications have cost Alaskans millions of dollars in lost employment and higher prices;

(3) the public interest has not been advanced by protracted delay in the processing of permit applications by state agencies;

(4) by reducing the number of agencies and agency reviews involved in the permit process, and by requiring state agencies to process permit applications in an expeditious manner, the social, economic, and environmental health and well-being of Alaska citizens will be promoted; and

(5) there are many administrative orders and similar documents that have been promulgated by the executive branch relating to interagency review that conflict and overlap, retarding the permit issuing process.

* Sec. 2. AS 44.62 is amended by adding new sections to read:

ARTICLE 8A. PERMIT PROCESSING.

Sec. 44.62.632. PERMIT CLASSIFICATION. (a) Each state resource agency shall by regulation classify each of the permits issued by that agency within one of the two following categories:

(1) class I permits, for which the state agency must issue a final decision within 30 days after the date of receipt of a completed permit application; and

(2) class II permits, for which, because of a necessary public notice or interagency review period, a final decision cannot be issued within 30 days. A final decision on a class II permit must be issued within 65 days after the date of receipt of a completed permit application, , unless a public hearing is held on the application, in which case a final decision must be issued within 75 days after the date of receipt.

(b) Final regulations classifying its permits, and uniform procedural regulations providing for the processing of these permits, shall be adopted by each state resource agency by October 1, 1982, following appropriate notice and hearing. Permits applied for after October 1, 1982 must be issued in accordance with the time periods specified in (a) of this section, and the provisions of the implementing regulations.

Sec. 44.62.633. OTHER REGULATORY REQUIREMENTS FOR PERMIT PROCESSING. (a) Upon a finding by the head of a resource agency that a permit being considered involves unusually complex issues so that the agency cannot render a final decision within the time period specified in AS 44.62.632(a), the head of the agency may prescribe a time period within which the final decision will be made. The finding of the head of the agency may be appealed by the applicant to the superior court under the Appellate Rules of Procedure. The time period may not be extended more than 120 days beyond the time period specified in AS 44.62.632(a), unless the applicant otherwise agrees.

(b) The time period specified in AS 44.62.632(a) may be extended

if necessary to facilitate joint processing of a permit application by state and federal agencies, but only if adherence to the time periods established in AS 44.62.632(a) would cause an irreconcilable conflict with a federal statute or regulation.

(c) Subject to (a) and (b) of this section and AS 44.62.634, failure of a resource agency to make a final decision within 30 days after the receipt of a completed permit application for a class I permit, or within 65 days after the receipt of a completed permit application for a class II permit, is approval of the application. In an appeal of a permit issued by operation of this subsection, the record shall be considered in the light most favorable to the applicant, and the permit shall be accorded a presumption of regularity.

(d) A state agency may not condition the issuance of a permit upon the issuance of a permit from another governmental agency.

Sec. 44.62.634. ADDITIONAL INFORMATION. (a) If a resource agency receives a completed permit application that does not contain sufficient information concerning the project's compliance with the agency's statutes and regulations, the agency shall notify the applicant within 15 days after receipt of a completed permit application for a class I permit, and within 30 days after receipt for a class II permit.

(b) The notification must specify those particular facts or issues concerning the proposal upon which the agency requires additional information in order to determine whether the project will conform to the agency's statutes and regulations.

(c) If a timely request under (a) and (b) of this section is made, the time period specified in AS 44.62.632 is suspended from the date of request to the date of full compliance with the request. Subsequent requests for additional information may be made, but must relate only to new issues raised by the response to the initial noti-

fication. Subsequent requests do not extend the time periods specified in AS 44.62.632.

(d) Nothing in this section grants a resource agency the authority to request information beyond the authority given to it by other statutes.

Sec. 44.62.635. LEAD AGENCY. (a) There is established a lead agency that is solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications. The lead agency is that resource agency that has principal responsibility for authorizing the overall activity, including instances where an activity requires permits from more than one resource agency. For classes of activities for which no agency with principal responsibility exists the governor shall designate a resource agency to be a lead agency for each class by administrative order no later than October 1, 1982. In performing its functions under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40.

(b) Substantive consideration shall be given to the documented factual statements or data submitted by resource agencies and to the office of coastal management within their primary areas of expertise, and to the documented factual statements or data submitted by coastal resource districts made under an approved district coastal management program. The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

Except as otherwise required by federal law,

(c) No state agency other than the lead agency may comment to a federal permitting agency.

delete this subsection; replace with attached *(Eighth Amendment 5)

~~(d) An agency's completion of a review under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341) does not constitute that agency as a lead agency under this section.~~

Sec. 44.62.636. COMMENT PERIOD. A coastal resource district or state agency that receives a request for comment in connection with a permit application or plan review being processed by a resource agency shall submit these comments in accordance with the following schedule:

(1) comments on class I permits shall be submitted within 15 days after the agency's receipt of the request;

(2) comments on class II permits and federal permits shall be submitted within 30 days after the agency's receipt of the request;

(3) when under AS 44.62.633, the requesting agency has extended the time periods specified in AS 44.62.632, that agency may extend the time period specified in this section. However, comments submitted ~~for up to an additional 30 days~~ under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision.

Sec. 44.62.637. ADMINISTRATIVE APPEALS. (a) The uniform procedural regulations adopted under AS 44.62.632(b) must provide for an administrative appeal from a final decision on a permit application. The administrative appeal is to the head of the resource agency involved. Except as provided in this section the procedure is conducted under AS 44.62.330 - 44.62.630.

(b) The administrative appeal must be resolved within 45 days after the final decision on a permit application, or, if a hearing is held on the administrative appeal, within 65 days after the final decision on the permit application.

(c) An appeal taken from a decision granting a permit may, but need not, stay the issuance of the permit.

(d) The head of the agency may summarily dismiss an appeal before the time established in this section, and the dismissal is the final agency action on the matter.

(e) In an appeal from the denial or conditioning of a permit the head of the agency may, if he determines that the public interest would be served, grant the permit or remove conditions of the permit until the appeal is determined.

Sec. 44.62.638. REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the superior court of a final decision issued under AS 44.62.632 - 44.62.637 may be had by filing a notice of appeal in the superior court in accordance with the applicable Rules of Appellate Procedure. The right to appeal is not affected by the failure to seek further review under AS 44.62.637. The review is governed by the provisions of AS 44.62.560(b) - (e) and AS 44.62.570.

(b) An appeal taken under this section ~~has~~ should have preference on the calendar of civil actions before the court and ~~shall~~ should be decided without unnecessary delay.

* Sec. 3. AS 44.62.640 is amended by adding a new subsection to read:

(c) As used in AS 44.62.632 - 44.62.638,

(1) "date of receipt" means the date on which a state agency actually receives a completed application filed in accordance with agency regulations and at a place identified as appropriate for filing in the agency's regulations;

(2) "permit" means a permit, license, certification, consistency determination, or other authorization or approval issued by a resource agency as a written document that is required to be obtained or is solicited from a state agency before the construction or operation of a project; "permit"

(A) does not include the approval of a unit agreement,

a unit development plan, or a unit exploration plan, or conveyances of interest in state land or water;

(B) does include all authorizations and approvals, whether proprietary or regulatory, necessary to undertake a project under a previously conveyed property interest;

(3) "project" means a new activity or expansion or addition to an existing activity for which permits are required before construction or operation; "project" does not include pursuing a trade or profession, providing public health service, or operating a financial institution;

(4) "resource agency" includes the Department of Natural Resources, the Department of Environmental Conservation, and the Department of Fish and Game with respect to permits issued for the protection of fish habitat or the regulation of state sanctuaries, refuges, and critical habitat areas.

AMENDMENT 5

Page 5, ls. 3-5.

Delete existing subsection (d) and insert the following:

(d) For activities involving both a disposal of interest in land, or plan of operations approval under a previous disposal, and a certification under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341), the lead agency shall be the Department of Natural Resources.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K—STATE CAPITOL
JUNEAU, ALASKA 99811

March 2, 1982

Honorable Terry Martin
Chairman, House Labor & Commerce
Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Hearing on HCS CSSB 84 (L&C)

Dear Representative Martin:

At the last HCS CSSB 84 before your committee, you had expressed an interest in receiving copies of the Administrative Uniform Procedures Regulations which were adopted last year as a means of streamlining the permitting processes in the state in the absence of legislation on the subject. Even though the bill you were considering did pass out of your committee that same day, I thought you might still wish to review the end product of the Administration's regulatory effort. I am therefore enclosing 10 copies of the Uniform Regulations for your review and distribution to others who may also be interested in their content.

If you have any questions regarding the regulations, please don't hesitate to contact us.

Sincerely,

WILSON L. CONDON
ATTORNEY GENERAL

By: Lauri J. Adams

AMENDMENT 3

Page 4, lines 6 -- 29

Delete all of sec. 44.62.635(a) and (b) and insert the following in its place:

(a) There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which include the conveyance of an interest in state land or water or at least one class II permit decision. The lead agency may vary for classes of activities, but shall be that agency that has principal responsibility for authorizing the overall activity. For classes of activities for which no agency with principal responsibility exists the governor shall designate a lead agency by administrative order no later than October 1, 1982. In performing its functions under this section the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40. The lead agency shall balance competing factors in reaching its decision. Substantive consideration shall be given to the comments of resource agencies within their primary areas of expertise.

(b) If a coastal resource district with an approved and applicable district coastal management program appeals the lead agency's consistency determination, AS 44.62.560--44.62.570 govern judicial review. However, notwithstanding

AS 44.62.570(c), abuse of discretion is established if the reviewing court determines that the consistency determination is not supported by a preponderance of the evidence in the administrative record.

AMENDMENT 4

OK

Page 5, ls. 1-2. Yes —

(c) Except as otherwise required by federal law, [N]no state agency other than the lead agency may comment to a federal permittingaagency.

AMENDMENT 5

Sec. 44.62.637. ADMINISTRATIVE APPEALS. (a) The uniform procedural regulations promulgated pursuant to AS 44.62.632(b) shall provide for an administrative appeal from a final decision on a permit application. (b) The appeal must be resolved within 45 days of the final decision, or, if a hearing is held on the appeal, within 65 days of the final decision. Such appeal shall be to the head of the resource agency involved. An appeal taken from a decision granting a permit shall not necessarily stay the issuance of the permit in question. The head of the agency may summarily dismiss an appeal before the time established herein, and such dismissal shall be the final agency action on the matter. If the public interest is so served, in an appeal from the denial or conditioning of a permit the head of the agency may grant the permit or remove conditions thereon pending the outcome of the appeal.

Re: Enclosed Material on
Uniform Procedural Regulations
and SB 84

Dear Ray:

Enclosed are the materials which I promised you relating to SB 84 and the Uniform Procedural Regulations. These documents are, in order:

1. The Executive Summary of the draft regulations, for which public notice was given in January of this year. The Executive Summary highlights the major issues surrounding the draft regulations which emerged from working sessions held with industry and environmental groups late in 1980;

2. The complete public comment file on the draft regulations;

3. An April 6, 1981 memorandum from myself to Governor Hammond with respect to major issues surrounding the proposed final regulations. In particular, the memorandum addresses the criticism raised by public interest groups that the regulations "balkanize" the State's Coastal Management Program, and give excessive authority to the Department of Natural Resources as a coastal management "lead agency";

4 The final regulations as adopted by the departments of Natural Resources, Environmental Conservation and Fish & Game, and the Alaska Coastal Policy Council, in April of this year. As you are aware, these regulations have not been filed with the Lieutenant Governor's Office because of uncertainty regarding possible permit reform legislation;

5. The Department of Law's analysis of CSSB 84. The analysis addresses the Senate Resources Committee version of the bill;

6. Proposed changes in the Second Rules Committee version of SB 84 discussed at a recent meeting with various AOGA representatives. As the enclosed cover letter to the suggested changes indicates, the primary areas of remaining disagreement between the administration and the oil industry relate to the proper role of local governments in State decision making--at least when the local government has an approved coastal management program--and the length of the administrative appeals process; and

7. Our permit reform mailing list.

Once you have digested these documents, I would be happy to answer any questions you might have. The cabinet has yet to meet on the proposed AOGA changes, and we as well have yet to hear from AOGA as to whether they would be satisfied with a package of legislation and regulations which contain the proposed revisions. For reasons which are self-evident, the changes proposed in the enclosure would be opposed by local governments, as well as by public interest groups in the State. Moreover, many industry groups within the State will likewise object to the changes. As you are aware, the Southeast Alaska timber industry, and the Southeast native corporations, have supported the regulations actively. The primary reason for this support has been the strong role which the regulations envision for local governments with approved coastal management programs. Local/industry relations with respect to the timber industry are generally good. This is also true with respect to certain petrochemical interests in the Kenai Peninsula, which have also supported the regulations. The oil production industry, on the other hand, has been having rather notorious problems with the North Slope Borough, and therefore has taken the position that local governments should have a lesser influence on State decision making, even when that local government has an approved coastal management program. We have attempted, from the outset, to choose a middle ground between merely "considering" local comments on coastal management matters on the one hand, and affording local governments a "veto" on the other.

I hope these materials are of some help to you, and look forward to hearing from you.

Sincerely yours,

WILSON L. CONDON
ATTORNEY GENERAL

TESTIMONY OF J. D. BERTINO

CHEVRON U.S.A. INC.

ON

PROPOSED UNIFORM PROCEDURES FOR PERMITS,
CONSISTENCY DETERMINATIONS AND APPEALS

FEBRUARY 6, 1981

ANCHORAGE, ALASKA

I am an atty.

My name is J. D. BERTINO. I represent Chevron U.S.A. Inc. I have been employed by Chevron in various positions dealing with governmental regulations for over 23 years. I am an Alaska resident and have been responsible for land and permitting matters for Chevron for almost six years in Alaska. I would like to express our appreciation to you for affording Chevron U.S.A. Inc. the opportunity to comment on the proposed uniform procedural regulations. We hope our comments will be constructive, both to the benefit of the State and our industry.

Chevron appreciates and welcomes any efforts taken by the State to facilitate the processing of permits. However, it is difficult to square an additional fourteen pages of regulations with Governor Hammond's regulatory reform project announced on December 5, 1980. In his opening remarks he stated that too little progress had been made in ensuring that State government is easier to deal with. I quote, "Regulatory Reform efforts run a great risk of becoming either too theoretical, or mired in fundamental political controversy". Governor Hammond indicated his program would be a sincere effort to get government off the backs of our average citizens and our industries.

It is our understanding that the Legislature is presently considering legislation which generally pertains to the permitting process. It appears there is a reasonable probability that some type of permitting legislation will be passed in this session. It is our recommendation that the administration defer action on the proposed regulations until the Legislature has acted. In the event the proposed regulations are adopted, it seems inevitable that these regulations will conflict with any legislation that is passed during the present session. This unnecessary conflict can be avoided by delaying the adoption of any procedural regulations until the Legislature has had an opportunity to act.

However, we submit the following specific comments in the event further consideration is given to the adoption of these regulations at this time.

Sec. 020 provides that the deadline for an agency's processing of a permit may be extended for an indefinite period of time where the agency finds that "substantial complex issues" are involved. We believe that any permit application can be processed within 65 days of the agency's receipt of the application. Accordingly, we recommend

that this portion of Section .020 be deleted. At a minimum, we would suggest that an outside limit as to the amount of time the Commissioner may extend the deadline be inserted; for example, 120 days. Moreover, the regulations should be amended to provide that such certification by a commissioner could only be made upon a finding that extraordinary circumstances warranted such an extension.

Articles 6, 7 and 8 provide for a lengthy and cumbersome administrative appeal process. It is Chevron's position that any satisfactory permitting process must provide for immediate access to the superior court following the agency's initial decision with regard to the permit application. We believe that the availability of this option will insure the agency's careful scrutiny of the application, as well as any suggested stipulations, throughout the permitting process. In view of the current problems with the permitting process, we believe it essential that any disputes between the applicant and the agency be presented to a neutral tribunal at an early date.

The need for a process which provides for an immediate appeal to the judicial system is clear when the effect of even a short delay in the permitting process is considered.

For example, many oil and gas operations are required to be conducted under very rigid seasonal restrictions. If a permit is delayed, the lessee may lose a full year of a lease term.

We have a situation where a lessee has paid a substantial sum for a lease and has an obligation to diligently explore and develop his lease or lose it. Often, a lessee finds himself unable to meet his obligations under the terms of the lease because of a delay in obtaining the required permits or because of conditions imposed under the permitting process which virtually preclude diligent exploration and development. On one hand, we have the lease administrator compelling diligent exploration and development; on the other hand, we have various agencies imposing conditions which make it almost impossible to meet the very obligations required under the terms of the lease. We therefore recommend that Articles 6, 7 and 8 be deleted. Should the applicant desire further agency review, a motion to reconsider the decision can always be filed with the department.

We are also concerned with those provisions of the regulations pertaining to inter-agency review. Sec. 130(c) provides that the deciding agency shall accord "great weight"

to comments of other resource agencies provided such comments are within the commenting agency's "primary area of expertise". On its face, that language would appear to require a deciding agency to defer to a commenting agency's recommendation. This is the basic cause of current problems with the permitting process. The Executive Summary with which we have been provided by the State has attempted to allay such fears by arguing that such recommendations are not within the agency's primary area of expertise. Similarly, Attorney General Condon stated to a Senate Resources Committee work session on January 27 of this year that it was his view the purpose of the language in question was to assure that comments of the other agencies would be considered. Consistent with that statement, and that of the Executive Summary, we would suggest that the definition of "great weight" be couched in terms of "careful consideration" rather than deference.

We also believe that comments of other agencies should be restricted to the manner in which the permitted activity shall occur, rather than whether the activity will be allowed. For example, where a state oil and gas lease has been issued the lessee has a contractual right to conduct operations on the state's land. Recommendations by commenting agencies

that certain activities should not be allowed, even though authorized by the lease, are therefore inappropriate. This is particularly true when it is considered that the concerns of the commenting agencies receive extensive analysis prior to the State's decision to lease.

As acknowledged by the Executive Summary, the proposed regulations do not constrain the degree to which a State agency may influence the approval of federal permit applications which are required to conduct the same or similar activities as also permitted by State agencies. Chevron believes that it is essential that State comments be channeled through the same State agency which has State permitting authority for the activity in question. We can fathom no policy consideration which would allow a State agency to permit a given activity, and simultaneously allow another State agency to block that activity through the federal permitting process. This is part cularly true where the commenting agency was previously given a full opportunity to submit detailed comments and supporting rationale to the deciding State agency for the State permit, and then proceeded to require that conflicting conditions be imposed on the same activity through the federal permitting process.

Contrary to the suggestion of the Executive Summary, it is submitted that such a procedure would not relegate the Department of Fish and Game or the Department of Environmental Conservation to a "second class" status. Rather it would assure that such departments are on equal terms with the other permitting departments. No department should be able to block another department's decision via a "back-door" process. The Departments of Fish and Game and Environmental Conservation would retain their ability to monitor performance through their own statutory authority.

We will submit further detailed written comments by February 27, 1981. Thank you for this opportunity to comment.

WRITTEN COMMENTS OF
CHEVRON U.S.A. INC.
ON UNIFORM PROCEDURES FOR PERMITS,
CONSISTENCY DETERMINATIONS AND APPEALS

22AAC 10.020. DEADLINES ON PERMIT ISSUANCE.

Subsection (a)(1) provides for open-ended extension of any permit deadline if the Commissioner certifies that the project involves "substantial complex issues". We believe that any permit application can be processed within 65 days of the agency's receipt of the application. This section undermines the purpose of establishing permit deadlines. Therefore, we recommend that (a)(1) be deleted.

Alternatively, an outside limit should be established so that a deadline cannot be extended for an indefinite period of time. We suggest a maximum extension of 60 days be established. Therefore, the maximum time for processing a class I permit cannot exceed 90 days. The maximum time for processing a class II permit cannot exceed 125 days.

Subsection (a)(4) provides that a deadline may be extended where the deciding agency is processing the application jointly with the federal agency pursuant to a memorandum of understanding. We suggest that this section be deleted. Existing memoranda of understanding should be revised to reflect deadlines established in these regulations.

22AAC 10.030. ADDITIONAL INFORMATION.

This section establishes two time periods during which an agency can request additional information. Upon receipt of an application for either a class I or class II permit the agency should immediately assess whether additional information is necessary in order to process the permit. Assessment should not require more time for class II permits than for class I permits. Therefore, we propose that a 15 day period be established for both classes of permits.

22AAC 10.040. SIGNING OF APPLICATIONS.

Subsection (1) provides that, in the case of corporations, a representative responsible for the "overall management of the project or operation" sign the application. This requirement does not reflect the realities of corporate business transactions in Alaska. Many times the person responsible for the overall management of the project or operation does not work in Alaska and has delegated permitting responsibilities to those who do. Any duly authorized employee of the corporation should be allowed to sign applications. This is consistent with Subsection (4) which allows for any duly authorized employee of a governmental agency to sign applications.

22AAC 10.050. ORAL PUBLIC HEARINGS.

This section creates new and complex requirements for public notice and hearings. These procedures complicate, rather than expedite the permitting process. They are inconsistent with the goal of regulatory reform and will provide a vehicle for attacking decisions made pursuant to these regulations. We propose that public hearings be limited to those required by statute.

22AAC 10.130. INTERAGENCY REVIEW.

This section provides that the deciding agency accord "great weight" to the comments of other resource agencies which meet certain qualifications. As defined in 22AAC 10.920 Subsection (7), "great weight" means deference, unless the assertion is contrary to the weight of fact or opinion in the administrative record. To the extent that certain matters have been statutorily defined as matters of national concern, this requirement may be unlawful. If a deciding agency must defer to the comments of a local agency pursuant to .130(c), the deciding agency may be unlawfully delegating its decision-making functions.

As applied to Coastal Management Consistency Determinations, this would clearly conflict with the mandate of the Coastal Zone Management Act (CZMA). Section 46.40.020(7) of CZMA states "the Alaska Coastal Management program shall be consistent with recognition of the need for a continuing supply of energy to meet the requirements of this State and the contribution of a share of the State's resources to meet national needs." To the extent that these regulations conflict with this mandate by requiring deciding agencies to accord "great weight" or deference to the comments of other resource agencies, they are invalid.

Section .570(b) states that "resource agency" includes coastal resource districts. Thus, the regulations establish a procedure for promoting the concerns of local districts over state or national concerns. We caution the State not to adopt regulations which may require the unlawful delegation of decision making functions to local coastal resources.

22AAC 10.500 ET SEQ. COASTAL MANAGEMENT CONSISTENCY DETERMINATIONS.

The procedures established in Article 5 do not expedite coastal management consistency determinations. The requirement that a deciding agency accord "great weight" to the comments of other resource agencies, and defer to the agency with "primary expertise" if no balancing or competing factors are involved, further complicates an already complex process.

Although the goal of this section appears to be limiting the Coastal Management Consistency Determinations to a one time occurrence, subsections (b) and (c) of .500 defeat this goal. .500(c) provides that an agency may reappraise its prior determination on the basis of new information not available at the prior stage if a more specific consequential activity is being permitted. Subsection (c) undermines the

purpose of subsection (b). The last sentence in subsection (b) states "the scope of any consistency determinations on a more specific activity is limited by the scope of the more specific permit proceeding". This is directly contradicted by subsection (c) which authorizes a reappraisal of prior determinations. Accordingly, we suggest that subsection (c) be deleted.

We oppose the requirement that two consistency determinations be made when certain other activities are undertaken. There is no basis for establishing a more complex procedure for consistency determinations arising from "other activities", therefore, we suggest that subsections (a) and (b) of .550 be deleted. The title should be changed to refer to those activities which do not require consistency determinations.

ARTICLES 6, 7 and 8. APPEALS. 22AAC 10.600, .700, .800 ET SEQ.

Articles 6, 7 and 8 provide for a lengthy and cumbersome administrative appeal process. In order to establish a satisfactory permitting process, immediate access to the Superior Court must follow an agency's initial decision with regard to the permit application. The availability of this option will insure not only the agency's careful scrutiny of the application as well as any suggested stipulations, but the applicant's careful preparation of the application and diligent followup work. In addition, immediate access to Superior Court will greatly shorten the delay that is inherent in the appeal procedure established in these regulations.

Delay is critical when considering the lessees obligation to diligently explore and develop his lease or possibly loose it. Often, a lessee may find himself unable to meet obligations under the terms of the lease because of a delay in obtaining a required permit or because of conditions imposed under the permitting process which precludes

diligent exploration and development, and therefore must be appealed. Immediate access to judicial review is the only method for resolving the conflict between the lease administrator, who compels diligent exploration and development and the various agencies who may compose conditions which impede the very obligations required by the terms of the lease.

In order to resolve this, we recommend that Articles 6, 7 and 8 be deleted. In their place we suggest the following sections be included in the regulations:

"REVIEW BY THE COMMISSIONER. An agency's final decision issued pursuant to AS 44.62.632 may be reviewed by the commissioner for the issuing agency at the request of the applicant. The request must be filed with the commissioner within thirty (30) days of the applicant's receipt of the decision. The commissioner shall issue a decision within ten (10) days of the department's receipt of the request, unless the applicant has requested a hearing de novo, in which case such hearing shall be held within thirty (30) days of the department's receipt of the request, and the commissioner's decision shall be rendered within thirty (30) days of the conclusion of the hearing. Unless the agency decision is confirmed in its entirety, the commissioner shall issue a written decision setting forth his findings and conclusions in full.

REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the Superior Court of a final decision issued by a state agency pursuant to AS 44.62.632 or 44.62.634 or of a decision of the commissioner issued pursuant to AS 44.62.635, may be had by filing a notice of appeal in the Superior Court in accordance with the applicable rules of appellate procedure. The right to appeal is not affected by the failure to seek reconsideration or further review pursuant to AS 44.62.635. The review shall be governed by the provisions of AS 44.62.560(b)-(e) and AS 44.62.570.

(b) On an appeal by the applicant to the Superior Court, the agency which issued the final decision has the burden of proving that the decision is in accordance with AS 44.62.632 and 44.62.634.

(c) An appeal taken under this section has preference on the calendar of civil actions before the court and shall be decided without unnecessary delay."

Additional Comments:

1. Comments of Other Agencies:

Comments of other agencies should be restricted to the manner in which the permitted activity may occur rather than whether the activity will be allowed to occur at all. Once the State issues an oil and gas lease, the lessee obtains the contractual right to conduct operations on the State's land. Recommendations by commenting agencies that certain activities should not be allowed, even though they are specifically authorized by the lease, are therefore inappropriate and should not be considered. The concerns of commenting agencies receive extensive analysis prior to the State's decision to lease. Once the State decides to schedule an oil and gas lease sale, commenting agencies should not be allowed to undermine this decision by recommending that the activity not be allowed.

2. State Agency Comments on Federal Permit Applications.

Proposed regulations do not constrain the degree to which a state agency may influence the approval of federal permit applications which are required to conduct the same or similar activities permitted by State agencies. State comments must be channeled through the same State agency who has the State permitting authority for the activity in question. There is no valid policy consideration

which would allow a State agency to permit a given activity and simultaneously allow another State agency to block that activity through the Federal permitting process. This is particularly true when the commenting agency was given a full opportunity to submit detailed comments and supporting rationale to the deciding State agency and then proceeds to require that conflicting conditions be imposed on the same activity through the federal permitting process. In order to avoid this problem, the regulations should assure that no department is able to block another departments decision via a "back-door" process.

3. Automatic Approval of Permit Applications.

Conspicuously absent from the proposed regulations is a provision regarding enforcement of the time limits established. In spite of statements by the Department of Law in the Executive Summary, many states, including California, have provided for automatic approval of some permit applications if no action is taken within the applicable time period. We strongly urge the Department of Law to include a section calling for automatic approval of permit applications in this circumstance. Unless permitting agencies face some penalties these regulations will provide little impetus for compliance.

FINAL

Mr. Jonathan K. Tillinghast,
Special Assistant Attorney General
Department of Law
Pouch K
State Capitol
Juneau, Alaska 99811

Re: Draft Uniform Procedures

Dear Mr. Tillinghast:

The Alaska Oil and Gas Association (AOGA) has reviewed the draft Uniform Regulatory Procedures discussed at a meeting with you on December 12, 1980 and has the following comments.

AOGA supports measures which expedite and reform administrative and regulatory procedures. However, after review of the draft regulations, AOGA members have concluded that instead of streamlining and expediting permit procedures, these regulations provide a more complex and cumbersome system. The purpose of regulatory reform is not to enact long-standing, archaic procedures which are neither necessary to the permitting process nor beneficial to the sound development of Alaska's resources. Reform should not require the adoption of an additional 17 pages of regulations.

In addition, AOGA has the following general comments concerning proposals set forth in the proposed Uniform Regulatory Procedures. During late November and the month of December, the state has advised of the proposed adoption of nine different sets of regulations which affect the oil industry. Most of these are new and in addition to existing regulations, thus requiring considerable review time. Because of time constraints, holiday season, and the flood of new proposed regulations, several AOGA members have not had the opportunity to review and develop specific responses to these proposals. From the members who attended your meeting in Juneau on December 12, 1980, our committee was informed that these regulations will be publicly noticed on or about January 9, 1981. If that time schedule has changed, please advise me.

The central problem concerns the lack of administrative guidelines to establish the relationship between the statutory responsibilities of the resource agencies and the implementation of particular state programs such as oil and gas leasing. Until the Administration or the Legislature clearly defines the role of resource agencies in reacting to approved resource programs, no reform at the executive level can be effective.

AOGA makes the following general comments concerning several of the specific proposals set forth in the proposed draft.

1. These regulations do not provide for a direct appeal to the Superior Court for a permit applicant who has been either denied a permit, or a permit condition is attached to which the applicant does not agree. The appeal procedure may be addressed in later regulations; however, any regulations proposed should allow a direct appeal to the Superior Court following the agency's initial decision on the permit application.

2. Since various sections of the regulations allow the commissioner to request additional time, provide public notice, and set a public hearing, in essence every permit application for oil and gas related activities will be a Class II permit. Class II permits provide for a minimum of 65 days review by the agency and in many cases this is not necessary or required to expedite the permitting process.

3. The provisions set forth in AAC 10.020, allowing extension of times, are so broad that effectively there is no deadline set in the permit review process requiring an agency to act. In addition, there are no penalty provisions requiring issuance of a permit if the agencies take more time than set forth in the regulations.

4. There is no provision that precludes the commissioner from making a finding, that as a result of a public hearing, additional time will be necessary to review the permit application. Thus, the commissioner could certify that additional time is necessary after the permit has been the subject of a public hearing.

5. In section 10.030(a) the agency should specify within 10 days of receipt of an application whether the application is complete, and if the application is incomplete specify the data necessary to complete the application. No request for additional information should be made by the agency after the additional information has been supplied by the applicant.

6. In sections 10.030(b) and (c) there should be no extensions of time for reviewing an application which is otherwise complete where the agency is requesting more information than is generally required. If the agency requests additional information that is generally not required, the time constraints imposed on the agency for action should remain the same.

7. Any authorized employee should be allowed to sign a permit application on behalf of a corporation.

8. Public hearings should only be held if required by a statute. The present public notice provisions and opportunities to comment are sufficient to receive diverse comments regarding a project and permit proposal.

9. There should be a specific provision requiring the agency to act, or if the permit application is not approved or denied within the specified time period, the permit should be approved by operation of law. Existing regulations on surface use permits provide for such automatic approval. (See 11 AAC 96.030(b)).

10. Where permits are denied or approved with stipulation, there should be a section which requires the agency to set forth the reasoning and justification for either (a) the denial or (b) the reasons supporting the need for permit stipulations, and whether these permit stipulations are reasonable and necessary. Many permits now being issued contain boiler-plate language or have stipulations which have no application to the permitted activity.

11. All permits should be for the life of the project as proposed by the applicant, and not for a specified term unless such term is required by statute.

12. If a streamlined permitting process is developed, there is no reason for Memorandums of Understanding between various agencies for processing applications. It is not clear why Memorandums are necessary for internal operations of the agencies. Substantial changes have resulted from such internal Memorandums which defeat the intent of established procedures.

13. Regarding AAC 10.130 a commenting agency does not have the full record before it and therefore should not be allowed to recommend denial of a permit. Such a recommendation, when viewed in conjunction with the definition

of "great weight" and the considerable deference given to the commenting agency, will ensure that a permit application will be denied if the commenting agency so recommends. The applicant will not have the ability to provide additional information or data to the lead or deciding agency to refute these comments. This section expands agency jurisdiction without any statutory-enabling legislation. The commenting agency should only be able to set forth reasonable conditions under which the activity proposed by the applicant can be conducted.

14. Regarding Coastal Zone Management - one consistency determination should be made. Once a decision is made to commit state resources for a particular purpose one consistency determination should be made which discusses that determination and resulting projects. For instance, if the state determines that lands should be leased for potential oil and gas exploration and development, one consistency determination should be made at the time the lands are proposed for sale. Later, when leases are purchased, and exploration operations commenced, no additional consistency determination should be required. Also, any state agency reviewing consistency should not be able to impose additional comments or conditions on any federal permit or state permit. The agency should not submit comments which are different from those originally submitted regarding a state permit application before them or where they have been requested to comment on a permit application before another agency.

15. State permitting procedures are not likely to improve until the concept of "a lead agency" having sufficient authority to make permit decisions is adopted. Under present procedures, each decision is fragmented on an equal weight basis as each agency maneuvers to have its concerns assume a dominant role. Broad state and public interest is ignored in the process while the permit issuance is delayed until the last possible moment. These circumstances frequently compel the applicant to accept unwanted, unnecessary and inappropriate stipulations.

Finally, these regulations in some cases expand the authority of agencies in the state and decrease the authority of other agencies. An agency charged with approving a permit or plan of operation is charged and responsible for the disposition of state resources and is required by law to meet certain requirements. These regulations require that agency to delegate much of its authority, and defer to comments of other agencies, which effectively expands the authority of those other agencies.

In conclusion, even though considerable time, personnel and effort has been expended on the drafting of these regulations, regulatory reform can be more effectively accomplished in a simpler manner. Passing legislation which requires agencies to issue or deny permit applications within a specified time period is the initial step in regulatory reform. Agencies should be partners with permit applicants to insure that applications are not denied, that state resources are utilized in a reasonable manner and that applications and permits are granted in the shortest possible time frames by the agency. These regulations do not provide for regulatory reform, but merely attempt to set forth the present permitting procedure into formal regulations. The present permitting procedure is not acceptable and is the basis for the present regulatory reform efforts.

We thank you for the opportunity to review these regulations and if you require further information concerning our comments please advise me.

Very truly yours,

O. K. Gilbreth, Jr.

FINAL

TESTIMONY

OF THE

ALASKA OIL AND GAS ASSOCIATION

ON

UNIFORM PROCEDURES FOR PERMITS, CONSISTENCY DETERMINATIONS AND APPEALS

FEBRUARY 6, 1981

ANCHORAGE, ALASKA

COMMENTS OF THE
ALASKA OIL AND GAS ASSOCIATION
ON
UNIFORM PROCEDURES FOR PERMITS,
CONTINGENCY DETERMINATIONS AND APPEALS
FEBRUARY 6, 1981

Good evening. My name is Don E. Glass and I am with Shell Oil Company in Anchorage. I am here tonight representing the Alaska Oil and Gas Association.

The Alaska Oil and Gas Association is a trade association whose 30 member companies account for the bulk of oil and gas exploration, production and transportation activities in Alaska. Our membership includes the largest and some of the smallest petroleum firms in the industry. AOGA is the Alaska division of the Western Oil and Gas Association.

AOGA is well into the second year of study on regulatory constraints faced by our industry. AOGA supports necessary measures which expedite and reform regulatory procedures. We are supportive of the four goals listed in the Executive Summary, namely:

1. Establishment of the shortest feasible deadline for the issuance of state permits for natural resource development;

2. Establish uniform permit procedures;

3. Explicitly define the rights of the applicant, and other persons in the permitting process; and

4. Streamlining the state's coastal management decision-making process.

We regretfully conclude that these regulations do not achieve these goals. While many existing problems have been alleviated, some have been made worse and others newly introduced. Therefore we are unable to support their adoption without further changes. We believe these regulations contain the following major problems:

1. Complex new requirements are created by these regulations that did not exist before. New public notice, hearing and administrative appeals procedures are established, which can only serve to complicate and delay the processing

of permits. To our knowledge, no complaint has ever been registered with the state concerning the present lack of public notice, hearings and administrative appeals on matters relating to the issuance of permits. Also, new procedures are added which further complicate procedures which are already too complex, and which invite lawsuits over the complexities that are created in these new regulations. For instance, Section 160(3) requires that the agency making a decision must state its reason for the rejection of "any significant and material recommendation made at a public hearing" held under the regulations. Presumably, if this is not done properly, the permit is void. Our belief is that this provision constitutes an easy target for hostile lawyers to attack, since in someone's opinion, virtually anything discussed at a hearing will be "signficant and material". On the other hand, it is physically impossible for an agency to respond to everything discussed at a public hearing. Providing complex procedures which are easy targets for lawsuits is <u>not</u> reforming the regulatory process.

2. There is presently a problem concerning the orderly process of making consistency findings under the Alaska Coastal Management Program because several agencies are involved in the matter. We believe that Sections 510 through 550 solve many of these problems, but create others which do not now exist. For example, sections 510 through 540 designate which state agency will make the conclusive Consistency determination under most forseeable circumstances. However, the deciding agency must accord "great weight" (Section 920-7) to the comments of other resource agencies (920-12) and must defer to the agency with "primary expertise" (920-9) if no balancing of competing factors is involved. In many important circumstances this will find the Department of Environmental Conservation or the Department of Natural Resources facing a consistency determination on an activity for which the Division of Policy Development and Planning is recommending consistency denial, and trying to sort out which agency has primary expertise, and whether the situation calls for balancing or automatic deference. To make matters worse, 570(b) by the same token offers a virtual veto power held by local governments over any activity to be permitted on state lands by the State of Alaska. This is not presently the case. We think this is unacceptable.

Without a substantial re-write and simplification, we

must remain opposed to adoption of these regulations. Our preliminary recommendations on specific sections of the regulations, as currently proposed, are as follows:

Section 10.020 provides for deadline extensions if provided for in a memorandum of understanding or if the Commissioner finds that complex issues require additional time.

Any memorandum of understanding entered into prior to or pursuant to these regulations should not contain conflicting approval schedules, but rather should provide for approvals within the time frame contained in these regulations.

The provision for extension deadlines due to substantial complex issues is open-ended, and should be granted only in extraordinary circumstances.

Section 10.030 calls for agencies to notify applicants of the need for additional information within 15 days for Class I permits and 30 days for Class II permits. Fifteen days is sufficient for both classes of permits.

Section 10.040 requires an individual responsible for the overall management of a project to sign an application. It is not always possible for that individual to sign an application due to locale, etc. Submittal of an application should not be delayed for this reason; any duly authorized employee should be allowed to sign applications. We note that subsection (4) of this section allows for any duly authorized government employee to sign applications.

Under Section 10.050 public hearings may be held under certain circumstances. We believe that hearings on Class I permits should be held only if required by statute.

Notwithstanding the comment in the Executive Summary, the section on Decision of Applications should include a provision for automatic approval of a permit application if no action is taken by the deciding officer within the applicable time period.

Further to our earlier comment on memorandums of understanding, the regulations need to be clarified under Section 10.085 to reflect that any MOU's in existence upon adoption of the regulations must be either revised to reflect the provision of the Chapter, or withdrawn.

Under Subsection (c) of the Public Notice section, notice must be sent to any unit of local government having jurisdiction

over a proposed activity. In some cases such jurisdiction may be difficult to determine and the inadvertent omission of such notice to one local government later claiming jurisdiction could prejudice the permit. To avoid confusion we would suggest that the section require notice be given to "appropriate units of local government".

In the section on Intra-agency Review it should be noted that agencies should not be allowed to recommend denial of a permit; but rather should make recommendations on what is needed to make the application approvable.

We have several concerns over the consistency article of this chapter.

We propose that the Department of Natural Resources be responsible for consistency determinations associated with a state oil and gas lease including any leasing EIS or Federal Permits requiring an EIS. This would support the intent of .520 which calls for DNR to make determinations on disposal of an interest in state land. We also recommend that the Department of Natural Resources, the agency with expertise in oil and gas matters, be responsible for the State's review and consistency determinations for petroleum exploration and development activities in the OCS as well as in State waters.

In most cases the regulations reflect that only one consistency determination will be made; however, as proposed, Section 10.550 would require two consistency determinations to be made for activities not covered in other sections. We would suggest that (a) and (b) of that section be deleted, thereby eliminating the double consistency problem. The title should then be changed to reflect that the section covers activities for which a consistency determination is not necessary.

Section 570(b) provides a description of resource agencies for the purposes of sections .510-.550. including in that description a coastal resource district with an approved CZM plan. The inclusion of a district as a resource agency is unnecessary because once a district plan is approved, it becomes part of the Alaska Coastal Management Program and therefore must be considered by any state agency making a consistency determination. Including a district in the consistency determination process adds yet another layer to the approval process. Given the definition of "great weight" this section apparently authorizes a local district to veto a project which is in the best interest of the state.

Section .580 can require an applicant to submit all applications simultaneously. This would be cumbersome, if not impossible, in some instances. We are recommending in our detailed comments language which would allow consistency determinations to be rendered limited to the scope of the activity and contingent upon an ultimate conclusive consistency determination.

AOGA recommends Articles 6, 7 and 8, and all references to appeals, be deleted from the regulations and instead one article be included stating that an applicant has the right to direct appeal to the Superior Court following the agency's decision on the permit application. The permitting process is vital to our industry and accordingly we believe it is essential that permit issues be resolved through judicial review at an early date.

In the definitions section we would recommend that the definition of "great weight" be changed from meaning "deference" to "serious consideration". Deference provides no latitude to the agency deciding the issue. Further, we would recommend a sentence be added to the definition of "primary area of expertise" calling attention to the fact that any consistency determination includes a"question of balancing factors". Finally, we question why the definition for "feasible and prudent" under the Alaska Coastal Management Act is proposed to be changed. As proposed in these regulations, the definition would not give consideration to economics, which we believe to be an important consideration in determining if an issue is "feasible and prudent".

Finally, we recommend the addition of two new sections, possibly under the deferred Article 4, which we believe would help alleviate the problem of multiple and conflicting state agency comments to federal agencies. The first section calls for the lead agency established under Sections .510-.540 to determine on behalf of the state its comments and recommendations on federal permits and to transmit such policy to the federal agency. The second calls for any state agency commenting upon an activity to address its comments solely to that lead agency.

In summary, we would like to reiterate our support for measures which expedite regulatory process. We are concerned that the regulations, as proposed, create new, complex requirements that do not presently exist. Additionally, while many of the problems over consistency determinations have been resolved, new problems present themselves in the regulations as proposed.

We believe a substantial rewrite of the regulations is necessary to accomplish the goals listed in the Executive Summary of short permit issuance deadlines, uniform procedures, applicants' rights and streamlining of the consistency determination process.

Thank you for the opportunity to comment. Attached to this testimony are our detailed written remarks laying out the changes we have suggested. I will be happy to answer any questions.

DETAILED WRITTEN COMMENTS
OF THE
ALASKA OIL AND GAS ASSOCIATION
ON
UNIFORM PROCEDURES FOR PERMITS,
CONSISTENCY DETERMINATIONS AND APPEALS
FEBRUARY 6, 1981

22 aac 10.020(a)(4)--Delete this subsection. This should not be justification for extending deadlines because any memorandum of understanding entered into prior to or pursuant to these regulations should not contain conflicting approval schedules, but rather should provide for approvals within the time frame contained in these regulations.

22 aac 10.020(b)--Change to read: "(b) A certification under (a)(1) of this section will only be made on a finding of extraordinary circumstances and will specify...". As proposed this provision is open-ended. We believe such certification should be made only under unusual or extraordinary circumstances.

22 AAC 10.030(a)--Change first sentence to read: "...the agency will notify the applicant within 15 days of receipt of a completed application for a Class I or Class II permit." Strike remainder of sentence. Fifteen days is sufficient for both classes of permits.

22 AAC 10.040(1)--Strike "responsible for the overall management of the project or operation". As is the case in (4) any duly authorized employee should be allowed to sign applications.

22 AAC 10.050(a)--Change to read "An oral public hearing on a Class I or Class II permit application will be held if:".

22 AAC 10.050(a)(1)--Change to read: "required by statute; or for Class II permits;".

22 AAC 10.050(b)(1)--Delete "or for Class I permits, likely".

Hearings on Class I permits should be held only if required by statute.

22 AAC 10.060(a)(2)--Delete this subsection. Include a new (2) which would read: "(2) If at the end of the applicable time period the deciding officer has taken no action, the application is deemed approved and the permit granted pursuant to this chapter."

Notwithstanding the comment in the Executive Summary, this section should include a provision for automatic approval if the deciding officer does not act within the specified time period. Existing regulations on surface use permits provide for such automatic approval.

22 AAC 10.085--In second sentence delete "which would" and insert "shall not"; end sentence after the word "chapter" and delete the remainder of the section. Add a new sentence to read: "All existing memoranda of understanding must be revised to reflect the provisions of this chapter." Any MOU's entered into by agencies should comply with the requirements of this chapter. All existing MOU's should either be revised to comply with the chapter, or withdrawn.

22 AAC 10.100(d)--Delete this subsection. See our comments on ARTICLES 6, 7 and 8.

22 AAC 10.120(c)--Change to read: "A copy of the notice will be sent to appropriate units of local government." Delete remainder of sentence. In some cases such jurisdiction may be difficult to determine and the inadvertent omission of such notice to one local government later claiming jurisdiction could prejudice the permit.

22 AAC 10.130(b)--In second sentence delete the words "denial of the permit, or". Agencies should not be allowed to recommend denial of permits; rather they should make recommendations on what is needed to make applications approvable.

22 AAC 10.160(3)--Change to read: "a statement of the factual or judgmental basis for the rejection of any significant and material resource agency recommendation under sec. 130(b) of this chapter, or, in the discretion of the Commissioner, any recommendation made at a public hearing held under sec. 50 of this chapter." This suggestion is made to provide flexibility to the Commissioner in responding to recommendations made at public hearings. Responding to each and every recommendation made at public hearings is an impossible task and should not be required.

ARTICLE 4.--Add two new sections:

"22 AAC 10.400. Where a federal permit is also issued on an activity for which a consistency determination will be made by a lead agency established under Sections .510-.540, the state agency conducting the consistency determination for the state pursuant to these regulations shall have sole authority to determine on behalf of the state its comments and recommendations on the matter (including but not limited to consistency with the ACMP) and to communicate such policy on behalf of the state to the federal agency issuing such a permit.

22 AAC 10.410. All state agencies commenting upon such an activity shall address their comments solely to the lead agency established under Sections .510-.540."

The addition of these two new sections would alleviate the problem of multiple and conflicting state agency comments to federal agencies.

22 AAC 10.510--Change first sentence to read: "When a direct federal activity or a federal permit or license requiring a State consistency determination necessitates preparation of an Environmental Impact Statement under 42 U.S.C. § 4332, except pertaining to state oil and gas leases, the Office of the Governor, Division...". At the end of the second sentence, add "excluding oil and gas activities".

22 AAC 10.520--Change first sentence to read: "Consistency determinations on disposals of an interest in state land will be performed by the Department of Natural Resources, including a joint state/federal oil and gas lease sale where an EIS is required." At the end of the second sentence, add "including associated federal permits requiring an EIS."

The changes suggested in .510 and .520 are intended to make clear that the Department of Natural Resources is responsible for consistency determinations associated with disposals of interest in state lands, including any EIS or Federal permits requiring an EIS.

Add new sentence to read: "The Department will conduct the consistency determination on oil and gas activities occuring in the Outer Continental Shelf adjacent to Alaska."

22 AAC 10.550--Delete (a) and (b); Change title to read: ACTIVITIES NOT REQUIRING A CONSISTENCY DETERMINATION. As proposed, this section would require that two consistency determinations be made for activities not covered by previous sections. This is not in keeping with the intent of these regulations.

22 AAC 10.570(b)--Delete this subsection. Including a coastal resource district with an approved CZM plan in the description of a resource agency adds another layer to the approval process and authorizes a local district to veto a project which is in the best interests of the State. See also our comments on .920(12).

22 AAC 10.580--Change this section to read: "When an activity requires more than one permit, the applicant, in order to obtain a conclusive determination under secs. 510-540 of this chapter, should apply for the appropriate permit under those sections prior to or contemporaneous with application for any other necessary federal permit or license. If an applicant applies for a federal license or permit prior to applying for a state permit which would provide the proper forum for a conclusive consistency determination under secs. 510-540 of this chapter, the designated lead agency may render a consistency determination which is limited to the scope of the activity contemplated by the federal license or permit and contingent upon the issuance of an ultimate conclusive consistency determination. Thereafter, an applicant may either submit application for additional federal licenses or permits and obtain further non-conclusive consistency determinations, or may apply for the appropriate state permit under secs. 510-540 and obtain a conclusive consistency determination."

As proposed, this section could require an applicant to submit all applications simultaneously, which would be cumbersome, if not impossible in some cases.

ARTICLES 6, 7 and 8. Delete these articles. An applicant must have the right to direct appeal to the Superior Court following an agency's decision on a permit application.

22 AAC 10.920(a)--Delete this subsection pursuant to deletion of ARTICLES 6, 7 and 8 pertaining to appeals.

22 AAC 10.920(7)--Change "deference" to "serious consideration". Deference provides no latitude to the agency deciding the issue.

22 AAC 10.920(9)--Add a new third sentence to read "Any consistency determination made by lead agencies hereby is defined to include "questions of balancing factors". The balancing process should be employed when agencies determine consistency.

22 AAC 10.920(12)--Add a new sentence at the end of this section to read "For the purposes of section .570 of these regulations, the term also includes all state agency members of the Alaska Coastal Policy Council." This sentence is moved from Sec. 570(b).

6 AAC 80.900(20)--We question why this definition is proposed for change. As proposed, the definition would not give consideration to economics, which we believe to be an important consideration in determining if an issue is "feasible and prudent". We suggest leaving the definition as it now appears in the ACMP.

WRITTEN COMMENTS
OF THE
ALASKA OIL AND GAS ASSOCIATION
ON
UNIFORM PROCEDURES REGULATIONS

On February 6, 1981 the Alaska Oil and Gas Association presented comments on the Proposed Uniform Procedures Regulations at the public hearing held in Anchorage. A copy of that testimony is attached for your reference.

We would like to take this opportunity to submit additional written comments on the proposed procedures.

As stated in our previous testimony, the Alaska Oil and Gas Association feels a substantial re-write of the proposed regulations is necessary if the State is to achieve the four goals set out in the Executive Summary accompanying the regulations. As proposed, the regulations alleviate many existing problems; however new, more complex requirements are created that do not presently exist.

We note that the Legislature has under consideration legislation pertaining to the permitting process. If the proposed regulations are adopted, the possibility exists that the regulations will conflict with any legislation that is passed. To avoid the possibility of an unnecessary conflict, adoption of the proposed regulations should be deferred until the Legislature has acted.

We have the following additional comments on specific portions of the proposed regulations.

22. AAC 10.050 Oral Public Hearings

In our earlier detailed comments we suggested changes to this section to reflect our recommendation that public hearings on Class I permits should be held only if required by statute. Upon reflection, we believe a "cleaner" way to reflect this intent would be as follows:

Change (a) to read: (a) An oral public hearing on a Class I permit application will be held if required by statute.

Create a new (b) to read: (b) An oral public hearing on a Class II permit application will be held if:

(1) required by statute; or...."

The remainder of the section would require renumbering.

In the existing section (b)(1)--which would become (c)(1)--delete: "or, for Class I permit, likely".

In the existing section (c)--which would become (d)--change the reference to section (a)(2) to (b)(2).

11 AAC 10.500(c)

Delete this section. The regulation appears to allow an agency to reverse a prior consistency determination. To the extent that the original consistency determination had been relied upon by an operator, a subsequent reversal of that determination would be unlawful. Moreover, subsection (c) is in conflict with (b) which provides that "...a consistency determination on a more specific consequential activity is bound by those decisions, findings and conclusions actually made at prior, less specific decision-making stages." It is not at all clear how an agency is bound by its prior determination if that determination can be reversed.

Articles 6, 7 and 8 Appeals

In our comments made at the hearing we recommended the deletion of the lengthy appeals procedure provided for in the regulations. The permitting process is vital to our industry and it is imperative that permit issues be resolved at an early date. In place of ARTICLES 6, 7, and 8, we recommend the following:

ARTICLE 6. APPEALS

22 AAC 10.600 Review by the Commissioner

An agency's final decision issued pursuant to this chapter may be reviewed by the Commissioner of the issuing agency at the request of the applicant. The request must be filed with the Commissioner within thirty (30) days of the applicant's receipt of the decision. The Commissioner shall issue a decision within ten (10) days of the Department's receipt of the request, unless the applicant has requested a hearing de novo, in which case such hearing shall be held within thirty (30) days of the Department's receipt of the request, and the Commissioner's decision shall be rendered within thirty (30) days of the conclusion of the hearing. Unless the agency decision is confirmed in its entirety, the Commissioner shall issue a written decision setting forth his findings and conclusions in full.

22 AAC 10.610 Review by the Superior Court

(a) Judicial review by the Superior Court of a final decision issued by a state agency pursuant to this chapter or of a decision of the Commissioner issued pursuant to sec. 600 may

be had by filing a notice of appeal in the Superior Court in accordance with the applicable rules of appellate procedure. The right to appeal is not affected by the failure to seek reconsideration or further review pursuant to sec. 600.

Thank you for the opportunity to comment.

COMMENTS BY ARCO ALASKA, INC.
ON UNIFORM PROCEDURES FOR PERMITS,
CONSISTENCY DETERMINATIONS AND APPEALS

INTROLUCTION

ARCO Alaska, Inc., (ARCO) is a wholly owned subsidiary of Atlantic Richfield Company. We appreciate the opportunity to present these written comments to the Departments of Natural Resources, Environmental Conservation, and Rish and Game; the Alaska Coastal Policy Council, and Boards of Fisheries and Game. ARCO supports any efforts to modify and streamline the regulatory process to respond to the needs of the regulated community. Streamlining the regulatory proces hould mean the elimination of duplicative and unnecessary equirements and procedures which provide no benefits either to the regulated community or to the general public.

The agencies and drafters should be complimented on the attempt to draft uniform procedures and implement a system which defines the rights of an applicant and the general public in the permitting process; however, upon review of the proposed regulations, it is apparent that in many cases the proposed regulatory procedures do not accomplish these goals. Regulatory reform, by its nature, should not create an additional bureaucratic structure which is not responsive to the applicant, and does not provide a more simplified process of permitting.

The following is a list of specific comments on the various sections of the Uniform Regulatory Procedures and the Appeals Provisions. These suggested modifications will provide a more streamlined system if these procedures are adopted.

1. 22 AAC 10.020(3). This section which allows the commissioner to extend the permit deadline where the agency and the applicant mutually agree should be deleted. The commissioner would already be empowered, under 22 AAC 10.020(2), to extend the permit deadline when substantially complex issues are involved. This additional opportunity to extend permit deadlines invites abuse; an applicant would feel compelled to agree to any extension requested by an agency rather than risk an unfavorable decision on the permit.

2. 22 AAC 10.030(a). For a Class II permit application, if an agency requests additional information, this request should be made within fifteen (15) days of receipt of the application, rather than the thirty days set forth in the proposed regulations. A thirty-day period to return the permit application is almost half the permitting period. If additional information is required, it should be transmitted to the permit applicant as quickly as possible. This will enable a permit applicant to supply the information which is necessary to the permitting process and still allow the agency sufficient time to review the permit application.

3. 22 AAC 10.030(a). A deciding agency should not be able to toll the permitting period where the information requested of the permit applicant is atypical from that normally requested. If the permit applicant fails to supply information normally submitted for a permit of that nature, then the time period should be tolled until the information is received.

4. 22 AAC 10.040. Any duly authorized representative of a corporation should be authorized to sign the permit application on behalf of the corporation. Often the party responsible for the overall management of the project or its operation is in another location or not available to sign the application form.

5. 22 AAC 10.050. Since Class I permits will require the least amount of time for both the applicant and the agency, an oral public hearing should be held on a Class I permit only when required by statute.

6. 22 AAC 10.085. Memoranda of Understanding with federal agencies may be necessary to implement procedures for interaction between the state agency and the federal agency; however, no Memorandum of Understanding should extend the time provisions or obligations set forth in these regulations. One of the purposes of uniform regulatory procedures is to design a uniform system which will not be deviated from by a Memorandum with another agency.

7. 22 AAC 10.130(b). A commenting agency should never recommend denial of a permit application to a deciding

agency. The commenting agency is requested to respond by the deciding agency to a permit application. The commenting agency has neither the whole record before it, nor all the evidence on whether to grant or to deny a permit application. The commenting agency may recommend inclusion of terms and conditions on the permit. The deciding agency's obligations are to review all of the factors and determine whether the project, as proposed by the applicant, should be approved.

8. 22 AAC 10.150. When the employee prepares a summary of an ex parte oral communication with an applicant, a copy of this summary should be transmitted to the applicant.

9. 22 AAC 10.160(3). The deciding agency's final decision should address the factual and judgmental basis for rejecting a commenting agency's recommendations. However, the deciding agency should only be required to summarize the comments submitted at a public hearing and the agency's action or determination concerning the comments. To require the deciding agency to individually state and respond to the factual and judgmental basis for rejecting a "significant and material recommendation" is overly burdensome. Adequate reasoning for the deciding agency's decision will provide sufficient response to questions presented at a public hearing.

10. 22 AAC 10.920(7) - Great Weight]. This definition should be changed so that "great weight" does not mean deference to the commenting agency. This definition, when used

in conjunction with the commenting agency's right to recommend denial of a permit application, would eliminate the authority of the deciding agency to grant an application which may be in the best interests of the state, but which has been recommended for denial by another agency. The addition of serious consideration or similar language would provide the assurance that necessary attention is given to comments of resource agencies.

11. The General Appeals provisions should allow the applicant the opportunity to directly appeal to the Superior Court if a permit application is denied, or if unreasonable and unsupportable conditions are attached to the permit. Since time can be extremely critical, the applicant should be able to seek judicial relief at the earliest possible date from a final agency decision.

12. The proposed regulations do not establish a lead agency concept, or resolve the permitting problem where agency comments are made to both a state and federal agency. As noted in the Executive Summary, (p. 14) the problem is not easily solved. One method to alleviate part of the problem is to require the commenting agency to limit the conditions it requests be imposed on a federal permit to those imposed on a state permit required for the same or substantially similar activity. This would eliminate two sets of differing conditions on similar state/federal permits.

CONCLUSION

The resource agencies and the Department of Law should be complimented on their effort to set forth a uniform permitting procedure in the State. Much of the success of the uniform regulatory program will be in its acceptance and implementation both by the regulatory community and the resource agencies. These regulations should be reviewed in a year to determine whether regulatory reform has been successful. The effort expended in regulatory reform is by no means complete. The next year will indicate whether more changes are needed to allow the resource agency to provide timely responses to the permit applicants. Every day's additional delay in permit approval can mean a substantial increase in the cost of the project. These costs can be alleviated through cooperation between the regulated community and the resource agencies.

RESPECTFULLY SUBMITTED this 25th day of February, 1981.

G. T. Wilkinson
Vice President

TESTIMONY OF J. D. BERTINO

CHEVRON U.S.A. INC.

ON

PROPOSED UNIFORM PROCEDURAL REGULATIONS

FEBRUARY 6, 1981

ANCHORAGE, ALASKA

My name is J. D. BERTINO. I represent Chevron U.S.A. Inc. I would like to express our appreciation to you for affording Chevron U.S.A. Inc. the opportunity to comment on the proposed Uniform Procedural Regulations. We hope our comments will be constructive, both to the benefit of the State and our industry.

Chevron is appreciative of any efforts taken by any agency which tend to facilitate the processing of permits. Chevron thus welcomes the efforts of the state which are reflected in the proposed uniform procedures for permits.

It is our understanding that the legislature is presently considering legislation which generally pertains to the permitting process. It appears there is a reasonable probability that some type of permitting legislation will be passed in this session. It is our recommendation that the administration defer action on the proposed regulations until the legislature has acted. In the event the proposed regulations are adopted, it seems inevitable that these regulations will conflict with any legislation that is passed during the present session. This unnecessary conflict can be avoided by delaying the adoption of any procedural regulations until the legislature has had an opportunity to act.

However, we submit the following specific comments in the event further consideration is given to the adoption of these regulations at this time.

Sec. 020 provides that the deadline for an agency's processing of a permit may be extended for an indefinite period of time where the agency finds that "substantial complex issues" are involved. We believe that any permit application can be processed within 65 days of the agency's receipt of the application. Accordingly, we recommend that this portion of Section .020 be deleted. At a minimum, we would suggest that an outside limit as to the amount of time the Commissioner may extend the deadline to be inserted; for example, 120 days. Moreover, the regulations should be amended to provide that such certification by a commissioner could only be made upon a finding that extraordinary circumstances warranted such an extension.

Articles 6, 7 and 8 provide for a lengthy and cumbersome administrative appeal process. It is Chevron's position that any satisfactory permitting process must provide for immediate access to the superior court following the agency's initial decision with regard to the permit application. We believe that the availability of that option will insure the agency's careful scrutiny of the application, as well as any suggested stipulations, throughout the permitting process. In view of the current problems with the permitting process, we believe it essential that any disputes between the applicant and the agency be presented to a neutral tribunal at an early date.

The need for a process which provides for an immediate appeal to the court system is apparent when the effect of even a short delay in permitting process is considered. For example, many oil and gas operations are required to be conducted under very rigid season restrictions. If a permit is delayed, the lessee may lose a full year of a lease term.

Often, a lessee finds himself unable to meet his obligations under the terms of the lease because of a delay in obtaining the actual permit or because of conditions imposed under the permitting process which virtually preclude diligent exploration. On one hand, we have the lease administrator telling us to perform or move on; on the other hand we have agencies imposing conditions which make it almost impossible to meet the very obligations required under the terms of the lease. We would therefore recommend that Articles 6, 7 and 8 be deleted. Should the applicant desire further agency review, a motion to reconsider the decision can always be filed with the department.

We are also concerned with those provisions of the regulations pertaining to inter-agency review. Sec. 130(c) provides that the deciding agency shall accord "great weight" to comments of other resource agencies provided such comments are within the commenting agency's "primary area of expertise". On its face, that language would appear to require a

deciding agency to defer to a commenting agency's recommendation. This is the basic cause of current problems with the permitting process. The Executive Summary with which we have been provided by the state has attempted to allay such fears by arguing that such recommendations are not within the agency's primary area of expertise. Similarly, Attorney General Condon stated to a Senate Resources Committee work session on January 27 of this year that it was his view that the purpose of the language in question was to assure that comments of the other agencies would be considered. Consistent with that statement, and that of the Executive Summary, we would suggest that the definition of "great weight" be couched in terms of "careful consideration" rather than deference.

We also believe that comments of other agencies should be restricted to the manner in which the permitted activity shall occur, rather than whether the activity will be permitted. For example, where a state oil and gas lease has issued, the lessee has a contractual right to conduct operations on the state's land. Recommendations by commenting agencies that certain activities should not be allowed, even though required by the lease, are therefore inappropriate.

As acknowledged by the Executive Summary, the proposed regulations do not constrain the degree to which a state agency may comment upon federal permit applications. Chevron believes that it is essential that state comments be channeled through the same state agency which has state permitting authority for the activity in question. We can fathom no policy consideration which would allow a state agency to permit a given activity, and simultaneously allow another state agency to block that activity through the federal permitting process. This is particularly true where the commenting agency was given a full opportunity to submit detailed comments and supporting rationale to the deciding state agency.

Contrary to the suggestion of the Executive Summary, it is submitted that such a procedure would not relegate the Department of Fish and Game or the Department of Environmental Conservation to a "second class" status. Rather it would assure that such departments are on equal terms with the other permitting departments. No department should be able to block another department's intent via a "back-door" process. The Departments of Fish and Game and Environmental Conservation would retain their ability to monitor performance through their own statutory authority.

We will submit further detailed written comments by February 27. Thank you for this opportunity to comment.

WRITTEN COMMENTS OF
CHEVRON U.S.A. INC.
ON UNIFORM PROCEDURES FOR PERMITS,
CONSISTENCY DETERMINATIONS AND APPEALS

22AAC 10.020. DEADLINES ON PERMIT ISSUANCE.

Subsection (a)(1) provides for open-ended extension of any permit deadline if the Commissioner certifies that the project involves "substantial complex issues". We believe that any permit application can be processed within 65 days of the agency's receipt of the application. This section undermines the purpose of establishing permit deadlines. Therefore, we recommend that (a)(1) be deleted.

Alternatively, an outside limit should be established so that a deadline cannot be extended for an indefinite period of time. We suggest a maximum extension of 60 days be established. Therefore, the maximum time for processing a class I permit cannot exceed 90 days. The maximum time for processing a class II permit cannot exceed 125 days.

Subsection (a)(4) provides that a deadline may be extended where the deciding agency is processing the application jointly with the federal agency pursuant to a memorandum of understanding. We suggest that this section be deleted. Existing memoranda of understanding should be revised to reflect deadlines established in these regulations.

22AAC 10.030. ADDITIONAL INFORMATION.

This section establishes two time periods during which an agency can request additional information. Upon receipt of an application for either a class I or class II permit the agency should immediately assess whether additional information is necessary in order to process the permit. Assessment should not require more time for class II permits than for class I permits. Therefore, we propose that a 15 day period be established for both classes of permits.

22AAC 10.040. SIGNING OF APPLICATIONS.

Subsection (1) provides that, in the case of corporations, a representative responsible for the "overall management of the project or operation" sign the application. This requirement does not reflect the realities of corporate business transactions in Alaska. Many times the person responsible for the overall management of the project or operation does not work in Alaska and has delegated permitting responsibilities to those who do. Any duly authorized employee of the corporation should be allowed to sign applications. This is consistent with Subsection (4) which allows for any duly authorized employee of a governmental agency to sign applications.

22AAC 10.050. ORAL PUBLIC HEARINGS.

This section creates new and complex requirements for public notice and hearings. These procedures complicate, rather than expedite the permitting process. They are inconsistent with the goal of regulatory reform and will provide a vehicle for attacking decisions made pursuant to these regulations. We propose that public hearings be limited to those required by statute.

22AAC 10.130. INTERAGENCY REVIEW.

This section provides that the deciding agency accord "great weight" to the comments of other resource agencies which meet certain qualifications. As defined in 22AAC 10.920 Subsection (7), "great weight" means deference, unless the assertion is contrary to the weight of fact or opinion in the administrative record. To the extent that certain matters have been statutorily defined as matters of national concern, this requirement may be unlawful. If a deciding agency must defer to the comments of a local agency pursuant to .130(c), the deciding agency may be unlawfully delegating its decision-making functions.

As applied to Coastal Management Consistency Determinations, this would clearly conflict with the mandate of the Coastal Zone Management Act (CZMA). Section 46.40.020(7) of CZMA states "the Alaska Coastal Management program shall be consistent with recognition of the need for a continuing supply of energy to meet the requirements of this State and the contribution of a share of the State's resources to meet national needs." To the extent that these regulations conflict with this mandate by requiring deciding agencies to accord "great weight" or deference to the comments of other resource agencies, they are invalid.

Section .570(b) states that "resource agency" includes coastal resource districts. Thus, the regulations establish a procedure for promoting the concerns of local districts over state or national concerns. We caution the State not to adopt regulations which may require the unlawful delegation of decision making functions to local coastal resources.

22AAC 10.500 ET SEQ. COASTAL MANAGEMENT CONSISTENCY DETERMINATIONS.

The procedures established in Article 5 do not expedite coastal management consistency determinations. The requirement that a deciding agency accord "great weight" to the comments of other resource agencies, and defer to the agency with "primary expertise" if no balancing or competing factors are involved, further complicates an already complex process.

Although the goal of this section appears to be limiting the Coastal Management Consistency Determinations to a one time occurrence, subsections (b) and (c) of .500 defeat this goal. .500(c) provides that an agency may reappraise its prior determination on the basis of new information not available at the prior stage if a more specific consequential activity is being permitted. Subsection (c) undermines the

purpose of subsection (b). The last sentence in subsection (b) states "the scope of any consistency determinations on a more specific activity is limited by the scope of the more specific permit proceeding". This is directly contradicted by subsection (c) which authorizes a reappraisal of prior determinations. Accordingly, we suggest that subsection (c) be deleted.

We oppose the requirement that two consistency determinations be made when certain other activities are undertaken. There is no basis for establishing a more complex procedure for consistency determinations arising from "other activities", therefore, we suggest that subsections (a) and (b) of .550 be deleted. The title should be changed to refer to those activities which do not require consistency determinations.

ARTICLES 6, 7 and 8. APPEALS. 22AAC 10.600, .700, .800 ET SEQ.

Articles 6, 7 and 8 provide for a lengthy and cumbersome administrative appeal process. In order to establish a satisfactory permitting process, immediate access to the Superior Court must follow an agency's initial decision with regard to the permit application. The availability of this option will insure not only the agency's careful scrutiny of the application as well as any suggested stipulations, but the applicant's careful preparation of the application and diligent followup work. In addition, immediate access to Superior Court will greatly shorten the delay that is inherent in the appeal procedure established in these regulations.

Delay is critical when considering the lessees obligation to diligently explore and develop his lease or possibly loose it. Often, a lessee may find himself unable to meet obligations under the terms of the lease because of a delay in obtaining a required permit or because of conditions imposed under the permitting process which precludes

diligent exploration and development, and therefore must be appealed. Immediate access to judicial review is the only method for resolving the conflict between the lease administrator, who compels diligent exploration and development and the various agencies who may compose conditions which impede the very obligations required by the terms of the lease.

In order to resolve this, we recommend that Articles 6, and 8 be deleted. In their place we suggest the following sections be included in the regulations:

"REVIEW BY THE COMMISSIONER. An agency's final decision issued pursuant to AS 44.62.632 may be reviewed by the commissioner for the issuing agency at the request of the applicant. The request must be filed with the commissioner within thirty (30) days of the applicant's receipt of the decision. The commissioner shall issue a decision within ten (10) days of the department's receipt of the request, unless the applicant has requested a hearing de novo, in which case such hearing shall be held within thirty (30) days of the department's receipt of the request, and the commissioner's decision shall be rendered within thirty (30) days of the conclusion of the hearing. Unless the agency decision is confirmed in its entirety, the commissioner shall issue a written decision setting forth his findings and conclusions in full.

REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the Superior Court of a final decision issued by a state agency pursuant to AS 44.62.632 or 44.62.634 or of a decision of the commissioner issued pursuant to AS 44.62.635, may be had by filing a notice of appeal in the Superior Court in accordance with the applicable rules of appellate procedure. The right to appeal is not affected by the failure to seek reconsideration or further review pursuant to AS 44.62.635. The review shall be governed by the provisions of AS 44.62.560(b)-(e) and AS 44.62.570.

(b) On an appeal by the applicant to the Superior Court, the agency which issued the final decision has the burden of proving that the decision is in accordance with AS 44.62.632 and 44.62.634.

(c) An appeal taken under this section has preference on the calendar of civil actions before the court and shall be decided without unnecessary delay."

Additional Comments:

1. Comments of Other Agencies:

Comments of other agencies should be restricted to the manner in which the permitted activity may occur rather than whether the activity will be allowed to occur at all. Once the State issues an oil and gas lease, the lessee obtains the contractual right to conduct operations on the State's land. Recommendations by commenting agencies that certain activities should not be allowed, even though they are specifically authorized by the lease, are therefore inappropriate and should not be considered. The concerns of commenting agencies receive extensive analysis prior to the State's decision to lease. Once the State decides to schedule an oil and gas lease sale, commenting agencies should not be allowed to undermine this decision by recommending that the activity not be allowed.

2. State Agency Comments on Federal Permit Applications.

Proposed regulations do not constrain the degree to which a state agency may influence the approval of federal permit applications which are required to conduct the same or similar activities permitted by State agencies. State comments must be channeled through the same State agency who has the State permitting authority for the activity in question. There is no valid policy consideration

which would allow a State agency to permit a given activity and simultaneously allow another State agency to block that activity through the Federal permitting process. This is particularly true when the commenting agency was given a full opportunity to submit detailed comments and supporting rationale to the deciding State agency and then proceeds to require that conflicting conditions be imposed on the same activity through the federal permitting process. In order to avoid this problem, the regulations should assure that no department is able to block another departments decision via a "back-door" process.

3. Automatic Approval of Permit Applications.

Conspicuously absent from the proposed regulations is a provision regarding enforcement of the time limits established. In spite of statements by the Department of Law in the Executive Summary, many states, including California, have provided for automatic approval of some permit applications if no action is taken within the applicable time period. We strongly urge the Department of Law to include a section calling for automatic approval of permit applications in this circumstance. Unless permitting agencies face some penalties these regulations will provide little impetus for compliance.

Re: Uniform Procedures for
Permits, Consistency
Determinations and Appeals

Mr. Jonathan K. Tillinghast
Special Assistant Attorney General
Alaska Department of Law
Pouch "
Juneau, Alaska 99811

Dear Mr. Tillinghast:

We are pleased to have this opportunity to address some areas of concern which may not have been fully discussed in AOGA's comments on the captioned regulation proposals We will limit these comments to those sections of the proposed regulations which affect coastal management consistency determinations.

First, we join many others in expressing our belief that the proposed regulations reflect Governor Hammond's stated desire to expedite and streamline this State's coastal management decision-making process as it pertains to consistency determinations. However, for some of the reasons expressed herein, these regulations offer the potential for abuses which may result in uncertainty, delays, and the possibility for challenge of consistency determinations once they are issued. Some of our more serious concerns are as follows:

I. 22 AAC 10.020(a)(1): This section allows an extension of the deadline for making an agency decision if the commissioner of the agency certifies that the project for which the permit is sought involves substantial complex issues requiring additional time for review. This open-ended grant of discretion would allow all OCS applications to be deemed complex and the deadline for decision to be extended. We do not believe that such a possibility for delay was intended by the drafters of these regulations, nor is it supported by the intent of the Federal Coastal Zone Management Act of 1972 and its implementing regulations which encourage early issuance of consistency determinations [See, e.g, 15 CFR 930.63(a)].

II. 22 AAC 10.030(c): This section provides that the deadline for making a final decision on a permit shall be tolled for a period equal to that time from an agency's date of request for additional information affecting the application until the date of full compliance with that request. 15 CFR 930.60 provides that only a state agency request for information specifically enumerated in 15 CFR 930.58 shall toll the applicable review period. The proposed 22 AAC 10.030 does not address this important distinction and opens up the possibility of further delay. At a minimum, the proposed section should be narrowly limited as to the type of additional information requests which will toll the time period for issuing a final permit decision in compliance with 15 CFR 930.60. Further, any tolling should occur only with respect to requests of information required to be supplied by 15 CFR 930.58.

III. 22 AAC 10.040. This section provides that a corporate permit application must be signed by a duly authorized representative responsible for the overall management of the project or operation. This section is unnecessarily restrictive and should be amended to allow any duly authorized employee of the corporation to sign a corporate permit application. A duly-authorized representative will bind the corporation and thus serve the legitimate purpose of this regulation.

IV. 22 AAC 10.070. This section authorizes a deciding officer to attach conditions to a permit where empowered by statute to do so. It should be clarified in this section that a deciding officer may not unilaterally attach conditions to a consistency determination. 15 CFR 930.63 & 930.64 allow a state agency either to concur or object to a consistency certification. 15 CFR 930.64 also provides a means by which the applicant may accept conditions in order to permit state agency concurrence with the consistency certification. At a minimum, Section 10.070 should be clarified to either provide that it does not apply to consistency determinations or to provide that any conditions must be agreed upon in accordance with 15 CFR 930.64.

V. 22 AAC 10.080(c): This section treats an amendment to an existing permit as a separate Class I permit which is subject to public notice, comment and, possibly, a public hearing. We support AOGA's position that hearings on Class I permits should be held only if required by statute. Further, this section should be modified to recognize that changes to a permit which do not constitute a significant revision are not considered separate permits. This flexibility is essential to permittees whose activities undoubtedly require minor permit revisions over the life of a project.

VI. 22 AAC 10.130: This section as it applies to 22 AAC 10.570(b), provides the means by which a local district may veto a project of overriding State or National interest. Again, we support AOGA's position on this section.

VII. 22 AFC 10.130(d): This section gives an agency the discretion to consider comments not received within the applicable time periods. This section should be amended to provide that an agency shall not consider untimely comments. Such amendment would encourage timely comments and prevent further delays. This amendment would also assure that an applicant does not face imposition of additional conditions in a permit or denial of a permit based on comments to which the applicant has not had the opportunity to respond.

VIII. 22 AAC 10.160: This section does not address the specific findings that are required to be made if a State agency objects to an applicant's consistency certification. (See 15 CFR 930.64) Further, the regulations implementing the federal Coastal Zone Management Act of 1972 allow a State agency to either concur with a consistency certification or object to such certification. The federal regulations do not permit a finding of consistency which is conditioned on the applicant's acceptance of unilateral conditions imposed by the State agency. Section 10.160 should be modified to reflect this intent.

IX. General Comments: To determine the procedures required of an applicant under these regulations requires extensive and confusing references to many different sections of the regulations. Once the applicant has completed this tedious task, the applicant is still unsure at to what procedures are required.

The Federal Coastal Zone Management Act of 1972 and its implementing regulations specifically provide that a State's Coastal Management Program must provide for adequate consideration and protection of the national interest. This protection is found through a balancing of the national interest with other factors. These proposed regulations do not include the national interest as one of the necessary elements which must be included in the balancing process.

Further, these regulations do not acknowledge that when an applicant submits an OCS exploration or development plan, all activities described in detail in those plans are subject to a single consistency determination. (See 15 CFR 930.80) Once a state agency issues a concurrence with an applicant's consistency certification for an OCS plan the individual permits required to effect such a plan are then not subject to further consistency review. These proposed regulations should expressly recognize this important distinction.

Again, we thank you for consideration of our comments.

Very truly yours,

Theresa R. Hebert

Re: Uniform Procedural Regulations

Dear Mr. Tillinghast:

The purpose of this letter is to comment, on behalf of Sohio Alaska Petroleum Company, on the above referenced regulations. Sohio is pleased that efforts toward regulatory reform are being made by the Hammond Administration. We believe this is one of the more substantial problems facing the oil and gas industry in Alaska, affecting both day to day operations and our long term planning processes.

We have set out at the beginning of this letter several general comments. Thereafter follow specific comments relating to specific sections.

A. GENERAL COMMENTS

1. Lack of lead agency concept. Sohio, as an operator of the Prudhoe Bay Field, and as a company conducting substantial exploration in the Arctic, obtains dozens of permits each year from the State of Alaska governing its operations. Primarily, these permits are received from DMEM, although other permits are obtained from other agencies of DNR. We must also obtain permits from the Army Corps of Engineers. We have had substantial problems in obtaining these permits in an orderly and predictable fashion. We believe that the main problem is that the State has no mechanism for determining once, and with finality, the policy or position of the State with respect to any single development. By making comments contrary to the terms of the State's permit issued by DNR on a project through DPDP to the Army Corps of Engineers, many times State agencies have been successful in either obtaining stipulations deviating from the terms of the DNR permits, or at least in substantially delaying the adjudication of the permit by the Corps of Engineers. We believe that the following section should be added to the

regulations to resolve this problem. It is, incidentally, carefully crafted to merge state and federal regulatory procedures in the most orderly fashion possible:

"ADD A NEW ARTICLE 6 AS FOLLOWS:

LEAD AGENCY PROVISIONS

22 AAC 10.600. ESTABLISHMENT OF A LEAD AGENCY. Lead agencies shall be established as follows:

(a) Subject to the terms of these regulations, an agency:

(1) issuing a permit to conduct an activity; or

(2) directly conducting the activity itself;

shall be the lead agency on the matter, with sole authority to issue or withhold its permits and to determine questions of state policy arising out of such activities relating to the desirability of such an activity, to any condition or limitation sought to be imposed thereon, and/or the balancing of competing interests within the State.

Where two state agencies are issuing permits on such an activity, that agency primarily responsible for authorizing the overall activity shall be considered the lead agency for purposes of this section. For instance, if an agency is authorizing a primary activity, except for which authorization the activity would not take place, and another agency is authorizing a phase of such primary activity, then the lead agency is that which is authorizing the primary activity.

22 AAC 10.610. COMMENTS OF OTHER STATE AGENCIES.

(a) All state agencies commenting upon an activity shall address their comments solely to the lead agency.

(b) Comments and recommendations of resource agencies not received by the lead agency within 21 days of notice of the proposed action shall not be considered by the lead agency in taking its action.

22 AAC 10.620. STATE AGENCY COMMENTS AND RECOMMENDATIONS RESPECTING FEDERAL PERMITS.

(a) Where a federal permit is also issued on an activity for which there has been established a lead agency for the State hereunder, the lead agency shall have sole authority to determine on behalf of the State its comments and

recommendations on the matter (including but not limited to its consistency with the ACMP, and stipulations and conditions recommended to be imposed thereon) and to communicate such policy on behalf of the state to the federal agency issuing such a permit.

(b) Where the application of these regulations and federal law will result in two state agencies commenting to a federal agency on a federal permit, the commenting agency which is not the lead agency shall make its comments in a narrow manner, consistent with the requirements of law, so as to give maximum effectuation to the purposes of this article. For instance, where the Department of Natural Resources is authorizing the development on state lands of a drillpad or island which is also subject to a U.S. Department of the Army, Corps of Engineers Section 404 Permit, and the activities to be conducted thereon do not involve discharges not otherwise regulated by state and/or federal law and regulation, DEC's Section 401 Water Quality Certification shall be limited in its scope, consistent with federal law, to the question of the effect of the construction and maintenance of the permitted work upon water quality, and questions of operations conducted thereon shall be reserved to DNR, the lead State agency on the matter.

RENUMBER ARTICLES 6, 7, 8, and 9 AS APPROPRIATE."

2. Resolution of "consistency findings" problems. The present problem of the State of Alaska relating to orderly consistency findings is that, pursuant to Administrative Order 54, DNR completes its own consistency review on matters involving DNR permits. However, confusion arises when the same project (for instance a drillpad) also requires a federal permit, for instance from the Corps of Engineers. The Corps of Engineers will not issue a permit without a consistency review being completed by the State. However, in spite of the DNR consistency review for purposes of the State permit on the same project, the federal consistency review is conducted by DPDP. This gives rise to confusion and disorder. The only possible result of this is delay and the imposition by agencies not primarily involved in the regulation of state activities of inconsistent permit stipulations. The regulations attempt to resolve the problem by allowing DPDP to complete all required DNR consistency findings under certain circumstances. This, in our view, only perpetuates the problems. We believe this problem can be rectified only by making clear that DNR, on behalf of the State of Alaska, conducts all consistency reviews on matters affecting DNR permits. This includes conducting a consistency review on state

permitted matters also permitted by the federal government for purposes of the federal permit, and on federal OCS matters not otherwise permitted by the State. We believe the following changes should be made:

22 AAC 10.510 should be changed to read as follows:

"22 AAC 10.510 CONCLUSIVE CONSISTENCY DETERMINATIONS ON [ACTIVITIES INVOLVING ENVIRONMENTAL IMPACT STATEMENTS AND] ACTIVITIES OCCURRING ON THE OCS. [When a direct federal activity or a federal permit or license necessitates preparation of an Environmental Impact Statement under 42 USC § 4332, the Office of the Governor, Division of Policy Development and Planning, will perform the consistency review for the activity, permit or license under 16 USC § 1456 (c).] The [Office of the Governor, Division of Policy Development and Planning] [division] will [also] conduct the [consistency] determination for activities [not otherwise covered by these regulations.] occurring on the Outer Continental Shelf adjacent to Alaska.] Subject to SECS. 500 and 580 of this chapter, no other consistency determination will be made for state or federal law purposes on the activity by a state agency.

22 AAC 10.520 shall be changed as follows:

22 AAC 10.520. CONCLUSIVE CONSISTENCY DETERMINATIONS INVOLVING DISPOSALS OF INTSRESTS IN STATE LANDS AND PLANS OF OPERATIONS. [Except as provided in Section 510 of this chapter] [c] [C]onsistency determinations on disposals of an interest in state land [or on operations conducted on the Federal OCS] will be performed by the Department of Natural Resources... (the remainder of the section remains the same).

22 AAC 10.540 shall be changed as follows:

(a) (4) State plans [, programs] and studies developed by or affecting more than one state agency if no lead agency has been designated [hereunder or] by statute or executive action;

(a) [5) Federal activities for which there are no state permits or other approvals required [at the current level of detail]; and... (b) except as provided in SECS. 510-530 of this chapter, consistency determinations for other direct state and federal activities will be made by the [appropraite] [acting] state agency.

22 AAC 10.550 shall be changed as follows:

22 AAC 10.550. CONSISTENCY DETERMINATIONS ON OTHER ACTIVITIES. (a) For activities not covered by SECS. 510-540 of this chapter, consistency determinations will be made by state agencies in the course of otherwise required permit review, and [, if there is no such otherwise required permit review,] by the division for the purposes of 15 CFR §930.

3. Local veto over state consistency determinations. The operation of Section 570(b) when viewed in the context of Section 130 and the definitional sections, relating to the terms "great weight" and "primary agency of expertise", give rise to a virtual veto power over the issuance of state permits held by local governments. While we have communicated separately on this matter, the problem is as follows: Under Section 570(b), for purposes of consistency determinations, Coastal Resource Districts (usually local government bodies) are considered to be "resource agencies". "Resource agencies", under Section 130, are to comment on state issued permits. Their comments are to be given "great weight" under Section 130. The term "great weight" is defined in the definitional section as "deference" unless the weight of the administrative record is against the opinion. The "great weight" that the local governmental body is given is, of course, limited to "primary area of agency expertise". However, with reference to Coastal Resource District which has drawn up Coastal Zone Management Plan under the State of Alaska statutes and regulations, the only conceivable area of "primary agency expertise" is in that plan. On this matter, the local government is to be given "deference". If, therefore, a local government feels that an activity to be conducted on state lands pursuant to state permits is inconsistent with the local plan, the views of that government will be given "deference" and the state thereby loses control of the management of state lands. We believe this problem can be rectified as follows:

"22 AAC 10.570 shall be changed as follows:

DELETE SUBSECTION (b).

22 AAC 10.920 shall be amended as follows:

22 AAC 10.920. DEFINITIONS. AS USED IN THIS CHAPTER:

(12) "Resource agency" includes the departments of Environmental Conservation, Natural Resources, and Fish and Game, and the Office of the Governor, Division of Policy Development and Planning. [For purposes of Section 570 of these regulations, the term also includes all state agency

members of the Coastal Policy Council.]"

4. Establishment of new and complex procedures. We do not believe that there has been demonstrated any need to deviate so substantially from the existing simple procedures relating to DNR permits. As you may know, the requirement of a state permit for the conduct of surface operations on state oil and gas leases, where there is involved state owned surface lands, is found completely, at the present time, on the early 1960's lease forms which provided that there would be placed "wildlife stipulations" on such activities as were appropriate. Other than that, there has never been in the past a regulatory mechanism set up to govern surface operations. Moreover, in view of the fact that this involves primarily a relationship between the lessor, the State of Alaska, on the one hand, and the lessee (Sohio or any other relevant company), on the other hand, and because a public interest review of the lease has been conducted prior to the sale pursuant to AS 38.05.035(a)(14), substantial public involvement has never been pursued in the past. Moreover, we are not familiar with any complaint from the general public that they have been excluded. The state has been careful, in the conduct of its informal procedures governing this conduct of surface operations, to protect the public interest by including the concerns of the relevant resource conservation agencies of the State of Alaska, and of local governments.

This, however, has changed under the new regulations. Substantial, new, and complex procedures are created by these regulations. Complicated public notice provisions are created. Public hearing rights are created, where previously there were none. As well, complex and lengthy appellate procedure mechanisms are created as well. None of this has existed in the past. To impose upon us, at this point, with the intent of "reforming" the regulatory mechanism, such new and complex procedures seems incongruous at best. We believe that the entire matter of public notice, public participation and hearing, and public appeal rights should be made applicable to any particular permit program at the express option of the relevant resource agency, and only to the degree necessary to achieve the purposes of that agency as are appropriate under the circumstances. We believe that this should be done with an eye to maximizing final decision making at the outset by these departments (by making most decisions be made by the commissioners so that little if any opportunity for administrative exhaustion remains) in order to simplify the bureaucratic morass which can be created by the existence of many administrative appeals.

5. Complexity of administration and susceptibility to challenge by lawsuit. Apart from the matters discussed above, the new regulations create other procedures which will be difficult to

administer and which invite litigation. For instance: (a) the interagency review section, 22 AAC 10.130, and the relevant definitions, found at 22 AAC 10.920(4), (7) and (9) are unduly complicated. We understand that these regulations were created under a requirement of consensus among the various agencies on the matter. However, we believe that what has been created here will serve as an albatross around the neck of orderly administration by the State of Alaska because the complicated structure of the new interagency relationships established in these sections is a new and very obvious target for litigation. The question of what part of any decision involves balancing, what part of a decision is to be based upon the opinions of agencies which are accorded "great weight", and when is a commissioner's balancing decisions made contrary to the recommendations of a "resource agency", whose decisions are accorded "great weight", improper and/or arbitrary and capricious, are matters only capable of resolution in Court. This section will likely give rise to the same sort of endless, dilatory procedural litigation as that created by NEPA. We believe that this section as drafted is unreasonable in its effect and should be amended to read in its entirety as follows:

> "An agency issuing a permit is the lead agency on that permit and may, in its discretion, consider the recommendations on the matter of other agencies, giving due weight to their opinions based on their relevant expertise."

The proposed amendment has much the same effect as the present Section 130 and the relevant definitions, but does not create a broad spectrum of complex interrelationships and carefully defined terms. It rather relies upon the general concept of agency discretion, the limits of which and the definition of which are already understood by the judiciary.

Another example of the unnecessary complexity and susceptibility to litigation created in the regulations is 22 AAC 10.160. This section requires there to be three different sorts of findings appended to <u>every</u> permit issued by <u>any</u> of the four agencies subject to the regulations. Subsection 1 requires findings on the activities compliance with the agencies applicable standards; subsection 2 requires findings supporting the decisions; subsection 3 requires a reply to any resource agency recommendation under Section 130 and to any "significant and material recommendation" made at a public hearing. There are three affects of this section. First, it is highly repetitive. All three subsections can easily be addressed in one statement respecting findings. Second, it is not necessary in all cases. The State issues hundreds of permits each year, and only a few require findings. Third, the effect of subsection (3) is to

invite litigation. "Any" resource agency recommendation or "any significant and material" recommendation of a member of the general public made at a hearing must be replied to; if there is the slightest omission (even in the mind of some potential and unreasonable litigant litigation will result and the decision is in doubt. In order to avoid this, we believe that the entire subsection should be deleted and Section 160 should be rewritten as follows:

> "22 AAC 10.160 AGENCY DECISION. The agency decision will meet the requirements of Section 60 of this chapter and will contain, in the discretion of the deciding officer, findings which support his decision. These findings may include a statement of the basis for the acceptance or rejection of any recommendation or comment received by the deciding agency on the matter."

Again, this section, as we propose to rewrite it, relies upon well understood notions of discretion.

B. SPECIFIC COMMENTS.

1. Article I--General provisions. This article relates generally to establishing the parameters of the chapter.

(a) Section .020. We believe the concept of "extraordinary circumstances" should be introduced before any deadline for the issuance of permits can be extended. Otherwise, the opportunity for manipulation of the process (even, under subsection (3), with the apparent consent of the applicant) is obvious.

(b) Section .030. If the notion is to be introduced into these regulations that time limitations do not begin to run until a "completed permit application" is received, and the deciding officer is vested with the discretion to find that otherwise regular permit applications do not contain sufficient information to allow him to make a decision, then very clear parameters of what is required must be established in the relevant agency regulations to avoid abuse or misunderstanding under this section.

(c) Section .040. This section establishes in subsection 1 as follows:

> "... all permit applications must be signed ... in the case of corporations, by a duly authorized representative responsible for the overall management of the project or operation...."

This is an unduly restrictive requirement. Traditionally, Sohio's applications for permits from the State have been signed

by our local land manager. There has never been a problem with this in the past, and we see no reason to deviate from this practice now. Obtaining the signature of a person "responsible for the overall management of the project or operation" can, given the spectrum of activities administered by Sohio, cause significant problems, particularly with reference to major projects and operations. The "overall manager" should be able to delegate his authority.

(d) Section .050 and .060. Our comments on this section, relating to public hearings, and appeals, as they relate to DNR permits has been made above in (A)(4).

(e) Section .085. This section provides for the creation of a memoranda of understanding with federal agencies, which can, by their terms, modify the time limits established by the article. We strongly believe that a memorandum of understanding should be drafted consistent with the time limits of this article, and that all existing memoranda of understanding should be revised to reflect the time provisions of article 1. While, of course, the State cannot control the timing of federal agencies, the State should provide in its regulations that it will complete all activities required under such memoranda of understanding within the time limitations imposed under this article.

2. Article 5. Consistency determinations. Comments on Article 5 have been made above in Section (A)(2) of these comments. However, a matter not addressed there is the application of Section 10.580, which provides that an activity which requires, for instance, a DNR permit and also a federal permit, and the federal permit is applied for before the state permit, that DPDP will do the consistency certification. We believe this is entirely inappropriate. If the matter is clearly one regulated by DNR, then DNR should do the consistency determination for purposes of the federal application, whether a DNR permit has been timely applied for or not. It is clear that a DNR consistency certification will be completed for purposes of the state permit in any case, and therefore this suggested change avoids duplication.

3. Article 6 and Article 8. Appeals provisions. As stated above, in Section (A)(4) of these comments, we believe these provisions are inappropriate for application by all agencies, in all instances, and should be deleted or made optional.

4. Article 9. Definitional section. Parts of the definitions have been discussed above, in Section (A)(2), (3), and (5) of these comments. However, apparently appended to this article 9 on page 14, are found two other provisions. These purport to amend sections of regulations not otherwise the subject of these

uniform procedural regulations. One is objectionable. It is an amendment to 6 AAC 80.900(20), the Coastal Policy Council adopted definition of the term "feasible and prudent". This attempt to change this term is totally inappropriate, because it does not relate in the least to uniform procedural regulations.

Moreover, this change, each time it has been attempted made before the Coastal Policy Council, has generated substantial controversy. The present definition of "feasible and prudent" has been revised carefully to embrace and balance the concerns of the Coastal Policy Council (which is made up of both state agencies and local governments), and of the general public, which includes the oil industry and environmental groups. Changing the definition of the term "feasible and prudent" in the manner attempted here would substantially deviate from the definition of that term adopted by the Coastal Policy Council, which appropriately includes the concept of economic practicability as well as the feasibility of alternative sites. The Friends of Overton Park v. Volpe definition of "feasible and prudent" found in the proposed amendment was adopted with an eye to government programs, carried out and paid for by government agenices, and to whom profit and loss is not important. Thus, the absence of a cost factor involved in the definition of the term is appropriate. However, because the Coastal Policy Council definition, in quite a different situation, involves government regulation of private enterprise (and even homeowners), the introduction of the notion of financial practicability is of the utmost importance. For all these reasons, we believe that this change should be deleted from the regulations. Failure to do so will result in the involvement of these regulations in substantial controversy well beyond their stated purpose, which could jeopardize the Uniform Procedural Regulations.

We thank you in advance for your consideration of these comments. If I can be of further assistance, please do not hesitate to call or write. Kindest personal regards.

Sincerely,

James D. Linxwiler

COMMENTS OF TEXACO INC.
ON
PROPOSED REGULATIONS
OF THE
DEPARTMENTS OF NATURAL RESOURCES,
ENVIRONMENTAL CONSERVATION
FISH AND GAME, AND THE OFFICE OF THE
GOVERNOR, DIVISION OF POLICY
DEVELOPMENT AND PLANNING

MY NAME IS ETHEL H. NELSON AND MY POSITION IS ADVANCED EXPLORATION LAND REPRESENTATIVE FOR TEXACO INC. WE APPRECIATE THE OPPORTUNITY TO APPEAR AT THIS HEARING AND EXPRESS OUR VIEWS CONCERNING THE PROPOSED UNIFORM PROCEDURES FOR PERMITS, CONSISTENCY DETERMINATIONS AND APPEALS. WE COMMEND THE DEPRATMENTS FOR THEIR EFFORTS TO STREAMLINE THE APPROVAL OF VARIOUS STATE PERMITS AS WELL AS THE COASTAL MANAGEMENT DECISION-MAKING PROCESS. WE CAN APPRECIATE THE LONG HOURS SPENT BY THE STAFFS OF THESE DEPARTMENTS AND THE DEPARTMENT OF LAW OVER THE PAST YEAR AND A HALF OR SO.

WE WOULD LIKE TO PREFACE OUR REMARKS T NIGHT WITH THE STATEMENT THAT MOST OF OUR CONCERNS WITH THE REGULATIONS ARE THAT PROCEDURES FOR THE PROCESSING OF PERMITS ARE BEING APPLIED TO PLANS OF OPERATIONS INVOLVING OIL, GAS, COAL AND OFFSHORE MINING ACTIVITIES. THESE ACTIVITIES ARE APPROVED PURSUANT TO LEASES AND PERMITS ALREADY ISSUED BY THE STATE, AND ARE SUBJECT TO THE INTERAGENCY REVIEW PROCESS SET UP BY MOU'S BETWEEN THE DECIDING AGENCY AND THE COMMENTING AGENCIES. WE STRONGLY OBJECT TO THE INCLUSION OF PLANS OF OPERATIONS IN PROCEDURES THAT MAY BE APPROPRIATE (WITH MODIFICATIONS) FOR ISSUING PERMITS BUT WHICH ARE NOT APPROPRIATE FOR APPROVAL OF PLANS OF OPERATIONS. WE BELIEVE THAT THESE TYPES OF ACTIVITIES SHOULD BE EXCLUDED FROM THESE REGULATIONS AND CONTINUE TO BE ADMINISTERED UNDER EXISTING MOU'S AND PROCEDURES OR UNDER SEPARATE

REGULATIONS WRITTEN TO IMPLEMENT THE EXISTING PROCEDURES. WITH THIS IN MIND, I WILL READ OUR GENERAL COMMENTS REGARDING THE PROPOSED REGULATION.

ON DECEMBER 5, 1980, GOVERNOR HAMMOND HELD A PRESS CONFERENCE IN WHICH HE STATED THAT HIS ADMINISTRATION WAS WORKING ON UNIFORM PROCEDURES FOR PERMITS WHICH WOULD ESTABLISH THE SHORTEST FEASIBLE DEADLINE FOR THE ISSUANCE OF STATE PERMITS FOR NATURAL RESOURCE DEVELOPMENT; ESTABLISH UNIFORM PERMIT PROCEDURES; DEFINE THE RIGHTS OF THE APPLICANT AND OTHER PERSONS IN THE PERMITTING PROCESS; AND STREAMLINE THE STATE'S COASTAL MANAGEMENT [illegible]SION-MAKING PROCESS.

THESE GOALS WERE STATED AGAIN IN THE EXECUTIVE SUMMARY WHICH ACCOMPANIED THE FINAL DRAFT OF THE UNIFORM PROCEDURAL REGULATIONS WHICH ARE THE SUBJECT OF THIS HEARING TONIGHT.

WHILE THE PROPOSED REGULATIONS ACCOMPLISH A GREAT DEAL IN SOME AREAS, UNFORTUNATELY THEY DO NOT TOTALLY ACCOMPLISH THE GOVERNOR'S STATED GOALS.

IN AN ATTEMPT TO SIMPLIFY THE CURRENT PERMITTING PROCESS, THE STATE HAS PROPOSED VOLUMINOUS REGULATIONS WHICH WILL, IF ADOPTED, CREATE COMPLICATED NEW REQUIREMENTS THAT DO NOT PRESENTLY EXIST, SUCH AS PUBLIC NOTICE, HEARINGS AND ADMINISTRATIVE APPEAL PROCEDURES FOR APPROVAL OF PLANS OF OPERATIONS.

IN SECTION 22 AAC 10.020, FOR EXAMPLE, A DEADLINE FOR APPROVAL IS SET AT 30 AND 65 DAYS RESPECTIVELY FOR CLASS I AND CLASS II PERMITS, WHICH SOUNDS ENCOURAGING UNTIL YOU READ ON. THE SAME SECTION, (1) THROUGH (4), LISTS THE MANY ARBITRARY WAYS IN WHICH THESE DEADLINES CAN BE EXTENDED WITHOUT PLACING A TIME LIMIT ON THE EXTENSIONS.

22 AAC 10.40 SPECIFIES THAT A PARTICULAR CORPORATION EMPLOYEE MUST SIGN THE PERMIT APPLICATION FOR A CORPORATION, BUT ALLOWS FOR ANY EMPLOYEE OF OTHER APPLICANTS TO SIGN, INCLUDING GOVERNMENT AGENCIES. "ANY DULY

AUTHORZED EMPLOYEE" SHOULD BE ALLOWED TO SIGN FOR CORPORATIONS ALSO.

SECTION 22 AAC 10.50 ESTABLISHES THE NEW TIME-CONSUMING PROCEDURE FOR ORAL PUBLIC HEARINGS ON, AMONG OTHER THINGS, PLANS OF OPERATIONS FOR OIL AND GAS LEASES THAT HAVE ALREADY BEEN SUBJECT TO EXTENSIVE NOTICE AND REVIEW (INCLUDING PUBLIC HEARINGS) AT THE TIME OF THE LEASE SALE.

SECTION 22 AAC 10.130 INDICATES THAT A "COMMENTING AGENCY" COULD RECOMMEND DENIAL OF APPROVAL OF A PLAN OF OPERATIONS, FOR EXAMPLE, TO BE CONDUCTED ON AN OIL AND GAS LEASE, A COAL LEASE OR A MINING LEASE. IN THESE INSTANCES THE STATE HAS ALREADY ENTERED INTO A CONTRACT WITH THE APPLICANT IN THE FORM OF A LEASE, IN WHICH THEY WERE GRANTED THE RIGHT TO EXPLORE FOR AND EXTRACT THE OIL, GAS AND COAL FROM THE LANDS COVERED THEREBY. THIS WOULD CLEARLY BE A BREACH OF CONTRACT ON THE PART OF THE STATE. REVIEW AGENCIES SHOULD BE INSTRUCTED BY THE DECIDING AGENCY TO REVIEW THE PLAN OF OPERATIONS FOR CONSTRUCTIVE RECOMMENDATIONS WHICH WILL ACCOMODATE PROBLEMS OR POTENTIAL PROBLEMS RELATIVE TO THAT AGENCIES' RESPONSIBILITIES. IT SHOULD BE MADE CLEAR THAT DENIAL IS NOT AN OPTION.

22 AAC 10.500 CONTAINS SEVERAL DISTURBING FEATURES. SECTION 500 (a) TELLS US THAT ONE CONSISTENCY DETERMINATION WILL BE MADE FOR ANY COASTAL ACTIVITY REQUIRED TO BE CONSISTENT WITH COASTAL MANAGEMENT GUIDELINES, AND WE AGREE THAT THIS IS A COMMENDABLE IDEA. HOWEVER, SECTION 500 (b), DESPITE BEING UNINTELLIGIBLE, SEEMS TO QUALIFY THE IDEA EXPRESSED IN 500 (a), WHILE 500 (c) RATHER CLEARLY TELLS US THAT ANY SUCH COASTAL ACTIVITY MAY BE SPLIT INTO ADDITIONAL CONSEQUENTIAL ACTIVITIES WHICH MAY OR MAY NOT BE COVERED BY THE INITIAL CONSISTENCY DETERMINATION. IN OTHER WORDS, THE DECIDING AGENCY APPARENTLY HAS THE OPTION TO HALT CONSEQUENT ACTIVITIES THROUGH REAPPRAISAL OF IT'S PRIOR DETERMINATION ON THE BASIS OF NEW INFORMATION WHICH WAS NOT AVAILABLE AT THE PRIOR STAGE.

SECTION 570 (b) RAISES A SERIOUS QUESTION REGARDING THE AUTHORITY OF THE DECIDING AGENCY TO GRANT A CONSISTENCY DETERMINATION. THIS SECTION STATES THAT A COMMENTING "RESOURCE AGENCY" INCLUDES "ANY COASTAL RESOURCE DISTRICT WITH AN APPLICABLE AND APPROVED COASTAL MANAGEMENT PLAN UNDER AS 46.40." SECTION 130 (c) STATES THAT "GREAT WEIGHT" WILL BE ACCORDED TO COMMENTS OF THE OTHER RESOURCE AGENCIES SOLICITED BY THE DECIDING AGENCY IF THE MATTER IS IN THEIR PRIMARY AREA OF EXPERTISE. SECTION 920 (7) DEFINES "GREAT WEIGHT" AS DEFFERENCE, UNLESS THE ASSERTION IS CONTRARY TO THE WEIGHT OF FACT OR OPINION IN THE ADMINISTRATIVE RECORD. WE EXPECT THAT THE LOCAL GOVERNMENT OF A COASTAL RESOURCE DISTRICT WILL CLAIM TO HAVE PRIMARY EXPERTISE IN ANY ACTIVITY AFFECTING THEIR LANDS, AND WE BELIEVE THAT THIS SECTION CAN BE USED TO VETO PROJECTS OF STATE CONCERN WHICH ARE OPPOSED BY THE COASTAL DISTRICTS.

IN SUMMARY, WE WOULD LIKE TO REITERATE OUR FEELING THAT SEVERAL EXISTING PROBLEMS, ESPECIALLY IN THE AREA OF CONSISTENCY DETERMINATIONS, CAN BE RESOLVED BY THESE PROPOSED REGULATIONS AND WE SINCERELY APPRECIATE THE EFFORTS OF ALL WHO HAD A PART IN WRITING THEM.

THERE ARE OTHER SECTIONS OF THE PROPOSED REGULATIONS WITH WHICH WE HAVE SOME CONCERNS. A DETAILED WRITTEN ALALYSIS OF THE FOREGOING GENERAL COMMENTS AS WELL AS OTHER AREAS OF CONCERN WILL BE SUBMITTED FOR YOUR CONSIDERATION BY FEBRUARY 27, 1981.

AGAIN, WE APPRECIATE THE OPPORTUNITY TO EXPRESS OUR VIEWS AND HOPE THAT OUR COMMENTS ARE HELPFUL.

UNIFORM PROCEDURAL REGULATIONS

Department of Law
Pouch K, State Capitol
Juneau, AK 99811

Attention: Mr. Jon K. Tillinghast
Special Assistant Attorney General

Gentlemen:

Texaco Inc. appreciates the opportunity to comment on the referenced permit regulations of the Departments of Natural Resources, Environmental Conservation and Fish and Game; the Boards Fisheries and Game and the Alaska Coastal Policy Council.

As we stated at the hearing on February 6, 1981, we are opposed to the inclusion of plans of operations in these proposed permit regulations in their present form, primarily because they do not fit well. We would like to reiterate our feeling that plans of operations involving oil, gas, coal and offshore mining activities as well as hardrock mining should be excluded from these proposed regulations and continued to be administered under existing MOU's and procedures or under separate regulations written to implement the existing procedures. We note that hardrock mining operations have not been considered in the proposed regulations and suggest that plans for those activities be covered by the same procedural regulations.

In view of discussion at the February 6 hearing regarding our opposition to the inclusion of plans of operations in these regulations, our comments are a constructive attempt to reword some of the sections to more logically include operations in these regulations.

We also believe that the adoption of the proposed regulations is premature, as the Legislature is considering at least one permitting bill which may require amendment to these regulations. We suggest that work be continued on the regulations in an effort to iron out any problems and to prepare them for adoption, but wait until the Legislature acts on a permitting bill before actual adoption.

We continue to support the department's efforts to establish uniform permit procedures including the streamlining of the coastal zone consistency determination process, and feel that a great deal can be accomplished under these proposed regulations. However, we have concerns regarding some of the proposed sections and offer the following analysis for your consideration:

This is recycled paper

22 AAC 10.010. This section says that the agency's regulations will identify permits as Class I or Class II. The Notice of Proposed Changes in the Regulations which accompanied the proposed regulations and the Executive Summary stated that the adoption of this section would designate the permits as either Class I or Class II. We are concerned that neither these regulations nor the agency's regulations designate permit classes. We feel that class designations should be made by amendments to the agency's regulations adopted simultaneously with these regulations or by the adoption of these regulations.

22 AAC 10.020. A maximum time limit for extensions should be stated for (1) through (4) of this section. We suggest that 10 days may be a logical amount of time for both Class I and Class II permits.

22 AAC 10.030. Fifteen (15) days should be sufficient time to notify the applicant of an incomplete application for both classes of permits.

22 AAC 10.040(1). This section should provide for the signature of "any duly authorized employee" of a corporation as in (4).

22 AAC 10.050(a)(1). Hearings should be held only if the statutes require it, or federal law requires it to accomplish a binding consistency determination.

22 AAC 10.050(b)(1). Delete "or, for Class I permits, likely." Hearings should be held on Class I permits only if required by statute. "Likely concern" is not good enough cause for holding a public hearing.

22 AAC 10.060(a)(2). A statement that a person aggrieved by the officer's decision may apply for reconsideration under the provisions of 22 AAC 10.620 through 22 AAC 10.670 of this chapter.

This change is necessary because of recommended changes in the appeal sections of the proposed regulations.

22 AAC 10.060(a). Add a new subsection (3) which would read "(3) If, at the end of the applicable time period the deciding officer has taken no action and the applicant has a proper bond on file, if required, the application is deemed approved and the permit granted pursuant to this chapter.

22 AAC 10.085. In the second sentence, delete the words "which would" and replace them with the words "shall not," end the sentence after the word "chapter" and delete the remainder of the section.

All existing MOU's should be amended to comply with these regulations and any new ones should be written to comply with them.

22 AAC 10.100(d). Replace the words "class A or Class B appeal of the agency's decision is taken," in the first sentence with "application for reconsideration is made."

This change is necessary because of recommended changes in the appeal sections of the proposed regulations.

22 AAC 10.120(c). This section should provide for a copy of the notice to be sent to appropriate local governments. We could never be sure that we know all the units of local governments claiming jurisdiction.

22 AAC 10.130(b). Add "except in the case of plans of operations" between "permit" and "or" in the middle of the second sentence.

The commenting agencies should be instructed by the deciding agency to review the plan of operations and make constructive recommendations which will accommodate problems or potential problems in their respective areas of responsibility. It should be made clear that denial is not an option where plans of operations are concerned. The right to explore for and to develop discoveries has already been granted by the state.

22 AAC 10.130(c). Delete the words "accord great weight to" in the first sentence and replace them with "consider the."

22 AAC 10.160(3). The issuing decision is not the place for explaining why resource agency recommendations were rejected. A separate document between the deciding agency and the commenting agencies could accomplish this without cluttering up the decision.

22 AAC 10.500(c). Delete this subsection. Section 500(a) provides that one consistency determination for each activity will be made; (b) explains that subsequent activities still need a consistency determination, even where a prior related activity had been given a determination, which is okay. However, (c) allows the deciding agency to go back and reappraise a prior determination based on new information which was not available at the prior stage. This could be dangerous. We are concerned that an activity that has been granted consistency with the ACMP may be cancelled through a non-consistent determination made for a necessary consequent activity. This could stop a project already well along toward completion by a retroactive non-consistency determination. A project should be found either consistent or non-consistent with ACMP at the outset.

22 AAC 10.510. Add the words "except pertaining to state oil and gas leases" between "42 U.S.C. § 4332" and "the office of the . . . ."

This change is to clarify that the Department of Natural Resources is responsible for consistency determinations on disposals of interest in state lands, including environmental impact statements or federal permits requiring an environmental impact statement.

22 AAC 10.520. Add the words "including a joint state/federal oil and gas lease sale where an environmental impact statement is required" at the end of the first sentence. Add the words "including associated federal permits requiring an environmental impact statement" at the end of the second sentence.

This change is for the same reason as 510.

22 AAC 10.550. Delete (a) and (b).

These subsections provide for two consistency determinations on "other activities" which is not in keeping with the stated intent of these regulations.

22 AAC 10.550(c). We suggest that the term "de minimus" be replaced by the word "minor," minimum," "trifling" or some other easily understood term. Not everyone reading these regulations are attorneys nor do they all have access to Black's Law Dictionary.

22 AAC 10 570(b). Delete this subsection and add "all state agency members of the Coastal Policy Council" to the definitoin of "resource agency" in .920(12).

22 AAC 10.580. Change this section to read: "When an activity requires more than one permit, the applicant, in order to obtain a conclusive determination under Secs. 510-540 of this chapter, should apply for the appropriate permit under those sections prior to or at the time of application for any other necessary federal permit or license. If an applicant applies for a federal license or permit prior to applying for a state permit which would provide the proper forum for a conclusive consistency determination under Secs. 510-540 of this chapter, the designated lead agency may render a consistency determination which is limited to the scope of the activity contemplated by the federal license or permit and contingent upon the issuance of an ultimate conclusive consistency determination. Thereafter, an applicant may either submit application for additional federal licenses or permits and obtain further non-conclusive consistency determinations, or may apply for the appropriate state permit under Secs. 510-540 and obtain a conclusive consistency determination."

As proposed, this section could require an applicant to submit all applications simultaneously, which would be cumbersome, if not impossible in some cases.

22 AAC 10.600 through 22 AAC 10.860. In general, the appeal procedures are too complicated and time consuming. We suggest that Sections 22 AAC 10.600 through 22 AAC 10.860 be deleted and replaced by the procedures set out in Chapter 83 of the Oil and Gas Leasing Regulations be used with some modifications, as follows:

22 AAC 10.620. Reconsideration. (a) Within fifteen (15) days after the receipt of the agency decision, the applicant may file a request for reconsideration to the director if the action was taken without the advance approval, consent or concurrence of the commissioner, or to the commissioner, if he had approved, consented to or concurred with the decision in advance of its issuance.

22 AAC 10.630. Judicial Appeals. A decision or other action of the division, the director or the commissioner becomes final for purposes of an appeal to the superior court 30 days after delivery in person or by certified mail or registered mail, or as provided By applicable provisions of the Administrative Procedures Act.

22 AAC 10.640. Applications for Reconsideration. An application for reconsideration or an appeal must be filed with the deciding agency and must contain the following information:

(1) A clear and concise statement of the material factual issues proposed for reconsideration;
(2) A statement on how the decision will injure the applicant; and
(3) A statement of intent to file a brief, if applicable.

22 AAC 10.650. Briefs. Written briefs in support of an application for reconsideration or appeal may be filed with the division within 20 days after the filing of the application. The intention to file a brief must be specified in the application for reconsideration or appeal.

22 AAC 10.660. Oral Argument. Oral argument may be allowed at the discretion of the officer who is to reconsider the action if written request for it is filed with the division within the time allowed for filing written briefs.

22 AAC 10.670. Notice of Decision. Following reconsideration of any action or final decision on appeal, the applicant will be given notice of the decision reached, specifying whether the action is affirmed, reversed, or modified, and if the last, the details of the action as modified.

22 AAC 10.820(a). In the event that section 22 AAC 10.820(a) is not deleted, we are concerned that it says that the appellate officer will be designated by the regulations of the agency hearing the appeal. We are not aware of proposed amendments to the agency's regulations to accomplish this. We feel that designations of appellate officers should be made by amendments to the agency's regulations adopted simultaneous with these regulations or by the adoption of these regulations.

22 AAC 10.900(a). Delete the reference to "sec. 620" and replace it with "sections .620 through .670."

This is to accommodate the recommen changes in the appeal sections of the proposed regulations.

22 AAC 10.900(b). Delete the first part of the first sentence to the first comma. Start a new sentence beginning with "A copy of all matters and proof of service . . . ."

22 AAC 10.920(3). Add "except where otherwise required by the agency's regulations," between the words "means" and "an" in the first sentence.

This suggestion is made to accommodate the fact that applications for approval of plans of operations are not made on a form, but are prepared in accordance with the requirements of the proposed leasing and unitization regulations currently being considered for adoption.

22 AAC 10.920(7). Change "deference" to "serious consideration." Yielding to the opinion of other resource agencies would in effect make them the "deciding agency" rather than the agency responsible for the issuance of the permit.

22 AAC 10.920(12). Add a sentence at the end of this section to read "For the purposes of .570 of these regulations, the term also includes all state agency members of the Alaska Coastal Policy Council." This sentence is lifted from .570(b).

6 AAC 80.900(20). We recommend deletion of this section as well as section 6 AAC 80.010(b) because they are not subject to these uniform procedural regulations. Further, the attempt to amend .900(20), in the past has created considerable controversy, and most likely will again, with the possibility of jeopardizing the uniform procedural regulations. As proposed, the definition would not give consideration to economics which is important in determining if an issue is "feasible and prudent."

Finally, we would like to express our concern regarding the proposed Land Use Regulations, Chapter 65 and the proposed Miscellaneous Land Use Regulations, Chapter 96; how they relate to each other and to these uniform permit regulations. We would appreciate any information available as to the status of these chapters.

Again, we appreciate the opportunity to comment on these proposed regulations and hope that our comments will be helpful. If you have any questions, please do not hesitate to call or write.

Very truly yours,

TEXACO Inc.

TELEPHONE NO:

FROM: Robert E. LeResche
Commissioner
Department of Natural Resources

SUBJECT: Uniform Procedures for Permits, Consistency Determinations, and Appe

For purposes of the meeting scheduled Friday, April 24, to finalize regulations on uniform procedures, I am setting out my comments on the draft distributed March 26 together with the memorandum by Jon Tillinghast dated April 13. This program has generated much interest among the legislature, industry, and public interest groups. As has been true throughout, my comments are for the purpose of assisting you in obtaining a permit reform program which (1) achieves genuine deregulation, (2) maximizes certainty as to the respective authorities of state agencies, and (3) provides a practical and workable product to increase efficiency in State government.

I continue to have objection to four provisions of the draft regulations, which are as follows:

1. Proposed Sec. 22 AAC 10.050(b) lists the factors to be considered in determining whether to hold a hearing on a permit application. With respect to paragraph (5), earlier drafts spoke only to the possible delay in the starting date of a project. The most recent draft places the delay factor in the context of "the likely impacts of the project". Since any major project will undoubtedly have significant impacts, the addition of this phrase effectively eliminates delay as a consideration in deciding not to hold a public hearing on major projects.

2. Proposed Sec. 22 AAC 10.570(g) provides for monitoring of consistency determinations by DPOR. I have no objection to the concept of monitoring, nor to formal amendment of the regul setting forth the coastal management standards if it is the opinion of the cabinet that the standards are not accomplishing desired results. However, formal recommendations for, and the issuance of, "interpretations" of coastal management standa by one agency based on the case history of consistency determin made by another agency troubles me greatly. Regardless of the provision in paragraph (g) that such binding interpretations are prospective only, the analysis leading to said recommendati and interpretations will amount to a formal post mortem of decisions already made by State government. While paragraph(g) states that such interpretations may not serve as the basis for an appeal of a consistency determination, consideration of facts affecting the coastal zone is inherently part of the "best inter decision DNR makes prior to the disposition of any interest in land (which is not protected from appeals by these regulations)

As a result, I expect that recommendations and interpretations generated under this paragraph will, as admissions against interest by State government, serve as the basis for litigation challenging oil and gas lease sales, timber sales, land disposa and other dispositions by this Department.

It seems to me that the alleged need for paragraph (g) carries with it the implication that administrative orders on major project review and oil and gas leasing, the state clearinghous procedure, and the interagency review provisions of these regulations are inadequate. Moreover, I see no reason why DPDP cannot perform an informal monitoring function without memorializing it in a regulation.

3. Proposed Sec. 22 AAC 10.570(h) speaks to the preceden value of consistency determinations made by DPDP prior to the effective date of these regulations. It goes without saying that the State should not change its interpretation of any laws or regulations without good reasons. Why, however, is it necessary to state this objective in regulatory form only for the Coastal Management program? Moreover, I can virtually guarantee that private organizations of any philosophy may use this provision to challenge any consistency determination on the grounds that it is not consonant with a consistency determination made on a similar subject previously.

4. The memorandum of April 13 authored by Jon Tillinghas suggests changing the language regarding rebutting of comments submitted by other agencies from "burden of moving forward" to "burden of proof". In order to protect the legality of an oil and gas lease sale, land disposal, or other disposition of land interests, this change will require DNR to (1) assume in nearly all cases that an agency comment is within their primar area of expertise, and (2) disprove every comment submitted wh we do not agree with individually and with a preponderance of the evidence. Moreover, every attempt by DNR to do this will be subject to judicial examination in the context of any litig filed, and I expect this will become a common occurrence. I would strongly urge that the phrase "burden of moving forward" be used, which requires us to respond to comments but does not establish formal standards of proof.

Overall, I continue to have reservations about the overall complexity of these regulations, considering that they must be followed to the letter by literally hundreds of state emplo in order to avoid committing a procedural error rendering a pr legally vulnerable. As you know, a number of groups have made a profession out of instituting litigation against a project o procedural grounds when their real objection is to the project itself; such litigation may delay or cancel a project without the advisability of the project ever being actually considered

by the judge. Since the complexity of these regulations is largely attributable to the provisions implementing the Coastal Management Act, I continue to have doubts about the desirability of this legislation as I expressed in an earlier memorandum.

Nevertheless, there are many laudable portions of these regulations which will have a beneficial effect on the efficiency of State government. Moreover, this is the first permit reform project which has reached the point of having a conclusion. I ask that the serious deficiencies in the draft regulations outlined above be reviewed, but I will abide by the consensus of the cabinet on the final result.

MEMORANDUM State of Alaska

DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINERALS & ENERGY MANAGEMENT

TO: Robert E. LeResche,
Commissioner

DATE: January 2, 1981

FILE NO:

Deputy Commissioner

TELEPHONE NO: 276-5113

FROM: Glenn Harrison
Director

SUBJECT: Personnel Requirement, Uniform Permit Procedure December 9, 1980 Draft

Personnel requirements necessary to administer the Uniform Permit Procedures are estimated below. The method used in the calculation is clearly presented. The results of the estimation are in addition to the two people request associated with the proposed unit and plan of operation regulations.

The estimate is organized into four topics: analysis of 1980 data; projection of 1980 data to 1981; identification of procedures not presently used which will become necessary with this formal method and percent of applications affected; calculation of personnel requirements.

I. ANALYSIS OF APPLICATIONS RECEIVED AT DMEM IN 1980:

Total Processed: 340

TYPE	OIL AND GAS	MINING
Class I	119	81*
Class II	134	6

* There was an increase in 1980 of 13,500 mining claims, bringing total claims to 35,000. If only 10% of those 1980 claims file MLUP Class I applications this spring - and the proposed regs would require 100% to file - 1350 applications at a minimum could be expected. Average processing time per application was estimated by the LMT that has sole responsibility for processing this type of application at 8 hrs each. Using 4 hrs * 1350 applications = 5,400 hours. An estimate of 1750 hours per man per year yields 3+ positions. These positions were already requested in the 1982 budget.

Determination of Mean time for processing applications in 1980:

Petroleum Engineer	1750 hours
Coastal Zone Management	1750
Land Management Technician	1750
Petroleum Geophysicist	1000
Total processing time for 1980:	6250 hours

$\frac{6250 \text{ hr}}{340 \text{ applications}}$ = 18.4 hours per application
mean processing time

II. PROJECTION ESTIMATE FOR APPLICATIONS IN 1981.

Estimate: 390-460 applications

* * See attached graph * *

Note: This ignores the increase in mining MLUP activity noted earlier.

III. IDENTIFICATION OF PROCEDURES NOT PRESENTLY REQUIRED AND ASSOCIATED ESTIMATES.

- Give written notice to applicant within 15 days or 30 days if additional information is necessary.
  Percent applications affected: 50%
  Time: * 1 hour Net Effect: 1 hr x 0.50 = 0.5

* Time includes researching, writing, typing, proofing and final copy preparation.

- Establish and keep track of deadlines, starting and stopping the deadline clock (sec. 30 & throughout)
  Percent applications affected: 100%
  Time: 1 hour Net Effect: 1 x 1.00 = 1 hr

- Determine whether to hold a hearing & carry out decision, notify applicant (sec 50).
  Percent applications affected: 10% (see attached list of 1980 applications where some 30 applications out of the 340 considered controversial have been highlighted)
  Time: 4 hours Net Effect: 4 x 0.1 = 0.4 hr

- Serve a copy of permit decision on applicant, resource agencies or anyone who has submitted request for it (sec. 60)
  Percent applications affected: 100%
  Time: 1 hour Net Effect: 1 x 1.0 = 1 hr

- Prepare justification of decision if testimony opposed to decision presented at hearing (sec 100).
  Percent applications affected: 10%
  Time: 4 hours Net Effect: 4 x 0.1 = 0.4 hr

- Serve justification of decision on everyone within 5 days if decision appealed (sec 100)
  Percent applications affected: 5%
  Time: 1 hour Net Effect: 1 x 0.05 = NIL

- Give public notice at least twice for Class II, with summary of proposed activity (sec. 120)
  Percent applications affected: (140/340) 40%
  Time: 3 hr Net Effect: 3 x 0.40 = 1.2 hr

- Prepare a separate staff recommendation (sec. 140)
  Percent applications affected: (140/340) 40%
  Time: 8 hrs Net Effect: 8 x 0.40 = 3.2

- Hold preissuance conference at applicant's request (sec. 150) prepare memorandum of meeting.
  Percent applications affected: 50%
  Time: 4 hrs Net Effect: 4 x 0.5 = 2.0 hr

- Prepare formal agency decision with findings, conclusions in support of decision; a detailed justification of decision process (sec. 160)
  Percent applications affected: (140/340) 0.40%
  Time: 15 hrs Net Effect: 15 x 0.4 = 6.0 hr

- Consider requests for stay of agency decision pending appeal, serve request on everyone, rule or request within 10 days after other parties have served responsive memorandum (sec. 630).
  Percent applications affected: (140/340 x 0.50) = 20%
  Time: 4 hrs. Net Effect: 4 x 0.20 = 0.8 hr.

- Within 10 days after appeal filed, decide whether to hear appeal (sec. 640).
  Percent applications affected: 20%
  Time: 2 hr Net Effect: 2 x 0.2 = 0.4 hr.

- If Class B hearing request granted, publish notice within permit area, serve notice on everyone who received 1st, agency decision, receive petitions for intervention and objections to intervention petitions, decide whether to grant intervention petition w/in 10 days (sec. 640).
  Percent applications affected: 5%
  Time: 8 hrs Net Effect: 8 x 0.05 = 0.4 hr

- Make summary decision in some cases on Class A brief, may serve notice further brief required (sec. 710)
  Percent applications affected: 5%
  Time: 1 hr Net Effect: 1 x 0.05 = NIL

- Oral hearing after second Class A brief, serve decision on parties
  Percent applications affected: 5%
  Time 2 hrs Net Effect: 2 x 0.05 = 0.1 hr

TOTAL WEIGHTED - AVERAGE PROCESSING TIME INCREASE PER APPLICATION 16.5 hours

IV. CALCULATION OF PERSONNEL REQUIREMENTS

Expected application load in 1981: 390-460

Increased permit time per application: 16.5 hours

1981 increased workload: 6435 - 7590 hours
3.7 - 4.34 people

Net Requirement: 4 people

1 Clerk-Typist
1 CZM (MA II)
1 DPC III
1 LMT I

The above request for four people is in addition to those currently assigned to the permit process at DMEM (see attached organization chart). Tasks which the Uniform Permit Procedures require similar to those already being performed at DMEM are listed below.

- o Carry out interagency review
- o Review applicant's written response to other agencies' written comments.
- o Keep record file on application.
- o For disposal within coastal zone, ask for comments on consistency issue in both .305 and .345 notice.
- o Prepare informal brief for Commissioner in event of appeal of decision.

Given the number of deadlines in the proposed regulations, it is obvious we would receive benefit from developing a computer monitoring process of the applications. I have not included a request here for these funds since I am not sure to what extent ALARS could help with this, or indeed, what the final regulations will require. I would not expect the amount to be extraordinarily large, however.

Please let me know if you need further information.

REGULATORY REFORM

The Alaska State Chamber supports regulatory reform legislation which will generate consistent, non-duplicative regulations and processes for issuance of state permits which will create a clearly defined method of permit procedure and which will encourage and help the business climate within the state of Alaska.

The Alaska State Chamber believes that unless the state government assumes the role of cooperation and support rather than simply regulation and policing, we will not have a climate that will encourage establishment of new industry or economic viability for industries already operating in the state.

Section 1. FINDINGS. The legislature finds that (1) the orderly development of state resources is being unnecessarily delayed by the length of time required to obtain permits from state agencies, by the complexity of the permitting process, and by the number of agencies involved in the permitting process;

Schedule for Fri. - Feb 5

(2) the uncertainties created by the lack of specific time limits, the proliferation of agency reviews, the number of agencies involved in the permit process, and unjustified agency requirements upon the processing of permit applications have cost Alaskans millions of dollars in lost employment and higher prices;

(3) the public interest has not been advanced by protracted delay in the processing of permit applications by state agencies;

(4) by reducing the number of agencies and agency reviews involved in the permit process, and by requiring state agencies to process permit applications in an expeditious manner, the social, economic, and environmental health and well-being of Alaska citizens will be promoted;

(5) there are many administrative orders and similar documents that have been promulgated by the executive branch relating to interagency review that conflict and overlap, retarding the permit issuing process.

Leave Sec. 2 out as separate adm.

* Section 2. AS 44.62.330(a) is hereby amended as follows:

(a) Except as provided in Article 8A of this Chapter, the [The] procedure of the State Boards, Commissions, and Officers listed in this Subsection or their successors by reorganization under the constitution shall be conducted under AS 44.62.330 - 44.62.630. This procedure, including, but not limited to, accusations and statements of issues, service, notice and time and place of hearing, subpoenas, depositions, matters concerning evidence and decisions, conduct of hearing, judicial review and scope of judicial review, continuances, reconsideration, reinstatement or reduction of penalty, contempt, mail vote, oaths, impartiality, and similar matters shall be governed by AS 44.62.010 - 44.62.650, notwithstanding similar provisions in the statutes dealing with the state boards, commissions, and officers listed. Where indicated, the procedure that shall be conducted under AS 44.62.330 - 44.62.630 is limited to named functions of the agency.

(1) Repealed by § 5 ch 159 SLA 1980.

(2) Board of Chiropractic Examiners

(3) Board of Dental Examiners

(4) State Board of Registration for Architects, Engineers and Land Surveyors

(5) Repealed by § 13 ch 218 SLA 1976.

(6) Board of Examiners in Optometry.

(7) Repealed by § 5 ch 159 SLA 1980.

(8) State Medical Board

(9) Divison of Lands under Alaska Land Act where applicable

(10) Board of Nursing

(11) Board of Pharmacy

(12) Board of Public Accountancy

(13) Department of Labor as to functions relating to employment security only as provided in (c) of this section

(14) Real Estate Commission

(15) Alaska Workers' Compensation Board, where procedures are not otherwise expressly provided by the Alaska Workers' Compensation Act

(16) Department of Transportation and Public Facilities, as to functions relating to aeronautics and communications

(17) Repealed by § 12 ch 131 SLA 1980.

(18) Repealed by § 49 ch 94 SLA 1980.

(19) Repealed by § 54 ch 169 SLA 1978.

(20) Department of Revenue, under Cigarette Tax Act

(21) Repealed by § 54 ch 169 SLA 1978.

(22) Repealed by § 11 ch 181 SLA 1976.

(23) Department of Public Safety, as to suspension or revocation of a security guard's license under AS 18.65.400 - 18.65.490

(24) Department of Health and Social Services, under AS 47.35.010 - 47.35.080, relating to boarding and foster homes for children

(26) Repealed by § 4 ch 120 SLA 1971.

(27) Department of Health and Social Services and Department of Environmental Conservation under Alaska Food, Drug, and Cosmetic Act (AS 17.20.010 - 17.20.380) and Department of Health and Social Services in connection with the licensing of embalmers under AS 08.44.010

(28) Department of Health and Social Services and the Hospital Advisory Council, under AS 18.20.010 - 18.20.130

(29) Repealed by § 4 ch 120 SLA 1971.

(41) Board of Game

(42) the Department of Education and the Professional

Teaching Practices Commission with regard to proceedings to revoke or suspend a teacher's certificate under AS 14.20.030 - 14.20.040 and AS 14.20.470(a)(4)

(43) Alaska Commission on Postsecondary Education under AS 14.48.010 - 14.48.210 as to denial of applications and revocation of authorizations and permits.

(44) Department of Environmental Conservation except to the extent that AS 44.62.360 - 44.62.400 are inconsistent with the manner in which proceedings are initiated under the provisons of AS 46.03.010 - 46.03.900

(45) University of Alaska, except to the extent that its inclusion is inconsistent with the provisions of AS 14.40.010 - 14.40.960

(46) Department of Commerce and Economic Development concerning the fisheries enhancement loan program (AS 16.10.500 - 16.10.620)

(47) Board of Psychologist and Psychological Associate Examiners (AS 08.86.010)

(48) the Department of Fish and Game as to functions relating to the protection of fish and game under AS 16.05.870

(49) Board of Veterinary Examiners (AS 08.98.010)

(50) Board of Nursing Home Administrators (AS 08.70.010)

(51) Board of Barbers and Hairdressers (AS 08.13.010).

* Sec. 3. AS 44.62 is amended by adding new sections to read:

ARTICLE 8A. PERMIT PROCESSING.

[Sec. 44.62.632.] PERMIT CLASSIFICATION. (a) Each state resource agency shall by regulation classify each of the permits issued by that agency within one of the two following categories:

(1) class I permits, for which the state agency must issue a final decision within 30 days after the date of receipt of a completed permit application; and

(2) class II permits, for which, because of a necessary public notice or interagency review period, a final decision cannot be issued within 30 days. A final decision on a class II permit must be issued within 90 days after the date of receipt of a completed permit application.

(b) Final regulations classifying its permits, and uniform procedural regulations providing for the processing of these permits, shall be adopted by each state resource agency by October 1, 1982, following appropriate notice and hearing. Permits applied for after October 1, 1982 must be issued in accordance with the time periods specified in (a) of this section, and the provisions of the implementing regulations.

Sec. 44.62.633. OTHER REGULATORY REQUIREMENTS FOR PERMIT PROCESSING.

(a) Upon a finding by the head of a resource agency that a permit being considered involves unusually complex issues so that the agency cannot render a final decision within the time period specified in AS 44.62.632(a), the head of the agency may prescribe a time period within which the final decision will be made. The finding of the head of the agency may be appealed by the applicant to the superior court under the Appellate Rules of Procedure. In no event may the time period be extended more than 120 days beyond the time period specified in AS 44.62.632(a).

(b) The time period specified in AS 44.62.632(a) may be extended if necessary to facilitate joint processing of a permit application through memoranda of understanding between state and federal agencies, but only if strict adherence to the time periods established in AS 44.62.632(a) would pose an irreconcilable conflict with a federal statute or regulation.

(c) Subject to (a) and (b) of this section and AS 44.62.634, failure of a resource agency to make a final decision within 30 days after the receipt of a completed permit application for a class I permit, or within 65 days after the receipt of a completed permit application for a class II permit, constitutes approval of the application. In an

appeal of a permit issued by operation of this subsection, the record shall be construed in a light most favorable to the applicant, and the permit shall be accorded a presumption of regularity.

(d) A state agency may not condition the issuance of a permit upon the issuance of a permit from another governmental agency.

Sec. 44.62.634. ADDITIONAL INFORMATION. (a) If a resource agency receives a completed permit application which does not contain sufficient information concerning the project's compliance with the agency's statutes and regulations, the agency shall notify the applicant within 15 days after receipt of a completed permit application for a class I permit, and within 30 days after receipt for a class II permit.

(b) The notification must specify those particular facts or issues concerning the proposal upon which the agency requires additional information in order to determine whether the project will conform with the agency's statutes and regulations;

(c) If a timely request under subsections (a) and (b) of this section is made, the time period specified in AS 44.62.632 is suspended from the date of request to the date of full compliance with the request. Subsequent requests for additional information may be made, but must relate only to new issues raised by the response to the initial notification. Subsequent requests shall not extend the time periods specified in AS 44.62.632.

(d) Nothing in this section shall be construed as granting any resource agency the authority to request information beyond the authority given to it by other statutory provisions.

Section 44.62.635. LEAD AGENCY. (a) [For each class of activity permitted in the state] there is established a lead agency which is solely responsible for ~~issuing~~ MAKING coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications. The lead agency shall be that resource agency having principal responsibility for authorizing the overall activity, including instances where an activity requires permits from more than one resource agency. For classes of activities for which no agency with principal responsibility exists the governor shall designate a resource agency to be a

Preferred

(b) Substantive consideration shall be given to the factual comments of resource agencies and to the Office of Coastal Management within their primary areas of expertise, and also to the factual comments of coastal resource districts made ~~pursuant~~ under to an approved district coastal management program.

"The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received.

The lead agency shall then

balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

(c) No state agency other than the lead agency may comment to a federal permitting agency.

(d) An agency's completion of a review under § 401 of Corp of Engineers the Clean Water Act (33 USC § 1341) does not constitute that agency as a lead agency hereunder.

Section 44.62.636. COMMENT PERIOD. A coastal resource district or state agency which receives a request for comment in connection with a permit application or plan review being processed by a resource agency shall submit such comments in accordance with the following schedule:

(1) Comments on class I permits shall be submitted within 15 days of the agency's receipt of the request;

(2) Comments on class II permits and federal permits shall be submitted within 30 days of the agency's receipt of the request;

(3) Where, pursuant to AS 44.62.633, the requesting agency has extended the time periods specified in AS 44.62.632, that agency may extend the time period specified in this section for up to an additional 30 days.

(a)

Sec. 44.62.637. ADMINISTRATIVE APPEALS. The uniform procedural regulations promulgated pursuant to AS 44.62.632(b) shall provide for an administrative appeal from a final decision on a permit application. (b) The appeal must be resolved within 45 days of the final decision, or, if a hearing is held on the appeal, within 65 days of the final decision. Such appeal shall be to the head of the ~~resource~~ agency involved. An appeal taken from a decision granting a permit shall not necessarily stay the issuance of the permit in question. The head of the agency may summarily dismiss an appeal before the time established herein, and such dismissal shall be the final agency action on the matter. If the public interest is so served, in an appeal from the denial or conditioning of a permit the head of the agency may grant the permit or remove conditions thereon pending the outcome of the appeal.

Sec. 44.62.638. REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the superior court of a final decision issued pursuant to Article 8A of this chapter may be had by filing a notice of appeal in the superior court in accordance with the applicable rules of appellate procedure. The right to appeal is not affected by the failure to seek further review pursuant to AS 44.62.637. The review shall be governed by the provisions of AS 44.62.560(b) - (e) and AS 44.62.570.

(b) An appeal taken under this section has preference on the calendar of civil actions before the court and shall be decided without unnecessary delay.

* Sec. 4. AS 44.62.640 is amended by adding a new subsection to read:

(c) As used in AS 44.62.632 - 44.62.635,

(1) "date of receipt" means the date on which a state agency actually receives a completed application filed in accordance with agency regulations and at a place identified as appropriate for filing in the agency's regulations;

(2) "permit" means a permit, license, certification, consistency determination, or other authorization or approval issued by a resource agency as a written document that is required to be obtained or is solicited from a state agency before the construction or operation of a project; "permit" does not include the approval of a unit agreement, a unit development plan, or a unit exploration plan, or conveyances of interest in state land or water, but does include all authorizations and approvals, whether proprietary or regulatory, necessary to undertake a project under a previously conveyed property interest;

(3) "project" means a new activity or expansion or addition to an existing activity for which permits are required before construction or operation; "project" does not include pursuing a trade or profession, providing public health service or operating a financial institution;

(4) "resource agency" means the Department of Natural Resources, the Department of Environmental Conservation, and the Department of Fish and Game with respect to permits issued for the protection of fish habitat or the regulation of state sanctuaries, refuges, and critical habitat areas;

delete 5

(5) "substantive consideration" means that, where documented factual statements or data are submitted by a resource agency or a coastal resource district, those statements or data shall be deemed true unless the lead agency or permit applicant refutes such statements or data by a preponderance of the evidence. The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received.

Pouch V
Juneau, Alaska 99811
(907) 465-4907

May 7, 1982

To: Members of the House

From: Senator Charles Parr

Regarding: CS SB 135 (Rules)

All members of the House and the Senate recently received a form letter distributed by a transportation common carrier regarding SB 135 (legislation which deals with transportation subcontractors commonly known as "Owner-Operators"). Due to the importance of this bill I would like to clear up some misconceptions which may have been created by the information provided by the carrier.

The gravest inaccuracy is the obvious attempt to paint this issue as a union dispute. It has been clearly demonstrated in two Senate committee hearings that this is not the case. The owner operator is stuck between the union and the carrier. On the one hand, the owner operator under law must only work for a common or contract carrier and under a contract which has terms that are generally set by the carrier, on the other hand, in order to work for some carriers the operator must join the union.

Under Alaska Transportation Commission regulations, the carrier is allowed to deduct the employee wages and benefits as well as any truck expenses from the revenues paid to the owner operator for the leased vehicle. This means that the owner operator pays his own wage and benefit and union contributions as well as the employers contributions through deductions in the lease revenues. Any economic benefits that the union, if it is a union shop, negotiates for the employee are just further expenses to the owner operator which are backed off the revenues which are received for the lease of the vehicle.

It makes no sense for a owner operator to strike for the type of benefits which the union could provide, i.e., related to wages and benefits, because that money comes out of the truck revenues, revenues which are under a contract which the union plays no part in securing, a contract which is specifically and only between the carrier and the operator, and which provides the finances which allow the operator to pay vehicle expenses and living expenses.

The concern of the owner operators is that while carriers such as the one which distributed the letter in question are

posting record profits as the result of a highly protected industry, that numerous Alaskan owner operators who do not enjoy the same protection under the law are going out of business because they can no longer afford to operate their rigs at the level of revenues being offered by the carriers.

The carriers are cutting their tariffs (or not adjusting them to reflect the effects of inflation) but still maintaining the same or higher profits, while it is the owner operator, whom is unrecognized by ATC, that is receiving less and less revenue for the vehicle lease and is required to pick up more of the costs and risks related to the transportation of goods over Alaska's highways.

The result is that today, unlike the era prior to the pipeline, common carriers own few if any of their own vehicles, thus eliminating all risk related to maintaining or operating trucks, and that responsibility has been transferred to the owner operator. The carrier has an opportunity to work essentially as a broker, a broker who is in a monopolistic industry where the owner operators have to work for the carrier and where the carrier need not fear the entrance of other carriers into the market due to ATC protection.

The operators, under CS SB 135(rules) are provided a measure of protection, not the protection afforded the carriers, but the minimum protection which will allow competition to flourish within the Alaskan Economy.

CHARLIE PARR
ALASKA LEGISLATURE

S.R. Box 50599
Fairbanks, Alaska 99701
(907) 456-5029

Pouch V
Juneau, Alaska 99811
(907) 465-4907

CS SB 135 (Rules)

CS SB 135 (Rules) provides a measure of equal protection to a class of transportation operators not envisioned when the Alaska Motor Freight Carrier Act was developed. It is less protection than afforded the current class of carriers, but the minimum which will allow competition and fair trade to grow in this sector of the Alaskan Economy.

The primary reason for this legislation is the economic survival of the group providing more than 90% of Alaska's transportation services - the transportation subcontractor (commonly known the "owner operator").

At issue here is the question of minimum standards which will insure that transportation subcontractors receive reasonable consideration for the service and the equipment provided which is necessary to properly serve public needs in the Alaskan environment and economy.

If these people who provide necessary transportation services can not be assured of a certain minimum rate of return on their efforts, there is a danger that no one will provide the type of "adequate, complete, dependable and stable transportation in all its phases", as is assured the public under AS 42.10, the Alaska Motor Freight Carrier Act.

The bill provides the Alaska Transportation Commission with authority to:

-regulate at one level lower than it now does.

-provide licenses to those who are currently transportation subcontractors or who have operated in Alaska since 1976.

-apply standards of public convenience and necessity to the issuance of further licenses.

-provide for minimum and maximum rates

The licensing, grandfather, and rate provisions are modeled after the Alaskan system for common carriers and is a standard approach for a category of public utilities (the grouping in which transportation falls).

RULES CS for SB 135

Changes from Finance CS:

-Section 3 deleted. This section would have changed the definition of a "private carrier" by deleting language refering to lessee and bailee (which is how it presently reads in the statutes.) Therefore, the statutes remain the same regarding "private carriers." This change was agreed in the Rules Committee hearing.

-p. 1 line 19 "...construction contractor operator..." is deleted. This change was agreed in the Rules Committee hearing.

-grandfather clause added. This clause would be the basis for issuing owner/operator (transportation subcontractor) permits. (Section 1 (f)) This change was discussed in the Rules Committee hearing.

-owner/operator language deleted. "transportation subcontractor" added. As SB 135 (Finance) reads, an owner/operator is a trucker that owns one truck. In fact, many truckers own more than one truck, but they are not by definition "carriers." What the term "transportation subcontractor" does is more accurately describe truckers that own more than one truck than the term currently used in SB 135 (Finance). This change in terminology is very important because of the permit system that SB 135 would create.

The language in the Rules CS read: TRANSPORTATION SUBCONTRACTOR. a person who rents, leases, or otherwise provides a motor vehicle for the use of common or contract carriers in transporting property and who provides or arranges for, directly or indirectly, a driver or operator for the vehicle but does not include taxicabs. This is new language. Need for it arose out of problems with owner/operator terminology in the application of SB 135.

-immediate effective date (Sec. 4) plus time frame ATC shall adopt regulations (Sec. 3) will mean as swift an implementation of the permit system as is possible by law and the ATC regs.

-Permit system, permit each vehicle, not each driver (SB 135 will institute a system similar to issuing license plates as opposed to driver's license.) Nontransferable permits will be issued to each truck so that the number of trucks in use will be constant. This creates a limited entry type situation for the trucking industry. The scenario would be something like this: Under the grandfather clause, a person operating a truck in Alaska between 1976 and the effective date of SB 135 would receive, upon application, a transportation subcontractor permit. This permit would be issued to each truck of the person that is eligible under the grandfather clause. If a trucker wrecks his truck and buys a new one,

the permit will be transferred to the new truck. If the trucker suffers economic or physical hardship or death, the permit can be transferred to a spouse, or a person designated by the owner. Cases of transferability will be specifically spelled out in the ATC regulations. This is necessary to prevent locking up the market, where permits might possibly be sold and also have the affect of inflating the cost of a truck. Nontransferable permits allow fair access to future groups.

An annual permit system would be instituted. This would mean a yearly review of already existing permits to assure that permits issued are not for dormant trucks.

Regularly, the ATC will review the transportation needs of the state, and based on their review will decide if "public convience and necessity" dictates that more permits be issued. When ATC does decide that more permits will be issued, anyone who is a transportation subcontractor will be eligible. At this point the grandfather clause will no longer be applicable.

Historically, grandfather clauses have proved to be constitutionally unsound. SB 135's grandfather clause makes no reference to Alaska residency so that it is constitutionally sound and will stand if challenged in a court of law. Also, the provision that it can be used only upon the inception of the ATC transportation contractor permit system and is then open to all, affords every citizen due process and prevents people like the Zobels from having a picnic with SB 135.

Senator Charles Parr
Chairman Senate Health, Education & Social Services Committee
State Capitol
Pouch 5
Juneau, AK 99811

Dear Senator Parr:

I am writing in regards to the Transportation Subcontractor Proposal presented to you by the Women for Alaskan Owner/Operators Committee. I have examined the entire proposal as well as the supporting documents and agree with nearly every detail. The Owner-Operator portion of the Alaskan transportation industry is in a crisis situation the results of which will have far reaching effects into the Alaskan economy. To understand the situation you need to know how this developed.

Prior to the pipeline days there were very few Owner-Operators in Alaska. Quite to the contrary 90 percent of the freight moving then was moved by carriers utilizing company owned equipment driven by employees of that carrier. As the pipeline project began to unfold these carriers increased the size of their fleets dramatically to accommodate the tremendous tonnages of freight to be moved. The rates were good and new or dormant carriers developed to fill the demand. Soon equipment became harder and harder to come by and the carriers began utilizing Owner-Operators to fill this need.

All went well during this period as the rates were adequate and the equipment leases and payments were liveable.

In the period following the peak of the pipeline project more and more competition developed over the decreasing demand (a natural thing) for transportation. The carriers began filing lower and lower tariff rates in order to get the work. As the rates declined companies with large numbers of company owned trucks found it not profitable to operate and began turning more and more to Owner-Operators. Many companies sold their trucks directly to the employees driving for them. There were many advantages in leasing from Owner-Operators, not the least of which, was that the company no longer had the overhead of shops, mechanics, or any of the repair responsibilities. The legal responsibility to insure equipment remained up to state and federal agency standards was and is still the carriers

responsibility. The cost of that standard however, is borne by the Owner-Operator including any fines related to this. In some cases, even the public liability and cargo insurances required by law of the carrier are prorated and subtracted from the amounts paid on the leases.

Still during the demobilization period of the pipeline amounts received by Owner-Operators were adequate to maintain and operate the equipment. Then in 1979, under pressure by the carriers and over the objections of the Owner-Operators, the ATC revised the leasing regulations under 3AAC 64.070. This allowed the costs of the driver to be legally deducted from the lease revenues earned by the Owner-Operator. By so doing the carrier was further relieved from the expense of employees including, but not limited to wages, fringe benefits, the employers contributions for; social security, unemployment, and workmens compensation payments. Even then in 1979 the received amounts for the Owner-Operator were tolerable though very close to intolerable. Now came the inevitable.

Too many carriers, too little work. The carriers, protected by favorable laws and protected by leases that gave them impenetrable protection for their profits entered into cutthroat competition totally insulated from any losses. Certainly not all carriers were or are of this mind but faced with loss of business the alternatives were to get out of business or follow suit. Most followed suit. The Owner-Operator having no voice over the tariff rates and no voice in the price paid for his services reached the point of not enough money to maintain his equipment, his home and family.

Facing the inevitable loss of their equipment and or bankruptcy many Alaskan Owner-Operators withdrew their equipment asking for better leasing arrangements. Some reached agreements and were able to continue operating. Others were told either take what your getting or we will replace you.

Some companies based outside Alaska recognized the desperate economic conditions there and began an active recruiting effort in the lower 48, advertising a need for Owner-Operators in Alaska. The rates stated looked unbelievable to Owner-Operators there who have little or no understanding of the cost of operating in Alaska. Over the last six months literally hundreds of these Owner-Operators have come to Alaska as direct replacements for Alaskan Owner-Operators. Alaskans' equipment is sitting idle, unable to compete against outsiders who have no families here, no homes and no investment in Alaska. Their equipment is ill-equipped for Alaskan operating conditions yet carriers lease their equipment send them on the road overloaded and inexperienced. Much of the type of equipment now in use was previously refused for use by the carrier because it failed to meet their standards.

The Alaskan Owner-Operator is not asking for subsidies or hand outs. What Alaskan Owner-Operators are asking for is to be allowed to function and compete in Alaska's own economy. It would be hard to argue that Alaska doesn't have it's own distinct economy. Alaska has always been plagued by the flow of dollars out of our economy. Many Alaska businesses will be hurt if the present trend continues.

Alaskan Owner-Operators are a clearly identifiable industry of small businessmen who have proved their efficiency by the fact that approximately 90 percent of all freight moved by truck in Alaska is moved by an Owner-Operator. There are many similarities to the Alaska fisherman. Limited entry has helped Alaskan fishermen and Alaskan Owner-Operators need similar laws to allow this industry to function for Alaskans.

The Transportation Subcontractor Proposal is an excellent beginning for allowing this industry to function and to reach stability in these very unstable times. It is essential that this be brought before the legislature before this session ends. By next January the damage to these Alaskan small businessmen will be irrepairable. Many have already filed bankruptcy or are facing the loss of their equipment and personal possessions.

I urge you to bring the Transportation Subcontractor Proposal forward, to examine it closely, and pass it before this session ends.

The Alaskan Owner-Operator has earned and deserves your immediate attention to this industry of small businessmen. Please do not delay!

Sincerely,

Tim Gunderson

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 5/14/82

Haul Road

(CS: Motor Carriers)

Senate on April 28 by Finance with the committee recommending it be replaced with Finance CS and as follows: Bennett (Co-Chmn.), Sackett and Stimson signed do pass; Sturgulewski, Eliason, Ferguson and Dankworth signed no recommendation. To Rules.

April 28 Finance

The Finance CS is a completely new bill. Amends several statutes governing the Alaska Transportation Commission and the regulation of common and private carriers in Alaska. Sec. 1 amends AS 42.07 (AK Transportation Commission) by adding a new section calling for the regulation of "Owner Operators" by ATC. Defines an "owner operator" as one who "rents, leases, or otherwise provides a motor vehicle for the use of others in transporting passengers or property upon the condition that the person be employed to operate the vehicle and includes common and contract carriers and construction contractor operators but does not include taxicabs."

page 792

Sec. 2 amends AS 42.10.280(b)(filing of common carrier tariff schedules with ATC) to require common carriers to file with ATC "schedules showing the maximum and minimum rates, charges, and classifications for the transportation of property within the state . . . "

Sec. 3 amends the definition of "private carrier" in AS 42.10.420(7) to eliminate paid private carriers. Would only mean a person "who transports without compensation, property which is owned or is being bought or sold by him, or property of which he is the seller or [,] purchaser [, LESSEE OR BAILEE,] and the transportation is incidental to and in furtherance of some other primary business conducted by the person in good faith."

Motor Carriers

SENATE BILL NO. 135, (see pages 190;792). Reported back to the Senate May 8 by Rules with a majority recommending it be replaced with a Rules substitute and that it be placed on the May 11 calendar. The report was signed by Senator Kelly, Chairman and concurred in by Senators Ziegler and Ferguson.

May 8 Rules

The Rules version of the bill relates to transportation subcontractors (Senate Finance referred to "owner operators"). Provides permits issued shall authorize the specific number and the types of vehicles to be operated by the transportation subcontractor. The permit does not transfer with a sale, lease, or other transfer of a vehicle, and can only be transferred with the approval of the Commission on the death or injury or economic hardship to the transportation subcontractor who holds it. Vehicles under a permit may be replaced, but the numbers of vehicles under a permit may not be increased.

States that a "transportation subcontractor" means ". . .a person who rents, leases, or otherwise provides a motor vehicle for the use of common or contract carriers in transporting property and who provides

page 818

or arranges for, directly or indirectly, a driver or operator for the vehicle but does not include taxicabs." Provides a person who conducted business as a transportation subcontractor in the state between July 1, 1976, and the effective date of this Act shall upon application be issued an annual permit.

Deletes section of Finance version that would have changed the definition of "private carrier" (see page 793).

Adds new section providing the Alaska Transportation Commission shall adopt regulations relating to transportation subcontractors within 90 days after the effective date of this Act.

RE:

MESSAGE The Anchorage Daily News, published an article, Date 4-24-82 (Wed Pub business page E-1 quote (State may not escape recession.) unquote.

As A Resident of Alaska for Sixteen years, property owner, Registered Voter, Tax Payer and business man, I see My Client & Client, Recession has reached the County level. Originating from relaxation in issuing Permits, and relaxation & inforcing the existing regulations. In Funding it now difficult to maintain living conditions which I have become accustom to.

SIGNATURE

POM TRANSMITTED, DATE TIME OPERATOR

LAA/PS 6/22/81

A twenty acre subdivision was recently excavated in Anchorage, with all the trucks utilized, that one had hauling authority, was excavating out a strip approximitly 32 feet wide and 8 to 10 feet deep. The trucks were paid $50.00 per hr. haul. $8.00 per hr. haul less than the average rate. Operations of this nature can only lead to poor maintance. Increasing damage to public and property. Material was hauled in by a carrier with operating authority, again at a rate no local carrier could operate for. The carrier appears to be a person who requested and was issued authority. Not a property owner, nor a registered voter, nor a tax payer of Alaska. He was another Washington commuter. His dump trucks and semi tractors are licensed with Alaska licenses, yet the car he drives on the state highways washington plates, and has for 2 years. When construction season for the season, his car is loaded in the truck, Washington bound, to stay for the winter months. Returning in the spring Anchorage, Alaska. Should the transits continue to be issued ATC permits, The Residents such as myself, will be forced to sell our homes, our industrial property and our belongings. we will be forced to relocate

to A cheaper location to live. Should the economy in Washington, the commuter will cease to commute, thus furthering the situation with unfounded personal anxiety now damage to the public and property.

Sincerely
Glenn W. Kent

IN THE SENATE

BY THE RULES COMMITTEE

CS FOR SENATE BILL NO. 135 (Rules)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to motor vehicles and carriers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.10 is amended by adding a new section to read:

Sec. 42.10.095. TRANSPORTATION SUBCONTRACTORS. (a) The commission shall supervise and regulate transportation subcontractors in the state and shall prescribe regulations consistent with this chapter concerning the filing of reports by transportation subcontractors, the issuance of nontransferable annual permits to transportation subcontractors based on public convenience and necessity, and the maximum and minimum rates that may be charged by transportation subcontractors.

(b) A permit issued under this section shall authorize the specific number and the types of vehicles to be operated by the transportation subcontractor.

(c) A permit issued under this section does not transfer with a sale, lease, or other transfer of a vehicle. A permit may ~~only~~ not be transferred with the approval of the commission on the death of or injury or economic hardship to the transportation subcontractor who holds the permit, to family members. Factors. Lottery board.

(d) A transportation subcontractor may replace vehicles authorized under a permit but may not increase the number of vehicles authorized under the permit.

(e) In this section "transportation subcontractor" means a person who rents, leases, or otherwise provides a motor vehicle for the use of

Sec. dtly. —
say by date of application.

common or contract carriers in transporting property and who provides or arranges for, directly or indirectly, a driver or operator for the vehicle but does not include taxicabs.

(f) A person who conducted business as a transportation subcontractor in the state between July 1, 1976, and the effective date of this Act shall upon application be issued an annual permit under this section.

#2- ~~in this~~ at any time
↔ and who applies within ~~two years~~ one year.

* Sec. 2. AS 42.10.280(b) is amended to read:

delete (b) ~~A common carrier~~ shall annually evaluate the public need and authorize new permits by regulation. ~~to that end~~

~~(b) A common carrier~~ shall file with the commission, and print and keep open to public inspection, schedules showing the maximum and minimum rates, charges, and classifications for the transportation of property within the state between each point upon its route, and between each point upon its route and each point upon every route leased, operated, or controlled by it, and between each point upon its route or upon any route leased, operated, or controlled by it and each point upon the route of a common carrier, whenever a through route and joint rate has been established or ordered between two such points. If no joint rate over a through route has been established, the carriers in a through route shall file, print, and keep open to public inspection the separately established rates, charges, and classifications applied to the through transportation. The schedules of contract and common carriers shall plainly state the places between which property will be carried, and the schedules of common carriers shall also contain classifications of property in force, and state separately all terminal, storage, icing, and other charges which the commission requires to be stated, all privileges or facilities allowed, and rules and regulations which affect or determine any part or the aggregate of the rates and charges, or the value of the service given to the shipper or consignee. The schedules shall be plainly printed in large type. The carrier shall keep a copy of each schedule readily accessible for inspection by the public in

by date of application ~~some basis - fit, willing and able~~

every station or office where property is received for transportation when the station or office is in charge of an agent, and in every station or office of the carrier where bills of lading or receipts for property are issued. The carrier shall produce a schedule for inspection upon the demand of any person. The carrier shall keep posted in two public and conspicuous places in each station in which a schedule is kept a notice, printed in bold type, which states that the schedules are on file with the agent and open to inspection by any person, and that the agent will assist the person to determine rates or rules and regulations. The commission shall prescribe the form of schedules. The form shall conform as nearly as practicable to the form of schedules required by the Interstate Commerce Commission.

* Sec. 3. The Alaska Transportation Commission shall adopt regulations as provided in AS 42.10.095 enacted in sec. 1 of this Act within 90 days after the effective date of this Act.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

May 5, 1982

Dear Representative:

As a representative of one of Alaska's oldest surviving transportation companies who has been thoroughly involved in the history of owner-operators in Alaska, I feel compelled to explain the real economic factors behind the wild allegations being made in Juneau recently, by a group of truck owners.

There has been a lot of publicity, a lot of political pressure, a lot of table thumping, a lot of lobbying efforts in recent days loudly proclaiming that a group of people called "owner-operators of Alaska" have been discriminated against, cheated by their employers, and in general, are deprived of their rights by the State, you as legislators, and the trucking companies as employers.

Let the record show that this information circulated to you by paid advertisements, telegrams, phone calls, and personal visits does not reflect the true story at all!

During the construction of the now famous Trans Alaska Oil Pipeline, there was created a need for a very large fleet of trucks to move the huge volumes of supplies and construction material north out of Fairbanks, Alaska.

The trucking companies in existence in Alaska at the start of this enormous project were limited to their ability to provide the equipment and drivers necessary. Old, dormant, trucking company operating rights were revived, new companies were created overnight. The 350 mile road now known as the Dalton Highway was finished in a record 154 days. The Yukon River Bridge was completed.

The numbers are staggering! During the peak of construction, there were trucking firms in Fairbanks dispatching over 100 trucks per day!

The Teamsters Union in Alaska had demanded and put into agreement with the trucking firms, a wage guarantee for drivers running north from

(206) 354-2101

Fairbanks to Prudhoe Bay. This totally unreasonable driving wage guaranteed that each driver would get eighteen hours of pay (8 streight time, 10 overtime) for each twenty four hours he was away from Fairbanks on a trip. This wage demand also included provisions that if a driver worked into a Sunday, his wage scale doubled and stayed that way until he returned to Fairbanks!

Trucking companies employed owner-operators during and after the pipeline construction project as a way of providing economic incentive to keep the drivers working in spite of the 18 hour guarantee. None of the trucking companies who operated company equipment survived the post pipeline recession.

Records show that an owner-operator will average over $10,000 per month North of Fairbanks with a trucking company that runs steady. Some of the high figures will reach $14,000 per month. These are the people that are demanding "more" from each of the trucking firms. These are the people who forced a strike on their employers. These are the people who are demanding that you "protect" them with legislation. These are the people who have created the situation that exists today. These are the people who, because of their own near sightedness, have brought upon themselves the situation you have been asked to correct.

The notion that Alaska's unemployed owner-operators are mistreated, underpaid, and abused, is absurd.

A long series of strikes and decertification petitions between Alaska's trucking companies and the Teamsters Union has created a situation today whereby approximately 70% of all Alaska trucking is non-union. This transfer of union to non-union trucking is the basis for the current level of unemployed truck owners. As carriers went on strike, they had to replace the striking drivers, and in so doing, new drivers and owner-operators entered the state and took the jobs of the striking drivers. We feel it is improper for the legislature to interfere with these strike issues by creating new regulations that are monopolistic, inflationary and anti free enterprise.

We trust that when making your decision concerning SB 135, you consider that the individuals who represent themselves as poor, starving, abused, owner-operators are actually "on strike" Teamsters who have been grossly overpaid since 1975, and who struck a very depressed Alaska trucking industry in an effort to further increase Alaska's transportation costs.

Sincerely yours,

LYNDEN TRANSPORT, INC.

ALASKA STATE LEGISLATURE HOUSE OF REPRESENTATIVES

REPRESENTATIVE SALLY SMITH • 321 CHURCH STREET • FAIRBANKS, ALASKA 99701 • IN JUNEAU: POUCH V • JUNEAU, ALASKA 99811

March 18, 1981

David Wurm
Galena Avionics
SR Box 30928
Fairbanks, Alaska 99701

Dear Mr. Wurm:

Thank you for your message supporting long-term, low-interest, lower monthly payment housing and small business loans. As you may already be aware, the legislature is considering some changes to the various loan program requirements.

The Labor and Commerce Committee will consider various amendments to the statutory loan provisions and a copy of your message has been sent to Labor and Commerce Chair Vern Hurlbert. If you have additional information that you would like to provide, I urge you to contact Representative Hurlbert at Pouch V, Juneau, 99811.

Your comments have been noted and I will consider them carefully before taking any action on legislation which might affect these state programs.

Again, thanks for your input.

Sincerely,

Sally

Dear Barry,

Thank you for your comments concerning Senate Bill 148.

Senate Bill 148 is in House Labor & Commerce so I am sending Labor & Commerce Chair Vern Hurlbert a copy of your message. He can then use it as backup for committee deliberations. If you have further comments on this piece of legislation, I urge you to contact Representative Hurlbert at Pouch V, Juneau 99811. Rest assured, I will take your comments into consideration when this bill comes to the House floor.

Again, thanks for your input!

AMBA
ALASKA MORTGAGE BANKERS ASSOCIATION
ANCHORAGE, ALASKA

April 16, 1981

The Honorable Vernon Hurlbert
Alaska State House of Representatives
Pouch V
State Capitol Building
Juneau, Alaska 99811

Dear Representative Hurlbert:

The Alaska Mortgage Bankers Association has reviewed CS for Senate Bill No. 148. Section 44.47.385. Eligible Locations. This section appears to have the intent to make financing through the nonconforming Housing Loan Fund available only in areas with population of 3,500 or less. Such action would appear to be inequitable to areas of Alaska such as Anchorage, Fairbanks, Juneau, Ketchikan, Kodiak, the Kenai Peninsula, Mat-Su Borough, etc.

We strongly recommend loan programs funded by the State be available to residents of all areas.

Sincerely,

Lynn Manley
President

M E M O R A N D U M

TO: Honorable Jim Duncan, Speaker
Alaska House of Representatives

FROM: Milt Barker, Fiscal Analyst MB
Legislative Finance Division

SUBJECT: Working Capital, Inventory, and Refinance Loans

The policy of the small business loans programs while it has been under the Department of Commerce has been to not make loans for the purpose of working capital, inventory, or refinancing. A very minor portion of a loan made for other purposes, i.e., a new business or a business expansion, has been allowed on occasion for such purposes.

In the last 8 years, about five or six inventory loans have been made against a pledge of real property or equipment; no inventory loans were made against inventory.

During the same period, no straight working capital loans were made. A few loans for construction or equipment allowed $5,000 to $10,000 for working capital.

During the same period, a handful of refinancing loans were done to avoid bankruptcy or permit expansion. In the case of expansion, no refinancing actually was done with State funds because the bank was required to participate in the new loan in an amount equal to its prior loan plus 10% of the expansion. No equity extraction was permitted in any case.

Even if it is desired that AIDA make working capital, inventory, or refinancing loans, it is not necessary for the State to subsidize such loans to be able to offer the borrower a reduced interest cost. The IRS statutes permit up to 10% of an tax-exempt bond issue to be used for non-tax-exempt purposes. Thus, if AIDA plans $400 million in

tax-exempt bonding for qualified projects, they could instead issue $444 million and have $44 million available for working capital, inventory, and refinancing loans (these purposes are not otherwise eligible for tax-exempt bonding).

It has been suggested that AIDA could offer these loans at a reduced interest cost by funding them from taxable bonds. The taxable bond rate is currently several points below the prime rate of banks. These loans generally pay prime plus 2%, so there could be a four to five percent reduction in interest cost for borrowers paying the taxable bond rate.

However, borrowing long and lending short is not sound. If interest rates fall, new working capital and inventory loans will be made from repayments on the initial loans at lesser rates than the bonds which will still be outstanding.

MBB/pw

DIVISION OF HOUSING ASSISTANCE LOANS

The Division of Housing Assistance in the Department of Community and Regional Affairs was established through passage of Senate Bill No. 1 during the 1980 Legislative Session. The Division is responsible for administering the Nonconforming Housing Loan Program, which will provide monies from the Nonconforming Housing Loan Fund to be used for the purchase of (1) nonconforming housing mortgage loans; (2) loans for building materials for nonconforming housing; and (3) loans made for renovations or improvements to existing nonconforming housing. $10 million has been appropriated from the General Fund for the program's first year of operation. The loan money is to be distributed on an equitable and statewide basis.

"Nonconforming Housing" under this program, is defined as housing that does not meet the standards established by national and state codes regarding construction practices or minimum space requirements, or normal utilities, or normal title in fee simple ownership. Housing must meet minimum standards of structural integrity and be devoid of any conditions that are a serious hazard to physical safety.

The Nonconforming Housing Loan Program has been designed to fulfill the need of individuals for obtaining housing in all geographical areas of the State of Alaska. A major objective of the Division of Housing Assistance is to accomodate the need for safe and adequate housing in the rural areas of the State. Many individuals living in the more remote locations of Alaska have in the past, been unable to obtain financing for housing because of geographical constraints, and the inability of other lending institutions to serve these areas. The Division, in an effort to serve the rural areas, will be establishing four field offices to be located in Kotzebue, Bethel, Dillingham and Nome. These offices will be staffed by loan information officers who will be trained to assist individuals seeking a Nonconforming Housing Loan, as well as providing comprehensive loan information on all state loan programs.

TYPE OF LOAN	Maximum Loan Amount	Loan to Value Ratio	Interest Rate	Maximum Term
Single Family (non-veteran)	147,750	95%	10%	30 Years
Single Family (veteran)	147,750	95%	9%	30 Years
Duplex (non-veteran)	189,000	95%	10%	30 Years
Duplex (veteran)	189,000	95%	9%	30 Years
Rural/Remote Areas Single Family	125,500	95%	8 3/4%	30 years
Rural/Remote Areas Duplexes	160,000	90%	8 3/4%	30 Years

TERMS OF LOAN:

1. Must be for purchase of an existing house for owner occupancy
2. Loan to value ratio will be determined by the market value of the property securing the mortgage as established by an appraiser or the purchase price of the property whichever is lower.
3. Maximum term of the loan shall not exceed 30 years or 80% of the remaining physical life of the property
4. Loans are assumable.
5. Where possible, fire insurance will be required.

BORROWER ELIGIBILITY:

1. A person is eligible under the nonconforming housing program for a residential mortgage loan to finance the purchase of a single family or duplex building which must be designed for residential use and intended as the principal residence of the borrower.
2. There are no maximum income limits.
3. The borrower must have sufficient income to meet debt service payments, heating and utility payments, plus normal living expenses.

MINIMUM CONSTRUCTION STANDARDS: are established as the construction standards which in the opinion of the Division are acceptable within the normal construction standards which will permit water holding tanks, individual water and sewage haul systems, on-site water and sewer systems, foundation variations and other deviations as specific engineers certification that the characteristics of such physical construction will not impair the health or safety of the occupants of the residence. The Division will require as a condition to its purchasing, a mortgage loan, a waiver and release from each borrower that the Division is not responsible for any failure of the residence to meet normal minimum construction standards.

SECURITY FOR LOAN: made to a purchaser of an existing house shall consist of a deed of trust and evidence that the land is conveyed in fee simple ownership. If land is restricted native allotment, then security shall consist of a deed of trust and an executed leasehold which must exceed the loan term by at least 10 years.

HOW TO APPLY: eligible borrowers may contact local lending institutions to process their loan applications.

RURAL/REMOTE AREA LOANS: are loans for residences located in areas of the State not connected by road or rail to Anchorage or Fairbanks, or serviced by the state marine highway system, and located in a community having a population of 2200 or less.

RENOVATION/IMPROVEMENT LOANS OR BUILDING MATERIAL LOANS: are available to homeowners to upgrade their existing homes. Renovation work shall meet all applicable building codes. Applications for a loan shall be submitted through a lending institution and shall include plans and specifications of work to be done, cost estimates, and properly executed contracts for the proposed renovation work.

Borrowers must have sufficient income to meet all housing expenses plus normal living expenses.

ALASKA DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

DIRECTORY

BANKS & FINANCIAL INSTITUTIONS

Charles R. Webber, Commissioner
Department of Commerce
& Economic Development

Julius J. Brecht Director
Division of Banking, Securities,
Small Loans & Corporations

APRIL 1980

PREFACE

The Division of Banking, Securities, Small Loans and Corporations charters and supervises state-chartered commercial banks, mutual savings banks, savings and loan associations, and trust companies; registers and examines bank holding companies, licenses and examines small loan offices and premium finance companies and filings under the Model Foreign Bank Loan Act.

Currently, there are six state-chartered commercial banks, two mutual savings banks, two state-chartered savings and loan associations and one trust company with banking privileges. These institutions operate a total of forty-eight offices in the State as of this date.

Total assets for all banks in Alaska were $2,248,372 as of December 31, 1979, which represents an increase of $115,319,000 over last year. The total assets of all state-chartered banks and trust companies of that date were $824,441,000 which represents a 13.8 percent increase over last year. Approximately 37 percent of the total assets of all banks and trust companies are held in state-chartered institutions, which represents a 3 percent increase over last year. With the conversion of one national bank in February 1980, approximately 40 percent of the total assets of all banks and trust companies are held in state-chartered institutions.

This directory updates the one published last year and is designed to provide a comprehensive listing of all state-chartered banks, national banks, state and federal savings and loan associations, small loan and premium finance companies, and branch offices that are approved and operating in the State of Alaska at the time of publication.

It is our hope that the information will be helpful to you. Your suggestions for additions or corrections to the information contained in this directory would be appreciated. Next year the division will publish the directory incorporating the changes and improvements, as necessary.

Additionally, two state-chartered savings and loan associations are in their formation stages, but had no significant effect on deposit or loan volume as of year-end.

Please feel free to make as many copies of the directory as you need.

March 10, 1982

Dear :

As a member of the medical community, you may be interested in a bill I am sponsoring that would change portions of the law relating to the Medical Indemnity Corporation of Alaska.

I believe Senate Bill 548 makes several technical changes that would make MICA more competitive and benefit its policy holders.

First, it would remove uncertainty over the floating premium rate relating to malpractice insurance. Currently, the director of insurance can increase the premium retroactively from zero to 150 percent, depending on the risk factor. My bill gives the director the authority to fix the rate at a prudent level, so that the physician, when he signs a contract, knows in advance the maximum level of increase in his policy.

Second, Senate Bill 548 gives MICA the authority to pick up claims handled by a prior insurance company, so that the physician is covered at all times.

Third, the bill would cover related malpractice liabilities. For example, a medical facility would be protected against a patient who falls and breaks a leg in the facility and claims the staff, in some way, was negligent.

If Senate Bill 548 interests you, I would suggest you contact the Senate Finance Committee and urge co-chairmen Ed Dankworth and Don Bennett to schedule the bill for public hearings.

If I can be of any further assistance, don't hesitate to contact me in Juneau.

Sincerely,

Mike Colletta

Juneau, Alaska 99811

CS SB 548; Sectional Analysis:

"An act relating to the Medical Indemnity Corporation of Alaska"

Section 1): Amends As 21.88.030(a)(3)to read: (3) Two professionals form the insurance industry who are authorized to do business in the State. The current statute reads "insurance companies authorized" and the proposed change would allow for persons who are agents or brokers (insurance industry professionals) to have board membership.

Section 2): Amends AS 21.88.050(a)(1) provides for a substantive change to permit "tail coverage" (retroactive insurance) to cover malpractice claims. New language states: at the option of the corporation, if approved by the director, and for an additional premium the contract may cover claims against the physician or hospital that arise out of professional services performed by the physician for any period before the contract is issued except that coverage will not be provided for a claim already filed or of which the physician or hospital had or reasonably should have had notice at the time the retroactive insurance was purchased.

Section 3): Amends As 21.88.050 (b) (3): Provides coverage to insureds for other hazards when approved by the director; Encompasses insurance coverage for premisses liability for circumstances in which an injury occurs on the premisses as a result of "an ommission of health care" by a physician or medical staff. Example: Inadvertantly, the rail on a hospital bed is left down, and a patient sleeping under medication falls form the bed, injuring himself on the premisses. The injury resulted from an "omission in health care" by the attending nurse, and should be covered as such.

Section 4): Repeals and reenacts AS21.88.050(b)(12) to extend coverage to a person, entity, or facility that renders health care services in the state under the supervision of a physician. Expanded coverage for health care providers such as "bush medicine teams" who don't ordinarily fall within the conventional definition.

Section 5: Repeals and reenacts AS21.88.080 (17): Major change allows for a sliding

scale" assessment levied upon insureds in the event that the earned premiums for any given year are less than the incurred claims, claim expenses, underwriting expenses, and reserves. Presently, by statute, the director of the Division of Insurance must assess 150% on the premiums for all insureds if the earned premiums fall beneath incurred claims and expenses. Although this condition has never occurred, if it were to happen in the future, and if the director determines there is sound actuarial basis for the extinguishment of the assessment, the director would be able to extinguish all or a portion of the assessment.

Section 6: Amends AS 21.88.900 (17)(a) Deletes the phrase (DURING THE SAME PERIOD OF CONTINUOUS COVERAGE) to provide consistency throughout the MICA statutes for the ability to offer "tail coverage" (retroactive insurance) to insureds to cover claims which occurred prior to MICA coverage.

Section 7: Relates to the purpose of the bill which would allow MICA to remain more competitive within the marketplace and better fulfill its obligations to the medical community.

Section 8: Amends section 21(b), CH 177, SLA 1978; Technical change to permit "tail coverage" through the deletion of the following language: (WHICH OCCUR AFTER THE EFFECTIVE DATE OF THIS ACT).

Additional Information: The Division of Insurance estimates there are 400 licensed physicians in the State, including part time and retired physicians. There are presently 137 MICA insured physicians, with 33 new enrollees this quarter, demonstrating more faith among the medical community in the program.

TO: Representative Terry Martin, Chairman
House Labor & Commerce Committee

FROM: Senator Bob Mulcahy

SUBJ: SB 552

DATE: March 24, 1982

This bill will exempt certain employees of non-profit educational or child care facilities who are required to reside year-round at the facility from the Alaska Wage and Hour Act.

This is needed to solve certain conflicts with the Wage and Hour Act, and is patterned after federal law, United States Code 29:213 (24), which is enclosed along with other background material.

Thank you.

Baptist
Mission P. O. Box 785, Kodiak, Alaska 99615

February 22, 1981

Senator Bob Mulcahy
Pouch V (MS 3100)
Juneau, Alaska
99811

Dear Bob:

Thank you for the time to took with me, while I was in Juneau, to discuss possible legislation to ease the difficulty of wage and hour pay for employees who are working in a program such as we have here at the Mission.

The labor law as outlined in the United States Code 29:213 (24) is a good starting point for similar state legislation. As discussed, the only shange that would need to be made would be in the first sentence. It would need to read "...a non-profit educational and/or child care institution...".

The State Department of Labor said that the egemption would need to go in Sec. 23.10.055 of the Alaska Statutes.

I believe the base salary figure given in the Federal exemption should be raised in the State exemption from $10,000. to $15,000.

If I can be of any help to you or you need any information in support of such an exemption, please let me know. I am willing to travel to Juneau to testify concerning such legislation.

I really appreciate all the effort you have put forth for us.

Cordially,

Dave Cook

Representative Fred Zharoff
Senator Glenn Hackney
Bouch V (MS 3100)
99811

Dear Friend:

Robert L. Childs wrote you last May 13, 1980 that the DHSS raised the issue of minimum wage and our complicance to the regulation. DHSS did make it an issue in the final audit report for Kodiak Baptisi Mission FY 79.

We are now in the process of agreeing to a voluntary audit to be in compliance with the minimum regulations. However, I believe that the arbitrary drawing of lines dividing on/off duty hours as required by minimum wage requirements is not conducive to the effectiveness of our program. The drawing of these lines also is the beginning of the disintegration of a lifestyle that is a part of our treatment program.

The Federal Government recognizes the difficulty involved with minimum wage and "live-in" personnel involved in child-care. I have enclosed a copy of the Federal regulation which does not provide complete exemption but a different compensation method. I would appreciate it if such a regulation could be established for Alaska Statutes so effective child-care programs do not have to be compromised.

I appreciare the efforts extended on our behalf last spring.

Cordially,

David L. Cook

Mr. Michael Thill
Senate Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. ~~Thill~~ Michael:

Reference our discussions on Senate Bill No. 552, I would recommend the following language for Section 1, as Exemption Number 12 to AS 23.10.055.

> "An employee or an employee and spouse employed by a non-profit educational or child care facility to serve as a parent or parents of children while the children are in residence at the facility, if the employee resides in the facility and is compensated on a cash basis at an annual rate of not less than $5,000 exclusive of room and board, or if the employee and spouse reside in the facility and are together compensated on a cash basis at an annual rate of not less than $10,000 exclusive of room and board."

My apologies for the delay in preparing this exemption. I did attempt other language only to create more confusion. Call if you have questions.

Sincerely,

Judy

IN THE SENATE

BY RAY AND DANKWORTH

HOUSE COMMITTEE SUBSTITUTE
FOR
SENATE BILL NO. 611

IN THE LEGISLATURE OF THE STATE OF ALASKA
TWELFTH LEGISLATURE - SECOND SESSION
A BILL

For an Act entitled: "An Act revising the criminal penalties for unlawful operation of an aircraft."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF INTENT CONCERNING CHAPTERS 30 & 35 OF TITLE 2, ALASKA STATUTES. It is recognized by the Legislature, that from time to time certain Statutes require revision in order that they comply with Federal provisions, state of the art and public concern and safety. For these reasons, the intent of the Legislature in this bill is to make those revisions to the two above noted Chapters of Alaska Statutes which will at once cause them to operate in concert with applicable Federal Aviation Regulations, actual operating characteristics of the aircraft and aircrews involved, and to focus attention on the several areas of violation which the Legislature perceives as areas of major public concern. The Legislature recognizes that Air Commerce is an invaluable portion of the activities of the State, but that safety and operations of those aircraft so involved are such that without a high degree of professionalism and carefully prepared and enforced controls, the public is hopelessly at the mercy of the various operators. Therefore the following provisions are hereby enacted to provide workable statutes which do not provide duplication of penalties without genuine purpose.

* Section 2 AS 02.30.010 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 3. AS 02.30.030 (a) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 4. AS 02.30.030 (b) is amended to read:

Sec. 02.30.010 (a) No person may operate an aircraft occupied by a crew member [or passenger] who is obviously under the influence of intoxicating intoxicating liquor or [habit-forming] drugs.

* Section 5. AS 02.30.030 (c) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 6. AS 02.30.030 (d) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 7. AS 02.30.040 is repealed and reenacted to read:

Sec. 02.30.020. PENALITIES A person violating AS 02.30.010 shall be guilty of a class B misdemeanor.

* Section 8. AS 02.35.010 is amended to read:

Sec. 02.35.010. Federal law followed. It is declared that the policy, principals, and practices established by the United States Air Commerce Act of 1958 [1926], and all amendments to it are adopted and extended and made applicable to cover all air traffic in this state, so far as not covered by federal law.

* Section 9. AS 02.35.020 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 10. AS 02.35.030 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 11. AS 02.35 040 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 12. AS o2.35.050 is repealed effective June 1. 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 13. AS 02.35.060 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 14. AS 02.35.070 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 15. AS 02.35.080 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 16. AS 02.35.090 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.100 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.110 is amended to read:

Sec. 02.35.020. Emergency rations and equipment. (a) No airman may make a flight inside the State with an aircraft unless emergency equipment is carried as follows:

(1) The minimum equipment to be carried during the summer months is as follows:

(A) food for each occupant sufficient to sustain life for two weeks;

(B) one axe or hatchet;

(C) One first aid kit <u>with capacity for each passenger and crewmember carried, as stated by the kit manufacturer</u>;

(D) one pistol, revolver, shotgun or rifle, and ammunition for same <u>in the following minimum quantities: pistol or revolver: 50 rounds shotgun or rifle: 20 rounds</u>;

(E) one small gill net, and an assortment of tackle such as hooks, flies, lines, sinkers etc.;

(F) one knife <u>with a blade at least 5" long</u>;

(G) [two small boxes of matches] <u>two waterproof containers of matches each containing at least 25 matches, or equal</u>;

(H) one mosquito headnet for each occupant;

(I) [two] four small signaling devices [such as] to include 2 colored smoke bombs, [railroad fuses] and 2 colored rocket or flare devices or Very pistol shells, in sealed metal containers, accompanied by the appropriate pistol or launching device.

(2) In addition to the above, the following must be carried as minimum equipment from October 15 to April 1 of each year:

(A) one pair of snowshoes or one pair of cross country skis with proper bindings, poles and boots;

(B) one sleeping bag;

(C) one wool blanket for each occupant over four years of age, for whom a sleeping bag is not provided;

(b) However, operators of multi-engine aircraft licensed to carry more than 15 passengers need carry only the food, mosquito nets and signalling equipment at all times other than the period from October 15 to April 1 of each year, when two sleeping bags, and one blanket for every two passengers shall be carried. All of the above requirements as to emergency rations and equipment are considered to be minimum requirements which are to remain in full force and effect, except as further safety measures may be from time to time imposed by the department, in the form of published regulations.

* Section 18. AS 02.35.115 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 19. AS 02.35.120 is repealed and reenacted to read:

Sec. 02.35.030. Penalties for violation of this chapter. A person who violates a provision of this chapter shall be guilty of a class B misdemeaner.

* Section 20. AS 02.35.130 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 21. AS 02.35.140 is amended by changing its identification to AS 02.35.040.

* Section 22. AS 02.35.150 is amended by adding a second paragraph to read:

AS 02.35.050 (b) "AIRCRAFT" is defined in this chapter means a device that is used or intended to be used for flight in the air, and includes helicopters, gyrocopters, airplanes, sailplanes and gliders.

RATIONALE' AND EXPLANATION

SEC. 02.30.010. Two-way radios required.

Inasmuch as this section refers to "Commercial" aircraft operations with passengers, the applicable portions of the FAR's are found in Part 135. We note that those commercial operations that do not carry passengers, are not covered in the present language, thus allowing training flights with crew or ferry flights in uncontroled airspace, and we feel that this is correct and needs no attention.

Part 135.157, however, provides that:

> *(a) No person may operate, under VFR, an aircraft carrying passengers at night, in a control zone or, except as provided in paragraph (c) of this section, over-the-top unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.*

This part goes on with additional, similar language for other conditions, as shown in parts (b) and (c), but they are redundant for these purposes.

RATIONALE': The FAR is much more comprehensive and far better wording. The State statute is vague and sloppy. As one simple example, almost no aircraft radio will work 50 miles on the ground, and no other provision is allowed in the State language. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

Finally, the effect of SB 611, as written, would add CRIMINAL penalties to what is basically a technical equipment area of concern. As a practical matter, all part 121 (airline) aircraft always comply. Additionally, it would be a rare situation to find a part 135 (air-taxi/Charter) operator without at least one such aircraft radio; they often have 2 or more!

SEC. 02.30.030. (a) Reckless operation.

This section is also found, almost verbatum in several FAR's, and is redundant.

Part 91.8, provides:

> *No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of the crewmember's duties aboard an aircraft being operated.*

Part 91.9, provides:

> *No person may operate an aircraft in a careless or reckless manner so as to endanger the life or property of another.*

RATIONALE': The FAR's more than adequately cover the problem and provide penalties for violation. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

If the desire is to provide stiffer penalties, then this may be accomplished by simply making reference to the specific FAR and provide Class A or B misdemeaner status.

Sec. 02.30.030 (b) (liquor or drugs)

The Alaska Airmen's Association and AOPA both heartily agree that aircrew members who violate this or parallel FAR's are a serious threat to public safety and are a discredit to an honorable profession. We have no objection to the State tacking on Criminal penalties to his portion.

We do however, have problems with the language of the present section, wherein

> *"No person may operate an aircraft occupied by a crew member or passenger who is obviously under the influence of intoxicating liquor or habit-forming drugs." (emphasis added)*

Part 91.11, provides:

(a) No person may act as a crewmember of a civil aircraft-

(1) Within 8 hours after the consumption of any alcoholic beverage;
(2) While under the influence of alcohol; or
(3) While using any drug that effects his faculties in any way contrary to safety.

(b) Except in an emergency, no pilot of a civil aircraft may allow a person who is obviously under the influence of intoxicating liquors or drugs (except a medical patient under proper care) to be carried in that aircraft. (emphasis added)

Part 135.115, provides:

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft it that person appears to be intoxicated.

(d) Each certificate holder shall, within 5 days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft. (emphasis added)

RATIONALE': Inasmuch as the FAR's are explicit and more comprehensive than the current State statute section, recommend they be the controling directive; especially in light of Sec. 02.35.010 Specifically adopting the FAR's for State compliance.

We do however, have difficulty in making it a CRIMINAL offence as relates to the passengers. Terms such as "obviously under the influence" also include those suffering a hangover from the previous night, and they do not offer a threat to the Public traveling aboard an aircraft. As a matter of fact, they are docile. Terms such as "appears to be intoxicated" and the like are often used in this context. We submit that rigid enforcement of this portion would, as a practical matter, cut air commerce in this state in half over night.

Recommend that the FAR's be adopted and that the more severe penalty for Air Crew members be adopted on its own.

Sec. 02.30.030 (c) (over water)

This section is more than adequately covered in the FAR's, with little confusion and excellent language:

Part 91.33 (11) provides:

If the aircraft is operated for hire over water and beyond the power-off gliding distance from shore, approved floatation gear readily available to each occupant, and at least one pyrotechnic signaling device. (is required)

Part 91.79 (a) provides:

Except when neccessary for takeoff or landing, no person may operate an aircraft lower than the following altitudes:

(a) ANYWHERE. An altitude allowing, if a power unit fails, an emergency landing without undue hazard to persons or property on the surface.

Part 135.167 provides:

No person may operate an aircraft in extended overwater operations unless it carries:

(note: This section is extremely long, and contains all manner of specific relations to rafts, floatation and signalling devices and the like. None of that is required here to make the point that there is no reference to any specific distances from land; only equipment required when flying off shore.)

RATIONALE': To begin with, the current State language, if enforced, would halt approximately 50% of the air commerce in the State immediately. Here are several obvious examples:

1. A single-engine land plane flying from Anchorage to Kodiak. (not uncommon)

To comply with this part, the aircraft would need to fly higher than 25,000 feet! Only those aircraft equipped with both turbochargers and pressurization could possibly comply.

2. A single-engine land plane flying from Anchorage to Juneau or Ketchikan. (not uncommon)

After Yakutat, heading southeasterly, the beach rapidly ends, replaced by beautiful mountains, covered with large trees, ending in rocks and surf. There is no beach; no "landing" is possible. One ditches in the Gulf of Alaska near shore and wades ashore with survival gear.

We feel that the Federal regulations more than adequately cover this contingency, with far better language, in all instances. Inasmuch as Sec. 02.35.010 adopts the FAR's for compliance by the State, it is redundant and confusing to establish still another, poorly worded criteria.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deleting the section.

Sec. 02.30.030 (d) (snow and ice)

This section is more than adequately covered by FAR's:

Part 135.85, provides:

(a) No pilot may take off an aircraft that has-

(1) Frost, snow, or ice adhering to any rotor blade, propeller, windshield, or powerplant installation, or to an airspeed, altitimeter, rate of climb, or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing control surfaces; or

(3) Any frost adhering to the wings, or stabilizing control surfaces, unless that frost has been polished to make it smooth.

(there are additional sections, but they are redundant for these purposes)

Part 91.209 provides virtually identical text.

RATIONALE': The FAA language is far more comprehensive. Inasmuch as Sec. 02.35.010 adopts the FAR's for State compliance, it is redundant and confusing to establish yet another, less comprehensive and confusing standard.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs to be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deletion of this section.

Good

Sec. 02.35.010 Federal law followed

This is an excellent section, and would and is referred to above and in other sections not herein noted. Unfortunately the United States Air Commerce Act of 1926 has been void since it was replaced with the 1958 edition. Recommend adoption of the current one.

Sec 02.35.040 Registration of Aircraft

This section provides that all the registration and documentation already required by applicable FAR's, and already on file with the FAA in Oklahoma City, and already available to the public upon request, and already printed in a government circular at least semi-annually, also be duplicated and filed with the Department of Transportation and Public Facilities.

We are unaware of <u>any</u> general aviation pilot who is aware of this provision or complies. We are unaware of any attempts by DOTPF to implement this section. We are unaware of any requirement for it. Recommend its deletion as an unnecessary, expensive and duplicating bureaucratic requirement with no valid requirement.

Sec. 02.35.050, Registration of Airmen

See section 02.35.040 above. Recommend deletion of this ineffective portion as well for the same reasons.

Sec. 02.35.060, 070 & 080.

See items above. <u>Recommend deletion of these sections</u>, which provide administrative control of the previous sections.

COMMENT: Inasmuch as these four (4) sections appear to have been in Public Law since 1949, and no attempt to comply has ever been initiated to our certain knowledge, this fact alone attests to the lack of requirement.

Sec. 02.35.090 License and permit to be exhibited on request.

Part 61.3, provides:

(a) No person shall act as pilot in command or in any other capacity as a required pilot flight crew member of a civil aircraft of United States registry unless he has in his personal possesion a current pilot certificate issued to him under this part.

(h) Each person who holds a pilot certificate, flight instructor certificate, medical certificate, authorization, or license required by this part shall present it for inspection upon request of the Administrator, an authorized representative of the National Transportation Safety Board, or any Federal, State, or local law enforcement officer.

Part 91.27, provides:

(a) Except as provided in part 91.23 (foreign aircraft), no person may operate a civil aircraft unless it has the following.

(1) An appropriate and current airworthiness certificate. Each U.S. airworthiness certificate used to comply with this subparagraph (except a special flight permit, a copy of the applicable operations specifications issued under 21.197(c) of this chapter, appropriate sections of the air carrier manual required by parts 121 or 127 of this chapter contianing that portion of the operations specificatiojs under 21.187(c), or an authorization under 91.45), must have on it the registration number assigned to the aircraft under part 47 of this chapter. However, the air worthiness certificate need not have on it an assigned special identification number before 10 days after that number is first affixed to the aircraft. A revised airworthiness certificate having on it an assigned special identification number, that has been affixed to an aircraft, may only be obtained upon application to an FAA flight standards district office.

(2) a Registration Certificated issued to its owner.

(b) No person may operate a civil aircraft unless the airworthiness certificate required by paragraph (a) of this section or a special flight authorization issued under 91.28 is displayed at the cabin or cockpit entrance so that it is legible to passengers or crew.

RATIONALE' Obviously the Federal language more than adequately covers the entire situation and others not even dreampt of by State officials. Recommend deleting it and relying on Sec. 02.35.010 for application of the FAR's in Alaska.

Sec. 02.35.100 Temporary permit.

This entire section covers an area expressly preempted by the Federal Government. There simply is no legal way for the State of Alaska to license pilots under any circumstances. This is 100% an FAA matter.

As a practicle matter, here is what would happen should there be an earthquake, major fire, flood or other State emergency: The authorized State official on the scene (Civil Defense Director, member of the National Guard etc), invoking whatever emergency authority may be available under other statutes, would notify the pilot/owner of an aircraft that it was required for service to say, send a generator to Bethel, evacuate something, haul medicine or supplies or the like. At that moment, the operator of the aircraft is under control and contract of the State of Alaska, and may operate any aircraft with no licenses at all.

He or she is operating in what is called the PUBLIC SERVICE, much the same as FAA pilots, military pilots, and even State pilots.

Recommend deletion of this entire section.

Sec. 02.35.110 Emergency rations and equipment.

This is an important part of the aviation Safety field in Alaska, and it should remain. There are, however, two (2) items which require updating:

Good

1. Item (2) (A) requires showshoes. We recognize that a pair of cross-country skis, poles and boots are superior to snowshoes for survival travel, and recommend addition of the skis as shown on the attached proposed amended bill.

2. Item (1)(D) requires a firearm and ammunition. While this is an excellent suggestion, there are two (2) problems with the provision:

   a. In most cases a hand-gun is not a suitable survival weapon. Of far more value would be a lightweight shotgun and a supply of slugs and shot. We will not, however, offer this as an amendment at this time, as we have been counseled that it may be a controversial enough issue to bog down passage of the more important safety items. We urge consideration, however.

   b. There is no specified amount of ammunition, and one round could qualify. Recommend a minimum amount such as 25 or 50 rounds.

Sec. 02.35.115 Downed aircraft transmitting devices. (ELT's)

Sec. 91.52, provides

(a) Except as provided in paragraphs (e) and (f) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c) and (d) of this section.

(b) To comply with paragraph (a) of this section, each U.S. registered civil airplane must be equipped as follows:

(1) For operations governed by the supplemental air carrier and commercial operator rules of part 121 of this chapter, or the air travel club rules of part 123 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicability requirements of TSC-C91;

(2) For charter flights governed by the domestic and flag air carrier rules of Part 121 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in

operable condition and meets the applicable requirements of TSO-C91;

(3) For operations governed by Part 135 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91; and

(4) For operations other than those specified in subparagraphs (1), (2) and (3) of this paragraph, there must be attached to the airplane a personal type or an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91.

(Note: there are 2 more pages of technical details that are not required to demonstrate sufficiency here.)

RATIONALE' There is obviously very complete and thorough Federal regulation to cover the installation, maintenance and operation of ELT's in all aircraft operations in this state; commercial and private. This is an area over which the state has no authority whatsoever, and where the state regulations CONFLICT with the appropriate Federal regulations.

Additionally, and as a much more practicle matter, one notes that under the FAR's, such ELT is inspected each year during the annual inspection of the aircraft under FAA criteria, and the aircraft is grounded if the ELT is not present, not in proper order or has an expired battery date. There is no such inspection system established or required under State authority.

OK Recommend that the item be deleted in its entirety and that reference to the FAR's via Sec. 02.35.010 for application in Alaska be sufficient.

Sec. 02.35.120, Penalties for violation of Chapter

maybe delete This section will be reduced in scope by the actions above. The only requirement for the section remaining in in those areas which the State desires to inflict CRIMINAL penalties on top of Federal penalties. These are reflected in the attached, proposed substitute bill.

Sec. 02.35.130, Penalty for iolation of 90 or 110 of this chapter.

Same as above.

Sec. 02.35.150, Deffinitions

Because of difficulties in interpretation, we suggest that "aircraft" and "airplane" be defined here precisely as they are in FAR's.

OK AIRCRAFT means: a device that is used or intended to be used for flight in the air, and when used in air traffic control terminology, may include the aircrew. (includes aircraft, helicopters, gyrocopters and all other heavier-than-air equipment, as well as gliders and sail planes)

AIRPLANE means: a divice such as above, but not including helicopters or gyrocopters.

GENERAL: Penalties under the FAR's are found in two (2) areas:

Sec. 609: wherein the Administrator has authority to revoke, suspend, or modify certificates. This includes pilot certificates, aircraft certificates and operator certificates. This is considered severe and serious penalty authority, and exceeds anything the State is empowered to do.

Sec. 901; wherein the FAA may impost Civil Penalties. Such penalties are limited in current law to $1,000 for each violation.

AIRCRAFT OWNERS AND PILOTS ASSOCIATION

The Honorable Terry Martin
State House of Representatives
The Behrends Building, Room 211
Pouch V, Juneau, Alaska 99 11
Interdepartmental mail stop: 3100

Atten: Ms Mary Isaacs 081-27

Dear Mary, 22 March 1982

Thank you so much for your call this morning concerning our interest in SB 611, the "Drunk Pilot Bill".
Yes indeed, I have made some input on the matter. I think that it swept through the Senate without comment because the bill is so simple and so short. There is no reference to airplanes or pilots, and I think most folks did what I did; put a copy off to the side to research at the "first spare moment". Well, the Associated Press did the basic research and it was their item in the paper that got our attention. We were first concerned because of two aspects of the report to the press:

a. The drunk pilot language currently on the books includes passengers under the influence, and they need to be separated because slapping a class A misdemeaner on a pilot with a hungover passenger is STEEP!

b. The report incorrectly stated that the criteria for a single engine aircraft offshore, related to "Fixed Gear". That would indicate that a retractible gear, single engine bird was o.k.

So the research began, and what to our wondering eyes appeared, but a whole raft of statutes dealing with aircraft and pilots, all of which needed complete overhaul! It is terrible, and in many cases, in direct conflict with the Federal Aviation Administration Regulations.

What I attempted to do was to re-write the two chapters of title 2 to fix every-thing and update it. As you can see from the package attached, the Alaska Airmen's Association has already endorsed the proposed changes. At this writing the Alaska Air Carriers Association is reviewing it, and preliminary indications this morning were that they would also endorse the proposal. The FAA Regional Counsel has a copy, at his request, and you may receive some input there, and if he does not generate it, you may consider asking for it.

I will be in Juneau from about noon on Thursday the 1st of April through 5 pm on Friday the 2nd, and will be pleased to visit with you and any staff or committee members on this bill. I will also be there to work on HB 634 and the new work in progress in Senator Mulcahy's Committee to increase the aviation fuel tax in support of the Alaskan Aviation Safety Foundation.

Thank you again; I look forward to seeing you all next week!

KENT LEE WOODMAN,
Regional Representative

encl: SB 611 package

Alaska Air Carriers Association

March 22, 1982

The Honorable Terry Martin
Chairman
House Commerce Committee
Pouch V
Juneau, AK 99811

RE: SB611

Dear Mr. Martin:

The Alaska Air Carriers Association supports the amendments to Title 2 prepared by the Aircraft Owners and Pilots Association.

AACA agrees that the entire Title 2, especially chapters 30 and 35, are in need of revision.

AACA is particuraly concerned that Sec. 02.30.030 as written in SB611 and Title 2 will have a severe impact on air commerce in Alaska. AACA believes limitations on overwater flight are covered in the Federal Air Regulations. AACA recommends deleting this section.

AACA is also concerned with the wording of Section 02.30.030(b) (liquor or drugs). Air carriers would find it difficult to enforce the prohibition on transporting passengers "obviously under the influence" of alchol or drugs.

The Aircraft Owner's and Pilots Association proposed several other important changed in Title 2.

AACA recommends that your committee adopt the proposed changes.

Sincerely,

Tulinda Deegan

THE HONORABLE RAMONA L BARNES
Chairperson, House Judiciary Committee
The Capitol Building, Room 122
Pouch V, Juneau, Alaska 99811

Atten: Mr Dave Stancliff

Dear Mr Stancliff, 06 March 1982

This letter is to confirm that the Alaska Airmen's Association, Inc. supports the position and the work done by the AOPA representitive on SB 611.

The entire Title 2 and especially chapters 30 and 35, were in need of work. As Mr Woodman has indicated, there certainly would not be 1 pilot in 50 that was aware of many of the requirements of the two chapters. Indeed, the DOTPF, even before it was emasculated by the present structure, never made any effort to establish the procedures, forms and formats for the various requirements under the current statute.

We suspect that had a pilot actually turned in certified copies of his aircraft registration, pilots license and the like, requesting his certified receipt, that the DOTPF would have been hard-pressed to develop any reasonable response. Similarly, the issuance of a temporary airmen's (pilot's) certificate in an emergency situation would certainly be a shock to them as well as to the FAA, who has the preemptive authority.

We are pleased that Mr Woodman has taken the time and effort to go through both chapters in detail and update them all at one massive effort, rather than just respond to what we might have perceived as a threat to our members and their operations from SB 611. In this way we feel that we have made a genuine effort to assist the State and the public by the effort.

Please call upon us if you should require additional materials or if you should have any questions. Thank you very much in advance for your assistance. I have taken the liberty of enclosing one of our membership applications.

Best personal regards,

JIM WOOD,
President

FEDERAL AVIATION ADMINISTRATION
Office of the Regional Counsel
701 C Street
Anchorage, Alaska 99501

068-23

Atten: Don Boberick

Dear Mr Boberick,

09 March 1982

Thank you so much for the convseration Friday concerning State House Bill 611 and its impact on Alaskan aircraft and airmen operations.

As you can see from the attached documents, which you requested, I undertook to do a complete review of the whole of Chapters 30 & 35 of Alaska Statutes Title 2. As you can also see, most of the work leans towards simple adoption of the applicable FAR's and away from any confusion with two sets of rules covering the same areas....one of which is weak.

The reception from Representative Romona Barnes' office to date has been excellent and I have high hopes that the proposed House Committee Substitute may be introduced at least similar to the attached. If this bill should make it through the House and be accepted by the Senate, it will go a long way towards cleaning up the Statutes, and at the same time give them the heavier penalties they felt they needed for drinking and flying.

As you can also see, the Alaska Airmen's Association has already endorsed the submittal. The Alaska Air Carriers Association is currently studying it and I anticipate similar endorsement. If you feel you can provide an FAA endorsement as well, then I am certain Representative Barnes will appreciate it very much and it will go a long way towards helping this bill through expediciously.

Good reading! and thank you again,

KENT LEE WOODMAN
Regional Representative

AIRCRAFT OWNERS AND PILOTS ASSOCIATION

THE HONORABLE RAMONA L BARNES
Chairperson, House Judiciary Committee
The Capitol Building, Room 122
Pouch V, Juneau, Alaska 99811

Atten: Mr Dave Stancliff 064-22

Dear Dave, 05 March 1982

This letter, with attachments, will confirm our several conversations, and provide the input to SB 611 from both the Alaska Airmen's Association (the largest general aviation organization in the State of Alaska, representing the interests of over 12,500 pilots) and the AOPA (the largest general aviation organization in the world).

We were alarmed by press reports of some of the impact of SB 611 on certain Alaskan flying operations, and this caused the research. First let me tell you that that research into Title 2 of Alaska Statutes was an eye-opener for me, a pilot in Alaska for over 20 years! Virtually every pilot I have spoken to had absolutely no knowledge of Alaskan flying regulations with the exception of 02.35.110; Emergency rations and equipment.

As it turns out, the Associated Press coverage of the intent and effects of the bill were incorrect, but we completed our researches in any event, with the idea of allowing this opportunity to present a complete review of the Statute and to update and fix it all in one shot. Attached to this letter are two documents:

a. A proposed amendment to SB 611, containing all the "repairs" we feel are required to update.

b. A description sheet providing all the rationale' and references for each of the proposed changes.

Thank you so much for the opportunity of visiting with you on the bill. It would be our pleasure to participate in teleconference, in-person testimony on the bill and/or subcommittee efforts to complete proper language for a substitute. Please be advised that we feel strongly enough about these provisions to lobby as required, and this is not casual input. After you have reviewed the materials herein, please comment on the timing and appropriateness of releasing it to the Senate sponsors so that they may be ready for joint committee. We intend to go public with the positions as required.

Dear Art:

Thank you for writing to me to inform me of some of the concerns you have with Senate Bill 611. I have talked with some people who are familiar with the area and they have indicated that they too have been concerned with the requirements that the proposed legislation would impose on pilots.

The bill is up for hearing in the House Labor and Commerce Committee on Thursday, March25, 1982. I have sent a copy of your letter to Representative Martin so that he, too, may be aware of your suggestions. You may wish to call him directly at 465-3783.

If I can be of further assistance, please don't hesitate to contact me.

Sincerely,

Patrick J. Carney
Representative

Representative Pat Carney
Pouch N
Wasilla, AK 99687

Dear Representative Carney:

Last week i read in the Anchorage Daily News that Senate Bill 611 recently passed had a stipulation and a stiff penality for flying a single engine wheel plane over water at a low altitude as to making it impossilbe if the engine quite and you could not glide to shore.

If this is so, I feel then the House should hold some hearings on this bill in both the Anchorage and Mat-Su Valley areas. Becuase flying between Point McKenzie and Anchorage fields a private plane has to go over or under Elmendorfs Airspace. Most small planes use what is called the Ship Creek departure and cross the inlet from the mouth of Ship Creek to Point McKenzie at the 600 foot level and use the same return. This route is flown many times a day. If these planes were required to climb over the military corridor, they would have to circle over Anchorage to get to the required altitude and this in turn will thoroughly conjest and already crowded air space. If the paragraph states as was stated in the News, I really don't see its reasoning for it.

Sincerely,

Arthur J. Petersen, Private Pilot

Thanks Pat

AIRCRAFT OWNERS AND PILOTS ASSOCIATION

THE HONORABLE RAMONA L BARNES
Chairperson, House Judiciary Committee
The Capitol Building, Room 122
Pouch V, Juneau, Alaska 99811

Atten: Mr Dave Stancliff

064-22

Dear Dave,

05 March 1982

This letter, with attachments, will confirm our several conversations, and provide the input to SB 611 from both the Alaska Airmen's Association (the largest general aviation organization in the State of Alaska, representing the interests of over 12,500 pilots) and the AOPA (the largest general aviation organization in the world).

We were alarmed by press reports of some of the impact of SB 611 on certain Alaskan flying operations, and this caused the research. First let me tell you that that research into Title 2 of Alaska Statutes was an eye-opener for me, a pilot in Alaska for over 20 years! Virtually every pilot I have spoken to had absolutely no knowledge of Alaskan flying regulations with the exception of 02.35.110; Emergency rations and equipment.

As it turns out, the Associated Press coverage of the intent and effects of the bill were incorrect, but we completed our researches in any event, with the idea of allowing this opportunity to present a complete review of the Statute and to update and fix it all in one shot. Attached to this letter are two documents:

a. A proposed amendment to SB 611, containing all the "repairs" we feel are required to update.

b. A description sheet providing all the rationale and references for each of the proposed changes.

Thank you so much for the opportunity of visiting with you on the bill. It would be our pleasure to participate in teleconference, in-person testimony on the bill and/or subcommittee efforts to complete proper language for a substitute. Please be advised that we feel strongly enough about these provisions to lobby as required, and this is not casual input. After you have reviewed the materials herein, please comment on the timing and appropriateness of releasing it to the Senate sponsors so that they may be ready for joint committee. We intend to go public with the positions as required.

IN THE SENATE

BY RAY AND DANKWORTH

HOUSE COMMITTEE SUBSTITUTE
FOR
SENATE BILL NO. 611

IN THE LEGISLATURE OF THE STATE OF ALASKA
TWELFTH LEGISLATURE - SECOND SESSION
A BILL

For an Act entitled: "An Act revising the criminal penalties for unlawful operation of an aircraft."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF INTENT CONCERNING CHAPTERS 30 & 35 OF TITLE 2, ALASKA STATUTES. It is recognized by the Legislature, that from time to time certain Statutes require revision in order that they comply with Federal provisions, state of the art and public concern and safety. For these reasons, the intent of the Legislature in this bill is to make those revisions to the two above noted Chapters of Alaska Statutes which will at once cause them to operate in concert with applicable Federal Aviation Regulations, actual operating characteristics of the aircraft and aircrews involved, and to focus attention on the several areas of violation which the Legislature perceives as areas of major public concern. The Legislature recognizes that Air Commerce is an invaluable portion of the activities of the State, but that safety and operations of those aircraft so involved are such that without a high degree of professionalism and carefully prepared and enforced controls, the public is hopelessly at the mercy of the various operators. Therefore the following provisions are hereby enacted to provide workable statutes which do not provide duplication of penalties without genuine purpose.

* Section 2 AS 02.30.010 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 3. AS 02.30.030 (a) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 4. AS 02.30.030 (b) is amended to read:

Sec. 02.30.010 (a) No person may operate an aircraft occupied by a crew member [or passenger] who is obviously under the influence of intoxicating intoxicating liquor or [habit-forming] drugs.

* Section 5. AS 02.30.030 (c) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 6. AS 02.30.030 (d) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 7. AS 02.30.040 is repealed and reenacted to read:

Sec. 02.30.020. PENALITIES A person violating AS 02.30.010 shall be guilty of a class B misdemeanor.

* Section 8. AS 02.35.010 is amended to read:

Sec. 02.35.010. Federal law followed. It is declared that the policy, principals, and practices established by the United States Air Commerce Act of 1958 [1926], and all amendments to it are adopted and extended and made applicable to cover all air traffic in this state, so far as not covered by federal law.

* Section 9. AS 02.35.020 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 10. AS 02.35.030 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 11. AS 02.35 040 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 12. AS 02.35.050 is repealed effective June 1. 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 13. AS 02.35.060 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 14. AS 02.35.070 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 15. AS 02.35.080 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 16. AS 02.35.090 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.100 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.110 is amended to read:

Sec. 02.35.020. Emergency rations and equipment. (a) No airman may make a flight inside the State with an aircraft unless emergency equipment is carried as follows:

(1) The minimum equipment to be carried during the summer months is as follows:

(A) food for each occupant sufficient to sustain life for two weeks;

(B) one axe or hatchet;

(C) One first aid kit <u>with capacity for each passenger and crewmember carried, as stated by the kit manufacturer</u>;

(D) one pistol, revolver, shotgun or rifle, and ammunition for same <u>in the following minimum quantities: pistol or revolver: 50 rounds shotgun or rifle: 20 rounds</u>;

(E) one small gill net, and an assortment of tackle such as hooks, flies, lines, sinkers etc.;

(F) one knife <u>with a blade at least 5" long</u>;

(G) [two small boxes of matches] <u>two waterproof containers of matches each containing at least 25 matches, or equal</u>;

(H) one mosquito headnet for each occupant;

(I) [two] four small signaling devices [such as] to include 2 colored smoke bombs, [railroad fuses] and 2 colored rocket or flare devices or Very pistol shells, in sealed metal containers, accompanied by the appropriate pistol or launching device.

(2) In addition to the above, the following must be carried as minimum equipment from October 15 to April 1 of each year:

(A) one pair of snowshoes or one pair of cross country skis with proper bindings, poles and boots;

(B) one sleeping bag;

(C) one wool blanket for each occupant over four years of age, for whom a sleeping bag is not provided;

(b) However, operators of multi-engine aircraft licensed to carry more than 15 passengers need carry only the food, mosquito nets and signalling equipment at all times other than the period from October 15 to April 1 of each year, when two sleeping bags, and one blanket for every two passengers shall be carried. All of the above requirements as to emergency rations and equipment are considered to be minimum requirements which are to remain in full force and effect, except as further safety measures may be from time to time imposed by the department, in the form of published regulations.

* Section 18. AS 02.35.115 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 19. AS 02.35.120 is repealed and reenacted to read:

Sec. 02.35.030. Penalties for violation of this chapter. A person who violates a provision of this chapter shall be guilty of a class B misdemeaner.

* Section 20. AS 02.35.130 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 21. AS 02.35.140 is amended by changing its identification to AS 02.35.040.

* Section 22. AS 02.35.150 is amended by adding a second paragraph to read:

AS 02.35.050 (b) "AIRCRAFT" is defined in this chapter means a device that is used or intended to be used for flight in the air, and includes helicopters, gyrocopters, airplanes, sailplanes and gliders.

RATIONALE' AND EXPLANATION

SEC. 02.30.010. Two-way radios required.

Inasmuch as this section refers to "Commercial" aircraft operations with passengers, the applicable portions of the FAR's are found in Part 135. We note that those commercial operations that do not carry passengers, are not covered in the present language, thus allowing training flights with crew or ferry flights in uncontroled airspace, and we feel that this is correct and needs no attention.

Part 135.157, however, provides that:

> *(a) No person may operate, under VFR, an aircraft carrying passengers at night, in a control zone or, except as provided in paragraph (c) of this section, over-the-top unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.*

This part goes on with additional, similar language for other conditions, as shown in parts (b) and (c), but they are redundant for these purposes.

RATIONALE': The FAR is much more comprehensive and far better wording. The State statute is vague and sloppy. As one simple example, almost no aircraft radio will work 50 miles on the ground, and no other provision is allowed in the State language. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

Finally, the effect of SB 611, as written, would add CRIMINAL penalties to what is basically a technical equipment area of concern. As a practical matter, all part 121 (airline) aircraft always comply. Additionally, it would be a rare situation to find a part 135 (air-taxi/Charter) operator without at least one such aircraft radio; they often have 2 or more!

SEC. 02.30.030. (a) Reckless operation.

This section is also found, almost verbatum in several FAR's, and is redundant.

Part 91.8, provides:

> *No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of the crewmember's duties aboard an aircraft being operated.*

Part 91.9, provides:

> *No person may operate an aircraft in a careless or reckless manner so as to endanger the life or property of another.*

RATIONALE': The FAR's more than adequately cover the problem and provide penalties for violation. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

If the desire is to provide stiffer penalties, then this may be accomplished by simply making reference to the specific FAR and provide Class A or B misdemeaner status.

Sec. 02.30.030 (b) (liquor or drugs)

The Alaska Airmen's Association and AOPA both heartily agree that aircrew members who violate this or parallel FAR's are a serious threat to public safety and are a discredit to an honorable profession. We have no objection to the State tacking on Criminal penalties to his portion.

We do however, have problems with the language of the present section, wherein

> *"No person may operate an aircraft occupied by a crew member or pas-*

Part 91.11, provides:

(a) No person may act as a crewmember of a civil aircraft-

(1) Within 8 hours after the consumption of any alcoholic beverage;
(2) While under the influence of alcohol; or
(3) While using any drug that effects his faculties in any way contrary to safety.

(b) Except in an emergency, no pilot of a civil aircraft may allow a person who is obviously under the influence of intoxicating liquors or drugs (except a medical patient under proper care) to be carried in that aircraft. (emphasis added)

Part 135.115, provides:

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft it that person appears to be intoxicated.

(d) Each certificate holder shall, within 5 days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft. (emphasis added)

RATIONALE': Inasmuch as the FAR's are explicit and more comprehensive than the current State statute section, recommend they be the controling directive; especially in light of Sec. 02.35.010 Specifically adopting the FAR's for State compliance.

We do however, have difficulty in making it a CRIMINAL offence as relates to the passengers. Terms such as "obviously under the influence" also include those suffering a hangover from the previous night, and they do not offer a threat to the Public traveling aboard an aircraft. As a matter of fact, they are docile. Terms such as "appears to be intoxicated" and the like are often used in this context. We submit that rigid enforcement of this portion would, as a practical matter, cut air commerce in this State in half over night.

Recommend that the FAR's be adopted and that the more severe penalty for Air Crew members be adopted on its own.

Sec. 02.30.030 (c) (over water)

This section is more than adequately covered in the FAR's, with little confusion and excellent language:

Part 91.33 (11) provides:

If the aircraft is operated for hire over water and beyond the power-off gliding distance from shore, approved floatation gear readily available to each occupant, and at least one pyrotechnic signaling device. (is required)

Part 91.79 (a) provides:

Except when neccessary for takeoff or landing, no person may operate an aircraft lower than the following altitudes:

(a) ANYWHERE. An altitude allowing, if a power unit fails, an emergency landing without undue hazard to persons or property on the surface.

Part 135.167 provides:

No person may operate an aircraft in extended overwater operations unless it carries:

(note: This section is extremely long, and contains all manner of specific relations to rafts, floatation and signalling devices and the like. None of that is required here to make the point that there is no reference to any specific distances from land; only equipment

RATIONALE': To begin with, the current State language, if enforced, would halt approximately 50% of the air commerce in the State immediately. Here are several obvious examples:

1. A single-engine land plane flying from Anchorage to Kodiak. (not uncommon)

To comply with this part, the aircraft would need to fly higher than 25,000 feet! Only those aircraft equipped with both turbochargers and pressurization could possibly comply.

2. A single-engine land plane flying from Anchorage to Juneau or Ketchikan. (not uncommon)

After Yakutat, heading southeasterly, the beach rapidly ends, replaced by beautiful mountains, covered with large trees, ending in rocks and surf. There is no beach; no "landing" is possible. One ditches in the Gulf of Alaska near shore and wades ashore with survival gear.

We feel that the Federal regulations more than adequately cover this contingency, with far better language, in all instances. Inasmuch as Sec. 02.35.010 adopts the FAR's for compliance by the State, it is redundant and confusing to establish still another, poorly worded criteria.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deleting the section.

Sec. 02.30.030 (d) (snow and ice)

This section is more than adequately covered by FAR's:

Part 135.85, provides:

(a) No pilot may take off an aircraft that has-

(1) Frost, snow, or ice adhering to any rotor blade, propeller, windshield, or powerplant installation, or to an airspeed, altitimeter, rate of climb, or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing control surfaces; or

(3) Any frost adhering to the wings, or stabilizing control surfaces, unless that frost has been polished to make it smooth.

(there are additional sections, but they are redundant for these purposes)

Part 91.209 provides virtually identical text.

RATIONALE': The FAA language is far more comprehensive. Inasmuch as Sec. 02.35.010 adopts the FAR's for State compliance, it is redundant and confusing to establish yet another, less comprehensive and confusing standard.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs to be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deletion of this section.

Sec. 02.35.010 Federal law followed

This is an excellent section, and would and is referred to above and in other sections not herein noted. Unfortunately the United States Air Commerce Act of 1926 has been void since it was replaced with the 1958 edition. Recommend adoption of the current one.

Sec 02.35.040 Registration of Aircraft

This section provides that all the registration and documentation already required by applicable FAR's, and already on file with the FAA in Oklahoma City, and already available to the public upon request, and already printed in a government circular at least semi-annually, also be duplicated and filed with the Department of Transportation and Public Facilities.

We are unaware of any general aviation pilot who is aware of this provision or complies. We are unaware of any attempts by DOTPF to implement this section. We are unaware of any requirement for it. Recommend its deletion as an unnecessary, expensive and duplicating bureaucratic requirement with no valid requirement.

Sec. 02.35.050, Registration of Airmen

See section 02.35.040 above. Recommend deletion of this ineffective portion as well for the same reasons.

Sec. 02.35.060, 070 & 080.

See items above. Recommend deletion of these sections, which provide administrative control of the previous sections.

COMMENT: Inasmuch as these four (4) sections appear to have been in Public Law since 1949, and no attempt to comply has ever been initiated to our certain knowledge, this fact alone attests to the lack of requirement.

Sec. 02.35.090 License and permit to be exhibited on request.

Part 61.3, provides:

(a) No person shall act as pilot in command or in any other capacity as a required pilot flight crew member of a civil aircraft of United States registry unless he has in his personal possesion a current pilot certificate issued to him under this part.

(h) Each person who holds a pilot certificate, flight instructor certificate, medical certificate, authorization, or license required by this part shall present it for inspection upon request of the Administrator, an authorized representative of the National Transportation Safety Board, or any Federal, State, or local law enforcement officer.

Part 91.27, provides:

(a) Except as provided in part 91.28 (foreign aircraft), no person may operate a civil aircraft unless it has the following.

(1) An appropriate and current airworthiness certificate. Each U.S. airworthiness certificate used to comply with this subparagraph (except a special flight permit, a copy of the applicable operations specifications issued under 21.197(c) of this chapter, appropriate sections of the air carrier manual required by parts 121 or 127 of this chapter contianing that portion of the operations specifications under 21.187(c), or an authorization under 91.45), must have on it the registration number assigned to the aircraft under part 47 of this chapter. However, the air worthiness certificate need not have on it an assigned special identification number before 10 days after that number is first affixed to the aircraft. A revised airworthiness certificate having on it an assigned special identification number, that has been affixed to an aircraft, may only be obtained upon application to an FAA flight standards district office.

(2) a Registration Certificated issued to its owner.

(b) No person may operate a civil aircraft unless the airworthiness certificate required by paragraph (a) of this section or a special flight authorization issued under 91.28 is displayed at the cabin or cockpit

RATIONALE' Obviously the Federal language more than adequately covers the entire situation and others not even dreampt of by State officials. Recommend deleting it and relying on Sec. 02.35.010 for application of the FAR's in Alaska

Sec. 02.35.100 Temporary permit.

This entire section covers an area expressly preempted by the Federal Government. There simply is no legal way for the State of Alaska to license pilots under any circumstances. This is 100% an FAA matter.

As a practicle matter, here is what would happen should there be an earthquake, major fire, flood or other State emergency: The authorized State official on the scene (Civil Defense Director, member of the National Guard etc), invoking whatever emergency authority may be available under other statutes, would notify the pilot/owner of an aircraft that it was required for service to say, send a generator to Bethel, evacuate something, haul medicine or supplies or the like. At that moment, the operator of the aircraft is under control and contract of the State of Alaska, and may operate any aircraft with no licenses at all.

He or she is operating in what is called the PUBLIC SERVICE, much the same as FAA pilots, military pilots, and even State pilots.

Recommend deletion of this entire section.

Sec. 02.35.110 Emergency rations and equipment.

This is an important part of the aviation Safety field in Alaska, and it should remain. There are, however, two (2) items which require updating:

1. Item (2) (A) requires showshoes. We recognize that a pair of cross-country skis, poles and boots are superior to snowshoes for survival travel, and recommend addition of the skis as shown on the attached proposed amended bill.

2. Item (1)(D) requires a firearm and ammunition. While this is an excellent suggestion, there are two (2) problems with the provision:

   a. In most cases a hand-gun is not a suitable survival weapon. Of far more value would be a lightweight shotgun and a supply of slugs and shot. We will not, however, offer this as an amendment at this time, as we have been counseled that it may be a controversial enough issue to bog down passage of the more important safety items. We urge consideration, however.

   b. There is no specified amount of ammunition, and one round could qualify. Recommend a minimum amount such as 25 or 50 rounds.

Sec. 02.35.115 Downed aircraft transmitting devices. (ELT's)

Sec. 91.52, provides

(a) Except as provided in paragraphs (e) and (f) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c) and (d) of this section.

(b) To comply with paragraph (a) of this section, each U.S. registered civil airplane must be equipped as follows:

(1) For operations governed by the supplemental air carrier and commercial operator rules of part 121 of this chapter, or the air travel club rules of part 123 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicability requirements of TSC-C91;

operable condition and meets the applicable requirements of TSO-C91;

(3) For operations governed by Part 135 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91; and

(4) For operations other than those specified in subparagraphs (1), (2) and (3) of this paragraph, there must be attached to the airplane a personal type or an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91.

(Note: there are 2 more pages of technical details that are not required to demonstrate sufficiency here.)

RATIONALE' There is obviously very complete and thorough Federal regulation to cover the installation, maintenance and operation of ELT's in all aircraft operations in this state; commercial and private. This is an area over which the state has no authority whatsoever, and where the state regulations CONFLICT with the appropriate Federal regulations.

Additionally, and as a much more practicle matter, one notes that under the FAR's, such ELT is inspected each year during the annual inspection of the aircraft under FAA criteria, and the aircraft is grounded if the ELT is not present, not in proper order or has an expired battery date. There is no such inspection system established or required under State authority.

Recommend that the item be deleted in its entirety and that reference to the FAR's via Sec. 02.35.010 for application in Alaska be sufficient.

Sec. 02.35.120, Penalties for violation of Chapter

This section will be reduced in scope by the actions above. The only requirement for the section remaining in in those areas which the State desires to inflict CRIMINAL penalties on top of Federal penalties. These are reflected in the attached, proposed substitute bill.

Sec. 02.35.130, Penalty for violation of 90 or 110 of this chapter.

Same as above.

Sec. 02.35.150, Deffinitions

Because of difficulties in interpretation, we suggest that "aircraft" and "airplane" be defined here precisely as they are in FAR's.

AIRCRAFT means: a device that is used or intended to be used for flight in the air, and when used in air traffic control terminology, may include the aircrew. (includes aircraft, helicopters, gyrocopters and all other heavier-than-air equipment, as well as gliders and sail planes)

AIRPLANE means: a divice such as above, but not including helicopters or gyrocopters.

GENERAL: Penalties under the FAR's are found in two (2) areas:

Sec. 609: wherein the Administrator has authority to revoke, suspend, or modify certificates. This includes pilot certificates, aircraft certificates and operator certificates. This is considered severe and serious penalty authority, and exceeds anything the State is empowered to do.

Sec. 901; wherein the FAA may impost Civil Penalties. Such penalties are limited in current law to $1,000 for each violation.

SEC. 02.30.010. Two-way radios required.

Inasmuch as this section refers to "Commercial" aircraft operations with passengers, the applicable portions of the FAR's are found in Part 135. We note that those commercial operations that do not carry passengers, are not covered in the present language, thus allowing training flights with crew or ferry flights in uncontroled airspace, and we feel that this is correct and needs no attention.

Part 135.157, however, provides that:

> *(a) No person may operate, under VFR, an aircraft carrying passengers at night, in a control zone or, except as provided in paragraph (c) of this section, over-the-top unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.*

This part goes on with additional, similar language for other conditions, as shown in parts (b) and (c), but they are redundant for these purposes.

RATIONALE': The FAR is much more comprehensive and far better wording. The State statute is vague and sloppy. As one simple example, almost no aircraft radio will work 50 miles on the ground, and no other provision is allowed in the State language. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

Finally, the effect of SB 611, as written, would add CRIMINAL penalties to what is basically a technical equipment area of concern. As a practical matter, all part 121 (airline) aircraft always comply. Additionally, it would be a rare situation to find a part 135 (air-taxi/Charter) operator without at least one such aircraft radio; they often have 2 or more!

SEC. 02.30.030. (a) Reckless operation.

This section is also found, almost verbatum in several FAR's, an redundant.

Part 91.8, provides:

> *No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of the crewmember's duties aboard an aircraft being operated.*

Part 91.9, provides:

> *No person may operate an aircraft in a careless or reckless manner so as to endanger the life or property of another.*

RATIONALE': The FAR's more than adequately cover the problem and provide penalties for violation. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

If the desire is to provide stiffer penalties, then this may be accomplished by simply making reference to the specific FAR and provide Class A or B misdemeaner status.

Sec. 02.30.030 (b) (liquor or drugs)

The Alaska Airmen's Association and AOPA both heartily agree that aircrew members who violate this or parallel FAR's are a serious threat to public safety and are a discredit to an honorable profession. We have no objection to the State tacking on Criminal penalties to his portion.

We do however, have problems with the language of the present section, wherein

> *"No person may operate an aircraft occupied by a crew member or passenger who is obviously under the influence of intoxicating liquor or habit-forming drugs." (emphasis added)*

(a) No person may act as a crewmember of a civil aircraft-

(1) Within 8 hours after the consumption of any alcoholic beverage;
(2) While under the influence of alcohol; or
(3) While using any drug that effects his faculties in any way contrary to safety.

(b) Except in an emergency, no pilot of a civil aircraft may allow a person who is obviously under the influence of intoxicating liquors or drugs (except a medical patient under proper care) to be carried in that aircraft. (emphasis added)

Part 135.115, provides:

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft it that person appears to be intoxicated.

(d) Each certificate holder shall, within 5 days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft. (emphasis added)

RATIONALE': Inasmuch as the FAR's are explicit and more comprehensive than the current State statute section, recommend they be the controling directive; especially in light of Sec. 02.35.010 Specifically adopting the FAR's for State compliance.

We do however, have difficulty in making it a CRIMINAL offence as relates to the passengers. Terms such as "obviously under the influence" also include those suffering a hangover from the previous night, and they do not offer a threat to the Public traveling aboard an aircraft. As a matter of fact, they are docile. Terms such as "appears to be intoxicated" and the like are often used in this context. We submit that rigid enforcement of this portion would, as a practical matter, cut air commerce in this State in half over night.

Recommend that the FAR's be adopted and that the more severe penalty for Air Crew members be adopted on its own.

Sec. 02.30.030 (c) (over water)

This section is more than adequately covered in the FAR's, with little confusion and excellent language:

Part 91.33 (11) provides:

If the aircraft is operated for hire over water and beyond the power-off gliding distance from shore, approved floatation gear readily available to each occupant, and at least one pyrotechnic signaling device. (is required)

Part 91.79 (a) provides:

Except when neccessary for takeoff or landing, no person may operate an aircraft lower than the following altitudes:

(a) ANYWHERE. An altitude allowing, if a power unit fails, an emergency landing without undue hazard to persons or property on the surface.

Part 135.167 provides:

No person may operate an aircraft in extended overwater operations unless it carries:

(note: This section is extremely long, and contains all manner of specific relations to rafts, floatation and signalling devices and the like. None of that is required here to make the point that there is no reference to any specific distances from land; only equipment required when flying off shore.)

RATIONALE': To begin with, the current State language, if enforced, would halt approximately 50% of the air commerce in the State immediately. Here are several obvious examples:

1. A single-engine land plane flying from Anchorage to Kodiak. (not uncommon)

To comply with this part, the aircraft would need to fly higher than 25,000 feet! Only those aircraft equipped with both turbochargers and pressurization could possibly comply.

2. A single-engine land plane flying from Anchorage to Juneau or Ketchikan. (not uncommon)

After Yakutat, heading southeasterly, the beach rapidly ends, replaced by beautiful mountains, covered with large trees, ending in rocks and surf. There is no beach; no "landing" is possible. One ditches in the Gulf of Alaska near shore and wades ashore with survival gear.

We feel that the Federal regulations more than adequately cover this contingency, with far better language, in all instances. Inasmuch as Sec. 02.35.010 adopts the FAR's for compliance by the State, it is redundant and confusing to establish still another, poorly worded criteria.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deleting the section.

Sec. 02.30.030 (d) (snow and ice)

This section is more than adequately covered by FAR's:

Part 135.85, provides:

(a) No pilot may take off an aircraft that has-

(1) Frost, snow, or ice adhering to any rotor blade, propeller, windshield, or powerplant installation, or to an airspeed, altitimeter, rate of climb, or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing control surfaces; or

(3) Any frost adhering to the wings, or stabilizing control surfaces, unless that frost has been polished to make it smooth.

(there are additional sections, but they are redundant for these purposes)

Part 91.209 provides virtually identical text.

RATIONALE': The FAA language is far more comprehensive. Inasmuch as Sec. 02.35.010 adopts the FAR's for State compliance, it is redundant and confusing to establish yet another, less comprehensive and confusing standard.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs to be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deletion of this section.

Sec. 02.35.010 Federal law followed

This is an excellent section, and would and is referred to above and in other sections not herein noted. Unfortunately the United States Air Commerce Act of 1926 has been void since it was replaced with the 1958 edition. Recommend adoption of the current one.

Sec 02.35.040 Registration of Aircraft

This section provides that all the registration and documentation already required by applicable FAR's, and already on file with the FAA in Oklahoma City, and already available to the public upon request, and already printed in a government circular at least semi-annually, also be duplicated and filed with the Department of Transportation and Public Facilities.

We are unaware of any general aviation pilot who is aware of this provision or complies. We are unaware of any attempts by DOTPF to implement this section. We are unaware of any requirement for it. Recommend its deletion as an unnecessary, expensive and duplicating bureaucratic requirement with no valid requirement.

Sec. 02.35.050, Registration of Airmen

See section 02.35.040 above. Recommend deletion of this ineffective portion as well for the same reasons.

Sec. 02.35.060, 070 & 080.

See items above. Recommend deletion of these sections, which provide administrative control of the previous sections.

COMMENT: Inasmuch as these four (4) sections appear to have been in Public Law since 1949, and no attempt to comply has ever been initiated to our certain knowledge, this fact alone attests to the lack of requirement.

Sec. 02.35.090 License and permit to be exhibited on request.

Part 61.3, provides:

(a) No person shall act as pilot in command or in any other capacity as a required pilot flight crew member of a civil aircraft of United States registry unless he has in his personal possesion a current pilot certificate issued to him under this part.

(h) Each person who holds a pilot certificate, flight instructor certificate, medical certificate, authorization, or license required by this part shall present it for inspection upon request of the Administrator, an authorized representative of the National Transportation Safety Board, or any Federal, State, or local law enforcement officer.

Part 91.27, provides:

(a) Except as provided in part 91.28 (foreign aircraft), no person may operate a civil aircraft unless it has the following.

(1) An appropriate and current airworthiness certificate. Each U.S. airworthiness certificate used to comply with this subparagraph (except a special flight permit, a copy of the applicable operations specifications issued under 21.197(c) of this chapter, appropriate sections of the air carrier manual required by parts 121 or 127 of this chapter contianing that portion of the operations specificatiojs under 21.187(c), or an authorization under 91.45), must have on it the registration number assigned to the aircraft under part 47 of this chapter. However, the air worthiness certificate need not have on it an assigned special identification number before 10 days after that number is first affixed to the aircraft. A revised airworthiness certificate having on it an assigned special identification number, that has been affixed to an aircraft, may only be obtained upon application to an FAA flight standards district office.

(2) a Registration Certificated issued to its owner.

(b) No person may operate a civil aircraft unless the airworthiness certificate required by paragraph (a) of this section or a special flight authorization issued under 91.28 is displayed at the cabin or cockpit entrance so that it is legible to passengers or crew.

RATIONALE' Obviously the Federal language more than adequately covers the entire situation and others not even dreampt of by State officials. Recommend deleting it and relying on Sec. 02.35.010 for application of the FAR's in Alaska.

Sec. 02.35.100 Temporary permit.

This entire section covers an area expressly preempted by the Federal Government. There simply is no legal way for the State of Alaska to license pilots under any circumstances. This is 100% an FAA matter.

As a practicle matter, here is what would happen should there be an earthquake, major fire, flood or other State emergency: The authorized State official on the scene (Civil Defense Director, member of the National Guard etc), invoking whatever emergency authority may be available under other statutes, would notify the pilot/owner of an aircraft that it was required for service to say, send a generator to Bethel, evacuate something, haul medicine or supplies or the like. At that moment, the operator of the aircraft is under control and contract of the State of Alaska, and may operate any aircraft with no licenses at all.

He or she is operating in what is called the PUBLIC SERVICE, much the same as FAA pilots, military pilots, and even State pilots.

Recommend deletion of this entire section.

Sec. 02.35.110 Emergency rations and equipment.

This is an important part of the aviation Safety field in Alaska, and it should remain. There are, however, two (2) items which require updating:

1. Item (2) (A) requires showshoes. We recognize that a pair of cross-country skis, poles and boots are superior to snowshoes for survival travel, and recommend addition of the skis as shown on the attached proposed amended bill.

2. Item (1)(D) requires a firearm and ammunition. While this is an excellent suggestion, there are two (2) problems with the provision:

   a. In most cases a hand-gun is not a suitable survival weapon. Of far more value would be a lightweight shotgun and a supply of slugs and shot. We will not, however, offer this as an amendment at this time, as we have been counseled that it may be a controversial enough issue to bog down passage of the more important safety items. We urge consideration, however.

   b. There is no specified amount of ammunition, and one round could qualify. Recommend a minimum amount such as 25 or 50 rounds.

Sec. 02.35.115 Downed aircraft transmitting devices. (ELT's)

Sec. 91.52, provides

(a) Except as provided in paragraphs (e) and (f) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c) and (d) of this section.

(b) To comply with paragraph (a) of this section, each U.S. registered civil airplane must be equipped as follows:

(1) For operations governed by the supplemental air carrier and commercial operator rules of part 121 of this chapter, or the air travel club rules of part 123 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicability requirements of TSC-C91;

(2) For charter flights governed by the domestic and flag air carrier rules of Part 121 of this chapter, there must be attached to the

operable condition and meets the applicable requirements of TSO-C91;

(3) For operations governed by Part 135 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91; and

(4) For operations other than those specified in subparagraphs (1), (2) and (3) of this paragraph, there must be attached to the airplane a personal type or an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91.

(Note: there are 2 more pages of technical details that are not required to demonstrate sufficiency here.)

RATIONALE' There is obviously very complete and thorough Federal regulation to cover the installation, maintenance and operation of ELT's in all aircraft operations in this state; commercial and private. This is an area over which the state has no authority whatsoever, and where the state regulations CONFLICT with the appropriate Federal regulations.

Additionally, and as a much more practicle matter, one notes that under the FAR's, such ELT is inspected each year during the annual inspection of the aircraft under FAA criteria, and the aircraft is grounded if the ELT is not present, not in proper order or has an expired battery date. There is no such inspection system established or required under State authority.

Recommend that the item be deleted in its entirety and that reference to the FAR's via Sec. 02.35.010 for application in Alaska be sufficient.

Sec. 02.35.120, Penalties for violation of Chapter

This section will be reduced in scope by the actions above. The only requirement for the section remaining in in those areas which the State desires to inflict CRIMINAL penalties on top of Federal penalties. These are reflected in the attached, proposed substitute bill.

Sec. 02.35.130, Penalty for violation of 90 or 110 of this chapter.

Same as above.

Sec. 02.35.150, Deffinitions

Because of difficulties in interpretation, we suggest that "aircraft" and "airplane" be defined here precisely as they are in FAR's.

AIRCRAFT means: a device that is used or intended to be used for flight in the air, and when used in air traffic control terminology, may include the aircrew. (includes aircraft, helicopters, gyrocopters and all other heavier-than-air equipment, as well as gliders and sail planes)

AIRPLANE means: a divice such as above, but not including helicopters or gyrocopters.

GENERAL: Penalties under the FAR's are found in two (2) areas:

Sec. 609: wherein the Administrator has authority to revoke, suspend, or modify certificates. This includes pilot certificates, aircraft certificates and operator certificates. This is considered severe and serious penalty authority, and exceeds anything the State is empowered to do.

Sec. 901; wherein the FAA may impost Civil Penalties. Such penalties are limited in current law to $1,000 for each violation.

FROM: Edward H. Hein EHH
Legislative Counsel

At the request of your administrative aide, Mary Isaacs, I have redrafted the committee substitute you requested for SB 630. As I pointed out in another memorandum today, the version you first submitted presented substantial legal and constitutional problems.

I have given you the State Affairs Committee version of the bill with the following changes:

1. Page 1, line 8: "AS 08.03 and" has been deleted because the bill no longer affects that chapter;

2. Page 1, line 17: "1985" was deleted because the continuation of a board or commission in this bill, which is essentially a "cleanup" bill to clarify the language of AS 44.-66.010, constitutes a violation of the single subject rule of Article II, Sec. 13 of the Alaska Constitution; and

3. Page 2, lines 14 - 16: the new language proposed in the State Affairs Committee version was deleted at your request.

SUBJECT: Sunset of state agencies, boards and commissions (HCS CSSSSB 630 (Labor and Commerce)

TO: Representative Terry Martin
Chairman, House Labor and
Commerce Committee

FROM: Edward H. Hein EH
Legislative Counsel

Enclosed is the draft committee substitute you requested for SB 630. This bill has two serious defects.

1. Sec. 1 of the bill extends the life of the Alcoholic Beverage Control Board, the state Board of Parole, and the Alaska Code Revision Commission. AS 44.66.060(e) provides that

> No more than one board, commission, or agency program shall be continued or reestablished in any legislative bill, and the board, commission or agency board or program shall be mentioned in the title of the bill.

This bill violates that section and, if challenged in court, the bill would therefore likely be struck down.

2. This began as a "cleanup" bill to clarify language of AS 44.66.010 and to make the language consistent with similar provisions in AS 08.03. The bill has now been turned into a substantive bill which continues or shortens the life of four boards or commissions. This is not reflected in the title of the bill, as required by Article II, Sec. 13 of the Alaska Constitution. More important, perhaps, the bill appears to be in violation of the single subject rule, Article II, Section 13 of the Alaska Constitution. The question of violation of the constitutional provision is a

matter ultimately determined by the Court. If a violation was found the act would be void.

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the legislative oversight procedures relating to state agencies, boards, and commissions under AS 08.03 and AS 44.66; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.66.010 is amended to read:

Sec. 44.66.010. TERMINATION OF STATE AGENCIES, BOARDS, AND COMMISSIONS. (a) A state agency, board, or commission [BOARDS AND COMMISSIONS] listed in this subsection is terminated on the date established by this subsection [EXPIRE ON THE DATE SET OUT AFTER EACH]:

(1) Alcoholic Beverage Control Board (AS 04.06.010) -- June 30, ~~1986~~ 1982; [1983]

(2) Alaska Transportation Commission (AS 42.07.011) -- June 30, ~~1983~~ [1982];

(3) State Board of Parole (AS 33.15.010) -- June 30, ~~1985~~ [1982]

(4) Alaska Public Utilities Commission (AS 42.05.010) -- June 30, 1985;

(5) (repealed)

(6) Alaska Council on Science and Technology (AS 44.21.241 - 44.21.255) -- June 30, ~~1985~~ 1986;

(7) Alaska Renewable Resources Corporation (AS 37.12.010) -- June 30, ~~1982~~ 1986;

(8) Alaska Code Revision Commission (AS 24.20.075) -- June 30, ~~1986~~ [1984];

(9) Rural Development Council (AS 44.47.160 - 44.47.190) -- June 30, 1987;

(10) Older Alaskans Commission (AS 44.21.200 - 44.21.240) -- June 30, 1985;

(11) Council on Domestic Violence and Sexual Assault (AS 18.66.010) -- June 30, 1985.

(b) Upon termination, a state agency, board, or commission listed in (a) of this section shall continue in existence until June 30 of the next succeeding year for the purpose of concluding its affairs. During this period, termination does not reduce or limit the powers or authority of the state agency, board, or commission.

(c) A state agency, board, or commission scheduled for termination under this chapter may be continued or reestablished by the legislature for a period not to exceed four years unless the state agency, board, or commission is continued or reestablished for a longer period under AS 44.66.050(e).

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

465-3678

DEPARTMENT OF LAW

POUCH KC – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3428

CRIMINAL DIVISION
PRETRIAL SERVICES SECTION

Feb. 15th 1982

The Honorable Robert Mulcahy
Chairman, Labor and Commerce Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Mulcahy:

In response to your request for a position on the proposed committee substitute for Sentate Bill 648 whereby the State of Alaska would assume the total cost of worker's compensation for individuals placed in community work service, the Department of Law supports the additional provision of the committee substitute.

In the memorandum of advise on the issue of liability for injuries to offenders performing community work service, dated February 4, 1982, and made available to your committee, analysis of the current provisions of the Worker's Compensation Act indicated that these offenders are excluded from worker's compensation coverage as they are not "employees" within the meaning of the Act. Exclusion of these offenders from coverage under the Act was problematic in that an offender injured in the performance of community work service could only recover damages for the injury by proving both fault and negligence in a common law tort suit action contrary to the underlying purposes of worker's compensation statutes. Additionally, in that this class of individuals is not within the coverage provisions of the Worker's Compensation Act, the exclusive remedy provisions (AS 23.30.055) are not applicable, thus greatly increasing the potential liability for employers in those instances where fault and negligence are proven. The original version of SB 648, requested by the governor at the behest of the Department of Law, attempted resolution by merely redefining "employee" for purposes of the Worker's Compensation Act to include offenders performing community work service. However, as was pointed out at hearings on SB 648 in your committee, merely redefining "employee" to include this class of individual could result in significant problems in implementation. Chief among these problems is the premimum rate that would be charged employers for worker's compensation coverage for offenders

performing community work service. In that offenders processed by the State into community work service perform a variety of functions, each of which may require a differing level of job injury risk (the method by which worker's compensation insurance premiums are determined), the result would be a separate risk premimum determination for each placement rather than a standardized risk premium that had been assumed to be the result. Alternatively, if placements were limited to a few risk classes, the ability of the community work service referral program to creatively place these offenders by matching their existing job skills or interest areas with community referral needs would be severely hampered. Similarly, the risk assessments are comparatively higher for certain job classes which positively impact a greater segment of a community than for other classes which do not; e.g., litter pickup along the highways commands a substantially higher premium than performing janitorial duties in a local agency.

This uncertainty of premium rates likewise results in a continued reticence on the part of agency-employers to accept such referrals, although these agency-employers derive a substantial benefit from the labor provided. Agencies accepting community work service referrals either would need to restrict the type of work to be performed or would have to budget uncertain amounts of funds to pay increased risk premiums should they determine in the course of the budget year that they could substantially benefit from another type of work. This uncertainty would result in the agency-employers realizing a substantially diminished benefit from the program.

The alternative to this legislation is the maintenance of the status quo, whereby the State would continue to assume the excess of any tort liability that would result from community work service placements. As this state of the law promotes lawsuits to enable recovery, and is an uncertain remedy for injured individuals, it belies the purposes of worker's compensation and is unacceptable to the Department of Law.

The proposed committee substitute appears to be the best alternative in terms of achieving statewide acceptance of the program, and thus meaningful implementation. With the proposed committee substitute no determination as to premium rates needs to be accomplished as the State is a self-insurer under the Worker's Compensation Act. As there won't be a variance in premium rates for the type of community work service assigned, the placements can continue to be creative, sensible and worthwhile. Furthermore, with over 2,000 referrals and 50,000 hours of community work service performed to date under the aegis of the State, we have not yet experienced any liability situations, thus making even a speculative cost of this assumption extremely low.

In conclusion, as a matter of strong public policy, the Department supports the proposed committee substitute and views it as a vehicle for uniform implementation of an innovative alternative in the criminal justice system. The speculative costs which attend this version are far outweighed by the benefits provided to both the recipients of the community work service and to the individuals performing it.

If you have further questions regarding this legislation, please feel free to contact me.

Sincerely,

WILSON L. CONDON

SUBJECT Liability During Performance of Community Work Service

A number of questions have been raised concerning the potential for liability for offenders who are placed in a community work service alternative at both the pretrial (diversion) or post trial (conviction) stages. These questions have primarily arisen as a result of a reluctance on the part of placement agencies to accept community work service referrals if there is an attendant assumption of liability on the part of the agency. Although placements made through the Department of Law's Pretrial Intervention Program (diversion) have not elicited the level of concern about liability that judicially authorized placements have, the liability issue is nonetheless of major concern in continuing an important component of the diversion program.

The liability issue is a double faceted question. First, what type of liability can potentially result, and to whom, for injuries to the offender in the course of performing community work service. Second, where does liability lie for injuries to others, or to property, for tortious conduct on the part of an offender during the performance of community work service. Resolution of these questions should facilitate implementation of the community work service alternative under AS 12.55.055.

During the last several months, I have worked with both the court system and the Division of Risk Management of the Department of Administration on these problems. I have additionally prepared and submitted legislation to ensure that offenders performing community work service are included within the coverage of the Worker's Compensation Act.

I. Factual Basis

An offender can be required to perform community work service in one of four ways: (1) attendant to a diversion agreement between the state and the offender for a felony or

misdemeanor offense; (2) attendant to a diversion agreement between a municipality and the offender for a misdemeanor offense; (3) resulting from a sentence for a felony offense pursuant to AS 12.55.015 (a)(6) and AS 12.55.055; and (4) resulting from a sentence for a misdemeanor offense pursuant to AS 12.55.015 (a)(6) and AS 12.55.055. This department's Pretrial Intervention Program administers the former three possibilities while having only peripheral involvement with the latter one.

To be eligible for pretrial diversion, an offender must be a first offender, or if previously convicted, the prior offense must be sufficiently in the past so as to be considered stale, and the prior conviction must be of a nature that when considered conjointly with the instant offense, it does not evince a pattern of habituation to crime. The offense charged must be a property crime or a drug offense, or, in rare situations a crime of domestic violence. All other violent crimes are excluded. In post-conviction situations, eligibility is determined by the sentencing judge, relying upon the presentence report prepared by probation personnel in the Division of Corrections for felony offenders. For misdemeanants, community work service is totally within the sentencing judge's discretion with no presentence reports or recommendations. There are no eligibility guidelines for post conviction community work service referrals.

All individuals referred to the Pretrial Intervention Program for community work service are subject to an intake interview. For state diversion referrals, this interview is in-depth and also serves as a screening device; for the other referrals, the interview is in the nature of matching the offender with appropriate community work. The majority of placements are with private, non-profit corporations, although a number are with state or municipal government agencies.

After placement, the Pretrial Intervention Program requires only that the agency report back that the offender is undertaking the requisite community work service on a satisfactory basis; the Pretrial Program does not supervise or otherwise control offenders in the performance of community work.

II. Liability for Injuries to Individuals Performing Community Work Service Resulting from "Employment" Related Accidents.

The first issue that needs to be resolved is whether offenders placed in community work service are "employees" within the meaning of AS 23.30.265(11). If so, they are then subject to the provisions of the Worker's Compensation Act, AS 23.30. This is an issue that has not been directly resolved by Alaska's courts, although there is sufficient precedent to provide considerable guidance on the question.

The definition of employee for purposes of AS 23.30 is not sufficiently clear in determining an offender's status as an employee. AS 23.30.265 provides:

> (11) "employee" means an employee employed by an employer as defined in paragraph (12);
>
> (12) "employer" means the state or its political subdivision or a person employing one or more persons in connection with a business or industry coming within the scope of this chapter and carried on in this state.

Previous opinions of this office delineated the test for an employee 1963 Op. of the Attorney General, No. 8. Citing both Larson, Workmen's Compensation, (1C, p. 8-1, §43 and p. 8-231, §47) and Ferrell v. Industrial Commission of Arizona 79 Ariz. 278, 288 P.2d 492, the opinion stated the rule that a contract of hire, expressed or implied, is essential to create the status of an employee generally, and the word "hire" connotes payment of some kind. This test was likewise utilized by the Alaska Supreme Court:

> The relationship of employer-employee can only be created by a contract which may be expressed or implied.

Solid Construction Co. v. Guarantee Ins. Co., 355 P.2d 389, 393 (Alaska 1960).

The existence of an employee-employer relationship is critical for unless that relationship exists between the offender and the placement agency, or the state, or both, then the exclusiveness of liability remedy provided in AS 23.30.055 is not applicable. The Supreme Court of Alaska has emphasized:

> . . .the [Worker's Compensation] act's coverage extend[s] only to persons occupying the status of an employee under either an express or implied contract of hire

City of Seward v. Wisdom, 413 P.2d 931, 939 (Alaska 1966). Further support for the "contract of hire" requirement is implicit in AS 23.30.020.

The elements of th contract of hire" concept were discussed in a subsequen opinion of this office on the issue of worker's compensation for state prisoners working voluntarily on governmental projects. 1965 Op. of the Attorney General, No. 8. After citing numerous authorities denying coverage to prisoners including a similar case before the Alaska Workmen's Compensation Board, the opinion found the lack of an employee-employer relationship when (1) there was an absence of any pecuniary remuneration for the services performed, and (2) the nature of the services performed were involuntary. In sum, for the establishment of an employee-employer relationship, a "contract of hire" encompassing (1) voluntary acts in return for (2) some type of remuneration needs to be present. See, Larson, §47 et seq.

In the instant case, remuneration can be found for both classes of offender performing community work service. For those individuals participating in the Pretrial Intervention Program where community work service is a portion of the offender's treatment plan, it can be said that the recompense realized in part for performance of community work service is the ultimate dismissal of criminal charges pending against the offender, a valuable, albeit unquantifiable, benefit. Similarly, those offenders sentenced to community work service under AS 12.55.015(a)(6) and AS 12.55.055 can be said to be receiving remuneration in the form of substituted or reduced periods of confinement. However, the absence of voluntariness in either instance precludes a conclusion that a contract of hire is present.

It is quite clear that offenders sentenced to community work service are not free to bargain and contract for their services. The apparent voluntariness present in the offender's choice to refuse to perform community work service when sentenced under AS 12.55.015(a)(6) and AS 12.55.055 is belied by the residual right of compulsion present with the sentencing authority. A refusal on the part of the

sentenced offender to perform community work service would most likely lead to the offender's incarceration, a significantly more onerous result.

Likewise, offenders in the Pretrial Intervention Program who "voluntarily" agree to perform community work service as part of an individualized treatment plan developed for them are free to negotiate the place and manner of performance of that obligation, but there is no voluntariness present with respect to what that performance will encompass and how long it will last. While participation in the Pretrial Intervention Program is clearly in the offender's best interest and entry is on a voluntary basis, the alternative to diversion, prosecution, belies a freedom for offenders to bargain and contract for their services.

Consequently, the lack of any express provision in the Alaska Worker's Compensation Act, AS 23.30, according offenders performing community work service the status of employees in conjunction with the absence of a true contract of hire between the offender and the state or a referral agency, precludes recovery for offenders performing community work service under worker's compensation. Absent coverage under the Worker's Compensation Act, an offender who is injured performing community work service must bring a common law action in tort to recover for injuries sustained.

III. Tort Liability

A determination of potential liability for tortious conduct occuring either by or to an offender is a much more difficult question. This is due to the large number of variations as to questions of fact that may occur in any given situation. As a matter of law, fact situations can be hypothesized which give rise to liability on the part of the state, political subdivisions of the state, placement agencies and the offender. Similarly, those situations can be altered to exclude tort liability as a matter of law for any of the potentially liable parties. Consequently, the tort liability issue should be resolved in a manner consistent with the legislative intent embodied in AS 12.55.055, that is, to institute a workable community work service program in the state. To this end, two approaches have been formally proposed.

A. HB 255 and SB 285. Under this proposed legislative solution, the state would automatically assume all liability

for tortious conduct to others, or to property, by an offender sentenced to community work service. This approach, however, would only include offenders sentenced by a court under AS 12.55.055, therefore excluding a large portion of offenders performing community work service under diversion agreements. It would additionally place the total financial burden upon the state, ignoring current levels of liability coverage maintained by political subdivisions of the state and non-profit corporations which serve as placement agencies and receive the benefits of the community work service. Moreover, it would hold the state strictly liable, irrespective of the conduct of the various parties involved.

B. Assumption of Excess Liability. The second, and preferable, alternative is that embodied in John Haywood's memoranda of November 20, 1981 and January 6, 1982, copies of which are attached. The Division of Risk Management has determined that it is appropriate for the state to assume all liability for tortious conduct in excess of the liability coverage currently provided by placement agencies. For private, non-profit organizations and political subdivision of the state serving as placement agencies currently providing liability coverage, there will be no change. Assumption of placement will not cause an increase in coverage, as the state assumes the excess. Similarly, for those private, non-profits not currently providing liability coverage, the state will assume any liability resulting from placements. This alternative eliminates the possibility of increased costs to placement agencies for accepting referrals while allowing those agencies to directly benefit from the community work service performed. It has the added advantage, however, of retaining the responsibility of those agencies for their interaction with and supervision of offenders performing community work service. Lastly, it eliminates any necessity for the state to underwrite the complete cost of the community work service program.

IV. Conclusion

The questions posed by the implementation of the community work service program are not insoluble. For tort liability, a change in policy as evidenced by Mr. Haywood's memoranda is sufficient, and is an equitable manner in which to ensure the proper functioning of the community work service program. For injuries sustained by offenders themselves,

a legislative resolution is necessary. This legislation has been submitted and we are working with the appropriate committees on it.

SUBJECT Community Work Service

This memo is to further clarify my letter of November 20, 1981 to Arthur H. Snowden regarding liability of the State for community work service. It is the intention of the Division that the coverage provided will extend likewise to community work service arranged by the Department of Law, Criminal Division, Pretrial Intervention Program.

I trust this clarifies this matter.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

This fiscal note provides that the state administrative costs for rehabilitation under the proposed AS 23.30.041 be paid from the Second Injury Fund. This includes the costs of four new positions, plus the cost of four existing positions which entails a transfer in funding source from General Funds to Second Injury Funds.

JUSTIFICATION:

It is the intent of the Legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to the worker's gross earnings at the time of the injury. The implementation of a delivery system to provide timely and adequate rehabilitation services is fundamental in meeting this objective.

The rehabilitation administrator is necessary to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

Extensive travel within the state is necessary to provide assistance to approximately 12,000 employers in developing programs for re-employment of injured workers and coordinating counselor services with workers, insurers/employers, labor unions, and rehabilitation providers.

9. Travel: $10,000 (20 trips @ $500 per trip)
10. Contractual: Space $3,100 (to be transferred to DOA)
    Auto Lease & Operating Costs $5,600
    Indirect (11.46% x 44,568 = $5,107)
    Other costs which include communications, equipment rental, etc., $1,800
11. Commodities: Cost per position

PROPOSAL FOR A DOCUMENTARY ON
ALASKA'S MINING HISTORY AND POTENTIAL

The American Mining Congress recently sponsored a survey of citizen attitudes towards mining. While only 16% of those polled felt at all familiar with mining, 43% believed it was damaging to the environment, 62% felt it was dangerous and unhealthy, and an incredible 96-97% felt mining was unnecessary to the national economy, unnecessary for the national defense and unnecessary to the quality of life.

As suggested by many industry spokesmen, such shockingly erroneous attitudes stem from the profound failure of America's educational system to teach its students the singular and immutable fact that modern civilization is made possible by, and remains dependent upon, the production and utilization of mineral resources. The resultant ignorance has fostered the misconception that mining is a dangerous and destructive enterprise that should be generally discouraged and locally forbidden. It is this ignorance which has allowed the piecemeal but cumulatively devastating withdrawal of public lands from mineral entry. It is this ignorance that has delivered to the country the specter of a national resource crisis.

The proposed documentary, which will be an accurate portrayal of historical and present mining activity in Alaska, will contribute to redressing this pervasive ignorance. It will show mines to people who have never seen a mine. It will take people underground. It will show them what a billion dollar orebody looks like in its natural disguise. They will be fascinated by a subject of which their only previous experience has been through souvenir shops and tourist displays. For the viewer, mining in Alaska will cease to be a cliched recitation of sourdough sagas and will begin to assume its true dimension and importance. The educational process will have begun.

The documentary will debut in October 1982 to the delegates of the American Mining Congress Convention, the foremost assembly of public and private industry personnel. At the most obvious level, the delegates will be as interested as anyone in the historical content of the film. Additionally, they will be professionally interested in the contemporary segments which will serve, without explicit overtures needed, a promotional function. And finally, the delegates will recognize and appreciate the value of the film as a much needed educational tool. The presentation to this forum of a stimulating and professional quality film will generate interest in the state's resources and create industry wide respect for the state as a good place to do business.

The documentary will be promoted and distributed for both statewide and national television broadcast. It will also be available for extensive use in schools, colleges, conferences and speaking presentations.

As it is felt that the highest and best purpose of this documentary will be for its educational value, two guidelines will be strictly followed to insure the acceptance of the film by the widest possible audience.

1. Within the documentary narrative, subjective opinions on highly controversial issues will not be endorsed.

2. To avoid the stigma of being a public relations "flak film", the promotional message of the documentary will be implicit in its accurate informational content, rather than be an explicit "pitch".

The following outline describes how the goals discussed above will be achieved.

1. OBJECTIVES

The documentary will accurately portray Alaska's mining history, will

examine its present mines and visit the sites of its future mines. It will be, firstly and foremost, educational, but by virtue of its informational and tonal content, promotional.

2. THEME

The film, by content and tone, will portray mining in Alaska as the positive and essential enterprise it has been and can be, and by inference will be supportive of the mining industry in general.

3. DESCRIPTION OF THE FILM

Using archival photographs, interviews, existing film footage and other materials, Alaska's mining history will be documented. While the salient events will all be at least briefly covered, several of the more unique and fascinating aspects of the history will be explored in some detail. Site visits to existing and future mines as well as the use of existing film footage will be used in the balance of the film. A soundtrack will be recorded and incorporated with a narrative.

4. AUDIENCE

While the first audience to view the documentary will be the foremost gathering of mining industry personnel, the American Mining Congress Convention in 1982, the film will subsequently be heavily used as an educational tool for the spectrum of the population.

5. STYLE

The film will be an educational documentary but should be dynamic and

innovative. It will avoid highly technical or esoteric material but will not be intellectually condescending.

Within the narrative, subjective opinions concerning such highly controversial issues as environmental protection and land use philosphy will not be endorsed. The film will, however, make use of interviews, where appropriate, to address these issues.

6. BUDGET

The estimated budget for all phases of production, from planning through post production, is $150,000.

7. DISTRIBUTION

The film will be distributed for extensive use in schools, colleges, conventions, conferences, and speaking engagements as well as for television broadcast.

SENATE BILL NO. 746

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Commerce and Economic Development, office of mineral development, for production of a documentary film on Alaska's mining history and potential; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $150,000 is appropriated from the general fund to the Department of Commerce and Economic Development, office of mineral development, for the production of a documentary film on Alaska's mining history and potential.

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1984.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

October

AMERICAN MINING CONGRESS - LAS VEGAS PROGRAM

ALASKA SESSION

Need to move aggressively to secure:

1) Committment from Program Committee

2) Committment from key participants in proposed program

3) Funding committment for film and subsequent proposal/bid process

Refer Item 1) above:

We need to insert an Alaskan - Dave Heatwole - onto the Program Committee.

Also, support from the A.M.C. executive should be directed to our advantage.

(Action - John Sims will contact Dave Heatwole 1/31/82.
E. B. will contact A.M.C. executive in Washington, D.C. and appraise them of developments and reassert our strong support and interest in the Vegas program)

Refer Item 2) above:

The concept of the Alaska session should be discussed with members of of Alaska's congressional delegates. Ideally, we should aim to have two out of the three (Murkowski and Young?) co-chair the session.

Preliminary approaches could be initiated to obtain provisional committments.

A top ranking Federal spokesman should be lined up to address the topic "Federal Perspectives and Policies in Relation to Mineral Development in Alaska". One suggestion would be Bill Horn from Interior Department, but others will no doubt come to mind. Suggestions.

Other speakers on the formal program can be lined up following dialogue between J.S., E.B. and D.H.

Refer to Item 3) above:

The Alaska Department of Commerce and Economic Development (Office of Mineral Development) has a contract with MediAlaska to generate conceptual ideas, script, preliminary budget and overall feasibility for film which ideally would have its premier showing at the A.M.C.

Although the Alaska program could proceed without the film, it is patently obvious that a top-rank production premiering at the A.M.C. would have great merit in stimulating interest in Alaska as well as adding to the session itself.

Procurement of funding for the film may pose problems. It is hoped to access some funds from the Alaska Economic Development Forum but this source could not possibly come up with the $125,000 to $150,000 estimate of total cost.

Legislative action may secure the entire fundingfor the film via a special appropriation bill and given the time constraints this is probably the way to go.

There could be rapid developments on this however if funding for a film by the legislature is linked to the A.M.C. convention we need to have assurance that the Alaska program will fly.

PROPOSAL FOR A DOCUMENTARY ON
ALASKA'S MINING HISTORY AND POTENTIAL

The American Mining Congress recently sponsored a survey of citizen attitudes towards mining. While only 16% of those polled felt at all familiar with mining, 43% believed it was damaging to the environment, 62% felt it was dangerous and unhealthy, and an incredible 96-97% felt mining was unnecessary to the national economy, unnecessary for the national defense and unnecessary to the quality of life.

As suggested by many industry spokesmen, such shockingly erroneous attitudes stem from the profound failure of America's educational system to teach its students the singular and immutable fact that modern civilization is made possible by, and remains dependent upon, the production and utilization of mineral resources. The resultant ignorance has fostered the misconception that mining is a dangerous and destructive enterprise that should be generally discouraged and locally forbidden. Juneau, Alaska 99811

Dear Committee Members:

With reference to Senate Bill #746, "An Act making a special appropriation to the Department of Commerce and Economic Development, office of mineral development for production of a documentary film on Alaska's mining history and potential and providing for effective date".

It is no big mystery to anyone and in particular those of us living in the Fairbanks area, that Alaska offers great possiblities and potential for mineral and mining activity within our area as well as many other areas throughout the State of Alaska.

In an attempt to improve the economic climate of the State's mining and mineral potential, we would encourage the passage of Senate Bill #746 appropriating $150,000 from the general fund to the Department of Commerce and Economic Development's office of mineral development for the production of this documentary film on Alaska's mining history and potential.

Our State needs more of this type thing to be used by both the State Department of Economic Development as well as other economic development committees and groups throughout the State in the promotion of mining and mineral activity within the State to show why Alaska is a good place to do business, how private enterprise can profit from the development of our natural resources and to create a positive image of Alaska's business climate.

Sincerely,

Ron Davis
President

Alaska State Legislature

Re: CSSB 746(fin)

Dear Rep. Martin:

The undersigned wishes to testify in support of the subject legislation on behalf of the Alaska Miners Association, but must be in Anchorage at the time of your scheduled hearing.

Section 1. of the bill is an appropriation for production of a documentary film on Alaska's mining history and potential. The program committee of the American Mining Congress has, for the first time in its long history, agreed to a full half-day section on Alaska at the next annual (international) convention to be held in Las Vegas on October 11-14, 1982. The proposed film would be ideal as a "kick-off" for this session, and would stimulate international interest in Alaska's mineral resources on the part of those who have not yet been exposed to this potential.

Section 2. covers support of the Arctic Winter Games which have already been held.

In light of the time restraints involved with both projects, and if legislative support is anticipated, passage of this legislation should certainly be expedited.

Respectfully submitted,

Phil R. Holdsworth

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL RELATING TO

For an Act entitled: "An Act relating to financial institutions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.30.115 is amended to read:

Sec. 06.30.115. ACCESS TO BOOKS AND RECORDS OF ASSOCIATION. (a) Every member or stockholder may inspect the books and records of an association which pertain to his loan, [OR] savings account, or voting rights.

(b) Except as provided in (a) [AND (c)] of this section, the right of inspection and examination of the books and records is limited to (1) the commissioner or his authorized representatives as provided in this chapter, (2) persons authorized to act for the association, and (3) any federal instrumentality or agency authorized to inspect or examine the books and records of an insured association.

[(c) IN STOCK ASSOCIATIONS EVERY STOCKHOLDER MAY INSPECT THE GENERAL BOOKS AND RECORDS OF THE ASSOCIATION EXCEPT A STOCKHOLDER MAY NOT HAVE ACCESS TO THE LOAN AND SAVINGS RECORDS OF OTHER MEMBERS.]

* Sec. 2. AS 06.30.120 is amended to read:

Sec. 06.30.120. BOOKS AND RECORDS [PERTAINING TO MEMBERS' ACCOUNTS] TO BE KEPT CONFIDENTIAL. Except as provided in AS 06.30.115, the [THE] books and records pertaining to the accounts, [AND] loans, and voting rights of members, stockholders, savers, and borrowers shall be kept confidential by the association, its directors, officers and employees, and by the commissioner, his examiners and representatives, except where disclosure is compelled by a court of competent jurisdiction. Except as provided in AS 06.30.115, no [NO] person, including a member or stockholder may

[SHALL] have access to the books and records or [SHALL] be furnished [OR SHALL POSSESS] a partial or complete list of the members or stockholders except upon express action and authority of the board of directors.

* Sec. 3. AS 06.30.145(b) is amended to read:

amend.

(b) In a stock association each director shall own individually or jointly with his or her spouse [IN HIS OWN RIGHT] free of any encumbrance capital stock of the association in an amount equal to at least $1,000 in par value.

* Sec. 4. AS 06.30.500(3) is amended to read:

(3) Except for participation loans authorized under AS 06.30.530, no [NO] investment may be made in a conventional loan secured by a mortgage on a one-to-four family residence unless the mortgaged property is located inside the state.

* Sec. 5. AS 06.30.520 is amended to read:

Sec. 06.30.520. PROPERTY IMPROVEMENT AND CONSUMER LOANS. An association may make property improvement loans to property owners for maintenance, repair, modernization, improvement, and equipment of their properties. In addition, an association may make consumer loans. A property improvement or consumer loan may be made with or without security and may be secured by liens on real estate and mobile homes. An association may not make property improvement loans exceeding 25 percent of its assets or consumer loans exceeding 40 percent of its assets.

* Section 6. AS 06.05.235(a) is amended to read:

(a) Except as provided in (b) or (e) of this section it [IT] is unlawful for a company to own, control or hold with power to vote 25 percent or more of a class of voting securities or other [THE] capital stock of one or more state banks or domestic [STATE] bank holding companies subject to regulation under this chapter. [NOTHING IN THIS SUBSECTION PROHIBITS A COMPANY FROM QUALIFYING AS A BANK HOLDING COMPANY UNDER (b) OF THIS SECTION.] However, when it becomes a bona fide necessity to avoid loss for a creditor to accept shares of stock in one or more state banks or domestic bank

holding companies constituting more than 25 percent of the ownership or control of a state bank or domestic bank holding company in payment of indebtedness owing to the creditor, shares of stock may be accepted, but the shares of the one or more state banks or domestic bank holding companies exceeding that 25 percent shall be promptly disposed of under the supervision of the department.

* Sec. 7. AS 06.05.235(b) is amended to read:

(b) A domestic bank holding company, as defined in AS 06.05.540 and organized under AS 10.05, which maintains its principal office and place of business in the state and conducts its principal operations in the state, may acquire and own all or any portion of the voting securities [SHARES] or other capital stock of, or all or substantially all of the assets of, one or more banks or bank holding companies unless the bank is a recently formed bank. The department may require a domestic bank holding company to post a bond with the department in an amount equal to the paid-in capital and paid-in surplus represented by the proportion of state bank stock directly or indirectly owned, held, or controlled by it, under conditions the department may prescribe, to assure full protection of the public. The domestic bank holding company is subject to an examination by the department or a competent person designated by the department when the department considers it necessary, but not less than once each year. The domestic bank holding company shall pay an examination fee in accordance with AS 06.01.010.

* Sec. 8. AS 06.05.235(c) is amended to read:

(c) The department may adopt regulations for [BANK HOLDING] companies qualifying as domestic bank holding companies or out-of-state bank holding companies under (b) or (e) of this section to assure financially sound banking organization and practice.

* Sec. 9. AS 06.05.235 is amended by adding new subsections to read:

(e) An out-of-state bank holding company as defined in (h) of this section may acquire and own all or any portion of the

voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank. To assure full protection of the public the department may require an out-of-state bank holding company that directly or indirectly owns, holds, or controls stock in a state bank or domestic bank holding company to post a bond with the department, under conditions the department may prescribe. The amount of the bond shall be equal to the product obtained by multiplying the amount of paid-in capital and paid-in surplus of the state bank or domestic bank holding company by the percentage of state bank or domestic bank holding company stock directly or indirectly owned, held, or controlled by the out-of-state bank holding company.

(f) When the department considers it necessary, an out-of-state bank holding company directly or indirectly owning, holding, or controlling state bank stock or domestic bank holding company stock is subject to an examination by the department or a competent person designated by the department. The out-of-state bank holding company shall pay an examination fee in accordance with AS 06.01.010.

(g) As used in this section a "recently formed bank" is a state bank or national bank conducting a banking business in the state that commenced that banking business in the state on or after July 1, 1982, and that has not been in existence and continuously operating in the state for a period of three years or more. However, the term "recently formed bank" does not include

(1) a bank organized solely for the purpose of facilitating acquisition of a bank that either has been in existence and continuously operating in the state as a bank for a three-year period, or was conducting a banking business in the state on or before June 30, 1[illegible] ;

(2) a state bank that the department determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to

continue to conduct its business independently in a fashion consistent with the public interest and the interest of depositors, creditors, and shareholders; or

(3) a national bank that the Board of Governors of the Federal Reserve System, or their designee, determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to conduct its business independently in a fashion consistent with the public interest of depositors, creditors, and shareholders.

(h) As used in this section "out-of-state bank holding company" means a company that

(1) is a bank holding company as defined in the U.S.C. 1841, et seq.);

(2) is registered as a bank holding company with the Board of Governors of the Federal Reserve System, with the Federal Reserve Bank of the Federal Reserve District in which the operations of the bank holding company are principally conducted, or with a Federal Reserve Bank that the Board of Governors may designate;

(3) maintains its principal office and place of business outside the state; and

(4) principally conducts its banking operations through out-of-state banking subsidiaries, as measured by total deposits held or controlled by it on the date on which it becomes an out-of-state bank holding company;

(i) For the purpose of this section, a trust company organized under the laws of this state which is conducting a banking business shall be deemed to be a state bank.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL RELATING TO

For an Act entitled: "An Act relating to savings associations;

and providing for an effective date."

TEXT BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.30.115 is amended to read:

Sec. 06.30.115. ACCESS TO BOOKS AND RECORDS OF ASSOCIATION. (a) Every member or stockholder may inspect the books and records of an association which pertain to his loan, :OR: savings account, or voting rights.

(b) Except as provided in (a) :AND (c): of this section, the right of inspection and examination of the books and records is limited to (1) the commissioner or his authorized representatives as provided in this chapter, (2) persons authorized to act for the association, and (3) any federal instrumentality or agency authorized to inspect or examine the books and records of an insured association.

:(c) IN STOCK ASSOCIATIONS EVERY STOCKHOLDER MAY INSPECT THE GENERAL BOOKS AND RECORDS OF THE ASSOCIATION EXCEPT A STOCKHOLDER MAY NOT HAVE ACCESS TO THE LOAN AND SAVINGS RECORDS OF OTHER MEMBERS.:

* Sec. 2. AS 06.30.120 is amended to read:

Sec. 06.30.120. BOOKS AND RECORDS :PERTAINING TO MEMBERS' ACCOUNTS: TO BE KEPT CONFIDENTIAL. Except as provided in AS 06.30.115, the :THE: books and records pertaining to the accounts, :AND: loans, and voting rights of members, stockholders, savers, and borrowers shall be kept confidential by the association, its directors, officers and employees, and by the commissioner, his examiners and representatives, except where disclosure is compelled by a court of competent jurisdiction. Except as provided in AS 06.30.115, no :NO: person, including a member or stockholder may :SHALL: have access to the books and records or :SHALL: be furnished :OR SHALL POSSESS: a partial or complete list of the members or stockholders except upon express action and authority of the board of directors.

* Sec. 3. AS 06.30.145(b) is amended to read:

(b) In a stock association each director shall own individually or jointly with his or her spouse :IN HIS OWN RIGHT: free of any encumbrance capital stock of the association in an amount equal to at least $1,000 in par value.

* Sec. 4. AS 06.30 is amended by adding a new section to read:

Sec. AS 06.30.900. Ownership of bank securities, stocks and assets. Federal savings and loan associations, associations as defined in AS 06.30.910(1), and other thrift and home-financing organizations subject to this chapter may acquire and own all or any portion of the voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank.

* Section 5. AS 06.05.235(a) is amended to read:

(a) Except as provided in (b) or (e) of this section it :IT: is unlawful for a company to own, control or hold with power to vote 25 percent or more of a class of voting securities or other :THE: capital stock of one or more state banks or domestic :STATE: bank holding companies subject to regulation under this chapter. :NOTHING IN THIS SUBSECTION PROHIBITS A COMPANY FROM QUALIFYING AS

A BANK HOLDING COMPANY UNDER (b) OF THIS SECTION.: However, when it becomes a bona fide necessity to avoid loss for a creditor to accept shares of stock in one or more state banks or domestic bank holding companies constituting more than 25 percent of the ownership or control of a state bank or domestic bank holding company in payment of indebtedness owing to the creditor, shares of stock may be accepted, but the shares of the one or more state banks or domestic bank holding companies exceeding that 25 percent shall be promptly disposed of under the supervision of the department.

* Sec. 6. AS 06.05.235(b) is amended to read:

(b) A domestic bank holding company, as defined in AS 06.05.540 and organized under AS 10.05, which maintains its principal office and place of business in the state and conducts its principal operations in the state, may acquire and own all or any portion of the voting securities :SHARES: or other capital stock of, or all or substantially all of the assets of, one or more banks or bank holding companies unless the bank is a recently formed bank. The department may require a domestic bank holding company to post a bond with the department in an amount equal to the paid-in capital and paid-in surplus represented by the proportion of state bank stock directly or indirectly owned, held, or controlled by it, under conditions the department may prescribe, to assure full protection of the public. The domestic bank holding company is subject to an examination by the department or a competent person designated by the department when the department considers it necessary, but not less than once each year. The domestic bank holding company shall pay an examination fee in accordance with AS 06.01.010.

* Sec. 7. AS 06.05.235(c) is amended to read:

(c) The department may adopt regulations for :BANK HOLDING: companies qualifying as domestic bank holding companies or out-of-state bank holding companies under (b) or (e) of this section to assure financially sound banking organization and practice.

* Sec. 8. AS 06.05.235 is amended by adding new subsections to read:

(e) An out-of-state bank holding company as defined in (h) of this section may acquire and own all or any portion of the voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank. To assure full protection of the public the department may require an out-of-state bank holding company that directly or indirectly owns, holds, or controls stock in a state bank or domestic bank holding company to post a bond with the department, under conditions the department may prescribe. The amount of the bond shall be equal to the product obtained by multiplying the amount of paid-in capital and paid-in surplus of the state bank or domestic bank holding company by the percentage of state bank or domestic bank holding company stock directly or indirectly owned, held, or controlled by the out-of-state bank holding company.

(f) When the department considers it necessary, an out-of-state bank holding company directly or indirectly owning, holding, or controlling state bank stock or domestic bank holding company stock is subject to an examination by the department or a competent person designated by the department. The out-of-state bank holding company shall pay an examination fee in accordance with AS 06.01.010.

(g) As used in this section a "recently formed bank" is a state bank or national bank conducting a banking business in the state that commenced that banking business in the state on or after July 1, 1982, and that has not been in existence and continuously operating in the state for a period of three years or more. However, the term "recently formed bank" does not include

(1) a bank organized solely for the purpose of facilitating acquisition of a bank that either has been in existence and continuously operating in the state as a bank for a

three-year period, or was conducting a banking business in the state on or before June 30, 1982;

(2) a state bank that the department determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to continue to conduct its business independently in a fashion consistent with the public interest and the interest of depositors, creditors, and shareholders; or

(3) a national bank that the Board of Governors of the Federal Reserve System, or their designee, determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to conduct its business independently in a fashion consistent with the public interest of depositors, creditors, and shareholders.

(h) As used in this section "out-of-state bank holding company" means a company that

(1) is a bank holding company as defined in the U.S.C. 1841, et seq.);

(2) is registered as a bank holding company with the Board of Governors of the Federal Reserve System, with the Federal Reserve Bank of the Federal Reserve District in which the operations of the bank holding company are principally conducted, or with a Federal Reserve Bank that the Board of Governors may designate;

(3) maintains its principal office and place of business outside the state; and

(4) principally conducts its banking operations through out-of-state banking subsidiaries, as measured by total deposits held or controlled by it on the date on which it becomes an out-of-state bank holding company;

(i) For the purpose of this section, a trust company organized under the laws of this state which is conducting a banking business shall be deemed to be a state bank.

* Sec. 9. This Act takes effect July 1, 1982.

TWELFTH LEGISLATURE - SECOND SESSION

A BILL RELATING TO

For an Act entitled: "An Act relating to [savings associations;] Financial institutions and providing for an effective date."

TEXT BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 06.30.115 is amended to read:

Sec. 06.30.115 ACCESS TO BOOKS AND RECORDS OF ASSOCIATION. (a) Every member or stockholder may inspect the books and records of an association which pertain to his loan, :OR: savings account, or voting rights.

(b) Except as provided in (a) :AND (c): of this section, the right of inspection and examination of the books and records is limited to (1) the commissioner or his authorized representatives as provided in this chapter, (2) persons authorized to act for the association, and (3) any federal instrumentality or agency authorized to inspect or examine the books and records of an insured association.

:(c) IN STOCK ASSOCIATIONS EVERY STOCKHOLDER MAY INSPECT THE GENERAL BOOKS AND RECORDS OF THE ASSOCIATION EXCEPT A STOCKHOLDER MAY NOT HAVE ACCESS TO THE LOAN AND SAVINGS RECORDS OF OTHER MEMBERS.:

* Sec. 2. AS 06.30.120 is amended to read:

Sec. 06.30.120. BOOKS AND RECORDS :PERTAINING TO MEMBERS' ACCOUNTS: TO BE KEPT CONFIDENTIAL. Except as provided in AS 06.30.115, the :THE: books and records pertaining to the accounts, :AND: loans, and voting rights of members, stockholders, savers, and borrowers shall be kept confidential by the association, its directors, officers and employees, and by the commissioner, his examiners and representatives, except where disclosure is compelled by a court of competent jurisdiction. Except as provided in AS 06.30.115, no :NO: person, including a member or stockholder may :SHALL: have access to the books and records or :SHALL: be furnished :OR SHALL POSSESS: a partial or complete list of the members or stockholders except upon express action and authority of the board of directors.

* Sec. 3. AS 06.30.145(b) is amended to read:

(b) In a stock association each director shall own individually or jointly with his spouse :IN HIS OWN RIGHT: free of any encumbrance capital stock of the association in an amount equal to at least $1,000 in par value.

NEW

* Sec. 4. AS 06.30 is amended by adding a new section to read:

Sec. AS 06.30.900. Ownership of bank securities, stocks and assets. Federal savings and loan associations, associations as defined in AS 06.30.910(1), and other thrift and home-financing organizations subject to this chapter may acquire and own all or any portion of the voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank.

SB-756

* Section 5. AS 06.05.235(a) is amended to read:

(a) Except as provided in (b) or (e) of this section it :IT: is unlawful for a company to own, control or hold with power to vote 25 percent or more of a class of voting securities or other :THE: capital stock of one or more state banks or domestic :STATE: bank holding companies subject to regulation under this chapter. :NOTHING IN THIS SUBSECTION PROHIBITS A COMPANY FROM QUALIFYING AS

A BANK HOLDING COMPANY UNDER (b) OF THIS SECTION.: However, when it becomes a bona fide necessity to avoid loss for a creditor to accept shares of stock in one or more state banks or domestic bank holding companies constituting more than 25 percent of the ownership or control of a state bank or domestic bank holding company in payment of indebtedness owing to the creditor, shares of stock may be accepted, but the shares of the one or more state banks or domestic bank holding companies exceeding that 25 percent shall be promptly disposed of under the supervision of the department.

* Sec. 6. AS 06.05.235(b) is amended to read:

(b) A domestic bank holding company, as defined in AS 06.05.540 and organized under AS 10.05, which maintains its principal office and place of business in the state and conducts its principal operations in the state, may acquire and own all or any portion of the voting securities :SHARES: or other capital stock of, or all or substantially all of the assets of, one or more banks or bank holding companies unless the bank is a recently formed bank. The department may require a domestic bank holding company to post a bond with the department in an amount equal to the paid-in capital and paid-in surplus represented by the proportion of state bank stock directly or indirectly owned, held, or controlled by it, under conditions the department may prescribe, to assure full protection of the public. The domestic bank holding company is subject to an examination by the department or a competent person designated by the department when the department considers it necessary, but not less than once each year. The domestic bank holding company shall pay an examination fee in accordance with AS 06.01.010.

* Sec. 7. AS 06.05.235(c) is amended to read:

(c) The department may adopt regulations for :BANK HOLDING: companies qualifying as domestic bank holding companies or out-of-state bank holding companies under (b) or (e) of this section to assure financially sound banking organization and practice.

* Sec. 8. AS 06.05.235 is amended by adding new subsections to read:

(e) An out-of-state bank holding company as defined in (h) of this section may acquire and own all or any portion of the voting securities or other capital stock of, or all or substantially all of the assets of, one or more state banks, domestic bank holding companies, or national banks conducting a banking business in the state unless the state bank or national bank is a recently formed bank. To assure full protection of the public the department may require an out-of-state bank holding company that directly or indirectly owns, holds, or controls stock in a state bank or domestic bank holding company to post a bond with the department, under conditions the department may prescribe. The amount of the bond shall be equal to the product obtained by multiplying the amount of paid-in capital and paid-in surplus of the state bank or domestic bank holding company by the percentage of state bank or domestic bank holding company stock directly or indirectly owned, held, or controlled by the out-of-state bank holding company.

(f) When the department considers it necessary, an out-of-state bank holding company directly or indirectly owning, holding, or controlling state bank stock or domestic bank holding company stock is subject to an examination by the department or a competent person designated by the department. The out-of-state bank holding company shall pay an examination fee in accordance with AS 06.01.010.

(g) As used in this section a "recently formed bank" is a state bank or national bank conducting a banking business in the state that commenced that banking business in the state on or after July 1, 1982, and that has not been in existence and continuously operating in the state for a period of three years or more. However, the term "recently formed bank" does not include

(1) a bank organized solely for the purpose of facilitating acquisition of a bank that either has been in existence and continuously operating in the state as a bank for a

three-year period, or was conducting a banking business in the state on or before June 30, 1982;

(2) a state bank that the department determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to continue to conduct its business independently in a fashion consistent with the public interest and the interest of depositors, creditors, and shareholders; or

(3) a national bank that the Board of Governors of the Federal Reserve System, or their designee, determines was not chartered directly or indirectly by an acquiring out-of-state bank holding company, and that does not have the capacity to conduct its business independently in a fashion consistent with the public interest of depositors, creditors, and shareholders.

(h) As used in this section "out-of-state bank holding company" means a company that

(1) is a bank holding company as defined in the U.S.C. 1841, et seq.);

(2) is registered as a bank holding company with the Board of Governors of the Federal Reserve System, with the Federal Reserve Bank of the Federal Reserve District in which the operations of the bank holding company are principally conducted, or with a Federal Reserve Bank that the Board of Governors may designate;

(3) maintains its principal office and place of business outside the state; and

(4) principally conducts its banking operations through out-of-state banking subsidiaries, as measured by total deposits held or controlled by it on the date on which it becomes an out-of-state bank holding company;

(i) For the purpose of this section, a trust company organized under the laws of this state which is conducting a banking business shall be deemed to be a state bank.

From the Office of

SENATOR DICK ELIASON

Attn: Mary Isaacs
House Labor & Commerce

Here is some information on SB771. The memo to Sen. Mukelby speaks to the original SB771 but all information also pertains to the CS. The CS simply expanded the bond exemption to include grocery stores as well as restaurants. This change was made at Sen. Eliason's own suggestion.

Also attached is a brief one page summary of the intent of the bill.

The Labor Dept. is in favor of the bill and testified for it in the Senate Labor and Commerce hearing.

If we can provide anythin further please let me know.

M E M O R A N D U M

To: Senator Bob Mulcahy, Chairman
Senate Labor and Commerce Committee

From: Senator Dick Eliason

Re: Senate Bill 771

I recently introduced S.B. 771 which would exclude restaurants from obtaining the labor bond which is required of fish processors and primary fish buyers. The bill has been referred to the Labor and Commerce Committee and I would appreciate you scheduling a hearing for it.

Under current statute a restaurant is classified as a primary fish buyer and as a fisheries business as it is the entity "who first actually and physically processes the fishery resource" (AS 43.75.015 (c)) by cooking it. Therefore restaurants must go through all of the procedures to meet requirements for processors. These include filing an "intent to operate" statement with the Fish and Game Department, filing fish tickets with the Fish and Game Department each week, posting a $10,000 labor bond with the Labor Department, obtaining a "fisheries business license" from the Revenue Department, filing a surety bond or prove lienable property or prepay the tax to the Revenue Department, and must file and pay this raw fish tax to the Revenue Department.

Obviously these are a lot of "hoops to jump through" for a restaurant which simply wants to include fresh seafood on its menu. It is evident to anyone who dines at Alaskan restaurants that it is often difficult to find fresh Alaskan seafood offered. My goal with S.B. 771 is to encourage the availability of good fresh seafood to Alaskans and to visitors to our state.

It is apparent when studying the various requirements for restaurants that the one which is the least necessary and by far the most costly and difficult is the labor bond. The other steps have some justification (management data from fish tickets, payment of the raw fish tax as these fish would go untaxed otherwise, and so on). However, the labor bond is meant to protect fishermen and cannery workers from fly-by-night fish buyers and seasonal operators who might buy fish or hire labor and leave without paying them. This is unnecessary for restaurants and is made even more ridiculous as restaurants already must meet labor protection requirements whether they buy fish or not. The labor bond is also very expensive to obtain, particularly for a small operation.

Currently the Department of Labor does not even bother to enforce the labor bond requirement for restaurants as they feel restaurants buy only small quantities of raw fish and are not likely to default to fishermen. The risk involved with breaking the law, however, may be enough to make some restaurants avoid offering fresh fish. Others, because they can't afford to buy the labor bond, may buy and serve fish but fail to do any of the required steps including paying the rawfish tax. Therefore, the State loses the revenue on the fish which are sold in restaurants.

I believe that the cost of the raw fish tax to a restaurant is so minimal that most would not mind remaining in compliance with all of the tax and paperwork requirements if the one which is the big financial burden, the labor bond, were removed.

Again, my goal is to encourage the availability of fresh Alaskan seafood to the consumer and provide a market alternative to fishermen. I believe we can meet our goals of encouraging availability of seafood, improving compliance with the necessary and purposeful paperwork and tax requirements and simplifying the permitting process by eliminating the labor bond requirement for restaurants.

Under current statute restaurants and grocery stores are classified as primary fish buyers and fisheries businesses when they buy and sell fresh fish.

The current statute <u>requires them to:</u>

(1) Filing an "intent to operate" statement with the Fish and Game Department
(2) Filing fish tickets with the Fish and Game Department each week
(3) Obtaining a "fisheries business license" from the the Revenue Department
(4) Filing a surety bond or prove lienable property or prepay the tax to the Revenue Department
(5) Must file and pay this raw fish tax to the Revenue Department
(6) AND THE BIGGEST HARDSHIP - Posting a $10,000 labor bond with the Labor Department

Labor bond law for fish buyers was put on the books to protect fishermen and workers from fly-by-night fish buyers and seasonal operators who may default them.

There is no need for labor bond for retailers as covered by other labor protection laws.

GOAL of this bill is to encourage availability of good fresh seafood to Alaskans and visitors to our State.

Labor & Commerce Committee

MEMORANDUM

16 March, 1982

TO: Representative Martin
Chairman
House Labor and Commerce

FROM: Michael Thill, A.A.
Senate Labor and Commerce

SB 798 (title insurance rating organizations) was heard in committee, and a Senate L&C CS was adopted at the behest of the Division of Insurance. They had submitted a proposal which required the deletion of section 5 in the original bill, the insertion of a new section 5, and the appropriate renumbering of sections following. Inadvertantly, a drafting error was not noticed until after the bill had passed the Senate, and CS SB 798 (L&C) requires an additional change. Section 6 of the bill is contained in the new language in section 5, and therefore section 6 should be deleted, and the following sections should be renumbered appropriately.

From Speaker Hayes' office 3-18-82

Additionally, Mulcahy's office has informed me that Section 6 of this bill is a duplicate of portions of Section 5 and the bill will have to be referred back to the Senate after it makes it through to the House Floor.

CSSB 798 (L&C)

Passed out of House L&C 3-19-82 with HCS.

MEMORANDUM

16 March, 1982

TO: Representative Martin
Chairman
House Labor and Commerce

FROM: Michael Thill, A.A.
Senate Labor and Commerce

SB 798 (title insurance rating organizations) was heard in committee, and a Senate L&C CS was adopted at the behest of the Division of Insurance. They had submitted a proposal which required the deletion of section 5 in the original bill, the insertion of a new section 5, and the appropriate renumbering of sections following. Inadvertantly, a drafting error was not noticed until after the bill had passed the Senate, and CS SB 798 (L&C) requires an additional change. Section 6 of the bill is contained in the new language in section 5, and therefore section 6 should be deleted, and the following sections should be renumbered appropriately.

From Speaker Hayes office 3-18-82.

Additionally, Mulcahy's office has informed me that Section 6 of this bill is a duplicate of portions of Section 5 and the bill will have to be referred back to the Senate after it makes it through to the House Floor.

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 798 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

See Section 6; A BILL

For an Act entitled: "An Act relating to title insurance rating organizations; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.66.370(a) is amended to read:

(a) A title insurance company shall file with the director its schedules of rates, manuals of classifications, rules and plans relating to schedules of rates or manuals of classification, and every modification of the schedules or manuals which it proposes to use in this state. A filing under this section shall contain the effective dates of the documents filed, and indicate the character and extent of the coverage contemplated. A title insurance company may satisfy its obligations to make these filings by becoming a member of, or a subscriber to, a licensed title insurance rating organization that makes such filings, and by authorizing the commissioner to accept the filings on its behalf.

* Sec. 2. AS 21.66.370(c) is amended to read:

(c) Subject to the provisions of (e) of this section, each filing shall be on file for a period of 30 days before it becomes effective. The director may, upon written notice given within the 30-day period to the person making the filing, extend the waiting period for an additional period, not to exceed 30 days, in order to complete the review of the filing. Additional extensions of the waiting period may also be made with the consent of the title insurance company or rating organization. Upon written application by the title insurance company or rating organization, the director, after review of the application, may authorize a

filing or any part of it to become effective upon the expiration of the waiting period or its extension.

* Sec. 3. AS 21.66.380(a) is amended to read:

(a) A rate filing shall be accompanied by a statement of the title insurance company or title insurance rating organization making the filing, setting out the basis on which the rate was determined, with the rates computed. A filing of rates may be justified by the following:

(1) the experience or judgment of the title insurance company or title insurance rating organization making the filing; [,]

(2) its interpretation of any statistical data relied upon; [,]

(3) the experience of other title insurance companies or title insurance rating organizations making the filings; [,] or

(4) any other factors which the title insurance company or title insurance rating organization considers relevant.

* Sec. 4. AS 21.66.390 is amended to read:

Sec. 21.66.390. MAKING OF RATES. (a) A title insurance company that makes its own rates and each title insurance rating organization shall make rates that are not excessive or inadequate and which do not unfairly discriminate between risks in this state which involve essentially the same exposure to loss and expense elements, and which give due consideration to the following matters:

(1) the desirability for stability of rate structures;

(2) the necessity of assuring the financial solvency of title insurance companies in period of economic depression by encouraging growth in assets of title insurance companies in periods of high business activity; and

(3) the necessity for assuring a reasonable margin of underwriting and operating profit.

(b) A title insurance company that makes its own rates and each title insurance rating organization shall adopt basic classifications of policies or contracts of title insurance which shall be used as the basis for rate-making.

* Sec. 5. AS 21.66.400 is repealed and reenacted to read:

Sec. 21.66.400. DISAPPROVAL OF FILINGS. (a) If within the waiting period provided for in AS 21.66.370(c) the director finds that a filing does not meet the requirements of this chapter, he shall send to the title insurance company or title insurance rating organization that made the filing, written notice of disapproval of the filing specifying in what respects he finds the filing fails to meet the requirements of this chapter and stating that the filing may not become effective.

(b) If at any time after the applicable review period provided for in AS 21.66.370(c) the director finds that a filing does not meet the requirements of this chapter, he shall, before issuing an order of disapproval, hold a hearing upon not less than 10 days written notice, specifying in reasonable detail the matters to be considered at the hearing. Notice of hearing shall be given to each title insurance company or title insurance rating organization that made the filing, and if, after the hearing, the director finds that the filing or a part of the filing does not meet the requirements of this chapter, he shall issue an order specifying how it is deficient, and when, within a reasonable period thereafter, the filing or a part of it is considered no longer effective. A title insurance company or title insurance rating organization has the right to withdraw a filing or a part of a filing. Copies of the order issued under this section shall be sent to every title insurance company and title insurance rating organization affected. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

(c) A person or organization aggrieved with respect to a filing that is in effect may make a written application to the director for a hearing on the filing. The title insurance company or title insurance rating organization that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied on by the applicant. If the director finds that the application is made in good faith, that the applicant would be aggrieved if the applicant's grounds are established, and that the applicant's grounds otherwise justify holding a hearing, the director shall, within 60 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company or title insurance rating organization that made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every affected title insurance company or title insurance rating organization. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

(d) A title insurance company or title insurance rating organization to which the director has issued an order made without a hearing may, within 30 days after notice to it of the order, make a written request to the director for a hearing. The director shall hear the party or parties within 60 days after receipt of the request and shall give not less than 10 days written notice of the time and place of the hearing. Within 15 days after the hearing the director shall affirm, reverse, or modify his previous action, specifying his reasons. Pending

the hearing and decision the director may suspend or postpone the effective date of his previous action.

(e) A hearing under this section is not required to observe formal rules of pleading or evidence.

(f) A filing or modification of a filing may not be disapproved if the rates in connection with the filing meet the requirements of this chapter.

Should be deleted; 400(B) now contained in Section 5; CSSB 798

* Sec. 6. AS 21.66.400(b) is amended to read:

(b) A person or organization aggrieved with respect to a filing which is in effect [,] may make written application to the director for a hearing on the filing. The title insurance company or title insurance rating organization that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied upon by the applicant. If the director finds that the application is made in good faith, and that the applicant would be aggrieved if his grounds are established, and that his grounds otherwise justify holding a hearing, he shall, within 30 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company or title insurance rating organization which made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter, he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every such title insurance company or title insurance rating organization. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

* Sec. 7. AS 21.66 is amended by adding new sections to read:

Sec. 21.66.401. TITLE INSURANCE RATING ORGANIZATIONS. (a) a person located in or out of the state may apply to the director for licensing as a title insurance rating organization and shall file as part of the application

(1) a copy of its constitution, its articles of agreement or association, or its certificate of incorporation and a copy of its bylaws and rules governing the conduct of its business;

(2) a list of its members and subscribers;

(3) the name and address of a resident of the state upon whom notices or orders of the director or process affecting the rating organization may be served; and

(4) a statement of its qualifications as a title insurance rating organization.

(b) If the director finds that the applicant is competent, trustworthy, and otherwise qualified to act as a title insurance rating organization, and that its constitution, articles of agreement or association, or certificate of incorporation and its bylaws and rules governing the conduct of its business conform to the requirements of law, the director shall issue a license authorizing the applicant to act as a title insurance rating organization. Each application shall be granted or denied in whole or in part by the director within 60 days after the date of its filing with him.

(c) A license issued under this section is in effect for three years unless sooner suspended or revoked by the director or withdrawn by the licensee. The fee for the license is $100.

(d) A license issued under this section may be suspended or revoked by the director, after hearing upon notice, if the title insurance rating organization ceases to meet the requirements of this subsection.

Each title insurance rating organization shall notify the director promptly of a change in

(1) its constitution, its articles of agreement or association or its certificate of incorporation and its bylaws and rules governing the conduct of its business;

(2) its list of members and subscribers; and

(3) the name and address of the resident of this state designated by it upon whom notices or orders of the director or process affecting the rating organization may be served.

(e) Subject to rules that have been approved by the director as reasonable, each title insurance rating organization shall permit any title insurance company to be a member or a subscriber to its rating services at a reasonable cost and without discrimination or to withdraw as a member or subscriber.

(f) Notice of a proposed change in rules of the title insurance rating organization must be given to members and subscribers. The reasonableness of a rule in its application to subscribers, or the refusal of a rating organization to admit a title insurance company as a subscriber, shall, at the request of a subscriber or a title insurance company, be reviewed by the director at a hearing held upon at least 10 days written notice to the rating organization and to the subscriber. If the director finds that a rule is unreasonable in its application to subscribers, he shall order that the rule may not apply to subscribers. If the title insurance rating organization fails to grant or reject an application of a title insurance company for subscribership within 30 days after it was made, the title insurance company may request a review by the director as if the application had been rejected. If the director finds that the title insurance company has been refused admittance to the title insurance rating organization as a subscriber without justi-

fication, he shall order the rating organization to admit the title insurance company as a subscriber. If he finds that the action of the title insurance rating organization was justified, he shall make an order affirming its action.

(g) Cooperation among title insurance rating organizations, or among rating organizations and title insurance companies, and concert of action among title insurance companies under the same general management and control in rate making or in other matters within the scope of this section is authorized, if the resulting filing is subject to the provisions of this section that apply to filings generally.

(h) Two or more title insurance companies who are members of or subscribers to a title insurance rating organization may act in concert with each other with respect to the making of rates or rating systems, the preparation or making of insurance policy forms, underwriting rules, surveys, inspections and investigations, the furnishing of loss or expense statistics or other information and data, or carrying out research.

(i) The director may review the activities and practices under (g) and (h) of this section. If, after a hearing, the director finds that an activity or practice is unfair, unreasonable, or inconsistent with the provisions of this section, he may issue a written order specifying how the activity or practice is unfair, unreasonable, or inconsistent with the provisions of this section and require discontinuance of the activity or practice.

Sec. 21.66.402. DEVIATIONS FROM FILINGS OF RATING ORGANIZATION. Each member of or subscriber to a title insurance rating organization must adhere to the filings made on its behalf by that organization, except a title insurance company that is a member of or subscriber to a rating organization may file with the director a decrease or increase to

be applied to any elements of the rates produced by the rating system for a class of title insurance that is found by the director to be a proper rating unit for the application of the decrease or increase, or to be applied to the rates for a particular area. The filing must specify the basis for the deviation and be accompanied by the data or historical pattern upon which the applicant relies. A copy of the filing and data shall be sent simultaneously to the title insurance rating organization. Each deviation shall be effective for one year unless terminated sooner with the approval of the director, or in accordance with the provisions of AS 21.66.400.

Sec. 21.66.403. APPEAL FROM ACTION OF RATING ORGANIZATION. (a) A member of or subscriber to a title insurance rating organization may appeal to the director from an action or decision of the rating organization in approving or rejecting a proposed change in or addition to the filings of the rating organization. The failure of a title insurance rating organization to act within 30 days after submission to it of a proposal under this section is a rejection of the proposal.

(b) The director shall, after a hearing held upon not less than 10 days written notice to the appellant and the rating organization, issue an order approving the action or decision of the rating organization or directing it to give further consideration to the proposal and to take action or make a decision upon it within 30 days.

(c) If the appeal is from the action or decision of the title insurance rating organization in rejecting a proposed addition to its filings, the director may, if he finds that the action or decision was unreasonable, issue an order directing the rating organization to make an addition to its filing on behalf of its members or subscribers, in a manner consistent with his findings, within a reasonable time after issuance of the order. If the appeal is from the action of the title

insurance rating organization with regard to a rate or a proposed change in or addition to its filings relating to the character and extent of coverage, the director shall approve the action of the rating organization or the modification as proposed by the appellant, if either is in accordance with this chapter.

(d) If the appeal is based on the failure of the rating organization to make a filing on behalf of the member or subscriber based on a system of expense allocation that differs, in accordance with the right granted in AS 21.66.390 from the system of expense allocation included in a filing made by the rating organization, the director shall, if he grants the appeal, order the rating organization to make the requested filing for use by the appellant. In deciding the appeal, the director shall apply the standards set out in AS 21.66.390.

* Sec. 8. AS 21.66.410(c) is amended to read:

(c) In order to more uniformly administer rate regulations, the director and each title insurance company or title insurance rating organization may exchange information and experience data with insurance supervisory officials, title insurance companies and title insurance rating organizations in other states, and may consult with them and with each other with respect to rate making and the application of rating systems.

* Sec. 9. AS 21.66.420 is amended to read:

Sec. 21.66.420. FALSE OR MISLEADING INFORMATION. No title insurance company or title insurance agent may wilfully withhold information from, or knowingly give false or misleading information to the director or to any title insurance rating organization of which the title insurance company is a member or subscriber which will affect the rates chargeable under this chapter.

* Sec. 10. AS 21.66.430(a) is amended to read:

(a) The director may, if he finds that a title insurance rating organization, a title insurance company, or title insurance agent has violated a provision of this chapter, impose a penalty of not more than $100 for each violation. However, if the violation is wilful, he shall impose a penalty of not more than $1,000 for each violation. Penalties imposed under this section are in addition to other penalties provided by law.

* Sec. 11. AS 21.66.430(b) is amended to read:

(b) In addition to the penalty provided in (a) of this section, the director may suspend the certificate of authority of a title insurance rating organization, title insurance company, or title insurance agent upon failure to comply with an order of the director within the time limit allowed by the order. No certificate of authority may be suspended for failure to comply with an order until the time prescribed for an appeal has expired, or, if an appeal has been taken, until the order has been affirmed.

* Sec. 12. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 798 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to title insurance rating organizations; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.66.370(a) is amended to read:

(a) A title insurance company shall file with the director its schedules of rates, manuals of classifications, rules and plans relating to schedules of rates or manuals of classification, and every modification of the schedules or manuals which it proposes to use in this state. A filing under this section shall contain the effective dates of documents filed, and indicate the character and extent of the coverage contemplated. A title insurance company may satisfy its obligations to make these filings by becoming a member of, or a subscriber to, a licensed title insurance rating organization that makes such filings, and by authorizing the commissioner to accept the filings on its behalf.

* Sec. 2. AS 21.66.370(c) is amended to read:

(c) Subject to the provisions of (e) of this section, each filing shall be on file for a period of 30 days before it becomes effective. The director may, upon written notice given within the 30-day period to the person making the filing, extend the waiting period for an additional period, not to exceed 30 days, in order to complete the review of the filing. Additional extensions of the waiting period may also be made with the consent of the title insurance company or rating organization. Upon written application by the title insurance company or rating organization, the director, after review of the application, may authorize a

filing or any part of it to become effective upon the expiration of the waiting period or its extension.

* Sec. 3. AS 21.66.380(a) is amended to read:

(a) A rate filing shall be accompanied by a statement of the title insurance company or title insurance rating organization making the filing, setting out the basis on which the rate was determined, with the rates computed. A filing of rates may be justified by the following:

(1) the experience or judgment of the title insurance company or title insurance rating organization making the filing; [,]

(2) its interpretation of any statistical data relied upon; [,]

(3) the experience of other title insurance companies or title insurance rating organizations making the filings; [,] or

(4) any other factors which the title insurance company or title insurance rating organization considers relevant.

* Sec. 4. AS 21.66.390 is amended to read:

Sec. 21.66.390. MAKING OF RATES. (a) A title insurance company that makes its own rates and each title insurance rating organization shall make rates that are not excessive or inadequate and which do not unfairly discriminate between risks in this state which involve essentially the same exposure to loss and expense elements, and which give due consideration to the following matters:

(1) the desirability for stability of rate structures;

(2) the necessity of assuring the financial solvency of title insurance companies in period of economic depression by encouraging growth in assets of title insurance companies in periods of high business activity; and

(3) the necessity for assuring a reasonable margin of underwriting and operating profit.

(b) A title insurance company that makes its own rates and each title insurance rating organization shall adopt basic classifications of policies or contracts of title insurance which shall be used as the basis for race-making.

* Sec. 5. AS 21.66.400 is repealed and reenacted to read:

Sec. 21.66.400. DISAPPROVAL OF FILINGS. (a) If within the waiting period provided for in AS 21.66.370(c) the director finds that a filing does not meet the requirements of this chapter, he shall send to the title insurance company or title insurance rating organization that made the filing, written notice of disapproval of the filing specifying in what respects he finds the filing fails to meet the requirements of this chapter and stating that the filing may not become effective.

(b) If at any time after the applicable review period provided for in AS 21.66.370(c) the director finds that a filing does not meet the requirements of this chapter, he shall, before issuing an order of disapproval, hold a hearing upon not less than 10 days written notice, specifying in reasonable detail the matters to be considered at the hearing. Notice of hearing shall be given to each title insurance company or title insurance rating organization that made the filing, and if, after the hearing, the director finds that the filing or a part of the filing does not meet the requirements of this chapter, he shall issue an order specifying how it is deficient, and when, within a reasonable period thereafter, the filing or a part of it is considered no longer effective. A title insurance company or title insurance rating organization has the right to withdraw a filing or a part of a filing. Copies of the order issued under this section shall be sent to every title insurance company and title insurance rating organization affected. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

(c) A person or organization aggrieved with respect to filing that is in effect may make a written application to the director for a hearing on the filing. The title insurance company or title insurance rating organization that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied on by the applicant. If the director finds that the application is made in good faith, that the applicant would be aggrieved if the applicant's grounds are established, and that the applicant's grounds otherwise justify holding a hearing, the director shall, within 60 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company or title insurance rating organization that made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every affected title insurance company or title insurance rating organization. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

(d) A title insurance company or title insurance rating organization to which the director has issued an order made without a hearing may, within 30 days after notice to it of the order, make a written request to the director for a hearing. The director shall hear the party or parties within 60 days after receipt of the request and shall give not less than 10 days written notice of the time and place of the hearing. Within 15 days after the hearing the director shall affirm, reverse, or modify his previous action, specifying his reasons. Pending

ok

the hearing and decision the director may suspend or postpone the effective date of his previous action.

ok (e) A hearing under this section is not required to observe formal rules of pleading or evidence.

(f) A filing or modification of a filing may not be disapproved if the rates in connection with the filing meet the requirements of this chapter.

* Sec. 6. AS 21.66.400(b) is amended to read:

delete (b) A person or organization aggrieved with respect to a filing which is in effect [,] may make written application to the director for a hearing on the filing. The title insurance company or title insurance rating organization that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied upon by the applicant. If the director finds that the application is made in good faith, and that the applicant would be aggrieved if his grounds are established, and that his grounds otherwise justify holding a hearing, he shall, within 30 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company or title insurance rating organization which made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter, he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every such title insurance company or title insurance rating organization. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.

OK remember

* Sec. 7. AS 21.66 is amended by adding new sections to read:

Sec. 21.66.401. TITLE INSURANCE RATING ORGANIZATIONS. (a) a person located in or out of the state may apply to the director for licensing as a title insurance rating organization and shall file as part of the application

(1) a copy of its constitution, its articles of agreement or association, or its certificate of incorporation and a copy of its bylaws and rules governing the conduct of its business;

(2) a list of its members and subscribers;

(3) the name and address of a resident of the state upon whom notices or orders of the director or process affecting the rating organization may be served; and

(4) a statement of its qualifications as a title insurance rating organization.

(b) If the director finds that the applicant is competent, trustworthy, and otherwise qualified to act as a title insurance rating organization, and that its constitution, articles of agreement or association, or certificate of incorporation and its bylaws and rules governing the conduct of its business conform to the requirements of law, the director shall issue a license authorizing the applicant to act as a title insurance rating organization. Each application shall be granted or denied in whole or in part by the director within 60 days after the date of its filing with him.

(c) A license issued under this section is in effect for three years unless sooner suspended or revoked by the director or withdrawn by the licensee. The fee for the license is $100.

(d) A license issued under this section may be suspended or revoked by the director, after hearing upon notice, if the title insurance rating organization ceases to meet the requirements of this subsection.

Each title insurance rating organization shall notify the director promptly of a change in

(1) its constitution, its articles of agreement or association or its certificate of incorporation and its bylaws and rules governing the conduct of its business;

(2) its list of members and subscribers; and

(3) the name and address of the resident of this state designated by it upon whom notices or orders of the director or process affecting the rating organization may be served.

(e) Subject to rules that have been approved by the director as reasonable, each title insurance rating organization shall permit any title insurance company to be a member or a subscriber to its rating services at a reasonable cost and without discrimination or to withdraw as a member or subscriber.

(f) Notice of a proposed change in rules of the title insurance rating organization must be given to members and subscribers. The reasonableness of a rule in its application to subscribers, or the refusal of a rating organization to admit a title insurance company as a subscriber, shall, at the request of a subscriber or a title insurance company, be reviewed by the director at a hearing held upon at least 10 days written notice to the rating organization and to the subscriber. If the director finds that a rule is unreasonable in its application to subscribers, he shall order that the rule may not apply to subscribers. If the title insurance rating organization fails to grant or reject an application of a title insurance company for subscribership within 30 days after it was made, the title insurance company may request a review by the director as if the application had been rejected. If the director finds that the title insurance company has been refused admittance to the title insurance rating organization as a subscriber without justi-

fication, he shall order the rating organization to admit the title insurance company as a subscriber. If he finds that the action of the title insurance rating organization was justified, he shall make an order affirming its action.

(g) Cooperation among title insurance rating organizations, or among rating organizations and title insurance companies, and concert of action among title insurance companies under the same general management and control in rate making or in other matters within the scope of this section is authorized, if the resulting filing is subject to the provisions of this section that apply to filings generally.

(h) Two or more title insurance companies who are members of or subscribers to a title insurance rating organization may act in concert with each other with respect to the making of rates or rating systems, the preparation or making of insurance policy forms, underwriting rules, surveys, inspections and investigations, the furnishing of loss or expense statistics or other information and data, or carrying out research.

(i) The director may review the activities and practices under (g) and (h) of this section. If, after a hearing, the director finds that an activity or practice is unfair, unreasonable, or inconsistent with the provisions of this section, he may issue a written order specifying how the activity or practice is unfair, unreasonable, or inconsistent with the provisions of this section and require discontinuance of the activity or practice.

Sec. 21.66.402. DEVIATIONS FROM FILINGS OF RATING ORGANIZATION. Each member of or subscriber to a title insurance rating organization must adhere to the filings made on its behalf by that organization, except a title insurance company that is a member of or subscriber to a rating organization may file with the director a decrease or increase to

be applied to any elements of the rates produced by the rating system for a class of title insurance that is found by the director to be a proper rating unit for the application of the decrease or increase, or to be applied to the rates for a particular area. The filing must specify the basis for the deviation and be accompanied by the data or historical pattern upon which the applicant relies. A copy of the filing and data shall be sent simultaneously to the title insurance rating organization. Each deviation shall be effective for one year unless terminated sooner with the approval of the director, or in accordance with the provisions of AS 21.66.400.

Sec. 21.66.403. APPEAL FROM ACTION OF RATING ORGANIZATION. (a) A member of or subscriber to a title insurance rating organization may appeal to the director from an action or decision of the rating organization in approving or rejecting a proposed change in or addition to the filings of the rating organization. The failure of a title insurance rating organization to act within 30 days after submission to it of a proposal under this section is a rejection of the proposal.

(b) The director shall, after a hearing held upon not less than 10 days written notice to the appellant and the rating organization, issue an order approving the action or decision of the rating organization or directing it to give further consideration to the proposal and to take action or make a decision upon it within 30 days.

(c) If the appeal is from the action or decision of the title insurance rating organization in rejecting a proposed addition to its filings, the director may, if he finds that the action or decision was unreasonable, issue an order directing the rating organization to make an addition to its filing on behalf of its members or subscribers, in a manner consistent with his findings, within a reasonable time after issuance of the order. If the appeal is from the action of the title

insurance rating organization with regard to a rate or a proposed change in or addition to its filings relating to the character and extent of coverage, the director shall approve the action of the rating organization or the modification as proposed by the appellant, if either is in accordance with this chapter.

(d) If the appeal is based on the failure of the rating organization to make a filing on behalf of the member or subscriber based on a system of expense allocation that differs, in accordance with the right granted in AS 21.66.390 from the system of expense allocation included in a filing made by the rating organization, the director shall, if he grants the appeal, order the rating organization to make the requested filing for use by the appellant. In deciding the appeal, the director shall apply the standards set out in AS 21.66.390.

* Sec. 8. AS 21.66.410(c) is amended to read:

(c) In order to more uniformly administer rate regulations, the director and each title insurance company <u>or title insurance rating organization</u> may exchange information and experience data with insurance supervisory officials, title insurance companies and title insurance rating organizations in other states, and may consult with them and with each other with respect to rate making and the application of rating systems.

* Sec. 9 AS 21.66.420 is amended to read:

Sec. 21.66.420. FALSE OR MISLEADING INFORMATION. No title insurance company or title insurance agent may wilfully withhold information from, or knowingly give false or misleading information to the director <u>or to any title insurance rating organization of which the title insurance company is a member or subscriber which will affect the rates chargeable under this chapter</u>.

* Sec. 10. AS 21.66.430(a) is amended to read:

(a) The director may, if he finds that a title insurance rating organization, a title insurance company, or title insurance agent has violated a provision of this chapter, impose a penalty of not more than $100 for each violation. However, if the violation is wilful, he shall impose a penalty of not more than $1,000 for each violation. Penalties imposed under this section are in addition to any other penalties provided by law.

* Sec. 11. AS 21.66.430(b) is amended to read:

(b) In addition to the penalty provided in (a) of this section, the director may suspend the certificate of authority of a title insurance rating organization, title insurance company, or title insurance agent upon failure to comply with an order of the director within the time limit allowed by the order. No certificate of authority may be suspended for failure to comply with an order until the time prescribed for an appeal has expired, or, if an appeal has been taken, until the order has been affirmed.

* Sec. 12. This Act takes effect immediately in accordance with AS 01.10.-070(c).

JAY S. HAMMOND, GOVERNOR

POUCH O – JUNEAU 99811

April 5, 1982

The Honorable Terry Martin
Chairman, Labor & Commerce Committee
State House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Martin:

I was quite surprised at the hasty action taken by the House Labor and Commerce Committee in passing out CSSB 831(L&C) on Friday afternoon. As you know, there were a number of persons, including some from the private insurance industry, who wished to provide testimony, but were unable to do so. In essence, the only testimony received was from the Associated General Contractors, and a few State agencies.

The subject of insurance coverage on large construction projects, such as those undertaken by the Alaska Power Authority, deserves extremely careful scrutiny. It is quite possible that the use of so-called "wrap-up" insurance programs, which would be prohibited by CSSB 831(L&C), could save the State many hundreds of millions of dollars over the next two decades. As you know, the Alaska Power Authority has on the books over $15 billion (nominal) in projects, including the proposed two dams of the Susitna River project. This latter project alone is estimated to cost at least $13.6 billion (nominal). In projects of this size, consolidating project coverage into a single "wrap-up" program could potentially return to the State several percentage points of the total project costs. If we are forced to use conventional means, such as required by your bill, this cost-saving approach will be prohibited.

Projects on APA's drawing boards represent the largest, single capital investment the State of Alaska will probably ever make. Regardless of the source of funds for these projects, be it the State treasury or the bond market, it is absolutely essential that the APA Board of Directors and its staff examine rigorously every possible means of economizing. The amounts of funds involved is so enormous that each minute fraction of total project costs that can be saved represents millions, and perhaps hundreds of millions of dollars.

If the Board continues to be hamstrung in its attempts to seek innovative cost-saving approaches in this program, I fear that projects costs could well excalate in a manner similar to that experienced by the Washington Public Power Supply System. A review of that program indicates that its astronomical cost overruns are due, in large part, on poor construction management by the board and its staff, and misrepresentation and errors by its contractors, compounded by a lack of diligence in seeking cost efficiencies. It's bad enough to be less than diligent in programs of this magnitude, but to be prevented by law from being so is doubly dangerous.

Sincerely,

Ernst W. Mueller
Commissioner

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Passage of HCSSB831 would elimiate the right of the State and it's agency, the Alaska Power Authority as owner and provider of funds for the hydro-electric projects, to protect itself with the best insurance coverage at the lowest price. "Wrap-up" insurance programs have been used on most major construction projects for the past forty years and substantial savings are well documented. Passage of HCSSB831 would increase costs to the State of Alaska in the following areas:

1) Increased insurance premiums ($36,645,000)
2) Loss of earnings on loss reserves not yet paid out ($9,288,000)
3) Necessity of purchasing "stop-gap" insurance ($13,087,000)
4) Increased litigation expense ($6,542,000)
5) Increased administrative expense ($284,000)

Total increase in state cost through FY 87 if "wrap-up" program prohibited = $65,786,000.

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 841 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to insurance policy provisions on policy loans and reinstatement of policies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.45.080(a) is amended to read:

(a) There shall be a provision that after three full years' premiums have been paid and after the policy has a cash surrender value and while no premium is in default beyond the grace period for payment, the insurer will advance, on proper assignment or pledge of the policy and on the sole security of the policy, at a specified rate of interest not exceeding eight percent a year, an amount equal to or, at the option of the party entitled to it, less than the loan value of the policy. The director may authorize rates of interest in excess of six percent only on a finding that the holders of policies will benefit from the increased earnings of the insurer resulting from the higher rates, through the use of higher dividends or lower premiums, or both. The loan value of the policy shall be at least equal to the cash surrender value at the end of the then current policy year, except that the insurer may deduct, either from the loan value or from the proceeds of the loan, an existing indebtedness not already deducted in determining the cash surrender value including interest then accrued but not due, the unpaid balance of the premium for the current policy year, and interest on the loan to the end of the current policy year. The policy may also provide that if interest on an indebtedness is not paid when

due it shall then be added to the existing indebtedness and shall bear interest at the same rate, and that if and when the total indebtedness on the policy, including interest due or accrued, equals or exceeds the amount of the loan value of the policy, the policy shall terminate and become void. The policy shall reserve to the insurer the right to defer the granting of a loan, other than for the payment of a premium to the insurer, for six months after the date of the loan application. The policy, at the insurer's option, may provide for automatic premium loan, subject to an election of the party entitled to elect. Except as provided in (e) of this section, the required interest rates on policy loans set out in this section apply only to policies issued before July 1, 1982.

* Sec. 2. AS 21.45.080 is amended by adding new subsections to read:

(c) A policy issued on or after July 1, 1982, shall have a provision specifying an interest rate on a policy loan not to exceed eight percent a year, or a provision permitting an adjustable maximum interest rate established under this subsection. An adjustable maximum rate of interest on a policy loan determined under this subsection may not exceed the higher of the published monthly average for the calendar month ending two months before the date on which the rate is determined, or the rate used to compute cash surrender values under the policy during the applicable period plus one-twelfth of a percentage point multiplied by the number of months in the applicable period. If an adjustable maximum rate of interest is used in a policy under this subsection the policy shall contain a provision that states times for the adjustment of the interest rate for that policy. Adjustment shall occur at least once every 12 months, but not more often than once every three months. The interest rate being charged may be increased if the published monthly average increases by one-half percent or more and the

reciprical provision of interest
increase in earnings of policies.

interest rate being charged must be reduced if the published monthly average decreases by one half percent or more. A life insurer shall (1) notify the policyholder of the initial rate of interest on the loan at the time a cash loan is made; (2) notify a policyholder who obtains a premium loan of the initial rate of interest on the loan as soon as it is reasonably possible to do so after making an initial premium loan; except as provided in (3) of this subsection, notice does not have to be given to the policyholder when a second or subsequent premium loan is added; (3) send reasonable advance notice of any increase in the rate to a policyholder who has a policy loan; and (4) include other relevant information on adjustment of interest rates in a notice required under this subsection. The loan value of the policy shall be determined in accordance with (a) of this section. A policy may not be terminated in a policy year as the sole result of a change in the interest rate during that policy year. If an interest rate changes, the insurer shall maintain coverage during the policy year until the date on which the policy would have terminated if the interest rate had not changed.

(d) In (c) of this section

(1) "interest rate" includes a rate of interest charged for reinstatement of policy loans for the period during and after the lapse of a policy;

(2) "policy" includes certificates issued by a fraternal benefit society and annuity contracts that provide for policy loans;

(3) "policy loan" includes a premium loan made under a policy to pay a premium that was not paid to the life insurer as it became due;

(4) "policyholder" includes an owner of a policy or a person designated to pay policy premiums according to the records of the life insurer;

(5) "published monthly average" means the monthly average of

corporate bond yields as published by Moody's Investors Service, Inc., or its successor, or if Moody's corporate bond yield average-monthly average corporates is not published, a substantially similar average, established by regulation adopted by the director.

(e) The provisions of (c) of this section on interest rates apply to all policy loans made on or after July 1, 1982, except that if a policy holder agrees in writing to the applicability of (c) of this section to a policy issued before July 1, 1981, that subsection applies to the policy.

* Sec. 3. AS 21.45.110 is repealed and reenacted to read:

Sec. 21.45.110. REINSTATEMENT. Except as provided in AS 21.45.-230, there shall be a provision that unless (1) the policy has been surrendered for its cash surrender value, (2) its cash surrender value has been exhausted, or (3) the paid-up term insurance, if any, has expired, the policy will be reinstated at any time within three years (or two years in the case of industrial life insurance policies) from the date of premium default upon written application, the production of evidence of insurability satisfactory to the insurer, the payment of all premiums in arrears with interest at a rate not exceeding six percent a year compounded annually, and the payment or reinstatement of interest due to the insurer on a loan on the policy with interest as provided in AS 21.45.080(c).

* Sec. 4. This Act takes effect July 1, 1982.

Terry - This answers the questions you asked.

Honorable Terry Martin
Alaska State Legislature
Pouch V
Juneau, AK 99811

Re: CSSB 841

Dear Representative Martin:

The committee substitute introduced by the Senate Labor and Commerce Committee incorporated all of the changes recommended by the Division of Insurance. Their memo is attached. The explanation of the background and basic structure of the bill in my January letter to you remains accurate.

Thank you for taking this bill up. It passed the Senate 19 - 1 on April 20.

Sincerely,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

Michael T. Thomas

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2500

LEGISLATIVE POSITION PAPER
SB 841
March 15, 1982

The Department of Commerce and Economic Development favors SB 841 if amended and recommends its passage.

The proposed legislation is based on a model law of the National Association of Insurance Commissioners. It would allow the use of either a fixed rate of interest on life insurance policy loans not to exceed 8% or the use of a flexible rate of interest which would be adjusted at least once a year based on an external index.

The current approach is to use a fixed rate of interest capped at 8%. This rate is generally lower than the cost of such loans and results in an impact on policyholders dividends since those funds in life insurance policy loans are not available for investment in more lucrative markets thus reducing income available for distribution as dividends. This impacts the ultimate net cost of life insurance. It also creates a subsidy of policyholders using the policy loan feature of the policy by those policyholders who do not use the policy loan feature.

The current cap has an impact on insurer liquidity thus impacting the flexibility they have in their investment portfolic. Income cannot be maximized which would accrue to the advantage of policyholders if it could be maximized.

Attached to this paper is a list of proposed amentments. Also attached is a section by section analysis and in some cases, a line by line analysis of the bill. The effect of proposed amendments is also explained in those comments.

Introduced: 3/8/82
Referred: Labor & Commerce and Judiciary

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

SENATE BILL NO. 841

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to insurance policy provisions on policy loans and reinstatement of policies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.45.080(a) is amended to read:

(a) There shall be a provision that after three full years' premiums have been paid and after the policy has a cash surrender value and while no premium is in default beyond the grace period for payment, the insurer will advance, on proper assignment or pledge of the policy and on the sole security of the policy, at a specified rate of interest not exceeding eight percent a year, an amount equal to or, at the option of the party entitled to it, less than the loan value of the policy. The director may authorize rates of interest in excess of six percent only on a finding that the holders of policies will benefit from the increased earnings of the insurer resulting from the higher rates, through the use of higher dividends or lower premiums, or both. The loan value of the policy shall be at least equal to the cash surrender value at the end of the then current policy year, except that the insurer may deduct, either from the loan value or from the proceeds of the loan, an existing indebtedness not already deducted in determining the cash surrender value including interest then accrued but not due, the unpaid balance of the premium for the current policy year, and interest on the loan to the end of the current policy year. The policy may also provide that if interest on an indebtedness is not paid when due it shall then

COMMENTS

NO CHANGES THIS PAGE

be added to the existing indebtedness and shall bear interest at the same rate, and that if and when the total indebtedness on the policy, including interest due or accrued, equals or exceeds the amount of the loan value of the policy, the policy shall terminate and become void. The policy shall reserve to the insurer the right to defer the granting of a loan, other than for the payment of a premium to the insurer, for six months after the date of the loan application. The policy, at the insurer's option, may provide for automatic premium loan, subject to an election of the party entitled to elect. Except as provided in (e) of this section, the required interest rates on policy loans set out in this section apply only to policies issued before June 30, 1982.

On line 11, change "June 30" to read "July 1". Since the proposed effective date of this proposal is July 1, 1982, we feel that the use of July 1, in the language would be more consistent.

* Sec. 2. AS 21.45.080 is amended by adding new subsections to read:

(c) A policy issued after June 30, 1982 shall have a provision permitting a maximum interest rate on a policy loan of eight percent a year.

On line 13, following the word "issued", insert the words "on or" and change "June 30" to read "July 1".

On line 14, remove the words "permitting a maximum" and insert "specifying an", also delete the word "of" and insert "not to exceed".

This language change allows a policy loan interest rate up to 8% rather than requiring exactly 8% with nothing less permitted. This comports with the way it is done now and has been done in the past. It retains the "traditional"method of computing policy loan interest.

COMMENTS

or a provision permitting an adjustable maximum interest rate established under this subsection.

The principal component of this proposal is that it allows a life insurance company to use a policy loan interest rate that is adjustable subject to conditions set out in the proposal. The Insurer would have the option of offering a fixed rate of interest not to exceed 8% or of offering the adjustable rate of interest or both. The adjustable rate is based on an external index described in this section of the bill. The option selected must be described in the policy itself.

An adjustable maximum rate of interest on a policy loan determined under this subsection may not exceed the higher of the published monthly average for the calendar month ending two months before the date on which the rate is determined,

A two month period has been established between the time that is used as the monthly base for establishing the indexed rate and the time the adjustable indexed rate is determined and becomes effective. This two month period is intended to give the insurer the necessary time in which to determine the actual rate as well as the time to notify policyholders with existing loans of any change in the rate reasonably in advance as required on page 3, lines 2 - 6. Thus, for example, the monthly average for October is published by Moody's during the early part of November. An insurer during the remainder of November could determine the rate that will be charged as of January 1 and take the administrative steps necessary to notify policyholders of any increase in the rate. Notices could be mailed on December 1 along with the premium notice or the policy loan or dividend statement. The rate would then become effective on January 1 as to all outstanding and new loans thereafter.

COMMENTS

or the rate used to compute cash surrender values under the policy during the applicable period plus one percentage point.

On line 21, following the word "point" insert the words "a year".

This clarification is needed since the period dealt with this provision could be as small as three months and as much as one year.

This provision provides for a floor under the indexed maximum rate approach, that is, a minimum on the maximum rate. Whenever the index falls below the specified rate, the floor would apply. A minimum is considered necessary to ensure that the maximum policy loan interest rate would never be lower than the interest rate used to compute the policy's nonforfeiture values. In effect, the life insurer should, as a minimum, be able to charge an interest rate that is equivalent to the rate of interest earned by the policyholder on his policy's cash surrender values. This protects the insurer's solvency. An additional 1% has been added to the rate used to compute the nonforfeiture value in order to cover administrative expenses.

If an adjustable maximum rate of interest is used in a policy under this subsection the policy shall contain a provision that states times for the adjustment of the interest rate for that policy.

A policy issued with the indexed maximum rate provision must state how often the interest rate on policy loans may be changed by the company. That is, it must state whether the rate is to be determined quarterly, semi-annually or annually.

Adjustment shall occur at least once every 12 months, but not more often than once every three months.

The rate of interest on policy loans under the indexed maximum rate provision may be

determined as often as every three months but must be determined by the insurer at least once a year. This permits flexibility so that each life insurer may choose a frequency of change compatible with the company's manner of doing business. The frequency with which the company intends to determine the interest rate is required to be included in the policy.

For example, if a company chose to determine interest rates once a year, it could do so by calendar or fiscalyears or by policy anniversary dates. If a company chose to determine interest rates on a calendar year basis, the new rate, based on the average for October, would apply to loans outstanding or taken out on or after January 1 and would be in effect for the entire year. If policy anniversary dates were chosen, the company could establish a new rate every month for policies with anniversaries in that month and the new rate would continue for such policies until the next anniversary date. Thus, for such a company, there could be twelve different rates set by reference to the indexed maximum but only one rate would apply to a particular policy from one anniversary to the next anniversary.

If a company chose to determine interest rates quarterly, it could do so on a calendar basis or by policy anniversary dates. Thus for example, a company could increase or decrease the interest rate as of January 1, April 1, July 1 and October 1 or at three month intervals during a policy year. The increase or decrease would be based on the

index for the month ending two months prior to the change. For the calendar quarter example, the base months would be October, January, April, and July respectively. Rate changes would apply to all outstanding loans and new loans made after the effective date of change but prior to the effective date of the next change.

The interest rate being charged may be increased if the published monthly average increases by one-half percent or more

Companies may increase their interest rate if the Moody's index is 1/2 of 1% or more above the rate actually being charged. Of course, a company is not required to increase the rate and may decide to keep the rate being charged well below the permissible rate. This provision will prevent companies from changing the interest rate for insignificant amounts.

and the interest rate being charged must be reduced if the published monthly average decreases by one-half percent or more.

Companies are required to decrease the interest rate at the same frequency interval as they can increase the rate under the provisions of the policy whenever the indexed maximum rate is 1/2 of 1% or more below the rate actually being charged at that time. Thus, this provision requires timely decreases in the rate as the index drops but is tempered by the 1/2 of 1% factor in order to avoid reducing the rate for an insignificant amount.

A life insurer shall (1) notify the policyholder of the initial rate of interest on the loan at the time a cash loan is made; (2) notify a policyholder who obtains a premium loan of the initial rate of interest on the loan as soon as it is reasonably possible to do so after making an initial premium loan; except as provided in (3) of this subsection, notice does not have to be given to the policyholder when a second or subsequent premium loan is added; (3) send reasonable advance notice of any increase in the rate to a policyholder who has a policy loan; and

COMMENTS

(4) include other relevant information on adjustment of interest rates in a notice required under this subsection.

Provisions for notice have been established in order to protect the policyholder. Notice of the currently effective interest rate, whether the 8% fixed maximum or indexed maximum is used, must be given at the time a cash loan is made. Advance notice of any increase in the policy loan interest rate must also be given to policyholders with outstanding loans affected by the increase. No advance notice is required of a decrease in the rate. Since it is not possible to provide advance notice with respect to automatic premium loans, notice should be given as soon as is reasonably practical after the rate is increased. Finally, all notices sent to policyholders must state the type of rate being used, that is, a maximum of 8% or the indexed maximum, and the frequency with which the company may change the variable rate.

The loan value of the policy shall be determined in accordance with (a) of this section.

This proposal does not act as a repealer of the current statutory provisions relating to the loan value of the policy which is found in AS 21.45.080(a) on page 1 and 2 of this proposal.

A policy may not be terminated in a policy year because the interest rate has changed during that policy year.

On line 12 delete the word "because" and insert the words "as the sole result of the change in" also remove the words "has changed"

On line 13, following the word "year" remove the period and add "; the insurer shall maintain coverage during that policy year until the time at which the policy would have terminated if there had been no change during that

(d) In (c) of this section

(1) "interest rate" includes a rate of interest charged for reinstatement of policy loans for the period during and after the lapse of a policy;

(2) "policy" includes certificates issued by a fraternal benefit society and annuity contracts that provide for policy loans;

(3) "policy loan" includes a premium loan made under a policy to pay a premium that was not paid to the life insurer as it became due;

(4) "policyholder" includes an owner of a policy or a person designated to pay policy premiums according to the records of the life insurer;

(5) "published monthly average" means the monthly average of corporate bond yields as published by Moody's Investors Service, Inc., or its successor, or if Moody's corporate bond yield average-monthly average corporates is not published, a substantially similar average, established by regulation adopted by the director.

policy year".

This provision lost something in the drafting which hopefully this correction will resolve. Since, in many instances, it is impossible to tell in advance the amount of interest to be paid on a loan because of the flexible nature of the interest rate, there is the possibility, in situations where a maximum loan is taken, that a policy might lapse because of an increase in the interest rates. In order to avoid this possibility, this provision prevents a policy from lapsing during the policy year solely as a result of an increase in the interest rate during that policy year. The insurer must maintain coverage during that policy year until the time the coverage would have terminated had the interest rate not been increased during that policy year.

See comments on Sec. 3 of the bill.

Automatic premium loans are to be treated in the same manner as cash loans on a policy and would be subject to the same interest rate.

Moody's Investors Service, Inc. has published the Corporate Bond Yield Average - Monthly Average Corporates for many years. It was chosen as the index because it generally corresponds to the rate available to insurers

on new long term investments and consequently, its use promotes equity between policyholders who borrow against their policy and policyholders who do not borrow. It is generally a smooth and stable long-term rate not subject to the volatile highs and lows from month to month of the various short-term rates. Nevertheless, it is responsive to the changing interest rates in the economy. Another factor in choosing this particular index is that it is the index adopted by the National Association of Insurance Commissioners for its Model Standard Valuation and Nonforfeiture Laws. Moreover, it is widely recognized and readily available. The monthly average is published within a few days of the close of the calendar month. Thus, a policyholder or regulator could readily determine the maximum policy loan interest rates at any given moment.

The provision permits a similar index to be substituted in the event that Moody's or any successor thereto no longer publishes this particular index.

(e) The provisions of (c) of this section on interest rates apply to all policy loans made after June 30, 1982 except that if a policy holder agrees in writing to the applicability of (c) of this section to a policy issued before July 1, 1981, that subsection applies to the policy.

On line 2, following the word "made" insert "on or". Also change"June 30" to read "July 1".

This section makes it clear that policies in existence prior to the effective date of this proposal could be amended, with the written agreement of the policyholder, to include the provisions of this proposal.

* Sec. 3. AS 21.45.110 is repealed and reenacted to read:

Sec. 21.45.110. REINSTATEMENT. Except as provided in AS 21.45.-230, there shall be a provision that unless (1) the policy has been surrendered for its cash surrender value, (2) its cash surrender value has been exhausted, or (3) the paid-up term insurance, if any, has expired, the policy will be reinstated at any time within three years (or two years in the case of industrial life insurance policies) from the date of premium default upon written application, the production of evidence of insurability satisfactory to the insurer, the payment of all premiums in arrears with interest at a rate not exceeding six percent a year compounded annually, and the payment or reinstatement of interest due to the insurer on a loan on the policy with interest as provided in AS 21.45.080.

* Sec. 4. This Act takes effect July 1, 1982.

COMMENTS

On line 18, following "AS 21.45.080" add "(c)"

The interest rate permitted on the reinstatement of policy loans for the period during and after the lapse of the policy shall be the same interest rate applicable to policy loans. This avoids the administrative complications that would ensue if a different rate were applicable to reinstatements of policy loans. However, interest on past due premiums would not be affected.
