SUBJ: Confirmation Hearing

DATE: January 19, 1984

The following comments were prepared as a result of a discussion during which legal advice was requested for the question:

"What is the role of the Committee in conducting confirmation hearings?"

The question which the individual committee members must resolve in their own minds is:

"Do you believe the nominee would properly fulfill the duties of the Commissioner?"

The decision is essentially a political process as opposed to a legal process. There is no requirement to apply the rule of "burden of proof"; a more appropriate description is a "burden of persuasion".

During the process, the determination of an act or acts being technically illegal is "mildly interesting" and in large part, irrelevant from the perspective of the Committee. The question of impropriety is more important in the decision making process.

The rationale for the previous statement is that the commitment of an illegal act(s), even if substantially proven, may or may not be indicative of a person's qualifications to perform assigned duties and the Committee is not in a position to prosecute for illegal acts.

On the other hand, the Committee is charged with making a judgement, based on all reasonably available information, whether or not the actions of the individual convince the Committee that the nominee will, or will not, properly fulfill the role of Commissioner.

RESUME

Emil Reynold Notti
6735 Gray Street
Juneau, AK 99801
Phone: (907) 586-2168

Education

BSEE, Northrop University
Inglewood, California - 1961

Military Service

U.S. Navy 1952-1956 - Honorable Discharge

Honors

Honorary Doctor of Humane Letters Degree from Alaska Methodist University, 1969
President Emeritus, Alaska Federation of Natives
Nominee - Alaskan of the Year, 1969

Employment

December 1982 to Present: Director, Legislative Relations for Governor Bill Sheffield.
April 1980 - December 1982: Emil Notti & Associates, Anchorage, Alaska

Job placement for high level professional personnel. Generate job placements, interview potential candidates, screen for suitability of client, and check references for clients.

April 1978 - March 1980: President, Doyon, Limited, Fairbanks.

The President of Doyon, Limited is chief executive officer for the Corporation. The President is responsible for the general supervision and control of the business, property, and affairs of the Corporation. He reports to the Board of Directors monthly and to the stockholders annually. The President presides at all meetings of the stockholders.

1976 to April 1978: Senior Vice President, Doyon, Limited, Fairbanks.

The Senior Vice President has internal management of the Company. The Vice President of Finance, Director of Resources, and Director of Lands report to the Senior Vice President. He is part of a senior investment committee He held negotiations for oil and gas and heavy minerals exploration on millions of acres of Company land. He has responsibility for dealing with government bodies - both legislative and administrative. Operating budgets and planning

functions are the responsibility of the Senior Vice President. Preparation and presentation of reports to the Board of Directors and to the stockholders at the Annual Meeting of Stockholders are made by the Senior Vice President.

September 1972 to 1976: President, Alaska Native Foundation, Anchorage.

Chief Administrator for the Foundation. Prepares budgets, seeks contracts from State and Federal agencies, coordinates seminars and training activities, chairs Board meetings.

June 1971 to September 1972: Deputy Commissioner, Department of Health & Social Services, State of Alaska.

Full responsibilities for Department in absence of Commissioner. Department had approximately 1400 employees. Worked with Divisions in Department to prepare budget. The Divisions in the Department were Public Health, Mental Health, Administration, Corrections, and Family and Childrens Services. Other programs attached to the Commissioner's office were Office of Alcoholism and Office of Aging.

April 1970 - May 1971: Self-Employed. Electronic Systems, Sitka.

Sales and service of electronic equipment for commercial boats, cars, institutions and homes.

June 1967 - March 1970: President, Alaska Federation of Natives, Anchorage. The Alaska Federation of Natives, Native land claims lobbying. Organizing regional Native organizations.

Dear Mr. Speaker:

The House Community and Regional Affairs Committee has held confirmation hearings on Mr. Emil Reynold Notti for confirmation to the Commissioner's position to the Community and Regional Affairs Department, State of Alaska.

Mr. Notti was recommended for appointment by Governor William Sheffield.

After meeting and voting on the matter, the House Community and Regional Affairs Committee recommends that the above named person be confirmed to that position.

Respectfully submitted,

Mike W. Miller, Chairman

Dear Speaker Hayes,

This is to request an extention of the April 1, 1983 recommendation form the Committee on Community & Regional Affairs pertaining to the confirmation of Mr. Mark Lewis as Commissioner, Department of Community and Regional Affairs.

We initially scheduled the hearings to begin on March 21, 1983, this schedule was based upon timely receipt of a report from the Department of Revenue and of receiving legal opinions on related issues. The report arrived this morning and will clearly require additional staff time to fully analyze. In all fairness to Commissioner Lewis, we need to clear up the allegations that have been addressed in the report.

The primary purpose of this request is to insure that the Committee provide Mr. Lewis with a full hearing and, in so far as possible, clear the air on any possible allegations.

Sincerely,

Barbara Lacher

Mr. Mark Lewis, Commissioner
Department of Community & Regional
Affairs
Juneau, Alaska

Dear Commissioner Lewis:

I regret that I must inform you that confirmation hearings for your appointment, scheduled for March 21 and 22, must be delayed.

When we initially scheduled the hearings for the above dates, it was with the understanding that we would be in receipt of a report from the Department of Revenue and of receiving legal opinions on related issues. The report just arrived this morning and will clearly require additional staff time to review. It is my intention to inform myself and the committee to the fullest extent possible and it is with this in mind that I am delaying the hearing.

Please rest assured that hearings will be rescheduled as soon as possible.

Sincerely,

Representative Barbara Lacher
Chairman, House C & R A Committee

Dear Commissioner Lewis:

Pursuant to AS 39.05.080, the House Committee on Community and Regional Affairs is in receipt of communications that request the Committee to conduct hearings pertaining to your confirmation as Commissioner, Department of Community and Regional Affairs.

This is to notify you that confirmation hearings will be scheduled to begin at 3:15 p.m. on March 21 in Room 205, Capitol and on March 22, in Room 126, Capitol. Additional hearings may be scheduled, if deemed necessary. The Committee respectfully requests your presence during the hearings.

Sincerely,

Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

Am. Jur. 2d and ALR references. — 63 Am. Jur. 2d, Public Officers and Employees, §§ 5, 38-81, 360-413.

Conclusiveness of governor's decision in removing or suspending officers, 52 ALR 7; 92 ALR 998.

Constitutionality of statute providing for direct appeal or other review of orders and rulings of governor, 66 ALR 586.

Prohibition as means of controlling action of governor, 115 ALR 14.

Legislative power to prescribe qualifications for or conditions of eligibility to constitutional office, 34 ALR2d 155.

Sec. 39.05.065. Qualifications of members of the Board of Education. (a) Each member of the Board of Education shall be a citizen of the United States and have been a resident of Alaska for at least three years.

(b) A member of the Board of Education may also be a member of a district school board. (§ 11 ch 96 SLA 1967; am § 19 ch 26 SLA 1980)

Revisor's note. — "District" as used in subsection (b) of this section apparently means a district of the state public school system as set out in AS 14.12.010.

Cross reference. — As to appointment of members of Board of Education, see AS 14.07.085.

Effect of amendment. — The 1980 amendment, added subsection (b).

Sec. 39.05.070. Purpose. It is the purpose of AS 39.05.070 — 39.05.110 to—provide procedural uniformity in the exercise of appointive powers conferred by the legislature to eliminate, insofar as possible, recess or interim appointments except in the event of death, resignation, inability to act or other removal from office and the exercise, insofar as possible, of appointive powers only when the legislature is in session. (§ 1 ch 64 SLA 1955)

Section repugnant to tacit confirmation. — The expressed intention of this section is repugnant to tacit confirmation of appointments. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

Sec. 39.05.080. Procedure for all appointments. Appointments shall be made in the following manner:

(1) The appointing authority shall, within 30 days of the convening of the legislature in regular session, present to the legislature for confirmation the names of the following persons: (A) persons appointed to a position or membership who have not previously been confirmed by the legislature or either house of it; (B) persons appointed by him subject to confirmation to fill an existing position or membership vacancy; (C) persons to be appointed subject to confirmation to fill a position or membership the term of which shall expire before July 2, following the session of the legislature. If an appointment is made after the deadline but while the legislature is in session, the appointing

authority shall, within five calendar days after the appointment is made, present to the legislature for confirmation the name of the person appointed. The deadline may be extended by the legislature by the approval of a concurrent resolution.

(2) When appointments are presented to the legislature for confirmation,

(A) the presiding officer of each house shall assign the name of each appointee to a standing committee of that house for a hearing, report and recommendation; standing committees of the two houses assigned the same person's name for consideration may meet jointly to consider the qualifications of the person appointed and may issue either a separate or a joint report and recommendation concerning that person; then

(B) the legislature shall, before the end of the session in which the appointments are presented, in joint session assembled, act on the appointments by confirming or declining to confirm by a majority vote of all of the members the appointments presented.

(3) When the legislature declines to confirm an appointment, the legislature shall notify the appointing authority of its action and a vacancy in the position or membership exists which the appointing authority shall fill by making a new appointment. The new appointment shall be presented for confirmation to the legislature within 20 calendar days following receipt by the appointing authority of the legislature's notification of its refusal to confirm the prior appointment. If the name of a person is submitted and is not confirmed, the appointing authority may not, upon resubmission of appointments, submit again the name of the person whose confirmation was refused for the same position or membership during the session of the legislature at which confirmation was refused. The person whose name is refused for appointment by the legislature may not thereafter be appointed to the position or membership during the interim between legislative sessions. Failure of the legislature to act to confirm or decline to confirm an appointment during the session in which the appointment was presented is tantamount to a declination of confirmation on the day the session adjourns.

(4) Pending confirmation or rejection of appointment by the legislature, persons appointed shall exercise the functions, and have the powers and be charged with the duties prescribed by law for the appointive positions or membership. (§ 4 ch 64 SLA 1955; am §§ 1—3 ch 1 SLA 1964; am § 1 ch 2 SLA 1967; am § 1 ch 65 SLA 1974; am § 2 ch 82 SLA 1975)

Legislative history of ch. 82, SLA 1975. — See Bradner v. Hammond, Sup. Ct. Op. No. 1297 (File No. 2802), 553 P.2d 1 (1976).

Laws requiring bilateral appointments are mandatory. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

Paragraph (2) of this section imposes a direct mandate upon the legislature to act upon the nominations of the governor. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

  Status: Army Reserves

Work Experience:

- City of Pullman
  Pullman, Washington
  1972 - 1974

  Program Coordinator
  Worked part-time while an undergraduate student as staff assistant to a City Department Head

- City & Borough of Juneau
  Juneau, Alaska
  June 1974 - February 1977

City/Borough Administrative Assistant (Assistant to the City Manager)

The City of Juneau is a consolidated full-service "home-rule" city/borough government of the capital of the State of Alaska with a population of 22,000; net budget approximately $40 million, including $15 million capital budget. Responsibilities as the Assistant to the City Manager included: budget preparation and budget management assignments; direct responsibility for the City's insurance program and State and Federal grant programs. As staff assistant to the manager, I conducted management analysis and review of various City operations, supervised a wide variety of civic projects and aided in the development of staff policy on a broad spectrum of issues.

- City of Valdez
  Valdez, Alaska
  January 1978 - May 1978

Assistant City Manager

Managed day-to-day routine operations of the City, along with being directly responsible for financial operations. Did research; monitored, evaluated and directly supervised various programs; developed staff policy recommendations on a broad spectrum of issues.

- City of Valdez
  Valdez, Alaska
  May 1978 - July 1982

City Manager

The City of Valdez is a growing oil pipeline and port community - the terminus of the Trans-Alaska Pipeline and North America's largest oil port. The City is a full-service, "home-rule," local government encompassing 275 square miles, with a 1981 net operating budget of $29 million and a capital budget of $70 million. The Community has approximately 80 full-time City employees and a population of approximately 4,000 people.

The Community's goals, as defined and developed, are to expand and diversify the economy - building on the economic base of the pipeline terminal and utilizing the City's unusual tax base to rebuild and establish the community's long term assets while improving the quality of life for its citizens.

I, as City Manager, was able to make significant contributions to the City of Valdez while, at the same time, gaining a great wealth of management experience, especially in the fields of municipal finance and industrial development, as well as obtaining the experience of piloting major construction projects with significant environmental considerations through Federal and State permit process, on schedule and within budget.

Experience Summary

- Identified, developed and implemented comprehensive community goals with the City Council over a period of years.

- Planned and implemented a comprehensive capital improvement program which included: major port facilities, schools, roads, storm and sanitary sewers, parks, library, civic center, administration building and police and fire stations.

- Facilitated the economic development and diversification of the City.

- Developed the City as one of the major leaders in tax-exempt financing.

- Reconstructed and redirected the City's financial systems.

- Developed a capable staff who are able to follow through with the City's diversification programs.

Economic Development and Diversification

The City Administration established a sound working relationship with industry, which has been the basis for Valdez's economic development. The Administration's efforts included the development of the oil industry, port and marine industries, seafood industry, pipeline related industries, as well as small businesses.

Tax-Exempt Financing

The City of Valdez has become a leader in the field of tax-exempt financing. I was the key administrative official for the City of Valdez on the following financing:

- in the final issues of $1.35 Billion in Marine Terminal Revenue Bonds;

- $600 million developed to construct oil facilities in Valdez;

- $48 million Port Redevelopment bond issue to construct a new "interior Alaska" container port at Valdez;

- $10 million housing mortgage revenue bond (low interest8 1/2%) which provided tax-exempt housing mortgage money for Valdez residents; and

- $18 million school bond issue used to construct various school facilities

Capital Construction

Major new capital construction programs completed under my administration include the following:

- Library facilities - $2.6 million

- Administration and Police buildings - $3.0 million

- Three fire stations (2 rural and 1 central)

- City shop (heavy equipment, vehicle maintenance facility)

- Roads, storm and sanitary sewers, parks

- Airport reconstruction - $7.0 million (including Navigational Aid System)

- Port facilities - $48.0 million (cargo and container)

- Civic Center (includes theater and large convention center)

These construction projects were designed to build Valdez's infrastructure of community facilities while stimulating the economy in the midst of a temporary recession. During these years the tax millage rate was lowered from 8.9 mills to 6.3 mills.

RECEIVED

JAN 27 1983

DEPT. OF COMMUNITY AND REGIONAL AFFAIRS

POLICE DEPARTMENT
January, 24, 1983

Governor Bill Sheffield
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

I am writing this letter because I feel that it is important that other views be known. I have never used the news media or other public sources to air my personal opinions. However; recently after reading several stories in the Anchorage Daily News I find myself compelled to ask for a few minutes of your time.

I will not answer each point that has been made by the Anchorage Daily News as I feel this is a blatant attempt by them not only to discredit Mr. Lewis but also a cheap way to sell newspapers.

I have worked closely with Mr. Lewis and was very pleased with his appointment to the state cabinet post. I feel this appointment and others that you have made are a clear sign that we will not only have honesty in our state government but that we will have progressive government rather than business as usual.

In the time Mr Lewis spent as City Manager with the City of Valdez I found his integrity and honesty to be of the highest level. I would not hesitate to work for or with Mr. Lewis on any matters.

To allow blatant attempts by the Anchorage Daily News and others who appear to have personal grudges against Mr. Lewis to remove Mr. Lewis from office would be a serious miscarriage of justice.

I also feel that this type of political mudslinging would damage our political process if allowed to have any credibility.

Thank you for your time. Please be assured of my support and cooperation.

Sincerely,

Patrick M. Shely
Chief of Police

The Honorable
Representative Barbara Lacher
Pouch V
Juneau, Alaska 99811

Dear Rep. Lacher:

I have recently met with the Department of Community and Regional Affairs Commissioner and wish to convey to you my favorable impression of him. Mr. Lewis strikes me as a person who is sensitive to municipal problems of communities of all sizes in our state.

It is my hope that you will look favorably on his confirmation. Although I have heard of certain allegations in reference to Mr. Lewis, I am not personally aware of anything substantial against him to cause me to speak against his confirmation.

With this in mind, I am in support of Mr. Lewis as Commissioner of Community and Regional Affairs and I sincerely urge you to vote in favor of his confirmation.

Thank you for your consideration.

Sincerely,

Nels A. Anderson Jr.

Mr. Mark Lewis
City Manager
City of Valdez
P.O. Box 307
Valdez, Alaska 99686

Dear Mark:

It's with mixed feelings that I received word of your intent to resign as City Manager of Valdez on the first of next year. Certainly, the citizens of Valdez have benefited by your energies and dedication in directing the city into the 80's. Your accomplishments in guiding the economic growth of Valdez in a sensible manner, but always with an eye towards the long-term, are exceedingly noteworthy and will not soon be forgotten.

We, at Seatrain, will miss dealing with you as a representative of Valdez, but there is no doubt your management skills will greatly enhance the prospects of your next endeavor and bring you personal rewards and fulfillment, as well.

I personally wish you much success in the years ahead. Please take leave from Valdez with the thought the city is better for your efforts and take the best wishes of your associates with you as you begin a new journey elsewhere.

Best personal regards.

Sincerely,

JOHN W. GRAVES

Dear Mark:

Although your letter of resignation was not a surprise, it was certainly received with deep regret.

You have made a substantial contribution to the City of Valdez and are clearly the most outstanding city manager with whom I have ever dealt.

Naturally—I am extremely interested in your future plans and would appreciate hearing from you in that regard if you deem that appropriate.

My colleagues join me in extending to you our grateful appreciation for the opportunity to work with you in the past, and we send you best wishes for unbounded success in the future.

Stephen A. McAlpine, Mayor
City of Valdez
P.O. Box 307
Valdez, Alaska 99686

Dear Mr. McAlpine:

On this date the Board of Directors of the Valdez Chamber of Commerce held its regular meeting and during a discussion of business matters, the subject of the resignation of City Manager, Mark Lewis, was addressed.

It was the unanimous decision of the Board that it should urge you and the council members to request that Mr. Lewis withdraw his resignation and seriously consider continuing his relationship with the City of Valdez as City Manager.

Our reasons for making this request are many, but to detail a few, we list the following:

1. Mr. Lewis has been professionally and personally involved in the City activities with an intensity almost unknown heretofore. This is a quality we would not like to see lost.

2. If there were a change in the city administration, existing projects currently underway could be severely delayed, curtailed or abandoned; or the direction of these projects could be substantially changed from the original intent.

3. Mr. Lewis has shown outstanding abilities and has demonstrated capability in the administration of the City which would be sorely missed should he leave the community.

4. We are aware of, and would not like to lose, Mr. Lewis' expertise in the area of managing the City's excess funds and maximizing the income therefrom.

5. Mr. Lewis has demonstrated that he has the ability to gain the respect of federal, state and

industry's top people which is important to Valdez in our future growth and development.

6. Our contacts with many of the citizenry of Valdez show that they would like to see Mr. Lewis continue in his present position.

We feel it is in the best interests of the community of Valdez that Mark Lewis be retained as City Manager. Therefore, we urge you and the council to accomplish this in whatever manner you deem appropriate.

Very truly yours,
VALDEZ CHAMBER OF COMMERCE
BOARD OF DIRECTORS

combination of reachable and unreachable things," Mathis said.

Guests were able to purchase the designer fashions after the show, but Mathis said she sold only "a third of as much as I would have liked to have sold."

Still, Mathis said, "We were terribly pleased. Everything was so organized and prepared. It made it really easy for us.

"We feel we have made a lot of friends in Valdez," she said.

Although the fashions were imported, Rasmus said it was a

Lewis changes mind, urged to stay here

City Manager Mark Lewis, who two weeks ago said it was time to pack his bags, withdrew his resignation Monday and said he would stay.

The community and City Council members had "convinced me I haven't quite overstayed my welcome yet," said Lewis after he asked the council to disregard his earlier resignation.

No council action was required, because the body had not yet acted on the resignation. Mayor Stephen McAlpine, who helped spearhead an effort to keep Lewis on the city payroll, said the council would gladly turn the matter aside.

"I think the city is the largest beneficiary of his (Lewis') decision," McAlpine said after the regular council meeting Monday.

A major factor in the 29-year-old Lewis' reconsideration apparently was a letter written to McAlpine by the Valdez Chamber of Commerce board of directors. Meeting last week, the board decided to ask the council to keep Lewis, and "to accomplish this in whatever manner you deem appropriate."

Lewis, said the chamber officials, "has been professionally and personally involved in the city activities with an intensity almost unknown heretofore."

With a change in the city manager's spot, "existing projects currently underway could be severely delayed, curtailed or abandoned; or the directions of these projects could be substantially changed from the original intent," the letter continued.

Lewis was praised for his financial management capabilities, with the chamber recognizing his "expertise in the area of managing the city's excess funds and maximizing the income therefrom."

At the same time Lewis was being cited for his "ability to gain the respect" of government officials at various levels by the chamber board, he was in Fairbanks being elected president of the City Managers Association of the Alaska Municipal League.

McAlpine, who also was at the AML meeting, indicated there was a lot of interest expressed by other cities' officials in latching onto Lewis, who had said he would leave his post at the end of the year.

But Lewis said he became convinced that he was still welcome in Valdez, also.

His decision did not involve apprehension about his relationship with the newly elected council, Lewis said. In fact, one of the reason he asked to resign was because he was getting along so well with the current council, Lewis said.

"It was a team relationship. It was a good relationship," he said.

In deciding to submit his resignation, Lewis said he had also considered that the city was in top financial shape, having just received a spotless audit report.

He said he had come to like Valdez too much "to leave under any other circumstances than the very best."

Welcome back, Mark

There was a collective sigh of relief at City Council Monday when Mark Lewis asked that his resignation, announced two weeks earlier, be withdrawn.

There was no objection.

There had been much objection the past two weeks to the city manager's decision to look elsewhere for employment. And there was apparently a lot of lobbying going on to get him to change his mind.

The youthful Lewis was as politic this week as he was two weeks ago—revealing little in public about the real reasons behind his decisions. He continued to draw on the analogy that a city manager is like a guest in someone else's house. The worst thing that guest can do is overstay his welcome.

The best thing the guest could do was move on while times were good and everything was running smoothly.

Lewis and many others feel the city is cruising nicely now. But what came out the past two weeks is that there is a strong opinion that Lewis is a necessary gear in the machinery.

The Chamber of Commerce board of directors strongly voiced this opinion in a letter to Mayor Stephen McAlpine urging the council to do what it could to pursuade Lewis to stay. The board also said its opinion reflected the community.

"Our contacts with many of the citizenry of Valdez show that they would like to see Mr. Lewis continue in his present position," the board's letter read.

It is an extremely unusual situation for a person in Lewis' position to retract a resignation once tendered. But Lewis is an unusual administrator. His talents are perhaps appropriate for these extraordinary times in Valdez—with so many projects of sizable magnitude in progress.

To whomever or whatever made him change his mind, we take off our hats and say, "Good work."

And now let's get back to work.

– Robert Armstrong

Support your local jazz musician

I would like to comment about the fledgling jazz opportunities in Anchorage, Alaska. I am an Alaskan since 1967 and have played in various "in town" settings as an entertainer. It seems in the late 70s (disco era), local musicians were given their walking papers by local club owners in favor of "out of towners." Do Alaskans really think "in town" acts can't be quality?

I went to a local "jam session" last Sunday at the Tiki Cove. It seems the house band members (which are composed mostly of non-[illegible] Alaskan residents) come to get all of the jazz jobs that come [illegible] them to entertain themselves and could not let local musicians play alone as a group for even one song.

The purpose of "jam sessions" are to let everyone express themselves musically. People have to be able to crawl before we walk.

In the late '50s and early 60s, the "Oasis" club was a frequent stopover spot for many

our forests, and turn our lakes and streams into garbage dumps — all this in only a few years — we'd better hurry, 'cause there isn't much time left.

All that aside, Jerry, you still haven't answered my main question: how much do the oil companies write off when they find a dry hole? And why bother drilling when they know nothing is there? I say, let us put our money and intelligence to better use!

— Dave Carlson

A response from Valdez

The recent letter congratulating your reporters on spotlighting Valdez' profligate ways was not amusing to Valdezeans, nor was it accurate. As with anything that is spotlighted, much of what is really there languishes in the dark.

While we recognize that telling stories on Valdez has become great sport of late, your letter writer's gross exaggeration demands correction. The great "Big Mac Importation" was not quite as exciting a story as it apparently translated by a pilot passing on an amplified anecdote.

Political fund-raisers necessitate unique items to spur contributors and as auction coordinator, I fixed on Big Macs. While taken for granted by Anchoragites, we in the hinterlands have Big Mac Attacks that necessarily involve 350-mile ventures upcountry to satisfy. The order for 50 Big Macs was placed and arrangements were made to have them picked up and delivered to Valdez Airlines on their last evening run into Valdez so the burgers would be "fresh" for the big event. A last-minute snag in pick-up arrangements developed, however, and as zero hour approached, I prevailed upon a Valdez Airlines employee to run and get them for us and get them to the plane.

Unfortunately, the run took a bit longer than anticipated and because Valdez Airlines was kind enough to accommodate my plea for help, the plane was delayed in its departure, time awaiting delivery. That plane was by no means chartered; it was on a regularly scheduled flight and the accommodations were in time and energy expended by employees who responded to customer requests. We have come to expect that kind of good service by Valdez Airlines and we very much appreciate it.

It should also be pointed out that Messrs. McAlpine and Lewis steered Valdez through years of unparalleled prosperity and activity; during those years an investment plan was developed, a master plan was implemented and the community bonded and put in place new schools, a dock complex, a civic center, a senior citizens center, a softball complex, a hatchery, a new city hall, and a new library; and it increased its network of roads and water and sewer systems. It spruced up its parks and green areas, added flowers and trees and increased the overall quality of life in Valdez immeasurably.

We in Valdez are not blind to the fact that some mistakes were made along the way, but we wish the naysayers and predictors of doom would not be blind to the fact that we have accomplished an enormous amount in a very short period of time and we are well on the road to diversifying Valdez's economy. We are very much alive and well here in Valdez and we are looking forward to a continuing bright future.

— Judy Londo

Lewis cleared by probe

A state report clearing Community and Regional Affairs Commissioner Mark Lewis of charges that he illegally changed Valdez tax rolls will be delivered to legislators today.

Commissioner of Revenue Robert Heath, who headed an investigation by his department and the Department of Law, will tell legislators his investigators "have concluded from the facts that Mr. Lewis did not act improperly or illegally . . . and we view the matter as closed."

The Daily News reported Jan. 14 that "tax rolls had been 'improperly altered under Lewis' tenure" as Valdez city manager.

The full reports accompanying the Heath investigation were not available Wednesday night, but a letter from Heath to legislators who will examine Lewis' appointment as commissioner concludes the state did not lose revenue as a result of Valdez tax roll changes.

"While the procedures (involving the assessment changes) may have been irregular, they are by no means clearly improper" or in violation of Alaska law, the attorney general's opinion says.

The Heath report will be delivered to Rep. Barbara Lacher, R-Wasilla, and Sen. Frank Ferguson, D-Kotzebue, who head legislative committees on Community and Regional Affairs. Both committees have announced plans to hold hearings prior to a vote to confirm Lewis's appointment as commissioner.

"In conjunction with the Department of Law, we have completed an investigation of allegations that Mark Lewis, former city manager of Valdez, improperly reduced assessments on local property in

See Back Page, INVESTIGATION

other is a special roll of property related to the oil pipeline and terminal operations in the city.

The city assesses its property, but the state is in charge of assessing oil-related property for the state, and have concluded from the facts that Mr. Lewis did not act improperly or illegally. Therefore the state should not pursue any claim against the City of Valdez for the recovery of additional taxes," Heath's letter says.

Randell said he did not.

Valdez taxes two groups of property. One is commercial property, and residental property; the assessments in

the 1981 year. In 1982 he said he again kept fair-value figures on file but submitted figures 15 percent lower on instructions from the city administration.

Oil related property did not receive the benefit of the assessment reductions in other year. As a result, the millage rate in each year which is applied equally to oil and city property, had the effect of increasing taxes by about $190,000, from the 1981 tax roll.

Randell said he considered to be fair what he considered to be fair

Under state law, the

company is allowed to deduct the taxes it pays the city from its state taxes, meaning the state did not receive $190,000 it would have gotten had the original assessments been approved.

Lewis argued that a pipeline construction slump in Valdez had lowered property values and that Randell's original assessment was too high. Subsequent state comparisons showed the lowered Valdez assessments were in line with communities around the state.

Valdez named All-America city

VALDEZ — The National Municipal League's Citizen Action Awards Program has named Valdez as one of its 10 All-America Cities of 1981. More than 500 cities were nominated. City officials said the award to Valdez was based in part on the depth of citizen involvement in community projects such as the new $40 million port, a fisheries enhancement program and construction of a recreation complex.

Chapt. 5: he's resigned

49

Valdez City Manger, Mark Lewis, has notified the Valdez City Council his resignation of Jan. 18 will stand over the protest of local business and community leaders.

Lewis' move follows a rejection of his original Jan. 18 resignation by the City Council at their Feb. 1 meeting. After the city council rejected his resignation, Lewis then announced that he would reconsider in light of strong community support for his remaining in the city's top executive position.

"I sincerely appreciate the council's rejection of my resignation," said Lewis. "However, after further reflection, it is my belief that my resignation cannot be rejected."

Lewis' resignation is effective July 18.

Certificate of Merit

to

MARK LEWIS
CITY MANAGER OF VALDEZ

"MARK LEWIS is cited for meritorious service performed during the period of 4 October 1988 through 6 October 1988. Early on the morning of 4 October 1988, five hundred and nineteen passengers and crewmembers of the luxury liner PRINCESS were forced, by fire, to abandon ship in lifeboats and liferafts in the Gulf of Alaska. Throughout the day, rescue efforts continued until all 519 passengers and crewmembers of the stricken vessel had been accounted for and placed safely aboard vessels for transportation to port. City Manager LEWIS, working with state and federal agencies coordinated the efforts of the city of Valdez and local citizen groups in preparing to receive and care for the 519 survivors that were transported to Valdez by the tanker WILLIAM SMITH. As a result of his expert planning the reception of the survivors was conducted in a most exemplary manner. MARK LEWIS' dedication and genuine concern for humanity are recognized as Alaskan traditions and are greatly appreciated."

DATE:

RE: Certificate of Conformance in Financial Reporting awarded to

The CITY OF VALDEZ, ALASKA has been awarded a Certificate of Conformance in Financial Reporting by the Municipal Finance Officers Association of the United States and Canada (MFOA) for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended DECEMBER 31, 1981. The Certificate of Conformance is the highest form of recognition in the area of governmental financial reporting, and its attainment represents a significant accomplishment by a government and its management.

In order to be awarded a Certificate of Conformance, a government must publish an easily readable and efficiently organized Comprehensive Annual Financial Report (CAFR), whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

Eligible CAFRs are evaluated by an impartial Special Review Committee composed of government finance officers, certified public accountants, educators and others with particular expertise in the area of governmental accounting and financial reporting.

When a Certificate of Conformance is awarded to a government, an Award of Financial Reporting Achievement is also presented to the individual(s) designated by the government as primarily responsible for its having earned the certificate. An Award of Financial Reporting Achievement has been awarded to CITY MANAGER, MARK LEWIS.

NOTE: A list of governments holding valid Certificates of Conformance is published periodically. A copy of the most recent list is enclosed. Further information concerning the Certificate of Conformance in Financial Reporting Program is available upon request from MFOA at 180 N. Michigan - Suite 800, Chicago, Illinois 60601 or (312) 977-9700.

The Municipal Finance Officers Association
of the United States and Canada

presents this

AWARD OF FINANCIAL REPORTING ACHIEVEMENT

to:

MARK LEWIS
CITY MANAGER

CITY OF VALDEZ, ALASKA

The Award of Financial Reporting Achievement is presented by the Municipal Finance Officers Association to those individuals who have been instrumental in their governmental unit achieving a Certificate of Conformance in Financial Reporting. A Certificate of Conformance is presented to those governmental units whose comprehensive annual financial reports (CAFR's) are judged to substantially conform to program standards.

Executive Director Jeffrey L. Esser *Date* JANUARY 5, 1983

January 5, 1983

CITY OF VALDEZ
JAN 15 1983

Mr. Stephen A. McAlpine
Mayor
City of Valdez
Box 307
Valdez, AK 99686

Dear Mr. McAlpine:

We are pleased to notify you that the comprehensive annual financial report of City of Valdez, Alaska for the fiscal year ended December 31, 1981 qualifies for a Certificate of Conformance in Financial Reporting. The Certificate of Conformance is the highest form of recognition in governmental accounting and financial reporting, and its attainment represents a significant accomplishment by a governmental unit and its management.

When a Certificate of Conformance is awarded to a governmental unit, an Award of Financial Reporting Achievement is also presented to the individual designated by the governmental unit as primarily responsible for its having earned the certificate. Enclosed is an Award of Financial Reporting Achievement for City Manager, Mark Lewis.

The Certificate of Conformance will be mailed to you under separate cover. We hope that you will arrange for a formal presentation of the certificate and Award of Financial Reporting Achievement, and that appropriate publicity will be given to this notable achievement. A sample news release is enclosed. We suggest that you provide copies of it to the appropriate local newspapers and radio and television stations.

We hope that this example will encourage other government officials in their efforts to achieve and maintain an appropriate standard of excellence in financial reporting. If you have any questions regarding this matter, or if we may be of any further assistance, please don't hesitate to contact us.

Very truly yours,

MUNICIPAL FINANCE OFFICERS ASSOCIATION

SOMETIMES, IT PAYS TO CONFORM.

certificate of conformance

MUNICIPAL FINANCE OFFICERS ASSOCIATION

The Certificate of Conformance is the highest form of recognition in the area of governmental financial reporting, and its attainment represents a significant accomplishment by a government and its management.

The Certificate of Conformance in Financial Reporting Program was begun by MFOA in 1945 to emphasize the association's belief that every government and public employee retirement system (PERS) should prepare and publish an easily readable and understandable comprehensive annual financial report (CAFR) covering all of its funds and financial transactions during the year. MFOA believes that governments have a special responsibility to fully and fairly disclose their financial affairs. The CAFR is a very detailed report that goes beyond the requirements of generally accepted accounting principles (GAAP) and beyond the requirements of applicable statutes and regulations in an effort to present all of the information necessary to meet the information needs of the many persons and groups with legitimate interests in the financial affairs of government.

To be eligible for a Certificate of Conformance, a report must be the published CAFR of a government or PERS. Eligible CAFRs must include general purpose financial statements prepared in substantial conformance with generally accepted accounting principles which have been independently audited in accordance with generally accepted auditing standards and a reproduction of the auditor's opinion on them. Governmental CAFRs must also include financial statements for individual funds for which an independent auditor has accepted *at least* "in relation to" supplementary data responsibility.

To earn a Certificate of Conformance, a CAFR must tell its financial story clearly, thoroughly and understandably. Certificate of Conformance reports are efficiently organized, employ certain standardized terminology and formatting conventions, minimize ambiguities and potentials for misleading inference, enhance understanding of current GAAP theory, and generally demonstrate a constructive "spirit of full disclosure."

The Certificate of Conformance Program provides a government with easy and economical access to an extensive amount of technical reference material concerning governmental accounting and financial reporting theory. It provides technical informational tools which can enable government finance officers to help themselves to improve their financial reporting techniques. The standards of the Certificate of Conformance Program are quite rigorous. This is apparent from the large number of governments which do not receive a certificate on their first attempt. There should be no stigma attached to a government's failure to earn a Certificate of Conformance at the time of its first, or even its second, submission of its CAFR. The Certificate of Conformance review process should be viewed as a learning device. A government's follow-up analysis and study of the comments and suggestions for improvements provided through the review can significantly facilitate an improved management by objectives approach to the government's financial reporting activities.

To participate in the program, units must complete an application form, submit the appropriate fee and send five copies of their CAFRs for review by the Certificate of Conformance Program Special Review Committee. Special Review Committee members include finance officers, certified public accounts, educators and others with particular expertise in governmental accounting and financial reporting. Reports must be received by MFOA within six months of the end of the reporting entity's fiscal year.

The governments listed on the following pages held Certificates of Conformance on October 27, 1982. Results of reviews still in process on that date are not reflected in this list.

Further information about the Certificate of Conformance in Financial Reporting Program is available upon request from Gila K. Klein, Director/Certificate of Conformance Program, Municipal Finance Officers Association, 180 North Michigan Avenue, Suite 800, Chicago, IL 60601.

Senator Frank Ferguson
Repr. Al Adams
Representative Tony Vaska
and Other Members of the Bush Caucus

Gentlemen:

On behalf of the Bering Straits CRSA Board, I am writing to express grave concerns regarding the appointment of Mr. Mark Lewis by Governor Sheffield as Commissioner of the Department of Community & Regional Affairs (DCRA).

At their regular meeting at Unalakleet, Alaska on March 16, 1983, the Bering Straits CRSA Board directed me to convey the Board's extreme disappointment that Governor Sheffield did not appoint a person with known seasoned experience and knowledge of local concerns.

To the Board's knowledge, Mr. Lewis has not demonstrated requisite experience and knowledge of our Inupiat and Yupik cultures in the Bering Straits Coastal Resource Service Area District. From Shishmaref to Stebbins along the coastline and over to St. Lawrence Island, we Inuit along with the Naluamiut (White People) who live in this Region, have advocated the adoption of a Coastal Management Program, which, when adopted, will provide an opportunity for local residents to express their concerns regarding major coastal land and water resources, uses, and management plans.

We understand that Mr. Lewis's Confirmation Hearings are scheduled before the DCRA Committee - House on Monday and Tuesday of next week, and before the DCRA Committee - Senate on Wednesday.

Please convey to the Committee the Board's feelings, and give a copy of this letter to them and to Governor Sheffield as well.

Thank you for your kind assistance and cooperation.

Very truly yours,

BERING STRAITS CRSA BOARD

Attorney general review finds no contract bid conflict

By STEVE SEPLOCHA
and JOHN LINDBACK
Daily News reporters

A company denied a state Department of Community and Regional Affairs contract because of a possible conflict of interest actually had no conflict, an attorney general's office opinion says.

The Kuskokwim Planning and Management Corp., bidding for one-third of a $395,000 contract for planning in Western Alaska, was called a "runaway winner" in the competition by a department bid review team in January.

But Community and Regional Affairs Commissioner Mark Lewis threw out all bids for the contract amid questions over potential conflicts in Kuskokwim's bid, and in the bid made by the second-ranked competitor, Calista Professional Service Corp.

A Kuskokwim employee, Richard Aks, had been deputy commissioner of the Department of Community and Regional Affairs. He resigned Dec. 3, and became general manager of Kuskokwim Corp. on Jan. 5.

Thomas Jahnke, an assistant attorney general asked by Aks to review the situation, said in a letter to Aks that his review of documents and discussions with state officials "lead me to conclude that there has been no impropriety on your part."

Jahnke said, "It was appropriate for Commissioner Lewis to inquire about the appearance of conflict in connection with your employment by KP (Kuskokwim). However, on closer examination, the apparent conflict is seen to be illusory."

The Jahnke opinion on Aks said the record was "entirely contrary" to any of the factors required for a conflict finding under Alaska law.

Lewis' actions on the contract have been criticized by the former director of the department's community planning division, Lawrence H. Kimball Jr., and a number of private contractors. They claim Lewis steered the contract to Calista Professional Services Corp. and/or the Association of Village Council Presidents (AVCP).

Lewis has denied any improper actions and has said his actions were aimed at making the contracting procedure fair. He further accused Kimball of having a personal vendetta against him.

Jeff Smith, director of the C&RA Local Assistance Division, said Lewis would have no comment on the ruling. Smith said he felt the actions taken by Lewis were "still justified based on the appearance (that existed at the time) and other issues involved."

Aks began negotiating with Kuskokwim in mid-October and immediately notified superiors that he was talking with the firm and would take no part in department decisions regarding the planning contract.

In January, the bids were graded by a department review team and the Kuskokwim proposal was cited as the best.

The second-ranked proposal, by Calista, was also recommended for two-thirds of the $395,000 award, since the top firm had only applied for one-third.

However, about the same time, Sen. John Sackett, R-Ruby, complained to Lewis and Gov. Bill Sheffield's office that Aks' employment by Kuskokwim should disqualify that company.

Lewis convened an executive review committee in February, at which Aks' potential conflict was addressed, along with information that Kimball had that a member of the original review committee had been employed by Calista.

After a stormy second meeting of the review committee, in which Kimball said he made charges of impropriety and asked to be relieved of any involvement in the award, Lewis threw out all proposals.

In tossing out the bids, Lewis announced a change in the scope of the work that had the effect of eliminating resubmission of the Kuskokwim bid.

He subsequently made another rule change that allowed Association of Village Council Presidents, a nonprofit organization with close ties to Calista, to enter the second round of bids. Lewis also briefly put a Calista shareholder who is a relative of an influential AVCP member on the second round review committee.

A new review committee appointed after complaints about the Calista shareholder met this week and made a contract award recommendation to Lewis.

Smith said Lewis would issue a press release Tuesday giving his decision on the contract.

Calista, in partnership with AVCP, resubmitted a bid in the second round.

The alleged conflict involving the Calista employee, who had access to all first round bids and an apparent advantage in the second round, has not been resolved.

Smith said earlier this week that he had a preliminary indication that the change that eliminated the Kuskokwim bid represented a significant revision of the proposal and made the point about a potential Calista conflict moot.

U.S.S. Anchorage visiting namesake

Anchorage's namesake on the high seas is paying a holiday visit, and the welcome mat is out to residents.

The U.S.S. Anchorage is docked at the Port of Anchorage and the public has been invited to scurry over its decks, peer in its holds and sit in a captain's chair from noon to 5 p.m. today.

The Anchorage is a Dock Landing Ship (LSD), designed for two main missions. First, it is a cargo ship, capable of toting up to 300 fully equipped troops and their land vehicles and debarking them on use as harbor tugs to steer in for overhauls.

"We can get a boat in the lower decks and it works just like a dry dock," said Lt. j.g. Michael Craft. "We can use the cranes and lift an engine right out of a vessel and drop another one in."

The upper deck is also large enough to allow medium-sized helicopters to drop in for service and storage.

The Anchorage carries three twin-barreled 50-caliber gun mounts with a range of six miles. While primarily for

May 31, 1983
FOR RELEASE 8 a.m.

PRESS RELEASE

Mark Lewis, Commissioner of the Department of Community and Regional Affairs, announced today that the Anchorage firm of Maynard and Partch has been selected to carry out the Yukon/Kuskokwim Regional Planning Needs Assessment project, subject to successful contract negotiations. This selection implements a unanimous recommendation by the Proposal Evaluation Committee.

Revised Requests for Proposals were issued on April 20, 1983, with an addendum to the RFP issued on April 29, 1983. Using appropriate bidder's lists, maintained by the Alaska Department of Administration, the RFP was distributed to over 180 firms. In addition, public notice was printed in major Alaska newspapers in both Anchorage and Juneau inviting prospective bidders to submit proposals.

Five proposals were received by the deadline for submission on May 19, 1983. A five-member Proposal Evaluation Committee met on May 25 and 26 in Anchorage to consider the proposals which had been submitted in a manner responsive to the terms of the RFP. The final proposals were submitted by Maynard and Partch in association with Kuskokwim Planning and Management Corporation; Kevin Waring and Associates; Woodward and Clyde Consultants and the second from Calista Professional Services joint venture with the Association of Village Council Presidents. The other three proposals were rejected as not complying with the submittal requirements of the RFP.

Proposal Evaluation Committee members were Fred Ali, President, Kuskokwim Community College, Bethel; Tony Stigel, Planning Director, City of Bethel; George Gee, Private Consultant, Ketchikan; Jim Edwards, Department of Transportation and Public Facilities, Anchorage; and Ed Busch, Department of Community and Regional Affairs, Division of Community Planning.

The Proposal Evaluation Committee reviewed the proposals according to criteria established within the RFP. Major criteria included:

1. Quality and Thoroughness of Presentation

   - Understanding of the project
   - Understanding of the communities and the region
   - Responsiveness to contractual requirements
   - Organization and clarity of the proposal
   - Innovativeness of the proposal

2. Capabilities and Organization of the Proposed Team

   - Qualifications and experience
   - Work satisfactorily completed on related projects
   - Organization and management

3. Project Budget

Following their discussions on May 25, the Proposal Evaluation Committee elected to interview both proposed project teams on the morning of May 26. Following these interviews, the members resumed their discussions and, ultimately, moved to recommend the firm of Maynard and Partch as the firm most qualified to carry out this project. The Committee vote was unanimous in favor of the motion.

Subject to successful negotiations, the Yukon/Kuskokwim Regional Planning Needs Assessment Project is expected to be under contract with the firm of Maynard and Partch before June 30, 1983.

The policy of this administration is to award all contracts in a fair and equitable manner and to contract with the firm most capable to successfully complete the project. As evident by the process we have just completed regarding the Regional Planning Needs Assessment for the Yukon/Kuskokwim both of these goals have been met.

Commissioner Mark Lewis said:

"It is unfortunate that the Anchorage Daily News was so quick to judge this contract review process and that their articles were one-sided and had a biased interpretation. I am pleased to announce this award and as I have maintained all along that this contract review process has been fair and equitable to all the participants involved."

FROM: Staff

DATE: May 25, 1982

SUBJ: Planning Consultant Contract, Department of Community and Regional Affairs.

CAUTION: The following information has been summarized from articles appearing in the Anchorage Daily News on May 15 and May 17, 1983 and has not been verified by independent investigation.

The articles allege that Commissioner Mark Lewis has directed actions that favor the award of a State-funded Regional Planning Contract to Calista Professional Services Corporation. The amount of the contract is $395,000. and is one part of a larger multi-part contract.

Earlier portions of the larger Regional Planning Contract were awarded to Calista Professional Service Corporation. Proposals from several consulting and planning firms for the latest contract were reviewed in January by a contract review committee comprised of employees of the Department of Community and Regional Affairs. The review committee recommended award of the contract to Kuskokwim Planning and Management Corporation.

In January, Senator Sackett informed the Governor that a conflict of interest existed in the award of the contract to Kuskokwim because a former employee of the Department, Richard Aks, worked for Kuskokwim. The Senator also wanted to award one contract on a regional basis rather than several smaller contracts on a subregion basis. A decision to follow the Senator's request would mean eliminating the request for contract proposals and the Kuskokwim bid.

Subsequent to receipt of Senator Sackett's letter, Commissioner Lewis directed a newly formed contract review committee to again review the proposals and recommend a winning bid. Reasons given for appointment of a new review committee were to be certain that the program was in line with the new administration policies (not clarified) and possible conflict of interest in the earlier recommendation for contract award.

The new or "executive" review commttee met twice but apparently made no recommendation. On March 13, Lewis announced that all of the bids would be discarded but, bidders would be paid for their efforts. He also announced that readvertisements for bids would eliminate the provisions that permitted bids for portions of the work. This change eliminated the proposal submitted by Kuskokwim from further consideration.

During the month of February, a Mr. Jim Pederson who prepared Calista's bid proposal resigned from Calista, which would reduce the strength of that Corporation's proposal. Additionally, Gary Hennigh, a former Department employee who had been a member of the original bid review committee had been hired by Calista. Since Mr. Hennigh had seen all the comtetitive bids, it could be a conflict of interest in subsequent proposals submitted by Calista.

An Assistant Attorney General, Mr. Janhke, stated that a preliminary review of materials supplied by Lewis indicated that Richard Aks of the Kuskokwim organization did not create a conflict of interest situation in their bid proposal.

The requests for new bid proposals were advertised on April 22. Later, Lewis directed additional changes to the bid rules to allow the Bethel based association of Village Council Presidents to submit a bid proposal. The rule change allowed an organization with no planning staff to submit a bid (the Association had no planning staff), even though an important part of the bid evaluation was based on the expertise of the applicant's planning staff.

The Association of Village Council Presidents has strong ties to Calista Corporation. The rule change could result in the Association being awarded the contract, and then using or hiring the Calista Planning Staff to do the work. In effect, the Calista Corporation may have two chances for the contract.

Lewis is reported to have told Lawrence Kimball and Jim Kohler that he (Lewis) was going to name another committee to review the proposals. The new committee would include Bethel City Manager Lyman Hoffman, nephew of the Chairman of the Association of Village Council Presidents and a Calista shareholder. Lewis later said that he would not name Hoffman to the committee.

Lawrence Kimball, who was the Director of the Departments' Division of Community Planning, has resigned at the request of Lewis. Kimball had advised Lewis of the legal and ethical problems involved in the rejection of the original review committte's recommendations and of subsequent actions. Jim Kohler, Kimball's Deputy Director advised Lewis against changing the bid rules to allow the Association of Village Council Presidents to bid on the contract.

Three charges involving the procedures and circumstances surrounding the bidding procedures have been filed with the State Ombudsman's office.

Howard Weaver
Anchorage Daily News
200 Potter Drive
Anchorage, Alaska 99504

Dear Mr. Weaver

It has not been my policy to respond directly to the articles that have been appearing in the Daily News. However, following the article that appeared in your May 15 Sunday edition, I feel a response is necessary. In reviewing this entire contract's history, it must be remembered that this project was appropriated and developed during the last year of the Hammond Administration and the associated problems have arisen as a result of their decisions. It has fallen to the Sheffield Administration to correct these problems and to implement the project. This, I have attempted to do in a fair and equitable manner.

The article that was printed contained factual errors, conclusions inconsistent with the facts and, at best, misrepresented the actions that I have taken regarding the Yukon-Kuskokwim Planning Needs Assessment. The article is as interesting for what it doesn't say as much as for what it does. Contradictory documentation that was provided to your reporters does not appear anywhere in the article. This is especially troubling from the standpoint that this proffered documentation was also written by a major source for your story, Larry Kimball. Following is a point by point rebuttal to your article.

In the article you state that decisions made by me have consistently favored the Calista Corp. This is patently not true and I do not believe that this statement is substantiated in the article. While your reporters view the change in the second RFP as benefiting Calista, it was actually made in order that the RFP conform to the original "legislative" intent for this project. The project was instigated by the Legislature in order to provide for a comprehensive regional planning effort, not a subregional planning effort. On what basis DCRA, under the Hammond Administration, made this change in the project remains unclear to us now. We can find no supporting documentation in the files for not meeting the intent of the legislation. Therefore, this change to the RFP that you intimate is so damaging, in actuality only readdresses the original intent of the project. The other change referred to is the amendment to the second RFP that would allow for a firm to disclose the staff that will be hired to implement the project, after selection, but before the contract is let.

21-P1LH

While your reporters view this as giving Calista two chances, in fact, the Association of Village Council Presidents (AVCP) could choose to hire its staff from any firm. As I stated during my interview, the possibility that AVCP would hire Calista did not occur to me and my only motivation was to remove a stumbling block from the path of any firm which desired to respond to the proposal without having to receive firm commitments from professionals to work on a project that may not be awarded to them. In your article you state that this constitutes a pattern. I do not believe two changes are a pattern, especially when at least one of the changes was to bring the project into compliance with the original intent of the legislation.

You go on to mention the complaints received by the Ombudsman's Office and his subsequent review. If carefully scrutinized, you would discover that the majority of the aspects under investigation by the Ombudsman were actions taken by the former Hammond Administration. The concern regarding a favoring of firms with ties to native organizations from that region, refers to the original RFP written in October of 1982 by Larry Kimball of the Division of Community Planning. Both of these complaints were closed by the Ombudsman's Office after we cancelled the old RFP and went out for new bids.

Your point that these actions all figured heavily in the dismissal of Larry Kimball is pure conjecture. Kimball's departure is due to the proposed reorganization of the Department and Mr. Kimball's inability to conform to the stronger management style of this administration. Both Mr. Kimball and I made a good faith effort during the last few months to communicate better, however, this was without success. As stated to me in my last meeting with Mr Kimball, he felt the same way and was not upset about leaving the Department. He indicated that he was tired and looked forward to entering the private sector.

Your May 15th article stated that my reasons for throwing out the first set of bids was due to the conflicts previously mentioned and was an attempt on my part to provide the Calista Corporation with another chance at the contract. What wasn't stated in the article, and should have been apparent, is that due to the number of problems and apparent conflicts that came up regarding the contract, no matter to whom the contract was awarded, a cloud would have been left hanging over the project. This was apparent and no one, including Mr. Kimball, recommended that we award the project to the third, fourth or fifth bidder. The decision to re-bid was a joint and unanimous decision by all the staff involved.

You further state that Mr. Kimball repeatedly warned me about legal and ethical problems. This is a very interesting point. The only time that Mr. Kimball stated he felt there were problems with the manner in which I was proceeding was in a memo dated February 24th and that memo was not received in my office until March 14, at almost the same time that it was given to your newspaper by person or persons unknown. However, in a trip report written by Mr. Kimball March 3rd which covers the meeting held February 23 in Juneau, he states:

> I met with Jeff Smith and Marty Rutherford to convene as the Executive Review Committee on the Y-K proposals. I had discussed the situation with Bob Rehfeld earlier in the day. He was unable to attend the review committee meeting.
>
> Marty, Jeff and myself spent considerable time discussing the increasing problems with the proposal evaluations and decided to identify the issue areas and pass our concerns on to you prior to issuing a decision from the committee. You have been so informed and I agree with the course of action you have directed Marty to take. I have a separate memorandum coming to you relative to my continued involvement in this matter.

In addition, in another trip report covering the second and last meeting of the review team, Mr. Kimball wrote:

> "Met with Marty, Jeff and Bob to discuss the tasks necessary to follow your directives on the Y-K projects. I firmly believe your decisions were sound on these projects".

Both of these trip reports were provided to your reporters here in Juneau and these were never mentioned in your article. It must be remembered that the review committee held only two meetings. The first was held February 23 and the second held March 16. Mr. Kimball was present at both meetings, and his trip reports, I believe, reflect his immediate and therefore more accurate thoughts about the process. I do not believe that contradictory statements can be construed as repeatedly warning me of legal and ethical problems. If the statements made in Mr. Kimball's February 24 memo were true, and his impressions later changed, why did he not immediately come to my office and inform me of those instructions or at the very least utilize our telecommunication system to send me that memo on February 24, which could have been received in my office in minutes.

Instead, he chose to communicate these concerns to me in a memo I received eighteen days after it was written and on the same day your newspaper received it. With regard to your second point about the change in the RFP attemp- ting to exclude the Kuskokwim Planning and Management Corp. (KPMC) this is simply not true. Again, this action was taken in order to bring the project in line with legislative intent. KPMC can, under these guidelines, still bid on the project, but like everyone else, they have to include the whole region and not just parts of it in their scope of work.

You also brought up in your article a February 10 meeting that never occurred. The first meeting to review the project was held February 23. Further, at no time did Mr. Kimball recommend an Attorney General's opinion on the conflicts that he had pointed out to me.

In the interview I held with your reporters on Friday, May 13, Marty Rutherford, my Special Assistant, stated that she never used the word "orders" at that meeting, however, you imply in the article that she admitted using that word. You also imply that Jeff Smith, the Director of our Local Government Assistance Division, admitted to opening the February 23 meeting with the statement "Larry, you're not going to like this." Mr. Smith did comment that he made that statement at the meeting held on March 16 when he informed Mr. Kimball that I had decided to let the Land Management Contract to Darbyshire and Associates. This action was recommended by the technical evaluation team, however, Mr. Kimball did not want this contract given to that particular firm and Mr. Smith made his remark because he was aware of that fact.

You state that Mr. Kimball was allowed to leave the committee and he began losing influence in the decisions regarding the matter. In reality, in Mr. Kimball's February 24 memo he states categorically that he does not want to have anything further to do with this contract. However, he did continue to play a role as evidenced by his March 16 trip report and his May 2 memo, in which he pointed out problems with the proposed review committee. These comments were taken into consideration when I changed the membership of the new evaluation team.

A conflict of interest or an appearance of one is not to be taken lightly and deserves to be reviewed very carefully. At no time did we state that former Deputy Commissioner Aks had a conflict, but since Senator Sackett had questioned this, we were unable to ignore the concern. The records show that Mr. Aks signed the Authority To Negotiate (ATN) and approved the RFP for Contract Advertisement for the Yukon-Kuskokwim Contract.

I still maintain that since there was an appearance of a conflict, it was in the best interest of the State to throw out all the original proposals and start new. I find it ironic that attempts to proceed cautiously and be fair in awarding the contract would be interpreted as somehow "wiring" the outcome.

It is interesting to note that on April 28 Mr Kimball requested that I approve a sole-source contract to Kawarek, Inc., a non-profit regional corporation serving the Bering Straits Region, to develop a regional strategy. The Bering Straits Regional Strategy and the Yukon-Kuskokwim Region Comprehensive Plan are very similar. Both plans are designed to develop a region-wide policy and goal statement, which includes physical, social and economic growth and development issues, along with compiling information on the economic, political, cultural and physical characteristics of the region. This information and goal statements, and other pertinent information and data , will be used to assess development trends in the years to come and serve as a foundation for capital improvement programming. Mr. Kimball states that the success of the Bering Straits Plan depends upon the involvement of the Non-profit Regional Corporation (Kawarek, Inc), yet when he discusses doing the same planning in the Yukon-Kuskokwim Region, his statements are totally different. Mr. Kimball accuses me of "wiring" the Yukon-Kuskokwim contract in favor of the Calista Corporation, yet he, without the benefit of any competitive process, advises me to award a sole-source contract in the amount of $ 102,600 and calls it standard contracting practice in his division. One has to question the consistency of this logic. While I have not attempted to "wire" this contract to the Calista Corporation, Mr. Kimball's recommendation raises serious questions.

If, as you suggest, my only motivation was to ensure that Calista receive the contract for this project, I would have proceeded to award the contract to them on February 1st when everyone, including Mr. Kimball, presented that as an option. I did not do this and still your newspaper chose to imply that all of my actions had one purpose and one purpose only, to give the contract to the Calista Corp. For whatever reasons, however, you do not question the contradictory written statements of Mr. Kimball. You use words such as "pattern" and "repeatedly" in such a manner as to make them inflammatory. Throughout the article you make editorial judgments and assumptions and present them as factual information. You state that all planners and their firms, with the exception of Calista, complained about the sequence of events, but in my interview with your reporter, he stated that some of the firms contacted would not comment, yet you state that they <u>all</u> complained, when in fact, some you contacted did not.

The only conclusion I can draw is that this article demonstrates that your newspaper, or perhaps just one of your reporters, is trying to insinuate from loosely gathered facts that I am manipulating a contract process in order to favor one firm over others. This is absolutely not true and my past and future actions will bear out my contention that every decision I have made was to ensure that the people of the region and the state get a high quality product for the money, and that the project is implemented by the firm most capable to perform the work.

I look forward to an opportunity to meet with you to discuss this issue at your earliest opportunity.

Sincerely,

Mark Lewis

SUBJECT: Confirmation Hearings

DATE: March 16, 1983

Attached you will find a summary of allegations pertaining to Mr. Lewis that appeared in the Anchorage Daily News during January 1983. The staff has developed some questions that you may wish to further refine in order to clarify some of the allegations. I am not suggesting that the proposed questions be used for any purposes other than to assist your efforts in preparing for the confirmation hearings.

Please use the attached information with caution and discretion. None of the allegations or reports have been substantiated, the only source being newspaper articles. Materials provided in your file folder provide clarification on several of the issues.

ANCHORAGE NEWS ALLEGATIONS -Mark Lewis

SUBJECT: TAX ASSESSMENT ROLLS

ALLEGATION: MR. Lewis directed that the property tax assessment rolls for the City of Valdez non-oil related properties be lowered by 15% in 1981 and 1982.

BACKGROUND: State law and City of Valdez code require that only the assessor, upon the direction of the City Council, can change the assessment rolls.

Property within the City that is oil related is taxed by the City at the same rate as non-oil related property, but oil related property is assessed by the State. The reduction in assessed valuation of non-oil related property resulted in the oil related property paying a higher percentage of City revenues in 1981 and 1982.

SUGGESTED QUESTIONS: Was Mr. Lewis aware of the City of Valdez and State laws that require property to be assessed at 100 percent of market value?

Was Mr. Lewis aware that, by law, only the City Council could direct the Assessor to make any change to the assessment role?

Did Mr. Lewis own any property in the City of Valdez? And, if so, did he realize a personal gain by ordering the reduction of the assessment rates?

Did Mr. Lewis, at any time, discuss his order to reduce the assessment roles with any elected official of the City?

Why did Mr. Lewis not discuss or refer the question of reducing the tax assessment roles to the City Council?

POSSIBLE WITNESSES:

Rich Randall: Contracted with the City of Valdez for property assessments in 1981-82. Has stated that Lewis requested him (Randall) to change assessments in 1981 but he refused and that he (Randall) never agreed to alter the figures. In 1982, Randall, at the verbal request of Lewis, prepared the tax rolls with the same 15 percent reduction.

Lori Anderson: Secretary to City Manager. Has stated that Lewis verbally instructed Randall to prepare 1982 tax rolls with the 15 percent reduction.

Lt. Gov. Steve McAlpine and/or Council members: For verification that they were not consulted or aware of tax reductions.

ADDITIONAL QUESTION

Did Mr. Lewis reduce the assessment rolls by 15 percent and request City Council approval of those rolls while being fully aware that the individual property cards would continue to reflect the full 100 percent of market value as required by law?

SUBJECT: PERSONNEL POLICY CHANGE

ALLEGATION: Mr. Lewis changed the personnel policy for the City of Valdez employees two months prior to his departure, resulting in Mr. Lewis' being paid an additional $6,174 in compensation for accrued sick leave.

BACKGROUND: The City of Valdez has an ordinance that prohibits the City Manager from changing personnel policy but the ordinance had not been placed in the city code book (codified).

Lewis approved the change which allowed departing employees to be paid for unused sick leave four months after he announced his resignation and two months before he departed. The change in policy is reported to have been requested by Valdez Police Chief Pat Shely. Lewis established a committee of City employees to review and make a recommendation on the policy change. The committee recommended the change be made. Lewis departed his employment in July 1982 and collected the $6,174.

Lt. Gov. McAlpine is reported to have said that the City Council retroactively approved the personnel policy change in September 1982. Apparently there was debate as to whether Lewis had the authority to make the rule change. Lt. Gov. McAlpine is reported to believe that Lewis acted properly.

POSSIBLE QUESTIONS.

Did the City of Valdez have an ordinance in effect that prohibited the City Manager from making personnel policy changes when Mr. Lewis directed the change to the City personnel policy?

What is the policy of the City of Valdez on frequency of codification of ordinances? Are ordinances effective even though they have not been codified?

When Mr. Lewis made the policy change, was he aware that he could realize a substantial amount of money?

Assuming that Mr. Lewis' subordinate employees that he appointed to the committee to make a recommendation on the policy change were aware that Mr. Lewis had a financial interest in their decision, did Mr. Lewis feel that the committee members might be unduly influenced in their decision?

Did Mr. Lewis make any other major employee policy changes during his tenure as City Manager? If so, did he normally discuss with or inform the City Council of such changes - especially those with financial impact? Did Mr. Lewis inform the Council of the policy change in question?

POSSIBLE WITNESSES:

Policy Chief Pat Shelby. Reported to have requested the sick pay policy change and convinced Lewis that he (Lewis) should make the change for the long range benefit of the employees.

Lt. Gov. Steve McAlpine. Reports imply that McAlpine was not aware of the change in personnel policy (he may have departted for campaigning in July 1982) and that he (McAlpine) had conducted an investigation to confirm that Lewis had established an employee recommendation committee.

City Clerk (name unknown) Should be able to verify existence of ordinance prohibiting the City Manager from changing personnel policy, effectiveness of adopted ordinances prior to codification, and City Manager authorities under the City charter and codes pertaining to Lewis' authority regarding policy changes and budgeting matters.

City Treasurer (name unknown) Questions may be asked regarding city procedures on changing personnel policies that have a fiscal impact, especially when those changes affect a fiscal year budget that has previously been approved by the City Council. The implication could be that Lewis improperly made a policy change with budgetary impact without council approval.

Recommendation Committee Members (names unknown). Regarding guidance or influence from Lewis in making their recommendation. Were they aware of Lewis' imminent departure and, did they feel any pressure or obligation to report favorably on the policy change.

Council Members To determine if council members believed Lewis' action to change the personnel policy was proper or improper.

SUBJECT: MR. LEWIS' RELATIONSHIP WITH ALASKA GRAIN CO.

ALLEGATION: There is potential of collusion and use of office to assist Alaska Grain Co. in return for personal gain.

BACKGROUND INFORMATION: Apparently, when the voters of Valdez and the City Council decided to build a grain terminal, the concept was to contract the operation of the terminal, but the City would retain ownership. After the construction contract was awarded, Mr. Lewis presented to the Council a contract that not only awarded operations of the facility, but included selling the 30,000 ton capacity facility to Alaska Grain Co. The company was given a five year deferral to begin payments to Valdez.

Mr. Lewis deposited $5 million of Valdez funds, at 8% interest in a bank in Montana to help Alaska Grain Co. start up its business. Alaska banks refused to loan Alaska Grain Co. money because of too much risk.

In December, 1982, Mr. Eugene Thayer, President of Montana Merchandising (parent company of Alaska Grain Co.) stated he expected to sell the grain terminal as a tax credit to a third party. Reports are that Mr. Thayer's profit will be between $1.5 million and $3 million.

POSSIBLE QUESTIONS: It appears that Mr. Lewis' actions to 1) sell the grain terminal to Alaska Grain Co. 2) reduce the size and scope of the facility that was to be built in order to keep the contract alive, and 3)provide for the financing of Alaska Grain Co., were all performed under circumstances that are - at the least - "questionable."

Was there, at any time, and in any manner, reason for Mr. Lewis to believe or understand that he might realize any type of remuneration or other benefit, directly or indirectly, from his transactions or dealings with Alaska Grain Co. or Montana Merchandising or their representatives?

POSSIBLE WITNESSES:

Councilman Chuck Lapaze: will probably state that the idea of selling the facility had not occurred until Mr. Lewis proposed the selling and council was not aware of the reduction in the size of the terminal or of the Montana Bank investment until after the fact.

Eugene Thayer, President of Montana Merchandising regarding contacts, agreements or understandings between himself and Mr. Lewis regarding potential rewards from the sale of the terminal to a third party.

Tom Watson, Valdez City Manager: Can relate faulty aspects of contract to sell a 30,000 ton capacity facility while building a 15,000 ton facility, and associated problems caused by the contract.

SUBJECT: DECISION TO BUILD VALDEZ GRAIN TERMINAL

ALLEGATION: Mr. Lewis intentionally suppressed information concerning the economic feasibility of a Valdez grain terminal.

BACKGROUND INFORMATION: It has been reported that on February 17, 1982, Mr. Lewis received the results of a $17,000 feasibility study that indicated construction of the grain terminal was a "relatively high risk endeavor." Three weeks after receipt of the report, Mr. Lewis authorized $10 million in bonds be issued to build the grain facility. At least one city councilman who objected to the issuing of the bonds was unaware of the feasibility study and it is unknown if any of the council members were aware of the study. Mr. Lewis has reportedly indicated that there are several studies that are "relatively positive" toward the project and, that the council was aware that there were negative aspects of the project.

POSSIBLE QUESTIONS:

Did Mr. Lewis or the City Council initiate the action to have a grain terminal feasibility study prepared by Mr. Frank Orth?

Did Mr. Lewis discuss the results of the grain terminal feasibility study, prepared by Mr. Frank Orth, with any city official before authorizing the issuance of $10 million bonds to build the project?

In view of a report that indicated a high degree of risks for the City of Valdez, why did you not feel it appropriate or necessary to review the project with the council prior to proceeding with the bond sale, especially in consideration of the cost of the project?

Can Mr. Lewis produce any studies that reflect favorably on the economic viability of the Valdez grain terminal?

Was Mr. Lewis aware of efforts to construct a grain terminal in Seward and were his actions to rapidly proceed with the Valdez grain terminal influenced by knowledge of a potentially competing grain terminal? Did Mr. Lewis discuss at any time, with any person, any possibility of impeding or preventing the construction of a grain terminal at Seward, Ak.?

Did Mr. Lewis normally report the results or availability of city sponsored studies to the Council? Why did Mr. Lewis not take steps to insure that the City Council was aware of Mr. Frank Orth's study?

Was Mr. Lewis aware that an increase from 7500 acres of harvested grain in 1981 to a harvest of 150,000 acres of grain would be required before the City of Valdez could realize a profit on the grain terminal?

POSSIBLE WITNESSES:

Mr. Bob Kellar: Councilman who reportedly was against the issuance of bonds for the grain facility, had asked in March of 1982 if it was too late to terminate the bond action and was told by the city attorney that it was not and was not informed of the Frank Orth study, which was available in February, 1982.

Mr. Frank Orth: consultant who prepared the report that was allegedly suppressed by Mr. Lewis.

Mr. Ken Jacobus. Valdez City Attorney

Other City Council Members: For verification or denial if being made aware of consultant study(s) or contents. Other information as desired.

SUBJECT: VALDEZ GRAIN TERMINAL CONTRACT

ALLEGATION: Mr. Lewis entered into a contract on behalf of the City of Valdez that contained substantial errors.

BACKGROUND INFORMATION: It has been reported that, in the spring of 1982, Mr. Lewis learned that the $10 million of bonds issued would not pay for the 30,000 ton grain capacity building and conveyor system to transport the grain to the dock. At that time, the size of the project was reduced to a 15,000 ton facility with no conveyor system. After the decision to reduce the size of the project, Mr. Lewis signed a contract selling the terminal to to Alaska Grain Company. The contract with Alaska Grain Company specified a 30,000 ton facility with a conveyor belt. In November of 1982, Alaska Grain Company asked for renegotiation of the contract, during which negotiations the city of Valdez was in a disadvantageous position.

In May of 1982, Mr. Lewis signed documents that deposited $5 million dollars (Valdez funds) in a five year certificate of deposit in the National Bank of Great Falls, Montana. The certificate of deposit was to guarantee a $628,000 loan to Alaska Grain Company so that the company could complete a grain receiving terminal in Delta, Alaska.

Mr. Lewis allegedly states that some of the Council members may not have been aware of the financial transactions but that Councilman John Devens and former Mayor Steve McAlpine were informed. Former Mayor McAlpine is reported to have stated that, during the following month (June, 1982), he asked the other council members if they approved.

POSSIBLE QUESTIONS:

While the voters of Valdez authorized a $10 million bond issue for construction of the grain facility, does Mr. Lewis feel that he was authorized to commit an additional $5 million to guarantee a loan for Alaska Grain Co. without prior voter or city council approval?

How does Mr. Lewis account for the alledged fact that after he had to reduce the size of the grain terminal project and eliminate the conveyor belt, he then entered into a contract to sell the facility with the original capacity (30,000 tons) and with a conveyor belt?

In that the original plans called for a 30,000 ton capacity facility, with conveyor system to be constructed for $10 million and had to be reduced to one-half that capacity with no conveyor system, how does Mr. Lewis account for this amount of error in cost estimates?

Mr. Lewis, is the following sequence of events correct as they pertain to the deposit of $5 million of Valdez funds in a Montana bank in the May-June 1982 time frane?

1. You signed documents investing the $5 million in the Montana Bank at 8% interest, while the city charter for the Permanent Fund required investment at the higher rate of interest then available.

2. The Council learned of your investment action and protested because they were unaware of the investment and because of the low interest rate.

3. You then secured an agreement from the Alaska Grain Company to repay the City the difference between the 8% and 12% interest.

POSSIBLE WITNESSES:

Councilman John Devens - reported to have been kept informed of Mr. Lewis' financial transactions on behalf of the City of Valdez and was to keep the remainder of the council informed.

Lt. Gov. McAlpine. During tenure as Mayor of Valdez, did he convey to Mr. Lewis the impression that his (McAlpine's) approval of Mr. Lewis' transactions in regard to financing the Alaska Grain Co.'s loan, constituted the approval of the city council?

Mr. Jim Watson, present Valdez City Manager. Can provide insight into potential gains or loss to the City of Valdez as a result of Mr. Lewis' financial and contractual activities.

Mr. Ken Jacobus, City Attorney to assist in determining propriety of Mr. Lewis' actions in accordance with City Charter and terms of employment.

Mr. Clark Lapage, city councilman. Has stated that Council believed everything to be in order when they gave Lewis approval to sign a contract selling the 30,000 ton facility, with conveyor system to Alaska Grain Co.

Lewis appointment demands examination

Serious questions of competence and attitude surround the performance of Mark Lewis as Valdez city manager and strongly suggest that he is unqualified to assume a state Cabinet post.

Mr. Lewis has been selected by Gov. Bill Sheffield as head of Community and Regional Affairs, a wide-ranging department that deals extensively with all local governments in the state. That appointment is a dramatic step forward for the young administrator, but is a peculiar move for the state.

In essence, the question is this: Why should Mr. Lewis be elevated to high state office after a decidedly questionable tenure as a city official?

An extensive investigation of his Valdez reign resulted in a series of stories in The Daily News in recent days. Those stories ranged across a multitude of matters, but centered on these most telling revelations:

• After he decided to leave his Valdez job, Mr. Lewis changed city personnel rules and allowed himself to collect more than $6,000 in unused sick pay from the city.

• Without authority under state law or city ordinance — and without informing the Valdez City Council — Mr. Lewis directed that property tax assessments in the city be lowered by 15 percent for two years running.

• Mr. Lewis received a consultant's report outlining high risks for a city-sponsored grain terminal project but did not show it to other city officials before the bonds to finance the project were sold.

• He negotiated a flawed contract to sell that terminal to a private firm, and errors in the contract later influenced dramatic revisions in the deal that made it far less favorable to the city.

Taken even in the most favorable light, those are not the actions of a skilled administrator sensitive to the public decision-making process. It is not a record that recommends advancement.

As commissioner of Community and Regional Affairs, Mr. Lewis would be dealing with many of the same issues — and not just for Valdez, but the entire state. Can he be counted on to give unfavorable reports of pet projects wide distribution? Will he handle departmental personnel policies with more judgement than he did Valdez regulations? Can he now be relied upon to give state contracts the care he failed to exercise with the Valdez grain terminal? Considering his actions with Valdez tax assessments, should he now be made the boss of the state assessor?

Gov. Sheffield must weigh those questions. The quality and competence of his initial appointments will set a tone and establish standards for his entire administration. And once the governor formally submits his Cabinet nominations, the legislature must vote on confirmation. If Mr. Lewis is recommended by the governor, surely many questions arising from his Valdez tenure demand the closest scrutiny.

These issues will be addressed first by the governor. Even if he is satisfied, they must also be examined thoroughly and vigorously at legislative confirmation hearings, and Alaskans must be certain that the Valdez experience will not be repeated on a statewide stage.

Valdez sick pay is worth $6,174 to commissioner

By STEVE SEPLOCHA
Daily News business editor

Commissioner of Community and Regional Affairs Mark Lewis received $6,174 in extra pay when he left office in July as Valdez city manager after he changed personnel rules to allow departing employees to cash in unused sick time.

The rule change, made in May, came four months after Lewis announced his resignation and two months before he left office.

The change came to light in September, according to Lt. Gov. Steve McAlpine, who was Valdez mayor during the period. He said the City Council investigated whether to seek return of the money but did not.

An ordinance prohibiting the city manager from changing the personnel policy existed at the time, but McAlpine said it had been inadvertently omitted from the published list of codes and revisions.

Lewis said he felt he did no wrong in ordering the rule change and took steps to "divorce myself from it."

He said Police Chief Pat Shely requested the change as an incentive to keep people from taking sick leave just to get rid of it. Shely felt that if employees could cash in a portion of the leave on departure there would be less absenteeism, Lewis said.

Lewis said he realized he would benefit if he changed the rule and therefore set up a committee of employees to recommend whether he should adopt the change.

The recommendation was favorable and at the time it was made, Lewis said mention was made of the fact that

See Back Page, OFFICIAL

Official cashes in sick pay

Continued from Page A-1

he was leaving. He said he almost vetoed the matter at that stage but was convinced by the chief that the change was for the long range benefit of a lot of employees.

Lewis signed the change and it became effective. In July, he left his job and took the $6,174 due him as a result of the new rules.

McAlpine said the council retroactively approved the change in a resolution in September since there was some room to argue whether Lewis had authority to make the change.

The council did not seek to recover the money because members believed Lewis thought he acted properly, McAlpine said. McAlpine said he agreed.

Lewis did not notify the council that he had changed the rule or that he would personally benefit from the change. McAlpine said Friday that, in retrospect, had he (McAlpine) been Lewis, "I probably would have said something about it."

McAlpine said his own investigation verified Lewis' statements that the chief and other employees initiated the change and that Lewis set up a recommendation committee.

Valdez grain terminal proves to be risky venture

When Valdez voters in 1981 approved a $10 million bond issue to build a grain terminal, they were hoping to turn present oil wealth into a future grain industry for the town.

At the time of the referendum it was envisioned that the city would be able to create jobs with the facility and make money. The dream, however, has been shattered and instead of making money on the deal, the city will be lucky to come out of it without a loss.

In addition the city came close in December to losing a significant chunk of a $5 million certificate of deposit it pledged to help the grain operator get started in business.

Here is how it happened:

In the fall of 1981 voters, by a 2-1 margin, gave the City Council approval to build the terminal.

The council felt pressed to award a construction contract this spring so that the terminal could be built during the summer season and ready for the 1983 harvest.

There was a problem, however, in that no agreement had been reached with an operator for the facility.

At this point, then-City Manager Mark Lewis appeared before the council with a contract from Alaska Grain Co. proposing that Alaska Grain not only operate the terminal but that the company buy the operation from the city.

Councilman Chuck LaPage said the idea of selling the facility had not occurred to the council but they heard the proposal out.

Alaska Grain, a subsidiary of Montana Merchandising of Great Falls, Mont., wanted to defer making payments for five years. When the payments started, they proposed that the amount be based on the amount of grain processed up to a maximum not to exceed the annual bond payments.

LaPage said the deal did not sound great, but since there was pressure to get the terminal on line the council gave Lewis permission to sign the agreement.

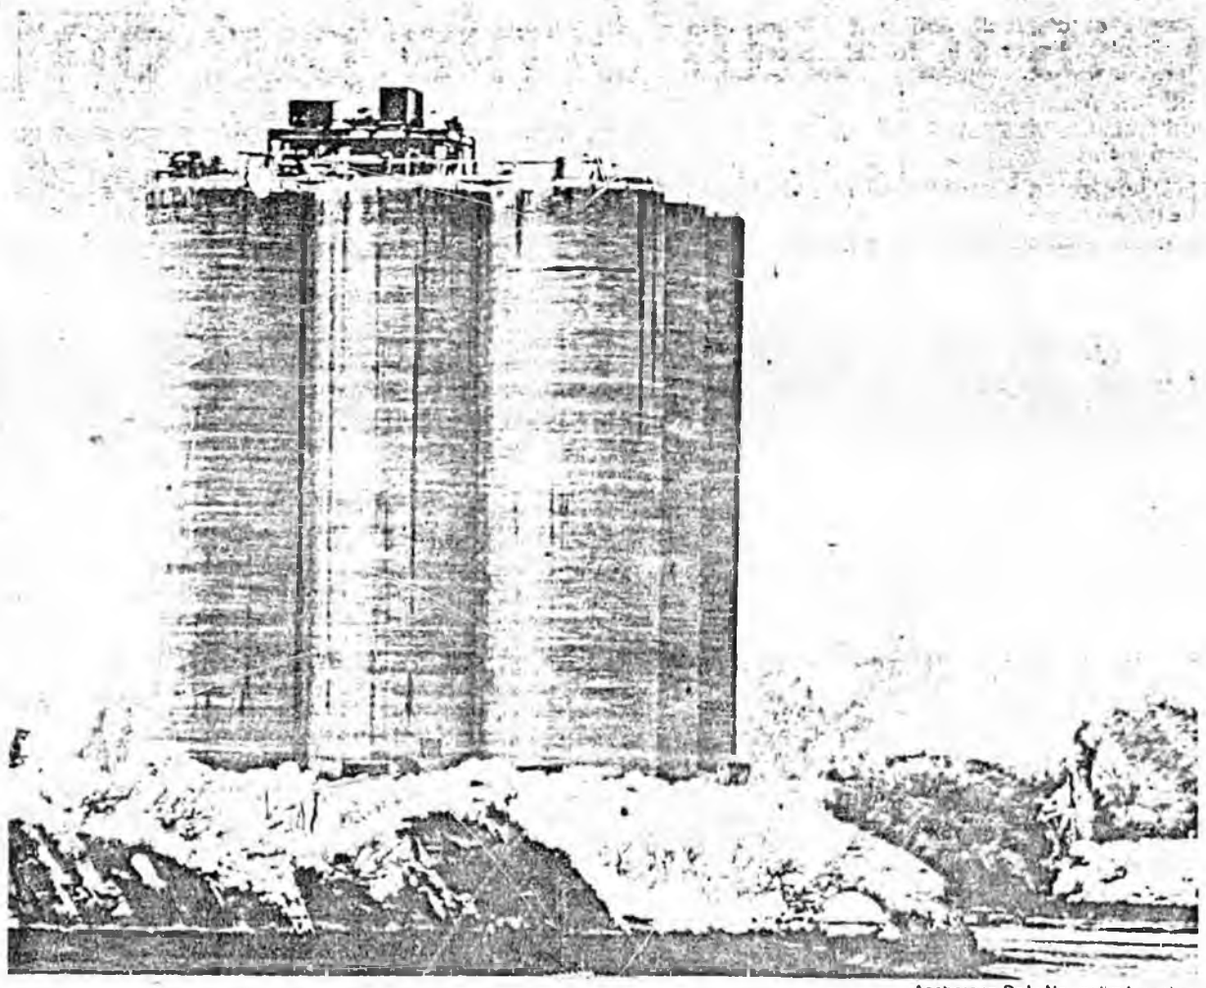
The contract specified that the terminal would hold 30,000-35,000 tons of grain and would be complete with a conveyor system.

Around the same time, the council gave Lewis permission to let the contract for the terminal and, according to LaPage, everything seemed in order.

In early June the council learned that Lewis, without consulting the council, had signed documents to invest $5 million of the Valdez permanent fund in a bank in Great Falls.

The money was invested in a five-year certificate of deposit at 8 percent interest, which was 4 percent below the prevailing rate.

A controversy ensued, as some members on the council protested because Lewis had not informed the council of his actions and because the lower rate was said to violate the charter provisions requiring prudent investment of funds at the highest rates of interest available.



Anchorage Daily News/Jim Larrakas

The new grain terminal in Valdez

Lewis explained that he made the deposit to help Alaska Grain start up its business.

Alaska banks had refused to loan Alaska Grain money to complete an elevator it was building in the Delta region to compete the grain transport chain. The banks in Alaska, not involved in agricultural lending, felt there was too much risk in the state grain program.

So, in an effort to secure the loan for the company, Lewis agreed to guarantee that the $5 million would stay in the bank for five years. If it were withdrawn the city would lose interest and a significant part of the principal.

With the Valdez money committed the National Bank of Great Falls, agreed to loan Alaska Grain $600,000 to complete the Delta terminal.

Lewis got an agreement from the company that it would repay the city the difference between the 12 percent the money had been earning and the 8 percent that the certificate would earn.

His rationale was that the city would break even on the interest with this plan, and would at the same time be helping the company, which in turn would help the city.

The council bought the argument and the matter was settled.

During the summer and fall the work on the terminal was completed, Lewis and Mayor Steve McAlpine left office, and a new city manager was hired.

In late November, the new manager, Jim Watson, came to the council with news that Alaska Grain wanted to change terms of the purchase agreement.

The company wanted to extend the deferred payment period to 15 years.

Watson also revealed that there was a problem with the original contract with Alaska Grain. The contract called for the city to provide a 30,000-35,000 ton capacity building and a conveyor system. But, Watson said, the building only had a capacity of 15,000 tons and there was no conveyor system.

The council was told that another $3 million would be needed to build the conveyor system. Besides, Watson told the council, since there was no conveyor and the building was half the size it should have been, Alaska Grain could probably get out of the contract and sue for losses.

Members of the council began raising questions about the deal. The explanations generally told this story:

Early estimates of the cost for the facility were wrong.

When the administration discovered this, they decided to scale the project down. When this happened is still not clear, and there is dispute over whether the council was formally advised of the change.

It was not brought to the council's attention that the city was building itself into a contract problem with Alaska Grain because of the discrepancy between the operating agreement and the building contract.

The bottom line was that the city was in a corner. Its house of grain was crumbling into dust. If Valdez pulled out of the deal with Alaska Grain, the city stood to lose at least the $628,000 to be paid by the grain company. And Valdez would be without an operator for its new terminal. If it salvaged the deal it would still be out a bundle because of a reduced payback from Alaska Grain.

And no matter what it did it still had to build some type of conveyance system or it would be stuck with a new building with no functional use.

To address the latter matter, the council in early December decided to buy $600,000 worth of trucks and land and set up a circle of trucks to haul the grain from the terminal to the dock. Additional funds would be provided for drivers, maintenance, and other operating expenses.

Later in the month, on Dec. 20, the council voted against renegotiating the contract with Alaska Grain, and said they wanted to stick with the five-year deferral.

In the last week of December, Eugene Thayer, president of Montana Merchandising asked for reconsideration and an emergency council meeting was called.

Thayer and LaPage both said it was understood that the deal was on the verge of collapse. But they said the company did not allude to that possibility and dealt only with its need to spread payments.

Another vote was taken and it deadlocked 3-3. The motion to grant deferral failed.

A recess was called until the seventh councilman, Lynn Chrystal, could be found. He voted for a compromise on the deferral request that would have the company pay a minimum of 3 percent of the bond payment during the first five years, 5 percent during the second five years and 12 percent during the final three years.

This meant the Alaska Grain share of bond repayment would be a minimum of $45,000 a year. The city's share of bond payment would be $1.3 million.

The property was turned over to Alaska Grain and Thayer said he expects to sell it as a tax credit to a third party in the next 90 days. There were reports he would receive $3 million in the sale but he said the figure will probably be much less. He said he will use the money for operating capital.

New Mayor Susy Collins said the council felt there were no good answers to the problem and chose the path least damaging to the city.

"It is a strange arrangement," she said. "The city spent an enormous amount on a facility that isn't there . . . We have bonded $10 million plus the $5 million tied up in the bank and we don't even own it."

But she also said the decisions leading to the present situation must be viewed in the context of the the time. "I think Mark felt he had a great deal of community support for what he did. I believe he had complete support for aggressively pursuing this."

Valdez grain project rocked by changes

1-9-83

By STEVE SEPLOCHA
DON HUNTER and
JOHN LINDBACK
Daily News reporters
©1983, Anchorage Daily News

VALDEZ — A $10 million grain terminal operation approved by Valdez voters in 1981 has now become a $15 million gamble that requires astronomical increases in state grain production just to break even.

The project — engineered by former City Manager Mark Lewis and former Mayor Steve McAlpine — was marked by:

- Gross errors in cost estimates;
- Questionable investment plans for city funds; and
- A faulty contract that required renegotiation and will cost the city hundreds of thousands of dollars yearly.

McAlpine is now Alaska's lieutenent governor; Lewis is commissioner of Community and Regional Affairs. Both defended their decisions this week and said the city got a good deal that will bring long term benefits to Valdez.

But several current city officials say there is only a remote chance the city will ever get back the money invested in the project.

City Manager Jim Watson, who succeeded Lewis two months ago, said Saturday a profitable Valdez operation would require farmers in the state to harvest at least 150,000 acres of grain a year and ship all grain not used for state consumption through the Valdez terminal.

Farmers last year harvested about 7,500 acres of grain.

In addition, the state has proposed building a grain terminal at Seward that could compete with Valdez for business.

The first miscalculation in the project was discovered last spring, when it was learned that $10 million would not pay for the initially proposed 30,000-ton capaci-

See Page A-10, VALDEZ

Valdez grain project is rocked by changes

Continued from Page A-1

ty building and a conveyor system to move the grain to the dock. The project was then scaled back to a 15,000-ton facility with no conveyor system.

Later, in June, a contract was signed selling the terminal to Alaska Grain Co. The sales contract, though, promised a 30,000-ton capacity facility complete with a conveyor. This contractual error, along with risks incurred through a financing plan initiated by Lewis without prior council authorization, forced city officials to renegotiate terms of the sales agreement last month at a significant disadvantage.

Though Lewis has come under criticism since he left office, city officials say that he acted within power granted under the strong city manager form of Valdez government.

Criticism has been leveled at the wisdom of his actions and he has been accused by some members of keeping the council in the dark.

Lewis acknowledges some council members may not have known what was going on at times, but said he kept former Mayor McAlpine and Councilman John Devens "fully informed about the whole project."

He said because the city had a number of projects in progress, it was his practice to consult with the mayor on all the work and different council members on each project. Information was supposed to be passed to the entire council through this system, he said.

McAlpine said the council was kept informed on the project and all members should have known what was going on.

He cites a City Council meeting in early June when he polled members about the financing scheme and asked each, individually, whether they approved.

The discussion was not in the minutes but did occur, according to council members and newspaper accounts.

However, the meeting was held after Lewis, with McAlpine's blessing, signed documents committing $5 million of the city's $13 million permanent fund to a five-year certificate of deposit in the National Bank of Great Falls, Mont.

The documents, signed May 26, resulted in the city receiving eight percent interest instead of the prevailing 12 percent on the $5 million deposit. The certificate was used to guarantee a $628,000 loan to Alaska Grain so the company could complete work on its $2 million grain receiving terminal in Delta.

The $628,000 loan represented the difference between the 12 percent prevailing rate and the 8 percent certificate. Lewis and McAlpine explained that Alaska Grain would repay that amount to the city. That would represent a break-even on interest for the city, with the benefits of the new industry as the city's payoff.

At risk, though, was the $628,000. Should the company default to the city, that money might be lost.

Such a possibility occurred in November and December when Alaska Grain asked for renegotiation of the sales agreement. The original contract called for a two-year

See Page A-11, GRAIN

Grain project hit by change

Continued from Page A-10

deferral of payments from Alaska Grain with the possibility of a five-year deferral.

Alaska Grain said it wanted to change the deferral to 15 years so it could re-sell the building to a third party for investment tax credits.

Watson informed the council of the Alaska Grain request and advised the council that Alaska Grain might pull out of the deal and sue because of the faulty contract.

"It was held out that we had a faulty contract," Watson said Saturday. It was also known, he said, that should the deal fall through there was a good chance that Alaska Grain would default and the city would have a problem collecting the $628,000 loan made through the Montana Bank.

The council considered the arguments and, on Dec. 20, rejected the request to renegotiate.

On Dec. 27, Eugene Thayer, president of Montana Merchandising, the parent company of Alaska Grain, appeared at an emergency council meeting and asked for reconsideration.

Thayer said Friday he dealt only with his request for the deferral extension at that meeting but acknowledged both sides knew of the contract faults and that default on the loan was possible. He said he intended to go through with the deal no matter what the vote.

The council then approved a deferral, with the company paying a fraction of the bond obligation during the next 15 years.

Thayer, meanwhile, said he will realize more than $1.5 million in the next 90 days when he sells the property for the investment tax credit. He said the money will be used for operating capital and points out that should his company fail the city can still get the building back.

The city faces increased cost of operations because no conveyor system was built, including establishment of truck delivery system to move the grain from silo to dock, Watson said. That will cost $600,000 originally plus salaries for three or four drivers. The city must later pay the cost of putting in a permanent conveyor system.

The company will pay the city a minimum of $45,000 during the first five years of the new deal, leaving the city with a annual bond payments approaching $1.5 million.

Prospects of success for the project hinge on the state's grain program.

The council has been told the state needs 30,000 acres under cultivation — up from 7,500 acres last season — to fill the terminal one time. That amount would fill one small ship and would turn an operating profit for the company.

If the company is to process enough grain to meet the city's bond obligation as well, production would have to be increased to at least 150,000 acres.

Watson said that could come in five to 10 years. He said there is concern the state grain program won't advance as planned but "I'm told its realistic."

Asked Friday whether the operation was a good one in view of its current status, both McAlpine and Lewis said it was.

Lewis said that the financial arrangements were made in an effort to help Alaska Grain get on its feet. He said the "link deposit concept" used with the Montana bank was sound and that the city funds were safe.

Because of it, he said, jobs and port commerce will be created. McAlpine agreed.

Watson, who wasn't in Valdez until this fall, said he could not challenge the intentions of the previous administration. "I think they were convinced the state would make it (grain production) grow."

Asked if he would propose an arrangement like the Montana deposit, he said, "As a professional manager you are very conservative person. It depends on the mood of the community. Your role is not to dictate but to respond to the wishes of the council."

'Gloomy' Valdez grain study, tax roll change found

By STEVE SEPLOCHA
JOHN LINDBACK and
DON HUNTER
Daily News reporters
©1983, Anchorage Daily News

After Mark Lewis left the city manager's job in Valdez for a Cabinet post in Juneau, the new city manager discovered that tax rolls had been improperly altered under Lewis' tenure and that Lewis had withheld a $17,000 feasibility study predicting gloomy prospects for a $10 million grain terminal the city has since built.

Lewis, in an interview Friday, acknowledged the tax rolls were changed and said the council may not have seen the report, but denied any wrongdoing on his part.

Lt. Gov. Stephen McAlpine, who was Valdez mayor during the period, said he learned only recently of the tax roll change and the existence of the feasibility report.

Lewis's performance as chief administrator in Valdez came into scrutiny beginning in September, when it was learned he had changed personnel rules two months before he left office and took $6,174 in extra pay as a result when he left office in July.

Appraiser Rich Randell, who had a contract to assess city property for the tax roll, says Lewis asked him in early 1981 to lower his valuation of property in the pipeline terminus city.

Randell said he told Lewis his figures might be computed differently by someone else because no two assessors see things the same way, but "I'm going to give you what I think the numbers are."

State law requires assessment at 100 percent of fair market value.

Randell said he told Lewis

See Back Page: PESSIMISTIC

Pessimistic Valdez grain report, changes in tax assessment rolls found

Continued from Page A-1

that he (Randell) wouldn't change the numbers but that the city could do what it wanted to with them.

The numbers were later lowered 15 percent across the board and the roll was presented to the council for certification without mention of the change.

Alaska statutes and the city code of Valdez say only the assessor, after instructed by the city council, can change numbers on the roll and he must personally certify those changes to the council.

Lewis claims Randell agreed to the changes and certified them to the city in a letter shortly after the change. Randell says his letter did not agree to alter the figures.

Valdez taxes two separate assessment rolls. The one that was changed was for all non-oil-related property in the city. The city sets the assessment and applies taxes to this property.

Oil-related property is taxed by the city at the same rate as non-oil related property, but is assessed by the state.

The effect of the change on the city-assessed roll was that oil-related property did not receive the same break and, accordingly, paid a higher percentage of city revenues during 1981-82.

Randell said in preparing the 1982 roll he asked the city whether the 15 percent break was to be applied again. He said he was told "yes" and submitted the figures that way "to save them the trouble of changing it."

Current Valdez City Manager Jim Watson and Lori Anderson, secretary to the city manager, say Lewis directed the change in assessments in 1982. The council did not address the issue.

Anderson said Lewis's directive was verbal.

Individual property cards maintained by Randell reflect 100 percent values, as required by law, for both years, he said.

Charges of suppression of information surfaced when it was learned that Lewis did not alert council members of a $17,000 grain terminal feasibility report.

The report, submitted to Lewis Feb. 17, 1982, came about three weeks before $10 million in bonds were issued to build the terminal and warned of risks in the venture.

Minutes of city council meetings show that Councilman Bob Kellar asked City Attorney Ken Jacobus early in March if it was too late to pull out of the bond deal. He was told it was not.

Kellar, who objected to the bond deal from the beginning, said he did not know that a "gloomy" report was in Lewis's possession when he asked the question.

The report was prepared by consultant Frank Orth, who had a contract to evaluate and advise on the grain terminal project.

The summary portion of the report contained Orth's characterization that it was gloomy and said the city could elect to pull out and let private enterpise develop any grain facilities.

"This relatively bleak forecast suggests that selection of the aggressive policy option may be essential to prevent the city's investment in the grain terminal from being a wasted or seriously underutilized asset," the Orth report says. "While we are disappointed for you and the city to have to make such a gloomy prediction, we do feel that the situation is manageable with a continued aggressive posture on the part of the city and Port of Valdez."

He went on to outline the best route should the city choose to build in light of the "relatively high risk endeavor."

The terminal has been plagued with cost estimate problems, a faulty contract prepared under Lewis's direction, and a crisis with the proposed operator in December that resulted in further losses to the city.

Lewis said Friday that the council was fully aware that the project had some negative aspects.

He said if he is to be judged fairly, the entire context of the operation must be considered.

First, he said, the mood of the community was to build the terminal and his job was to build it. Secondly, he said, the "body of information that was available" in several studies was "relatively positive" toward the project.

He said he did not suppress the Orth study and that it was available to any councilmen who wanted to see it. He said he could not recall if he took any steps to tell the council there was a report that was partly negative.

Fish plant transactions raise questions

Daily News reporters

Dealings between Valdez city officials and fish processors over the past three years have resulted in questions about the propriety of actions by Stephen McAlpine, now lieutenant governor, and two other members of the City Council.

The complex string of transactions concerns a city-owned warehouse bordering the Valdez dock that the city leased for use as a fish processing plant.

The record of the city's eviction of one processor and lease with another shows:

• That McAlpine, acting as a lawyer while serving on the Valdez City Council, had a $7,200 warehouse rent check to the city seized on behalf of a private client;

• That McAlpine vigorously pressed for city payment of $68,000 in repairs to the dockside facility for a subsequent renter even though the firm had agreed to lease it "as is;"

• That two councilmen were stockholders in a corporation that leased the city property — and one of them later gave up his ownership so he would be allowed to vote to help the firm;

McAlpine, Lewis leave legacy behind in Valdez

By SHEILA TOOMEY
Daily News reporter

The town and the men who ran it were alike: ambitious, confident, brash.

Mark Lewis and Stephen McAlpine have moved on to higher office now, leaving behind a mixed legacy in Valdez. But for a couple of years they were the dream team that was going to make it all happen for a city that feels perpetually cheated by destiny — and by an overgrown railroad camp to the west called Anchorage.

A community of 3,700 people located on Prince William Sound, Valdez has Chugach mountain majesty at its back and a year-round port at its feet. "The Switzerland of

See Back Page, McALPINE

McAlpine, Lewis leave a mixed legacy in Valdez where the two teamed up to run city

Continued from Page A-1

Alaska," a bygone promotional campaign gushed.

Settled before Anchorage and once the seat of federal power in the state, Valdez' dream of becoming the center of Alaska commerce died at the hands of Anchorage boosters. Instead — like much of Alaska — Valdez is temporarily oil rich and worried about the future.

Things started to go downhill for Valdez before 1920, when the new Alaska Railroad linked Seward to Anchorage. The freight that once came through the Port of Valdez for the rest of Alaska quickly dropped off. In 1940, what was to have been a branch of the U.S. Third District Court — then headquartered in Valdez — opened in Anchorage. Soon after, the headquarters court and its big federal payroll all moved to the new Anchorage building.

For now, jobs and taxes from the terminus of the trans-Alaska oil pipeline in Valdez have brought the always feisty town a new era of optimisim and opportunity.

For the future, "diversification" is the dream: grain terminals, fish plants and tourists to take up the economic slack when the oil runs out.

In 1978, when Lewis arrived in Valdez to begin a $2,385-a-month job as assistant city manager, the town was looking for someone to help them take charge of the future. Within the year, the man who hired Lewis had been fired and Lewis had his job.

Then in his late twenties, Lewis had grown up in Edina, Minn., an affluent suburb of Minneapolis. He was graduated in 1974 from Washington State University with a bachelors degree in politics and public administration and headed for Alaska.

During a three-year stint as administrative assistant in the Juneau city manager's office Lewis seemed eager to learn how local government really worked. "He was always ready to take the bull by the horns," is how one coworker from that period put it.

Valdez City Council members say they were impressed by Lewis' intelligence, his hustle and his savvy about government systems. "The old city manager was into delegating authority," said a Valdez businessman who was on the council at the time.

"After a while Mark looked sharper than him at the council meetings."

During his own administration, where he came to earn $60,000-a-year, Lewis rarely delegated authority to anyone, according to present and past city officials. His department heads reportedly made few decisions on their own.

At least once, when Lewis and the mayor were both out of town, subordinates had difficulty finding someone authorized to sign a check.

At about the time Lewis came to power, one of Valdez' two lawyers was elected to the City Council. At 30, Stephen McAlpine had lived in Valdez on and off for almost 10 years. A native of Yakima, Wash., and a graduate of the University of Washington, he worked for the state and for a pipeline company before getting a law degree from the University of Puget Sound Law School.

One of the most interesting things about McAlpine is that his friends and his enemies use the same words to describe him: colorful, aggressive, articulate, hot tempered. "He really knows what he wants," says gas station owner and former Valdez Mayor Mack MacDonald. "He's politically astute. He gets things done."

Steve McAlpine

Mark Lewis

"He's a colorful character," a former girl friend says of McAlpine, "but he pushes too far. He baits people into fights. He wants to ram a point down your throat beyond good taste, beyond politics, beyond reason."

However, the same woman called McAlpine charming, perceptive, shrewd and able to laugh at himself. And MacDonald says he has a lot of respect for McAlpine although the two often disagree.

"When he kicks your fanny, that's the end of it," MacDonald laughs.

A year after joining the council, McAlpine was elected mayor and for the next two years — according to most accounts, but not theirs — the two men ran Valdez virtually on their own.

Together and separately, Lewis and McAlpine usually convinced the City Council to go along with them, at least partly because both so hated to lose even the smallest point.

MacDonald remembers a minor flap about how a new Little League baseball diamond should be laid out — "You know, how the sun should rise and set and so forth."

Lewis allegedly told Little League sponsors that the city already had decided how to lay it out, "and that was that. it was a small item, no big deal," MacDonald says.

"But when I got to the council meeting he had a bunch of experts there. He took me to the cleaners." The baseball diamond was laid out the way Lewis wanted.

"He always lined up his ducks," MacDonald said. "He was always ready."

The stories about McAlpine sound a similar chord. Charles LaPage, a long-time city councilman, local accountant and air service operator who was a frequent political foe of the administration, accuses McAlpine of using his attorney's skills to belittle people who challenge him. "And he will defend his actions to the end in the face of criticism," LaPage said.

Aggressive is the most often offered description of both men — usually meant as a compliment. People seem either to have loved them or hated them. "They're that kind of people," MacDonald said.

Like others, MacDonald had little quarrel with Lewis' and McAlpine's plan to develop Valdez. "It's just how you get there," he said.

Respectively divorced and separated at the time, McAlpine and Lewis socialized as well as worked together. Valdez is a small town and Lewis and McAlpine were well known. Townspeople described them a close friends.

For a while all was well between the town and the two bright young men who ran it. If their own ambitions were obvious — well, Valdez isn't the kind of place that would fault men for ambition as long as they were willing to tie the town's fortunes to the tail of their personal comet.

During this period Valdez built a beautiful convention center — one that can handle more people than Valdez hotels can accommodate.

In a financial transaction that is now being questioned, the city floated a $10 million bond issue and beat the state in a race to construct a grain terminal. The terminal joined a new floating dock to complete an international barley marketing system.

Its future — like that of the state's barley crop itself — remains uncertain.

There is a new airport terminal with a space-age radar system so sophisticated that planes landing in Valdez can't use it.

And, in the midst of plenty, there's a looming 70-percent property tax hike.

By early 1982, the bloom was off the rose, at least for Lewis. Four, perhaps five, Valdez City Council members favored firing him because of prevailing sentiment that he was making too many important decisions without consulting them, according to council members LaPage and Jason Wells, and former Councilman George Hillar.

Lewis resigned. It was the third time he had submitted his resignation; this time it was accepted.

"I think this town needed him for a while," says former Mayor MacDonald, "but it was time for him to leave. We knew it and he knew it."

Around the same time, McAlpine filed for lieutenant governor and eventually the team moved on. Lewis helped McAlpine during the primary race and ran the Sheffield-McAlpine headquarters in Fairbanks during the general election campaign.

Now Lewis is Commissioner of Community and Regional Affairs. The new job makes him responsible for the federally funded CETA program, the state's coastal management program, senior citizens housing programs, distribution of municipal assistance funds and a miscellany of other community local government assistance programs, including the Local Boundary Commission. Lewis' department also includes the Office of the State Assessor.

As for McAlpine, he is the No. 2 man in state government.

Valdez is still worried about the future.

1-16-83

Fish processing plant transactions raise questions involving McAlpine, city officials

Continued from Page A-1

• That the city leased its facility to a firm composed of local fishermen only to see it taken over — three days later — by a company headed by a man involved earlier in the controversial bankruptcy of Salamatof Seafoods in Kenai; and

• That the city's close relationship with that firm has fueled protest from another Valdez processor who claims unfair competition and threatens to sue.

The story centers on the city-owned warehouse at the Valdez dock. Hoping to diversify the city's oil-dominated economy, city officials in 1978 awarded a lease on the building to a fish processing company that in early 1980 fell into serious financial difficulties.

A restructured company called Arctic Coast Fisheries Inc. then assumed control of the leased plant and scaled down operations. The company began to run up unpaid bills, and a series of non-sufficient-funds checks were issued to fishermen and former employees.

In early 1981, the city began to explore the possibility of declaring Arctic Coast in default and resuming control of the processing plant. On March 20, then City Manager Mark Lewis sent notice to the firm that the city considered the company in default for three reasons:

• Monthly rent payments totalling $3,600 for January and February had not been the city.

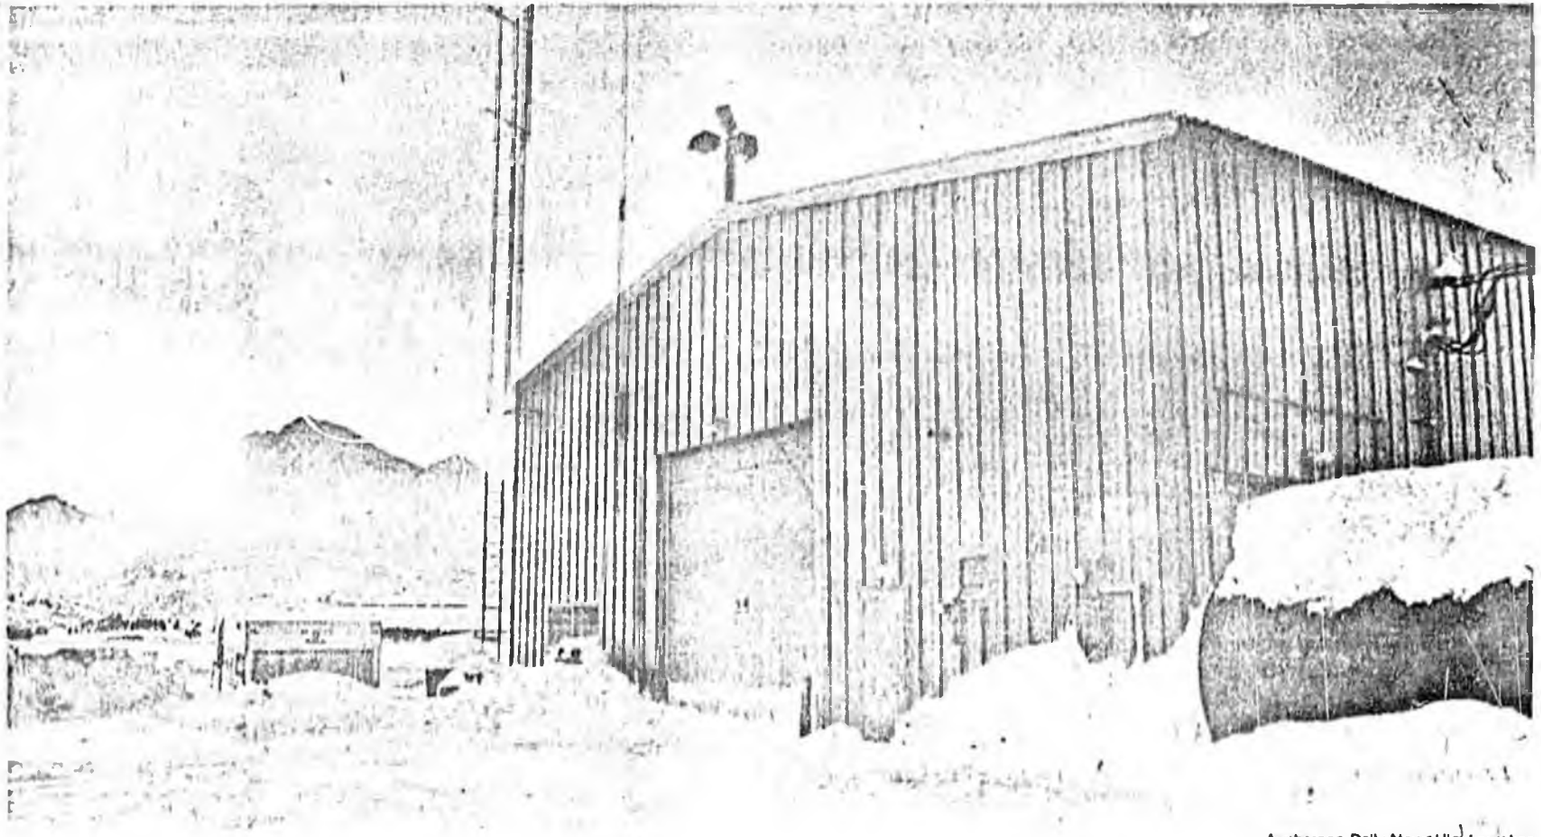
McAlpine told his fellow councilmen that it was he who had directed the seizure of the check. According to the minutes of that meeting, McAlpine said because he had "several interests in having Arctic Coast Fisheries eliminated, he (McAlpine) would abstain" from voting on a motion to declare the company in default."

But he still lobbied the council to find the company in default. The minutes show: "Mr. McAlpine did, however, proceed to explain his futile efforts to seek other assets and declared that because both Farm-N-Sea (the company that preceded Arctic Coast) and Arctic Coast fisheries have done nothing but exhibit a bad faith position both to the city and the fishermen who attempted to serve them and open this area for fisheries development, and because they had not properly filed bonds and become licensed with the state of Alaska, he was in favor of declaring default."

When questions were raised about McAlpine's seizure of the check, City Attorney Ken Jacobus replied that "there might be a conflict of interest because both his (McAlpine's) client and the city wanted the check."

With McAlpine abstaining, the council then voted 6-0 to confirm Lewis' declaration of default.

McAlpine this week said he learned of the rent payment by reading information sent to all members of the City



Anchorage Daily News/Jim Lavrakas

Photo shows the Waterkist warehouse in Valdez

interested in moving into the warehouse.

A ballot proposition that would have created a company owned by Valdez citizens to operate a processing plant failed at a special election in 1981.

In January 1982, according to City Council minutes, a tour of the plant was conducted with Orth, council members, and Prince William Sound Processors, a new firm

line Service worker and a part-time commercial fisherman who also serves as head of the Valdez Fisheries Development Association. Wells is a fisheries biologist for the association, which is developing a salmon hatchery near Valdez.

Kellar said he didn't view as a conflict of interest his strong advocacy for fisheries development in Valdez so he and others in the local indus-

council members, Wells said.

And without votes from himself or Kellar, the lease couldn't have been accomplished. Both those factors led Wells to dispose of his interest in Prince William Sound Processors.

"It enabled me to become the sixth vote," Wells said. He said his intent was not personal financial gain. "My total emphasis has been to get something going in Valdez for

million worth of improvements to the building. Its monthly payroll during the summer months of operations was $150,000, Waterer said.

But the complaints about the arrangements spurred worries by the new city administration headed by present City Manager Jim Watson.

The city in November mailed a notice of default on the lease to Waterkist, arguing that assignment of the

of declaring Arctic Coast in default and resuming control of the processing plant. On March 20, then City Manager Mark Lewis sent notice to the firm that the city considered the company in default for three reasons:

- Monthly rent payments totalling $3,600 for January and February had not been made;
- The company allegedly had failed to maintain liability insurance; and
- The company had ceased actively purchasing or processing fish.

The notice allowed the company 30 days to correct the deficiencies.

In April, Arctic Coast sent a check for $7,200 — to cover the rent for the first four months of the year — to City Hall. McAlpine, then a city councilman, issued a writ of execution on behalf of a client to whom the company owed money and had a state trooper seize the check at city offices. The check was held by the court for several weeks until the city secured its release.

On April 17, Lewis wrote another letter to the firm advising that the $7,200 check had been seized by troopers. "Needless to say," Lewis continued, "this leaves the rent on the city owned building still due."

Lewis also discounted Arctic Coast claims that its scaled-down operation still conformed with the lease. "We do not, under any stretch of the imagination," Lewis wrote, "believe that your watchman selling some of the product retail or wholesale justifies 'active fish purchasing or food processing.' "

Lewis told the firm the city still considered Arctic Coast in default and ordered it to move company equipment stored on or in city property within 20 days.

At the May 5, 1980, City Council meeting, Lewis told the council that Arctic Coast had been advised that it was in default of the lease. He also noted that the $7,200 rent check had been seized from because both his (McAlpine's) client and the city wanted the check."

With McAlpine abstaining, the council then voted 6-0 to confirm Lewis' declaration of default.

McAlpine this week said he learned of the rent payment by reading information sent to all members of the City Council that was also available to any member of the public.

He argued that his first responsibility was to his client.

McAlpine said the conflicts that have arisen throughout the city's attempts to support fisheries development can be attributed to Valdez's small population.

"It's a small town. At one time or another I have represented the majority of people in the city," he said.

At least five suits and countersuits surrounding the disposition of the Arctic Coast lease have been filed. A trial on several of those suits, since combined, was scheduled for Oct. 4, 1982. It was delayed on the motion of the city, supported by affidavits from Lewis and McAlpine, who in part argued that their involvement in the general election campaign would hinder their participation.

At the time, McAlpine was campaigning for lieutenant governor and Lewis — who had stepped down as Valdez city manager in mid-July — was managing the Sheffield-McAlpine Fairbanks campaign.

The trial is now set for April 23.

Even before the Arctic Coast eviction, the City Council decided to look for another processor. Seattle consultant Frank Orth was commissioned to conduct a $240,000 study on prospects for the fish processing industry in the area and search out businesses that might lease the warehouse.

Orth's 1980 study concluded that fish processing was a feasible industry for Valdez. But the consultant said he couldn't find anyone firmly would have created a company owned by Valdez citizens to operate a processing plant failed at a special election in 1981.

In January 1982, according to City Council minutes, a tour of the plant was conducted with Orth, council members, and Prince William Sound Processors, a new firm.

Also on the tour was Tom Waterer. Council members say they were told he was considering running the fish processing plant for Prince William Sound Processors.

On April 12, 1982, the city's warehouse lease with Prince William Sound Processors was executed. Three days later, the firm was taken over by Waterkist Corp. Its president is Tom Waterer.

Waterkist operated the plant all last summer. But another local processor, Sea Hawk Seafoods, some members of the City Council and other citizens of Valdez have questioned the original intent of Prince William Sound Processors and Waterer.

Council members and city officials said they didn't realize that Prince William Sound Processors intended to sell out so quickly. They thought the city was leasing its building to a group of local fishermen, not a man who was formerly connected to Anchorage and Kenai fish processing businesses.

"The first time I was introduced to Mr. Waterer, he was going to be the manager of the plant for Prince William Sound Processors," said City Councilman Chuck LaPage. "The next thing we know, Prince William Sound Processors isn't doing anything and Waterkist is running a plant out of the city's building," LaPage said.

Waterer was out of town and attempts by The Daily News to reach him during the past week for comment were unsuccessful.

Prince William Sound Processors, composed of about 20 area fishermen, included two City Council members, Bob Kellar and Jason Wells.

Kellar is an Alyeska Pipe- of the Valdez Fisheries Development Association. Wells is a fisheries biologist for the association, which is developing a salmon hatchery near Valdez.

Kellar said he didn't view as a conflict of interest his strong advocacy for fisheries development in Valdez so he and others in the local industry could have another place to sell their fish.

"You've got to remember, processors are folding up all around the state," said Kellar.

The Orth study said a successful fish processing operation would help others get started in Valdez, Kellar said.

Orth, as part of his study, tried to search out potential processors for Valdez but was unsuccessful, Wells said. So he and 19 other fishermen formed Prince William Sound Processors.

But Orth introduced Waterer to the group, and after the lease with the city was signed in April, a stock transfer took place that "made Prince William Sound Processors for all intents and purposes a dead horse," Wells said.

Wells said he sold his stock in Prince William Sound Processors soon after the council began discussions of leasing the group its waterfront warehouse. He said he had left the group because of a conflict of interest with his elected position as a city councilman.

Kellar has opted to maintain his interest in Prince William Sound Processors. Minutes of City Council meetings show that Kellar has abstained from all votes on the city's deal with the fish processing operation.

But he said in an interview that he doesn't consider it a conflict of interest for him to discuss and lobby with other councilman on matters pertaining to the firm.

"I could see I was getting into a conflict of interest situation, and I didn't want to get into that," Wells said.

Any time the city leases or sells property, it must be approved by six of the seven couldn't have been accomplished. Both those factors led Wells to dispose of his interest in Prince William Sound Processors.

"It enabled me to become the sixth vote," Wells said. He said his intent was not personal financial gain "My total emphasis has been to get something going in Valdez for fisheries," he said.

"Every fisherman in town has been accused of being in cahoots with the city and it's not true," said Wells, adding that he intends to complete the second year of his term and bow out of city politics.

The Waterkist merger spurred a new issue for the city when Waterer in June presented them with a letter demanding payment for $70,000 in repairs to the warehouse.

A source of dispute in that controversy was that the lease agreement specified that the firm would be willing to accept the building "as is, where is" and wouldn't press the city to finance improvements.

Council minutes show Waterer argued that the repairs should have been financed by the city because there was no way he could have realized they were necessary when he took a tour of the building in January 1982.

Members of the council including McAlpine, voted to pay for $68,000 of the repairs. McAlpine, according to council minutes, argued that the city had a moral obligation to appropriate the funds in order to ensure the success of the processing plant. He also argued that the repairs would be permanent improvements to the city-owned building.

Competitor Sea Hawk Seafoods Vice President Sandy Cesarini protested the move. She also asked the council to appropriate $68,000 to her business so that all processors in Valdez would be treated equally. The City Council did not respond.

According to a letter by Waterer printed in the Valdez Vanguard, the local newspaper, Waterkist has made $1 summer months of operations was $150,000, Waterer said.

But the complaints about the arrangements spurred worries by the new city administration headed by present City Manager Jim Watson.

The city in November mailed a notice of default on the lease to Waterkist, arguing that assignment of the lease from Prince William Sound Processors to Waterkist required City Council approval. The council must now decide whether to approve that assignment.

The emergence of Waterer in the processing operation has fueled a petition drive that calls for the city to investigate the background of businesses that intend to lease city property.

Last week Watson said he has asked Waterer to submit details of his financial background to auditors who can compile a report for the town government.

But some details are already public.

Waterer was head of Salamatof Seafoods, a fish processing plant in Kenai that went broke two years ago.

At least some council members have been notified that the federal government recently filed a notice of federal tax liens against Waterkist in the amount of $43,808.

"The thing showed up in my mailbox in a clean white envelope with no return address," LaPage said.

LaPage, an accountant, said the notice indicates that during 1982 Waterkist deducted Social Security and income taxes from its employees and did not make later payments to the federal government.

Meanwhile, Sea Hawk Seafoods is showing signs of taking legal action.

Sea Hawk lawyer Henry Camerot recently mailed a letter to the council, demanding that the City of Valstop its help to the Waterkist operation. The city is participating in an illegal restraint of trade under provisions of the Sherman Anti-Trust Act, Camerot contends.

TO: Committee on Community and Regional Affairs

FROM: Staff

SUBJECT: Confirmation Hearings

DATE: March 18, 1983

The following comments were prepared as a result of a discussion during which legal advice was requested for the question: "What is the role of the Committee in conducting confirmation hearings?"

Presumably the nominee who will be appearing before the Committee has received careful consideration by the Governor and as such, represents the Governor's choice for the position. Traditionally, the Committee has an affirmative attitude towards the Governor's selection.

The question which the individual committee members must resolve in their own minds is: "Do you believe the nominee would properly fulfill the duties of the Commissioner?"

The decision is essentially a political process as opposed to a legal process. There is no requirement to apply the rule of "burden of proof;" a more appropriate description is a "burden of persuasion."

During the process, the determination of an act or acts being technically illegal is "mildly interesting" and in large part irrelevant from the perspective of the Committee. The question of impropriety is more important in the decision making process.

The rationale for the previous statement is that the commitment of an illegal act(s), even if substantially proven, may or may not be indicative of a person's qualifications to perform assigned duties and, the Committee is not in a position to prosecute for illegal acts.

On the other hand, the Committee is charged with making a judgement, based on all reasonably available information, whether or not the actions of the individual convince the Committee that the nominee will, or will not, properly fulfill the role of Commissioner.

TAB 1 - GENERAL QUESTIONS

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS:

Can we expect any changes in the direction, philosophy, or organization of the Department of Community and Regional Affairs, and, if so, how will they differ from the present situation?

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS

The Department of Community and Regional Affairs recently compiled a list of capital improvement projects submitted by state municipalities. Does this activity indicate that the Department will act as a screening agency to establish priorities for state funding of all capital improvement projects, including such things as airports, roads and sewage facilities?

Committee on Community & Regional Affairs

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS

A major portion of the effort and resources of the Department of Community and Regional Affairs is directed towards grant administration and other activities for the unincorporated communities and unorganized boroughs.

One of the major reasons for the establishment of the Department was to assist the unorganized areas in achieving a level of sophis..cation and education that would encourage them to organize into municipalities for the delivery of services.

In your view, has the Department been a success or a failure in this role?

Do you believe the Department should encourage rural areas to incorporate?

What incentives do you believe are necessary to encourage incorporation?

House of Representatives
Committee on Community & Regional Affairs

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS

To date, there has been considerable reluctance in the rural - or unorganized borough - parts of the state to organize into municipalities. The state constitution provides for maximum self-government, both through the organized and unorganized borough. However, the delivery of services in the unorganized borough presents considerable problems to the state and to the residents of the unorganized borough.

Partial solutions for the delivery of services have evolved by the formation of such entities as the Regional Education Attendance Area (REAA), the Native Regional Housing Corporations, the Regional Development Corporation, and others. Other needs have been provided for by direct legislative appropriations, usually administered by the Department of Community and Regional Affairs.

Do you feel that providing all these services, some of which are funded at 100 percent from the state general fund, is an inducement or a disincentive to the formation of organized municipalities? Why?

Alaska State Legislature

Juneau, Alaska 99811

House of Representatives
Committee on Community & Regional Affairs

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS

Many of the activities of the Department of Community and Regional Affairs appear to overlap or duplicate the functions of other departments in the Administration. Among these duplicated activities are housing mortgage loans and construction, employment training programs, grants for court litigation, grants for water and sewer projects in rural areas, and many projects that are normally within the realm of responsibilities of the Department of Transportation and Public Facilities.

You have now indicated a desire to organize a separate "grants management" organization which would be similar to a function in the Department of Administration.

In brief, it seems that the Department of Community and Regional Affairs is drifting towards being a separate, large entity that encompasses the responsibilities of all the other departments in state government, and is intended to serve as all state agencies for the rural areas of Alaska.

Do you feel that the Department should perform all functions for the rural areas and the remaining departments concentrate their efforts on the urban areas of the state, or should the other departments perform their respective responsibilities statewide?

TAB 2 - Valdez Property Tax Assessments

POSSIBLE QUESTIONS FOR COMMISSIONER LEWIS

As Commissioner of the Department of Community and Regional Affairs, you will be responsible for reviewing and approving requests for state funds, many of which will be based on the local revenue generating capability, including property taxes.

State law requires property assessments for taxation to be 100 percent of true value. Please discuss your philosophy on who should be authorized to determine property valuations and who should be authorized to change valuations.

DEPARTMENT OF ASSESSMENT

March 22, 1983

MAR 26 1983

House of Representatives
Barbara Lacher, Chairman
Community and Regional Affairs Committee

Dear Representative Lacher:

This is in response to your request for me to review the packet you sent me regarding reduced assessments in Valdez for 1981 and 1982.

The packet seemed to address the legal implications of reducing the assessments and, therefore, contained very little information as to whether or not the reduction of assessments could be substantiated.

After reviewing the packet, as presented, it is my personal and professional opinion that the reduction of assessments in Valdez was not substantiated by any supporting data and the method used could be considered, by professional assessors, as improper and unethical. My opinion is based upon the following observations:

1. Property appraisal is not an exact science but an opinion of value based on facts. Mr. Randell indicated in his letter that it was his opinion that his values represented 100% market value. I believe that a small amount of research will show that these value estimates were based upon facts which Mr. Randell obtained through his market analysis.

2. The valuations were reduced "because he (Mr. Lewis) believed that local economic conditions were depressed to the extent that the market probably would not support the values used by Mr. Randell." Nowhere in the packet can I find any information to support what Mr. Lewis believed. If this strategy were used by other assessors in the State, we might all raise our assessments by 10% - 20% because we believed we were low. This could not happen because our Boards of Equalization require us to show supporting data for our value estimates.

3. Mr. Randell's statement, it is not uncommon for appraisers to differ as much as 15% to 20% in valuation, is a correct statement. However, it should be noted that both appraisers values would be based upon supporting data. The interpretation of this data usually is the reason for a difference of opinions.

MAR 2 6 1983

4. The statutes mandate that the assessor assess property at its full and true value, not attempt to assess at a level comparable with other municipalities.

As I stated earlier, the appraisal of real estate is not an exact science but an opinion of value based on facts or supporting data. If Mr. Lewis believed that the assessments were high, a sales ratio study should have been conducted. A sales ratio study may have shown that the assessments were high and adjustments were warranted. This would have been the proper method for an assessor to follow rather than an arbitrary percentage reduction. I would like to point out that this may have been done, however, I did not see it in the packet you sent me. If this were in fact done, then I would state that the actions taken were both ethical and proper. For your information, I have enclosed a copy of the IAAO Code of Ethics which most assessing offices use.

As to your question regarding the tax dollar amounts as reported by Gerald Heier with the Department of Revenue, I believe the figures obtained are correct with respect to the information he received.

I hope I have answered your questions and would like to point out that the opinions expressed in this letter are my personal opinions and not necessarily those of my employer.

Respectfully,

Steve Van Sant
Director of Assessments
and Land Management

cr

International Association of Assessing Officers

MAR 26 [illegible]

Code of Ethics

The functions of the assessing officer and other members of IAAO are professionals in character. This Code of Ethics is a set of dynamic principles guiding the members' conduct. Each member of IAAO agrees that he will:

1. Cooperate fully with other members in all matters affecting his offical duties.
2. Conduct his activities in a manner that will reflect credit upon himself, other members and the IAAO.
3. Cooperate with the IAAO and its officers in all matters, including, but not limited to the investigation, censure, discipline or expulsion of members who by their conduct prejudice their professional status or the reputation of the IAAO.
4. Protect the professional reputation of other members of IAAO who subscribe to and abide by this Code of Ethics.
5. Treat as confidential all information concerning persons or their property obtained in his official capacity, except for lawfully authorized uses. It is proper for members employed by different jurisdictions to exchange factual information concerning persons or their property to aid either or both in the assessment of property legally subject to taxation.
6. Perform his assessment duties in a manner consistent with statutory requirements without advocacy for accommodation or any particular interests, being factual, objective, unbiased and honest in his conclusion.
7. Maintain, at all times, a courteous and respectful attitude in his relations with taxpayers, public officials and the public generally, and to compel a similar attitude on the part of his subordinates.
8. Give full faith and allegiance to his oath of office, apply the law of his jurisdiction to all taxpayers alike, and obey all applicable laws and regulations.
9. Conform in all respects to this Code of Ethics, The Standards of Professional Conduct and the Constitution of the IAAO as the same may be amended from time to time

Standards of Professional Conduct

In relations with assessing officers, an IAAO member will:

Cooperate within the legal and ethical boundaries of his office or profession with other members who request his cooperation in performing the functions of their offices or profession.

Treat information obtained in his professional capacity as confidential unless use of that information is authorized by law. It is proper for members employed by different jurisdictions to exchange factual information concerning property to aid either or both in the assessment of property legally subject to taxation.

Protect the professional reputation of other members who subscribe to and abide by these Standards of Professional Conduct.

Give full credit to the originator of any material he uses in his writings or speeches.

Conduct his activities in a manner that will reflect credit upon himself, other members, and the IAAO.

Cooperate with the officers of the IAAO in all matters, including but not limited to the investigation, censure, discipline, or expulsion of members whose conduct casts a shadow on their professional status or the reputation of the IAAO.

In relations with public officials, an IAAO member:

Has a duty to cooperate with public officials to improve the efficiency and economy of public administration.

Will always maintain an attitude of respect and cooperation toward public officials and governmental agencies to whom the law has assigned official duties relating to the work of the IAAO member.

In relations with the public and taxpayers, an IAAO member will:

Maintain at all times a courteous and respectful attitude in his relations with taxpayers, taxing officials, and the public generally, and will compel a similar attitude on the part of his subordinates.

Give full faith and allegiance to his oath of office.

Apply the law of his jurisdiction equitably.

Perform his duties in a manner consistent with statutory requirements without advocacy for accommodation of any particular interests; he will be factual, objective, unbiased, and honest in his conclusion.

Appraisal standards to be complied with by IAAO members:

Any appraisal by an IAAO member shall conform to the highest professional assessment/appraisal standards.

Any value estimate made for assessment purposes by an IAAO member shall be an estimate of true market value as defined by the courts having jurisdiction, regardless of the assessment percentage to be used, except when the law of his jurisdiction requires or the assessment practice in his jurisdiction permits special valuation techniques.

Any value estimate made by an IAAO member shall be a true opinion of value in accordance with generally accepted appraisal practices, except when the law of his jurisdiction requires or the assessment practice in his jurisdiction permits special valuation techniques.

Any fee appraisal assignment accepted by an IAAO member shall be one in which he has no unrevealed personal interest or bias, and one which he is competent to complete without placing his personal integrity or the assessing/appraisal profession in jeopardy.

It shall be unethical for a member of IAAO to accept an engagement for which the amount of his compensation is contingent upon reporting a predetermined value or upon the amount of the value estimate; or upon reporting a predetermined opinion, conclusion, or recommendation; or upon the amount of a tax reduction obtained by a client where his services are used; or upon any result, value, or subsequent transaction.

Review of potential State claim against
the City of Valdez for recovery of taxes
paid under AS 43.56

In conjunction with the Department of Law, we have completed an investigation of allegations that Mark Lewis, the former City Manager of Valdez, improperly reduced assessments on local property in 1981 and 1982, thereby increasing the overall millage rate in the local tax on the petroleum properties in concomitantly reducing taxes paid to the State, and have concluded from the facts that Mr. Lewis did not act improperly or illegally. Therefore, the State should not pursue any claim against the City of Valdez for recovery of additional taxes under AS 43.56 and we view the matter as closed.

A copy of the Department of Revenue's report dated March 14, 1983 and a copy of the Department of Law's legal opinion dated March 16, 1983 are attached. The following is a brief summary of those findings.

AS 43.56.010(a) imposes a state tax of 20 mills on oil and gas property. Under AS 43.56.010(b) and AS 29.53.045 a municipality may levy a tax on petroleum properties within its jurisdiction at the rate applicable to other property tax by the municipality. The tax paid to a municipality under this subsection is then credited under AS 43.56.010(d) against the state tax due.

In 1981 and 1982, the City of Valdez hired on contract an appraiser to assess property in the city for purposes of taxation. The contractual provisions required the appraiser to perform the statutory duties of an assessor. Under state law (AS 29.53.060(a)) and the Valdez city code (25-4 (2)) the city is required to assess property at its true and full value. Both define "full and true value" in a manner which clearly allows for a determination upon which reasonable minds can differ. In addition, real estate appraising is not an exact science and does not allow for "full and true value" determinations to be precise and often appraisers differ by as much as 20 percent on valuations.

House of Representatives
Barbara Lacher, Chairman
Community & Regional Affairs Committee

Senate
Frank Ferguson, Chairman
Community & Regional Affairs Committee

The City of Valdez's contracted assessor made his real property valuations as being 100% of fair market value, however, Mr. Lewis believed the assessor's assessments were high in light of the local economic conditions and after consultation with the assessor lowered the assessments by 15%. The assessor certified the reduced assessments as true and correct for 1981 and 1982.

The Department of Revenue investigation shows that all the real property assessments ratios for the municipalities which contain petroleum property are less than 100% of valuation. The ratios for Valdez in 1981 and 1982 are 89.6% and 93.8% respectively. When comparing the Valdez assessment ratios with the assessments ratios of other municipalities having oil and gas properties which ranged from 70.0 to 93.8, it is clear that the City of Valdez appraisals were in fact high and will not support a finding of any improper or illegal action.

In conclusion, the facts do not substantiate that Mr. Lewis acted improperly or that his actions resulted in the City of Valdez making any illegal real property assessment determinations under AS 29.53.060(a) and therefore, we conclude that the State did not lose any revenue under AS 43.56.010(d) and the matter is closed.

Sincerely,

Robt D Heath

Robert D. Heath
Commissioner of Revenue

FOR IMMEDIATE RELEASE - February 18, 1983

TITLE: Revenue sharing under oil and gas property tax.
FROM: Alaska Department of Revenue, Pouch SA, Juneau, AK 99811

The Department of Revenue is conducting an overall review of local property tax assessment procedures utilized by those jurisdictions which share oil and gas property tax revenues under AS 43.56 to determine if the state is receiving its proper allocation under that program. This review was prompted by allegations that assessment practices utilized by the City of Valdez led to an underpayment of oil and gas property tax to the state during the years 1981 and 1982. The final report will be concluded by early March, but due to misimpressions left by the Anchorage Daily News story (Feb. 18) relating to the Valdez situation, Robert Heath, Commissioner of Revenue, feels that the preliminary results of the investigation should be released at this time.

First, the 1981 and 1982 ratios of local assessments to full and true appraised value as set fortn in Alaska Taxable 1981 and 1982 are as follows:

	*1980	1981	1982
Anchorage		87.24	82.05
Kenai		90.39	79.93
Fairbanks North Star Borough		93.11	87.03
Valdez	94.74	89.6	93.84
Matsu		80.84	88.18
North Slope Borough		70.0	76.0

These indicate that, during the relevant period, the Valdez assessments compared very favorably with other assessment ratios.

--Add One--

* SOURCE: DEPT. OF Community and Regional Affairs Report (ANCHORAGE)

Second, officials of the Department of Revenue conducting the review indicate that it is not unusual for these "appraised" values and "assessed" values to differ by ten to fifteen percent.

Commissioner Heath stated: "The results of the overall investigation will be made public once they have been reviewed and approved by myself."

PRESS RELEASE

To All News Media

Juneau, Alaska
Friday, February 18, 1983

Commissioner of Community & Regional Affairs, Mark Lewis, today said he welcomed a State review of 1981 and 1982 tax assessment roles across Alaska, particularly those compiled by the City of Valdez during his tenure as City Manager.

The Commissioner said that adjustments were made uniformly to the pre-certified residential property tax roles in the post-pipeline town. These adjustments were made while the assessments were in draft form prior to certification of the roles and after a review was conducted to consider the towns artificially inflated tax roles, which were a result of the boom economy resulting from pipeline construction. The adjustments were made to reflect the proper post-pipeline market conditions and were made legally and properly.

Lewis presented the back-up documentation which clearly indicates the tax roles were not improper and that studies of assessed valuation to market value indicate Valdez assessments were in conformance with State standards.

Lewis said, "It is unfortunate the recent stories did not present the complete facts on the issue and have a one-sided biased interpretation."

March 31, 1981

Re: Real Estate Values
for Properties Located
in the City of Valdez

City of Valdez
P.O. Box 307
Valdez, Alaska 99686

Attention: Mr. Mark Lewis

Dear Mr. Lewis,

In reference to our conversation of March 23, 1981 pertaining to assessed values for tax purposes in the city of Valdez, I feel that the valuations I arrived at are 100% of fair market value. However, it is not uncommon for appraisers to be as much as 15% to 20% apart in valuation and two appraisers could arrive at two different values on the same piece of property. Therefore, it would be reasonable to apply a percentage of increase or decrease to the values I arrived at for assessment purposes.

Real estate appraising is not a science, it is an estimation based on knowledge and analysis of the real estate market. The analyses utilized in arriving at an estimation is uniform throughout the appraisal field, but because of the many different variables involved in these processes different appraisers do arrive at different estimations of value.

I hope this satisfactorily answers your questions and if any others should arise please contact me.

Very truly yours,

Richard G. Randell

CONTRACT F PROFESSIONAL APPRAISAL RVICES

THIS AGREEMENT, made and entered into this 15th day of December ,1981, by and between the CITY OF VALDEZ, a municipal corporation organized under the laws of the State of Alaska, hereinafter referred to as the "City," and Rich Randall Appraisal Company, hereinafter referred to as the "Appraisers".

WITNESSETH:

1. The Appraiser shall:

(a) Appraise, in accordance with standard Alaska tax practice, all taxable real property located within the existing limits of the City at true value, furnishing all necessary cards, photographs and forms required for such appraisal, for tax year 1982 and 1983.

(b) Appraise, in accordance with standard Alaska tax practice, all City, State, and Federal property located within the existing limits of the City at true value, furnishing all necessary property cards with photographs and information on acreage and dimensions as well as a description of any improvements, for tax year 1982 and 1983.

(c) Furnish all necessary equipment and labor, other than legal and/or location descriptions and ownership records of those parcels to be appraised, in connection with the appraisal required in the preceding paragraphs, and make a final report to the City in the manner required by law.

(d) Investigate, evaluate and report to the City the merits of all written complaints received by the City and forwarded to the appraisers after evaluation notices have been mailed and prior to Board of Equalization hearings. The City shall determine which compalints are to be forwarded to the Appraiser for further investigation and evaluation.

(e) Attend hearings of the Board of Equalization at such times as required by law.

City of Valdez Contract for Appraisal Services with Richard Randall 1981

4. The parties agree that all existing property cards and tax records, as well as those cards and records which may be created by the Appraiser while performing this contract, are and shall remain the property of the City.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands and seals the day and year first above written.

(f) Complete, prior to March 1, of each year, all obligations to be performed on the part of the Appraiser with the exception of investigation of complaints and attendance at the Board of Equalization hearings.

2. The City shall:

(a) In consideration of the performance of the obligations undertaken under paragraph 1, Sections (a), (b), (c) and (f), by the Appraiser, pay to the Appraiser the sum of twenty-five thousand two hundred dollars ($25,200) for the 1982 tax year and the sum of twenty-five thousand ($25,000) for the 1983 tax year. Eight thousand four hundred dollars ($8,400) shall be paid not later than December 15th of each year with the remainder to be paid within thirty days of delivery to the City of the tax roll and satisfaction of all contract requirements for that year.

(b) In consideration of the obligations undertaken by the Appraiser under Paragraph 1, Sections (d) and (e) herein pay to the Appraiser amount of FIFTY DOLLARS ($50.00) per hour for the time spent performing these services, except that no additional fee shall be paid for appeals caused by Appraiser negligence, such as appraising non-existent property or misidentifying property.

(c) Provide the Appraiser, prior to commencement of field work in Valdez, with legal or location descriptions, ownership records, owners' addresses, and the existing property cards with photographs from the previous tax year. The property cards and city records shall be returned to the City as soon as possible after use by the Appraiser.

(d) Provide the Appraiser with copies of existing City maps, plats and zoning maps covering the properties to be appraised.

3. The parties agree that the Appraiser shall have no responsibility for the appraisal of either the Pipeline-oriented property which has been appraised by the State or any property, the location and description of which, the City has not provided to the Appraiser.

TABLE IV

LOCAL ASSESSMENTS VS. FULL VALUE

The following information should be used to interpret Table IV:

Municipalities: Boroughs and cities organized under the laws of Alaska, except those second class cities which are located outside of boroughs and do not levy a property tax.

ASSESSED VALUES:

Locally assessed property values taxable under provisions of municipal ordinance and state law. (AS 29.53)

RATIOS:

The relationship in terms of percent, which actual assessed property values bear to the Department's full value determination.

FULL VALUES:

The full value of real and personal property taxable under provisions of local ordinance and state law as equalized by the Department of Community and Regional Affairs in conformity with uniform standards defined in Attorney General Opinion No. 18, 1962.

NOTE: Table III does not include oil and gas property (AS 43.56).

TABLE III

LOCAL ASSESSMENTS VS. FULL VALUE

The following criteria should be used to interpret Table III:

Municipalitis: Boroughs and cities organized under the laws of Alaska except second class cities without boroughs which do not levy a property tax.

ASSESSED VALUES:

Local assessed property values taxable under provisions of municipal ordinance and state law. (AS 29.53)

RATIOS:

The relationship in terms of percent, which actual assessed property values bear to the Department's full value determination.

FULL VALUES:

The full value of real and personal property taxable under provisions of local ordinance and state law as equalized by the Department of Community and Regional affairs in conformity with uniform standards defined in Attorney General Opinion No. 18, 1962.

NOTE: Table III does not include oil and gas property. (AS 43.56).

Article I. Assessment, Levy and Collection of Taxes.

Division 1. Generally.

Sec. 25-1. Property subject to taxation generally.

All property not expressly exempt by the city, or exempted from taxation by the city under federal or state constitutional provisions, shall be subject to annual taxation at its full and true value based upon the actual value of the property assessed. (Ord. No. 6303, § 1.)

Sec. 25-2. Exemption of personal property from taxation; mobile homes classified as real property.

(a) Effective January 1, 1968, all personal property located within or owned by residents of the city shall be exempt from the Valdez personal property tax. This exemption includes, but is not limited to, household furniture and effects, intangibles, inventories and goods in process, and boats and vessels of all types.

(b) For the purposes of this chapter, real property includes, among other things, trailers and mobile homes, and lean-tos and similar structures attached or contiguous thereto. The words "trailers and mobile homes" include all forms of housing adaptable to being moved by a power connected thereto, and which are or can be used for residential, business, commercial or office purposes. Provided, however, that those trailers which are (1) used for camping or recreational purposes only, or (2) not affixed to the site and not con-

nected with utilities, shall be considered to be personal property and exempt from taxation. A trailer or mobile home is conclusively presumed to be affixed to the land and real property for the purposes of taxation when it has remained at a fixed site for more than ninety days. When the ownership of a trailer or mobile home and attachments and appurtenances is different from the land upon which it rests, the city may, in its discretion, assess and tax the ownerships separately. (Ord. No. 6803, § 2.)

Sec. 25-2.1. Exemptions required by state law.

(a) The following property is exempt from general taxation:

(1) Municipal, state or federally owned property; except, that private leaseholds, contracts or other interest in the property shall be taxable to the extent of those interests.

(2) Household furniture of the head of a family or a householder not exceeding five hundred dollars in value.

(3) Property used exclusively for nonprofit religious, charitable, cemetery, hospital or educational purposes. "Property used exclusively for religious purposes" includes the following property owned by a religious organization:

a. The residence of the pastor, priest, rabbi, minister or religious order of a recognized religious organization;

b. A structure, its furniture and its fixtures used solely for public worship, charitable purposes, religious education or a nonprofit hospital;

c. Lots supporting and adjacent to a structure or residence mentioned in subparagraphs a. or b. of this subsection which are necessary to convenient use; and

d. Lots required by local ordinance for parking near a structure defined in subparagraph b. of this subsection.

(4) Property of a nonbusiness organization composed entirely of persons with ninety days or more of active service in the armed forces of the United States whose conditions of service and separation where other than dishonorable, or the property of the auxiliary of such organization.

(5) Money on deposit.

(6) After January 1, 1973, the real property owned and occupied as a permanent place of abode by a resident sixty-five years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more per-

sons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under Alaska Statutes, sections 44.62.560--44.62.570.

(b) Property described in subsection (a) of this section from which income is derived is exempt only if that income is solely from use of the property by nonprofit religious, charitable or hospital groups or by educational groups for classroom space.

(c) No exemption may be granted except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15 of the assess-

ment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, he shall allow an exemption in accordance with the provisions of this section. The assessor may at any time require proof in the form he considers necessary of the right and amount of an exemption claimed under this section. (Ord. No. 7538, § 1.)

Sec. 25-2.2. Additional exemptions.

Thirty percent of the assessed value, up to a maximum of ten thousand dollars, of a principal residence owned and occupied by the taxpayer is exempt from taxation. (Ord. No. 7611, § 1.)

Sec. 25-3. Determination of annual levy, due dates, etc.; limitation on amount of levy.

The rate of levy of tax, the date of equalization of the tax and the date when taxes shall become delinquent shall be fixed by resolution of the city council, and the levy for school and municipal purposes shall be separately made and fixed, but the aggregate thereof shall not exceed three per cent of the assessed value of the property assessed. (Ord. No. 218, § 1.)

Division 2. Assessments.

Sec. 25-4. Assessment procedure generally; preparation of assessment roll.

(a) All taxable property shall be assessed at its true and full value and all assessments shall be uniform and equal and based upon the actual value of the property assessed. The "full and true value" is the estimated price which the property would bring in an open market and under the then prevailing market conditions in a sale between a willing seller and a willing buyer both conversant with the property and with prevailing general price levels.

(b) The city assessor shall annually assess and list on a tax roll all real property in the name of the person by whom it is owned on the first day of January. If no owner or claimant to the property can be discovered, the property shall be assessed to the unknown owner.

(c) The assessor shall complete the listings for the annual assessment roll of all real property within the city before March 1, or other such date as may be established by the city council each year. The listing of all taxable property may be made upon permanent separate ledger cards which will be the combined assessment roll and tax ledger. Real property shall be assessed to the owner of record as shown in the records of the recorder of the district; provided, that any other person having an interest in the property may be listed on the assessment records with the owner. The person in whose name any property is listed as owner thereof shall be conclusively presumed to be the legal owner of record. If the owner of land is unknown, such land may be assessed to an "Unknown Owner" or "Unknown Owners." No assessment shall be invalidated by a mistake, omission or error in the name of the owner of the real property assessed, if the property is correctly described.

(d) The assessor may list real property located in any subdivision by lot and block or tract description, and unsubdivided property according to the land office section and township survey description, or by giving the boundaries thereof, or by reference to the book and page of the records of the recorder where the description may be found or by designation of tax lot number, referring to a public record kept by the assessor of descriptions of real property, or in such other manner as to cause the description to be capable of being made certain. Initial letters, abbreviations, fractions and exponents to designate the township, range, section or part of a section, or the number of any lot or block or part thereof, or any distance, course, bearing or direction, may be employed in any such description of real property.

(e) The assessor personally, or by any designated assistant, shall, after identifying themselves, have the right to enter upon and inspect the premises of any person at reasonable times for the purpose of making an examination, valuation, or assessment of real property. He shall have access to and may examine all property records involved, and any person shall, upon request, furnish to the assessor or his assistant every facility and assistance for the purposes of such examination, valuation or assessment. (Ord. No. 6803, § 3; Ord. No. 7539, § 1.)

Sec. 25-4.1. Reevaluation.

A systematic reevaluation of taxable real and personal property undertaken by the assessor, whether of specific areas in which real property is located or of specific classes of real or personal property to be assessed, shall be made only in accordance with a resolution or other act of the city council directing a systematic reevaluation of all taxable property within the city over the shortest period of time practicable, as determined by the city council and fixed in the resolution or other act of the council. (Ord. No. 7539, § 2.)

Sec. 25-5. Contents of assessment roll.

The assessor shall prepare an annual assessment roll, in duplicate, upon which he shall enter the following particulars:

(a) The names and last known addresses of all persons with property liable to assessment and taxation.

(b) A description of all taxable property.

(c) The assessed value, quantity or amount of such property.

(d) The arrears of taxes, if any, owed by any person. (Ord. No. 218, § 4.)

Sec. 25-6. Notices of assessment to be given; corrections in assessment roll by assessor.

(a) The assessor shall give to every person named in the assessment roll a notice of assessment, showing the assessed value of his property, at least

thirty days before the equalization hearings. On the back of each assessment notice shall be printed a brief summary, for the information of the taxpayer, of the dates when the taxes are payable, delinquent and subject to interest and penalty, dates when the board will sit for equalization purposes and any other particulars specified by the city council. The assessment notice shall be directed to the person to whom it is to be given, and shall be sufficiently given if it is mailed by first class mail addressed to, or is delivered at, his address as last known to the assessor; or if the address is not known to the assessor, the notice may be addressed to the post office nearest to the place where the property is situated. The date on which the notice is mailed, or if delivered by a city official or employee then on the date of such delivery, shall be deemed to be the date on which the notice is given.

(b) When valuation notices have been mailed, the assessor shall cause notice that the assessment rolls have been completed to be published in a newspaper of general circulation once each week for two successive weeks. In the event no newspaper of general circulation is published in the city, the assessor shall cause such notices to be posted at two public places for a period of two weeks. Such notice shall also state when and where the equalization hearings shall be held, and that an appeal may be taken to the board of equalization upon the filing of notice, in writing, with the board specifying the grounds for the appeal.

(c) The assessor may correct any error or supply any omission made or arising in the preparation of the assessment roll at any time before the sitting of the board of equalization. It shall be the duty of every person receiving a notice of assessment to advise the assessor of any error or omission he may have observed in the assessment of his property, in order that the assessor may correct the same.

If errors found in the preparation of the assessment roll are adjusted, the assessor shall mail a corrected notice allowing thirty days for appeal to the board. (Ord. No. 218, § 5; Ord. No. 7539, §§ 3, 4.)

Sec. 25-7. Appeals to board of equalization.

(a) Any person who receives notice or whose name appears on the assessment roll may appear to the board of equalization with respect to any alleged error in the valuation, overcharge, omission or neglect of the assessor not adjusted to the taxpayer's satisfaction. Whenever it appears to the board that there are overcharges or errors or invalidities in the assessment roll, or in any of the proceedings leading up to or subsequent to the preparation of the roll, and there is no appeal before the board by which the same may be dealt with, or where the name of any person is ordered by the board to be entered on the assessment roll, by way of addition or substitution, for the purpose of assessment, the board shall cause notice of assessment to be mailed by the assessor to that person or his agent giving him at least thirty days from the date of such mailing within which to appeal to the board against the assessment.

(b) Notice of appeal, in writing, specifying the grounds for the appeal, shall be filed with the board of equalization within thirty days after the date on which the assessor's notice of assessment was given to the person appealing. Such notice shall contain a certification that a true copy thereof was mailed or delivered to the assessor. If notice of appeal is not given within that period, the right of appeal shall cease as to any matter within the jurisdiction of the board, unless it is shown to the satisfaction of the board that the taxpayer was unable to appeal within the time so limited. A copy of the notice of appeal shall be sent to the assessor as above indicated.

(c) Upon receipt of the notice of appeal, the assessor shall make a record of the same in such form as the city council may direct, which record shall contain all the information shown on the assessment roll in respect of the subject matter of the appeal, and the assessor shall place the same before the board of equalization from time to time as may be required by the board. The board shall cause a notice of the sitting at which the appeal is to be heard to be mailed by the assessor to the person by whom the notice of appeal was given, and to every other person in respect of whom the appeal is taken, to their respective addresses last known to the assessor.

(d) The city may appeal an assessment to the board of equalization in the same manner as a taxpayer. Within five days after receipt of the appeal, the assessor shall notify the person whose property assessment is being appealed by the city. (Ord. No. 218, § 6; Ord. No. 7539, § 5.)

Sec. 25-7.1. Hearing.

(a) If an appellant fails to appear, the board of equalization may proceed with the hearing in his absence.

(b) The appellant bears the burden of proof.

(c) The only grounds for adjustment is proof of unequal, excessive or improper valuation based on facts which are stated in a valid written appeal timely filed or proved at the hearing.

(d) The board shall certify its actions to the assessor within seven days.

(e) The assessor shall enter the changes and certify the final assessment roll by June 1.

(f) An appellant may appeal to the superior court for, and is entitled to, trial de novo of the board's action. Either party to the appeal may demand a jury trial. (Ord. No. 7539, § 6.)

Sec. 25-8. Completion of assessment roll; records of board of equalization; certification of assessment roll.[9]

(a) The assessor shall enter the changes, so certified upon his records, and no assessed valuations shall thereafter be changed. After the hearings held by the board of equalization are concluded, the assessor shall complete the annual assessment roll, at a time to be determined by the city council, which shall be based on values as of January 1 immediately preceding, and he shall certify the same. Such supplementary assessment rolls shall be prepared and certified as may be expedient or necessary.

(b) The city clerk shall be ex officio clerk of the board of equalization and shall record in the minutes of the meeting all proceedings before the board and the names of all persons protesting assessments. All changes, revisions, corrections and orders relating to claims or adjustments and all final decisions shall be recorded in a record to be kept by the city clerk and to be known as the appeal record. Within three days following the final hearings of the board, the city clerk shall transmit to the assessor all corrections, revisions or changes authorized and approved by the board and shall certify that the changes so reported are as approved by the board of equalization.

(c) All taxes to be levied or collected, except as otherwise provided, shall be calculated, levied and collected upon the assessed values entered in the assessment roll and certified by the assessor as correct, subject to the taxpayer's right of appeal and to the corrections and amendments made in the rolls pursuant to this article. (Ord. No. 218, § 7.)

Sec. 25-9. Appeals to superior court.[1]

Any person feeling aggrieved by any order of the board of equalization shall have the right of appeal on a de novo basis to the superior court; provided, that the person has first taken his appeal to the board of equalization. (Ord. No. 218, § 8.)

Sec. 25-10. Supplementary assessment rolls.[2]

All the duties imposed upon the assessor and the city clerk with respect to the annual assessment roll and all the provisions of this article relating to assessment rolls shall, as far as applicable, apply to supplementary assessment rolls. The delinquent date when taxes shall become delinquent, as determined by the city council, shall also apply to property listed on the supplementary assessment rolls. (Ord. No. 218, § 9.)

---

9. For similar state law, see A.S., §§ 29.10.432, 29.10.435, 29.10.429, 29.10.438.
1. For similar state law, see A.S., § 29.10.426.
2. For similar state law, see A.S., § 29.10.441.

Sec. 25-11. Delivery of assessment roll to city council; validity of assessment rolls.[3]

(a) When the final assessment records have been completed by the assessor as provided in this division, the assessor shall deliver to the city council a statement of the total assessed valuation of all real property within the city.

(b) Every assessment roll as completed and certified by the assessor, and as corrected and amended by him from time to time in conformity with this article and the decisions of the board of equalization, shall, except insofar as the same may be further amended as a result of an appeal to the court, as provided by this article, be valid and binding on all persons, notwithstanding any defect, error, omission or invalidity existing in the assessment roll or any part thereof, and notwithstanding any proceedings pertaining thereto. (Ord. No. 6803, § 4.)

Division 3. Levy and Collection.[4]

Sec. 25-12. Determination of tax rate and delinquent date; tax statements; penalties for delinquent payment.[5]

The city council shall thereupon, by resolution, fix the rate of tax levy and designate the number of mills upon each dollar of assessed real and personal property that shall be levied, and shall levy such tax in accordance therewith and shall determine the date when taxes shall become delinquent. If the total tax assessed to any owner is less than one dollar, then the administration may delete such tax obligation from the tax roll.

The assessor shall then prepare and mail tax statements to the persons listed as the owners on the tax rolls. If the total tax assessed against the taxpayer is in excess of ten dollars, the taxpayer shall be given the right to pay such taxes in two installments. If the first half tax is not paid when due, the entire tax becomes delinquent and penalty and interest accrue as provided in this article. If the first half is paid when due, the second half of such taxes shall be payable on the date fixed by the city council for such second half, and if not paid shall be delinquent after such date.

A penalty not to exceed eight per cent shall be added to all taxes delinquent until the due date fixed for the payment of the second half, and interest at the rate of eight per cent a year shall be charged on the whole of the unpaid taxes, not including the

4. For state law authorizing city to enforce tax liens by foreclosure and sale, see A.S., § 29.10.456.
5. For similar state law, see A.S., §§ 29.10.447, 29.10.-450, 29.10.453.

(g) The council has the power to:

(1) Delegate the power to invest the fund to the city manager or other city official, and require reports relating to the investment as it prescribes;

(2) Hire other persons as necessary to assist the council in the exercise of its powers; and

(3) Take whatever other actions are reasonably necessary in furtherance of the purpose of this section. (7-19-77.)

Chapter VII. Taxation.

Sec. 7.1. Taxation by ordinance.

The council shall provide in the Code for the annual assessment, levy and collection of city taxes. Council may provide for differential taxation based upon differences in kind or level of services provided within service areas established by ordinance.

Sec. 7.2. Exemptions.

The power of taxation shall never be surrendered. No exemptions from taxation shall be allowed, except such as are expressly provided by law. Private leaseholds, contracts or interests in land or property owned or held by the United States, the state or its political subdivisions, shall be taxable to the extent of the interests.

Sec. 7.3. Assessment day.

The taxable status of property shall be determined as of the first day of January, or such other date as may subsequently be required by law, which shall be the assessment day. Values on the assessment roll shall be determined according to the facts existing on the assessment day for the year for which the assessment roll is made, and no charge of the status of any property after that day shall be considered by the council when acting as a board of equalization. Standards of appraisal shall be followed by the council when established as a board of equalization.

Standards of appraisal shall be followed by the council when established by law.

Sec. 7.4. Security for taxes on real property.

The city shall have a first lien upon all real property against which taxes are assessed for the taxes and any collection charges, penalties and interest which may accumulate thereto, which lien shall continue until the taxes are paid.

SOURCE: VALDEZ city CHARTER.

Sec. 7.5. Protection of city's real property tax liens.

The city may protect its lien for taxes upon real property by sale at tax sale, or by purchasing the real property at any tax sale or other public sale, or by direct negotiation with the owner. Any such procedure shall be deemed to be for a public purpose. When the city has acquired an interest in real property to protect a tax lien thereon, the owner of any interest in such real property may redeem the same by paying the delinquent city taxes and all accrued charges, penalties and interest thereon. After the city has held any tax delinquent real property for one year, it may hold the same for public use or sell it at public auction to the highest bidder.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

Sec. 7.6. Security for taxes on personal property.

City taxes on personal property shall be a debt to the city from the persons to whom they are assessed. If any person to whom such taxes are assessed fails or refuses to pay the taxes, or if the collecting officer resonably believes that any person will not pay such taxes, the taxes and accrued charges, penalties and interest may be collected by a personal action in the name of the city against the person to whom assessed in a court of competent jurisdiction, or by distraint and sale of any personal property of the person assessed. Neither of the remedies herein given shall be exclusive of the other at any time.

Chapter VIIA. Service Areas.

Sec. 7A.1. Purpose.

Service areas may be established to provide services not provided on an area-wide basis or to provide a higher level of service than that provided on an area-wide basis.

Sec. 7A.2. Establishment.

(a) The council by ordinance may establish, alter, consolidate or abolish service areas. The council by ordinance may add or eliminate services in a service area. The ordinance shall contain the following:

(1) Boundaries and area to be included;

(2) Service to be provided or be eliminated; and

(3) Other provisions the council includes.

(b) If a petition of protest is filed with the council before the effective date of the ordinance adopted under this section, the ordinance shall be submitted to the qualified voters residing in the service area or proposed service area and if ratified shall take effect upon certification of the election. The petition shall contain signatures of at least ten percent or 100 of the qualified voters residing in the service area or proposed service area, whichever is the greater. Each new service or each service to be eliminated shall be placed separately on the ballot and shall require ratification by a majority of the qualified voters voting on the question. There shall be no election under this subsection to eliminate a service to be provided on an area-wide basis.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

Sec. 1.13. Severability of Charter provisions.

If any portion of this Charter is held to be invalid, such invalidity shall not affect the remainder of the Charter; and to that end, this Charter is declared to be severable.

Chapter II. Officers.

Sec. 2.1. City officers.

(a) The elective officers of the city are the seven councilmen.

(b) The appointive officers of the city are the city clerk, and the city attorney.

(c) The administration officers are all officers of the city other than elective officers and appointive officers.

Sec. 2.2. Eligibility for elective city office.

(a) To be eligible to file a nominating petition for election to a city office, a person shall be an elector of the city and shall have been a resident of the city or of territory annexed to the city, or shall have had a combination of residence in the city and in the annexed territory for a period of not less than one year immediately preceding the date of the filing of such petition.

(b) A person appointed to fill a vacancy in an elective office must have such qualifications at the time of his appointment.

(c) The council shall be the judge of the election and of the qualifications of its members.

Sec. 2.3. Persons ineligible for city office or employment.

A person who holds or has held an elective city office shall not be eligible for appointment to an office or for employment for which a salary is paid by the city until one year has elapsed following the term for which he was elected or appointed. An exception may be made with the approval of four or more members of the council.

Sec. 2.4. Notice of election or appointment.

The city clerk shall mail to each person elected or appointed, a certificate of election or appointment within five days from the time of election or appointment.

Sec. 2.5. Compensation of officers.

The compensation for the service of each city officer and employee shall be the amount fixed by the council.

Sec. 2.6. Compensation of mayor and councilmen.

The compensation of the mayor and councilmen shall be determined by ordinance. No increase in the compensation of the mayor and councilmen shall take effect until the council meeting following the first general city election after the increase is ordered.

Sec. 2.7. Oath of office.

Every officer of the city before entering upon his duties shall take the oath or affirmation required by section 5 of article XII, Constitution of the State of Alaska. The council may require designated employees to take such oath before entering upon their employment. Oaths of office shall be filed with the city clerk.

Sec. 2.8. Surety bonds.

In order to protect the city and the public, the council may require appropriate surety bonds of officers and employees. The premium of such bonds shall be paid by the city.

Sec. 2.9. Giving of surety by officers and employees forbidden.

No officer or employee shall give or furnish any bail, bond or recognizance, nor shall he be the agent of any bondsman in connection with any bond which may be required by law or by the council.

Sec. 2.10. Vacancies in office.

(a) A city office shall become vacant upon the occurrence of any of the following:

(1) The expiration of the term of office;

(2) The death of the incumbent;

(3) A resignation when approved by the council;

(4) A removal from office in the manner provided by law;

(5) Ceasing to possess at any time the qualifications or eligibility required by this Charter for election or appointment to office;

(6) Final conviction of a felony involving moral turpitude, or an offense involving a violation of an oath of office;

(7) A judicial determination that the incumbent is of unsound mind;

Revenue department examines Valdez property tax rolls

Continued from Page A-1

residential property. The second is Alyeska Pipeline Co. property, which is assessed by the state.

The oil company property, which provides about 95 percent of the city's tax revenues, did not receive the benefit of Lewis' assessment reduction and was taxed at full assessed value. Had he not changed the city roll, Valdez residents would have paid $100,000 more during the period and the state would have received $190,000 more from its oil tax.

Alyeska pays a flat 20 mills in property taxes each year on property in Valdez. The city tax levy, 6.7 mills in 1982, is taken out of the 20-mill state levy and the remainder goes to the state.

The assessment change meant that the tax rate on the oil property had to go up to produce enough money to operate city government. When this happened Alyeska paid more to the city and, accordingly, less of the 20 mill-assessment went to the state.

Donohue said his department is investigating all aspects of the question.

He said one determination to be made is whether the resultant city roll on which taxes were levied was assessed at fair market value. This determination can be made only by the state tax assessor, who works under Lewis in the Department of Community and Regional Affairs.

"This is the first time we have been approached with this kind of a problem," Donohue said. "Our jurisdiction is to try to determine whether the state received a fair amount of money."

He said the results will be referred to the Department of Law "to see if it is actionable."

Donohue said he could not predict when his investigation might be completed. He said the review may be complicated by vagaries in the law regarding assessment procedures.

State probes property tax rolls in Valdez

By STEVE SEPLOCHA
Daily News business editor

The state Department of Revenue is investigating Valdez property tax records for 1981 and 1982 to determine whether the city owes the state $100,000 as a result of changes made in the tax roll by then-City Manager Mark Lewis.

Joe Donohue, deputy commissioner of revenue, said Thursday that if the investigation verifies press reports about the changes the matter will be referred to the Department of Law for possible collection action.

Lewis, who is now Commissioner of Community and Regional Affairs, lowered the tax assessment rolls by 15 percent in 1981 and 1982 without legal authority to do so. State statutes prohibit any individual from changing property appraisals delivered by the tax assessor. Changes can only be made by a court or by the city council sitting as the Board of Tax Equalization.

Lewis said he ordered the rolls lowered because he felt economic downturns in the community justified it. He said the assessor agreed with the changes but the assessor, Rich Randell, said he did not.

The change may have had the effect of denying the state $100,000 it was due over the two-year period from state taxes on oil property in the city.

Valdez taxes two rolls. One is the city commercial and

State Commissioner of Revenue Robert Heath said Friday that he is conducting an investigation of all oil pipeline property that is taxed by municipalities in the state.

Heath said the investigation was touched off by articles in The Daily News about changes made in the Valdez property tax rolls in the past two years that may have caused the state to lose money.

Former Valdez City Manager Mark Lewis, who is now commissioner of Community and Regional Affairs, ordered the 1981 and 1982 tax rolls presented by the city's tax assessor to be lowered 15 percent without legal authority to do so. The changes meant that the state did not receive about $190,000 it would have gotten had the rolls as presented by the assessor been unchanged.

The city of Valdez has two

See Back Page, STATE

2-14-83

State starts investigation of oil pipeline property taxed by municipalities

Continued from Page A-1

tax rolls — one prepared by the city and an oil property roll prepared by the state.

The oil property did not receive the 15 percent reduction that Lewis applied to the city roll.

Alyeska Pipeline Service Co. is taxed a flat 20 mills by the state, and from the 20 mills the city tax is subtracted. By paying more to the city the pipeline company paid less to the state.

Heath said that the situation outlined in the stories might occur elsewhere and that is why he talked to Gov. Bill Sheffield about a statewide investigation and began one with Sheffield's approval.

He said he hasn't gotten to the specifics of the Valdez changes made by Lewis, but plans to pursue the investigation.

When asked if he was investigating Lewis, Heath said, "If there are state monies that are not where they should be, I will include that in my report to the Department of Law."

In a press release issued in Juneau, Heath said an article in Friday's Daily News about the investigation contained "misimpressions" about his investigations. When asked later to be specific, he said he meant that the investigation is statewide. The Daily News story centered on the Valdez investigation.

When asked what the statewide probe had to do with Lewis and the Valdez situation, he emphasized that his study was "in a very preliminary stage" and had not touched on the Valdez issue.

He said his investigators had not talked to past or present Valdez officials unless they had done so in the past day or so. Heath further said that his office had not checked with Valdez tax assessor Rich Randell but would do so.

Lewis maintains that he changed the rolls because of economic downturns in the community and that he had Randell's permission to do so. Randell said he did not give his permission and maintained "true value rolls" in his office that were higher than those Lewis had approved by the City Council.

The City Council did not become aware that changes were made until last fall, months after Lewis had left the city. An opinion by the city attorney in December concluded "that no one individual has the authority" to change the assessments presented by the assessor.

The issue may turn on a letter that Randell sent Lewis in 1981 shortly afte. the two had talked about the accuracy of the assessments presented by Randell.

Lewis' version is that Randell agreed the rolls could be off by 15 percent and agreed to write a letter to that effect. Lewis said this letter was consent to the assessment reduction as required by statute.

Randell, however, said that he did not consent. He said he told Lewis that any assessor could make a mistake and sent him a letter to that effect. He said the letter in no way agreed with lowering the rolls and that is why he kept his original cards on file.

Heath, in discussing his investigation, agreed that there were two separate issues involved: one being whether the state is receiving its fair share of taxes on a statewide basis and the other being the Valdez matter specifically.

He said his preliminary conclusion was that statewide, including Valdez, it appears the tax assessments reported to the state were fair.

He acknowledged that this information was provided by the state tax assessor, who works under Lewis, but said he "will get it independently."

He further acknowledged that the conclusion did not address the issue of whether Lewis changed the roll and whether such a change was proper. "What I need is time to finish my report," he said.

Heath said the report probably will be finished by March.

According to the Associated Press, Lewis issued a press release Friday saying he welcomes the review, "particularly those compiled" by Valdez during his tenure as city manager. In the release Lewis said the assessments were made "legally and properly."

The story quoted Lewis as saying he presented the "back-up documentation which clearly indicates the tax rolls were not improper and that the studies of assessed valuation to market value indicate Valdez assessments were in conformance with state standards."

"It is unfortunate the recent stories did not present the complete facts on the issue and have a one-sided biased interpretation."

SUBJECT: Review of Attorney General's report on potential state claim against the City of Valdez for recovery of taxes.

DATE: May 12, 1983

According to the Department of Revenue Report and the opinion by the Department of Law, Mr. Lewis' actions were not illegal and "it is not clear that Mr. Lewis acted improperly. . . ." After detailed review of the report and of other factors, I believe the report is precisely correct in the conclusions made therein.

Should you have any remaining concerns on this subject, I would suggest that the following areas be reviewed for clarification. The line of thought is not in points of law, but in points of fact that may, in the minds of the committee, be indicative of characteristics upon which the committee may wish to base a judgment.

The central issues to be addressed are:

-Did Mr. Lewis assume the role of assessor by changing the tax valuations and, if so, was the assumption proper or improper?

-Was the City Council not informed of the tax valuation changes with the intent that the Council would assume that the tax rolls presented to it reflected the result of the contract assessor's work?

Discussion:

Re: Assumption of role of assessor.

While state law and city codes are explicit in requiring the assessor to prepare the tax valuations, they are not clear on who the assessor shall be. The City of Valdez does not have a designated assessor and thus, under the broad powers and authorities delegated to a City Manager, it can be reasonably argued that the manager can perform the acts of a de facto assessor.

The argument that Mr. Lewis is not qualified to act as an assessor cannot be completely substantiated. First, there are no legally established standards of qualifications to be an assessor and, secondly, the reduced property valuations are judged to be reasonable in relation to valuations in other municipalities. The only potentially questionable areas in the reduction of the tax rolls are procedural questions. First, not all properties were reduced equally in that the less valuable properties were not reduced from the assessor's valuation; and, secondly, a reputable assessor would have established a factual basis for an across-the-board assessment reduction. This is essentially a question of procedure, the dollar valuation of the lower valued properties being irrelevant, and no points of law are involved.

Legally, the tax rolls containing the lowered figures were certified by the assessor, Mr. Randell, as being true and correct and in accordance with law. Therefore, it is reasonable to assume that Mr. Randell agreed with the lowered figures.

There remains a "fine line" of distinction, outside of legal sufficiency, regarding Mr. Randell's agreement or disagreement with the reduced figures. Mr. Randell readily agreed that a variance of 15% to 20% in valuation opinions is reasonable, but the valuations he submitted were correct in his best judgment. He did not clearly acquiesce, at that time, to reducing the valuations, but, by his later certification, he legally agreed. While there is no indiction of implied or explicit coercion, the fact is that Mr. Lewis was solely responsible for the selection and contracting for city assessment work. It appears that Mr. Randell tried to maintain his own professional standards by refusing to personally change his valuations, and later tried to accommodate the situation by ignoring the fact that the rolls he certified were not the ones he prepared.

Conclusion: The bottom line is that it is a subjective judgment as to the propriety or impropriety of Mr. Lewis' action to alter the tax rolls after they were prepared by the assessor. There is little, if any, likelihood that any illegal acts could be proven in a court of law.

The second issue, that of not informing the Council of the alteration of the property valuations, again, clearly does not constitute a legal violation.

There does not appear to be any debate over the allegation that the City Council was not informed of the lowering of the assessed valuations. Absent such debate, and in note of public statements that substantiate the allegation, it should be assumed that the Council was not informed.

If the arguments that assert that Mr. Lewis had the right and authority to act in the role of assessor are accepted, then it follows that the assessor's valuations were presented to the Council and there was no need to inform it of any changes, because in this case, there effectively were no changes to the tax rolls that were finally prepared for the Council.

If the argument that Mr. Randell agreed to the reduction in property valuations is accepted, there still remains the "fine point" of when he agreed -- before the presentation of the rolls to the Council, or after the Board of Equalization adjustments.

Assuming that Mr. Randell did not agree to the property valuation changes prior to the presentation to the Council, and that it is believed that Mr. Lewis should not have acted in the role of assessor, the ethical question remains: Should Mr. Lewis have informed the Council of his actions regarding the changes in the property valuations?

An important consideration in the mental process of determining an answer to the question involved, is the relationship established by a City Council and the City Manager. The extent of the trust and confidence of the Council in the Manager, and the Manager's knowledge of what is and what is not of interest or concern to the Council, is developed over an extended period of time. Some councils expect and demand to be informed of virtually every activity and decision of the city administration and others are simply not interested in the details. In the latter case, it is a matter of personal judgment on the part of the manager as to what items should be brought to the attention of the council. In the case of the Valdez City Council, it is commonly accepted that the City Manager was given a fairly free hand in the administration of the City.

In view of the preceding discussion, there is probably no reason to make a harsh judgment of impropriety unless there were other motives for failing to tell the Council of the changes directed by Mr. Lewis. Following this line of reasoning, the Council would not have been informed because of the possibility that it would not have approved of Mr. Lewis' action. The basis of its disapproval could have been the arbitrary method used for reducing the rolls, or the usurpation of the role of the assessor by Mr. Lewis, or it may have simply had more confidence in the validity of the figures prepared by the contract assessor.

Regardless of the possible reasons for Council disapproval, if in fact the Council was not informed for other motives, the possible motives need review.

First, the benefit to be gained by the reduction in property tax that might accrue to Mr. Lewis is not sufficient to be significant, given the income of Mr. Lewis, and should be discared as a possible motive.

Next, a major consideration when evaluating the effectiveness of a city manager or a political figure is the ability to provide excellent public services and capital improvements while keeping tax rates at the lowest possible level. I have found no evidence of Mr. Lewis having ambition for higher office, or of criticism of his city manager activities in early 1981, when the property valuation reductions were first directed.

Another possible motive was that Mr. Lewis had become overly involved, on a deeply personal and emotional level, with trying to do everything possible in the best interest of the citizens of Valdez. If this were

the case, and this being the motive for not informing the Council of his actions for fear of disapproval, then this is an issue for which he could be faulted for judgment.

If, as Mr. Lewis has stated, the reason for his reduction in property valuations was simply that he felt that they were too high, we come back full circle to the question -- why did he not tell the Council that he had changed them? Again, the same answer -- fear of disapproval and possible alternate motives, all of which I can imagine have been examined.

Conclusion: If Mr. Lewis intentionally wanted to have the City Council assume that the property valuation rolls presented to them had been prepared by the assessor, the only logical reason was fear that they would not approve his changing the rolls.

The possible motives for intentionally deceiving the City Council have been examined and from the viewpoint of personal gain have been, in large part, found to be without substantial merit. Therefore, it can reasonably be argued that Mr. Lewis really did not feel that he had done anything irregular and was not obligated to inform the Council.

Whether or not Mr. Lewis acted improperly is probably an arguable point. Whether or not he used appropriate judgement or acted irregularly in not informing the Council is a matter for the considered evaluation of this committee.

SUBJ: 1981 Valdez
Property Tax
Values

In January of this year the Anchorage Daily News published a series of articles concerning Mark Lewis's tenure as City Manager of Valdez. Several of the articles contained the allegation that Mr. Lewis had illegally changed the tax rolls of Valdez by lowering the value of most non-oil or gas related property by 15 percent.

Based on these articles, the Department of Revenue instigated a review to determine if Mr. Lewis's actions were improper or illegal.

According to the DOR report and attached opinion by the Department of Law, Mr. Lewis's actions were not illegal and the state does not have grounds to pursue action for lost state revenues caused by the alteration of the tax roll.

I have reviewed this report thoroughly and endorse the report is accurate in its conclusion. Both the report and the newspaper articles agree that Richard Randell, the appraiser hired by Valdez under contract to act as the city assessor, certified the reduced figure as true and correct for 1982. The report states that Randell had also certified the reduced figures as true and correct for 1981. Newspaper accounts had quoted Randell as denying that he certified the reduced figures in 1981.

I contacted Mr. Randell to resolve this contradiction. Randell said that in early March, 1981, he submitted the

roll of assessed property values to the Valdez City administration. On March 23, 1981, Randell discussed the figures with Lewis. Randell states that during that conversation he acknowledged that another appraiser might come in with different figures but held that the figures he had submitted were his best estimate of full and true value. Randell followed this conversation up with a March 31, 1981 letter to Lewis which DOR has included in their report as Exhibit F. Sometime in the middle or end of March, Lewis caused the values of most non-oil or gas related properties in the city to be reduced 15 percent.

In late March 1981, the tax notices were mailed to property owners at the reduced values. Twenty appeals were filed and Randell participated on the Board of Equalization hearings on these appeals in June 1981. Randell was aware at this time that the values had been reduced and he did not protest.

In late August 1981, Randell was reminded by the city that he had not submitted a formal letter certifying the tax roll as true and correct. On September 1, 1981, Randell wrote a letter to Lewis (Revenue Exhibit A) certifying the tax roll for 1981 as true and correct. Randell said that in his own mind he was certifying his original figures as true and correct, but he acknowledges that given his knowledge that the values had been reduced and the fact that he worked with the reduced figures at the Board of Equalization without protest, it was a reasonable assumption on the part of the city to believe he was certifying the reduced figures.

After examination of the sequence of events, I believe it could reasonably be held that Randell did certify the lower figures. This concurs with the report by DOR and the opinion by the Department of Law and supports the contention that the reduction of property values as handled and administered by Mark Lewis was legal.

RE: Personnel Policy Change

Allegation: Four months after announcement of Mr. Lewis' departure, and two months prior to his actural departure, Mr. Lewis changed city personnel rules which resulted in his being paid an additional $6,174 in compensation for accrued sick leave.

Alaska Statute: 29.23.555. "Each home rule and general law municipality shall adopt a conflict-of-interest ordinance which, other provisions of this chapter notwithstanding, includes provision that an officer or employee shall disqualify himself from participating in any official action in which he has a substantial financial interest. If a home rule or general law municipality fails to adopt such a conflict-of-interests ordinance within 90 days from September 10, 1972, the conflict-of-interest provision of this section is automatically applicable to and binding upon that municipality."

Discussion: Mr. Lewis followed the recommendations of a committee by changing the personnel rules. In that a 1971 ordinance requiring council approval of such an action had not been properly codified, it is understandable that Mr. Lewis believed that he was acting within his delegated authority under city code. The inclosed report by the Valdez City Attorney states that the change of personnel policy by Mr. Lewis was not in accordance with city code or state statutes.

pensation for service to the municipality. Per diem payments or reimbursements for expenses are not compensation under this section. (§ 2 ch 118 SLA 1972)

ALR and C.J.S. references.—Effect of illegality of appointment or compensation, 7 ALR 1682.

Mandamus to compel appropriation for payment of salaries of public officers, 81 ALR 1253.

Actions for compensation by de facto officers, 93 ALR 258.

62 C.J.S. Municipal Corporations §§ 522, 541.

Sec. 29.23.540. Prohibitions. (a) No person may be appointed to or removed from municipal office or in any way favored or discriminated against with respect to a municipal position because of his race, color, sex, creed, national origin or, unless otherwise contrary to law, because of his political opinions or affiliations.

(b) This section applies to home rule and general law municipalities. (§ 2 ch 118 SLA 1972)

Sec. 29.23.550. Personnel system. All appointments and promotions of municipal officers and employees are made on the basis of merit. The assembly or council may provide for a personnel system. (§ 2 ch 118 SLA 1972)

Sec. 29.23.555. Conflict of interests. Each home rule and general law municipality shall adopt a conflict-of-interests ordinance which, other provisions of this chapter notwithstanding, includes provision that an officer or employee shall disqualify himself from participating in any official action in which he has a substantial financial interest. If a home rule or general law municipality fails to adopt such a conflict-of-interests ordinance within 90 days from September 10, 1972, the conflict-of-interests provision of this section is automatically applicable to and binding upon that municipality. (§ 1 ch 147 SLA 1972)

Effective date.—Section 11, ch. 147, SLA 1972, provides that this Act takes effect September 10, 1972.

Sec. 29.23.560. Reports. (a) Home rule and general law municipalities shall file with the Department of Community and Regional Affairs:

(1) maps and descriptions of all annexed or excluded territory;

(2) a copy of the annual audit or in the case of second class cities an audit or statement of annual income and expenditures;

(3) tax assessment figures as requested;

(4) reports relating to long-term debt as provided in AS 44.19.205.

(b) Compliance with the provisions of this section is a prerequisite to receipt of state shared-revenues under AS 43.18. The state shall withhold annual allocations under that chapter in the event of

Subject Personel Leave vs. sick and annual leave

From P.M. Shelv

I am respectfully submitting, for your consideration, a plan that would propose the change of sick and annual leave into personal leave.

This change would effect city personnel regulations 6.1 Annual Leave, 6.102 Computing Leave Accural, 6.2 Sick Leave

The City of Valdez now accures annual leave at the following rate:

1½ days per month for less than 2 years
1 3/4 days per month for 2 years but less than 5 years
2 days per month for 5 years but less than 10 years
2½ days per month for more than 10 years
Sick leave accures at the rate of 1½ days per month.

My proposal would ask that be changed to personal leave and accure at the following rate.

2 days for under 2 years
2¼ days for 2 to 5 years of service
2½ days for 5 years but less than 10 years of service
3 ¼ 3 days for more than ten years of service

There are other things that are effected and need answers. However, I would propose that a committee of four or five people be appointed by you to spend time answering those questions and make recommendations to you. An example of other things is what to do with people who now have sick leave. One alternative would be to take 60% of the sick leave and put that into personal leave and surrender the rest. I believe that 4 or 5 people spending 1 day on this would resolve all the questions.

I am attaching the State plan for this proposal and the State Troopers plan. They are identical.

Thank you for your consideration and I would volunteer to serve on the committee if you felt that appropriate.

MEMO

City of Valdez, Alaska Box 307, 99686

To PAT SHELY, G. ZOET, ~~MARTY RUTHERFORD, SHIRLEY SCOTT, LEE SCHLITZ~~

Date April 12, 1982

Subject Personal Leave

From ~~MARK LEWIS~~ City Manager

I have reviewed Mr. Shely's proposal to change the city's leave program and believe it has a significant amount of merit.

The plan, I believe, would eliminate the misuse of sick leave, while rewarding those employees with excellent attendance records and habits.

You are to meet and review the proposed leave plan, amend it if necessary and have a final report - including implementation plan - by April 14th.

Valdez, Alaska 99686

RE: Personnel Rule Changes
Our File No. 00925/0001

Dear Gentlemen:

At the August 20, 1982 Special Council Meeting I was requested to report on the effect of the personnel rule changes recently instituted by the former city manager. It is apparent that the changes were not made in accordance with State and local laws.

A question was raised at the council meeting regarding whether the $2,000 limit on purchasing without council approval contained in Section 20-3 of the code applies to this situation. It does not. It only applies to contracts for the purchase of supplies, materials, equipment or contractual services. Contractual services is defined to mean "services performed for the city by persons not in the employment of the city." This limit, therefore, does not apply.

There have been several changes to the personnel regulations over the years. In 1977 a change was made in the schedule of paid holidays. In December 1981 a change was made to Section 6.103 regarding the accumulation and use of leave. And on April 14, 1982, the change in question was made which converted 60% of accumulated sick time to personal leave and eliminated entirely the categories of annual and sick leave, creating the personal leave category in their stead. None of these changes as far as I've been able to determine were brought before the council for its approval.

The City Code, as published, states that the City Manager has the power to make the rules and regulations relating to compensation and leave. Section 2.6 provides in part:

"The city manager shall have the power to make rules and regulations relating to hiring and discharge, working conditions, hours and terms of employment, retirement and insurance plans, classification, compensation, leave and the like of all the employees of the city....

These rules and regulations shall be on file and available for inspection in the office of the city clerk and shall also be available in booklet or pamphlet form entitled "City of Valdez - Personnel Regulations.""

The above language was approved by the city council in Ordinance No. 7111. A second section of Ordinance No. 7111, however, provides that "Initial adoption of the personnel rules and future amendments thereto, shall be approved by resolution of the City Council." For some reason that section of the ordinance never made it into the code book after its adoption in 1971. Although there are arguments to the contrary, it is my opinion, after a brief amount of research on the question, that the section requiring council approval was duly enacted and is the law of Valdez even though it was not published in the code.

It can readily be seen, however, that if one were unaware of the unpublished portion of Ordinance No. 7111 and looked only to the code for an answer regarding the authority of the city manager to make such amendments to the regulations, that one would come to the conclusion that the city manager did have such authority. There is a substantial question whether adequate notice is provided to the city manager regarding his powers and duties under the circumstances.

The question of whether the code provides adequate notice to the city manager, however, does not directly affect the question of whether the changes in the personnel rule are valid. The answer to that question clearly seems to be that the ordinance requiring council approval of the changes was not followed and that the changes are therefore not effective. Only the council can make the changes effective.

There is also a state statute which renders the action of the city manager in approving the personnel rule changes ineffective. Alaska Statute 29.23.555 provides:

"Each home rule and general law municipality shall adopt a conflict-of-interests ordinance which, other provisions of this chapter notwithstanding, includes provision that an officer or employee shall disqualify himself from participating in any official action in which he has a substantial financial interest. If a home rule or general law municipality fails to adopt such a conflict-of-interests ordinance within 90 days from September 10, 1972, the conflict-of-interests provision of this section is automatically applicable to and binding upon that municipality."

The city council did not act to adopt a conflict-of-interests ordinance until 1978 at which time it adopted an ordinance currently codified as Section 2-77. That section does provide a rule relating to "an elected city official or member of an appointed commission, board or committee, "but with regard to city employees it provides only:

> "The city council by ordinance shall adopt procedures dealing with conflict of interest on the part of city employees."

However, the city has not adopted such an ordinance, so the state conflict-of-interests statute quoted above applies. In other words, state law requires "that an officer or employee shall disqualify himself from participating in any official action in which he has a substantial financial interest." Therefore, even assuming that the Valdez City Code authorized the city manager to make personnel rule changes without council approval, the state conflict-of-interests statute would prevent the city manager from approving any change which would result in a substantial financial benefit to him.

It is my understanding based on discussions with present members of the city administrative staff that the personnel rule changes were initially suggested by a staff member and worked out in detail by a committee of staff members appointed by the city manager. It is further my understanding that the personnel rule changes are very much liked by the city staff, are substantially the same as the rules in effect for state employees, and in the opinion of the administration constitute sound management principles. If the council agrees, approving the changes effective April 14, 1982, would avoid undue hardship on all city employees who have since that time terminated and received payment for (and have probably spent) that portion of their sick leave which was converted into personal leave.

It is my recommendation that the city council take action to clarify the confusion caused by the manner in which Ordinance 7111 was codified by either repealing Section 2 of that ordinance (which would clearly give the city manager the power to make changes without council approval), or by amending the existing code section by adding language to claify that changes in the rules are subject to council approval. It is also recommended that the city consider adoption of a conflict of interests ordinance relating to city officers and employees as it directed itself to do in Code section 2-77.

Very truly yours,

HUGHES, THORSNESS, GANTZ,
POWELL & BRUNDIN

By: Gordon J Tans

GJT/jam

Other duties imposed upon the city manager are those necessary to furnish complete executive direction of the administrative service of the city. He shall:

(a) Prepare and recommend to council an annual budget.

(b) Execute and enforce all ordinances, resolutions and motions of the city council and carry out all contracts entered into by the city.

(c) Make such recommendations to the council as he may deem expedient or necessary and once a year present a detailed statement of what he has done during the year covered by the report.

(d) Perform such other duties as may be assigned to him by council and other such duties as are set out in this Code.

(e) Serve as ex officio member without vote of all city boards and commissions. (Ord. No. 6907.)

Sec. 2-5. Temporary appointment; vacancy in office.

During the absence of the city manager, he shall appoint an acting city manager. Such appointment during an extended absence shall only be upon approval by city council. If the office of manager becomes vacant, council shall appoint without delay either a new manager or an acting manager to fill the office until a new manager is chosen. (Ord. No. 6907.)

Sec. 2-6. Regulation of personnel.

The city manager shall have the power to make rules and regulations relating to hiring and discharge, working conditions, hours and terms of employment, retirement and insurance plans, classification, compensation, leave and the like of all of the employees of the city; except, that no rule or regulation shall contravene the principles that the employment of city personnel shall be on the basis of merit and fitness and that there shall be no discrimination in any manner based on race, color, religion or national origin.

CITY OF VALDEZ, ALASKA

RESOLUTION NO. 8248

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF VALDEZ ADOPTING AMENDED PERSONNEL REGULATIONS AFFECTING ALL CITY EMPLOYEES.

WHEREAS, the City of Valdez has previously adopted City of Valdez Personnel Regulations, and

WHEREAS, certain changes to the Personnel Regulations have been recommended by the city staff to the city administration which has in turn recommended the changes to the city council, and

WHEREAS, a copy of the Personnel Rules incorporating the proposed changes is attached hereto, and

WHEREAS, it appears that the proposed changes are likely to be of benefit to both the City and to the employees of the City, and

WHEREAS, city administration has been acting under the proposed rules as if they had been in force beginning on May 1, 1982, and substantial hardship and inconvenience would result if the City were now required to reverse the actions taken beginning May 1, 1982, and

WHEREAS, no useful purpose would be accomplished by not approving the Personnel Rule changes effective as of May 1, 1982,

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF VALDEZ, ALASKA:

Section 1. The City of Valdez Personnel Regulations are hereby amended to read in accordance with the copy of the City of Valdez Personnel Regulations attached hereto.

Section 2. The changes to the Personnel Regulations shall be effective as of May 1, 1982.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF VALDEZ, ALASKA, this _____ day of September, 1982.

ORDINANCE NO. 8216

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF VALDEZ, ALASKA, AMENDING SECTION 2-6 OF THE VALDEZ CITY CODE TO PROVIDE FOR COUNCIL APPROVAL OF PERSONNEL REGULATIONS.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF VALDEZ, ALASKA, that:

Section 1. Section 2-6 of the Valdez City Code is hereby amended to read as follows:

The city manager shall have the power, subject to council approval, to make or amend rules and regulations relating to hiring and discharge, working conditions, hours and terms of employment, retirement and insurance plans, classification, compensation, leave and the like of all of the employees of the city; except, that no rule or regulation shall contravene the principles that the employment of city personnel shall be on the basis of merit and fitness and that there shall be no discrimination in any manner based on race, color, religion or national origin.

These rules and regulations shall be on file and available for inspection in the office of the city clerk and shall also be available in booklet or pamphlet form entitled "City of Valdez--Personnel Regulations."

Section 2. This ordinance takes effect immediately upon passage and approval.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF VALDEZ, ALASKA this 20th day of September, 1982.

MEMO

City of Valdez, Alaska Box 307, 99686

To Fred Hanson, Acting City Manager

From Pat Shely, Police Chief

Date August 26, 1982

Subject Personal Leave Policy Information

Fred, this is information pertaining to the article in the August 25th paper regarding the City Leave Policy.

As early as 1980, Mark Lewis had asked that I and several others review the Personnel Rules, however, no changes were made at that time. In 1981, I requested one change to the existing Personnel Policy; changing sick leave to personal leave. Mark reviewed that request and took no action, but stated that if I could convince him that the City employees wanted it, he would reconsider.

I didn't get on it again until about February of 1982. I then asked Mark if he would appoint a committee from the City employees to review it. He appointed a committee of which I was a member. During the course of our meetings, Mark heard a rumor that some people believed that this whole thing was for his benefit and he told me the committee was disbanded and no Personal Leave Plan could be considered at that time. I spent about an hour of one day and an hour of the next day convincing Mark that this was a needed change. Mark decided to let the committee continue, but stated that if it was felt that this change was being made for his benefit it must not be considered until after his departure.

During the committee's deliberations, they used as examples the Valdez Highway Department and State Employees Personal Leave Plans.

We submitted our proposal to Mark for his approval. While doing so, I asked Mark if we had to go to Council for approval and he said no, that it stated in the City Code that he could make the change himself. The Committee also checked the City Code and could find nothing that stated we had to get Council's approval. I was not aware of Ordinance #7111 until after Mark left, and I believe Mark was not aware of it either.

There follows several items which I believe should be considered by the City Council while reviewing this plan. These were items considered by the review Committee while putting together their proposal:

1. The City was the only Valdez Governmental Agency without a Personal Leave Plan prior to this change.

2. The Council had stated and voted it wanted the Valdez Police Department to have the same pay and benefits as the Alaska State Troopers. I believe this was the direction set by the Council during the 1975 or 1976 Budget Sessions.

3. In the Police Department alone, the sick time loss has dropped by 80% since this plan was instated.

4. This ideas was originally presented to Mark long before he even thought of leaving and it was not his idea to begin with.

Mr. Mark Lewis, Commissioner
Department of Community and
Regional Affairs
Pouch B
Juneau, Alasla 99811

Dear Commissioner Lewis:

Pursuant to AS 39.05.080, the House Committee on Community and Regional Affairs is in receipt of communications that request the Committee to conduct hearings pertaining to your confirmation as Commissioner, Department of Community and Regional Affairs.

This is to notify you that confirmation hearings will be scheduled to begin at 3:15 p.m. on March 21 in Room 205, Capitol and on March 22, in Room 126, Capitol. Additional hearings may be scheduled, if deemed necessary. The Committee respectfully requests your presence during the hearings.

Sincerely,

Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

Am. Jur. 2d and ALR references. — 63 Am. Jur. 2d, Public Officers and Employees, §§ 5, 38-81, 360-413.

Conclusiveness of governor's decision in removing or suspending officers, 52 ALR 7; 92 ALR 998.

Constitutionality of statute providing for direct appeal or other review of orders and rulings of governor, 66 ALR 586.

Prohibition as means of controlling action of governor, 115 ALR 14.

Legislative power to prescribe qualifications for or conditions of eligibility to constitutional office, 34 ALR2d 155.

Sec. 39.05.065. Qualifications of members of the Board of Education. (a) Each member of the Board of Education shall be a citizen of the United States and have been a resident of Alaska for at least three years.

(b) A member of the Board of Education may also be a member of a district school board. (§ 11 ch 96 SLA 1967; am § 19 ch 26 SLA 1980)

Revisor's note. — "District" as used in subsection (b) of this section apparently means a district of the state public school system as set out in AS 14.12.010.

Cross reference. — As to appointment of members of Board of Education, see AS 14.07.085.

Effect of amendment. — The 1980 amendment, added subsection (b).

Sec. 39.05.070. Purpose. It is the purpose of AS 39.05.070 — 39.05.110 to—provide procedural uniformity in the exercise of appointive powers conferred by the legislature to eliminate, insofar as possible, recess or interim appointments except in the event of death, resignation, inability to act or other removal from office and the exercise, insofar as possible, of appointive powers only when the legislature is in session. (§ 1 ch 64 SLA 1955)

Section repugnant to tacit confirmation. — The expressed intention of this section is repugnant to tacit confirmation of appointments. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

Sec. 39.05.080. Procedure for all appointments. Appointments shall be made in the following manner:

(1) The appointing authority shall, within 30 days of the convening of the legislature in regular session, present to the legislature for confirmation the names of the following persons: (A) persons appointed to a position or membership who have not previously been confirmed by the legislature or either house of it; (B) persons appointed by him subject to confirmation to fill an existing position or membership vacancy; (C) persons to be appointed subject to confirmation to fill a position or membership the term of which shall expire before July 2, following the session of the legislature. If an appointment is made after the deadline but while the legislature is in session, the appointing

authority shall, within five calendar days after the appointment is made, present to the legislature for confirmation the name of the person appointed. The deadline may be extended by the legislature by the approval of a concurrent resolution.

(2) When appointments are presented to the legislature for confirmation,

(A) the presiding officer of each house shall assign the name of each appointee to a standing committee of that house for a hearing, report and recommendation; standing committees of the two houses assigned the same person's name for consideration may meet jointly to consider the qualifications of the person appointed and may issue either a separate or a joint report and recommendation concerning that person; then

(B) the legislature shall, before the end of the session in which the appointments are presented, in joint session assembled, act on the appointments by confirming or declining to confirm by a majority vote of all of the members the appointments presented.

(3) When the legislature declines to confirm an appointment, the legislature shall notify the appointing authority of its action and a vacancy in the position or membership exists which the appointing authority shall fill by making a new appointment. The new appointment shall be presented for confirmation to the legislature within 20 calendar days following receipt by the appointing authority of the legislature's notification of its refusal to confirm the prior appointment. If the name of a person is submitted and is not confirmed, the appointing authority may not, upon resubmission of appointments, submit again the name of the person whose confirmation was refused for the same position or membership during the session of the legislature at which confirmation was refused. The person whose name is refused for appointment by the legislature may not thereafter be appointed to the position or membership during the interim between legislative sessions. Failure of the legislature to act to confirm or decline to confirm an appointment during the session in which the appointment was presented is tantamount to a declination of confirmation on the day the session adjourns.

(4) Pending confirmation or rejection of appointment by the legislature, persons appointed shall exercise the functions, and have the powers and be charged with the duties prescribed by law for the appointive positions or membership. (§ 4 ch 64 SLA 1955; am §§ 1—3 ch 1 SLA 1964; am § 1 ch 2 SLA 1967; am § 1 ch 65 SLA 1974; am § 2 ch 82 SLA 1975)

Legislative history of ch. 82, SLA 1975. — See Bradner v. Hammond, Sup. Ct. Op. No. 1297 (File No. 2802), 553 P.2d 1 (1976).

Laws requiring bilateral appointments are mandatory. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

Paragraph (2) of this section imposes a direct mandate upon the legislature to act upon the nominations of the governor. Munson v. Territory of Alaska, 16 Alaska 580 (1956).

Military:

- Graduate of United States Army
  Ranger School - 1972
  Status: Army Reserves

Work Experience:

- City of Pullman
  Pullman, Washington
  1972 - 1974

  Program Coordinator
  Worked part-time while an undergraduate student as staff assistant to a City Department Head

- City & Borough of Juneau
  Juneau, Alaska
  June 1974 - February 1977

City/Borough Administrative Assistant (Assistant to the City Manager)

The City of Juneau is a consolidated full-service "home-rule" city/borough government of the capital of the State of Alaska with a population of 22,000; net budget approximately $40 million, including $15 million capital budget. Responsibilities as the Assistant to the City Manager included: budget preparation and budget management assignments; direct responsibility for the City's insurance program and State and Federal grant programs. As staff assistant to the manager, I conducted management analysis and review of various City operations, supervised a wide variety of civic projects and aided in the development of staff policy on a broad spectrum of issues.

- City of Valdez
  Valdez, Alaska
  January 1978 - May 1978

Assistant City Manager

Managed day-to-day routine operations of the City, along with being directly responsible for financial operations. Did research; monitored, evaluated and directly supervised various programs; developed staff policy recommendations on a broad spectrum of issues.

- City of Valdez
  Valdez, Alaska
  May 1978 - July 1982

City Manager

The City of Valdez is a growing oil pipeline and port community - the terminus of the Trans-Alaska Pipeline and North America's largest oil port. The City is a full-service, "home-rule," local government encompassing 275 square miles, with a 1981 net operating budget of $29 million and a capital budget of $70 million. The Community has approximately 80 full-time City employees and a population of approximately 4,000 people.

The Community's goals, as defined and developed, are to expand and diversify the economy - building on the economic base of the pipeline terminal and utilizing the City's unusual tax base to rebuild and establish the community's long term assets while improving the quality of life for its citizens.

I, as City Manager, was able to make significant contributions to the City of Valdez while, at the same time, gaining a great wealth of management experience, especially in the fields of municipal finance and industrial development, as well as obtaining the experience of piloting major construction projects with significant environmental considerations through Federal and State permit process, on schedule and within budget.

Experience Summary

- Identified, developed and implemented comprehensive community goals with the City Council over a period of years.

- Planned and implemented a comprehensive capital improvement program which included: major port facilities, schools, roads, storm and sanitary sewers, parks, library, civic center, administration building and police and fire stations.

- Facilitated the economic development and diversification of the City.

- Developed the City as one of the major leaders in tax-exempt financing.

- Reconstructed and redirected the City's financial systems.

- Developed a capable staff who are able to follow through with the City's diversification programs.

Economic Development and Diversification

The City Administration established a sound working relationship with industry, which has been the basis for Valdez's economic development. The Administration's efforts included the development of the oil industry, port and marine industries, seafood industry, pipeline related industries, as well as small businesses.

Tax-Exempt Financing

The City of Valdez has become a leader in the field of tax-exempt financing. I was the key administrative official for the City of Valdez on the following financing:

- in the final issues of $1.35 Billion in Marine Terminal Revenue Bonds;

- $600 million developed to construct oil facilities in Valdez;

- $48 million Port Redevelopment bond issue to construct a new "interior Alaska" container port at Valdez;

- $10 million housing mortgage revenue bond (low interest8 1/2%) which provided tax-exempt housing mortgage money for Valdez residents; and

- $18 million school bond issue used to construct various school facilities

Capital Construction

Major new capital construction programs completed under my administration include the following:

- Library facilities - $2.6 million

- Administration and Police buildings - $3.0 million

- Three fire stations (2 rural and 1 central)

- City shop (heavy equipment, vehicle maintenance facility)

- Roads, storm and sanitary sewers, parks

- Airport reconstruction - $7.0 million (including Navigational Aid System)

- Port facilities - $48.0 million (cargo and container)

- Civic Center (includes theater and large convention center)

These construction projects were designed to build Valdez's infrastructure of community facilities while stimulating the economy in the midst of a temporary recession. During these years the tax millage rate was lowered from 8.9 mills to 6.3 mills.

Governor Bill Sheffield
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

I am writing this letter because I feel that it is important that other views be known. I have never used the news media or other public sources to air my personal opinions. However; recently after reading several stories in the Anchorage Daily News I find myself compelled to ask for a few minutes of your time.

I will not answer each point that has been made by the Anchorage Daily News as I feel this is a blatant attempt by them not only to discredit Mr. Lewis but also a cheap way to sell newspapers.

I have worked closely with Mr. Lewis and was very pleased with his appointment to the state cabinet post. I feel this appointment and others that you have made are a clear sign that we will not only have honesty in our state government but that we will have progressive government rather than business as usual.

In the time Mr Lewis spent as City Manager with the City of Valdez I found his integrity and honesty to be of the highest level. I would not hesitate to work for or with Mr. Lewis on any matters.

To allow blatant attempts by the Anchorage Daily News and others who appear to have personal grudges against Mr. Lewis to remove Mr. Lewis from office would be a serious miscarriage of justice.

I also feel that this type of political mudslinging would damage our political process if allowed to have any credibility.

Thank you for your time. Please be assured of my support and cooperation.

Sincerely,

Patrick M. Shely
Chief of Police

The Honorable
Representative Barbara Lacher
Pouch V
Juneau, Alaska 99811

Dear Rep. Lacher:

I have recently met with the Department of Community and Regional Affairs Commissioner and wish to convey to you my favorable impression of him. Mr. Lewis strikes me as a person who is sensitive to municipal problems of communities of all sizes in our state.

It is my hope that you will look favorably on his confirmation. Although I have heard of certain allegations in reference to Mr. Lewis, I am not personally aware of anything substantial against him to cause me to speak against his confirmation.

With this in mind, I am in support of Mr. Lewis as Commissioner of Community and Regional Affairs and I sincerely urge you to vote in favor of his confirmation.

Thank you for your consideration.

Sincerely,

Nels A. Anderson Jr.

Dear Nels:

Thank you for your letter supporting Mark Lewis. I've had the opportunity to work with Mark and I find him to be not only very dedicated, but bright and aggressively motivated. I tend to feel as you do, I'm very impressed.

Nels, as you know, there are no assurances. But, I intend to do all that I can to see this fine young man confirmed. It's just too bad you're not here to cast your official vote. We sure do miss you in the chamber and in the lounge.

I sincerely hope all is well with you professionally and personally. Next time you are in town, don't be such a stranger.

Warm personal regards.

Sincerely,

Bettye Fahrenkamp
Alaska State Senator

Support your local jazz musician

I would like to comment about the fledgling jazz opportunities in Anchorage, Alaska. I am an Alaskan since 1967 and have played in various "in town" settings as an entertainer. It seems in the late 70s (disco era), local musicians were given their walking papers by local club owners in favor of "out of towners." Do Alaskans really think "in town" acts can't be quality?

I went to a local "jam session" last Sunday at the Tiki Cove. It seems the house band members (which are composed mostly of nonlongtime Alaskan residents) seem to get all of the jazz jobs that come about. They seem to entertain themselves and could not let local musicians play alone as a group for even one song.

The purpose of "jam sessions" are to let everyone express themselves musically. People have to be able to crawl before we walk.

In the late '50s and early 60s, the "Oasis" club was a frequent stopover spot for many

our forests, and turn our lakes and streams into garbage dumps — all this in only a few years — we'd better hurry, 'cause there isn't much time left.

All that aside, Jerry, you still haven't answered my main question: how much do the oil companies write off when they find a dry hole? And why bother drilling when they know nothing is there? I say, let us put our money and intelligence to better use!

— Dave Carlson

A response from Valdez

The recent letter congratulating your reporters on spotlighting Valdez' profligate ways was not amusing to Valdezeans, nor was it accurate. As with anything that is spotlighted, much of what is really there languishes in the dark.

While we recognize that telling stories on Valdez has become great sport of late, your letter writer's gross exaggeration demands correction. The great "Big Mac Importation" was not quite as exciting a story as it apparently translated by a pilot passing on an amplified anecdote.

Political fund-raisers necessitate unique items to spur contributors and as auction coordinator, I fixed on Big Macs. While taken for granted by Anchoragites, we in the hinterlands have Big Mac Attacks that necessarily involve 350-mile ventures upcountry to satisfy. The order for 50 Big Macs was placed and arrangements were made to have them picked up and delivered to Valdez Airlines on their last evening run into Valdez so the burgers would be "fresh" for the big event. A last-minute snag in pick-up arrangements developed, however, and as zero hour approached, I prevailed upon a Valdez Airlines employee to run and get them for us and get them to the plane.

Unfortunately the run took a bit longer than anticipated and because Valdez Airlines was kind enough to accommodate my plea for help, the plane was delayed in its departure time awaiting delivery. That plane was by no means chartered; it was on a regularly scheduled flight and the accommodations were in time and energy expended by employees who responded to customer requests. We have come to expect that kind of good service by Valdez Airlines and we very much appreciate it.

It should also be pointed out that Messrs. McAlpine and Lewis steered Valdez through years of unparalleled prosperity and activity; during those years an investment plan was developed, a master plan was implemented and the community bonded and put in place new schools, a dock complex, a civic center, a senior citizens center, a softball complex, a hatchery, a new city hall, and a new library; and it increased its network of roads and water and sewer systems. It spruced up its parks and green areas, added flowers and trees and increased the overall quality of life in Valdez immeasurably.

We in Valdez are not blind to the fact that some mistakes were made along the way, but we wish the naysayers and predictors of doom would not be blind to the fact that we have accomplished an enormous amount in a very short period of time and we are well on the road to diversifying Valdez's economy. We are very much alive and well here in Valdez and we are looking forward to a continuing bright future.

— Judy Londo

SUBJECT: Confirmation Hearings

DATE: March 18, 1983

The following comments were prepared as a result of a discussion during which legal advice was requested for the question: "What is the role of the Committee in conducting confirmation hearings?"

The question which the individual committee members must resolve in their own minds is: "Do you believe the nominee would properly fulfill the duties of the Commissioner?"

The decision is essentially a political process as opposed to a legal process. There is no requirement to apply the rule of "burden of proof;" a more appropriate description is a "burden of persuasion."

During the process, the determination of an act or acts being technically illegal is "mildly interesting" and in large part irrelevant from the perspective of the Committee. The question of impropriety is more important in the decision making process.

The rationale for the previous statement is that the commitment of an illegal act(s), even if substantially proven, may or may not be indicative of a person's qualifications to perform assigned duties and, the Committee is not in a position to prosecute for illegal acts.

On the other hand, the Committee is charged with making a judgement, based on all reasonably available information, whether or not the actions of the individual convince the Committee that the nominee will, or will not, properly fulfill the role of Commissioner.

SUBJ: 1981 Valdez
Property Tax
Values

In January of this year the Anchorage Daily News published a series of articles concerning Mark Lewis's tenure as City Manager of Valdez. Several of the articles contained the allegation that Mr. Lewis had illegally changed the tax rolls of Valdez by lowering the value of most non-oil or gas related property by 15 percent.

Based on these articles, the Department of Revenue instigated a review to determine if Mr. Lewis's actions were improper or illegal.

According to the DOR report and attached opinion by the Department of Law, Mr. Lewis's actions were not illegal and the state does not have grounds to pursue action for lost state revenues caused by the alteration of the tax roll.

I have reviewed this report thoroughly and endorse the report is accurate in its conclusion. Both the report and the newspaper articles agree that Richard Randell, the appraiser hired by Valdez under contract to act as the city assessor, certified the reduced figure as true and correct for 1982. The report states that Randell had also certified the reduced figures as true and correct for 1981. Newspaper accounts had quoted Randell as denying that he certified the reduced figures in 1981.

I contacted Mr. Randell to resolve this contradiction. Randell said that in early March, 1981, he submitted the

roll of assessed property values to the Valdez City administration. On March 23, 1981, Randell discussed the figures with Lewis. Randell states that during that conversation he acknowledged that another appraiser might come in with different figures but held that the figures he had submitted were his best estimate of full and true value. Randell followed this conversation up with a March 31, 1981 letter to Lewis which DOR has included in their report as Exhibit F. Sometime in the middle or end of March, Lewis caused the values of most non-oil or gas related properties in the city to be reduced 15 percent.

In late March 1981, the tax notices were mailed to property owners at the reduced values. Twenty appeals were filed and Randell participated on the Board of Equalization hearings on these appeals in June 1981. Randell was aware at this time that the values had been reduced and he did not protest.

In late August 1981, Randell was reminded by the city that he had not submitted a formal letter certifying the tax roll as true and correct. On September 1, 1981, Randell wrote a letter to Lewis (Revenue Exhibit A) certifying the tax roll for 1981 as true and correct. Randell said that in his own mind he was certifying his original figures as true and correct, but he acknowledges that given his knowledge that the values had been reduced and the fact that he worked with the reduced figures at the Board of Equalization without protest, it was a reasonable assumption on the part of the city to believe he was certifying the reduced figures.

After examination of the sequence of events, I believe it could reasonably be held that Randell did certify the lower figures. This concurs with the report by DOR and the opinion by the Department of Law and supports the contention that the reduction of property values as handled and administered by Mark Lewis was legal.

DEPARTMENT OF ASSESSMENT

March 22, 1983

MAR 2 6 1983

House of Representatives
Barbara Lacher, Chairman
Community and Regional Affairs Committee

Dear Representative Lacher:

This is in response to your request for me to review the packet you sent me regarding reduced assessments in Valdez for 1981 and 1982.

The packet seemed to address the legal implications of reducing the assessments and, therefore, contained very little information as to whether or not the reduction of assessments could be substantiated.

After reviewing the packet, as presented, it is my personal and professional opinion that the reduction of assessments in Valdez was not substantiated by any supporting data and the method used could be considered, by professional assessors, as improper and unethical. My opinion is based upon the following observations:

1. Property appraisal is not an exact science but an opinion of value based on facts. Mr. Randell indicated in his letter that it was his opinion that his values represented 100% market value. I believe that a small amount of research will show that these value estimates were based upon facts which Mr. Randell obtained through his market analysis.

2. The valuations were reduced "because he (Mr. Lewis) believed that local economic conditions were depressed to the extent that the market probably would not support the values used by Mr. Randell." Nowhere in the packet can I find any information to support what Mr. Lewis believed. If this strategy were used by other assessors in the State, we might all raise our assessments by 10% - 20% because we believed we were low. This could not happen because our Boards of Equalization require us to show supporting data for our value estimates.

3. Mr. Randell's statement, it is not uncommon for appraisers to differ as much as 15% to 20% in valuation, is a correct statement. However, it should be noted that both appraisers values would be based upon supporting data. The interpretation of this data usually is the reason for a difference of opinions.

MAR 26 1983

4. The statutes mandate that the assessor assess property at its full and true value, not attempt to assess at a level comparable with other municipalities.

As I stated earlier, the appraisal of real estate is not an exact science but an opinion of value based on facts or supporting data. If Mr. Lewis believed that the assessments were high, a sales ratio study should have been conducted. A sales ratio study may have shown that the assessments were high and adjustments were warranted. This would have been the proper method for an assessor to follow rather than an arbitrary percentage reduction. I would like to point out that this may have been done, however, I did not see it in the packet you sent me. If this were in fact done, then I would state that the actions taken were both ethical and proper. For your information, I have enclosed a copy of the IAAO Code of Ethics which most assessing offices use.

As to your question regarding the tax dollar amounts as reported by Gerald Heier with the Department of Revenue, I believe the figures obtained are correct with respect to the information he received.

I hope I have answered your questions and would like to point out that the opinions expressed in this letter are my personal opinions and not necessarily those of my employer.

Respectfully,

Steve Van Sant
Director of Assessments
and Land Management

cr

International Association of Assessing Officers

MAR 26 [illegible]

Code of Ethics

The functions of the assessing officer and other members of IAAO are professionals in character. This Code of Ethics is a set of dynamic principles guiding the members' conduct. Each member of IAAO agrees that he will:

1. Cooperate fully with other members in all matters affecting his offical duties.
2. Conduct his activities in a manner that will reflect credit upon himself, other members and the IAAO.
3. Cooperate with the IAAO and its officers in all matters, including, but not limited to the investigation, censure, discipline or expulsion of members who by their conduct prejudice their professional status or the reputation of the IAAO.
4. Protect the professional reputation of other members of IAAO who subscribe to and abide by this Code of Ethics.
5. Treat as confidential all information concerning persons or their property obtained in his official capacity, except for lawfully authorized uses. It is proper for members employed by different jurisdictions to exchange factual information concerning persons or their property to aid either or both in the assessment of property legally subject to taxation
6. Perform his assessment duties in a manner consistent with statutory requirements without advocacy for accommodation or any particular interests, being factual, objective, unbiased and honest in his conclusion
7. Maintain, at all times, a courteous and respectful attitude in his relations with taxpayers, public officials and the public generally, and to compel a similar attitude on the part of his subordinates.
8. Give full faith and allegiance to his oath of office, apply the law of his jurisdiction to all taxpayers alike, and obey all applicable laws and regulations
9. Conform in all respects to this Code of Ethics, The Standards of Professional Conduct and the Constitution of the IAAO as the same may be amended from time to time

Standards of Professional Conduct

In relations with assessing officers, an IAAO member will:

Cooperate within the legal and ethical boundaries of his office or profession with other members who request his cooperation in performing the functions of their offices or profession.

Treat information obtained in his professional capacity as confidential unless use of that information is authorized by law. It is proper for members employed by different jurisdictions to exchange factual information concerning property to aid either or both in the assessment of property legally subject to taxation.

Protect the professional reputation of other members who subscribe to and abide by these Standards of Professional Conduct.

Give full credit to the originator of any material he uses in his writings or speeches.

Conduct his activities in a manner that will reflect credit upon himself, other members, and the IAAO.

Cooperate with the officers of the IAAO in all matters, including but not limited to the investigation, censure, discipline, or expulsion of members whose conduct casts a shadow on their professional status or the reputation of the IAAO.

In relations with public officials, an IAAO member:

Has a duty to cooperate with public officials to improve the efficiency and economy of public administration.

Will always maintain an attitude of respect and cooperation toward public officials and governmental agencies to whom the law has assigned official duties relating to the work of the IAAO member.

In relations with the public and taxpayers, an IAAO member will:

Maintain at all times a courteous and respectful attitude in his relations with taxpayers, taxing officials, and the public generally, and will compel a similar attitude on the part of his subordinates.

Give full faith and allegiance to his oath of office.

Apply the law of his jurisdiction equitably.

Perform his duties in a manner consistent with statutory requirements without advocacy for accommodation of any particular interests; he will be factual, objective, unbiased, and honest in his conclusion.

Appraisal standards to be complied with by IAAO members:

Any appraisal by an IAAO member shall conform to the highest professional assessment/appraisal standards.

Any value estimate made for assessment purposes by an IAAO member shall be an estimate of true market value as defined by the courts having jurisdiction, regardless of the assessment percentage to be used, except when the law of his jurisdiction requires or the assessment practice in his jurisdication permits special valuation techniques.

Any value estimate made by an IAAO member shall be a true opinion of value in accordance with generally accepted appraisal practices, except when the law of his jurisdiction requires or the assessment practice in his jurisdiction permits special valuation techniques.

Any fee appraisal assignment accepted by an IAAO member shall be one in which he has no unrevealed personal interest or bias, and one which he is competent to complete without placing his personal integrity or the assessing/appraisal profession in jeopardy.

It shall be unethical for a member of IAAO to accept an engagement for which the amount of his compensation is contingent upon reporting a predetermined value or upon the amount of the value estimate; or upon reporting a predetermined opinion, conclusion, or recommendation; or upon the amount of a tax reduction obtained by a client where his services are used; or upon any result, value, or subsequent transaction.

Review of potential State claim against
the City of Valdez for recovery of taxes
paid under AS 43.56

In conjunction with the Department of Law, we have completed an investigation of allegations that Mark Lewis, the former City Manager of Valdez, improperly reduced assessments on local property in 1981 and 1982, thereby increasing the overall millage rate in the local tax on the petroleum properties in concomitantly reducing taxes paid to the State, and have concluded from the facts that Mr. Lewis did not act improperly or illegally. Therefore, the State should not pursue any claim against the City of Valdez for recovery of additional taxes under AS 43.56 and we view the matter as closed.

A copy of the Department of Revenue's report dated March 14, 1983 and a copy of the Department of Law's legal opinion dated March 16, 1983 are attached. The following is a brief summary of those findings.

AS 43.56.010(a) imposes a state tax of 20 mills on oil and gas property. Under AS 43.56.010(b) and AS 29.53.045 a municipality may levy a tax on petroleum properties within its jurisdiction at the rate applicable to other property tax by the municipality. The tax paid to a municipality under this subsection is then credited under AS 43.56.010(d) against the state tax due.

In 1981 and 1982, the City of Valdez hired on contract an appraiser to assess property in the city for purposes of taxation. The contractual provisions required the appraiser to perform the statutory duties of an assessor. Under state law (AS 29.53.060(a)) and the Valdez city code (25-4 (2)) the city is required to assess property at its true and full value. Both define "full and true value" in a manner which clearly allows for a determination upon which reasonable minds can differ. In addition, real estate appraising is not an exact science and does not allow for "full and true value" determinations to be precise and often appraisers differ by as much as 20 percent on valuations.

House of Representatives
Barbara Lacher, Chairman
Community & Regional Affairs Committee

Senate
Frank Ferguson, Chairman
Community & Regional Affairs Committee

The City of Valdez's contracted assessor made his real property valuations as being 100% of fair market value, however, Mr. Lewis believed the assessor's assessments were high in light of the local economic conditions and after consultation with the assessor lowered the assessments by 15%. The assessor certified the reduced assessments as true and correct for 1981 and 1982.

The Department of Revenue investigation shows that all the real property assessments ratios for the municipalities which contain petroleum property are less than 100% of valuation. The ratios for Valdez in 1981 and 1982 are 89.6% and 93.8% respectively. When comparing the Valdez assessment ratios with the assessments ratios of other municipalities having oil and gas properties which ranged from 70.0 to 93.8, it is clear that the City of Valdez appraisals were in fact high and will not support a finding of any improper or illegal action.

In conclusion, the facts do not substantiate that Mr. Lewis acted improperly or that his actions resulted in the City of Valdez making any illegal real property assessment determinations under AS 29.53.060(a) and therefore, we conclude that the State did not lose any revenue under AS 43.56.010(d) and the matter is closed.

Sincerely,

Robt D Heath

MEMORANDUM State of Alaska

TO: Honorable Robert D. Heath
Commissioner
Department of Revenue

DATE: March 16, 1983

FILE NO: 366-493-83

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

By: Diane T. Colvin
Assistant Attorney General

SUBJECT: Review of potential state claim against City of Valdez for recovery of taxes paid under AS 43.56

You asked us to review a situation involving assessment and levy of taxes by the city of Valdez under AS 43.56, relating to oil and gas property taxes. Allegations have been made that the former City Manager of Valdez, Mark Lewis, improperly reduced assessments on local property in 1981 and 1982, thereby increasing the overall millage rate and the local tax on petroleum properties and concomitantly reducing taxes paid to the state. You have asked us to determine if his actions were improper, and, if found improper, to further determine whether the state has a claim against the city for recovery of excess taxes paid to the city on petroleum properties. We conclude, based upon your investigation and the facts submitted to us, that there is no clear proof that the assessments were improperly reduced and that, therefore, the chances of the state recovering on a claim against the city are poor.

The tax in question is the oil and gas property tax levied under AS 43.56.010. AS 43.56.010(a) imposes a state tax of 20 mills on oil and gas property as defined by AS 43.-56.210(6). Under AS 43.56.010(b) and AS 29.53.045 a municipality may levy a tax on petroleum properties within its jurisdiction at the rate applicable to other property taxed by the municipality. The tax paid to a municipality under this subsection is then credited under AS 43.56.010(d) against the state tax due.

The actions in question here involved assessments made in 1981 and 1982 on local property in the city of Valdez. State law and city ordinances require the city to assess property at its full and true value. (AS 29.53.060(a) and Valdez City Code 25-4(a)). Both define "full and true value" as follows:

> . . . the estimated price which the property would bring in an open market and under the then prevailing market conditions in a sale between a

RECEIVED
ALASKA DEPARTMENT OF REVENUE
MAR 16 1983
OFFICE OF THE COMMISSIONER

willing seller and a willing buyer both conversant with the property and with prevailing general price levels.

It is evident from the definition itself that full and true value is a determination on which reasonable minds can differ. The factors involved -- prevailing market conditions, a willing seller, a willing buyer, prevailing general price levels -- cannot be ascertained with precision or complete accuracy.

In 1981 and 1982 the city hired on contract an appraiser to assess property in the city for purposes of taxation. The contract refers to the individual hired as appraiser; however, it is evident from the contract provisions that the appraiser was to perform the statutory duties of assessor (e.g., . . . "make a final report to the City in the manner required by law", Exhibit C of your report, clause 1(c).) In addition, the facts show that the appraiser hired, Richard G. Randell, acted as tax assessor for those two years. By letter of September 1, 1981, he certified the tax roll for the year 1981 as true and correct. (Exhibit A). By letter of March 1, 1982, he made the same certification for the year 1982. (Exhibit B).

The allegation made against Mark Lewis is that he acted improperly and without authorization by reducing the assessments made by Mr. Randell by 15%. It appears that this action was taken before issuance of the notices of assessment and any subsequent action by the Board of Equalization and prior to certification of the tax rolls. According to your report, he took this action because he believed Mr. Randell's assessments were high in consideration of local economic conditions. Mr. Lewis and Mr. Randell discussed this matter on March 23, 1981, and in a letter dated March 31, 1981 (Exhibit F), Mr. Randell defended his valuations as being 100% of fair market value. In the same letter, he pointed out that real estate appraisal is an inexact science, and that appraisers often differ by as much as 15 to 20 percent on valuations.

Subsequent to this letter, but long before final certification of the assessment roll, the assessments were lowered by Mark Lewis. This was done in consultation with Mr. Randell, as discussed above, and evidently with his acquiescence, since there is no indication in the facts that he refused to submit the new assessments to the city council or to certify the tax rolls, despite the fact that he may have disagreed in principle with them.

In light of this, I do not believe the facts show that

Mr. Lewis acted improperly. The general rule in regard to the making of assessments is that the officer or board authorized to make an assessment is usually specified by law and the assessment, to be valid, should be made by the one so designated. See, McQuillen Mun Corp (3rd Ed) § 44.102. In this case, it does not appear that this rule was violated. Although the changes were actually made by Mr. Lewis, not the assessor, they were done after consultation with the assessor. While the assessor may have disagreed with the reduced valuation, he certified the assessments as changed to the city council.

While one can argue that this situation involves an unauthorized delegation of authority to make an assessment, that argument is a weak one. In accordance with rules relating to public officers, the acts of a de facto assessor generally are recognized to be valid. Id. In addition, exact conformity with all the statutory procedures for assessment is not necessarily a condition precedent to a valid tax. Substantial compliance with statutory requirements is sufficient, unless the requirements are classified as mandatory. City of Yakutat v. Ryman, ____ P.2d ____ (Opinion No. 2581), November 5, 1982. It does not appear that any requirements deviated from here were mandatory, so strict compliance is not at issue. Thus, it is unlikely that a court would invalidate the tax levied. While the procedures used may have been irregular, they are by no means clearly improper or in violation of AS 29.53.010 -- .180, Municipal Property Tax, or Valdez City Code §§ 25-1 -- 25-15, Assessment, Levy and Collection of Taxes.

In addition, the memorandum of March 9, 1983 from Jerry Heier included in your report shows that all the real property assessment ratios for the municipalities that contain petroleum property are at less than 100% of valuation. The ratios for Valdez in 1981 and 1982 are 89.6 percent and 93.8 percent. When compared to the average ratio for each of these years (85.2 and 84.5) and the ratios for other municipalities with oil and gas properties (ranging from 70.0 to 93.8), it appears that the original appraisals of Randell were in fact high. This fact, combined with the legal principles discussed above, would make it difficult to show improper or arbitrary action.

It is also important to note that if an assessor uses any proper method of assessment uniformly throughout the taxing district, the mere fact that a different method of assessment may result in a different valuation is not grounds for invalidating the tax. Winegardner v. Greater Anchorage Area Borough, 534 P.2d 541, 548 (Alaska 1975). A municipality has discretion to appraise by whatever recognized method of valuation it chooses, so

long as there is no fraud or clear adoption of a fundamentally wrong principle of valuation. Twentieth Century Investment Company v. City of Juneau, 359 P.2d 783 (Alaska 1961); Hoblit v. Greater Anchorage Area Borough, 473 P.2d 630 (Alaska 1970). There is no evidence that either factor was present in this case.

Because it is not clear that Mr. Lewis acted improperly, I cannot recommend that the state pursue a claim against the city for recovery of the excess taxes charged. It would, in my opinion, be difficult for the state to prove that the method of assessment was improper or that there was not substantial compliance with prescribed procedures. It would be particularly difficult to prevail on these issues in light of the fact that the assessment ratio for each year in question is reasonable when compared to the ratios for other municipalities affected by oil and gas property assessments.

We hope this information is useful to you. If you have further questions, please do not hesitate to contact us.

SUBJECT: Valdez Property Tax Problem

ALLEGATIONS BY ANCHORAGE DAILY NEWS

The Anchorage Daily News, in a series of stories, charged that the City of Valdez had received about $ 190,000 in property tax revenues on state assessed petroleum properties in an improper way. The stories indicated that the locally assessed property had been reduced in 1981 and 1982 by the City Manager, Mark Lewis, by 15% without folowing proper procedures. As a result of the lower assessment for local property, the overall millage rate was higher than it otherwise would have been. This caused the local tax on petroleum property to also be higher with the result that the net tax paid to the state was reduced. See the memo from Jerry Heier and me dated February 9, 1983 titled "Valdez oil and gas property taxation" for the calculations and details of how this worked.

THE FACTS

The City of Valdez hired the Rich Randall Appraisal Company to appraise local property for 1981 and 1982. Although the correspondence and the contract entered into on December 15, 1981 (for the 1982 and 1983 years) uses the term "appraiser", Mr. Randall actually certified the rolls for 1981 and 1982 as the city "assessor". In addition, the terms of the request for proposal, the correspondence, and the contract (Exhibit C), seem to indicate that the appraiser was to do all of the work ordinarily done by the assessor under the Municipal Code (Title 29, Alaska Statutes) and the local ordinances (See Exhibit E). Although no reference was made to having Mr. Randall certify the rolls as "assessor", he in fact did so in letters to Mark Lewis dated September 1, 1981 for the 1981 tax roll (Exhibit A) and to Tom Gilson dated March 1, 1982 for the 1982 tax roll (Exhibit B).

Mark Lewis, in his capacity as City Manager, and as the person who, acting in that capacity, hired Mr. Randall, then proceeded to lower Mr. Randall's assessments by 15%. He did this because he believed that local economic conditions were depressed to the extent that the market probably would not support the values used by Mr. Randall. Mr. Lewis and Mr. Randall apparently discussed this topic on March 23, 1981 and Mr. Randall subsequently defended his valuations in a letter to Mr. Lewis dated March 31,1981 (Exhibit F). In that letter, Mr. Randall also indicated that appraisers could differ in their valuations of the same piece of property by as much as 15% to 20% and that, "Therefore, it would be reasonable to apply a percentage of increase or decrease to the values I arrived at for

assessment purposes." Mr. Lewis, did, in fact, lower those assessments by 15%.

It should be noted at this point that their is substantial support for Mr. Randall's views about the variability of assessments on property. A study by Jerry Heier (see his memo to you dated February 22, 1983 attached) comparing the ratios for several Alaska municipalities as done by the State Assessor and the various practices different communities use for the year to year assessment process indicate that there is, indeed, a wide variation, not only in the values, but in the assessment process itself.

LEGAL QUESTIONS

There are really two legal questions involved here:

1) Did Mark Lewis act improperly when he lowered the local assessments?

2) Can the state recover the excess taxes charged on petroleum properties as a result of his action?

The first question is a difficult one to resolve. According to the Municipal Code and the City Ordinances of the City of Valdez, only the assessor has the authority to certify the assessment role and any changes made to the role must be made by the assessor (as a result of error or omission) or by the city council sitting as the board of equalization as recorded by the city clerk (Exhibit E, Secs. 25-4, 25-4.1, 25-6, 25-7, 25-7.1, and 25-8). It is apparent from the facts that Rich Randall acted as assessor within the meaning of this requirement. However, he was hired by, and worked under the authority of Mark Lewis, City Manager. The question is, did Lewis have the actual authority to function as assessor which he then delegated to Randall? If that is the case, then one could argue that he lowered the assessments in accordance with his authority and both questions are resolved.

If, on the other hand, only Rich Randall, by virtue of the authority given to him under the agreements he had with the City of Valdez, could make the changes that were made, then Mark Lewis failed to follow the procedures required under the local ordinances and acted improperly in changing the role.

As to the second question, it is possibly a question that could be applied to all municipalities which contain petroleum property and which assess local property at less than full and true value. Again, referring to the memo dated February 22, 1983 by Jerry Heier, it appears that all such municipalities are at less than 100%. In fact, it is further interesting to note that the City of Valdez had ratios of 89.60% in 1981 and 93.84% in 1982 which indicates that Rich Randall's original appraisals were high. Valdez is also higher than the average for all municipalities.

Even so, if the first question is answered in the affirmative and Mark Lewis did act improperly, does that impropriety give the state a cause of

action against the City of Valdez to recover the excess taxes collected on petroleum property? There is nothing in Title 43 that would give the state such authority.

CONCLUSION

Both legal questions should be referred to the Department of Law for a legal opinion and recommendations as to further action, if any. I should point out that if the state does seek to recoup the money from the City of Valdez, then Valdez would more than likely have to raise its current mill rate in order to pay us. Since that would be born primarily by petroleum property, our net would be only about $ 12,000. It is possible, however, that the Attorney General could find a way to make this assessment either retroactive to local property owners at the time of the 1981 and 1982 assessments or order a special assessment on current locally owned property only.

This memo and the attachments should be forwarded to the Attorney General for his advice on how or whether to proceed.

MEMORANDUM State of Alaska

TO: Joe Donohue
Deputy Commissioner
Department of Revenue

DATE: March 9, 1983

FILE NO:

TELEPHONE NO:

FROM: Jerry Heier JH
Petroleum Property Assessor
Petroleum Revenue Division
Department of Revenue

SUBJECT: Overview of Local Assessment Practices

Through: Fred Boetsch FB
Director

I have obtained the 1982 real property local assessment ratios for 1982 from the Department of Community and Regional Affairs that apply to the municipalities primarily affected by oil and gas property assessments.

The 1981 and 1982 ratios are as follows:

	1981	1982
Anchorage	87.24	82.05
Fairbanks-North Star	93.11	87.03
Kenai Peninsula	90.39	79.93
Matanuska-Susitna	80.84	88.18
North Slope Borough	70.00	76.00
Valdez	89.60	93.84
Average Ratio	85.20	84.51

The methodology used for determining real proprty assessment ratios and its uses and limitations are explained in "Alaska Taxable" furnished by the Department of Community and Regional Affairs, Division of Local Government Assistance.

While a 100% ratio is the ultimate goal for an assessor's office it is very rarely attainable. Property valuation can best be described as an art and not an exact science. It is very unlikely that any two appraisers will appraise a specific property at the exact same value. Too many variables are involved in the appraisal function. A difference of 10 to 15 percent is not uncommon.

The ideal situation is for a municipality to revalue, or at least recheck the value of each property annually. On the practical side this is rarely possible due to time and budget restraints. Smaller taxing jurisdictions may be able to accomplish this on a contract basis, rather than with an in-house appraisal and assessment staff.

I have contacted several of the municipalities involved with oil and gas properties to determine the time schedule used for an entire valuation of the locally assessed properties.

In 1980 the Municipality of Anchorage began an annual revaluation cycle. This is being accomplished through the utilization of a computer assisted valuation system along with an in-house field appraisal section. Approximately 20 percent of the Municipality is physically appraised by the field staff. This would include difficult to appraise, special purpose properties and areas where there have been erratic and/or rapid value changes. The remaining 80 percent of the municipality is revalued utilizing computer analysis and extension.

The Fairbanks-North Star Borough is on a three year reappraisal cycle with staff appraisers. One-third of the Borough is physically inspected and revalued each year.

The Kenai Peninsula Borough is on a two year reappraisal cycle with one-half of the Borough being physically inspected and revalued each year.

The Matanuska-Susitna Borough has just gone on an annual revaluation basis. During the last two years the land values were readjusted annually and the buildings every two years.

The North Slope Borough uses both an in-house staff and a contract appraisal firm. Industrial and commercial properties are revalued annually and residential properties are revalued every two years.

The Municipality of Valdez uses a contract appraisal firm on an annual review and revaluation basis.

During inflationary market conditions a municipality that is on a two or three year revaluation cycle will always be on the low side of a 100% ratio. Computer assisted valuation is relatively new in the state and I am not able to comment on its reliability or accuracy.

The ultimate proof of an appraisal is only evident after a sale of the property itself and assessments are not made on hindsight but only on the basis of a best estimate of current market conditions.

With due consideration given to the fact that a 100% ratio is rarely obtainable under the best of conditions and that most of the municipalities revalue on a cycle basis it is understandable that local assessment ratios will be below the ideal, 100% assessment ratio.

To my knowledge the statutes do not provide any means of forcing a municipality to achieve and maintain a relatively reasonable high ratio. Even statutory provisions would have to provide for a reasonable range to allow for local budget and time constraints.

The question of ultimate authority for an across the board reduction or increase for a portion or even all of an assessment roll, by any class of city or borough whould be referred to the Department of Law. From a practical point of view it would appear that the real property assessment ratios for the municipalities reviewed were fairly consistant and fell within a reasonable range. The average rate for 1981 was 85.20 percent and range from a low of 70 percent to a high of 93.11 percent. For 1982 the

spread is even narrower, with an average ratio of 84.51 percent with a low of 76 percent and a high of 93.84 percent.

For reasons already mentioned it is not unreasonable for the average ratio to be below 100 percent and the spread or range or ratios also appears to be within tolerable limits.

GDH:il

MEMORANDUM State of Alaska

TO: Joseph K. Donohue
Deputy Commissioner

DATE: February 9, 1983

FILE NO:

TELEPHONE NO:

SUBJECT: Valdez oil and gas property taxation

Through: FROM: Fred Boetsch, Director
Petroleum Revenue Division

From: Gerald D. Heier
Petroleum Property Assessor

I have checked into the Valdez oil and gas property tax situation and was informed by Terry Early, the State Assessor with the Department of Community and Regional Affairs that the 1981 locally taxed assessed value for Valdez was $87,412,330 and that the 1982 value was $91,811,450. These would be the 85% numbers derived from the 100% appraised values.

The original appraised values can be calculated as follows:

1981 = 87,412,330 ÷ .85 = 102,838,035

1982 = 91,811,450 ÷ .85 = 108,013,470

The differences in local taxes paid on state assessed oil and gas properties and 85% or 100% locally assessed properties can be calculated as follows:

	1981	1982
Locally Assessed, actual	87,412,330	91,811,450
State Assessed	+ 1,619,140,000	+ 1,575,389,000
Total Value	1,706,552,330	1,667,200,450
Actual local mill levy	x .006364	x .0069009
Taxes collected	10,860,499	11,505,183
Locally assessed, adjusted	102,838,035	108,013,470
State Assessed	+ 1,619,140,000	+ 1,575,389,000
Total adjusted value	1,721,978,035	1,683,402,470

An adjusted mill rate can now be determined as follows:

Taxes collected -- Total adjusted value equals adjusted mill levy.

1981

$$\frac{10,860,499}{1,721,978,035} = .006307$$

1982

$$\frac{11,505,183}{1,683,402,470} = .0068345$$

The difference between the actual local mill levy times the state assessed property value yields the additional local tax imposed on state assessed properties.

	1981	1982
Actual mill levy	.006364	.0069009
Adjusted mill levy	- .006307	- .0068345
	.000057	.0000664
State Assessed Property	1 619,140,000	1,575,389,000
	.000057	.0000664
	92,290.98	104,605.83

The above scenario assumes that the information obtained from Terry Early is the actual assessed values used by Valdez for tax purposes and that the assessed value was actually 85% of the original appraised value as determined by their contract appraisers.

I have discussed the Valdez situation with Dave LeBlond of the Attorney General's office here in Anchorage and he mentioned several points of concern.

Valdez is a Home Rule City and may or may not operate under the same rules and regulations as an organized borough. It should be assumed that the city manager has the authority to reduce the appraised values and establish the local assessment roll as he thought best. His opinion of value for the city properties may be different than the contract appraisers. It is not unusual for "appraised" values and "assessed" values to differ by 10% to 15%. Any formal investigation would be time consuming, probably involving subpoenas and interogatories. It would be difficult to prove that anyone acted in bad faith or conspired to cheat the state.

Enclosed is a copy of "Alaska Taxable" - 1981, please refer to Table III "Local Assessment Vs. Full Value" on pages 20 and 21. Valdez has a real property assessment ratio of 89.6; North Slope Borough, 70.00; Mat-Su, 80.84; Kenai Peninsula, 90.39; Fairbanks North Star, 93.11 and Anchorage 87.24. This would seem to indicate that the assessment ratio for Valdez for 1981 did fit the general pattern of ratios determined for other oil and gas related property boroughs.

Re: Real Estate Appraisals
for Assessment Purposes
Valdez, Alaska

Dear Tom:

I hereby certify, as the tax assessor, that the appraisals for tax purposes are completed and the tax roll for the year 1982 is true and correct as submitted. However, in the event that any appeals to this tax roll and/or the appraised values prove correct, the tax roll will be amended.

This year we were asked to value certain city owned lands and these values follow.

Legal Description	Area	Estimated Value as of 1/1/82

ASLS 79-116 TR.B.	1,488.42 Acres	1,191,000-
ASLS 79-116 TR.C.	188.67 Acres	283,000-
ASLS 79-116 TR.D.	106.81 Acres	171,000-
ASLS 79-115 TR.E.	21.66 Acres	75,800-
ASLS 79-116 TR.F.	364.21 Acres	437,000-
ASLS 79-116 TR.G.	34.56 Acres	121,000-

These values are opinions based on factors found in the Valdez real estate market while doing our assessment work. However, many of these parcels are so large and/or so untypical that no comparable sales data was available and therefore are extremely rough estimates.

Also, many of the property cards need to be updated, and in order to accomplish this, we must personally inspect each of the properties in question. The accomplishment of this will take time as it is difficult to find owners at home during day-time hours and many do not want to be bothered in the evening.

We have been, and are making, telephone calls to try and set up appointments. Those that cannot be reached by telephone will have to be canvassed.

We are also planning to take new photographs of all improved properties during the late spring and summer of 1982. We propose to have the majority of the property cards completed and have new photographs with them by December 15, 1982 and if not, we recommend that the payment of $8,400 due us on that date be held back until this requirement is met.

One other subject I would like to discuss with you is the appraisal of mobile homes as real property. Anything that is permanently affixed to the land is real property; mobile homes are personal property. There is no way to accurately keep abreast of ownership changes in the mobile home market as there is no requirement to file any sort of deed; like in a real property transaction. Also, mobile home owners move their units from one court to another without any notification to the city. The city then expends a large amount of effort, as well as money, in locating the correct owner and/or unit.

I would recommend that any mobile home that is not set up on a full (permanent style) foundation be considered personal property and removed from the real property tax roll.

If you have any questions regarding any part of this letter please contact me.

Very truly yours,

Richard A. Randell

Rich Randell

CONTRACT FOR PROFESSIONAL APPRAISAL SERVICES

THIS AGREEMENT, made and entered into this 15th day of December, 1981, by and between the CITY OF VALDEZ, a municipal corporation organized under the laws of the State of Alaska, hereinafter referred to as the "City," and Rich Randall Appraisal Company, hereinafter referred to as the "Appraisers".

WITNESSETH:

1. The Appraiser shall:

(a) Appraise, in accordance with standard Alaska tax practice, all taxable real property located within the existing limits of the City at true value, furnishing all necessary cards, photographs and forms required for such appraisal, for tax year 1982 and 1983.

(b) Appraise, in accordance with standard Alaska tax practice, all City, State, and Federal property located within the existing limits of the City at true value, furnishing all necessary property cards with photographs and information on acreage and dimensions as well as a description of any improvements, for tax year 1982 and 1983.

(c) Furnish all necessary equipment and labor, other than legal and/or location descriptions and ownership records of those parcels to be appraised, in connection with the appraisal required in the preceding paragraphs, and make a final report to the City in the manner required by law.

(d) Investigate, evaluate and report to the City the merits of all written complaints received by the City and forwarded to the appraisers after evaluation notices have been mailed and prior to Board of Equalization hearings. The City shall determine which compalints are to be forwarded to the Appraiser for further investigation and evaluation.

(e) Attend hearings of the Board of Equalization at such times as required by law.

(f) Complete, prior to March 1, of each year, all obligations to be performed on the part of the Appraiser with the exception of investigation of complaints and attendance at the Board of Equalization hearings.

2. The City shall:

(a) In consideration of the performance of the obligations undertaken under paragraph 1, Sections (a), (b), (c) and (f), by the Appraiser, pay to the Appraiser the sum of twenty-five thousand two hundred dollars ($25,200) for the 1982 tax year and the sum of twenty-five thousand ($25,000) for the 1983 tax year. Eight thousand four hundred dollars ($8,400) shall be paid not later than December 15th of each year with the remainder to be paid within thirty days of delivery to the City of the tax roll and satisfaction of all contract requirements for that year.

(b) In consideration of the obligations undertaken by the Appraiser under Paragraph 1, Sections (d) and (e) herein pay to the Appraiser amount of FIFTY DOLLARS ($50.00) per hour for the time spent performing these services, except that no additional fee shall be paid for appeals caused by Appraiser negligence, such as appraising non-existent property or misidentifying property.

(c) Provide the Appraiser, prior to commencement of field work in Valdez, with legal or location descriptions, ownership records, owners' addresses, and the existing property cards with photographs from the previous tax year. The property cards and city records shall be returned to the City as soon as possible after use by the Appraiser.

(d) Provide the Appraiser with copies of existing City maps, plats and zoning maps covering the properties to be appraised.

3. The parties agree that the Appraiser shall have no responsibility for the appraisal of either the Pipeline-oriented property which has been appraised by the State or any property, the location and description of which, the City has not provided to the Appraiser.

4. The parties agree that all existing property cards and tax records, as well as those cards and records which may be created by the Appraiser while performing this contract, are and shall remain the property of the City.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands and seals the day and year first above written.

CITY OF VALDEZ, ALASKA

(g) The council has the power to:

(1) Delegate the power to invest the fund to the city manager or other city official, and require reports relating to the investment as it prescribes;

(2) Hire other persons as necessary to assist the council in the exercise of its powers; and

(3) Take whatever other actions are reasonably necessary in furtherance of the purpose of this section. (7-19-77.)

Chapter VII. Taxation.

Sec. 7.1. Taxation by ordinance.

The council shall provide in the Code for the annual assessment, levy and collection of city taxes. Council may provide for differential taxation based upon differences in kind or level of services provided within service areas established by ordinance.

Sec. 7.2. Exemptions.

The power of taxation shall never be surrendered. No exemptions from taxation shall be allowed, except such as are expressly provided by law. Private leaseholds, contracts or interests in land or property owned or held by the United States, the state or its political subdivisions, shall be taxable to the extent of the interests.

Sec. 7.3. Assessment day.

The taxable status of property shall be determined as of the first day of January, or such other date as may subsequently be required by law, which shall be the assessment day. Values on the assessment roll shall be determined according to the facts existing on the assessment day for the year for which the assessment roll is made, and no charge of the status of any property after that day shall be considered by the council when acting as a board of equalization. Standards of appraisal shall be followed by the council when established as a board of equalization.

Standards of appraisal shall be followed by the council when established by law.

Sec. 7.4. Security for taxes on real property.

The city shall have a first lien upon all real property against which taxes are assessed for the taxes and any collection charges, penalties and interest which may accumulate thereto, which lien shall continue until the taxes are paid.

Sec. 7.5. Protection of city's real property tax liens.

The city may protect its lien for taxes upon real property by sale at tax sale, or by purchasing the real property at any tax sale or other public sale, or by direct negotiation with the owner. Any such procedure shall be deemed to be for a public purpose. When the city has acquired an interest in real property to protect a tax lien thereon, the owner of any interest in such real property may redeem the same by paying the delinquent city taxes and all accrued charges, penalties and interest thereon. After the city has held any tax delinquent real property for one year, it may hold the same for public use or sell it at public auction to the highest bidder.

Sec. 7.6. Security for taxes on personal property.

City taxes on personal property shall be a debt to the city from the persons to whom they are assessed. If any person to whom such taxes are assessed fails or refuses to pay the taxes, or if the collecting officer resonably believes that any person will not pay such taxes, the taxes and accrued charges, penalties and interest may be collected by a personal action in the name of the city against the person to whom assessed in a court of competent jurisdiction, or by distraint and sale of any personal property of the person assessed. Neither of the remedies herein given shall be exclusive of the other at any time.

Chapter VIIA. Service Areas.

Sec. 7A.1. Purpose.

Service areas may be established to provide services not provided on an area-wide basis or to provide a higher level of service than that provided on an area-wide basis.

Sec. 7A.2. Establishment.

(a) The council by ordinance may establish, alter, consolidate or abolish service areas. The council by ordinance may add or eliminate services to a service area. The ordinance shall contain the following:

(1) Boundaries and area to be included;

(2) Service to be provided or be eliminated; and

(3) Other provisions the council includes.

(b) If a petition of protest is filed with the council before the effective date of the ordinance adopted under this section, the ordinance shall be submitted to the qualified voters residing in the service area or proposed service area and if ratified shall take effect upon certification of the election. The petition shall contain signatures of at least ten percent or 100 of the qualified voters residing in the service area or proposed service area, whichever is the lesser. Each new service or each service to be eliminated shall be placed separately on the ballot and shall require ratification by a majority of the qualified voters voting on the question. There shall be no election under this subsection to eliminate a service to be provided on an area-wide basis.

CHAPTER 25.

TAXATION.[1]

Article I. Assessment, Levy and Collection of Taxes.

Division 1. Generally.

§ 25-1. Property subject to taxation generally.
§ 25-2. Exemption of personal property from taxation; mobile homes classified as real property.
§ 25-2.1. Exemptions required by state law.
§ 25-2.2. Additional exemptions.
§ 25-3. Determination of annual levy, due dates, etc.; limitation on amount of levy.

Division 2. Assessments.

§ 25-4. Assessment procedure generally; preparation of assessment roll.
§ 25-4.1. Reevaluation.
§ 25-5. Contents of assessment roll.
§ 25-6. Notices of assessment to be given; corrections in assessment roll by assessor.
§ 25-7. Appeals to board of equalization.
§ 25-7.1. Hearing.
§ 25-8. Completion of assessment roll; records of board of equalization; certification of assessment roll.
§ 25-9. Appeals to superior court.
§ 25-10. Supplementary assessment rolls.
§ 25-11. Delivery of assessment roll to city council; validity of assessment rolls.

Division 3. Levy and Collection.

§ 25-12. Determination of tax rate and delinquent date; tax statements; penalties for delinquent payment.
§ 25-12.1. Deadlines for rate of levy determinations and tax statement mailing.
§ 25-13. Delinquent tax roll; foreclosure lists; payment of taxes prior to sale; giving of notices.
§ 25-14. Foreclosure and sale of real property for delinquent taxes; redemption.
§ 25-15. Foreclosure on personal property.

Article II. Sales Tax.

§§ 25-16 to 25-33. Repealed.

---

1. As to finance generally, see ch. 9 of this Code.

§§ 25-34 to 25-99. (Blank.)

Article III. Special Assessments.

§ 25-100. Authorized improvements.
§ 25-100.1. General limitations.
§ 25-101. Property to be assessed.
§ 25-102. Property owner.
§ 25-103. Amount to be assessed.
§ 25-104. Costs of improvement.
§ 25-105. Council initiated improvement districts--Authorized.
§ 25-106. Same--Procedures for creation.
§ 25-107. Same--Objections and hearings.
§ 25-108. Petition initiated improvement districts--Authorized.
§ 25-109. Same--Public hearings and notice thereof.
§ 25-110. Same--Maximum assessment.
§ 25-111. Computation of assessments.
§ 25-112. Levy of assessments; notice of hearing on objections.
§ 25-113. Hearing on objections; signing of assessment roll.
§ 25-114. Notice to owner of assessment.
§ 25-115. Assessments to be lien on property.
§ 25-116. Assessments to be binding.
§ 25-117. Appeal.
§ 25-118. Reassessment--To be made where original assessment invalidated.
§ 25-119. Same--Valid notwithstanding irregularities.
§ 25-120. Foreclosure of liens for unpaid assessments.

Article IV. Municipal Service Areas.

§ 25-121. Created.
§ 25-122. Boundaries designated.
§ 25-123. Differential tax levied.

Article V. Tax on Pipeline Property.

§ 25-124. Levied on "taxable property."
§ 25-125. Levied on "construction equipment."

Article VI. Hotel-Motel Room Tax.

§ 25-126. Definitions.
§ 25-127. Levied; responsibility for payment; collection.
§ 25-128. Certificate of registration.
§ 25-129. Receipts--Segregation.
§ 25-130. Same--Transmittal; due date; penalty.
§ 25-131. Returns to be confidential.
§ 25-132. Records--Maintenance and inspection.
§ 25-133. Same--Investigation by city.
§ 25-134. Suits for collection.
§ 25-135. Prohibited acts.
§ 25-136. Civil penalties for violations.
§ 25-137. Use of funds generated; creation of advisory board.

Article I. Assessment, Levy and Collection of Taxes.

Division 1. Generally.

Sec. 25-1. Property subject to taxation generally.

All property not expressly exempt by the city, or exempted from taxation by the city under federal or state constitutional provisions, shall be subject to annual taxation at its full and true value based upon the actual value of the property assessed. (Ord. No. 6803, § 1.)

Sec. 25-2. Exemption of personal property from taxation; mobile homes classified as real property.

(a) Effective January 1, 1968, all personal property located within or owned by residents of the city shall be exempt from the Valdez personal property tax. This exemption includes, but is not limited to, household furniture and effects, intangibles, inventories and goods in process, and boats and vessels of all types.

(b) For the purposes of this chapter, real property includes, among other things, trailers and mobile homes, and lean-tos and similar structures attached or contiguous thereto. The words "trailers and mobile homes" include all forms of housing adaptable to being moved by a power connected thereto, and which are or can be used for residential, business, commercial or office purposes. Provided, however, that those trailers which are (1) used for camping or recreational purposes only, or (2) not affixed to the site and not con-

nected with utilities, shall be considered to be personal property and exempt from taxation. A trailer or mobile home is conclusively presumed to be affixed to the land and real property for the purposes of taxation when it has remained at a fixed site for more than ninety days. When the ownership of a trailer or mobile home and attachments and appurtenances is different from the land upon which it rests, the city may, in its discretion, assess and tax the ownerships separately. (Ord. No. 6803, § 2.)

Sec. 25-2.1. Exemptions required by state law.

(a) The following property is exempt from general taxation:

(1) Municipal, state or federally owned property; except, that private leaseholds, contracts or other interest in the property shall be taxable to the extent of those interests.

(2) Household furniture of the head of a family or a householder not exceeding five hundred dollars in value.

(3) Property used exclusively for nonprofit religious, charitable, cemetery, hospital or educational purposes. "Property used exclusively for religious purposes" includes the following property owned by a religious organization:

a. The residence of the pastor, priest, rabbi, minister or religious order of a recognized religious organization;

b. A structure, its furniture and its fixtures used solely for public worship, charitable purposes, religious education or a nonprofit hospital;

c. Lots supporting and adjacent to a structure or residence mentioned in subparagraphs a. or b. of this subsection which are necessary to convenient use; and

d. Lots required by local ordinance for parking near a structure defined in subparagraph b. of this subsection.

(4) Property of a nonbusiness organization composed entirely of persons with ninety days or more of active service in the armed forces of the United States whose conditions of service and separation where other than dishonorable, or the property of the auxiliary of such organization.

(5) Money on deposit.

(6) After January 1, 1973, the real property owned and occupied as a permanent place of abode by a resident sixty-five years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more per-

sons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under Alaska Statutes, sections 44.62.560--44.62.570.

(b) Property described in subsection (a) of this section from which income is derived is exempt only if that income is solely from use of the property by nonprofit religious, charitable or hospital groups or by educational groups for classroom space.

(c) No exemption may be granted except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15 of the assess-

ment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, he shall allow an exemption in accordance with the provisions of this section. The assessor may at any time require proof in the form he considers necessary of the right and amount of an exemption claimed under this section. (Ord. No. 7538, § 1.)

Sec. 25-2.2. Additional exemptions.

Thirty percent of the assessed value, up to a maximum of ten thousand dollars, of a principal residence owned and occupied by the taxpayer is exempt from taxation. (Ord. No. 7611, § 1.)

Sec. 25-3. Determination of annual levy, due dates, etc.; limitation on amount of levy.

The rate of levy of tax, the date of equalization of the tax and the date when taxes shall become delinquent shall be fixed by resolution of the city council, and the levy for school and municipal purposes shall be separately made and fixed, but the aggregate thereof shall not exceed three per cent of the assessed value of the property assessed. (Ord. No. 218, § 1.)

Division 2. Assessments.

Sec. 25-4. Assessment procedure generally; preparation of assessment roll.

(a) All taxable property shall be assessed at its true and full value and all assessments shall be uniform and equal and based upon the actual value of the property assessed. The "full and true value" is the estimated price which the property would bring in an open market and under the then prevailing market conditions in a sale between a willing seller and a willing buyer both conversant with the property and with prevailing general price levels.

(b) The city assessor shall annually assess and list on a tax roll all real property in the name of the person by whom it is owned on the first day of January. If no owner or claimant to the property can be discovered, the property shall be assessed to the unknown owner.

(c) The assessor shall complete the listings for the annual assessment roll of all real property within the city before March 1, or other such date as may be established by the city council each year. The listing of all taxable property may be made upon permanent separate ledger cards which will be the combined assessment roll and tax ledger. Real property shall be assessed to the owner of record as shown in the records of the recorder of the district; provided, that any other person having an interest in the property may be listed on the assessment records with the owner. The person in whose name any property is listed as owner thereof shall be conclusively presumed to be the legal owner of record. If the owner of land is unknown, such land may be assessed to an "Unknown Owner" or "Unknown Owners." No assessment shall be invalidated by a mistake, omission or error in the name of the owner of the real property assessed, if the property is correctly described.

(d) The assessor may list real property located in any subdivision by lot and block or tract description, and unsubdivided property according to the land office section and township survey description, or by giving the boundaries thereof, or by reference to the book and page of the records of the recorder where the description may be found or by designation of tax lot number, referring to a public record kept by the assessor of descriptions of real property, or in such other manner as to cause the description to be capable of being made certain. Initial letters, abbreviations, fractions and exponents to designate the township, range, section or part of a section, or the number of any lot or block or part thereof, or any distance, course, bearing or direction, may be employed in any such description of real property.

(e) The assessor personally, or by any designated assistant, shall, after identifying themselves, have the right to enter upon and inspect the premises of any person at reasonable times for the purpose of making an examination, valuation, or assessment of real property. He shall have access to and may examine all property records involved, and any person shall, upon request, furnish to the assessor or his assistant every facility and assistance for the purposes of such examination, valuation or assessment. (Ord. No. 6803, § 3; Ord. No. 7539, § 1.)

Sec. 25-4.1. Reevaluation.

A systematic reevaluation of taxable real and personal property undertaken by the assessor, whether of specific areas in which real property is located or of specific classes of real or personal property to be assessed, shall be made only in accordance with a resolution or other act of the city council directing a systematic reevaluation of all taxable property within the city over the shortest period of time practicable, as determined by the city council and fixed in the resolution or other act of the council. (Ord. No. 7539, § 2.)

Sec. 25-5. Contents of assessment roll.

The assessor shall prepare an annual assessment roll, in duplicate, upon which he shall enter the following particulars:

(a) The names and last known addresses of all persons with property liable to assessment and taxation.

(b) A description of all taxable property.

(c) The assessed value, quantity or amount of such property.

(d) The arrears of taxes, if any, owed by any person. (Ord. No. 218, § 4.)

Sec. 25-6. Notices of assessment to be given; corrections in assessment roll by assessor.

(a) The assessor shall give to every person named in the assessment roll a notice of assessment, showing the assessed value of his property, at least

thirty days before the equalization hearings. On the back of each assessment notice shall be printed a brief summary, for the information of the taxpayer, of the dates when the taxes are payable, delinquent and subject to interest and penalty, dates when the board will sit for equalization purposes and any other particulars specified by the city council. The assessment notice shall be directed to the person to whom it is to be given, and shall be sufficiently given if it is mailed by first class mail addressed to, or is delivered at, his address as last known to the assessor; or if the address is not known to the assessor, the notice may be addressed to the post office nearest to the place where the property is situated. The date on which the notice is mailed, or if delivered by a city official or employee then on the date of such delivery, shall be deemed to be the date on which the notice is given.

(b) When valuation notices have been mailed, the assessor shall cause notice that the assessment rolls have been completed to be published in a newspaper of general circulation once each week for two successive weeks. In the event no newspaper of general circulation is published in the city, the assessor shall cause such notices to be posted at two public places for a period of two weeks. Such notice shall also state when and where the equalization hearings shall be held, and that an appeal may be taken to the board of equalization upon the filing of notice, in writing, with the board specifying the grounds for the appeal.

(c) The assessor may correct any error or supply any omission made or arising in the preparation of the assessment roll at any time before the sitting of the board of equalization. It shall be the duty of every person receiving a notice of assessment to advise the assessor of any error or omission he may have observed in the assessment of his property, in order that the assessor may correct the same.

If errors found in the preparation of the assessment roll are adjusted, the assessor shall mail a corrected notice allowing thirty days for appeal to the board. (Ord. No. 218, § 5; Ord. No. 7539, §§ 3, 4.)

Sec. 25-7. Appeals to board of equalization.

(a) Any person who receives notice or whose name appears on the assessment roll may appear to the board of equalization with respect to any alleged error in the valuation, overcharge, omission or neglect of the assessor not adjusted to the taxpayer's satisfaction. Whenever it appears to the board that there are overcharges or errors or invalidities in the assessment roll, or in any of the proceedings leading up to or subsequent to the preparation of the roll, and there is no appeal before the board by which the same may be dealt with, or where the name of any person is ordered by the board to be entered on the assessment roll, by way of addition or substitution, for the purpose of assessment, the board shall cause notice of assessment to be mailed by the assessor to that person or his agent giving him at least thirty days from the date of such mailing within which to appeal to the board against the assessment.

(b) Notice of appeal, in writing, specifying the grounds for the appeal, shall be filed with the board of equalization within thirty days after the date on which the assessor's notice of assessment was given to the person appealing. Such notice shall contain a certification that a true copy thereof was mailed or delivered to the assessor. If notice of appeal is not given within that period, the right of appeal shall cease as to any matter within the jurisdiction of the board, unless it is shown to the satisfaction of the board that the taxpayer was unable to appeal within the time so limited. A copy of the notice of appeal shall be sent to the assessor as above indicated.

(c) Upon receipt of the notice of appeal, the assessor shall make a record of the same in such form as the city council may direct, which record shall contain all the information shown on the assessment roll in respect of the subject matter of the appeal, and the assessor shall place the same before the board of equalization from time to time as may be required by the board. The board shall cause a notice of the sitting at which the appeal is to be heard to be mailed by the assessor to the person by whom the notice of appeal was given, and to every other person in respect of whom the appeal is taken, to their respective addresses last known to the assessor.

(d) The city may appeal an assessment to the board of equalization in the same manner as a taxpayer. Within five days after receipt of the appeal, the assessor shall notify the person whose property assessment is being appealed by the city. (Ord. No. 218, § 6; Ord. No. 7539, § 5.)

Sec. 25-7.1. Hearing.

(a) If an appellant fails to appear, the board of equalization may proceed with the hearing in his absence.

(b) The appellant bears the burden of proof.

(c) The only grounds for adjustment is proof of unequal, excessive or improper valuation based on facts which are stated in a valid written appeal timely filed or proved at the hearing.

(d) The board shall certify its actions to the assessor within seven days.

(e) The assessor shall enter the changes and certify the final assessment roll by June 1.

(f) An appellant may appeal to the superior court for, and is entitled to, trial de novo of the board's action. Either party to the appeal may demand a jury trial. (Ord. No. 7539, § 6.)

Sec. 25-8. Completion of assessment roll; records of board of equalization; certification of assessment roll.[9]

(a) The assessor shall enter the changes, so certified upon his records, and no assessed valuations shall thereafter be changed. After the hearings held by the board of equalization are concluded, the assessor shall complete the annual assessment roll, at a time to be determined by the city council, which shall be based on values as of January 1 immediately preceding, and he shall certify the same. Such supplementary assessment rolls shall be prepared and certified as may be expedient or necessary.

(b) The city clerk shall be ex officio clerk of the board of equalization and shall record in the minutes of the meeting all proceedings before the board and the names of all persons protesting assessments. All changes, revisions, corrections and orders relating to claims or adjustments and all final decisions shall be recorded in a record to be kept by the city clerk and to be known as the appeal record. Within three days following the final hearings of the board, the city clerk shall transmit to the assessor all corrections, revisions or changes authorized and approved by the board and shall certify that the changes so reported are as approved by the board of equalization.

(c) All taxes to be levied or collected, except as otherwise provided, shall be calculated, levied and collected upon the assessed values entered in the assessment roll and certified by the assessor as correct, subject to the taxpayer's right of appeal and to the corrections and amendments made in the rolls pursuant to this article. (Ord. No. 218, § 7.)

Sec. 25-9. Appeals to superior court.[1]

Any person feeling aggrieved by any order of the board of equalization shall have the right of appeal on a de novo basis to the superior court; provided, that the person has first taken his appeal to the board of equalization. (Ord. No 218, § 8.)

Sec. 25-10. Supplementary assessment rolls.[2]

All the duties imposed upon the assessor and the city clerk with respect to the annual assessment roll and all the provisions of this article relating to assessment rolls shall, as far as applicable, apply to supplementary assessment rolls. The delinquent date when taxes shall become delinquent, as determined by the city council, shall also apply to property listed on the supplementary assessment rolls. (Ord. No. 218, § 9.)

---

9. For similar state law, see A.S., §§ 29.10.432, 29.10.435, 29.10.429, 29.10.438.
1. For similar state law, see A.S., § 29.10.426.
2. For similar state law, see A.S., § 29.10.441.

Sec. 25-11. Delivery of assessment roll to city council; validity of assessment rolls.[3]

(a) When the final assessment records have been completed by the assessor as provided in this division, the assessor shall deliver to the city council a statement of the total assessed valuation of all real property within the city.

(b) Every assessment roll as completed and certified by the assessor, and as corrected and amended by him from time to time in conformity with this article and the decisions of the board of equalization, shall, except insofar as the same may be further amended as a result of an appeal to the court, as provided by this article, be valid and binding on all persons, notwithstanding any defect, error, omission or invalidity existing in the assessment roll or any part thereof, and notwithstanding any proceedings pertaining thereto. (Ord. No. 6803, § 4.)

Division 3. Levy and Collection.[4]

Sec. 25-12. Determination of tax rate and delinquent date; tax statements; penalties for delinquent payment.[5]

The city council shall thereupon, by resolution, fix the rate of tax levy and designate the number of mills upon each dollar of assessed real and personal property that shall be levied, and shall levy such tax in accordance therewith and shall determine the date when taxes shall become delinquent. If the total tax assessed to any owner is less than one dollar, then the administration may delete such tax obligation from the tax roll.

The assessor shall then prepare and mail tax statements to the persons listed as the owners on the tax rolls. If the total tax assessed against the taxpayer is in excess of ten dollars, the taxpayer shall be given the right to pay such taxes in two installments. If the first half tax is not paid when due, the entire tax becomes delinquent and penalty and interest accrue as provided in this article. If the first half is paid when due, the second half of such taxes shall be payable on the date fixed by the city council for such second half, and if not paid shall be delinquent after such date.

A penalty not to exceed eight per cent shall be added to all taxes delinquent until the due date fixed for the payment of the second half, and interest at the rate of eight per cent a year shall be charged on the whole of the unpaid taxes, not including the

---

3. For similar state law, see A.S., §§ 29.10.444, 29.10.-447.
4. For state law authorizing city to enforce tax liens by foreclosure and sale, see A.S., § 29.10.456.
5. For similar state law, see A.S., §§ 29.10.447, 29.10.-450, 29.10.453.

penalty, from the due date until paid in full. After the due date for the payment of the second half, a total penalty of ten per cent shall be added to all delinquent taxes, and interest at the rate of eight per cent per annum shall accrue as provided in this section upon all unpaid taxes, not including the penalty, from the due date until paid in full. (Ord. No. 218, § 11; Ord. No. 6521, § 1.)

Sec. 25-12.1. Deadlines for rate of levy determinations and tax statement mailing.

The city council shall annually determine the rate of levy before June 15. By July 1, the city shall mail tax statements setting out the levy, dates when taxes are payable and delinquent, and penalties and interest. (Ord. No. 7539, § 7.)

Sec. 25-13. Delinquent tax roll; foreclosure lists; payment of taxes prior to sale; giving of notices.

(a) The city clerk shall, within such time as the city council may direct, after such taxes have become delinquent and due, make up a roll in duplicate of all real property then subject to foreclosure. Such roll shall show therein the names of the persons appearing in the latest tax roll as the respective owners of the tax delinquent properties, a description of each such property as it appears on the latest tax roll, the years for which taxes are delinquent, the amount of delinquent taxes for each year and penalty and interest thereon, and thereon shall be endorsed under the hand of the city clerk and the corporate seal, a certificate to the effect that such roll is a true and correct roll of the delinquent taxes of the city for the years there shown. Such roll so made up shall be known as the foreclosure list of the city for the year in which the same is made up, the original of which shall be filed with the city clerk and remain open to inspection of the public. After the completion of the foreclosure list, the city clerk shall cause to be published in a newspaper of general circulation in the city, to be designated by the city council, or posted, a notice under the hand of the city clerk setting forth that the foreclosure list of real property for the year, naming it, has been completed and is open for public inspection at the office of the city clerk and that on a certain day not less than thirty days after publication or posting of such notice, the foreclosure list will be presented to the superior court for judgment and order of sale.

(b) On the day designated in the publication, a certified copy of the foreclosure list, together with a petition for judgment, shall be presented to the superior court. Notice of such foreclosure proceeding shall be given by four weekly publications of the foreclosure list in a newspaper to be designated by the city council. The first such publication shall commence on the day of the filing of the list and petition, and it shall not be necessary to mail a copy of any notice to the owner or to any other person interested in the property. If no newspaper is published, the city council may, in lieu of publication in a newspaper, cause the thirty days notice that the foreclosure list will be presented to the superior court for judgment and order of sale, and also the foreclosure

list filed with the court, to be posted at the front door of the post office and in three other conspicuous public places in the city. The posting of the foreclosure list shall be sufficient service on each person interested in any of the properties; provided, that when the foreclosure list is not published in a newspaper but notice thereof is given by posting, the city clerk shall, within ten days after such posting, mail to each person to whom a tract is assessed, at his last known address, a notice describing the tract and the amount due as stated on the foreclosure list. All persons owning or claiming to own, or having or claiming to have, any interest in any property included in the foreclosure list are charged with notice of such proceeding and of all steps thereunder.

(c) During the time of the publication or posting of the foreclosure list and up to the time of sale, any person may make payment on any piece or tract set forth therein, together with the penalty and interest, and proportionate share of the costs of publication and foreclosure; and the city clerk shall make proper notation of such payment on both the original delinquent tax roll and foreclosure list. On receipt of the delinquent tax payments as to a particular property any time one week prior to the filing of the foreclosure list and petition, the city clerk shall remove the property from both the list and the petition.

(d) A mortgagee or other holder of a recorded lien on real property may file with the city clerk a written request that notice of any foreclosure list including such real property be given to such mortgagee or other lien holder. The request shall contain the name and address of the person filing it, the description of the property and the name of the owner or reputed owner thereof, and the date of expiration of the mortgage or lien. Notice need not be given after the expiration of the mortgage or lien, unless a further request therefor is filed. If the mortgagee or lien holder furnishes a duplicate form of request for the notice, the city clerk shall certify thereon to the filing and return the duplicate to the person making the request. Whenever any property described in the request for notice is included in a foreclosure list, the city clerk shall send by registered mail, written notice thereof to the mortgagee or other lien holder. At the time of mailing the notice, the city clerk shall note that fact in ink in the latest tax roll. The notation in the tax roll is prima facie evidence that the notice was mailed. Where the same mortgagee or lien holder has filed requests for notices on two or more properties included in a foreclosure list, one notice may be issued covering all such properties. (Ord. No. 218, § 12.)

Sec. 25-14. Foreclosure and sale of real property for delinquent taxes: redemption.

(a) One general proceeding shall be brought on the part of the city to foreclose the tax liens against each of the properties included in the foreclosure list. Foreclosure proceedings shall be in accordance with state law. A certified copy of the judgment of the district court shall constitute a certificate of sale to the city of the several properties described in the judgment and decree.

(b) All real property sold to the city pursuant to law shall be held by the city for the period of one year from and after date of the judgment and decree of

foreclosure, unless sooner redeemed. During the one year period, any person having an interest in the property at the date of the judgment and decree of foreclosure, or any heir or devisee of such person, or any person holding a lien of record on the property, or any independent school district or public utility district having a lien on the property, may redeem the property by payment of the full amount applicable to the property under the judgment and decree, with interest thereon as provided by law, and the costs charged against such property. Property so redeemed shall be subject to assessment for taxation during the period of redemption, as though it had continued in private ownership. Any person holding a mortgage or other lien of record covering a part only of a particular parcel of real property included in the judgment and decree of foreclosure may redeem such part by payment of the proportionate amount applicable thereto under the judgment and decree.

(c) Not earlier than thirty days before the expiration of the redemption period the clerk shall publish a redemption period expiration notice. The notice shall contain the date of judgment, the date of expiration of the period of redemption and a warning to the effect that all properties ordered sold under the judgment, unless redeemed, shall be deeded to the city immediately on expiration of the period of redemption and that every right or interest of any person in the properties will be forfeited forever to the city. The notice shall be published once a week for four consecutive weeks in a newspaper of general circulation distributed within the city. If there is no newspaper of general circulation distributed within the city, the notice shall be posted in three public places for at least four consecutive weeks. The clerk shall send a copy of the published notice by certified mail to each record owner of property against whom a judgment of foreclosure has been taken. The notice shall be mailed within five days of the first publication. The mailing shall be sufficient if mailed to the property owner at the last address of record. The right of redemption shall expire thirty days after the date of the first publication notice.

(d) Upon filing proof of publication of notice of expiration of the redemption period as a part of the foreclosure proceedings, the properties not redeemed within the one-year period prescribed shall be deeded to the city by the clerk of the court. All rights of redemption, with respect to the real properties therein described, shall terminate on the execution of the deed to the city. No return or confirmation of the sale or deed to the city is required.

(e) When the city acquires real property under foreclosure procedures, the conveyance vests in the city title to the property, free from all liens and encumbrances except unpaid taxes and assessments duly levied for local improvements to the property, and liens of the United States and the state.

(f) No deed is invalid for irregularities, omissions or defects, unless the former owner has been misled to his injury. After two years from the date of the deed, its validity is conclusively presumed and any claim of the former owner is forever barred. (Ord. No. 218, § 13; Ord. No. 7539, §§ 8, 9.)

Sec. 25-15. Foreclosure on personal property.

(a) Owners of personal property assessed shall be personally liable for the amount of taxes assessed against their personal property and such tax, together with penalty and interest, may be collected after the same becomes due by a personal action brought in the name of the city against such owner in the courts of the state.

(b) In addition to the remedy given by the preceding subsection, which shall not be construed as exclusive, the lien of personal property taxes may be enforced by distraint and sale of the personal property of the person assessed. The city clerk shall first make demand of the person assessed for the amount of the tax, penalty and interest, and the sale shall be made at public auction after at least ten days' notice given by posting or publication. The city clerk shall issue a warrant directing the chief of police or any other officer of the city to forthwith seize, levy upon, distrain and sell such personal property of the person assessed as the tax may have been levied upon; and if the same is not sufficient to satisfy the tax, penalty and interest, and costs and expenses of such sale, such warrant may authorize the seizure, levy, distraint and sale of such other property of the person against whom the tax was assessed as may be sufficient to satisfy the tax, penalty, interest and cost of sale. The costs and expenses of such proceedings may be satisfied out of the proceeds of the property sold. The cost and expenses of such proceeding that may be satisfied from the proceeds of the property sold shall in no event exceed twenty per cent of the proceeds received from such sale.

(c) The lien of real property taxes on trailers and mobile homes which are about to be removed or have been removed from the city or which, subsequent to the accrual of the real property tax lien, become personal property within the meaning of this chapter, may be foreclosed by distraint and sales as set forth in subsection (b) of this section. (Ord. No. 218, § 14; Ord. No. 7008, § 1.)

Article II. Sales Tax.

Secs. 25-16 to 25-33. Repealed by Ordinance No. 7608, § 1.

Secs. 25-34 to 25-99. (Blank.)

Article III. Special Assessments.[1]

Sec. 25-100. Authorized improvements.

A special assessment district may be initiated either by council or by petition for any public improvements including but not limited to the following:

(1) Streets, alleys, curbs and gutters, driveways, curbcuts and sidewalks;

(2) Storm sewers or drains;

(3) Sanitary sewers.

(4) Parks or playgrounds;

(5) Off-street parking facilities;

(6) Changes in channels of streams or watercourses;

(7) Bridges, culverts, bulkheads, embankments or dikes for streams or watercourses;

(8) Water supply system including water mains, water connections and fire hydrants; or

(9) Fallout or disaster shelters;

(10) Windbreaks. (Ord. No. 6705, § 1.)

Sec. 25-100.1. General limitations.

Notwithstanding any other provision of this article, the city may:

(a) Refuse to proceed with the construction of any improvements or the creation of any district, if deemed not in the public interest, whether council or petition initiated; and

(b) Advance or delay the construction of any improvements or the creation of any district based on city priorities, available funding, need to coordinate with other projects or any other reason whatsoever. (Ord. No. 8003, § 1.)

---

1. For state law as to local improvements and assessments, see A.S., § 29.63.010 et seq.

Sec. 25-101. Property to be assessed.

The council may assess for an improvement any real property, or any interest in real property, and the property specially benefitted may include abutting, adjoining, adjacent, contiguous, noncontiguous or other property or interest in property benefitted directly or indirectly by the improvement. The property to be assessed may include any property which is otherwise, for any reason, exempt from taxation by law. A benefitted property may be included in whole or in part in more than one special assessment district. (Ord. No. 6705, § 1.)

Sec. 25-102. Property owner.

The person whose name is listed on the latest city tax roll as the owner of the property to be assessed is presumed to be the legal owner of the property. If the property owner is unknown, the property may be assessed in the name of the "unknown owner." No assessment is invalidated by a mistake, omission or error in the name of the owner if the property is correctly described. (Ord. No. 6705, § 1.)

Sec. 25-103. Amount to be assessed.

The council may assess one hundred percent of any or all costs of a public improvement against each parcel of property benefitted by the improvement. Unless a specific method of computation of the benefit to the property is expressly provided for ascertaining the amount to be assessed against the property benefitted by a particular improvement, the council shall assess each parcel of property in a special assessment district in proportion to the value of the benefit received from the improvement using any reasonable method of apportionment.

Unless the council determines otherwise, the following general standards are applicable for assessments for public improvements:

(a) The city shall pay one hundred percent of the cost of the following improvements:

(1) Reconstruction and maintenance of existing improvements;

(2) Sewer interceptor and collector improvements;

(3) Water transmission mains, supply and storage;

(4) Storm sewer collectors and regional drainage improvements;

(5) Collector roads; and

(6) Sidewalks.

(b) The city shall pay fifty percent and the property owners shall be assessed for fifty percent of the cost of the following improvements:

(1) Local sewer service improvements;

(2) Local water service improvements;

(3) Local road improvements; and

(4) Local drainage improvements.

(c) The property owners shall be assessed one hundred percent of the costs of the following improvements:

(1) All improvements to new subdivision; and

(2) All improvements to which the council cannot or does not desire to contribute city funds.

The city may deviate from these general guidelines at any time for any reason whatsoever. (Ord. No. 6705, § 1; Ord. No. 8003, § 2.)

Sec. 25-104. Costs of improvements.

The costs of an improvement shall be the actual costs of the improvement, including acquisition of interests in land for the improvement, design, engineering, administration, overhead, professional services, bond costs and interest incurred as a result of the improvement and all other costs resulting from the construction of the improvement. Unless otherwise provided in the resolution confirming the assessment roll, the actual bond interest costs shall be considered to be four percent per annum of the costs, less bond interest, of the improvement calculated from the date of completion of the construction of the improvement until the special assessment is scheduled to be paid in full. (Ord. No. 6705, § 1.)

Sec. 25-105. Council initiated improvement districts--Authorized.

Council planning to make a public improvement shall establish local special improvement districts and the cost of the improvement shall be assessed against the property in any such local special assessment district. Council may determine upon and use any method for spreading the assessment among the properties within the district, which bears a reasonable relationship to the benefit received by the properties, including but not limited to assessments measured by the front foot and by the number of square feet in the property benefitted. The cost per unit of assessment need not be the same for all parcels

within the district, but insofar as is reasonable, properties similarly situated shall bear the same cost per assessment unit. Council shall also have power to enlarge or decrease the area of an improvement district and to change and revise the boundaries thereof from time to time. (Ord. No. 6705, § 1.)

Sec. 25-106. Same--Procedures for creation.

The council planning to make a public improvement at the expense in whole or in part of the owners of the properties benefitted shall order prepared the preliminary plans for the work and estimates of the cost of the same, and then before proceeding with the work, publish a notice of such fact at least once a week for two consecutive weeks in a newspaper of general circulation within the city and shall further post such notice in three public places within the city.

The notice shall state the nature, extent and approximate cost of such improvement and give the boundaries of the local special assessment district to which the costs of the improvements will be assessed. The notice shall contain a date not less than thirty days from the beginning of such publication on or before which time the owners of the properties affected may file their objections in writing with the city clerk to the work.

The council shall cause a plat of the improvement district to be made showing thereon the boundaries of the proposed improvement district with the various lots, tracts and parcels of land that will be included therein and affected thereby; together with a list of such various lots, tracts and parcels of land; a statement of the general method of assessment to be used, and a statement of the estimated cost of the improvement that will be assessed against each such lot, tract or parcel. The plat, method of assessment and list of parcels with estimated costs shall be available for public inspection during normal working hours of each working day during the period of publication of notice of the proposed assessment.

Five days or more after the termination of the thirty day publication period above described, council may proceed with the proposed improvement unless objection be filed either severally or by petition by the owners of property affected. (Ord. No. 6705, § 1.)

Sec. 25-107. Same--Objections and hearings.

(a) In the event objection is filed by the owner or owners of property affected, the council shall proceed to hold a public hearing. Notice shall be given of such hearing by one publication in a newspaper of general circulation in the city and by posting in three places within the city. The notice shall set forth the time and place of the hearing and that the council will consider the establishment of the improvement districts. Such notice shall be given at least one week prior to the time set for hearing.

(b) At the hearing, all of those appearing for or against the establishment of the improvement district may be heard, including any officer or employee of the city. After the hearing, the council may, if it determines that the improvement district is in the public interest and necessary, order the work to proceed, or may modify the plans of the improvement district or may order further proceedings suspended or terminated. However, if protests in writing as to the necessity of of the local improvement are made by owners of property who will bear fifty per

cent or more of the estimated cost of the improvement, council shall not proceed with the improvement until the protests have been reduced to less than fifty per cent, except upon the approval of at least five members of the council.

(c) After the public hearing is closed, council shall adopt a resolution determining either to proceed or not to proceed with the proposed improvement. The resolution to proceed shall find that the improvement is necessary and will benefit the properties within the district. The findings of the council are conclusive. The resolution shall require an account to be kept of all costs of the improvements and direct the proper city official to prepare the assessment roll. The council, in the resolution, shall assess the authorized percentage or rate of the cost of the improvement against the property within the district. (Ord. No. 6705, § 1.)

Sec. 25-108. Petition initiated improvement districts--Authorized.

In addition to improvement districts initiated by council, improvement districts and assessments may be initiated by petition in a form prescribed by the city administrator which shall include a description of the improvement sought by the petition. The original or copies of the petition shall be signed by the owners of property which will bear at least fifty per cent of the estimated cost of the improvement sought by the petition. The petition, when signed, shall be filed with the city clerk. No property owner may withdraw his signature of approval after the petition has been filed with the city clerk unless authorized so to do by council.

Upon receipt by the city administrator of the petition from the city clerk, the city administrator shall cause a survey and report to council to be made concerning the needs for and the estimated cost of the district. The report shall contain a plan defining the district, outlining the properties to be assessed and showing the desirable extent of the proposed improvement. The district may be defined by any convenient means, whether by a designation of the property to be assessed or by a boundary description. The survey and report of the city administrator may be made either before or at the time of a public hearing on the necessity for the proposed improvement. (Ord. No. 6705, § 1.)

Sec. 25-109. Same--Public hearings and notice thereof.

Before council shall take action on a proposed petition initiated improvement district, a public hearing shall be held at a time and place set by council or the city administrator, which public hearing may be continued from time to time as council may decide. After hearing the interested persons favoring or opposing the proposed improvement, council may decrease the extent or value of the improvement or may delete from the district properties not benefitted in whole or in part by the improvement. No change may be made resulting in an improvement district containing petitioners owning properties bearing less than fifty per cent of the estimated costs, unless other sufficient property owners are added to the petition.

Notice of the public hearing shall be published in a newspaper of general circulation in the city at least once a week for two consecutive weeks prior to the time fixed for the hearing. The city clerk shall send a written notice by first class mail at least fifteen days prior to the time of hearing to each owner of property to be assessed. The notice to be published shall include a summary of the improvement, the designation of the properties to be assessed in the special improvement district, the purpose of the public hearing and the time and place fixed for the public hearing. The notice by mail shall include a summary of the improvement, the designation of the addressee's property to be assessed, the purpose of the public hearing, the amount of the estimated or actual assessment against the property and the time and place for the public hearing. Each notice shall generally inform the property owner of the manner and method of protesting or objecting to the action to be taken at the public hearing.

After the public hearing is closed, council shall proceed to adopt a resolution determining to proceed or not to proceed with the proposed improvement. The council resolution to proceed shall find that the improvement is necessary and of benefit to the properties to be assessed and that the petition for the improvement has been signed by sufficient and proper petitioners. The findings of the council are conclusive. The resolution shall require an account to be kept of all the costs of the improvement and direct the proper city officials to prepare the assessment roll. The council, in its resolution, shall assess the authorized percentage or rate of the cost of the improvement against the properties within the district. Thereafter, the improvement shall proceed and the cost thereof be assessed in the same manner as assessments are levied for special improvement districts initiated by council action. (Ord. No. 6705, § 1.)

Sec. 25-110. Same--Maximum assessment.

No parcel of property within a special improvement district initiated by petition shall be assessed in an amount greater than its proportionate share of two-thirds of the cost of the improvement unless the petition shall be signed by the owners of the properties which will bear at least seventy-five per cent of the cost of the improvement and unless such petition requests an assessment in an amount greater than two-thirds of the cost of the improvement. (Ord. No. 6705, § 1.)

Sec. 25-111. Computation of assessments.

Except in cases otherwise specifically provided for, and unless otherwise provided in the resolution ordering such improvement, the improvement district shall include all of the property within the boundaries established by city council. All property included within such limits of the district shall be considered and held to be the property and to be all the property specially benefitted by such public improvement and shall be the property to be assessed to pay the cost and expense thereof or such part thereof as may be chargeable, which cost and expense shall be assessed upon all such properties to be benefitted in accordance with the special benefits conferred on such property in the proportion determined by the assessments method adopted by the city council for the particular public improvement.

Property may be included in more than one assessment district; provided, it is benefitted by the public improvements for which such districts are created. (Ord. No. 6705, § 1.)

Sec. 25-112. Levy of assessments; notice of hearing on objections.

(a) When it has been decided to make such public improvement and to levy such assessments, correct account shall be kept of all expense of such improvement and as soon as the latter shall be completed, the city council shall apportion such percentage of the cost as was previously determined upon and shall assess the same against the various tracts of real property in proportion to and consistent with the apportionment method set forth in the resolution authorizing the improvement.

(b) Such apportionment of costs shall be designated the assessment roll and shall contain a brief description or designation of each tract or parcel of property, the name of the owner or reputed owner thereof and the amount of the assessment. When the same is completed, the council shall fix a time at which to hear objections to such assessment. The city clerk shall then send a written notice by mail to each owner of a tract against which an assessment is made, which notice shall state the amount of the assessment against any particular tract, and the time fixed by the council for hearing objections. Such notice shall be mailed at least fifteen days before the date of the hearing. (Ord. No. 6705, § 1.)

Sec. 25-113. Hearing on objections; signing of assessment roll.

At the time of such hearing, all persons concerned shall have a right to present their objections to the assessment or any part thereof and to point out errors and inequalities and submit such reasons for amendments and corrections as they may have and such hearings may be continued from time to time as council shall decide. Council shall have power to vary the assessments made according to the formula set forth for the particular improvement in individual cases where, because of peculiar circumstances, the property assessed is not benefitted commensurate with the amount of the assessment. After the council has heard all objections and suggestions, it shall correct all errors, if any, which it finds to exist in the assessment roll as originally made, and when the same is finally settled, the mayor shall sign the assessment roll and provide for the terms of payment of the assessments contained therein. (Ord. No. 6705, § 1.)

Sec. 25-114. Notice to owner of assessment.

Within ten days after final passage of the ordinance levying the assessment, the city clerk shall mail, postage prepaid, a notice to the owner of each property assessed which notice shall designate the property, the amount of the assessment, the time of delinquency and the amount of penalty, if any. Within five days after the notices have been mailed, the clerk shall file his affidavit setting forth such mailing, which affidavit shall be conclusive as to the facts therein set forth. (Ord. No. 6705, § 1.)

Sec. 25-115. Assessments to be lien on property.

Such assessments shall be a lien upon the property assessed from the time the assessment is levied, which lien shall be paramount and superior to any other lien heretofore or hereafter created whether by mortgage or otherwise, except a lien for prior assessments and for general taxes, and shall be payable at such time and when delinquent, shall bear such interest and penalty as city council may prescribe and may be enforced in the same manner provided for the collection and enforcement of general taxes. (Ord. No. 6705, § 1.)

Sec. 25-116. Assessments to be binding.

The regularity or validity of assessments as provided herein may not in any manner be contested or questioned by any proceeding whatsoever by any person not filing objections to such assessment roll prior to the confirmation thereof. (Ord. No. 6705, § 1.)

Sec. 25-117. Appeal.

The decision of council upon any objection may be reviewed by the state superior court in the manner prescribed by law. (Ord. No. 6705, § 1.)

Sec. 25-118. Reassessment--To be made where original assessment invalidated.

Whenever an assessment provided for in this article is set aside, annulled or declared void, or its enforcement refused by a court of the state or the United States, whether directly or by virtue of a decision of a court, the council may, by ordinance or resolution, make a new assessment or reassessment upon the lots, blocks, or parcels of land benefitted by the improvement, not to exceed, however, two-thirds of the cost of the improvement. The reassessment shall be based on the special and peculiar benefit of the improvement to the respective parcels of land assessed at the time it was originally made. (Ord. No. 6705, § 1.)

Sec. 25-119. Same--Valid notwithstanding irregularities.

The proceedings required by law to be taken before the making of an original assessment are not required to be taken in connection with a reassessment under this article. The reassessment shall be made and become a charge upon the property notwithstanding the omission, failure or neglect of an officer, body or person to comply with the provisions of law relating to improvement and assessment, and whether or not the proceedings of the council or a person connected with the work may have been irregular or defective and whether or not an irregularity was jurisdictional. (Ord. No. 6705, § 1.)

Sec. 25-120. Foreclosure of liens for unpaid assessments.

Liens for unpaid assessments shall be foreclosed and the property sold in the same manner as provided for foreclosure of property for taxes. (Ord. No. 6705, § 1.)

Article IV. Municipal Service Areas.

Sec. 25-121. Created.

There is hereby created two service areas within the city denominated Zone One and Zone Two. Zone One shall receive all municipal services. (Ord. No. 7011, § 1; Ord. No. 7810, § 1.)

Sec. 25-122. Boundaries designated.

These zones are described as follows:

(1) Zone One shall be that area included within the boundary described as follows:

Beginning at the northeast corner of Section 29, Township 8 South, Range 6 West, Copper River Meridian; thence West 39.78 chains to a point on the South boundary of Section 20, Township 8 South, Range 6 West, Copper River Meridian; thence North 80.0 chains more or less to a point on the North boundary of Section 20, Township 8 South, Range 6 West, Copper River Meridian; thence West 80 chains more or less to the intersection point of the North-South centerline and the North boundary of Section 19, Township 8 South, Range 6 West, Copper River Meridian; thence South along the North-South centerline of Sections 19, 30 and 31, Township 8 South, Range 6 West, Copper River Meridian to the point of intersection with the West boundary of U. S. Survey No. 639; thence on a bearing South 45° 57' West, along the West boundary of said U. S. Survey 639, a distance of 29.4 chains, more or less, to the Southwest Corner of U. S. Survey 639; thence on a bearing South 80° 55' East, along the South boundary of said U. S. Survey 639, a distance of 23.0 chains, more or less, to the Southeast Corner of U. S. Survey 639, also being a point of angulation on the westerly boundary of Black Gold No. 2 Subdivision as per plat, recorded in the Valdez Recording District, Valdez Reception No. 74-661, Plat 74-5, thence on a bearing South 0° 48' 56" East, along said westerly boundary a distance of 110.00 feet to the Southwest Corner of said Black Gold No. 2, thence on a bearing South 89° 11' 04" East along the South boundary of said Black Gold No. 2 Subdivision, a distance of 102.42 feet; thence in a southerly direction, a distance of 14.88 chains, more or less, along a line of intersection with the Northwest Corner of the Standard Oil Company of California parcel of land, Tract "A," common with the Northeast Corner of the Standard Oil Company of California parcel of land, Tract "B," and identified on the ground by a brass disc embedded in a concrete pillar, flush with the ground, and marked NW COR STD OIL; thence on a bearing North 79° 55' West, along the North boundary of the Standard Oil Company of California parcel of land, Tract "B," a distance of 7.378 chains, more or less, to the Northwest Corner of Tract "B." Tract "B" is defined by Deed dated November 14th, 1967, and recorded in the Valdez Recording District in Book 60, page 18, Reception No. 67-578; thence on a bearing South along the West boundary of Standard Oil Company of California Tract "B," a distance of 6.95 chains, more or less, to the Southwest Corner of Tract "B"; thence on a bearing

South 80° 55' East, along the South boundary of Tract "B," a distance of 7.36 chains, more or less, to the Southeast Corner of Tract "B," identified on the ground by a brass disc embedded in a concrete pillar, flush with the ground, and marked on the west side of the disc SE COR STD OIL TRACT B, and on the east side of the disc STD OIL CO, TRACT A; thence in a southerly direction a distance of 21.21 chains, more or less, to the point of intersection with the line of mean low, low water of Valdez Bay; thence easterly, along the line of mean low, low water of Valdez Bay to the point of intersection with the North-South centerline of Section 33, Township 8 South, Range 6 West, Copper River Meridian; thence North along the North-South centerline of Sections 33 and 28, Township 8 South, Range 6 West, Copper River Meridian, to the point of intersection with the East-West centerline of Section 28, Township 8 South, Range 6 West, Copper River Meridian; thence West along the East-West centerline of Section 28, Township 8 South, Range 6 West, Copper River Meridian to the point of intersection with the East Boundary of Section 29, Township 8 South, Range 6 West, Copper River Meridian; thence North along the East boundary of Section 29, Township 8 South, Range 6 West, Copper River Meridian to the Northeast corner of Section 29, Township 8 South, Range 6 West, Copper River Meridian, the point of beginning.

This area may also be described as all of that portion of the city located within its boundary, as that boundary existed subsequent to the deannexation of May 5, 1969, and prior to the annexation of March 8, 1970, and also located to the West of the North-South centerline of Sections 33, 28 and 21, Township , South, Range 6 West, Copper River Meridian.

(2) Zone Two shall be all of that portion of the city that is not located within Zone One. (Ord. No. 7011, § 2; Ord. No. 7609, § 1; Ord. No. 7810, § 2.)

Sec. 25-123. Differential tax levied.

There shall be a differential tax rate levied in each zone, and that rate shall be related to the estimated cost of services provided in that zone. (Ord. No. 7011, § 3.)

Article V. Tax on Pipeline Property.

Sec. 25-124. Levied on "taxable property."

There is hereby levied a tax on all pipeline and terminal property as defined in House Bill No. 1 as "taxable property." (Ord. No. 7316, § 1.)

Sec. 25-125. Levied on "construction equipment."

There is hereby levied a tax on all "equipment used in the construction of the pipeline" as described in item 4 of the Free Conference Committee report on Free Conference CS for Senate CS for CS for House Bill No. 1. (Ord. No. 7316, § 2.)

Township 8 South, Range 7 West, Copper River Meridian, to the point of intersection with the line of mean low, low water of Valdez Bay; thence in a generally easterly and southerly direction along the line of mean low, low water of Valdez Bay to the point of intersection with the thread of the main channel of the Lowe River; thence in an easterly direction along the thread of the main channel of the Lowe River to the point of intersection with the north-south centerline of Section 20, Township 9 South, Range 5 West, Copper River Meridian; thence north along the centerline of Sections 20, 17, 8 and 5, Township 9 South, Range 5 West, Copper River Meridian, to the point of intersection with the south boundary of Section 32, Township 8 South, Range 5 West, Copper River Meridian; thence east along the south boundary of Section 32, Township 8 South, Range 5 West, Copper River Meridian, to the southeast corner of Section 32, Township 8 South, Range 5 West, Copper River Meridian; thence north along the east boundary of Sections 32 and 29, Township 8 South, Range 5 West, Copper River Meridian to the northeast corner of Section 29, Township 8 South, Range 5 West, Copper River Meridian; thence west along the north boundary of Sections 29 and 30, Township 8 South, Range 5 West, Copper River Meridian, and Sections 25 and 26, Township 8 South, Range 6 West, Copper River Meridian, to the northeast corner of Section 27, Township 8 South, Range 6 West, Copper River Meridian; thence south along the east boundary of Section 27, Township 8 South, Range 6 West, Copper River Meridian to the point of intersection with the east-west centerline of Section 27, Township 8 South, Range 6 West, Copper River Meridian; thence west along the east-west centerline of Sections 27 and 28 to the point of intersection with the east boundary of Section 29, Township 8 South, Range 6 West, Copper River Meridian; thence north along the east boundary of Section 29, Township 8 South, Range 6 West, Copper River Meridian, to the northeast corner of Section 29, Township 8 South, Range 6 West, Copper River Meridian, to the point of beginning.

(3) Zone Three shall be all of that portion of the city that is not located within Zone One or Zone Two. (Ord. No. 7011, § 2; Ord. No. 7609, § 1.)

Sec. 25-123. Differential tax levied.

There shall be a differential tax rate levied in each zone, and that rate shall be related to the estimated cost of services provided in that zone. (Ord. No. 7011, § 3.)

Article V. Tax on Pipeline Property.

Sec. 25-124. Levied on "taxable property."

There is hereby levied a tax on all pipeline and terminal property as defined in House Bill No. 1 as "taxable property." (Ord. No. 7316, § 1.)

Sec. 25-125. Levied on "construction equipment."

There is hereby levied a tax on all "equipment used in the construction of the pipeline" as described in item 4 of the Free Conference Committee report on Free Conference CS for Senate CS for CS for House Bill No. 1. (Ord. No. 7316, § 2.)

Article VI. Hotel-Motel Room Tax.

Sec. 25-126. Definitions.

For the purposes of this article, the following words and phrases shall have the meanings respectively ascribed to them by this section:

Contractor. A person or organization who undertakes to construct, alter, repair, move or demolish a building, highway, road, railroad or any type of fixed structure, including excavation, site development and erection of scaffolding.

Guest. An individual, corporation, partnership or association paying or agreeing to pay monetary consideration for the use of a room or rooms in a hotel-motel.

Hotel-motel. A structure or portion of a structure which is occupied or intended and designed for occupancy by transients for dwelling, lodging or sleeping purposes and includes any construction camp, hotel, motel, inn or similar structure.

Operator. A person who furnishes, offers for rent or otherwise makes rooms available in a hotel-motel in the city for monetary consideration, whether acting directly or through an agent or employee.

Person. An individual and entities recognized by law.

Quarter. Computed by use of the calendar year beginning with January and shall consist of a three-month period.

Rents. The amount paid as monetary consideration for the use of a room or rooms in a hotel-motel or other place of public accommodation by a transient.

Transient. A person who occupies or has available for occupancy a suite, room or rooms in a hotel-motel for fewer than thirty consecutive days. An employee who occupies or has available for fewer than thirty days a suite, room or rooms rented or leased for more than thirty consecutive days by an employer for use on a rotating basis by employees is not a transient. (Ord. No. 8112, § 1; Ord. No. 8126, § 1.)

Sec. 25-127. Levied; responsibility for payment; collection.

(a) The city hereby levies a tax on transient hotel-motel room rentals within the city equal to six percent of the room rental, effective October 1, 1981. The tax shall be applicable to all transient room rentals unless the rental is specifically exempted from taxation, as follows:

(1) The rent paid for a hotel-motel room by a federal, state or municipal officer or employee who is on official business is exempt from taxation.

(2) The rent paid for a hotel-motel room by an officer or employee of a foreign government who is exempt by reason of express provision of federal law or international treaty is exempt from taxation.

(3) The rent paid for a hotel-motel room by a contractor or employees of a contractor who are occupying or using the room while engaged in the actual construction of a project in the city is exempt from taxation.

No exemption shall be granted except upon a claim therefor made at the time rent is collected. Applications for exemptions under this subsection shall be made under penalty of perjury upon a form prescribed by the city.

(b) Each transient guest is responsible for the room rental tax imposed by this article, and the tax shall be due and payable at the time the rent is paid. If the rent is paid in installments, a proportionate share of the tax shall be paid with each installment. The unpaid tax shall be due when the transient guest ceases to occupy or use space in the hotel-motel.

(c) Every operator renting rooms subject to taxation under this article shall collect the taxes imposed by this article from the transient guest at the time of collection of the room rental and shall transmit the same quarterly to the city. The tax imposed shall be shown on the billing to the guest as a separate and distinct item. (Ord. No. 8112, § 1; Ord. No. 8126, § 2.)

Sec. 25-128. Certificate of registration.

(a) Operators shall apply to the city for a certificate of registration not later than ten days from the effective date of the ordinance codified in this article, the date of commencement of business or the opening of additional places of business. Upon receipt of a properly executed application, the city may issue without charge a certificate of registration to the operator authorizing the operator to collect the tax at the business address stated on the certificate.

(b) The certificate must be displayed prominently at the registered place of business.

(c) The certificate of registration is nonassignable and nontransferable and must be surrendered to the city by the operator to whom it was issued upon the operator's cessation of business at the location stated in the certificate. If the business is continued at the same location but the form of business organization is changed, the operator shall surrender his old certificate to the city for cancellation. The new operator shall file a new application for the certificate of registration and, upon receipt of a properly executed application, a new certificate will be issued. If there is a change of address for the operator's place of business, a new certificate of registration is required showing the new location or address. (Ord. No. 8112, § 1.)

Sec. 25-129. Receipts--Segregation.

Title to the taxes collected pursuant to this article shall vest in the city upon collection. Such taxes shall be segregated by the operator from the funds of the operator or the hotel-motel and safeguarded until transmitted to the city as hereinafter provided. A separate account shall be maintained for all taxes collected. (Ord. No. 8112, § 1.)

Sec. 25-130. Same--Transmittal; due date; penalty.

(a) On or before thirty days after the end of each quarter, each operator shall prepare and submit to the city a return for the preceding quarter upon forms furnished by the city setting forth the amount received for:

(1) Rentals within the city;

(2) The amount received from nontaxable rents;

(3) The amount received from all taxable rentals; and

(4) The taxes collected.

In addition, the operator shall submit such other information and supporting papers as may be required by the city.

(b) The operator shall sign the return and transmit it together with the taxes collected to the city on or before the due date. A return shall be filed even if none of the reported rentals were taxable.

(c) Taxes collected by an operator as provided by this article shall be due thirty days after the end of each quarter. If taxes collected by an operator have not been received by the city on or before the due date, the operator shall incur a penalty equal to ten and one-half percent of the taxes which are due and shall be charged interest at the rate of ten and one-half percent per annum for each day the tax is delinquent.

(d) Where the city has reasonable grounds to believe that taxes due were not collected or taxes collected were not transmitted on or before the due date, or if the operator of a hotel-motel has failed to file a return as required by this article, the city shall prepare a notice of delinquency and shall deliver such notice to the operator. Payment of delinquent tax under a notice of delinquency shall include penalty and interest which shall be calculated as provided above. (Ord. No. 8112, § 1.)

Sec. 25-131. Returns to be confidential.

All returns filed with the city pursuant to the provisions of this article and all data obtained from such returns are confidential and may not be released for inspection by the public, except upon court order. (Ord. No. 8112, § 1.)

Sec. 25-132. Records--Maintenance and inspection.

Every operator of a hotel-motel engaged in business within the city shall keep and preserve suitable records of all rentals made and such other books or accounts as may be necessary to determine the amount of tax required to be collected. All books, invoices and other necessary records shall be maintained by the operator for a period of two years and shall be available for examination at reasonable times by the city for the purpose of ascertaining the correctness of a return or for the purpose of determining the amount of tax collected or levied. (Ord. No. 8112, § 1.)

Sec. 25-133. Same--Investigation by city.

The city may conduct investigations and hearings concerning any matters covered by this article, may examine relevant books, papers, records or memoranda of any operator and may require the attendance of the operator, his officers or employees. The city shall have the power to administer oaths to persons testifying, and may issue formal subpoenas to compel attendance or to require production of relevant books, papers, records of memoranda. All subpoenas issued under the terms of this article may be served on any person of legal age. The fees paid to witnesses for attendance at the hearings shall be the same as the fees paid to witnesses before the superior court, and such fees shall be paid when the witness is excused from further attendance. When a witness is subpoenaed at the insistence of any party to the proceeding, the cost of service of the subpoena and the fee of the witness shall be borne by the party at whose request the witness is summoned. A subpoena shall be served in the same manner as a subpoena issued by a superior court. The city or any party to an investigation or hearing before the city may cause the deposition of witnesses residing within or without the state to be taken in a manner prescribed by law for depositions in civil actions in the courts of this state and to that end may compel the attendance of witnesses andproduction of relevant books, papers, records or memoranda. (Ord. No. 8112, § 1.)

Sec. 25-134. Suits for collection.

Taxes due but not paid or taxes collected but not transmitted may be recovered in an action at law against the transient guest or the hotel-motel operator. Tax returns shall be prima facie proof of taxes collected but not transmitted. (Ord. No. 8112, § 1.)

Sec. 25-135. Prohibited acts.

(a) No person may fail or refuse to pay the tax imposed by this article when it is due and payable to an operator authorized to collect the tax.

(b) An operator may not advertise or state to the public or to any guest or renter directly or indirectly that the tax or any part of it will be assumed or absorbed by the operator, or that the tax will not be added to the rental, or that it will be refunded. An operator may not absorb or fail to add the tax or any part of it or refund any tax or fail to state the tax separately to the renter or guest. (Ord. No. 8112, § 1.)

Sec. 25-136. Civil penalties for violations.

An operator who rents accommodations in the city and who thereafter fails to file a tax return as required by this article shall incur civil penalty equal to ten percent of the taxes due to the city for each quarter for which a return was not filed as required by this article. An operator who, in the course of his business, rents accommodations upon which a tax is levied hereunder and who fails to collect such tax shall incur a civil penalty of double the tax which should have been collected. In addition, a violator of this article is subject to criminal penalties as set forth in section 1-7. (Ord. No. 8112, § 1.)

Sec. 25-137. Use of funds generated; creation of advisory board.

The funds generated by the hotel-motel tax, less costs of collection, shall be used only for promotion of tourism and tourist-related activities. Any person or organization which receives an appropriation of any of these funds from the city shall use the funds only for those purposes and under the limitations set forth by the city, and shall provide an accounting and records of the use of the funds in a form satisfactory to the city.

An advisory board is hereby created for the purpose of making recommendations to the council regarding the use of the proceeds of the hotel-motel room tax. This board shall consist of seven members who are appointed and serve at the pleasure of the council. At least three board members shall be connected with the hotel-motel business in the city, at least one board member shall be connected with the transportation industry in the city, and at least two board members shall be from the general business community of the city. (Ord. No. 8112, § 1.)

Re: Real Estate Values
for Properties Located
in the City of Valdez

City of Valdez
P.O. Box 307
Valdez, Alaska 99686

Attention: Mr. Mark Lewis

Dear Mr. Lewis,

In reference to our conversation of March 23, 1981 pertaining to assessed values for tax purposes in the city of Valdez, I feel that the valuations I arrived at are 100% of fair market value. However, it is not uncommon for appraisers to be as much as 15% to 20% apart in valuation and two appraisers could arrive at two different values on the same piece of property. Therefore, it would be reasonable to apply a percentage of increase or decrease to the values I arrived at for assessment purposes.

Real estate appraising is not a science, it is an estimation based on knowledge and analysis of the real estate market. The analyses utilized in arriving at an estimation is uniform throughout the appraisal field, but because of the many different variables involved in these processes different appraisers do arrive at different estimations of value.

I hope this satisfactorily answers your questions and if any others should arise please contact me.

Very truly yours,

Richard G. Randell

Re: Valdez Tax Assessments

Dear Mark:

Pursuant to our recent telephone conversation, I have obtained copies of the Valdez ordinances concerning the real estate tax assessment process in the City of Valdez, and have reviewed the State's statutes, as well. Unfortunately, under the factual situation as described by both yourself and my conversation with Mr. Randell, it appears that there is no clear answer to your question as to "precertified tax roll changes vs. certified tax roll changes." The reason this is unclear is because according to the Valdez City ordinances, section 25-8, the tax rolls are not certified until after the board of equalization has met and heard all appeals. Therefore, it is my opinion that "certified tax rolls" can only be changed by the Superior Court, since all the municipal remedies would have been exhausted by that time.

However, as I understand your factual circumstances, the question really should be "who has the authority to change or suggest changes to tax rolls before the original submission to the City Council?" It appears that in this case the tax rolls were changed even prior to the first submission to the City Council. If my understanding is correct, the tax rolls were changed after a meeting with yourself and the city assessor, Richard Randell, a meeting that was reflected in Mr. Randell's letter of March 31, 1981 to yourself. At this point, the city tax rolls had not even been originally submitted to the City Council.

The original submission of the tax rolls to the City Council is not called for by ordinance, however, is the initial notification to council members that the tax rolls have been completed. Certification is not necessary prior to this original sumission and as discussed above, is only necessary after the board of equalization meets.

Therefore, it appears that Mr. Randell, in his role as an expert appraiser as well as a city tax assessor, could receive input from any person he chooses, whether it be from the city administration or the citizenry in order to make determinations necessary as to the "full and true value" of the realty located in the city. Since Mr. Randell was present at the time the City Council received the tax rolls originally, it would appear that he assented to the change. Nothing in the city ordinances nor in the Alaska Statutes prohibit either yourself, other members of the administration, or even the citizenry, from making suggestions to Mr.

Randell. The tax roll was submitted originally to the City Council after consultation with the city assessor and after his professional review, and on the bottom line, that's what really counts.

Upon review of your actions, it is my opinion that you did not violate any statutes or ordinances applicable to the situation.

I believe there might be a problem if changes had occurred after the original submission to the City Council. I believe there is a problem if changes would have occurred unilaterally after the rolls were submitted to the board of equalization. Clearly there would be a problem if changes occurred after the review by the board of equalization and prior to the certification by Mr. Randell of the tax rolls. Just as clearly, there would be a problem if any changes were made after certification.

I hope this letter has answered your questions. I also hope this letter finds you in the best of health, and next time you are in Anchorage, give me a call.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Patrick J. McKay

Attachment A - assumptions & computations.

ATTACHMENT A

Assumptions:

1. Of the 75% disabled veterans in Alaska whose disability ratings are 50% or higher, we assume 1.5% to be over 65 years of age, and therefore, already exempt under Senior Citizen programs.

2. The percentage of disabled veterans who rent is similar to those who own their homes.

3. The average exemption for homeowners is $427 per year. The average rebate for renters is $295 per year.

4. The annual increase is 10%. This allows for inflation, increasing participation and increased property taxes.

Computations:

House of Representatives
Committee on Community & Regional Affairs

TO: House C & R A Committee

FROM: Staff

DATE: February 14, 1983

SUBJECT: CSHB 31

CSHB 31 adds a provision for disabled veterans who are renters to receive a rebate on the portion of rent that is estimated to be equal to the tax payment.

It makes property tax exemption and rental rebate applicable to disabled veterans with a minimum of 50 percent disability.

The committee substitute incorporates requests of committee members which require verification of disability and provides for exceptions to the deadline for applications.

To: Representatives Barbara Lacher, Chairperson
House Committee on Community and Regional Affairs

Through: Representative Walt Furnace

From: Steven C. Levi, Staff

Date: January 20, 1982

RE: HB 31

This bill, when enacted, will allow a property tax exemption for a disabled Alaska veterans in the percentage of his or her disability on his or her residential, permanent abode. Thus, an Alaskan veteran who is 75% disabled would have a 75% reduction in his or her property taxes. A disabled veterans may be required to show evidence of disability. Disability shall be defined as that percentage of physical damage which has been rated by the branch of the service in which the person served or by the Veterans Administration. Such veteran must have been honorably discharged.

Staff notes that Alaskans 65 years or older pay no property assessments and that only one exemption may be granted for any piece of property -- even if two or more eligible Alaskans reside at the same address.

Representative Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mrs. Lacher,

We do not have a precise breakdown of disabled veterans by state and percentage of disability.

We do, however, know the exact number of Alaska veterans receiving service connected disability payments, and that figure is 3,436.

Also, we do have a breakdown by percentage of disability on a national basis. That is as follows:

DISABILITY	PERCENT OF TOTAL
10%	39.5
20%	15.9
30%	14.1
40%	8.3
50%	5.1
60%	5.5
70%	3.4
80%	1.7
90%	0.1
100%	6.0

You can see from this chart that, for example, 39.5% of the veterans nationally are receiving 10% disability compensation. If you apply the same percentage (39.5) to the total number of Alaska veterans (3436) you will arrive at a good approximation of the number of veterans in Alaska receiving 10% compensation.

Representative Barbara Lacher

Attached you will find a copy of our current compensation rates. Historically, the rates have been adjusted on October 1st to reflect increases in cost-of-living.

Sincerely,

WILLIAM R. HARRELL
Staff Assistant/Veterans Services Officer

38 U.S.C. 314

January 24, 1983

TO: Representative Barbara Lacher

FROM: Staff

SUBJECT: HB 31 Summary

This proposed amendment provides tax exemption of real property (permanent place of abode) for disabled veterans. The amount of the exemption is the same percentage as the percentage of disability as established by the service disability rating of the veteran.

The taxes lost to a municipality as a result of this amendment shall be paid to the municipality by the State (29.53.020g). The manner for the veteran to receive the exemption and for the municipality be reimbursed is the same as exising law for persons 65 years of age or older.

TO: HB 31 files

FROM: Staff

According to Bill Harrell of the Veterans Administration in Anchorage there are 3436 veterans who are drawing disability compensation. Of these

39.5%	10% disability	1,357
15.9%	20%	
14.1	30%	
8.3%	40%	
5.1	50%	
5.5	60%	
3.4%	70%	
1.7	80%	
.1%	90%	(4)
6.0	100%	(206)

The above figures are close approximations and thus do not come out exactly at 100%

In addition to the above disability rating, there are special letter ratings from A-R. The loss of one eye for example is a K rating and entitles the veteran to an additional amount of money.

The % of disability rating is based on the "average man's income loss" For example, it is determined that the average man would lose a certain percentage of his earning power for a particular injury and so anyone, be they a concert pianist or a truck driver will receive the same amount of compensation for a particular disability. The rate scale is updated annually.

FISCAL NOTE

"...providing for exemption of the residence of disabled veterans..."

The following tables show estimated number of veterans by percent of disability and is based on average payments made to senior citizens under current statutes.

HOMEOWNERS

% Disabili[illegible]	Number	Total
10%	1070	$63,828
20%	430	$51,301
30%	382	$68,361
40%	225	$53,687
50%	150	$44,739
60%	149	$53,329
70%	92	$38,416
80%	46	$21,952
90%	2	$1,074
100%	162	$96,636
	2,708	$493,323

RENTERS

10	268	$8,920
20	108	$7,190
30	95	$9,486
40	56	$7,456
50	38	$6,324
60	37	$7,389
70	17	$5,658
80	11	$226
90	1	$300
100	41	$13,647
	672	$66,596

Grand Total $559,919

Assumptions

1. There are 3,436 eligible disabled veterans in the state.
2. Census statistics show the over 65 male population of the state to comprise 1.4% and this percentage also applies to disabled veterans. Therefore, that 1.4% of the disabled veterans are presently exempt by virtue of age.
3. The percentage of disabled veterans who rent is similar to senior citizens who rent.

M E M O R A N D U M

TO: House C & RA Committee Members

FROM: Staff

SUBJECT: HB 31

Message from Mr. Dave Barrett, Alaska Director of Veterans Administration, as relayed by Mr. Pete Everingham, Juneau VA representative.

The Veterans Administration can provide to state agencies the necessary data to implement HB 31 as presently written, that is, exemptions and payments based on a percentage of disability as rated by the Veterans Administration.

The Veterans Administration cannot provide the necessary information should tax exemptions and payments be based on income or need because they do not and cannot maintain this data.

TO: Representative Barbara Lacher

FROM: Staff

SUBJECT: CS HB 31

The proposed CSHB 31 retains the same provisions as HB 31 but provides for property tax equivalency payments for disabled veterans who are renters of an abode in the same manner as is presently provided for citizens 65 years of age or older who are renters. (AS 29.73.060)

The disabled veteran will be eligible for payment of that portion of his rent that approximates the property tax of his abode, but the amount of payment made will be the same percentage as the percentage of the veterans' disability rating.

Re: HB 31

Sponsor: Furnace

Program Effects of Bill

A property tax exemption for the homeowners of a given segment of the population may prompt companion legislation to provide for property tax rebates for renters within that same segment of taxpayers (see AS 29.73.060. Property tax equivalency payments). Additional legislation could extend into areas such as sewer and water assessment exemptions (see AS 29.63.065.) and motor vehicle tax exemptions [see AS 28.10.411(d)].

As a result of the adoption of those programs, additional administrative costs may be incurred by this department, and similar impacts could occur in numerous taxing municipalities across the State.

Comments

The Department does not oppose veterans benefits in concept. However, there are ramifications to be considered. Although this specific bill might not have a significant financial impact on the State, it could set a precedent which we believe could have such an impact.

The Department is also concerned with the deterioration of the property tax base through the passage of such bills. As more tax exemptions are passed, the net result is that fewer property owners are required to pay more in local tax dollars to maintain the existing level of municipal services.

Committee

FROM: Mike Szymanski
Representative

SUBJECT: HB 31 Exempting Disabled Veterans from Paying Real Property Tax

Before we move on this legislation I would recommend the following questions be either addressed by the sponsor or researched by committee staff:

1. If we restrict eligibility to "special disabled" (30% or more), what will the fiscal note be?

2. Can a needs survey be initiated which would support the funding of disabled veterans as proposed in the legislation.

3. Is is possible to tie the amount of tax exemption to the true income of the disabled veteran?

Finally, I would aslo request identification of where in the existing operating budget of the State the sponsor or supporter of this legislation would reduce funding to accommodate this new program so as not to increase the already bulging and inflated operating budget.

If you have any questions concerning this request, please feel free to contact me.

Quoted in Tunley v. Municipality of Anchorage School Dist., Sup. Ct. Op. No. 2160 (File Nos. 4796, 4797, 4826), 617 P.2d 490 (1980).

Sec. 29.73.060. Property tax equivalency payments. (a) A resident of the state 65 years of age or older who rents a permanent place of abode is eligible for tax equivalency payments from the state through the Department of Community and Regional Affairs.

(b) For purposes of determining payments to eligible persons, the department shall calculate a property tax equivalent percentage for each home rule or general law municipality which levies a general property tax at the rate of one percent per mil. The property tax equivalent percentage applied to the annual rent charged to the applicant equals the property tax equivalency payment payable under this section.

(c) To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year on forms and in the manner prescribed by the department. Each applicant shall submit with the application rental receipts or, if rental receipts are not available, other evidence satisfactory to the department for determination of the fact of payment of rent and the amount paid.

(d) If two or more persons occupy a residence as tenants, not all of whom are eligible for tax equivalency payments under this section, the assessor shall determine equitable partial payments to be made to the eligible tenants. However, tax equivalency payments to an eligible applicant may not be reduced because the spouse is less than 65 years of age. If all occupants in a residence are eligible for tax equivalency payments under this section, the occupants shall decide between and among themselves which shall receive payment. (1) the residence of a bishop, pastor, priest, rabbi, minister or religious order of a recognized religious organization;

(2) a structure, its furniture and its fixtures used solely for public worship, charitable purposes, religious administrative offices, religious education or a nonprofit hospital;

(3) lots supporting and adjacent to a structure or residence mentioned in (1) or (2) of this subsection which are necessary to convenient use;

(4) lots required by local ordinance for parking near a structure defined in (2) of this subsection.

(c) Property described in (a) or (b) of this section from which income is derived is exempt only if that income is solely from use of the property by nonprofit religious, charitable, hospital, or educational groups for classroom space.

(d) Laws exempting certain property from execution under the Code of Civil Procedure (AS 09) do not exempt the property from taxes levied and collected by municipalities.

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 — 44.62.570.

(f) No exemption may be granted except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15 of the assessment year for which the exemption is sought, but during the same year the governing body of the municipality for good cause shown may waive the claimant's failure to make timely application for the exemption for that year and authorize the assessor to accept the application as if timely filed. The claimant must file a separate application for each assessment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, he shall allow an exemption in accordance with the provisions of this section. If a claimant whose failure to file by January 15 of the assessment year has been waived as provided in this subsection and the application for exemption is approved, the amount of tax which the claimant may have already paid for the assessment year with respect to the property exempted shall be refunded to him. The assessor may at any time require proof in the form he considers necessary of the right and amount of an exemption claimed under this section.

(g) The state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of (e) of this section. However, reimbursement will be made to a borough or city for revenue lost to it only to the extent that the loss exceeds an exemption which was granted by the borough or city, or which upon proper application by an individual would have been granted by the borough or city, under AS 29.53.025(a).

(h) Except as provided in (g) of this section, nothing in (e)—(i) of this section affects similar exemptions from property taxes granted by municipalities on September 10, 1972 or prevents municipalities from granting similar exemptions by ordinance as provided in AS 29.53.025(a).

(i) In (e) — (i) of this section the term "real property" includes but is not limited to mobile homes, whether classified as real or personal property for municipal tax purposes.

(j) Two percent of the assessed value of a structure is exempt from taxation if the structure contains a fire protection system approved under AS 18.70.081, in operating condition, and incorporated as a fixture or part of the structure. The exemption granted by this subsection is limited to

(1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if the fire protection system is a fixture of the structure on January 1, 1981; or

(2) an amount equal to two percent of the value of the structure based on the assessment as of January 1 of the year immediately following the installation of the fire protection system if the fire protection system becomes a fixture of the structure after January 1, 1981. (§ 2 ch 118 SLA 1972; am §§ 1, 2 ch 60 SLA 1973; am § 1 ch 65 SLA 1975; am § 1 ch 191 SLA 1976; am § 1 ch 217 SLA 1976; am §§ 1, 2 ch 229 SLA 1976; am § 1 ch 97 SLA 1977; am §§ 2, 3 ch 45 SLA 1980; am § 2 ch 95 SLA 1980)

Effect of amendments. — The 1973 amendment deleted "whose gross annual income totals less than $10,000" preceding "is exempt" in the first sentence of subsection (e), deleted the language beginning "however" from the end of the present second sentence of that subsection, and deleted the language following "exemption claimed under this section" from the end of the fourth sentence of subsection (f).

The 1975 amendment, in subsection (f), divided the former second sentence into the present second and third sentences by substituting "The claimant" for "and" at the beginning of the present third sentence, added the language beginning "but during the same year" to the end of the second sentence, and added the present fifth sentence.

The first 1976 amendment, in subsection (b), substituted "a bishop, pastor" for "the pastor" in paragraph (1) and inserted "religious administrative offices" in paragraph (2).

The second 1976 amendment, in subsection (e), deleted "After January 1, 1973" from the beginning of the first sentence, added the language beginning "up to and including an assessed value limit" to the end of that sentence, and added the former second sentence.

The third 1976 amendment added the second sentence of subsection (g), added "Except as provided in (g) of this section," to the beginning of subsection (h), and deleted the former second sentence of subsection (h), which read "However, under (e) — (i) of this section only the amount of

Dear Mr. Notti,

Enclosed is a copy of a letter from Mr. Snell, acting Deputy Commissioner of Transportation, to Gary Thurlow, Borough Manager of Mat-Su. You will note that the Capital budget does not include Pittman Road. It was my understanding that this would be considered a top priority item in the Capital budget.

Sincerely,

Barbara Lacher

Gary Thurlow
Borough Manager
Matanuska-Susitna Borough
Box B
Palmer, AK 99645

Dear Mr. Thurlow:

RE: State Maintained Roads

This letter is in response to your inquiry regarding the Department's position on including in the Governor's budget improvements to State maintained collector roads in the Matanuska-Susitna Borough. Improvements to these collector roads were recommended by the Department's Central Region Planning and Programming Division in their Transportation Improvement Program (TIP), which was submitted to the Governor for use in preparing his budget. More specifically you have inquired about the following State maintained collector roads:

1. Pittman Road
2. Trunk Road
3. Big Lake Road
4. Church Road
5. Hatcher Pass Road
6. Hyer Road

Of the roads listed above, the Fishhook-Willow Road (Hatcher Pass Road) was included as a road which could be considered for preliminary engineering funding under the "Highways Preliminary Engineering" item of the Governor's budget. None of the other roads identified above were included in the Governor's FY'84 capital budget.

Unfortunately not all Statewide Transportation projects can be met due to the limited amount of funds available for yearly capital projects. The Department and the Governor realize the need to improve the State collector roads which serve the rapidly developing rural residential area of the Matanuska-Susitna Borough. Although none of the road you have mentioned above are included in the Governor's capital budget, the Governor is currently developing a supplemental budget for submission to the Legislature. As the supplemental budget is developed, careful consideration will be given to funding for the improvement of State roads in the Borough which serve a collector function.

Thank you for bringing your concerns to my attention. I am hopeful that funding will be made available this session to meet some of the recognized transportation needs which were identified in your letter. If you have any questions please call.

Sincerely,

William R. Snell

re: HB 41 - State Aid to Municipalities for Roads

The Alaska Municipal League supports the adoption of HB 41, increasing state aid to municipalities for roads from $2,500 a mile to $3,500 a mile if the revenue sharing appropriation is increased to cover the increased entitlement. If the total appropriation is not increased, then municipalities will receive decreased funding in the other revenue sharing categories to make up for the road increases.

It has been three years since the allocation per mile has been increased. Needless to say, the cost of road maintenance has gone up considerably since then. At that time, it was estimated that the actual costs of maintaining a mile of road were between $4,000 and $8,000.

Programs Effects

This Bill would increase the per mile amount distributed for road maintenance under the Municipal Revenue Sharing program. It would raise it from $2500 per mile to $3500 per mile.

Comments

The Department supports the intent of this bill to increase aid to communities. The Department would suggest an increase to the appropriation to the Municipal Revenue Sharing Fund if this bill were passed. For the current year Chapter 89 Revenue Sharing funds are prorated at 81% of the total each community is eligible for; if this bill were in place that proration factor would be approximately 75%. That would mean that Municipal Revenue sharing for other areas (Health Care, Volunteer Fire Departments, and Unincorporated Communities.) would be reduced to pay for increased assistance for roads if the appropriation were not increased.

Additionally, increasing the amount per mile of road could weight the formula disproportionately in favor of Municipalities located on the road system.

The bill should also be reviewed in light of other proposed changes in the Municipal Revenue Sharing program and projected funding over the next few years.

Pouch V
State Capitol
Juneau, Alaska 99811

TO: House C & RA Committee Members

FROM: Staff

SUBJECT: House Bill 41

AS 29.89.020 provides $2,500 per road mile to municipalities that maintain roads excluding the official state highway system (state maintained) and roads maintained under the local service roads and trails program.

The amount of $2,500 per road mile of maintainance was established by the Legislature in 1980. There has been no increase in the amount authorized in recognition of inflation in the cost of maintaining roads.

According to figures provided by the Department of Transportation and Public Facilities, they requested an average of $9,300 per mile for maintenance of state roads in FY 83.

MEMORANDUM

TO: Representative Barbara Lacher
Attention: Bob Harris

FROM: Christine Johnson and Jonathan Sherwood
Research Staff

RE: Road Maintenance Costs
Research Requests 83-33

Bob Harris of your staff has requested the following information for hearings scheduled on HB 41. This bill would increase the amount municipalities receive from the State for road maintenance from $2,500 to $3,500 per road mile.

(1) How would HB 41 affect the amount of money received for road maintenance in each election district?

(2) How much did the State Department of Transportation and Public Facilities receive for road maintenance in FY 83?

(3) What is the average cost of maintenance per road mile on roads maintained by the State?

Increase in Revenues by Election District

Table 1 on the following page shows the amount of money which would be received in each House district in FY 84 at $2,500 per mile and at $3,500 per mile. As the table indicates, municipalities would receive approximately $11.1 million for road maintenance in FY 84 under HB 41. This compares to $7.9 million which they could receive under the current program in FY 84, given full funding. The amounts shown on the table include a cost-of-living adjustment computed by the Department of Administration. State law (AS 29.89.070) currently requires that payments to municipalities under this program reflect area cost-of-living differentials.

Please note that where a municipality encompasses more than one House district we have combined those districts.

State Expenditures for Road Maintenance

According to Paul Harris, with the Department of Transportation and Public Facilities Maintenance and Operation Division in Anchorage,

the approximate cost of State road maintenance can be obtained by adding the FY 83 appropriation for each region in the Maintenance and Operation Budget Request Unit of DOT/PF's budget (see FY 84 Executive Budget, page 481). The total for all regions, including the Dalton Highway is about $56 million. According to Mr. Harris, the State is responsible for maintaining approximately 6,000 road miles. Based on this estimate, the average cost per road mile of maintaining State roads is $9,300.

If you would like any additional information on this topic, please don't hesitate to contact us.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

This bill would increase the amount Municipalities receive from State Aid (AS 29.89) for road maintainence.

The above projections are based on the currently approved 2883.35 road miles and incorporates the COLA for all the areas. They reflect the difference between the current $2500 per mile and the proposed $3500 per mile.

SUBJECT: State aid to municipalities for roads (Work Order No. 13-0314)

TO: Representative-elect Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

Here is a draft of the bill you requested that would increase the amount of state aid to municipalities for roads. As you may be aware, an effort was made during the Twelfth Legislative Session to revise all of the municipal code. A similar revision bill may be introduced again this coming session. I have attempted to draft this legislation so that the increase in state aid will be effective even if a bill revising the municipal code is enacted. Section 1 of this draft amends existing law. Section 2 amends the relevant provision as it may exist under a revision bill, but that section is effective only upon the enactment of the municipal code revision. Additional changes to this legislation may be necessary to reconcile it with a municipal code revision bill if one is introduced.

Please let me know if you would like changes made to this draft or if you would like it to be prefiled.

TBC:lmb

Enclosure

(2) to a Native village government under AS 29.89.050. (§ 3 ch 155 SLA 1980)

Sec. 29.89.020. State aid to municipalities for roads. (a) The department shall pay to a municipality which has power to provide for road maintenance and exercises that power, $2,500 a mile for each mile of road, street or highway maintained by the local government, excluding (1) the official state highway system, (2) roads, streets or highways not dedicated to public use, (3) roads, streets or highways maintained under the local service road program (AS 19.30.111 — 19.30.251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. A payment may not be made under this subsection for maintenance of a road which is not used by automotive equipment.

(b) A frozen waterway and a connection from an inhabited area to a waterway which may be safely used for public transportation by automotive equipment and is so used during a portion of a year is eligible for a payment of $1,500 per mile if the waterway and connection are maintained during the period of use by a municipality or combination of municipalities. The department, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipalities shall receive the payments under this subsection, unless the municipalities involved have agreed in writing to a particular distribution. (§ 3 ch 155 SLA 1980)

Sec. 29.89.030. State aid to municipalities and other eligible recipients for health facilities and hospitals. (a) The department shall pay

(1) to a municipality which has the power to provide hospital facilities and services and which exercises that power, $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $250,000 a hospital for those hospitals with 10 or more beds, or $50,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; money received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(2) on the basis set out in (1) of this subsection to a municipality for a nonprofit hospital not operated by a municipality if the municipality first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals which have been adopted by the municipality; money may not be paid on behalf of a nonprofit hospital without this certification; payments to the municipality shall be transferred to the nonprofit hospital in accordance with the basis by which the payment was generated by the hospital, and shall be applied to the

The Borough's experience has been that $2,500 per road mile will cover the cost of about six snowplowing, plus a late Spring grading and a late Fall grading. Very little is left for other road maintenance such as ditching and culverts. A series of heavy Winter snowfalls puts all Summer maintenance in jaopardy. State maintenance costs average well over $4,000 per road mile, even though many state roads are paved or are otherwise built to a high standard with respect to surface, width and drainage.

BILL ANALYSIS

RE: HB 119

SPONSOR: Representative Shultz

Program Effects Of The Bill

This bill would provide $203,787 to the Community of Tok for their volunteer fire department to purchase rescue/ambulance apparatus.

Comments

Governor Sheffield has set up a process for review and prioritization of Capital Grants on a statewide basis. This Grant has been included in that review process. With this process in place, the Department believes that an alternative to individual capital appropriation bills exists and should be considered by the Legislature.

Juneau, Alaska 99811

Dear Representative Shultz:

The City Council of Delta Junction reviewed pending legislation at their March 1, 1983 meeting. They voted unanimously to endorse and provide their support on the following bills:

HB42	An Act relating to the determination of population for purposes of calculating amounts of state aid; and providing for an effective date.
HB100	An Act relating to an avalanche and fire weather forecasting system; and providing for an effective date.
HB119	An Act making a special appropriation for payment as a grant to the community of TOK for a rescue ambulance apparatus; and providing for an effective date.
HB136	An Act making an appropriation to the Department of Revenue for financial assistance to municipalities; and providing for an effective date.
HB153	An Act making a supplemental appropriation to the Department of Revenue for financial assistance to municipalities; and providing for an effective date.
HB162	An Act authorizing general law municipalities to limit the number of consecutive full terms certain municipal officials may serve.
HB172	An Act relating to municipal government; and providing for an effective date. (Title 29 rewrite).

House Bill 164 was also reviewed by the Council and they voted four to two against endorsing and supporting this legislation.

Sincerely,

Lou Heinbockel

Louis E. Heinbockel, Mayor
City of Delta Junction

they are reluctant to face the Community "hassel" on deciding what to do with the money.

HB 119

February 8, 1983

Jeanne Ostness
Executive Director
IREMSC, Inc.
PO Box 2120
Fairbanks AK 99701

Dear Jeanne:

We want it to be known that the Tok EMTs are not in opposition to the activities of the Tok Fire Department. Furthermore, we are not opposed to the passage of House Bill No. 119 entitled: "An Act making a special appropriation to the community of Tok for a rescue/ambulance apparatus; and providing for an effective date" providing that passage of the bill:

1. Does not jeopardize future EMS expenditures in the Tok area.

2. Does not jeopardize the purchase of the ambulance that the Tok Clinic Board is currently applying for.

From the amount of information that we have recieved concerning this proposed vehicle, we feel that it might be a piece of equipment that any EMT group would be happy to use. But, we were not involved in drawing up this proposal and are not very well informed about the specifics of the vehicle itself. Due to our lack of knowlege, we cannot make any informed comments concerning it either in support or opposition.

Thank you.

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

House Bill No. 119

"An Act making a special appropriation for payment as a grant to the community of Tok for a rescue/ambulance apparatus; and providing for an effective date."

This bill would appropriate the sum of $203,787 to the community of Tok for the Tok volunteer fire department to purchase a rescue ambulance apparatus.

The Emergency Medical Services Section of the Division of Public Health, Department of Health and Social Services cannot endorse this bill at the present time for the following reasons:

1) The Tok Ambulance Service currently operates independently from the fire department. Therefore, we are concerned that this appropriation may create a duplication of services.

2) We only endorse EMS expenditures which are approved by local EMS or health councils, endorsed by a physician, and approved by a Regional EMS Council.

3) Interior Region EMS Council, Inc. has initiated a fund, with donations from other communities, to purchase a new ambulance for Tok. This fund currently has abut $42,000 which is approximately $10,000 to $15,000 short of the amount needed for a new four wheel drive ambulance.

4) The amount of money to be appropriated by this bill seems excessive unless it will purchase some type of fire apparatus.

Tony Conrad, Chief
Tok Volunteer Fire Department
P. O. Box 204
Tok, Alaska 99780

Dear Mr. Conrad:

I am in receipt of your letter and attachments concerning your need for a rescue unit to be stationed in the Tok area. You have provided considerable information as to the proposed construction and use of the desired unit and your letter establishes the need for such a vehicle in the Tok area.

I have been in contact with Sgt. Dowd and other Troopers assigned to the Tok area and they concur with your finding of need due to the extensive areas you cover and the current lack of a quick response-type rescue unit to handle both rescue and fire on a limited basis. I understand that oftentimes victim transportation is provided by private vehicle to medical facilities in Fairbanks due to the availability of only one ambulance in Tok. The services you have provided to the public, as well as the Department of Public Safety in the past, are greatly appreciated and have been valuable to us in the overall objective of saving lives.

It is my understanding that you are applying for either grant funds or legislative funds to purchase the proposed rescue unit, and I would offer the support of this Detachment by way of this letter to verify the need.

In the past, the Tok Volunteer Fire Department has coordinated its efforts with the Alaska State Troopers providing freely of its resources and volunteer manpower. I am looking forward to a continuation of this working relationship and I hope that this letter provides some assistance in establishing the need for implementing your proposal.

If I can be of any further assistance to you, please feel free to contact me.

Sincerely,

Captain Donald Lawrence

08 February 1983

To Whom It May Concern,

After viewing the proposal offered by Mr. Tony Conrad, it is my opinion as a resident of the Tok community, that a vehicle of this type would be an asset to this geographic area.

To the best of my knowledge, to date, Tok has been ineffectual in its efforts to provide an effective RESCUE/EMERGENCY vehicle for use in this enormous service area. Severe Artic type weather conditions, long distances to emergency scenes, and the potential for mass casualties have to be considered when planning for the acquisition of an emergency vehicle. Mr. Conrad's idea meets these and many more requirements peculiar to the Tok environment.

The operation or housing of this vehicle, as I view the problem, is secondary to the prime need---to get an adequate emergency vehicle into our area. If we let our personal feelings influence our judgement in this case, we may very well never have an opportunity to acquire a vehicle of this quality again.

Mr. Conrad should be congratulated for his initiative and concern for this community's well-being in his efforts to organize this fine proposal. An asset, which when operational, will help not one or two groups---but all people in this vast wilderness we call home.

February 9, 1983

TO WHOM IT MAY CONCERN:

SUBJECT. TOK AREA RESCUE TRUCK

The Tok Community and specifically Tok School, could be well served by the existence of a rescue unit. A rescue unit, in association with the fire department, would be a great assistance should we have a bus wreck, an emergency with a crowd situation, fire in an occupied building, or building damage due to unforeseen events.

The spin-off benefits would include insurance advantages and the general safety and welfare of our employees.

Such a unit would also be available for use in large scale bush evacuation emergencies and accidents along the Alaska Highway.

This recommendation is in no way meant to supersede the need for an effective and efficient ambulance service in the Tok area.

Sincerely,

Spike Jorgensen
Superintendent of Schools

February 1, 1983

Mr. Anthony J. Conrad, Jr.
Chief, Tok Volunteer Fire
Department
P.O. Box 204
Tok, AK 99780

Dear Chief Conrad:

The Governor forwarded your request for an Emergency Rescue Unit to this office.

Your summation for the need of that type of vehicle in the Tok area is straight forward and reflects the need of such a vehicle.

This Department is not in a position to financially assist you. Capital Budget requests of State agencies have already been submitted, by the Governor, to the Legislature, for Fiscal Year 1984.

The process, as has been utilized in the past, was for the Legislature to appropriate funds for ambulance, fire equipment and rescue units for various areas and communities in the State. That money would be placed in this Department's Highway Safety Planning Agency budget unit. The Agency would then, with the coordination and cooperation of the various local entities for which funds were allotted for specific equipment, handle the procurement.

The current administration is utilizing the Department of Community and Regional Affairs as the focal point for community projects, and, I have taken the liberty of forwarding your request there.

The Legislature has not, in the past, provided the amount of funds you have requested for any one piece of rescue equipment. Past allotments have ranged from fifty to seventy thousand dollars.

This Department concurs that a rescue unit in the Tok area would be beneficial. We wish you success.

Sincerely,

Robert J. Sundberg

Feb 14, 198

Representative Dick Schultz

Dear Sir,

This is a program the Tok Vol Fire Dept. has put together for a new rescue unit. The Tok Vol Fire Dept. is asking for your support. Enclosed is a list of signatures of people who support the unit. I have personally contacted each of these people and no one said "No" on this issue. There are several letters of reccommendation, from Public Safety, US Coast Guard, Tetlin Village, Tanacross Village, Alaska Gateway School District. We will also send one from the Bureau of Land Management.

We would like you to look it all over carefully. We know this is a large sum of money. But Tok is a sort of "centering agent" for 6 surrounding villages plus all the tourists who go in and out of Tok. This rescue unit can serve as a full medical facility on an accident scene until a victim, or victims is transported to the hospital. Our present, smaller ambulance can serve as a back up unit for the 1026 people of the Tok area while the rescue unit is out on duty.

Sincerely,

Anthony J. Conrad, Jr.
Tok Vol Fire Chief

JUNEAU, ALASKA 99811
PHONE:

January 31, 1983

Anthony J. Conrad, Jr., Chief
Tok Volunteer Fire Department
P.O. Box 204
Tok, Alaska 99780

Dear Tony:

I have reviewed the specifications for your proposed ambulance/heavy rescue unit. I am impressed.

Other than the items we discussed on the telephone, I am at a loss to find any serious discrepencies in the specifications. There were minor items, i.e. on page 4 of 80-11, Apparatus Production Sheet, I noted that the outside doors were to be hung vertically on "piano hinges bolted on 4" centers". Throughout the rest of the specs the requirement is for 14 guage continuous (piano) hinge, stainless steel with 1/4" stainless steel pins. This is much better and you will not be stuck with common light weight "piano" hinge. The specs also called for plated hinge bolts. It would seem to me that it would be better to use marine quality stainless bolts. The cost is minimal by comparison with the cost of the hinges themselves.

I am not familiar with "Cleveland Hardware" type door holders. At least not by that name. I do favor the double spring holders such as are used on Emergency One apparatus. They are very reliable and can be operated by one person who may even have both hands full of equipment.

I note there is no reference to Ziebart or other rustproofing. Perhaps that is not a problem in your area. We have had both our pumpers rustproofed by the Ziebart method. There is always somewhere for the water to lay and cause trouble.

With reference to a portable pump, we recommend a Hale Model 25FB-B25 which is rated at 250 gpm. It is set up for either electric or manual start and is exceptionally reliable.

This is not much of a critique, but your specifications really look good to me and any differences of opinion would be based on simple individual preferences rather than justifiable concerns.

I am sending you a set of guides for writing apparatus specifications published by the U.S. Fire Administration. There may be something of interest for you. If not, "chuck 'em out".

I understand that Representative Shultz introduced the bill for your truck today. I have not seen the text yet so I can't tell you what it says.

Keep in touch and let me know if we can be of further assistance.

Sincerely,

Bill

William A. Hagevig, Supervisor
Fire Service Training Program

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

House Bill No. 119

"An Act making a special appropriation for payment as a grant to the community of Tok for a rescue/ambulance apparatus; and providing for an effective date."

This bill would appropriate the sum of $203,787 to the community of Tok for the Tok volunteer fire department to purchase a rescue ambulance apparatus.

The Emergency Medical Services Section of the Division of Public Health, Department of Health and Social Services cannot endorse this bill at the present time for the following reasons:

1) The Tok Ambulance Service currently operates independently from the fire department. Therefore, we are concerned that this appropriation may create a duplication of services.

2) We only endorse EMS expenditures which are approved by local EMS or health councils, endorsed by a physician, and approved by a Regional EMS Council.

3) Interior Region EMS Council, Inc. has initiated a fund, with donations from other communities, to purchase a new ambulance for Tok. This fund currently has abut $42,000 which is approximately $10,000 to $15,000 short of the amount needed for a new four wheel drive ambulance.

4) The amount of money to be appropriated by this bill seems excessive unless it will purchase some type of fire apparatus.

State Legislative
Representative Dick Schultz
Dear Sir,

I am writing about our need for a rescue unit in the Tok Vol. Fire Dept. We have a great fire dept. and we have a very good staff to work in it. We have just one ambulance in Tok; if we had 2 ambulances we would still need a rescue unit and we need it as soon as possible. I will try to explain the reasons why we need a rescue unit.

If you look at a map of Alaska and put a pencil on Tok you will see we are surrounded by 6 native villages. We have the Hartsell Airstrip, state owned and operated. We have the 10½ Mi. Tanacross Airstrip which is used by 40 Mile Air and BLM and private pilots. We have an airstrip 2 miles south of Tok, called the Tok Lodge Airstrip. We have 4 bulk fuel plants and 5 miles west of town is the US Army Petroleum Station. We provide 24 hour emergency service to them and Blm. We provide fire protection and emergency services for Tanacross, Dot Lake, Ment-asta, Mineral Lakes, Tetlin Jct. We provide ambulance service only to Northway but we make ambulance runs all the way to the Canadian border. Accident victims in the Yukon Territory are brought to the border(if they are U.S. citizens) or the Beaver Creek ambulance will travel until they meet our ambulance. Then the accident victim is brought in to the Tok Clinic. There are many accidents between Tok and Northway. Vehicles go over the large banks and hang up on trees or rocks with people trapped in them. If the trees were cut down and then vehicles go over the banks then the people may get pinned and hurt worse on the then exposed rocks and boulders. With a rescue unit on the scene we could

put a wench line on to hold the unit. Or we could pull a small car out from under a truck that is jackknifed across the road on a hill or a curve.

When an accident occurs the ambulance is always called. If AST is available they promptly respond. Sometimes if the fire dept. was called at the same time it would save lives (when there are fuel oil or gasoline spills). If we had a rescue unit we would have all needed equipment right there on hand. This would be the most practical unit to have. With a built in water storage and foam system we would have adequate fire protection for about 90% of our accidents. This unit would save us gas and other expenses since it would save taking out 2 or 3 separate units. It would also save time; accident victims could be rescued within minutes of our arrival.

I have put together a "first picture" of this rescue unit along with my fire staff. The Ford truck will be designed to serve Tok and surrounding villages and 50-60 miles down highways around Tok. The unit will have a full rescue and ambulance combined. Outside compartments will hold the rescue equipment. The front compartment will have a portable pump with a 2½" suction hose and high pressure discharge of 150 lbs. PSI. It will have a 1" automatic electric hose reel and an inductor system. It will have an insulated water storage tank of 150-200 gal., with the chemical Fire-out in the tank and an inductor system for foam.

We will be able to handle 4 patients at one time. Our present ambulance can handle only one. Any other victims have to wait until the ambulance returns for them. This is a truck our fire dept. needs, it is also something the local clinic and EMT's need. This past year the ambulance responded with the fire dept. 4 times. Prior to that the ambulance did not respond with the fire dept. The ambulance should go with the fire dept. every time it responds to a fire call and return to the firehall with the fire units.

This is not fair to our firemen. This is a volunteer fire dept. and when we have a man injured we want immediate care for him.

1982 statistics figures show we had 52038 people come into Alaska for that year. 1981 statistics show we had 40692 people traveling into Alaska. 1980 statistics show?8751 people. This is a very substantial increase over a 3 year period. It also shows we can expect many more people for 1983.

We cannot ask for mutual aid from Delta or Glenallen because they are too far away. This is also why we cannot refuse help to the AST or to the public outside our 5 mile radius. Tok is an unincorporated village, therefore we have to work together as much as possible. We do not refuse help and assistance to anyone simply because we are so remote. In larger villages or cities they can tell people to look elsewhere for help because there is other help available.

Our fire dept. was started in 1972 when the state highway dept. turned it over to us. We have managed to operate our fire dept. only on our head count funds which is astronomical.

With ever increasing tourist numbers the people are constantly for more and more extensive emergency services. We want to be prepared. We are 220 miles southwest of Fairbanks, 145 miles from the Glenallen Hospital. We are 328 miles from aid and assistance in Anchorage.

We hope you will thoroughly study and consider our request for aid in acquiring the rescue unit we want and need. The new unit will serve as ambulance and rescue combined. It will be a 4 wheel drive vehicle with a hydraulic or manual tailgate platform for loading and unloading. It will have a compartment that will hold as many as 28 oxygen bottles, 6 hooked up at all times. It will have all the cabinetry, sink, hot water, medical supplies and cardiac machine and medical supplies.

I will personally go to the factory and supervise building of this unit so when it arrives here we can be sure it is everything we are asking for. I have had sufficient experience with fire and rescue equipment that I know what to look for behind the paint. I have been in the Tok Volunteer Fire Dept. since it started. I was Captain for several years and now I have been Chief for 6 years. June 21, 1981 I was given an Honorable Award from the 12 member of Alaska State Legislature for my work in the fire dept.

We hope to hear from you soon on this subject.

Tok Vol Fire Dept.

TO: Barbara/Bob

FROM: Paula

SUBJECT: HB 119

I spoke with Jeanne Ostnes, Director of the Interior Region Emergency Medical Services Council about this bill inasmuch as she had requested to be kept informed and notified of the scheduling. I asked her to submit her testimony by telecopy but she said that she would be in town on Monday, March 7 and could she give her testimony with the committee. Rep. Shultz' office (I spoke with Jack) and they see no problem with having the bill scheduled for both tomorrow and again on Monday to let Jeanne present her testimony.

Basically, the following are some of the facts, as told to me by Jean:

1. The Tok Umbrella Corp. is the organization in Tok set up to receive funds, such as SB 168 per capita monies. Requests for funds are usually funneled thru them so that they can coordinate and avoid duplication etc.

2. The EMS council is, by statute (18.08.080) set up as a watchdog for the setting up of emergency rescue programs - in other words, they see that equipment is properly certified and only used by certified personnel.

3. The Tok Clinic Board has already been approved for an ambulance. Last year they were given 10.0 from the Legislature for an ambulance and this was out of an original request of 60.0. The EMS interior office had funds and other communities donated a portion of their share to help Tok. Mcgrath, for example donated $7,200 . The EMS office then went to the Tok Community UImbrella Corp and requested 25.0 from their 168 monies. This was approved and added to the 42.0 they had raised, they now have 67.0 for their ambulance. Approval for the 25.0 was granted by the Tok Umbrella Corp. on 1/15/83.

4. Jeanne indicated that this same apparatus was ordered by the city of N.Y. and then returned because it turned out to be too expensive to maintain and operate.

5. There is no 24 hour dispatch in Tok (Jack in Shultz' office said that this is now in place).

6. The Fire Dept. request did not go thru the umbrella corp. the fire chief, Tony Conrad, indicated to Jeanne that he was unaware of the need to do this.

7. The $200,000 apparatus has equipment which will require upgrading of EMT and certification. It is all equipment, OTHER THAN FOR FIRE, which can be used by any ambulance.

SUBJECT: HB 144

DATE: March 7, 1983

AS 30.15 provides for legislative appropriations or proceeds from the sale of bonds to the State to make grants to municipalities for the construction of port facilities.

HB 144 expands the use of grant funds to allow for performing feasibility for erosion control at port facilities.

The proposed legislation also increases the limits of the state portion of project costs from 90% to 95%.

AS 41.10 pertains to the Soil Conservation District Law. HB 144 adds waterfronts to the list of basic assets to the state and empowers the Commissioner of Natural Resources to conduct investigations of waterfronts, including necessary preventative and control measures.

Capital								
Operating								
Total								

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

Since funds will be appropriated, by the legislature or by the sale of bonds, on an individual project by project basis, this bill will not of itself increase the number of state employees or the state's operating budget. The bill does provide that a feasibility study for each project may be funded by project funds where before the study usually had to be conducted by the community at its own expense. This bill also reduces the communities percentage participation in project costs for those municipalities with a population under 5,000. It is unkonwn how many communities may have delayed requesting grants because of their inability to fund a feasibility study or to provide the 10% matching funds for the grant.

(Contunued next page)

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

2/15/83

While the number of feasibility studies cannot be anticipated at this time, the cost of a typical study ranges between $80,000 and $100,000. The total costs to the state for feasibility studies will be determined by the legislature on a project by project basis, as will construction costs.

Erosion control can generally be divided into two types: beach erosion in coastal locations, and bank erosion at river locations. Beach erosion is a routine consideration in the design and development of coastal ports. The costs of beach erosion control are usually incorporated in the costs of port facilities such as breakwaters, jetties, docks, etc. Beach erosion control practices normally need to be applied only in the immediate vicinity of port facilities.

River bank erosion control is frequently needed for significant distances upstream and downstream in order to protect river ports. River bank erosion control is generally expensive; estimates for Bethel, for example, are as high as $100.00 per foot of protected riverbank. Complete stabilization of the Kuskokwim river to protect the port of Bethel could cost as high as $200 million. Erosion control along river banks frequently transfers and exacerbates erosive forces elsewhere, leading to the need for additional speed along "protected" reaches of a river, port operations are often made more difficult and dangerous, as well.

Gary Gross
Executive Director
AVCP Housing Authority
P.O. Box
Bethel, Alaska
99559

Dear Gary:

I have received a letter from the City of Tununak requesting aid from the legislature for the construction of a sea wall to cut down on the erosion of the beach fronting Tununak. City officials assert the problem is the result of the removal of gravel from the beach and blasting of sea cliffs for gravel for various projects, including an AVCP Housing Authority project. In their report proposal they state:

> "In 1979, the Association of Village Council Presidents Housing Authority (AVCP/HA) contracted with Northwest Construction to build 23 HUD housing units in Tununak. Gravel used for the foundation pads was obtained from the beach east of the mouth of the Tanunak River and from the cliffs northeast of the community. The latter was obtained by blasting the cliffs. During the course of this project, concerns were raised over blasting the cliffs and removal of gravel from the beach and a community meeting was held with Northwest Construction and AVCP/HA representatives. At that meeting, AVCP/HA informed the City Council that if they did not agree to let Northwest Construction obtain gravel from the cliffs, the project would be delayed for at least one year. To reassure the community representatives from AVCP/HA stated that erosion will always be present and this project will not accelerate the rate of erosion."

I would ask your help in trying to deal with this situation. I have introduced a bill for an appropriation to construct a sea-wall in Tununak to cut down on this erosion. In order to be successful in my efforts, I need as much background information on this as possible.

I have the following questions which you may be able to help me with:

1. Are you aware of this project? Who was involved from AVCP/HA?

2. What are normal procedures under circumstances involving the use of local resources as done here, i.e. gravel from the beaches and blasting of nearby cliffs.

3. What precautions were taken to insure the erosion rate would not be affected by these activities?

4. Are you aware of the meeting in Tununak referred to where AVCP/HA people would have made the statements referred to?

5. Do you know who would have made such statements and the basis for such statements?

I am not concerned at this point with placing the blame on anyone, but I do need the information to help justify the bill. Thank you for your cooperation, I look forward to your reply.

Sincerely,

Tony

Dear Representative Vaska:

This letter is in response to your request for information on the availability of Ports and Harbors monies as a grant to the Village of Tununak for erosion control.

The Department currently does not have any Ports and Harbors or discretionary monies available for an erosion control structure at Tununak. However, the Department of Transportation and Public Facilities (DOT/PF) and the Department of Community and Regional Affairs do provide limited technical assistance to define the scope of the erosion problem and alternate solutions.

It is our understanding that the village of Tununak has already had a study completed, recommending a solution. Unfortunately, until funds are made available, DOT/PF will be unable to assist Tununak with construction.

If you need additional information, please call.

Sincerely,

John C. Bates
Deputy Commissioner

March 3, 1983

Hello Tony,

I received your letter regarding the Tununak beach erosion on February 24. The concerns you expressed in the letter were first brought to the Housing Authority's attention during a phone conversation with Jim Plasman, earlier in February. As I mentioned to Jim at the time, his phone call was the first time I had heard of the erosion problem resulting from gravel extraction done by the Housing Authority.

Since that phone call from Jim, I have talked to Bob Angaiak, Development Director for the Housing Authority, who is from Tununak and was living there at the time, John Deladder, who was a teacher living in Tununak at the time and Bill Jones, President of Northwest Construction. I've also gone through all the Tununak files and have enclosed copies of all relevant reports for your review.

I have numbered each of the letters of correspondence, so I can address each one separately and you can, follow the chain of events more easily. Since I did not work on the project directly and it happened almost four years ago I will substitute some speculation for veracity.

#1-Outlines a conversation between Contractor and Architect on 8/1/79. States that the area specified by the Housing Authority for gravel extraction had been exhausted, and specifically acknowledges that no gravel should be taken from in front of the village.

#2-Architects interpretation of same phone conversation 8/1/79. Specifically states that taking of gravel from the beach is unacceptable, and mentions that only gravel source is by blasting cliff.

#3-Outlines a conversation between Contractor and Architect regarding alternative sources. 8/3/79
Northwest Superintendent advised architect that the cliff area gravel had been exhausted and that there was gravel on the other side of the river from town and that the Housing Authority said it was okay to extract gravel from the other side of the river. However, village residents opposed the idea of removing gravel from the other side of the river. The Contractor then began getting gravel from a beach/cliff site south of the village (an area that DOT/PF had been using for a Local Service Roads & Trails project

*We do not have any correspondence on record until a trip was made on August 14, 1979 by Marlin Knight, Peter Phillip (AVCP-Housing Authority), Steve Crosby (Architect Agent), and John Chambers (Soils Engineer).

#4-Trip Report of Peter Phillip-Housing Counselor.
States that all possible gravel sources were investigated. The site that DOT/PF could not be used because the State had exclusive rights to the area. Peter then highlights a meeting that was held in the village with the Council and Marlin Knight. At this meeting, apparently, Marlin said the entire project would be stopped unless a gravel source could be found. According to Peter's report, the Council agreed to allow the Contractor to haul gravel from an area Northeast of the village; however it doesn't specify whether the Council approved to the blasting of the cliff or the area of erosion.

#5-Architects Trip Report.
Briefly mentioned that the Housing Authority did get the Council to approve a gravel source.

#6-Soil Engineers Trip Report.
This report specifically states that Marlin had received approval of the Council to extract gravel from a site South of the cliff, i.e. the site that has eroded.

In addition to these reports, Bob Angaiak, today, found photographs he had taken of the beach front before and after Housing Authority involvement. These photograps clearly show, significant erosion after a spring storm in late April or May; at least two months prior to any Housing Authority excavation. Erosion occurred along the entire beach front, with up to two to three feet of gravel washed away by a single storm.

We're not sure why this erosion occurred, although we know P.H.S. had been extracting gravel in the area during the summer of 1978 for a new pumphouse foundation and access road. The P.H.S. engineer working on the project is out of town for three weeks so we haven't been able to determine the exact location of the extraction. We believe it was in the area to the Northeast of the village. The excavation work done by the Housing Authority in the summer of 1979 may have heightened the erosion problem.

That is all I have been able to find out about the project.

Since that time, precautions have been taken to make sure we have an approved gravel source. The normal procedure for the Housing Authority when using a local gravel source is to get a letter of "non-objection" from both the local village corporation and Calista, and to arrange for a royalty payment. In addition, all housing projects go through the State-Federal A-95 Review, and simultaneously the States, Alaska Coastal Management Program Review to solicit comments from appropriate agencies. Since we became aware of Corps of Engineers wetlands regulations, we have been applying for Section 404 Wetlands Permits, whenever we need to extract gravel or place fill in wetlands areas.

That's about all I have for now. If you have any specific questions, please call me. I'm sorry about the delay in answering you, but I've tried to be as thorough as possible. Tua-i.

Keep up the good work.

Sincerely,

Jim

REPLY TO
ATTENTION OF:

Flood Plain Management Services

Mr. Tom Middendorf
Department of Transportation
and Public Facilities
Pouch 6900
Anchorage, Alaska 99502

Dear Mr. Middendorf:

This is in response to your telephone conversation on January 26, 1983 with Mr. Allen Churchill with regard to erosion problems at Tununak, Alaska.

Enclosed is a trip report that was made in September, 1981 by one of our engineering technicians. Item six of the report stated that the village was going to request a reconnaissance study; however, we have not received such a request to date. Tununak would qualify under Section 103 of 1962 Rivers and Harbors Act, as amended for a small beach erosion control study. Federal funding limits on this type of project cannot exceed $. million including study costs.

A brochure entitled Low Cost Shore Protection is also enclosed at your request. More detailed manuals are available by submitting the card on the back cover. Because this brochure addresses the coastal erosion process, we are also enclosing a spare copy of the Final Report to Congress that pertains to the Streambank Erosion Control Evaluation and Demonstration Act of 1974. Appendices A through H, involving 11 additional volumes, are available by writing to the U.S. Army Engineer Waterways Experiment Station, ATTN: WES-HP, P.O. Box 631, Vicksburg, Mississippi 39180. We would be glad to accommodate you or others on the staff that would like to meet and discuss some of the erosion problem areas around the State and the types of solutions that have been recommended.

If you would like to set up such a meeting or have any further questions, please contact Mr. Allen Churchill of our Planning Branch at (907) 552-3246.

Sincerely,

Harlan E. Moore
Chief, Engineering Division

January , 1983

The Honorable Tony Vaska
Representative
Alaska State House
Pouch V
Juneau, Alaska 99811

Dear Representative Vaska:

This letter is in response to your request for information on the availability of Ports and Harbors monies as a grant to the Village of Tununak for erosion control.

The Department currently does not have any Ports and Harbors or discretionary monies available for either an erosion control structure or study at Tununak. However, the Department of Transportation and Public Facilities (DOT/PF) and Community and Regional Affairs do provide limited technical assistance to define the scope of the erosion problem and alternate solutions.

Assistance provided by DOT/PF usually includes a site visit by an area planner, identification of the problem with residents, identification of affected structures, and review of alternate solutions and their relative costs.

Assistance provided by Community and Regional Affairs includes an Erosion Control Manual that helps the community assess the problem and alternate solutions and/or a site visit by a community planner. The site visit would be similar to that described above for DOT/PF with an optional slide presentation that describes common causes of erosion and potential solutions that have worked elsewhere.

The Army Corps of Engineers provides self-help brochures and more detailed technical assistance to communities. The Corps has investigated the erosion problem in Tununak and I have requested a copy of their report and will forward a copy to you when I receive it.

If you need additional information please call.

Sincerely,

John C. Bates
Deputy Commissioner

NPAEN-PL-FP 24 September 1981

MEMORANDUM FOR RECORD

SUBJECT: Field Trip Report
VILLAGE: Tununak, Alaska

1. At the request of the Village Council, we traveled to Tununak, arriving at 11:30 a.m. 21 September 1981.

2. I, Ken Eisses and John Angaiak proceeded to the problem area along seaward side of village.

3. The fuel tanks shown in slides B-6 and B-10 are of most concern to the village along with several homes located approximately 25-30 feet from the present bank. The 1979 storm was the most severe, with approximately 30-40 feet of beach and bank eroded.

4. After some lengthy conversation the point was brought up that after the State had removed several thousand cubic yards of gravel from the beach paralleling the village that the erosion problem was greatly increased. Several of the Town Council people informed us that they had minimum erosion ~~gravel~~ from the beach fronting the village.

5. The village was informed that the Corps of Engineers could give them technical assistance if a project was undertaken.

6. The Village Council is going to request in writing that the Corps of Engineers do a Reconnaissance Report for their village erosion problem.

7. Recommendations:

a. That all fuel tanks be moved further back on higher ground. There is high ground available approximately 200 yards to the northeast. This is the most economical solution.

The fuel tanks are setting on skids and could be pulled to another location.

Several of the buildings are setting on skids and could be pulled by a tractor further to the northeast on higher ground.

Tuc11

b. Gabion Revetment would be the second most economical method because there is plenty of available large stones less than one-fourth mile from the erosion area.

8. If rocks are to be used there is an area approximately one-fourth mile from the village that could be used as shown in slides B-7 and B-8. The village has a small bulldozer, front end loader and dump truck, however, all three are not in running condition.

9. There are three pickup trucks in the village.

M E M O R A N D U M

TO: Files

FROM: Peter C. Phillip, Housing Counselor I

DATE: August 15, 1979

SUBJECT: FIELD TRIP REPORT - Tununak, 8/14/79.

I accompanied Marlin Knight, Stephen Crosby and John Chambers to Tununak for the purpose of meeting with the Tununak Council to settle the gravel - hauling problem for the A.V.C.P. Housing foundation being constructed.

When we got to Tununak, the site location where gravel was being hauled from was looked at, on both ends of the village: Northeast and Southwest. The main purpose for stoppage of hauling gravel from the Southwest, which is approximately 1½ miles from the village, was that the area had been applied for by the Corps of Engineers through Bureau of Land Management for riprap material on the river bridge, where some of the stone wall has been washed by tide action. The only other place was to be from the Northeast of the village along the beach. When we held the Council meeting, the Council were told by Marlin Knight, of the problem of getting gravel to finish the foundation of the houses. If this was not resolved, the project would have had to be stopped until gravel could be obtained to complete the housing foundation. The Council were told of the problem and after discussion, the problem was resolved and gravel could be hauled from the Northeast end of the village. There are 12 foundations completed and six more, with gravel, are needed for the foundations. The gravel padding is approximately three feet thick and in an area depending on the size of the house to be built.

Marlin, Stephen, and John stopped in Eek to look into the progress of the housing project on the return trip from Tununak.

Honorable Anthony Vaska
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Reference: Tununak Erosion Control Project

Dear Representative Vaska:

Tununak is faced with a serious erosion problem. If measures are not taken to correct this problem, the community will lose subsistence herring fish processing facilities, historic and cultural sites, and other valuable property.

The erosion problem in Tununak appears to have resulted directly from the removal of gravel from the beach fronting Tununak and blasting the sea cliffs to obtain gravel in order to cut costs for construction projects sponsored by state and federal governments. This was done in spite of objections raised by residents and the City Council.

The Tununak City Council, on behalf of the residents of Tununak, Alaska, submits this project proposal requesting funding from the State of Alaska for the purpose of constructing a sea wall. This project has the full support of both the Tununak IRA Council and Tununrmiut Rinit Corporation (Tununak village corporation) Board, and it was selected as the most important priority project by a vote of the residents of Tununak

5. CONCLUSIONS 9

APPENDICES

A. Maps of Project Area 13

B. Sea Wall Design 17

C. Project Budget 18

1. PROJECT OVERVIEW

The City of Tununak requests $904,891 from the State of Alaska for the purpose of constructing a sea wall to protect the community from further destruction caused by storm-wave action. The City proposes that a seven-foot high, 3,800 foot long sea wall be built.

2. STATEMENT OF PROBLEM

The City of Tununak is faced with a serious erosion problem. This situation has intensified in recent years because of a sudden acceleration in the erosion rate begining in 1978. Since that time, at least 30 feet of land has been lost through erosion along hundreds of feet of waterfront. At present, the beach head is less than 10 feet from the bulk fuel storage tanks. Also in immediate jeopardy are the village corporation office building, ANICA native store warehouse, and many private residences. A substantial amount of community reserve lands has already been lost.

In 1976-1977, the Alaska Department of Transportation constructed a one-half mile gravel road and bridge over the mouth of the Tanunak River. The DOT obtained gravel from the mouth of the river, along the beach, and from the base of the cliffs northeast of the community. All the large boulders along the base of the cliffs were removed for this project. This exposed the cliffs to the full impact of the ocean waves during high tide and storm surges.

In 1979, the Association of Village Council Presidents Housing Authority (AVCP/HA) contracted with Northwest Construction to build 23 HUD housing units in Tununak. Gravel used for the foundation pads was obtained from the beach east of the mouth of the Tanunak River and from the cliffs northeast of the community. The latter was obtained by blasting the cliffs. During the course of this project, concerns were raised over blasting the cliffs and removal of gravel from the beach and a community meeting was held with Northwest Construction and AVCP/HA representatives. At that meeting AVCP/HA informed the City Council that if they did not agree to let Northwest Construction obtain gravel from the cliffs, the project would be delayed for at least one year. To reassure the community representatives from AVCP/HA stated that erosion will always be present and this project will not accelerate the rate of erosion.

3. COMMUNITY PROFILE

3.1 Location and Setting

Tununak is a Yup'ik Eskimo village located on the northwest coast of Nelson Island, 120 miles west of Bethel on the Yukon-Kuskokwim delta. The village is sited on a narrow spit that extends from the flank of Ugchirnak Mountain (elevation 998 feet) southwest across the mouth of Tanunak River. The spit, approximately 4,000 feet in length, rises about 10 feet above the beach and is approximately 400 feet wide at its widest point.

The residents of Tununak depend heavily on subsistence hunting and gathering for food. Wildfowl, ptarmigan, herring, salmon, trout, halibut, flounder, seal, clams, mussels, blackfish, needlefish, and wild plants and berries are the foods primarily utilized by the villagers. Musk ox and reindeer (the latter obtained from nearby Nunivak Island) are the only game taken in the area. Mink, fox, beaver, and muskrat are hunted and trapped for their fur. Many women make grass baskets and garments made from musk ox hair (qiviut) for sale outside the village. Some residents are skilled ivory carvers. The school is the major employer, with other employment in government and commercial sectors.

Tununak is located in the Transition climatic zone. Weather conditions have a maritime influence and are highly variable and often unpredictable. Rain, drizzle, clouds, and fog are common in the summer and fall. Annual precipitation in the form of rain and snow amounts to 16 inches and 60 inches respectively. Surface winds are strong and come predominantly from the northeast and south. Climatic conditions are modified by the Bering Sea waters. Estimated temperature extremes at Tununak range from -48°F to 76°F. The mean total heating degree days for Tununak is 13,000. Freezing and thawing degree day values are 2,750 and 1,750 respectively. The estimated mean total number of days below 0°F is 46.

Sea ice formation in Tanunak Bay normally begins in December, and by February the waters are "closed" with 80 to 90% ice coverage. Waters are generally open by June.

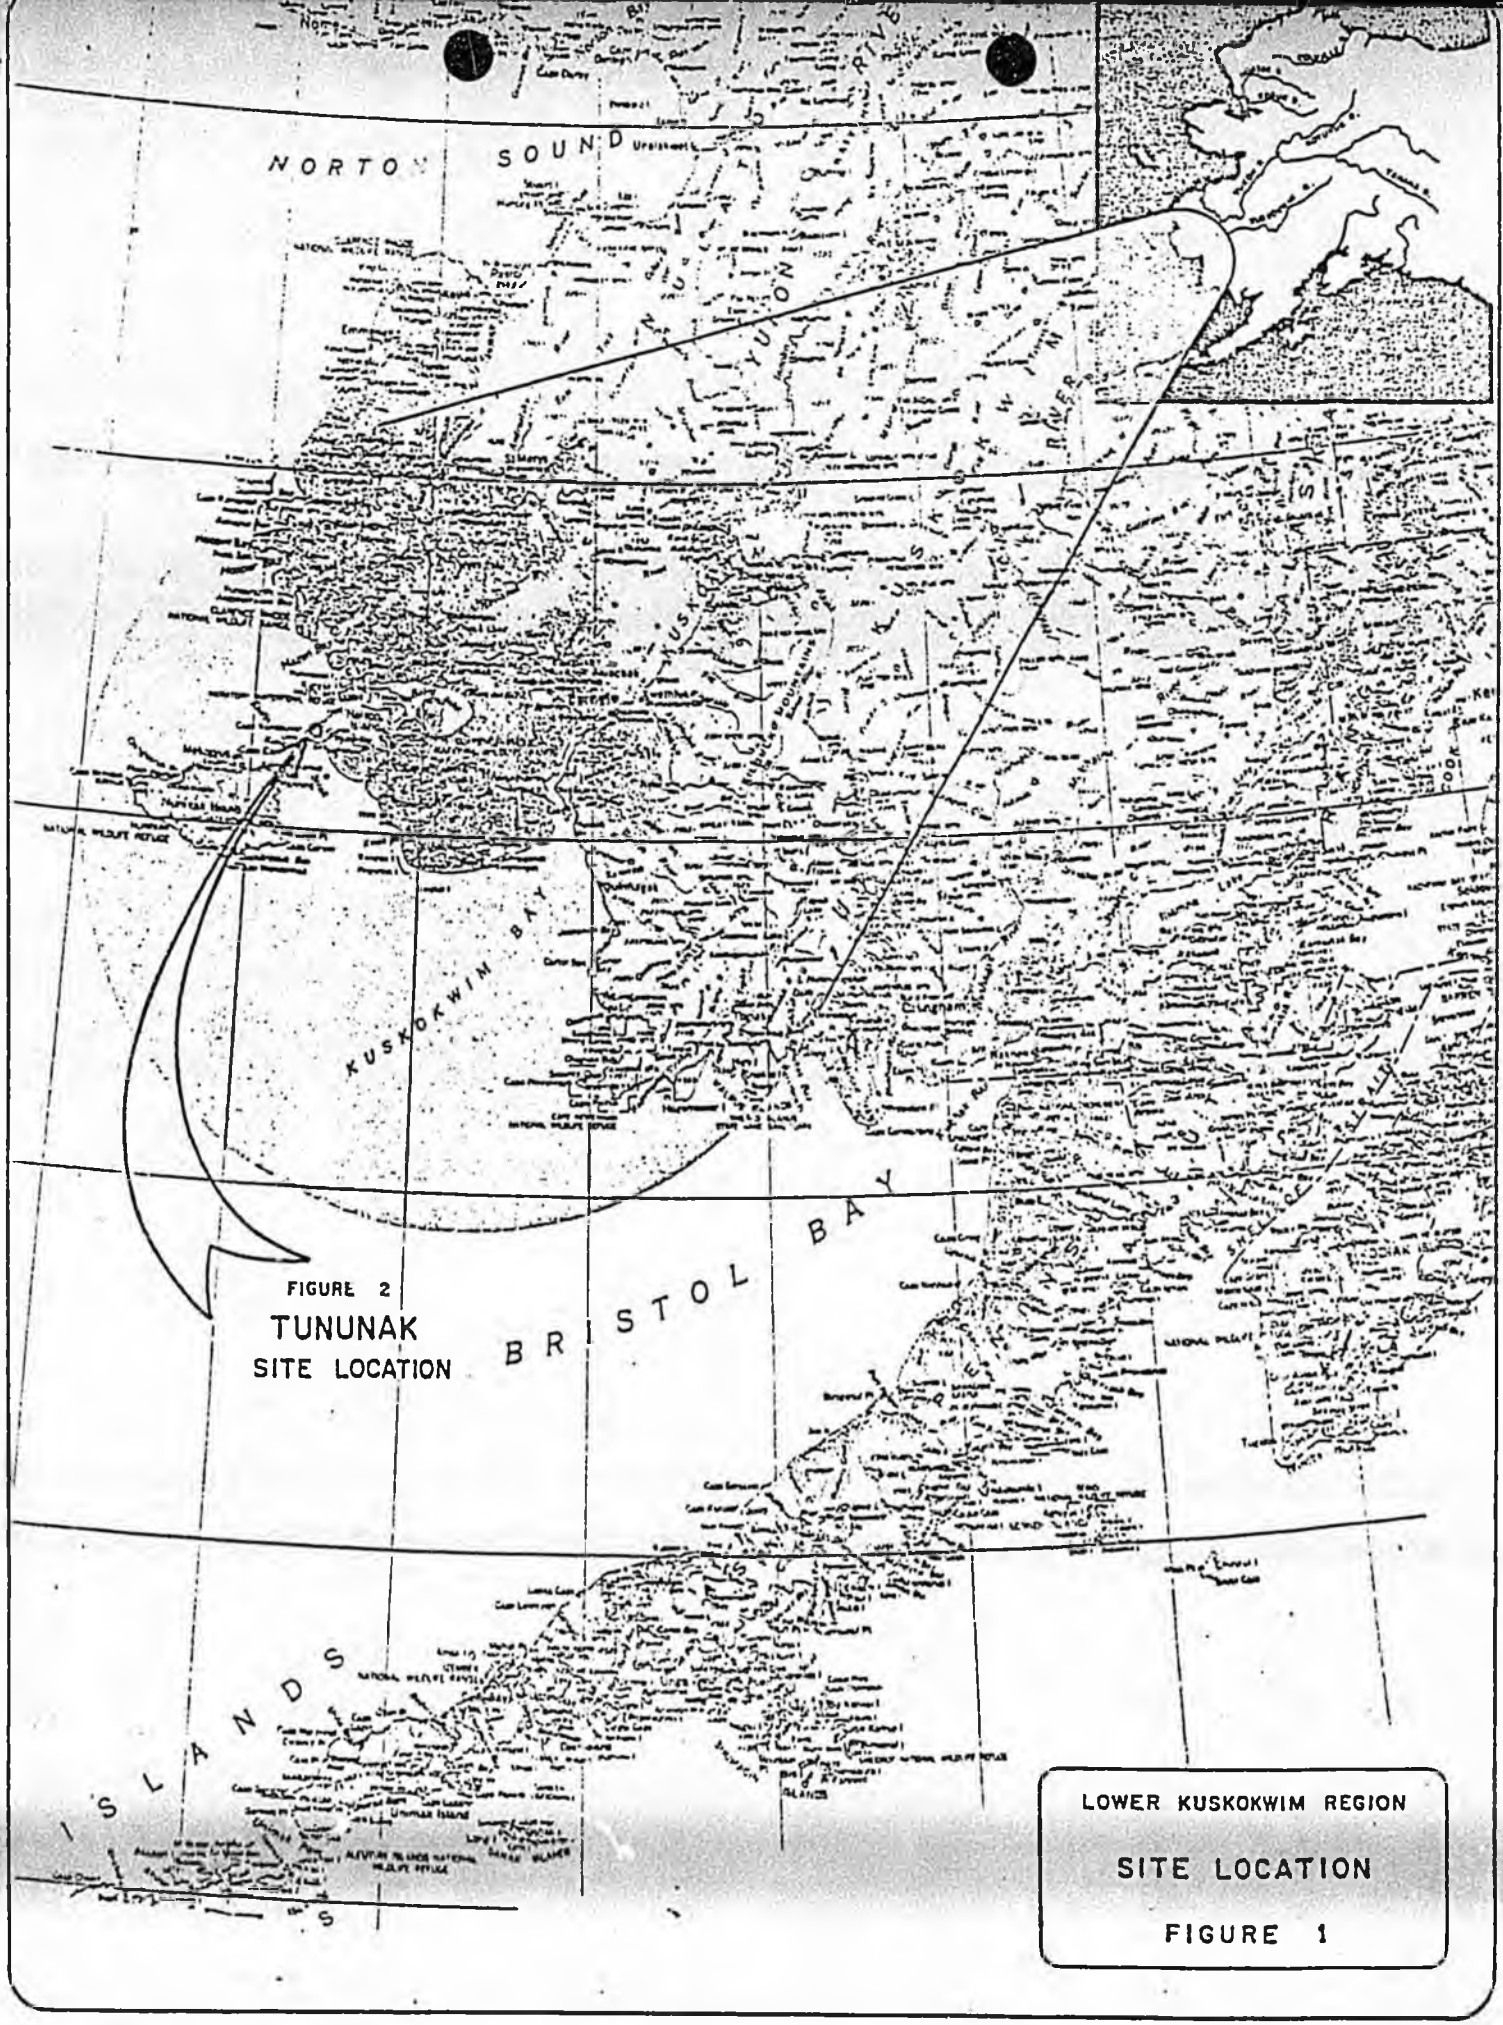

FIGURE 2

3.2 Population

Population data for Tununak is sporadic, but available data shows a consistent upward trend since at least 1939.

Year	Population
1939	65
1950	112
1960	183
1970	274
1978	291
1980	299
1981	301
1982	315

4. EROSION CONTROL PROJECT

4.1 Project Description

Tununak is sited on a narrow sand and gravel spit that extends southwest between the Tanunak River and Tanunak Bay (Figure 2; Appendix A). The spit, approximately 4,000 feet in length, rises about ten feet above the beach line and is approximately 400 feet wide at its widest point.

The spit is eroding at a rapidly accelerating rate. The Tununak erosion control project is desperately needed to protect the community from further destruction. To control the erosion, a seven foot high sea wall should be constructed from the cliffs located northeast of the community to a point approximately 3,800 feet to the southwest (Appendix A).

4.2 Engineering and Construction

Two gravel and boulder borrow sites for the erosion control project have been selected (Appendix A). These materials will be obtained from a large landslide area located approximately 4,000 feet northeast of the project site. The rock will be extracted from ten feet above the base of the slide to prevent erosion problems in that area. An alternative borrow site, located about 3,500 feet northeast of the project site, is comprised of a highly unstable 45-foot thick sandstone unit. Both sites were selected on the basis of socio-economic and engineering considerations.

Rock materials in the landslide area are composed primarily of non-vesicular and vesicular basalt, with lesser amounts of well-cemented medium- to course-grained sandstone. The sandstone comprising the alternative site is highly compacted and indurated. Rock materials in both sites will be suitable for this project.

The construction season in Tununak typically extends from May through November. Daylight and twilight hours are about the same as in Anchorage. Construction hours will have to be flexible because hauling cannot be conducted during high tide. Extracting and emplacing rock materials as well as constructing support facilities will not be affected by the the tides.

Construction of the sea wall will utilize front-end loaders for extracting rock, dump trucks for hauling, and a crawler bulldozer for emplacing and grading. The City of Tununak already owns the necessary heavy equipment, which consists of the following:

- 95000 series GMC dump truck
- 700 series 1975 Ford dump truck
- 545 Allison-Chalmer front-end loader
- JD 350-B John Deere front-end loader

- JD 350-C John Deere crawler bulldozer/backhoe

The sea wall will be approximately seven feet high. The project will require approximately 5,300 cubic yards of rock and 45 cubic yards of concrete (see Appendix B for sea wall design sketches).

Construction of the sea wall will proceed in the following steps:

1. Grading the beach sand adjacent to the beach head to a small angle inclined downward to the southeast.
2. Extracting, hauling, emplacing, and compacting gravel to form the inner portion of the sea wall.
3. Extracting, hauling, and emplacing boulders to form the outer portion of the sea wall, building the sea wall to an angle of about 33°.
4. Forming and pouring concrete access steps and ramps.

The project will start at the northeast end and progress to the southwest. As the rock materials are emplaced, construction of the concrete access steps can begin.

The first step in constructing the sea wall will involve grading a 6 foot wide strip of beach sand adjacent to the beach head. The sand will be graded to an angle between 3° and 5°, inclined downward to the southeast.

The next step will involve emplacing and compacting gravel to form the inner portion of the sea wall. Boulders will then be emplaced over the gravel to form the outer portion of the sea wall. The largest and most competent (non-vesicular basalt) boulders will be placed along the base of the sea wall. These boulders will absorb most of the wave energy generated during storm surges and prevent continued erosion of the beach head. The sea wall will be built to an angle of about 33° from the horizontal. This is the "angle of repose;" that is, the maximum angle rocks can be piled while maintaining stability.

The final step in the sea wall project will be the construction of concrete vehicle ramps and pedestrian steps to provide access between the community and beach. The pedestrian steps will be six feet wide, thus permitting residents to haul herring fish buckets from the beach to the herring pits and drying racks on top of the beach head. The individual steps will be 8 inches high and 12.3 inches wide. There will be six pedestrian access structures along the sea wall, each requiring about 2.5 cubic yards of concrete, for a total of 15 cubic yards of concrete.

There will be two vehicle ramps ten feet wide and one foot thick, each requiring about 15 cubic yards of concrete. Construction of access structures will utilize plywood forms. Concrete will be mixed on the beach head and poured into the forms.

A 12' x 16' plywood emergency shelter will be constructed at the rock extraction site. The shelter will contain first-aid supplies, a space heater, work table and benches, spare parts, and a 3700 watt, 120/240 volt generator. A 1500 watt tungsten halogen quartz floodlight will be used to illuminate the rock extraction site during the autumn months.

5. CONCLUSIONS

The coastal shoreline fronting Tununak is eroding at a rapid and accelerating rate. Since 1978, more than 30 feet of shoreline public reserve lands have been lost. At present, less than 10 feet separate the Corporation bulk fuel storage tanks and the beach head. Many private residences are threatened as are several public and commercial structures. If precautionary measures are not taken immediately, continued loss of private and commercial property will occur.

Immediately after the sea cliffs were blasted and gravel was removed from the beach fronting the community, beachfront erosion increased dramatically. It appears that these actions were the direct cause of the increase in erosion. It is ironic that projects intended to improve the standard of living in Tununak may have inadvertently created a situation that could result in the destruction of the original village site.

The proposed Tununak erosion control project consists of a seven foot high, 3,800 foot long rock sea wall composed of locally obtained rock materials. These materials will be extracted, transported, and emplaced utilizing local manpower and heavy equipment. The sea wall will have concrete pedestrian steps and vehicle ramps to provide access between the community and beach. Project engineering and management will be the responsibility of the City of Tununak.

POSITION PAPER

RE: HB 144

SPONSORS: Representatives Vaska and Kopohen

Program Effects of Bill

Includes erosion control measures as eligible for State grants for port facility construction under A.S.31.15.020-030.

Comments

This legislation would simply and logically expand eligibility criteria for port facility construction grant funds to include erosion control measures. This revision would be consistent with the cooperative Federal/State Flood Plain Management Program administered by this Department.

Editor's note. — Section 9, Executive Order No. 39 (1977), effective July 1, 1977, provides: "(a) The Department of Transportation and Public Facilities is vested with the duties and powers formerly held by the Department of Public Works relating to planning, construction, maintenance and operation of transportation facilities, including state ferries, airports and water and harbor facilities, and for design and construction of buildings and appurtenant structures, and specifically including all powers and duties formerly held by the Department of Public Works under AS 02, AS 30.05, AS 30.15, AS 35, As 41.20 and AS 44.65.

"(b) The Department of Transportation and Public Facilities is vested with the duties and power formerly held by the Department of Highways relating to planning, construction, maintenance and operation of state transportation facilities including state highways, roads, bridges, traffic signs and signals, the supervision and maintenance of state automotive and mechancial equipment, the control of outdoor advertising visible from state highways and all other duties and powers of the Department of Highways, and specifically including powers and duties formerly held by the Department of Highways under AS 19, AS 28.01, AS 28.05, and AS 44.57."

Sec. 30.15.010. State grants for port facilities construction. To the extent funds are appropriated by the legislature, or from the proceeds from the sale of bonds, the state may make grants to municipalities to finance a portion of the cost of construction local, regional or state port facilities. The state shall participate only in those projects approved by the governor on recommendation of the commissioner of transportation and public facilities.(§ 1 ch 85 SLA 1974; am Executive Order No. 39, § 11 (1977)).

Effect of amendment. — Pursuant to Executive Order No. 39 (1977), a reference to the commissioner of transportation and public facilities has been substituted for a reference to the commissioner of public works at the end of the section.

Sec. 30.15.020. Criteria for establishing eligibility. (a) Before a grant may be awarded under this chapter, the commissioner of public works shall determine that

(1) the grant is for a feasible project;

(2) the project is endorsed by resolution of the governing body of the sponsoring municipality on its own behalf, or on behalf of a service area in an organized borough if a service area is established to finance and construct port facilities and operate and maintain them once constructed; and

(3) the municipality can clearly demonstrate its ability to finance the local share of project costs.

(b) No grant may be awarded under this chapter for a port facility development project until a study of its feasibility is conducted and submitted with the application for the grant. The project also must be justifiable on the basis of public convenience and necessity. The study shall be conducted by consultants, engineers or other technical experts, who may be officers or employees of the municipality in making application for a grant. (§ 1 ch 85 SLA 1974)

laska -HI-1-32-7887

Sec. 30.15.030. Limitation on grants. Grants for the development of port facilities may not exceed

(1) 90 per cent of project costs for municipalities under 5,000 population;

(2) 80 per cent of project costs for municipalities 5,000 population and over. (§ 1 ch 85 SLA 1974)

Sec. 30.15.040. Disposition of state land for port facilities development projects. The division of lands in the Department of Natural Resources, subject to the applicable provisions of AS 38.05 and 38.10, may convey title or other interests in state land, provide for the exchange of state land, or make other arrangements with respect to state land that may be necessary to complete a project for which a state grant is approved under this chapter. (§ 1 ch 85 SLA 1974)

Sec. 30.15.050. Combined port and ferry terminal facilities. A grant may be awarded under this chapter for a port facilities development project that includes, or combines, state ferry terminal facilities as a part of the project. However, the state shall pay the proportionate projects costs attributable to the ferry terminal including but not limited to vehicle staging areas, transfer spans and aprons, passenger terminal facilities and offices, docks and other docking facilities for ferry vessels. (§ 1 ch 85 SLA 1974)

Sec. 30.15.060. Regulations. The commissioner of public works shall promulgate regulations under the Administrative Procedure Act (AS 44.62) that he considers necessary to carry out the provisions of this chapter. (§ 1 ch 85 SLA 1974)

Sec. 30.15.070. Definitions. In this chapter

(1) "commissioner" means commissioner of public works;

(2) "department" means Department of Public Works;

(3) "municipality" means a home rule or general law borough or city including but not limited to a unified municipality organized under AS 29.68;

(4) "port facilities" means docks, wharves, bulkheads, seawalls, landfills, warehouses, staging areas, transfer spans and aprons, lifting equipment and similar structures together with the necessary equipment and facilities required to accomodate waterborne commerce and shipping, including but not limited to combined port and ferry terminal facilities;

(5) "project costs" means the cost of financing or borrowing, site acquisition and rights-of-way, planning, engineering and designing, construction, equipment acquisition and installation, but does not include the cost of operation or maintenance of the port facilities once constructed or the cost of feasibility studies required in making application for a grant under this chapter. (§ 1 ch 85 SLA 1974)

to and providing for the systematic collection, recording, and distribution of data on the water of the state. (§ 3 ch 41 SLA 1977)

Sec. 41.08.040. Cooperation with other agencies. The state geologist, with the consent of the commissioner, may enter into cooperative agreements with federal, state, and local governmental agencies to perform geological and geophysical surveys, studies, investigations, and services. (§ 1 ch 93 SLA 1972)

Chapter 10. Soil Conservation District Law.

Section		Section	
10.	Declaration of policy	100.	Duty of board to advise commissioner of natural resources
20.	Creation and boundaries of soil conservation district	110.	Powers of commissioner of natural resources relating to soil conservation
30.	Purpose of district	120	Land occupier shall approve plans, etc.
40.	Soil conservation board	130.	Creation of subdistricts

Sec. 41.10.010. Declaration of policy. The farm, forest and grazing lands of the state are basic assets of the state. It is the policy of this chapter, in the interest of the health, safety, and general welfare of the people of the state, to provide for the development, use and conservation of these lands in accordance with their capabilities. (§ 47-4-2 ACLA 1949)

Am. Jur. and C.J.S. references. — 2 Am. Jur., Agriculture, §§ 12, 19, 50, 217; 11 Am. Jur., Constitutional Law, § 276; 12 Am. Jur., Constitutional Law, §§ 424, 701; 37 Am. Jur., Municipal Corporations, § 6. 3 C.J.S. Agriculture §§ 7 to 10.

Sec. 41.10.020. Creation and boundaries of soil conservation district. The Soil Conservation District of Alaska is created. The district is composed of the area of the state. (§ 47-4-3 ACLA 1949)

Sec. 41.10.030. Purpose of district. The purpose of the district is to provide for the orderly development of lands, for guiding settlement, and for conserving soil and soil resources and controlling and preventing soil erosion. (§ 47-4-3 ACLA 1949)

Sec. 41.10.040. Soil conservation board. The district is governed by the Alaska Soil Conservation Board composed of three members. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.050. Appointment. The governor shall appoint members of the board subject to confirmation by a majority of the members of the legislature in joint session. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.060. Qualifications of board members. Members of the

board shall be resident bona fide farmers selected from the major farming areas of the state. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.070. Term of office. The term of office of members is three years, except that initial appointments shall be for terms of one, two, and three years, respectively. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.080. Vacancies. The governor shall fill vacancies by appointment for the unexpired term. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.090. Compensation and per diem. Members receive no salary but receive the same per diem and travel expenses authorized for members of state boards. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.100. Duty of board to advise commissioner of natural resources. At the request of the commissioner of natural resources, the board shall meet and advise him in the exercise of his powers, duties, and functions. (§ 47-4-4 ACLA 1949; am § 1 ch 82 SLA 1960)

Sec. 41.10.110. Powers of commissioner of natural resources relating to soil conservation. The commissioner of natural resources has the power to

(1) conduct land capability surveys and investigations of potential agricultural areas and of soil conservation and erosion control, including necessary preventative and control measures, in the state; to publish the results of these surveys and investigations and to disseminate information concerning the results of the surveys and investigations to prospective settlers and the general public;

(2) make technical guidance and other assistance available to settlers of new land to assure the development of the land in a manner that will permit it to be used in accordance with its capabilities and treated in accordance with its needs;

(3) carry out measures for soil conservation and erosion control within the district, including engineering operations, methods of cultivation, the growing of vegetation, and changes in use of land, with the consent and cooperation of the land occupier or agency having jurisdiction of the land;

(4) cooperate with, furnish assistance to, and enter into agreements with, an occupier of land or agency within the district, subject to the conditions as the board considers necessary to advance the purposes of this chapter;

(5) construct, improve, and maintain soil erosion control and conservation structures as are necessary and practical for carrying out the purposes of this chapter;

(6) develop comprehensive plans for the conservation of soil and control of soil erosion within the district, cropping programs, tillage

FROM: Representative Barbara Lacher

SUBJECT: HB 146

DATE: March 7, 1983

The City of Wasilla has been working with the Department of Environmental Conservation and federal environmental protection agencies since 1978 in planning a city wastewater treatment facilities system. The preliminary planning is completed and public hearings have been conducted. Final design is to be completed by July 1983, and the project ready for bid by October, 1983.

Total project costs which are eligible for grant participation are $8,000,115. Funding sources are as follows:

	FEDERAL E.P.A.	STATE D.E.C.	CITY ASSESSMENTS	TOTALS
Laterals	0 (0%)	1,338,975 (50%)	1,338,975 (50%)	2,677,950 (100%)
Collector	3,078,080 (75%)	513,180 (12.5%)	513,180 (12.5%)	4,105,440 (100%)
Small Diam.	719,950 (85%)	63,525 (7.5%)	63,525 (7.5%)	847,000 (100%)
Sewage Treatment Plant	314,265 (85%)	27,730 (7.5%)	27,730 (7.5%)	369,725 (100%)
TOTALS	4,113,295 (51.6%)	1,943,410 (24.2%)	1,943,410 (24.2%)	8,000,115 (100%)

The cost to owners of property adjacent to the sewer system will be assessed, on the average, about $1,153,100 per 50 feet of property frontage and monthly service charges will be less then $20 per month.

Bill would help Wasilla

JUNEAU—A bill to increase the state's share of payments to communities for water supply, sewage and solid waste facilities to 75 percent is in the finance committee of the legislature.

Sponsoring the bill is Sen. Jay Kerttula, D-Palmer; Frank Ferguson, D-Kotzebue, and Joe Josephson, D-Anchorage.

The bill ups the state participation in funding from 50 percent, as funds are available, of costs not financed by the federal government on projects started after July 1, 1983.

Where federal funds are involved, state grants cannot exceed the difference between federal input and 87.5 percent of the eligible costs.

If the project is a solid waste facility to be used for resource recovery, the state can grant a municipality up to 85 percent of eligible costs.

Locally, the bill might prove beneficial for two sewage projects in the works for Wasilla. That city is developing plans for an innovative waste water treatment project as well as a sewage treatment facility.

POSITION PAPER

RE: CSHB 146

SPONSOR: Representatives Lacher and Larson

Program Effects of Bill

This bill would provide special appropriations of $1,178,000 or a sewage system and $185,786 for a septic treatment plant as grants to the City of Wasilla.

Comments

Governor Sheffield has established a process for review and assignment of priorities for capital grants on a statewide basis. Requests from the City of Wasilla for $987,500 for sewers and $80,000 for septic treatment have been included in that process. With this process in place, the Department believes that an alternative to individual appropriations bills exists and should be considered by the Legislature.

POSITION PAPER

RE: HB 146

SPONSOR: Representatives Lacher and Larson

Program Effects of Bill

This bill would provide special appropriations of $978,500 for a sewage system and $160,000 for a septic treatment plant as grants to the City of Wasilla.

Comments

Governor Sheffield has established a process for review and assignment of priorities for capital grants on a statewide basis. Requests from the City of Wasilla for $987,500 for sewers and $80,000 for septic treatment have been included in that process. With this process in place, the Department believes that an alternative to individual appropriations bills exists and should be considered by the Legislature.

Mark Lewis, Commissioner

21-P1LH

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 146 Date on Bill: 1/28/83
Title: Special appropriations for grants to City of Wasilla for sewage system
Sponsor: Representatives Lacher and Larson
Requestor: House Community & Regional Affairs Committee

1. Estimated fiscal impacts on: Department of Community & Regional Affairs

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital				-0-	-0-	-0-		
Operating				-0-	-0-	-0-		
Total				-0-	-0-	-0-		

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:

Sponsor does not indicate

3. Assumptions:

The Department of Administration would administer this grant. No fiscal impact on this Department.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

FROM: Representative Barbara Lacher

SUBJECT: HB 146

DATE: March 7, 1983

The City of Wasilla has been working with the Department of Environmental Conservation and federal environmental protection agencies since 1978 in planning a city wastewater treatment facilities system. The preliminary planning is completed and public hearings have been conducted. Final design is to be completed by July 1983, and the project ready for bid by October, 1983.

Total project costs which are eligible for grant participation are $8,000,115. Funding sources are as follows:

	FEDERAL E.P.A.	STATE D.E.C.	CITY ASSESSMENTS	TOTALS
Laterals	0 (0%)	1,338,975 (50%)	1,338,975 (50%)	2,677,950 (100%)
Collector	3,078,080 (75%)	513,180 (12.5%)	513,180 (12.5%)	4,105,440 (100%)
Small Diam.	719,950 (85%)	63,525 (7.5%)	63,525 (7.5%)	847,000 (100%)
Sewage Treatment Plant	314,265 (85%)	27,730 (7.5%)	27,730 (7.5%)	369,725 (100%)
TOTALS	4,113,295 (51.6%)	1,943,410 (24.2%)	1,943,410 (24.2%)	8,000,115 (100%)

The cost to owners of property adjacent to the sewer system will be assessed, on the average, about $1,153,100 per 50 feet of property frontage and monthly service charges will be less then $20 per month.

In addition to project costs which are eligible for grant participation, the City of Wasilla is confronted with a requirement for $1,178,500 of non-grant- eligible cost, funding for which must be firmly identified prior to state and federal committment of grant funds. These non-grant eligible costs are as follows:

Purchase of treatment plant site	
Right-of-way for trunt and collector construction	
Construction across Parks Highway	
Engineering and Administration	
Topography mapping	$ 200.000
	$ 1,178,500

For the past four years, the City of Wasilla has committed a considerable amount of scarce resources to this project and public hearings have indicated strong public support; however, the requirement for $1,178,500 "up front" funding is beyond the capability of the City. For this reason, the City of Wasilla respectfully requests the assistance of the Alaska State Legislature.

CITY OF WASILLA, ALASKA, LEGISLATIVE PRIORITIES

CAPITAL IMPROVEMENT PROJECTS 1983

WASILLA SEPTIC TREATMENT FACILITY

PRIORITY # 2

PROJECT DESCRIPTION:

As an intermediate and immediate measure to provide a short term solution to the problems created by (1) a population increase and (2) its resulting impacts, and (3) on-site septage treatment facility to serve its community. The Houston septage treatment facility, when it is on-line, will not have the capacity to serve Wasilla in addition to the rest of the Borough.

There are no septage treatment facilities in the Mat-Su Borough in use at the present time. Septage is hauled to Anchorage for disposal. During late 1982, the two active sewage pumping services were contacted to determine the present quantities of septage produced in the Borough. Approximately 2.9 million gallons of sewage was produced this year within the Borough with a substantial quantity increase occurring in the immediate future. The proposed septage treatment facility at Houston has a design capacity of 2.5 million gallons.

The City of Wasilla must include a septage treatment facility in its capital improvements plan programming since the Houston facility will not be able to accept the increased load anticipated from the regularly pumped septic tanks within the Wasilla area.

TIME TABLING FOR PROJECTS COMPLETION.

Attached is a time line schedule for the project. Estimated project commencement will begin during the first of the 1984 year.

BUDGET AND COSTS:

Legislative or other State assisted funding in the amount of $185,786.00 is required to cover those costs as attached.

OPERATION AND MAINTENANCE COSTS:

It shall be necessary for the City of Wasilla to establish a user fee for the operation and maintenance of the project. Additionally, this project shall "dovetail" with Priority #1-Wasilla Sewage Collection and Treatment Facility with its overall intent to act as an interim measure and serve the immediate needs of the community.

IMPACT ON THE ECONOMIC DEVELOPMENT OF THE COMMUNITY:

There will be a positive impact on the economic development of the community. The cost of residential, commercial, and industrial property development shall be lower due to lack of need for sewage pumping and hauling ro Anchorage.

LOCAL EMPLOYMENT EFFECTS:

Local employment will be created for this project during the planning, design and construction phases as well as after the system goes on line in the form of operation and maintenance. The real benefits of this type of development as the State readily sees is its provision of needed infrastructure for the stable and productive growth of private sector employment security.

IMPACT ON THE MAINTENANCE OF LIFE, HEALTH AND SAFETY:

The City of Wasilla is experiencing a growth rate of 15% to 30% annually. With this, housing development has brought an increase of on-site sewage disposal systems. The City's water is taken from wells and provided to part of the community through a distribution network. This combined with a high water table has created a sensitive environment, including two lakes, which will be negatively impacte through the potential pollution emanating from on-site sewage disposal in a high water table.

SUPPORTING DOCUMENTATION:

Attached to this narrative is the Matanuska-Susitna Borough's statement of support. The project has also been cited as supported and needed by other Borough, State and Federal reports and findings.

PLAN OF STUDY

PROPOSED SEPTAGE TREATMENT FIELD DEMONSTRATION PROJECT

On July 2, 1982, the existing EPA Facilities Planning Grant for the City of Wasilla was increased to provide for an additional planning effort in order to produce an acceptable facilities plan. A copy of the Plan of Study for that effort is attached hereto (Appendix A). Items A, B, C, E and F in that Plan of Study which are required for a POS have not changed and will be incorporated into this POS by reference. This POS will address items D, G and H as required by the EPA Construction Grants Program.

D. An amendment to the previous grants for Facilities Planning for the study area is necessary for the following reasons:

The additional planning effort funded by the July 2, 1982 increase will emphasize the use of Innovative/Alternative solutions. It is anticipated that the result will include a number of septic tanks which must be pumped and maintained on a regular schedule. The purpose of I/A solutions is to provide facilities that can be operated and maintained at a cost the community can afford. The facilities plan, therefore, must address the problem of septage treatment and disposal. There are no septage treatment facilities in the Mat-Su Borough at the present time. Septage is hauled to Anchorage for disposal. Two pumpers are active in the Borough at the present time. They were each contacted to determine the present quantities of septage produced in the Borough. A-1 Cesspool Service, the largest, estimates that, on an average, they pump 10,000 gallons per day, five days a week, or 2.6 million gallons per year. P&B Septic Services have pumped 180,000 gallons from January 1st to August 15th of this year. They anticipate that the rate will probably increase during the balance of the year. This translates to approximately 0.22 million gallons per year. The total amount of septage currently produced in the borough, therefore, is approximately 2.9 million gallons per year. That quantity can be expected to increase over the next ten years.

APPENDIX 1

A proposed septage treatment facility is scheduled to be built in the Big Lake area. It is anticipated that that facility will be completed during the summer of 1983. It will have a design capacity of 2.5 million gallons. The estimated cost of the facility is $521,000 for a cost of $208,400 per million gallon capacity. The designers estimate the O&M costs to be $16.10 per thousand gallons for the first year of operation.

The Wasilla facilities plan must include septage treatment facilities since the proposed plant at Big Lake will not be able to accept the increased load anticipated from the regularly pumped septic tanks within the Wasilla facility plan boundaries. The proposed plant to be funded by this grant increase employs an Innovative/Alternative solution. The 1981 changes in Public Law 92-500 allow for a field demonstration project for an I/A solution during the planning stage to develop the design parameters and to insure that a full scale project will be economically designed or will not be built if the innovative process does not function as intended. If approved, the increased grant will be used to pay for constructing a facility designed for a target capacity of 2,000 gallons per day or .73 million gallons per year. The 2,000 GPD design target was selected for two reasons. The pumper supplying the septage normally carries 2,000 gallons making it more reliable to expect a 2,000 gallon load per delivery. Also, this size project will be necessary to prevent scale up uncertainties when the full scale project is built. This project will be designed to permit it to be incorporated into the full scale project if practical. The projected capital costs for the facility are estimated to be $152,000 per million gallons capacity as compared to $208,400 per million gallon capacity for the Big Lake plant. The estimated operation and maintenance costs will be $10.74 per 1,000 gallons as compared to $16.10 per thousand gallons for the Big Lake plant. These costs are for a completely self-contained small facility. Both the capital costs per million gallons and the O&M costs per 1,000 gallons can be expected to be lower for a full size plant since the relationship is not linear.

By combining the septage treatment facility with a sewage treatment plant, such as an aerated lagoon, it is probable that the second stage fluidized bed, the building housing it, and the subsurface disposal system

can be eliminated. The effluent from the first stage solid separation phase would be discharged directly into the sewage treatment plant. This will drastically reduce both the first cost and the O&M costs for pretreating septage since all that will be required will be a series of concrete tanks to settle out the settleable solids.

The proposed plant will consist of a six compartment concrete tank heated and insulated and buried with the top 8" above ground level. The top will serve as the foundation and floor of the building housing the second stage fluidized bed. The tank will have a total capacity of 20,000 gallons. Compartment #1 will act as a flow equalization tank with a capacity of 5,000 gallons. The contents will be pumped at a uniform rate into tanks #2, 3, and 4 which will serve as three septic tanks in series. The effluent from tank 4 will be collected in tank 5 and will be pumped from tank 5 through the second stage fluidized bed reactor. The effluent from the second stage will go into tank 6. Tank 6 will have a dosing siphon chamber which will discharge into a subsurface soil absorption field. Sludge collected in tanks 2, 3 and 4 will be pumped as necessary to a sludge drying bed. The sludge drying bed will have four compartments for flexibility and the dried sludge will be picked-up with a front-end loader and buried in a landfill at the site. The second stage anaerobic fluidized bed has been investigated by EPA. EPA publication 600/2-82-001, dated February, 1982, entitled "Technology Assessment of Anaerobic Systems for Municipal Waste Water Treatment" reports on an EPA sponsored study of the use of an anaerobic fluidized bed to provide secondary treatment for domestic wastes. The anaerobic fluidized bed consists of a vertical tube, in this case two feet in diameter, containing finely divided media, for example ion exchange media, and a pump. The pump is sized to maintain a vertical velocity such that the particles are suspended continuously but the velocity is too low for wash-out. The anaerobic bacteria collect on the surface of the media. The gases produced in this case will be flared. The process is extremely simple and maintenance free since the only piece of equipment is a pump. The anaerobic fluidized bed we propose to use in the study was developed by the Ecolotrol Corporation of New York. The chief of research for Ecolotrol, Roger Olson, advises that Ecolotrol has conducted pilot studies on a number of very strong wastes but never on

septage. The most closely comparable waste was a food processing waste with BOD, suspended solids and COD comparable to those reported for settled septage in the literature. The pilot study was successful for the food processing waste. The reactor will be built by Ecolotrol and shipped to Wasilla for installation in the building. Ecolotrol has offered technical support for the study at no cost. The research engineer from the EPA Research Lab in Cincinnati who was the project engineer for the EPA study described above, Robert Bowker, has also offered technical support. Finally, Dr. Tim Tillsworth, Professor of Sanitary Engineering at the University of Alaska, who has investigated extensively the physical and chemical characteristics of septage in Alaska, has offered technical support.

The demonstration project will be built on land owned by the City of Wasilla and located approximately 1.5 miles southwest of the City center adjacent to the Knik-Goosebay Highway. A site plan with test hole data is attached (Appendix B). The surrounding area is undeveloped and owned by the State.

The success of this system will also be beneficial to the Mat-Su Borough since they will be responsible for funding and operating future septage treatment facilities. They have authorized $8,000 to partially fund the study. For their $8,000, they will receive a copy of the report and be kept up-to-date technically on the study. A copy of the agreement is enclosed with this application.

Sampling and testing will be accomplished by subcontract with Mat-Su Test Lab.

Among the objectives of this study are the following:

1) The literature contains no reference to septage studies conducted to determine the settlability of the solids over a relatively long period of time. The results reported generally are from Imhoff cone tests of sixty minutes. The material in a septic tank before it is pumped typically includes a settled sludge

layer on the bottom, a scum layer on the top, and a liquid fraction between the two which is the material discharged to the subsurface disposal system in the typical ST-SAS home system. An important part of the study will be to measure the BOD, COD and suspended solids in each of the compartments of the solids separation phase to determine the rate at which solids separation occurs. The concrete tank will be equipped with thermostatically controlled heating pads so that the effect of temperature on settlability can be determined. Finally, a retention time at temperatures in the mesophilic range is expected to enable the solids separation phase to function as an inefficient anaerobic digester. Results of this analysis will impact on the capacity of the second stage reactor.

2) Efforts to utilize Municipal aerated lagoons for treatment of septage have failed because of the heavy build-up of solids at the point where septage enters the lagoon. If the settlable solids are removed during the initial solids separation phase, it would be reasonable to believe that the effluent from the solids separation phase could be introduced into a lagoon or other treatment facility without creating a problem. The elimination of the second phase fluidized bed, the building housing it and the subsurface absorption system will drastically reduce the first cost and the O/M costs.

3) The study above will also permit the determination of the pattern of settlable solids build-up in the solids separation phase. For example, a five to eight day retention time for the solids seperation phase may not be necessary.

4) The usefulness of using an anaerobic fluidized bed for the second stage treatment will be determined. For a self-contained facility where the effluent is disposed of in a subsurface soil absorption system, the important parameter is suspended solids. The ability of an anaerobic fluidized bed to reduce suspended solids will be critical. Also, in most of the studies

accomplished to-date by Ecolotrol, they have observed a two to three month period after start-up until the methane formers in the column have reached the necessary concentration. If the methane formers can begin to be established in the heated and insulated solids separation tank, it would appear that this start-up period could be reduced.

5) Finally, the subsurface absorption system will be divided in four parts in an effort to determine the suspended solids levels which can be discharged to the drains without damaging the bed.

G. The schedule for completion of each specific task necessary to complete the study has been prepared. Table 1 lists the major tasks, shows their sequencing and the approximate amount of time to complete each one.

H. Table 2 lists the estimated costs for each major task and the total estimated costs.

A recap of the costs for the project is as follows:

Design (12%)		$ 11,140.00
Soils Investigation		2,200.00
Construction		110,056.00
Construction Management (5%)		4,633.00
Study		46,000.00
O&M during Study		
Power	$ 1,657.00	
*Septage Hauling	6,500.00	
Total O&M		$ 8,157.00
Legal and Administrative (2%)		3,540.00
TOTAL		185,786.00

It is proposed that the city will let six separate contracts for the construction phase which will be prepared by Pohl and Associates. They will be:

CONTRACT NO.	WORK TO BE DONE	ESTIMATED COST
1	Clearing & Site-work	$ 12,477.00
2	Concrete Tank	13,009.00
3	Building	21,493.00
4	6" Cased Well	1,152.00
5	Fluidized Bed Unit	44,941.00
6	Fencing (6' Chain Link)	6,977.00
	TOTAL	$ 100,051.00
Contingency (10%)		10,005.00
		$ 110,056.00

Construction Management will be by Pohl and Associates.

Statement made by Guy Wooding, Chairman, Matanuska-Susitna Borough Planning Commission to City of Wasilla, City Council at public hearing on January 13, 1983.

STATEMENT ON ROLE OF CITY OF WASILLA
SEWER SYSTEM WITHIN MATANUSKA-SUSITNA BOROUGH
COMPREHENSIVE PLAN

We understand that the City of Wasilla is considering adoption of A PLAN intended to result in a sewer system for the City of Wasilla.

You should know that a sewer system within the City of Wasilla is a critical and necessary element of the Wasilla Comprehensive Plan approved by the Wasilla City Council and the Matanuska-Susitna Borough Assembly in November, 1982.

The Matanuska-Susitna Borough Planning Department and its consultants DOWL Engineers and Howard, Needles, Tammen, Bergendoff (HNTB), are also very nearly completed with their work on a proposed Borough comprehensive plan and the Planning Commission has had an opportunity to review various portions of the plan.

In our comprehensive planning we have striven for the best of two different worlds:

First, a community with a rural and open aspect which preserves many of the features that make this area look and feel like a part of Alaska, rather than a suburb, and

Second, a community where there are the retail and distribution jobs for local residents, local shopping and local services convenient for everyone. You shouldn't have to go to Anchorage for a day of shopping.

The Comprehensive Plans call for most of the Borough being unsewered, which means larger lot subdivisions, with minimum lot sizes of one acre to a dwelling. Where there is tree cover this large lot type of residential development will result

The City of Wasilla is fortunate in that it is located close to two attractive water bodies--Wasilla Lake and Lake Lucille, but these features which result in a very fine setting also create an immediate probability of water pollution if discharge of sewage is handled on-site.

The fathers of the City of Wasilla recognize that sewers will be necessary if the City of Wasilla is to house substantially more residences and commercial establishments than it does today.

We expect that the Matanuska-Susitna Borough population will triple in next two decades and cannot visualize the mid-Valley portion of the Borough functioning successfully without further filling in and development of the City of Wasilla. We know that this plan is the plan that the City of Wasilla relied upon when the City Council approved a city plan for the City of Wasilla and we know that this is the plan that the Matanuska-Susitna Borough Planning Commission and the Borough Assembly assumed to exist when the plan for the City of Wasilla was adopted by both the City and Borough.

17.44.045 Delegations.

The City Council of the City of Wasilla shall carry out the planning and zoning functions set forth in this chapter within the City. The City Council shall establish by ordinance a City Planning Commission and may delegate to it or other city officials duties and authorities delegated by this chapter.

II. LAND USE MAP AND DISTRICTS

17.44.100 Districts Established.

The City of Wasilla is divided into the following land use districts:

A. Core District.

(a) corresponds to first phase of water system

(b) will receive initial sewer service.

(c) reflects the sector of the community that is the most accessible, has the greatest intensity of development, and is the focus of primary commercial and civic activities

(d) the boundary of the core district will expand as new sewer or water assessment districts adjacent to the existing core district are approved.

B. Intermediate District

(a) corresponds to area between the core district and city limits

(b) planned for eventual public water and sewer service.

(c) reflects sectors of the community that are served by arterials, have a moderate intensity of development, and contain some commercial, industrial, and community activities

(d) the boundary of the intermediate district shall expand with annexations to the City of Wasilla.

C. Creekside Estates Special Use District Excluded.

The Creekside Estates Special Land Use District described as the NW¼NE¼ Section 15, Township 17 North, Range 1 West, Seward Meridian is excluded from the provisions of this chapter.

17.44.105 Land Use District Map.

The districts described are bounded and defined on an official map dealing with the district areas of Wasilla entitled "Land Use District Map of the City of Wasilla, Alaska." Copies of the map are on file in the offices of the City of Wasilla and the Matanuska-Susitna Borough Planning Department. This map is incorporated as a part of this ordinance as if the districts were described in detail according to written descriptions in the ordinance.

Department of Transportation and Public Facilities. All bids with the names of the bidders and the amounts of the bids, together with all documents pertaining to the award of a contract, shall be made a part of a file or record and retained by the department for three years, unless reproduced by microfilming and these files or records are open to public inspection at all reasonable times. An aggrieved bidder may within five days after an award of contract appeal to the department for hearing, with notice to interested parties, for redetermination and final award in accordance with law.

(b) A contract for professional services shall be awarded in accordance with AS 24.23 or AS 36.98. (§ 4 art IV ch 82 SLA 1955; am § 1 ch 64 SLA 1976; am Executive Order No. 39, § 11 (1977); am § 9 ch 144 SLA 1982)

Effect of amendments. — The 1982 amendment, effective July 22, 1982, designated the former provisions of this section as subsection (a), and in that subsection, added "Except as otherwise provided in AS 37.05.230" to the beginning, deleted "taking into consideration conformity with the specifications, terms of delivery, and other conditions imposed in the call for bids" from the end of the first sentence, and substituted the present second, third, and fourth sentences for those set out in the main pamphlet. The amendment also added subsection (b).

Article 5. General Provisions.

Section
315. Grants to municipalities
316. Grants to named recipients
317. Grants to unincorporated communities
318. Exemption from regulations
319. Definitions

Sec. 37.05.300. Interpretation of AS 37.05.010 — 37.05.330.

Opinions of attorney general. — As to applicability of the chapter to the University of Alaska, see notes under this catchline following chapter heading.

Sec. 37.05.315. Grants to municipalities. (a) When an amount is appropriated or allocated as a grant to a municipality, the Department of Administration shall promptly notify the municipality of the availability of the grant. When the Department of Administration receives an agreement executed by the municipality which provides that the municipality (1) will spend the grant for the purposes specified in the appropriation or allocation; (2) will allow, on request, an audit by the state of the uses made of the grant; and (3) assures that, to the extent consistent with the purpose of the appropriation or allocation, the facilities and services provided with the grant will be available for the use of the general public, the Department of Administration shall pay the grant directly to the municipality. The agreement executed by a municipality under this section shall be on a form furnished by the Department of Administration and shall be executed within 60 days after the effective date of the appropriation or allocation.

(b) An appropriation or allocation for a grant to a municipality for construction of a public facility lapses if substantial, ongoing work on the project has not begun within five years after the effective date of the appropriation or allocation.

(c) In accepting a grant of money for construction of a public facility, a municipality covenants with the state that it will operate and maintain the facility for the practical life of the facility and that the municipality will not look to the state to operate or maintain the facility or pay for its operation or maintenance. This requirement does not apply to a grant of money for repair or improvement of an existing facility operated or maintained by the state at the time the grant is accepted if the repair or improvement for which the grant is made will not substantially increase the operating or maintenance costs to the state.

(d) Not less than 20 percent of a grant shall be paid to a municipality within 10 days of the effective date of the agreement under (a) of this section. The remainder of the grant shall be paid either in monthly installments equal to the amount of grant money the municipality expended in the previous month or in a lump sum as determined by the Department of Administration. (§ 1 ch 156 SLA 1980; am § 1 ch 4 SLA 1982)

Effect of amendments. — The 1982 amendment, effective January 16, 1982, in subsection (a), substituted "amount is appropriated or allocated" for "appropriation is made" in the first sentence, inserted "or allocation" in items (1) and (3) in the second sentence, and added "and shall be executed within 60 days after the effective date of the appropriation or allocation" to the end of the third sentence; redesignated the former fourth and fifth sentences of subsection (a) as subsection (d); inserted "or allocation" in two places in subsection (b); substituted "a" for "each" preceding "municipality covenants" and "the practical life of the facility and that the municipality" for "its practical life and that it" in subsection (c); added the second sentence of subsection (c); deleted the provisions of former subsections (d), (f), and (g), which may now be found in AS 37.05.316, 37.05.317, and 37.05.318, respectively; and in present subsection (d), added "under (a) of this section" to the end of the first sentence. The substance of the provisions of former subsection (e) may now be found at the end of the third sentence of subsection (a).

Sec. 37.05.316. Grants to named recipients. When an amount is appropriated or allocated to a department as a grant for a named recipient which is not a municipality, the department to which the appropriation or allocation is made shall promptly notify the named recipient of the availability of the grant and request the named recipient to submit a proposal to provide the goods or services specified in the appropriation act, or both, for which the appropriation or allocation is made. At the same time, the department may issue a request for proposals from other qualified persons to provide the same goods or services, or both, in the same area. The department shall contract with the named recipient unless the Office of the Governor, with due regard for any local expertise or experience among those making proposals, determines that an award of the contract to a different party would

better serve the public interest. If the contract is awarded to another party than that named by the legislature, the basis of that action shall be stated in writing at the time the grant is issued and a copy of the written statement shall be sent to the Legislative Budget and Audit Committee. A contract shall be executed within 60 days after the effective date of the appropriation or allocation. The purchase of the goods or services, or both, shall be in accordance with AS 37.05.230(1)(C). (§ 2 ch 4 SLA 1982)

Effective dates. — Section 3, ch. 4, SLA 1982, provides that this section take effect January 16, 1982, in accordance with AS 01.10.07(c).

Editor's notes. — The provisions of this section were formerly contained in AS 37.05.315(d) as it existed prior to the 1982 amendment of that section.

Sec. 37.05.317. Grants to unincorporated communities. When an amount is appropriated or allocated as a grant under this section to an unincorporated community, it shall be disbursed as follows:

(1) Within 45 days after the effective date of the appropriation or allocation, the Department of Community and Regional Affairs shall notify the governing body of the unincorporated community, if any, that a grant is available.

(2) The Department of Community and Regional Affairs shall determine if there is a qualified incorporated entity in the community area that will agree to receive the grant and administer it, subject to terms generally applicable to private grantees. If there is more than one such entity, the Department of Community and Regional Affairs shall select the most qualified and the grant shall be awarded to that incorporated entity for the purposes specified in the appropriation act. However, the Department of Community and Regional Affairs shall give preference to a nonprofit corporation organized by a community for receipt of the grant.

(3) If there is no incorporated entity qualified to receive the grant, the Department of Community and Regional Affairs shall administer the program as specified in the appropriation act directly or through agents or contractors with whom it may contract in the community area. (§ 2 ch 4 SLA 1982)

Effective dates. — Section 3, ch. 4, SLA 1982, provides that this section take effect January 16, 1982, in accordance with AS 01.10.07(c).

Editor's notes. — The provisions of this section were formerly contained in AS 37.05.315(f), which was deleted by the 1982 amendment.

Sec. 37.05.318. Exemption from regulations. Notwithstanding the Administrative Procedure Act (AS 44.62), the Fiscal Procedures Act (AS 37.05), and the Executive Budget Act (AS 37.07), a state agency may not adopt regulations or impose additional requirements or procedures to implement, interpret, make specific, or otherwise carry out the provisions of AS 37.05.315 — 37.05.317 unless required

RE: CS HB 148, "An Act relating to the preservation of agricultural land."

The intent of this legislation is to provide a mechanism to preserve and protect existing, productive agricultural lands in Alaska. Several other states in the Union have enacted legislation similar to this with effective and economically beneficial results. This particular legislation is patterned from one of the most successful: King County, Washington State.

It has been the policy of the Legislature and the Administration to encourage the development of agriculture in Alaska, but little attention has been given to the protection of existing agricultural lands from the pressures of subdivision and development. Our existing farm land is a nonrenewable resource; once the land is converted to subdivisions, this important resource is lost permanently to the people of Alaska.

In the Matanuska-Susitna Valley, for example, glacial geologic history has resulted in two main types of lands that run parallel to each other the entire length of the valley. Extremely rich agricultural soils, over a foot thick, lie next to glacial gravels. Existing agricultural lands on this rich soil can not be developed on glacial gravels. Subdivisions and industrial development, on the other hand, can be built on either sedimentological deposit. Furthermore, development on a gravel deposit is, in the long run, more economically prudent due to the drainage that is more effective for sewage in a predominantly gravel deposit. The long range merits of this legislation outweigh the short term profits of development on lands with existing access roads and utilities. Sufficient lands are available in the Matanuska-Susitna Valley and in other regions of the state to permit subdivision and development along with agricultural land preservation.

The fact that the state is investing millions of dollars every year for the development of new agricultural lands, makes it difficult for some legislators and administrators to imagine the need for protection of existing agricultural lands. The land use patterns in this state, unfortunately, have resulted in urban settlement on some of the best agricultural lands in the state. Once shopping malls and subdivisions are in place, these rich agricultural lands will never be recovered. It is only through intelligent planning now that we can invest in the future economic stability of this vital industry.

The intent of CS HB 148 is to permit the Director of the Department of Natural Resources to very selectively purchase the agricultural rights of only those lands which are of high quality farm value and are being threatened by urban sprawl such as we are presently experiencing in some parts of the state. The protection of these productive farm lands will result in developing the necessary security to encourage the growth of a healthy private sector infrastructure for the agricultural industry.

I urge your support of this important legislation.

HB 148

Will Alaskan Farmers Sell the Development Rights to their Land?

by William G. Workman*, Edward L. Arobio**, and Anthony F. Gasbarro***

INTRODUCTION

In Alaska, as in many other parts of the country, market forces are producing a change in land-use patterns that is resulting in the conversion of highly productive agricultural lands to nonagricultural uses. Property on the urban fringes of Anchorage and Fairbanks that once produced vegetables and grains or supported dairy farms appears most vulnerable to this conversion to residential or industrial sites. Within the last three years alone, for example, 27 farms have been subdivided in the Palmer-Butte area of the Matanuska Valley. Many of the subdivisions along the Parks Highway between Willow and Talkeetna are located on lands with high agricultural potential.

This displacement of farms by subdivisions, roads, shopping centers, and other nonagricultural enterprises is viewed by some Alaskans as not being in the state's best interest. Those concerned about the loss of agricultural lands argue that the areas most likely to be converted represent some of the best agricultural lands in the state and are vital to the maintenance and further development of an agricultural economy in Alaska. In addition, it is suggested that the preservation of these areas will help to maintain a much-desired way of life and to provide needed open space and other environmental amenities at the urban fringe. These concerns have resulted in actions by the

School of Agriculture and Land Resources Management
Agricultural Experiment Station

August 14, 1978

Dear

The Agricultural Experiment Station at the University of Alaska is conducting a survey of Alaskan farmers. This survey is part of a study concerning the future use of agricultural lands near population centers of Alaska. We need your assistance to make this study a success.

Agricultural lands are rapidly being converted to other uses such as residential lots, airports, and shopping centers. Land is becoming more expensive and some farmland owners are convinced that it makes more sense to develop agricultural land than to farm it. Other people are concerned that we are converting too much of the farmland near cities to nonagricultural uses and that it would be wise to preserve these lands so that food can be grown close to large population centers and so that there will continue to be open space near urban areas.

Many ways are being tried to preserve agricultural lands in other areas of the United States. Some of these include tax incentives, zoning and the trading of land. Another way is for a state or municipality to purchase from the farmland owner his right to develop his land for anything but farming. For a price, the farmer would give up his option to use his land for nonagricultural purposes; the land would still be his, but he could do nothing that would impair its agricultural potential.

The principal objective of our study is to determine (1) farmers' interest in selling development rights and (2) what it might cost the State of Alaska to purchase these rights. A short questionnaire is enclosed and we would be grateful if you will fill it out and return it to us in the enclosed postage paid envelope before September 1, 1978. All information will be kept confidential. If you desire we will be happy to send you a final report at the completion of the study.

Thank you for your cooperation,

William G. Workman

ALASKA AGRICULTURAL LANDS SURVEY

1. How many acres do you currently farm or ranch?
   Your own land _____
   Land rented or leased _____
   From other landowners _____
   From the government _____
   Total acres _____

2. What crops or livestock do you produce?

Crops	Acres: Your own	Rented from others	Leased from government
Vegetables or potatoes			
Small grains			
Hay or silage			
Planted Pasture			
Native Pasture			

Livestock	Number of Head	Livestock	Number of Head
Dairy cattle		Swine	
Beef cattle		Poultry	
Sheep		Other (specify)	

3. What do you estimate is the per acre market value of agricultural land:
   Your own land: Cleared _____$/acre Uncleared _____$/acre.
   That you rent (exclude government leases): Cleared _____$/acre.

4. Would you be interested in selling development rights to your agricultural land? Selling such rights would mean that your land could be used for agricultural or forestry purposes only.

Degree of interest	Cleared	Uncleared
Not interested		
Slightly interested		
Moderately interested		
Highly interested		

5. At what price would you sell the development rights to your agricultural land: _____$/acre.

6. Please describe the location of your farm or ranch.
   Nearest town _____ Distance from town _____
   Direction from town _____
   Thank you for your cooperation. A summary of the results of this survey will be available to you on request

Figure 2

state and municipal governments in Alaska to intervene in the land market to slow down or stop the loss of agricultural land. Methods employed include tax incentives (use-value assessment of farmland) and the sale of only the agricultural rights on state and municipal lands.

Recently, some state government officials have developed an interest in a new method of agricultural land preservation that is being adopted in some of the eastern states. This method involves the public purchase of nonagricultural development rights on agriculture lands currently held in the private sector. Usual development rights associated with a parcel of real property permit the landowner to develop his land beyond its current agricultural use, and because those rights can be separated from the total bundle of rights, they can be sold, thus transferring from the landowner the right to develop his land. This, then, is the concept behind the purchase of development rights as an agricultural land control device. In order that land remain in agriculture use in areas being converted to other uses, governments might purchase the development rights from agricultural lands. These lands could then be used only for agricultural purposes.

In June of 1978, the Agricultural Experiment Station at Fairbanks was asked by the Alaska Department of Natural Resources to evaluate such a program for Alaska. As a part of this assessment, a survey of Alaska farmers and ranchers was conducted primarily to determine their interest in such a program and to obtain estimates of the costs of purchasing these development rights. The results of this survey are reported here.

SURVEY RESULTS

During August of 1978, a questionnaire, with a brief explanation of the development rights concept in the cover letter (Figure 1 and 2), was mailed to 263 agricultural landowners in the most important farming or livestock areas of the state. Since there is no statewide, farmers' organization in Alaska, the names of landowners were obtained from the mailing lists of state and federal agencies that distribute agricultural information. Undoubtedly these lists did not include all of the people who consider themselves farmers. Of the questionnaires mailed, 18 were returned as undeliverable, leaving 245 that actually reached their destination, of which 112 (46%) were returned completed (Table 1).

Questionnaire recipients were asked to indicate their degree of interest in selling the development rights to their cleared and uncleared agricultural lands. Specifically they were asked to indicate whether they were highly, moderately, slightly, or not interested in selling these rights. Approximately 94%, 106 of 112 respondents, answered this question. The distribution of these expressions of interest can be seen in Table 2.

Most of the respondents in all regions except the Matanuska-Susitna area expressed little or no interest in selling develop-

ment rights. Those respondents living in the Matanuska-Susitna region were evenly divided on the question: half indicated little or no interest and half expressed moderate to high interest. On a statewide basis, 65% expressed little or no interest and 35% indicated moderate to high interest. Over half of all those moderately or highly interested in selling development rights were from the Matanuska-Susitna region.

Questionnaire respondents were also asked to estimate the value of their farmland. Sixty-nine of the 112 respondents indicated what they perceived as the market value of their cleared land and 62 answered the same question about uncleared land. The distributions of these values are shown in Table 3. On a statewide basis, most of the respondents perceived the market values of both uncleared and cleared land to be less than $5,000 per acre. Uncleared land was valued at less than $5,000 per acre by 77% of the respondents and at less than $3,000 per acre by 65% of the respondents. Correspondingly, for cleared land 77% of the respondents valued their land at less than $5,000 per acre while 56% indicated a value of less than $3,000 per acre.

Average market values for cleared and uncleared land as perceived by the respondents were calculated for each region. These data are summarized in Table 4. Average values for cleared land ranged from $1,500 per acre in Delta to $3,900 per

Table 6: Average Development Rights Values (Dollars per Acre)

Region	Value	No. of Respondents
Fairbanks	$3,200	5
Matanuska-Susitna	3,600	21
Kenai-Kodiak	3,100	8
TOTAL		34
WEIGHTED AVERAGE	$3,400	

acre in the Fairbanks region. Three of the regions (Fairbanks, Matanuska-Susitna, Kenai-Kodiak), accounting for nearly 80% of the respondents, differed by only $200 per acre in the perceived average value of cleared land with values ranging between $3,700 and $3,900 per acre. The weighted-average, cleared-land value for the five regions was $3,300 per acre.

Uncleared land values averaged slightly lower than cleared land values and ranged from $900 per acre in the Copper River region to $3,600 per acre in the Matanuska-Susitna region. As with cleared land, the Fairbanks, Matanuska-Susitna, and Kenai-Kodiak regions accounted for nearly 80% of the survey respondents and showed a relatively narrow range of perceived land values. Average land values for uncleared land in these regions were between $2,900 and $3,600 per acre. The weighted average for all five regions was $2,800 per acre.

Questionnaire recipients were asked to assess the value of the development rights associated with their farmland. A value of development rights was reported by 39 of the 112 respondents (35%). Thirty-four of these responses were from the Fairbanks, Matanuska-Susitna, and Kenai-Kodiak areas. Nearly 70% of the respondents valued their development rights at less than $4,000 per acre. The distribution of development rights values can be seen in Table 5.

Average development rights values as perceived by the respondents were calculated for the Fairbanks, Matanuska-Susitna, and Kenai-Kodiak regions. These values are shown in Table 6. Average values were not calculated for the Copper River and the Delta regions because so few of these contacted in these areas responded to this part of the questionnaire. Average development rights values in the three areas mentioned ranged between $3,100 per acre and $3,600 per acre. Values were highest in the Matanuska-Susitna region.

Table 7: Farm Distance from Nearest Community Related to Degree of Interest

Distance Category	Percentage of Respondents Reporting	Moderate to High Interest	Little or No Interest
0-5	41	39	43
6-10	24	29	21
11-15	16	12	19
16-20	7	5	9
21+	12	15	9

[a]Based on 111 farmers reporting.

Average development rights values were also calculated by degree of interest, again using data from the Fairbanks, Matanuska-Susitna, and Kenai-Kodiak regions. Calculations showed that those with a moderate or high interest in a development rights program on the average valued these rights at $2,145 per acre. Those not interested in the program put a much higher value on these rights, $4,662 per acre. Respondents in the moderate-to-high interest categories accounted for 63% of the total acreage represented in the survey responses.

Additional analysis of the survey data was undertaken to determine whether or not a landowner's interest in a development rights purchase program and/or his perceived value of these rights were related to the distance between his farm and the nearest population center. Table 7 presents a summary of the data relating to the interest/distance question. One can observe that the distributions of responses are similar between the moderate-or-high and low-or-no interest categories and are, therefore, similar to the pattern shown for all responses.[1] This close relationship suggests that farmers' interest in selling development rights is not significantly influenced by the location of his farm relative to a population center. When data for just those farm owners living near Palmer and Wasilla were broken out and analyzed in the same way, the identical conclusion was drawn.

We also addressed the issue of whether a landowner's perception of the value of the development rights to his property was influenced by the location of the farm relative to a population center. The expectation was that the closer the farm was to a town or city, the more attractive would be that land for development purposes and that this relative attractiveness would be reflected in the perceived value of the development rights. Unfortunately the quality of the data obtained through the survey did not allow a rigorous test of this proposition on either a local or statewide basis.

The data in Table 8 are presented to show the nature of the relationship or lack thereof between distance and development rights value as perceived by farmers near Palmer. No clear pattern emerges but, again, this conclusion must be qualified by recognizing that the data are not taken from a random sample. The fact that the expected relationship did not occur may perhaps also be explained by the existence of unrealistic expectations on the part of some landowners regarding the development value of their property. Consequently, these perceived values may not represent the minimum payments that these landowners might be willing to accept to forego their development options.

[1]Using the chi square test for independence with the data on which Table 7 is based, we were not able to reject the hypothesis of independence of interest and distance at any reasonable level of significance. One must recognize, however, that these data were not obtained through random sampling. Thus, any inferences about the views of farmers in Alaska must be regarded with caution.

CONCLUDING REMARKS

The survey described here was designed to assess Alaska farmers' interests in participating in a development rights acquisition program for preserving agricultural lands and to provide an estimate of the cost to the state of purchasing these rights. While agricultural landowners in the Matanuska-Susitna Valley areas appeared the most receptive to this land use control concept, farmers surveyed statewide were generally not interested in selling the development rights to their farmland. When faced with the hypothetical proposition of selling these rights, nonetheless, farmers on the average valued the development options at $3,400 per acre.

While it would be difficult to state confidently why farmers lack enthusiasm for the development rights purchase concept, several explanations appear plausible. First, as reflected in written comments on the returned questionnaires, some landowners may feel this approach to be just another invasion in their lives by "big government." Also, questionnaire respondents may have felt it to be a wise strategy, considering possible future price negotiations, to appear initially uninterested in disposing of their development rights.

Another possible explanation is that agricultural landowners might not be interested in selling development rights now since they anticipate that these rights will be worth more at some later date. This explanation, however, is not entirely satisfactory, since land prices and, therefore, development rights values presumably reflect the discounted value of future development benefits. Thus, in order for this reasoning to offer any promise, one must also argue that these farmers view the market as presently failing to accurately anticipate future development patterns.

The results obtained in this survey should be viewed with caution. Although a high percentage (46%) of delivered questionnaires was completed and returned, the sampling technique and the fact that some respondents did not answer all questions may have biased the results. Also, the concept of purchase of development rights was new to many farmers and this lack of familiarity may account for some of the negative interest shown by farmers. Still, the conclusion that must be drawn from this survey, keeping in mind the preceding caveats, is that Alaskan farmers at this time show little enthusiasm for the idea of selling their farmland development rights and place a significant value on these rights *vis-a-vis* the total market value of their agricultural land.□

SUBJECT: Preservation of agricultural land (CSHB 148 (C&RA))

TO: Representative Barbara Lacher

FROM: Richard A. Bradley
Legislative Counsel

You have requested a sectional analysis of the above described bill. You have also asked that I comment on a particular set of circumstances.

As a preliminary matter, I must advise you that a sectional analysis or summary of a bill should not be considered an authoritative interpretation of the bill; the bill itself is the best statement of its contents. For a full explanation of any point, please consult the bill itself.

I. Sectional Analysis.

Sec. 1 of the bill establishes a new chapter at AS 03.07 relating to "preservation of agricultural land.

Sec. 10(a) provides that the director [of agriculture] may acquire an "agricultural preservation easement" in certain privately owned agricultural land.

Sec. 10(b) requires the privately owned agricultural land to meet the requirements of AS 03.07.020. It also requires the state land to be exchanged to be classified for a purpose consistent with the exchange.

Sec. 10(c) requires the land offered to have the same monetary value as the land to be exchanged; an exchange with the transfer of money to equal the difference in value is permitted.

Sec. 10(d) provides that the director may not acquire an easement or exchange state land "except to preserve the agricultural use of the land."

Sec. 10(e) establishes public notice requirements for the acquisition of an easement or exchange. It also provides that the basic documents involved in the acquisition of the easement or the exchange remain public documents.

Sec. 10(f) provides that the operation of the chapter is "voluntary." A parcel may be considered for exchange only on the application of the owner of the land. And after the exchange or acquisition, the owner may not be required to carry out affirmative "agricultural activities" so long as the land is not subdivided or used for "residential, commercial, or industrial purposes or activities which are not related to agricultural uses."

Sec. 10(g) provides that the director may not use funds appropriated from the general fund of the state for the purpose of implementing AS 03.07 unless the appropriation is "specifically stated to be for that purpose." Funds from other sources may be used.

Sec. 20 describes the land eligible for agricultural preservation. It must be privately owned. The soil under no less than 40 percent of the surface of the parcel must meet stated standards established by the U. S. Soil Conservation Service. It is also required to be either (1) a parcel not less than 40 acres in cultivation or farm use; or (2) a parcel not less than 20 acres in cultivation or farm use which is adjacent to an established farm or farms totalling no less than 40 acres that has been in operation as a farm for no less than 10 years.

Sec. 30 establishes priority districts for the situation where the director does not have adequate funds to purchase easements in all offered land. Five levels of priority are established.

Sec. 40 establishes criteria for the selection of land within a single priority district. Five levels of criteria are offered.

Sec. 50 relates to agricultural land within a municipality. It requires the director to consider "any comprehensive plan or ordinances of the municipality on municipal farmland

preservation priorities adopted by the municipality" before making an allocation of "easement money" to a farmland preservation priority district within the municipality. Before making the allocation, the director shall also consider recommendations from the municipality regarding priorities.

Sec. 60 relates to the acquisition of the easement or the exchange. Sec. 60(a) requires that an offer from a private land owner for participation under this chapter be in writing.

Sec. 60(b) requires the owner to specify the price at which the owner will agree to the sale. Also required is a complete description of land and an appraisal in support of the price.

Sec. 60(c) requires the director to respond within 30 days on the "sufficiency of the offer." This apparently relates to the the extent to which an offerer has fully complied with the specific requirements of sec. 60(b). If insufficient, the director must specify the area of the insufficiency and give 30 days for compliance. If the compliance is made within the 30 days after notification by the director, the "land is determined to qualify as land that meets the requirements of AS 03.07.020." Note an unstated requirement: that the land also meets acreage requirements.

Sec. 60(d) requires notification to a municipality of the determination made under (c). The municipality may request reconsideration. If reconsideration is requested, the director shall hold a public hearing in the municipality before an offer to sell or exchange is given to the owner. The municipality may appeal an adverse decision to the commissioner.

Sec. 70 provides that the director may accept the offer to buy or exchange land or make a counter-offer. The section appears to contain some awkward language; it provides that "The director may accept the offer . . . or may make a counter offer . . . within 90 days after approval of the landowner's offer to sell or exchange an agricultural preservation easement." I suspect that the emphasized phrase should rather read: "a determination of eligibility for exchange or sale of an easement under AS 03.07.060." Another unstated requirement is likely to be that the priority districts have been established; an eager owner may

move too fast for the time threshold established in the bill.

The section gives an owner of land 30 days for a response to the offer or counter offer of the director.

Sec. 80(a) provides that the maximum valuation of an easement acquired under this chapter is either (1) the asking price or (2) the difference between the fair market value of the land and the agricultural value of the land, -- whichever is less.

Sec. 80(b) requires the director to use appraisals by qualified appraisers, a defined term.

Sec. 90(a) outlines uses of the land under an agricultural preservation easement. Five broad uses are permitted.

Sec. 90(b) provides that the establishment of an agricultural preservation easement does not grant a member of the public access to the property or affect existing easements, rights-of-way, or rights of access that did not exist before. And "residential subdivision and the removal from the land of minerals or materials [which usually means gravel] for commercial purposes are not permitted."

Sec. 100 establishes definitions. While they are somewhat technical, they do not require review in this analysis. Among the terms defined are "agricultural operations", "agricultural preservation easement", "agricultural use", "agricultural value", "development rights", "fair market value", "qualified appraiser", and "residential subdivision". As suggested at the beginning of this memorandum, "director" means the director of agriculture in the Department of Natural Resources.

Sec. 2 amends AS 29.53.035(a); the amendment specifically provides that

> The owner of farm land subject to this subsection who grants an agricultural preservation easement under AS 03.07 may not be required to reimburse the state under this subsection for revenue lo s.

The section amended generally permits land not subject to an agricultural preservation easement to receive tax protection so long as it is used for farm purposes. The section

requires a certain reimbursement to the state for its payments of municipal taxes if it is subdivided.

Sec. 3 amends AS 29.53 to provide that land receiving protection under AS 03.07 shall be assessed on the basis of value as farm land.

Sec. 4 conforms AS 38.05.345 to the amendments to the amendments made in this section; sec. 345 relates to notice to the public on the disposition of state land.

Sec. 5 requires a report by the commissioner of natural resources on six aspects of the implementation of AS 03.07.

House of Representatives

M E M O R A N D U M

TO: HOUSE RESOURCES COMMITTEE

FROM: REPRESENTATIVE LACHER

SUBJECT: HB 148

DATE: April 9, 1983

Several questions were raised in regard to the intent of HB 148 in its first hearing in the House Resources Committee on March 30, 1983. I would like to take this time to address these issues in turn.

Concern was expressed as to the extent to which this bill effects areas of the state other than the Mat-Su valley. In other words, is this a Mat-Su bill? Agricultural lands are endangered throughout the state. Farmer's Loop Road in Fairbanks was mostly farms, and is now predominantly subdivided. A 160 acre dairy farm, also in Fairbanks, is subdivided and partially developed. The Bench area in Homer was originally all farmland, while today there are but a few small farm acres left due to subdivisions. Several farmers from the Bench area testified in the teleconference held on this bill in the C&RA Committee, earlier this session. The rate of subdivision is best documented for the Mat-Su area, where about 1,000 acres per year are being subdivided. The Department of Agriculture has not been keeping records for other regions of the state, but the absence of these records should not be interpreted as an indication that this is only a Mat-Su phenomena.

The $77,000.00 fiscal note attached to this bill has been questioned for its reasonableness. On this note, Sharon Barton of the DNR testified, in the 3/30/83 hearing, that "...were HB 148 to pass it would not be a Department priority and that the funds provided in the bill would be spent for staff work on other priority projects." It should be pointed out that the legislative intent and direction of this bill is quite clear. The DNR should be reminded of the consequences of intentional failure to comply with legislative direction. The $77,000 fiscal note, provided by the DNR, is quite reasonable. It is intended to cover the costs of administrating the enabling legislation of HB 148. The administration of HB 148 will not require two full time staff positions. Most assessment valuations conducted under this program would be contracted to private assessors or use present state employee assessors.

These expenses would probably not total the $77,000 provided in the fiscal note. HB 148 is enabling legislation and therefore the fiscal note does not provide funds for the acquisition of any agricultural preservation easements. These funds must be specifically designated and appropriated by the legislature.

HB 148 does not mandate that the DNR, Division of Agriculture purchase all property submitted for purchase by the program; nor does this legislation mandate that the Director or Commissioner purchase at any price. The State's liability in regard to questionable land valuations is guarded on two counts. First, the bill requires the use of an assessor (member of the organizations or a state employed assessor). Secondly there is no obligation stipulated in the bill that the Department purchase all submitted purchase applications.

Some members of this legislative body have raised questions as to the status of agriculture in Alaska and its overall value to the state as a whole. One could equally ask if Alaska is a forestry state, a fishing state, a trapping state, a mining state, a tourism state, and so on. The answer to all of these questions is an obvious yes. Alaska is a diverse state with multiuse lands and many growing and developing industries. The relevant question here is what does and will Alaskan agriculture do for Alaskans. Quite simply, farmland in Homer, Delta, Fairbanks, and Mat-Su is capable of providing employment and food for many thousands of Alaskans at a lower price than the same commodity shipped up from the lower 48.

The Workman, Arobio and Gasbarro report [An Examination of A Development Rights Purchase Program For Alaskan Agricultural Lands; January, 1979, DNR] noted that some small Alaskan farms are currently underproductive due to the impending threat of development. The report argued that these farmers were holding off from necessary investments into more productive equipment, etc., in the anticipation that they will be driven out of business and are therefore keeping their losses at a minimum. The effects of passage of HB 148 on this trend would be an obvious reversal. A second factor which has been a drawback for smaller Alaskan farms has been the absence of a well-developed transportation and marketing infrastructure. As the Workman, Arobio and Gasbarro report indicates, were state support of this industry given to the smaller produce, dairy and potatoe farmers then the inducement to develop this industry and the necessary infrastructure would follow within the private sector.

It is ironic that the state is currently spending millions of dollars to develop new agricultural lands while we're building subdivisions on existing farmlands that happen to be the best in the state. Most of these farms have been productive for years (see attached statistics); but the pressure of high prices offered by developers is causing a loss of these lands at the same historical moment that the state is investing in the clearing and development of new agricultural lands and grain terminals for the storage and export of the anticipated production.

An identical bill has been sponsored on the Senate side by Representative Moss; this is SB 237.

TABLE 1

TOTAL VALUE OF AGRICULTURAL PRODUCTION AND SALES
(In Thousands of Dollars)

KING COUNTY, WASHINGTON

PROPOSITION ONE: FARM AND OPEN SPACE BONDS

Shall King County, for the purpose of acquiring and preserving voluntarily offered farm and open space lands in the county, issue its general obligation bonds in the principal amount not to exceed $50,000,000 in one or more series over a period of up to 6 years, to mature serially commencing in from two to five years and maturing in not to exceed 30 years from date of issue of each series and to be paid by annual tax levies upon all the taxable property within King County in excess of constitutional and statutory limitations, all as more specifically provided in King County Ordinance No. _____.

BONDS, YES ..... /___/

BONDS, NO ..... /___/

SECTION 16. Severability.

Should any section, subsection, paragraph, sentence, clause or phrase of this ordinance be declared unconstitutional or invalid for any reason, that determination shall not affect the validity of the remaining portions of this ordinance.

INTRODUCED AND READ for the first time this 29th day of May, 1979.

PASSED this 18th day of June, 1979.

AN EXAMINATION OF A DEVELOPMENT RIGHTS PURCHASE PROGRAM FOR ALASKA AGRICULTURAL LANDS

William G. Workman
Edward L. Arobio
Anthony F. Gasbarro

Agricultural Experiment Station
University of Alaska
Fairbanks, Alaska

A report submitted to the Department of Natural Resources, State of Alaska, in accordance with terms of research contract CC10 1142.

January, 1979

Susitna area and the Tanana Valley accounted for 50 and 29 percent of this acreage, respectively. The Kenai Peninsula averaged 11 percent of the annual total. Cropland utilization statistics are shown in Table 7.

Agricultural Lands for Future Development

Agricultural lands that are currently being converted to non-agricultural uses are not the only lands available for future development. While these lands are close to the State's major population centers and are felt by some to be the most valuable for agriculture, they are being converted because the market has placed a higher value on them for other uses. It may well be that other lands suitable for agriculture further out from existing agricultural areas will replace the lands being converted. The purpose of this section is to provide a brief overview of the supply of potential agricultural lands, particularly those adjacent to existing agricultural areas.

The Soil Conservation Service (Alaska Rural Development Council, 1974, p. 130) has identified approximately 15.2 million acres of potential agricultural land throughout the State. Because many of these lands are away from population centers and are without surface transportation access, there is little chance of their developing before the turn of the century. There are, however, some lands in the Tanana Valley and the Matanuska-Susitna-Kenai area that are closer to population centers and accessible by surface transportation.

The Alaska Department of Natural Resources (1976) has conducted an analysis of the agricultural lands identified by the Soil Conservation

TABLE 7

AVERAGE CROPLAND UTILIZATION, 1971-1976.

Crops	REGION				
	Tanana Valley	Matanuska-Susitna Valleys	Kenai Peninsula	Southwest	State Total

Percent	29.4	58.6	11.3	.7	100

SOURCE: Alaska Crop and Livestock Reporting Service, Alaska Agricultural Statistics (Palmer: Alaska Crop and Livestock Reporting Service, 1978), p. 17.

Service and rated these lands by certain criteria[3] in order to arrive at a priority ranking of agricultural lands in the State for state selection. The results of this analysis are presented in Table 8.

It is not surprising that the high priority potential agricultural lands are in the State's most important existing agricultural areas since these areas already have a sizable population and existing transportation facilities. What is significant is the large amount of potential agricultural acreage in these areas. If one considers all agricultural lands in the three most important agricultural areas, regardless of priority, there are nearly six million acres available, 32 percent of all agricultural lands in the State. If all priority categories but the top six are eliminated, the six million acres is reduced to 3.8 million, still a healthy amount of land. The top six priority rankings include lands that are relatively unconstrained by access and demands for other uses and could come into production in a reasonable amount of time. Even if the 3.8 million acres are reduced by 1.5 million to account for existing agricultural and nonagricultural uses, the 2.3 million acres could provide substantial agricultural development.[4]

---

[3] These criteria include: (1) present and future access possibilities; (2) productive capability; (3) need for conservation practices; (4) local needs for agricultural products; (5) demand for other uses of agricultural lands; (6) variety of crops that could be grown; (7) timing of agricultural development, and (8) local socioeconomic impact.

[4] Although this discussion shows that large quantities of potential land are available, at this time its not certain how much, if any, of these lands eventually will come into production since they could be classified by the State for other uses.

TABLE 8

RANKING OF AGRICULTURAL LANDS BY STATE OF ALASKA[a]
(Thousands of Acres)

Priority	Tanana Valley	Matanuska-Susitna Anchorage	Kenai	Total	% of Priority Rank	Other Areas	% of Priority Rank

Totals	3,501.4	1,688.8	787.4	5,977.2	32	12,820.2	68

[a] These figures include all lands with agricultural potential regardless of current use.

SOURCE: Alaska Department of Natural Resources, "Priority Values of Agricultural Land for State Selection" (mimeograph), Anchorage: Alaska Department of Natural Resources, 1978.

Not all of the potential agricultural lands are in State ownership. In an effort to gain an idea of the amount of identified agricultural lands held by the State, we examined land status data[5] for the Tanana Valley and the Matanuska-Susitna Basin. The result of this analysis is shown in Table 9. In the Tanana Valley, the State will eventually receive title to 1.6 million acres (48 percent) of the agricultural land. In the Matanuska-Susitna Basin, 91 percent of the potential agricultural land will be in state ownership. No attempt was made to estimate the percentage of state control by priority rankings, but the very high percentage of state agricultural lands in the Matanuska-Susitna region assures that most of the high priority land there will be in state ownership.

Future Agricultural Development in Alaska

In order to get some idea of the future agricultural land demand in Alaska, this section will review a recent study made by the University of Alaska (Thomas, 1976) involving projections for agriculture to the year 2000. Assuming: (1) a state population of 820,000; (2) that Alaska would still produce only part of its total consumption; and (3) that Alaska's consumption patterns will be the same as those in the other 49 states, the study predicted the quantity of different types of commodities that would be produced in Alaska and the amount of land that would be needed in the different regions. This information is presented in Tables 10 and 11. At the time of this study, plans had not yet been

---

[5] Computer printouts of land status made available by the Alaska Department of Natural Resources, Anchorage, Alaska.

TABLE 9

LAND STATUS OF AGRICULTURAL LANDS

Area	Agricultural Area[a]	STATUS[b] State Lands	Native Lands	Federal Land
	----------Thousands of Acres----------			
Tanana Valley	3,433	1,639 (48%)	293	1,500
Matanuska-Susitna	1,001	912 (91%)	075	014
Total	4,433	2,551 (58%)	368	1,514

[a] Figures are less than those shown in Table 8 because private and municipal agricultural lands are not included.

[b] Anticipated status after state selections and settlement of the Native Claims Settlement Act.

APPLICABILITY OF A DEVELOPMENT RIGHTS PROGRAM IN ALASKA

Introduction

The objective of this section is to discuss how a development rights program could be applied in Alaska and what its costs and benefits might be. Before entering into this discussion we will first review the results of a development rights survey and comment on the most efficient size of agricultural operations which might be considered when carrying out a development rights program.

Development Rights Survey in Alaska

During August 1978 a questionnaire was mailed to 263 agricultural landowners[12] in the five major agricultural regions in the State. The objective of the questionnaire was to determine the interest that farmland owners had in selling development rights to their land and how much these rights were worth to them. A sample questionnaire is provided in Appendix B.

Response

Of the 263 questionnaires mailed, 18 were returned as undeliverable, leaving 245 that actually reached their destination. A total of 112 (45%) of the delivered questionnaires were returned (See Table 12). The response rate differed by region with the Kenai-Kodiak and Copper River

---

[12] The list of agricultural landowners was supplied by the Agricultural Experiment Station in Palmer, Alaska.

TABLE 12

QUESTIONNAIRE RESPONSE BY REGION

Region	Questionnaires Delivered	Questionnaires Returned	Percent
Fairbanks	52	24	46
Delta	34	10	29
Copper River	15	10	67
Matanuska-Susitna	106	41	39
Kenai-Kodiak	38	27	71
TOTALS	245	112	46

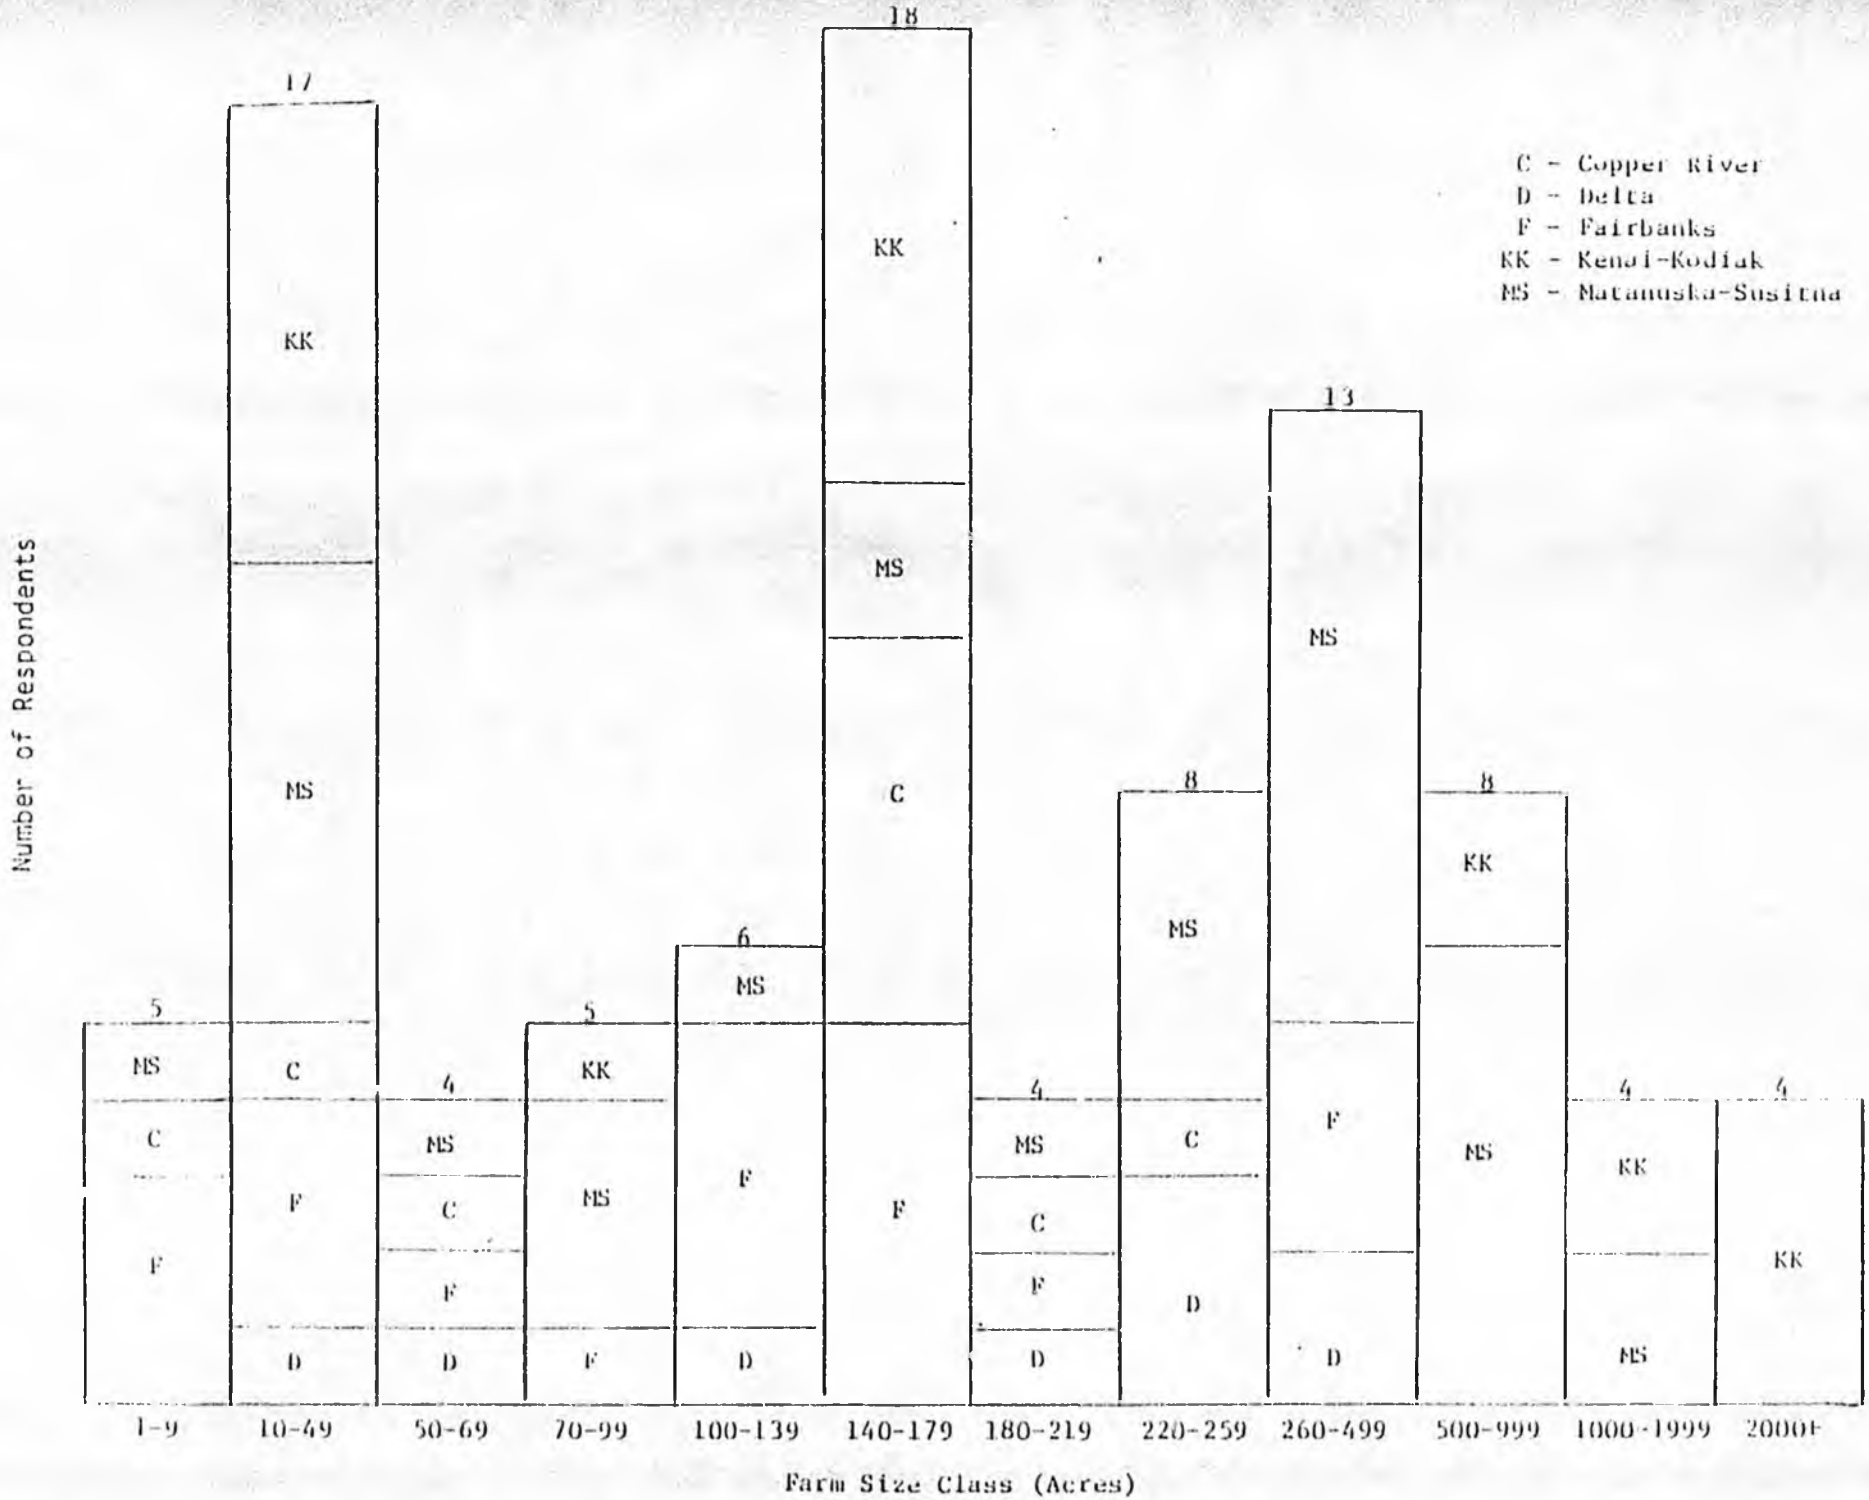
regions having the highest with 71 percent and 67 percent return rates, respectively. The Delta region had the lowest return rate with only 29 percent of the questionnaires returned. The Fairbanks and Matanuska regions, which contain the majority of agricultural operations in the state, had return rates of 46 percent and 39 percent, respectively. Although the overall response rate of 46 percent is quite satisfactory for a mailout questionnaire, the data suggest that we may not have obtained an adequate sample response to some questions to have high confidence in our analysis.

Farm Size of Respondents

There was a wide range of farm sizes reported by the respondents (Figure 2). One-half of the 96 respondents who gave farm size statistics reported one of three farm size classes: 10-49 acres, 140-179 acres, or 260-499 acres. The remaining 48 respondents were distributed relatively uniformly among the other classes. The acreage figures given by the respondents included land leased or rented from other private landowners or the government in addition to their own land.

The farm size pattern differs somewhat by region. All of the respondents who indicated a farm size above 500 acres were in the Matanuska-Susitna or Kenai-Kodiak regions. Large acreages of grazing land are leased from the government on Kodiak Island. Most of the respondents from the Fairbanks and Copper River areas reported farm sizes below 180 acres. A high proportion of the respondents from the Kenai Peninsula reported farm sizes of between 10 and 49 acres and

FIGURE 2. RESPONDENTS IN EACH FARM SIZE CLASS BY REGION



140-179 acres. Matanuska-Susitna respondents reported farm sizes in every farm size class; however, over 50 percent of the reported farms were between 220 and 999 acres.

Interest in Selling Development Rights

Questionnaire recipients were asked to indicate the degree of interest they had in selling the development rights to their cleared and uncleared land. A brief explanation of the development rights concept was given in the cover letter to the questionnaire (Appendix B). Respondents were asked to indicate whether they were highly, moderately, slightly, or not interested in selling development rights. Approximately 94 percent, 106 of the 112 respondents, answered this question. Practically all respondents rated cleared and uncleared land similarly. The distribution of these expressions of interest can be seen in Figure 3.

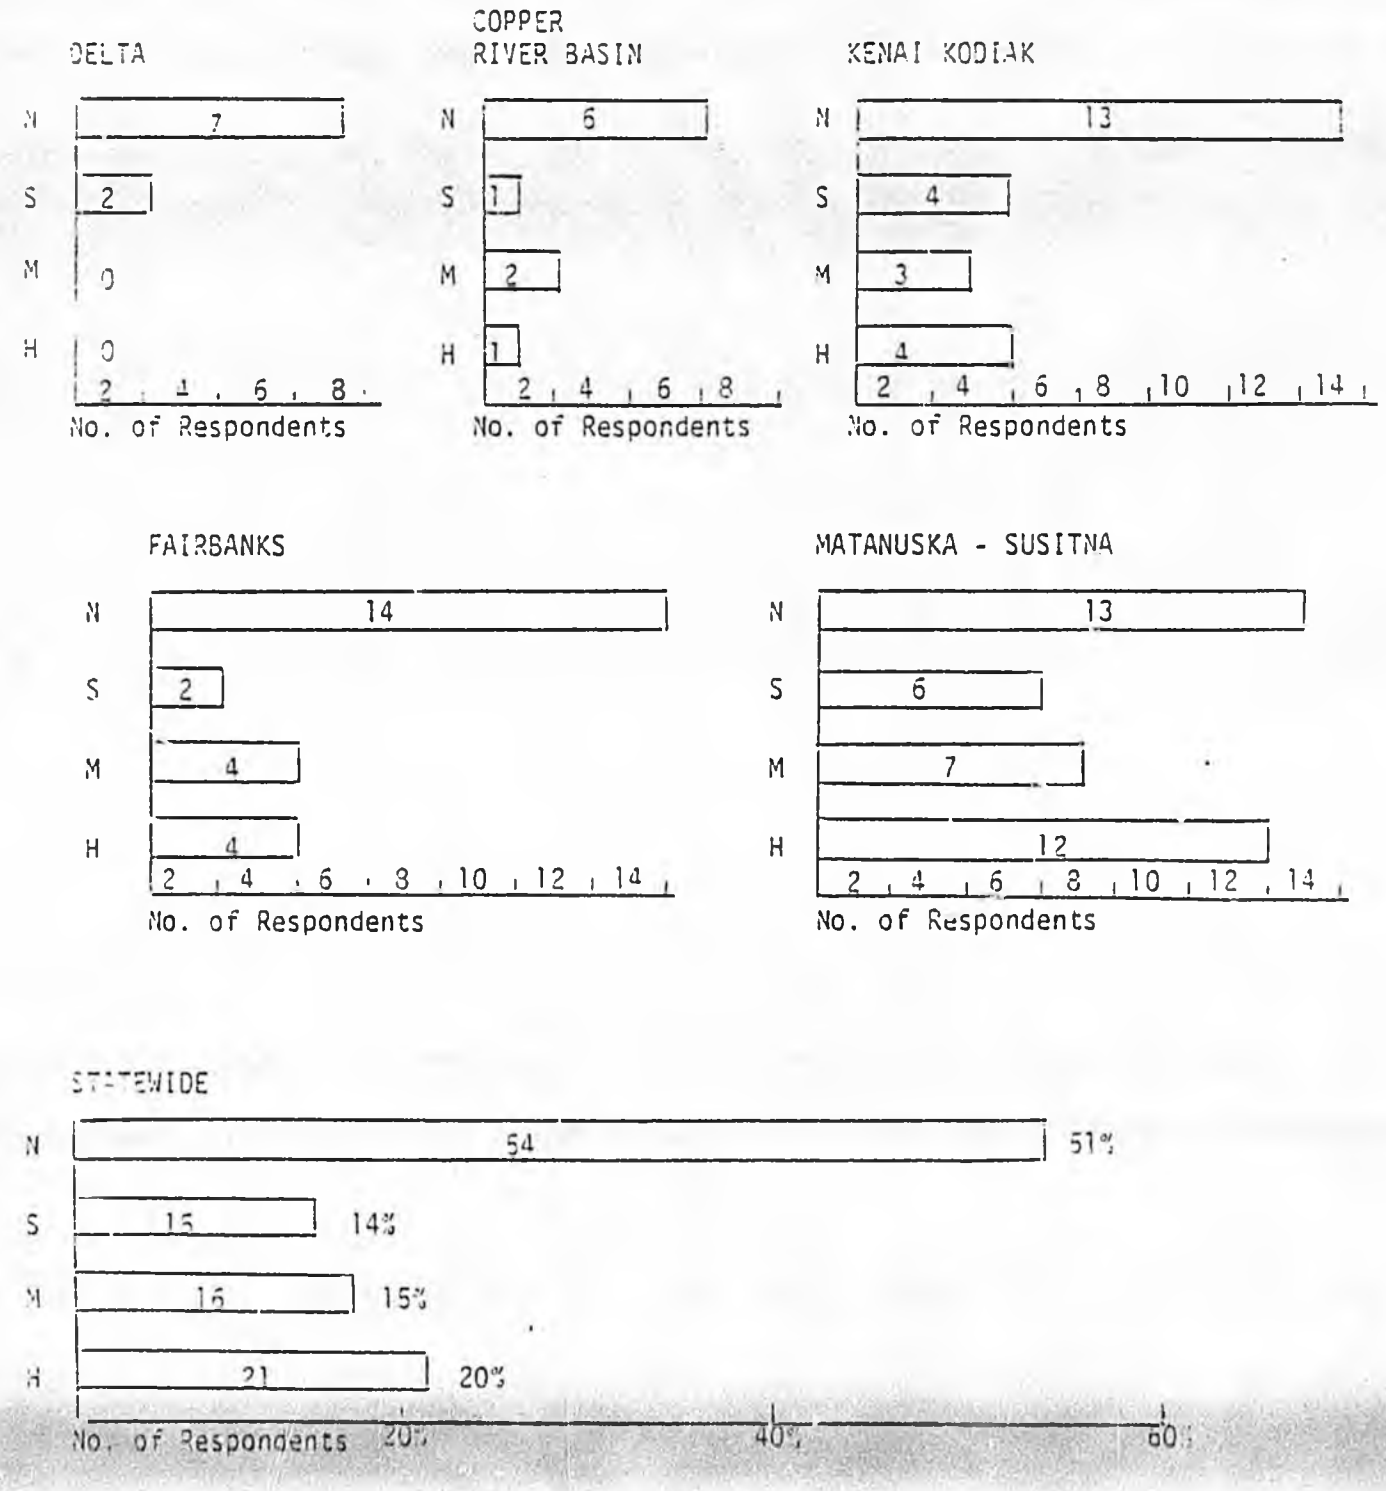
Most of the respondents in all regions except the Matanuska-Susitna area expressed little or no interest in selling development rights. Those respondents living in the Matanuska-Susitna region were evenly divided on the question. Half indicated little or no interest and half expressed moderate to high interest. On a statewide basis, 65 percent expressed little or no interest and 35 percent indicated moderate to high interest. Over half of all those moderately or highly interested in selling development rights were from the Matanuska-Susitna region.

Market Values of Cleared and Uncleared Agricultural Lands

Sixty-nine of the 112 respondents indicated what they perceived as the market value of their cleared land and 62 answered the same

FIGURE 3.

DEGREE OF INTEREST* IN SELLING DEVELOPMENT RIGHTS TO AGRICULTURAL LAND



*N - No Interest
S - Slight Interest
M - Moderate Interest
H - High Interest

question about uncleared land. The distributions of these values are shown in Figure 4.

On a statewide basis, most of the respondents perceived the market values of both uncleared and cleared land to be less than $5,000 per acre. Uncleared land was valued at less than $5,000/acre by 77 percent of the respondents and less than $3,000/acre by 65 percent of the respondents. The percentages were similar for cleared land with 77 percent valuing their land at less than $5,000/acre while 56 percent indicated a value of less than $3,000/acre.

Average market values for cleared and uncleared land as perceived by the respondents were calculated for each region. These data are summarized in Table 13. Average values for cleared land ranged from $1,500/ acre in Delta to $3,900/acre in the Fairbanks region. Three of the regions (Fairbanks, Matanuska-Susitna, Kenai-Kodiak) represented by nearly 80 percent of the respondents differed by only $200/acre in the perceived average value of cleared land with values ranging between $3,700 and $3,900 per acre. The weighted average cleared land value for the five regions was $3,300/acre.

Uncleared land values averaged slightly lower than cleared land values ranging from $900/acre in the Copper River region to $3,600/acre in the Matanuska-Susitna region. As with cleared land, the same three regions representing nearly 80 percent of the respondents showed a relatively narrow range of perceived land values. Average land values for uncleared land in these regions ranged between $2,900 and $3,600 per acre. The weighted average for all regions was $2,800/acre.

FIGURE 4.

Perceived Market Values of Cleared and Uncleared Lands

(Dollars per Acre)

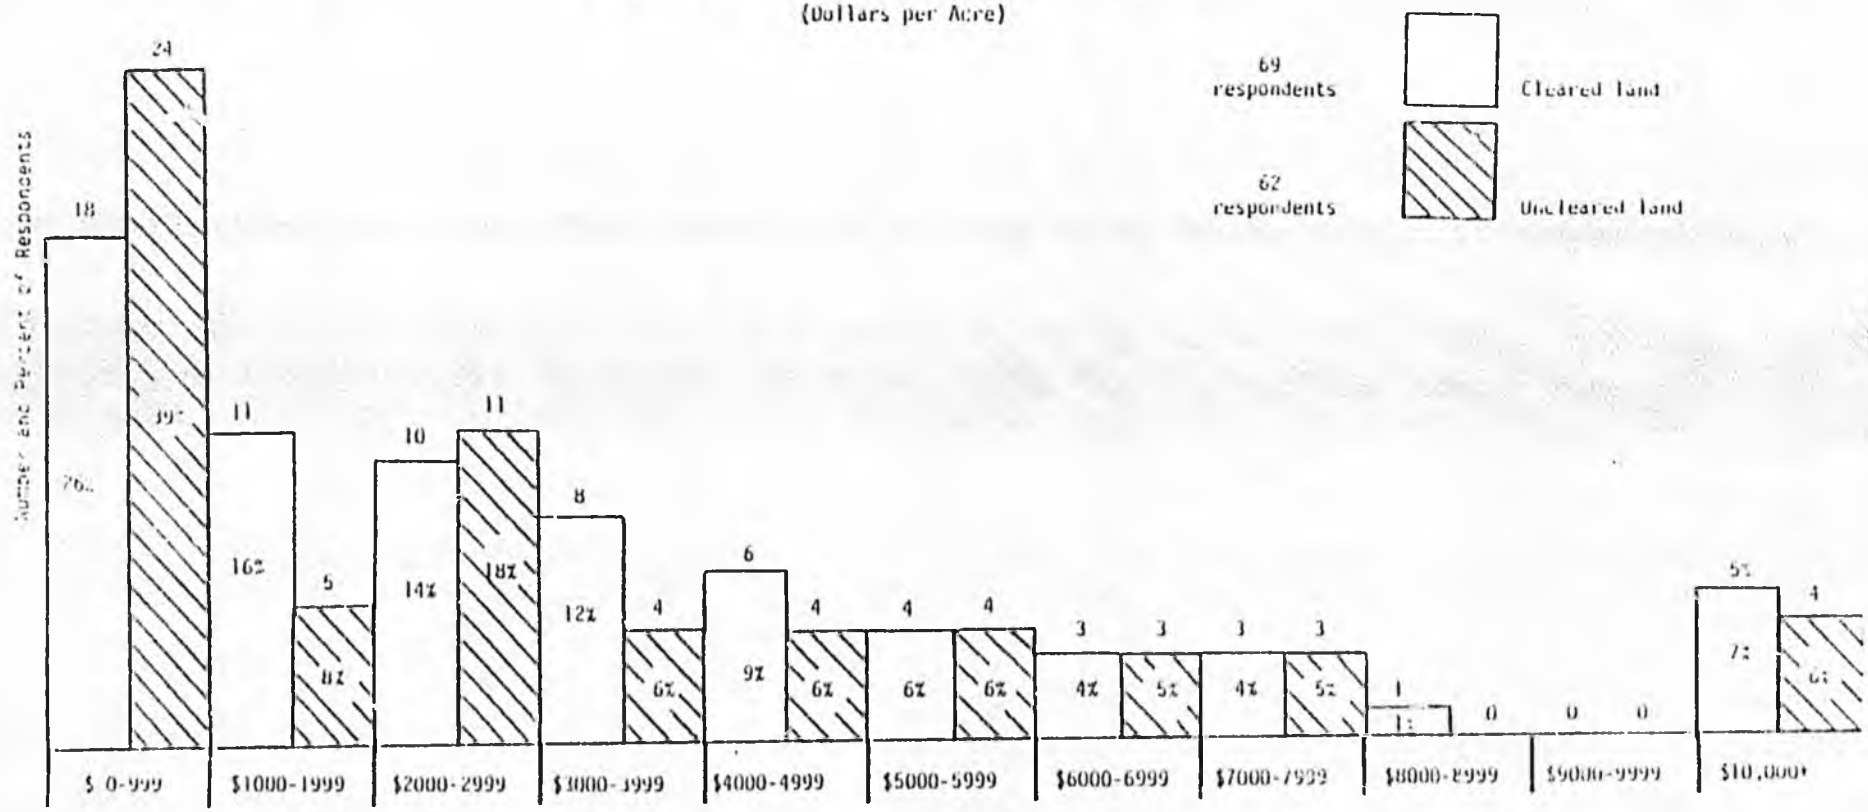


TABLE 13

AVERAGE PERCEIVED LAND VALUES BY REGION
(Dollars per Acre)

Region	Cleared Land Value	Number of Respondents	Uncleared Land Value	Number of Respondents
Fairbanks	$3,900	13	$2,900	11
Delta	1,500	9	1,300	8
Copper River	1,900	6	900	6
Matanuska-Susitna	3,800	28	3,600	24
Kenai-Kodiak	3,700	13	3,100	13
TOTALS		69		62
Weighted Average	$3,300		$2,800	

The difference between cleared and uncleared land average values per acre was smallest in the Matanuska-Susitna region ($3,800 vs. $3,600) and greatest in the Fairbanks region ($3,900 vs. $2,900).

Value of Development Rights

A value for development rights was reported by 39 of the 112 respondents (35%). Thirty-four of these responses were from the Fairbanks, Matanuska-Susitna, and Kenai-Kodiak areas. Nearly 70 percent of the respondents valued their development rights at less than $4,000/acre. The distribution of development rights values can be seen in Figure 5.

Average development rights values as perceived by the respondents were calculated for the Fairbanks, Matanuska-Susitna and Kenai-Kodiak regions. These values are shown in Table 14. Average values were not calculated for the Copper River and the Delta regions because so few of the respondents in these areas responded to this part of the questionnaire. Average development rights values in the three areas mentioned ranged between $3,100/acre and $3,600/acre. Values were highest in the Matanuska-Susitna region. The development value data lacks reliablity because of the small sample. In addition, comments and figures from some of the questionnaires indicated that some of the respondents apparently did not understand how to evaluate the value of development rights to their farmland.

Average development rights values were also calculated by degree of interest, again using the data from the Fairbanks, Matanuska-Susitna and Kenai-Kodiak regions. Calculations showed that those with a moderate or high interest in a development rights program on the average

FIGURE 5.

Value of Development Rights

(Dollars per Acre)

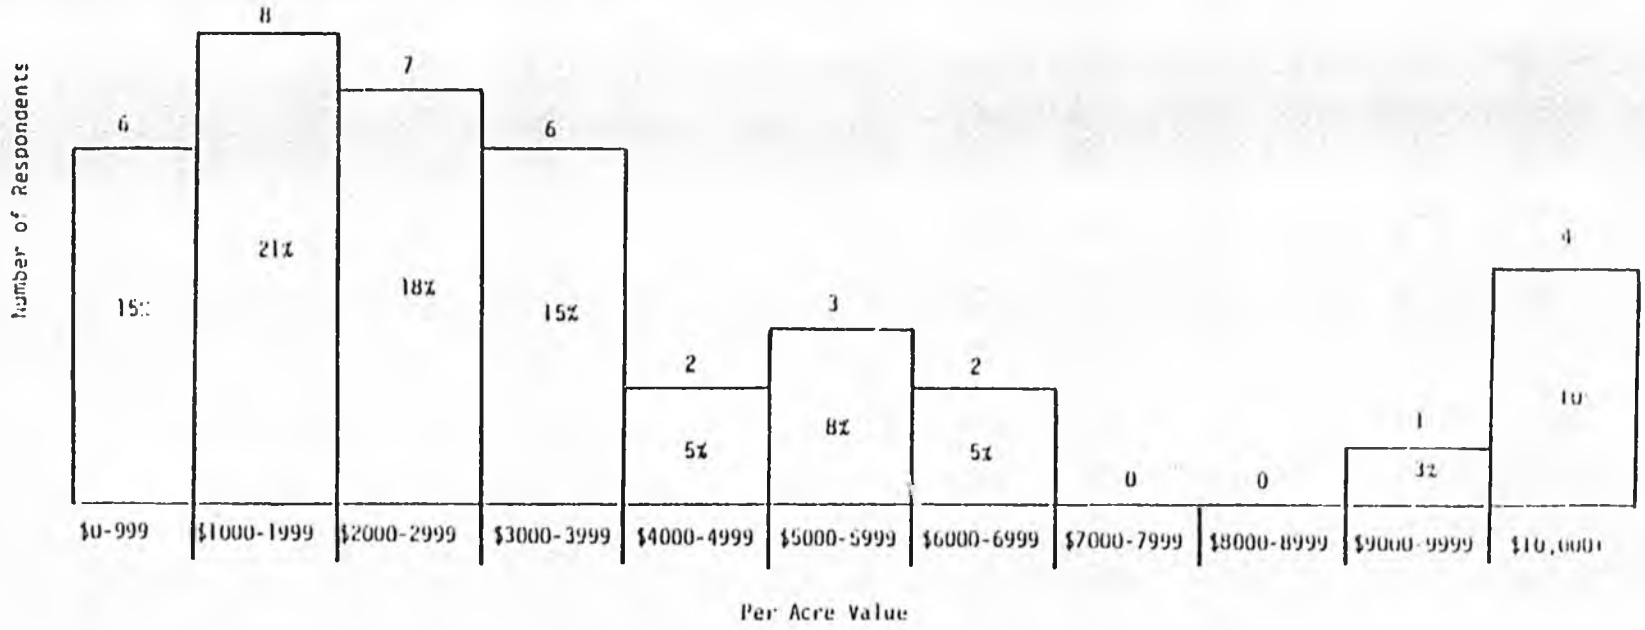

TABLE 14

AVERAGE DEVELOPMENT RIGHTS VALUES
(Dollars per Acre)

Region	Value	No. of Respondents
Fairbanks	$3,200	5
Matanuska-Susitna	3,600	21
Kenai-Kodiak	3,100	8
TOTAL		34
Weighted Average	$3,400	

valued these rights at $2,145/acre. Those not interested in the program put a much higher value on these rights, $4,662/acre. Respondents in the moderate to high interest categories accounted for 63 percent of the total acreage represented in the survey responses.

Distance from a Population Center, Interest in Selling Development Rights, and Perceived Value of Development Rights

Additional analysis of the survey data was undertaken to determine whether or not a landowner's interest in a development rights purchase program and/or his perceived value of these rights were related to the distance between his farm and the nearest population center. Table 15 presents a summary, in percentage terms, of the data relating to the interest/distance question. One can observe that the distributions of responses are similar between the moderate or high and low or no interest categories and are, therefore, similar to the pattern shown for all responses.[13] This close relationship suggests that farmers' interest in selling development rights is not significantly influenced by the location of his farm relative to a population center. When data for just those farm owners living near Palmer and Wasilla were broken out and analyzed in the same way the identical conclusion was drawn.

We also addressed the issue of whether a landowner's perception of the value of the development rights to his property was influenced by the location of the farm relative to a population center.

---

[13] Using the chi square test for independence with the data on which Table 15 is based, we were not able to reject the hypothesis of independence of interest and distance at any reasonable level of significance. One must recognize, however, that these data were not obtained through random sampling. Thus, our conclusions must be viewed with caution.

TABLE 15

FARM DISTANCE FROM NEAREST COMMUNITY
RELATED TO DEGREE OF INTEREST[a]

	Distance Categories				
	0-5	6-10	11-15	16-20	21+
Percent of Farmers Reporting	41	24	16	7	12
Percent of Farmers with Moderate or High Interest	39	29	12	5	15
Percent of Farmers with Little or No Interest	43	21	19	9	9

[a] Based on 111 farmers reporting.

The expectation here was that the closer the farm was to a town or city, the more attractive would be that land for development purposes and that this relative attractiveness would be reflected in the perceived value of the development rights. Unfortunately the quality of the data obtained through the survey did not allow a rigorous test of this proposition on either a local or statewide basis. The data in Table 16 is presented to show the nature of the relationship or lack thereof between distance and development rights value as perceived by farmers near Palmer. No clear pattern emerges but, again, this conclusion must be qualified by recognizing that the data are not taken from a random sample. The fact that the expected relationship did not occur may perhaps also be explained by the existence of unrealistic expectations on the part of some land owners regarding the development value of their property. This should not be taken to mean, however, that these perceived values represent the mimimum payments that these land owners might be willing to accept to forego their development options.

Economic Size Agricultural Operations

A key factor in the attempts to maintain and/or expand agricultural production in the State is the development of economic size agricultural operations. Thomas (1976, p. 15) noted that one of the major problems with agriculture in the Matanuska Valley was the small size of individual farms. The Alaska Power Administration (1970, pp. 46-53) has determined the most economically efficient sizes for dairy, small grain and potato operations. Each of these enterprises is discussed below.

TABLE 16

RELATIONSHIP BETWEEN DEVELOPMENT RIGHTS VALUE AND DISTANCE FROM PALMER

Distance (Miles)	Stated Values
0-1	$10,000
	7,700
1	3,000
2	10,000
	3,500
	1,500
3	3,500

8	500
9	-
10	850
11	1,000

Dairy operations in the Matanuska Valley would have to approach 60 cows to be considered an economic unit. Such a unit would require 280 acres to grow the necessary feed. A 60 cow dairy is estimated to be a minimum economic size and is probably just above being marginal. A more realistic size would be a 120 cow enterprise based on 560 acres. A budget analysis of this larger enterprise showed a return on investment of 8.8 percent after allowing for the operator's salary and the value of perquisites.

There is some concern that if the number of dairy cows in the Matanuska Valley declines further, the creamery that processes the milk will go out of business. We were unable to verify this. Husby (1978) has indicated that approximately 750 cows are needed to support a creamery, thus, baring other problems, the present milk cow herd of 1,500 animals would have to decline by almost one-half for the creamery to discontinue operation, assuming that Alaska dairy enterprises are the only source of supply. The present creamery, however, is importing milk for processing from Washington State. If the Alaskan supply of milk declines it may be possible to import a greater proportion of non-Alaskan milk to maintain operations.

The 1970 study by the Alaska Power Administration determined that for small grain farms the minimum economic unit was 320 acres. Thomas, et al. (1977) in evaluating potential barley production in the Delta-Clearwater, consider this to be too small under current agricultural conditions and suggest that 3,000 acres would be the minimum economic unit for a grain farm.

A potato farm of about 40 acres was identified as the minimum sized unit that could support a farmer and his family. Potato farms require less investment than either grain or dairy farms. Labor requirements are more than for grain farms but less than for dairy farms.

The Alaska Power Administration Study did not consider vegetable farms other than potatoes. Interviews with vegetable farmers in the Matanuska Valley indicated that a minimum economic unit would be about 15 acres.

Potential Costs of a Purchase of Development Rights Program

An important consideration in examining the applicability of a purchase of development rights program for Alaska is the potential costs of such a program. These costs would vary widely depending on the scope of the program. Estimated purchase costs (the value of development rights) for several alternative purchase programs are provided in this section. Estimated development rights values are derived from two sources: the survey of Alaskan farmers that was described earlier and, for the Matanuska-Susitna Valleys, from Alaska's program of use-value assessment of agricultural land.

Estimates of purchase costs for three alternative acquisition programs are provided in Table 17. These estimates are for (1) the cost of purchasing development rights to all acres in Alaska planted to crops in 1977, (2) the cost of purchases by specific region in the state and (3) the cost of purchases in the Matanuska-Susitna Valleys by level of interest among farmers. Following a short discussion of these esti-

TABLE 17

ESTIMATED PURCHASE COSTS OF ALTERNATIVE DEVELOPMENT RIGHTS PURCHASE PROGRAMS

Scope of Purchase	Acres Available[a]	Cost (per acre) From Farmer Survey	Total Cost	Cost (per acre)[b] From Use-value Assessment	Total Cost
1. State-wide	19,005	$3,400	$64,617,000	--	--
2. By region[c]					
a. Tanana Valley	5,633	3,200[d]	18,025,600	--	--
b. Matanuska-Susitna Valleys	11,222	3,600	40,399,200	$747	$8,382,834
c. Kenai Peninsula	2,050	3,100	6,355,000	--	--
3. By interest (Matanuska-Susitna Valleys)[e]					
a. High & moderate interest	7,070	2,145	15,165,150	747	5,281,290
b. Low & no interest	4,152	4,662	19,356,624	747	3,101,544

[a] Acres planted to crops in 1977 (ACLRS, 1978, p. 16).

[b] This value is from Janet McCabe, The Urban Fringe: Methods of Land Use Direction, Federal-State Land Use Planning Commission for Alaska, Study No. 35, 1978.

[c] One hundred acres in Southwest Alaska are excluded.

[d] Values provided by Fairbanks area farmers were applied to all of the Tanana Valley.

[e] Total available acres for this alternative were determined by multiplying the total acres in the Matanuska-Susitna Valleys by the percent of acres in high-moderate and low-no interest categories as taken from returned questionnaires. Sixty-three percent of reported acres were in the high-moderate category while 37 percent were in the low-no category.

mates, an examination of the potential costs of purchasing the development rights to a specific agricultural enterprise in the Matanuska Valley is provided.

If the development rights to all acres planted to crops in 1977 (ACLRS, 1978, p. 16) were purchased, the estimated total purchase cost, using the average state-wide value of $3,400 per acre for development rights as determined by farmer survey, would be approximately $64,600,000. Approximately $40,400,000 (63%) of this total would apply to Matansuka-Susitna Valleys. In the Tanana Valley, the estimated cost would be $18,000,000. For the Kenai Peninsula, estimated cost would be approximately $6,000,000.

An alternative purchase cost estimate for the Matanuska-Susitna Valleys is approximately $8,400,000. This estimate was calculated by using the base for deferred taxes under Alaska's use-value assessment program as the development rights value. If current records of agricultural value and market value of agricultural lands were kept, then the difference between these two figures could be viewed as the development rights value. However, it appears that development rights values and thus probable purchase costs may be greatly underestimated using this procedure. This is not unexpected since farmland market values are typically undervalued by assessors in the United States. This often happens because assessing departments are not able to do yearly assessments because of staff and budget limitations.

Because the Matanuska-Susitna Valleys are presently the most important agricultural area in Alaska, and also because this region is

facing the most intense development pressure, we show two additional cost estimates. These estimates are by level of interest among farmers and by type of operation.

For the Matanuska-Susitna Valleys, an estimate of the costs of purchasing development rights by level of interest among farmers is also provided in Table 17. In this estimate, the available acres with high-moderate interest and low-no interest were determined by extrapolation from the acres reported by farmers responding to our survey to the total acres available (11,222). Because we were unable to obtain a random sample of farmers, there is likely to be considerable error in our estimate of acres within high-moderate and low-no interest categories. If a random sample of farmers were obtained, more confidence could be placed in these estimates.

Agricultural enterprises that currently exist in the Matanuska-Susitna Valleys include dairying, potato-vegetables, hay and silage, and a small amount of beef and swine production. For various reasons there may be greater rationale for purchasing the development rights to those acres needed to maintain dairying for any other single type of enterprise in this area. For potato-vegetable enterprises, for example, farmers surveyed expressed little interest in participation in a development rights purchase program. Also, because these crops are land intensive, the current amount of land available does not appear to be a critical factor. Next, for hay and silage enterprises, few people are involved in full-time operations and production units are not easily identifiable. Those acres involved in forage production

that would be critical for the maintenance of dairying are covered in the following dairy discussion. Finally, beef and swine production is a minor part of the agricultural economy in this region and accounts for only a small amount of land use.

As of January 1, 1978, there were 13 Grade A dairy herds in Alaska (ACLRS, 1978, p. 34). Eleven of these herds were located in the Matanuska Valley. Herds in the state were estimated to total 1,500 dairy cows, 1,400 of which were in the Matanuska Valley. This is the lowest number of dairy cows in the state since 1960. The high year was 1962 when 3,200 dairy cows in 35 Grade A herds were located in Alaska.

Because of the decrease in dairies and cows in Alaska, interest has been expressed at maintaining dairy operations at least at their current levels. Because most of the dairying activity is in the Palmer area, a way to possibly insure the maintenance of the dairy industry would be to purchase the development rights to the acres needed to support the current number of cows in this area. It has been estimated that for operations larger than 120 cows, approximately 4.67 acres are needed to support a cow annually (Alaska Power Administration, 1978, p. 48). Thus, approximately 6,538 acres would be necessary to sustain the dairy industry at its current level in the Matanuska Valley.

Three estimates of the cost of acquiring the development rights to this number of acres are provided in Table 18. These estimates of development rights values are: (1) the average development rights value of the four dairymen in the Matanuska Valley who answered our questionnaire and showed some interest in selling these rights; (2) the average value of all respondents in the Matanuska Valley, and (3) the average

development rights value of all respondents in the Matanuska-Susitna area who showed high or moderate interest in selling their development rights.

TABLE 18

ESTIMATED COSTS OF DEVELOPMENT RIGHTS PURCHASES TO MAINTAIN THE MATANUSKA DAIRY INDUSTRY

Acres Needed	Total Cost Four Dairymen[a]	Total Cost All Respondents Matanuska Valley[b]	Total Cost High-moderate Interest Matanuska Valley[c]
6,538	$24,700,000	$23,500,000	$14,000,000

[a] $3,775/acre.

[b] $3,600/acre.

[c] $2,145/acre.

Other Costs

Besides the direct purchase costs associated with development rights acquisition, other costs would be a part of such a program. Two of these potential costs, easily identifiable but not so easily quantifiable, are administrative and legal costs and property tax losses.

Administrative and legal costs would arise from (1) activities involved with the actual purchases and (2) from continuing administration once land was in an acquisition program. In the initial purchase effort, costs would be associated with such activities as contacting farmers, identifying and describing parcels included in any program, preparing legal documents, negotiating sales with farmers, closing sales,

etc. Once land was actually in a program, continuing administration of the program would be needed. This would entail making sure contracts and regulations were followed. For example, someone would have to make certain that any building that took place on land under an acquisition program was in accordance with the program's regulations.

Our literature search of existing programs failed to disclose any documentation of the above costs. However, assuming that once the program was underway, two full-time professionals and a secretary were adequate to administer the program, a gross estimate of administrative costs might be as follows:

Estimated Annual Administrative Costs*

Salaries	
Program leader	$35,000
Assistant	22,000
Secretarial	16,000
Travel	5,000
Supplies	2,000
Total	$80,000

*(It is assumed that legal advice would come from attorneys already employed by the state. New legal costs would then be slight if these attorneys were able to assume this increased work load without seriously detracting from their current assignments.)

Another possible cost to local governments would be a reduction in property tax revenues due to the decrease in land values following the sale of development rights. Currently, under Alaska's agricultural land use-value assessment law, property taxes that are lost by a borough when

farmland is placed under the use-value assessment program are reimbursed by the state. However, the market value of land under a development rights acquisition program would be the land's use-value, and boroughs would not be entitled to reimbursement for losses in property taxes, since none would occur. Although borough governments would lose property tax revenues under a development rights purchase program, there would be a corresponding reduction in costs to the state government, assuming all land involved was previously enrolled in the use-value assessment program.

Benefits of Development Rights Acquisition

Earlier in this report it was suggested that the preservation of agricultural activities has associated with it a set of joint benefits (see section on market failure). In assessing the feasibility of a public program to maintain land in agriculture in Alaska it is, of course, important to consider these benefits in relationship to the costs of achieving this end. Some of the benefits attributable to the presence of agricultural activities, however, do not lend themselves to objective quantification. They are public goods. As is the case with any good, a person's subjective evaluation of the relative importance of this class of benefits depends on his own personal value system. But unlike conventional private goods, the absence of an organized system of exchange for these collective goods stands in the way of our use of market signals (prices) to measure society's willingness to pay for these benefits.[14]

---

[14] Similar problems have been encountered in other public policy issues in Alaska such as the proposed relocation of the state capital and the debate involving the use of the North Slope haul road.

An alternative approach to actual quantification is to present to the public and to government officials in the state a listing and discussion of the potential benefits stemming from a development rights purchase program. This information, along with the program costs estimates, may then be employed by the decision maker in assessing the overall desirability of a given policy. Specifically, the program costs estimates represent the minimum value that must be achieved by the joint benefits in order for the program to be economically feasible.

Maintenance of the Local Agricultural Economy

From a state-wide perspective, agriculture currently contributes relatively little monetarily to the Alaska economy. Statewide, agricultural activities accounted for an estimated two percent of the Gross State Product prior to start-up of petroleum production from the Prudhoe Bay field (Logsdon, 1975). Comparable statistics for local areas within the state are not available. The degree of dependence of the Palmer-Wasilla area, for example, on the agricultural industry has not been documented. One can easily observe, however, that the relative position of agriculture in this area is of much greater significance.

In measuring the "local agricultural economy" benefits associated with a development rights buy-back program, one must look beyond the agricultural landholders themselves. These farmers and ranchers, in deciding whether to continue their agricultural operations or to develop their land,[15] presumably consider only the implications for their own

[15] "Develop their land," as used here, includes the sale of the land to others who in turn develop the land.

private welfare. In the absence of any public program that might prevent the conversion of agricultural lands to other uses, one would expect these individuals to remain in agriculture only if the private gains of doing so were greater than the returns from converting the land to an alternative use. Thus, if one observes agricultural land being developed in an area, one must conclude that the landholders who sell or subdivide their land are better off economically without than with agriculture.[16] What is not taken into account in the decisions of these landholders is the effect their actions might have on the welfare of other individuals--processors, farm suppliers, etc.--whose business activities are somehow linked to the production of agricultural commodities on these lands.

What do these businesses that represent the infrastructure for the agriculture industry stand to lose if land is converted to nonagricultural uses? Clearly it is the difference between their net earnings in the presence of agricultural production and what they could earn in their next best alternative. The net effect on these businesses, then, depends largely on how specialized they are, or, stated differently, on the mobility of the resources that they employ. It is conceivable that

---

[16] Since participation in the development rights purchase program as it is envisioned would be voluntary, one would expect farmers or ranchers to forfeit their development options only if they receive compensation at least equal to the discounted value of future development benefits. While the initial asking price for development rights could very likely exceed this minimum value, one might reason that bargaining between the state and the landholder concerning development rights values would generate an "equilibrium" price at which the landholder was indifferent between selling and retaining these rights. If this were the case, landowners who participate in the program will, upon the establishing of this theoretical limiting price, be just as well off with the program as in its absence.

some firms such as financial institutions would be better off after the conversion of land to nonagricultural uses. The only people who would clearly be made worse off by the conversion of agricultural land would be some immobile farm workers whose absence of skills outside the agricultural industry would prevent them from easily adjusting to the changing economic scene (Gardner, 1977).[17] Regarding this latter class of resources, one must face the issue of whether retaining land in agriculture is the least cost method of providing these individuals with their present standard of living. It may well be that publically financed programs of direct economic assistance and/or retraining could achieve this end more efficiently.

Locally Produced Food

As pointed out before, food is a private good produced in a competitive environment and as such there is little evidence that the market will allocate a nonoptimal amount of land to food production. In Alaska, however, one often hears the argument that we are too dependent on out-of-state sources for our food supply. It is further argued that by promoting a local agricultural industry we can lower our food costs. What is the relationship of a development rights buy-back program to these issues? Can the preservation of currently and potentially productive private agricultural land reduce our dependence on outside food sources and lower our food costs? To address these issues one might

[17] Although these individuals would surely be worse off, this is not to say that no others would suffer. Other individuals might also be faced with resource immobility.

first ask what are the benefits to be gained by reducing our food imports? It would seem that only if there were some cost advantages would it be in the interest of Alaskan consumers to buy their food from local sources.[18] The important question then centers around the ability of Alaska farmers and ranchers to compete successfully with other agricultural producers in providing food supplies to Alaska consumers. Alaskan agricultural firms are small relative to their competitors, and therein lies an important part of the explanation of why production costs are higher in Alaska, even in the presence of any environmental advantages that are related to long daylight periods and the relative freedom from insects that damage crops.

While the agricultural land mass in private ownership could support a larger number of efficient-sized intensive agricultural enterprises (e.g. vegetable farms), the market for products from these firms is currently limited to in-state sales due to the absence of processing facilities. A relatively small acreage planted to garden vegetables could supply the entire state's population with fresh produce. But larger acreages would be needed to support an infrastructure and to provide Alaska consumers with an opportunity to benefit from the potentially lower prices associated with large scale production. In the

---

[18] It is sometimes suggested that by reducing our food imports, we may become less vulnerable to disruptions in food delivery systems linking Alaska with current food sources. It is difficult to evaluate this alleged benefit of local food production on any objective basis. One's view on this issue depends on his perception of the reliability of food transport systems and on how much he is willing to pay in order to insure that a disruption in this system will not affect the availability of food in the state.

absence of product export opportunities that might be made possible if processing facilities were available, there is little incentive to bring a critical mass of vegetable farms into production.

Open Space and Other Public Good Amenities

Open space is only one of several "external benefits" that accrue to Alaskans from the decision by agricultural landowners to keep their land either uncleared or in agricultural use. Other benefits in this class are the maintenance of wildlife habitat, watershed protection, and the preservation of a visible, perhaps romantic, "lifestyle." Since farmers and ranchers are not in a position to capture the full value of these benefits, they have little incentive to provide a socially optimal quantity of environmental amenities. The market system will often fail to efficiently allocate resources in situations such as this where property rights to certain benefits are undefined.[19]

While Alaska, with its vast area, has a great deal of open space and related environmental amenities to offer its residents, understandably the highest value is placed on these benefits in situations where they are in short supply. In areas around Anchorage and Fairbanks where population and industrialization have expanded recently, these benefits take on high value indeed. It is in these relatively densely populated areas that the preservation of open space promises to have significant

---

[19] Since this class of benefits are public goods in addition to being externalities, we are faced with a further problem on the supply side as discussed earlier (see page 4). Specifically, even if a beneficiary could be forced to pay for the good, it would be inefficient to levy a charge since the marginal cost of extending a collective good to an additional consumer is zero.

social value. Since these benefits accrue chiefly to urban residents, an equitable program for preserving these opportunities would presumably also have the urban residents paying the bulk of the costs associated with their preservation.

Removal of Uncertainty

A final potential benefit to be mentioned in association with a development rights purchase program is the effect that such a program could have on investment decisions by farmers and ranchers. An important reason for the inefficiency of agricultural production at the urban fringes around Anchorage and Fairbanks is the great amount of uncertainty these farmers associate with the likelihood of land use shifts. Farmers have little incentive to invest optimally, especially in durable capital, if the probability is high that they will soon choose to abandon farming and thus forego the opportunity to capture the returns on agricultural investments (Gardner, 1975). As a result, farmers earn smaller net returns in their enterprises than they would if they invested in more efficient operations. A development rights buy-back program would serve to remove this uncertainty by compensating farmers to forfeit the development option in return for keeping land in agriculture for a period sufficiently long to capture the benefits from long term investment.

House of Representatives
Committee on Community & Regional Affairs

M E M O R A N D U M

TO: HOUSE C & R A COMMITTEE

FROM: Staff

SUBJECT: HB 148

DATE: March 9, 1983

The Committee has indicated a general consensus on two (2) proposed changes to HB 148:

1. A modification of AS 03.07.090 (2) with the intent to clarify that mineral or material extraction from the subsurface of the land was to be permitted only if the materials or minerals were to be used on the land that is under the preservation easement.

2. The committee conceptually agreed that the Director should make public notices prior to exchanging land or purchasing an agricultural easement.

ATTACHMENT B

within the structure or for the alteration of land as a consequence of construction activity. An exemption provided in this subsection may continue for up to four years from the date the improvement is completed or from the date of approval for the exemption by the local assessor, whichever is later.

(g) A municipality may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to a single family dwelling if the principal purpose of the improvement is to increase the amount of space for occupancy. An exemption provided in this subsection may continue for up to two years from the date the improvement is completed or from the date of approval of an application for the exemption by the local assessor, whichever is later. (§ 2 ch 118 SLA 1972; am § 2 ch 1 FSSLA 1973; am § 1 ch 33 SLA 1975; am § 1 ch 111 SLA 1976; am § 1 ch 262 SLA 1976; am § 1 ch 95 SLA 1977; am § 31 ch 94 SLA 1980)

Effect of amendments. — The 1973 amendment added the second sentence of subsection (a).

The 1975 amendment added subsection (e).

The first 1976 amendment added paragraph (3) of subsection (c).

The second 1976 amendment added paragraph (2)(D) of subsection (b).

The 1977 amendment added subsections (f) and (g).

The 1980 amendment deleted "adopted without weighted voting" near the beginning of paragraph (1) of subsection (c).

Sec. 29.53.035. Farm or agricultural lands. (a) Farm use lands included in a farm unit and not dedicated or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use, and shall not be assessed as if subdivided or used for some other nonfarm purpose. The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be sold, leased, or otherwise disposed of for uses incompatible with farm use or be converted to a use incompatible with farm use by the owner, the owner is liable to pay an amount equal to the additional tax at the current mill levy together with eight per cent interest for the preceding seven years, as though the land had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the city or borough.

(b) An owner of farm use land must, to secure the assessment, make application to the assessor before May 15 of each year in which the assessment is desired. The application shall be made upon forms prescribed by the state assessor for the use of the local assessor and shall include information which may reasonably be required to determine the entitlement of the applicant. If the farm use land is leased for farm use purposes, the applicant shall furnish to the assessor a copy of the lease bearing the signatures of both lessee and lessor along with the

completed application. The applicant shall furnish the assessor a copy of the lease covering the period for which the exemption is requested.

(c) In this section "farm use" means the use of land for raising and harvesting crops or for the feeding, breeding and management of livestock or for dairying or another agricultural use for profit or any combination thereof. To be farm use land, the owner or the lessee must be actively engaged in farming the land, and derive at least 10 per cent of his yearly gross income from the farm use land. The provisions of this section do not apply to land respecting which the owner has granted, and has outstanding, a lease or option to buy the surface rights. A property owner wishing to file for farm use classification having no history of farm-related income may submit a declaration of intent at the time of filing the application with the assessor setting out the intended use of the land and the anticipated percentage of income. An applicant using this procedure shall file with the assessor before February 1 of the following year a notarized statement of the percentage of gross income attributable to the farm use land. Failure to make the filing required in this subsection forfeits the exemption.

(d) In the event of a crop failure by an act of God the previous year, the owner or lessee may submit an affidavit affirming that 10 per cent of his gross income for the past three years was from farming.

(e) Subject to legislative appropriations for the purpose, the state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of this section. (§ 2 ch 118 SLA 1972; am § 1 ch 90 SLA 1974; am § 3 ch 229 SLA 1976; am § 1 ch 66 SLA 1978)

Effect of amendments. — The 1974 amendment made such changes in subsections (a), (b), and (c) as to make a detailed comparison impracticable and added subsections (d) and (e).

The 1976 amendment, in subsection (a), substituted "uses incompatible with farm use" for "other than farm use purposes," "a use incompatible with farm use" for "nonfarm use" and "eight per cent" for "five per cent" in the third sentence, inserted "at the current mill levy" in that sentence, and added "for the preceding seven years" at the end of the fourth sentence.

The 1978 amendment substituted "May 15" for "February 1" in the first sentence of subsection (b).

Sec. 29.53.045. Tax on oil and gas production and pipeline property. (a) A municipality may levy and collect taxes on taxable property taxable under AS 43.56.010 — 43.56.210 only by using one of the methods set out in (b) or (c) of this section.

(b) A municipality may levy and collect a tax on the full and true value of taxable property taxable under AS 43.56.010 — 43.56.210 as valued by the Department of Revenue at a rate not to exceed that which produces an amount of revenue from the total municipal property tax equivalent to $1,500 a year for each person residing within its boundaries.

Chairman Fahrenkamp and members of the Senate Resources Committee:

I would like to help you develop an awareness of the soil and water conservation program in Alaska and the importance of SB 120 to its future. To accomplish this, it is important for you to understand

1) a little of the history behind Alaska's Soil and Water Conservation program;

2) the relationship between the Alaska Soil Conservation District, the Governor, and the Commissioner of Natural Resources; and

3) some of the current responsibilities of the 48 supervisors throughout the state.

In the mid-1930's, President Roosevelt became deeply concerned with the loss of one of America's most valuable resources due to the extreme effects of wind and water erosion. This resource was of course her soil, the basis of America's economic and physical stability. As a result of the "Dirty Thirties," President Roosevelt authorized the development of what is now the Soil Conservation Service under the United States Department of Agriculture. The mandate of this technical service organization was to find 1) the cause and 2) the effect of this depleting natural resource.

The cause, in short, was the misuse and mismanagement in all phases of land use and included agriculture, forestry, grazing, and mining. Most recently we have seen an increase in land resource abuse due to rapid expansion of urban areas. The effect was lower crop yields, destruction of those areas with commercial timber values, complete loss of native range for livestock grazing, deterioration of water and air quality, and the combined effect of all of these on the standard of living and the American economy.

To overcome what seemed to be an insurmountable problem, each state, as well as the Territories of Alaska and Hawaii, was asked to establish a program that would organize the private sector into a unit of government that would work with the Soil Conservation Service in managing the nations renewable natural resources. A.S. 41-10 adopted in 1947 by the Territory of Alaska and amended in 1961 is a result of that request. For the past 36 years the Alaska Soil Conservation District, through a Memorandum of Understanding with the USDA Soil Conservation Service, has provided assistance to the residents of this state as the private sector moves ahead to develop Alaska's valuable natural resources.

I would like to briefly describe the structure of the soil and water conservation program. The current statewide district is administered by three board members appointed by the Governor. There are nine subdistricts established to service various areas of the state where intense land uses have occurred to assist cooperators in their areas. Subdistrict supervisors are elected by the cooperators in their area. The individual districts are

associated into a state association and are also members of the National Association of Conservation Districts to help provide input into programs developed at the federal government level. (Organizational charts attached.)

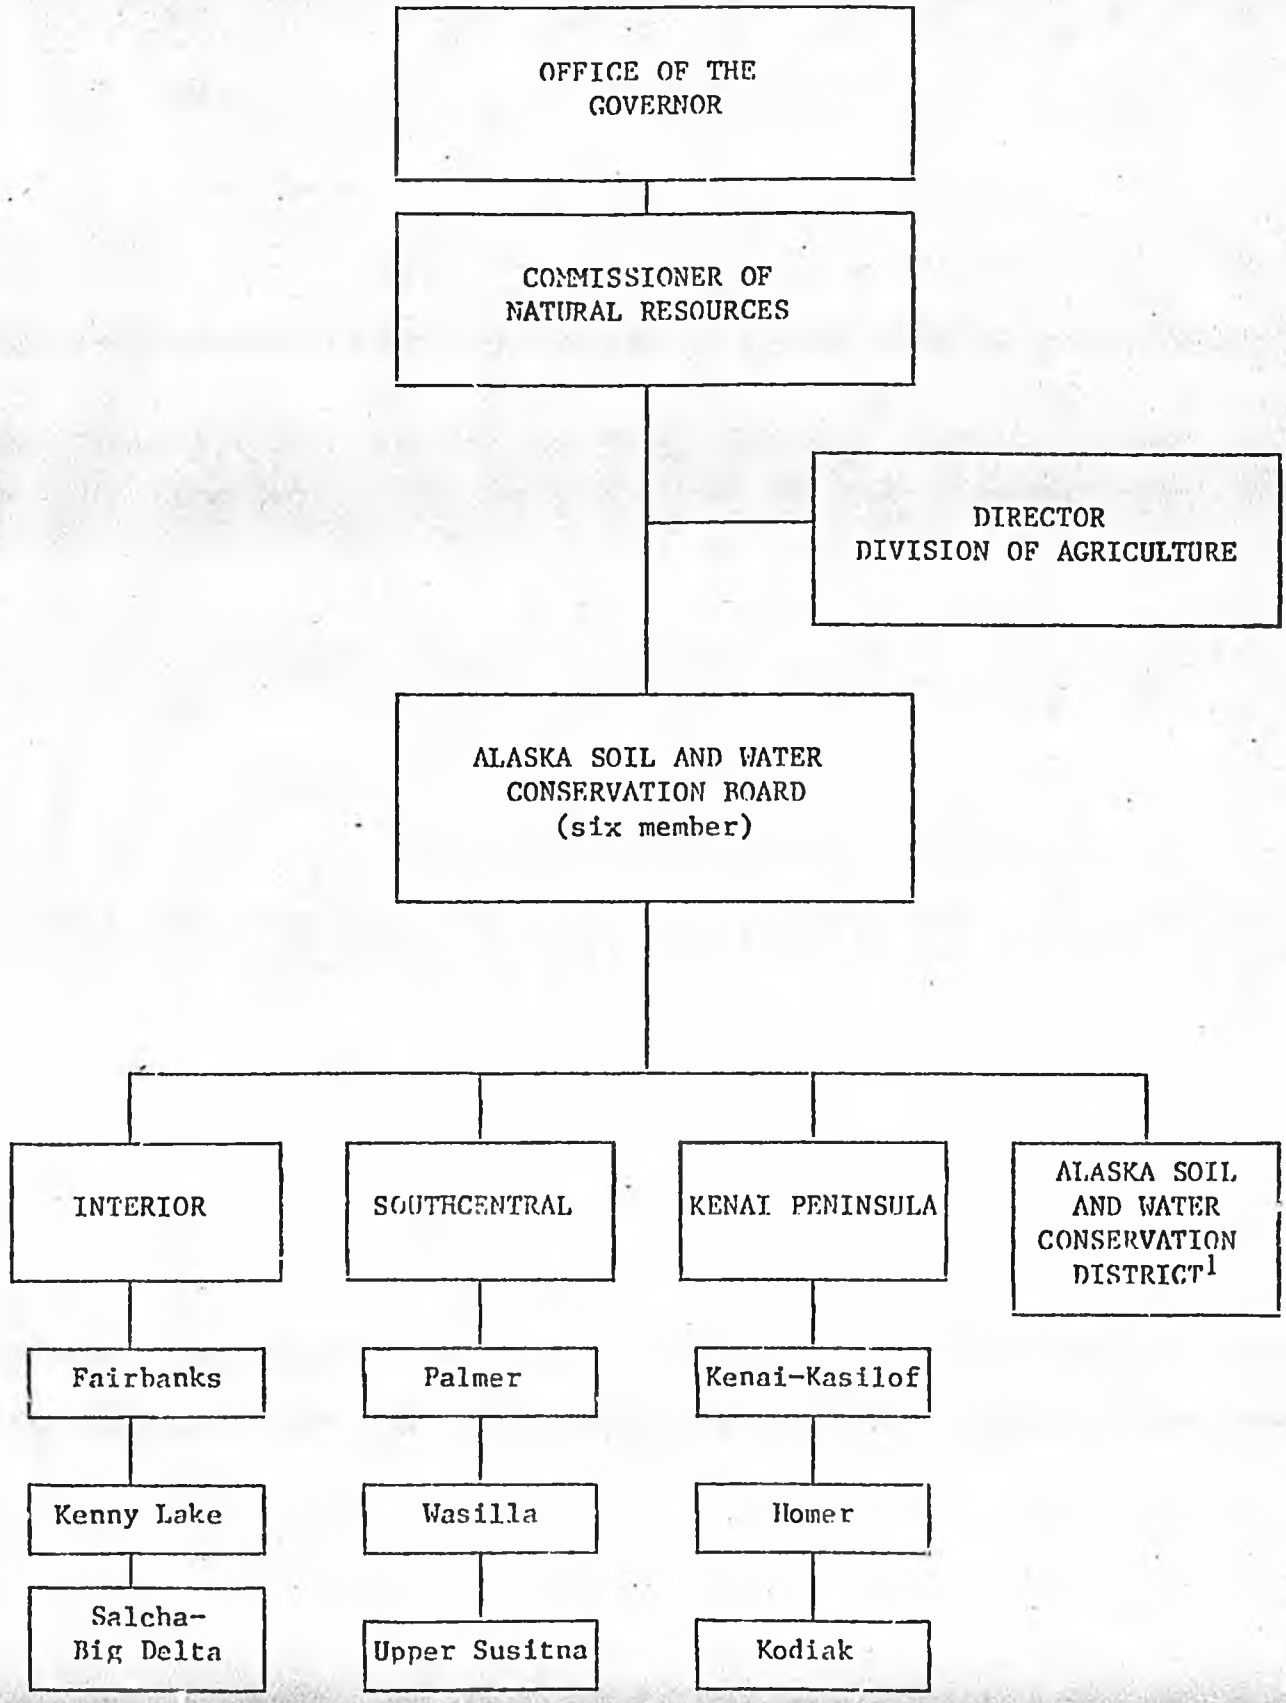
Through long-range and annual plans of operations, the Alaska Soil Conservation District and each of the nine subdistricts identify goals and objectives with regard to the development of the natural resources as a result of settlement. The attitude of the supervisors statewide is that development is a must for Alaska's economic well being, making sure that progress is achieved along reasonable management guidelines. In general, development hazards can be curbed if resource management recommendations are assigned to address the type and intensity of development. An example of such resource management recommendations is the Farm Conservation Plan which is a requirement of the sales contract on all state lands sold for agricultural development. The Farm Conservation Plan is a result of a cooperative effort between the local SCS District Conservationist and the individual farmer and is approved or disapproved by the local soil conservation subdistrict board of supervisors. I would like to emphasize one important aspect of this process. The subdistrict supervisors are elected for three year terms by local land owners in their area who are cooperators with that particular subdistrict.

It is important to remember, however, that development of privately-owned land through conservation planning is basically voluntary. The soil and water conservation program is therefore non-regulatory, and implementation of this program depends on the educational process and reasonable economic incentive.

I would like to conclude by reading a brief excerpt from the Executive Summary prepared by the Alaska Soil Conservation District Board of Directors:

> "In 1982 our support of federal programs has been responsible for approximately $195,000 worth of cost-shared conservation practices on more than 15,000 acres of land in Alaska. Recent Soil Conservation Service records indicate 5,595,222 acres of land in Alaska which are adequately treated as a result of conservation planning. The Alaska Soil Conservation District has been active in the acquisition of approximately $500,000 of state and federal funds to help support the National Cooperative Soil Survey program in Alaska. In 1981 this money was used to fund soil and range surveys in the Susitna Valley, Copper River Valley, Delta, Fairbanks, Kenai Peninsula, and the Seward Peninsula. A recent Memorandum of Understanding with the Alaska Division of Forestry establishes a working relationship for conservation planning with regard to privately owned timber resources. The Department of Environmental Conservation also recognizes the ability of the District to address non-point source pollution on agricultural lands for the protection of Alaska's water quality."

Alaska Association of Soil Conservation Subdistricts



[1] Defined as that area of the state which is not encompassed by an organized district. The Alaska Soil and Water Conservation District is administered by the Soil Conservation Board.

Honorable Charlie Bussell
Alaska State House
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Bussell:

This letter is to express our support for Senate Bill 120, "An act relating to soil and water conservation; and providing for an effective date."

A soil conservation district act was passed in Alaska about thirty years ago which provided for an advisory committee to the Commissioner of Natural Resources and establishing Soil Conservation Subdistricts in the State. This act has made possible a cooperative agreement with the U.S. Department of Agriculture, Soil Conservation Service (SCS), which allows SCS to perform soil conservation surveys and provide technical services related to soil and water conservation activities. The soil conservation subdistrict boards from organized subdistricts in the State have volunteered their services in providing local expertise and guidance to soil and water conservation activities since the organization of the program. Other than travel expenses for the State board, this movement has not had financial support from the State.

The quality of the subdistrict boards has been recognized by State agencies to the point that they now have legal responsibility for reviewing state farm plans and have a special signed agreement with the Department of Environmental Conservation providing for district and subdistrict cooperation with that agency. These legislative mandates and cooperative agreements demand considerable statewide coordination, time and expense by board members. SB 120 is an attempt to expand the Soil Conservation Board's activities to include broader representation and make possible continuous coordination of activities and responsibilities on a statewide basis. The Soil Conservation program provides a valuable service to state activities associated with agriculture, forestry, land use planning, and development. As the State develops agriculture, reclamation activities, forestry, grazing and other programs that need the services provided by the soil and water conservation programs these demands will increase. These services cannot be continued indefinitely without fiscal support.

We urge you to support SB 120 with full funding of the necessary support services this legislative session.

For background information we have attached:
-1983 Alaska Assoc. of Soil Conservation Subdistricts Directory
-A prepared statement for the Senate Resources Committee
-A list of Cooperators throughout the state.

Thank you for your consideration of our request.

Sincerely,

Alaska Association of Soil Conservation Subdistricts

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M March 8, 1983

SUBJECT: Agricultural land amendments (CSHB 148(C&RA))

TO: Representative Don Clocksin

FROM: Richard A. Bradley
Legislative Counsel

You have requested an analysis of the amendments incorporated into the committee substitute for HB 148. If this memorandum is late, as it seems it may be at this time, I regret that.

An analysis of the changes to HB 148 follows:

As you requested, the "Legislative Findings and Declaration of Purpose" have been eliminated.

The first amendment to bill language is in Sec. 03.07.010(b). The last "if" phrase on lines 23 - 24 of page 2 of the bill is turned into subsec. (b)(1) and the concept you suggested becomes (b)(2). Your request was that concepts of (1) prior classification and (2) disposal consistent with the classification be utilized. I believe that the short phrase added as (b)(2) contains these ideas.

But note that the "director" described in the bill is not the director of the division of lands. See sec. 100(7). Rather, the director is the director of agriculture. As a result, the director carrying out these programs is not going to have supervision of the division of lands programs and the access to the state land. I believe it was for this reason that the early part of sec. 10(b) requires the permission of the commissioner for these disposals. Some coordination between divisions is required.

Your second concept dealt with notice. Rather than developing new concepts of notice, I plugged your request into existing law at AS 38.05.345, with some embellishments. In that connection, see also bill sec. 2.

Since you wished sec. 10(e) to be eliminated for other reasons, I have put the notice requirements in at sec. 10(e).

Your third request, an amendment to AS 03.07.010(d), is accomplished.

Sec. 03.07.010 is deleted, as noted earlier, and replaced with new material you requested.

Your fifth request was concerned with specific appropriations for this program. See the new sec. 10(g).

The report that you wish from the commissioner of natural resources is requested under bill section 3.

For the moment, I will pass over the request concerned with the municipal tax implications of this bill, particularly as a conforming amendment to AS 29.53.035 is concerned.

Sec. 60(b) is amended to accomplish your request.

Sec. 90(a)(2) is deleted.

The effective date clause is eliminated.

Returning to the tax implications.

I was in the process of drafting an amendment to AS 29.53.035 for addition to the bill when the computer went down. Because I had substantial problems fitting your request into sec. 35 and because I anticipated problems meeting your deadline request, I decided to omit that request, advise you why and send the bill on its way.

The portion of sec. 35 that I would amend is sec. 35(a); that subsection provides:

> (a) Farm use lands included in a farm unit and not dedicated or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use, and shall not be assessed as if subdivided or used for some other nonfarm purpose. The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be sold, leased, or otherwise disposed of for uses incompatible with farm use or be converted to a use incompatible with farm use by the owner, the owner

> is liable to pay an amount equal to the additional tax at the current mill levy together with eight per cent interest for the preceding seven years, as though the land had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the city or borough.

As you can see, the third sentence of sec. 35(a) contemplates that it is a transaction turning the land to a use "incompatible with farm use by the owner" that triggers the repayment. As I suggested to you yesterday, if that use is consistent with agricultural use, then the argument for repayment is vitiated -- or so it seems to me.

But if you believe that such a provision is required, then I suggest the following:

> (a) Farm use <u>land that is</u> [LANDS] included in a farm unit, [AND] not dedicated or being used for nonfarm purposes<u>, and not subject to an agricultural preservation easement</u> shall be assessed on the basis of full and true value for farm use, and shall not be assessed as if subdivided or used for some other nonfarm purpose. The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be sold, leased, or otherwise disposed of for uses incompatible with farm use or be converted to a use incompatible with farm use by the owner, the owner is liable to pay an amount equal to the additional tax at the current mill levy together with eight per cent interest for the preceding seven years, as though the land had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the city or borough.

I would then also add a new subsection to read:

> (f) Farm land subject to an agricultural preservation easement shall be assessed on the basis of full and true value for farm use. The owner of the farm land subject to an agricultural preservation easement is not entitled to benefits under (a) of this section.

If I may be of further assistance, please advise.

PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: CSHB 148 (C&RA) Date on Bill: 3/18/83
Title: Preservation of agricultural lands
Sponsor: Lacher, Larson and Zharoff
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating		77.3	82.5	88.0
Total				

b. Revenues:

Revenue				

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

Fiscal impact of this proposal is entirely dependent on level of implementation. We estimate the program would require a minimum of one professional and one clerical to administer the activities required to prepare documents, arrange appraisals, handle public meetings and follow up on verification of compliance with land use requirements. These position can be located at the Wasilla office of the Division of Agriculture.

No funding is requested in this note for actual purchase of easements.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

Barbara Lacher
P.O. Box 30
Wasilla, AK 99687

Dear ~~Senator:~~ Representative:

The Kodiak Farmer/Stockgrowers Association and the individual ranchers are very interested in HB 148, relating to the preservation of agricultural land. It has proved workable in other areas and will also in Alaska.

We also think the amendments listed in Senate Bill 124, changing the loan program to farmers, are necessary in today's marketplace and ask you to support this legislation.

Please let me know your views on these important concepts at your early convenience.

Sincerely,

Bill Burton

4. Fiscal Impact: ☒ None ☐ Fiscal Note Attached

5. Amendments Proposed:

6. Comments:

This bill would provide a variety of financial mechanisms and inducements in an effort to protect agricultural lands in rapidly urbanizing areas. Superficially, this is an admirable goal. However, unless the protection of the agricultural land is accomplished under a long range land use policy and plan, such protection is doomed to failure from the outset. Even under the auspices of such a plan, a community, or the State, rarely has the commitment or resources to effectively carry out such protection.

The end result of such an effort is usually a patchwork quilt of varying land uses. It results in "leap-frog" developments which, after a few years, leave isolated so-called "agricultural lands" surrounded by noncompatible uses. This situation increases the burden on the municipalities and taxpayers by making the extension of public utilities and services much more expensive. This bill would have a negative impact on the economic development of the State.

BILL ANALYSIS
HB 148

6. Comments (Continued)

Direct experience in both Oregon and California, where similar laws exist, has demonstrated that when there is pressure for development then development will occur. The protection or preservation of agricultural lands without a concurrent program to identify and provide lands for development is simply not justified. Rather than increasing the livability of an area, it will have exactly the reverse effect in the long run. Added costs to the State and municipalities, reduced effectiveness of public services, added rules and regulations, etc., will all serve as a deterrent to effective land use and economic development.

POSITION PAPER

RE: HB 148

SPONSOR: Representatives Lacher and Larson

Program Effects of Bill

The measure establishes an agricultural preservation easement program within the Department of Natural Resources designed to preserve farmland that would otherwise be lost to urbanization.

Comments

This Department is in a position only to address potential impacts on local governments. Department of Natural Resources would hold primary responsibility for administration.

Section 03.07.010(d) allows only the preservation of agricultural uses.

The purpose of this program is to preserve land, for and in agricultural use, from being absorbed by urbanization. This is laudable.

According to Section 03.07.090, this legislation does not allow the State or anybody other than the "owner" to actually perform agricultural activities.

Matanuska-Susitna Borough

BOX B, PALMER, ALASKA 99645 • PHONE 745-4801

DEPARTMENT OF ADMINISTRATION

January 10, 1983

Billy G. Berrier, Director
Division of Legal Services
Legislative Affairs Agency
Pouch Y
Juneau, Alaska 99811

Dear Billie:

Subject: FARM LAND PRESERVATION BILL

I understand Representative Barbara Lacher will be making arrangements with you on drafting a farm land preservation bill and that she may have already been in contact with you on this.

Attached are

1. Section by section analysis of a draft bill.

2. Draft bill reviewed and approved by Borough Agricultural Advisory Committee.

The Matanuska-Susitna Borough Assembly has seen the bill and had the bill before it when it included farm land preservation as a Borough FY 83-84 legislative priority. They did not want to make recommendations as to specific wording of a bill.

You may have received an earlier draft. You should be aware of the following changes recommended by the Borough Agricultural Advisory Committee in its testimony before the Assembly in support of a State farm land preservation program on January 4, 1983.

> Sec. 38.60.030 LAND ELIGIBLE FOR AGRICULTURAL PRESERVATION. Land eligible for agricultural preservation under this chapter must
>
> ...
>
> (3) contain over at least 40 percent of the surface area soils which are classified as classes II, III and IV [CLASSES II, AND III] by the United States Soil Conservation Service; and
>
> (4) be a parcel of at least 40 [20] acres in cultivation or farm use or be a parcel of at least 20 acres in cultivation or

farm use [IN SIZE] adjacent to established farms [FARMS OR FARMS] of at least 40 acres in size which have been in operation as farms for at least ten (10 years.

I am also attaching a copy of the King County (Washington) farm preservation ordinance from which we borrowed and a list of farms in this Borough that are presently under the State property tax deferral program. Some of the farms listed are representative of the type of farms in which agricultural easements would be sought.

Representative Lacher is out of the state at this time so I wanted you to get this material now in case you are in the middle of work on a farm land preservation bill at this time.

I recognize that you draft bills only at the request of a legislator and word them to meet the specific objectives of the legislator. So, if I have jumped the gun, would you wait for Representative Lacher's call.

Representative Lacher was a member of the Borough Agricultural Action Council until she resigned from the Assembly to take her seat in the Legislature so she is familiar with the wording of the attached bill.

Sincerely,

Gary Thurlow
Borough Manager

er

cc: Representative Barbara Lacher
Tracy Moffitt, Chairman
Agricultural Committee

SECTION BY SECTION ANALYSIS OF AN ACT
RELATING TO THE PRESERVATION OF AGRICULTURAL LAND

Section 38.60.010 Findings and Declaration of Purpose. This section is probably not necessary. Ordinarily findings and declaration of purpose simply add to the bulk of the statute books. This section is adapted from Section 2, of King County Ordinance No. 4341 which is the King County ordinance relating to the acquisition of voluntarily offered interest in farm and open space in King County, which ordinance was funded through a bond issue approved by a vote of King County voters and which obtained in excess of the 60% vote required by State of Washington law. The county commissioners of King County used the findings and declaration of purpose presumably for one or two purposes including:

(1) to help explain the proposition to the voters of King County, and

(2) upon advice of King County bond counsel to the end that buyers of agricultural preservation bonds would have a better idea of the uses of the general obligation bond monies.

In this case, the findings and declaration of purpose may better explain the purposes of the bill to Alaska legislators.

Section 33.60.020. Acquisition of Agricultural Preservation Easements. This section sets up the mechanism for the director of agriculture to purchase or otherwise acquire a agricultural preservation easement in property.

State land is made available as an alternate means of exchange.

In the Matanuska-Susitna Borough, available state land would probably be limited to tracts in the state agricultural project, such as the Fish Creek Agricultural Project, or lots and parcels generated through the establishment of state subdivisions within the borough. Parcels in the agricultural projects would give the owner an opportunity to obtain additional agricultural land; lots in parcels within a state subdivision would almost always be non-agricultural in character.

There is an almost total absence of state owned lands in the Matanuska-Susitna Borough which are agricultural in character and which now have access.

Subsection (e) giving the director the right to acquire future interests in farm land was added in the event a owner is in a particular tax situation where he can get an attractive tax deduction for dedicating a future interest, such as a remainder interest upon the expiration of the grantor's life, the life of the grantor's spouse, or the life of one or more other individuals. Very often, an owner of agricultural land is willing to accept less than full value for the agricultural preservation easement and donate the balance for a federal income tax deduction. Subsection (e) is another tool to be used in negotiations with a owner who is seeking further tax deductions.

Subsection (f) includes provisions requested by the Borough Agricultural Advisory Committee including:

(1) the decision to convey an agricultural preservation easement is strictly voluntary and relates only to lands nominated by a particular owner or owners;

(2) the owner is free to farm as he sees fit or to refrain from farming, so long as the owner does not develop his property. The proviso at the end beginning with "so long as" is taken from the King County ordinance.

Section 38.60.030. Land Eligible for Agricultural Preservation. The purpose this section is to limit the application of the act to those lands which have agricultural value. Under a borough land disposal ordinance of 1975, the borough will only dispose of agricultural rights in borough lands in parcels of 40 acres or larger which have 40% or more Class II and III soils. Item (3) of this section refers to classes I through III. There are no Class I soils in the State of Alaska because of climatic constraints; however, with a re-evaluation of these constraints it is possible that some Class II soils might be reclassified as Class I soils.

Section 38.60.040. Priorities for Acquisition. This section gives the director of agriculture criteria to follow when insufficient monies are appropriated for all the demands that would be made upon an agricultural preservation easement fund. It is a virtual certainty that the amount of appropriations for farm land preservation will be substantially lower than the funds which could be used; accordingly, there has to be a means of rationing available monies other than first come first served.

Subsection (b) is adapted from the King County ordinance.

Subsection (c) has been added to require the director of agriculture to refer to any municipal comprehensive plan. Lands which the municipality consider to be high priority agricultural lands may be described in the comprehensive plan.

Section 38.60.050. Application to Exchange or Sell Easement in Agricultural Land. This sets forth what appears to be a rather stiff procedure. If the person administering the program on behalf of the state is dedicated to preserving farm land, he will be able to review a number of different tax saving approaches with the property owner so that the property owner would have a range of options to consider. Successful farm land preservation programs require the time and effort of someone who is dedicated and knowledgeable in land uses and conveyances.

Sections 38.60.060--.090--These are technical provisions which are self-explanatory.

IN THE HOUSE

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the preservation of agricultural land."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38 is amended by adding a new chapter to read:

CHAPTER 60. PRESERVATION OF AGRICULTURAL LAND.

Sec. 38.60.010 Findings and Declaration of Purpose.

(1) Land suitable and in use for farming is an irreplaceable natural resource with soil and topographic characteristics which have been enhanced by years of agricultural use. When such land is converted to urban and suburban uses which do not require those special fertility and landscape characteristics, and important economic and community resource is permanently lost to the State of Alaska.

(2) Alaska is a desirable place to live and visit because of the quantity, variety and natural beauty of its open space which contributes a vital ingredient to the quality of life of the people of the State. Alaska farmlands provide a natural separation between urban areas, furnish unique aesthetic and economic benefits to the citizens of the State and are an important part of Alaska's heritage.

(3) The agricultural industry in Alaska provides Alaskans with the opportunity to obtain locally grown agricultural products with certain advantages in flavor, quality and costs which would not otherwise exist.

preservation easement in privately owned agricultural land if the privately owned agricultural land meets the requirements specified in AS 38.60.030.

(c) The value of an agricultural preservation easement received by the state in an exchange made under this chapter must be equal to the fair market value of the state land or the interest in state land exchanged. If the value of the state land or the interest in state land is not equal to the value of the agricultural preservation easement, the director may accept money from, or pay money to, a landowner. The money paid or accepted must equal the difference between the fair market value of the agricultural preservation easement and the fair market value of state land or the interest in state land exchanged under this chapter.

(d) A purchase of an agricultural preservation easement or an exchange of state land for an agricultural preservation easement shall be to preserve the agricultural use of land.

(e) The director may, in lieu of an agricultural preservation easement, accept a remainder interest in a life estate or similar future interest, so long as the land continues in agricultural uses.

(f) The sale, exchange or donation of an agricultural preservation easement is strictly voluntary. A parcel shall be considered under this program only upon application of the owner. After sale, donation or acquisition by exchange of agricultural preservation rights, the owner shall not be required to carry out any specific agricultural activities so long as the owner does not use or subdivide the land for any residential, commercial or industrial purposes and activities which are not incident to agricultural uses.

(4) farm lands that are close to market; and

(5) farm lands that are within a known established agricultural area.

(b) Criteria for selection within same priority. In the event that funds are not adequate within a priority area to purchase all eligible lands of equal priority for which valid offers shall have been received by the state, the following criteria shall be considered in determining which offers to accept:

(1) an offer of land which is more threatened by urban development shall be favored over an offer of land which is less threatened;

(2) an offer which is below appraisal shall be favored over an offer which is at appraisal.

(3) an offer of farmland producing in the 12 months preceding application shall be favored over an offer of land which lies fallow;

(4) an offer of land which will form a contiguous farming area with other offered or acquired eligible land shall be favored over an offer of land which is separated;

(5) an offer of land which will serve the dual purpose of urban separation and agricultural production or separating commercial and industrial uses from residential or recreational uses shall be favored over an offer of land which will serve only one of such purposes; and

(c) Where agricultural lands are within a municipality, the director shall, before making an allocation of agricultural preservation

(d) If the agricultural land, or any part of it, is located in a municipality, the director shall notify the governing body of the municipality within 30 days after approval of an application that an application has been approved. Within 30 days after the notification, the municipal governing body may appeal to the director for reconsideration of his decision. If a municipality appeals, the director shall hold a public hearing in the municipality before an offer to sell or exchange is tendered to the landowner. If, after a public hearing in the municipality, the director's decision remains unchanged, the municipality may appeal to the commissioner within five days for a review of the director's decision.

Sec. 38.60.060. OFFER TO BUY OR EXCHANGE. Within 90 days after approval of the landowner's application to sell or exchange an agricultural preservation easement, the director may accept the landowner's offer to buy or exchange at a price and upon terms offered by the lanowner or may, in the director's discretion, make a counter offer to buy or exchange and may specify terms, contingencies, and conditions not contained in the landowner's aplication. A landowner has 30 days from the date or receipt of the counter offer to buy or exchange in which to accept or reject the offer.

Sec. 38.60.070. VALUE OF AGRICULTURAL PRESERVATION EASEMENT. (a) The maximum value of an agricultural preservation easement acquired under this chapter shall be the asking price or the difference between the fair market value of the land and the agricultural value of the land, whichever is less.

(b) The value of an agricultural preservation easement shall be determined by the director based on one or more appraisals by qualified appraisers. If the landowner and the director fail to agree on the value

Sec. 38.60.90. DEFINITIONS. In this chapter (1) "agricultural operations" means those activities related to the production of domesticated plants and animals useful to man;

(2) "agricultural preservation easement" means a public owned interest in lands under which the owner retains agricultural rights, but in which all development rights are owned by the public.

(3) "agricultural rights" means an interest in and the reight to use and possess land for purposes and activities related to horticultural, livestock, dairy and other agricultural uses.

(4) "agricultural use" means the use of land for the production of domesticated plants and animals useful to man, and other related uses and activities;

(5) "agricultural value" means the price on the valuation date which a vendor, willing but not obligated to sell, would accept for the property, and which a purchaser, willing but not obligated to buy, would pay for the property to be used for agricultural operations;

(6) "commissioner" means the commissioner of the Department of Natural Resources;

(7) "development rights" means an interest in and the right to use and subdivide land for any and all residential, commercial and industrial purposes and activities which are not incident to agricultural uses.

(8) "director" means the director of the division of agriculture in the Department of Natural Resources;

(9) "fair market value" means the price on the valuation date for the highest and best use of the property which a vendor, willing but

not obligated to sell, would accept for the property, and which a purchaser, willing but not obligated to buy, would pay for the property if the property was not subject to any restriction imposed under this chapter.

(10) "municipality" means a unified municipality or a home rule borough or general law borough or city, of any class, incorporated under the laws of the state;

(11) "qualified appraiser" means a senior member of the American Institute of Real Estate Appraisers, the Society of Real Estate Appraisers, a person meeting the requirements for certification as an appraiser II by the division of personnel, Department of Administration, or a person qualified according to regulations adopted by the commissioner under the Administrative Procedure Act (S 44.62);

(13) "residential subdivision for commercial purposes" means the division of a tract or parcel of land into two or more lots, sites or other divisions for the purpose, whether immediate or future, of sale or building development, and includes a resubdivision.

of the easement, the landowner, at his own expense, may have the easement appraised by a qualified appraiser agreed upon by the landowner and the director.

Sec. 38.080. PROVISIONS TO BE INCLUDED IN EASEMENT. An agricultural preservation easement acquired under this chapter shall include the following provisions:

(1) agricultural use of the land by the landowner or his assigns is permitted;

(2) removal of minerals or materials from the subsurface of the land by the landowner or his assigns is permitted if the landowner immediately returns the land to agricultural use and restores the land to a condition at least as favorable for agricultural use as existed before the nonagricultural use began;

(3) operation of machinery used in agricultural production or the primary processing of agricultural products is permitted;

(4) normal agricultural operations are permitted, including, but not limited to, sale of agricultural products produced on the land where the sale is made;

(5) residential subdivision for commercial purposes by the landowner or his assigns is not permitted;

(6) construction of buildings for farming operations is permitted, but land used for farm residences may not exceed one acre per 40 acres of land under an agricultural preservation easement; and

(7) acquisition of an agricultural preservation easement by the state does not grant the public a right of access or right of use of the property subject to the easement, nor does it affect any existing easements, rights of way or rights of access.

easement monies to farm land preservation priority districts within the municipality, refer to any comprehensive plan or ordinances of the municipality on municipal farm land preservation priorities provided to him by the municipality and shall, before making an allocation, give the municipality an opportunity to make recommendations regarding priorities for farm land preservation within the municipality.

Sec. 38.60.050. APPLICATION TO EXCHANGE OR SELL EASEMENT IN AGRICULTURAL LAND. (a) An owner of agricultural land which meets the requirements of AS 38.60.030 may offer by written application to sell or exchange an agricultural preservation easement to the state on all or a portion of his agricultural land.

(b) To be considered by the director, an application to sell or exchange must

(1) include an asking price at which the owner is willing to sell an easement. The owner may, but is not required to, submit an appraisal to support the asking price.

(2) include a complete description of the agricultural land.

(c) Within 30 days after the receipt of an application, the director shall notify the landowner of the sufficiency of the application. If the application is insufficient, the director shall specify the reason and shall allow an additional 30 days for the landowner to remedy the insufficiency. If the application is made sufficient within 30 days of the notification by the director, the application shall be approved. The director shall notify all landowners whose applications have been rejected, and he shall specify the reasons for the rejection.

Sec. 38.60.030. LAND ELIGIBLE FOR AGRICULTURAL PRESERVATION. Land eligible for agricultural preservation under this chapter must

(1) be under private ownership;

(2) be located in an area of the state surveyed by the United States Soil Conservation Service;

(3) contain over at least 40 per cent of the surface area soils which are classified as classes II, III and IV by the United States Soil Conservation Service; and

(4) be a parcel of at least 40 acres in cultivation or farm use or be a parcel of at least 20 acres in cultivation or farm use adjacent to established farms of at least 40 acres in size which have been in operation as farms for at least ten (10) years.

Sec. 38.60.040. PRIORITIES FOR ACQUISITION.

(a) Priority districts. In the event that funds are not adequate in the state to purchase agricultural preservation easements in all eligible lands, the director may establish farmland preservation priority districts and allocate monies for agricultural preservation easements within those districts according to the following priorities and in the following order of priority.

(1) farm lands threatened by early conversion to subdivisions, commercial or industrial uses;

(2) farm lands which are of recognized value as a tourism destination because of historic associations, natural setting, closeness to tourism routes or other reasons;

(3) farm lands which have a history of high productivity because of soils, temperatures and other reasons:

(4) It is the policy of the State of Alaska to protect and preserve agricultural lands as evidenced by Alaska laws authorizing current use taxation of agricultural land and by property tax deferral policies of local governments in which farmlands are located.

(5) These policies, by themselves, have not been effective to provide long-term protection of farm lands under the pressure of increasing urban development.

(6) Generally, farm lands close to urban centers have a greater market value for future urban development than their market value for farming. This fact encourages the speculative purchase of these lands at high prices for future development, regardless of the current use of such lands. Farm lands which have a market value greater than their agricultural value do not attract sustained agricultural investment and eventually these lands are sold by farmers and removed from agricultural uses.

(7) The permanent acquisition by the State of voluntarily offered interests in farm lands within the State, as provided in this chapter will permit these lands to remain in farm uses in developing urban areas and provide long-term protection for the public interests which are served by farmlands within the State of Alaska.

Sec. 33.60.020. ACQUISITION OF AGRICULTURAL PRESERVATION EASEMENTS.

(a) If privately owned agricultural land meets the requirements specified in AS 38.60.030, the director may acquire by purchase an agricultural preservation easement in that land.

(b) The director, with the concurrence of the commissioner, is authorized to dispose of state land or an interest in state land by exchanging it for privately owned agricultural land or for an agricultural

Proposed No.: 79-729

ORDINANCE NO. 4341

AN ORDINANCE relating to the acquisition of voluntarily offered interests in farm and open space land in King County; calling an election by the voters of the County on September 18, 1979, to authorize the issuance of general obligation bonds of the County in the principal amount of not to exceed $50,000,000 for the purpose of providing funds for such acquisition and repealing Ordinances 3871, 3872 and 3918.

BE IT ORDAINED BY THE COUNCIL OF KING COUNTY:

SECTION 1. Repeal. Ordinances 3871, 3872 and 3918 are hereby repealed and replaced with this ordinance.

SECTION 2. Findings and Declaration of Purpose.

The Council finds that:

(1) King County is a desirable place to live and visit because of the quantity, variety and natural beauty of its open space which contributes a vital ingredient to the quality of life of the people of the County. These open space resources presently include more than fifty thousand acres of land suitable for farming, and other woodlands, wetlands and open lands adjacent to these farmlands. Such lands provide natural separation between urban areas, furnish unique, aesthetic and economic benefits to the citizens of the County and are an important part of our heritage.

(2) Land suitable for farming is an irreplaceable natural resource with soil and topographic characteristics which have been enhanced by generations of agricultural use. When such land is converted to urban and suburban uses which do not require those special fertility and landscape characteristics, an important community resource is permanently lost to the citizens of King County.

(3) The agricultural industry in King County provides the citizens of the County with the opportunity to harvest locally grown berries, fruit and vegetables at u-pick farms and to purchase locally produced food and dairy products through the Pike Place Market, farmers markets, roadside stands and other local outlets throughout the County.

(4) It is the policy of the State of Washington and King County to protect, preserve and enhance agricultural and open space lands as evidenced by the King County Comprehensive Plan of 1964 as amended by Ordinance 1096, establishing open space policies in King County, Ch. 84.34 RCW and Ordinance 2537, authorizing current use taxation of agricultural and open space land, Ch. 84 Laws of 1979 limiting and deferring road and utility assessments on farm and open space land, Ordinance 3064, as amended, establishing King County's agricultural lands policy and County and city ordinances regulating land use by zoning.

(5) However, these policies and regulations, by themselves, have not been effective to provide long-term protection of farm and open space lands under the pressure of increasing urban development. The amount of land in agricultural use in King County has declined from more than 100,000 acres in 1959 to approximately 50,000 acres in 1979, with much of this loss having been caused by actual or prospective urban development.

(6) Generally, farm and open space lands which are close to urban centers have a greater market value for future urban development than their market value for commercial farming or other open space uses. This fact encourages the speculative purchase of these lands at high prices for future development, regardless of the current zoning of such lands. Farm lands which have a market value greater than their agricultural value do not attract sustained agricultural investment and eventually

these lands are sold by farmers and removed from commercial agricultural uses.

(7) The permanent acquisition by the County of voluntarily offered interests in farm and open space lands within the County, as provided in this ordinance and as authorized by the Constitution and statutes of the State of Washington, will permit these lands to remain in farm and open space uses in a developing urban area and provide long-term protection for the public interests which are served by farmlands and open space lands within the County.

(8) The acquisition of interests in farm and open space lands as provided in this ordinance is a public purpose of King County and financing such acquisition requires that the County issue its general obligation bonds in the principal amount of not to exceed $50,000,000.

SECTION 3. Definitions.

(1) "Full Ownership" means fee simple ownership.

(2) "Agricultural Rights" means an interest in and the right to use and possess land for purposes and activities related to horticultural, livestock, dairy and other agricultural and open space uses.

(3) "Development Rights" means an interest in and the right to use and subdivide land for any and all residential, commercial and industrial purposes and activities which are not incident to agricultural and open space uses.

(4) "Value of Development Rights" means the difference between the fair market value of Full Ownership of the land (excluding the buildings thereon) and the fair market value of the Agricultural Rights to that land.

(5) "Owner" means the party or parties having the fee simple interest, a real estate contract vendor's or vendee's

interest, a mortgagor's interest or a grantor of a deed of trust's interest in land.

(6) "Farmland" means a) "Farm and Agricultural Land" as now defined in RCW 84.34.020(2), or b) land which is in a single ownership of twenty or more contiguous acres, at least 80% of which is open or fallow and which has produced a gross income from agricultural uses of $100.00 or more per acre per year for three of the ten calendar years preceding the date of the owner's application. The "date of application" as used in a) or b) above shall be the date of the owner's application for purchase by the County.

(7) "Food Producing Farmland" means Farmland which has been used for the commercial, soil-dependent cultivation of vegetables, berries, other fruits, cereal grains and silage corn.

(8) "Open Space Land" means "Open Space Land" as now defined in RCW 84.34.020(1) and "open space use" shall mean any of the uses provided in such definition.

(9) "Eligible Land" means Farmland and Open Space Land for the purchase of which bond proceeds are authorized to be used pursuant to this ordinance.

(10) "Selection Committee" means the Committee formed pursuant to Section 6 of this ordinance to advise the Council in the selection of Eligible Lands for purchase.

(11) "Bonds" means the general obligation bonds of the County described in Section 12 of this ordinance.

(12) "Council" means the King County Council.

(13) "Executive" means the King County Executive.

(14) "Governmental Agency" means the United States or any agency thereof, the State of Washington or any agency thereof, any County, City or municipal corporation.

(15) "Appendices A, B, C, D, E and F" of this ordinance mean the maps which describe designated areas of Eligible Lands for purposes of priority of acquisition as provided in Section 5 of this ordinance. Official large scale maps describing such areas in detail are hereby filed with the Administrator-Clerk of the Council and incorporated herein by this reference. Smaller scale maps generally illustrating such areas are appended to this ordinance for more readily accessible public reference.

SECTION 4. Authorization.

(1) The County is hereby authorized to issue its general obligation bonds to acquire the Farmlands and Open Space Lands described and prioritized in Section 5 of this ordinance. The property interest acquired may be either the Development Rights, Full Ownership or any lesser interest, easement, covenant or other contractual right. Such acquisition may be accomplished by purchase, gift, grant, bequest, devise, covenant or contract but only at a price which is equal to or less than the appraised value determined as provided in this ordinance. The proceeds of the Bonds shall be used to acquire such property interests only upon application of the owner and in a strictly voluntary manner.

(2) If the Owner so elects, the Executive is authorized to pay the purchase price in a lump-sum single payment at time of closing, or to enter into contracts for installment payments against the purchase price consistent with applicable federal arbitrage regulations. When installment purchases are made, the County is authorized to pay interest on the declining unpaid principal balance at a legal rate of interest consistent with prevailing market conditions at the time of execution of the installment contract and adjusted for the tax-exempt status of such interest.

(3) The Executive is further authorized to contract with other Governmental Agencies to participate jointly in the

acquisition of interests in Eligible Lands on such terms as shall be approved by the Council consistent with the purposes and procedures of this ordinance.

(4) The County may acquire Full Ownership in Eligible Lands of First Priority only where the Owner will voluntarily sell only the Full Ownership of the property. The County shall acquire only Development Rights or interests which are less than Full Ownership in Eligible Lands of Second and Third Priority.

(5) After County acquisition of Development Rights or some interest less than Full Ownership in any Eligible Land, the County may purchase the remaining Agricultural Rights or other property interests in such land only when requested by the Owner and when such acquisition is necessary to maintain agricultural or open space uses of the property.

(6) If the County shall acquire Full Ownership in any Eligible Lands the Executive shall as soon as practicable offer the Agricultural Rights to such land for public sale at a price not less than the appraised value of such rights. If no offer for such rights is received at the appraised value, the Executive may, with the approval of the Council, either reoffer the agricultural rights for public sale or lease such land for agricultural or open space use or make such land available for publicly owned open space uses consistent with the purposes of this ordinance.

(7) Interests which the County owns in property other than Eligible Lands may be exchanged for property interests in Eligible Lands on an equivalent appraised value basis. If the County has acquired Full Ownership of any Eligible Lands the Agricultural Rights in such lands may be exchanged for the Development Rights to other Eligible Land of equal or higher priority on an equivalent appraised value basis. If the property interests exchanged are not exactly equal in appraised value, cash

payments may be made to provide net equivalent value in the exchange.

SECTION 5. Eligible Lands and Priority of Acquisition.

The proceeds of the Bonds shall be used to purchase property interests in the following lands in the following order of their numbered priority group. The lands described within each numbered priority group shall be deemed of equal priority regardless of the order of designation within such group.

First Priority:

(a) Farmlands and Open Space Lands located within the designated areas of the Sammamish, Lower Green or Upper Green River Valleys as shown respectively on Appendix A, Appendix B and Appendic C of this ordinance.

(b) Food Producing Farmlands located anywhere within the County except those lands removed from the Agricultural District by the King County Council in its affirmative action on Ordinance No. 3326* generally described but not limited to those lands on Appendix "F" but outside of the designated areas of the Sammamish, Lower Green, Upper Green and Snoqualmie River Valleys and Enumclaw Plateau as shown in Appendices A-E inclusive of this ordinance.

Second Priority:

(a) Farmlands in designated areas in the Snoqualmie Valley as shown on Appendix D of this ordinance.

(b) Farmlands in designated areas of the Enumclaw Plateau as shown on Appendix E of this ordinance.

(c) Approximately 1,500 acres of Farmlands which are larger than 40 contiguous acres located anywhere within the County outside of the areas described in Appendices A to E inclusive of this ordinance

*Amended by Ordinance No. 4373, July 12, 1979.

Third Priority:

All other Farmlands located within presently established Agricultural Districts of the County and designated to be Agricultural Lands of County Significance.

SECTION 6. Selection Committee.

(1) A seven-member Selection Committee shall be appointed within ninety (90) days following the approval of the Bonds by the voters. The Selection Committee shall advise the Council in the selection of Eligible Lands offered for acquisition by their owners. Members shall be appointed by the Executive and confirmed by the Council and shall comply with the King County Code of Ethics. No member may have an ownership interest in any of the lands eligible for purchase pursuant to this ordinance.

(2) The Selection Committee shall consist of two members each of whom shall have at least five years experience in the operation and management of commercial farms; two members each of whom shall have five years of experience in the management of either a construction or land development or real estate business; and three members who shall be lay citizens from different geographic areas of the County. One of the lay members shall be appointed by the Executive to serve as chairman. Committee recommendations shall be made by a majority of its members.

(3) Members shall serve three-year terms, except that the initial term of three members shall be two years and of four members shall be three years. Members may be removed by the Executive only for good cause shown. Members shall not be compensated for their services but shall be reimbursed for expenses actually incurred in the performance of their duties. Members may be reappointed to successive terms but the Selection Committee shall be terminated when the proceeds of the Bonds have been spent and in any event no later than eight years after the Bond election.

SECTION 7. Selection Process.

Beginning in the first year following the Bond election and continuing at least once a year for a period of six years or until all Bond proceeds have been expended whichever date is sooner, the Executive shall conduct a voluntary property selection process (herein called "Selection Round") generally as follows:

(1) In the first and second Selection Rounds all properties offered in Priority One shall be eligible for purchase. In the third Selection Round all properties offered in Priority One and Priority Two shall be eligible for purchase, and in all subsequent Selection Rounds all properties offered in Priorities One, Two and Three shall be eligible for purchase. In all Selection Rounds properties of higher priority shall be purchased with available funds before properties of lower priority are purchased.

(2) The Executive shall begin each Selection Round by giving notice in one newspaper of general circulation in each area where Eligible Lands are located which may be acquired in that Round. The notice shall describe the properties eligible for purchase in that Selection Round, the procedure to be followed in the selection process, including an estimated time schedule for the steps in the process, and shall invite the Owners of such properties to make application for purchase by the County and to describe the property interest which the Owner is willing to sell.

(3) Upon closing of the application period, the County Executive shall review each application which has been received to determine the eligibility and priority classification of each property interest and to verify ownership by title search.

(4) For those applications which meet the requirements of (3) above, the Executive shall cause an appraisal of the applicant's property interest to be made. Two appraisals shall

be made to determine the Value of Development Rights. One appraisal shall determine the fair market value of Full Ownership of the land (excluding buildings thereon) and one shall determine the fair market value of the Agricultural Rights only. Appraisals of the fair market value of Full Ownership or of a property interest other than Development Rights shall be made by independent appraisers selected by the Executive from a list of not less than ten qualified persons recommended by the County Assessor. Such persons shall be deemed qualified if they have been certified to be professionally competent appraisers by a recognized professional appraisal certification organization, shall have had at least five years experience as a professional appraiser and shall not have a property interest in Eligible Lands. Appraisals of the fair market value of Agricultural Rights shall be made by independent appraisers selected by the Executive with at least five years experience in the appraisal of agricultural land and who shall not have a property interest in Eligible Lands.

(5) Appraisals shall be in writing and shall be furnished to the respective owners for review. Errors of fact in any appraisal may be called to the attention of the appraiser by the County or by Owners of the property appraised but corrections of the appraisal may be made only by the appraiser. If an Owner of property believes it has not been adequately appraised such Owner may, within the time allowed therefor on the selection schedule, request that a review appraisal be made at the Owner's expense. The Selection Committee shall appoint the review appraiser or appraisers in the same manner as the original appraiser or appraisers are appointed by the Executive. The review appraisal shall become the final appraisal.

The appraisal shall then be filed with the Executive.

(6) Terms and conditions of sale and information on the effect of the sale may be discussed by the Executive with

Owners prior to the submission of written offers.

(7) Sealed, firm, written offers by all applicants who desire to have their property purchased by the County shall then be submitted on forms provided by the County to be opened by the County Executive on a day certain.

(8) The Executive shall review all offers and make recommendations thereon to the Selection Committee and the Council.

(9) The Selection Committee shall review all offers and the recommendations of the Executive and make recommendations to the Council.

(10) Upon receiving the recommendations of the Selection Committee, the Council shall take final action on such recommendations.

SECTION 8. Criteria for Selection within Same Priority. Only in the event that funds are not adequate in any Selection Round to purchase all Eligible Lands of equal priority for which valid offers shall have been received by the County, the following criteria shall be considered in determining which offers to accept within such priority group:

(1) An offer which is below appraisal shall be favored over an offer which is at appraisal.

(2) An offer of Development Rights in land shall be favored over an offer of Full Ownership.

(3) An offer of farmland producing in the 12 months preceding application shall be favored over an offer of land which lies fallow;

(4) An offer of land which is more threatened by urban development shall be favored over an offer of land which is less threatened;

(5) An offer of land which will form a contiguous farming area with other offered or acquired Eligible Land shall be favored over an offer of land which is separated;

(6) An offer of land which will serve the dual purpose of urban separation and agricultural production shall be favored over an offer of land which will serve only one of such purposes;

(7) An offer of Farmlands in commercial production shall be favored over an offer of non-commercial Farmlands.

The weight to be given to each of the above criteria shall be determined finally by the Council for each parcel of property and such good faith determination shall be conclusive.

SECTION 9. Duration of Acquired Interests.

(1) Development Rights acquired pursuant to this ordinance shall be held in trust by the County for the benefit of its citizens in perpetuity. Except as provided in Section 4 of this ordinance and Subsection 2 of this Section and except as found necessary by the Council to convey public road and utility easements, the County shall not sell, lease or convey any land or interest in land which it shall acquire with the use of Bond proceeds.

(2) If the Council shall find that the public farm and open space purposes described in Section 2 of this ordinance can no longer reasonably be fulfilled as to any land or interest in land acquired with Bond proceeds, the Council shall submit to the voters of the County a proposition to approve of the disposition of such land or interest. Only upon a majority vote approving such proposition can such land or interest be disposed of by the County and the proceeds of such disposition shall be used to acquire other Farmlands or Open Space Lands in the County as provided in this ordinance.

SECTION 10. Related Costs.

The costs of appraisal, engineering, surveying, planning, financial, legal and other services lawfully incurred incident to the acquisition of interests in Eligible Lands by the County and

incident to the sale, issuance and delivery of the Bonds shall be paid from the proceeds of the Bonds.

SECTION 11. Supplemental Funds.

Supplemental or matching funds from other Governmental Agencies or private sources may become available to pay a portion of the cost of acquiring Development Rights, Full Ownership or some lesser interest in Eligible Lands or to supplement or enlarge such acquisition. The Executive is hereby authorized to utilize such funds to purchase interests in Eligible Lands or to otherwise supplement the proceeds of the Bonds in the manner provided by this ordinance and in accordance with the applicable laws or terms governing such grant.

It is the intention of the Council that the proceeds of Bonds available for the acquisition of interests in Farmlands in the Snoqualmie Valley be used in a manner consistent with the adopted multi-jurisdiction agreement affecting the uses of the Snoqualmie River.

SECTION 12. County Purpose.

The Council finds and declares that the use of County funds for the purpose of paying in whole or in part the cost of acquisition of interests in Eligible Lands as set forth herein, including any costs necessarily incident to such acquisition, to the sale, issuance and delivery of the Bonds, or to participation with any Governmental Agency for such purposes will promote the health, welfare, benefit and safety of the people of King County and is a strictly County capital purpose.

SECTION 13. Terms of the Bonds.

For the purpose of providing funds necessary to pay the cost of carrying out the acquisition authorized by this ordinance, the County shall issue the Bonds in the principal amount of not to exceed $50,000,000. The Bonds shall be sold at public sale in the manner required by law, shall bear interest payable at such

times, shall be issued in such series from time to time out of such authorization over a period of up to six years, and shall mature serially commencing in from two to five years from the date of issue of each series and maturing in a period which may be less than but shall not exceed thirty years from the date of issue of each series, all as hereafter authorized by the Council and as provided by law. Both the principal of and interest on the Bonds shall be payable out of annual tax levies to be made upon all of the taxable property within the County in excess of constitutional and statutory limits and from any other money which may become legally available and used for such purposes. Any series of the Bonds may be combined with other authorized general obligation bonds of the County and issued and sold as single issues of County bonds. The exact date, form, terms, redemption options and maturities of each series of the Bonds shall be as hereafter fixed by ordinance of the Council.

SECTION 14. Farmland and Open Space Acquisition Fund. The principal proceeds of sale of the Bonds shall be deposited in a Farmland and Open Space Acquisition Fund to be hereafter created in the office of the Comptroller of King County (hereinafter "Acquisition Fund"), except that any premium and accrued interest on the Bonds received at the time of their delivery shall be paid into a fund of the County to be used for the redemption of the Bonds. Money in such Acquisition Fund may be temporarily deposited in such institutions or invested in such obligations as may be lawful for the investment of County money and may be temporarily advanced to the fund for the redemption of the Bonds to pay Bond interest pending receipt of taxes levied therefor.

The principal proceeds from the sale of the Bonds and any interest received from the deposit or investment of such proceeds shall be applied and used solely for the purposes set forth in

this ordinance, and none of such proceeds shall be used for other than a strictly county capital purpose.

SECTION 15. Calling Election.

It is hereby found and declared that an emergency exists requiring the submission to the qualified electors of the county at a special election to be held therein on September 18, 1979, of a proposition authorizing the issuance of the Bonds.

The Manager of the King County Records and Elections Division, as ex officio supervisor of all elections held within King County, is hereby requested to find the existence of such emergency and to assume jurisdiction of and to call and conduct such special election to be held within the County on that date and to submit to the qualified electors of the County at such special election the proposition hereinafter set forth.

The Administrator-Clerk of the Council is hereby authorized and directed to certify that proposition to the Manager of the King County Records and Elections Division in substantially the following form:

Matanuska-Susitna Borough

assembly memorandum

Manager's

no. AM 82-425

from: Gary Thurlow, Borough Manager date: 12/17/82

subject: PRESERVATION OF FARM LANDS

The Borough Agricultural Advisory Committee recommends that the Borough Assembly adopt a farm land preservation bill along the lines of the attached bill.

The Planning Commission supports preservation of farm land through state purchase of development rights from willing sellers.

We recommend that farm land preservation be included as a legislative priority.

Respectfully submitted,

Gary Thurlow
Borough Manager

Attachment

IN THE HOUSE

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the preservation of agricultural land."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38 is amended by adding a new chapter to read:

CHAPTER 60. PRESERVATION OF AGRICULTURAL LAND.

Sec. 38.60.010 Findings and Declaration of Purpose.

(1) Land suitable and in use for farming is an irreplaceable natural resource with soil and topographic characteristics which have been enhanced by years of agricultural use. When such land is converted to urban and suburban uses which do not require those special fertility and landscape characteristics, and important economic and community resource is permanently lost to the State of Alaska.

(2) Alaska is a desirable place to live and visit because of the quantity, variety and natural beauty of its open space which contributes a vital ingredient to the quality of life of the people of the State. Alaska farmlands provide a natural separation between urban areas, furnish unique aesthetic and economic benefits to the citizens of the State and are an important part of Alaska's heritage.

(3) The agricultural industry in Alaska provides Alaskans with the opportunity to obtain locally grown agricultural products with certain advantages in flavor, quality and costs which would not otherwise exist.

(4) It is the policy of the State of Alaska to protect and preserve agricultural lands as evidenced by Alaska laws authorizing current use taxation of agricultural land and by property tax deferral policies of local governments in which farmlands are located.

(5) These policies, by themselves, have not been effective to provide long-term protection of farm lands under the pressure of increasing urban development.

(6) Generally, farm lands close to urban centers have a greater market value for future urban development than their market value for farming. This fact encourages the speculative purchase of these lands at high prices for future development, regardless of the current use of such lands. Farm lands which have a market value greater than their agricultural value do not attract sustained agricultural investment and eventually these lands are sold by farmers and removed from agricultural uses.

(7) The permanent acquisition by the State of voluntarily offered interests in farm lands within the State, as provided in this chapter will permit these lands to remain in farm uses in developing urban areas and provide long-term protection for the public interests which are served by farmlands within the State of Alaska.

Sec. 33.60.020. ACQUISITION OF AGRICULTURAL PRESERVATION EASEMENTS.

(a) If privately owned agricultural land meets the requirements specified in AS 38.60.030, the director may acquire by purchase an agricultural preservation easement in that land.

(b) The director, with the concurrence of the commissioner, is authorized to dispose of state land or an interest in state land by exchanging it for privately owned agricultural land or for an agricultural

preservation easement in privately owned agricultural land if the privately owned agricultural land meets the requirements specified in AS 38.60.030.

(c) The value of an agricultural preservation easement received by the State in an exchange made under this chapter must be equal to the fair market value of the state land or the interest in state land exchanged. If the value of the state land or the interest in state land is not equal to the value of the agricultural preservation easement, the director may accept money from, or pay money to, a landowner. The money paid or accepted must equal the difference between the fair market value of the agricultural preservation easement and the fair market value of state land or the interest in state land exchanged under this chapter.

(d) A purchase of an agricultural preservation easement or an exchange of state land for an agricultural preservation easement shall be to prserve the agricultural use of land.

(e) The director may, in lieu of an agricultural preservation easement, accept a remainder interest in a life estate or similar future interest, so long as the land continues in agricultural uses.

(f) The sale, exchange or donation of an agricultural preservation easement is strictly voluntary. A parcel shall be considered under this program only upon application of the owner. After sale, donation or acquisition by exchange of agricultural preservation rights, the owner shall not be required to carry out any specific agricultural activities so long as the owner does not use or subdivide the land for any residential, commercial or industrial purposes and activities which are not incident to agricultural uses.

Sec. 38.60.030. LAND ELIGIBLE FOR AGRICULTURAL PRESERVATION. Land eligible for agriculutral preservation under this chapter must

(1) be under private ownership;

(2) be located in an area of the state surveyed by the United States Soil Conservation Service;

(3) contain over at least 40 per cent of the surface area soils which are classified as classes II - IV by the United States Soil Conservation Service; and

(4) be a parcel of at least 40 acres in cultivation or farm use or be a parcel of at least 20 acres under cultivation or farm use in size adjacent to established farms of at least 40 acres in size which have been in operation as farms for at least ten (10) years.

Sec. 38.60.040. PRIORITIES FOR ACQUISITION.

(a) Priority districts. In the event that funds are not adequate in the state to purchase agricultural preservation easements in all eligible lands, the director may establish farmland preservation priority districts and allocate monies for agricultural preservation easements within those districts according to the following priorities and in the following order of priority.

(1) farm lands threatened by early conversion to subdivisions, commercial or industrial uses;

(2) farm lands which are of recognized value as a tourism destination because of historic associations, natural setting, closeness to tourism routes or other reasons;

(3) farm lands which have a history of high productivity because of soils, temperatures and other reasons;

(4) farm lands that are close to market; and

(5) farm lands that are within a known established agricultural area.

(b) Criteria for selection within same priority. In the event that funds are not adequate within a priority area to purchase all eligible lands of equal priority for which valid offers shall have been received by the state, the following criteria shall be considered in determining which offers to accept:

(1) an offer of land which is more threatened by urban development shall be favored over an offer of land which is less threatened;

(2) an offer which is below appraisal shall be favored over an offer which is at appraisal.

(3) an offer of farmland producing in the 12 months preceding application shall be favored over an offer of land which lies fallow;

(4) an offer of land which will form a contiguous farming area with other offered or acquired eligible land shall be favored over an offer of land which is separated;

(5) an offer of land which will serve the dual purpose of urban separation and agricultural production or separating commercial and industrial uses from residential or recreational uses shall be favored over an offer of land which will serve only one of such purposes; and

(c) Where agricultural lands are within a municipality, the director shall, before making an allocation of agricultural preservation

easement monies to farm land preservation priority districts within the municipality, refer to any comprehensive plan or ordinances of the municipality on municipal farm land preservation priorities provided to him by the municipality and shall, before making an allocation, give the municipality an opportunity to make recommendations regarding priorities for farm land preservation within the municipality.

Sec. 38.60.050. APPLICATION TO EXCHANGE OR SELL EASEMENT IN AGRICULTURAL LAND. (a) An owner of agricultural land which meets the requirements of AS 38.60.030 may offer by written application to sell or exchange an agricultural preservation easement to the state on all or a portion of his agricultural land.

(b) To be considered by the director, an application to sell or exchange must

(1) include an asking price at which the owner is willing to sell an easement. The owner may, but is not required to, submit an appraisal to support the asking price.

(2) include a complete description of the agricultural land.

(c) Within 30 days after the receipt of an application, the director shall notify the landowner of the sufficiency of the application. If the application is insufficient, the director shall specify the reason and shall allow an additional 30 days for the landowner to remedy the insufficiency. If the application is made sufficient within 30 days of the notification by the director, the application shall be approved. The director shall notify all landowners whose applications have been rejected, and he shall specify the reasons for the rejection.

(d) If the agricultural land, or any part of it, is located in a municipality, the director shall notify the governing body of the municipality within 30 days after approval of an application that an application has been approved. Within 30 days after the notification, the municipal governing body may appeal to the director for reconsideration of his decision. If a municipality appeals, the director shall hold a public hearing in the municipality before an offer to sell or exchange is tendered to the landowner. If, after a public hearing in the municipality, the director's decision remains unchanged, the municipality may appeal to the commissioner within five days for a review of the director's decision.

Sec. 38.60.060. OFFER TO BUY OR EXCHANGE. Within 90 days after approval of the landowner's application to sell or exchange an agricultural preservation easement, the director may accept the landowner's offer to buy or exchange at a price and upon terms offered by the lanowner or may, in the director's discretion, make a counter offer to buy or exchange and may specify terms, contingencies, and conditions not contained in the landowner's aplication. A landowner has 30 days from the date or receipt of the counter offer to buy or exchange in which to accept or reject the offer.

Sec. 38.60.070. VALUE OF AGRICULTURAL PRESERVATION EASEMENT. (a) The maximum value of an agricultural preservation easement acquired under this chapter shall be the asking price or the difference between the fair market value of the land and the agricultural value of the land, whichever is less.

(b) The value of an agricultural preservation easement shall be determined by the director based on one or more appraisals by qualified appraisers. If the landowner and the director fail to agree on the value

of the easement, the landowner, at his own expense, may have the easement appraised by a qualified appraiser agreed upon by the landowner and the director.

Sec. 38.080. PROVISIONS TO BE INCLUDED IN EASEMENT. An agricultural preservation easement acquired under this chapter shall include the following provisions:

(1) agricultural use of the land by the landowner or his assigns is permitted;

(2) removal of minerals or materials from the subsurface of the land by the landowner or his assigns is permitted if the landowner immediately returns the land to agricultural use and restores the land to a condition at least as favorable for agricultural use as existed before the nonagricultural use bagan;

(3) operation of machinery used in agricultural production or the primary processing of agricultural products is permitted;

(4) normal agricultural operations are permitted, including, but not limited to, sale of agricultural products produced on the land where the sale is made;

(5) residential subdivision for commercial purposes by the landowner or his assigns is not permitted;

(6) construction of buildings for farming operations is permitted, but land used for farm residences may not exceed one acre per 40 acres of land under an agricultural preservation easement; and

(7) acquisition of an agricultural preservation easement by the state does not grant the public a right of access or right of use of the property subject to the easement, nor does it affect any existing easements, rights of way or rights of access.

Sec. 38.50.90. DEFINITIONS. In this chapter (1) "agricultural operations" means those activities related to the production of domesticated plants and animals useful to man;

(2) "agricultural preservation easement" means a public owned interest in lands under which the owner retains agricultural rights, but in which all development rights are owned by the public.

(3) "agricultural rights" means an interest in and the reight to use and possess land for purposes and activities related to horticultural, livestock, dairy and other agricultural uses.

(4) "agricultural use" means the use of land for the production of domesticated plants and animals useful to man, and other related uses and activities;

(5) "agricultural value" means the price on the valuation date which a vendor, willing but not obligated to sell, would accept for the property, and which a purchaser, willing but not obligated to buy, would pay for the property to be used for agricultural operations;

(6) "commissioner" means the commissioner of the Department of Natural Resources;

(7) "development rights" means an interest in and the right to use and subdivide land for any and all residential, commercial and industrial purposes and activities which are not incident to agricultural uses.

(8) "director" means the director of the division of agriculture in the Department of Natural Resources;

(9) "fair market value" means the price on the valuation date for tne highest and best use of the property which a vendor, willing but

not obligated to sell, would accept for the property, and which a purchaser, willing but not obligated to buy, would pay for the property if the property was not subject to any restriction imposed under this chapter.

(10) "municipality" means a unified municipality or a home rule borough or general law borough or city, of any class, incorporated under the laws of the state;

(11) "qualified appraiser" means a senior member of the American Institute of Real Estate Appraisers, the Society of Real Estate Appraisers, a person meeting the requirements for certification as an appraiser II by the division of personnel, Department of Administration, or a person qualified according to regulations adopted by the commissioner under the Administrative Procedure Act (S 44.62);

(13) "residential subdivision for commercial purposes" means the division of a tract or parcel of land into two or more lots, sites or other divisions for the purpose, whether immediate or future, of sale or building development, and includes a resubdivision.

Matanuska - Susitna Borough

assembly memorandum

no. AM 82-422

from: Planning Department **date:** 12/16/82

subject: Planning Commission Resolution 82-47 - Purchase of Agricultural Development Rights

Enclosed is a copy of Planning Commission Resolution 82-47 recommending that the Assembly and State support the concept of preservation of agricultural land through the purchase of agricultural development rights. This resolution supported by a Borough Agricultural Advisory Board memorandum of November 10, 1982 (see attached). This resolution does not relate to any particular draft legislation existent or to any other specific method of agricultural development rights purchase.

Administration recommends Assembly concurrence with this concept through approval of this memorandum.

Respectfully submitted,

Claudio Arenas

Dear Chuck,

Thanks for your letter of support for the preservation of agricultural lands bill that I have introduced, as HB 148, in the House this year.

House Bill 148 is currently in the House Resources Committee and was first heard in that committee last week. Several questions were raised by committee members, in the first hearing of this bill, that demonstrated their doubts as to how this bill would serve the people of Alaska as a whole, and not simply the residents of the Mat-Su Borough. Further questions challenged the very notion of Alaska as an agricultural state. For these reasons, your letters of support are very much needed and should be directed to the members of the House Resources Committee. The members of this committee are Representatives Ringstad and Schultz, Co-Chairmen, Representative Uehling, Vice-Chairman, and Representatives Cowdery, Bussell, Liska, Vaska, Goll, and Larson, Committee members.

Your timely support of this worthy bill would be greatly appreciated.

Sincerely,

Barbara Lacher
Representative
District 16

Dear Barbara:

I saw you interviewed on TV the other night, and I must say you were impressive.

It is true that there is no leadership for agriculture in the House, and I hope you and Ron separately or collectively will try to remedy that situation soon. If you decide to do that, I would be happy to try to supply you with my information and opinion if you think it might do you any good.

Sincerely yours,

Charles E. Logsdon

PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: CSHB 148 (C&RA) Date on Bill: 3/18/83
Title: Preservation of agricultural lands
Sponsor: Lacher, Larson and Zharoff
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating		77.3	82.5	88.0
Total				

b. Revenues:

Revenue				

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

Fiscal impact of this proposal is entirely dependent on level of implementation. We estimate the program would require a minimum of one professional and one clerical to administer the activities required to prepare documents, arrange appraisals, handle public meetings and follow up on verification of compliance with land use requirements. These position can be located at the Wasilla office of the Division of Agriculture.

No funding is requested in this note for actual purchase of easements.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

TO: HOUSE C & R A COMMITTEE

FROM: Staff

SUBJECT: CSHB 148

DATE: March 15, 1983

During the last committee hearing on CSHB 148 on March 9, 1983, the committee requested that three (3) corrections be made. The requested corrections are incorporated into the bill as follows:

1. page 6, line 23, add "or by a leasee of the owner of the land."

2. page 6, line 25, 26, reinstates permission for owner to remove minerals or materials from the subsurface of the land but adds the words "for personal use for five years after acquisition of the agricultural preservation easement."

3. page 9, lines 16-20. Amends AS 29.53 to insure that lands with a state purchased preservation easement will be assessed at farm use value, thus preventing a tax exemption as provided in AS 29.53; and does not require an owner of farm lands, who has in the past received a tax exemption, to repay those funds upon selling his agricultural preservation rights.

SUBJECT: Agricultural preservation easement (CSHB 148 (C&RA))

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Richard A. Bradley
Legislative Counsel

A brief analysis of the amendments prepared for the committee substitute.

The restoration of Sec. 90(a)(2) seemed best accomplished in two parts. Thus, the uses permitted are included as sec. 90(a)(2). The uses not permitted are added in at the end of sec. 90(b).

The amendment to sec. 90(a)(1) is included as requested.

The amendments to AS 29.53.035 suggested in my memorandum to Representative Don Clocksin are accomplished in two parts. AS 29.53.035(a) is affirmatively amended. A new AS 29.-53.036 containing what was suggested as sec. 35(f) is added.

If I may be of further assistance, please advise.

ANALYSIS:

Assumptions:

As this supplemental appropriation would be administered through an existing Community and Regional Affairs program, there would be no fiscal impact other than the increased amount of grant money made available to municipalities. However, as this applies to the fiscal year ending June 30, 1983, it is probably moot.

POSITION PAPER

RE: CSHB 152

SPONSOR: House Community & Regional Affairs Committee

Program Effects of Bill

The bill makes a $2.938 million supplemental appropriation to fully fund Chapter 89 State Revenue Sharing. This chapter funds roads, ice roads, health facility and hospital operations, unincorporated communities and volunteer fire departments serving unincorporated areas in the unorganized borough.

Comments

The Department believes it is important to fully fund programs that allow municipalities and unincorporated communities to provide vital services to their residents. The current funding level for Chapter 89 requires that local allocations be prorated at about 81% of their fully funded level. The funding for this program must be weighed against other State needs to determine if its priority warrants full funding. The Department does not have funds available from within its FY'83 budget to reduce or offset this supplemental appropriation.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 15, 1983

SUBJECT: Constitutional spending limit

TO: Representative Barbara Lacher
Chairman, House Community and Regional
Affairs Committee

FROM: Billy G. Berrier
Director
Division of Legal Services

You have asked whether supplemental appropriations for fiscal year 1983 reduce the amount available for appropriation in fiscal year 1984 under section 16, Article IX, Constitution of the State of Alaska (the spending limit amendment).

In my opinion they do not.

First and conclusive is the provision in section 28 of Article XV of the Constitution which reads:

> APPLICATION OF AMENDMENT. The 1982 amendment limiting appropriation increases (art. IX, sec. 16) applies to appropriations made for fiscal year 1984 and thereafter.

This section excludes earlier appropriations, that is in practical effect fiscal year 1983 appropriations, from the spending limit.

Even if the spending limit applied supplemental appropriations would be counted against the limit in the year the appropriations were available. The relevant part of section 16, Article IX reads:

> . . . appropriations from the treasury for a fiscal year shall not exceed . . . (Emphasis added)

A supplemental appropriation is for the current fiscal year. Therefore, they would be counted against the limit for the fiscal year in which they were made. For example a fiscal year 1984 supplemental must be within the available appropriation limit for fiscal year 1984. A fiscal year 1983 appropriation is for fiscal year 1983 spending authority and is not part of the fiscal year 1984.

Vote: Unanimous
Action: Adopted

KENAI PENINSULA BOROUGH

RESOLUTION 83-32

FEB 7 1983

A RESOLUTION SUPPORTING FULL FUNDING OF FISCAL YEAR 1983 MUNICIPAL ASSISTANCE REVENUES AND STATE REVENUE SHARING.

WHEREAS, the continuation of adequate levels of state financial aid is essential for Alaskan local governments to continue to provide important, needed services to their citizens while holding down local taxes; and

WHEREAS, Municipal Assistance revenues are a sharing of corporate income tax revenues by the state with local governments; and

WHEREAS, Alaskan local governments were assured that they would suffer no financial harm when during the 1981 legislative session SB 524 was approved which changed the method of taxation of the petroleum industry by transferring much of the corporate income taxes previously paid by that industry to severance taxes; and

WHEREAS, the FY 1983 Municipal Assistance appropriation of $71.3 million represents a $25.1 million shortfall from the $96.4 million minimum funding level which would have existed had not SB 524 been approved.

WHEREAS, the Section 89 State Revenue Sharing entitlement provides state aid to local governments for categorical services such as road maintenance and health facilities and hospitals; and

WHEREAS, the FY 1983 Section 89 State Revenue Sharing entitlement for roads, health facilities-hospitals, and volunteer fire departments was funded at only approximately 80% of the amount authorized by state statutes;

NOW THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

Section 1. That the Kenai Peninsula Borough Assembly supports and endorses the supplemental appropriation of $25.1 million FY 1983 Municipal Assistance revenues to fully fund the entitlement at the amount which would have existed had not the method of taxation of petroleum industry been changed.

Section 2. That the Kenai Peninsula Borough Assembly supports and endorses the supplemental appropriation of $3.5 million of FY 1983 Section 89 State Revenue Sharing for roads, health facilities-hospitals, and volunteer fire departments to fully fund the entitlement at the level authorized by state statutes.

Section 3. That the State Legislature appropriate and the Governor approve the aforementioned supplemental appropriation by April 15, 1983, so that local governments can use the additional funding in setting their 1983 mill levies.

Section 4. That copies this resolution be delivered to Governor William J. Sheffield, and to all members of the Thirteenth Alaska Legislature.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH ON THIS 1st DAY OF February, 1983.

Re: SB 17 - Municipal Assistance Supplemental

Apologies for the confusion over numbers at Tuesday's committee meeting. Mr. Donohue from the Department of Revenue, was reading from a table of estimates prepared by the Department in January of 1982, a copy of which is printed on the back of this memo. At that time, the Department estimated that corporate income tax receipts would have been $1.08 billion if the oil and gas tax had not been changed (SB 524), making the 10% sharing to municipalities in 1983 $108 million. Two months later, the Department lowered their revenue projections, decreasing the estimate under the current law from $744 million to $713 million and the estimate of the amount that would have been generated under the old law from $1.08 billion to $964 million.

Revenue Sharing Impact
(Millions of Current Dollars)

FY	Corporation Taxes (Previous Statutes) 43.20 Non Petroleum	43.21 Petroleum	TOTAL Corp. Taxes (TCT)	10% TCT	Corporation Taxes (Current Statutes) 43.20 amended Non Petroleum	43.20 amended Petroleum	TOTAL Corp. Taxes (TCT	10% TCT	30% TCT	FY
82	$35	$1047	$1082	$108	$31	$713	$744	$74	$223	82
83	42	1101	1143	114	31	304	335	34	101	83
84	49	1233	1282	128	37	360	397	40	119	84
85	56	1436	1492	149	42	373	415	42	125	85

The comparisons, for illustrative purposes only, reveal what would have been shared if previous statutes had been in effect versus what will in fact be shared, assuming this proposal is implemented in conjunction with current statutes. The aforementioned general fund numbers represent total amounts of revenue to be shared under this proposal.

MUNICIPAL SUPPLEMENTAL - $28.6 MILLION

"The Alaska Municipal League supports the supplemental appropriation of $28.6 million: $25.1 million FY 83 Municipal Assistance Revenues to fully fund the entitlement at the amount had not the method of taxation of the petroleum industry been changed during the 1981 State legislative Session and $3.5 million FY 83 Chapter 89 State Revenue Sharing for roads, health facilities and hospitals, volunteer fire departments in the unorganized borough, and unincorporated communities to fully fund the entitlement at the level authorized by state statutes. The League further encourages the Legislature to appropriate and the Governor to approve the supplemental appropriation by April 15, 1983 so that local governments can use the additional funding in setting mill levies."

Municipal Assistance Fund - $25.1 Million

FY 82	$87.4 million appropriated
FY 83	$71.3 million appropriated
FY 83	$96.4 million if the legislature had not changed the Oil and Gas Corporate Income Tax

When the Legislature repealed the Gross Business License Tax, a portion of which was automatically distributed to municipalities, it created the Municipal Assistance Fund as a revenue replacement for local governments. The law provided that an amount "equal to or greater than 10%" of the proceeds of the previous year's corporate income tax, both special oil and gas and also general, could be appropriated to the fund. When the Legislature repealed the special oil and gas corporate income tax and increased the severance tax in the closing days of the 1981 session, it did not make any changes to the Municipal Assistance Fund. Following the session, however, legislative leaders publicly stated that they did not intend to adversely impact local government funding and would make corrections during the next session. In the 1982 session, the Legislature amended the law, increasing the level from 10% to 30%, which is estimated to provide almost as much as the previous system, but the Legislature did not adjust the FY 83 appropriation to reflect that intent.

Revenue Sharing, Chapter 89 - $3.5 Million

Although most of the revenue sharing funds are distributed by the general formula established in AS 29.88, there are also entitlements established in AS 29.89 - State Aid for Miscellaneous Purposes, including roads, hospitals and health facilities, volunteer fire departments in the unorganized borough, unincorporated communities, and area cost of living differentials. The allocation for this chapter was not increased to cover the large increases in eligible roads, with the result being a projected $3.5 million shortfall and an 80% proration of funding in these categories.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

supplemental

For an Act entitled: "An Act making an appropriation to the Department of Revenue for financial assistance to municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $25,100,000 is appropriated from the general fund to the Department of Revenue for the municipal assistance fund (AS 43.20.016(a)) for distribution to municipalities for the fiscal year ending June 30, 1984/83

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1984.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

This should be changed — to reflect that money is a supplemental approp'n to get municipalities through current FY.

Tam suggested possibly extending lapse date so that municipalities have enough time to spend money (or so that state has time to distribute money)

MUNICIPAL ASSISTANCE FUND

The intent of municipal assistance funds is to permit municipalities to reduce local property tax. The primary source of the fund is the severance tax on oil production.

In 1981, the source of these revenues was the special oil and gas corporate income tax which was repealed and the severance tax increased to maintain the same level of revenues. There was no change made to the municipal assistance fund which, because of the method of computation under the new law, was funded at a considerably lower level than if the law had not been changed.

Following the session, legislative leaders stated that they did not intend to adversely impact local governments and would make corrections.

In the 1982 session, the Legislature amended the law, increasing from 10% to 30% of severance tax received to be distributed to municipalities, but the legislature failed to adjust the FY 83 appropriation to reflect that intent.

FY 83 - $96.4 million if Legislature had not changed the oil and gas corporate tax.

FY 83 - $71.3 million appropriated

$25.1 million shortfall

POSITION PAPER

RE: HB 153

SPONSOR: House Community & Regional Affairs Committee

PROGRAM EFFECTS

This Legislation would provide an appropriation of $25,100,000 to the Department of Revenue for distribution under the Municipal Assistance Program.

COMMENTS

The Municipal Assistance Program guidelines call for a maximum of 30% of Corporate Income Tax revenues to be allocated to municipal assistance. This appropriation would bring the level of funding for FY 1983 up to this 30% maximum. The funding for this bill does not appear to have been included in the Governor's budget and the sponsor has not indicated where reductions would be made.

CITY OF KENAI

RESOLUTION NO. 83-35

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA REQUESTING THE THIRTEENTH LEGISLATURE OF THE STATE OF ALASKA TO SUPPORT SB 17 AND/OR HB 136 BOTH OF WHICH REPRESENT SUPPLEMENTAL MUNICIPAL ASSISTANCE FUNDING FOR MUNICIPALITIES THROUGHOUT THE STATE OF ALASKA.

WHEREAS, the supplemental appropriation of $25 million for FY 83 municipal assistance revenues is designed to fully fund the entitlement at the amount had not the method of taxation of the petroleum industry been changed during the 1981 State Legislative Session, and

WHEREAS, it was the intent of the Twelfth Legislature to provide this funding for the purpose of permitting local governments to reduce taxes in the local community, and

WHEREAS, the City of Kenai, Alaska used all of its municipal assistance funding for the purpose for which the Twelfth Legislature intended municipal assistance to be used by reducing the mill levy to 2.1 mills for the property taxpayers within the City of Kenai, and

WHEREAS, the City anticipated full funding of municipal assistance at the same rate previously provided by the old corporate income tax, and

WHEREAS, to maintain this low mill levy and to meet the anticipated expectations of the local taxpayers, the supplementary municipal assistance funding becomes extremely important to the City of Kenai, Alaska, and

WHEREAS, the Twelfth Legislature of the State of Alaska is basically and primarily responsible for the actions of the Kenai City Council in reducing its mill levy and therefore entitled to a major portion of the credit for the low mill levy in the City of Kenai.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, that said Council go on record urging the Thirteenth Legislature of the State of Alaska to fund the supplemental municipal assistance bill which will permit the City of Kenai to carry out the Legislature's original intent to permit that money to be used in the General Fund Budget for the sole purpose of reducing the mill levy for local taxpayers and to

February 14, 1983

Telegram to: Barbara Lachat
Attention: Bob Barris

Subject: HB153

HB153, if passed and distributed on same formula as used in the past, would result in about $2 being allocated to the Matanuska-Susitna Borough. This $1.25 million equals 1.1 mills in areawide taxes. Municipal assistance funding is available to Matanuska-Susitna Borough June 1. This timing is so late in the fiscal year that it actually is used as revenue for the succeeding fiscal year. The 1.1 mills remitted from passage of this bill would be used to partially offset the increases in education costs which are the result of additional student enrollments of almost 800 for the last year.

Please call me if you require further information on this matter.

Attention: Bob Harris

Subject: HB132

HB132, if passed, would provide approximately $334,000 in road maintenance monies which were underfunded in current fiscal year revenue sharing. These funds, if received, would allow for continuation of snow plowing, sanding and spring grading in all road service areas in the Matanuska-Susitna Borough. Currently Greater Willow Road Service Area and Alpine Road Service Area (Sutton) have expended their funds and will be required to borrow money for the balance of this fiscal year. Additionally, Midway, Fairview, Lazy Mountain and Knik Road Service Areas are projected to have insufficient funds to complete the fiscal year.

Please call me if you require further information.

File: Legislature - 1983 - HB 153

Ladies and Gentlemen:

The City and Borough of Juneau urges your favorable action on HB 153, the supplemental appropriation for municipal assistance.

The city and borough depends heavily upon revenue sharing, municipal assistance, and other state assistance to keep its mill levies low. The city and borough areawide levy for the current year is 6.04 mills. For Juneau, the reduction in the municipal assistance fund which occurred last year translates into a 1.3 mill increase this next year or a significant reduction in public services. We urge you to pass out HB 153 with a do pass recommendation so that we may avoid this potentional 21% increase in our areawide levy.

Sincerely,

Gerald L. Sharp

TONY KNOWLES
MAYOR

OFFICE OF THE MAYOR

To: House Community and Regional Affairs Committee

From: Patrick M. Anderson, Office of Legislative Affairs, Municipality of Anchorage

Re: HB 152 & HB 153

Date: February 14, 1983

The Municipality of Anchorage fully supports House Bills 152 and 153.

HB 153 would appropriate an additional $25.1 Million to the Municipal Assistance program. The appropriation would have the effect of funding the program to the level of $96.4 million total for FY 1983. The significance of this level of funding can be found in a short history of the municipal assistance fund. SB 524, passed during the final days of the 1981 legislative session, changed the method of taxation of the petroleum industry from corporate taxation to severance taxation. The effect was to reduce the level of corporate taxation. Since Alaska Statute 43.20.126 provided that the State may share an amount equal to or greater than 10% of the prior fiscal year's corporate income tax receipts, the net effect of SB 524 was to reduce the amount of the fund to be shared. The legislature did not increase the amount shared above the 10% mandated minimum, consequently, the reduction in the corporate income tax receipts reducted the amount of expected Municipal Assistance by $25.1 million.

HB 153 would give the Municipality an additional estimated $11.5 million for FY 1983. This additional funding would allow the Municipality to reduce the amount of FY 1983 property tax requirements to approximately $40 million and reduce the the overall mill rate in Anchorage by approximately one mil, or $100 per $100,000 of assessed valuation.

HB 143 would provide approximately $510,000 in State Revenue Sharing to the Municipality for road maintenance, health facilities and hospitals.

We would be happy to provide answers to specific questions.

KENAI PENINSULA BOROUGH

RESOLUTION 83-32

FEB 7 1983

A RESOLUTION SUPPORTING FULL FUNDING OF FISCAL YEAR 1983 MUNICIPAL ASSISTANCE REVENUES AND STATE REVENUE SHARING.

WHEREAS, the continuation of adequate levels of state financial aid is essential for Alaskan local governments to continue to provide important, needed services to their citizens while holding down local taxes; and

WHEREAS, Municipal Assistance revenues are a sharing of corporate income tax revenues by the state with local governments; and

WHEREAS, Alaskan local governments were assured that they would suffer no financial harm when during the 1981 legislative session SB 524 was approved which changed the method of taxation of the petroleum industry by transferring much of the corporate income taxes previously paid by that industry to severance taxes; and

WHEREAS, the FY 1983 Municipal Assistance appropriation of $71.3 million represents a $25.1 million shortfall from the $96.4 million minimum funding level which would have existed had not SB 524 been approved.

WHEREAS, the Section 89 State Revenue Sharing entitlement provides state aid to local governments for categorical services such as road maintenance and health facilities and hospitals; and

WHEREAS, the FY 1983 Section 89 State Revenue Sharing entitlement for roads, health facilities-hospitals, and volunteer fire departments was funded at only approximately 80% of the amount authorized by state statutes;

NOW THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

Section 1. That the Kenai Peninsula Borough Assembly supports and endorses the supplemental appropriation of $25.1 million FY 1983 Municipal Assistance revenues to fully fund the entitlement at the amount which would have existed had not the method of taxation of petroleum industry been changed.

Section 2. That the Kenai Peninsula Borough Assembly supports and endorses the supplemental appropriation of $3.5 million of FY 1983 Section 89 State Revenue Sharing for roads, health facilities-hospitals, and volunteer fire departments to fully fund the entitlement at the level authorized by state statutes.

Section 3. That the State Legislature appropriate and the Governor approve the aforementioned supplemental appropriation by April 15, 1983, so that local governments can use the additional funding in setting their 1983 mill levies.

Section 4. That copies this resolution be delivered to Governor William J. Sheffield, and to all members of the Thirteenth Alaska Legislature.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH ON THIS 1st DAY OF February, 1983.

From: Ginny Chitwood, AML Executive Director

Re: SB 17 - Municipal Assistance Supplemental

Apologies for the confusion over numbers at Tuesday's committee meeting. Mr. Donohue from the Department of Revenue, was reading from a table of estimates prepared by the Department in January of 1982, a copy of which is printed on the back of this memo. At that time, the Department estimated that corporate income tax receipts would have been $1.08 billion if the oil and gas tax had not been changed (SB 524), making the 10% sharing to municipalities in 1983 $108 million. Two months later, the Department lowered their revenue projections, decreasing the estimate under the current law from $744 million to $713 million and the estimate of the amount that would have been generated under the old law from $1.08 billion to $964 million.

Revenue Sharing Impact
(Millions of Current Dollars)

FY	Corporation Taxes (Previous Statutes) 43.20 Non Petroleum	43.21 Petroleum	TOTAL Corp. Taxes (TCT)	10% TCT	Corporation Taxes (Current Statutes) 43.20 amended Non Petroleum	43.20 amended Petroleum	TOTAL Corp. Taxes (TCT	10% TCT	30% TCT	FY
82	$35	$1047	$1082	$108	$31	$713	$744	$74	$223	82
83	42	1101	1143	114	31	304	335	34	101	83
84	49	1233	1282	128	37	360	397	40	119	84
85	56	1436	1492	149	42	373	415	42	125	85

The comparisons, for illustrative purposes only, reveal what would have been shared if previous statutes had been in effect versus what will in fact be shared, assuming this proposal is implemented in conjunction with current statutes. The aforementioned general fund numbers represent total amounts of revenue to be shared under this proposal.

MUNICIPAL SUPPLEMENTAL - $28.6 MILLION

"The Alaska Municipal League supports the supplemental appropriation of $28.6 million: $25.1 million FY 83 Municipal Assistance Revenues to fully fund the entitlement at the amount had not the method of taxation of the petroleum industry been changed during the 1981 State legislative Session and $3.5 million FY 83 Chapter 89 State Revenue Sharing for roads, health facilities and hospitals, volunteer fire departments in the unorganized borough, and unincorporated communities to fully fund the entitlement at the level authorized by state statutes. The League further encourages the Legislature to appropriate and the Governor to approve the supplemental appropriation by April 15, 1983 so that local governments can use the additional funding in setting mill levies."

Municipal Assistance Fund - $25.1 Million

FY 82	$87.4 million appropriated
FY 83	$71.3 million appropriated
FY 83	$96.4 million if the legislature had not changed the Oil and Gas Corporate Income Tax

When the Legislature repealed the Gross Business License Tax, a portion of which was automatically distributed to municipalities, it created the Municipal Assistance Fund as a revenue replacement for local governments. The law provided that an amount "equal to or greater than 10%" of the proceeds of the previous year's corporate income tax, both special oil and gas and also general, could be appropriated to the fund. When the Legislature repealed the special oil and gas corporate income tax and increased the severance tax in the closing days of the 1981 session, it did not make any changes to the Municipal Assistance Fund. Following the session, however, legislative leaders publicly stated that they did not intend to adversely impact local government funding and would make corrections during the next session. In the 1982 session, the Legislature amended the law, increasing the level from 10% to 30%, which is estimated to provide almost as much as the previous system, but the Legislature did not adjust the FY 83 appropriation to reflect that intent.

Revenue Sharing, Chapter 89 - $3.5 Million

Although most of the revenue sharing funds are distributed by the general formula established in AS 29.88, there are also entitlements established in AS 29.89 - State Aid for Miscellaneous Purposes, including roads, hospitals and health facilities, volunteer fire departments in the unorganized borough, unincorporated communities, and area cost of living differentials. The allocation for this chapter was not increased to cover the large increases in eligible roads, with the result being a projected $3.5 million shortfall and an 80% proration of funding in these categories.

REP. HAYES STATEMENT ON MUNICIPAL ASSISTANCE

Alaska faces a period of declining revenue. The enormous budgets of several years past may never be with us again. On a state level we are working to meet that challenge by prioritizing and eliminating unproductive programs. While the Legislature has finally realized the severity of declining revenues, many local governments appear unwilling to share in that decline and follow the lead of the state in slowing the growth of government. This unwillingness appears in their insistence that the Legislature provide a $25 million supplemental appropriation for municipal assistance in addition to the $127 million funded last year.

Anchorage is a prime example of where the local government officials have yet to realize the reality of reduced revenue. The Municipal administration's budget proposal was $194 million for FY 83. After several assembly members failed in their attempts to cut $14 million from that budget, the final budget passed was near $193 million, a 17.3% increase over the previous year.

Municipal assistance and revenue sharing have grown at tremendous rates in past years. The state appropriated $38.3 million to these programs in FY 80, $90 million in FY 81, $143 million in the revenue boom year of FY 82 and $127 million last year. Projections for this fiscal year show about $131 million for these programs will be available. While revenues have dropped over 50% in two years, funding for municipal assistance has only dropped about 9% which I consider to be proof of a major commitment by the Legislature to provide funding to keep property taxes low.

Property owners are constantly faced with a double jeopardy situation which causes tax increases. First, property values normally increase, so even if the mill rate remains constant, taxes will rise slightly each year. Between 1982 and 1983 property value of an average residence increased between 10-15%. New buildings added $500 million in city value. Total city value in 1976 was $3 billion. It is now about $10.6 billion. This value determines the tax base. Theoretically, if the budget remained constant and the tax base increased, the mill rate would fall and local government taxes would probably decrease. However, inflation alone usually dictates some budget increase. An increase in assessed valuation, though, should more than offset inflation costs with a minimal increase in property taxes needed to fund a legitimate amount of program expansion.

But the Municipality's need for funds to both meet its budget while attempting to keep the mill rate stable exceeded the funds generated by increased property value. Property owners now are subject to being taxed by both the normal and natural property value increase and the demands of an inflated budget.

It is realistic to expect some increase in the cost of local government. However, the Municipality's budget increase this past year was unrealistic if an assumption was made that the state was rich enough to add $25 million more this year to the municipal assistance funds approved last year. The result would be the largest contribution ever made to local government assistance in history. In budget preparation, the Anchorage assembly was told to adopt a philosophy in passing the budget with an assumption that taxes would pay for everything. The assumption in philosophy is fine, but in practice it can't work when the state has a history of giving local governments millions of dollars to lower property taxes. The only way to truly gauge if a program is worth being funded by taxes is for taxpayers to actually be faced with a tax increase as they may be this year. The public really has never had to make that choice in recent years. The result has become a budget based on what government thinks the people want or need instead of a budget based on actual need as prioritized by the public and paid for by the local public through property taxes.

One assembly member recently accused the assembly of wandering without goals. I would agree as it relates to the budget. If a tax increase was to be avoided, a limit should have been set on the budget based on increases in property value and the known amount of municipal assistance available. Instead the municipal administration budgeted in the dark and then convinced a majority of the assembly to buy that philosophy. In no way do I wish to tell any local government what programs they should cut. I support better roads, increased police protection and adequate public services. But I suggest there are budget items of a lower priority that could have been eliminated to help offset the costs of the desired increases. Instead every category in the budget increased. It will become increasingly important to set goals as the Project 80's facilities which I (any) many Anchorage residents supported come on line and add the need for millions of dollars more for the operating budget.

In summary, it is unrealistic to ask the state to fund a supplemental appropriation for municipal assistance that would be 6% above the amount given when the state had twice the revenues it now expects. The state has done more than should be expected to maintain high appropriations to keep property taxes down. The cities have done little and the responsibility to keep taxes low can only rest on their shoulders by decreasing the budgets accordingly. If local officials are unwilling to lower budgets then they should present the public with a tax increase. I believe the resulting public opinion would be to everyone's benefit in determining what the public truly wants government to provide.

CONSOLIDATION OF MUNICIPAL ASSISTANCE AND REVENUE SHARING

"The Alaska Municipal League endorses the consolidation of the current municipal assistance and state revenue sharing programs together with the funding of the consolidated program at a level of at least 8% of the prior year's state operating budget so that municipalities can continue to provide important, needed services while holding down taxes."

Consolidation of the principal municipal aid programs is recommended for two reasons: (1) to simplify the administration of revenue distribution to local governments, both for the state and for the municipalities, and (2) to provide a predictable source of funding for basic services delivered at the local level.

The Municipal Assistance Fund, the successor to the Gross Business License Tax sharing program, is administered by the Department of Revenue. The funds are distributed primarily on a per capita basis. Municipalities must submit an application to the Department and must pass a resolution agreeing to accept the money.

The Revenue Sharing program is administered by the Department of Community and Regional Affairs, which distributes the funds primarily through a formula, with some additional special purpose entitlements. In order to receive funding, municipalities must fill out multi-page application forms and submit financial statements or audits.

Through an interdepartmental agreement this year, the two departments devised a joint application for both programs, simplifying to a certain extent the administrative process.

The proposed consolidation eliminates the municipal assistance fund, establishes the total amount municipalities received in FY 83 for revenue sharing and municipal assistance as a base for distribution, raises the minimum entitlement from $25,000 to $100,000, and distributes any additional funding using the current revenue sharing formula.

It is suggested that the level of funding for the consolidated program be 8% of the prior year's state operating budget. Using this approach, municipal aid would keep pace with state spending and local governments would have a better idea of how much to expect when adopting their budgets. Under the current system, municipalities must adopt their budgets before the Legislature has appropriated any funding.

The FY 83 state operating budget was about $1.8 billion, 8% of which is $144 million. The combined revenue sharing and municipal assistance funding for FY 83 was $127 million, down $16 million from the FY 82 level of $143 million. If you apply the inflation and population increase factors provided in the spending limit, the $143 million level would have increased to $156 million in FY 83 and $170 million in FY 84.

Municipal Assistance Funds

Dear Representative Adams:

The Alaska Municipal League urges you to reconsider your actions in slashing $13 million from the FY 82 level of the municipal assistance fund, one of the line items in the shared taxes section of the Department of Revenue FY 83 budget.

Several years ago, the Legislature repealed the gross business license tax, 60% of which was automatically rebated to the municipality in which it was collected. The purpose was to make business taxes more equitable, not penalize local government. For that reason, the Legislature established a municipal assistance fund, containing an amount "equal to or greater" than 10% of the corporate income tax received, but subject to legislative appropriation.

The Legislature intended that the municipalities use, for local tax relief, any funds over and above that which would have been generated by the gross business license tax rebate. As is indicated by the enclosed questionnaire results, that is exactly what happened in most of the major municipalities throughout the state as a result of the increased level of funding appropriated last year by the Legislature. If FY 82 levels are not maintained or increased to recognize the 9% inflation and the 4.7% population increases, then municipalities will have only two choices - cut back on services or raise the local taxes back up again.

The reason the 10% corporate income taxes is lower this year than last is because at the end of the 1981 session, the Legislature shifted oil and gas taxation from corporate income to severance (SB 524). As was the case with the gross business license repeal, it is my understanding that the intent was to make oil and gas taxation more equitable, not penalize municipalities. Unfortunately, if the Legislature sticks to the "10%" instead of the "or greater" the results will be that municipalities and the local tax payers will be adversely impacted. Had there been no change in the corporate income tax law, 10% of the receipts would be $108 million, instead of the $74 million currently in the House Finance version of the FY 83 budget.

AML urges you to at least maintain the current level of funding and preferably increase to $99 million, an upward adjustment recognizing inflation and population increases. The latter amount is still $9 million less than what would have been shared without SB 524.

Thank you for your consideration of this request. If you have any questions please do not hesitate to contact me.

Sincerely,

Ginny Chitwood
Executive Director

MEMORANDUM

TO: Representative Barbara Lacher, Chair
Community and Regional Affairs Committee

FROM: Representative Al Adams

SUBJECT: House Bill 157 - An Act to expand the right to petition for a local option election

House Bill 157 amends the General Provisions Chapter of Title 4, Alcholic Beverages, by expanding the definition of "established village".

In 1981, the Legislature enacted legislation clarifying provisions in Title 4 so that alcohol local option elections could be held. As a result of these changes a municipality, as well as an established village, could hold an election.

In spite of the Legislature's best efforts to clarify the law, a question has arisen as to the ability of an unincorporated community within a borough to conduct an election. Three communities, Point Lay, Karluk and Tyonek, wanted to hold an election, but were unable to due to this defect in the law. HB 157 clarifies the language to ensure that all communities, regardless of status, may conduct an election.

Additional background information is attached.

I. INTRODUCTION

On June 19, 1981, Governor Hammond signed Senate Bill 65, which cleared up difficulties with the 1980 Title 4 alcohol local option law, AS 04.11.490-04.11.506. Pursuant to the statute "municipalities" may conduct their own alcohol local option elections. "Established villages" may also request alcohol local option elections. These latter elections are conducted by the lieutenant governor.

Under the law, municipality is defined as "an incorporated city, an organized borough, or a unified municipality established under AS 29.68." AS 04.21.080(b)(11). A Municipality may hold a special election and vote upon one of the following four options:

1. Prohibition of the sale of alcoholic beverages. AS 04.11.490.

2. Community liquor license. AS 04.11.492.

3. Prohibition of the sale and importation of alcoholic beverages. AS 04.11.496.

4. Prohibition of the sale of alcoholic beverages except by selected licenses. AS 04.11.500.

An "established village" is defined under the statute as "an unincorporated area that

(A) is within the circumference of a circle described by drawing a five-mile radius around a post office station;

(B) has 25 or more permanent residents."

AS 04.11.080(b)(8). An established village may in a special election conducted for that purpose by the lieutenant governor, vote upon one of the following three options:

1. Prohibition of the sale of alcoholic beverages. AS 04.11.490.

2. Prohibition of the sale and importation of alcoholic beverages. AS 04.11.496.

3. Prohibition of the sale of alcoholic beverages except by selected licenses. AS 04.11.500.

Alcohol abuse constitutes a very serious problem in Alaska. The state Title 4 alcohol local option law, AS 04.11.490-04.11.506, has allowed individual communities to deal with the problem on a local level and thus choose a legal remedy which fits the local problem. The results have been largely successful both as a means of controlling alcohol abuse and as an experiment in pure democracy. As of this writing, forty-one communities have held alcohol local option elections and ten more are currently waiting to hold them. Moreover, over twenty other communities have expressed interest in holding alcohol local option elections to the Alaska Legal Services Corporation Alcohol Project. Of the forty-one communities which have already voted, thirty-seven have voted to prohibit the sale and importation of alcoholic beverages.

II. THE PROBLEM

Simply put, the problem is that communities within organized boroughs cannot utilize the state Title 4 alcohol local option law unless separately incorporated because the power of legislation in those communities rests

with virtual exclusivity in the borough government. AS 04.11.080(b)(8) defines "established village" as "an unincorporated area." Since a borough is incorporated, a village lying within a borough cannot be an unincorporated area.

Boroughs exercise certain powers, such as operating a school system and planning, platting, and zoning on an areawide basis, both inside and outside cities within the borough boundaries. AS 29.33.010-29.33.290. Pursuant to AS 29.38.020, second-class boroughs exercise certain municipal powers in areas of the borough outside the cities. These include such things as regulating fireworks, providing water pollution control, constructing local roads, etc. Boroughs can also acquire other powers outside cities by an election of the voters outside cities.

AS 29.48.035 gives municipalities certain regulatory powers. AS 29.48.035(10) provides that a municipality may regulate "alcoholic beverages as provided by 4.15.070." AS 4.15.070 is now repealed but there is a cross-reference to 4.21.010 "for present provisions concerning municipal regulation." AS 4.21.010(a) allows a municipality to adopt ordinances governing barter, sale, consumption of alcoholic beverages as necessary for orderly selling of alcohol within the municipality. AS 4.21.010(b) allows a municipality to adopt an ordinance making sale or importation a misdemeanor after a valid election on the option to prohibit the sale and importation of alcoholic beverages has been held.

The above provisions of Title 29, along with the definition of established village in Title 4, suggest that power to regulate alcohol in a borough in the area outside the borough's cities is given to the borough.

Nonetheless, at least one village, Karluk, in the Kodiak Island Borough, has evinced a desire to hold a local option election and cannot under present law.

An organized borough generally co[illegible] more than one community and often contains several. At the time of this writing, no organized borough has yet held an alcohol local option election. The difficulties involved in a multi-community election of this sort are evident. Should a borough hold an alcohol local option election, a strong vote for prohibition in the outlying villages and municipalities could impose that measure upon communities with no desire or need to embrace so draconian a resolution. Conversely, a strong vote to maintain the privilege of buying and consuming alcohol in the larger communities could prevent other communities within the borough from taking effective action to deal with a chronic local problem.

A preferable arrangement would allow the voters of each community in an organized borough to decide for that community and that community alone how the state Title 4 alcohol local option law can best be used. Voters in a community will probably be better informed as to local conditions than they will be to borough-wide conditions. A better informed electorate will naturally make more intelligent decisions at the polls. More importantly, their decision will only affect local conditions and not conditions in other communities within the borough of which they are much less likely to be adequately informed.

III. THE SOLUTION

The proposed legislation will allow villages within organized boroughs to hold an alcohol local option election subject to the same conditions

imposed upon villages outside organized boroughs. The proposed legislation accomplishes this essentially by enlarging the definition of "established village" to include those villages lying within organized boroughs.

The proposed legislation is designed to enlarge the powers of villages within organized boroughs only as regards to their ability to hold local option elections. Section 2 of the proposed legislation expressly limits itself to those purposes. Alaska already has a well established and complex municipal code by which the respective powers of various types of communities are delegated. The proposed legislation will have only a strictly limited effect on the municipal code. It is designed and intended only to allow communities not separately incorporated which lie within organized boroughs to hold alcohol local option elections pursuant to AS 04.11.490-04.11.506. No other impact upon the respective powers of the state, organized boroughs, organized communities, or unorganized communities is foreseen or intended.

MEMORANDUM

TO: Persons Interested in the Current Status of Rural Communities With Respect to the State Title 4 Alcohol Local Option Law

FROM: Alaska Legal Services Corporation Alcohol Project

RE: Statewide Village Status Report

DATE: January 14, 1983

The ALSC Alcohol Project was funded by the State Office on Alcoholism and Drug Abuse ("SOADA") to provide statewide on-site community legal education and technical legal assistance on the state Title 4 alcohol local option law. During its existence, the ALSC Alcohol Project worked closely with rural communities throughout Alaska. The ALSC Alcohol Project has terminated.

Approximately 130 rural communities were visited and 50 other rural communities were assisted in some fashion. "Assistance" means a community either requested a petition form, cover letter, and memorandum explaining the law, or a legal opinion of their local village ordinance concerning alcohol control. This Statewide Village Status Report from the ALSC Alcohol Project is a final attempt to provide an adequate profile of individual rural community activity with respect to the state Title 4 alcohol local option law.

Presently, 74 alcohol local option elections have been hold. Some communities have now held two elections, with differing results. The present tally is: 1 community has voted for a community liquor license, 51 communities have voted to forbid the sale and importation of alcoholic beverages, 10 communities have defeated the sale and importation option, 2 communities approved and 1 defeated the no sale option, and 1 community defeated the private liquor license option. Several more elections are presently scheduled and many other petitions are being circulated.

If you have any additional information or questions on specific communities, please contact Vivian Kortie at the Alcoholic Beverage Control Board, 201 East 9th Avenue, Anchorage, Alaska, 99501, or call (907) 277-8638.

STATEWIDE VILLAGE STATUS REPORT — January 14, 1983

Village (Municipality or Village)	Petition Sent (ALSC Visit*)	Option Considered or Voted Upon	Election Results (yes/no[2])	Effective Dates	Notes

NOTE[1]: The four option choices for municipalities (first and second-class and homerule cities) are:

1. Selected liquor license;
2. Community liquor license;
3. Banning the sale of alcoholic beverages;
4. Banning the sale and importation of alcoholic beverages.

Established villages may choose option 1, 3, or 4.

NOTE[2]: For those villages which have chosen the option to ban sale and importation, a "yes" vote means that a voter wishes to stop the sale and importation of alcoholic beverages. A "no" vote means that a voter does not wish to stop the sale and importation of alcoholic beverages under the state alcohol local option law.

NOTE[3]: ALOL -- Alcohol Local Option Law.
ALOE -- Alcohol Local Option Election.
CRA -- Community and Regional Affairs; Division of Local Government Assistance.

NOTE[4]: As of May 18, 1982, the United States Department of Justice approved the Alaska State Title 4 alcohol local option law submission under Section 5 of the Voting Rights Act. The state of Alaska is a "Voting

Rights Act State," which means that when there is any "change in the standard practice or procedure" in voting, the state or other appropriate agency is required to obtain approval from the United States Department of Justice.

This approval means that the alcohol local option law elections already held by municipalities in the state of Alaska are valid. This approval also means that the established villages can hold alcohol local option law elections with the assistance of the Division of Elections.

This approval means that no objection under the Voting Rights Act can be raised with respect to the alcohol local option law elections held unless someone has actually been denied his or her right to vote, thus prejudicing the election.

NOTE[5]: After receiving encouragement from many rural Alaskan priests, religious organizations and residents, the Alaska House of Representatives and Senate passed a law, Senate Bill 765, dealing with the sacramental wine exception to the state Title 4 alcohol local option law.

The new law changed A.S. 04.11.496 (b), which is the law allowing communities to vote to prohibit the sale and importation of alcoholic beverages. The amendment of A.S. 04.11.496 (b) stated that if a majority of the people in a community vote to prohibit the sale and importation of alcoholic beverages, a person "may not knowingly send, transport, or bring an alcoholic beverage into the municipality or established village, unless the alcoholic beverage is sacramental wine to be used for bona fide religious purposes based on tenets or teachings of a church, is limited in quantity to the amount necessary for religious purposes, and is dispensed only for religious purposes by a person authorized by the church or religious body to dispense sacramental wine."

This language means that the only alcoholic beverages which can come legally into a community which has voted to stop sale and importation of alcoholic beverages is wine to be used only in a religious service. The wine is to be an amount to be used only in religious service. Only a priest or someone authorized by the priest can receive the wine and give it to people in a religious ceremony.

PROJECTED COSTS FOR EGEGIK LOCAL OPTION ELECTION 3/ 8/83

Canvass Board Payments	$500.00
Rent of Polling Place	30.00
Roundtrip, Fairbanks to King Salmon	320.00
2 Charters to Egegik	320.00
Per Diem	231.00
Ballot Printing	100.00
Tally Books and Posting Notice	50.00
Advertising	150.00
SUB-TOTAL	1701.25

NOTE; May not have to charter to Egegik

(2) the use of the premises for storage is authorized by local zoning ordinances; and

(3) the premises are accessible for inspection as provided in AS 04.11.630. (§ 4 ch 131 SLA 1980)

Sec. 04.21.070. Enforcement. Peace officers shall investigate and report to the board violations of this title. (§ 4 ch 131 SLA 1980)

Sec. 04.21.080. Definitions. (a) In this title

(1) a person acts with "criminal negligence" with respect to a result or to a circumstance described by a provision of law defining an offense when he fails to perceive a substantial and unjustifiable risk that the result will occur or that the circumstance exists; the risk must be of such a nature and degree that the failure to perceive it constitutes a gross deviation from the standard of care that a reasonable person would observe in the situation;

(2) a person acts "knowingly" with respect to conduct or to a circumstance described by a provision of law defining an offense when he is aware that his conduct is of that nature or that the circumstance exists; when knowledge of the existence of a particular fact is an element of an offense, that knowledge is established if a person is aware of a substantial probability of its existence, unless he actually believes it does not exist; a person who is unaware of conduct or a circumstance of which he would have been aware had he not been intoxicated acts knowingly with respect to that conduct or circumstance;

(3) a person acts "recklessly" with respect to a result or to a circumstance described by a provision of law defining an offense when he is aware of and consciously disregards a substantial and unjustifiable risk that the result will occur or that the circumstance exists; the risk must be of such a nature and degree that disregard of it constitutes a gross deviation from the standard of conduct that a reasonable person would observe in the situation; a person who is unaware of a risk of which he would have been aware had he not been intoxicated acts recklessly with respect to that risk.

(b) In this title

(1) "alcoholic beverage" includes, but is not limited to, whiskey, brandy, rum, gin, wine, ale, porter, beer, and all other spirituous, vinous, malt and other fermented or distilled liquors intended for human consumption and containing more than one percent alcohol by volume;

(2) "board" means the Alcoholic Beverage Control Board;

(3) "bottling" means to put into a bottle, can, or other container;

(4) "designated premises" means any or all designated portions of a building or structure, rooms or enclosures in the building or structure, or real estate leased, used, controlled, or operated by a licensee for the purpose for which the permit is issued by the board at the location of

(5) "director" means the director of the Alcoholic Beverage Control Board;

(6) "distributing point" means a location where alcoholic beverages are distributed from a warehouse;

(7) "drunken person" means a person whose physical or mental conduct is substantially impaired as a result of the introduction of an alcoholic beverage into his body and who exhibits those plain and easily observed or discovered outward manifestations of behavior commonly known to be produced by the overconsumption of alcoholic beverages;

(8) "established village" means an unincorporated area that

(A) is within the circumference of a circle described by drawing a five-mile radius around a post office station;

(B) has 25 or more permanent residents;

(9) "licensed premises" means any or all designated portions of a building or structure, rooms or enclosures in the building or structure, or real estate leased, used, controlled, or operated by a licensee in the conduct of business for which he is licensed by the board at the specific address for which the license is issued;

(10) "local governing body" means, as appropriate, a city council, a borough assembly, or a traditional village council, but does not include a corporation established under the Alaska Native Claims Settlement Act;

(11) "municipality" means an incorporated city, an organized borough, or a unified municipality established under AS 29.68. (§ 4 ch 131 SLA 1980)

Bart –

Re: limitation of Liquor Licenses.

Do you want to reschedule this in 2 or 3 weeks?

Net effect of attached substitute is:

1. Changes requirement for new or transfer of beverage dispensary (Bar) license or package store to one per 3000 people vs. 1500 people.

2. The new "3000" rule will apply to tourist trade (hotel, motel, resort, similar businesses, and to restaurants more than 18 miles from a ~~municipality~~ city or unified municipality).

   The present 1500' rule does not apply to the above tourist related businesses.

From: Staff

Date: May 20, 1983
Re: HB 158 "Relating to the limitations of liquor licenses"

The last Committee hearing on HB 158 was a teleconference on March 23. Since that date the sponser of the bill has proposed substitute legislation.

Attached is a copy of the minutes of the March 23 committee meeting, an analysis of the proposed substitute, and the proposed substitute.

1. Is this proposed or for real?
2. Will only proposed be considered? Then we need CS & more time.

PREVIOUS ACTION

HB 158	See previous House Community & Regional Affairs Committee Meeting minutes from: March 10, 1983.
	Statutory Reference: AS 04.11.320(a)

ACTION NARRATIVE

TAPE#39 (Side A) Recording Number 0000	The meeting was called to order by Chairwoman Lacher at 3:15 p.m. Members present were : Representatives Lacher, Tischer, Fritz, Phillips, Clocksin and Szymanski. Rep. McBride was absent.
Number 0012	Legislative Teleconference introduction.
Number 0034	Wally Kubley of the Odom Alaska Distributors testified on HB 158.
Number 0205	John Paden, Alaskans for Alcohol Moderation, testifies in favor of HB 158. States that it would be helpful in lowering crime rates and traffic fatalities.
Number 0250	There is discussion on prohibition - where to draw the line.
Number 0316	Rep. Szymanski would like a copy of the statistics.
Number 0324	Rep. Mike M. Miller, Prime Sponsor of HB 158, came before the committee to testify. He feels the number of licenses has a direct relationship to the amount of alcohol consumed.
Number 0370	Rep. M.M. Miller commented on freezing licenses until population gets higher, etc.; not talking about community or village licenses.
Number 0406	He states that if this bill is passed, and all relating bills, we will make an effect on alcohol abuse.
Number 0415	Rep. Clocksin asks Rep. M.M. Miller about population exceptions: would you allow

these exceptions: hotels; restaurants; tourist operations.

Number 0442 — Rep. M.M. Miller spoke on exceptions.

Number 0498 — Discussion between Rep. M.M. Miller and Rep. Clocksin on beer and wine exceptions.

Number 0524 — Chairwoman Lacher comments on the need to keep this new information in mind for a CS.

Number 0595 — Howard Scaman, Coalition for Safer Alaska in Anchorage, testifies in favor of HB 158. He does not see a restaurant opening and serving beer and wine as a real contributing factor - moderation measures. He states factors: drinking age, bar hours, licenses, and has no objection to a CS.

Number 0645 — Ron Widowsky, Council on Alcohol Abuse in Sitka, testifies in support of HB 158.

Number 0690 — Questions and discussion between Rep. Szymanski and Ron Widowsky on accessibility.

Number 0726 — Rep. Szymanski would like a list of 15 elements involved in research by Howard Scaman.

Number 0750 — Dave Coco, Mental Health and Alcohol in Cordova, representing himself, testifies in favor of HB 158. Relates stories to population.

Number 0775 — Claude Swaim in Fairbanks testifies in favor of HB 158. Comments on the statistics on population and licenses.

TAPE#39 (Side 2)
Recording
Number 0000 — Bob Konet in Ketchikan testifies in favor of HB 158. Reduce outlets/population.

Number 0051 — Connie Hollenbeck, Alcohol Program funded by CERTA in Nome, testifies in favor of HB 158.

Number 0098 — Leo Land in Haines asks if this bill would preclude the transfer of liquor licenses.

Number 0144 — Michael Myer, Sitka, testifies in favor of HB 158.

Number 0168	Rep. Clocksin replies to Leo Land's question that this bill only relates to new licenses being issued; it does not effect the sections relating to transfers.
Number 0190	Mr. Nelson, Coalition of Safer Alaskans in Anchorage, comments that we are not prohibitioning; states statistics; and comments on reducing runaway consumption and alcohol abuse.
Number 0225	Wally Kubley, Juneau, comments on the ratio of licenses to the number of people 21 years or older, and states this is a question that has not been addressed.
Number 0224	The meeting adjourned.

SUBJECT: Liquor licenses
(HB 158)

TO: Representative M. Mike Miller

FROM: Russ Josephson
Legislative Counsel

Enclosed is a revised draft of SSHB 158. As requested, rather than repealing all of AS 04.11.400(g), only (g)(1) is repealed. The following is the sectional analysis that you requested with the above change.

Section 7 is the key to this bill. This section adds a subsection (k) to AS 04.11.400. The new subsection requires a ratio of 3,000 people in a given area for each new or transferred beverage dispensary (bar) or package store (liquor store) license.

Sections 1, 3, and 8 amend existing law by inserting a reference to the new language provided in Sec. 7, in three places where the limiters on the issuance of new licenses or the transfer of existing licenses are already mentioned. Inasmuch as Sec. 7 has added a new provision limiting licensing, these amendments simply reflect the existence of the new provision.

Sections 2, 4, and 5 are simple amendments to sections of existing law that refer to AS 04.11.400(j). To indicate that this section has been repealed, the amendments insert the word "former" before the statutory reference.

Section 6 contains a technical amendment reflecting the repeal of AS 04.11.400(g)(1) and (j).

Section 9 repeals AS 04.11.400(g)(1) and (j).

In summary, this bill limits bar and liquor store licenses by using the ratio of one license for each 3,000 persons

instead of the ratio of one license for each 1,500 persons required under AS 04.11.400 now. In addition, the bill eliminates two exceptions to the license/population ratio. The tourist trade exception for hotels, motels, resorts, and similar businesses, and the public convenience exception have been repealed.

If I may be of further assistance, please advise.

M E M O R A N D U M

TO: Committee on Community and Regional Affairs

FROM: Staff

DATE: March 10, 1983

SUBJECT: HB158

The purpose of HB158 is to prevent, under certain conditions, the Alaska Alcohol and Beverage Control Board from approving new licenses pertaining to alcoholic beverages. The governing factor over approval of a new license will be the ratio of persons in Alaska over the age of 21 to the number of existing licenses shall not exceed the ratio of the number of persons over age 21 to the number of licenses in the remainder of the United States. AS.04.11.080 designates nineteen (19) different types of licenses in Alaska.

Preliminary data indicates that the present ratio of licenses to persons21 years of age or older is approximately 1:200, while the ratio of licenses to persons 21 years of age and older in the rest of the United States is approximately 1:800.

According to U.S. Census Bureau projections, enactment of HB158 will prevent the approval of any new alcoholic beverage license in Alaska until well beyond 1990.

PUBLIC SERVICE ANNOUNCEMENT

THE HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE WILL BE HOLDING A TELECONFERENCE ON HOUSE BILL 158, RELATING TO THE LIMITATION OF LIQUOR LICENSES, ON WEDNESDAY, MARCH 23, 1983 FROM 3:15 P.M. - 5:00 P.M. PST (1:15 P.M. - 3:00 P.M. AST).

THIS LEGISLATION SEEKS TO AMEND EXISTING STATUTES REGARDING THE ISSUANCE OF NEW LIQUOR LICENSES SO THAT THE CRITERIA FOR ALASKA MORE CLOSELY FOLLOWS THE RATIO FORMULA AS IT EXISTS IN THE REMAINDER OF THE UNITED STATES. THIS BILL WOULD ESSENTIALLY CHANGE THE PRESENT RATIO OF ONE LICENSE PER 294 PEOPLE TO ONE LICENSE PER 800 PERSONS.

IF YOU ARE INTERESTED IN TESTIFYING, CONTACT YOUR LOCAL LEGISLATIVE INFORMATION OFFICE. FOR FURTHER INFORMATION ON THIS LEGISLATION, PLEASE CALL THE HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE OFFICE IN JUNEAU AT 465-3870 OR 465-3875.

CHAPTER 13

The Effects of Legal Restraint on Drinking

Robert E. Popham, Wolfgang Schmidt, and Jan de Lint

INTRODUCTION

The purpose of this review is to assess the evidence bearing on the effects of legal measures believed to have some primary preventive value with respect to the incidence of alcohol problems. Excluded from consideration are laws concerned solely with such special segments of the drinking population as incorrigible alcoholics, public inebriates, and impaired drivers. It is true that these laws are sometimes seen to have a possible deterrent effect on the appearance of new cases (Bruun, 1970). However, with the exception of certain legislation directed against impaired driving, the primary effect if any is more likely to be on recidivism rates. In contrast, our focus is on legislation and derivative measures aimed at the whole population of consumers (or potential consumers) of alcohol, and intended to prevent the occurrence of alcohol problems through regulation of the amount or character of alcohol consumption.

Legislative enactments dealing with one or another aspect of alcohol use are probably as old as written laws. For example, the famous Code of Ham-

murabi, formulated some four thousand years ago, contained four articles on the topic (Harper, 1904). But it was not until comparatively recent times that the principal concern in alcohol legislation came to be with the prevalence of alcohol problems. At first, in both the Old World and the New, the usual objectives were to prevent fraudulent practices on the part of sellers, assure availability, and secure revenue for the state (Catlin, 1931; Krout, 1925). Scattered attempts, ostensibly to cope with intemperance, and including the total prohibition of public drinking places, are found in Classical and Medieval legislation (King, 1947). In England during the thirteenth and fourteenth centuries, taverns were increasingly a target of restrictive legislation, efforts being made to reduce their numbers, hours of sale, and the amount of time patrons spent in them; and in 1551 what appears to have been the first licensing system was introduced by Edward VI with the control of excessive use in view (Shadwell, 1915). However, it was in the late eighteenth and nineteenth centuries, with the rise of industrialism, that the prevention of drunkenness and its consequences became the overriding issue, and the volume and complexity of alcohol legislation reached a peak (Askwith, 1928; King, 1974; Krout, 1925). In North American and some other areas, these efforts culminated during World War I in total prohibition. This was repealed in most jurisdictions in the 1920s and 1930s, and followed by the adoption of the diverse measures and systems of control that prevail today.

The literature concerned with the effects of the legislative approach to the prevention of alcohol problems is vast. In addition to the assessments of historians, physicians, clergymen, jurists, journalists, and others, there are many official government reports. For example, in England there have been inquiries roughly once every 20 years since the Select Committee published its findings in 1834. In Canada and the United States there are reports of federally instigated inquiries, and of countless provincial or state bodies concerned with the merits and demerits of the control systems in their jurisdictions. While some of this literature contains data worthy of further analysis, most of it contributes little of value to the present review. Typically, the conclusions are based on the personal tastes or beliefs of the author, on *ex cathedra* arguments, or on the weight of opinion of persons with little or no direct knowledge of the matters at issue.* And even in cases where objective evidence of change is provided, one is usually left unsure, as Room (1971) remarked, whether the law was the cause, or itself a product of prior changes in public sentiment. In short, scientifically acceptable attempts to evaluate the effects of particular control measures are seldom encountered.

* To cite a characteristic instance, the authors of "The Pub and the People" (Mass Observation, 1943) noted that a recent Royal Commission on Licensing (1932), ostensibly setting out to conduct an impartial study of taverns, only interviewed persons who rarely or never patronized such establishments, not a single regular patron was asked to give evidence, nor were direct observational studies undertaken.

This dearth of scientific studies may seem surprising, especially when one contemplates the very great expansion of research interest in the alcohol field during the last 30 years. Room (1971) has offered some plausible reasons which include: (1) lack of sufficient specificity in the stated objectives of most measures; (2) the formidable complexity of the factors that may be involved in the production of any changes observed to follow the introduction of a new law; and (3) the fact that those who enact legislation normally are not influenced by a desire to develop rational policy through appropriate testing of alternatives, but by the probable reactions of their constituents. However, it is likely that another reason, also cited by Room (1971) and by Mäkelä (1972), is of greater importance, notably the rise of the "disease concept" of alcoholism. The view that normal drinkers and alcoholics comprise two quite separate groups within the population, which this concept has meant for many workers, has rendered meaningless or at least of low priority the contemplation of measures intended to affect the prevalence of alcoholism through the general regulation of alcohol consumption. The drinking of the alcoholic came to be seen as independent of other drinking: a symptom of pathological factors peculiar to him, and therefore, not amenable to change by measures that would affect the normal drinker. As a consequence, scientists understandably concentrated their attention mainly on the alcoholic per se in an effort to discover the distinctive causal factors (Armstrong, 1958; Keller, 1972).

We shall return to this and related issues in the section on Models of Prevention. Suffice to say for the present, that a rapidly growing body of evidence casts serious doubt on the validity of so narrow a concept of alcoholism, and indicates that the overall level of consumption in a population may well play a crucial role in its prevalence (de Lint and Schmidt, 1971). The result in some quarters has been a renewal of interest in the possible preventive value of legal measures and the appearance of a number of relevant studies.

In the following sections, the evidence is reviewed respecting the effects or lack of effects of the principal control measures which have been employed in recent times and most of which are now in use. However, whether or not the law will be, or should be applied to preventive ends depends on many factors besides the objective effectiveness of particular measures. Accordingly, in the final sections some of these factors are examined, as well as current models of prevention in relation to the role of legal restraint on drinking.

CONTROL OF OUTLET FREQUENCY

Perhaps no single control measure has been more frequently and widely employed over the centuries than the regulation of the number of places in which alcoholic beverages may be purchased (King, 1947; Krout, 1925;

Shadwell, 1915). Outlets for on-premise consumption have been particular targets, and the immediate aim most commonly has been to reduce their frequency. While from time to time those who influenced the legislators had objectives other than the prevention of insobriety (Lee, 1944; Lemert, 1962; Odegard, 1928; Popham, 1962), the latter has been typically the stated justification. The underlying assumption, often made explicit by temperance writers, is simply that the more opportunities there are for people to drink, the more they will be tempted to do so and the more drunkenness there will be. However, during the post-World War II years in particular, the opinion of such interested groups as the clergy and of the public at large has come to be divided on the issue (Canada Facts, 1946; Wolch, 1957). Now there are those who, by implication at least, favor increases in outlet frequency, still with the promotion of sobriety in mind. The notion of the "forbidden fruit" is cited, and it is argued that if alcohol were everywhere available, man would not desire it so much and would therefore drink in a moderate and civilized manner. As might be expected, this view has received considerable support from the alcoholic beverage industries.

On both sides, similar types of statistical data are often used to support the arguments for or against changes in outlet frequency. These data include arrests or convictions for drunkenness, alcohol sales figures, and alcohol-related mortality and morbidity statistics. The validity of such data as indices of the prevalence of alcohol problems has been questioned many times, most recently, for example, by Walsh and Walsh (1973). Thus, official statistics of drunkenness may depend not only on the actual prevalence of drunkenness but to varying degrees on prevailing legal sanctions, police instructions, the manner in which drunkenness is defined, the extent to which refuges from police vigilance are available, and local attitudes toward insobriety. In addition, rates generally are not separated into first offenders and repeaters; they refer simply to the number of arrests or convictions rather than to different individuals. Official sales figures, among other deficiencies, do not reflect the legal consumption of homemade wines and beers, or the consumption of illicitly produced and distributed beverages. An upward trend in per capita sales may reflect the addition of new reporting jurisdictions or an increase in the proportion of users rather than a true increase in average consumption. Alcohol-related hospital admission and vital statistical data may be subject to numerous extraneous influences such as attitudes of physicians, incomplete reporting, and trends in diagnosis and treatment.*

There is no question but that these potential sources of error need to be kept in mind when the effects of changes in control measures are under

* For detailed commentaries on the artifacts that may affect variation in alcohol statistics, see Bruun *et al.* (1960), Jellinek (1947), Popham and Schmidt (1958), and with particular reference to legal statistics of drunkenness, Ahlström-Laakso (1971).

scrutiny. At the same time, it is well to guard against the tendency to overestimate their importance, particularly when the implications of an apparent change in rates are not consistent with one's presuppositions. Thus, it is easy to explain away a drop in alcohol sales following stricter control measures by appeal to an artifact (such as illicit consumption) whose contribution may be negligible in reality. In any case, several types of alcohol statistics, especially sales and mortality data, have been shown to be valid indicators of the magnitude of alcohol problems in an area (Jellinek, 1947; Ledermann, 1956, 1964; Popham, 1970; Schmidt and de Lint, 1970). Furthermore, very considerable regional and temporal differences in these indicators have been found, and it is difficult to believe that much of this variation is attributable to errors in the indices rather than to real differences in the prevalence of alcohol problems (de Lint and Schmidt, 1971). Accordingly, it is of interest to review attempts to determine if, in fact, there is a relationship between the indicators mentioned and outlet frequency.

Popham *et al.* (1976) reported that, among the provinces and certain larger cities in Canada, higher rates of arrest or conviction for drunkenness tended to be found where there were fewest public drinking places per unit of population. In addition, trends through time in Ontario suggested a similarly inverse relationship (Popham, 1962; Popham and Schmidt, 1958). During the latter years of the nineteenth century, when the frequency of outlets for on-premise consumption achieved its all-time high, rates of conviction for drunkenness were comparatively low. Following this, the outlet rate fell steadily until the introduction of Prohibition in 1916. On the other hand, the conviction rate rose to a peak in 1912–14, then fell during Prohibition to reach a low point in the early Depression years. After the reintroduction of licensed drinking places in 1934, the outlet rate remained fairly static until recent years. But during the same period, drunkenness conviction rates rose steadily to achieve a level markedly higher than in any previous period. Per capita alcohol sales and liver cirrhosis mortality rates, long considered one of the best indicators of the prevalence of alcoholism (Jolliffe and Jellinek, 1941; Expert Committee on Mental Health, 1951; Popham, 1970), showed roughly similar trends over the years for which figures were available.

Mass Observation (1943) also reported an apparently negative association between drunkenness charges and outlet rates in English Data. And Popham *et al.*, (1976) ran a linear correlation analysis on two other English series: figures for 84 county boroughs and for 52 counties, excluding boroughs. The coefficients of correlation between convictions for drunkenness and on-premise licenses per 10,000 of population were negative but small (−0.18 and −0.19, respectively), and not significantly different from zero. Equally extensive legal statistics on drunkenness have not been studied for the United States. However, coefficients of correlation between tavern rates and per capita alcohol sales, and

tavern rates and alcoholism prevalence estimates for 49 states proved readily attributable to chance (Popham *et al.*, 1976). With respect to other types of outlet in the United States, Entine (1963) concluded that limiting the number of package stores did not reduce off-premise consumption. On the other hand, Simon (1966b) found per capita sales to be related positively to the frequency of such stores, but felt on further analysis that this variable was more likely to be dependent on sales than the reverse.

The tendency toward a negative relationship between outlet frequency and drunkenness rates may be due to one or more of a number of factors. It may be that where a large number of outlets are tolerated, a relatively more liberal attitude toward drinking and drunkenness prevails so that there are fewer arrests (Popham, 1962). Or, as the authors of "The Pub and the People" (Mass Observation, 1943) noted, drunkenness rates are usually higher in urban areas and vary with the business cycle, rising and falling with the bank rate and other measures of prosperity. Outlet rates, on the contrary, are controlled by a licensing authority whose objectives may lead to fewer outlets where or when drunkenness is considered to be prevalent.

The most thorough analysis of this issue, of which we are aware, is that of Ahlström-Laakso (1971). In her study, the point of departure was the fact that the rate of arrest for drunkenness was markedly higher in Helsinki than in Copenhagen. On the other hand, the level of alcohol consumption and the frequency of public drinking places was very much higher in the latter city. Among the many possible explanations, the author showed that differences in the control system were especially important. Thus, for example, fewer taverns in Helsinki, and in particular of those catering to drinkers of the lower social strata, meant fewer places to become drunk unobserved by the police, and a greater likelihood that heavy drinking would occur in parks and other public areas. Differences in behavior when intoxicated, in the probability of intoxication on any given drinking occasion, and in enforcement vigor were also considered to contribute significantly. However, it is quite possible that such factors are more likely to be among the primary determinants of variation among different countries than of regional or temporal variation within the same country. Through time in Finland, for example, the trend in arrests for drunkenness appeared to follow rather closely the trends in other indicators of the level of alcohol consumption and alcohol problems (Bruun *et al.*, 1960).

Summing up the evidence, it would seem clear that in the populations examined, variations in indicators of the prevalence of inebriety are not dependent on outlet frequency. It is important to emphasize, however, that the variations considered ranged from situations where outlets were ubiquitous to those where some customers may have been mildly inconvenienced. That under the latter circumstances, there may be little or no effect on consumption, especially in a world of high speed transportation, is suggested by the figures shown

below. These data relate to two rural municipalities in Ontario of about the same size. The only alcoholic beverage store in the district was located in one of the two communities so that residents of the other had to travel several miles to make a purchase. It can be seen that this circumstance did not prevent a slightly higher patronage by them (Table 1).

Finally, some attention should be given to studies bearing on the effects of control measures that create or alter situations of extremely low accessibility: that is to say, situations substantially different from those reviewed in the foregoing paragraphs. The classic instance on one side of the question is Prohibition when, in several countries, the frequency of legal outlets was reduced virtually to zero. There can be little doubt that during the first few years of Prohibition in Canada (Popham, 1956), Finland (Bruun *et al.*, 1960), and the United States (Jolliffe and Jellinek, 1941; Warburton, 1932) all indicators of alcohol consumption and alcohol problems reached the lowest level yet achieved in any period for which there are relevant data. It is also clear that in later years—say, roughly 1923–1933 in the United States—as an illegal trade became well established and the speakeasy and other clandestine outlets made their appearance, consumption increased substantially (Warburton, 1932).

It may be that during Prohibition there was an increase in poison deaths as a consequence of toxic impurities in poor quality beverages, or because of the use of toxic substitutes. Such effects have been alleged to buttress the contention that Prohibition was a complete failure (see, for example, citations in Room, 1971). We are not aware, however, of any scientifically acceptable study that has demonstrated an excess mortality from these causes of epidemiologically significant proportions. And the studies already noted would suggest that, even in the later years of Prohibition in Canada and the United States, the level of alcohol consumption and the prevalence of alcohol-related health problems were significantly lower than before or since. A rationally based argument against Prohibition therefore must seek other grounds for rejection, and many such have been well documented (e.g., Asbury, 1950; Feldman, 1930; Lemert, 1962; Mäkelä, 1972; Warburton, 1932).

TABLE 1. Buyers of Alcoholic Beverages in Two Rural Municipalities in Ontario[a]

Municipality	Buyers per 1000 adults	Frequent buyers per 1000 adults[b]
With store	247	42
Without store	267	50

[a] From de Lint and Schmidt (1966).
[b] Buyers who purchased alcoholic beverages 4 or more times during the one-month study period.

At the opposite extreme is the effect of a change in control policy that renders alcoholic beverages readily accessible in areas previously isolated from a legal supply through geographic conditions. For example, in parts of northern Canada, the nearest outlet to some communities may take an expensive day or more to reach. Under these circumstances, it might be hypothesized that the introduction of outlets close by would have an appreciable effect on consumption. The results of Kuusi's alcohol policy experiment in rural Finland would seem to support this hypothesis (Kuusi, 1957). In the study, stores for the sale of beer and wine were opened in selected market towns that had previously been "dry" for many years. The drinking habits of the affected population and of a control population were studied in depth prior to the change, and monitored in detail afterward. An increase in overall consumption could be attributed to the new outlets. At the same time there was no evidence of a change in the frequency of intoxication, and indications that the increased consumption was partly offset by a decline in the consumption of illicit alcohol.* Very similar results have since been obtained by Amundsen (1965), who studied the consequences of the first introduction of alcoholic beverage stores to isolated "dry" areas in Norway.

Mäkelä (1972) recently reported a more dramatic effect in Finland following a very considerable and rapid rise in number of outlets, many of which were established in previously "dry" areas. Thus, in 1969 medium-strength beer was released for unrestricted retail distribution. Shortly thereafter, apparent alcohol consumption in the country increased by 48 percent. Beer accounted for most of the increase. Although effects on other indicators of the prevalence of alcohol problems have not been reported as yet, Mäkelä (1971) showed that such an increase tended to be spread over the drinking population in a manner that inevitably brought about an increase in the proportion of heavy consumers.

REGULATION OF TYPE AND LOCATION OF OUTLETS

A related area of control, which has been a subject of much debate and legislative or other governmental action over the years, concerns the character and distribution of outlets to be permitted. Usually, the focus has been on one or another aspect of such questions as: In what type of setting and under what conditions may different classes of alcoholic beverage be sold for on- or off-

* The study stands as a model for those wishing to undertake tests of control measures in the alcohol field or, for that matter, of any proposed change in social policy. In the report, the formidable methodological and practical problems encountered are dealt with at length, as well as the relation of the findings to the intricacies of developing an acceptable control policy.

premise consumption? What entertainment or recreational facilities may be provided in public drinking places? With special reference to the latter, may outlets be located in or near certain categories of public building, commercial establishments, or institutions such as schools and churches?

An almost bewildering array of regulatory measures have been attempted at one time or another within this area of control. Some—for example, the prohibition of treating or round-buying—have failed if only because they proved unenforceable. Some—for example, the requirement that alcoholic beverages could only be sold for on-premise consumption if accompanied by food (which led to the "reusable sandwich"—were easily circumvented and objects of ridicule. Some were dropped in response to negative reactions from the public. Many still survive, and none, so far as we are aware, have ever been adequately assessed as to their effectiveness for the purpose intended.

Many earlier writers (and a few in recent times) considered the facilities and physical features of the American saloon or the English public-house to be among the seducers of the working man to a life of insobriety. For them the overriding goals have been the abolition of these places, and the development of nonalcoholic alternatives in the community (e.g., Calkins, 1901; Levy, 1951). Others have been more moderate and have advocated only a number of restrictions on the operation of public drinking places, and the establishment of counter attractions such as free garden plots, libraries, museums, parks, and a variety of other recreational facilities (e.g., Select Committee, 1834). As Lemert (1962) has suggested, the implicit assumption would seem to have been that drinking occurred in response to deficiencies in community life, and that if these were eliminated the need for alcohol would disappear.

Perhaps it is obvious that this assumption has not entirely withstood the test of time. Certainly the use of alcohol is still very much in evidence although most of the gaps in social life to which its attractiveness was commonly attributed have long since been filled. It is probably true, on the other hand, that the importance of public drinking places—at least in North America—has declined since the turn of the nineteenth century. And this may be due to the growth of competing attractions as well as to overall improvements in the standard of living (and therefore of the home as a drinking place). Nonetheless, the on-premise outlet has remained a significant element in the recreational, if not emotional, life of a great many people, and a substantial portion of all drinking takes place in it (Cavan, 1966; Mass Observation, 1943; Popham, 1962).

A number of writers have focussed on the physical improvement of on-premise outlets, rather than on their abolition, in the belief that structural and aesthetic features were important determinants of sociability and sobriety. The models that have most captured the attention of these scholars are the inns and taverns of the Elizabethan period and of the following two centuries. Maskell's work is typical in this regard (1927). It was written in the hope that "the sym-

pathy of some readers may be enlisted in the movement to rescue the public house from obloquy and neglect" (p. vii). It was in fact a plea for the renaissance of the taverns and tavern life eulogized by literary figures from Shakespeare to Dickens and celebrated by poets from Chaucer to Longfellow. In the introduction it is submitted that "decadence began in England when the kindly landlord gave way to the brewer's manager and the inn became a public-house where men go just to drink in sordid and demoralizing surroundings" (p. x). In short, public drinking places of both the past and the present are viewed selectively, with the result that the former are associated with the picturesque, the healthy, and the desirable, and the latter with the ugly, the sordid, and the undesirable.

This school of thought apparently has had some influence on government control policies, at least in England. For example, in 1916 the government acquired the entire alcoholic beverage trade, including more than 100 public houses, in and around the City of Carlisle. This became widely known as the "Carliste Experiment." The justification was the necessity of strict control to prevent insobriety among local munitions workers. Among the measures introduced to achieve this end, considerable emphasis was placed on a program to remodel or renovate many of the public-houses (Askwith, 1928; Shadwell, 1923). A more recent example is the "trust-house" concept of government control over the restoration and maintenance of the original appearance of historic drinking places. The point of view is also sometimes implicit in arguments to support the "tied-house" system in England. Thus, it is contended that the large brewery owners of public-houses are more likely to have the capital and motivation to make their outlets attractive than are many small entrepreneurs (Oliver, 1947).

Until comparatively recent years, just the opposite philosophy seems to have dominated control policies respecting the operation, appearance, and facilities of both on- and off-premise outlets in most of Canada, a number of American jurisdictions, and some other areas. This has been especially evident where a substantial "dry" sentiment continued to prevail following the repeal of Prohibition. The Province of Ontario is a typical instance. Prohibition was repealed in much of the province in 1927, and a limited number of government-owned and -managed package stores were opened. These were generally located well off the main shopping streets, and the beverages offered for sale were never displayed or readily accessible to customers for examination. In 1934 outlets for on-premise consumption were reintroduced in the form of "beverage rooms," that is, establishments licensed to sell beer only. They were constructed so that the activity within could not be observed from the outside. Most were exceedingly plain both as to furnishings (usually restricted to simple tables and chairs) and decoration. No professional entertainment, game, singing, or dancing was permitted. Typically, there was a room for men only, and

one for women only or women with escorts. A customer was not permitted to carry his drink from one table to another, to drink while standing, to buy more than one drink at a time, or to buy on credit. There were many other rules but the foregoing will serve to convey the relevant picture. Clearly, the objective was to minimize the attractions of the public drinking place, and the likelihood of prolonged and lively social interaction occurring among its patrons.

Since World War II, public sentiment in Ontario has increasingly favored a more permissive policy with respect to drinking, and this has been reflected in several changes in legislation and derivative regulations. One notable change in 1947 led to a diversification in types of outlet for on-premise consumption. Beverage rooms continued to operate under the same restraints as before, but now "cocktail and dining lounges" were permitted in the province as well. Essentially, this meant a slight increase in outlet rate, the sale of wines and distilled liquors by the glass with or without meals, and higher standards of decor for the establishments licensed to sell such beverages. Most beverage rooms catered to a working-class clientele; the new establishments were intended to attract a middle-class patronage. Music, professional entertainment, and dancing were allowed in the lounges, and no segregation of patrons by sex was imposed.

In an effort to assess the effect of the 1947 legislation, Popham *et al.*, (1976) analyzed trends in alcohol statistics for eight-year periods before and after the change. By way of control data, the trends were compared with those in the adjacent Province of Manitoba. There no significant changes in policy had occurred over the 16 years, and the regulations and types of outlet were much the same as prevailed in Ontario prior to 1947. It was found that, with the exception of alcoholism (in effect, liver cirrhosis mortality) rates, the percentage increases were much greater in both provinces before than after 1947. From 1947 to 1954, alcohol sales increased slightly more in Ontario (19 percent) than in Manitoba (14 percent), but drunkenness conviction and alcoholism rates showed greater increases in Manitoba.

A criticism which may be levied against this study is that it did not take account of a possible differential change in the proportion of users of alcohol in the two provinces; the rates were all based on either the drinking age or adult populations. However, the rather scanty survey data available for the period (Popham and Schmidt, 1958) do not suggest changes of a magnitude that would significantly affect the results reported. Bryant (1954) examined the consequences of a similar change in the State of Washington: the introduction of "liquor by the drink." He concluded that there was no evidence that increases in consumption or in alcohol-related offenses could be attributed to the change in control policy. And in Saskatchewan, Dewar and Sommer (1962) conducted a before-and-after study of a small community in which a "beer parlor" for men only was replaced by a beer and wine tavern catering to both sexes. They

could discern few effects. After the change, more drinking occurred away from home but there was no apparent alteration in the overall consumption level.

It should be stated at once that exclusive dependence on studies such as these is seldom likely to permit a definitive conclusion respecting the effects of a change in legal restraint. In the first place, when a change applies to a whole state or province, let alone a nation, it will be difficult if not impossible to find an adequately matched control population. Secondly, it is rare to find instances when a single specific change has occurred. Usually, several changes are introduced simultaneously, as in the case of the 1947 outlet diversification in Ontario. Under these circumstances, if an effect is identified it will not be known to which changes it should be attributed and to which not. This greatly reduces the value of the results insofar as rational policy development is concerned.

Thus, it is important that other approaches to assessment be undertaken as well. It seems to us that one of the most promising—for the area of regulation under consideration—would be careful observation and interview studies of behavior in beverage outlets before and after changes. Good models of the essentially ethnographic approach involved are provided by the tavern studies of Cavan (1966) and Mass Observation (1943). Ideally, such investigations would be done with the cooperation of the local licensing authority so that contemplated changes might be introduced in a manner that facilitated controlled examination. Another approach, which has received far too little attention in the alcohol field, is direct experimental manipulation using small groups in a simulated or, where practicable, real tavern setting. Bruun's study of a group of regular drinkers, conducted in one of the rooms of a licensed outlet in Helsinki, is an excellent example of the potentialities of the approach (Bruun, 1959).

In the past 25 years in Ontario, as in many other jurisdictions of the Western world, there have been numerous changes in alcohol control policy, mainly in the direction of relaxation of restrictions. Since the mid-1950s television has been allowed in beverage rooms; in the past few years, games and other recreational facilities have been permitted in establishments with lounge licenses; some "stand-up" bars have been allowed; displays of beverages have been introduced to package outlets; self-service package stores have been established in main shopping areas; and licenses have been issued for on-premise outlets in locations not previously contemplated; for example, museums and other public buildings, theaters, office complexes, large department stores, and sidewalk cafés.

It may be that, taken individually, these and other changes in type and location of outlet permitted have little effect on general consumption and attendant problems. But this has not yet been substantiated with even a reasonable degree of certainty. It is clear that an overall shift in alcohol control

policy is well underway in many countries. In the past, a strong influence was exerted by those who considered that changes that increased the attractiveness of beverage outlets, or their visibility to the public would lead to increased alcohol use with undesirable consequences. Today it is more common to hear that by improving the appearance and facilities of outlets, and introducing them into all areas of everyday life, the mysticism associated with alcohol will be reduced; it will come to be regarded as no more remarkable than any other consumer product and therefore will be used moderately. The essential point is that, whichever view is argued, the appeal to date has had to be to theory rather than fact, or to the weight of prevailing sentiment rather than to evidence systematically gathered and objectively analyzed.

CONTROL OF HOURS AND DAYS OF SALE

The opening hours of alcoholic beverage outlets, especially those for on-premise consumption, have been almost as common a target of regulatory measure through the ages as their frequency (King, 1947; Shadwell, 1915, 1923). Usually, the legislation has provided for a reduction in opening times, and the stated intent has been to combat the problems of insobriety. In recent years, however, and in keeping with trends in other areas of control, new regulations have sometimes extended both the hours and days of sale. In Ontario, for example, the hours of dining lounges were extended from the usual midnight closing to 2:00 A.M., and such establishments were permitted to sell alcoholic beverages with meals on Sunday, traditionally a general closing day. In addition, the 6:30 to 8:00 P.M. closing of beverage rooms was not imposed on premises with lounge or dining lounge licenses when these were allowed in 1947.

Despite the long-standing belief in the efficacy of regulating opening hours, there have been exceedingly few attempts to put the matter to test. Popham (1962) found an apparent correlation between the opening hours of beverage rooms in Toronto and the hourly pattern of arrests for drunkenness exhibited between 8:00 A.M. Monday and 8:00 A.M. the following Sunday. However, when arrests were plotted for the period 8:00 A.M. Sunday to 8:00 A.M. Monday morning, during which time all beverage outlets were closed, an almost identical pattern emerged. This might be taken to indicate that the hours of sale reflected the drinking pattern of at least one segment of the community rather than the reverse. On the other hand, the opening hours that prevailed at the time of the study had been in force for many years, and originally may have shaped the characteristic circadian pattern observed. Indeed, the results of a recent study in Victoria, Australia, would suggest this as the more probable relationship.

MEMORANDUM

TO: Persons Interested in the Current Status of Rural Communities With Respect to the State Title 4 Alcohol Local Option Law

FROM: Alaska Legal Services Corporation Alcohol Project

RE: Statewide Village Status Report

DATE: January 14, 1983

The ALSC Alcohol Project was funded by the State Office on Alcoholism and Drug Abuse ("SOADA") to provide statewide on-site community legal education and technical legal assistance on the state Title 4 alcohol local option law. During its existence, the ALSC Alcohol Project worked closely with rural communities throughout Alaska. The ALSC Alcohol Project has terminated.

Approximately 130 rural communities were visited and 50 other rural communities were assisted in some fashion. "Assistance" means a community either requested a petition form, cover letter, and memorandum explaining the law, or a legal opinion of their local village ordinance concerning alcohol control. This Statewide Village Status Report from the ALSC Alcohol Project is a final attempt to provide an adequate profile of individual rural community activity with respect to the state Title 4 alcohol local option law.

Presently, 74 alcohol local option elections have been held. Some communities have now held two elections, with differing results. The present tally is: 1 community has voted for a community liquor license, 51 communities have voted to forbid the sale and importation of alcoholic beverages, 10 communities have defeated the sale and importation option, 2 communities approved and 1 defeated the no sale option, and 1 community defeated the private liquor license option. Several more elections are presently scheduled and many other petitions are being circulated.

If you have any additional information or questions on specific communities, please contact Vivian Kortie at the Alcoholic Beverage Control Board, 201 East 9th Avenue, Anchorage, Alaska, 99501, or call (907) 277-8638.

STATEWIDE VILLAGE STATUS REPORT — January 14, 1983

Village (Municipality or Village)	Petition Sent (ALSC Visit*)	Option Considered or Voted Upon	Election Results (yes/no[2])	Effective Dates	Notes

NOTE[1]: The four option choices for municipalities (first and second class and homerule cities) are:

1. Selected liquor license;
2. Community liquor license;
3. Banning the sale of alcoholic beverages;
4. Banning the sale and importation of alcoholic beverages.

Established villages may choose option 1, 3, or 4.

NOTE[2]: For those villages which have chosen the option to ban sale and importation, a "yes" vote means that a voter wishes to stop the sale and importation of alcoholic beverages. A "no" vote means that a voter does not wish to stop the sale and importation of alcoholic beverages under the state alcohol local option law.

NOTE[3]: ALOL -- Alcohol Local Option Law.
ALOE -- Alcohol Local Option Election.
CRA -- Community and Regional Affairs; Division of Local Government Assistance.

NOTE[4]: As of May 18, 1982, the United States Department of Justice approved the Alaska State Title 4 alcohol local option law submission under Section 5 of the Voting Rights Act. The state of Alaska is a "Voting

Rights Act State," which means that when there is any "change in the standard practice or procedure" in voting, the state or other appropriate agency is required to obtain approval from the United States Department of Justice.

This approval means that the alcohol local option law elections already held by municipalities in the state of Alaska are valid. This approval also means that the established villages can hold alcohol local option law elections with the assistance of the Division of Elections.

This approval means that no objection under the Voting Rights Act can be raised with respect to the alcohol local option law elections held unless someone has actually been denied his or her right to vote, thus prejudicing the election.

NOTE[5]: After receiving encouragement from many rural Alaskan priests, religious organizations and residents, the Alaska House of Representatives and Senate passed a law, Senate Bill 765, dealing with the sacramental wine exception to the state Title 4 alcohol local option law.

The new law changed A.S. 04.11.496 (b), which is the law allowing communities to vote to prohibit the sale and importation of alcoholic beverages. The amendment of A.S. 04.11.496 (b) stated that if a majority of the people in a community vote to prohibit the sale and importation of alcoholic beverages, a person "may not knowingly send, transport, or bring an alcoholic beverage into the municipality or established village, unless the alcoholic beverage is sacramental wine to be used for bona fide religious purposes based on tenets or teachings of a church, is limited in quantity to the amount necessary for religious purposes, and is dispensed only for religious purposes by a person authorized by the church or religious body to dispense sacramental wine."

This language means that the only alcoholic beverages which can come legally into a community which has voted to stop sale and importation of alcoholic beverages is wine to be used only in a religious service. The wine is to be an amount to be used only in religious service. Only a priest or someone authorized by the priest can receive the wine and give it to people in a religious ceremony.

Journal of Studies on Alcohol, Vol. 40, No. 11, 1979

Relationship between the Number of On-Premise Outlets and Alcoholism

Thomas C. Harford, Ph.D.,[1] Douglas A. Parker, Ph.D.[2]
Charles Pautler[3] and Michael Wolz[4]

SUMMARY. *Rates of on-premise outlets and urbanism were significantly related to rates of alcoholism in 38 states and the District of Columbia.*

Studies of the relationships between alcohol availability, per-capita consumption and the prevalence of alcoholism have generated both critical discussions and policy recommendations relating to the prevention of alcoholism (1–5).

In 1977 Smart (3) reported on the relationships between over-all availability of beverage alcohol (6) and per-capita consumption and alcoholism rates in the U.S.A. He gave equal weighting to each of the control factors making up the index; these included the legal minimum purchasing age and restrictions on off- and on-premise sales on weekdays and Sundays, on hours of business and on outlet density. He found that availability was not related to alcoholism rates or per-capita consumption when per-capita income and the percentage of the population living in urban areas were controlled. Since Smart made no statistical analysis of the internal properties of the index, nor adjustments for legal restrictions on the number of outlets by population in certain jurisdictions, and since the empirical status of the relationships between several of the control factors in the index (e.g., outlet density, legal age) and alcoholism rates is far from conclusive, further studies are required.

The purpose of the present study was to examine the effects of alcohol availability, as measured by the number of on-premise outlets per 100,000 persons, on alcoholism rates in the U.S. On-premise outlets

serve to specify both a context of drinking and a subgroup of drinkers within the population at large (7).[5, 6]

Clark[5] examined the relationship between heavy drinking and tavern patronage and concluded that heavy drinking was related to the frequency of going to taverns and that heavy drinkers are more likely to be found in taverns than are other drinking groups. Harford et al.[6] found that the frequency of bar patronage was significantly related to daily and total weekly alcohol consumption among both men and women. Cahalan and Room (7) have shown that the frequency of visiting bars is related to heavy and problem drinking. Although there is a great variety of bars, their patrons differ demographically in several important ways from those who do not patronize bars,[5] and they do not drink exclusively in bars (8). Thus, patrons of on-premise outlets would appear to be heavy drinkers who contribute substantially to total alcohol consumption.

We hypothesized that the number of on-premise outlets would be significantly related to alcoholism rates when per-capita consumption, per-capita income and urbanism are controlled. Per-capita consumption was entered into the model because it has been shown (3) to be significantly related to each of the other variables.

Method

Data on the number of on-premise outlets were taken from a 1964 survey by Licensed Beverage Industries (9).[7] Rates of on-premise outlets were based on the population aged 15+. Data on the number of on-premise outlets were not available for 12 states. Of the remaining 39 states (including the District of Columbia), 22 reported legal restrictions on the number of on-premise outlets by population and 17 reported no restrictions (10).[8] Per-capita consumption was based on U.S. gallons of absolute alcohol consumed by the population aged 15+ (11). Data on per-capita income and the percentage of the population living in urban areas (urbanism) were provided by the Bureau of the Census (12). Alcoholism rates were based on the Jellinek formula (13). Smart (3) used the same data for consumption, income, urbanism and alcoholism.

[5] Also, Clark, W. Contextual and situational variables in drinking behavior. [Unpublished manuscript.]

[6] Also, Harford, T., Gerstel, E. K., Paulter, C. and Hoban, M. Social activity level and drinking patterns. Presented at the annual Medical–Scientific Conference of the National Alcoholism Forum, Washington, D. C., May 1979.

[7] Since the hypothesis being tested relates availability to alcoholism rates, it seemed reasonable to allow for a lag between the time for which the survey reported rates of on-premises outlets and a time when the effects would appear in alcoholism rates. An estimated time lag is not critical to the present analysis, however, in view of the high correlation ($r = 98$) obtained between 1964 and 1975 rates of on-premises outlets.

[8] States with restrictions are Alabama, Alaska, Arizona, California, Florida, Idaho, Indiana, Kentucky, Massachusetts, Michigan, Minnesota, Montana, New Jersey, New Mexico, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Washington, Wisconsin and Wyoming; states with no restrictions are Colorado, Connecticut, Delaware, Georgia, Hawaii, Iowa, Louisiana, Maine, Maryland, Missouri, Nebraska, Nevada, New Hampshire, New York, North Dakota and Vermont, as well as the District of Columbia.

Results

Table 1 shows the Pearson product-moment correlations between the variables for the sample of 38 states and the District of Columbia and for the 50 states and the District of Columbia reported by Smart (3). The coefficients of the 2 studies are similar, except that Smart found a significant correlation between availability and income. The 2 measures of availability also yielded similar results for consumption and alcoholism. On-premise rates correlated significantly and positively with the over-all availability measure used by Smart ($r = .44$, 38 df, $p < .01$).

To test the hypothesis that rates of on-premise outlets are significantly related to alcoholism rates when other factors are controlled, alcoholism rates (Y) were regressed on on-premise outlet rates ($X1$), per-capita consumption ($X2$), per-capita income ($X3$) and percentage of urban population ($X4$). Several different polynominal regressions were tested and it was found that the term $X4^2$ should be in any equation relating Y to $X4$ and any other set of variables because the nonlinear relationship between urbanism and alcoholism rates was significant. Accordingly, the present regression was based on the following model: $Y = X1 + X2 + X3 + X4 + X4^2$. Finally, a statistical analysis indicated that the two groups of states (presence and absence of legal restrictions) were not statistically different for this model and therefore the regression analysis was based on the total state data ($N = 39$).

The results of the regression analysis indicated that on-premise rates were significantly related to alcoholism rates ($p < .01$) when consumption, income and urbanism were controlled. In addition, the results indicated that urbanism was significantly related in a nonlinear manner to alcoholism rates ($p < .05$) when on-premise rates, consumption and income were controlled. Neither consumption nor income was significantly related to alcoholism when the other variables were controlled.

Although the 2 groups, those with and without legal restrictions, did not differ significantly on this model, regressions were made separately

Table 1.—*Pearson Product-Moment Correlations between Measures of Availability, Per-Capita Consumption, Per-Capita Income, Urbanism and Alcoholism Rate*[a]

	Availability							
	On-Premise Rates	*Over-all*	*Consumption*		*Income*		*Urbanism*	
	(N = 39)	*(51)*	*(39)*	*(51)*	*(39)*	*(51)*	*(39)*	*(51)*
Consumption	.49†	.41†						
Income	.23	.39†	.54†	.60†				
Urbanism	.09	.25	.28	.34*	.71†	.72†		
Alcoholism rates[b]	.45†	.42†	.47†	–	.52†	.59†	–	.53†

[a] Availability measures are the over-all availability of beverage alcohol, which Smart (3) examined in 50 states and the District of Columbia, and the rate of on-premise outlets as assessed by the present study in 38 states and the District of Columbia.

[b] Smart (3) did not report the correlation between alcoholism rates and per-capita consumption; alcoholism rates were not linearly related to urbanism in the present study.

* $P < .05$. † $P < .01$.

for the groups because they provide greater conceptual if not statistical homogeneity (14). The results of the regression analysis in states with restrictions ($N = 22$) were identical to those presented above. In the 16 states (and the District of Columbia) with no restrictions only on-premise rates were related to alcoholism ($p < .10$). The removal of 1 outlier, the District of Columbia, increased the strength of the relationship between on-premise rates and alcoholism ($p < .05$).

While the major objective in the present study was to examine the relationship between availability and alcoholism after adjusting for consumption, income and urbanism, other forms of the equation were examined with the same variables. Since certain interactions might exist, squared and cross-product terms were tested. These regression analyses show that if prediction of alcoholism rates was the objective then the model $Y = X1 + X4 + X4^2$ was the best one to use based on Mallows' Cp criteria (15). This equation yields a squared multiple correlation of .54. The two groups of states (presence and absence of restrictions) were not statistically different according to this model.

Because of the nonlinear relationship between urbanism and alcoholism rates, we reexamined the relationship between Smart's index of over-all availability and alcoholism rates using the complete set of state data ($N = 51$). The same regression model was used except that the index of over-all availability replaced that of on-premise outlet rates. The results of this analysis indicated that over-all availability scores, per-capita income and urbanism were not related to alcoholism rates, while per-capita consumption was related ($p < .08$).

Discussion

The results of the regression analyses indicated that both the rates of on-premise outlets and urbanism contributed to alcoholism rates when per-capita consumption and income were controlled. Urbanism, however, contributed significantly to alcoholism rates only in states which placed restrictions on the number of outlets according to population.

Further research is needed to determine the mechanisms underlying the relationship between availability and alcoholism and whether subsequent changes in numbers of outlets will influence alcoholism rates. The present findings suggest that a high rate of on-premise outlets indicates the presence of a heavy-drinking population that is at risk with respect to alcoholism. The fact that the index of over-all availability was not significantly related to alcoholism rates is consistent with this interpretation. Also consistent is the finding that per-capita consumption was not significantly related to alcoholism rates when on-premise rates were controlled.

There are several obvious limitations in the present data. The heterogeneity of state jurisdictions and the small sample sizes available for analysis indicate the need for other units of analysis (e.g., Standard Metropolitan Statistical Areas or counties). In the present study classification was based solely on the presence and absence of restrictions

on outlet rates by population. Other classifications (e.g., location and type of outlet) may yield different results.

More attention should be given to the development of a comprehensive model of alcohol availability. The incorporation of different measures of availability, as well as other variables, may yield different results. Different results may also be obtained when alcoholism rates are based on indicators other than liver cirrhosis mortality.

Sec. 04.11.090. Beverage dispensary license. (a) A beverage dispensary license authorizes the holder to sell or serve on the licensed premises alcoholic beverages for consumption on the licensed premises only.

(b) The annual beverage dispensary license fee is $1,250.

(c) An applicant for a beverage dispensary license must file with the application a cash bond or a surety bond executed by a surety company approved by the board. The bond shall be in the sum of $2,500. Upon revocation of the license under AS 04.11.370(4), the bond shall be forfeited and the amount deposited in the general fund of the state.

Sec. 04.11.320. Denial of new licenses and permits. (a) An application requesting issuance of a new license shall be denied if

(1) the board finds, after review of all relevant information, that issuance of the license would not be in the best interests of the public;

(2) issuance of the license is prohibited by AS 04.11.390, relating to residency, or AS 04.11.410, relating to location of premises near churches and schools;

(3) the application has not been completed in accordance with AS 04.11.260;

(4) issuance of the license would violate the restrictions pertaining to the particular license imposed under this title;

(5) issuance of the license is prohibited under this title as a result of an election conducted in accordance with AS 04.11.502;

(6) the requirements of AS 04.11.420 — 04.11.450 relating to zoning, ownership and location of the license, and the identity and financing of a licensee have not been met;

(7) the licensed premises are to be located in a municipality, the type of license sought is a beverage dispensary or package store license, and that type of license is already in effect in the municipality under a community liquor license, unless the new license is to become effective after the community liquor license is no longer effective, whether as the result of a local option election or otherwise;

(8) the authority sought is authority to operate a beverage dispensary or package store under a community liquor license for premises to be located in a municipality where the authority sought is already held by a private licensee under a beverage dispensary or package store license, unless the community liquor license is to become effective after the privately held license is no longer effective, whether as the result of a local option election or otherwise;

(9) issuance of the license is prohibited under AS 04.11.400(a) or prohibition of issuance of the license is found necessary under AS 04.11.400(b);

(10) the application contains false statements of material fact;

(11) the license is sought for the sale of alcoholic beverages in a first or second class city in which there are no licensed premises at the time of application unless a majority of the voters in a local option election conducted in accordance with AS 04.11.502 have voted "no" on the question set out in AS 04.11.490, or have voted "yes" on a question set out in AS 04.11.492 or 04.11.500;

(12) the license is sought for the sale of alcoholic beverages in an established village in which there are no licensed premises at the time of application unless a majority of the voters in a local option election conducted in accordance with AS 04.11.502 have voted "no" on the question set out in AS 04.11.490 or have voted "yes" on the question set out in AS 04.11.500.

(b) An application requesting issuance of a new permit shall be denied if

(1) the board finds, after review of all relevant information, that issuance of the permit would not be in the best interests of the public;

(2) the board finds that any of the statements made in the application are untrue;

(3) the application has not been completed in accordance with AS 04.11.260;

(4) the permit is sought for the sale of alcoholic beverages in a first or second class city or established village in which there are no licensed premises at the time of application unless a majority of the voters in a local option election conducted in accordance with AS 04.11.502 have voted "no" on the question set out in AS 04.11.490. (§ 2 ch 131 SLA 1980)

Cross reference. — As to application for new license or permit, see AS 04.11.260.

Sec. 04.11.330. Denial of license or permit renewal. (a) An application requesting renewal of a license shall be denied if

(1) the board finds, after review of all relevant information, that renewal of the license would not be in the best interests of the public;

(2) the license has been revoked for any cause;

(3) the applicant has not operated the licensed premises for at least 30 eight-hour days during the immediately preceding calendar year, unless the board determines that the licensed premises are under construction or cannot be operated through no fault of the applicant;

(4) the board finds that issuance of an existing license under AS 04.11.400(g) has not encouraged tourist trade;

(5) the requirements of AS 04.11.420 — 04.11.450 relating to zoning, ownership of the license, and financing of the licensee have not been met;

(6) renewal of the license would violate the restrictions pertaining to the particular license under this title;

(7) renewal of the license is prohibited under this title as a result of an election conducted in accordance with AS 04.11.502;

(8) the application has not been completed in accordance with AS 04.11.270;

SUBJECT: Limitation of liquor licenses (SSHB 158)

TO: Representative M. Mike Miller

FROM: RJ Russ Josephson
Legislative Counsel

Enclosed is a draft of the sponsor substitute you requested for HB 158. I thought it would be useful to explain the contents of the draft.

Sections 1 through 6 and sec. 8 all contain technical changes necessitated by the repeal of the tourist trade exception and the public convenience exception provisions in sec. 9. The remaining section, sec. 7, is the "guts" of the bill, changing the population requirements for bar and package store licenses. Rather than the present figure of 1,500 persons per license, the bill would require 3,000 persons per license for those two types of licenses.

RJ:ljb

Enclosure
12/040

Barb —
attached is M. Miller's revised HB 158 - limiting liquor licenses. He wants to know if you prefer a committee substitute or a Sponsor Sub.?
If you want to hear it again, I'll get a sectional analysis.

SUBJECT: Tenure limitation for mayor of general law municipality

We have reviewed the opinion of the borough attorney for the Fairbanks North Star Borough dated February 12, 1981. That opinion concerns the power of a second class borough, which is a general law municipality, to limit the number of successive terms of the borough mayor. By ordinance #79-38, the assembly provided that an elected borough mayor may only serve for two consecutive terms.

A limit on the number of consecutive terms for a municipal officer creates a qualification for office. See Benzow v. Cooley, 199 N.Y.S.2d 22 (Sup. Ct. 1960). The qualifications for the office of borough mayor are established by AS 29.23.-130(b), which provides:

> A borough voter is eligible to be borough mayor. The assembly may by ordinance establish residence requirements for candidates for borough mayor not exceeding three years.

A review of AS 29.48 discloses that general law municipalities have not been expressly granted the power to prescribe the qualifications of elected municipal officers. See AS 29.48.010. It is also evident that an express power does not exist to which the power to establish these qualifications may be inferred. See AS 29.48.010(1) and (2). Other evidence of a legislative intent to reserve this power may be inferred by comparing the limitations concerning the term of mayor imposed on a home rule city. See AS 29.13.100(4). We believe that if the legislature limited the power of a home rule city to adopt inconsistent qualifications, then it is reasonable to assume that a general law municipality may not exercise an unlimited power to create new qualifications for the office of mayor.

We hope this letter answers your question.

RE: House Bill 162

Under current statutes, municipalities do not have the authority to limit the number of terms elected officials may serve.

House Bill 162 provides that General Law Boroughs and cities may limit, by ordinance, the number of terms that may be served by assembly members, borough mayors, city council members, and city mayors.

Proposed CS HB 162 expands the provisions of HB 162 in that it is applicable to home rule as well as general law municipalities and, requires that limitations on the number of terms served by members of the governing bodies be ratified by the voters.

SUBJECT: Limits on terms of municipal officials (CSHB 162 (C&RA))

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel TBC

Here is the sectional analysis of the draft of CSHB 162 (C&RA) that you requested.

Section 1. This makes material added in secs. 3 - 5 of this draft applicable to home rule municipalities as home rule limitations. Since AS 29.23.050 is a home rule limitation now under AS 29.13.100(3), no addition is needed to include the material in sec. 2 as a home rule limitation.

Section 2. Unless ratified by the voters, no limit may be placed on the total number of terms or number of consecutive terms that a person may serve on the assembly of a home rule or general law borough.

Section 3. Unless ratified by the voters, no limit may be placed on the number of terms or number of consecutive terms a person may serve as mayor of a home rule or general law borough.

Section 4. Unless ratified by the voters, no limit may be placed on the number of terms or number of consecutive terms a person may serve as mayor of a home rule or general law city.

You have also asked me to compare this draft to HB 172. Under sec. 29.20.140 of that bill, no limit may be placed on the number of terms or number of consecutive terms a person may serve on the governing body. This applies to all home rule and general law municipalities. The section is made a

home rule limitation under sec. 29.10.200(4). Under sec. 29.20.230(c) of HB 172 no limit may be placed on the number of terms or number of consecutive terms a person may serve as mayor of a general law city or borough. That section does not apply as a home rule limitation. HB 172 differs from this draft in that the restrictions on limiting the terms of mayors do not apply to home rule municipalities. Otherwise, the restrictions on limiting terms are the same in that bill and in the draft of CSHB 162 (C&RA).

PROGRAM EFFECTS OF BILL

This bill allows municipalities to limit, by ordinance, the number of consecutive full terms that a person may serve as mayor or as a member of the assembly or council.

COMMENTS

This bill would give each municipality an option regarding whether or not individual elected officials should be turned out of office not by the voters but by a limitation on the consecutive number of terms they may serve. There are advantages and disadvantages to limiting terms of office, but the Department will not debate them here. The overriding consideration is that this legislation provides for a local option on the question, a philosophy this Department generally favors.

Alaska State Legislature
House Committee on Community and Regional Affairs

Dear Representative Lacher:

In support of House Bill No. 162 which I have introduced, I have attached a copy of a letter from Fairbanks North Star Borough discussing the problem as well as a copy of a resolution passed by Fairbanks North Star Borough. The voters of both Fairbanks North Star Borough and Matanuska-Susitna Borough have passed advisory propositions on this matter.

Briefly, the legislation simply puts the power to limit the number of terms of elected officials back into the hands of the local governments where it belongs.

Yours very truly,

Jerry Ward
State Representative

SUBJECT: Recall of municipal officials
(Work Order No. 13-0837)

TO: Representative Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked what the responsibility of the clerk is in reviewing recall petitions for sufficiency.

What a recall petition must contain and the method of determining the sufficiency of a petition depends on the specific statute involved and these types of laws vary from state to state. Some statutes require only a general statement of the grounds for recall and an official may be recalled for purely political reasons. However, other statutes require grounds for recall that are more than simple disagreement with matters of policy and the grounds stated must actually constitute misfeasance, malfeasance or nonfeasance in office. McQuillan, Municipal Corporations, vol. 4, sec. 12.251b: Noel v. Oakland County Clerk, 284 N.W.2d 761 (Michigan 1979); Bent v. Ballantyne, 368 S.2d 351 (Florida 1979); Tolar v. Johns, 147 S.2d 196 (Florida 1962); Jacobsen v. Nagel, 96 N.W.2d 569 (Minnesota 1959).

Where petitioners are required to state only general grounds, the recall petition need not state the cause for removal with the same particularity as where the requirement is that reasons for removal be stated clearly. The purpose of a general statement of grounds is to furnish information to electors upon which a political and not a legal issue may be raised. Under statutes providing that a statement of grounds for recall is for the information of the electors, the question of the sufficiency of those grounds is also for the electors, but under provisions authorizing recall for malfeasance or similar language, the sufficiency of the grounds provided is a legal question. 63 Am. Jur.2d, Public

Officers and Employees, sec. 245; Pybus v. Smith, 141 P. 203 (Washington 1914).

Statutory provisions as to recall are to be liberally construed in favor of the electorate's right to exercise recall. Hazelwood v. Saul, 619 P.2d 199 (Colorado 1980). Under this principle and in the absence of statutory language limiting the recall to specific, indicated reasons, the adequacy of grounds stated in a petition is treated as a political matter and courts refuse to enjoin recall petitions on complaints that charges are insufficient. However, where recall is limited to specified grounds of malfeasance or similar language it is generally held that

> . . . petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Municipal Corporation Law, sec. 22.200, pages 22-304 - 22-305.

The officer designated to ascertain the sufficiency of a petition in a particular statute may be required to determine legal sufficiency rather than matters of form only. Unless an appeal is specifically provided for, the officer's determination as to sufficiency of a recall petition is final and subject only to judicial correction if the determination is capricious, arbitrary, or plainly erroneous as a matter of law. McQuillan, supra., vol. 4, sec. 12.251(d); Hold v. Trantham, 575 S.W.2d 83 (Texas 1979).

Article XI, section 8 of the Constitution of the State of Alaska provides:

> All elected public officials, in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedure and grounds for recall shall be prescribed by the legislature. (Emphasis added)

In carrying out this constitutional responsibility the legislature has provided under AS 29.28.140 that misconduct in office, incompetence, and failure to perform prescribed duties are the grounds for recall. In addition, under AS 29.28.150(a)(3), a petition for recall must contain ". . . a statement of the grounds of the recall stated with particularity as to specific instances". (Emphasis added)

The municipal clerk is required to review the petition ". . . for content and signatures . . ." under AS 29.28.160.

These statutory provisions dealing with recall have not been judicially construed by the Supreme Court in this state, so it cannot be determine with certainty whether the clerk is required to review the petition for signatures and form only or whether the clerk must determine as a legal matter whether the specific instances set out in a petition, if true, constitute misconduct in office, incompetence or failure to perform prescribed duties. Under the principles set out previously in this memorandum it appears that the clerk is required to determine whether the specific instances set out support a claim of misconduct in office, incompetence or failure to perform prescribed duties because AS 29.28.150 demands more than just a general statement of the grounds for recall and does not specifically indicate that the stated grounds are for the information of the voters only.

Under both versions of the bill revising Title 29, SB 1 and HB 172, the grounds for recall remain unchanged although the procedure for recall has been substantially changed. Nevertheless, an applicant for a recall petition under Sec. 29.26.260(a)(3) is still required to set out the grounds ". . . with particularity". The clerk must prepare a recall petition only if the clerk determines that the application for the petition meets the requirements of AS 29.26.260, including the requirement that grounds be ". . . stated with particularity" (Sec. 29.26.280). After a petition is filed the clerk must again determine whether the petition is sufficient and, if insufficient, ". . . identify the insufficiency and notify the sponsors. . ." (Sec. 29.-26.290). It seems clear that since the clerk must identify the insufficiency, a determination of sufficiency is not limited to review of signatures, even though (b) and (c) of the section only provide for correcting a petition insufficient for lack of signatures. It appears under these sections that the clerk would still be required to determine whether the grounds stated, if true, actually constitute misconduct in office, incompetence, or failure to perform prescribed duties.

I believe that this interpretation conforms to the intent of the policy committee that produced the original version of a Title 29 revision bill. There was considerable discussion of the recall provisions by that committee and at one point

the committee considered requiring only a general statement of reasons for recall and allowing recall to proceed upon purely political grounds. It was even suggested that grounds for recall be eliminated entirely. That approach was specifically rejected by the committee. Consequently, I would recommend that HB 172 be amended to clearly reflect the fact that the clerk is to review a recall petition for form and signatures only, and not to determine whether grounds stated actually constitute misconduct in office, incompetence, or failure to perform prescribed duties, if that is the result intended by the legislature.

RE: House Bill 172 amendment 6

The attached letter of intent and proposed language for implementation was prepared during hearings of SB 1, comparison legislation to HB 172.

Present law requires first class and home rule cities in the unorganized borough to accept the responsibility for delivery of Educational services. It is perceived that the requirement to be responsible for educational services may be a deterrant to certain cities or areas to organizing or upgrading to first class or home rule status. The opposition for a city to assume the educational powers could come either from an existing REAA or the city.

The proposed change to HB 172 would resolve the issue of the assumption of education powers by vote of the residents in the city and in the REAA.

LETTER OF INTENT
TO CSSB 1

February 24, 1983

It is the intent of the Senate Community and Regional Affairs Committee that the assumption of the education power by newly formed or upgraded first class or home rule cities be dependent upon a vote in the existing Regional Education Attendance Area. If the vote both within the city and in the remainder of the REAA was not in favor of the city assuming the education power, it would not.

This Letter of Intent was discussed and unanimously approved by the Senate C & RA Committee. The attached page labelled "Proposed Amendment #10" is what the committee members had in front of them when the Letter of Intent was endorsed. The longer attached amendment, drafted by Legal Services, represents all of the actual changes that need to be made to SB 1 to carry out the Letter of Intent.

Though the committee strongly endorses this concept it was felt the full amendment should be available for review before it was adopted, which is why this method of presentation was followed. The Community and Regional Affairs Committee urges the Finance Committee to incorporate the intent of the attached proposed Amendment #10 into SB 1.

To: _____ HOUSE BILL No. _____

PAGE: LINE:

Note: This change is listed as a proposal rather than an amendment because of the complex drafting that will be required to make sure all the necessary sections are cross referenced. Legal Services has reviewed this proposal and suggested this approach because of time constraints. If the Committee approves this proposal, Legal Services will incorporate it as part of the Committee Substitute.

Page 10, after line 19, insert new section:

"29.05.145. ASSUMPTION OF THE EDUCATION POWER. (a) When an unincorporated area or second class city that is part of a Regional Education Attendance Area incorporates or upgrades to first class or home rule city status, the assumption of the education power shall be in accordance with this section

(b) When an unincorporated area or city that is part of a REAA incorporates or upgrades to first class or home rule city status, that Director of Elections shall conduct an election in the REAA within 90 days of the incorporation.

(c) At this election, voters of the REAA shall be given an opportunity to approve or disapprove the assumption of the education power by the newly incorporated or upgraded first class or home rule city.

(1) The vote shall be counted separately within the city limits of the newly incorporated or upgraded city and in the remainder of the REAA.

(2) A majority of voters in both areas must approve the assumption of the education power by the newly incorporated or upgraded city or it may not assume the education power"

Alter other sections as necessary to conform.

RE: House Bill 172 amendment 7

During Committee review of HB 172 there was discussion but no apparent concensus concerning the exemption of greenhouses from assessement at full valuation for taxation purposes (Page 109, line 22).

The existing law does not give special treatment for greenhouses. The intent of providing special tax treatment for farm lands (not including barns, houses, sheds, etc.) was to assist the farmer in resisting the pressures of urban growth rather than being forced to subdivide farm land because of inflated land values. The effect of the new language is to provide a special tax treatment for greenhouses, including commercial greenhouses raising ornimental flowers.

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "developed" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation.

BOROUGH ATTORNEY'S OFFICE

April 6, 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: HB 172 "DEVELOPED" DEFINITION

The present version of HB 172 provides for a tax exemption as required by 43 U.S.C. 16.20(d) for certain Native lands. This exemption provides a definition of "developed" for implementing the federal law. I recommend that this matter be treated in a separate bill rather than in HB 172 or SB 1, the parallel bills intended as housekeeping measures to revamp Title 29.

During the last legislative session certain amendments were made to the Title 29 bill on the House floor which caused a great deal of controversy. In re-introducing the Title 29 in the present legislature, all of these amendments were removed except for the provisions for implementing the tax exemptions under 43 U.S.C. 16.20(d). This amendment was incorporated in AS 29.45.030 of the bill.

Pursuant to federal law, certain Native lands are not taxable until "developed". The intent of the proposed definition in AS 29.45.030 is to clarify what improvements of land will constitute "development" for tax exemption status.

I believe that the intent of this section is to assure that lands will not be taxed simply because an access road is constructed to the property or improvements are placed on the property in anticipation of future development. However, the language is sufficiently ambiguous to permit the interpretation that even a regular, residential or commercial subdivision development would not be taxable until the lots were sold. Once land is subdivided, roads are constructed and other improvements are put in place, the available lots become the sale inventory of the real estate developer. An exemption from taxation of these lots would give the exempted developer an unfair advantage over other developers with which it was in competition.

Because this provision is not in existing Title 29 and because there is potential controversy involved, I recommend that

it not be included in HB 172, a housekeeping bill. As a separate bill, I believe that the Borough would support a definition between a taxable subdivision development and tax exempt lands which have been surveyed and have constructed roads.

Sincerely,

Steven H. Morrissett
Borough Attorney

FILE: HB 172

SUBJECT: Substitute Utility Language
for Title 29 Revision

Dear Bob:

If the House Community and Regional Affairs Committee would like to consider alternative language to that which has been proposed for the utilities section of the Title 29 revision, may I suggest the following. This language, I believe, accommodates the interests of the municipalities and of the utilities. It would exempt from municipal regulation those utilities, including co-ops, which have elected to exempt themselves from APUC regulation by a vote of the subscribers or members. It would also exempt from municipal regulation those small electric, telephone and garbage utilities which are presently exempt from APUC regulation but which may come under APUC regulation if 25% of the subscribers petition the commission for regulation. In addition, it would exempt from municipal regulation those utilities which the APUC itself exempts upon a finding of no legitimate public interest in regulation if the commission also finds that the utility should also be exempt from municipal regulation. If cable TV is given an exemption from APUC regulation, and the legislature believes that it should also be exempt from municipal regulation, a simple amendment to the following language making reference to the statute exempting cable TV would extend the exemption to municipal regulation of cable TV also. The substitute language would be as follows:

> AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).
>
> (b) A municipality may not regulate a utility
>
> (1) to the extent it is subject to regulation under AS 42.05; or

(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

M E M O R A N D U M

TO: Committee on Community and Regional Affairs

FROM: Staff

DATE: April 25, 1983

RE: House Bill 172 proposed amendment number 9

The attached amendment proposed by representatives of utility companies is a significant change from present law.

The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is also subject to regulation by the Alaska Public Utilities Commission. Stated in another way, if the Alaska Public Utilities Commission does not or can not regulate a utility or a matter pertaining to a utility, then a municipality may not impose a regulation.

Present law provides municipalities the power to regulate utilities and matters pertaining to utility services to the extent the utilities are not regulated by the Alaska Public Utility Commission.

In several instances, the regulation of a condition of service by a utility company, or the regulation of a utility company is optional for the Public Utilities Commission, or optional for the utility.

In cases where utilities are not regulated by the Alaska Public Utilities Commission, Municipalities generally feel they need to have the authority to exercise regulatory powers. On the other hand, utility companies believe that; if the Alaska Public Utility Commission does not regulate them, then the municipalities should not have the authority to provide regulation.

Chugach Elec. Ass'n, Sup. Ct. Op. No. 1636 (File Nos. 2969, 2993), 580 P.2d 687 (1978); B-C Cable Co. v. City of Juneau. Sup. Ct. Op. No. 2112 (File No. 4587), 613 P.2d 616 (1980).

Sec. 42.05.711. Exemptions. (a) The provisions of AS 42.05.010 — 42.05.721 do not apply to a person who furnishes water, gas or petroleum or petroleum products by tank, wagon, or similar conveyance, unless the person is thereby supplying water, gas, petroleum or petroleum products to a public utility in which he has an "affiliated interest."

(b) Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with any other utility, are exempt from the provisions of AS 42.05.010 — 42.05.721, other than the provisions of AS 42.05.221 — 42.05.281, unless the owner and operator elects to be subject to all provisions of AS 42.05.010 — 42.05.721.

(c) The ownership in whole or part, of the corporate stock of a public utility does not make the owner a public utility.

(d) The commission, on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of AS 42.05.010 — 42.05.721.

(e) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, any electric or telephone utility that does not gross $50,000 annually is exempt from regulation under AS 42.05.010 — 42.05.721 unless 25 percent of the subscribers petition the commission for regulation.

(f) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, an electric or telephone utility that does not gross $325,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(g) A utility, other than a telephone or electric utility, that does not gross $100,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(h) A cooperative organized under AS 10.25.010 — 10.25.650 may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721, other than AS 42.05.221 — 42.05.281, under the procedure described in AS 42.05.712.

(i) A utility which furnishes collection and disposal service of garbage, refuse, trash, or other waste material and has annual gross revenues of $200,000 or less is exempt from the provisions of this chapter, other than the certification provisions of AS 42.05.221 — 42.05.281,

unless 25 percent of the subscribers or subscribers representing 25 percent of the gross revenue of the utility petition the commission for regulation.

(j) The provisions of this chapter do not apply to sales, exchanges or gifts of energy to an electric utility certificated under AS 42.05.010 — 42.05.721 when the energy which is the subject of the sale, exchange or gift is waste heat, electricity, or other energy which is surplus or the by-product of an industrial process. In an area in which no electric utility is certificated for service, energy provided by sale, exchange or gift may be provided to any utility which is certificated for service to that area. A contract for the sale, exchange or gift of energy exempt under this subsection does not make the supplier a public utility, and does not transfer the responsibility to provide utility services from a certificated utility to any other person. (§ 6 ch 113 SLA 1970; am § 3 ch 76 SLA 1973; am § 8 ch 83 SLA 1980; am §§ 7-9 ch 136 SLA 1980; am § 89 ch 59 SLA 1982)

Revisor's notes. — As enacted by chs. 83 and 136, SLA 1960, present subsections (j) and (i) were designated as subsections (f) and (j), respectively, but were redesignated by the revisor of statutes pursuant to AS 01.05.031(b). Former subsection (i) of this section was transferred as § 13, ch. 136, SLA 1980 to the 1980 Temporary and Special Acts and Resolutions by the revisor of statutes pursuant to AS 01.05.031(b).

Effect of amendments. — The first 1980 amendment added subsection (j).

The second 1980 amendment deleted "excepting the furnishing of collection and disposal service of garbage, refuse, trash or other waste material" following "none of whose utilities" near the beginning of subsection (b), deleted the former second sentence in subsection (b), which read: "Notwithstanding any other provisions of this chapter, municipalities providing collection and disposal service of garbage, refuse, trash or other waste material within their corporate boundaries are not subject to regulation by the Alaska Public Utilities Commission unless the municipality elects to be subject to the provisions of this chapter," substituted "$50,000" for "$25,000" following "does not gross" near the middle of subsection (e), substituted "under this chapter" for "hereunder" following "exempt from regulation" near the middle of subsection (e), and added subsections (f) through (i).

The 1982 amendment, effective May 28, 1982, deleted "on June 30, 1980" preceding "a utility," and inserted "annual" preceding "gross revenue" in subsection (i).

Editor's notes. — Section 13, ch. 136, SLA 1980, as revised by the revisor of statutes, provides: "Cable television systems are exempt from the provisions of AS 42.05 [AS 42.05.010 — 42.05.721], other than the provisions of AS 42.05.221 — 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983. If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission."

Opinions of attorney general. — An electrical utility owned and operated by a regional electrical authority would continue to qualify for the broad exemption from this chapter, available to political subdivisions under subsection (b) of this section once the regional electrical authority had completed its proposed organization as a nonprofit corporation pursuant to AS 10.20.005 et seq. June 7, 1976, Op. Att'y Gen.

Re: HB 172, proposed utilities amendment.

The attached amendment to HB 172 has been requested by Mr. Dave Hutchins, representing the Alaska Rural Electric Cooperative Association.

The controversy over the proposed amendment is based on the authority of municipalities, or lack of authority, to regulate utilities that are not subject to regulation by the Alaska Public Utilities Commission under AS 42.05.

A summary of the controversial portions of the three options presented to the committee is as follows:

1. Present Statues:
   a. Municipalities cannot regulate or grant franchises to any utility that is regulated by the Alaska Public Utilities Commission (APUC) under AS 42.05.

   b. APUC approval is required for a municipality to extend a municipal utility's service area.

The present laws are silent on the authority--or lack of authority-- of municipalities to regulate non-municipal owned utilities that are not regulated under AS 42.05. Since a General Law municipality has only the powers granted by law, it would probably be upheld that a General Law municipality does not have the authority to regulate a non-municipal owned utility that is not regulated by APUC. This limitation does not apply to a Home Rule municipality.

2. HB 172 Provides:
   a. Municipalities may grant franchises and regulate utilities to the extent they are not subject to regulation by APUC under AS 42.05, or not otherwise prohibited by law.

   b. Municipal owned utility services may be extended outside of the municipal boundaries (subject to approval by APUC).

3. Amendment requested by utilties:
   a. Whenever a utility is exempted from regulation by APUC or subject to regulation under AS 42.05, a municipality may not regulate the utility.

   b. A municipality may only extend utility services to an area adjacent to the municipal boundaries. This provision would prevent a municipal utility from providing utility services to an area that is not adjacent to the municipal boundaries.

The utilties that are, or may be, exempted from APUC regulation and as such are the utilties that are at the center of this issue are identified in AS 42.05.711 (copy attached).

"Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly for the area outside all cities in the borough and the council acting for the area in a city may regulate a utility service and fix, establish, and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except to the extent

(1) the utility is subject to regulation under AS 42.05; or

(2) municipal regulation is prohibited by AS 42.05.711(k) or other law.

(b) A municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

(d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing

rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

(e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees for or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

(f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

(g) This section applies to home rule and general law municipalities."

Page 195, after line 22, add a new section to read:

"* Sec. 62. AS 42.05.711 is amended by adding a new subsection to read:

(k) A public utility that is exempt or partially exempt under (d) through (j) of this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a muncipality."

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

Chugach Elec. Ass'n, Sup. Ct. Op. No. 1636 (File Nos. 2969, 2993), 580 P.2d 687 (1978); B-C Cable Co. v. City of Juneau, Sup. Ct. Op. No. 2112 (File No. 4587), 613 P.2d 616 (1980).

Sec. 42.05.711. Exemptions. (a) The provisions of AS 42.05.010 — 42.05.721 do not apply to a person who furnishes water, gas or petroleum or petroleum products by tank, wagon, or similar conveyance, unless the person is thereby supplying water, gas, petroleum or petroleum products to a public utility in which he has an "affiliated interest."

(b) Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with any other utility, are exempt from the provisions of AS 42.05.010 — 42.05.721, other than the provisions of AS 42.05.221 — 42.05.281, unless the owner and operator elects to be subject to all provisions of AS 42.05.010 — 42.05.721.

(c) The ownership in whole or part, of the corporate stock of a public utility does not make the owner a public utility.

(d) The commission, on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of AS 42.05.010 — 42.05.721.

(e) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, any electric or telephone utility that does not gross $50,000 annually is exempt from regulation under AS 42.05.010 — 42.05.721 unless 25 percent of the subscribers petition the commission for regulation.

(f) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, an electric or telephone utility that does not gross $325,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(g) A utility, other than a telephone or electric utility, that does not gross $100,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(h) A cooperative organized under AS 10.25.010 — 10.25.650 may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721, other than AS 42.05.221 — 42.05.281, under the procedure described in AS 42.05.712.

(i) A utility which furnishes collection and disposal service of garbage, refuse, trash, or other waste material and has annual gross revenues of $200,000 or less is exempt from the provisions of this chapter, other than the certification provisions of AS 42.05.221 — 42.05.281,

unless 25 percent of the subscribers or subscribers representing 25 percent of the gross revenue of the utility petition the commission for regulation.

(j) The provisions of this chapter do not apply to sales, exchanges or gifts of energy to an electric utility certificated under AS 42.05.010 — 42.05.721 when the energy which is the subject of the sale, exchange or gift is waste heat, electricity, or other energy which is surplus or the by-product of an industrial process. In an area in which no electric utility is certificated for service, energy provided by sale, exchange or gift may be provided to any utility which is certificated for service to that area. A contract for the sale, exchange or gift of energy exempt under this subsection does not make the supplier a public utility, and does not transfer the responsibility to provide utility services from a certificated utility to any other person. (§ 6 ch 113 SLA 1970; am § 3 ch 76 SLA 1973; am § 8 ch 83 SLA 1980; am §§ 7-9 ch 136 SLA 1980; am § 89 ch 59 SLA 1982)

Revisor's notes. — As enacted by chs. 83 and 136, SLA 1980, present subsections (j) and (i) were designated as subsections (f) and (j), respectively, but were redesignated by the revisor of statutes pursuant to AS 01.05.031(b). Former subsection (i) of this section was transferred as § 13, ch. 136, SLA 1980 to the 1980 Temporary and Special Acts and Resolutions by the revisor of statutes pursuant to AS 01.05.031(b).

Effect of amendments. — The first 1980 amendment added subsection (j).

The second 1980 amendment deleted "excepting the furnishing of collection and disposal service of garbage, refuse, trash or other waste material" following "none of whose utilities" near the beginning of subsection (b), deleted the former second sentence in subsection (b), which read: "Notwithstanding any other provisions of this chapter, municipalities providing collection and disposal service of garbage, refuse, trash or other waste material within their corporate boundaries are not subject to regulation by the Alaska Public Utilities Commission unless the municipality elects to be subject to the provisions of this chapter," substituted "$50,000" for "$25,000" following "does not gross" near the middle of subsection (e), substituted "under this chapter" for "hereunder" following "exempt from regulation" near the middle of subsection (e), and added subsections (f) through (i).

The 1982 amendment, effective May 28, 1982, deleted "on June 30, 1980" preceding "a utility," and inserted "annual" preceding "gross revenue" in subsection (i).

Editor's notes. — Section 13, ch. 136, SLA 1980, as revised by the revisor of statutes, provides: "Cable television systems are exempt from the provisions of AS 42.05 [AS 42.05.010 — 42.05.721], other than the provisions of AS 42.05.221 — 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983 If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission."

Opinions of attorney general. — An electrical utility owned and operated by a regional electrical authority would continue to qualify for the broad exemption from this chapter, available to political subdivisions under subsection (b) of this section once the regional electrical authority had completed its proposed organization as a nonprofit corporation pursuant to AS 10.20.005 et seq. June 7, 1976, Op. Att'y Gen.

Sec. 29.48.050. FRANCHISES AND PERMITS. Present LAW

(a) The assembly acting for the area outside cities and the council acting for the area within a city may grant franchises, including exclusive franchise privileges, for the construction, operation and maintenance of bus transportation systems and public utilities not regulated under AS 42.05 and may permit them the use of streets and other public places under regulations prescribed by ordinance.

(b) No franchise is valid until it has been submitted to the qualified voters of the city or borough area outside cities in which it applies, and at least 55 per cent of the votes cast are in favor of the franchise. At least 30 days notice of a franchise referendum election shall be given in the same manner as is provided for notice of regular municipal elections, and the notice shall specify the purpose of the election. The ordinance granting a franchise shall provide for its submission for ratification to the qualified voters of the city or borough area outside cities at either a regular or special election, and the result of the election shall be canvassed publicly by the council or assembly and spread upon the records of the minutes and the result declared and certified in the same manner as in a regular election.

(c) Public utilities regulated under AS 42.05 have the right to use the streets and other public places, upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions the assembly or council requires. A dispute as to whether fees, terms, conditions, or exceptions are

reasonable shall be decided by the Alaska Public Utilities Commission.

Sec. 29.48.060. PUBLIC UTILITIES RATES.

The assembly acting for the area outside cities and the council acting for the area within a city may regulate, fix, establish and change, as it considers proper, the rates and charges imposed for utilities services given to the municipality or its inhabitants by a municipally owned utility not regulated under AS 42.05.010 - 42.05.721 and may regulate and provide what is a reasonable deposit for meters and security for service to be given, provided that interest is paid on the deposit. All rates, charges and regulations shall be reasonable and shall permit a fair and reasonable return on invested capital.

Sec. 29.48.050. FRANCHISES AND PERMITS. Present LAW

(a) The assembly acting for the area outside cities and the council acting for the area within a city may grant franchises, including exclusive franchise privileges, for the construction, operation and maintenance of bus transportation systems and public utilities not regulated under AS 42.05 and may permit them the use of streets and other public places under regulations prescribed by ordinance.

(b) No franchise is valid until it has been submitted to the qualified voters of the city or borough area outside cities in which it applies, and at least 55 per cent of the votes cast are in favor of the franchise. At least 30 days notice of a franchise referendum election shall be given in the same manner as is provided for notice of regular municipal elections, and the notice shall specify the purpose of the election. The ordinance granting a franchise shall provide for its submission for ratification to the qualified voters of the city or borough area outside cities at either a regular or special election, and the result of the election shall be canvassed publicly by the council or assembly and spread upon the records of the minutes and the result declared and certified in the same manner as in a regular election.

(c) Public utilities regulated under AS 42.05 have the right to use the streets and other public places, upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions the assembly or council requires. A dispute as to whether fees, terms, conditions, or exceptions are

reasonable shall be decided by the Alaska Public Utilities Commission.

Sec. 29.48.060. PUBLIC UTILITIES RATES.

The assembly acting for the area outside cities and the council acting for the area within a city may regulate, fix, establish and change, as it considers proper, the rates and charges imposed for utilities services given to the municipality or its inhabitants by a municipally owned utility not regulated under AS 42.05.010 - 42.05.721 and may regulate and provide what is a reasonable deposit for meters and security for service to be given, provided that interest is paid on the deposit. All rates, charges and regulations shall be reasonable and shall permit a fair and reasonable return on invested capital.

Re: Amendments to HB 172

The Committee has completed action on proposed amendments One through eight; except that representatives of the Cape Fox Corporation were offered an opportunity to prepare new language for amendment No. 8.

Amendment No. 8 deals with a definition of developed lands for tax exempt status. A revised definition has been prepared for Committee review.

Amendment No.9 has been requested by representatives of the Alaska Rural Electric Cooperative Association. A staff summary has been prepared in an attempt to clarify the basis of the issue.

Following Committee decision on the above proposed amendments, staff will request a Committee Substitute HB 172 that will incorporate all approved amendments.

Borough

Mayor: B.B. Allen

April 6, 1984

Honorable Mike W. Miller
Alaska State Legislature
State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Mike:

Over the past eleven years a number of amendments to Title 29, the Municipal Code, have resulted in numerous conflicts and inconsistencies which make the title very difficult to use, let alone read and understand. Because of the difficulties with Title 29, a proposed revision of the entire title is before you which clarifies the municipal code without making major policy changes. I would like to request that you work to insure the adoption of this critical piece of legislation in this session. Though local governments are the only direct constituency for this legislation, all citizens of this state are affected.

I would also hope that this legislation could be passed without the type of controversial amendments which lead to its veto two years ago. Such a "clean" bill would provide us with the basis from which major policy changes could be addressed.

Thank you in advance for your positive consideration of this legislation.

Sincerely,

Bill

B.B. Allen
Borough Mayor

FILE: Legislature - 1983/84 - SB 260

SUBJECT: Proposed Substitute

Gentlemen:

Enclosed is a proposed substitute for Senate Bill 260 which I believe incorporates the changes we agreed could be made to help clarify the definition of "developed" in the bill. As you requested, I have shown the changes which the three of us propose by using brackets and underlining.

I appreciate the time you spent with me in discussing the changes. Please note that I still feel that subsection (1) should be deleted as it will lead to a changing tax status for property which cannot be pinned down to some specific event such as a transfer of ownership. While I recognize that such a system may be beneficial to the native corporations, it creates a situation which will undoubtedly lead to disagreements (and perhaps court battles) between municipalities and native corporations.

While I believe the language in the attached proposed substitute is more clear than that in Senate Bill 260, I strongly suggest that this proposal be reviewed by the attorneys and assessors in other municipalities as well as other native corporations. The situation varies from municipality to municipality and from native corporation to native corporation. It may even be profitable to try to set up a meeting of officials from concerned municipalities and native corporations to try to work out something to which a majority of us can agree.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

RE: House Bill 172 amendment 6

The attached letter of intent and proposed language for implementation was prepared during hearings of SB 1, comparison legislation to HB 172.

Present law requires first class and home rule cities in the unorganized borough to accept the responsibility for delivery of Educational services. It is perceived that the requirement to be responsible for educational services may be a deterrant to certain cities or areas to organizing or upgrading to first class or home rule status. The opposition for a city to assume the educational powers could come either from an existing REAA or the city.

The proposed change to HB 172 would resolve the issue of the assumption of education powers by vote of the residents in the city and in the REAA.

RE: House Bill 172 amendment 7

During Committee review of HB 172 there was discussion but no apparent concensus concerning the exemption of greenhouses from assessement at full valuation for taxation purposes (Page 109, line 22).

The existing law does not give special treatment for greenhouses. The intent of providing special tax treatment for farm lands (not including barns, houses, sheds, etc.) was to assist the farmer in resisting the pressures of urban growth rather than being forced to subdivide farm land because of inflated land values. The effect of the new language is to provide a special tax treatment for greenhouses, including commercial greenhouses raising ornimental flowers.

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "developed" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation.

RE: House Bill 172 proposed amendment number 9

The attached amendment proposed by representatives of utility companies is a significant change from present law.

The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is also subject to regulation by the Alaska Public Utilities Commission. Stated in another way, if the Alaska Public Utilities Commission does not or can not regulate a utility or a matter pertaining to a utility, then a municipality may not impose a regulation.

Present law provides municipalities the power to regulate utilities and matters pertaining to utility services to the extent the utilities are not regulated by the Alaska Public Utility Commission.

In several instances, the regulation of a condition of service by a utility company, or the regulation of a utility company is optional for the Public Utilities Commission, or optional for the utility.

In cases where utilities are not regulated by the Alaska Public Utilities Commission, Municipalities generally feel they need to have the authority to exercise regulatory powers. On the other hand, utility companies believe that; if the Alaska Public Utility Commission does not regulate them, then the municipalities should not have the authority to provide regulation.

City of Fairbanks

MEMORANDUM

APR 2 '84

The Fairbanks City Council has requested the attached Resolutions, passed and approved at their meeting of 3/26/84, be forwarded to your office.

Thank you,

Carma Roberson

Carma B. Roberson, City Clerk

Introduced by: Mayor Bill Walley
Date : March 26, 1984

RESOLUTION NO. 2515

A RESOLUTION REQUESTING THE THIRTEENTH LEGISLATURE TO ADOPT THE REVISED ALASKA STATUTE TITLE 29 AS PROPOSED.

WHEREAS, Title 29 of the Alaska Statutes, the Municipal Code, has not been revised since 1972; and

WHEREAS, eleven years of amendments to Title 29 have created a confusing patchwork that is very difficult to read and understand; and

WHEREAS, the proposed revision of Title 29 reorganizes and clarifies the Municipal Code without making major policy changes; and

WHEREAS, major policy changes to Title 29 should be considered in separate legislation in order to keep the Title 29 revision a "clean" bill;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAIRBANKS, ALASKA, as follows:

SECTION 1. That the thirteenth legislature is respectfully requested to adopt in this legislative session the revised Title 29, of the Alaska Statutes, as proposed, without any controversial amendments.

SECTION 2. That the City Clerk is hereby directed to send to each member of the thirteenth legislature a copy of this Resolution.

PASSED and APPROVED this 26th day of March, 1984.

Introduced by: Mayor Bill Walley
Date : March 26, 1984

RESOLUTION NO. 2516

A RESOLUTION REQUESTING THE THIRTEENTH LEGISLATURE TO FULLY FUND THE MUNICIPAL ASSISTANCE PROGRAM.

WHEREAS, the Alaska State Legislature adopted a formula funding the program for Municipal Assistance, which is thirty percent of the previous year's corporate income tax; and

WHEREAS, that amount for fiscal year 1985 is estimated to be $90.9 million, which is $20.4 million more than the $70.5 million requested by Governor Bill Sheffield in his fiscal year 1985 budget request; and

WHEREAS, the municipalities of Alaska base their fiscal planning on this formula and rely on the law; and

WHEREAS, partial and irregular funding of the formula causes major budgeting problems for municipalities because local budgets must be approved before the state budget is adopted; and

WHEREAS, reduced funding for the municipalities will result in either increased local property taxes or reduced local services;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAIRBANKS, ALASKA, as follows:

SECTION 1. That the thirteenth legislature is respectfully requested to fully fund at the statutory adopted formula the Municipal Assistance Program for fiscal year 1985 at $90.9 million.

SECTION 2. That the City Clerk is directed to send to each member of the thirteenth legislature a copy of this Resolution.

PASSED and APPROVED this 26th day of March, 1984.

MEMORANDUM

TO: Representative Mike W. Miller
Chairman, House C & RA Committee

FROM: Representative Milo H. Fritz
Interim Chairman, House C & RA Committee MHF

DATE: January 17, 1984

SUBJ: HB 172 Amendments

During the interim, my staff and I have studied HB 172 and its effects and implications. I have changes and alternatives to suggest that the Committee consider. These ideas come from my review of this legislation during the first session and an analysis of the Interim Report on HB 172. I will briefly outline my reasoning for each change in the hope that my ideas will be of assistance to you and the committee.

I believe that current amendments #2 and #7 will not have the effect which is desired, and that the legislation should be left as currently written in HB 172. Amendment #2 eliminates the "legal grounds" for a recall election. Although this would remove the legal problem of determining the sufficiency of grounds, it leaves totally open the right to pursue a recall. If any group has an inclination to start a recall, they state "a reason" and start collecting signatures. It would indeed be difficult to gather the amount of signatures necessary to have a recall election. However, the group will have received much media attention, the person who they are trying to recall has had his/her image tarnished, and the whole political process put into a state of turmoil. This is not even considering the mental anguish caused by this action.

I do not want to see any group have the ability to singularly influence the destiny of a city or borough by the use of a threat of recalling one or more members of the governing body. If we do not have the "grounds" of a "recall", we will be allowing the recall system to be used for purely political/personal interest purposes.

Amendment #7 would eliminate the exemption of greenhouses from assessment at full valuation for tax purposes. The argument against this exemption was that "the purpose of the exemption was to allow farms to continue in spite of otherwise inflated land prices, and the corresponding taxes. I believe that the greenhouses in our state also need this help. If a greenhouse is to be successful, it must have the ability to get its produce to market, which is the urban population centers. The law is written so that a highly prosperous greenhouse, will be taxed at a high "true value of farm use", thereby seeing that equitable taxes are paid. This exemption will allow our fledgling greenhouse industry a chance to grow.

Amendments #8 and #9 should be withdrawn from consideration. The 13th Legislature, as a whole and with concurrence of the Governor, has dealt with these issues by the passage of SB 260 and HB 274, respectively. This decision should be incorporated into the Committee Substitute as recommended by amendment #10.

Amendment #11 was requested by the Alaska State Hospital Association and should be judged on its merits. Their claim of discrimination against a "special" hospital seems to be valid.

Amendment #12 was placed in the Interim Report because it is a part of the information, and is an alternative. However, I strongly urge the rejection of this amendment. The differences between the two bills, were caused in a large part, by the rejection of proposed amendment #6 during the first session. I believe the Senate may change their bill or accept our version if it passes first. The proper time to discuss any remaining differences will be in Conference Committee.

Amendment #13 is a matter of housekeeping.

In addition to the Municipal Code revision, the report to the 13th State Legislature examining court decisions and opinions of the Attorney General construing Alaska Statutes revealed a problem with the local preference law. AS 04.11.502 states that one or "several questions" can be placed before the voters. The preceding paragraphs which have been updated specifically state that only one question can be placed before the voters at a time. Correcting this oversight will only take a short amendment removing the words "or several questions" from A.S. 04.011.502 (a) and (b). This action was suggested on page 78 of the report.

TITLE 29 FACT SHEET

SUMMARY OF HB 172/SB 1 - TITLE 29 (MUNICIPAL CODE)

HB 172 and SB 1 are comprehensive bills that reorganize and clarify Title 29 (Municipal Code), but do not substantially change that part of the state statutes that direct the operation of local government in Alaska.

History: The current Title 29, last revised in 1972, is a hodgepodge of 13 years worth of amendments. It is very difficult for the average citizen to read and understand.

Recognizing the problem, the Legislature adopted SCR 66 in 1980, directing the rewrite of Title 29. A broadly representative policy committee, with the assistance of a technical committee, prepared a revised code after an exhaustive series of meetings, hearings, and public presentations.

HB 170 and SB 180 were introduced in 1981. More hearings were held during the 1981 legislative session, during the interim, and continuing through the 1982 session. SB 180 passed the legislature, but because of controversial floor amendments, Governor Hammond vetoed the bill.

In 1983, SB 1 was introduced by Senators Sturgulewski and Gilman; HB 172, by Governor Sheffield. Both bills are basically the same as the bill that had passed the previous year minus the controversial amendments. More committee work was done in both the House and Senate on the 204 page bill.

Changes: For the most part, these bills reorganize and reword Title 29 for clarity and flexibility. Policy changes of any substance are very few. The main changes are:

Third Class Boroughs: The existing third class borough, Haines Borough, continues in existence, but there is no provision for incorporating new third class boroughs in the future.

Home Rule Status: Second class cities and unincorporated areas are authorized to adopt home rule charters, which must be ratified by a vote of the people.

Municipal Powers: A general grant of municipal powers is given to municipalities, instead of a long list of enumerated powers. The difference is more semantic than actual, since the list includes almost every conceivable municipal power. There is no change in the manner in which boroughs acquire powers.

Organizational Grants/Feasibility Studies: The organizational grants are increased and expanded, depending on the category of local government. Studies for the feasibility of local government are authorized.

Incorporation Requirements: The minimum number of people required for incorporation as either a first class or home rule city is increased from 400 to 600.

Ordinance Violation: Penalties for ordinance violations are increased from a maximum $500 and 30-days to class B misdemeanor penalties, which are a maximum of $1000 and 90-days.

Extraterritorial Jurisdiction: Solid and septic waste disposal, utility services, wharves, harbors, and other marine services are added to the list of powers that may be exercised outside the boundaries of the municipality, if the municipality has the authority to exercise the power inside its boundaries.

Economic Development: Allow economic development as a non-areawide power for second class

boroughs, without requiring a vote of the people to exercise it.

Franchise: Requires a vote on franchises of more than 5 years; current law requires a vote on all franchises.

Eminent Domain: Removes the requirement that second class cities get permission from the Department of Community and Regional Affairs and the voters before exercising the power of eminent domain.

Planning, Platting, and Land Use: Updates the language, changing "zoning" to "land use".

Run-Off Elections: Allows run-off election procedures and requirements to be changed by ordinance.

Personal Property: Allows exemption of personal property from taxation.

Taxation of Boats: Removes the $5 and $15 property tax limit on boats if assessed on the basis of net tonnage.

Penalties and Interest: Increases the maximum penalty on delinquent property and sales tax from 10% to 20% and interest from 8% to 15%.

Revenue Bonds: Authorizes revenue bonds to be payable solely from the revenue and property of the project.

Municipal Assistance Fund: Moves the administration of the Municipal Assistance Fund from the Department of Revenue to the Department of Community & Regional Affairs.

Municipal Property Disposal: Requires municipalities to adopt formal procedures by ordinance; current law sets out procedures including requiring an election on the disposal of any property valued at more than $25,000.

The substantive differences between SB 1 and HB 172 are:

Hospital Definition: Proposed CSHB 172 (CRA) adds "special" hospitals to the definition section for revenue sharing eligibility.

Farm Use Greenhouses: Senate CRA amendment to SB 1 provides for the assessing of farm use greenhouses on the basis of full and true value for farm use.

Annexation and Detachment: Senate CRA amendment to SB 1 adds detachment language to the annexation sections and establishes a time deadline for Local Boundary Commission action.

Education Powers: Senate CRA recommends amending the powers section to provide for a double majority vote before a second class city or an unincorporated area in an REAA can assume the education power when incorporating as a first class or home rule city. The vote would be both in the proposed incorporating area and the rest of the REAA.

Alaska Municipal League
Prepared February 23, 1984

AMENDMENT TO CSHB 172:

Add in AS 29.60.140 after the word borough "or within an organized borough"

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811

MEMORANDUM March 1, 1984

SUBJECT: Proposed amendment to the municipal code revision bill (CSHB 172 C&RA))

TO: Representative Mike W. Miller
Chairman
House Community and Regional Affairs

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

You have asked what the legal effect would be of adding language to Sec. 29.60.140(b) in CSHB 172 (C&RA) so that the subsection would read:

> (b) In this section "unincorporated community" means a place in the unorganized borough or within an organized borough that is not incorporated as a city and in which 25 or more persons reside as a social unit. (New language underlined)

That section provides for aid to unincorporated communities. It replaces the current program of aid to Native village governments contained in AS 29.89.050 to reflect the way the program has actually been administered. Under sec. 29.60.140 each unincorporated community in the unorganized borough may receive an annual entitlement of $25,000 if there is a qualified entity in the community to receive and spend the money. The amendment changes the definition of "unincorporated community" to include communities in boroughs as well as communities outside of boroughs. Under this amendment, an unincorporated community, no matter where it is located in the state, can qualify to receive a grant.

You have also asked whether this amendment would have any fiscal impact. Since under the section as it now appears, only certain communities may receive a grant (those in the unorganized borough), and since the amendment would have the effect of increasing the number of communities that would

qualify for a grant by including communities in all the organized boroughs, it seems that the number of grants awarded under the section could increase substantially. Assuming an effort is made to fully fund the program, the program as amended will probably be significantly more expensive than it would have been under the original section. I have no way to determine how much additional money would be needed to fully fund the program.

You have also asked whether this amendment will encourage the formation of municipalities. I can think of no legal reason that this amendment would have that effect. Granting money to communities would not remove the limitation on incorporation of a cities under sec. 29.05.020 of the bill. In addition, some communities that would qualify for a grant on the basis of population would not be able to incorporate as a city for lack of 25 voters required to sign an incorporation petition. This is the minimum number of voters necessary for incorporation of a city. (See 29.05.060 (12)). To receive a grant, all that is needed is 25 residents, including children and others who might not be voters.

RE: House Bill 172 amendment 2

Randy Phillips, Mike Szymanski

The following changes are proposed by ~~Ginny Chitwood, Alaska Municipal League.~~

1. Page 68, lines 5-7:
Delete section 29.26.250.

2. Page 68, line 15:
Delete "grounds of", insert "reasons for".

3. Page 68, line 24:
Delete "grounds" insert "reasons".

4. Page 69, lines 20,24:
Delete "25", insert "35".

5. Page 71, line 18:
Delete "grounds of" insert "reasons for".

Explanation: The issue of determining the sufficiency of grounds for a recall election was discussed by the committee. It appeared that a concensus was reached to eliminate the requirement for providing legal grounds to conduct a recall election and to increase signatory requirements for the petitioners.

Amendment #2

#s 1, 2, 3, & 5 eliminate the specified "grounds for recall" which are: misconduct in office, incompetence, or failure to perform prescribed duties.

#4 increases the signatory requirements for petitioners from 25% to 35%.

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y · STATE CAPITOL
JUNEAU ALASKA 9981[illegible]
907-465 3800

MEMORANDUM February 24, 1983

SUBJECT: Recall of municipal officials
(Work Order No. 13-0837)

TO: Representative Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked what the responsibility of the clerk is in reviewing recall petitions for sufficiency.

What a recall petition must contain and the method of determining the sufficiency of a petition depends on the specific statute involved and these types of laws vary from state to state. Some statutes require only a general statement of the grounds for recall and an official may be recalled for purely political reasons. However, other statutes require grounds for recall that are more than simple disagreement with matters of policy and the grounds stated must actually constitute misfeasance, malfeasance or nonfeasance in office. McQuillan, Municipal Corporations, vol. 4, sec. 12.251b: Noel v. Oakland County Clerk, 284 N.W.2d 761 (Michigan 1979); Bent v. Ballantyne, 368 S.2d 351 (Florida 1979); Tolar v. Johns, 147 S.2d 196 (Florida 1962); Jacobsen v. Nagel, 96 N.W.2d 569 (Minnesota 1959).

Where petitioners are required to state only general grounds, the recall petition need not state the cause for removal with the same particularity as where the requirement is that reasons for removal be stated clearly. The purpose of a general statement of grounds is to furnish information to electors upon which a political and not a legal issue may be raised. Under statutes providing that a statement of grounds for recall is for the information of the electors, the question of the sufficiency of those grounds is also for the electors, but under provisions authorizing recall for malfeasance or similar language, the sufficiency of the grounds provided is a legal question. 63 Am. Jur.2d, Public

Officers and Employees, sec. 245; Pybus v. Smith, 141 P. 203 (Washington 1914).

Statutory provisions as to recall are to be liberally construed in favor of the electorate's right to exercise recall. Hazelwood v. Saul, 619 P.2d 199 (Colorado 1980). Under this principle and in the absence of statutory language limiting the recall to specific, indicated reasons, the adequacy of grounds stated in a petition is treated as a political matter and courts refuse to enjoin recall petitions on complaints that charges are insufficient. However, where recall is limited to specified grounds of malfeasance or similar language it is generally held that

> . . . petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Municipal Corporation Law, sec. 22.200, pages 22-304 - 22-305.

The officer designated to ascertain the sufficiency of a petition in a particular statute may be required to determine legal sufficiency rather than matters of form only. Unless an appeal is specifically provided for, the officer's determination as to sufficiency of a recall petition is final and subject only to judicial correction if the determination is capricious, arbitrary, or plainly erroneous as a matter of law. McQuillan, supra., vol. 4, sec. 12.251(d); Hold v. Trantham, 575 S.W.2d 83 (Texas 1979).

Article XI, section 8 of the Constitution of the State of Alaska provides:

> All elected public officials, in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedure and grounds for recall shall be prescribed by the legislature. (Emphasis added)

In carrying out this constitutional responsibility the legislature has provided under AS 29.28.140 that misconduct in office, incompetence, and failure to perform prescribed duties are the grounds for recall. In addition, under AS 29.28.150(a)(3), a petition for recall must contain ". . . a statement of the grounds of the recall stated with particularity as to specific instances". (Emphasis added)

The municipal clerk is required to review the petition ". . . for content and signatures . . ." under AS 29.28.160.

These statutory provisions dealing with recall have not been judicially construed by the Supreme Court in this state, so it cannot be determine with certainty whether the clerk is required to review the petition for signatures and form only or whether the clerk must determine as a legal matter whether the specific instances set out in a petition, if true, constitute misconduct in office, incompetence or failure to perform prescribed duties. Under the principles set out previously in this memorandum it appears that the clerk is required to determine whether the specific instances set out support a claim of misconduct in office, incompetence or failure to perform prescribed duties because AS 29.28.150 demands more than just a general statement of the grounds for recall and does not specifically indicate that the stated grounds are for the information of the voters only.

Under both versions of the bill revising Title 29, SB 1 and HB 172, the grounds for recall remain unchanged although the procedure for recall has been substantially changed. Nevertheless, an applicant for a recall petition under Sec. 29.26.260(a)(3) is still required to set out the grounds ". . . with particularity". The clerk must prepare a recall petition only if the clerk determines that the application for the petition meets the requirements of AS 29.26.260, including the requirement that grounds be ". . . stated with particularity" (Sec. 29.26.280). After a petition is filed the clerk must again determine whether the petition is sufficient and, if insufficient, ". . . identify the insufficiency and notify the sponsors. . ." (Sec. 29.-26.290). It seems clear that since the clerk must identify the insufficiency, a determination of sufficiency is not limited to review of signatures, even though (b) and (c) of the section only provide for correcting a petition insufficient for lack of signatures. It appears under these sections that the clerk would still be required to determine whether the grounds stated, if true, actually constitute misconduct in office, incompetence, or failure to perform prescribed duties.

I believe that this interpretation conforms to the intent of the policy committee that produced the original version of a Title 29 revision bill. There was considerable discussion of the recall provisions by that committee and at one point

the committee considered requiring only a general statement of reasons for recall and allowing recall to proceed upon purely political grounds. It was even suggested that grounds for recall be eliminated entirely. That approach was specifically rejected by the committee. Consequently, I would recommend that HB 172 be amended to clearly reflect the fact that the clerk is to review a recall petition for form and signatures only, and not to determine whether grounds stated actually constitute misconduct in office, incompetence, or failure to perform prescribed duties, if that is the result intended by the legislature.

Editorial Comments

Amendments on this subject should be:

1) Pg. 75, delete lines 19-21.
2) Pg. 75, delete lines 27-29

> These sections give the municipality the Authority to REQUIRE inaividuals to use the govt. provided garbage collection service rather than another method.

Boy, That's some "free market" when the government is allowed to come in & force A garbage collection company out of business & buy them out at a government-determined price!!

Amendment #3

This would clarify exactly what eminent domain is used for: (to acquire the certificate, equipment & facilities of the carrier, or that portion of the certificate that would be affected).

Enid's suggested amendment

Pg. 76, lines 18-20, Delete "A municipality may exercise the right of eminent domain to determine fair market value."

RE: House Bill 172 amendment 3

Page 76, lines 19 and 20:
Delete "determine fair market value" insert "acquire the certificate, equipment and facilities of the carrier, or that portion of the certificate that would be affected".

Explanation: The right of eminent domain is not used to determine fair market value. The determination of fair market value is a step in the process of exercising eminent domain. As written, the statement may not meet the intent of allowing municipalities to excercise the right of eminent domain to acquire certificates or property.

Page 126, line 3:
Delete "$100,000.00" insert "$20,000.00".

Explanation: During Committee review of House Bill 172, there appeared to be a concessus of the committee that the minimum value of property to be foreclosed upon without notification to the owner by certified mail is too high ($100,000.00).

Amendment #4

The bill currently requires notice to all holders of a mortgage or lien on property only if the assessed value is $100,000 or more. This would reduce the minimum to $20,000.

MEMORANDUM

TO: Representative Milo H. Fritz
FROM: David Schade, Staff
DATE: August 16, 1983
RE: C&RA Interim Proposal

The House Community and Regional Affairs Committee has 25 Bills and Resolutions in committee at this time. 15 of these bills and resolutions can be researched and prepared for commitee hearings in Juneau. 7 of these Bills are no longer valid and 3 Bills will require extensive research.

HB 92 Repeal AK Coastal Management Program by Bettisworth would require extensive research and public hearings. There seems to be much opposition to this bill by Boroughs and Cities around the state, and I do not know if the House Majority Coalition is in favor of this bill.

HB 172 RE: Municiple Government by Rules has had its hearings and is ready to be passed out of committee. I would suggest that staff prepare a report explaining how the different issues have been solved. As we discussed it will be important that the bill is not amended by poorly informed legislators after the bill is passed out of committee.

HB 317 RE: State Revenue Sharing/Municipal Assistance by Rules by request of the Governor is a complex bill. This bill was designed to combine existing revenue sharing and municipal assistance programs into a single program. It would also give increased minimum entitlements for local governments. According to Representative Lachers' Interim Proposal "... the legislation is deficient in equity and may cause unnecessary administrative burdens." It would seem to be beneficial to have public hearings around the state on this bill before session and to have researched and defined the problem areas.

Representative Lacher also proposed to hold public hearings and develop legislation to assist the unincorporated boroughs in the organization process. This was recommended by the Local BoundaryCommission, but I do not know anything about this issue.

As you can see there is more work for the committee to do than time available. With only 4½ months before we return to Juneau it will be important to identify the projects that the coalition wants pursued, and allocate our time accordingly.

The following amendment is the differences between House Bill 172 and CS Senate Bill 1 at present. If adopted, both bills would be in line.

AMENDMENT #12 - page 33, after line 28, insert new line (26) 29.3-5.060 (franchise and permits) and renumber following paragraphs accordingly.

page 77, after line 6, add a new subsection - (c) this section applies to home rule and general law municipalities.

page 77, line 9, after "regulate" delete [,] and add a utility service and"

page 77, line 12 after "is" delete [not] and after AS 42.05, delete [and] and add "or"

page 77, line 14 delete [(2)...law.] and add (2) municipal regulat... is prohibited by AS 42.05.711 (k) or other law.

page 77, line 17-20, delete subsection (c) and add a new subsection (c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose, the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

page 77, lines 21-22, delete subsection (d) and add a new subsection (d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

not introduced — should not be — might be bargaining tool for Senate!

page 77, Sec. 29.35.070, add new subsection (e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

page 77, Sec. 29.35.070, add a new subsection (f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

page 77, Sec. 29.35.070, add a new subsection (g) This section applies to home rule and general law municipalities.

page 195, line 22, add Sec. 62. AS 42.05.711 is amended by adding a new subsection (k) A public utility that is exempt or partially exempt under this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a municipality. This subsection does not apply to a public utility exempt under (b) of this section.

Renumber the following sections accordingly.

page 107, line 29, after "borough" delete [including...period;]

page 61, line 10, after "(3) delete [is] and add "has been
after "elections" add for at least 30 days immediately preceding the municipal election; and

page 14, lines 17-26, after "action." add The standards and procedures established under this subsection that apply to detachment shall be the same as the standards and procedures that apply to annexation, except that the standards and procedures that apply to detachment must include provisions for equitable prorated payment of debts acquired by the municipality before the detachment.

page 14, line 19 after (1) add, subject to (2) and (3) of this subsection,

page 14, line 23 after "annexed" delete [by ordinance ...approval] and add or detached by ordinance without an election;

page 14, line 24 after "annexed" add or detached

page 14, after subsection (3) add a new subsection (4) within 90 days after receipt of a petition for annexation or detachment, the Local Boundary Commission shall make a decision on the petition. (S.D.#20)

The Honorable Bill Ray
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Subject: Senate Bill 1

Dear Senator Ray:

You have before you SB 1, the municipal code revision which includes in it revisions to the existing law, AS 29.89, state aid to municipalities and other eligible recipients for health facilities and hospitals.

That section as currently drafted, AS 29.60.120 in SB 1, continues to discriminate against the Juneau Regional Rehabilitation Hospital by excluding it from hospital revenue sharing. This, inspite of the fact that the facility was required to be built to acute hospital standards and functions as an acute facility with a specialty license. The specific problem is caused in the definition section of Article 15, General Provisions, Section 29.60.800(2). This should be changed to read as follows:

> (2) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general or special hospital; the term excludes a facility operated or wholly supported by the state or the federal government.

Your assistance in securing this amendment would be greatly appreciated.

Sincerely,

Dennis L. DeWitt

AMENDMENTS

The following is a list that presents a brief explanation of the amendments that were discussed and that received approval from the House Committee on Community and Regional Affairs during the 1983 legislative session. The following amendments 1 through 10, cover the concerns brought out from the proposals previously conducted by the Hammond Administration as well as progressively bringing further clarity and flexibility to Title 29.

passed

AMENDMENT #1 - clarifies the participation of a municipal employee or official in instances where the employee or official has substantial financial interest that may constitute a conflict of interest. Other items on the amendment are grammatical changes and general house keeping changes to further clarify the language (S.D.#9).

delete

AMENDMENT #2 - removes the requirement of determining the "sufficiency of grounds" for a recall election. It replaces "providing legal grounds" with "providing reasons for" and amends the percentage amount of signatures required to constitute a recall election from 25% to 35% (S.D.#10).

passed

AMENDMENT #3 - defines the intent of eminent domain process. As written, the statement may have not met the intent of allowing municipalities to exercise the right of eminent domain to acquire specific certificates or properties (S.D.#11).

passed

AMENDMENT #4 - lowers the minimum value of property to be foreclosed upon without notification to the owner by certified mail to $20,000.00 from the proposed limit of $100,000.00 (S.D.#12). Presently, property of any value must be notified.

passed

AMENDMENT #5 - specifies the date that Chapter 45 of Title 29 as written in House Bill 172 will go into effect. The amendment will avoid the possibility of a split tax year and will provide lead time for municipal planning and department assistance for mandated state and federal programs (S.D.#13).

AMENDMENTS

The following is a list that presents a brief explanation of the amendments that were discussed and that received approval from the House Committee on Community and Regional Affairs during the 1983 legislative session. The following amendments 1 through 10, cover the concerns brought out from the proposals previouslv conducted by the Hammond Administration as well as progressively bringing further clarity and flexibility to Title 29.

AMENDMENT #1 - clarifies the participation of a municipal employee or official in instances where the employee or official has substantial financial interest that may constitute a conflict of interest. Other items on the amendment are grammatical changes and general house keeping changes to further clarify the language (S.D.#9).

AMENDMENT #2 - removes the requirement of determining the "sufficiency of grounds" for a recall election. It replaces "providing legal grounds" with "providing reasons for" and amends the percentage amount of signatures required to constitute a recall election from 25% to 35% (S.D.#10).

AMENDMENT #3 - defines the intent of eminent domain process. As written, the statement may have not met the intent of allowing municipalities to exercise the right of eminent domain to acquire specific certificates or properties (S.D.#11).

AMENDMENT #4 - lowers the minimum value of property to be foreclosed upon without notification to the owner by certified mail to $20,000.00 from the proposed limit of $100,000.00 (S.D.#12). Presently, property of $10,000 value must be notified.

AMENDMENT #5 - specifies the date that Chapter 45 of Title 29 as written in House Bill 172 will go into effect. The amendment will avoid the possibility of a split tax year and will provide lead time for municipal planning and department assistance for mandated state and federal programs (S.D.#13).

failed

AMENDMENT #6 - This amendment did not receive committee approval (S.D. #14).

delete

AMENDMENT #7 - deletes "greenhouses" from being considered under a special lower assessment for property taxes on farm use land. The special taxing provisions for farm use land is designed to help farmers resist pressures to sub-divide their land (S.D.#15).

not voted on motion for delete

AMENDMENT #8 - deals with required tax exemptions which contain new language that defines "developed" for the implementation of a required federal tax program. This concern was addressed and resolved in Senate Bill 260 (S.D.#16).

not voted on motion delete

AMENDMENT #9 - relates to the Alaska Public Utilities Commission. The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is not subject to regulation by the Alaska Public Utilities Commission (S.D.#17). Please review HB274 (S.D.#5) which dealt with this issue.

PROPOSED AMENDMENTS FOR CONSIDERATION DURING 1984 SESSION

adopt

AMENDMENT #10 - Legal Services is preparing this amendment, by request of the Chairman, to be considered by the Committee on Community and Regional Affairs during the 1984 legislative session. It will encompass all legislation that was signed into law during the 1983 session that pertains to Title 29. This action is necessary in order to reflect changes made to Title 29 that are not now incorporated in the revision bill.

Three separate pieces of legislation became law. SB85 relates to the certificate of need program and construction funding for health facilities (S.D.#18).

Senate Bill 260 which provides for the definition of "developed" as it relates to lands that are exempt from taxation as stated by federal law (S.D.#4). House Bill 274 would exempt a utility which furnishes cable television from the provisions of the Alaska Public Utilities Commission Act (AS 42.05.010 thru AS 42.05.721) with the exception of provisions requiring a certificate of public convenience and necessity (AS 42.05.221 thru AS 42.05.281), unless 25 percent of the subscribers petition the commission for regulation (S.D.#5).

adopt

AMENDMENT #11 - "special hospitals" to be included in definition of health facilities - AS 29.60.800(2), page 169, line 3 of House Bill 172. That section as currently drafted discriminates against special hospitals by excluding them from hospital revenue sharing. Since these facilities are required to be built to acute hospital standards and function as an acute facility with a specialty license, language to resolve this discrepancy may read as follows:

> AS 29.60.800(2),
> "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general or special hospital; the term excludes a facility operated or wholly supported by the state of the federal government (S.D.#19).

The following amendment is the differences between House Bill 172 and CS Senate Bill 1 at present. If adopted, both bills would be in line.

AMENDMENT #12 - page 33, after line 28, insert new line (26) 29.3-5.060 (franchise and permits) and renumber following paragraphs accordingly.

page 77, after line 6, add a new subsection - (c) this section applies to home rule and general law municipalities.

page 77, line 9, after "regulate" delete [,] and add a utility service and"

page 77, line 12 after "is" delete [not] and after AS 42.05, delete [and] and add "or"

page 77, line 14 delete [(2)...law.] and add (2) municipal regulation is prohibited by AS 42.05.711 (k) or other law.

page 77, line 17-20, delete subsection (c) and add a new subsection (c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose, the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

page 77, lines 21-22, delete subsection (d) and add a new subsection (d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

page 77, Sec. 29.35.070, add new subsection (e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

page 77, Sec. 29.35.070, add a new subsection (f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

page 77, Sec. 29.35.070, add a new subsection (g) This section applies to home rule and general law municipalities.

page 195, line 22, add Sec. 62. AS 42.05.711 is amended by adding a new subsection (k) A public utility that is exempt or partially exempt under this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a municipality. This subsection does not apply to a public utility exempt under (b) of this section.

Renumber the following sections accordingly.

and Fairbanks Delegation

Re.: Opposition to CSHB 172 (C&RA), an act changing local government law

Dear Legislators:

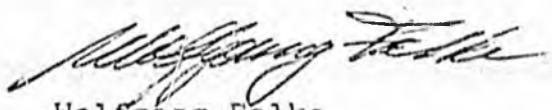
CSHB 172 conflicts with numerous constitutional provisions. In the past I have written extensively and pointed out the problems with this bill (attached is a copy of my twelfth letter to all Legislators, a letter to the editor and one addressed to Governor Hammond in 1982 concerning the basically same bill then, that was stopped by veto).

Now, like then, the public is not aware that this notorious administration-pushed bill is moving again. The public is uninformed of the changes in present law should CSHB 172 be passed and in fact is denied a fair opportunity to comment. This bill is to the public like a thief in the night that will rob the people of their constitutional right to maximum local self-government, to property, etc.

(Upon your request I will gladly, within a reasonable time, prepare a more detailed analysis of this bill with respect to the the provisions of the Alaska Constitution and the people as a whole.)

Without further public input, this bill should die in your committee. Present law provides adequately for the necessary administration and for maximum local self-government.

Very truly yours,



Wolfgang Falke

Twelfth open letter to all
Legislators of the State of Alaska

May 19, 1982

Re.: HCS CSSB 180(2d Fin) "An Act relating to municipal government"

Dear Legislator:

We have spent much time reviewing this version of SB 180 as well as the other committee versions. We only can react to a bill that comes out of a committee and the comments we make seem to be of no concern to the next committee scrutinizing and amending the same bill from their special point of interest. Therefore please consider the objections expressed from the viewpoint of the voters as enumerated in the letters I previously mailed to you plus the following:

With respect to the proposed procedures for the incorporation of home rule municipalities - in order to assure maximum local voter approval and local self-determination - the following changes must be made:

Delete proposed AS 29.05.060(13) "for a home rule municipality a proposed home rule charter" (at page 6);
delete proposed AS 29.05.110(d) "A home charter included in an incorporation petition under AS 29.05.060(13) is considered to be part of the incorporation question. The home rule charter is adopted if the voters approve incorporation of the municipality." (at page 8);
add "Because a home rule municipality has all legislative powers not prohibited by law or charter, a listing of each additional municipal power (additional to the mandatory powers of tax assessment and collection, education etc.) must appear separately on the ballot so that each could be voted on for the purpose of exclusion from exercise by the proposed new municipality.";
delete proposed AS 29.10.010(g) "The proposed charter for an unincorporated community or an area of the unorganized borough shall be filed with the incorporation petition filed under AS 29.05.060." (at page 28); and
add the following to AS 29.10.020:
"Model charters may serve only as an example or as a guideline to the members of the charter commission and must not be made a part of the incorporation petition under AS 29.05.060."

With respect to penalties (AS 29.25.070 at page 57), violation (AS 29.-40.180 at page 92) and remedies (AS 29.40.190 at page 92) - in addition to the objections expressed in my previous letters - the following ought to be added:

"Harm must be established in an action under this Title. Harmless violation of a provision under this Title or of an ordinance or regulation shall not be construed as a punishable offence."

HB 170 or SB 180 in any form must not become law.

Very truly yours,

Wolfgang Falke

P.S.
The third class borough form of local government is not "only a school district"! Please see AS 29.41.010(b), and my 10th and 4th open letter to all Legislators.
The third class borough must remain law as a first step to borough organization.

Re.: HCS-CSSB-180(Jud)amH,"An Act relating to municipal government"

Dear Governor Hammond:

HCS-CSSB-180(Jud)amH,"An Act relating to municipal government", having passed both the House and the Senate, now comes across your desk for approval, inaction, or veto. Before you decide the fate of this bill, please consider the following comments for the good of the people of Alaska as a whole:

This bill has received little publicity and only in recent weeks was labeled by the Municipal League and the Associated Press as just revising or reorganizing "chaotic laws regulating cities". In reality this bill is fundamentally changing the form of borough government and eliminating local voter approval of additional municipal powers to be exercised by second class boroughs, as well as deleting the reclassification option from second to third class status and the formation of new third class boroughs. Among other fundamental changes, it will, without the vote of the people, allow second class boroughs to provide for economic development, i.e. unrestricted government business and government industrial development. That is something the Voters of Fairbanks turned down by about 75% "No"-votes at the last general election.

By conferring authority to exercise additional municipal powers without the approval of the local electorate, and by prohibiting the formation of new third class boroughs the legislature is violating the constitutional mandate to provide for maximum local self-government. The Municipal League is pushing for passage of the bill and hiding the bills true intention of stripping the local citizens of their right to voter approval for the exercise of additional powers by the borough governments. This is also evidenced in my recent letter to the Editor of the Fairbanks Daily News-Miner, copy of which is attached hereto.

At the time the people of Alaska adopted the Constitution of the State of Alaska it was their will to retain the right of self-determination over local government, and that any additional exercise of municipal powers or special services must be approved by the voters of the locality affected. It is your duty as Governor of the State of Alaska to support and defend the Constitution of the State of Alaska, therefore you are obligated, pursuant to Article I, Sections 2, 15, and 21, Article II Sections 13 and 19, and Article X of our Alaska Constitution to exercise your veto power over this unconstitutional enactment created in HCS-CSSB-180-(Jud)-am-H by our legislators.

For the good of the people as a whole I urge you to veto this bill.

Very truly yours,

Wolfgang Falke

Fairbanks Daily News-Miner
200 No. Cushman St.
Fairbanks, Alaska 99701

Dear Editor:

This is in response to the Juneau AP report in your May 26, 1982 issue regarding Senate Bill 180, "An act relating to municipal government", wherein it was stated:

> "Alaska Municipal League Executive Director Ginny Chitwood defended the bill. She said city officials have struggled for years with Alaska's disorganized set of rules regulating their decisions, and the bill would straighten out the complicated municipal code."

A quick look at SB 180 and present law will convince overwhelmingly that the contrary is true! The proposed new law will allow existing second class boroughs to exercise many new additional powers circumventing local voter approval. Among such additional powers are the powers to provide for unrestricted government business and government industrial development, something that the voters of Fairbanks turned down by about 75 % "No" votes at the last general election. It is unconstitutional and unlawful for the legislature to "confer" the authority to exercise such powers to second class boroughs without the consent of the local voters.

The Municipal League's further statement, that

> "... local governments formed under other law (general law, other than home-rule) may do only what is specifically allowed in the municipal code."

<u>is false</u>! Present law confers undiscriminatingly all municipal powers to any class of borough or city. Third class boroughs must exercise the areawide powers of tax assessment and collection, and education; second class boroughs must exercise the areawide powers of tax assessment and collection, education, and planning, platting and zoning. Any additional powers proposed for exercise by a second or third class borough must be approved by the local voters affected; and if more than one power is proposed, each must appear separately on the ballot. That is the law that was approved by the citizens when they voted to incorporate as a second or third class borough, and the legislature cannot legally change that law without the approval of the voters of

existing second or third class boroughs.

The Municipal League's further statement, that

> "The reason for prohibiting any new third class boroughs is that state law limits the powers of third class boroughs making it difficult for the locality to spend revenue sharing money they collect from the state."

is a careless misconstrual. State law does not limit the powers of a second or third class borough - the citizens do, by a majority vote of the electorate! The citizens of a third class borough can approve by majority vote any additional municipal power they would like their local government to exercise on a service area basis, and should they desire their local government to exercise areawide or non-areawide additional powers they would vote to reclassify to second or first class status. It's not the legislature that limits the powers to be exercised by the local government, the local citizens do. The Alaska Constitution, Article X, Section 1, demands that the legislature shall prescribe law for maximum local self-government, and for different classes of boroughs and cities, and to provide for their reclassification. Therefore new incorporation of third class boroughs, as well as reclassification from second to third class borough status, must not be tampered with!

SB 180 MUST NOT BECOME LAW IN ANY FORM!

Very truly yours,

Wolfgang Falke

March 3, 1983

SUBJECT: Impact of land use regulation on development of energy resources (Work Order No. 13-0881)

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel TBC

You have asked whether the changes in HB 172 to the provisions dealing with land use regulation discourage development of energy resources as compared to existing laws that authorize land use regulation by municipalities.

Under AS 29.33.090, a municipality is required to regulate the use of land in accordance with a comprehensive plan through zoning by districts. The zoning regulations must be uniform for each type of building or area within a particular district, but the regulations may differ between the various districts. In addition, a municipality is authorized to rezone property to a less restricted use if the owner of the property agrees to place restrictions on the use of the land beyond those restrictions imposed under the general zoning requirements. Subsection (b) of that section contains a list of the types of restrictions that may be imposed through zoning. While paragraphs (2) - (6) deal with very specific restrictions relating to buildings, paragraph (1) grants broad authority to restrict "land use". It should be noted that the list is by way of example of various zoning restrictions and does not limit the types of restrictions that a municipality may impose through zoning. However, under this section a municipality is authorized to regulate land use only through zoning and may not use other land use techniques.

In contrast to existing law, under sec. 29.40.040 of HB 172, a municipality may implement the comprehensive plan through zoning, land use permit requirements, or any other method of

land use regulation. To the extent that greater flexibility is authorized in the implementation of a comprehensive plan, HB 172 makes it more practical for a municipality to adopt measures that may have the effect of discouraging the development of energy resources. Nevertheless, under both HB 172 and under existing law a municipality has the general authority to regulate land use regardless of whether this regulation places burdens on the development of energy resources and thereby discourages that development. In addition, the change in HB 172 that allows municipalities to use other techniques in addition to zoning impacts only general law municipalities, since under existing law home rule municipalities are not limited to the use of zoning in regulating land use.

In considering whether the changes in HB 172 may discourage development of energy resources it is necessary to determine whether the power to regulate land use has been significantly expanded under this bill with respect to each class of municipality. Under secs. 29.10.200(32), 29.35.180(b), 29.35.250(c), and 29.35.260(c) of HB 172, a home rule borough and home rule city in the organized borough or in the third class borough must provide for land use regulation, but a home rule municipality is not bound by the general provisions dealing with land use regulation set out in Title 29. Under existing law, although some provisions appear contradictory, most home rule municipalities are not required to provide land use regulation, nor are they restricted from providing land use regulation. A home rule municipality that does regulate land is not required to comply with provisions contained in Title 29 dealing with land use regulation except for provisions dealing with zoning and platting of state land (AS 29.13.100(37) and (39)). The general requirement that boroughs provide for planning, platting and zoning contained in AS 29.33.070 is not a home rule limitation. Under AS 29.43.040 home rule cities in third class boroughs and outside boroughs are required to provide for planning, platting and zoning ". . . as provided for boroughs". This is a home rule limitation under AS 29.13.100(12). Since, under AS 29.43.010, powers incorporated by reference to laws governing boroughs apply to home rule cities outside boroughs only if applicable to home rule boroughs and home rule boroughs are not required to provide for planning, platting and zoning, the net result is that only home rule cities in third class boroughs are required to provide land use regulation.

In summary, under HB 172, home rule boroughs and home rule cities in the third class borough or in the unorganized borough must provide land use regulation, but need not comply with provisions dealing with land use regulation contained in Title 29. Under existing law, only home rule cities in the third class borough are required to provide land use regulation, but home rule boroughs and home rule cities in the unorganized borough are not prohibited from providing land use regulation. No home rule municipality must comply with provisions contained in Title 29 dealing with land use regulation, with the minor exception of the provisions dealing with state land. The changes in HB 172 do not appear to confer broader authority upon home rule municipalities than they now have in the area of land use regulation, and consequently should not present any special discouragement to the development of energy resources in home rule municipalities.

HB 172 does not appear to expand the authority of the various classes of general law municipalities to provide land use regulation. As in existing law, these must comply with specific provisions regarding land use regulation contained in Title 29. Under AS 29.33.070, first and second class boroughs must provide for planning, platting and zoning. Under secs. 29.35.180(a) and 29..40.010 of HB 172 first and second class boroughs must provide for land use regulation. AS 29.41.010(b) allows third class boroughs to exercise the power of planning, platting and zoning in service areas. Secs. 29.35.220 and 29.35.300(b) of HB 172 provide for exercise of the power of land use regulation by third class boroughs in service areas. AS 29.43.040 authorizes first class cities and second class cities in the unorganized borough or in the third class borough to provide for planning, platting and zoning. Secs. 29.35.250 and 29.35.260 of HB 172 grant the same authority to regulate land use to these cities. HB 172 does not grant the power to regulate land use to any general law municipality that does not have that power under existing law, so, in that respect, does not present additional impediments to development of energy resources.

TBC:ljb
9/039

Sec. 29.40.210. ACTIVITIES AUTHORIZED BY STATE OR FEDERAL AGENCIES. (a) Ordinances, regulations, permit decisions, coastal management or other land use plans adopted or promulgated under AS 29.35.180, AS 29.40 or AS 46.40 may not preclude or otherwise impede a hydrocarbon, mineral or geothermal exploration, development or production activity or project conducted pursuant to a lease, license, permit or other authorization issued by a state or federal regulatory agency or department having jurisdiction over the activity or project.

(b) The provisions of this section apply to home rule and general home rule and general law municipalities.

=Voted down=

CITY OF BETHEL

P.O. Box 388 • Bethel, Alaska 99559

543-2297—Area Code 907

MAR 28 1983

March 10, 1983

Rep. Barbara Lacher
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Representative Lacher:

As presented in the enclosed Resolution #398. the City of Bethel has gone on record fully supporting the adoption of legislation revising and reorganizing Title 29 of the Alaska Statutes.

A great deal of work has gone into this most important piece of legislation; but more importantly, the communities of Alaska need Title 29 revised. Not only does this piece of legislation make the municipal code more understandable, but it also grants to local governments greater flexibility in handling local problems. Bethel's difficulty in moving Home Rule status demonstrates the need for such flexibility in the municipal code statute. At the present time Bethel is a second class city. The community has considered the option of becoming a first class city and assuming the administration of the Bethel school system. However, Bethel is reluctant to do so because first class status is more restrictive than Home Rule. But Bethel is precluded from going directly to the more favorable Home Rule status under the present Title 29 provisions. The flexibility given to local governments under the proposed Title 29 revisions would save Bethel the unneeded expense and time delay now required by Title 29 to achieve its goal of Home Rule.

The City of Bethel requests your full support for the Title 29 revision now before the Legislature in the form of SB 1.

Thank you.

Sincerely,

Lyman Hoffman

Lyman Hoffman
City Manager

MAR 29 1983

RESOLUTION #393

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BETHEL, ALASKA, FULLY SUPPORTING THE ADOPTION OF LEGISLATION REVISING AND REORGANIZING THE MUNICIPAL CODE AS PRESENT IN THE FORM OF SENATE BILL NO. 1.

WHEREAS, the existing Alaska Statute, Title 29, Municipal Government, has been amended numerous times; and

WHEREAS, the revision of the Municipal Government Statute was mandated in 1980 by SCR66 "Directing the Alaska Legislative Council to revise AS 29 (Municipal Government)"; and

WHEREAS, a thirteen (13) member Policy Advisory Group was appointed from the Legislature and various levels of local government to draft a revision of AS 29; and

WHEREAS, the present Senate Bill No. 1 revision represents a simplification of the title's organization and provides for maximum flexibility in the structure and functioning of local government; and

WHEREAS, several drafts and much work at numerous meetings have resulted in this revision; and

WHEREAS, communities across the State of Alaska are awaiting the adoption of this most important piece of legislation,

NOW THEREFORE BE IT RESOLVED that the City Council of Bethel, Alaska, fully supports the adoption of legislation revising and reorganizing the Municipal Code as present in the form of Senate Bill No. 1.

PASSED AND APPROVED THIS 28th DAY OF February, 1983.

John Guinn, Mayor

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

February 8, 1983

Senate Community and
Regional Affairs Committee
Juneau, Alaska

File: Legislature - 1983 - Senate Bill 1

Gentlemen:

Please consider the following recommendations in your deliberations on Senate Bill 1.

On page 42, line 22, insert the phrase "charter or" immediately before the word "ordinance." In at least one community, and possibly others, this matter is dealt with by a charter provision rather than by ordinance.

On page 56, beginning at line 25, I suggest that lines 25 through 29 be deleted along with the reference to this section under the home rule laundry list at line 17 on page 23. Alaska Statute 36.25.025 applies to all municipalities whether home rule or general law. If a home rule municipality wishes to exempt its contractors from those provisions it must do so in accordance with the procedures set out in AS 36.25.025. Those procedures clearly specify the use of an ordinance to establish the exemption.

Page 76, line 17. Although this is the language used in the present law, I think it is inartful. Municipalities do not exercise the right of eminent domain merely to determine fair market value. Eminent domain is used to acquire property. The determination of fair market value is merely one of the incidences of acquiring property through the use of eminent domain. I suggest the phrase "determine fair market value" which starts in line 16 be deleted and replaced with the phrase "acquire the certificate, equipment and facilities of the carrier, or that portion of the certificate that would be affected".

Page 78, beginning at line 25 and extending through line 8 on page 80. I think this entire section is unneeded. The authority for a municipality to enter into a joint agreement for the exercise of one of its powers or functions with other municipalities, the state and the federal government is found in Section 13 of Article 10 of the Alaska Constitution. The subject section in the Bill just provides unnecessary details. It is my recollection that this section was included in the revision because it was adopted either while the Title 29 Revision Committee was revising Title 29 or shortly after the committee produced its revision. It was incorporated in the revision without substantive review. We do not have provisions in the code detailing the procedures for entering into joint

agreements with the Forest Service for fire protection of rural properties of mutual concern, or for joint state, federal, and local drug enforcement operations or for a host of other municipal functions which are exercised jointly or in cooperation with state or federal agencies or other municipalities. I strongly suggest that this section be eliminated as it is not only superfluous, but its existence may lead courts to two unfortunate conclusions; first, that the only way municipalities may engage in a cooperative or joint emergency service communication center is as provided in the subject section; and second that inasmuch as the legislature went to great pains to detail the procedures and structures for joint operation of emergency communication centers, other similar joint operations must have specific and detailed legislative authorization. It was for these types of reasons that the technical committee for the Title 29 revision recommended striking or generalizing such detailed procedures found in the present Title 29. If there is some feeling that striking this section would jeopardize the authority of municipalities to enter into such arrangements, I suggest the section be struck and replaced with a new section under the general powers portion of the Bill which would authorize a municipality to enter into an agreement or association, including membership in a corporation, with any other municipality, the state, or federal agencies, for the purpose of exercising any power or function of the municipality. 29.35.010(13)

Page 96, beginning at line 5. Subsection (c) of this section makes subsections (a) and (b) applicable to all home rule municipalities. Actually, there appears to be little need to have this apply to any home rule municipality; however, because subsection (a) deals with the different disposition of a vacated public square depending on whether the square is within a city or outside a city but within the borough, it may be appropriate to make subsection (a) applicable only to home rule boroughs and general law municipalities. In addition, the last sentence of subsection (a) which begins in line 17 could lead to some very awkward situations. If, in the original plat, a lot is dedicated as a holding area for storm waters, or as a park or for some other non-street use and is later vacated because the lot is no longer needed for that purpose it may be very difficult to determine who is the "rightful" owner; and if this "rightful" owner is someone other than the abutting property owners, it may be impossible to locate the owner. I suggest deletion of the sentence which begins on line 17, and in line 14, just before the word "public" the insertion of the phrase "lot or".

Page 105, beginning at line 7. I don't think that the definition of "developed" clarifies anything. For example, when a native corporation subdivides some of its property and puts in roads and

utilities, that would seem to be "developed" under the common use of that word; however, this definition casts serious doubts as to whether such land would be developed for tax purposes. Lines 19 and 20 establish a situation which is contrary to the subdivision laws and will create problems if there is a tax foreclosure on non-exempt land. Unless I read this part of the section incorrectly, its intent is to limit the loss of the exemption to only that portion of the parcel which is developed. That is, if the corporation owns a U.S. Survey consisting of 25 acres and it develops three acres of that parcel with an industrial park, only the three acres would be taxable. The problem this approach creates is that if the municipality forecloses on the property it must foreclose on the parcel of record; that is, the 25 acre parcel and not some lesser parcel. If it were to foreclose on a parcel other than a parcel of record, the foreclosure proceeding would have the effect of subdividing the property without going through the platting procedure. Therefore, I suggest that the language relating to the loss of the exemption to the smallest practicable tract be deleted. The corporation may protect its remaining property by subdividing the parcel into two lots; one which will be developed and will lose its exemption, and one which will not be developed. This will protect the undeveloped property.

Page 106, beginning at line 1. I suggest you consider deleting this section (n) as municipalities are already going to have a difficult enough time determining <u>when</u> an exempt property is "developed." To foist on it the burden of also determining if the property has subsequently become "undeveloped" is merely adding more situations for conflict between the municipality and certain of its property owners. Once property becomes taxable because it is put to productive use, is there any real reason it should not remain taxable even though the productive use may cease?

Page 107, lines 24 through 28. I believe this section should be rewritten to eliminate the now superfluous reference to excluding personal property from taxation as this is now included as a specific power for all municipalities in line 22 above. I also believe the reference to extending the redemption period should be deleted as it has nothing to do with exemptions. It also appears that this language contemplates some sort of system of partial redemption of property. If you believe this is an appropriate option for municipalities, I suggest that it should be placed in the section of this chapter which deals with foreclosure and redemption.

Page 109, beginning at line 19. You may want to consider whether to leave greenhouses under this section. Exempting greenhouses does not fit at all with the policy or purpose of the special

procedure used to determine the value of farm or agricultural land for tax purposes. That purpose is to assist the owner of farm or agricultural land in resisting the pressures of urban growth so that he or she can afford to continue farming rather than being forced to subdivide farm land because of inflated land values. Note that only the farm land receives the special treatment, not improvements to the land such as barns, sheds, irrigation systems, etc. However, with greenhouses, the greenhouse, that is the improvement, also receives the special valuation. The effect of the addition of greenhouses to the existing farm land section results in special tax treatment for commercial greenhouses which raise dieffenbachia and cactus to be sold for use in hotel and office lobbies and to adorn file cabinets and kitchen windows. It has been my understanding that the special tax treatment for farm land was to help the industry which provides us with food to keep the price of this basic need to a minimum. Extending such special treatment to greenhouses which exist for the purpose of raising ornamental plants does not seem to fall within this lofty purpose. I believe the committee should consider incorporating the existing Title 29 language in this section by deleting the changes that were made to incorporate greenhouses.

In packet.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

BOROUGH ATTORNEY'S OFFICE

April 6, 1983

file w/ Bill

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: HB 172 "DEVELOPED" DEFINITION

The present version of HB 172 provides for a tax exemption as required by 43 U.S.C. 16.20(d) for certain Native lands. This exemption provides a definition of "developed" for implementing the federal law. I recommend that this matter be treated in a separate bill rather than in HB 172 or SB 1, the parallel bills intended as housekeeping measures to revamp Title 29.

During the last legislative session certain amendments were made to the Title 29 bill on the House floor which caused a great deal of controversy. In re-introducing the Title 29 in the present legislature, all of these amendments were removed except for the provisions for implementing the tax exemptions under 43 U.S.C. 16.20(d). This amendment was incorporated in AS 29.45.030 of the bill.

Pursuant to federal law, certain Native lands are not taxable until "developed". The intent of the proposed definition in AS 29.45.030 is to clarify what improvements of land will constitute "development" for tax exemption status.

I believe that the intent of this section is to assure that lands will not be taxed simply because an access road is constructed to the property or improvements are placed on the property in anticipation of future development. However, the language is sufficiently ambiguous to permit the interpretation that even a regular, residential or commercial subdivision development would not be taxable until the lots were sold. Once land is subdivided, roads are constructed and other improvements are put in place, the available lots become the sale inventory of the real estate developer. An exemption from taxation of these lots would give the exempted developer an unfair advantage over other developers with which it was in competition.

Because this provision is not in existing Title 29 and because there is potential controversy involved, I recommend that

it not be included in HB 172, a housekeeping bill. As a separate bill, I believe that the Borough would support a definition between a taxable subdivision development and tax exempt lands which have been surveyed and have constructed roads.

Sincerely,

Steven H. Morrissett
Borough Attorney

FROM: Don Thomas, Assessor

SUBJECT: Native Lands, Title 29 Revisions – Sec M #1 Lines 28 + 29 page 100 ~ 101

By the definition included in the work draft of Title 29 the Kenai Peninsula Borough would loose approximately 13.9 Million in assessed valuation. This would equal about $41,727 based on a 3 mill average.

This would also put the Native lands in a better position to develope and compete in the open market, if they wished. They could do all the preliminary work, such as roads, utilities, survey, and hold the property for the highest return, and still not pay taxes. – this would only apply to native lands purchased by someone other than the Native Corp. as well as the Boro.
We currently have 13.9 million in assessed value that the different regions have been paying taxes on. We have had them on the tax rolls for 4 or 5 years and they paid their taxes without paying under protest.

Cook Inlet	7,281,205
Ninilchik	924,950
Seldovia Native	2,882,300
Slamatoff	589,500
English Bay	2,708,800
Port Graham	1,068,000
Total	15,454,755

Also when 20 years are up & Native lands would become taxable on the tax rolls – they they would be Exempt, at a tremendous loss to the Boro – taxed until sold

RE: House Bill 172 amendment 6

The attached letter of intent and proposed language for implementation was prepared during hearings of SB 1, comparison legislation to HB 172.

Present law requires first class and home rule cities in the unorganized borough to accept the responsibility for delivery of Educational services. It is perceived that the requirement to be responsible for educational services may be a deterrant to certain cities or areas to organizing or upgrading to first class or home rule status. The opposition for a city to assume the educational powers could come either from an existing REAA or the city

The proposed change to HB 172 would resolve the issue of the assumption of education powers by vote of the residents in the city and in the REAA.

RE: House Bill 172 amendment 7

During Committee review of HB 172 there was discussion but no apparent concensus concerning the exemption of greenhouses from assessement at full valuation for taxation purposes (Page 109, line 22).

The existing law does not give special treatment for greenhouses. The intent of providing special tax treatment for farm lands (not including barns, houses, sheds, etc.) was to assist the farmer in resisting the pressures of urban growth rather than being forced to subdivide farm land because of inflated land values. The effect of the new language is to provide a special tax treatment for greenhouses, including commercial greenhouses raising ornimental flowers.

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "developed" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation.

RE: House Bill 172 proposed amendment number 9

The attached amendment proposed by representatives of utility companies is a significant change from present law.

The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is also subject to regulation by the Alaska Public Utilities Commission. Stated in another way, if the Alaska Public Utilities Commission does not or can not regulate a utility or a matter pertaining to a utility, then a municipality may not impose a regulation.

Present law provides municipalities the power to regulate utilities and matters pertaining to utility services to the extent the utilities are not regulated by the Alaska Public Utility Commission.

In several instances, the regulation of a condition of service by a utility company, or the regulation of a utility company is optional for the Public Utilities Commission, or optional for the utility.

In cases where utilities are not regulated by the Alaska Public Utilities Commission, Municipalities generally feel they need to have the authority to exercise regulatory powers. On the other hand, utility companies believe that; if the Alaska Public Utility Commission does not regulate them, then the municipalities should not have the authority to provide regulation.

Sec. 29.40.210. ACTIVITIES AUTHORIZED BY STATE OR FEDERAL AGENCIES. (a) Ordinances, regulations, permit decisions, coastal management or other land use plans adopted or promulgated under AS 29.35.180, AS 29.40 or AS 46.40 may not preclude or otherwise impede a hydrocarbon, mineral or geothermal exploration, development or production activity or project conducted pursuant to a lease, license, permit or other authorization issued by a state or federal regulatory agency or department having jurisdiction over the activity or project.

(b) The provisions of this section apply to home rule and general home rule and general law municipalities.

PROPOSED AMENDMENT TO

HB 172

Page 33, after line 28, insert:

"(26) AS 29.35.060 (franchise and permits)"
Renumber following paragraphs accordingly.

Page 33, after line 29, insert:

"utility services,"

Page 77, after line 6 add a new subsection to read:

"(c) This section applies to home rule and general law municipalities."

Page 77, lines 7 through 22, delete present language and replace it with the following:

"Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly for the area outside all cities in the borough and the council acting for the area in a city may regulate a utility service and fix, establish, and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except to the extent

(1) the utility is subject to regulation under AS 42.05; or

(2) municipal regulation is prohibited by AS 42.05.711(k) or other law.

(b) A municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

(d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing

rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

(e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees for or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

(f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

(g) This section applies to home rule and general law municipalities."

Page 195, after line 22, add a new section to read:

"* Sec. 62. AS 42.05.711 is amended by adding a new subsection to read:

(k) A public utility that is exempt or partially exempt under (d) through (j) of this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a muncipality."

Bob Harris
House Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

FILE: HB 172

SUBJECT: Substitute Utility Language
for Title 29 Revision

Dear Bob:

If the House Community and Regional Affairs Committee would like to consider alternative language to that which has been proposed for the utilities section of the Title 29 revision, may I suggest the following. This language, I believe, accommodates the interests of the municipalities and of the utilities. It would exempt from municipal regulation those utilities, including co-ops, which have elected to exempt themselves from APUC regulation by a vote of the subscribers or members. It would also exempt from municipal regulation those small electric, telephone and garbage utilities which are presently exempt from APUC regulation but which may come under APUC regulation if 25% of the subscribers petition the commission for regulation. In addition, it would exempt from municipal regulation those utilities which the APUC itself exempts upon a finding of no legitimate public interest in regulation if the commission also finds that the utility should also be exempt from municipal regulation. If cable TV is given an exemption from APUC regulation, and the legislature believes that it should also be exempt from municipal regulation, a simple amendment to the following language making reference to the statute exempting cable TV would extend the exemption to municipal regulation of cable TV also. The substitute language would be as follows:

> AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).
>
> (b) A municipality may not regulate a utility
>
> (1) to the extent it is subject to regulation under AS 42.05; or

(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

1984 DRAFT POLICY STATEMENT

Following is the 1984 draft policy statement prepared by the Alaska Municipal League Legislative Committee and Board of Directors at their summer meetings. Please review it in preparation for the policy section meetings that will be held on Wednesday afternoon and all day Thursday at the Annual Local Government Conference to be held in Juneau, November 2-5, 1983. Changes, additions, and deletions will be made at that time, to be voted on by all the delegates at the business meeting on Saturday, November 5.

PART I
TAXATION AND FINANCE

A. LOCAL TAX RELIEF

The League supports state-funded relief for local taxpayers where such relief does not reduce the tax base or the tax-levying authority of the municipality and does not adversely affect the marketability of municipal bonds.

B. STATE ASSISTANCE IN FINANCING LOCAL GOVERNMENT

1. Funding Legislation Passed in Timely Manner: In order to assist local governments in financial planning, the League urges the Governor and the Legislature to pass the necessary funding legislation for state revenue sharing and local school funding in sufficient time for municipalities to incorporate the additional revenues in the annual budgets. The League also urges the Governor and the Legislature to pass the necessary funding legislation for on-going, state-funded grant and contract programs to local governments in sufficient time to maintain an orderly continuation of operations, but in no case later than June 1 of each year. The League further advocates that if such funding legislation is not approved by that date, that the Legislature authorize funding and disbursement of the on-going programs for the first quarter of the year.

2. Administration of Grants & Entitlements: The League supports legislation eliminating delay, administrative regulations, and complexity associated with administration of municipal entitlements and grants programs by state departments and agencies. Administration of grants and entitlements should, when possible, be consolidated in a single state department. The League further supports elimination of administration fees deducted by state departments administering the grants.

3. Pass-Through Funds and Grants: The League encourages the Legislature to adopt policies for pass-through funds to non-profit corporations that do not cause any present or future liabilities to the municipality.

4. Population Determination and Impact: The League supports following federal census practices for determination of population based on residency and encourages the Legislature and Governor to recognize the need for a comprehensive policy to alleviate the social and economic impact of major development on municipalities by state funding from funds appropriated separately from revenue sharing and municipal assistance funding.

C. MUNICIPAL ASSISTANCE/REVENUE SHARING PROGRAMS

1. Consolidation of Municipal Assistance and State Revenue Sharing Programs: The League endorses the consolidation of the current Municipal Assistance and State Revenue Sharing Programs together with the funding of the consolidated program at a level of at least 8% of the prior year's state operating budget so that municipalities can continue to provide important, needed services while holding down taxes.

2. State Revenue Sharing: (a) If the Legislature does not consolidate the current State Revenue Sharing and Municipal Assistance programs, the League supports annual increases in the State Revenue Sharing Program. The annual appropriation by the Legislature to the State Revenue Sharing Program should include an increase of the FY 84 legislative appropriation based on such criteria as state population, inflation, cost of local government services, and other timely considerations.

(b) In those cases where legislation is approved increasing the state revenue sharing entitlement for specific recipients or for a specific purpose, the League advocates that the total funding for state revenue sharing be increased accordingly in order to preclude the dilution of funding to other recipients.

(c) The League supports an increase in the state revenue sharing minimum allocation to $100,000 for each city and $50,000 for each eligible unincorporated community.

(d) The League supports continued full state funding for road maintenance at levels determined by the First Session of the 11th State Legislature and adjusted annually to reflect increased cost of maintenance.

3. Municipal Assistance: (a) If the Legislature does not consolidate the current State Revenue Sharing and Municipal Assistance Programs, the League supports the funding of the FY 85 entitlement at the statutory level of at least 30% of the FY 84 corporate income tax proceeds.

(b) The League further endorses a change to the existing Municipal Assistance Program that would provide for the disbursement of municipal assistance funds to all municipalities on February 1 of each year.

4. FY 84 Supplemental Appropriation: The League supports the supplemental appropriation of $10.5 million FY 84 Municipal Assistance revenues to fully fund the entitlement at the level authorized by state statutes. The League further encourages the Legislature to appropriate and the Governor to approve this supplemental appropriation by April 15, 1984 so that local governments can use the additional funding in setting their 1984 mill levies.

D. OTHER STATE ASSISTANCE PROGRAMS

1. Permanent Endowment For Local Government: The League encourages legislation to place on the 1984 ballot a constitutional amendment to establish a permanent endowment for local governments. The purpose of the endowment would be to establish a predictable source of income to fund the programs of state assistance to municipalities. Criteria for developing any permanent endowment and allocation of income approach should include equity, predictability, and maximum local control.

2. State-Collected, Locally Shared Taxes: Municipalities in Alaska presently derive significant revenues from state-collected, locally shared taxes to help meet their basic operating expenses. The League, therefore, opposes reduction of such revenues through elimination of such taxes unless other equal sources of revenue are made available to local governments, or appropriations to compensate for lost revenues are made by the state.

3. Funding of Local Capital Projects: The League supports the establishment by statute of a "block grant" approach to the state funding of local capital projects in order to allow the decisions regarding local capital project priorities to be made at the local level.

E. LOCAL TAXES

1. State-Mandated Exemptions: The League opposes the imposition of state-mandated exemption of certain classes of property, individuals, organizations, or commodities from the application of taxes unless adequate compensation is made by the state to reimburse local governments for revenues lost due to these exemptions.

2. Payments-in-Lieu: The League endorses the position whereby the state would pay to the local governments a payment-in-lieu of ad valorum taxes for the state-owned property as well as payments for its share of the cost of improvements and services which specially benefit such property.

3. Right To Tax: The League opposes any further effort on the part of the state to levy a property tax which would infringe upon the rights of local governments to levy the same rate of tax as levied on other property within the taxing jurisdiction.

4. Personal Property: The League supports legislation which would provide for the optional exemption or a partial exemption of personal property.

5. Interest Rate Limit: The League supports legislation to remove the limits established in Title 29, the Municipal Code on the penalty and interest rate for deliquent property and sales tax payments and allow municipalities to set their own rates.

6. Waiver of Tax Collection: The League endorses legislation to permit the waiver of collection of taxes when collection costs exceed taxes due.

F. FORMATION OF NEW MUNICIPALITIES

The League supports legislation to provide adequate funds to assist in the study of the feasibility of forming new municipalities and in the formation of newly organized municipalities.

G. PUBLIC EMPLOYEES RETIREMENT

The League urges that in any legislation passed which increases benefits under the Public Employees Retirement System and Teachers Retirement System, the increased cost be borne by contributions from the employees. The League urges the Legislature to recognize the effect on participating municipal employers if any amendments are made to PERS and TRS.

.. LOCAL HOSPITAL USE

1. Utilization of Local Health Facilities: The League urges the state and federal agencies responsible for health care to utilize the local health facilities and to transport patients to regional centers only when necessary services are not available.

2. Increased State Funding: The League strongly supports increased state funding of hospital construction costs and of special hospital and health facility construction and operating costs.

3. Separate Funding For Hospitals: The League strongly supports funding of hospital and health facility grants outside the municipal revenue sharing program.

4. Funding for Air Ambulance Services: The League supports a program to cover the cost of transporting patients to regional health care facilities for treatment in a medical emergency.

I. FISCAL NOTES/STATE MANDATES

1. Fiscal Notes: The League supports enactment of legislation requiring preparation of notes assessing the fiscal impact on local government of any proposed bill or regulation, including pass-through grants.

2. State Mandates: The League urges passage of legislation which would require the state to reimburse municipalities for costs they incur in programs or activities mandated by the State of Alaska.

PART II
EDUCATION

A. SCHOOL SUPPORT

1. Permanent Endowment: The League supports the concept of a permanent endowment for funding public school education. The income from this endowment would be made available for use for public school education expenses and/or capital programs.

2. Funding for Schools: The Constitution of Alaska is very specific in its requirement that education is the responsibility of the state. Therefore, the League urges the Legislature to modify the foundation program formula to reflect the actual cost of public school education with awareness toward the different funding needs of public education in the rural and urban areas including special education, student transportation (including kindergarten, inclement weather, and hazardous bus routes), and community schools. Full funding should not be used as a reason for the state to infringe upon the rights of local people to supplement the foundation formula or to administer local schools.

3. Funding for School Construction: The League urges the Legislature to support school capital projects at full construction level (as defined by the rules and regulations established by the Department of Education), and calls upon the Legislature and Governor to fund this amount annually. The League also supports legislation under which the state will provide funding for all approved school capital projects to the local district at the time of approval, including value of land provided by municipalities for school sites. The League also urges the Legislature to assume the total state approved school capital indebtedness incurred by municipalities.

4. Funding of State Programs: The League recommends that the Legislature fully fund all special programs required by state law.

5. Education Program on Abuse: The League recommends passage of legislation that funds educational programs in the area of substance and person abuse, including staff training, with such programs to be optional by each school district.

6. PSFP Unit Value: The League strongly urges the Legislature to resume the policy establishing the amount of the public school foundation support unit value two years in advance.

7. Bilingual Programs: The League recommends that the Legislature continue to provide funding for multi-cultural programs and for bilingual programs to assist those for whom English is not their first language.

8. Rural BIA Schools: The League urges the Legislature and the Office of the Governor to continue considering the impact of the transfer of BIA schools in rural areas of the state and taking the leadership in acquiring the funds needed to bring these facilities up to state standards.

9. Reclassification Guidelines: The League urges the Legislature to set up guidelines to assist communities considering municipal reclassification with the educational system aspects of

the transfer, to include, but not be limited to, feasibility studies, transfer of funds and control, transfer of assets, and resolution of disputes.

B. ASSEMBLY/COUNCIL-SCHOOL BOARD RELATIONSHIPS

The League supports legislation to clarify assembly/council-school board relationships and opposes legislation which would diminish assembly/council authority in education matters.

C. PUBLIC COMMUNICATIONS

1. Education by Satellite: The League encourages state and federal governments to improve satellite communication facilities for education in the state. The telecommunications system should provide a harmonious balance of instruction for student-teacher interaction.

2. Televising of Legislative Sessions: The League urges full funding of the limited televising of legislative sessions to assure that the general public has the greatest access possible, not only to floor sessions, but also to major committee hearings and teleconferencing, but not to interfere with the normal state satellite program.

PART III
PUBLIC SAFETY

A. ALCOHOL/DRUGS

1. Public Intoxication: The League supports legislation which would amend the State Alcoholism Act to include public intoxication as an offense so as to provide the court with alcoholism treatment as an alternative to incarceration in order to provide a measure of control in the initial phase of rehabilitation and, additionally, to streamline the process of involuntary commitment within the State Alcoholism Act.

2. Alcohol & Substance Abuse and Domestic Violence: The League recognizes the serious individual and public safety problems that exist in all communities in Alaska as a result of alcohol and substance abuse and domestic violence. It supports the enforcement of the Domestic Violence sections of Title 9, Code of Civil Procedure (AS 09.55.600 - AS 09.55.640) in all parts of the state as a public safety priority. It further supports financial support for shelters and programs within communities to meet the needs of victims. The League further supports the establishment and utilization of mandatory rehabilitation programs for offenders in domestic violence cases as an alternative to incarceration.

3. Drug Enforcement Units: Recognizing the state-wide and interstate nature of narcotic and dangerous drug traffic, the League recommends full state support of state-wide and metropolitan drug enforcement units.

B. PUBLIC SAFETY TRAINING

1. Local Safety Training: The demand for trained competent local police and fire departments is accelerating throughout Alaska. The League urges the Legislature to assure that full-time and volunteer police, fire, and emergency medical personnel throughout the state have access to adequate facilities and program resources for training of local safety people and to provide financial support to assist the communities who participate.

2. Public Fire Education and Arson Investigation: The League urges the state to establish a comprehensive public fire education program and a comprehensive statewide arson investigation

program, through the state fire marshall's office, that will utilize professionally trained fire educators.

3. Village Public Safety: The League supports the Village Public Safety Officer Program to include all village communities in Alaska. The League further supports the continuation and expansion of the VPSO Program, which constitutes the only access to law and order available within small rural communities. The League urges the Legislature to ascertain that adequate funding continues to be made available to provide for the salaries, support, and training of these officers.

C. COURT SYSTEM

1. Use of TV Capacity: The League encourages the Court System to make maximum use of TV capacity for arraignment, grand jury, and similar court functions to release the burden on highly trained public safety personnel.

2. Judicial Presence: The League supports the funding of a judicial system that would assure the presence of a judicial officer in each community in the state when the need arises.

D. STATE ASSISTANCE PROGRAMS

1. Police Standards Council: The League supports full state funding for the Alaska Police Standards Council to provide the training necessary for municipal police officers to meet the requirements of the Police Standards Act and recommends increased funding to the Council for specialized police training programs.

2. Detention Costs: The League recommends that costs associated with prisoner care and prisoner transportation be borne by the state. When a municipal police officer makes an arrest for a violation of either a state or municipal law, the state should assume the legal and financial responsibility for the prisoner as soon as the prisoner is presented to a magistrate or a correctional facility.

3. Civil Defense: The League supports full state and federal funding of civil defense and emergency preparedness activities, particularly in regards to emergency communications, medical and food supplies.

4. Fire Fighting Equipment: The League supports full funding for basic fire fighting equipment which meets minimum Insurance Services Office (ISO) or state criteria for small Alaska cities and fire service districts.

E. CORRECTIONS FACILITIES

1. Short Term Detention: Recognizing that corrections is a state function, the League urges the state to fund the construction and operation of short-term detention facilities within local communities, or pay the cost of construction of new facilities to local communities and contract with local communities for the care of prisoners.

2. Long-Term Maximum Security: Recognizing that the determinate sentencing provisions of the State Crime Code will increase the volume of long-term state prisoners and the fact that the Federal Correctional System which currently houses this state's long-term prisoners has reduced its level of prisoner acceptance from the state, the League urges the immediate funding and construction of a long-term maximum security correctional facility within the state.

F. ANIMAL CONTROL

The League requests an amendment to Prohibited Use of Decompression Chambers sections of Title 3, Agriculture and Animals (AS 03.60.005) to state that the use of decompression chambers shall be regulated by the Department of Environmental Conservation. DEC regulations shall contain all the information necessary to ensure the humane disposal of animals.

PART IV
LAND USE

A. LOCAL OPTIONS

The League feels strongly that laws pertaining to the powers of local planning and zoning must allow for the greatest flexibility at the local level.

B. LAND SELECTION

1. Easements: The League urges modification of state statutes which encourage the undesirable practice of blanketing all waterways within municipal selections with reservations for public easements and unnecessariiy encumbering patents with undefined easements. The League, however, supports the policy of preserving needed specific rights-of-way and easements which provide for present and future public access.

2. Conveyance and Land Use: The League urges (A) immediate conveyance of native and state lands presently identified and jointly agreed upon for selection, and (B) the state move expeditiously to convey lands to municipalities with the least amount of encumbrance and restrictions. The League encourages (C) funding of a cooperative intergovernmental land use planning commission to expedite land conveyance that considers municipal, state, and federal lands affected by the land selection process.

related

3. Energy Project Sites and ^Rights-of-Way: The League urges the state selection of potential hydroelectric and alternative energy project sites by providing headwater rights, sites for dam sites, corridors for water and electric transmission lines, power houses, associated substations, and all attendant facilities. ~~The league further supports the preservation of rights-of-way across all land selected and classified for the purpose of providing for future construction of public access of various types.~~

4. Fish Ladder and Hatchery Sites: The League urges that potential fish ladder ^and fish hatchery sites be selected by the state. The sites would be those identified by the FRED division of ADF&G and aquaculture organizations, formally organized within the State of Alaska.

5.

^ = add stream enhancement

C. HISTORIC AND RECREATION SITES

1. Monuments & Hiscoric Sites: In order to help municipalities to retain as much as possible of Alaska's colorful and historic past, the League supports continuation of a state matching grant program and funding for acquisition, maintenance, and rehabilitation of monuments, historic sites, and rights-of-way.

2. Outdoor Recreation Sites: In order to help municipalities to provide local outdoor recreation sites, the League supports the establishment of a state matching grant program to be used to assist in the cost of projects initiated by communities to acquire, develop, or extend local outdoor recreation sites and facilities.

5. Support legislation this session to allow State to retain land with proven native allotments to BLM for adjudication & conveyance to rightful owners.

3. Recreational Opportunities: Since many of Alaska's citizens recreate outside of local government jurisdictions in which they reside, the League urges the state to exercise its responsibility to provide a broad spectrum of recreation opportunities for all Alaskans. The League strongly supports adequate funding for improved development and maintenance of accessible parks, recreation areas, and trails.

D. COASTAL MANAGEMENT

1. Local Control: The League supports continued and maximum local control in the development, management and implementation of coastal planning and policies.

2. Extra-Territorial Planning: The League supports the concept of "extra-territorial" planning by municipalities in the unorganized borough with statutory provisions to permit the Alaska Coastal Policy Council to adopt the "extra-territorial" planning as part of the Alaska Coastal Management Program, provided that the planning process allows for participation and comment by all affected private and quasi-public parties and is mutually agreed on by affected local governments, until such time as a resource district plan is adopted.

3. Agency Review of Local District Programs: All state and federal agency comments and recommendations must be made expeditiously by these agencies prior to local government conceptual approval of the district plan.

4. Coastal Leasing: The League discourages the state from pursuing oil, gas, tideland, or mineral leasing activity in a coastal area until a local coastal management plan is in effect or the deadlines for establishment of that plan have expired.

5. Financial Support: The League encourages state financial support of the Alaska Coastal Management Program.

E. SUBDIVISIONS

1. Proof of Approval: Subdivision of land is a major factor in community development, creating patterns which have long lasting effects. Although present legislation clearly recognizes the need for regulation of subdivisions, means of enforcement are inadequate. The League supports legislation which would require proof of approval by local authorities prior to the filing of an instrument, including those filed by the state, which would change the boundaries of land and prior to any judicial partition of real property.

2. Compliance with Local Ordinances: The League urges passage of legislation which requires the State of Alaska to comply with all local subdivision ordinances and regulations in connection with state land disposal programs. The state should meet the same local requirements imposed on private citizens.

F. STATE LAND DISPOSAL

1. Improvement Funding: Recognizing the pressure on both state and municipal governments to dispose of land, the League supports a cooperative effort by the state and municipalities to dispose of land in a continuous and orderly manner. The League also supports state funding to provide planning grants, funds for necessary access roads, survey costs for land scheduled for disposal, and state, borough and city subdivision roads, sewers and utilities to meet local subdivision improvement ordinances.

2. Mandated Programs: The League continues to oppose any state mandated program regarding disposal of municipal selected land relative to timing, size, or use.

3. Compliance with Municipal Planning: The League supports state legislation or administration policy which would require state land disposals to recognize local planning efforts, such as comprehensive plans and coastal management plans, including existing or planned municipally approved trails, by means of right-of-way dedication.

PART V
TRANSPORTATION, DOCKS, AND PORTS

A. TRANSPORTATION PLANNING

1. DOT/PF Reorganization: The League supports the further regionalization and localization, where appropriate, of the Department of Transportation and Public Facilities to increase local knowledge and efficiency of the department.

2. Rights-of-Way: With the difficulty in acquiring public rights-of-way throughout the state, primarily due to different land classification and ownerships, the League supports the identification of adequate corridors for construction for public access through such lands and early acquisition of adequate rights-of-way.

3. Transportation Systems: (a) The League continues to support state planning for a state transportation system comprised of marine and land highway components. This system would embody: (1) shorter ferry runs between communities with extensions to the land highway system and by the utilization of high speed ferries and end-loading vessels with more frequent ferry service with minimal on-board facilities for passengers, and (2) transportation of freight by surface, water, and air and to include specific provisions addressing the needs of individual communities for docks, dredging, and riverbank stabilization, with priority consideration to communities not connected to the state's highway or rail system.

(b) The League urges the review of all transportation resources within a community in the development and support of transit programs to meet local mobility needs.

4. Ports and Harbors: Since Alaska's economy depends heavily upon ocean and inland water shipping, fishing, and other marine travel, the League finds the existing port and harbor grant programs to be inadequately funded and urges expansion of these programs. Major port and harbor facility plans should be prepared and developed consonant with the municipalities' plans.

B. SURFACE TRANSPORTATION

1. Railroad System: The League supports efforts towards an expanded and improved railroad system to better serve all areas of Alaska, including, but not limited to, extension to additional tide-water ports, and to link the State of Alaska with Canadian rail facilities. The League supports the transfer of the Alaska Railroad, including all present and future needed rights-of-way.

2. Highways and Trails: a. The League supports implementation of a scheduled maintenance program encompassing the entire Alaska primary road system.

b. Since the Alaska economy depends on the existence of transportation routes, the League supports the continued use and expansion of the state highways and trails systems. In view of the increased use of bicycles, the League urges that new state roads and state road construction, whenever feasible, have provisions for safe use by bicyclists and pedestrians.

c. The League urges that a program of permanent trail marking be established and funded by the state.

C. AIR TRANSPORTATION

1. Construction Assistance: The League supports an equitable approach to state construction assistance for all airports and supports the concept of continued expansions and upgrading of airports, airport facilities, and air navigational aids in Alaska. The League urges the state to provide increased levels of funding to provide for these facilities.

2. Maintenance: The League supports the adequate funding and maintenance of airports, including dust control measures when appropriate.

3. Air Service: The League strongly recommends the State of Alaska maintain the level of essential air service established in the deregulation act for Alaska communities to maintain the provision that allows these communities to be served by large (jet) aircraft.

4. Land Transfer: The League supports transfer to municipalities of federal and state lands to provide for needed construction and expansion of municipal airport facilities and operations.

D. MARINE TRANSPORTATION

1. Citizens Advisory Committee: The League supports creation of a marine highway citizen's advisory committee to develop an action plan for correcting maintenance, scheduling, reservations, and personnel attitude problems and for implementing a program of major and minor in-state ferry maintenance.

2. Expansion of the Alaska Marine Highway: With the ongoing development of natural resources in Alaska, the League supports legislation which will expand the Alaska Marine Highway to Western Alaska and improve transportation to tie the Central Alaska ports in with the Aleutian Alaskan ports, and further supports the expeditious procurement of a number of appropriate ocean going vessels to accomplish the expansion of the Alaska Marine Highway System.

3. Efficiencies in Operation: The League supports efforts to provide efficiencies in the operation of the Alaska Marine Highway System providing these efficiencies are based on publicly available economic and technical data. However, the League strongly objects to any reduction in existing marine highway systems and strongly urges community input be required prior to establishing marine highway rates, schedules, and operational changes, and requests public input for studies affecting the operation of the Alaska Marine Highway System be solicited on a state-wide basis.

4. Jones Act: The League urges the state join in requesting modification of the Jones Act limits on the time permitted and number of port calls in Alaska by foreign bottom ships.

5. Shipping Corridors: The League requests that the State of Alaska support mandatory shipping corridors within Alaska waters whenever local communities request such mandatory shipping corridors.

6. Acquisition: The League supports transfer to municipalities of federal and state lands to provide for needed expansion of municipal port facilities and operations.

PART VI
UTILITIES

A. STATE REGULATION

1. Grants and Loans for Services: The League supports continued funding which would make available to the various essential utilities in the State of Alaska direct grants and/or low interest loans in order that they may meet the needs of the citizens served by the utilities.

2. APUC: The League supports the current statutory exemptions which allow municipal utilities to operate in the best interest of the consumer public without regulation by the APUC.

3. Grants and Loans for Energy Sources: The League supports the concept of direct grants and low interest loans from state funds for the construction of conventional and alternative energy sources, including fossil, hydroelectric, geothermal, wind power, and other means, and for the exploration of alternative energy sources, in order that rates paid by the Alaska consumer for these necessary services may be set at a reasonable level.

4. Acquisition: In order to eliminate service area conflicts between municipalities and utilities, the League supports legislation which would allow municipalities to acquire the facilities of a utility under specific terms which would fairly compensate the utility.

5. Utility Relocation Costs: The League opposes any effort to shift to municipalities the cost of all non-municipal utility relocation within existing rights-of-ways associated with municipal street work.

B. WATER, SEWER, AND SOLID WASTE

1. Clean Water Act: Amendments were passed by the US Congress to allow exemption to the Clean Water Act with respect to sewage disposal in marine waters with sufficient fluctuation. The League opposes any federal regulation for implementing Section 301(h) of the Clean Water Act which would unduly burden the Alaska community in receiving these exemptions.

2. Construction Grant Program: The League strongly endorses the concept of the state paying at least 75% for sewage, solid waste facilities, and water systems constructed by municipalities under the State of Alaska Construction Grant Program and that the replacement of out-moded systems be grant eligible in the same manner as the installation of new systems. The League strongly supports appropriation levels to meet statewide needs.

3. General Fund Support: The League endorses an amendment to federal law which would allow general fund support from the State of Alaska and municipalities for operation of sewage treatment facilities.

4. Rural Facilities: The League strongly urges the state, through the Department of Environmental Conservation, to assess the needs of rural communities and service districts for adequate and appropriate water treatment and waste disposal facilities, including the need for operator training and assistance with facility maintenance.

PART VII
MUNICIPAL ELECTIONS

A. PLURALITY

The League strongly supports legislation which would permit a municipality to opt out of

the 40% plurality requirement for election to office and which would clarify the 40% rule for municipalities that continue to use it.

B. POLL HOURS

Experience has proven that extension of polling hours has not increased voter turnout and has been costly. The League, therefore, opposes legislation which would expand the hours beyond the present 8:00 a.m. to 8:00 p.m.

C. REGISTRATION

1. State Voter Registration: The League opposes legislation which would eliminate or erode the state registration system and supports efforts to improve the processing and quality of the state voter registration system.

2. On-Line Computer Access: The League supports state funding to promote immediate on-line computer access for the election supervisor offices of Juneau, Fairbanks, Anchorage, and Nome.

D. ADMINISTRATION

The League strongly supports legislation which consolidates all functions pertaining to elections, conflict of interest, and campaign disclosure into one agency.

E. DISCLOSURE RESTRICTIONS

The League opposes imposition upon local governments of campaign and financial disclosure restrictions. The League urges the Legislature to review the laws and make the reporting requirements less onerous than presently in effect. The League specifically supports legislation which would exempt from campaign disclosure and/or financial disclosure elected or appointed advisory boards as defined in the Services Areas section of Title 29, The Municipal Code (AS 29.63.090).

F. VOTER QUALIFICATION

The League supports legislation that would allow a municipality, by ordinance, to require persons to be state registered voters in, and residents of, the precinct, district, or service area in which they seek to vote.

G. QUALIFICATION FOR ELECTIVE OFFICE

The League supports legislation that would include provisions in Title 29, the Municipal Code and Title 14, the Education Code for municipalities to set qualification for all elected municipal officials including school board members.

H. TITLE 29 REVISIONS

1. Signature Requirements: The League supports legislation which would clarify the Initiative and Referendum sections of Title 29, the Municipal Code (AS 29.28.070(b)) to specify that signature requirements for petitions be based upon the last regular municipal election held just preceding the date of first circulation of the petition.

2. Recall: The League supports legislation amending the Recall sections of Title 29, The Municipal Code (AS 29.28.070) to provide that the number of signatures required to initiate a petition for recall be 35% of the number of voters voting in the last regular municipal election

for that office regardless of population of the municipality, and to make recall procedures clearer, including provisions to make the grounds more specific.

PART VIII
LOCAL GOVERNMENT POWERS

A. LOCAL AUTONOMY

1. Effective Local Government: Because certain restrictions currently exist in the Alaska Statutes which impede effective independent local government, the League supports legislation which would promote more effective and independent local government in all organized boroughs and cities, and opposes any legislation which unduly restricts local government operations.

2. Lobbying: The League supports the continued exemption of municipal officials and employees from the lobbying reporting requirements under the Lobbying sections of Title 24, the Legislative Code (AS 24.45).

3. Anti-Trust Laws: The League supports legislation at both the state and federal levels placing municipalities in an equal posture with state governments with respect to federal anti-trust laws.

4. Enforcement of Municipal Ordinances: The League opposes state restriction on enforcement of municipal ordinances and supports legislation clearly establishing local autonomy in the creation of mandatory sentences and other remedies for violation of local ordinances.

5. Public Records: The League supports legislation ensuring that local governments are free to adopt, through ordinance or resolution, their own policies and procedures concerning local public records.

6. Utility Regulation: The League endorses the return to municipalities of the authority to regulate all utilities, other than co-op utilities and utilities that have opted out of the Alaska Public Utility Commission (APUC) regulation, within their jurisdiction to the extent not regulated or specifically exempted from municipal regulation under state law.

7. Interest on Retainage: The League supports repeal of the application to municipalities of the Public Construction Contract Payments section of Title 36, Public Contracts Code (AS - 36.90.001) relating to payment of interest on retainage on construction contracts. (check)

8. Eminent Domain: The League strongly supports legislation amending the Prerequisites to Taking of Private Property section of Title 9, Code of Civil Procedure (AS 9.55.270) to create a rebuttable presumption that the choice of the condemning authority has been made in a manner compatible with the greatest public good and least private injury.

9. Local Construction: Local governments should have autonomy to administer local construction projects. Title 36, the Public Contracts Code should be amended to permit local governments to establish their own notice, reporting, and prevailing wage requirements for local construction.

B. PUBLIC EMPLOYEE LABOR RELATIONS

1. Alaska Public Employees Labor Relations Act: The League strongly opposes any legislation which would force municipalities to be subject to the provisions of the Alaska Public Employees Labor Relations Act. The League opposes just as strongly any legislative efforts to

dictate the provisions of local public employees labor relations ordinances. The League supports legislation to allow each municipality at any time to reject or withdraw from the terms of the Alaska Public Employees Relations Act.

2. Binding Arbitration: The League opposes legislation imposing binding arbitration on local governments. Such legislation would hinder local governments' ability to determine their personnel costs and prevent local governments from having complete control of determining the local tax rate.

C. CLASSIFICATION OF MUNICIPAL GOVERNMENTS

The League urges the Legislature to address the classification of municipal governments, including the organization of the unorganized borough.

D. TRIBAL/LOCAL GOVERNMENT RELATIONS

The League supports and encourages efforts on the part of the Legislature and other concerned parties to address tribal/local government relations. → BIA

E. TITLE 29 REVISIONS

1. Fundamental Elements: The League encourages the Governor and Legislature to recognize the significance of the effort to revise Title 29, the Municipal Code and the importance of maintaining this legislation in a basic form and of insuring that the legislation contain only the fundamental elements and guidelines for a basic municipal code.

2. Other Proposals: The League requests other proposals which would constitute ~~s~~ or policy revisions or innovations in the function of local government be considered in separate legislation which, if approved, would be incorporated into Title 29 once the revised basic code has been adopted.

* 3. THE LEAGUE SUPPORTS OF TITLE 29 REVISION TO ALSO ALLOW THE ELECTION AT LARGE MAYOR OF A 2ND CLASS CITY.

PART IX
RESOURCES

A. NON-RENEWABLE

1. Oil and Gas Policy: The League supports a clear policy for gas and oil encouraging the exploration, production, and processing of state royalty oil and gas within Alaska with due consideration for local municipalities.

2. Energy Efficiency: (a) The League urges the federal government, the State of Alaska, and League members to design, construct, and use their facilities with an emphasis on energy efficiency, as a part of life cycle cost considerations.

(b) The League urges regionalized studies by the state recommending changes in building codes which would achieve maximum cost effective energy savings over the lifetime of new facilities.

3. Coal: In consideration of having a diversified, dynamic Alaska mineral industry and recognizing the current importance of petroleum products for energy production and the potential for a considerable coal export market, the League urges the state to vigorously encourage the development of Alaska's coal resources by private industry.

4. Mineral Policy: The League strongly urges the administration and legislature to establish a clear mineral policy to encourage resource development and in-state ore concentration and/or reduction.

5. Gas Liquids: The League strongly supports optimum use of gas liquids as feed stocks for in-state petrochemical development, with coal or other energy sources to be used for the processing.

6. Site Reclamation: The League enccurages the state and federal agencies to vigorously enforce reasonable and best use of regulations for the reclamation of mined areas.

7. Alternate Fuels: The League strongly supports the use of alternate fuels (compressed natural gas), as a substitute to gasoline or diesel in areas where it is feasible.

B. RENEWABLE

1. Development and Processing Policy: The League requests that the executive and legislative branches of the state establish a policy strongly encouraging the development and processing of renewable resources in Alaska, and through appropriate inventory and management practices make all renewable resources available for development and processing on a sustained yield basis. The League encourages a federal/state policy requiring out-of-state and foreign processors to comply with federal and state regulations.

2. Study and Development: The League requests the executive and legislative branches of the state to accelerate the study, research, development, and marketing of Alaska's renewable resources.

3. Fisheries: (a) The League supports legislation for the development of aggressive and substantially accelerated marketing studies and market development for Alaska's seafood industry, with emphasis on a quality assurance program.

(b) The League requests the State of Alaska take a stronger stance in negotiating with respect to salmon interception treaties with foreign nations as well as negotiations with the North Pacific Fisheries Management Council with regards to salmon harvest quotas. The League urges the state to carefully evaluate, identify, and attempt to minimize the negative economic impact to communities caused as a result of these negotiations.

(c) The League urges the state to provide adequate funding for the full operation of viable FRED hatcheries and continue to support and provide sufficient loans to regional non-profit aquaculture associations for expansion of their programs.

(d) The League encourages the state to support modification of the Fisheries Management Act (FMA) so that the North Pacific Fisheries Management Council has a greater representation of Alaskan delegates.

(e) The League urges the State of Alaska to take a stronger stance in negotiating with the North Pacific Fisheries Management Council in opposition to the proposed share-quota system in the halibut fishery.

4. Agriculture: The League supports state encouragement of agriculture through farmland preservation and opening up of new agriculture lands, with adequate road access within a farm area and by encouraging the development, processing, and marketing of Alaska agriculture products.

C. HUMAN RESOURCES

1. Alaska Hire: The League supports and encourages, within the confines of the constitution and human resource limitations, any efforts on the part of the Governor and the Legislature to implement an Alaska hire policy particularly within state government.

2. Resources of Institutions of Higher Learning: The League encourages the Legislature and Administration to use both human resources and technical resources of the institutions of higher learning inside the state over institutions outside the state.

3. Training Incentives: The League supports the development of incentives that would encourage contractors and other employers to train and apprentice local workers and encourage their employment.

4. Day Care: The League supports state funding for day care at a sufficient level to insure that a high standard of day care is available to Alaska families who desire day care and pre-school services.

D. PLANNING

1. Resource Development Projects: The League supports resource development and funding policies which provide that state assisted resource development projects substantially impacting communities should be approved by the municipalities.

2. Waste Disposal: The League encourages the state to maintain high standards concerning waste disposal from processing of all resources.

3. Cooperative Planning: The League recognizes the many of the state's most valuable resource lands are already under private control through mining claims, leases, and conveyances pursuant to the Alaska Native Claims Settlement Act. Thus, in furthering its goals of both resource development and the protection of Alaska's environment, the League urges meaningful, cooperative planning between the state, municipalities, and appropriate private parties, particularly Alaska Native Corporations.

PART X
ECONOMIC DEVELOPMENT

A. IMPACT

The exploration, development, and industrial utilization of renewable and non-renewable resources, both inside and outside municipal boundaries, creates a substantial and immediate impact on the need for municipal facilities and services which exceeds the financial ability of most municipalities to meet in the short period of time available to have such facilities and services operational. The League urges adoption of legislation which would provide financial assistance to municipalities which are facing such impacts. Such legislation needs to establish criteria for impact assistance with appropriate trigger mechanisms to activate such assistance.

B. INCENTIVES

1. Resources: The League supports legislation that will aid in the exploration, development, and in-state processing of Alaska's raw materials and vast mineral wealth, and urges the state to provide incentives to those industries engaging in in-state primary and secondary processing of Alaska's resources.

2. Economic Development: The League urges that legislation be enacted to allow local municipalities to adopt and implement incentives for economic development, such as economic development corporations and tax increment financing authorities.

3. Permanent Fund: The League supports maximum investment of the Permanent Fund in the state.

C. PAPERWORK REDUCTION

The League supports a reduction of state regulations requiring redundant reports for small business and local governments.

D. LOANS

1. State Funding: The League supports the continued state funding for small business loans. The League also supports the Alaska Industrial Development Authority concept where appropriate, but recognizes as well a need for smaller businesses and projects to obtain funding, and most importantly, the inclusion of working capital providing lower interest rates and more flexibility in its application process and provisions.

2. Financial Institutions: The League supports a program to educate the lending institutions so as to expedite loans to small businesses. The League encourages the administration to revamp current Alaska Industrial Development Authority policy to encourage greater service on the part of local financial institutions, where the business loan needs of smaller communities are not being met.

E. TOURISM DEVELOPMENT

The League recognizes the importance of tourism to the economy of the State of Alaska and encourages increased assistance to municipalities for tourism promotion and attraction programs, especially within the Visitor Information Center and Tourist Attraction Development Grant Programs administered by the Division of Tourism.

F. BONDED INDEBTEDNESS

The League supports the adoption of legislation which would raise the level of bonded indebtedness for the Alaska Municipal Bond Bank to $300 million and approve a suitable level of bonded indebtedness for revenue bonds.

fill with
senate

There are currently three procedures in practice within the state regarding taxation of motor vehicles. When the present statute [AS 28.10.411 (d)] was written, it took into account only one of those practices, leaving the other two as problem areas.

In the case where a municipality has opted to have the state collect taxes on motor vehicles for the municipality, the senior citizen is exempt, and the municipality is reimbursed. That is the way the program was intended to work.

One of the problems occurs in a municipalities where a local property tax is levied on motor vehicles. Based on the current statute, the State reimburses those municipalities. However, Title 29 presently does not allow the municipalities to exempt Seniors, therefore the Senior pays the tax and the State "reimburses" the municipality, producing a double payment.

The second problem occurs in municipalities which do not tax motor vehicles. Under the current statute, the state reimburses those municipalities for revenues which they <u>might have</u> lost had they assessed and exempted the motor vehicles.

Currently, the Seniors complete an exemption form when they buy their license plates. That form is forwarded to the Department f Community and Regional Affairs, and the affected municipality is subsequently reimbursed based on the schedule located in AS 28.10.431 (b).

The following suggested language would correct the problems which exist under current law and would allow the State to continue with the current very simple and inexpensive administrative procedure.

AS 28.10.411 (d) The state shall reimburse a municipality for revenues lost to it under (c) of this section. The payment shall be an amount equal to the tax levied under AS 28.10.431 (b) for each vehicle for which a senior citizen exemption form is approved.

1566X/MW/nk

Alaska State Legislature

HB 172

FEB 7 1983

Speaker of the House of Representatives

Pouch V
State Capitol
Juneau, Alaska 99811
(907) 465-3720

Official Business

February 4, 1983

Mr. Wayne Mabry
Ombudsman
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Wayne:

Thank you for your recent letter regarding the lack of clarification in statutes and case history as it refers to recall petitions. I am aware of the recent problems this has caused in Anchorage and can appreciate the position you have been put in.

A complete revision of Title 29, Municipal Code, is indeed taking place agin this year. Last year, as I am sure you are aware, a similar bill passed but later became mired in controversy and was vetoed. SB 1 is now in the Senate committee process and is the vehicle which is being used to address this question. Eventually, should it pass the Senate, it will be referred to the Community and Regional affairs committee in the House chaired by Representative Barbara Lacher.

I am forwarding your letter and backup to her at this time for investigation and consideration. This matter could be taken up as a separate issue or incorporated as part of the overall Title 29 examination. In anv case, it warrants investigation and Representatuve Lacher's committee has propoer jurisdiction over this matter. I will keep in touch with her to monitor the progress on this situation. You may wish to contact her as well at 465-4894.

I hope we can reach an acceptable solution. Please feel free to contact me at any time if I can be of assistance.

Very truly yours,

Joe L. Hayes
Speaker

JLH/jkd

Barbara- Joe has asked that you take this into consideration as you review Title 29- Thanks. Jeff

FEB 3 1983

February 1, 1983

Joe L. Hayes, Legislator
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Joe:

I have recently investigated a complaint about a recall petition for A Municipal Assemblyman. My investigation found that the State Law (AS 29.28.130) on recall petitions is not clear as to the legislative intent regarding a clerk's authority and/or responsibility. The legal opinions regarding similar cases are, in my view, conflicting. In the case I reviewed, the Anchorage Municipal Clerk ruled that the "grounds" stated in the recall petition did not "constitute incompetence or failure to perform prescribed duties" and rejected it. The Municipal CLerk's decision was based on several legal opinions which stated the Clerk had the responsibility and authority to review the grounds based on the word "content" in AS 29.28.160.

My case summary disagrees with those legal opinions and states that a recall petition can only be rejected for one of the reasons stated in AS 29.28.150. I feel that no individual can rule the grounds for recall insufficient except the voters in a duly called recall election. A copy of my case summary is enclosed with four attachments covering the legal opinions. Also enclosed is a copy of the Anchorage Municipal's Clerks January 11th letter to the complainant, Tom Staudenmaier.

I understand that you are involved in revising this portion of the Alaska Statutes and ask that you review my case summary. I would appreciate your comments on this problem and would like to be informed of any proposed changes to this state law. Also, if any hearings are being planned, please let me know as I would like to testify.

If you have any questions, please don't hesitate to call.

Sincerely yours,

Wayne

CLERKS OFFICE

PETITION FOR RECALL

OF GERRY O'CONNER, ASSEMBLYMAN

SECTION (2) TWO, SEAT C

P.O. BOX 8-9110
ANCHORAGE, AK
694-4982
694-2322

We the undersigned registered voters of Section (2) two, Seat C, of the Municipality of Anchorage, which includes Fort Richardson, Eagle River and Chugiak, hereby petition for the recall of Assembly Member Gerry O'Conner under the Anchorage Municipal Charter, Article III, Section 3.03, Recall; Title 29, Section 29.28.140 for incompetence and failure to perform prescribed duties.

Said recall is based upon dereliction of duty of this representative of Eagle River and Chugiak. At the December 2nd, 1982 Municipal Assembly Meeting, Gerry O'Connor joined Tony Knowles, Mayor of Anchorage and voted to increase property taxes up to 50%. His other past actions and this tax increase are contrary to the best interest of the citizens of Eagle River and Chugiak.

RECEIVED
JAN 11 1983
OFFICE OF THE OMBUDSMAN

Mr. Tom Staudenmaier, Chairman
AKC-PAC
P.O. Box 8-9110
Anchorage, AK 99508

Dear Mr. Staudenmaier:

On January 3, 1983, you presented to the Municipal Clerk a petition for recall of Assemblyman Gerry O'Connor. In accordance with AS. Section 29.28.160, the Municipal Clerk shall, within 10 days, review the petition for content and signatures and shall certify on the petition whether it is accepted or rejected.

A review of the signatures was made and of the 509 signatures, 354 were registered voters. In reviewing the grounds, the petition was found to be insufficient because the act i.e., voting on the municipal budget, does not constitute incompetence or failure to perform prescribed duties.

It is the decision of the Municipal Clerk the petition is insufficient and it is therefore rejected and will be filed for public record.

A copy of the legal opinion from the Municipal Attorney is enclosed for your information.

If you have any questions, please contact this office.

Sincerely,

Ruby E. Smith
Municipal Clerk

Municipality of Anchorage

MEMORANDUM

DATE: January 20, 1983

FROM: Office of the Ombudsman

SUBJECT: CASE SUMMARY, NO. 82-3

The following case summary is provided for your information and review. If you have any questions, clarifying information, or comments regarding our determination or any other aspect of the case, please bring them to our attention so that we can incorporate them into this summary.

CASE SUMMARY

Investigator Wayne D. Mabry In Date: 1-11-83 Close Date: 1-17-83

Category: MUNICIPAL CLERK'S OFFICE

Complaint Summary: The complainant presented a petition for the recall of Assemblyman Gerry O'Conner to the Municipal Clerk's office on January 3, 1983. On January 11, 1983, the Municipal Clerk rejected the petition as being insufficient on the grounds that "voting on the Municipal budget does not constitute incompetence or failure to perform prescribed duties". The complaint is that the Clerk's office does not have the authority under state law (AS 29.28.160) to rule on the alleged grounds.

Case Description: The complainant approached this office on January 3, 1983, after delivering the petition to the Clerk's office, and wished to file a complaint that the petition was going to be rejected based on an opinion by the Municipal Attorney. The complainant felt the Clerk had no right to solicit the Municipal Attorney's opinion. On that date, I informed the complainant the Clerk did have the right to solicit the Municipal Attorney's opinion and since no action had been taken by either the Clerk or the Municipal Attorney, this office could not investigate.

Based on the complainant's contact I did discuss the matter with the Municipal Clerk and Attorney explaining that an official complaint was probably going to be filed with this office if the petition was rejected. At that time, neither the Clerk nor the Attorney had made their determination; a reply by the Clerk to the petition was required by January 11, 1983.

In anticipation of a complaint being filed with this office and a decision to look into the matter on this office's "own motion", I then contacted the Matanuska-Susitna Borough attorney's office and the State Attorney General's office in Anchorage. I spoke with Steven H. Morrissett, Matanuska-Susitna Borough Attorney, about recall petitions because his office has gone through several in the last few years. Mr. Morrissett had given his opinion on the last recall petition filed in the Borough in a memorandum dated August 13, 1981, (attachment #1) which determined that the recall petition was insufficient. I provided a copy of this memorandum to the Municipal Clerk.

On January 11, 1983, the complainant came to this office to lodge a formal complaint based on the Clerk's rejection of the recall petition he had filed. His specific

complaint was that the Municipal Clerk did not have the authority to review the grounds and determine if they constituted "incompetency or failure to perform prescribed duties". I explained to the complainant that this office would accept the complaint and open a case file; however, any recommendation from this office could not change the outcome. Furthermore, the only possible way to change the outcome of the Clerk's decision is through the court system. This was based on my assumption that once the Clerk made a decision, within the 10 day time limit allowed by state law, there is no mechanism to allow the Clerk to change that decision.

I contacted Mr. David LeBlond at the State Attorney General's office. He helped me locate two memorandums regarding recall that had been prepared by the Attorney General's office in 1977. I went to the Attorney General's office, reviewed their files and made copies of the two memorandums regarding a recall petition of a School Board member located in the upper Railbelt School District. In this case there was no municipal clerk involved to handle the recall petition, so the Commissioner of the State Department of Education was handling it. [Later in this Case Summary, I will be quoting from the memorandums by the Assistant Attorneys General, Roger W. Pegues, dated April 12, 1977 and Ronald W. Lorensen, dated June 6, 1977 (attachment #2, #3).]

I then met with the Municipal Clerk, Ruby Smith, to discuss her decision and she informed me that she had contacted numerous Municipal Clerks around the State and had requested an opinion from the Muncipal Attorney, Jerry Wertzbaugher. Ms. Smith tended to agree with my analysis that the term "content" in Section 29.28.160 of the State Statutes, Examinations of Sufficiency, did not relate to determining if the grounds stated in the recall petition were sufficient. She made her decision based on legal opinions she had reviewed and discussions with other clerks around the State, giving the overwhelming opinion that state law did require her to rule on weather the grounds constituted "incompetence or failure to perform prescribed duties". Ms. Smith had contacted Mr. Rubini of the State Attorney General's office in Juneau and the discussion included the opinion by the lawyer that the petition was valid and should go on the ballot. When Ms. Smith requested this opinion in writing the response was that the State Attorney General's office would not give an opinion as the Municipality of Anchorage had an attorney for that purpose.

Basis for Determination: After my first contact with the complaint I reviewed a copy of the applicable state law regarding recall petitions. My first impression of the state law was that there was no legislative intent to have municipal clerks across the state of Alaska determine if the grounds stated in a recall petition were, in fact, "misconduct in office, incompetence, or failure to perform prescribed duties". I then discussed this concept with the Muncipal Clerk and the Municipal Attorney, but neither had yet formed a specific opinion although the Municipal Clerk did tend to agree with my concerns. I then met with the Matanuska-Susitna Borough attorney and also reviewed the files of the State Attorney General's office here in Anchorage. There were several other memorandums in the State Attorney General's files regarding recall petitions, but the two attached were the only ones that related to the specific question of "content".

In reading the January 11, 1983, opinion by Jerry Wertzbaugher, Municipal Attorney, (attachment #4) to the Municipal Clerk, I find that his basic premise revolves around the word "content" located in Section 29.28.160 and that this word "content" means the Municipal Clerk can determine if the grounds stated in the recall petition are in fact grounds for recall as stated in Section 29.28.140. Mr. Wertzbaugher's memorandum goes to great lengths to prove that the term "content" could only refer to the statement of grounds.

My position regarding the term "content" as used in the state law is that it does not nor could not refer to the grounds. In the State Statues regarding recall petitions, Section 29.28.140 states the grounds for recall. Then Section 29.28.150 entitled "Petition" states:

> (a) A petition seeking recall of one or more municipal officials is filed with the Municipal Clerk. The petition shall contain
>
> (1) the signatures and residence addresses of a number of voters as prescribed in §70(b) of this chapter for initiative and referendum;
>
> (2) the date each voter signed the petition; and
>
> (3) a statement of the grounds of the recall stated with particularity as to specific instances; B. A petition for recall must be filed with the Clerk within 60 days after the date of the earliest signature on the petition. (§2 ch 118 SLA 1972)

Then comes Section 29.28.160, Examination for Sufficiency. It states "The Municipal Clerk shall review the petition for content and signatures and shall certify the petition within 10 days of the filing date whether it is accepted or rejected ... ." In my non-legalistic mind it appears that the term "content" in Section 29.28.160 refers to the words "shall contain" in Section 29.28.150 and the only thing the Clerk can look at relating to the grounds is stated in number 3 above: that the grounds will be particular and specific. There is nothing in the law that says the Clerk can determine if the grounds, if assumed to be true, must fit the test of being "misconduct in office, incompetence or failure to perform prescribed duties". As stated in Mr. Morrissett's August 13, 1981 memorandum, I feel the charges must be definite enough to allow the public to determine the truth or falsity of those charges. Mr. Morrissett's memorandum rejecting the recall petition submitted was rejected on the basis that all five charges were too vague and would not give the voter a chance to determine if the Assemblyman should be recalled or not. I think Mr. Morrissett's memorandum tends to support my opinion because the reason for rejecting that recall petition was based on vagueness.

Also, two other recall petitions in 1980 were accepted by the Matanuska-Susitna Borought Clerk based on grounds related to how a particular Assemblyman voted on issues similar to the one in this case (copies of the two 1980 petitions are attached to Mr. Morrissett's memorandum).

It is difficult for me to imagine that the legislative intent was to have any clerk make this decision on the grounds for recall as it could relate to one or more of their bosses. If the clerk is appointed by a manager, the clerk's action could be construed as a political move by the administrative branch against the legislative branch. This would be a terrible position for a clerk to be put in; to have to say one of the members of the legislative body is guilty of "incompetence, misconduct in office or failure to perform prescribed duties" and could put a clerk's job in jeopardy.

The April 12, 1977 memorandum from the Assistant Attorney General regarding the recall of a School Board member states " The recall petition must contain a statement of grounds 'with particularity as to specific instances.'" The petition in question stated that its aim was to correct the incompetency of the School Board and cited two particular instances: "(1) the Board's approving a new position of Assistant Superintendent and (2) the Board's approving funds for a computer." The memorandum further goes on to state:

> It is not the role of the officer charged with ascertaining the petition's sufficiency to judge the merit or truth of the grounds asserted (68 Am. Jur.2d Public Officers and Employees § 245) It suffices that the reasons have been stated and with sufficient particularity to inform the office holder and the electorate. The latter will determine the merit of the charges.

I feel these "grounds" are similar in nature to the ones filed by the complainant and these were acceptable enough to call for a recall election. Also, it is clear that the electorate should determine the merits of the charges, not the clerk.

The second memorandum from the Attorney General's office dated June 6, 1977, goes into even further detail regarding the allegations and what exactly can or cannot be determined by the Commissioner in this case. The first part of the memorandum speaks to the fact that the allegation's truth or untruth is irrelevant to the question of whether or not the recall petition is legally sufficient. The memo goes on to say:

> The decisions of those courts are virtually unanimous in their holding that the question as to whether or not the charges contained in the

> petition are true or false is irrelevant. ... the only question to be decided is whether or not the charges which have been made are sufficiently specific to allege incompetence or misfeasance if they were in fact true. ... 'recall is political in nature and it is for the people and not the courts to decide the merits of the reasons stated in the petition'.

Further, the memo goes on to say:

> In those states where the power of recall is constitutionally established, the courts have viewed recall as a 'fundamental right' and have consistently said that statutes dealing with recall should be liberally interpreted and that any restrictions which are placed on the power of recall must be strictly construed. ... Consequently, neither you nor the Board may determine the propriety of the policy in this area or the sufficiency of the petitions based on potential factual inaccuracies. A good general description of the judicial approach to recall can be found in State ex rel. Citizens Against Mandatory Bussing v. Brooks, 492 P.2d 536 (Wash., 1972):
>
> > First, in determining the validity of recall charges, courts are limited to examination of the charges stated and cannot inquire into factual matters extraneous to the allegations. Second, courts must assume the truth of the charges in determining whether legally sufficient grounds for recall

> have been stated. Third, just as there can be no inquiry into the truth or falsity of the charges, there can be no inquiry into the motives of those filing the charges. Fourth, recall charges are sufficiently specific if they are definite enough to allow the charged official to meet them before the tribunal of the people.

These statements lead me to believe that rejecting the petition because the grounds are political is invalid as everything a politician does is political. Also, rejecting the petition because it does not fit the definitions of "incompetence or failure to perform prescribed duties" is a right that can only be exercised by the voters.

My concern is if the legal opinion stated by Jerry Wertzbaugher and Steven Morrissett is correct. Then, what I hear this saying to those voters who wish to submit a recall petition, is to make allegations that, although possibly blatant lies, could be determined non-political statements and therefore allow a recall election. I do not think this concept is the intent of the state law. I totally agree with the statement that the recall petition is a "fundamental right" and that these petitions should be liberally interpreted and that restrictions placed on the power of recall must be strictly construed. Otherwise, the voters, as in this case, are not being allowed their fundamental right to a recall election.

Based on all of the above information, my opinion is that the state law does not allow the Municipal Clerk to review the content of a recall petition as it relates to the grounds for recall as stated in the state law, I have determined this case to be JUSTIFIED.

Note: I did not seek another legal opinion for two reasons. The first is my assumption that this matter will have to be settled in the courts which will generate additional legal opinions. Secondly, I felt I had enough information on which to base my determination.

Case Action:

This investigation leads me to the opinion that the state law needs to be revised in such a way that this question of content can be cleared up and made very specific as to what the legislature's intent is in regards to review by any municipal clerk within the State. Based on that I will be forwarding my memorandum on to members of the State Legislature who are interested in amending the Alaskan Statues regarding recall petitions. It is my understanding that some changes were recently passed by the State Legislature but vetoed by the Governor.

In my discussions with the complainant I stated that I felt the recall effort was premature if based on a Municipal tax increase. My reasoning is that approving the budget does not automatically raise taxes. Taxes are set in April or May by the Assembly only when it approves a specific mill rate for each Municipality service area. At this time the Assembly still retains the option to not raise the mill rate which, in effect, would lower the budget.

BOROUGH ATTORNEY'S OFFICE

August 13, 1981

RECEIVED

JAN 07 1983

OFFICE OF THE OMBUDSMAN

MEMORANDUM

To: Evelyn Thompson, Borough Clerk

From: Steven K. Morrissett, Borough Attorney

Subject: Recall of an Elected Official--Procedures

The recall of an elected official is governed by AS 29.28.130--.250. Any elected official of the Borough may be recalled by the voters after he or she has served six months in office, subject to the provisions of those sections. The subject of this memorandum is discussed in relation to a petition received on August 6, 1981, to recall Assemblyperson Dorothy Jones.

Recall Charges

It is for the voters to decide whether the charges in the recall petition are true and, if true, whether they are enough reason for recalling the elected official. However, it is the duty of the Borough Clerk to determine whether the charges alleged, if taken as true, constitute "misconduct in office, incompetence or failure to perform prescribed duties" within the meaning of the law. Bocek v. Bagley, 505 P. 2d 814 (Wash 1973). AS 29.28.140.

The requirement that reasons be provided means that a recall petition is not sufficient if it is submitted solely for political reasons. However, the Clerk must look only to the language of the charge in determining whether adequate reasons are alleged in the petition.

Charges must be made which "state the grounds with particularity as to specific instances." AS 29.28.150(a)(3). An allegation of "misconduct", for instance, must be supplemented by specific facts which demonstrate "misconduct". The charges must be definite enough to allow the public to determine the truth or falsity of the charges. If even one charge, or if all together meet these requirements then the petition is sufficient.

"Misconduct in office" includes any wrongful conduct which affects or interferes with performance of official duty and includes misfeasance or malfeasance: the performance of a duty in an improper manner or the doing of an unlawful or unethical act. Knowledge by the official that the act was "misconduct" may not be relevant except to the extent that knowledge is required to show misconduct.

"Incompentence" ordinarily means intellectual, physical or moral inability to carry out a required task. It may include serious ignorance of basic information or a lack of mental or emotional ability necessary to carry on the duties of the official. It would not include making decisions which were politically unpopular.

"Failure to perform prescribed duties" means a failure to carry out those responsibilities of the office set out in state or local laws. Prescribed duties are numerous, from the obligation to attend Assembly meetings unless excused, to ordering elections on the acquisition of Borough powers if requested by the voters. MSB 2.12.070(F), 2.04.050. A "prescribed" duty may be created by implication; e.g., when the Assembly as a whole is required to perform a function, it is the implicit duty of each official who is a member to aid in the performance of that function. However, it is not a "prescribed duty" of each Assemblyperson to take every conceivable action which might make that official a more informed or more popular representative. Thus, it is not a "prescribed duty" to attend meetings which are not official or are sponsored by other non-Borough organizations. It is not a "prescribed duty" of an Assemblyperson to inform all constitutents of the economic impact of an Assembly decision.

On the Jones recall petition, five charges were made, as set forth in the footnote below.1/ The petition characterizes these charges as "incompetency and/or failure to perform prescribed duties." However, the sufficiency of the petition is not determined by this characterization, but by whether any charge, or all of the charges together, constitutes misconduct in office, incompetency or failure to perform prescribed duties.

The first charge is that Assemblyperson Jones has generally failed to consult with constitutents or keep them informed. Taking this as true, it fails to allege specific instances which would constitute

---

1/ (1) Has generally failed to consult with constituents and has failed to keep citizens informed concerning the various activities of the Borough Assembly and Borough Government; (2) Has failed to inform constituents concerning the true size and scope of Borough Government and the sources of revenues for the operation of Borough Government. This was especially true during early 1981 at Borough budget meetings; (3) Has failed to inform and/or consult with constituents concerning future property tax liabilities if and when present sources of state and federal revenues should cease to be available for the operation of the Borough Government. Specifically, she failed to discuss these matters at Borough budget meetings in 1981; (4) Has failed to recognize the desires of many constituents to lead quiet, peaceful, and uncomplicated lifestyles with a minimum of government regulation, intrusion, and interference. Has sponsored and/or voted for ordinances which interfere with privacy rights and individual freedoms of citizens; and (5) Has favored and/or voted for more expensive and burdensome Borough Government despite the objections of many of her constituents. Specifically, in May 1981, she ignored a petition signed by approximately 50 of her constituents, the purpose of w was to inform the Borough Assembly that many Borough citizens were against the addition of permanent employees to the general Borough Government staff.

statutory grounds for recall. It does not allege refusal to talk with constitutents in specific cases , nor does it state the nature of the failure to inform. It is not a prescribed duty of an Assemblyperson to inform all constitutents of all matters. The charge is not specifically clear to establish a valid reason for recall, nor would it generally be a sufficient charge if referenced to a specific instance.

The second charge is that Jones has failed to inform constitutents concerning the true size and scope of the government and its sources of revenue, particularly during the 1981 Budget hearings. This charge sets a specific time, but is as vague as the first charge in showing an act constituting misconduct, incompetence or failure of duty. The "true size and scope of government" is no more specific a subject than "various activities". There is no catagorical duty of Assemblypersons to inform all constitutents of all matters in a representative form of government.

The third charge is that Jones has failed to inform constitutents of future tax liability "if and when present sources of state and federal revenues should cease to be available..." This is so vague as to be impossible to respond to or for voters to determine whether the charge is true. It also fails for the reasons stated previously.

The fourth charge is that Jones has "failed to recognize the desires of many constitutents..." This is strictly a "political" reason for wanting a different representative. It is inevitable that some voters will be disappointed by every action taken by an Assemblyman. The elective process is the remedy. Recall requires specific, limited grounds for removal of an official before the end of his or her regular term.

The fifth charge is that Assemblyperson Jones has voted for "expensive Borough government", despite objections and a petition signed by 50 constitutents. If true, this is a charge that the elected official has acted contrary to the wishes of certain voters, not that the official is guilty of misconduct or failure of duty.

No charge states an allegation of incompetence, i.e. that Assemblyperson Jones is incapable of performing her duties. No charge alleges misconduct in office, i.e. an illegal or unethical act. Allegations directed towards claims of failure to perform prescribed duties establish no duties that were not performed. No allegation is made by the petition which is a basis for recall and which could be considered by informed voters as to its truth. The charges set forth in the recall petition are therefore insufficient. 2/

2/ This opinion is consistent with two previous written opinions of attorneys Allen Tesche and Harland Davis, provided at the request of the Clerk in 1980. Each of those opinions, issued in relation to petitions for the recall of Assemblypersons Schmall and Hitchcock, concluded that certain reasons on the petition were not legally sufficient. The charges that Schmall and Hitchcock failed to discuss "certain matters and general charges were noted not to be sufficient. However, charges of a specific instance of slander, excessive absences from meetings and illegal actions related to dismissal of the manager in violation of the law were detailed and sufficient to present to the voters.

Form of Petition Signatures

A recall petition must have a statement of the grounds of the recall stated with particularity. It must have the signature, residence address and signing date for each signer.

There is no requirement that the petition be on one page. Where the petition extends to several pages, each page should be attached to the others which form a complete petition and should be identified clearly as to the purpose of the petition to assure no signer is misinformed as to what he is signing. However, it is permissible to circulate more than one petition, each of which can be filed in a joint petition, if the form of each petition is identical.

It is preferable if each page of a petition has a full statement of the petition or a summary clearly setting forth the purpose. There is no apparent requirement that proof be provided that all sheets in a petition were circulated as a unit; some states require an affidavit to that effect.

The signatures on the petition must meet certain statutory requirements. If the area concerned by the petition in the Borough has fewer than 7,500 persons, the petition must contain the signatures of persons who are registered to vote in and living in the concerned area equal to 25% of the total number of votes cast at the last general election within that area. If the concerned area has 7,500 persons or more, the petition must be signed by voters equal in number to at least 15% of the total votes cast in the last general election in that area. In this case, the concerned area is District 5 only.

The signature must be in ink or indelible pencil. To be valid a signature must be followed by the date of signature and the person's current residence address. Each and every signature on the petition must have been signed within 60 days of the filing of the petition with the clerk.

Only those persons who are currently registered voters within the concerned area may be counted toward the petition. The petition itself is not an affidavit of residency; the required voter registration establishes the validity of a person's signature, residence and right to sign the petition. Because of the lack of specific residence addresses within the Borough, certain leeway must be granted to describing the location of residence. However, a signature may not be counted if it cannot be ascertained from the address that the person lives within the area concerned.

Processing a Petition

The municipal clerk is required to review the petition for content and signatures and accept the petition within ten days of the filing date. Until such time as the petition is accepted, any signer of the petition may withdraw his signature upon written application to the clerk.

RECALL PETITION
THE PETITION FOR RECALL OF ASSEMBLYPERSON DOROTHY JONES (Rejected)

(13)

THE UNDERSIGNED VOTERS of the Matanuska-Susitna Borough Assembly District 5, currently composed of Precincts 3, 8, 15, 17, 21, and 50, seek the recall of DOROTHY JONES due to incompetency and/or failure to perform prescribed duties. Each of the undersigned states that he/she petitions for the recall of DOROTHY JONES for each of the instances of incompetency and/or failure to perform prescribed duties cited below with or without the other, and whether such instances constitutes incompetence, failure to perform assigned duties, or both: (1) Has generally failed to consult with constituents and has failed to keep citizens informed concerning the various activities of the Borough Assembly and Borough Government; (2) Has failed to inform constituents concerning the true size and scope of Borough Government and the sources of revenues for the operation of Borough Government. This was especially true during early 1981 at Borough budget meetings; (3) Has failed to inform and/or consult with constituents concerning future property tax liabilities if and when present sources of state and federal revenues should cease to be available for the operation of the Borough Government. Specifically, she failed to discuss these matters at Borough budget meetings in 1981; (4) Has failed to recognize the desires of many constituents to lead quiet, peaceful, and uncomplicated lifestyles with a minimum of government regulation, intrusion, and interference. Has sponsored and/or voted for ordinances which interfere with privacy rights and individual freedoms of citizens; and (5) Has favored and/or voted for more expensive and burdensome Borough Government despite the objections of many of her constituents. Specifically, in May 1981, she ignored a petition signed by approximately 50 of her constituents, the purpose of which was to inform the Borough Assembly that many Borough citizens were against the addition of permanent employees to the general Borough Government staff.

RECALL PETITION

THE PETITION FOR RECALL OF ASSEMBLYPERSON KATHRYN R. SCHMALL

The undersigned voters of the Matanuska-Susitna Borough Assembly District 4, currently composed of precincts 18, 19 and 35, seek the recall of Kathryn R. Schmall due to incompetence and/or misconduct. Each of the undersigned states that he/she petitions for the recall of Kathryn R. Schmall for each of the instances of incompetence and/or misconduct cited below with or without the others, and whether such instance constitutes misconduct, incompetence, or both.

A. Voting at the Assembly meeting on June 3, 1980 to dismiss the Borough Manager, constituting incompetence because (1) the vote was based upon unsubstantiated charges presented at an executive session, which charges affected the character and reputation of the Manager, without allowing the Manager an opportunity to respond to the charges or confront the witnesses against him; (2) failing to publish the topic of the Manager's dismissal on the Assembly's agenda, not allowing for appropriate input from all interested segments of the community; and (3) voting to dismiss the Manager capriciously, without making any provision for a smooth administrative transition at a critical period in the development of several major economic development projects in the Point McKenzie area, generating the likelihood of great economic loss to the Borough and its residents.

B. Voting to hold executive sessions beyond the authority granted by statutes, in derogation of the people's right to attend and observe the Assembly's deliberations.

C. Refusing to discuss Borough Assembly actions with constituents, who have a right to know.

D. Making slanderous remarks against the Borough Manager at the Wasilla Chamber of Commerce meeting of May 20, 1980.

If the petition is sufficient, the clerk should immediately submit it to the Borough Assembly to be placed on the ballot within 75 days of submission of the petition to the clerk. If the clerk finds that there are insufficient signatures, or that the petition is otherwise inadequate, the clerk must let the petitioners know within the ten day period for review of the petition. The petitioners are entitled to an additional ten days from the date of rejection to provide additional signatures.

If the petition is insufficient for any reason other thatn insufficient signatures, it must be rejected in its entirety. If insufficient signatures are provided within a supplemental ten day period, the petition shall also be rejected. A new recall petition cannot be filed for six months after rejection of the first petition.

The recall petition must be placed on the ballot within 75 days of submission of the petition. The question on the ballot must include:

(1) The grounds for recall as stated in the recall petition.

(2) The elected officer's response to the petition, in 200 words or less.

(3) The proposition questions: "Shall (the elected official) be recalled from the office of (office)? Yes___ No___

A majority vote on the question is required to recall an officer. Failure to recall an elected official prevents the filing of a new recall petition within six months after the election. A successful recall requires that an election be conducted for its successor at least ten but not more than 45 days after the date of the recall election, except that the election for the successor may be held at a regular election if occurring within 75 days of the recall election.

Petition for recall, Upper Railbelt school board

FM: Rodger W. Pegues
Assistant Attorney General

As you requested, we have reviewed the recall petition from REAA #14, the Upper Railbelt School District. In our opinion, the petition meets the statutory requirements, and we advise that it be accepted as sufficient in form and substance. */

By law, the grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties. AS 29.28.140. The recall petition must contain a statement of the grounds, "with particularity as to specific instances." AS 29.28.150(a)(3). **/ While certain of the recall petition's allegations are vague and do not meet the statutory requirements for particularity, the petition recites that the "aim is to correct the incompetency of the School Board," and the petition states two particular instances of alleged misconduct or incompetency: (1) the board's approving a new position of assistant superintendent, and (2) the board's approving funds for a computer. Accordingly, while far from a perfect instrument, the petition does facially meet the statutory requirements.

It is not the role of the officer charged with ascertaining the petition's sufficiency to judge the merit or truth of the grounds asserted. 63 Am. Jur.2d Public Officers and Employees § 245. It suffices that the reasons have been stated and with sufficient particularity to inform the office holder and the electorate. The latter will determine the merit of the charges.

*/ This assumes that a check of the signatures results in a determination that the petition has been signed by the required number of qualified voters.

**/ AS 14.08.081 makes REAA school board members subject to recall under AS 29.28.130--250, except that the commissioner of education performs the municipal clerk's functions and the state Board of Education performs the functions of the assembly. All elected public officials in Alaska, except judicial officers, are subject to recall. Alaska Const., art. XI, § 8.

In preparing the recall ballot, you are required to include on it "the grounds as stated in the recall petition." AS 29.28.210(1). In our view, this should be interpreted to mean the grounds as stated with particularity so as to comply with AS 29.28.150(a)(3), which requires particularity. Therefore, the statement of grounds on the ballot should exclude the non-specific grounds and include those stated "as to specific instances."

The first statement of grounds in the petition (consistently ignored the will, etc.) may or may not meet these criteria. It is probably sufficiently particular to advise the officers and the electorate in the district. It does not give "specific instances." You should exercise your own judgment as to whether it should be included on the ballot based on your knowledge of the situation, i.e., if you believe that, under the circumstances, the statement adequately recites the alleged misconduct, you should include it on the ballot.

The second statement (created dissension, etc.) is facially inadequate. It states a broad conclusion without the slightest reference to a particular act or instance. It should not be placed on the ballot.

The third statement (new position) and the fourth statement (allocated funds for a computer) are particularized and give specific instances. They should be placed on the ballot.

The statements of grounds placed on the ballot are to be "as stated in the recall petition." AS 29.28.210(1). Following these allegations, the official's rebuttal or defense of not more than 200 words is placed. AS 29.28.010(2).

This is a proceeding without precedent in Alaska, and if you require additional assistance, please do not hesitate to request it.

Recall petition of the Upper Railbelt School Board
A.G. File No. J-66-512-77

This will confirm my oral advice to you of May 19, 1977 in response to certain questions which you raised as to whether or not the charges contained in the recall petition filed in the above-referenced matter were legally sufficient to require that a recall election be undertaken. I advised you that those charges were in fact sufficient, despite some substantial questions which you had raised as to the apparent untruth of certain of the factual allegations.

While a review of the relevant school board minutes for the Upper Railbelt School District does seem to indicate that certain of the factual allegations contained in the petitions are indeed not correct, this factor, under applicable judicial decisions dealing with the question of recall elections, is irrelevant to the question of whether or not the recall petition is legally sufficient to bring on the holding of the recall election. This point has been addressed in numerous judicial decisions throughout the United States, although it has not yet been addressed in Alaska. The decisions of those courts are virtually unanimous in their holding that the question as to whether or not the charges contained in the petition are true or false is irrelevant. According to those decisions, the only question to be decided is whether or not the charges which have been made are sufficiently specific to allege incompetence or misfeasance if they were in fact true. As recently stated by the Wisconsin Supreme Court in In re Recall of Certain Officials, 217 N.W.2d 277 (1974), "recall is political in nature and it is for the people and not the courts to decide the merits of the reasons stated in the petition."

The power of the people to recall their elected officials is established by our state constitution in Article XI, Section 8 which provides as follows:

> All elected public officials in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedures and grounds for recall shall be prescribed by the legislature.

In those states where the power of recall is constitutionally established, the courts have viewed recall as a "fundamental right" and have consistently said that statutes dealing with recall should be liberally interpreted and that any restrictions which are placed on the power of recall must be strictly construed. See, for example, Bumgarner v. City of Boulder, 525 P.2d 416 (Col., 1974).

Although you and the state Board of Education may disagree with respect to the established policy behind the widespread judicial support for recall powers, and though you have substantial concerns over the truth of the factual allegations made in the petitions, neither of these areas are concerns with which either you or the Board in your respective roles in the recall procedure have any vested authority. Consequently, neither you nor the Board may determine the propriety of the policy in this area or the sufficiency of the petitions based on potential factual inaccuracies. A good general description of the judicial approach to recall can be found in State ex rel. Citizens Against Mandatory Busing v. Brooks, 492 P.2d 536 (Wash., 1972):

> This court has on numerous occasions interprated and applied these constitutional and statutory provisions. Some basic rules may be gleaned from these prior cases. First, in determining the validity of recall charges, courts are limited to examination of the charges stated and cannot inquire into factual matters extraneous to the allegations. Second, courts must assume the truth of the charges in determining whether legally sufficient grounds for recall have been stated. Third, just as there can be no inquiry into the truth of falsity of the charges, there can be no inquiry into the motives of those filing the charges. Fourth, recall charges are sufficiently specific if they are definite enough to allow the charged official to meet them before the tribunal of the people. Finally, any one sufficient charge requires the holding of a recall election. (Citations omitted.)

Consequently, as you can see from the above, I am able to reach only one conclusion in this matter and that is that you and the state Board must proceed to hold the recall election called for under AS 14.08.081.

RWL:jf

Municipality of Anchorage

MEMORANDUM

ATTACHMENT #4

DATE: January 11, 1983

TO: Municipal Clerk

FROM: Municipal Attorney

SUBJECT: Petition for Recall of Gerry O'Connor, Assemblyman, Section 2, Seat C

ISSUE PRESENTED

Are the grounds set forth in the above referenced recall petition sufficient as a matter of law under the provisions of AS 29.28.150 to permit a submission by the Clerk to the Municipal Assembly for the purpose of calling an election pursuant to AS 29.28.200?

CONCLUSION

The above referenced petition is legally insufficient and no recall election may therefore be called. Under AS 29.28.160 - .170, the Municipal Clerk is required within 10 days of submission to examine the sufficiency of the recall petition, both as to the adequacy of signatures and for content with respect to compliance with AS 29.28.130 - .150. On the basis of the authorities and the reasoning referenced below, it is my opinion that an individual assembly member's vote on an ordinance approving the municipal budget cannot, as a matter of law, constitute misconduct in office, incompetence, or failure to perform prescribed duties under the meaning of AS 29.28.140, if that vote was in compliance with state and municipal law governing ethics and conflicts of interest and if the measure passed was in all respects a lawful action.

DISCUSSION

The necessity and sufficiency of specific grounds to support a recall petition is a matter governed by applicable constitutional or statutory provisions. For this reason, the weight given to various legal precedents from other jurisdictions depends on an examination of the specific legal framework involved. Generally, there would be no examination of the legal sufficiency of grounds where the governing statute permits removal from office for any reason or where grounds must be stated in a general manner. This is the case in many states, including, for example, Colorado, Michigan, Oklahoma and Wisconsin. In those states, it is held that recall can be based merely on a disagreement with the policies of the officeholder. A different rule applies, however, where, as in Alaska, the governing statute dictates that only certain grounds are suf-

> finitely at the expense of the taxpayers. And suppose the faction seeking power through recall of those in office should be successful and the first, second, or third attempt, then the ousted faction could then in turn employ the same in repeated trials to regain its lost prestige, and the interminable wrangell and turmoil would go on. This would result in the fostering and maintaining of political feuds to the detriment of society and the great expense of the taxpayers. 121 S.E. at 493.

Additional support for this conclusion is found in AS 29.28.160 entitled, EXAMINATION FOR SUFFICIENCY. That section requires that the Municipal Clerk review a recall petition for content as well as for signatures. Since a petition is required to contain only dated signatures with addresses and a statement of grounds, the term "content" could refer only to the statement of grounds. Any other conclusion would make the use of the term "content" superfluous. On this point, note that AS 29.28.170(a) provides for a supplemental petition if, and only if, it is rejected on the basis of insufficient signatures. The statute also provides that "if the petition is insufficient for any other reason, it shall be rejected and filed as a public record." (emphasis added). Obvious from the emphasized language, the legislature contemplated that the Clerk's duties include an examination of the petition for compliance with other requirements. This interpretation of the Clerk's authority is consistent with the Alaska Supreme Court's decision in Warren v. Boucher, 543 P.2d 731. In that case, the Court approved the Lt. Governor's determination that an initiative petition was "substantially the same" as a measure passed by the legislature and therefore barred from the ballot. The Court's approval of the Lt. Governor's authority in that case involved a statute which, like the one under analysis here, permitted the highest election officer of the jurisdiction to make certain threshold decisions on the validity of a petition. This is not an unusual position. In the case of Steadman v. Halland, 641 P.2d 448, the Supreme Court of Montana addressed the same issue; "We agree that the statement of grounds for recall to be included in the petition is 'part of the form of the petition' and find that the filing officer not only is 'empowered to' but is required to reject the petition when it does not comply with statutory requirements." (emphasis added) 641 P.2d at p. 453.

The inquiry need not be confined to the governing statute alone as there exists precedent from other states with similar statutory language.

In states where the law permits recall to be based on political grounds alone, the above referenced statement (or any statement for that matter) would be sufficient. It is, however, insufficient to support the grounds of incompetence or failure to perform prescribed duties.

Relative to removal from public office, the terms "incompetence" and "dereliction of duty" have well established meanings. 63 Am.Jur.2d, Public Officers, §§ 191-192. The petition describes one act allegedly constituting incompetence. The allegation does not meet judicially defined standards for "incompetence" as that term has been defined by the courts. "Incompetence" means "some demonstrated lack of capacity or ability to perform the professional functions of office", Vivian v. Examining Board of Architects, 213 N.W.2d 359 (Wisc. 1974), including physical handicap inability to perform official functions; Tafoya v. New Mexico State Police Board, 472 P.2d 973 (N.M. 1970), or other legal disqualification, incapacity, or fitness to discharge the required duty. It means want of physical, intellectual, or moral ability, insufficiency, inadequacy, want of legal qualifications. Appeal of School District of Bethleham, 30 A.2d 726 (Pa. Super. 1943); Hughes v. Hughes, 271 P.2d 172 (C.A. 4th 1954). The allegation in the petition falls short of claiming lack of capacity, ability, or physical, educational or mental ability to perform official functions; rather the allegation merely recites an action of the Assembly to which petitioners object. Failure to perform prescribed duties means a failure to carry out those responsibilities of the office set out in state or local law. Prescribed duties are numerous, from the obligation to attend assembly meetings unless excused to voting on matters for which one is not excused on the basis of a conflict of interest. A prescribed duty may be created by implication, as for example, when the assembly as a whole is required to perform a function. It is the implicit duty of each official who is a member to aid in the performance of that function. It is not, however, a prescribed duty of each assembly person to take every conceivable action which might make that official more informed or a more popular representative. Thus, it is not a prescribed duty to attend meetings which are not official or are sponsored by other nonmunicipal organizations. It is not a prescribed duty of an assembly person to inform all constituents of the basis of his or her political decisions, nor is it a prescribed duty to follow the popular will of ones constituency on any particular issue.

While the Alaska Supreme Court has not ruled on the precise question addressed here, at least one Superior Court Judge has

recall of municipal officials in AS 29.26.240 - 29.26.350 [AS 29.28.-130 - 29.28.250]. The lieutenant governor functions in place of the assembly or council and municipal clerk for receipt and review of recall petitions and the conduct of recall elections.

* Sec. 81. AS 46.40.210(2)(A) is amended to read:

(A) unified municipalities [ESTABLISHED UNDER AS 29.-68.240 - 29.68.440];

* Sec. 82. AS 47.35.010(b) is amended to read:

(b) The department shall, within 90 days after receiving a written request that it do so, delegate its powers relating to nurseries under this section and under AS 47.35.040, 47.35.050 and 47.-35.060 to a municipality which has adopted an ordinance providing for day care licensing under home rule powers or as authorized under AS 29.35.200 - 29.35.210 [AS 29.48.035(a)(20)]. A municipality to which these powers have been delegated may waive or modify any regulation or standard established by the department under the authority of AS 47.35.010 - 47.35.080 as it applies to nurseries or the application of any such regulation or standard as it applies to a particular day care licensee but must notify the department of any waiver.

* Sec. 83. The following laws are repealed: AS 04.11.400(c); AS 04.-21.080(11); AS 14.56.065(b), 14.56.180(3); AS 15.13.130(6); AS 18.55.950-(10); AS 19.20.015(f); AS 24.55.330(3); AS 28.35.260(a)(10); AS 29.08; AS 29.13; AS 29.18; AS 29.23; AS 29.28; AS 29.33; AS 29.38; AS 29.41; AS 29.43; AS 29.48; AS 29.53; AS 29.58; AS 29.63; AS 29.68; AS 29.73; AS 29.-78; AS 29.88; AS 29.89; AS 29.90; AS 29.95; AS 30.15.070(3); AS 30.30.170-(2); AS 35.15.120(3); AS 42.06.630(6); AS 43.18.500(j)(6); AS 43.20.016; AS 43.56.210(8); AS 44.47.310(5); and AS 44.85.410(4).

* Sec. 84. A right or liability of a municipality existing on July 1, 1983, is not affected by the enactment of this Act. Ordinances and

regulations in effect on July 1, 1983, remain in effect unless they conflict with provisions of this Act. Ordinances and regulations in effect on July 1, 1983, that conflict with provisions of this Act remain in effect for 180 days after July 1, 1983. The terms of elected or appointed municipal officials in office on July 1, 1983, are not affected by this Act, and their terms expire as provided before July 1, 1983.

* Sec. 85. AS 29.45 as enacted in sec. 11 of this Act is retroactive to January 1, 1983. — for retroactivity

* Sec. 86. AS 29.45 as enacted in sec. 11 of this Act and sec. 85 of this Act take effect immediately in accordance with AS 01.10.070(c).

* Sec. 87. Except for AS 29.45 as enacted in sec. 11 of this Act and except for sec. 85 of this Act, this Act takes effect July 1, 1983.

agreements with the Forest Service for fire protection of rural properties of mutual concern, or for joint state, federal, and local drug enforcement operations or for a host of other municipal functions which are exercised jointly or in cooperation with state or federal agencies or other municipalities. I strongly suggest that this section be eliminated as it is not only superfluous, but its existence may lead courts to two unfortunate conclusions; first, that the only way municipalities may engage in a cooperative or joint emergency service communication center is as provided in the subject section; and second that inasmuch as the legislature went to great pains to detail the procedures and structures for joint operation of emergency communication centers, other similar joint operations must have specific and detailed legislative authorization. It was for these types of reasons that the technical committee for the Title 29 revision recommended striking or generalizing such detailed procedures found in the present Title 29. If there is some feeling that striking this section would jeopardize the authority of municipalities to enter into such arrangements, I suggest the section be struck and replaced with a new section under the general powers portion of the Bill which would authorize a municipality to enter into an agreement or association, including membership in a corporation, with any other municipality, the state, or federal agencies, for the purpose of exercising any power or function of the municipality. 29.35.010(13)

Page 96, beginning at line 5. Subsection (c) of this section makes subsections (a) and (b) applicable to all home rule municipalities. Actually, there appears to be little need to have this apply to any home rule municipality; however, because subsection (a) deals with the different disposition of a vacated public square depending on whether the square is within a city or outside a city but within the borough, it may be appropriate to make subsection (a) applicable only to home rule boroughs and general law municipalities. In addition, the last sentence of subsection (a) which begins in line 17 could lead to some very awkward situations. If, in the original plat, a lot is dedicated as a holding area for storm waters, or as a park or for some other non-street use and is later vacated because the lot is no longer needed for that purpose it may be very difficult to determine who is the "rightful" owner; and if this "rightful" owner is someone other than the abutting property owners, it may be impossible to locate the owner. I suggest deletion of the sentence which begins on line 17, and in line 14, just before the word "public" the insertion of the phrase "lot or".

Page 105, beginning at line 7. I don't think that the definition of "developed" clarifies anything. For example, when a native corporation subdivides some of its property and puts in roads and

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 28, 1983

SUBJECT: Mayor's veto power
(HB 172)

TO: Representative Barabara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel TBC

You have asked for a comparison of the veto power of a mayor under HB 172 as compared to the veto power of a mayor under existing law.

EXISTING

Under AS 29.23.170, the mayor of a borough is authorized to veto ". . . any ordinance, resolution, motion or other action of the assembly and may, by veto, strike or reduce items in appropriation ordinances except for school budget items". However, the mayor may not veto an action of the assembly calling for an election on adopting or abandoning a manager plan (AS 29.23.240(d)), or an action of the board of equalization or board of adjustment. The assembly sits as the board of equalization and hears appeals from decisions of the borough assessor, or the assembly may delegate this authority to another board (AS 29.53.135). An action taken by the board of equalization may not be vetoed, whether the assembly sits as the board or whether other appointed members form the board. The assembly is the board of adjustment for purposes of hearing appeals from land use decisions, but the assembly may delegate this function to a city for the area within the city's boundaries (AS 29.33.110). An action taken by the board of adjustment may not be vetoed by the borough mayor, whether the assembly is sitting as the board or a city board is involved.

In addition to general limitations on the veto power of a borough mayor, with respect to a third class borough AS 29.41.020 provides in part:

EXISTING

> The borough executive is the presiding officer of the borough assembly and president of the school board. The borough executive has all powers of a borough executive except for the veto power.

Under this language it appears that the mayor of a third class borough has no veto power, whether acting as presiding officer of the assembly or as president of the school board.

Existing

Under AS 29.23.270, the mayor of a first class city ". . . may veto any ordinance, resolution, motion, or other action of the council and may by veto strike or reduce items in appropriation ordinances except, in a city outside an organized borough, for school budget items". The mayor of a second class city may not veto any action. The section is silent as to whether the mayor of a first class city in a borough may veto an action of the council sitting as a board of equalization or adjustment pursuant to a delegation of authority by the borough assembly.

New

The veto provision contained in sec. 29.20.270 of HB 172 applies to both cities and boroughs. Just as in existing law, a mayor is authorized to veto ". . . an ordinance, resolution, motion, or other action of the governing body and may strike or reduce appropriation items". As in existing law, the mayor may not veto items in a school budget or adoption or repeal of a manager plan of government, and the mayor of a second class city may not exercise a veto at all. In addition, the mayor of a city or borough may not veto ". . . actions of the governing body sitting as the board of equalization or board of adjustment . . . " Since the mayor is authorized to veto only actions of the governing body and not actions of other boards, the result of this provision is the same as the existing prohibition against veto of an action of the board of equalization or board of adjustment even if the governing body delegates the functions under sec. 29.40.050 or sec. 29.45.200. However, under HB 172 it is clear that neither the mayor of a city nor the mayor of a borough may veto actions of the board of adjustment or board of equalization.

While, in HB 172, the mayor of a third class borough continues to have no power to veto actions of the assembly sitting as a school board, under sec. 29.20.300(b) the mayor is not precluded from vetoing other actions of the assembly.

TBC:ljb
9/021

subsection is limited to

(1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if the fire protection system is a fixture of the structure on January 1, 1981; or

(2) an amount equal to two percent of the value of the structure based on the assessment as of January 1 of the year immediately following the installation of the fire protection system if the fire protection system becomes a fixture of the structure after January 1, 1981.

(m) The tax exemption required by 43 U.S.C. 1620(d), as amended, shall be implemented according to the following conditions and interpretations:

(1) "developed" means a purposeful modification of the property from its original state that effectuates a condition of gainful or productive present use without further substantial modification; surveying, construction of roads, providing utilities or other similar actions normally considered to be component parts of the development process, but which do not create the condition described in this paragraph, do not constitute a developed state within the meaning of this paragraph; developed property, in order to remove the exemption, must be developed for purposes other than exploration, and be limited to the smallest practicable tract of the property actually used in the developed state;

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of

exploration and development, this exemption shall continue with respect to that portion of the leased tract that is used solely for the purpose of exploration.

(n) If the property or interest in the property reverts to an undeveloped state, or if the lease is terminated, the exemption shall be reinstated, subject to the provisions of (m) of this section.

END

Sec. 29.45.040. PROPERTY TAX EQUIVALENCY PAYMENTS. (a) A resident of the state 65 years of age or older who rents a permanent place of abode is eligible for tax equivalency payments from the state through the department.

(b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax. The property tax equivalent percentage applied to the annual rent charged to the applicant equals the property tax equivalency payment payable under this section.

(c) To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year on forms and in the manner prescribed by the department. Each applicant shall submit with the application rental receipts or, if rental receipts are not available, other evidence satisfactory to the department for determination of the fact of payment of rent and the amount paid.

(d) If two or more persons occupy a residence as tenants, not all of whom are eligible for tax equivalency payments under this section, the assessor shall determine equitable partial payments to be made to the eligible tenants. However, tax equivalency payments to an eligible applicant may not be reduced because the spouse is less than 65 years of age. If all occupants in a residence are eligible for tax

ALASKA ASSOCIATION OF ASSESSING OFFICERS

SENATE BILL NO. 260 (proposed substitute)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to exemption from municipal property

taxation of certain property exempt from taxation from federal law; and providing for effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(9) real property or an interest in real property that is exempt from taxation under 43 U.S.C. 1620(d), as amended.

*Sec. 2. AS 20.53.020 is amended by adding new subsections to read:

(k) For the purpose of determining property exempt under (a)(9) of this section, the following definitions apply to terms used in 43 U.S.C. 1620(d) unless superseded by applicable federal law:

(1) "developed" means a purposeful modification of the property from its original state that affectuates a condition of productive present use or makes the property marketable for use or development in accordance with local ordinances and state statutes without further subdivision or substantial modification. Developed property, in order to remove the exemption, must be developed for purposes other than exploration and be limited to the smallest practicable tract of the property actually used in the developed state;

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of exploration and development, this exemption shall continue with respect to the portion of the leased tract that is used solely for the purpose of exploration.

(4) If property or an interest in property that is determined not to be exempt under (a)(9) of this section reverts to an undeveloped state, or if the lease is terminated, the exemption shall be granted, subject to the provisions of (a)(9) and (k) of this section

*Sec. 3. AS 209.53.060 is amended by adding a new subsection (c) reading

(c) The assessment of property which has lost its exempt status under 43 U.S.C. 1620(d) because it is developed or leased shall be based on the full and true value of the improvements to the property and of so much of the property and/or natural resource as is used or useful in connection with the improvements.

*Sec. [3]4. This Act takes effect January 1, 1984

NOTE OF INTENTION

Attached is a proposed substitute for Senate Bill 260, which is an act relating to the exemption from municipal property taxation of certain property exempt from taxation under federal law; and providing for an effective date.

The proposal was drafted at a quarterly meeting of the Alaska Association of Assessing Officers held in Soldotna on May 23 and 24, 1983.

It was the opinion of the assessing officers that the original Senate Bill 260 was unfair, as it related to other persons in the State of Alaska who are involved in the subdividing and developing of property. The original bill allowed Native organizations to completely develop a subdivision, including survey, roads and utilities, and still not be obligated to pay local taxes until such time as the property was sold. We realized that it was probably the intent of the federal government in passing the Native Land Claim Settlement Act to allow a moratorium on local taxes so that the Native organizations could get their feet on the ground and not forfeit their property to taxes in the early years. We felt the original Senate Bill 260 allowed the corporations not only to get their feet on the ground, but to remain in a tax exempt status virtually in perpetuity, as far as purposeful modifications to their property are concerned.

Our proposed bill would allow a future subdivision in the state of being developed a tax exemption, but as such time as the subdivision is completed in conformance with the subdivision agreement, it would become taxable. This, in essence, gives the Native organizations developing subdivisions or natural resources a tax free period of time during the development process, but once the development criteria has been met it places the property on the tax roll of local taxing jurisdictions.

The proposal also provides in section 2(k)(l) for the taxation of only a small portion of a a larger tract, if only that portion has been developed. It eliminates taxation as does the original Senate Bill 260 of land being used for exploration. It allows, as did the original bill, for property that has been leased to be taxed, but deletes this property from the tax roll should the lease be terminated. If the lease is terminated, and due to the lease, a portion of the property was developed, that portion would remain taxable to the Native corporation.

Our proposed bill would bestow an additional benefit on the Native corporations over what most of them have at the present time. Most of the assessing jurisdictions within the State begin to assess the property at the time it is surveyed, and continue through the development stage. As mentioned above, the proposed bill by our association would allow the development to take place prior to beginning the assessment procedures.

Should you have any questions concerning our position, please contact the undersigned.

April 12, 1983

Lyman Hoffman, City Manager
CITY OF BETHEL
P.O. Box 388
Bethel, Alaska 99559

Dear Lyman:

Thank you for your recent letter requesting my support for SB 1. As I'm sure you know, HB 172 is the House version of the Municipal Code revision bill.

The bills in question are monolithic, and due to their size and impact there will be a considerable amount of time spent on them in committee. SB 1 has gone from Senate C&RA to Judiciary. At this time, hearing dates in Judiciary have not been set. Once the bill gets through Judiciary, it will then go to the Finance and Rules Committees respectively. On the House side, the C&RA Committee will be passing the bill out sometime near the end of April. HB 172 has the same committee referrals as SB 1. Obviously, unless we're here till August, it looks like the bills will be carried over to the second session.

Lyman, I believe that the majority of legislators, including myself, support the concept of revising and reorganizing Title 29. However, at this time I cannot make a commitment to the bill until I see how it is amended. I'm sure you understand. In any event, you can always feel free to contact me on this.

Thank you for writing. Please give my best to my friends in Bethel.

Most sincerely,

Bette Cato

M E M O R A N D U M February 4, 1982

SUBJECT: Chapter summary of Municipal Code Revision [CSHB 170] (Work Order No. 12-2379)

TO: Representative Patrick M. O'Connell
Chairman, House Community and Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel

You have requested a chapter summary of the municipal code revision (CSHB 170) highlighting significant changes to existing law. For your convenience, I have attached a table of contents by chapter and article to the revision. Corresponding chapter numbers in the existing Title 29 are included in parentheses.

Chapter 03. The Unorganized Borough. No significant change.

Chapter 04. Classification of Municipalities. No significant change.

Chapter 05. Incorporation. Does not authorize incorporation of a third class borough.

Chapter 06. Alteration of Municipalities. Does not authorize incorporation of a third class borough through merger or consolidation.

Chapter 10. Home Rule Municipalities. Authorizes a second class city to adopt a home rule charter if the city has at least 400 permanent residents. Requires home rule municipalities to provide land use regulation.

Chapter 14. Capital City. No significant change.

Chapter 20. Municipal Officers and Employees. Requires a municipality to adopt a conflict of interest ordinance that requires a member of the governing body to declare a substantial financial interest he has in an official action. The presiding officer must then determine whether to excuse him from a vote and this decision may be overturned by majority vote of the membership. Allows a special meeting to be called if a majority of the members are given at least 24 hours notice and reasonable efforts are made to notify all members. A special meeting may be conducted with less than 24 hours notice if all members are present or if absent members waive in writing the required notice. Requires the governing body to appoint within 7 days the number of members needed for a quorum if the membership is reduced to fewer than the number needed. Requires that a veto be overridden at the next regular meeting or within 21 days after exercise of the veto. Grants authority to a municipality to establish advisory, administrative, technical, or quasi-judicial boards and commissions. Allows the governing body to provide for a classified service and to designate positions that are wholly or partially exempt from the classified service.

Chapter 25. Municipal Enactments. A penalty not to exceed that imposed for a class B misdemeanor may be imposed for a violation of an ordinance. A mandatory, nonsuspendable term of imprisonment for 5 days may be imposed for violation of an ordinance. A civil action may be instituted against a person who violates an ordinance and a civil penalty of up to $1,000 may be imposed for each violation. An action to enjoin a violation may be brought and the court must grant the injunction on finding a violation. Each day a violation continues is a separate violation.

Chapter 26. Elections. The judge of a precinct must be a voter of the precinct for which he is appointed unless no voter is willing to serve. Both general law and home rule municipalities are required to give at least 20 days notice of a regular or special election. A runoff election shall be held if no candidate receives over 40 percent of the votes cast for the office of mayor or member of the governing body or school board. There is no super majority requirement for other elected offices, and a municipality

Bad!

clarify at large elections

may change the requirement for mayor, member of the governing body, or member of the council by ordinance. The initiative and referendum process and the recall process have been substantially altered. An application must be filed with the clerk for a petition. The clerk prepares the petition and provides it to the voters who will sponsor the petition. When a petition is returned, the clerk certifies whether it is sufficient and notifies the sponsors. The petition may be supplemented with additional signatures obtained and filed within 10 days after the petition is first rejected, except that a recall petition may only be supplemented if it contains an adequate number of signatures, counting both valid and invalid. A person may not be recalled until after he has served 120 days and may not be recalled if there are only 180 days left in his term.

Chapter 35. Municipal Powers and Duties. The following have been included in the list of facilities that a municipality may provide outside its boundaries: solid and septic waste facilities, utility services, transportation facilities, wharves, harbors and other marine facilities. A municipality that provides a facility outside its boundaries may regulate its use only to the extent that the jurisdiction in which the facility is located does not. Extends eminent domain and declaration of taking power to second class cities as it may be exercised by other municipalities. Unless a grant of a franchise or permanent permit is made on a competitive basis, the grant of an exclusive right to use a public street or right-of-way for more than five years to a utility or transportation system that is not certified is valid only if approved by vote. (Under existing law no franchise is valid unless it is submitted to the voters for approval.) The governing body is required by ordinance to establish a formal procedure for acquisition and disposal of land, but is not otherwise limited in its ability to dispose of land. A first class borough is allowed to exercise on a nonareawide basis any power, and on an areawide basis any power that is acquired, so long as exercise of the power is not specifically prohibited by law. Allows a second class borough to exercise on a nonareawide basis any power approved by the voters living outside cities, unless the power is prohibited by law. Allows a second class borough to exercise an areawide power if it is approved by the voters or transferred by the cities in the borough, unless prohibited by law. A city may exercise any power not prohibited by law.

Chapter 40. Planning, Platting, and Land Use Regulation. A planning commission is authorized to utilize methods other than zoning to implement a comprehensive plan. The governing body must update the plan as necessary. Requires the assembly to provide for an appeal from the application of a land use regulation before a hearing officer or board of adjustment. The governing body must establish a platting authority, but the planning commission need not act as platting authority. Plat requirements may not be waived, but in certain cases a short plat procedure may be followed rather than the regular procedure. A person who violates a land use regulation or condition imposed by a platting authority is subject to the penalties that may be imposed for violation of an ordinance.

Chapter 45. Municipal Taxation. Allows a municipality to exempt by ordinance personal property from taxation. Extends the limit on assessing farm use land to greenhouses so that they are assessed at full and true value for farm use. A penalty not to exceed 20 percent of the tax due may be added to delinquent taxes, and interest not to exceed 15 percent shall accrue on unpaid taxes. The right to repurchase foreclosed property is cut off after 10 years. If, in the absence of a suit, it becomes obvious to the governing body that judgment for recovery of taxes would be obtained the municipality must refund the taxes. A petition for incorporation of a second class city may be combined with a sales and use tax proposal, so the incorporation proposition fails if the tax proposal fails.

Chapter 46. Special Assessments. Costs that may be included in a special assessment are listed. These may not exceed actual costs, but may include reasonable estimates of the costs of issuing bonds. If an assessment is increased a new public hearing must be held unless all owners of property subject to the increase agree to the increase in writing. A municipality may issue notes for the costs of a local improvement project to be eventually paid from assessments for the improvement.

Chapter 47. Municipal Debt. The issuance of revenue bonds and use of proceeds from revenue bonds are not subject to the prohibition against a political subdivision making a subscription to the capital stock of a corporation, lending its credit for the use of a corporation, or borrowing money for the use of a corporation. Refunding bonds may be

exchanged at the discretion of the governing body and need not be exchanges at par for bonds being refunded. Revenue bonds may be issued to finance any project and to be secured solely from the revenue and property of that project. Bonds and notes may be sold in the manner and at the price determined by the municipality regardless of the par value. Allows the interest rate payable on bonds or notes to exceed the contract usury rate. Indebtedness of a service area remains a debt even though a court subsequently determines that the service area was not validly formed under law.

Chapter 55. Municipal Programs. No significant change.

Chapter 60. State Programs. No significant change.

Chapter 65. General Grant Land. No significant change.

Chapter 71. General Provisions. Dedication of streets, rights-of-way, easements of other areas for public use may not be construed to require the municipality to maintain, improve or provide for municipal services in the area dedicated.

Re: Amendments to HB 172

The Committee has completed action on proposed amendments One through eight; except that representatives of the Cape Fox Corporation were offered an opportunity to prepare new language for amendment No. 8.

Amendment No. 8 deals with a definition of developed lands for tax exempt status. A revised definition has been prepared for Committee review.

Amendment No.9 has been requested by representatives of the Alaska Rural Electric Cooperative Association. A staff summary has been prepared in an attempt to clarify the basis of the issue.

Following Committee decision on the above proposed amendments, staff will request a Committee Substitute HB 172 that will incorporate all approved amendments.

FILE: Legislature - 1983/84 - SB 260

SUBJECT: Proposed Substitute

Gentlemen:

Enclosed is a proposed substitute for Senate Bill 260 which I believe incorporates the changes we agreed could be made to help clarify the definition of "developed" in the bill. As you requested, I have shown the changes which the three of us propose by using brackets and underlining.

I appreciate the time you spent with me in discussing the changes. Please note that I still feel that subsection (1) should be deleted as it will lead to a changing tax status for property which cannot be pinned down to some specific event such as a transfer of ownership. While I recognize that such a system may be beneficial to the native corporations, it creates a situation which will undoubtedly lead to disagreements (and perhaps court battles) between municipalities and native corporations.

While I believe the language in the attached proposed substitute is more clear than that in Senate Bill 260, I strongly suggest that this proposal be reviewed by the attorneys and assessors in other municipalities as well as other native corporations. The situation varies from municipality to municipality and from native corporation to native corporation. It may even be profitable to try to set up a meeting of officials from concerned municipalities and native corporations to try to work out something to which a majority of us can agree.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

Re: HB 172, proposed utilities amendment. (#9)

The attached amendment to HB 172 has been requested by Mr. Dave Hutchins, representing the Alaska Rural Electric Cooperative Association.

The controversy over the proposed amendment is based on the authority of municipalities, or lack of authority, to regulate utilities that are not subject to regulation by the Alaska Public Utilities Commission under AS 42.05.

A summary of the controversial portions of the three options presented to the committee is as follows:

1. Present Statues:
   a. Municipalities cannot regulate or grant franchises to any utility that is regulated by the Alaska Public Utilities Commission (APUC) under AS 42.05.

   b. APUC approval is required for a municipality to extend a municipal utility's service area.

The present laws are silent on the authority--or lack of authority-- of municipalities to regulate non-municipal owned utilities that are not regulated under AS 42.05. Since a General Law municipality has only the powers granted by law, it would probably be upheld that a General Law municipality does not have the authority to regulate a non-municipal owned utility that is not regulated by APUC.

2. HB 172 Provides:
   a. Municipalities may grant franchises and regulate utilities to the extent they are not subject to regulation by APUC under AS 42.05, or not otherwise prohibited by law.

   b. Municipal owned utility services may be extended outside of the municipal boundaries (subject to approval by APUC).

3. Amendment requested by utilties:

   a. Whenever a utility is exempted from regulation by APUC or subject to regulation under AS 42.05, a municipality may not regulate the utility.

   b. A municipality may only extend utility services to an area adjacent to the municipal boundaries. This provision would prevent a municipal utility from providing utility services to an area that is not adjacent to the municipal boundaries.

The utilties that are, or may be, exempted from APUC regulation and as such are the utilties that are at the center of this issue are identified in AS 42.05.711 (copy attached).

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

PROPOSED AMENDMENT TO

HB 172

Page 33, after line 28, insert:

"(26) AS 29.35.060 (franchise and permits)"

Renumber following paragraphs accordingly.

Page 33, after line 29, insert:

"(28) AS 29.35.075 (disputes and conflicts with state certificated utilities)."

Renumber following paragraphs accordingly.

Page 74, line 12, delete:

"utility services,"

Page 77, after line 6 add a new subsection to read:

"(c) This section applies to home rule and general law municipalities."

Page 77, lines 7 through 22, delete present language and replace it with the following:

"Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly for the area outside all cities in the borough and the council acting for the area in a city may regulate a utility service and fix, establish, and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except to the extent

(1) the utility is subject to regulation under AS 42.05; or

(2) municipal regulation is prohibited by AS 42.05.711(k) or other law.

(b) A municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

(d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing

rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

(e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees for or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

(f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

(g) This section applies to home rule and general law municipalities."

Page 195, after line 22, add a new section to read:

"* Sec. 62. AS 42.05.711 is amended by adding a new subsection to read:

(k) A public utility that is exempt or partially exempt under (d) through (j) of this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a muncipality."

ORIGINAL.

Chugach Elec. Ass'n, Sup. Ct. Op. No. 1636 (File Nos. 2969, 2993), 580 P.2d 687 (1978); B-C Cable Co. v. City of Juneau, Sup. Ct. Op. No. 2112 (File No. 4587), 613 P.2d 616 (1980).

Sec. 42.05.711. Exemptions. (a) The provisions of AS 42.05.010 — 42.05.721 do not apply to a person who furnishes water, gas or petroleum or petroleum products by tank, wagon. or similar conveyance, unless the person is thereby supplying water, gas, petroleum or petroleum products to a public utility in which he has an "affiliated interest."

(b) Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with any other utility, are exempt from the provisions of AS 42.05.010 — 42.05.721, other than the provisions of AS 42.05.221 — 42.05.281, unless the owner and operator elects to be subject to all provisions of AS 42.05.010 — 42.05.721.

(c) The ownership in whole or part, of the corporate stock of a public utility does not make the owner a public utility.

(d) The commission, on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of AS 42.05.010 — 42.05.721.

(e) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, any electric or telephone utility that does not gross $50,000 annually is exempt from regulation under AS 42.05.010 — 42.05.721 unless 25 percent of the subscribers petition the commission for regulation.

(f) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, an electric or telephone utility that does not gross $325,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(g) A utility, other than a telephone or electric utility, that does not gross $100,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(h) A cooperative organized under AS 10.25.010 — 10.25.650 may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721, other than AS 42.05.221 — 42.05.281, under the procedure described in AS 42.05.712.

(i) A utility which furnishes collection and disposal service of garbage, refuse, trash, or other waste material and has annual gross revenues of $200,000 or less is exempt from the provisions of this chapter, other than the certification provisions of AS 42.05.221 — 42.05.281,

unless 25 percent of the subscribers or subscribers representing 25 percent of the gross revenue of the utility petition the commission for regulation.

(j) The provisions of this chapter do not apply to sales, exchanges or gifts of energy to an electric utility certificated under AS 42.05.010 — 42.05.721 when the energy which is the subject of the sale, exchange or gift is waste heat, electricity, or other energy which is surplus or the by-product of an industrial process. In an area in which no electric utility is certificated for service, energy provided by sale, exchange or gift may be provided to any utility which is certificated for service to that area. A contract for the sale, exchange or gift of energy exempt under this subsection does not make the supplier a public utility, and does not transfer the responsibility to provide utility services from a certificated utility to any other person. (§ 6 ch 113 SLA 1970; am § 3 ch 76 SLA 1973; am § 8 ch 83 SLA 1980; am §§ 7-9 ch 136 SLA 1980; am § 89 ch 59 SLA 1982)

Revisor's notes. — As enacted by chs. 83 and 136, SLA 1980, present subsections (j) and (i) were designated as subsections (f) and (j), respectively, but were redesignated by the revisor of statutes pursuant to AS 01.05.031(b). Former subsection (i) of this section was transferred as § 13, ch. 136, SLA 1980 to the 1980 Temporary and Special Acts and Resolutions by the revisor of statutes pursuant to AS 01.05.031(b).

Effect of amendments. — The first 1980 amendment added subsection (j).

The second 1980 amendment deleted "excepting the furnishing of collection and disposal service of garbage, refuse, trash or other waste material" following "none of whose utilities" near the beginning of subsection (b), deleted the former second sentence in subsection (b), which read: "Notwithstanding any other provisions of this chapter, municipalities providing collection and disposal service of garbage, refuse, trash or other waste material within their corporate boundaries are not subject to regulation by the Alaska Public Utilities Commission unless the municipality elects to be subject to the provisions of this chapter," substituted "$50,000" for "$25,000" following "does not gross" near the middle of subsection (e), substituted "under this chapter" for "hereunder" following "exempt from regulation" near the middle of subsection (e), and added subsections (f) through (i).

The 1982 amendment, effective May 28, 1982, deleted "on June 30, 1980" preceding "a utility," and inserted "annual" preceding "gross revenue" in subsection (i).

Editor's notes. — Section 13, ch. 136, SLA 1980, as revised by the revisor of statutes, provides: "Cable television systems are exempt from the provisions of AS 42.05 [AS 42.05.010 — 42.05.721], other than the provisions of AS 42.05.221 — 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983. If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission."

Opinions of attorney general. — An electrical utility owned and operated by a regional electrical authority would continue to qualify for the broad exemption from this chapter, available to political subdivisions under subsection (b) of this section once the regional electrical authority had completed its proposed organization as a nonprofit corporation pursuant to AS 10.20.005 et seq. June 7, 1976, Op. Att'y Gen.

Sec. 29.48.050. FRANCHISES AND PERMITS. Present LAW

(a) The assembly acting for the area outside cities and the council acting for the area within a city may grant franchises, including exclusive franchise privileges, for the construction, operation and maintenance of bus transportation systems and public utilities not regulated under AS 42.05 and may permit them the use of streets and other public places under regulations prescribed by ordinance.

(b) No franchise is valid until it has been submitted to the qualified voters of the city or borough area outside cities in which it applies, and at least 55 per cent of the votes cast are in favor of the franchise. At least 30 days notice of a franchise referendum election shall be given in the same manner as is provided for notice of regular municipal elections, and the notice shall specify the purpose of the election. The ordinance granting a franchise shall provide for its submission for ratification to the qualified voters of the city or borough area outside cities at either a regular or special election, and the result of the election shall be canvassed publicly by the council or assembly and spread upon the records of the minutes and the result declared and certified in the same manner as in a regular election.

(c) Public utilities regulated under AS 42.05 have the right to use the streets and other public places, upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions the assembly or council requires. A dispute as to whether fees, terms, conditions, or exceptions are

reasonable shall be decided by the Alaska Public Utilities Commission.

Sec. 29.48.060. PUBLIC UTILITIES RATES.

The assembly acting for the area outside cities and the council acting for the area within a city may regulate, fix, establish and change, as it considers proper, the rates and charges imposed for utilities services given to the municipality or its inhabitants by a municipally owned utility not regulated under AS 42.05.010 - 42.05.721 and may regulate and provide what is a reasonable deposit for meters and security for service to be given, provided that interest is paid on the deposit. All rates, charges and regulations shall be reasonable and shall permit a fair and reasonable return on invested capital.

Alaska MUNICIPAL League

Juneau ★ November 2-5, 1983

33rd Annual Local Government Conference

HB 172

was read the first time and referred to the Community & Regional Affairs and the Judiciary Committees.

HB 172 was accompanied by a fiscal note which appears in House Journal Supplement No. 4, and the following letter:

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill revising the municipal code (AS 29). By our using the data base prepared by the Legislative Affairs Agency, this bill is identical to the bill introduced this session as Senate Bill No. 1, except for the correction of a typographical error (page 35, line 5 -- "overridden"), the justification of the right-hand-margin on several pages, and 11 rather technical changes that are described below. The bill was modeled on the bill approved last session by the House Finance Committee as HCS CSSB 180 (Fin). A detailed section-by-section analysis of SB 1 is being prepared by the Legislative Affairs Agency.

The bill does not contain any of the provisions which were criticized by Governor Hammond in his July 15, 1982 veto message for HCS CSSB 180(Jud) am H. See 1982 Senate Journal, pages 1788 -- 1792. This bill makes many non-controversial improvements to our municipal code and I urge its prompt consideration and passage. It is my hope that the AS 29 issues on which last year's amendments created such a controversy will be addressed by separate legislation so that this needed code revision is not once again delayed.

For your convenience in comparing SB 1 and this bill, here is a list of the 11 changes from SB 1 which are contained in this bill (with page and line numbers referring to SB 1):

1. page 8, line 26 -- following "council" the phrase "in a first class city" is added;

2. page 11, line 1 -- between the words "city" and "incorporated," the phrase "in the unorganized borough" is added;

3. page 29, line 8 -- following the first use of "commission," the phrase "of seven elected members" is added;

HB 172

4. page 29, lines 14 and 15 -- following "shall be" on line 14, the phrase "prepared by the petitioners and" is added and the word "incorporation" is deleted; following "petition" on line 15, the phrase "to incorporate a home rule municipality" is added;

5. page 62, line 3 -- a sentence to read "The runoff election shall be between the two candidates receiving the greatest number of votes for the seat." is added to sec. 29.26.060(c);

6. page 63, lines 7 and 26, and page 64, line 15 -- replace the words "bill" and "Act" with the phrase "ordinance or resolution";

7. page 82, line 18 -- following "emergency," the word "services" is added, and following "center," the phrase "under AS 29.35.130" is added;

8. page 85, lines 4 and 5 -- subsection (c) is amended as follows:

> (c) A third class borough acquires an additional power to exercise in a service area in accordance with AS 29.35.490(b) and (c) [AREAS BY HOLDING AN ELECTION ON THE QUESTION IN WHICH EACH PERSON WHO IS A VOTER OF THE BOROUGH MAY VOTE].

9. page 106, line 8 -- the first sentence of sec. 29.45.040(b) is amended as follows:

> (b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax [AT THE RATE OF ONE PERCENT PER MILL].

10. page 161, line 20 -- "29.60.120" is replaced with "29.60.130;"

11. page 182, line 1 -- following "general law," the phrase "first or second class" is deleted.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

TITLE 29 FACT SHEET

SUMMARY OF HB 172/SB 1 - TITLE 29 (MUNICIPAL CODE)

HB 172 and SB 1 are comprehensive bills that reorganize and clarify Title 29 (Municipal Code), but do not substantially change that part of the state statutes that direct the operation of local government in Alaska.

History: The current Title 29, last revised in 1972, is a hodgepodge of 13 years worth of amendments. It is very difficult for the average citizen to read and understand.

Recognizing the problem, the Legislature adopted SCR 66 in 1980, directing the rewrite of Title 29. A broadly representative policy committee, with the assistance of a technical committee, prepared a revised code after an exhaustive series of meetings, hearings, and public presentations.

HB 170 and SB 180 were introduced in 1981. More hearings were held during the 1981 legislative session, during the interim, and continuing through the 1982 session. SB 180 passed the legislature, but because of controversial floor amendments, Governor Hammond vetoed the bill.

In 1983, SB 1 was introduced by Senators Sturgulewski and Gilman; HB 172, by Governor Sheffield. Both bills are basically the same as the bill that had passed the previous year minus the controversial amendments. More committee work was done in both the House and Senate on the 204 page bill.

Changes: For the most part, these bills reorganize and reword Title 29 for clarity and flexibility. Policy changes of any substance are very few. The main changes are:

Third Class Boroughs: The existing third class borough, Haines Borough, continues in existence, but there is no provision for incorporating new third class boroughs in the future.

Home Rule Status: Second class cities and unincorporated areas are authorized to adopt home rule charters, which must be ratified by a vote of the people.

Municipal Powers: A general grant of municipal powers is given to municipalities, instead of a long list of enumerated powers. The difference is more semantic than actual, since the list includes almost every conceivable municipal power. There is no change in the manner in which boroughs acquire powers.

Organizational Grants/Feasibility Studies: The organizational grants are increased and expanded, depending on the category of local government. Studies for the feasibility of local government are authorized.

Incorporation Requirements: The minimum number of people required for incorporation as either a first class or home rule city is increased from 400 to 600.

Ordinance Violation: Penalties for ordinance violations are increased from a maximum $500 and 30-days to class B misdemeanor penalties, which are a maximum of $1000 and 90-days.

Extraterritorial Jurisdiction: Solid and septic waste disposal, utility services, wharves, harbors, and other marine services are added to the list of powers that may be exercised outside the boundaries of the municipality, if the municipality has the authority to exercise the power inside its boundaries.

Economic Development: Allow economic development as a non-areawide power for second class

PLEASE NOTE: THE FOLLOWING PAGES WERE TREATED AS A UNIT IN THE ORIGINAL DOCUMENT

FISCAL NOTE
"An Act Relating to Municipal Government"

Article 3 of the Bill appears to be the only portion that has fiscal impact on this Division. That Article "TRANSITIONAL ASSISTANCE" provides for organizational grants to newly formed and newly reclassified cities. These grants are $50,000 the first year and $25,000 the second year.

Additionally, the bill provides for organization grants to newly formed Boroughs in the following amounts:

$300,000 for the first fiscal year
$200,000 for the second fiscal year
$100,000 for the third fiscal year

Finally, it provides for the department to establish an initial sales tax structure and an initial property tax structure.

Assumptions: In estimating the fiscal impact of the bill the following assumptions were made.

1. There would be two incorporations or reclassifications each year. This would produce an FY 84 cost of $100,000 and an annual cost of $150,000 from that point forward.

2. There will be one Borough Incorporation in 1986. This incorporation would necessitate expenditure of the 3 step organization grant in 1986, 1987, and 1988. Based on this assumption it is also estimated that contractual costs for setting up the two tax systems would be $350,000 in contractual costs spread over a 2 year period.

CHAPTER 10
INTRODUCTION, PURPOSE, SCOPE AND MISC. PROVISIONS

19.10.010 Introduction. This Title creates a unique set of land management principles and procedures for development in the North Slope Borough. The ideas contained in this Title were developed by officials and residents of the Borough in many public meetings held between 1979 and 1982 to develop the Borough's Comprehensive Plan, Coastal Management Program, and other planning studies. Reliance has also been placed on the Borough's previous interim zoning ordinance and other draft regulations. Procedural and administrative matters are designed to be as efficient and fair as possible to all concerned, and to comply with legal requirements.

19.10.020 **Purposes.** This Title 19 is adopted:

(a) To achieve the goals and objectives, and implement the policies, of the Borough Comprehensive Plan, including its Coastal Management Program;

(b) To ensure that the future growth and development of theBorough is in accord with the values of its residents;

(c) To identify and secure, for present and future residents, the beneficial impacts of growth;

(d) To identify and avoid, mitigate, or prohibit the negative impacts of growth; and

(e) To ensure that future growth is of the proper type, design and location, and is served by a proper range of public services and facilities.

19.10.030 **Geographic Scope.** This Title applies to all private, State-, Borough- and Municipally-owned land in the Borough. To the extent allowed by law or administrative regulation or policy, it also applies to federal lands in the Borough.

19.10.040 **Severability.** Should any provision of this Title be held to be in violation of State law, the State Constitution or the United States Constitution, such holding shall not affect the validity of any other provision.

19.10.050 **Consistency with Coastal Management Plan.** Issuance of a Use Permit pursuant to an adopted Resource Development Master Plan, or issuance of a Development Permit for a conditional use, together with conditions on approval if any, is conclusive evidence of the Development's compliance with the North Slope Borough Coastal Management Plan when adopted.

19.10.060 **Effective Date.** This ordinance shall become effective on January 1, 1983.

CHAPTER 20
DEFINITIONS

19.20.010 Rules of Construction.

For the purpose of this Title, certain terms or words used herein shall be interpreted as follows:

(a) Words used in the present tense include the future tense;

(b) The singular number includes the plural;

(c) The word "person" includes a corporation, partnership, joint venture, the Borough and any other public agency, as well as an individual or individuals;

(d) The word "lot" also includes the words "plot," "parcel," or "tract;"

(e) The term "shall" is mandatory and the word "may" is permissive;

(f) The word "used" or "occupied" as applied to any land, or structure or building includes the words "intended," "arranged," or "designed" to be used or occupied;

(g) The word "including" means including but not limited to.

19.20.020 Definitions. The following words shall have the following meanings for the purpose of this Title 19:

Accessory Use or **Structure** means a use or structure customarily subordinate or incidental to, and located on the same lot with a principal use, building or structure.

Administrator means the Borough Land Management Administrator, or his designee.

Agenda Item. An agenda item shall state the address or location of the site, a brief description of the proposed Development (including variances and incentives if any), the action requested and the Administrator's decision or recommendation thereon.

Agenda, Posted. The agenda shall state the name of the hearing body; the time, date and place of the meeting; and a list of each agenda item. The Commission shall establish, by resolution, at least one location in each Village and two locations in Barrow, in addition to the Borough offices, for the posting of the agenda. The agenda shall be posted at the Borough office and the Village location, if applicable, at least five days prior to the date of the meeting.

Alteration. Means a change to a use or development. A **Minor Alteration** is a change which has no appreciable affect on its surroundings as conclusively determined by the Administrator. A **Major Alteration** is any alteration except a minor alteration.

Animal Husbandry is a use involving the keeping of any animal other than household pets or working dogs.

Area Special Area, or Area, is a term used to indicate the geographic extent of a policy or policies, such as the Coastal **Area**, where the Coastal Management Program policies apply. Areas may overlap each other and the various zoning districts.

Area, Building means the total of areas taken on a horizontal plane at the main grade level of the principal building, and all accessory buildings or structures, exclusive of steps and porches.

Assembly means the North Slope Borough Assembly.

Best Available Technology means the technology or technologies that best and most safely implements the relevant policy and that is available to the applicant at the time of application or within a reasonable time thereafter.

Best Efforts means the best available technology or (where that term is inapplicable) the methodology or course of conduct, which will most likely result in minimizing the negative impacts of the Development.

Block. A piece or parcel of land entirely surrounded by public highways, streets, shorelines, streams, railroads right-of-way, survey lines or a combination thereof.

Borough Means the North Slope Borough, Alaska.

Building means any structure which is enclosed on the top and sides, including dome-shaped structures.

Coastal Area means the area within the Borough below 200 feet in elevation, and certain other areas, as indicated on CMP Map II-6.

Commercial Use is a use involving the storing, wholesaling or retailing of any substance, and accessory uses.

Commission means the Borough Planning Commission.

Conditional Use means any use except uses-by-right and prohibited uses. It is subject to a Development Permit pursuant to Chapter 60.

Density means the number of square feet of lot area per dwelling unit in any residential development except a group home or rooming house.

Developer means the person who makes the application for a Development Permit, and his successors in title or interest. If the Developer is other than the owner of the land subject to the application, the owner must also sign the application.

Development, unless specifically exempted below, means any of the following:

(a) Construction, reconstruction or major alteration of a structure;

(b) A Preliminary Subdivision Plat and the initial lease or sale of a parcel for resource exploration, extraction or development purposes;

(c) Change in the use of a site, including any structure thereon, from one type of development to another;

(d) Installation of a mobile home;

(e) Construction or enlargement of a public, quasi-public or private facility or improvement, including airports, roads and trails, ice roads, water or sewer mains or treatment facilities; electric, telecommunications, telephone, cable TV and similar lines, substations, generating facilities, transmission facilities, etc.; schools, hospitals and clinics, fire stations, police and other public safety facilities; parks, recreation facilities and buildings; cemetaries; and meeting halls;

(f) Disturbance of the surface of the ground (including submerged grounds) including but not limited to dredge or fill activities; construction of roads, or parking areas; creation of airstrips, piers, jetties, gravel pads, etc; creation of an equipment or material storage site, or tailing pile; creation of a refuse pile, dump or landfill; creation of a reservoir, settling or evaporation pond, or leach field; and creation of placer mining sites;

(g) Setting off flares, fires or explosions, or vibrations,specifically including seismic exploration; and

(h) Any site work in preparation or anticipation of the above except surveying.

The following are specifically excluded from the term "Development":

(i) A single family dwelling or duplex, other than a mobile home, on a single lot;

(j) Conduct of a home occupation;

(k) Subsistence, including the construction or emplacement of structures in furtherance of subsistence activities;

(l) Existing uses and minor alterations thereto;

(m) Alterations to uses set forth in (i), (j), and (k) above;

(n) Uses or structures accessory to those set forth in (i), (j), (k), and (l) above.

(o) Projects adopted as part of the Borough's annual Capital Improvements Program.

Development Permit means the permit for development as set forth in Chapter 60, including Revocable Development Permits.

Duplex means a building designed for or occupied exclusively by two families and constituting two dwelling units.

Dwelling Unit means a building or portion thereof providing independent and complete cooking, living, sleeping and toilet facilities for one family.

Dwelling, Multifamily means a building designed for or occupied by three or more families, with the number of families in residence not exceeding the number of dwelling units provided.

Dwelling, Single-family means a detached building designed for long-term human habitation exclusively by one family, having complete living facilities and constituting one dwelling unit. The term includes factory-built and prefabricated dwellings, but not mobile homes.

Easement. A grant by the property owner to another person or to the public of the use of any designated part of his property for specific purposes.

Existing Use means a structure in existence and the use or uses to which it is put on the effective date of this Title 19.

Family means one or more persons occupying a physically secure premises and living as a single housekeeping unit, as distinguished from a group home, or rooming house.

Feasible and Prudent Alternative means an alternative to the Development's proposed conduct or method which is consistent with sound engineering practice and which does not cause environmental, social, or economic impacts that outweigh the net public benefit to be derived from compliance with the relevant policy.

Floor Area Ratio is the ratio of the floor area of all buildings on the site to the gross area of the site, or (if applicable) the area of the built-up surface (pads, roads, airstrips, etc.) to the area of the lease.

Floor Area means the total horizontal area of all of the floors of a building or structure, measured on the exterior perimeter.

Gross Area means the total site area, excluding bodies of water, to be included within a proposed development as indicted on a site plan.

Group Home is a use, which serves as a dwelling either for persons seeking rehabilitation or recovery from any physical, mental, emotional, or legal infirmity, or for the elderly.

Home Occupation is a commercial use conducted in a dwelling unit, by the occupants of that dwelling unit.

Industrial Use is a use involving manufacturing, processing, warehousing, storage, landfills and dumps, resource extraction, and any use which is not a residential, commercial, service/professional, or public facility; and accessory uses.

Intensity of Use means the density of residential developments, and the floor area ratio of nonresidential developments.

Lot means a distinct parcel of land for ownership and tax purposes unless otherwise specified, the lot will be deemed to be the site for a development. See **site.**

Master Plan is the program for development of a Resource Development District, and constitutes an amendment to the Comprehensive Plan and these Regulations. See Section 19.40.056.

Mobile Home is a use involving a detached, single-family dwelling designed for long-term human habitation and having complete living facilities, constructed and fabricated into a complete unit at a factory and capable of being transported to location of use on its own chassis and wheels, identified by a model number and serial number by its manufacturer, and designed primarily for placement on an impermanent foundation, and accessory uses.

Net Public Benefit means that the beneficial impacts of a Development outweigh its detrimental impacts, as set forth in the policies contained in Chapter 80. Impacts shall be measured on the Borough and its residents, with consideration given to residents of any Village Area of Influence.

Nonresidential Use means a commercial, service/professional, subsistence, resource extraction, recreational or industrial use, or a public facility.

Notice, Meeting. For variances, incentives, appeals and rezonings, notice shall consist of both of the following:

(a) An agenda item in the posted agenda; and

(b) Public notice

Notice, Public Public notice shall consist of: a minimum of five days prior to the date of the meeting:

(a) Publication of the agenda item in a newspaper of general circulation in the Borough, and on Barrow radio;

(b) Mailing a copy of the agenda item to the Developer, and to the Village Council(s) if the Development is in a Village Area of Influence; and

(c) Delivering a copy of the agenda item to the Commission and the Mayor.

Plan means the North Slope Borough Comprehensive Plan, as amended from time to time.

Prohibited Use means a use not allowed in the zone.

Public Facility is a use involving a building or structure owned or used by a public body or utility company, or a dump or landfill, and accessory uses.

Recreational Use is a use involving activities or structures for recreational activities not for commercial or subsistence purposes, including but not limited to hunting, fishing, touring, sightseeing, boating, hiking, or athletics.

Regulations or **Land Management Regulations** means this Title 19, as amended from time to time.

Residential Use means a use involving the occupation of a building or structure for living. cooking, sleeping and associated recreation, and accessory uses.

Resource Extraction is a use involving the removal for commercial purposes of native vegetation, topsoil, fill, sand, gravel, rock, petroleum, natural gas, coal, metal ore, or any other mineral, and other operations having similar characteristics.

Revocable Development Permit means a Development Permit issued pursuant to Sections 19.60.090 and 19.70.080.

Rooming House is a use in which three or more persons either individually or as families are housed or lodged, with or without meals. Oilfield or pipeline camps, base facilities and boarding houses are specifically included in the term.

Service/Professional Use is a use involving the provision of personal services, whether for profit or not, churches, and accessory uses.

Sign is an accessory structure involving any lettered or pictorial device designed to inform or attract attention. The surface area of a sign is the entire area used for the above purpose, including all of the elements of the matter displayed, but not including black masking, frames, or structural elements outside the advertising elements of the sign which bear no advertising matter.

Site The location of a development. The site is the lot in all cases except resource extraction and accessory uses, in which case the site is the surface area to be disturbed, plus a radius of 100 feet.

Special Habitat is either: Discrete geographical areas which support essential life functions of significant fish or wildlife species including breeding, nesting, pupping, calving, spawning, rearing, feeding and hauling out areas; or which provide unique population elements including very high concentrations or isolated occurrence; or which provide habitat essential to the maintenance of endangered species; or

Habitat which supports seasonal concentrations of a significant fish or wildlife species including winter, spring, summer or fall concentrations; supports highly productive fish or wildlife populations; provides elements necessary for special uses including migration corridors and feeding areas; or provides supporting habitat essential to the maintenance of critical habitat (i.e. stream banks).

Street. Any right-of-way, private or public, which provides for vehicular or pedestrian circulation, including snow machines and related vehicles commonly used in the Arctic.

Structure means anything which is placed, constructed or erected and located on or under the ground, or attached to something fixed to the ground, such as a floating structure anchored to submerged ground, regardless of size, purpose or temporality, including but not limited to:

(a) A building;

(b) A tower, sign, antenna, pole or similar structure;

(c) Drilling or excavating apparatus, pipelines, pump stations and similar structures;

(d) A foundation, or gravel pad

(e) A fence;

(f) A sign;

(g) A street, road, ice road, parking area, pad or storage area;

Structure, Principal means a structure in which is conducted the main use of the lot on which the structure is situated.

Subdivision means the division of a tract or parcel of land into two or more lots or other divisions for the purpose, whether immediate or future, of sale, financing, lease, development or the transfer of any interest, including any resubdivision, and when appropriate to the context, relates to the process of subdividing or to the lands or areas subdivided. For the purposes of this title, "subdivision" does not include a division of land by the lease of subsurface right solely for the purpose of exploring such rights. The extraction of subsurface resources pursuant to each lease and related surface development, such as the construction of non-seasonal streets, utilities and structures necessarily incident to the extraction of subsurface resources shall be considered a "subdivision" subject to the provisions of this title.

Subsistence Use is a use and includes hunting, whaling, fishing, trapping camping, food gathering, and other traditional, and cultural activities performed in support of the basic beliefs and needs of the residents of the Borough.

Use-By-Right means a use, determined pursuant to the process for rezoning to the Resource Development District, as set forth in Section 19.40.052.

Use Permit is a permit issued for a use-by-right pursuant to Chapter 50.

Variance means the relaxation of the strict application of the terms of a Mandatory Policy. It does not apply to Best Efforts or Beneficial Policies, or use or intensity restrictions. See Sections 19.60.060.

Village means the communities of Point Hope, Point Lay, Wainwright, Atqasuk, Barrow, Nuiqsut, Anaktuvuk Pass, and Kaktovik.

Village Area of Influence means the area outside the City limits of a Village which is used in common by some or all of the residents thereof for subsistence, transportation, public facilities or other purposes, as indicated on Maps 11 A, B and C.

Village Council means the City Council of incorporated cities and the IRA Council of unincorporated villages.

Wetlands include areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.

CHAPTER 30
ADMINISTRATIVE PROVISIONS

19.30.010 **Administrator.** The Administrator is authorized and empowered to carry out all of the duties set forth for him in this Chapter, and shall have all other power and authority reasonably necessary or desirable to carry out those duties, including the power to delegate those duties to other employees of the Borough.

19.30.020 **Planning Commission — Creation and Membership.** There is hereby recreated the North Slope Borough Planning Commission (the "Commission") to consist of eight registered voters of the Borough. Members shall be appointed by the Mayor subject to confirmation by the Assembly for staggered terms of three years. Vacancies in the Commission shall be determined by the Mayor and shall be filled only for the unexpired portion of the term.

19.30.030 **Commission Procedures.** The Commission shall elect a chairman and such other officers as it deems advisable. It may establish such subcommittees as it deems necessary or desirable in the discharge of its powers and duties.

No action set forth in Section 19.30.040 below, shall be undertaken by the Commission except by the affirmative vote of a majority of members present and voting at a properly noticed public hearing.

The Commission shall meet on the last Friday of each month, and upon call of the Chairman.

The Commission shall keep a permanent record of its meetings and its actions.

The Commission shall make such other rules and regulations governing the conduct of its business as it deems necessary or desirable.

19.30.040 **Commission - Powers and Duties**

19.30.041 **Comprehensive Plan and Land Management Regulations.** The Commission may, from time to time, and shall at least once every five years, consider amendments to the Comprehensive Plan and Land Management Regulations, and if appropriate, recommended amendments to the Assembly for adoption. In this regard, it is the policy of the Borough to incorporate and integrate future environmental, sociocultural, capital improvements, and other studies into the Plan. The Borough intends to adopt the policy recommendations of these studies into the Plan

and these Regulations, to the end that there be a consistent body of policy to guide and direct public and private activities in the Borough.

The text of the Plan and the Regulations shall remain as consistent with each other as possible, and the policies set forth in each shall be substantially identical. Therefore, any proposed change should be examined for its effect on the goals, objectives and policies contained in the Plan, and any change in the Plan policies (i.e. addition, deletion or rewording of one or more policies) must automatically trigger an amendment to the comparable provisions of these Regulations.

19.30.042 **Coastal Management Plan.** The Commission shall consider and recommend adoption of a Coastal Management Plan for the Borough, and any future amendments thereto. The Coastal Management Plan, when adopted by all relevant parties, will become a component of the Comprehensive Plan, and the policies contained in the Coastal Management Plan shall be adopted as part of these Regulations and govern (together with all other applicable policies) development in the Coastal Area.

19.30.043 **Development Permits Involving Density Bonuses and Variances from Mandatory Policies.** The Commission shall hear and decide all permit applications involving a request for density bonus or a variance from a Mandatory Policy, and all appeals of permit decisions, and impose conditions and modifications thereon.

19.30.044 **Other Incentives and Rezonings.** The Commission shall make recommendations to the Borough Assembly on all permit applications involving incentives other than density bonuses and all proposed rezonings, indicating its opinion on the proposed Development's compliance with the Policies, and recommended conditions or modifications.

19.30.045 **Review of the Capital Improvements Program.** The Commission shall review annually the Capital Improvements Program of the Borough and submit its recommendations thereon to the Borough Assembly. The Mayor shall submit the Capital Improvements Program to the Commission in a reasonable period in advance of the fiscal year.

19.30.046 **Reports and Recommendations on Public Improvements.** The Commission shall review and report to the Borough Assembly regarding the location, design, construction, demolition or disposition of any public building, facility, collector or arterial street, park, greenbelt, playground or other public facility. The report and recommendation of

the Commission shall be based upon the Policies, the Plan, and the Capital Improvements Program.

19.30.047 **Subdivisions.** The Commission shall decide Preliminary Plats except for minor subdivisions. The decision shall be based on the Policies, the Plan, the Capital Improvements Program, and the Subdivision Regulations. The existing subdivision ordinance shall be a component of the Comprehensive Plan. The new draft subdivision ordinance shall, when adopted by the Borough Assembly, become a component of the Comprehensive Plan and all policies, standards and guidelines shall be adopted as part of these regulations.

19.30.048 **Rules.** The Commission may, by motion, establish its own rules of procedure and committees, meeting times, dates and places; media for public notice, development application and evidentiary forms, referral and review agencies and procedures, and any other matter reasonably necessary or desirable for the full and complete conduct of its duties, and those of the Administrator, pursuant to this Title 19 and any other provision of Borough or State law.

19.30.049 Statute. In addition, the Commission has all powers and duties of planning commissions of a Home Rule Borough as set forth in law.

19.30.050 Fees. The fee for a Use Permit shall be $25.00. The fee for a Development Permit shall be $100.00. The fee for a rezoning shall be $1,000.00.

19.30.060 Enforcement.

19.30.061 Compliance. The developer of a use-by-right shall apply for and obtain a Use Permit prior to any initial site work, except surveying. The developer of all other Development shall apply for and obtain a Development Permit prior to any site work, except surveying.

19.30.062 Enforcement Orders. The Administrator may order:

(a) The discontinuance of activity for any development which does not comply with the terms of this Title 19;

(b) The removal or abatement of buildings or structures subject to the Revocable Development Permit provisions of Section 19.60.090; or

(c) Any other action necessary to ensure compliance with all provisions of this Title 19, including, but not limited to, suspension of Use Permits and Development Permits.

Any such enforcement order shall be signed bythe Administrator and served upon the developer or his agent or supervisor on the site (if known), or (if not known) posted in a conspicuous place on the site. The Administrator shall transmit a copy of the enforcement order to the Chairman of the Commission, and shall keep a copy thereof in permanent record.

Upon application of the developer, or upon its own motion, the Commission shall review the enforcement order at its next regular meeting. The review shall be limited to the presence of the violations stated in the enforcement order, and in such review the burden shall be upon the developer to prove that the violation does not exist or did not occur. The Commission, by resolution, may modify or rescind the enforcement order.

19.30.063 Violations, Penalties and Remedies.

(a) **Civil Remedies.** Upon violation of any of the provisions of this Title 19, or any of the conditions placed upon any permit issued pursuant hereto, the Administrator, on behalf of the Borough, or any aggrieved citizen, may institute or cause to be instituted any appropriate civil action to prevent, enjoin, abate, estop, remove or punish such violation and to obtain monetary damages suffered

by such party. In addition to injunctive and compensatory relief, each violation shall be subject to a civil penalty not to exceed $10,000.00 and attorney's fees as provided by law. An action to enjoin a violation of this Title 19 may be brought notwithstanding the availability of any other remedy. Upon application for injunctive relief and the finding of an existing or threatened violation, the Court shall grant injunctive relief to restrain the violation.

(b) **Criminal Remedies.** Every act where the maintenance of any condition prohibited by this Title 19, or by any condition placed upon any permit issued pursuant hereto, is unlawful, and the willful commission of such act or maintenance of such condition is a misdemeanor. Every person convicted of a violation of any provision of this Title 19 or of any condition placed upon any permit issued pursuant hereto shall be punished by a fine of not more than $500.00, a jail term not to exceed 30 days, or both.

Each unlawful act or condition, and every day upon which such shall occur, shall constitute a separate violation of this section.

(c) **Parties.** A proper party for any enforcement action under Subsections (a) and (b) hereof shall include, but shall not be limited to, the owner of the site

or any part thereof; any lessee or occupant of the site or any part thereof; and the developer, and its agents, contractors and subcontractors, and employees who participate in, assist, commit, or maintain a violation.

19.30.070 **Interpretation.** All questions of interpretation of the provisions of this Title 19 shall be treated as an appeal, either pursuant to the provisions of Section 19.50.040 or the provisions of 19.60.070, respectively.

CHAPTER 40
ZONING DISTRICTS

19.40.010 Map Adoption. North Slope Borough Maps 1-10 and 11A, B and C, inclusive, are hereby adopted and made a part of this Title 19. The map attached hereto entitled, **Zoning Districts Map of the North Slope Borough, Alaska,** together with the Special Area Overlays thereto, is hereby adopted and made a part of this Title 19.

19.40.011 Effect and Interpretation of the Zoning Districts Map. Map 1 - Zoning Districts - graphically depicts the geographic location of the zoning districts set forth in Sections 19.40.020, 19.40.030, 19.40.040 and 19.40.050. The map is binding and may be amended only by the process set forth in Sections 19.40.060 et seq. The map is not accurate because of scale, and therefore the following principles of interpretation apply:

(a) The City limits of Barrow and each incorporated village are the boundaries of the applicable B and V districts, respectively;

(b) The limits of the V district for Point Lay are the lots, tracts and right-of-way indicated on the H.V. Lounsbury and Associates Plot, which is adopted and incorporated herein by reference;

(c) The limits of the seven designated unitization fields are the boundaries of the respective Resource Development Districts;

(d) The Conservation District extends seaward to the full limit of the Borough's jurisdiction.

19.40.012 Other Maps — Effect and Interpretation. Comprehensive Plan Maps 2-10 and 11A, B and C, inclusive, indicate the probable existence of areas where various special policies apply. These maps are representational only, and in all instances, policies will be applied on an actual occurrence basis. The maps create a rebuttable presumption of the occurrence or nonoccurrence of the indicated element and, since this is their only legal effect, they may be amended merely by motion of the Commission.

19.40.020 Village (V) Districts.

19.40.021 **Intent.** The Village Districts govern the city limits of each incorporated Village, and the sites and immediate environs of unincorporated Villages in the Borough. The intent of the various Village Districts is to accomodate Development which:

(a) Reinforces traditional values and lifestyles;

(b) Is in accord with the Capital Improvements Program and Comprehensive Development Plan for the Village;

(c) Is in accord with the desires of the residents of the Village.

19.40.022 **Uses By Right.** There are no uses-by-right in the Village Districts. (It should be noted that these Regulations only govern "Development", and uses and activities excluded from the definition of that term may take place without any form of regulation under this title).

19.40.023 **Prohibited Uses.** Industrial uses (except warehousing or storage of supplies or commercial goods to be used in the Village by the residents thereof) are prohibited in the Village Districts.

19.40.024 **Conditional Uses.** All other types of Development are conditional uses in the Village Districts, and are subject to a Development Permit pursuant to Chapter 60.

19.40.025 **Special Policies.** Special policies in the various Village Districts may be adopted as part of the Village Comprehensive Development Plan, if so, shall be incorporated into Chapter 80 by ordinance.

19.40.030 Barrow (B) District.

19.40.031 Intent. The Barrow District encompasses the city limits of the City of Barrow. The intent of the Barrow District is to accomodate a full range of urban development which:

(a) Does not materially adversely impact existing and future subsistence activities by residents of the City;

(b) Recognize and reinforces, through special policies, various existing neighborhoods in the City;

(c) Is in accord with the Capital Improvements Program and Comprehensive Development Plan for the City; and

(d) Is in accord with the desires of the residents of the City.

19.40.032 Uses-by-Right. There are no uses-by-right in the Barrow District. (It should be noted that these Regulations only govern "Development", and uses and activities excluded from the definition of that term may take place without any form of regulation under this title).

19.40.033 Prohibited Uses. Resource extraction is prohibited in the Barrow District.

19.40.034 Conditional Uses. All other types of Development are conditional uses in the Barrow District, and are subject to a Development Permit pursuant to Chapter 60.

19.40.035 **Special Policies.** Special policies governing the BarrowDistrict may be adopted as part of the Barrow Comprehensive Development Plan and, if so, shall be incorporated into Chapter 80 by ordinance.

19.40.040 **Conservation (C) District.**

19.40.041 **Intent.** The Conservation District encompasses the entire area of the Borough, except the Villages, the City of Barrow, and areas specifically zoned for Resource Development pursuant to Sections 19.40.060 et seq., below. The District is intended to conserve the natural ecosystem for all the various species upon which Borough residents depend for subsistence. Subject to this overall intent, it can accomodate resource exploration and development on a limited scale, but major resource development projects will find it advantageous to apply for rezoning to the Resource Development District.

19.40.042 **Uses-by-Right.** There are no uses-by-right in the Conservation District. (It should be noted that these Regulations only govern "Development", and uses and activities excluded from the definition of that term may take place without any form of regulation under this title).

19.40.043 **Prohibited Uses.** There are no prohibited uses in the Conservation District.

19.40.044 Conditional Uses. All types of Development are conditional uses in the Conservation District, and are subject to a Development Permit pursuant to Chapter 60.

19.40.050 Resource Development (RD) District.

19.40.051 Intent. The intent of the Resource Development District is to accomodate large scale resource extraction and related activities which:

(a) Does not permanently and seriously impair the capacity of the surrounding ecosystem to support the species upon which Borough residents depend for the major portion of their subsistence;

(b) Is planned, phased and developed as a unit, or series of interrelated units, (the "Master Plan"), with provisions made for all necessary public and private facilities;

(c) Meets the various special policies set forth for all Resource Development Districts, as well as those imposed on each individual Resource Development District at the time of designation.

The Resource Development District is designed and intended to handle the cumulative impacts of large scale development, and to offer developers quick, inexpensive, predictable permit approvals.

19.40.052 **Uses-by-Right.** All Development indicated on the approved Master Plan, and minor alterations thereto, is a use-by-right in the Resource Development District, subject to any conditions on the Master Plan imposed pursuant to Chapter 70.

19.040.053 **Prohibited Uses.** No type of Development is prohibited in the Resource Development District per se, although certain uses and activities may be restricted or prohibited by the Master Plan or by conditions imposed on it at the time of adoption.

19.040.054 **Conditional Uses.** All uses not indicated on the approved Master Plan as uses-by-right or prohibited uses, and major alterations to uses-by-right, are conditional uses in the Resource Development District.

19.040.055 **Application.** An application for a rezoning to the Resource Development District shall be accompanied by:

(a) Maps, at a scale to be determined by the Administrator, indicating the site requested to be rezoned, the occurrence of all Special Areas on and within two miles of the site, all existing Development on the site and within two miles of the site, and all proposed Development, as defined in these Regulations, on the site to be governed by the proposed district;

(b) Engineering drawings and analyses of all proposed public or quasi-public facilities, and architectural renderings of all other proposed structures;

(c) A phasing program for development of the proposed uses-by-right;

(d) An analysis of the cumulative impact of the proposed Development in the proposed district pursuant to each applicable Policy in Chapter 80.

(e) Requested policy changes (modification in wording or application of policies, additions of new policies, or suspension of existing applicable policies) for the proposed district, and an analysis of the cumulative impact of the proposed Development in the proposed district pursuant to the policies if changed;

(f) Incentives, if any, requested pursuant to Chapter 90.

(g) A Preliminary Plat;

(h) The unitization Plan of Development if applicable; and

(i) Such other information as the Commission by rule may prescribe.

19.040.056 **Master Plan.** Adoption of a Resource Development District shall be accomplished pursuant to the procedures set forth in Sections 19.40-020 et seq. for rezonings.

The ordinance shall contain a Master Plan consisting of:

(a) A map or maps indicating all Development activity which will be a uses-by-right and conditional uses, identified as such;

(b) Prohibited uses;

(c) Special policies applicable in the District, and relevant supporting information if available;

(d) Conditions on approval of the District, or on approval of any Development in it, pursuant to Chapter 70;

(e) Incentives, if any, pursuant to Chapter 90; and

(f) The approved final Plat; and

(g) Such other material as the Commission and Assembly deem advisable.

19.40.057 **Prudhoe Bay; Milne Point and Kuparuk River.** The Prudhoe Bay, Milne Point and Kuparuk River unit fields are hereby zoned to the Resource Development District, and the relevant Plan of Development and Operations for the unitized fields as approved by the Alaska Department of Natural Resources on the effective date of this Ordinance, are hereby adopted as the Master Plan for each of those Districts.

19.40.058 **Gwydyr Bay, Duck Island, West Mikkelsen and Point Thompson.** The Gwydyr Bay, Duck Island, West Mikkelsen and Point Thompson unit fields are hereby zoned to the Resource Development District. No Master Plan is approved for any part of these districts, and until such time as a Master Plan is approved for all or part thereof pursuant to Sections 19.40.060 et. seq., there are no uses-by-right or prohibited uses in these districts, and all Development is subject to a Development Permit pursuant

to Chapter 60.

19.40.060 Rezonings.

19.40.061 Initiation. A rezoning may be initiated by the Administrator, the Commission, a Village Council, the Borough Assembly, or the owner or developer of the land. A rezoning from the Conservation District (but not the Resource Development District) to the Village or Barrow Districts, as applicable, will take place automatically upon official notification to the Borough that the boundaries of a City have been altered.

19.40.062 Restrictions on Rezonings. Rezonings covering less than ten acres may not be considered, unless the rezoning constitutes the expansion of an existing contiguous zone, or unless it comprises the alteration of City boundaries mentioned in Subsection 19.40.021, above. Rezonings which are substantially the same as a proposed amendment which was rejected within the previous three months may not be considered.

19.40.063 Procedure. A rezoning shall follow the procedure set forth in Sections 19.60.060 et seq. for variances, except that the Commission's decision shall merely constitute a recommendation to the Borough Assembly. As soon as possible after the Commission recommendation, the Borough Assembly shall post public notice and hold a public hearing on the proposed rezoning. At such hearing, the recommendation of the Commission shall be rebuttably

presumed to be correct, which presumption may be overcome with a preponderance of the evidence.

A rezoning shall be adopted by ordinance, and any conditions thereon shall be contained in the ordinance. Upon adoption of any rezoning, the Administrator shall cause the official zoning map to be changed, to reflect the operation of the ordinance.

CHAPTER 50
USE PERMITS FOR USES-BY-RIGHT IN RESOURCE DEVELOPMENT DISTRICTS

19.50.010 Permit Required. All uses-by-right are required to obtain a Use Permit pursuant to this Chapter 50 prior to commencement of site work.

19.50.020 Burden of Proof. In all applications for a Use Permit the burden shall be on the Administrator to prove by a preponderance of the evidence that the Development does not implement a policy.

19.50.030 Procedure - Administrator Decision.

19.50.031 Submission. The Developer shall submit one copy of a completed and properly executed Use Permit application to the Administrator.

19.50.032 Staff Procedure. The Administrator will:

(a) On the same business day determine whether: (1) the Development contains no use other than uses-by-right; (2) whether the submission requirements are met; and (3) whether the

application is void of any major alterations. If not, he shall return the application to the Developer.

(b) If the application for a use-by-right is complete and contains no major alterations, he shall determine, within three business days, whether the Development meets the requirements of the adopted Master Plan. He shall also indicate in the appropriate place on the application form any Master Plan conditions pursuant to Chapter 70 placed on his approval.

(c) **Major Alterations.** The Administrator does not have the authority to process Use Permit applications for Development which contains a major alteration from the approved Master Plan. Such Development is processed as a conditional use pursuant to Chapter 60.

19.50.033 **Decision.** If the Development meets the requirements of the adopted Master Plan, the Administrator shall issue a Use Permit and the Master Plan conditions shall be part of the approved permit. If the Development does not meet the requirements, the Administrator shall deny the permit and note his reasons. The Administrator shall issue his decision within five business days of submission of the application.

The Administrator shall mail a copy of the application and the decision to the Developer and the Chairman of the Commission, and shall keep a permanent record thereof.

19.50.040 **Appeals.** An appeal to the Commission of the Administrator's decision on any Use Permit may be undertaken in the manner set forth in Sections 19.60.070 et seq.

CHAPTER 60
DEVELOPMENT PERMITS FOR CONDITIONAL USES IN ALL DISTRICTS

19.60.010 **Permit Required.** All conditional uses, and uses-by-right which contain major alterations from the approved Master Plan, are required to obtain a Development Permit prior to commencement of site work. Permits are decided by the Administrator unless a variance or a density bonus is requested by the Developer, in which case they are decided by the Commission.

19.60.020 **Burden of Proof.** In all applications for a Development Permit, the burden of proof shall be as follows:

(a) **Permit Decision.** Except as noted below, the burden shall be on the Developer to prove, by a preponderance of the evidence, that the standards set forth in Section 19.60.030 are met, or that a variance should be granted from a Mandatory Policy.

(b) **Appeals.** For the purposes of appeals from the Administrators decision to the Commission or from the Commission to the Assembly, the initial decision is presumed to be correct, but that presumption may be rebutted by a preponderance of the evidence.

(c) **Village Districts and Village Areas of Influence.** Within the Village Districts and Village Areas of Influence, consideration will be given to the opinions of residents of the Village on all matters in which they have a special expertise.

(d) **Special Areas Maps.** The Special Areas Maps are presumed correct, which presumption may be rebutted by a preponderance of the evidence.

(e) **Referral Agencies.** Consideration will be given to the comments and recommendations of referral agencies, including regulations and lease stipulations by State and Federal agencies, if any.

19.60.030 Decision-Making Standards. The Borough shall issue a Development permit if it finds that all four of the standards set forth below are met by the Development, and shall not issue the permit otherwise:

19.60.031 Mandatory Policies. The Development implements each relevant Policy, or the grounds for granting a variance are met where a variance is requested;

19.60.032 **Best Efforts and Minimization Policies.** The Developmentrepresents the best effort possible to implement the Best Efforts and Minimization Policies;

19.60.033 **Beneficial Policies.** On the basis of its performance on the Policies taken as a whole, the Development represents a net public benefit; and

19.60.034 **Conditions.** The conditions imposed will be sufficient to guarantee compliance with the relevant policies.

Prior to denying, or placing a condition more restrictive than that placed by the State government upon a permit for a Use of State Concern as defined in Title 46, Alaska Statutes, or a Resource Development District Master Plan, the Administrator shall specifically:

(a) consult with and consider the views of appropriate federal, state and regional agencies;

(b) consider the availability of reasonable alternative sites in an adjacent location the use of which is authorized by the Administrator; and

(c) base his decision on an analysis showing that the proposed Development is incompatible with the proposed site on the basis of the policies set forth in Chapter 80.

19.60.040 Application.

19.60.041 Pre-Application Conference. Prior to submission of an application, the Developer shall meet with or telephone the Administrator for the purpose of discussing the site, the proposed Development, and the Development Permit procedure. The Administrator shall discuss these matters with the Developer, with special attention to policies which may pose problems or constraints on the site or the proposed Development activity, (especially policies for which the Development may need a variance), and Beneficial Policies which may create opportunities for the Developer.

19.60.042 Submission. The Developer shall submit a completed and properly executed Development Permit application in the number of copies established by rule of the Commission. The application shall contain such information as the Commission, by rule, may prescribe, and shall be accompanied by maps, architectural drawings, and engineering plans as prescribed by rule of the Commission, and a completed evidentary form for each relevant policy. To the maximum extent possible without violating the intent of the policies set forth in Chapter 80, submission requirements shall conform to the submission requirements of State and/or Federal agencies.

19.60.050 Procedure and Decision - Normal Application. Within three days of submission, the Administrator shall:

(a) Determine whether the application is complete and thesubmission requirements of Section 19.60.042 are met. If not, the Administrator shall return the application to the Developer. If so, the Administrator shall;

(b) Determine whether a variance or an incentive is requested. If so, he shall follow the procedure set forth in Sections 19.060.060 et seq. If not, he shall then:

19.60.051 Cause public notice to be made and transmit copies of the application (or the relevant portions thereof) to designated referral agencies, including Villages for Development within a Village Area of Influence. Such referral agencies shall be indicated by rule of the Commission and may vary depending on the location of the site and the type of use proposed. Referral agencies and the public shall have fifteen days to respond, or longer if allowed by rule of the Commission.

19.60.052 Within twenty days of his determination that the requirements of Section 19.60.042 are met, or longer if the response time for referral agencies and the public has been extended, the Administrator shall determine:

(a) Whether the Development meets the requirements of each Mandatory Policy. He shall indicate in the appropriate place on the evidentiary form: 1) whether the policy is applicable to the Development; and 2) (if so) whether the Development implements the policy or does not implement the policy; and 3) any conditions or

requirements for guarantees pursuant to Chapter 70;

(b) The Development's performance on each Best Efforts, Minimization and Beneficial Policy. He shall indicate on the appropriate place on the evidentiary form: 1) whether he agrees or disagrees with the Developer's statement of performance for the policy; and 2) (if he disagrees) his reasons for disagreement and; 3) any conditions pursuant to Chapter 70.

(c) His decision on the permit application, pursuant to the standards set forth in Section 19.60.030, with the conditions set forth on the evidentiary forms.

19.60.053 On or before the close of business on the last available day, he shall transmit his decision to the Developer and to the Commission.

19.60.060 **Variance From A Mandatory Policy.** For applications involving a violation of a Mandatory Policy, the Development Permit application shall be denied unless the Developer applies for, and obtains, a variance.

19.60.061 **Grounds for Variances.** No variances may be granted from the terms of a Best Efforts, Minimization or Beneficial Policy. Variances from the terms of a Mandatory Policy may be granted by the Commission if, and only if, the Developer shows by a preponderance of evidence that both of the following requirements have been met:

(a) The development implements the spirit, but not theletter, of the Mandatory Policy; and

(b) Enforcement of the strict terms of the Mandatory Policy would either:

* Work an undue hardship on the developer and/or the future occupants or users of the Development, without a concomitant public purpose; or

* Require a site design or building design which is completely out of character with the surroundings, and which is not justified by a concomitant public benefit.

19.60.062 **Administrator's Recommendation.** Within three days of submission the Administrator shall determine whether the application is complete and the submission requirements of Section 19.60.042 are met. If not, the Administrator shall return the application to the Developer. If so, the Administrator shall as soon as reasonably possible:

(a) Schedule the application for a public hearing, notify the Developer of the date of the hearing, and cause notice of the meeting to be made;

(b) Transmit copies of the application (or the relevant portions thereof) to designated referral agencies, including Villages for Development within a Village Area of Influence. Such referral agencies shall be indicated by rule of the Commission and may vary depending on the location of the site and the type of use proposed. Referral agencies and the public

have fifteen days to respond, or longer if allowed by rule of the Commission.

(c) Within twenty days of his determination that the requirements of Section 19.60.042 are met, or longer if the response time for referral agencies and the public has been extended, the Administrator shall determine:

* Whether the development meets the requirements of each relevant Mandatory Policy. He shall indicate in the appropriate place on the evidentiary form: 1) whether the policy is applicable to the Development; and 2) (if so) whether the Development implements the policy or does not implement the policy; and 3) any conditions or requirements for guarantees pursuant to Chapter 70; or 4) (if the Development does not implement the policy) whether he recommends that a variance be granted therefrom together with his reasons.

* The Development's performance on each Best Efforts, Minimization and Beneficial Policy. He shall indicate on the appropriate place on the evidentiary form: 1) whether he agrees or disagrees with the Developer's statement of performance for the policy: and 2) (if he disagrees) his reasons for disagreement and; 3) any conditions pursuant to Chapter 70.

* His recommendation for action by the Commission, pursuant to Section 19.60.030.

(d) On or before the close of business on the last available day he shall transmit his recommendations to the Developer and to the Commission.

19.60.063 **Commission's Action and Decision.** The Commission shall hold a public hearing on the Development Permit application. If the proposed Development is located in a Village District or a Village Area of Influence, it may hold the hearing in the affected Village (or Villages) and may hold another hearing in Barrow if such is deemed necessary or desirable. The Commission shall adopt the Administrator's recommendation on each policy unless it finds, by a preponderance of the evidence, that the Administrator's recommendation was in error, and states its reasoning for such finding with particularity. In addition, for good cause, the Commission in its discretion may alter the conditions on approval recommended by the Administrator.

If the Commission finds that the Development meets all the standards of Section 19.60.030, it shall issue a Development Permit and the conditions and requirements shall be part of the approved permit. If the Development does not meet the standards of Section 19.60.030, the Commission shall deny the permit and note with particularity its reasons for the decision.

The Administrator shall then transmit a copy of thedecision to the Developer and the Borough Assembly, and shall keep a permanent record thereof.

19.60.070 Appeals.

19.60.071 Appeals to the Commission.

Any aggrieved person, including the Developer, may appeal the Administrator's decision on any Use or Development Permit by serving written notice to the secretary of the Commission and the Developer prior to the Commission's next regularly scheduled meeting. The notice shall state the policy or policies on which the appellant disagrees with the Administrator and the reasons why the appellant believes the Administrator is incorrect. The Commission may, but need not, hold a hearing on the appeal. The issues before the Commission shall be limited to those raised on appeal, and the evidence shall be limited to a review of the record, although further argument may be allowed. The burden of proof shall be on the appellant. The Commission may affirm or reverse the Administrator's decision, return the matter to the Administrator for further evidence, or change the conditions on approval.

19.60.072 Appeal to the Assembly.

An appeal to the Assembly of a Commission decision may be made in the same manner as set forth in Section 19.60.071 for appeals to the Commission. The Assembly's decision shall be final.

19.60.080 Duration of Permits. Development Permits are valid for the duration of the occupancy and existence of the Development and the Developer's compliance with the terms and conditions thereof, except that they expire automatically upon the earliest of any of the following:

(a) Twelve months after approval if no actual construction has commenced; or

(b) The expiration date of a Revocable Development Permit.

19.60.090 Revocable Development Permits.

19.60.091 Issuance. Revocable Development Permits may be issued for any Development except uses-by-right, pursuant to Section 19.70.080. Revocable Development Permits are issued pursuant to the same standards and procedures as set forth for Development Permits in this Chapter 60.

19.60.092 Effect. On or before the expiration date of a Revocable Development Permit, the Developer shall cease the use or occupancy subject thereto. The Developer may apply for a new Development Permit or Revocable Development Permit prior to expiration but, unless specifically allowed by the Commission in advance, the pendency of such application shall not extend the expiration date.

CHAPTER 70
CONDITIONS ON APPROVAL

The Administrator may place conditions upon issuance of a permit which he deems necessary or desirable to ensure that a policy will be implemented in the manner indicated in the application. To the maximum extent possible without violating the intent of the policies set forth in Chapter 80, the Administrator shall conform the conditions to the conditions, restrictions and stipulations contained in State or Federal permits, leases or similar instruments. The conditions may consist of one or more of the following:

19.70.010 **Development Schedule.** The conditions may place a reasonable time limit on construction activity associated with the Development, or any portion thereof, to prevent speculation in permits, to enable new applications or revisions to come forward for unviable projects, to minimize construction-related disruption to ensure that Development is not used or occupied prior to substantial completion of required public or quasi-public facilities, or to implement other policies.

19.70.020 **Use.** The conditions may restrict the future use of the Development to that indicated in the application and uses of similar impact or effect on the policies.

19.70.030 **Common Maintenance Agreement.** The conditions may require that if an agreement among Developers or users, or a homeowner's association or special district is necessary or desirable to hold or maintain common property, that it be created prior to occupancy.

19.70.040 **Dedications.** The conditions may require conveyances of title or easements to the public, to public utilities or to a common entity. They may require construction to public standards, and then dedication, of public facilities to serve the Development and the public.

19.70.050 **Construction Guarantees.** The conditions may require the posting of a bond or other surety or collateral (which may provide for partial releases), to ensure that all construction features required by a policy are in fact constructed as represented and approved.

19.70.060 **Commitment Letter.** The conditions may require a letter from a utility company or public agency legally committing it to serve the Development.

19.70.070 **Covenants.** The conditions may require the recording of covenants on the site to ensure continued implementation of a policy by future owners or occupants.

19.70.080 **Revocation of Permits.** The conditions may provide that the permit shall be automatically revoked upon the occurrence of a certain event or events, or at a date certain. In such case, it shall be the sole responsiblity of the owner to apply for a new permit. Any condition mandating the revocation of a permit shall state with particularity, the grounds therefor and the policy or policies to be reviewed upon reissuance. Thereafter, reissuance shall be determined solely on the issue of the Development's compliance with the specified policy or policies.

CHAPTER 80
POLICIES

19.80.010 Introduction The policies contained in this Chapter constitute the rules by which a Development other than a use-by-right is reviewed and approved or denied. They are reformatted from the Development Policies in the Comprehensive Plan, and the citations are to the relevant Development Policy in the Plan.

19.80.020 Mandatory Policies All Development must comply with each of the policies set out in Section 19.80.021 and 19.80.025 unless:

(a) The Administrator determines that the policy is not applicable to the Development; or

(b) The Commission grants a variance from the policy pursuant to Sections 19.60.060 et seq.

19.80.021 Prohibited Development The following Development is prohibited:

(a) Development which will likely result in depleting a subsistence resource, as set forth in Section 3.5.1 of the Plan, below the subsistence needs of local residents of the Borough. (3-1.1, 5-1.2)

(b) Drilling and other high-impact activities within the area of bowhead whale migration routes during the migration season. (3-3.1)

(c) Development that does not meet the standards of the Borough Coastal Management Program, when adopted, for management of Sensitive Areas such as estuaries, wetlands, tideflats, beaches, rivers, streams and lakes, permafrost landscape, and high energy ice impacted shorelines. (3-3.3)

(d) Deposition of toxic materials and untreated solid waste on the barrier islands, sea ice, artificial islands, at sea, in any wetlands, rivers or lakes which support or are capable of supporting significant populations of fish and wildlife. (3-7.1, 5-7.2)

(e) Development which precludes subsistence user access to asubsistence resource. (3-1.4

(f) Development which significantly disturbs cultural or historic sites listed on the National Register of Historic Places or eligible for inclusion on the National Register. (4-1).

(g) Development which significantly interferes with traditional activities at cultural or historic sites identified in this Plan. (4-1).

(h) Surface disturbance of newly discovered historic sites prior to archaeological investigation. (4-2)

(i) Development which grossly violates guidelines on the rate or amount of growth adopted by a Village as a part of its Comprehensive Development Plan. (4-3)

(j) Mining during portions of the year when there would likely be substantial harm to the environment, such as the excessive silting of rivers and streams. (5-5.5)

(k) Any development located outside the Prudhoe Bay Base Area, Pump Station 3, or the Chandalar Base Area, and tourist and recreational facilities located anywhere, within the Haul Road Corridor Special Area. (7-3)

19.80.025 Required Features The following policies are required for applicable development:

(a) Vehicles, vessels, and aircraft usage in Special Habitat Areas is required to be confined to corridors designated in the permit. (3-2.3)

(b) Offshore exploration, development and production drilling outside the landfast ice area (Plan Map 9, CMP Map I-2 and Plan Section 5.5.3.5 Zone AO) is required to be sited on a barrier island or artificial islands. A variance from this policy to allow offshore platforms will be granted only if the requirements of Sections 19.60.060 et seq. are met and, in addition, the Developer demonstrates the actual capability of the structure to withstand all natural forces, specifically including ice. (3-5.3)

(c) Development with water or airborne emissions is required to comply with all State Department of Environmental requirements. (5-5.2)

(d) Industrial and commercial development is required to be served by solid waste disposal facilities which meet state and federal regulations. (5-7.1)

(e) Development not on a sewer system is required to impound and process effluent to state and federal quality standards. (5-7.3)

(f) Marine tankers to be utilized in offshore areas must be specially designed to withstand environmental hazards specifically including sea ice. (3-6.8).

(g) Residential development associated with industrial and resource extraction development must be removed when the industrial or extractive use is completed unless pursuant to Plan policies removal is more harmful than non-removal. (5-3.2, 3-8.3)

(h) Development in a Village is required to be consistent with the relevant Village Comprehensive Development Plan, when adopted. (3-8.1)

19.080.030 Best Efforts Policies All Development must comply with each of the policies set out in Sections 19.80.031 and 19.80.032 unless:

(a) The Administrator determines that the policy is not applicable to the Development; or

(b) The Administrator determines that the Developer has used his best efforts to comply with the policy and that there is no feasible and prudent alternative to the proposed compliance:

19.80.031 Prohibited Development

(a) Development that will likely result in significantly decreased productivity of subsistence resources or their ecosystems. (3-1.2)

(b) Development which restricts subsistence user access to a subsistence resource (3-1.3, 3-7.4)

(c) Development within Special Habitat Areas identified in Section 10.4.1 of this Plan. (3-2.1)

(d) Resource extraction uses within a Special Habitat Area. (3-2.2)

(e) Development in Sensitive Areas such as estuaries, tideflats, beaches, rivers, streams and lakes, and high energy ice impacted shorelines. (3-3.2)

(f) Facility siting, drilling or other high-impact activities at Barrier Islands that are intensively used by Beluga whales as feeding and resting areas as identified on CMP Map II-3. (3-3.4)

(g) Development on a shoreline that does not require a shoreline location, landfills, fuel or toxic material storage areas and dumps on or near a shoreline. (3-4.2, 5-2.3)

(h) Public highway development, except for village roads and streets and highways indicated in the Capital Improvements Program. (3-6.3)

(i) Transportation development including pipelines which significantly obstructs wildlife migration. (3-6.5)

(j) Development to accomodate petroleum transportation via marine tankers. (3-6.6)

(k) Duplicative transportation corridors from resource extraction sites to tidewater or railroads. (3-6.7)

(l) Development associated with purely recreational uses of land and wildlife habitat, such as commercial hunting and fishing camps or lodges and recreational second home subdivisions. (3-9.1, 6-2.2.1)

(m) Development of tourist facilities except as provided for pursuant to a Village Comprehensive Plan. (3-9.2, 6-2.2.2)

(n) Development which significantly violates guidelines on the rate or amount of growth adopted by a Village and adopted as a part of its Comprehensive Development Plan. (4-3)

(o) Development which substantially pollutes the natural environment (including water, air, noise and vibration). (5-1.1)

(p) Development in flood plains and other geologic hazard areas. (5-4.1)

(q) Siting, design, construction, and maintenance of transportation and utility facilities (including ice roads) are required to minimize alteration of shorelines, water courses, wetlands, and tidal marshes and significant disturbance to special habitat; and to avoid critical fish migration periods. (7-5)

(r) Disturbance of subsistence resource habitat, or migration routes during migration periods, by transportation modes or development. (7-4)

(s) Resource development which uses suppliers or subcontractors from outside the Borough for work which can be accomplished competitively by local private businesses or regional or village corporations. (8-2.2)

(t) Resource development which will not significantly employ local Borough residents, unless residents of the local village expresses no interest in the work. (8-1.2)

19.80.032 Required Features The following features are required of applicable Development:

(a) Industrial and commercial development and resource extraction development are required to be located, designed, and maintained in a manner that prevents significant adverse impacts upon subsistence resources and their habitat, including water circulation and drainage patterns and coastal processes. (3-4.3, 3-5.1)

(b) Resource extraction development for administration, operations, residence and other uses not absoultely required in the field is required to be located in a designated service base which is sited, designed, constructed and

maintained to be as compact as possible; and to share facilities to the maximum extent possible. (5-5.1)

(c) Development is required to maintain the natural permafrost insulation quality of existing soil and vegetation. (5-4.3)

(d) New subdivisions or other residential development near the shoreline or in Special Habitat Areas are required to provide adequate water and sewer service to prevent damage to the environment and habitat of subsistence species. (5-3.1, 3-8.2)

(e) Mining on beaches or offshore is prohibited unless no alternatives exist for extraction of the resource, and in those circumstances substantial alteration of shoreline dynamics is prohibited. (5-5.6)

(f) Independent verification by a Borough approved agent is required for a developer's environmental assessment and design and engineering criteria for offshore development outside the landfast ice zone. [Plan Map 9, CMP Map I-2 and Section 5.5.3.5 Zone AO of this Plan] (5-4.5)

(g) Transportation facilities for resource development and extraction are required to be consolidated to the maximum extent possible. (7-1)

19.80.040 Minimization of Negative Impacts Applicable development is required to minimize its impact on the following features:

(a) Airports and helicopter pads are required to be sited, designed, constructed and operated to minimize their impact upon significant wildfowl migration routes, breeding grounds and nesting areas. (7-2, 3-6.1)

(b) Siting, design, construction and maintenance of transportation and utility facilities (including ice roads) are required to minimize alteration of shorelines, water courses, wetlands, and tidal marshes and significant disturbance to special habitat; and to avoid critical fish migration periods. (3-6.2, 3-4.1, 3-7.2, 5-2.2, 5-6.2, 5-7.4)

(c) When linear structures such as roads and pipelines are located in areas used as corridors by migratory species of wildlife, a means of crossing shall be included for those migratory species. Pipelines shall be designed, using the best available information, to minimize disruptions of migratory patterns and other major movements of wildlife. Above ground pipelines shall be elevated a minimum of

five (5) feet, except at those points where the pipeline intersects a road, pad or caribou ramp. (3-6.4)

(d) Development in floodplains, shoreline areas, and offshore is required to be sited, designed and constructed to minimize loss of life or property due to oceanic storms, sea waves, ice gouging and override, and shore erosion. (5-4.2)

(e) Mining and mineral processing in the coastal area is required to be designed and conducted to minimize impacts on subsistence species habitat, land and water resources, and general environmental conditions. (5-5.3)

19.80.050 Beneficial Impacts The Administrator will consider the following features when making the determination set forth in Section 10.60.030.

(a) The joint siting and use of facilities, and the concentration of development. (3-5.2, 5-2.1)

(b) Accomodation of free cross-migration of tuttu by pipelines. (3-6.4)

(c) Design and maintenance of residential development associated with industrial and resource extraction which provides for employees to be shuttled into the area for work periods then outside to their permanent residence. (3-8.4, 5-3.3)

(d) Development of nor more than the minimum number of borrow pits to serve all Development in an area. (5-5.4)

(e) Incorporation of utilities and multimodal transportation facilities in a single corridor. (5-6.1, 7-6)

(f) Employment of local Borough residents. (6-1.1, 8-1.1)

(g) Utilization of flexible employment procedures to allow subsistence pursuits by local Borough resident employees. (6-1.2, 8-3, 6-3.3)

(h) Incorporation of job training programs for local Borough residents. (6-1.3)

(i) Development which related to or encourages Inupiat arts and crafts. (6-2.1)

(j) Development which provides local employment in the villages. (6-3.1)

(k) Utilization of local private businesses or village or regional corporations as suppliers or subcontractors. (6-3.2, 8-2.1)

(l) Development which provides or materially contributes to lower cost fuel or power to adjacent villages. (6-4.1, 6-5)

(m) Utilization of locally obtained energy (such as locally produced coal and natural gas) or renewable sources of energy. (6-4.2)

(n) Resource extraction development that is consistent with subsistence resources and the Inupiat culture and Inupiaq character of life. (9-1)

(o) Excess of tax revenues over demand for expenditures. (9-2)

CHAPTER 90
DENSITY AND INCENTIVES

19.90.010 Basic Density/Intensity. The following chart sets forth the maximum basic density (for residential uses) and intensity (for nonresidential uses) for Development served by both public/quasi-public water and sewer systems:

STRICT	RESIDENTIAL (square feet of site per dwelling unit)		GROUP HOMES, ROOMING HOUSES * AND NONRESIDENTIAL (floor area ratio)	
	EXISTING SUBDIVISION	NEW SUBDIVISION	EXISTING SUBDIVISION	NEW SUBDIVISIO
Village	1 du/lot	7,000sq ft/du	1:3	1:3
Barrow Downtown Area	2 du/lot	1,000 sq ft/du	1:1.5	1:1
Barrow Residential Areas	1 du/lot	7,000 sq ft/du	1:2	1:1.5
Conservation	1 du/lot	7,000 sq ft/du	1:2	1:1.5
Resource Development	ESTABLISHED BY MASTER PLAN			

* Group homes and rooming houses shall have a minimum of 100 square feet per resident

19.90.020 **Basic Density/Intensity Non Public Facilities .** For Development not on both public/quasi-public water and sewer facilites, the density or intensity of use shall be determined by the Borough health department as the highest density or intensity which can be justified under public health standards. The density or intensity may not be altered pursuant to the provisions of Subsection 19.90.040, below.

19.90.030 **Incentives — Application and Eligibility.**

19.90.031 **Application.** Conditional Uses and rezonings to the Resource Development District may request, as part of their application, any of the incentives set forth in Section 19.90.040 et. seq.. Any application requesting incentives shall state, clearly and concisely, the isolated impact of the requested incentives. The application and evidentiary materials shall be prepared as if the requested incentives will be granted and the application should state whether it is dependent on the incentives being approved or whether the Developer will accept a permit only if some or all of the incentives are granted.

19.90.032 **Eligibility.** To approve incentives requested by a Development, the Commission must find, at the time of permit or rezoning approval, that:

(a) The Development, if proposed without the requested incentive(s) would represent a **significant** net public benefit; and

(b) The Development as proposed (with requested incentives) meets all the standards of Section 19.60.030.

(c) Conditions pursuant to Chapter 80 may be placed onapproval of incentives.

19.90.040 Density Bonus. Density bonuses up to 50% may be granted, by the Commission for Development served by both public/quasi-public water and sewer, which either;

* Increases public or private services to local residents; or

* Improves housing for local residents.

No reduction in the minimum living space set forth for residents of group homes or rooming houses may be granted.

19.90.050 Industrial Development Bonds. The Borough Assembly may approve Industrial Development Bond financing for any nonresidential Development with a viable, continuing program for hiring (and training if applicable) residents of the Borough.

19.90.060 Tap Fee Reduction. The Assembly may approve a reduction in water or sewer tap fees for any of the following:

19.90.061 Development by public or quasi-public agencies;

19.90.062 Rent-subsidized residential Development;

19.90.063 Development which constructs and dedicates to public use, water or sewer lines or treatment facilities in excess of its own needs.

19.90.070 **Operation, Security and Maintenance.** The Assembly may contract to operate and provide maintenance for some or all quasi-public facilities (such as water and sewer treatment facilities, roads, training facilities, recreation facilities, etc) and provide fire protection and security for private Development in Resource Development Districts where the Developer agrees to:

19.90.071 Construct the facilities at its own cost;

19.90.072 Provide a specific public benefit for the service provided by the Borough, such as (but not limited to) allowing limited or complete public access to the facility, agreeing to dedicate it to the public in the future, agreeing to a hiring program (in the case of job-training facilities), paying the Borough for the services, using unusually expensive design or techniques to mitigate negative impacts of the Development, or any other monetary or non-monetary public benefit which the Assembly, in its sole discretion, deems adequate.

19.90.080 **Procedure for Incentives.** A Development Permit application with a request for a density bonus will be decided pursuant to the procedure for variances set forth in Section 19.60.060. A Development Permit application with a request for any other type of incentive, and rezonings with a request for any type of incentives, will be decided pursuant to the procedure for rezonings set forth in Section 19.40.063.

Re: North Slope Borough Draft
Comprehensive Plan and
Land Management Regulations

Mr. James Stotts
Assembly Chairman
North Slope Borough
Box 69
Barrow, AK 99723

Dear Mr. Stotts:

Exxon appreciates this opportunity to present its comments concerning the referenced Comprehensive Plan and Regulations, scheduled for formal Assembly consideration in the near future. As you may know, Exxon has provided comments on earlier drafts to the Planning Commission. Our goal has been to persuade the Borough to adopt a planning ordinance which will meet its local planning needs without hampering the efforts of state and federal agencies and oil and gas lessees, as well as other developers, from exercising their property rights to develop resources on state and federal lands. To date, our efforts have met with only limited success.

The draft now before you espouses the same fundamental philosophy which has been a matter of primary concern to Exxon throughout the entire process. The planners and their consultants have failed to recognize that the Borough's needs will not be well-served by an ordinance which establishes a cumbersome and duplicative permitting process for activities over which the Borough has only very limited authority.

The current draft has been improved by its stated recognition of geographical limits on Borough authority, and further improved by zoning of existing units of oil and gas leases as Resource Development District. The draft fails, however, to properly recognize the paramount rights of lessees to develop existing and future state and federal leases and future units. Moreover, the draft would attempt to impose numerous technical and operational restrictions upon state and federally approved activities in areas outside the scope of the Borough's geographic authority, including the NPR-A, the Arctic National Wildlife Refuge, the Outer Continental Shelf and other state and federal lands.

The restrictions imposed by the draft ordinance are not only unauthorized by law, but they are also unsupported by scientifically verifiable information. The drafters of this ordinance have placed undue pre-eminence on subsistence uses to the exclusion and/or severe limitation of petroleum development. The drafters have opted for prohibiting development, mandating categorical prohibitions of some activities, and imposing stringent limitations that would effectively block development.

Further, the proposed ordinance does not take into consideration the inescapable fact that Exxon and other industry members have operated safely in the Arctic for many years without a single incident of serious, or even moderate, environmental damage and without any measurable negative effect on wildlife or the subsistence values of the North Slope. The drafters have failed to attribute this safety record to anything more than sheer good luck, ignoring industry's efforts in training personnel to operate safely, designing structures to withstand Arctic conditions, and developing the capability to handle any spills which might occur.

The permitting process which would be established by this proposed ordinance is for the most part unnecessary and, to the extent it applies to oil and gas operations, counterproductive. Although the Borough can and should implement a planning process for the protection of human health and safety, its efforts to establish detailed restrictions on development over a large geographical region are unwarranted for the following reasons: first, there exist state and federal regulatory processes capable of considering and responding to the legitimate concerns of the Borough; second, many of the concerns incorporated in the proposed ordinance are shared by industry as well as state and federal agencies so that the regulations are duplicative; third the provisions of the ordinance are insensitive to developing technology or varied operating conditions; and fourth, to the extent the Borough's restrictions would block development permitted by state and federal agencies having jurisdiction, those restrictions are unenforceable.

The Alaska Constitution, statutes and case law uniformly provide that the regulation of oil and gas activities is a matter of statewide concern. A home rule borough may not adopt regulations that interfere with oil and gas activities authorized by state agencies pursuant to state statute. Alaska cases hold that local regulations cannot block the implementation of a specific statewide policy.

With regard to the ability of a home rule borough to regulate oil and gas exploration and development authorized by a federal agency pursuant to federal law, the Borough's power is limited by the Supremacy Clause of the United States Constitution which provides that the laws of the United States "shall be the supreme law of the land." Federal cases hold that state and local

governments cannot enact regulations which obstruct the achievement of a Congressionally approved use of federal lands.

The Comprehensive Plan and Land Management Regulations before you today have been consciously drafted so as to exceed the limits of home rule authority. The almost certain result of the adoption of this ordinance would be that those limits will be shaped by costly, time-consuming litigation, to the detriment of the Borough, the State, and the nation, as well as our industry.

Exxon fully endorses the comments presented by AOGA. We urge you to carefully consider our comments today and to return the Comprehensive Plan and Land Use Regulations to the Planning Commission for amendment. As we have throughout this process, we wish to work with the Borough and its staff for the development of a workable plan.

Sincerely yours,

R. H. Weaver

December 7, 1982

Mr. James Stotts
Assembly Chairman
North Slope Borough
P.O. Box 69
Barrow, AK 99723

Re: North Slope Borough Draft Comprehensive Plan and Land Management Regulations

Dear Mr. Stotts:

The Alaska Oil and Gas Association (AOGA) is a trade association whose 39 member companies account for the bulk of oil and gas exploration, production and transportation in Alaska. AOGA appreciates this opportunity to present comments on draft 3 of the Comprehensive Plan and Land Management Regulations which is being considered for adoption by the Assembly at this time.

As you are aware, AOGA, its member companies and state agencies, have been involved in the planning efforts of the NSB since 1978, beginning with the Borough's Coastal Management Program, which was withdrawn in January, 1980. Other efforts of the NSB include the Interim Zoning Ordinance of 1979 and Comprehensive Plan and Zoning Ordinance of 1981. The oil and gas industry and state agencies have expressed serious legal, technical and administrative concerns with those documents. While the documents before us today represent improvements over those previous documents, many of our legitimate concerns remain and new ones have emerged. We hope that the Assembly will accept our expression of these concerns as constructive and will give them full consideration prior to final action. The following remarks highlight our major concerns and recommendations. Attachments to these remarks contain more detailed comments for use in your evaluations.

At the outset, it is important to note that extensive and serious legal problems with the Comprehensive Plan and Regulations still remain unresolved and should be addressed by the Assembly before adoption. These legal issues are detailed in Attachment 1 and will only be briefly addressed in these remarks.

AOGA firmly believes that the Borough is moving much too fast with the adoption of the Comprehensive Plan and Land Management Regulations. During the past three months, three drafts of the proposed Plan and Regulations have been issued in rapid succession for public review and consideration by the Planning Commission. During this period, the oil and gas industry raised a

number of legal, technical and administrative issues with respect to these draft proposals in an effort to assist the Borough in developing a Plan and Regulations which properly address the separate and mutual interests of all parties involved. Many of these issues, which are also important to the Borough's own future development plans, remain unresolved. It is our belief that the public and the Assembly have not had adequate time for consideration of the Plan and Regulations. The present draft is not suitable for adoption at this time.

Aside from the basic issue of the Borough's zoning jurisdiction over oil and gas development of state and federal lands, the petroleum industry is concerned that the proposed Plan and Regulations provide such broad discretionary powers to the Administrator and Planning Commission that oil and gas development projects vital to the state and nation may be seriously impeded. The proposed Plan and Regulations will surely result in many conflicts between the Borough and the state and federal governments. We believe that the only practical and reasonable approach is for the NSB to work through state and federal agencies on oil and gas matters at the various stages of leasing, plan approvals and permitting decisions. The goals, objectives and policies developed by the Borough in the preparation of the Comprehensive Plan and Land Management Regulations will provide the basis for the Borough's participation in state and federal decision-making processes. The establishment of a separate NSB permitting scheme and a Master Plan requirement for oil and gas development, however, would be counterproductive and result in lengthy and expensive litigation.

In addition to these two legal issues, there is a question regarding the ability of the Borough to effectively implement the proposed Comprehensive Plan and Regulations if enacted on January 1. To our knowledge the administrative procedures, forms and checklists necessary to implement the Plan and Regulations are not presently under development and therefore will not likely be available on January 1. Additionally, a major component of the Comprehensive Plan, the proposed Coastal Management Program, to which repeated references are made in the Plan and Regulations, will also not be in place on January 1. As a result, we urge the Assembly to seriously consider delaying adoption of the Plan and Regulations until the Borough's Coastal Management Program has been given conceptual approval. This would provide the necessary additional time to develop the administrative procedures for effective implementation and to more completely address the unresolved issues, thereby assuring an orderly transition from the present program under the Interim Zoning Ordinance.

Should the Assembly nevertheless decide to pursue adoption of the Comprehensive Plan and Land Management Regulations at this time, we offer the following technical changes found in Attachment II for your consideration. Although these changes would not resolve all of the remaining issues, they would go a long way toward facilitating Borough and industry development activities proceeding in a timely manner without significantly compromising the other interests and long range goals of the Borough. These suggested changes can be summarized as follows:

1. The portions of the Land Management Regulations which would require rezoning, master plan approvals and permits should be modified. We commend the Planning Commission for having made modifications in the Land Management Regulations which zone all existing unitized areas as

Resource Development Districts. However, these modifications fall short of satisfying the need that all existing and future state and federal leases and units within the territorial jurisdiction of the Borough be similarly rezoned as a matter of course.

2. The Planning Commission has correctly recognized the priority afforded to uses of state concern under the Alaska Coastal Management Act and has provided some protection for uses of state concern in the proposed Regulations. However, a separate Master Plan and permit approval by the Borough as contemplated in these Regulations will either lead to irreconcilable conflicts with decisions of state and federal permitting agencies or result in a mere duplication of state and federal regulations and permits. The NSB should use the policies developed as part of the Comprehensive Plan and Land Management Regulations and the NSB Coastal Management Program as a basis for its consultation with the appropriate state and federal agencies. Such consultation procedures are established under existing regulations and programs. Where consultation rights are not clearly established in existing processes, the NSB should seek to establish those rights by agreement between the Borough and the appropriate state or federal agency, primarily with the Department of Natural Resources and the Mineral Management Service on oil and gas matters.

3. Vague and discretionary policies which create uncertainty as to their meaning and application should be rewritten to require a conclusive finding of adverse effect and evaluation of possible mitigating measures before prohibitive policies are applied to decisions on development activities.

4. Policies which impose technical or design constraints should be eliminated. Performance criteria with appropriate mitigating measures should be applied on a case-by-case basis. Specific design criteria should not be adopted as Borough policy.

5. Policies not pertaining to land and water uses should be rewritten as goals or objectives, and should not be used as the basis for decisions on development activities.

6. Policies which allow participation by the villages in NSB planning efforts are an important concept adopted by this version of the Comprehensive Plan and Regulations. However, the Borough must ensure that it does not impermissibly delegate decision-making authority to local jurisdictions.

7. Many terms used in the Comprehensive Plan and Regulations are inadequately defined, or are not defined at all, and require further specification before this document is adopted.

8. Miscellaneous corrections, additions or deletions have been suggested to eliminate inconsistencies, clarify intent and otherwise improve the accuracy of the document.

The Alaska Oil and Gas Association recognizes the importance of this planning effort to the Borough. The Assembly must recognize, however, that this document, if adopted, will have far reaching implications for future development in the Borough. We, therefore, urge you to give careful consideration to adoption of our recommendations before this planning effort is brought to a

conclusion. We again urge that the Assembly not take action on the Comprehensive Plan and Regulations until the Borough's proposed Coastal Management Program has been adequately developed so that the two documents can be conceptually adopted in concert.

AOGA and its member companies continue to stand ready to offer our advise and assistance to the Borough in bringing these important planning efforts to a satisfactory conclusion.

Very truly yours,

WILLIAM W. HOPKINS
Executive Director

Attachment I

AOGA Comments

Legal Considerations

NSB Comprehensive Plan and Regulations

Procedural Problems

The North Slope Borough has been in the process of developing a land use management plan since 1978. Starting with its draft Coastal Management Program, which was eventually withdrawn from state consideration in January, 1980, the Borough has sought to gain control over petroleum development across the great expanse of the North Slope of Alaska. In late 1979, the NSB adopted its Interim Zoning Ordinance. Early in 1981, the NSB Planning Commission issued a draft Comprehensive Plan and Zoning Ordinance that has been under revision since August, 1981. Extensive changes were made and on September 15, 1982, the NSB Planning Department issued an entirely new document, entitled Comprehensive Plan and Land Management Regulations (draft 1). This document was the subject of a Comprehensive Plan Policies Workshop on September 24, 1982, in Barrow. Draft 1 was subsequently revised and a new version issued on October 8, 1982. On October 15, 1982, the Planning Commission held a public hearing on draft 2. Another draft, Draft 3, which was not a complete document but merely an addition and partial revision of draft 2, was made available to the public on November 5, 1982; that same day it was adopted by the Planning Commission after a number of amendments had been made. On November 9, 1982, the draft 3 version of the document was presented to the NSB Assembly for action and the Assembly scheduled a hearing for December 7,.

1982. As of this date, an approved complete copy of the Plan, as amended and adopted by the Planning Commission on November 5, has not been made available to the public. Since a complete copy of the Comprehensive Plan is not available, the Borough has failed to provide adequate notice as required by its Charter.

AOGA is very concerned with the lack of opportunity afforded by the NSB for meaningful public participation within the last three months. Members of AOGA have attempted to participate in the development of the Comprehensive Plan and implementing Regulations from the earliest drafts, however, public participation has been frustrated by not having the complete document under consideration by the NSB Assembly and the lack of adequate time for review. Furthermore, industry's comments and recommendations, legal and technical, have been largely ignored, including comments made by industry representatives at the September 24, 1982, workshop.

We firmly believe that the Borough is moving too fast for the adoption of this Plan and Regulations. The Plan is confusing and there are many inconsistencies between the Plan and the Regulations. In addition, it is not clear how the Plan and Regulations will be integrated with the NSB's Coastal Management Program which is currently under development. Lastly, there are serious legal, technical and administrative problems within the documents. We recommend that the NSB Assembly delay action on the proposed Plan and Regulations and develop them in concert with its Coastal Management Program (CMP), since the CMP is a major component of the Plan and Regulations. "Concept approval" by the Assembly should be given both documents simultaneously prior to being submitted to the state for approval.

Substantive Problems

The policies and regulations of the North Slope Borough's (NSB) draft Comprehensive Plan in many cases conflict with both state and federal law. Specifically, the draft Comprehensive Plan and implementing Regulations are in conflict with the Alaska Constitution, Alaska Coastal Management Act, Alaska Lands Act, the Alaska Oil and Gas Conservation Act, the U.S. Constitution, the Federal Coastal Zone Management Act, the Outer Continental Shelf Lands Act, and other federal and state statutes which regulate oil and gas activities.

The goals, objectives and policies of the Comprehensive Plan and implementing Regulations give priority and protection to subsistence activities by right throughout the Borough while restricting or prohibiting other legitimate uses of state and national concern. The proposed Plan and Regulations seek to give the Borough ultimate control over industrial activities (primarily oil, gas, and mineral development) or prohibit/restrict such activities in the Borough. A clear anti-development bias pervades the objectives and policies of the proposed Plan, and the Plan purports to exert control over not only Borough owned lands but also private, state, and federally owned lands. Many of the objectives and policies in the Plan demonstrate the Borough's intention to frustrate oil and gas exploration, development and production operations which are authorized pursuant to federal and state statutes.

The NSB's power to regulate oil and gas activities is limited by the State of Alaska's interest in uniform statewide oil and gas regulations. The Alaska Constitution, its statutes, and its case law uniformly provide that the regulation of oil and gas activities is a matter of statewide concern. Numerous Alaska

statutes have been enacted to control oil and gas activities within the Borough. The principal statutes involved are the Alaska Lands Act (AS 38.05.005-.370) and the Alaska Oil and Gas Conservation Act (AS 31.05.005-.370). The Alaska Coastal Management Act also recognizes petroleum development as a use of a statewide and nation-wide concern [AS 46.40.020(7) and 46.40.210(6)].

Alaska law is clear regarding the limits of a homerule borough's authority under Title 29 of the Alaska Statutes. A homerule borough, such as the NSB, may exercise legislative powers so long as they are not "prohibited by law or charter" (Alaska Constitution, Article X, Section 11). The Alaska Supreme Court has stated the test for determining when a local enactment is "prohibited by law or charter" in Jefferson v. State, 527 P.2d 37,43 (1974):

> The prohibition must be either by expressed terms or by implication such as where the statute and ordinance are so substantially irreconcilable that one cannot be given its substantive effect if the other is to be accorded the weight of law.

In resolving conflicts between state statutes and local ordinances, the Alaska Supreme Court has recognized and applied the "local activity rule." Under this approach, the court must determine whether the matter regulated is of statewide or local concern. (MaCauley v. Hildebrand, 491 P.2d 120, 122 (Alaska 1971)).

The rule was applied in Chugach Electric Association v. City of Anchorage, 476 P.2d 115 (Alaska 1970), and restated in Johnson v. City of Fairbanks, 483 P.2d 181 (Alaska 1978) where the Court stated: "We resolved the conflict [in

Chugach Electric] by applying a rule requiring the local enactment to yield if it directly or indirectly impeded implementation of statutes which sought to further a specific statewide policy." The rule stated above was recently restated and applied to the zoning and planning area in Kenai Peninsula Borough v. Kenai Peninsula Board of Realtors, Inc., slip op., October 15, 1982.

The Alaska Constitution mandates state control in the use of Alaska's natural resources, including oil and gas. The pertinent provisions are found in Article VIII:

> Section 1. Statement of Policy. The policy of the State is to encourage the settlement of its lands and the development of its resources by making them available for maximum use consistent with the public interest.
>
> Section 2. General Authority. The Legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including lands and waters for the maximum benefit of its people.
>
> Section 6. State Public Domain. Lands and interests therein including submerged and titled lands possessed or acquired by the State and not used or intended exclusively for governmental purposes constitute the State public domain. The Legislature shall provide for the selection of lands granted to the State by the United States and for the administration of the State public domain.

Section 8. Leases. The Legislature may provide for the leasing of and the issuance of permits for exploration of any part of the public domain or interests therein subject to reasonable concurrent uses. Leases and permits shall provide, among other conditions, for payment by the party at fault for damage or injury arising from non-compliance with the terms governing concurrent use and for forfeiture in the event of breach of condition.

Section 12. Mineral Leases and Permits. The Legislature shall provide for the issuance, types and terms of leases for coal, oil, gas, oil shale, sodium phosphate, potash, sulfur, pumice and other minerals as may be prescribed by law. Leases and permits granting these exclusive rights of exploration for these minerals for specific periods and areas subject to reasonable and concurrent exploration as to different classes of minerals may be authorized by law. Like leases and permits giving the exclusive right of prospecting the physical, geochemical and similar methods for all minerals may also be authorized by law.

The clear policy of the State as provided in the Constitution is to encourage the development of the State's natural resources. The Legislature is exclusively charged with the administration of state lands, and specifically directed to provide for the utilization and development of all natural resources belonging to the State. The Legislature is also directed to regulate the issuance of oil and gas leases. In particular, leases and permits granting the right to explore for oil and gas are authorized by law. These provisions form a constitutional mandate for pervasive state administration of its lands, including the use and development of the state's natural rescurces. The language is mandatory, not

permissive. Its provisions entrusting these matters to the state legislature are unqualified. Local units of government have neither authority nor responsibility in these fields. Even should the State Legislature delegate a portion of this authority to municipalities to enable them to meet varying conditions within the different localities, such delegation could not diminish its constitutionally mandated control of state lands and natural resources. Given the conflict between the NSB's draft Comprehensive Plan and implementing Regulations and the Legislature's exercise of its constitutional authority, the Legislature's enactment must prevail.

The Alaska Lands Act contains an express prohibition preventing any municipality from closing state lands to oil and gas exploration, development, and production. AS 38.05.135(a) provides in part:

> Except as otherwise provided, valuable mineral deposits in lands belonging to the State shall be open to exploration, development and the extraction of minerals. All lands, together with tide, submerged, or shorelands, to which the State holds title or to which the State may become entitled, may be obtained by permit or lease for the purpose of exploration, development and the extraction of minerals.

A clear policy in favor of keeping state lands open for oil and gas exploration, development, and production is found in AS 38.05.350, which provides that "[i]t is a policy of the State to encourage the settlement of its lands and the development of its resources by making them available for maximum use

consistent with the public interest." AS 38.05.035(a) also demonstrates that exploration, development, and production of oil and gas is a matter of statewide concern, and that it is Alaska's policy to encourage such development on state lands. AS 38.05.035(a)(14) authorizes the leasing of state lands once it is found that the "interests of the State will be best served." With specific reference to oil and gas, AS 38.05.180(a) provides:

> The legislature finds that (1) the people of Alaska have an interest in the development of State oil and gas resources to (A) maximize the economic and physical recovery of the resources; (B) maximize competition among parties seeking to explore and develop the resources; (C) maximize use of Alaska's human resources in the development of the resources;

The Alaska Lands Act is, therefore, clear and unambiguous: the determination of which state land should be leased and the conditions or limitations to be contained in the lease agreements are matters of statewide concern.

In the absence of the adoption by the North Slope Borough of a district coastal management program pursuant to the Alaska Coastal Management Act, the state coastal management program applies to the North Slope Borough.

The NSB draft Comprehensive Plan and implementing Regulations approve subsistence use as a matter of right throughout the Borough, yet severely restrict competing uses in all land use districts outside the Resource Development District. This designation arbitrarily and unreasonably restricts "uses of State

concern," within the meaning of the ACMA. The Borough employs the subsistence designation to potentially exclude other competing uses, including oil and gas operations, within the Borough's boundaries. Although subsistence is certainly one use of State concern if properly substantiated and limited in scope, the Borough cannot avoid its obligation to balance and accommodate competing uses by simply designating its entire coastal zone and three of the four land use districts as subsistence areas. It is not the purpose of the ACMA to protect any single use, and the ACMA does not authorize the Borough to exclude uses of state and national interest based on purely local concern; it instead requires the balancing of legitimate state interests with reasonable standards for the protection of proper local concern.

As in Chugach Electric Association v. City of Anchorage, 476 P.2d 115 (Alaska 1970) and other cases establishing the "local activity rule" in Alaska, the matters covered by the ACMA are of statewide concern. By express statutory definition, the siting of energy facilities and other activities pursuant to a state or federal oil and gas lease are uses of state concern. AS 46.40.210(6)(c). The reasoning of Chugach Electric, therefore, is directly applicable to the NSB's proposed permitting plan. The Borough has no authority to interfere with a State statutory scheme by unreasonably restricting uses of state concern.

The Department of Natural Resources has implemented the Constitutional and statutory policy of natural resources development by issuing oil and gas leases. These leases were issued on the condition that oil and gas work was to be performed on the leased area. The draft Comprehensive Plan and implementing Regulations will impede this policy. Under the draft Comprehensive Plan and

implementing Regulations, all oil and gas activity requires a permit from the NSB. Under the "local activity rule," once the Department of Natural Resources has determined that the issuance of an oil and gas lease is in the best interest of the State, this determination may not be nullified because the Borough withholds a permit under narrowly defined local considerations.

The Alaska Supreme Court has recognized the State's interest in regulating and developing oil and gas resources on a statewide basis. In North Slope Borough v. LeResche, 581 P.2d 1,112 (Alaska 1978), the Court held that the Commissioner of Natural Resources had the authority to reject the Borough's application to select State lands overlaying the Prudhoe oil field on the ground that it was in the best interest of the State.

The NSB's attempt to restrict already limited petroleum related activity in State oil and gas lease areas is analogous to previous cases where the Alaska Supreme Court has held that state law preempts a home rule municipality from validly exercising legislative power. The Commissioner of the Department of Natural Resources has made the determination that certain state lands should be open to oil and gas development, and has promulgated extensive regulations governing such activity. This constitutes a prohibition upon the exercise of the Borough's zoning authority to further restrict or exclude petroleum related activities on these lands. The Borough cannot enact regulations which interfere with petroleum related activities in areas which the Commissioner has determined should be open for such activities.

The Alaska Supreme Court has held that ordinances of home rule municipalities are prohibited if they directly or indirectly impede implementation of State

statutes which seek to further a specific statewide policy. The Alaska Constitution, the Alaska Oil and Gas Conservation Act, and the Alaska Lands Act evidence a strong state policy in favor of oil and gas development. The proposed Comprehensive Plan and implementing Regulations greatly restrict oil and gas activity within the North Slope Borough and require a permit for activity in all areas of the Borough. These restrictions act as an impediment to oil and gas activity in irreconcilable contravention of State policy. To the extent that the Borough's proposed Comprehensive Plan and implementing Regulations interfere with the implementation of State policy, they are invalid.

In addition to the state law prohibitions against Borough regulation of state lands, the federal Constitution forbids such regulation by the Borough on federal lands.

A. The Supremacy Clause

The doctrine of federal preemption is derived from the Supremacy Clause of the United States Constitution (Article VI, Clause 2). This clause elevates federal law above that of a State and provides:

> [t]his Constitution and the laws of the United States which shall be made in pursuance thereof; and all treaties made or which shall be made under the authority of the United States shall be the supreme law of the land; and the judges in every state shall be bound thereby anything in the Constitution or laws of any state to the contrary notwithstanding.

The Supremacy Clause has been found directly applicable to local regulatory schemes. In Ventura County v. Gulf Oil Corporation, 601 F.2d 1080 (9th Cir. 1979), aff'd 445 U.S. 947, 100 S.Ct. 1593 (1980), the Court of Appeals held that federal regulations of oil and gas activities on federal lands pursuant to the Mineral Lands Leasing Act of 1920 preempted local regulation of the same activities. Gulf Oil had received an oil and gas lease pursuant to the Mineral Lands Leasing Act and obtained the necessary federal permits to drill a well under the terms of the lease. Ventura County sought to require Gulf to obtain a county oil exploration and extraction permit pursuant to its local zoning ordinance prior to the commencement of activities under the federal lease and permits. The federal appeals court rejected the County's argument that there was no evidence of either the Congressional intent to preempt local regulation nor any conflict between local and federal law that could be resolved only by exclusion of local jurisdiction. It held:

> We need not consider the extent to which local regulation of any aspect of oil exploration and extraction upon federal lands is precluded by federal legislation; the local ordinances impermissibly conflict with the Mineral Lands Leasing Act of 1920 and on this basis alone they cannot be applied to Gulf. (601 F.2d at 1083).

The Court stated its conclusion succinctly: "The states and their subdivisions have no right to apply local regulations impermissibly conflicting with achievement of a congressionally approved use of federal lands. (601 F.2d at 1086).

The Ventura County case is directly applicable to the NSB's draft Comprehensive Plan and implementing Regulations. Like Ventura County, the NSB is attempting to regulate oil and gas operations of a lessee on federal lands by ordinance. The draft Comprehensive Plan and implementing Regulations purport to be based on the Borough's home rule powers. Home rule authority, like all state powers, is necessarily limited by the Supremacy Clause of the U.S. Constitution. The Borough is attempting to limit oil and gas operations on federal lands where Congress has provided for the regulation of these activities in the Outer Continental Shelf Lands Act and the Mineral Lands Leasing Act. These statutes are designed to further the national interest in prompt development of domestic operations, considering their environmental impacts, and encouraging state and local government participation. Nevertheless, the NSB seeks a right of final approval by requiring federal lessees to obtain a Borough permit. The Ninth Circuit's response to this demand is certain:

> The federal government has authorized a specific use of federal lands, and [the Borough] cannot prohibit that use, either temporarily or permanently, in an attempt to substitute its judgment for that of Congress.

B. The Commerce Clause

Article I, Section 8, Clause 3 of the U.S. Constitution grants Congress the power to regulate interstate commerce exclusive of state control. The Commerce Clause has long been held to allocate decision making between state and federal governments in limitation of state or local action which may burden free trade between the states. Where Congress has not exercised its commerce power so·

fully as to preempt state regulations, the courts must decide whether the Commerce Clause standing alone bars a particular state imposition on national commerce. Case law generally holds that state and local legislation will not be sustained unless it is rationally related to a legitimate state purpose and the resultant burden on interstate commerce is outweighed by the state interest involved.

In weighing the burdens on interstate commerce, which would result from the NSB's draft Comprehensive Plan and implementing Regulations, it is conceivable that the tight restriction on pipelines and onshore activities could make OCS and onshore development impossible or prohibitively expensive. In the absence of a compelling local interest, such as protection of some unique physical or biological resource, a court would be unlikely to find that the promotion of local subsistence and unfounded environmental objections justify interference with the flow of OCS and onshore oil through the state. Under the draft Comprehensive Plan, the Borough attempts to restrict development activity to a single Resource Development District. Such a restriction would effectively deny oil and gas lessees access to onshore transportation and other necessary facilities. The burdens imposed on interstate commerce by the NSB's draft Comprehensive Plan and implementing Regulations would be far greater than the benefits received by the Borough. Federal courts in a number of cases have struck down local zoning ordinances which attempt to regulate LNG pipelines. These cases hold that such restraints imposed by a municipality are unreasonable and without justification in the interest of health, safety, and welfare. Such restraints are, therefore, an undue burden on interstate commerce.

The Borough's regulation of oil and gas activity based on protection of subsistence activities must be weighed against the burdens placed upon interstate commerce by such regulation. Whether the burden thereby placed on interstate commerce can withstand a Commerce Clause attack depends on the extent to which the Borough actually restricts or prohibits oil and gas activities. The NSB's draft Comprehensive Plan and implementing Regulations as presented do not assure the balancing of interests required to justify any such interference.

Attachment 2

ALASKA OIL AND GAS ASSOCIATION

Detailed Comments

Proposed NSB Comprehensive Plan and Land Management Regulations (Draft 3 - November 3, 1982)

INTRODUCTION

As indicated in attachment I, many of the provisions in the comprehensive Plan and Land Management Regulations will impermissibly conflict with the state and federal governments' regulation of natural resource development. To the extent they do so, the Plan and Regulations exceed the Borough's jurisdiction and home rule powers. We urge the Borough to delete all provisions in the Plan and Regulations which purport to regulate and restrict or prohibit oil and gas activities. In the event that the Borough determines that it wants to retain such provisions and hope that they will pass legal challenges in the courts, many changes will be necessary. The comments set forth below address, for the most part, portions of the Plan and Regulations which attempt to regulate oil and gas activities. The suggested changes will not be appropriate where the Borough deletes the objectionable provisions. AOGA's suggestion of specific changes in language does not indicate that AOGA or its member companies find the policies or provisions to be appropriate.

COMPREHENSIVE PLAN:

Page 3-3, Section 3.1.4: Impacting Factors

The list of so-called forces with potential direct negative and positive impacts on the biological/subsistence resources is incomplete. Other factors may have as much or more impact on the biological/subsistence resources as those listed. The allegation that natural resource development and extraction results in direct negative impacts on biological/subsistence resources are unsubstantiated by industry experience in the Arctic. See letter dated November 1, 1982, from John W. Katz, Commissioner of the Alaska Department of Natural Resources to Mr. George "Bud" Stevens. Commissioner Katz stated in his comments on the draft Comprehensive Plan and Land Management Regulations that:

> "Inherent in the Borough's plan is the assumption that oil and gas activities are incompatible with the subsistence lifestyle of the Borough's residents. I question this assumption, especially in light of the limited impact that the existing oil and gas activity has had on fish and wildlife resources on the North Slope. While some habitat has been altered and some animals have been displaced, the cumulative impacts on fish and wildlife have not been significant. In addition, the impact of existing development on subsistence hunting and fishing activity also has been minor. While there are some who are sincere in their beliefs that oil and gas activity has been the cause of lower subsistence yields, I have not seen convincing evidence to support this cause and effect relationship. In the absence of new evidence, I am also confident that future oil and gas activity will not result in significant impacts to wildlife habitats or subsistence activity if

the present level of environmental protection and concern resulting from state and federal regulations is continued. Also, results from state and federal onshore and offshore oil and gas lease sales indicate that the industry is not interested in exploring and developing the entire North Slope."

Page 3-7, Policy 3-1.1: Development/Subsistence

Suggest modifying this policy to the following:

"Development which can be conclusively shown to result in depletion of a subsistence resource, as set forth in Section 3.5.1 of the Plan, below the subsistence needs of local residents of the Borough is prohibited unless the adverse effects of such development can be appropriately mitigated."

The suggested changes incorporate the need for conclusive evidence of adverse effect and consideration of possible mitigation before proposed development activities can be precluded under this policy.

Page 3-7, Policy 3-1.2: Development/Subsistence

Suggest modifying this policy to the following:

"Development that can be conclusively shown to result in significantly decreased productivity of subsistence resources or their ecosystems is prohibited unless the adverse effects of such development can be appropriately mitigated or no feasible and prudent alternative is available."

Comment - same as for Policy 3-1.1 above.

Page 3-7, Policy 3-1.3: Development/Subsistence

Suggest modifying this policy to the following:

"Development which can be conclusively shown to restrict subsistence user access to a subsistence resource is prohibited unless such restriction can be appropriately mitigated or no feasible and prudent alternative is available."

Comment - same as for Policy 3-1.1 above.

Page 3-7. Policy 3-1.4: Development/Subsistence

Suggest modifying this policy to the following:

"Development which can be conclusively shown to preclude subsistence user access to a subsistence resource is prohibited unless such preclusion can be appropriately mitigated."

Comment - Same as for Policy 3-1.1 above.

Page 3-8, Policy 3-2.1: Critical Habitat/Subsistence Species

Suggest modifying this policy to the following:

"Development within Special Habitat Areas identified on Plan Maps 3-6 and CMP Maps II-2 and II-5 is prohibited if it can be conclusively shown to significantly affect adversely the special values of such an area, unless the significant adverse effects can be appropriately mitigated or no feasible and prudent alternative is available."

Comments - Same as for Policy 3-1.1 above.

Page 3-8, Policy 3-2.2: Critical Habitat/Subsistence Species

Suggest modifying this policy to the following:

"Resource Extraction uses within a Special Habitat Area identified on Plan Maps 3-6 and CMP Maps II-2 ad II-5 are prohibited if it can be conclusively shown to significantly affect adversely the special values of such an area, unless the significant adverse effects can be appropriately mitigated or no feasible and prudent alternative is available.".

Comment - Same as for Policy 3-1.1 above.

Page 3-9, Policy 3-3.1: Marine or Coastal Development

The statement of Policy 3-3.1 involves activities clearly beyond the Borough's territorial jurisdiction and therefore is not enforceable. This statement of policy is also too vague in that it does not adequately define "high-impact

activities" and "the area of bowhead whale migration routes." We recommend deletion of this policy.

If however, this Policy is to be retained in the Comprehensive Plan and Land Management Regulations, we suggest modifying it to the following:

> "Development activities that can be conclusively shown to significantly affect adversely the migration of bowhead whales and cannot be appropriately mitigated are prohibited within the area of bowhead whale migration during the migration season."

Comments - See Policy 3-1.1 above. The changes also eliminate appropriately the reference to the undefined and rather subjective term "high impact activities" without modifying the intent of the policy.

Page 3-9, Policy 3-3.2: Marine or Coastal Development

Suggest modifying this policy to the following:

> "Development that can be conclusively shown to significantly impact adversely sensitive areas such as estuaries, tideflats, beaches, rivers, streams and lakes, and high energy ice impacted shorelines are prohibited unless appropriate mitigation measures are taken to minimize such significant adverse impacts or no feasible and prudent alternative is available. See Plan Maps 9 and 15 and CMP Maps 2-4 for known major occurrences of Sensitive Areas; the policy will be applied on an actual occurrences basis, however."

Comment - Same as for Policy 3-1.1 above.

Also, map references are confusing - Plan Map 15 does not presently exist and the CMP Map reference is incomplete.

Page 3-9, Policy 3-3.4: Marine or Coastal Development

Suggest modifying this policy to the following:

> "Development is prohibited on or in the immediate vicinity of Barrier Islands intensively used by beluga whales as feeding and resting areas if it can be conclusively shown to significantly affect adversely such feeding or resting activities, unless the significant adverse effects can be appropriately mitigated, or no feasible and prudent alternative is available."

Comment - Same as for Policy 3-1.1 above. The changes also appropriately eliminate the reference to the undefined and subjective term "high-impact activities" without modifying the intent of the policy. Additionally, this change would eliminate the inconsistency with Policy 3-5.3 on page 3-10, which states that barrier islands are preferred over other (non-gravel) structures.

Page 3-10, Policy 3-4.2: Shoreline Development

The revision of this policy to allow development on the shoreline where there is no feasible and prudent alternative available is an improvement. However, coastal dependant industry should not be burdened with the requirement to investigate alternative site locations with the associated economic studies

because the industries are allowed shoreline locations by the Coastal Management Laws. This policy should be written as a relative policy encouraging development outside the shoreline where feasible and prudent inland alternatives exist. This comment applies also to Policy 5-2.3.

Pages 3-10 and 3-11, Policy 3-5.3: Resource Extraction

The Borough should not attempt to regulate the choice and design of offshore structures located outside its territorial jurisdiction. Further, this would needlessly duplicate both federal and state existing authority. We suggest that this policy be modified to the following:

> "Offshore exploration, development and production drilling outside the landfast ice area [Plan Map 9, CMP Map II-2 and Section 5.5.3.5 Zone AO] is required to be conducted from barrier islands, artificial islands or offshore platforms approved by the MMS under its structure verification program or by the State."

Page 3-11, Policy 3-6.2: Transportation and Transportation Facilities

This policy should be written as a relative policy by changing the word "required" to "encouraged." This comment also applies to Policies 3-4.1, 3-7.2, 5-2.2, 5-6.2, 5-7.4 and 7-5 (formerly 7-6).

Page 3-11, Policy 3-6.3: Transportation and Transportation Facilities

This policy has been changed to clearly state that it applies only to public facilities. This is a necessary revision because the policy will now allow roads for oil and gas development.

Page 3-11, Policies 3-6.4 and 3-6.5: Transportation and Transportation Facilities

Recent studies on the North Slope show that pipelines, regardless of orientation, do not present a significant barrier to caribou. We suggest that these two policies be combined and modified as follows to appropriately reflect the latest scientific information while preserving the intent of the original policies:

> "Transportation development which can be conclusively shown to significantly obstruct wildlife migration is prohibited unless appropriate mitigation measures are taken or no feasible and prudent alternative is available. Roads and pipelines shall be designed using the best available scientific information to minimize disruptions of migratory patterns and other movements of wildlife. Appropriate mitigation measures for use with pipelines when necessary may include sufficient clearance above ground and provision of crossings satisfactory for the particular wildlife species in question."

Page 3-11, Policy 3-6.6: Transportation and Transportation Facilities

The NSB does not have the authority to prohibit or exercise any jurisdiction over development which accommodates marine oil tankers. This policy could act to prohibit offshore development of future lease sale areas. Such a proposed policy could create an unreasonable burden on interstate commerce in violation of the Commerce Clause of the U.S. Constitution, and would violate the Alaska Coastal Management Act as an unreasonable restriction or exclusion of uses of state concern.

Page 3-12, Policy 3-7.1: Utility Facilities

The words "incidental to drilling, exploration and production," should be deleted from this policy to make it consistent with our understanding of the Borough's intent, and Policy 5-7.2 on page 5-14 (also Policy 3-7.1 as cited in Chapter 10 on page 10-9).

Additionally, the terms "toxic materials" and "untreated solid waste" should be defined. The definitions should conform with applicable state and federal definitions, i.e., under the Resource Conservation and Recovery Act (RCRA), etc.

Page 3-12, Policy 3-7.2: Utility Facilities

The word "significant" should be added before "disturbance" in the fourth line and "special" should be added before "habitat" in the fifth line to make this policy consistent with the identical Policies 3-4.1, 3-6.2, 5-2.2, 5-6.2, 5-7.4 and 7-5 (also Policy 3-7.3/7.2 cited in Chapter 10 on page 10-6).

Page 3-12, Policy 3-7.3: Utility Facilities

Suggest this policy be modified to the following:

> "Utility siting and design which can be conclusively shown to preclude subsistence user access to a subsistence resource is prohibited unless appropriate mitigating measures are taken or no feasible and prudent alternative is available."

Comment - Same as for Policy 3-1.1 above.

Page 3-12, Policy 3-7.4: Utility Facilities

Suggest this policy be modified to the following:

> "Development which can be conclusively shown to restrict subsistence user access to a subsistence resource is prohibited unless appropriate mitigation measures are taken or no feasible and prudent alternative is available."

Comment - Same as for Policy 3-1.1 above.

Page 3-12A, Policy 3-8.2: Residential Development

This policy should be rewritten to be consistent with Policy 5-3.1 on pages 5-10 and 5-11.

Pages 3-13 and 3-14, Policy 3-A.3: Regulation and Management

The reference to "joint management agreements" needs to be clarified. Is this referring to state agencies or other parties?

Page 3-14, Policy 3-A.7: Regulations and Management

This policy presumes that resource extraction and preservation of Special Habitat Areas are incompatible in all instances. We believe this is an inappropriate generalization. Each circumstance should be considered on its merits. We suggest modifying this policy to the following to incorporate the necessary appropriate considerations of conclusive evidence of effect and mitigation measures:

> "Promote the withdrawal of Special Habitat Areas from all resource extraction and non-essential entry and appropriation where such activities can be conclusively shown to significantly affect adversely the values of such areas and no appropriate mitigating measures are available or acceptable."

Page 3-14, Section 3.4.2: Regulation and Management Discussion

We note that the statement "Borough jurisdiction may have, to some degree, been preempted" has been deleted in Draft 3 of the Comprehensive Plan. The Borough should recognize that where regulation purporting to implement its police power invades the jurisdiction of state and federal governmental entities, such regulation is pre-empted, and the Borough retains no jurisdiction in those areas. Specifically, the regulation and management of oil and gas leases and activities have clearly been preempted by state and federal law. The oil and gas industry is willing to work with the NSB and encourages its involvement in existing regulatory processes; however, any attempt by the NSB to disrupt or restrict activities which are authorized by state and federal governments on public lands will be strongly opposed.

Page 3-50, Section 3.5.4.3: Construction

The proposed restriction on geophysical operations noted on page 3-50 should be modified to allow summer seismic operations that use helicopters and rolligons to carry vibroseis and other seismic equipment. Temporary summer seismic operations of this type cause no significant harm to wildlife or the environment.

Page 4.5, Policy 4.1: Development/Cultural & Historical Sites

Suggest this policy be modified to the following:

"Development which can be conclusively shown to significantly disturb cultural or historic sites listed in the National Register of Historic Places

or those which have been substantiated as being eligible for inclusion in the National Register, or to significantly interfere with traditional activities at such cultural or historic sites, is prohibited unless appropriate mitigating measures are taken to minimize this disturbance or interference. Possible interference with traditional activities would include significant visual, noise or other pollution; prolonged increases in activity; driving off subsistence species; or significant surface disturbance."

Suggested changes would clarify the intent of this policy and incorporate the appropriate considerations of a conclusive finding of adverse effect and mitigation.

Page 4-5, Policy 4-2: Development/Newly Discovered Sites

Suggest modifying this policy to the following:

"Surface disturbance which can be conclusively shown to significantly effect adversely newly discovered historic sites is prohibited prior to archaeological investigation unless appropriate mitigating measures are taken to minimize such significant adverse effects."

Suggested changes would incorporate the appropriate considerations of a conclusive finding of adverse effect and mitigation.

Page 4-5, Policy 4-3: Development/Growth

Suggest modifying this policy to the following:

> "Development which can be conclusively shown to significantly violate guidelines on the rate or amount of growth adopted by a village as part of its Village District Comprehensive Plan is discouraged. Development which can be conclusively shown to grossly violate such guidelines is prohibited unless appropriate mitigating measures are taken to minimize the significant adverse impacts or no feasible and prudent alternatives are available."

Suggested changes would clarify the intent of this policy and incorporate the appropriate considerations of a conclusive finding of adverse effect and mitigation.

Additionally, while we agree that the amount of development within a village should be guided by village policy, development outside the village which occurs on state or federal land is not under the jurisdiction of the NSB. Without detailed maps, the impact of this policy cannot be fully assessed.

Page 4-6, Section 4.4.3: Policy Discussion

The fourth paragraph in this section implies that as a general policy all of the barrier islands along the North Slope should be held "inviolate" with respect to offshore development. This would be inconsistent with what is implied in Policy 3-5.3 on page 3-10, that barrier islands are preferred for offshore drilling over

other (non-gravel) structures. We suggest this paragraph be revised by deleting the fourth and fifth sentences. Standard lease stipulations require identification of such sites prior to development.

Page 4-66, Section 4.5.6.5: Subsistence

The meaning of the third paragraph on page 4-66 is unclear (beginning with "an open-range").

Also, the meaning of the last sentence in the prior paragraph on page 4-66 is unclear. (What is meant by "the subsistence commons will be fragmented"?)

Page 5-1, Section 5.1.1.2: Potential Sources

We suggest that the first sentence in this section be modified to the following:

> "Groundwater systems play a relatively minor role in the hydrology of the Borough because the active layer is underlain with permafrost and thaws to a depth of only about two feet during the summer."

The present wording in the draft incorrectly describes the cause and effect relationship between permafrost and the active layer.

Page 5-2, Section 5.1.1.4: Industrial Consumption

We suggest that the first sentence of the third paragraph be modified to the following:

"Mud is normally used only during the drilling phase of a well's life."

Mud is normally not required after a well has been drilled.

Page 5-5, Section 5.1.4.1: Flooding

We suggest the addition of the following before the first full sentence on this page beginning with "In addition to hazards":

"An exception to this is the Sagavanirktok River, which has relatively uniform flow throughout the summer."

Page 5-10, Policy 5-1.1: Development/Environmental Degradation

Suggest this policy be modified to the following:

"Development which can be conclusively shown to substantially pollute the natural environment (including water, air, noise and vibration) is prohibited unless appropriate mitigating measures are taken or no feasible and prudent alternative is available."

Suggested changes would incorporate the appropriate considerations of a conclusive finding of adverse effect and mitigation.

Page 5-10, Policy 5-1.2: Development/Environmental Degradation

Suggest this policy be modified to the following:

> "Development which can be conclusively shown to result in depletion of a subsistence resource, as set forth in Section 3.5.1 of the Plan, below the subsistence needs of local residents of the Borough is prohibited unless the adverse effects of such development can be appropriately mitigated."

Comment - Same as for Policy 5-1.1 above (Also see identical policy 3-1.1 on page 3-7).

Page 5-10, Policy 5-2.3: Development/Commercial and Industrial

The words "fuel or toxic material," need to be added following "Landfills," in the third line of this policy to make it consistent with the suggested revision of the identical Policy 3-4.2 on Page 3-10.

Page 5-11, Section 5.4: Development Policy Discussion

Suggest that the fourth paragraph in this section be modified to the following:

> "Approved development activities should incorporate mitigation of impact on the quality of the natural environment, including water quality and air quality, and the local or adjacent environments and habitats."

The present wording is misleading. In general, there will be a certain level of localized impact on the environmental as a result of development.

Page 5-11, Section 5.4: Development Policy Discussion

In the fifth paragraph, we suggest replacing "precedence" with "preferential consideration for siting."

The resulting sentence would more clearly state what we presume is intended.

Pages 5-11 and 5-12, Section 5.4: Development Policy Discussion

In the sixth paragraph, we suggest that the second sentence be modified to the following:

> "Non-coastal dependent uses or activities which may interfere with or impact subsistence needs in shoreline areas shall be sited in geographically separate locations."

The resulting sentence would more clearly state what we presume is intended.

Page 5-12, Policy 5-4.1: Development/Geophysical Hazard Areas

Suggest this policy be modified to the following:

"Development in flood plains and other geologic hazard areas identified in Plan Map 9 and CMP Maps 1-2-5 and Section 5.5.3.5 of this Plan is prohibited unless appropriate mitigating measures are taken or no feasible and prudent alternative is available."

Suggested change to this policy incorporates the additional appropriate consideration of the availability of technology or other measures which could reduce the risk of such development to acceptable levels.

Page 5-12, Policy 5-4.5: Development/Geophysical Hazard Areas

The Borough should not attempt to regulate the choice and design of offshore structures since this would needlessly duplicate existing federal and state authority. We suggest that this policy be modified to the following:

"MMS approval under its structure verification program or state approval is required for all offshore development outside the landfast ice zone [see Plan Map 9, CZM Map 1-2 and Section 5.5.3.5 Zone AO]."

Page 5-13, Policy 5-5.1: Resource Extraction

We suggest deleting "absolutely" and the second "required" from this policy. These changes would provide increased flexibility in the administration of the policy to allow a developer to operate in the most efficient manner with respect to field support facilities.

Page 5-13, Policy 5-5.3: Resource Extraction

The term "general environmental conditions" should be defined. It should also be noted that such a general term cannot be adequately addressed in a permit application.

Page 5-13, Policy 5-5.5: Resource Extraction

Mining in streams and rivers is regulated by the ADF&G. This should be modified to a relative policy by replacing "prohibited" with "discouraged."

Page 5-13, Policy 5-5.6: Resource Extraction

It should be noted that on state and federal lands and waters, the conduct of mining activities are regulated by the state and federal agencies, and not within the jurisdiction of the NSB. This should be modified to a relative policy by replacing the words "prohibited" with "discouraged".

Page 5-13, Policy 5-6.1: Transportation Facilities

This policy should be identical to Policy 7-6 on page 7-7 (note additional wording in Policy 7-6, "or joint use transportation facilities" and "strongly").

Page 5-14, Policy 5-7.2: Utility Facilities

The terms "toxic materials" and "untreated solid waste" should be defined. The definitions should conform with applicable state and federal definitions, i.e., under the Resource Conservation and Recovery Act (RCRA), etc. (see similar comment for Policy 3-7.1 on page 3-12).

Page 5-14, Section 5-7: Utility Facilities

In the first sentence of the general comments, we suggest replacing "avoid environmental degradation" with "minimize environmental impact."

In the third sentence of the general comments, we suggest replacing "do not degrade the environment" with "minimize environmental impact."

The present wording is misleading - there will be a certain minimum level of localized impact on the environment as a result of development.

Page 5-14, Policy 5-A.2: Public Policies/Geophysical Hazard Areas

Suggest this policy be modified to the following to appropriately recognize state and federal approval processes and the need to minimize redundant reviews and approvals:

> "Development in Geophysical Hazard Areas shall be approved only on a site specific basis and in concert with the associated state and/or federal approval requirements."

Page 5-15, Policy 5-A.4: Public Policies/Geophysical Hazard Areas

See previous comment for Policy 3-5.3 on page 3-10 and Policy 5-4.5 on page 5-12.

Suggest the last sentence of this policy be deleted for the reasons stated previously.

Appendix, Table 5.2: Measured Pollutant Levels

Two important footnotes are missing from this table. They are as follows

"3 Ozone standard is attained if the expected number of days per calendar year with maximum hourly average concentration above 0.12 ppm is equal to or less than one."

"4 Guidelines used to achieve compliance of the ozone standard."

Footnote 3 above should be referenced for the 1 hour maximum ozone standard (present reference to footnote 2 should be deleted).

Footnote 4 above should be referenced for the 6-9 AM Maximum Non-Methane Hydrocarbon Standard.

Page 6-8A, Section 6.4(6-1): Development Policies/Full Employment

We support a voluntary local hire policy. However, local hire policies that may be used to influence decisions for approval of permits at any level of government are unconstitutional.

Policies 6-1.1 to 6-1.3 are not appropriate to be used in a permit decision. For Policy 6-1.2, it is important to note that such flexible hiring practices are generally not consistent with prudent management practices and operational requirements of petroleum development.

Page 6-8B, Section 6.4(6-2): Development Policies/Inupiat Industries

Policy 6-2.1 is not objectionable but is not appropriate to be used in a permit decision.

Page 6-8B, Section 6.4(6-3): Development Policies/Local Economic Development

We will continue to diligently pursue any opportunities to utilize the services of local private businesses and regional and village corporations within the Borough. It is contrary, however, to the free enterprise system to regulate by policy the use of local businesses and corporations.

Policies 6-3.1 and 6-3.2 are not objectionable but are not appropriate to be used in a permit decision. For Policy 6-3.3, it is important to note that such flexible hiring practices are generally not consistent with prudent management practices and operational requirements of petroleum development.

Page 7-6, Policy 7-3.1: Haul Road Corridor

The Borough does not have the authority to prohibit facilities in the Haul Road Corridor. Suggest this be modified to a relative policy by replacing "prohibited" with "discouraged."

Page 7-6, Policy 7-4: Disturbance of Habitat

Suggest this policy be modified to the following:

> "Disturbance of subsistence resource habitat or migration routes during migration periods by transportation modes or development is prohibited if it can be conclusively shown to significantly affect adversely such habitat or routes, unless such significant adverse effects can be appropriately mitigated, or no feasible and prudent alternative is available."

Suggested changes would incorporate the appropriate considerations of a conclusive finding of adverse effects and mitigation.

Page 8-8, Policy 8-1: Local Employment

We support a voluntary local hire policy. However, local hire policies that may be used to influence decisions for approval of permits at any level of government are unconstitutional. Policies 8-1.1 and 8-1.2 are not appropriate to be used in a permit decision.

Page 8-8, Policy 8-2: Local Business

We will continue to diligently pursue any opportunities to utilize the services of local private businesses and regional and village corporations within the Borough. It is contrary, however, to the free enterprise system to regulate by policy the use of local businesses and corporations. Policies 8-2.1 and 8-2.2 are not appropriate to be used in a permit decision.

Page 8-8, Policy 8-3: Flexible Employment Schedules

It should be noted that such flexible working schedules are generally not consistent with prudent management practices and operational requirements of petroleum development. Policy 8-3.1 is not appropriate for use in a permit decision.

Appendix, Tables 8.5 thru 8.8

It should be noted that the data presented in these tables is very misleading due to the gross measures used for magnitude, term and location, and the fact that a number of the listed actions or impacts have a relatively low probability of occurrence. We suggest that an appropriate comment concerning the use and accuracy of these tables be included on the tables and in the text of Chapter 8 where the tables are referenced.

Page 9-9, Policy 9-2: Public Fiscal Balance

We suggest this policy be modified to the following:

> "Development which results in an excess of tax revenues over demand for Borough expenditures necessitated by the development is strongly encouraged."

The comparison of expected increased revenue versus additional expenditures resulting from the proposed development would then be the determinant for this relative policy. We do not believe, however, that this policy is appropriate for use in permit decisions.

Page 9-10, Policy 9-A.2: Consolidated Service Base Facilities

Consolidated service base facilities to be provided by the Borough should be subject to the prior approval of the developer and not forced upon the developer as a permit condition.

Page 10-4, Section 10.3.4: Resource Development District

Item (c) in this section should be modified to be consistent with the Land Management Regulations, Section 19.40.058, which includes Sag Delta/Duck Island, West Mikkelsen and Point Thompson. Also, the section should be modified to include all existing and future state and federal leases for reasons outlined in the comment on Section 19.40.058. Therefore, we suggest the following language:

The last sentence of item (c) should be replaced with:

"The initial Resource Development (RD) Districts are the Prudhoe Bay, Kuparuk, Milne Point, Gwyder Bay, Sag Delta/Duck Island, West Mikkelsen and Point Thompson fields, and all other existing state and federal leases. All future state and federal leases will be automatically re-zoned to Resource Districts upon issuance of the leases."

Pages 10-5 and 10-6, Section 10.4.1.2: Policies/Special Habitat Areas

Policies 3-4.1, 3-6.2, 3-7.2, 5-2.2, 5-6.2 and 7.6 are redundant and should be cited jointly (also should include Policy 5-7.4).

Policies 3-3.1 and 3-3.4 should also be listed as policies affecting Special Habitat Areas.

Policies 3-2.1 and 3-6.5 are cited incorrectly relative to the policies as listed on pages 3-8 and 3-11 of the Plan, respectively.

Policies 3-7.3, 7-5 and 7-6 should be listed as 3-7.2, 7-4 and 7-5 to be consistent with the policies listed on pages 3-12, 7-6 and 7-6 of the Plan, respectively.

Page 10-8, Section 10.4.2.1: Subsistence Use Areas/Purpose

Reference is made in this section to the "great weight" to be accorded village resident comments relative to activities proposed within the "Village Area of

Influence." This reference should be deleted consistent with changes previously adopted for Policy 2-B on page 2-5 of the Plan and Section 19.60.020(c) on page 60-1 of the Land Management Regulations.

Page 10-9, Section 10.4.2.2: Subsistence Use Areas/Policies

Policy 3-7.4 should also be listed as a policy affecting Subsistence Use Areas. Policy 3-1.3 is cited incorrectly relative to the policy as listed on page 3-7 of the Plan.

Pages 10-9 and 10-10, Section 10.4.3.2: Geophysical Hazard Areas/Policies

Policies 5-4.1 (page 10-9), 3-5.3 and 5-4.5 are cited incorrectly relative to the policies as listed on pages 5-12, 3-10 and 5-12 of the Plan, respectively.

The Policy 5-4.1 cited on page 10-10 of this section is incorrectly numbered and does not exist elsewhere in the Plan. If this policy is to be incorporated in Chapter 5 and retained in Chapter 10, we suggest modifying it to the following:

> "Drilling in active seismic faults is prohibited unless appropriate mitigating measures are taken or no feasible and prudent alternative is available."

Page 10-11, Section 10.4.4.3: Historical and Cultural Areas/Location

We suggest dropping the phrase "a comprehensive archaeological and Land Use Inventory" from the third line in this section to eliminate any confusion. It is

our understanding that the designated "Historical and Cultural Areas" are to include only "sites that are currently on, or that are awaiting approval for, the National Register," as specified in Policy 4-1 on page 4-5 (and page 10-11).

Page 10-12, Section 10.4.6: Special Area Maps

Suggest modifying this section to the following:

> "Maps 2-10 indicate the general location of the special zoning areas where the various Comprehensive Plan policies apply. These maps do not provide the actual location of the special area boundaries, and as a result, the applicable policies will be determined on a case-by-case basis. The final determination relative to the applicability of a particular policy will be the responsibility of the Administrator. The Administrator's decision may be appealed to the Planning Commission, as provided in Section 19.60.071. Amendments to the maps are considered major changes to the Comprehensive Plan and therefore require notice, public review and hearing before the Planning Commission, and final approval of the Planning Commission and Borough Assembly."

Suggested changes would clarify the intent of this section, and appropriately set out the responsibilities, appeal process and amendment process as they pertain to the Special Area Maps.

Page 10-13, Section 10.5: Village Areas of Influence

Reference is made in this section to the "great weight" to be accorded to the knowledge and experience of residents of the affected Area of Influence in development related decisions. This reference should be deleted consistent with changes previously adopted for Policy 2-B on page 2-5 of the Plan and Section 19.60.020(c) on page 60-1 of the Land Management Regulations.

LAND MANAGEMENT REGULATIONS

Comments on policies in the Regulations only address inconsistencies with policies found in the Plan. Recommended changes to policies in the Plan should be included in the policies section (Chapter 80) of the Regulations.

Page 10-1, Section 19.10.020(d): Purpose

The word "prohibit" should be deleted.

Page 20-3, Section 19.20.020: Definitions

The definition of "Best Available Technology" should be modified to include a cost/benefit consideration. We suggest the following language:

"Best Available Technology means the technology or technologies that best and most safely implements the relevant policy(ies); that is available to the

applicant at the time of application; and that considers a cost versus benefit analysis."

Page 20-3, Section 19.20.020: Definitions

The definition of "Best Efforts" should be modified to include a cost/benefit consideration. We suggest "and that considers a cost versus benefit analysis" be added at the end of the present definition.

Page 20-3, Section 19.20.020: Definitions

The definition of "Coastal Area" should be modified to be consistent with the proposed Coastal Management Program (CMP). As presently worded the definition is inconsistent with what is outlined in phase II of the background document for the CMP.

Pages 20-4 and 20-5, Section 19.20.020: Definitions

The definition of "Development" is much too broad. Items (b) and (g) should be deleted.

Page 20-13, Section 19.20.020: Definitions

The "Use-by-Right" described in these definitions results from the rezoning of an area to a Resource Development District. Such rezoning is an uncertain and

cumbersome political process that depends on the current membership of the Planning Commission and Borough Assembly. Prospective bidders on State and Federal Leases need to know that, if they are successful on their bids, they will be able to conduct oil and gas operations in accordance with the lease terms; a requirement for rezoning would create prohibitive uncertainty for these lease sales. A rezoning requirement would also be invalid as State and Federal laws preempt the field of oil and gas operations.

We propose the following language:

> "Use by Right means a use pursuant to a local, state or federal agency permit."

Pages 20-12 and 20-13, Section 19.20.020: Definitions

The definition of "subsistence use" is vague and overbroad. Administration of the regulations that rely on this definition could be arbitrary and capricious.

We suggest the following language:

> "Subsistence Use is a use and includes hunting, whaling, fishing, trapping, camping and food gathering."

Pages 20-3 through 20-13, Section 19.20.020: Definitions

Definitions should be provided for the following terms: "Mandatory," "Best Efforts," and "Beneficial" policies; "highway"; "shoreline"; "general environ-

mental conditions"; "toxic materials"; "untreated solid waste"; "public benefit"; and "public purpose".

Pages 30-5 and 30-6, Section 19.30.062: Enforcement Orders

This provision creates wide discretionary authority to the Administrator, which, if enacted, will subject the Developer to the potential for arbitrary and capricious actions of the Administrator. This provision should be modified since the authority delegated to a borough by the State legislature does not include the power to regulate or discontinue an activity where State law already preempts the field, e.g., oil and gas operations. The burden of proof should be on the Administrator since he/she initiates an action which could result in the developer being deprived of rights.

We propose the following language:

"The Administrator may:

(a) recommend to the Planning Commission the discontinuance of activity for any development which does not comply with the terms of this Title 19;

(b) order the removal or abatement of buildings or structures subject to the Revocable Development Permit Provisions of Section 19.60.090; or

(c) order any action necessary to ensure compliance with all the provisions of this Title 19, including but not limited to, suspension of Use Permits and Development Permits.

Any such enforcement order shall be signed by the Administrator and served upon the Developer or his agent or supervisor on the site (if known), or (if unknown), posted in a conspicuous place on the site. The Administrator shall transmit a copy of the enforcement order to the Chairman of the Commission, and shall keep a copy thereof in permanent record.

Upon application of the Developer, or upon its own motion, the Commission shall review the enforcement order at its next regular meeting. The review shall be limited to the presence of violations stated in the enforcement order, and in such review the burden shall be upon the Administrator to prove that violation does exist or did occur. The Commission by resolution, may modify or rescind the enforcement order."

Pages 30-7 and 30-8, Section 19.30.063: Violations, Penalties and Remedies

This section provides that an aggrieved citizen may institute a civil action to enjoin violations of the ordinance. The Borough should recognize that the violation of a zoning ordinance generally does not establish a private cause of

action for individuals to enforce the ordinance, absent some unique and substantial harm to such individuals resulting from the activity constituting the violation.

We suggest the following language:

> In subsection (a), on the fourth and fifth lines, delete "or any aggrieved citizen."

Further, the action to enjoin a violation may not be brought unless it can be established that no adequate legal remedy exists. For the section to mandate to the contrary is legally inappropriate. The prescription that courts shall grant injunctive relief to restrain violations of the ordinance invades the province of the judiciary, in violation of the Doctrine of the Separation of Powers.

In this regard, we propose the following modification:

> In subsection (a), delete the last two sentences.

Page 40-5, Section 19.40.042: Conservation District, Uses by Right

Uses authorized and permitted by the state or federal government on state or federal land should be uses-by-right requiring no permit from the Borough.

We suggest the following language:

"Uses-by-Right. There are no uses-by-right in the Conservation District, except uses authorized and permitted by the state or federal government. These regulations only govern "Development", and uses and activities excluded from the definition of that term may take place without any form of regulation under this title."

Page 40-6, Section 19.40.052: Resource Development District, Uses-by-Right

All existing and future state and federal oil and gas leases should be included in the Resource Development District. Further, uses authorized and permitted by the state or federal government on state or federal land should be uses-by-right requiring no permit from the Borough.

We suggest the following language:

"Uses-by-Right. All development indicated on state and federally approved development plans, and minor alterations thereto, and all uses authorized and permitted by state and federal agencies, are uses-by-right in the Resource Development District."

Pages 40-6 and 40-7, Section 19.40.055: Resource Development District, Application

An excessive amount of material is stipulated for permit applications. This should be reduced to include only such information as necessary for the Administrator and Commission to assess the overall impact of a proposal.

We suggest the following modifications:

Subitem (b) - "Schematic drawings and analyses of all proposed or quasi-public facilities, and all other proposed structures;"

Subitem (c) - delete entirely.

Subitem (d,e) - delete entirely as these are requirements which the Borough would more appropriately provide.

Subitem (g) - delete entirely as this requirement will be satisfied in subitem (b).

Subitem (h) - delete entirely as this requirement and subitem (c) will be included in the required Master Plan.

Pages 40-8 and 40-9, Section 19.40.057: Prudhoe Bay and Kuparuk River Resource Development District

The purpose of this provision is to 'grandfather' into the Comprehensive Plan

existing operations at the Prudhoe and Kuparuk Units. However, as presently drafted, the provision only includes Plan of Development Maps. This section should be reworded to read as follows:

> "Plans for development of unitized areas as approved by the State are hereby adopted as the Master Plan for each District and uses authorized and permitted by the State or Federal government on state or federal lands are uses-by-right requiring no permit from the Borough. Future leases issued by the State are hereby rezoned to the Resource Development District and provisions above apply."

The Milne Point Unit should also be included in this section. An analysis of the level of development that has occurred at Milne Point suggests it is more appropriately grouped with the Prudhoe Bay and Kuparuk River Units rather than other unitized areas on the North Slope involved in earlier stages of development.

Page 40-9, Section 19.40.058: Milne Point, Gwyder Bay, Duck Island, West Mikkelsen and Point Thompson

This section should be modified to include all existing and future state and federal leases. The rationale for this inclusion is that once the state or federal agencies have determined that an area is appropriate for resource development, specifically oil and gas, then prospective successful bidders will be certain that oil and gas operations may be conducted in accordance with the terms of the lease.

This section should be reworded to read as follows:

"Plans for exploration and development as approved by the State for these and future units are hereby adopted as a portion of the Master Plan for the unit and uses authorized and permitted by the State or Federal government on state or federal land are uses-by-right requiring no permit from the Borough. Unitization Plans of Development, should development occur, are hereby adopted as the Master Plan for each unit. Future leases issued by the state are hereby rezoned to the Resource Development District and provisions above apply."

The Milne Point Unit should be deleted from this section and included under Section 19.40.057. (See comment under Section 19.40.057 for explanation).

Page 50-2, Section 19.50.040: Appeals

The burden of proof should not be on the developer, as an aggrieved party.

Pages 60-2 and 60-3, Section 19.60.034: Conditions

The permitting requirements and conditions proposed for oil and gas development by the NSB have been preempted by State and Federal permitting requirements and oversight authorities.

Page 60-3, Section 19.60.061(b): Grounds for Variances

The terms "public purpose" and "public benefit" should be defined and should include consideration of state and national interests.

Page 80-1, Section 19.80.010: Introduction

Suggest that this section be modified to the following to ensure a clear understanding of its purpose and content:

> "The policies contained in this Chapter constitute the guidelines to be used in evaluating a proposed development project for approval or denial. Uses granted by right would not be subject to such an evaluation. The Development Policies contained in the Comprehensive Plan are restated here along with citations to the relevant policies in the Plan."

Pages 80-1 thru 80-3, Section 19.80.021: Prohibited Development/Mandatory Policies

Item (c) - not cited consistent with Policy 3-3.3. Reference to "Borough Coastal Management Program" should be replaced with "Alaska Coastal Management Program."

Item (f) - for consistency should delete "is prohibited" at end of Policy.

Item (g) - for consistency should delete "is prohibited" at end of Policy.

Item (i) - should be deleted from this section and added to Section 19.80.031 since it is a "Best Efforts" Policy.

Item (k) - not cited consistent with Policy 7-3. The words "located anywhere within" should be deleted from third line and replaced with the word "in."

This section should also cite the first part of Policies 3-4.2 and 5-2.3, and Policy 3-7.3 as mandatory policies.

Pages 80-3 thru 80-5, Section 19.80.025: Required Features/Mandatory Policies

Item (b) - not cited consistent with Policy 3-5.3. Note difference in citation for variance requirements (one or the other should be changed).

Item (g) - not cited consistent with Policies 5-3.2 and 3-8.3. The words "unless pursuant to Plan policies removal is more harmful than non-removal" should be added to the end of the Policy to be consistent.

This section should also cite Policy 5-2.4.

Page 80-5, Section 19.80.030: Best Efforts Policies

Item (b) should be modified to the following to incorporate the concept of mitigation:

> "The Administrator determines that the Developer has used his best efforts to comply with the policy thru mitigation or otherwise, and that there is no feasible and prudent alternative to the proposed development."

Pages 80-5 thru 80-8, Section 19.80.031: Prohibited Development/Best Efforts Policies

Item (f) - not cited consistent with Policy 3-3.4. Note difference in Map references.

Item (g) - the first part of this cite "Development on a shoreline that does not require a shoreline location" should be deleted from this section and included in Section 19.80.021 as a mandatory policy.

The balance of this cite "Landfills, Fuel or toxic material, storage areas and dumps on or near a shoreline." should be retained as item (g) in this Section (19.80.031).

Item (k) - not cited consistent with Policy 3-6.7. The words "resource extraction" should be replaced with "mine."

Item (n) - the first part of Policy 4-3 should not be cited in this section as a "Best Efforts" Policy, but rather be included in Section 19.80.040 as a requirement to minimize impact. Also, the policy as cited here is not consistent with the first part of Policy 4-3.

Item (p) - the Map and Section references should be included in this cite consistent with Policy 5-4.1.

Item (q) - Policy 7-5 should not be cited in this section as a "Best Efforts" policy, but rather be included along with the identical policies in Section 19.80.040 (see Item (c) on page 80-11).

Item (r) - The Policy citation should be 7-4 rather than 7-5.

Item (s) - not cited consistent with Policy 8-2.2. Note that all words after "Resource development which" are misquoted.

Item (t) - not cited consistent with Policy 8-1.2. The words "unless residents of" should be replaced with "if" and "no" should be replaced with "an."

This section should also cite the second part of Policy 4-3, and Policy 5-5.6, as "Best Efforts" policies.

Pages 80-8 through 80-10, Section 19.80.032: Required Features/"Best Efforts" Policies

Item (e) - Policy 5-5.7 should not be cited in this Section, but rather be included in Section 19.80.031 as a "Prohibited Development/Best Efforts" Policy.

Item (f) - not cited consistent with Policy 5-4.5. The words "third party" should be added after "Independent" in the first line.

Pages 80-10 and 80-11, Section 19.80.040: Minimization of Negative Impacts

Item (b) - Policy citation for Policy 5-7.5 should be 5-7.4. Also, Policy citation should include Policy 7-5.

Item (d) - not cited consistent with Policy 5-4.2. The words "oceanic storms, sea waves, ice gouging and override, and shore" should be deleted.

This section should also cite the first part of Policy 4-3, and Policy 5-4.6, as policies to minimize negative impacts.

Pages 80-11 through 80-13, Section 19.80.050: Beneficial Impacts

Item (a) - not cited consistent with Policies 3-5.2 and 5-2.1. The words ",as methods of minimizing negative impacts on the environment" should be added at the end of this policy.

Item (b) - Policy 3-6.4 is appropriately cited in Section 19.80.040 and therefore this cite should be deleted. Also, note that the cite in this section is not consistent with Policy 3-6.4.

Item (c) - not cited consistent with Policies 3-8.4 and 5-3.3. The words "Design and maintenance of" should be deleted and all the words after "which" are misquoted.

Item (d) - the word "nor" should be "no."

Item (e) - not cited consistent with Policies 5-6.1 and 7-6. The words "Incorporation of" should be replaced with "Development" and the words ",or joint use of transportation facilities" should be added at the end.

Item (f) - not cited consistent with Policies 6-1.1 and 8-1.1. Should read "Development which employs local Borough residents in construction and development activities or its work force."

Item (g) - not cited consistent with Policies 6-1.2, 8-3 and 6-3.3. The words "Utilization of" should be replaced with "Development which."

Item (h) - not cited consistent with Policy 6-1.3. The words "Incorporation of" should be replaced by "Development which."

Item (i) - The word "related" should be "relates."

Item (k) - not cited consistent with Policies 6-3.2 and 8-2.1. The words "Utilization of" should be replaced with "Resource development which," the word "businesses" should be "business," and the words "as suppliers or subcontractors" should be replaced with "in its operations."

Item (m) - not cited consistent with Policy 6-4.2. The words "Utilization of" should be replaced by "Development which."

Item (o) - not cited consistent with Policy 9-2. The words "Development which results in an" should be added at the beginning.

Explanation: The issue of determining the sufficiency of grounds for a recall election was discussed by the committee. It appeared that a concensus was reached to eliminate the requirement for providing legal grounds to conduct a recall election and to increase signatory requirements for the petitioners.

SUBJECT: Recall of municipal officials
(Work Order No. 13-0837)

TO: Representative Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked what the responsibility of the clerk is in reviewing recall petitions for sufficiency.

What a recall petition must contain and the method of determining the sufficiency of a petition depends on the specific statute involved and these types of laws vary from state to state. Some statutes require only a general statement of the grounds for recall and an official may be recalled for purely political reasons. However, other statutes require grounds for recall that are more than simple disagreement with matters of policy and the grounds stated must actually constitute misfeasance, malfeasance or nonfeasance in office. McQuillan, Municipal Corporations, vol. 4, sec. 12.251b: Noel v. Oakland County Clerk, 284 N.W.2d 761 (Michigan 1979); Bent v. Ballantyne, 368 S.2d 351 (Florida 1979); Tolar v. Johns, 147 S.2d 196 (Florida 1962); Jacobsen v. Nagel, 96 N.W.2d 569 (Minnesota 1959).

Where petitioners are required to state only general grounds, the recall petition need not state the cause for removal with the same particularity as where the requirement is that reasons for removal be stated clearly. The purpose of a general statement of grounds is to furnish information to electors upon which a political and not a legal issue may be raised. Under statutes providing that a statement of grounds for recall is for the information of the electors, the question of the sufficiency of those grounds is also for the electors, but under provisions authorizing recall for malfeasance or similar language, the sufficiency of the grounds provided is a legal question. 63 Am. Jur.2d, Public

Officers and Employees, sec. 245; Pybus v. Smith, 141 P. 203 (Washington 1914).

Statutory provisions as to recall are to be liberally construed in favor of the electorate's right to exercise recall. Hazelwood v. Saul, 619 P.2d 199 (Colorado 1980). Under this principle and in the absence of statutory language limiting the recall to specific, indicated reasons, the adequacy of grounds stated in a petition is treated as a political matter and courts refuse to enjoin recall petitions on complaints that charges are insufficient. However, where recall is limited to specified grounds of malfeasance or similar language it is generally held that

> . . . petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Municipal Corporation Law, sec. 22.200, pages 22-304 - 22-305.

The officer designated to ascertain the sufficiency of a petition in a particular statute may be required to determine legal sufficiency rather than matters of form only. Unless an appeal is specifically provided for, the officer's determination as to sufficiency of a recall petition is final and subject only to judicial correction if the determination is capricious, arbitrary, or plainly erroneous as a matter of law. McQuillan, supra., vol. 4, sec. 12.251(d); Hold v. Trantham, 575 S.W.2d 83 (Texas 1979).

Article XI, section 8 of the Constitution of the State of Alaska provides:

> All elected public officials, in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedure and grounds for recall shall be prescribed by the legislature. (Emphasis added)

In carrying out this constitutional responsibility the legislature has provided under AS 29.28.140 that misconduct in office, incompetence, and failure to perform prescribed duties are the grounds for recall. In addition, under AS 29.28.150(a)(3), a petition for recall must contain ". . . a statement of the grounds of the recall stated with particularity as to specific instances". (Emphasis added)

The municipal clerk is required to review the petition ". . . for content and signatures . . ." under AS 29.28.160.

These statutory provisions dealing with recall have not been judicially construed by the Supreme Court in this state, so it cannot be determine with certainty whether the clerk is required to review the petition for signatures and form only or whether the clerk must determine as a legal matter whether the specific instances set out in a petition, if true, constitute misconduct in office, incompetence or failure to perform prescribed duties. Under the principles set out previously in this memorandum it appears that the clerk is required to determine whether the specific instances set out support a claim of misconduct in office, incompetence or failure to perform prescribed duties because AS 29.28.150 demands more than just a general statement of the grounds for recall and does not specifically indicate that the stated grounds are for the information of the voters only.

Under both versions of the bill revising Title 29, SB 1 and HB 172, the grounds for recall remain unchanged although the procedure for recall has been substantially changed. Nevertheless, an applicant for a recall petition under Sec. 29.26.260(a)(3) is still required to set out the grounds ". . . with particularity". The clerk must prepare a recall petition only if the clerk determines that the application for the petition meets the requirements of AS 29.26.260, including the requirement that grounds be ". . . stated with particularity" (Sec. 29.26.280). After a petition is filed the clerk must again determine whether the petition is sufficient and, if insufficient, ". . . identify the insufficiency and notify the sponsors. . ." (Sec. 29.-26.290). It seems clear that since the clerk must identify the insufficiency, a determination of sufficiency is not limited to review of signatures, even though (b) and (c) of the section only provide for correcting a petition insufficient for lack of signatures. It appears under these sections that the clerk would still be required to determine whether the grounds stated, if true, actually constitute misconduct in office, incompetence, or failure to perform prescribed duties.

I believe that this interpretation conforms to the intent of the policy committee that produced the original version of a Title 29 revision bill. There was considerable discussion of the recall provisions by that committee and at one point

the committee considered requiring only a general statement of reasons for recall and allowing recall to proceed upon purely political grounds. It was even suggested that grounds for recall be eliminated entirely. That approach was specifically rejected by the committee. Consequently, I would recommend that HB 172 be amended to clearly reflect the fact that the clerk is to review a recall petition for form and signatures only, and not to determine whether grounds stated actually constitute misconduct in office, incompetence, or failure to perform prescribed duties, if that is the result intended by the legislature.

RE: House Bill 172 amendment 6

The attached letter of intent and proposed language for implementation was prepared during hearings of SB 1, comparison legislation to HB 172.

Present law requires first class and home rule cities in the unorganized borough to accept the responsibility for delivery of Educational services. It is perceived that the requirement to be responsible for educational services may be a deterrant to certain cities or areas to organizing or upgrading to first class or home rule status. The opposition for a city to assume the educational powers could come either from an existing REAA or the city.

The proposed change to HB 172 would resolve the issue of the assumption of education powers by vote of the residents in the city and in the REAA.

LETTER OF INTENT
TO CSSB 1

February 24, 1983

It is the intent of the Senate Community and Regional Affairs Committee that the assumption of the education power by newly formed or upgraded first class or home rule cities be dependent upon a vote in the existing Regional Education Attendance Area. If the vote both within the city and in the remainder of the REAA was not in favor of the city assuming the education power, it would not.

This Letter of Intent was discussed and unanimously approved by the Senate C & RA Committee. The attached page labelled "Proposed Amendment #10" is what the committee members had in front of them when the Letter of Intent was endorsed. The longer attached amendment, drafted by Legal Services, represents all of the actual changes that need to be made to SB 1 to carry out the Letter of Intent.

Though the committee strongly endorses this concept it was felt the full amendment should be available for review before it was adopted, which is why this method of presentation was followed. The Community and Regional Affairs Committee urges the Finance Committee to incorporate the intent of the attached proposed Amendment #10 into SB 1.

PROPOSED SENATE AMENDMENT

By Community & Regional Affairs Committee

To: _____ SENATE BILL No. 1

To: _____ HOUSE BILL No. _____

PAGE: LINE:

Note: This change is listed as a proposal rather than an amendment because of the complex drafting that will be required to make sure all the necessary sections are cross referenced. Legal Services has reviewed this proposal and suggested this approach because of time constraints. If the Committee approves this proposal, Legal Services will incorporate it as part of the Committee Substitute.

Page 10, after line 19, insert new section:

"29.05.145. ASSUMPTION OF THE EDUCATION POWER. (a) When an unincorporated area or second class city that is part of a Regional Education Attendance Area incorporates or upgrades to first class or home rule city status, the assumption of the education power shall be in accordance with this section

(b) When an unincorporated area or city that is part of a REAA incorporates or upgrades to first class or home rule city status, that Director of Elections shall conduct an election in the REAA within 90 days of the incorporation.

(c) At this election, voters of the REAA shall be given an opportunity to approve or disapprove the assumption of the education power by the newly incorporated or upgraded first class or home rule city.

(1) The vote shall be counted separately within the city limits of the newly incorporated or upgraded city and in the remainder of the REAA.

(2) A majority of voters in both areas must approve the assumption of the education power by the newly incorporated or upgraded city or it may not assume the education power"

Alter other sections as necessary to conform.

RE: House Bill 172 amendment 7

During Committee review of HB 172 there was discussion but no apparent concensus concerning the exemption of greenhouses from assessement at full valuation for taxation purposes (Page 109, line 22).

The existing law does not give special treatment for greenhouses. The intent of providing special tax treatment for farm lands (not including barns, houses, sheds, etc.) was to assist the farmer in resisting the pressures of urban growth rather than being forced to subdivide farm land because of inflated land values. The effect of the new language is to provide a special tax treatment for greenhouses, including commercial greenhouses raising ornimental flowers.

Possible Deletion

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "developed" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation. BOX B, PALMER, ALASKA 99645 • PHONE 745-4801

BOROUGH ATTORNEY'S OFFICE

April 6, 1983

File Bill

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: HB 172 "DEVELOPED" DEFINITION

The present version of HB 172 provides for a tax exemption as required by 43 U.S.C. 16.20(d) for certain Native lands. This exemption provides a definition of "developed" for implementing the federal law. I recommend that this matter be treated in a separate bill rather than in HB 172 or SB 1, the parallel bills intended as housekeeping measures to revamp Title 29.

During the last legislative session certain amendments were made to the Title 29 bill on the House floor which caused a great deal of controversy. In re-introducing the Title 29 in the present legislature, all of these amendments were removed except for the provisions for implementing the tax exemptions under 43 U.S.C. 16.20(d). This amendment was incorporated in AS 29.45.030 of the bill.

Pursuant to federal law, certain Native lands are not taxable until "developed". The intent of the proposed definition in AS 29.45.030 is to clarify what improvements of land will constitute "development" for tax exemption status.

I believe that the intent of this section is to assure that lands will not be taxed simply because an access road is constructed to the property or improvements are placed on the property in anticipation of future development. However, the language is sufficiently ambiguous to permit the interpretation that even a regular, residential or commercial subdivision development would not be taxable until the lots were sold. Once land is subdivided, roads are constructed and other improvements are put in place, the available lots become the sale inventory of the real estate developer. An exemption from taxation of these lots would give the exempted developer an unfair advantage over other developers with which it was in competition.

Because this provision is not in existing Title 29 and because there is potential controversy involved, I recommend that

it not be included in HB 172, a housekeeping bill. As a separate bill, I believe that the Borough would support a definition between a taxable subdivision development and tax exempt lands which have been surveyed and have constructed roads.

Sincerely,

Steven H. Morrissett
Borough Attorney

SUBJECT: Native Lands, Title 29 Revisions – Sec M #1 Lines 28 + 29 Page 100 – 101

By the definition included in the work draft of Title 29 the Kenai Peninsula Borough would loose approximately 13.9 Million in assessed valuation. This would equal about $41,727 based on a 3 mill average.

This would also put the Native lands in a better position to develope and compete in the open market, if they wished. They could do all the preliminary work, such as roads, utilities, survey, and hold the property for the highest return, and still not pay taxes. – this would only [illegible] to Native. It would primarily be Longevity in this [illegible] as well as the Boro. We currently have 13.9 million in assessed value that the different regions have been paying taxes on. We have had them on the tax rolls for 4 or 5 years and they paid their taxes without paying under protest.

Cook Inlet	7,281,205
Ninilchik	924,950
Seldovia Native	2,882,300
Slamatoff	589,500
English Bay	2,708,800
Port Graham	1,068,000
Total	15,454,755

Also when 20 years are up & Native Lands would be on the tax rolls – they they would be Exempt at a tremendous loss to the Boro – [illegible] until Sold

Re: HB 172, proposed utilities amendment. (#9)

The attached amendment to HB 172 has been requested by Mr. Dave Hutchins, representing the Alaska Rural Electric Cooperative Association.

The controversy over the proposed amendment is based on the authority of municipalities, or lack of authority, to regulate utilities that are not subject to regulation by the Alaska Public Utilities Commission under AS 42.05.

A summary of the controversial portions of the three options presented to the committee is as follows:

1. Present Statues:
   a. Municipalities cannot regulate or grant franchises to any utility that is regulated by the Alaska Public Utilities Commission (APUC) under AS 42.05.

   b. APUC approval is required for a municipality to extend a municipal utility's service area.

The present laws are silent on the authority--or lack of authority-- of municipalities to regulate non-municipal owned utilities that are not regulated under AS 42.05. Since a General Law municipality has only the powers granted by law, it would probably be upheld that a General Law municipality does not have the authority to regulate a non-municipal owned utility that is not regulated by APUC.

2. HB 172 Provides:
   a. Municipalities may grant franchises and regulate utilities to the extent they are not subject to regulation by APUC under AS 42.05, or not otherwise prohibited by law.

   b. Municipal owned utility services may be extended outside of the municipal boundaries (subject to approval by APUC).

3. Amendment requested by utilties:
   a. Whenever a utility is exempted from regulation by APUC or subject to regulation under AS 42.05, a municipality may not regulate the utility.

   b. A municipality may only extend utility services to an area adjacent to the municipal boundaries. This provision would prevent a municipal utility from providing utility services to an area that is not adjacent to the municipal boundaries.

The utilties that are, or may be, exempted from APUC regulation and as such are the utilties that are at the center of this issue are identified in AS 42.05.711 (copy attached).

PROPOSED AMENDMENT TO

HB 192

Page 33, after line 28, insert:

"(26) AS 29.35.060 (franchise and permits)"

Renumber following paragraphs accordingly.

Page 33, after line 29, insert:

"(28) AS 29.35.075 (disputes and conflicts with state certificated utilities)."

Renumber following paragraphs accordingly.

Page 74, line 12, delete:

"utility services,"

Page 77, after line 6 add a new subsection to read:

"(c) This section applies to home rule and general law municipalities."

Page 77, lines 7 through 22, delete present language and replace it with the following:

"Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly for the area outside all cities in the borough and the council acting for the area in a city may regulate a utility service and fix, establish, and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except to the extent

(1) the utility is subject to regulation under AS 42.05; or

(2) municipal regulation is prohibited by AS 42.05.711(k) or other law.

(b) A municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

(d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing

rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

(e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees for or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

(f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

(g) This section applies to home rule and general law municipalities."

Page 195, after line 22, add a new section to read:

"** Sec. 62. AS 42.05.711 is amended by adding a new subsection to read:

(k) A public utility that is exempt or partially exempt under (d) through (j) of this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a muncipality."

Chugach Elec. Ass'n, Sup. Ct. Op. No. 1636 (File Nos. 2969, 2993), 580 P.2d 687 (1978); B-C Cable Co. v. City of Juneau, Sup. Ct. Op. No. 2112 (File No. 4587), 613 P.2d 616 (1980).

Sec. 42.05.711. Exemptions. (a) The provisions of AS 42.05.010 — 42.05.721 do not apply to a person who furnishes water, gas or petroleum or petroleum products by tank, wagon, or similar conveyance, unless the person is thereby supplying water, gas, petroleum or petroleum products to a public utility in which he has an "affiliated interest."

(b) Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with any other utility, are exempt from the provisions of AS 42.05.010 — 42.05.721, other than the provisions of AS 42.05.221 — 42.05.281, unless the owner and operator elects to be subject to all provisions of AS 42.05.010 — 42.05.721.

(c) The ownership in whole or part, of the corporate stock of a public utility does not make the owner a public utility.

(d) The commission, on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of AS 42.05.010 — 42.05.721.

(e) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, any electric or telephone utility that does not gross $50,000 annually is exempt from regulation under AS 42.05.010 — 42.05.721 unless 25 percent of the subscribers petition the commission for regulation.

(f) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, an electric or telephone utility that does not gross $325,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(g) A utility, other than a telephone or electric utility, that does not gross $100,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(h) A cooperative organized under AS 10.25.010 — 10.25.650 may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721, other than AS 42.05.221 — 42.05.281, under the procedure described in AS 42.05.712.

(i) A utility which furnishes collection and disposal service of garbage, refuse, trash, or other waste material and has annual gross revenues of $200,000 or less is exempt from the provisions of this chapter, other than the certification provisions of AS 42.05.221 — 42.05.281,

unless 25 percent of the subscribers or subscribers representing 25 percent of the gross revenue of the utility petition the commission for regulation.

(j) The provisions of this chapter do not apply to sales, exchanges or gifts of energy to an electric utility certificated under AS 42.05.010 — 42.05.721 when the energy which is the subject of the sale, exchange or gift is waste heat, electricity, or other energy which is surplus or the by-product of an industrial process. In an area in which no electric utility is certificated for service, energy provided by sale, exchange or gift may be provided to any utility which is certificated for service to that area. A contract for the sale, exchange or gift of energy exempt under this subsection does not make the supplier a public utility, and does not transfer the responsibility to provide utility services from a certificated utility to any other person. (§ 6 ch 113 SLA 1970; am § 3 ch 76 SLA 1973; am § 8 ch 83 SLA 1980; am §§ 7-9 ch 136 SLA 1980; am § 89 ch 59 SLA 1982)

Revisor's notes. — As enacted by chs. 83 and 136, SLA 1980, present subsections (j) and (i) were designated as subsections (f) and (j), respectively, but were redesignated by the revisor of statutes pursuant to AS 01.05.031(b). Former subsection (i) of this section was transferred as § 13, ch. 136, SLA 1980 to the 1980 Temporary and Special Acts and Resolutions by the revisor of statutes pursuant to AS 01.05.031(b).

Effect of amendments. — The first 1980 amendment added subsection (j).

The second 1980 amendment deleted "excepting the furnishing of collection and disposal service of garbage, refuse, trash or other waste material" following "none of whose utilities" near the beginning of subsection (b), deleted the former second sentence in subsection (b), which read: "Notwithstanding any other provisions of this chapter, municipalities providing collection and disposal service of garbage, refuse, trash or other waste material within their corporate boundaries are not subject to regulation by the Alaska Public Utilities Commission unless the municipality elects to be subject to the provisions of this chapter," substituted "$50,000" for "$25,000" following "does not gross" near the middle of subsection (e), substituted "under this chapter" for "hereunder" following "exempt from regulation" near the middle of subsection (e), and added subsections (f) through (i).

The 1982 amendment, effective May 28, 1982, deleted "on June 30, 1980" preceding "a utility" and inserted "annual" preceding "gross revenue" in subsection (i).

Editor's notes. — Section 13, ch. 136, SLA 1980, as revised by the revisor of statutes, provides: "Cable television systems are exempt from the provisions of AS 42.05 [AS 42.05.010 — 42.05.721], other than the provisions of AS 42.05.221 — 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983. If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission."

Opinions of attorney general. — An electrical utility owned and operated by a regional electrical authority would continue to qualify for the broad exemption from this chapter, available to political subdivisions under subsection (b) of this section once the regional electrical authority had completed its proposed organization as a nonprofit corporation pursuant to AS 10.20.005 et seq. June 7, 1976, Op. Att'y Gen.

Sec. 29.48.050. FRANCHISES AND PERMITS. Present LAW

(a) The assembly acting for the area outside cities and the council acting for the area within a city may grant franchises, including exclusive franchise privileges, for the construction, operation and maintenance of bus transportation systems and public utilities not regulated under AS 42.05 and may permit them the use of streets and other public places under regulations prescribed by ordinance.

(b) No franchise is valid until it has been submitted to the qualified voters of the city or borough area outside cities in which it applies, and at least 55 per cent of the votes cast are in favor of the franchise. At least 30 days notice of a franchise referendum election shall be given in the same manner as is provided for notice of regular municipal elections, and the notice shall specify the purpose of the election. The ordinance granting a franchise shall provide for its submission for ratification to the qualified voters of the city or borough area outside cities at either a regular or special election, and the result of the election shall be canvassed publicly by the council or assembly and spread upon the records of the minutes and the result declared and certified in the same manner as in a regular election.

(c) Public utilities regulated under AS 42.05 have the right to use the streets and other public places, upon payment of a reasonable permit fee and on reasonable terms and conditions and with reasonable exceptions the assembly or council requires. A dispute as to whether fees, terms, conditions, or exceptions are

reasonable shall be decided by the Alaska Public Utilities Commission.

Sec. 29.48.060. PUBLIC UTILITIES RATES.

The assembly acting for the area outside cities and the council acting for the area within a city may regulate, fix, establish and change, as it considers proper, the rates and charges imposed for utilities services given to the municipality or its inhabitants by a municipally owned utility not regulated under AS 42.05.010 - 42.05.721 and may regulate and provide what is a reasonable deposit for meters and security for service to be given, provided that interest is paid on the deposit. All rates, charges and regulations shall be reasonable and shall permit a fair and reasonable return on invested capital.

AR NO. 84-65 (Amended)

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY URGING THE STATE LEGISLATURE AND THE GOVERNOR TO PROCEED EXPEDITIOUSLY WITH THE PASSAGE OF TITLE 29 REWRITE.

WHEREAS, the current Title 29, last revised in 1972, is a hodgepodge of 13 years worth of amendments, and

WHEREAS, it is very difficult for the average citizen to read and understand, and

WHEREAS, recognizing the problem, the legislature adopted SCR 66 in 1980, directing the rewrite of Title 29, and

WHEREAS, a broadly representative policy committee, with the assistance of a technical committee, prepared a revised code after an exhaustive series of meetings, hearings, and public presentations, and

WHEREAS, SB 180, the original bill, was passed by the legislature in the 1982 session but because of controversial floor amendments, Governor Hammond vetoed the bill, and

WHEREAS, HB 172, the rewrite of Title 29, is a number one priority of the Alaska Municipal League.

BE IT, THEREFORE, RESOLVED, the Anchorage Municipal Assembly hereby requests the State Legislature and the Governor to proceed expeditiously with the passage of HB 172.

PASSED and APPROVED this 6th day of March, 1984.

Juneau, Alaska 99811

Dear Representative Miller:

Enclosed is a copy of City of Ketchikan Resolution No. 1371 passed by the City Council March 15, 1984.

The Council supports the reorganization of Title 29 and urges the State Legislature to pass House Bill 172 (CSHB 172).

Your consideration of this resolution is appreciated.

Sincerely,

/Karen Miles

CITY OF KETCHIKAN, ALASKA

RESOLUTION NO. 1371

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF KETCHIKAN, ALASKA, SUPPORTING THE REORGANIZATION OF TITLE 29 FOR CLARITY AND FLEXIBILITY AND URGING PASSAGE OF HOUSE BILL 172 (CSHB 172), AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, in 1980 the Legislature adopted SCR 66 which directed that Title 29 be reviewed and rewritten to provide clarity and readability; and

WHEREAS, a broadly representative policy committee representing rural and urban communities, with the assistance of a technical committee, prepared a revised code after an exhaustive series of meetings, hearing, and public presentations; and

WHEREAS, Title 29 as clarified was introduced as HB 170 and SB 180 in 1981; and

WHEREAS, more hearings were held during the First and Second Session of the Twelfth Alaska State Legislature and hearings were also held in the interim between sessions; and

WHEREAS, SB 180 passed the Legislature during the Second Session; and

WHEREAS, because of controversial floor amendments, the City of Ketchikan joined other local governments urging Governor Hammond to veto the bill; and

WHEREAS, Title 29 as clarified was again introduced as SB 1 and HB 172 during the First Session of the Thirteenth Alaska legislature; and

WHEREAS, both bills are basically a reorganization and rewording of Title 29 to enhance its clarity and flexibility; and

WHEREAS, the Council of the City of Ketchikan strongly feels that this clarification is in the best interests of all local governments in Alaska and that the content and intent of the bill is not controversial; and

WHEREAS, the City Council appreciates the hours of time and effort expended on this bill by Alaskans who harbor a great concern for the well-being of Alaska Local Government and believes those hours should not have been expended in vain.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Ketchikan, Alaska as follows:

Section 1: The Council of the City of Ketchikan supports the reorganization of Title 29 for clarity and flexibility and urges the State Legislature to pass House Bill 172 (CSHB 172).

Section 2: The City Council supports this bill in its basic form and requests other proposals which would constitute major policy revisions or innovations in the function of local government be considered in separate legislation.

Section 3: The Council further requests that all committees expeditiously consider House Bill 172 (CSHB 712) to assure action prior to adjournment of the Thirteenth Alaska Legislature.

Section 4: The City Clerk is hereby directed to send copies of this resolution to Representative McBride, Representative Wendte, Senator Ziegler, the House Community and Regional Affairs Committee, the House Judiciary Committee, and the House Rules Committee, the Senate Community and Regional Affairs Committee, the Senate Judiciary Committee, the Senate Finance Committee, the Senate Rules Committee, and the Alaska Municipal League.

Section 5: This resolution shall be effective immediately upon passage and approval.

PASSED AND APPROVED THIS 15 day of March, 1984.

POSITION PAPER

RE: HB 172
SPONSOR: Rules by Request of the Governor

PROGRAM EFFECTS:

HB 172 is a bill that reorganizes and clarifies Title 29 of the Alaska Statutes, which is the Municipal Code.

COMMENTS:

HB 172 is the product of the work of the Community and Regional Affairs Committees of both Houses of the Legislature, the Alaska Municipal League, many of the League's affiliate organizations, and the Department of Community and Regional Affairs.

This bill clarifies the Municipal Code, better organizes it, and eliminates ambiguities and conflicts from existing law.

The Department supports passage of this legislation, as well as considers it one of its highest priorities.

APPROVED: Emil Notti
Emil Notti, Commissioner

21-P1LH

HB 172 SUMMARY

HB 172 is a comprehensive bill to clean up the language and reorganize the contents of Title 29, the State Municipal Code. Its primary purpose is to make necessary language and format changes to Title 29 to achieve a more clearly organized, simplified and more readily useable set of statutes. Although the bill is lengthy, for the most part it involves moving existing provisions of Title 29 from one part of the code to another or making changes in wording to clarify current law.

The Department of Community and Regional Affairs has worked extensively over the past five years to achieve passage of the legislation. Because of years of patchwork amendments to Title 29, there now exists a confusing and often controversial mass of state law dealing with municipalities. Most of the changes in the bill are necessary for this reason and are supported by the department. They are also supported by the Alaska Municipal League and, except for some disagreement with certain isolated specific language, by all local governments.

The following analysis summarizes some of the major changes to Title 29 which are included in the bill and how these changes will make program administration easier for the Department of Community and Regional Affairs.

ORGANIZATION AND FORMAT OF TITLE 29

One of the most difficult problems of working with the current law is that it is not always easy to ascertain with any degree of certainty whether a particular statute applies to all classes of municipalities or whether certain classes are governed by language found elsewhere in Title 29. HB 172 resolves this problem by organizing most sections by class of municipality, making it much easier to refer to specific sections and determine which classes of municipalities are affected.

In addition, language within the revisions has been modified so that the terms of reference to municipalities, governing boards, etc., are held constant. The term "municipality" refers to all local governments with a subsequent distinction drawn between "home rule" and "general law." This consistency now makes it possible, by checking general references alone, to ascertain whether or not a particular class and type of municipality is affected by specific statutes.

These changes in the organization of the statutes and the use of consistent and more precise terminology mark these revisions to Title 29 as a great improvement over existing statutes.

Hay + Mike
Norley - C+RA Dept.

CHANGES TO THE EXISTING LAW

Aside from effecting a better organization of the contents of Title 29 and improved terminology, HB 172 also proposes some important improvements to the current body of municipal law.

Certain powers and responsibilities are clarified in HB 172, particularly in the areas of extraterritoriality and land disposal. Other portions of the bill create new flexibility for local communities, particularly in the areas of reclassification, home rule and zoning. Some changes are of great benefit to the department in its administration of programs, such as revenue sharing for unincorporated communities. These are all worthwhile changes that argue in favor of the bill.

Municipal Incorporation and Reclassification

- HB 172 provides for second class municipalities to reclassify directly to home rule governments. Existing statutes restrict this reclassification to municipalities of the first class.

Extraterritorial Powers

- Extraterritorial power for all municipalities has been expanded to allow for the operation of additional facilities outside of municipal boundaries, including solid and septic waste facilities, wharfs, harbors and other marine facilities.

- A municipality which provides a facility outside its boundaries may regulate its use to the extent that the jurisdiction in which the facility is located does not regulate it. Under existing statutes, no right to regulate was provided for the municipality within which the facility was located.

Eminent Domain

- The exercise of eminent domain and declaration of taking is extended to second class cities. Under current law, second class cities must first receive the approval of the Department of Community and Regional Affairs before they can exercise this power in a specific instance.

Land Disposal

- Municipal land disposal provisions have been simplified, requiring only that the local governing body establish a set of formal procedures by ordinance.

Planning and Zoning

- Zoning laws have been broadened to allow for "land use regulations," thus providing a wider range of options for local governments to implement their local plans and programs.

All of these modifications must be viewed as important, positive and long sought after improvements to Title 29.

Revenue Sharing

- HB 172 would combine the state's two most important programs of shared revenues with municipalities -- State Revenue Sharing and Municipal Assistance. The effects of this consolidation would include simplified program administration, a streamlined application procedure, and predictability of funding.

- Cleans up an existing provision of Title 29 which makes revenue sharing funds available to "Alaska Native Village" governments, which an Attorney General's opinion ruled was unconstitutional. HB 172 would resolve this problem by making revenue sharing available to all unincorporated communities in the unorganized borough, not just those with Native village governments.

Incorporation and Transition Grants

- Raises the organization grant paid by the state to newly formed cities from $10 per voter to a $50,000 in the first year and $25,000 in the second year. Boroughs would be eligible to receive a grant of $300,000 in the first year, $200,000 in the second, and $100,000 in the third year following incorporation. Boroughs now receive $25,000 on incorporation or $10 per voter, whichever is higher. The increased organizational grants will make it much easier for communities or regions of the state to organize as municipalities.

Municipal Property Taxation

In the sections which deal with local property taxation, the bill clarifies several points which are confusing under current law. In addition, it allows municipalities more flexibility in the area of asssessment policy.

In the past, property taxes were required to be levied equally against both real and personal property. HB 172 allows municipalities to exempt property in either category if it wishes to do so, an option which has been badly needed in some communities.

In addition, the Office of the State Assessor responds to numerous questions each year which are caused by the inferior organization of assessment and taxation laws under the current Title 29. The improved arrangement of these laws in HB 172 will be helpful in reducing the number of inquiries that the office currently addresses.

Second Class Borough Powers

Mandatory Powers

1. Assessment and collection of taxes. AS 29.33.030.
2. Education. AS 29.33.050.
3. Planning, platting, and zoning. AS 29.33.070-245.

Optional Areawide Powers (by ordinance, without a vote of the people)

1. Transportation systems. AS 29.48.030(b).
2. Licensing, impounding, and disposal of animals. AS 29.48.035(a)(5).
3. Water pollution control. AS 29.48.035(a)(17).
4. Air pollution control. AS 29.48.035(a)(18).
5. Licensing of day care facilities. AS 29.48.035(a)(20).

Optional Non-areawide Powers (by ordinance, without a vote of the people)

1. Fireworks. AS 29.48.020(1).
2. Animal control. AS 29.48.020(2) & AS 29.48.035(a)(5).
3. Licensing & operation of motor vehicles & operators. AS 29.48.020(3) & Title 28.
4. Snow vehicles. AS 29.48.020(4) & AS 05.30.070.
5. Garbage & solid waste collection and disposal. AS 29.48.020(5).
6. Water pollution control. AS 29.48.020(6) & AS 29.48.035(a)(17).
7. Housing rehabilitation for energy conservation. AS 29.48.020(7).
8. Local service roads & trails. AS 29.48.020(8).
9. Emergency communications centers. AS 29.48.020(9).
10. Transportation systems. AS 29.030(b).
11. Licensing of day care facilities. AS 29.48.035(a)(20).

Changes in HB 172

1. Economic development. New nonareawide power authorized in HB 172.
2. Air pollution control. In current law, authorized just areawide; in HB 172, both areawide and nonareawide.
3. Day care facilities. In current law, authorized both areawide and nonareawide; HB 172, just nonareawide.
4. Snow vehicles. HB 172 deletes reference, but power remains the same because of authority in Title 5.
5. Motor vehicles. HB 172 deletes reference; grant of power remains in Title 28, but not as clearly as in current Title 29.

TITLE 29 FACT SHEET

SUMMARY OF HB 172/SB 1 - TITLE 29 (MUNICIPAL CODE)

HB 172 and SB 1 are comprehensive bills that reorganize and clarify Title 29 (Municipal Code), but do not substantially change that part of the state statutes that direct the operation of local government in Alaska.

History: The current Title 29, last revised in 1972, is a hodgepodge of 13 years worth of amendments. It is very difficult for the average citizen to read and understand.

Recognizing the problem, the Legislature adopted SCR 66 in 1980, directing the rewrite of Title 29. A broadly representative policy committee, with the assistance of a technical committee, prepared a revised code after an exhaustive series of meetings, hearings, and public presentations.

HB 170 and SB 180 were introduced in 1981. More hearings were held during the 1981 legislative session, during the interim, and continuing through the 1982 session. SB 180 passed the legislature, but because of controversial floor amendments, Governor Hammond vetoed the bill.

In 1983, SB 1 was introduced by Senators Sturgulewski and Gilman; HB 172, by Governor Sheffield. Both bills are basically the same as the bill that had passed the previous year minus the controversial amendments. More committee work was done in both the House and Senate on the 204 page bill.

Changes: For the most part, these bills reorganize and reword Title 29 for clarity and flexibility. Policy changes of any substance are very few. The main changes are:

Third Class Boroughs: The existing third class borough, Haines Borough, continues in existence, but there is no provision for incorporating new third class boroughs in the future.

Home Rule Status: Second class cities and unincorporated areas are authorized to adopt home rule charters, which must be ratified by a vote of the people.

Municipal Powers: A general grant of municipal powers is given to municipalities, instead of a long list of enumerated powers. The difference is more semantic than actual, since the list includes almost every conceivable municipal power. There is no change in the manner in which boroughs acquire powers.

Organizational Grants/Feasibility Studies: The organizational grants are increased and expanded, depending on the category of local government. Studies for the feasibility of local government are authorized.

Incorporation Requirements: The minimum number of people required for incorporation as either a first class or home rule city is increased from 400 to 600.

Ordinance Violation: Penalties for ordinance violations are increased from a maximum $500 and 30-days to class B misdemeanor penalties, which are a maximum of $1000 and 90-days.

Extraterritorial Jurisdiction: Solid and septic waste disposal, utility services, wharves, harbors, and other marine services are added to the list of powers that may be exercised outside the boundaries of the municipality, if the municipality has the authority to exercise the power inside its boundaries.

Economic Development: Allow economic development as a non-areawide power for second class

boroughs, without requiring a vote of the people to exercise it.

Franchise: Requires a vote on franchises of more than 5 years; current law requires a vote on all franchises.

Eminent Domain: Removes the requirement that second class cities get permission from the Department of Community and Regional Affairs and the voters before exercising the power of eminent domain.

Planning, Platting, and Land Use: Updates the language, changing "zoning" to "land use".

Run-Off Elections: Allows run-off election procedures and requirements to be changed by ordinance.

Personal Property: Allows exemption of personal property from taxation.

Taxation of Boats: Removes the $5 and $15 property tax limit on boats if assessed on the basis of net tonnage.

Penalties and Interest: Increases the maximum penalty on delinquent property and sales tax from 10% to 20% and interest from 8% to 15%.

Revenue Bonds: Authorizes revenue bonds to be payable solely from the revenue and property of the project.

Municipal Assistance Fund: Moves the administration of the Municipal Assistance Fund from the Department of Revenue to the Department of Community & Regional Affairs.

Municipal Property Disposal: Requires municipalities to adopt formal procedures by ordinance; current law sets out procedures including requiring an election on the disposal of any property valued at more than $25,000.

The substantive differences between SB 1 and HB 172 are:

Hospital Definition: Proposed CSHB 172 (CRA) adds "special" hospitals to the definition section for revenue sharing eligibility.

Farm Use Greenhouses: Senate CRA amendment to SB 1 provides for the assessing of farm use greenhouses on the basis of full and true value for farm use.

Annexation and Detachment: Senate CRA amendment to SB 1 adds detachment language to the annexation sections and establishes a time deadline for Local Boundary Commission action.

Education Powers: Senate CRA recommends amending the powers section to provide for a double majority vote before a second class city or an unincorporated area in an REAA can assume the education power when incorporating as a first class or home rule city. The vote would be both in the proposed incorporating area and the rest of the REAA.

Alaska Municipal League
Prepared February 23, 1984

CITY OF KODIAK
RESOLUTION NUMBER 12-84

A RESOLUTION SUPPORTING HCS CS SENATE BILL 67* REGARDING RELOCATION OF UTILITY FACILITIES

WHEREAS, the City of Kodiak owns rights-of-way upon which utility facilities are located; and

WHEREAS, occasionally such utility facilities must be relocated during the construction of road or highway projects; and

WHEREAS, this substituted version of Senate Bill 67* would allow the cost of relocating such utility facilities to be governed by the terms of a franchise, permit, or agreement or the lack of such agreement,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Kodiak, Alaska, that passage of HCS CS Senate Bill 67* be and is hereby supported.

BE IT FURTHER RESOLVED that copies of this resolution be sent to:

The Honorable Robert Mulcahy, Alaska State Senator
The Honorable Fred Zharoff, Alaska State Representative

PASSED AND APPROVED this 23RD day of FEBRUARY, 1984.

CITY OF KODIAK
RESOLUTION NUMBER 11-84

A RESOLUTION SUPPORTING SENATE BILL 1 AND HOUSE BILL 172 WHICH REVISE AND REORGANIZE ALASKA STATUTE TITLE 29

WHEREAS, Alaska Statute Title 29 is that portion of state law which governs municipal government within the State of Alaska; and

WHEREAS, Title 29 has been in need of revision and reorganization for many years; and

WHEREAS, Senate Bill 1 and House Bill 172 were filed during the first session of the Thirteenth Legislature; and

WHEREAS, either one of these bills would accomplish the needed revision and reorganization; and

WHEREAS, the bills do not contain any of the provisions which were criticized by Governor Hammond in his July 15, 1982, veto; and

WHEREAS, the bills make many noncontroversial improvements that are long overdue and necessary for the smooth working of municipal government in our state,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Kodiak, Alaska, that the Alaska State Legislature is urged to pass Senate Bill 1 and/or House Bill 172 during this second session of the Thirteenth Legislature.

BE IT FURTHER RESOLVED that the Legislature refrain from making any controversial amendments to these bills.

AND, BE IT FURTHER RESOLVED that copies of this resolution be sent to:

The Honorable Robert Mulcahy, Alaska State Senator
The Honorable Fred Zharoff, Alaska Representative
The Honorable Bill Ray, Chairman of the Senate Judiciary Committee
The Honorable Mike W. Miller, Chairman of the House Community and Regional Affairs Committee

PASSED AND APPROVED this 23RD day of FEBRUARY, 1984.

The Honorable Mike W. Miller
Chairman House Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Miller:

Please be advised that the Kodiak Island Borough Assembly at their regular meeting held March 1, 1984 unanimously adopted Resolution No. 84-20-R supporting Senate Bill 1 and/or House Bill 172 revising and reorganizing Alaska Statutes Title 29.

It is our belief that Title 29 has been in need of revision and reorganization for many years and that the bill makes many non-controversial improvements that are long overdue and necessary for the smooth working of municipal government in our state. We would therefore urge you to support Senate Bill 1 and/or House Bill 172 during the Second Session of the Thirteenth Legislature and work to encourage the legislature to refrain from making any controversial amendments to these bills.

If you have any further questions regarding this matter, please contact me at your convenience.

Sincerely,

KODIAK ISLAND BOROUGH

MILO FRITZ

MEMORANDUM

TO: Representative Mike W. Miller
Chairman, House C & RA Committee

FROM: Representative Milo H. Fritz
Interim Chairman, House C & RA Committee MHF

DATE: January 17, 1984

SUBJ: HB 172 Amendments

During the interim, my staff and I have studied HB 172 and its effects and implications. I have changes and alternatives to suggest that the Committee consider. These ideas come from my review of this legislation during the first session and an analysis of the Interim Report on HB 172. I will briefly outline my reasoning for each change in the hope that my ideas will be of assistance to you and the committee.

I believe that current amendments #2 and #7 will not have the effect which is desired, and that the legislation should be left as currently written in HB 172. Amendment #2 eliminates the "legal grounds" for a recall election. Although this would remove the legal problem of determining the sufficiency of grounds, it leaves totally open the right to pursue a recall. If any group has an inclination to start a recall, they state "a reason" and start collecting signatures. It would indeed be difficult to gather the amount of signatures necessary to have a recall election. However, the group will have received much media attention, the person who they are trying to recall has had his/her image tarnished, and the whole political process put into a state of turmoil. This is not even considering the mental anguish caused by this action.

I do not want to see any group have the ability to singularly influence the destiny of a city or borough by the use of a threat of recalling one or more members of the governing body. If we do not have the "grounds" of a "recall", we will be allowing the recall system to be used for purely political/personal interest purposes.

Amendment #7 would eliminate the exemption of greenhouses from assessment at full valuation for tax purposes. The argument against this exemption was that "the purpose of the exemption was to allow farms to continue in spite of otherwise inflated land prices, and the corresponding taxes. I believe that the greenhouses in our state also need this help. If a greenhouse is to be successful, it must have the ability to get its produce to market, which is the urban population centers. The law is written so that a highly prosperous greenhouse, will be taxed at a high "true value of farm use", thereby seeing that equitable taxes are paid. This exemption will allow our fledgling greenhouse industry a chance to grow.

Amendments #8 and #9 should be withdrawn from consideration. The 13th Legislature, as a whole and with concurrence of the Governor, has dealt with these issues by the passage of SB 260 and HB 274, respectively. This decision should be incorporated into the Committee Substitute as recommended by amendment #10.

Amendment #11 was requested by the Alaska State Hospital Association and should be judged on its merits. Their claim of discrimination against a "special" hospital seems to be valid.

Amendment #12 was placed in the Interim Report because it is a part of the information, and is an alternative. However, I strongly urge the rejection of this amendment. The differences between the two bills, were caused in a large part, by the rejection of proposed amendment #6 during the first session. I believe the Senate may change their bill or accept our version if it passes first. The proper time to discuss any remaining differences will be in Conference Committee.

Amendment #13 is a matter of housekeeping.

In addition to the Municipal Code revision, the report to the 13th State Legislature examining court decisions and opinions of the Attorney General construing Alaska Statutes revealed a problem with the local preference law. AS 04.11.502 states that one or "several questions" can be placed before the voters. The preceding paragraphs which have been updated specifically state that only one question can be placed before the voters at a time. Correcting this oversight will only take a short amendment removing the words "or several questions" from A.S. 04.011.502 (a) and (b). This action was suggested on page 78 of the report.

Ginny Chitwood
Executive Director
Alaska Municipal League
105 Municipal Way
Suite 301
Juneau, Alaska 99801

Dear Ginny,

Thank you for providing my office with the League's policy statements and resolutions. It should provide another valuable source of input as the Legislature debates many issues this session. While I may not personally agree with all the statements or requests in the policy, I certainly welcome the League's input in the discussion process.

Just touching on a few issues, I feel the Legislature supports acquisition of the Alaska Railroad. Senator Kerttula and I have introduced legislation to operate the railroad, and I would be interested in your input.

I think we may be able to see passage of Title 29 revisions this session. Certainly we are making an effort in the House to accomplish this and, I have spoken several times on the need to upgrade and, possibly, expand the marine highway system.

In general, your policy statement appears to reflect interests throughout the state.

Thanks again, and please feel free to contact my office if you would like to discuss any of the issues in further depth.

Very truly yours,

Joe

FILE: HB 172

SUBJECT: Substitute Utility Language
for Title 29 Revision

Dear Bob:

If the House Community and Regional Affairs Committee would like to consider alternative language to that which has been proposed for the utilities section of the Title 29 revision, may I suggest the following. This language, I believe, accommodates the interests of the municipalities and of the utilities. It would exempt from municipal regulation those utilities, including co-ops, which have elected to exempt themselves from APUC regulation by a vote of the subscribers or members. It would also exempt from municipal regulation those small electric, telephone and garbage utilities which are presently exempt from APUC regulation but which may come under APUC regulation if 25% of the subscribers petition the commission for regulation. In addition, it would exempt from municipal regulation those utilities which the APUC itself exempts upon a finding of no legitimate public interest in regulation if the commission also finds that the utility should also be exempt from municipal regulation. If cable TV is given an exemption from APUC regulation, and the legislature believes that it should also be exempt from municipal regulation, a simple amendment to the following language making reference to the statute exempting cable TV would extend the exemption to municipal regulation of cable TV also. The substitute language would be as follows:

page 77, Line 7. AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).

(b) A municipality may not regulate a utility

White

(1) to the extent it is subject to regulation under AS 42.05; or

(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

TO: Committee on Community and Regional Affairs

From: Staff

Date: May 20, 1983

Re: Amendments to HB 172

The Committee has completed action on proposed amendments One through eight; except that representatives of the Cape Fox Corporation were offered an opportunity to prepare new language for amendment No. 8.

Amendment No. 8 deals with a definition of developed lands for tax exempt status. A revised definition has been prepared for Committee review.

Amendment No.9 has been requested by representatives of the Alaska Rural Electric Cooperative Association. A staff summary has been prepared in an attempt to clarify the basis of the issue.

Following Committee decision on the above proposed amendments, staff will request a Committee Substitute HB 172 that will incorporate all approved amendments.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM March 3, 1983

SUBJECT: Impact of land use regulation on development of energy resources (Work Order No. 13-0881)

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel TBC

You have asked whether the changes in HB 172 to the provisions dealing with land use regulation discourage development of energy resources as compared to existing laws that authorize land use regulation by municipalities.

Under AS 29.33.090 a municipality is required to regulate the use of land in accordance with a comprehensive plan through zoning by districts. The zoning regulations must be uniform for each type of building or area within a particular district, but the regulations may differ between the various districts. In addition, a municipality is authorized to rezone property to a less restricted use if the owner of the property agrees to place restrictions on the use of the land beyond those restrictions imposed under the general zoning requirements. Subsection (b) of that section contains a list of the types of restrictions that may be imposed through zoning. While paragraphs (2) - (6) deal with very specific restrictions relating to buildings, paragraph (1) grants broad authority to restrict "land use". It should be noted that the list is by way of example of various zoning restrictions and does not limit the types of restrictions that a municipality may impose through zoning. However, under this section a municipality is authorized to regulate land use only through zoning and may not use other land use techniques.

In contrast to existing law, under sec. 29.40.040 of HB 172, a municipality may implement the comprehensive plan through zoning, land use permit requirements, or any other method of

land use regulation. To the extent that greater flexibility is authorized in the implementation of a comprehensive plan, HB 172 makes it more practical for a municipality to adopt measures that may have the effect of discouraging the development of energy resources. Nevertheless, under both HB 172 and under existing law a municipality has the general authority to regulate land use regardless of whether this regulation places burdens on the development of energy resources and thereby discourages that development. In addition, the change in HB 172 that allows municipalities to use other techniques in addition to zoning impacts only general law municipalities, since under existing law home rule municipalities are not limited to the use of zoning in regulating land use.

In considering whether the changes in HB 172 may discourage development of energy resources it is necessary to determine whether the power to regulate land use has been significantly expanded under this bill with respect to each class of municipality. Under secs. 29.10.200(32), 29.35.180(b), 29.35.250(c), and 29.35.260(c) of HB 172, a home rule borough and home rule city in the organized borough or in the third class borough must provide for land use regulation, but a home rule municipality is not bound by the general provisions dealing with land use regulation set out in Title 29. Under existing law, although some provisions appear contradictory, most home rule municipalities are not required to provide land use regulation, nor are they restricted from providing land use regulation. A home rule municipality that does regulate land is not required to comply with provisions contained in Title 29 dealing with land use regulation except for provisions dealing with zoning and platting of state land (AS 29.13.100(37) and (39)). The general requirement that boroughs provide for planning, platting and zoning contained in AS 29.33.070 is not a home rule limitation. Under AS 29.43.040 home rule cities in third class boroughs and outside boroughs are required to provide for planning, platting and zoning ". . . as provided for boroughs". This is a home rule limitation under AS 29.13.100(12). Since, under AS 29.43.010, powers incorporated by reference to laws governing boroughs apply to home rule cities outside boroughs only if applicable to home rule boroughs and home rule boroughs are not required to provide for planning, platting and zoning, the net result is that only home rule cities in third class boroughs are required to provide land use regulation.

In summary, under HB 172, home rule boroughs and home rule cities in the third class borough or in the unorganized borough must provide land use regulation, but need not comply with provisions dealing with land use regulation contained in Title 29. Under existing law, only home rule cities in the third class borough are required to provide land use regulation, but home rule boroughs and home rule cities in the unorganized borough are not prohibited from providing land use regulation. No home rule municipality must comply with provisions contained in Title 29 dealing with land use regulation, with the minor exception of the provisions dealing with state land. The changes in HB 172 do not appear to confer broader authority upon home rule municipalities than they now have in the area of land use regulation, and consequently should not present any special discouragement to the development of energy resources in home rule municipalities.

HB 172 does not appear to expand the authority of the various classes of general law municipalities to provide land use regulation. As in existing law, these must comply with specific provisions regarding land use regulation contained in Title 29. Under AS 29.33.070, first and second class boroughs must provide for planning, platting and zoning. Under secs. 29.35.180(a) and 29.40.010 of HB 172 first and second class boroughs must provide for land use regulation. AS 29.41.010(b) allows third class boroughs to exercise the power of planning, platting and zoning in service areas. Secs. 29.35.220 and 29.35.300(b) of HB 172 provide for exercise of the power of land use regulation by third class boroughs in service areas. AS 29.43.040 authorizes first class cities and second class cities in the unorganized borough or in the third class borough to provide for planning, platting and zoning. Secs. 29.35.250 and 29.35.260 of HB 172 grant the same authority to regulate land use to these cities. HB 172 does not grant the power to regulate land use to any general law municipality that does not have that power under existing law, so, in that respect, does not present additional impediments to development of energy resources.

BILL SHEFFIELD
GOVERNOR

HB172

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 7, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill revising the municipal code (AS 29). By our using the data base prepared by the Legislative Affairs Agency, this bill is identical to the bill introduced this session as Senate Bill No. 1, except for the correction of a typographical error (page 35, line 5 -- "overridden"), the justification of the right-hand margin on several pages, and 11 rather technical changes that are described below. The bill was modeled on the bill approved last session by the House Finance Committee as HCS CSSB 180 (Fin). A detailed section-by-section analysis of SB 1 is being prepared by the Legislative Affairs Agency.

The bill does not contain any of the provisions which were criticized by Governor Hammond in his July 15, 1982 veto message for HCS CSSB 180(Jud) am H. See 1982 Senate Journal, pages 1788 -- 1792. This bill makes many non-controversial improvements to our municipal code and I urge its prompt consideration and passage. It is my hope that the AS 29 issues on which last year's amendments created such a controversy will be addressed by separate legislation so that this needed code revision is not once again delayed.

For your convenience in comparing SB 1 and this bill, here is a list of the 11 changes from SB 1 which are contained in this bill (with page and line numbers referring to SB 1):

1. page 8, line 26 -- following "council" the phrase "in a first class city" is added;

2. page 11, line 1 -- between the words "city" and "incorporated," the phrase "in the unorganized borough" is added;

3. page 29, line 8 -- following the first use of "commission," the phrase "of seven elected members" is added;

4. page 29, lines 14 and 15 -- following "shall be" on line 14, the phrase "prepared by the petitioners and" is added and the word "incorporation" is deleted; following "petition" on line 15, the phrase "to incorporate a home rule municipality" is added;

5. page 62, line 3 -- a sentence to read "The runoff election shall be between the two candidates receiving the greatest number of votes for the seat." is added to sec. 29.26.060(c);

6. page 63, lines 7 and 26, and page 64, line 15 -- replace the words "bill" and "Act" with the phrase "ordinance or resolution";

7. page 82, line 18 -- following "emergency," the word "services" is added, and following "center," the phrase "under AS 29.35.130" is added;

8. page 85, lines 4 and 5 -- subsection (c) is amended as follows:

> (c) A third class borough acquires an additional power to exercise in a service area in accordance with AS 29.35.490(b) and (c) [AREAS BY HOLDING AN ELECTION ON THE QUESTION IN WHICH EACH PERSON WHO IS A VOTER OF THE BOROUGH MAY VOTE].

9. page 106, line 8 -- the first sentence of sec. 29.-45.040(b) is amended as follows:

> (b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax [AT THE RATE OF ONE PERCENT PER MILL].

10. page 161, line 20 -- "29.60.120" is replaced with "29.60.130;"

11. page 182, line 1 -- following "general law," the phrase "first or second class" is deleted.

Sincerely,

Bill Sheffield
Governor

9. page 106, line 8 -- the first sentence of sec. 29.45.040(b) is amended as follows:

(b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax [AT THE RATE OF ONE PERCENT PER MILL].

10. page 161, line 20 -- "29.60.120" is replaced with "29.60.130;"

11. page 182, line 1 -- following "general law," the phrase "first or second class" is deleted.

Sincerely,

Bill Sheffield
Governor

HB 172

was read the first time and referred to the Community & Regional Affairs and the Judiciary Committees.

HB 172 was accompanied by a fiscal note which appears in House Journal Supplement No. 4, and the following letter:

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill revising the municipal code (AS 29). By our using the data base prepared by the Legislative Affairs Agency, this bill is identical to the bill introduced this session as Senate Bill No. 1, except for the correction of a typographical error (page 35, line 5 -- "overridden"), the justification of the right-hand-margin on several pages, and 11 rather technical changes that are described below. The bill was modeled on the bill approved last session by the House Finance Committee as HCS CSSB 180 (Fin). A detailed section-by-section analysis of SB 1 is being prepared by the Legislative Affairs Agency.

The bill does not contain any of the provisions which were criticized by Governor Hammond in his July 15, 1982 veto message for HCS CSSB 180(Jud) am H. See 1982 Senate Journal, pages 1788 -- 1792. This bill makes many non-controversial improvements to our municipal code and I urge its prompt consideration and passage. It is my hope that the AS 29 issues on which last year's amendments created such a controversy will be addressed by separate legislation so that this needed code revision is not once again delayed.

For your convenience in comparing SB 1 and this bill, here is a list of the 11 changes from SB 1 which are contained in this bill (with page and line numbers referring to SB 1):

1. page 8, line 26 -- following "council" the phrase "in a first class city" is added;

2. page 11, line 1 -- between the words "city" and "incorporated," the phrase "in the unorganized borough" is added;

3. page 29, line 8 -- following the first use of "commission," the phrase "of seven elected members" is added;

HB 172

4. page 29, lines 14 and 15 -- following "shall be" on line 14, the phrase "prepared by the petitioners and" is added and the word "incorporation" is deleted; following "petition" on line 15, the phrase "to incorporate a home rule municipality" is added;

5. page 62, line 3 -- a sentence to read "The runoff election shall be between the two candidates receiving the greatest number of votes for the seat." is added to sec. 29.26.060(c);

6. page 63, lines 7 and 26, and page 64, line 15 -- replace the words "bill" and "Act" with the phrase "ordinance or resolution";

7. page 82, line 18 -- following "emergency," the word "services" is added, and following "center," the phrase "under AS 29.35.130" is added;

8. page 85, lines 4 and 5 -- subsection (c) is amended as follows:

> (c) A third class borough acquires an additional power to exercise in a service area in accordance with AS 29.35.490(b) and (c) [AREAS BY HOLDING AN ELECTION ON THE QUESTION IN WHICH EACH PERSON WHO IS A VOTER OF THE BOROUGH MAY VOTE].

9. page 106, line 8 -- the first sentence of sec. 29.45.040(b) is amended as follows:

> (b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax [AT THE RATE OF ONE PERCENT PER MILL].

10. page 161, line 20 -- "29.60.120" is replaced with "29.60.130;"

11. page 182, line 1 -- following "general law," the phrase "first or second class" is deleted.

Sincerely,

Bill Sheffield
Governor

Sec. 29.48.010. GENERAL POWERS.

Municipalities have the following general powers, subject to other provisions of law:

(1) to establish and prescribe the functions of municipal departments, offices or agencies;

(2) to establish and prescribe salaries for the elected and appointed municipal officers and employees;

(3) to make investigations of the affairs of the municipality and make inquiries into the conduct of a municipal department;

(4) to enter into agreements, including those for cooperative or joint administration of any functions or powers with a local government, with the state, or with the United States;

(5) to require periodic and special reports from a municipal department to be submitted through the municipal executive;

(6) to sue and be sued;

(7) to levy taxes and special assessments;

(8) to enforce ordinances and to prescribe penalties for violations;

(9) to acquire, manage, control, use and dispose of real and personal property for a purpose authorized under AS 29.03.010 - 29.95.030, federal law, or other law, or in accordance with such law, and irrespective of whether or not the property is situated within or outside the municipal boundaries; this power includes the power of a second class borough to expend, for any purpose

authorized by law, money received from the disposal of land in a service area created under AS 29.63.090(f);

(10) to acquire membership in organizations which promote legislation for the good of the municipality;

(11) to expend funds for community purposes for the good of the municipality;

(12) to borrow money and issue evidences of indebtedness.

Sec. 29.48.030. MUNICIPAL FACILITIES AND SERVICES.

(a) A municipality may exercise the powers necessary to provide the following public facilities and services:

(1) streets and sidewalks;

(2) sewers and sewage treatment facilities;

(3) harbors, wharves, and other marine facilities;

(4) watercourse and flood control facilities;

(5) health services and hospital facilities;

(6) cemeteries;

(7) police protection and jail facilities;

(8) cold storage plants;

(9) telephone systems;

(10) light, power and heat;

(11) water;

(12) transportation systems;

(13) community centers;

(14) libraries, visual or performing arts centers, or museums;

(15) recreation facilities;

(16) airport and aviation facilities;

(17) garbage and solid-waste collection and disposal service and facilities subject to AS 29.48.033;

(18) fire protection service and facilities, not in conflict with AS 18.70.075, but not limited to AS 18.70.075;

(19) parking and parking facilities;

(20) housing and urban renewal, rehabilitation and development;

(21) preservation, maintenance and protection of historic sites, buildings and monuments;

(22) consumer protection;

(23) emergency medical services and facilities.

(b) First and second class boroughs may exercise the powers conferred by (a) of this section or sec. 33(a) of this chapter only after they have been assumed in the manner required under AS 29.33.250 - 29.33.290 for areawide exercise or in the manner required under AS 29.38.010 - 29.38.050 for exercise in the borough area outside cities, or are conferred by sec. 20 of this chapter for exercise in the borough area outside cities. However, as to powers conferred under (a) (12) of this section, exercise of the powers areawide or in the borough area outside

cities is at the option of the borough and is not subject to those restrictions on acquisition of additional borough powers. With respect only to boroughs which on September 10, 1972 are not exercising powers conferred under (a) (12) of this section on an areawide basis, objection which a city may raise to areawide exercise of the powers by a borough shall be reviewed by the Alaska Transportation Commission. The commission shall decide whether exercise of the powers exclusively by the borough areawide is to be approved as in the public interest under the particular facts and circumstances at issue.

Sec. 29.48.035. REGULATORY POWERS.

(a) A municipality may regulate the operation and use of its public rights-of-way, public facilities and services. It may also regulate the following:

(1) vehicle, pedestrian, and other traffic, and licensing and operation of motor vehicles, including snow vehicles and off-highway vehicles, and operators not inconsistent with AS 28.01.010;

(2) licensing of drivers of taxicabs, for-hire automobiles, motor buses, or other vehicles for the transportation of passengers or baggage not inconsistent with AS 28.01.010;

(3) vehicle parking not inconsistent with AS 28.01.010;

(4) transportation fares;

(5) licensing, impounding and disposition of animals;

(6) selling of goods;

(7) selling of food;

(8) abandoned property;

(9) dangerous and disorderly conduct;

(10) alcoholic beverages as provided by AS 04.21.010;

(11) recreational devices as provided by AS 05.20.100;

(12) control of insects and rodents;

(13) offering for sale, exposure for sale, sale, use, or explosion of fireworks;

(14) building, housing and related codes, which may be provided by cities within cities or, in the manner required in (b) or (c) of this section, by first or second class boroughs in the borough area outside cities or areawide, subject to the following:

(A) exceptions to requirements of the codes may be made in the codes among other reasons, in order to provide for the preservation, maintenance and protection of historic sites, buildings and monuments;

(B) codes may not be used to prohibit or restrict the development or use of solar or wind energy unless the assembly or council finds that the development or use of solar or wind energy would endanger the health or safety of the public;

(15) condemnation and abatement of public nuisances and hazards;

(16) garbage and solid-waste collection and disposal;

(17) water pollution control;

(18) air pollution control as provided in AS 46.03.140 - 46.03.240;

(19) other powers and functions affecting the general health, safety, well-being and welfare of its inhabitants;

(20) licensing of day care facilities.

(b) First and second class boroughs may exercise the powers conferred by (a) of this section only after they have been assumed in the manner required under AS 29.33.250 - 29.33.290 for areawide exercise or in the manner required under AS 29.38.010 - 29.38.050 for exercise in the borough area outside cities or are conferred by AS 29.48.020 for exercise in the borough area outside cities. However, as to powers conferred under (a)(5), (17), (18) and (20) of this section, exercise of the powers areawide or, as to (a)(5), (17) and (20), in the borough area outside cities is at the option of the borough and is not subject to those restrictions on acquisition of additional borough powers. Upon adoption of a borough ordinance to provide for areawide exercise of the powers specified, no home rule or general law city within the borough may exercise the powers, unless the borough ordinance provides otherwise or the borough by subsequent ordinance ceases to exercise the power.

(c) The provisions of (b) of this section notwithstanding, boroughs which on September 10, 1972 are exercising building, housing or related code powers, except as those code powers relate to flood control, on an areawide basis or in the borough area outside cities shall, subject to acquisition of the powers on an areawide basis by transfer or election as provided in (b) of this section, exercise the powers in the borough area outside

cities and, upon agreement of the city and borough, within any city, home rule or otherwise, in which the powers are being exercised on September 10, 1972; if the city does not agree to continue borough exercise of the powers within the city, the city shall exercise the powers within the city.

SUBJECT: Recall of municipal officials
(Work Order No. 13-0837)

TO: Representative Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked what the responsibility of the clerk is in reviewing recall petitions for sufficiency.

What a recall petition must contain and the method of determining the sufficiency of a petition depends on the specific statute involved and these types of laws vary from state to state. Some statutes require only a general statement of the grounds for recall and an official may be recalled for purely political reasons. However, other statutes require grounds for recall that are more than simple disagreement with matters of policy and the grounds stated must actually constitute misfeasance, malfeasance or nonfeasance in office. McQuillan, Municipal Corporations, vol. 4, sec. 12.251b: Noel v. Oakland County Clerk, 284 N.W.2d 761 (Michigan 1979); Bent v. Ballantyne, 368 S.2d 351 (Florida 1979); Tolar v. Johns, 147 S.2d 196 (Florida 1962); Jacobsen v. Nagel, 96 N.W.2d 569 (Minnesota 1959).

Where petitioners are required to state only general grounds, the recall petition need not state the cause for removal with the same particularity as where the requirement is that reasons for removal be stated clearly. The purpose of a general statement of grounds is to furnish information to electors upon which a political and not a legal issue may be raised. Under statutes providing that a statement of grounds for recall is for the information of the electors, the question of the sufficiency of those grounds is also for the electors, but under provisions authorizing recall for malfeasance or similar language, the sufficiency of the grounds provided is a legal question. 63 Am. Jur.2d, Public

Officers and Employees, sec. 245; Pybus v. Smith, 141 P. 203 (Washington 1914).

Statutory provisions as to recall are to be liberally construed in favor of the electorate's right to exercise recall. Hazelwood v. Saul, 619 P.2d 199 (Colorado 1980). Under this principle and in the absence of statutory language limiting the recall to specific, indicated reasons, the adequacy of grounds stated in a petition is treated as a political matter and courts refuse to enjoin recall petitions on complaints that charges are insufficient. However, where recall is limited to specified grounds of malfeasance or similar language it is generally held that

> . . . petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Municipal Corporation Law, sec. 22.200, pages 22-304 - 22-305.

The officer designated to ascertain the sufficiency of a petition in a particular statute may be required to determine legal sufficiency rather than matters of form only. Unless an appeal is specifically provided for, the officer's determination as to sufficiency of a recall petition is final and subject only to judicial correction if the determination is capricious, arbitrary, or plainly erroneous as a matter of law. McQuillan, supra., vol. 4, sec. 12.251(d); Hold v. Trantham, 575 S.W.2d 83 (Texas 1979).

Article XI, section 8 of the Constitution of the State of Alaska provides:

> All elected public officials, in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedure and grounds for recall shall be prescribed by the legislature. (Emphasis added)

In carrying out this constitutional responsibility the legislature has provided under AS 29.28.140 that misconduct in office, incompetence, and failure to perform prescribed duties are the grounds for recall. In addition, under AS 29.28.150(a)(3), a petition for recall must contain ". . . a statement of the grounds of the recall stated with particularity as to specific instances". (Emphasis added)

The municipal clerk is required to review the petition ". . . for content and signatures . . ." under AS 29.28.160.

These statutory provisions dealing with recall have not been judicially construed by the Supreme Court in this state, so it cannot be determine with certainty whether the clerk is required to review the petition for signatures and form only or whether the clerk must determine as a legal matter whether the specific instances set out in a petition, if true, constitute misconduct in office, incompetence or failure to perform prescribed duties. Under the principles set out previously in this memorandum it appears that the clerk is required to determine whether the specific instances set out support a claim of misconduct in office, incompetence or failure to perform prescribed duties because AS 29.28.150 demands more than just a general statement of the grounds for recall and does not specifically indicate that the stated grounds are for the information of the voters only.

Under both versions of the bill revising Title 29, SB 1 and HB 172, the grounds for recall remain unchanged although the procedure for recall has been substantially changed. Nevertheless, an applicant for a recall petition under Sec. 29.26.260(a)(3) is still required to set out the grounds ". . . with particularity". The clerk must prepare a recall petition only if the clerk determines that the application for the petition meets the requirements of AS 29.26.260, including the requirement that grounds be ". . . stated with particularity" (Sec. 29.26.280). After a petition is filed the clerk must again determine whether the petition is sufficient and, if insufficient, ". . . identify the insufficiency and notify the sponsors. . ." (Sec. 29.-26.290). It seems clear that since the clerk must identify the insufficiency, a determination of sufficiency is not limited to review of signatures, even though (b) and (c) of the section only provide for correcting a petition insufficient for lack of signatures. It appears under these sections that the clerk would still be required to determine whether the grounds stated, if true, actually constitute misconduct in office, incompetence, or failure to perform prescribed duties.

I believe that this interpretation conforms to the intent of the policy committee that produced the original version of a Title 29 revision bill. There was considerable discussion of the recall provisions by that committee and at one point

the committee considered requiring only a general statement of reasons for recall and allowing recall to proceed upon purely political grounds. It was even suggested that grounds for recall be eliminated entirely. That approach was specifically rejected by the committee. Consequently, I would recommend that HB 172 be amended to clearly reflect the fact that the clerk is to review a recall petition for form and signatures only, and not to determine whether grounds stated actually constitute misconduct in office, incompetence, or failure to perform prescribed duties, if that is the result intended by the legislature.

Municipality of Anchorage

MEMORANDUM

RECEIVED
JAN 14 1983
CITY-BOROUGH ATTORNEY

DATE: January 11, 1983

TO: Municipal Clerk

FROM: Municipal Attorney

SUBJECT: Petition for Recall of Gerry O'Connor, Assemblyman, Section 2, Seat C

ISSUE PRESENTED

Are the grounds set forth in the above referenced recall petition sufficient as a matter of law under the provisions of AS 29.28.150 to permit a submission by the Clerk to the Municipal Assembly for the purpose of calling an election pursuant to AS 29.28.200?

CONCLUSION

The above referenced petition is legally insufficient and no recall election may therefore be called. Under AS 29.28.160 - .170, the Municipal Clerk is required within 10 days of submission to examine the sufficiency of the recall petition, both as to the adequacy of signatures and for content with respect to compliance with AS 29.28.130 - .150. On the basis of the authorities and the reasoning referenced below, it is my opinion that an individual assembly member's vote on an ordinance approving the municipal budget cannot, as a matter of law, constitute misconduct in office, incompetence, or failure to perform prescribed duties under the meaning of AS 29.28.140, if that vote was in compliance with state and municipal law governing ethics and conflicts of interest and if the measure passed was in all respects a lawful action.

DISCUSSION

The necessity and sufficiency of specific grounds to support a recall petition is a matter governed by applicable constitutional or statutory provisions. For this reason, the weight given to various legal precedents from other jurisdictions depends on an examination of the specific legal framework involved. Generally, there would be no examination of the legal sufficiency of grounds where the governing statute permits removal from office for any reason or where grounds must be stated in a general manner. This is the case in many states, including, for example, Colorado, Michigan, Oklahoma and Wisconsin. In those states, it is held that recall can be based merely on a disagreement with the policies of the officeholder. A different rule applies, however, where, as in Alaska, the governing statute dictates that only certain grounds are suf-

ficient and that those grounds must be stated "with particularity" and be based on "specific instances". The rule is well stated by Antieau in his treatise on the Law of Municipal Corporations:

> Generally, courts refuse to allow recall proceedings to go forward where the grounds or charges stated in the petition do not satisfy local constitutions or legislation. Where local constitutions, statutes or charters limit the recall to malfeasance, misfeasance, nonfeasance in office or comparable grounds, it has been held that the petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Local Government Law, § 22.20.

The statute in question clearly applies to home rule municipalities. AS 29.28.130. It is equally clear that the remedy of recall is only available for certain specified reasons comparable to malfeasance, misfeasance, or nonfeasance in office:

> AS 29.28.140 Grounds. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties.

This degree of particularity coupled with the stated limitation on grounds constitutes by itself a strong implication that it is insufficient to rely merely on a disagreement with the officeholder's policies. The cited statutes would be superfluous if, as under the governing laws of some states, recall could be applied at any time to test the political strength of the legislator. This principle was well articulated by the Supreme Court of West Virginia in the case of State ex rel Perkins v. City Council of City of Parkersburg, 121 S.E. 489:

> To adopt the view of petitioner [that it is sufficient to allege mere political disagreement] would make it unnecessary for the petition to contain any real grounds. The official could be recalled as well on account of his religious beliefs or political affiliations, as for corruption or malfeasance in office; and if those who desire his removal were unsuccessful in one election the process might be continued inde-

> finitely at the expense of the taxpayers. And suppose the faction seeking power through recall of those in office should be successful in the first, second, or third attempt, then the ousted faction could then in turn employ the same in repeated trials to regain its lost prestige, and the interminable wrangle and turmoil would go on. This would result in the fostering and maintaining of political feuds to the detriment of society and the great expense of the taxpayers. 121 S.E. at 493.

Additional support for this conclusion is found in AS 29.28.160 entitled, EXAMINATION FOR SUFFICIENCY. That section requires that the Municipal Clerk review a recall petition for content as well as for signatures. Since a petition is required to contain only dated signatures with addresses and a statement of grounds, the term "content" could refer only to the statement of grounds. Any other conclusion would make the use of the term "content" superfluous. On this point, note that AS 29.28.170(a) provides for a supplemental petition if, and only if, it is rejected on the basis of insufficient signatures. The statute also provides that "if the petition is insufficient for any other reason, it shall be rejected and filed as a public record." (emphasis added). Obvious from the emphasized language, the legislature contemplated that the Clerk's duties include an examination of the petition for compliance with other requirements. This interpretation of the Clerk's authority is consistent with the Alaska Supreme Court's decision in Warren v. Boucher, 543 P.2d 731. In that case, the Court approved the Lt. Governor's determination that an initiative petition was "substantially the same" as a measure passed by the legislature and therefore barred from the ballot. The Court's approval of the Lt. Governor's authority in that case involved a statute which, like the one under analysis here, permitted the highest election officer of the jurisdiction to make certain threshold decisions on the validity of a petition. This is not an unusual position. In the case of Steadman v. Halland, 641 P.2d 448, the Supreme Court of Montana addressed the same issue; "We agree that the statement of grounds for recall to be included in the petition is 'part of the form of the petition' and find that the filing officer not only is 'empowered to' but is required to reject the petition when it does not comply with statutory requirements." (emphasis added) 641 P.2d at p. 453.

The inquiry need not be confined to the governing statute alone as there exists precedent from other states with similar statutory language.

In Jacobsen v. Nagle, 96 N.W.2d 569, the Supreme Court of Minnesota was called upon to apply constitutional and charter provisions similar to those applicable here. That court found that where recall is founded on specific grounds relating to misconduct in office, the allegations must state more than criticism of the officeholder's policies or positions.

The courts of Florida have also ruled that there must be a statement of facts charging specific misdeeds related to performance of office. In the case of Piuer v. Stallman, 198 So.2d 859, for example, the court specifically stated that the valid exercise of a legislative judgment was not grounds for recall. In another case, the court stated that "errors in judgment cannot be sufficient grounds for recall, nor can legitimate and authorized actions, no matter how unpopular they are." Taines v. Galvin, 279 So.2d 9. In Richard v. Tomlinson, 49 So.2d 798, the court held a charge did not sufficiently comply with the statutory language when it merely alleged activities that were "inimical to the best interest of the citizens".

The basis for recall in Washington, like here, is related to malfeasance, misfeasance and nonfeasance in office. The Washington Supreme Court has observed: "Misfeasance or malfeasance...have been held to be comprehensive terms that include any wrongful conduct that affects, interprets, or interferes with the performance of official duties....Additionally, we have held that 'misfeasance' means 'the improper doing of an act an officer might lawfully do; or, in other words, it is the performance of a duty in an improper manner.' Malfeasance means the commission of an unlawful act, or the doing of an act which the person ought not to do at all." Bocek v. Bayley, 505 P.2d 814; State ex rel LaMon v. Westport, 438 P.2d 200.

In addressing the petition in question relating to Assemblyman Gerry O'Connor, it is apparent that the petitioners have alleged two of the three grounds specified in AS 29.28.140, namely incompetence and a failure to perform prescribed duties. With respect to compliance with AS 29.28.150(a)(3) (which requires that the listed grounds be based on a specific instance of conduct) the petition lists only Mr. O'Connor's vote on the 1983 municipal budget. A vague reference is also made to "his other past actions" and "dereliction of duty of his representation of Eagle River and Chugiak", but these later two items are not sufficiently specific to comply with the statute and should therefore be ignored in any analysis of the sufficiency of petition.

In states where the law permits recall to be based on political grounds alone, the above referenced statement (or any statement for that matter) would be sufficient. It is, however, insufficient to support the grounds of incompetence or failure to perform prescribed duties.

Relative to removal from public office, the terms "incompetence" and "dereliction of duty" have well established meanings. 63 Am.Jur.2d, Public Officers, §§ 191-192. The petition describes one act allegedly constituting incompetence. The allegation does not meet judicially defined standards for "incompetence" as that term has been defined by the courts. "Incompetence" means "some demonstrated lack of capacity or ability to perform the professional functions of office", Vivian v. Examining Board of Architects, 213 N.W.2d 359 (Wisc. 1974), including physical handicap inability to perform official functions; Tafoya v. New Mexico State Police Board, 472 P.2d 973 (N.M. 1970), or other legal disqualification, incapacity, or fitness to discharge the required duty. It means want of physical, intellectual, or moral ability, insufficiency, inadequacy, want of legal qualifications. Appeal of School District of Bethlehem, 30 A.2d 726 (Pa. Super. 1943); Hughes v. Hughes, 271 P.2d 172 (C.A. 4th 1954). The allegation in the petition falls short of claiming lack of capacity, ability, or physical, educational or mental ability to perform official functions; rather the allegation merely recites an action of the Assembly to which petitioners object. Failure to perform prescribed duties means a failure to carry out those responsibilities of the office set out in state or local law. Prescribed duties are numerous, from the obligation to attend assembly meetings unless excused to voting on matters for which one is not excused on the basis of a conflict of interest. A prescribed duty may be created by implication, as for example, when the assembly as a whole is required to perform a function. It is the implicit duty of each official who is a member to aid in the performance of that function. It is not, however, a prescribed duty of each assembly person to take every conceivable action which might make that official more informed or a more popular representative. Thus, it is not a prescribed duty to attend meetings which are not official or are sponsored by other nonmunicipal organizations. It is not a prescribed duty of an assembly person to inform all constituents of the basis of his or her political decisions, nor is it a prescribed duty to follow the popular will of ones constituency on any particular issue.

While the Alaska Supreme Court has not ruled on the precise question addressed here, at least one Superior Court Judge has

stated that under AS 29.28.130-.170, the legal sufficiency of stated grounds should be examined and that allegations of "misconduct" cannot be based on "discretionary" items, but rather must be founded on an unlawful or unethical act. White v. Baker, 3KO-80-263. The opinion stated here is also consistent with several that have been given to the Matanuska-Susitna Borough Assembly by various attorneys retained or employed by that body.

MEMORANDUM

FEB 28 1983

Re: Proposed Municipal Code Revisions;
Planning, Platting and Zoning Authority
of Local Governments

A. SUMMARY.

There are no significant differences between SB 180 as it passed the House and the October 1982 redraft with regards to the planning, platting and zoning authority of municipal governments. As with Senate Bill 180, the October 1928 redraft would greatly expand the land use planning authority of municipalities. The use or misuse of this authority could lead to arbitrary or unreasonable exclusion or restriction of natural resource development, particularly on state or fee lands.

Amendatory language to limit this authority may be proposed to either Title 29 or Title 38. The selection of which of the two titles to amend depends largely upon industry perception of the likelihood of success before the legislature.

B. HISTORY OF SB 180

As the culmination of approximately 3 years of work by a special joint committee, Senate Bill 180, which completely rewrote the municipal code of Title 29, was adopted by the House on May 26, 1982. The Governor vetoed the bill on July 15, 1982. The veto message issued by the Governor (published in the Senate Journal on July 22, 1982

at 1788-1792 (copy attached)) set forth seven reasons for the veto, none of which relate to the land use planning chapter of the bill.

Bills vetoed after the adjournment after the last regular session of the legislature can be reconsidered only in a special session of that same legislature. Alaska Constitution Art. II, Sec. 16; AS 24.30.100. Therefore, Senate Bill 180 cannot now be reconsidered and is dead. In October of 1982, the Department of Community and Regional Affairs produced a rewrite of Senate Bill 180. The redraft is substantially the same as the bill which passed the legislature, but several of the last minute house amendments have been deleted, apparently in response to the Governor's veto message.

With regard to the planning, platting and zoning authority of municipalities, there are only three differences between the October 1982 redraft and SB 180 as it passed the legislature, all of which are minor. They are as follows:

1. On page 87, lines 9 and 14, the word "comprehensive" has been added to clarify the term "planned" as used in those sections.

2. On page 89, line 27, subpart 1 of AS 29.40.090(a) has been reinstated, after elimination by a house amendment to SB 180. This subpart requires that the abbreviated plat procedure apply only to subdivisions

containing four lots or less.

3. On page 89 at line 2, the October 1982 redraft has deleted a sentence at the end of AS 29.40.060(b) as it appeared in SB 180 which read as folows: "A proceeding under this section has preference over all other civil actions and proceedings."

C. THE PROBLEM.

The bill provides virtually unlimited planning, platting and zoning powers to home rule municipalities, and greatly expands the powers given to other municipalities. An elucidation of this matter is given in the attached memorandum which discusses the same provisions in House Bill 170 and Senate Bill 180.

It is our opinion that such a sweeping grant of power to the municipalities, particularly to the North Slope Borough, would allow the municipalities to severely inhibit the development of natural resources, particularly oil and gas. An attempt to do this has already been made in the North Slope Borough's proposed zoning ordinance. In fact, the North Slope Borough has adopted an interim zoning ordinance which requires oil and gas facilities to be permitted by the Borough.

The problem is not perceived to be quite as severe on federal lands, in view of a Ninth Circuit Court of Appeals decision which holds that municipal governments may

not impede the development of natural resources on land owned by the federal government. Ventura County v. Gulf Oil Corporation, 601 F.2d 1080 (9th Cir. 1979), aff'd per curiam, 100 S.Ct. 1593 (1980). However, state and fee land may be at the mercy of municipalities. See the attached memorandum.

D. PROPOSED SOLUTIONS.

The intent of Chapter 40 of the proposed municipal code revision is to increase the authority of local governments with regard to planning, platting and zoning within their respective jurisdictions. Planning, platting and zoning are tools used by local governments to regulate the growth of the urban environment. Unfortunately, in Alaska, municipal government has been expanded to cover vast regions of open and unoccupied space. Zoning was never intended to be a method by which use of the non-urban environment could be regulated.

However, with the North Slope Borough interim zoning ordinance, and proposed final zoning ordinance, it is clear that zoning will be used at least by that municipality to the maximum extent possible to restrict and exclude resource development in open spaces.

The objective of any amendment to the October 1982 municipal code revision, therefore, should be to limit municipal power in planning, platting and zoning with

respect to the development of natural resources in the non-urban environment. Such activities are fully regulated by federal and state agency, and an additional layer of local control will add significantly to the time and expense involved in developing ratural resources, with a de minimus contribution to environmental quality.

The objective is clear. The means to accomplish the objective are less than clear, mostly for political reasons.

Article 10, Sec. 1 of the Alaska Constitution provides that: "A home rule borough or city may exercise all legislative powers not prohibited by law or by charter." Although this constitutional provision applies expressly only to home rule municipalities, it appears that the Alaska Supreme Court applies the same test for state preemption to both home rule and general law municipalities. Liberati v. Bristol Bay Borough, 584 P.2d 1115 (Alaska 1978). The test set forth in the Liberati case requires either an express legislative direction or a direct conflict with a statute such that the municipal ordinance under consideration substantially interferes with the effective functioning of a

state statute or regulation or its underlying purpose. 584 P.2 at 1121-1122.*

The most logical way to accomplish an express prohibition would be the insertion of appropriate language in Title 29, Chapter 40 as proposed by the October 1982 revision of the municipal code. However, this may not be politically possible.

In the alternative, the only other logical place in the Alaska Statutes to put such an amendment would be Title 38, relating to natural resources. A limitation could be placed in the Alaska Lands Act, AS 38.05, but logically that limitation could only relate to development of natural resources on state land. A limitation could also be placed in the miscellaneous chapter of Title 38, AS 38.95, and, in such a context, could perhaps include fee lands as well as state lands.

---

* An excellent discussion of home rule authority in Alaska is contained in Sharp, "Home Rule in Alaska: A Clash Between the Constitution and the Court," 3 UCLA-Alaska Law Review 1-54 (1978).

E. CONCLUSION.

The use of zoning powers to regulate the development of natural resources in non-urban environments constitutes a serious threat to the oil and gas industry in Alaska. The problem is exacerbated by the existence of a home rule borough which has approximately 5,000 permanent residents and yet occupies the entire North Slope of Alaska, and which utilizes, to a maximum extent possible, the broad authority granted home rule governments by the Alaska Constitution to restrict resource development within its boundaries.

AS 29.40 as proposed by the October 1982 municipal code revision would compound this problem by giving unlimited planning, platting and zoning authority to home rule governments, and by greatly expanding the land use planning authority of other municipalities. This chapter would

validate an otherwise questionable North Slope Borough zoning ordinance, and result in yet another layer of regulatory bureaucracy with little benefit to the public interest.

For these reasons, it is imperative that modifications be made to the October 1982 redraft, or amendments be made to Title 38 in order to protect oil and gas interests. Five alternatives are proposed in this memorandum. The oil and gas industry should strive for a consensus among its members and push for passage of the consensus by the Alaska legislature. Failure to do so may be disasterous.

SB 515 (Cont.)

changing court rules. However, even if a two-thirds vote was necessary, the Senate's vote to concur in the House amendments was not affected by the subsequent failure to adopt the rule changes. The vote to concur passed by the required 11 votes, and that vote was to adopt the identical bill that had passed the House. Under Rule 39(c) the failure of the Senate to take a separate vote on the rule change simply meant only that secs. 43 and 44 (and potentially their respective companions -- 18 and 40) are now "void and without effect."

The issue that is presented is very similar to one which has arisen when one house votes to concur in amendments made by the other house, but then fails to adopt, for example, an immediate effective date included in the bill by a two-thirds vote as required by Rule 39(f). The procedure specified in Rule 39 (c) pertaining to votes on court rule changes is virtually identical to the language in Rule 39 (f) pertaining to votes on special effective date clauses. There is ample authority in support of the rule that a failure to adopt a special effective date by a two-thirds vote after concurring in a bill by a majority vote means that the bill has been adopted with an ordinary 90-day effective date. This authority rests on a construction of the effective date as not being a material factor influencing the favorable vote. This rule should apply by analogy to the failure of the Senate to vote separately on the rule change provisions in this bill. Consequently, I have concluded that HCS CSSB 535 (Jud) am H has been adopted by the legislature but without the effect of changing the court rules cited in sec. 43 and 44.

Sincerely,

/s/Jay S. Hammond
Jay S. Hammond
Governor

SB 180 VETOED

July 15, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under Article II, Sec. 15, of the Alaska Constitution, I have vetoed HCS CSSB 180 (Jud) am H, relating to municipal government.

SB 180 (Cont.)

I regret having to take this action for several reasons. Certainly, the bill contains many meritorious revisions and improvements to the municipal code. These were the product of an arduous undertaking accomplished after three years of unprecedented cooperation among legislators, state and local government officials and staff. Further, there are some concepts contained within questionably designed and inadequately considered amendments which I believe should be addressed responsibly by the next Legislature. While perhaps none of these amendments is individually sufficiently flawed to warrant a veto of the entire measure, a combination of them creates significant problems that have incurred greater collective public opposition than has almost any other legislative action in my entire political experience. It's for these reasons that I have regretfully concluded that it is simply not in the best public interest to permit this bill to become law.

For example, the amendment redefining "population" and permitting the counting of workers at "isolated job sites" appropriately recognizes that the influx of seasonal empl[illegible] can significantly impact local services for which there i[illegible] now no readjustment provided under revenue sharing statut[illegible] However, I am advised by counsel that the manner in which this matter is handled in SB 180 seriously jeopardizes the resolution reached by the state with the U.S. Census Bureau and could incur substantial losses in federal funding to both state and local governments. While I believe some redistribution of state funds is warranted to assist communities most impacted by seasonal and temporary influxes of population, (whether they be "isolated" communities or otherwise), I am concerned with the potential inequity created by this amendment. The vagueness of the term "isolated job site," I am advised, could result in endless litigation no matter what clarifying efforts might be made through regulation. This questionable feature, coupled with prospective revenue losses to the state treasury ascribed to it by the Department of Revenue in their request for veto, are but two of several causes for concern.

I as well favor the basic policy decision of the Legislature that forest values above ground, (just as mineral values beneath it), should be accorded different status for purposes of municipal taxation. However, the provision exempting forest lands from municipal property taxation contains a definition by reference that poses substantial problems of interpretation and impact according to all concerned state agencies. I am advised by the Department of Law, for example, that the definition problem alone would probably induce costly and unnecessary litigation.

Perhaps more importantly, bond counsel advises that the bill would gravely impede local government general obligation bond programs in progress and significantly harm the credit ratings of virtually all Alaska communities. This feature is perhaps the most damaging potentially of all the questionable features contained in SB 180 and, in the view of most financial consultants, would alone warrant veto. I

SB 180 (Cont.)

am certainly in no position to second guess and override them in this conclusion. They assert the resulting adverse effect of this feature is likely to be a decline in market value of outstanding issues and an increase in the costs for new financing. Potential impact on the state's bond bank is, of course, of equal concern.

Additionally, the Department of Natural Resources has expressed major concerns over the manner in which this amendment might apply, despite their agreement with the avowed basic philosophical intent of the amendment's sponsors. They point to the Oregon forest value taxing policies as a far preferable approach to meet that objective. Accordingly, I have directed that legislation be drafted which would more appropriately address this matter.

Another problem rests in the attempt to clarify statutory references regarding tax exemptions of undeveloped Alaska Native Claims Settlement Act lands. Agencies have raised unanswered questions as to whether the language is indeed clarified. Moreover, a retroactivity feature of this provision casts serious "public purpose" doubts upon the legality of the proposed solution.

The amendment prohibiting local governments from passing ordinances relating to firearms has been violently objected to by some law enforcement people. It causes me concern as well because of my reluctance to permit state government to impede the ability of local communities to govern in a manner deemed by themselves most responsive to their unique needs.

Objected to by many others requesting veto is the further intrusion into the conduct of local government business represented by amendment 13. This would expand the initiative and referendum process to include local administrative matters. Those requesting veto assert that actions of the governing body elected by the public should be subject of initiative and referendum; but that ongoing daily administrative matters should be subjected to the usual review and oversight inherent in the concept of a governing body of elected officials held accountable for actions of those whom they employ. For state government to impose its will in such matters upon local governments without far more public debate than was accorded this amendment, appears to me to be yet another undue incursion of "Big Brother" into local matters.

Another section affects a major change in public utility regulatory philosophy, and reverses the direction chosen with deregulation in 1980. In urging veto a multitude of agencies and utilities pled for further public hearings and agency consideration before so drastic a change be contemplated. Again, if this alone were the measure's greatest flaw, I perhaps would not have vetoed it. However, in conjunction with a multitude of other alleged defects and public confidence eroding features, it adds one more reason for my action.

SB 180 (Cont.)

A final problem is one related to language, not concept. This provision allows municipalities to use the group insurance concept for the purpose of pooling their workers compensation liabilities and claims handling. The language appears to mandate board adoption of regulations permitting a municipal employer group to recede under any circumstances. It seems only prudent that qualifications be stipulated so that municipalities requesting approval for group self insurance status are subject to the same regulatory criteria as any other self-insured employer.

The subject legislation has produced more controversy and debate than any other to emerge from the 12th Legislature. Because I find some issues addressed in the amendments, as well as the municipal code revisions, to be desirable, I am taking specific steps to encourage the 13th Legislature to address these issues. Accordingly, I have directed that legislation be drafted which would accomplish the municipal code revisions effective prior to the floor amendments. This would address the problem areas in a manner both acceptable to me and, I believe, to most legislators.

I have also directed that legislation be prepared to address the forest lands and taxation issues in a more acceptable manner to accommodate the appropriate intent of these amendments' sponsors.

I have also directed legislation be prepared to address the workers compensation provisions allowing local governments to use the group self-insurance concept for the purpose of pooling their workers compensation liabilities and claim handling.

Further, I'm directing the Department of Community and Regional Affairs to draft regulations on the provisions of state assistance to local governments in a manner which compensates more equitably those communities impacted by seasonal, temporary and isolated workers. Minimally, I would hope that in the short term we could at least "hold harmless" the North Slope Borough, which otherwise stands to lose about $2 million in revenues from the amount they received last year. All other municipalities would receive, I'm told, increases. Accordingly, I would hope that all other municipalities, which rose in violent protest over the prospects of revenue losses to themselves were SB 180 to become law, would be equally concerned about revenue losses incurred by other municipalities through this measure's veto.

I do not intend to submit legislation re-regulating public utilities at the municipal level unless some valid arguments can be presented for this change.

The legislative package presented to the 13th Legislature will, of course, be that of the future governor. Therefore, I cannot guarantee that all these proposals will come before the House and Senate. However, several key legislators who are likely to return assure me of their dedication towards

SB 180 (Cont)

address of these matters.

Despite the bill's problems, I was at first inclined to go along with policy decisions rendered by the Legislature in their passage of 180. After all, by so doing I could assure these issues would be addressed next session if as serious as opponents were contending. However, a growing crescendo of public opposition, virtually unanimous staff and agency veto recommendations, plus pleas from some legislators who now wish to do penance for having voted for the measure, cause me to conclude that while a veto does a disservice to the legitimate concerns of some communities and interests, permitting the bill to become law could incur even more disservice to all others. Finally, as one of two senators who will assuredly return next session, let me urge you, Mr. President, to place this crucial issue high upon you agenda.

Sincerely,

/s/ Jay S. Hammond
Jay S. Hammond

July 1982

DETAILED ANALYSIS OF LAND USE REGULATION BY MUNICIPALITIES UNDER CSSB 180 (C & RA) AND CSHB 170 (C & RA)

A. Current law.

Land use regulation by municipal governments is currently governed by A.S. 29.33.070-.245. A.S. 29.33.070 requires all boroughs to provide for planning, platting and zoning on a "area-wide basis." A.S. 29.43.040 grants the same power to home rule and first and second class cities located outside organized boroughs.

A.S. 29.33.080 and .085 require the assembly to adopt a "comprehensive plan" containing policy statements, goals, standards and maps. A.S. 29.33.090 requires the municipal assembly to regulate land use "by districts or contract zoning." It requires land use regulations to be uniform for each class of use in each district. Contract zoning is defined as allowing a "zoning reclassification" to a less restricted use where the owner agrees to place restrictions on the use of the land beyond the zoning requirements generally attaching to the new classification. This section also states the purposes for which zoning ordinances may be adopted. The stated purposes clearly envision zoning in an urban environment.

The current law applies to all local governments, and therefore limits the power of home rule boroughs. The current

law has no provision authorizing the regulation of land use by the adoption of a permit system. Additionally, the current law does not allow cities located in third class boroughs to provide for planning, platting and zoning.

B. Land use regulation under CSSB 180 and CSHB 170.

Under CSSB 180 and CSHB 170, land use regulation by local governments would be governed by A.S. 29.40.010-.200.

A.S. 29.35.180(b) requires a home rule borough to provide for planning, platting and zoning. No limitations are imposed upon that power, nor are any guidelines set forth limiting the exercise of that power.

A.S. 29.35.180(a) requires first and second class boroughs to provide for planning, platting and zoning pursuant to A.S. 29.40. A.S. 29.40.010 also requires first and second class boroughs to provide for planning, platting and zoning.

A.S. 29.35.220 and .300(b) would allow a third class borough to acquire the power to provide for planning, platting and zoning within a service area by the adoption of a referendum to that effect.

A.S. 29.35.250(b) requires a home rule or first class city within a third class borough to provide for planning, platting and zoning under A.S. 29.40, and allows a second class city located within a third class borough to so provide.

A.S. 29.35.260(c) requires home rule and first class cities outside a borough and permits a second class city outside a borough to provide for planning, platting and zoning under A.S. 29.40.

These provisions apparently impose no limitation on the planning, platting and zoning authorities of home rule boroughs. It appears that A.S. 29.40 does not apply to the exercise of those powers by home rule boroughs. A.S. 29.35.180(b); compare A.S. 29.35.180(a).

Article X, Section 11 of the Alaska Constitution provides: "A home rule borough or city may exercise all legislative powers not prohibited by law or by charter."

Given this provision and the apparent lack of any explicit limitations on the zoning authorities of home rule boroughs, home rule boroughs would have greatly expanded zoning authority under the bill. As the Supreme Court has stated:

> A municipal ordinance is not necessarily invalid in Alaska because it is inconsistent or in conflict with a state statute. The question rests on whether the exercise of authority has been prohibited to municipalities. The prohibition must be either by express terms or by implication such as where the statute and ordinance are so substantially irreconcilable that one cannot be given its substantive effect if the other is accorded the weight of law.

Jefferson v. State, 527 P.2d 37, 43 (footnotes omitted, emphasis added).

This position was reiterated by the Supreme Court in Liberati v. Bristol Bay Borough, 584 P.2d 1115 (Alaska 1978).

> Merely because the State has enacted legislation concerning a particular subject does not mean that all municipal power to act on the same subject is lost. We have consistently rejected application of any such concept in our cases dealing with home rule municipalities. We do so now with respect to general law municipalities because our constitution requires that their powers be liberally construed as well. We believe that an appropriate accomodation can be made between the State and general law municipalities by a rule which determines pre-emption to exist, in the absence of an express legislative direction or a direct conflict with a statute, only where an ordinance substantially interferes with the effective functioning of a state statute or regulation or its underlying purpose.

584 P.2d at 1121-1122 (footnotes omitted, emphasis added).

It appears that the Alaska Supreme Court is applying the same test for state pre-emption to both home rule and general law municipalities. In summary, in order for a local ordinance to be determined invalid pursuant to Article X, Section 11 of the Alaska Constitution, there must be a prohibition by state statute, express or implied, or the ordinance must substantially interfere with the effective functioning of the state statute or regulation or its underlying purpose.

Under CSSB 180 and CSHB 170, there would be no explicit prohibition of any zoning ordinance adopted by a home rule municipality.

Federal lands may be unaffected by the zoning ordinances adopted by home rule boroughs in any event. See Ventura County v. Gulf Oil Corp., 601 F.2d 1080 (9th Cir. 1979), affirmed per curiam 100 S. Ct. 1593 (1980).

Private land may be totally at the mercy of local zoning ordinances except insofar as inverse codemnation can be claimed and proved. It could be argued that, as applied to land granted to the natives by the Alaska Native Land Claims Settlement Act, zoning ordinances which prohibit development are inconsistent with the purposes of that act and therefore invalid. There is no precedent for such an argument and the success of such a position is questionable.

Any argument opposing the restriction of energy development on state lands by a local zoning ordinance adopted by a home rule borough would have to rely on the claimed inconsistency of the ordinance with the state's right to develop its natural resources. In that regard, determination of whether there is a limit to the home rule borough's authority to adopt ordinances prohibiting or restricting the development of energy sources requires a two-fold inquiry:

1. Are there Alaskan constitutional and statutory provisions which seek to implement a statewide policy with reference to the subject matter of the ordinances?

2. Do the proposed borough ordinances impede implementation of that policy?

While control of natural resources of the State of Alaska is specifically retained by state government pursuant to Article VIII of the Alaska Constitution, it is by no means certain that a court would rule that a local zoning ordinance which impedes or prohibits development of oil and gas in certain specific locations would be struck down as unconstitutional or unauthorized. In any event, the adoption of the current provisions concerning home rule regulationof land use as stated in CSSB 180 and CSHB 170 would insure extensive constitutional litigation to resolve these questions.

The question is further complicated by the fact that A.S. 29.40.040(a)(2) in the two bills would specifically authorize the use of a permitting system to regulate land use. This section places far greater authority in local government than the current law does. It is conceivable that an ordinance could be adopted which would prohibit all uses unless a land use permit is obtained from the local government involved. This would allow local governments to assess energy development projects on a case by case basis thus adding another layer to the regulation of energy development in general.

It should be noted that this permit procedure would be available to any local government that possesses or obtains planning, platting or zoning authority under A.S. 29.35 and A.S. 29.40 as proposed in CSSB 180 and CSHB 170.

Mr. Wayne Mabry
Ombudsman
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Wayne:

Thank you for your recent letter regarding the lack of clarification in statutes and case history as it refers to recall petitions. I am aware of the recent problems this has caused in Anchorage and can appreciate the position you have been put in.

A complete revision of Title 29, Municipal Code, is indeed taking place agin this year. Last year, as I am sure you are aware, a similar bill passed but later became mired in controversy and was vetoed. SB 1 is now in the Senate committee process and is the vehicle which is being used to address this question. Eventually, should it pass the Senate, it will be referred to the Community and Regional affairs committee in the House chaired by Representative Barbara Lacher.

I am forwarding your letter and backup to her at this time for investigation and consideration. This matter could be taken up as a separate issue or incorporated as part of the overall Title 29 examination. In any case, it warrants investigation and Representatuve Lacher's committee has propoer jurisdiction over this matter. I will keep in touch with her to monitor the progress on this situation. You may wish to contact her as well at 465-4894.

I hope we can reach an acceptable solution. Please feel free to contact me at any time if I can be of assistance.

Very truly yours,

Joe L. Hayes
Speaker

JLH/jkd

Barbara- Joe has asked that you take this into consideration as you review Title 29- Thanks. Pat

FEB 3 1983

February 1, 1983

Joe L. Hayes, Legislator
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Joe:

I have recently investigated a complaint about a recall petition for A Municipal Assemblyman. My investigation found that the State Law (AS 29.28.130) on recall petitions is not clear as to the legislative intent regarding a clerk's authority and/or responsibility. The legal opinions regarding similar cases are, in my view, conflicting. In the case I reviewed, the Anchorage Municipal Clerk ruled that the "grounds" stated in the recall petition did not "constitute incompetence or failure to perform prescribed duties" and rejected it. The Municipal CLerk's decision was based on several legal opinions which stated the Clerk had the responsibility and authority to review the grounds based on the word "content" in AS 29.28.160.

My case summary disagrees with those legal opinions and states that a recall petition can only be rejected for one of the reasons stated in AS 29.28.150. I feel that no individual can rule the grounds for recall insufficient except the voters in a duly called recall election. A copy of my case summary is enclosed with four attachments covering the legal opinions. Also enclosed is a copy of the Anchorage Municipal's Clerks January 11th letter to the complainant, Tom Staudenmaier.

I understand that you are involved in revising this portion of the Alaska Statutes and ask that you review my case summary. I would appreciate your comments on this problem and would like to be informed of any proposed changes to this state law. Also, if any hearings are being planned, please let me know as I would like to testify.

If you have any questions, please don't hesitate to call.

Sincerely yours,

Wayne D. Mabry
Ombudsman

694-2322

We the undersigned registered voters of Section (2) two, Seat C, of the Municipality of Anchorage, which includes Fort Richardson, Eagle River and Chugiak, hereby petition for the recall of Assembly Member Gerry O'Conner under the Anchorage Municipal Charter, Article III, Section 3.03, Recall; Title 29, Section 29.28.140 for incompetence and failure to perform prescribed duties.

Said recall is based upon dereliction of duty of this representative of Eagle River and Chugiak. At the December 2nd, 1982 Municipal Assembly Meeting, Gerry O'Conner joined Tony Knowles, Mayor of Anchorage and voted to increase property taxes up to 50%. His other past actions and this ta increase are contrary to the best interest of the citizens of Eagle River and Chugiak.

RECEIVED
JAN 11 1983
OFFICE OF THE OMBUDSMAN

Mr. Tom Staudenmaier, Chairman
AKC-PAC
P.O. Box 8-9110
Anchorage, AK 99508

Dear Mr. Staudenmaier:

On January 3, 1983, you presented to the Municipal Clerk a petition for recall of Assemblyman Gerry O'Connor. In accordance with AS. Section 29.28.160, the Municipal Clerk shall, within 10 days, review the petition for content and signatures and shall certify on the petition whether it is accepted or rejected.

A review of the signatures was made and of the 509 signatures, 354 were registered voters. In reviewing the grounds, the petition was found to be insufficient because the act i.e., voting on the municipal budget, does not constitute incompetence or failure to perform prescribed duties.

It is the decision of the Municipal Clerk the petition is insufficient and it is therefore rejected and will be filed for public record.

A copy of the legal opinion from the Municipal Attorney is enclosed for your information.

If you have any questions, please contact this office.

Sincerely,

Ruby E. Smith
Municipal Clerk

Municipality of Anchorage

MEMORANDUM

DATE: January 20, 1983

FROM: Office of the Ombudsman

SUBJECT: CASE SUMMARY, NO. 82-3

The following case summary is provided for your information and review. If you have any questions, clarifying information, or comments regarding our determination or any other aspect of the case, please bring them to our attention so that we can incorporate them into this summary.

CASE SUMMARY

Investigator Wayne D. Mabry In Date: 1-11-83 Close Date: 1-17-83

Category: MUNICIPAL CLERK'S OFFICE

Complaint Summary: The complainant presented a petition for the recall of Assemblyman Gerry O'Conner to the Municipal Clerk's office on January 3, 1983. On January 11, 1983, the Municipal Clerk rejected the petition as being insufficient on the grounds that "voting on the Municipal budget does not constitute incompetence or failure to perform prescribed duties". The complaint is that the Clerk's office does not have the authority under state law (AS 29.28.160) to rule on the alleged grounds.

Case Description: The complainant approached this office on January 3, 1983, after delivering the petition to the Clerk's office, and wished to file a complaint that the petition was going to be rejected based on an opinion by the Municipal Attorney. The complainant felt the Clerk had no right to solicit the Municipal Attorney's opinion. On that date, I informed the complainant the Clerk did have the right to solicit the Municipal Attorney's opinion and since no action had been taken by either the Clerk or the Municipal Attorney, this office could not investigate.

Based on the complainant's contact I did discuss the matter with the Municipal Clerk and Attorney explaining that an official complaint was probably going to be filed with this office if the petition was rejected. At that time, neither the Clerk nor the Attorney had made their determination; a reply by the Clerk to the petition was required by January 11, 1983.

In anticipation of a complaint being filed with this office and a decision to look into the matter on this office's "own motion", I then contacted the Matanuska-Susitna Borough attorney's office and the State Attorney General's office in Anchorage. I spoke with Steven H. Morrissett, Matanuska-Susitna Borough Attorney, about recall petitions because his office has gone through several in the last few years. Mr. Morrissett had given his opinion on the last recall petition filed in the Borough in a memorandum dated August 13, 1981, (attachment #1) which determined that the recall petition was insufficient. I provided a copy of this memorandum to the Municipal Clerk.

On January 11, 1983, the complainant came to this office to lodge a formal complaint based on the Clerk's rejection of the recall petition he had filed. His specific

complaint was that the Municipal Clerk did not have the authority to review the grounds and determine if they constituted "incompetency or failure to perform prescribed duties". I explained to the complainant that this office would accept the complaint and open a case file; however, any recommendation from this office could not change the outcome. Furthermore, the only possible way to change the outcome of the Clerk's decision is through the court system. This was based on my assumption that once the Clerk made a decision, within the 10 day time limit allowed by state law, there is no mechanism to allow the Clerk to change that decision.

I contacted Mr. David LeBlond at the State Attorney General's office. He helped me locate two memorandums regarding recall that had been prepared by the Attorney General's office in 1977. I went to the Attorney General's office, reviewed their files and made copies of the two memorandums regarding a recall petition of a School Board member located in the upper Railbelt School District. In this case there was no municipal clerk involved to handle the recall petition, so the Commissioner of the State Department of Education was handling it. [Later in this Case Summary, I will be quoting from the memorandums by the Assistant Attorneys General, Roger W. Pegues, dated April 12, 1977 and Ronald W. Lorensen, dated June 6, 1977 (attachment #2, #3).]

I then met with the Municipal Clerk, Ruby Smith, to discuss her decision and she informed me that she had contacted numerous Municipal Clerks around the State and had requested an opinion from the Muncipal Attorney, Jerry Wertzbaugher. Ms. Smith tended to agree with my analysis that the term "content" in Section 29.28.160 of the State Statutes, Examinations of Sufficiency, did not relate to determining if the grounds stated in the recall petition were sufficient. She made her decision based on legal opinions she had reviewed and discussions with other clerks around the State, giving the overwhelming opinion that state law did require her to rule on weather the grounds constituted "incompetence or failure to perform prescribed duties". Ms. Smith had contacted Mr. Rubini of the State Attorney General's office in Juneau and the discussion included the opinion by the lawyer that the petition was vali and should go on the ballot. When Ms. Smith requested this opinion in writing the response was that the State Attorney General's office would not give an opinion as the Municipality of Anchorage had an attorney for that purpose.

Basis for Determination: After my first contact with the complaint I reviewed a copy of the applicable state law regarding recall petitions. My first impression of the state law was that there was no legislative intent to have municipal clerks across the state of Alaska determine if the grounds stated in a recall petition were, in fact, "misconduct in office, incompetence, or failure to perform prescribed duties". I then discussed this concept with the Muncipal Clerk and the Municipal Attorney, but neither had yet formed a specific opinion although the Municipal Clerk did tend to agree with my concerns. I then met with the Matanuska-Susitna Borough attorney and also reviewed the files of the State Attorney General's office here in Anchorage. There were several other memorandums in the State Attorney General's files regarding recall petitions, but the two attached were the only ones that related to the specific question of "content".

In reading the January 11, 1983, opinion by Jerry Wertzbaugher, Municipal Attorney, (attachment #4) to the Municipal Clerk, I find that his basic premise revolves around the word "content" located in Section 29.28.160 and that this word "content" means the Municipal Clerk can determine if the grounds stated in the recall petition are in fact grounds for recall as stated in Section 29.28.140. Mr. Wertzbaugher's memorandum goes to great lengths to prove that the term "content" could only refer to the statement of grounds.

My position regarding the term "content" as used in the state law is that it does not nor could not refer to the grounds. In the State Statues regarding recall petitions, Section 29.28.140 states the grounds for recall. Then Section 29.28.150 entitled "Petition" states:

> (a) A petition seeking recall of one or more municipal officials is filed with the Municipal Clerk. The petition shall contain
>
> (1) the signatures and residence addresses of a number of voters as prescribed in §70(b) of this chapter for initiative and referendum;
>
> (2) the date each voter signed the petition; and
>
> (3) a statement of the grounds of the recall stated with particularity as to specific instances; B. A petition for recall must be filed with the Clerk within 60 days after the date of the earliest signature on the petition. (§2 ch 118 SLA 1972)

Then comes Section 29.28.160, Examination for Sufficiency. It states "The Municipal Clerk shall review the petition for content and signatures and shall certify the petition within 10 days of the filing date whether it is accepted or rejected ... ." In my non-legalistic mind it appears that the term "content" in Section 29.28.160 refers to the words "shall contain" in Section 29.28.150 and the only thing the Clerk can look at relating to the grounds is stated in number 3 above: that the grounds will be particular and specific. There is nothing in the law that says the Clerk can determine if the grounds, if assumed to be true, must fit the test of being "misconduct in office, incompetence or failure to perform prescribed duties". As stated in Mr. Morrissett's August 13, 1981 memorandum, I feel the charges must be definite enough to allow the public to determine the truth or falsity of those charges. Mr. Morrissett's memorandum rejecting the recall petition submitted was rejected on the basis that all five charges were too vague and would not give the voter a chance to determine if the Assemblyman should be recalled or not. I think Mr. Morrissett's memorandum tends to support my opinion because the reason for rejecting that recall petition was based on vagueness.

Also, two other recall petitions in 1980 were accepted by the Matanuska-Susitna Borought Clerk based on grounds related to how a particular Assemblyman voted on issues similar to the one in this case (copies of the two 1980 petitions are attached to Mr. Morrissett's memorandum).

It is difficult for me to imagine that the legislative intent was to have any clerk make this decision on the grounds for recall as it could relate to one or more of their bosses. If the clerk is appointed by a manager, the clerk's action could be construed as a political move by the administrative branch against the legislative branch. This would be a terrible position for a clerk to be put in; to have to say one of the members of the legislative body is guilty of "incompetence, misconduct in office or failure to perform prescribed duties" and could put a clerk's job in jeopardy.

The April 12, 1977 memorandum from the Assistant Attorney General regarding the recall of a School Board member states " The recall petition must contain a statement of grounds 'with particularity as to specific instances.'" The petition in question stated that its aim was to correct the incompetency of the School Board and cited two particular instances: "(1) the Board's approving a new position of Assistant Superintendent and (2) the Board's approving funds for a computer." The memorandum further goes on to state:

> It is not the role of the officer charged with ascertaining the petition's sufficiency to judge the merit or truth of the grounds asserted (68 Am. Jur.2d Public Officers and Employees § 245) It suffices that the reasons have been stated and with sufficient particularity to inform the office holder and the electorate. The latter will determine the merit of the charges.

I feel these "grounds" are similar in nature to the ones filed by the complainant and these were acceptable enough to call for a recall election. Also, it is clear that the electorate should determine the merits of the charges, not the clerk.

The second memorandum from the Attorney General's office dated June 6, 1977, goes into even further detail regarding the allegations and what exactly can or cannot be determined by the Commissioner in this case. The first part of the memorandum speaks to the fact that the allegation's truth or untruth is irrelevant to the question of whether or not the recall petition is legally sufficient. The memo goes on to say:

> The decisions of those courts are virtually unanimous in their holding that the question as to whether or not the charges contained in the

petition are true or false is irrelevant. ... the only question to be decided is whether or not the charges which have been made are sufficiently specific to allege incompetence or misfeasance if they were in fact true. ... 'recall is political in nature and it is for the people and not the courts to decide the merits of the reasons stated in the petition'.

Further, the memo goes on to say:

In those states where the power of recall is constitutionally established, the courts have viewed recall as a 'fundamental right' and have consistently said that statutes dealing with recall should be liberally interpreted and that any restrictions which are placed on the power of recall must be strictly construed. ... Consequently, neither you nor the Board may determine the propriety of the policy in this area or the sufficiency of the petitions based on potential factual inaccuracies. A good general description of the judicial approach to recall can be found in State ex rel. Citizens Against Mandatory Bussing v. Brooks, 492 P.2d 536 (Wash., 1972):

First, in determining the validity of recall charges, courts are limited to examination of the charges stated and cannot inquire into factual matters extraneous to the allegations. Second, courts must assume the truth of the charges in determining whether legally sufficient grounds for recall

> have been stated. Third, just as there can be no inquiry into the truth or falsity of the charges, there can be no inquiry into the motives of those filing the charges. Fourth, recall charges are sufficiently specific if they are definite enough to allow the charged official to meet them before the tribunal of the people.

These statements lead me to believe that rejecting the petition because the grounds are political is invalid as everything a politician does is political. Also, rejecting the petition because it does not fit the definitions of "incompetence or failure to perform prescribed duties" is a right that can only be exercised by the voters.

My concern is if the legal opinion stated by Jerry Wertzbaugher and Steven Morrissett is correct. Then, what I hear this saying to those voters who wish to submit a recall petition, is to make allegations that, although possibly blatant lies, could be determined non-political statements and therefore allow a recall election. I do not think this concept is the intent of the state law. I totally agree with the statement that the recall petition is a "fundamental right" and that these petitions should be liberally interpreted and that restrictions placed on the power of recall must be strictly construed. Otherwise, the voters, as in this case, are not being allowed their fundamental right to a recall election.

Based on all of the above information, my opinion is that the state law does not allow the Municipal Clerk to review the content of a recall petition as it relates to the grounds for recall as stated in the state law, I have determined this case to be JUSTIFIED.

Note: I did not seek another legal opinion for two reasons. The first is my assumption that this matter will have to be settled in the courts which will generate additional legal opinions. Secondly, I felt I had enough information on which to base my determination.

Case Action:

This investigation leads me to the opinion that the state law needs to be revised in such a way that this question of content can be cleared up and made very specific as to what the legislature's intent is in regards to review by any municipal clerk within the State. Based on that I will be forwarding my memorandum on to members of the State Legislature who are interested in amending the Alaskan Statues regarding recall petitions. It is my understanding that some changes were recently passed by the State Legislature but vetoed by the Governor.

In my discussions with the complainant I stated that I felt the recall effort was premature if based on a Municipal tax increase. My reasoning is that approving the budget does not automatically raise taxes. Taxes are set in April or May by the Assembly only when it approves a specific mill rate for each Municipality service area. At this time the Assembly still retains the option to not raise the mill rate which, in effect, would lower the budget.

OFFICE OF THE OMBUDSMAN

MEMORANDUM

To: Evelyn Thompson, Borough Clerk

From: Steven H. Morrissett, Borough Attorney

Subject: Recall of an Elected Official--Procedures

The recall of an elected official is governed by AS 29.28.130--.250. Any elected official of the Borough may be recalled by the voters after he or she has served six months in office, subject to the provisions of those sections. The subject of this memorandum is discussed in relation to a petition received on August 6, 1981, to recall Assemblyperson Dorothy Jones.

Recall Charges

It is for the voters to decide whether the charges in the recall petition are true and, if true, whether they are enough reason for recalling the elected official. However, it is the duty of the Borough Clerk to determine whether the charges alleged, if taken as true, constitute "misconduct in office, incompetence or failure to perform prescribed duties" within the meaning of the law. Bocek v. Bagley, 505 P. 2d 814 (Wash 1973). AS 29.28.140.

The requirement that reasons be provided means that a recall petition is not sufficient if it is submitted solely for political reasons. However, the Clerk must look only to the language of the charge in determining whether adequate reasons are alleged in the petition.

Charges must be made which "state the grounds with particularity as to specific instances." AS 29.28.150(a)(3). An allegation of "misconduct", for instance, must be supplemented by specific facts which demonstrate "misconduct". The charges must be definite enough to allow the public to determine the truth or falsity of the charges. If even one charge, or if all together meet these requirements then the petition is sufficient.

"Misconduct in office" includes any wrongful conduct which affects or interferes with performance of official duty and includes misfeasance or malfeasance: the performance of a duty in an improper manner or the doing of an unlawful or unethical act. Knowledge by the official that the act was "misconduct" may not be relevant except to the extent that knowledge is required to show misconduct.

"Incompentence" ordinaril means intellectual, physical or moral inability to carry out a required task. It may include serious ignorance of basic information or a lack of mental or emotional ability necessary to carry on the duties of the official. It would not include making decisions which were politically unpopular.

"Failure to perform prescribed duties" means a failure to carry out those responsibilities of the office set out in state or local laws. Prescribed duties are numerous, from the obligation to attend Assembly meetings unless excused, to ordering elections on the acquisition of Borough powers if requested by the voters. MSB 2.12.070(F), 2.04.050. A "prescribed" duty may be created by implication; e.g., when the Assembly as a whole is required to perform a function, it is the implicit duty of each official who is a member to aid in the performance of that function. However, it is not a "prescribed duty" of each Assemblyperson to take every conceivable action which might make that official a more informed or more popular representative. Thus, it is not a "prescribed duty" to attend meetings which are not official or are sponsored by other non-Borough organizations. It is not a "prescribed duty" of an Assemblyperson to inform all constitutents of the economic impact of an Assembly decision.

On the Jones recall petition, five charges were made, as set forth in the footnote below.1/ The petition characterizes these charges as "incompetency and/or failure to perform prescribed duties." However, the sufficiency of the petition is not determined by this characterization, but by whether any charge, or all of the charges together, constitutes misconduct in office, incompetency or failure to perform prescribed duties.

The first charge is that Assemblyperson Jones has generally failed to consult with constitutents or keep them informed. Taking this as true, it fails to allege specific instances which would constitute

---

1/ (1) Has generally failed to consult with constituents and has failed to keep citizens informed concerning the various activities of the Borough Assembly and Borough Government; (2) Has failed to inform constituents concerning the true size and scope of Borough Government and the sources of revenues for the operation of Borough Government. This was especially true during early 1981 at Borough budget meetings; (3) Has failed to inform and/or consult with constituents concerning future property tax liabilities if and when present sources of state and federal revenues should cease to be available for the operation of the Borough Government. Specifically, she failed to discuss these matters at Borough budget meetings in 1981; (4) Has failed to recognize the desires of many constituents to lead quiet, peaceful, and uncomplicated lifestyles with a minimum of government regulation, intrusion, and interference. Has sponsored and/or voted for ordinances which interfere with privacy rights and individual freedoms of citizens; and (5) Has favored and/or voted for more expensive and burdensome Borough Government despite the objections of many of her constituents. Specifically, in May 1981, she ignored a petition signed by approximately 50 of her constituents, the purpose of w was to inform the Borough Assembly that many Borough citizens were against the addition of permanent employees to the general Borough Government staff.

statutory grounds for recall. It does not allege refusal to talk with constitutents in specific cases , nor does it state the nature of the failure to inform. It is not a prescribed duty of an Assemblyperson to inform all constitutents of all matters. The charge is not specifically clear to establish a valid reason for recall, nor would it generally be a sufficient charge if referenced to a specific instance.

The second charge is that Jones has failed to inform constitutents concerning the true size and scope of the government and its sources of revenue, particularly during the 1981 Budget hearings. This charge sets a specific time, but is as vague as the first charge in showing an act constituting misconduct, incompetence or failure of duty. The "true size and scope of government" is no more specific a subject than "various activities". There is no catagorical duty of Assemblypersons to inform all constitutents of all matters in a representative form of government.

The third charge is that Jones has failed to inform constitutents of future tax liability "if and when present sources of state and federal revenues should cease to be available..." This is so vague as to be impossible to respond to or for voters to determine whether the charge is true. It also fails for the reasons stated previously.

The fourth charge is that Jones has "failed to recognize the desires of many constitutents..." This is strictly a "political" reason for wanting a different representative. It is inevitable that some voters will be disappointed by every action taken by an Assemblyman. The elective process is the remedy. Recall requires specific, limited grounds for removal of an official before the end of his or her regular term.

The fifth charge is that Assemblyperson Jones has voted for "expensive Borough government", despite objections and a petition signed by 50 constitutents. If true, this is a charge that the elected official has acted contrary to the wishes of certain voters, not that the official is guilty of misconduct or failure of duty.

No charge states an allegation of incompetence, i.e. that Assemblyperson Jones is incapable of performing her duties. No charge alleges misconduct in office, i.e. an illegal or unethical act. Allegations directed towards claims of failure to perform prescribed duties establish no duties that were not performed. No allegation is made by the petition which is a basis for recall and which could be considered by informed voters as to its truth. The charges set forth in the recall petition are therefore insufficient. 2/

2/ This opinion is consistent with two previous written opinions of attorneys Allen Tesche and Harland Davis, provided at the request of the Clerk in 1980. Each of those opinions, issued in relation to petitions for the recall of Assemblypersons Schmall and Hitchcock, concluded that certain reasons on the petition were not legally sufficient. The charges that Schmall and Hitchcock failed to discuss "certain matters and general charges were noted not to be sufficient. However, charges of a specific instance of slander, excessive absences from meetings and illegal actions related to dismissal of the manager in violation of the law were detailed and sufficient to present to the voters.

Form of Petition Signatures

A recall petition must have a statement of the grounds of the recall stated with particularity. It must have the signature, residence address and signing date for each signer.

There is no requirement that the petition be on one page. Where the petition extends to several pages, each page should be attached to the others which form a complete petition and should be identified clearly as to the purpose of the petition to assure no signer is misinformed as to what he is signing. However, it is permissible to circulate more than one petition, each of which can be filed in a joint petition, if the form of each petition is identical.

It is preferable if each page of a petition has a full statement of the petition or a summary clearly setting forth the purpose. There is no apparent requirement that proof be provided that all sheets in a petition were circulated as a unit; some states require an affidavit to that effect.

The signatures on the petition must meet certain statutory requirements. If the area concerned by the petition in the Borough has fewer than 7,500 persons, the petition must contain the signatures of persons who are registered to vote in and living in the concerned area equal to 25% of the total number of votes cast at the last general election within that area. If the concerned area has 7,500 persons or more, the petition must be signed by voters equal in number to at least 15% of the total votes cast in the last general election in that area. In this case, the concerned area is District 5 only.

The signature must be in ink or indelible pencil. To be valid a signature must be followed by the date of signature and the person's current residence address. Each and every signature on the petition must have been signed within 60 days of the filing of the petition with the clerk.

Only those persons who are currently registered voters within the concerned area may be counted toward the petition. The petition itself is not an affidavit of residency; the required voter registration establishes the validity of a person's signature, residence and right to sign the petition. Because of the lack of specific residence addresses within the Borough, certain leeway must be granted to describing the location of residence. However, a signature may not be counted if it cannot be ascertained from the address that the person lives within the area concerned.

Processing a Petition

The municipal clerk is required to review the petition for content and signatures and accept the petition within ten days of the filing date. Until such time as the petition is accepted, any signer of the petition may withdraw his signature upon written application to the clerk.

If the petition is sufficient, the clerk should immediately submit it to the Borough Assembly to be placed on the ballot within 75 days of submission of the petition to the clerk. If the clerk finds that there are insufficient signatures, or that the petition is otherwise inadequate, the clerk must let the petitioners know within the ten day period for review of the petition. The petitioners are entitled to an additional ten days from the date of rejection to provide additional signatures.

If the petition is insufficient for any reason other thatn insufficient signatures, it must be rejected in its entirety. If insufficient signatures are provided within a supplemental ten day period, the petition shall also be rejected. A new recall petition cannot be filed for six months after rejection of the first petition.

The recall petition must be placed on the ballot within 75 days of submission of the petition. The question on the ballot must include:

(1) The grounds for recall as stated in the recall petition.

(2) The elected officer's response to the petition, in 200 words or less.

(3) The proposition questions: "Shall (the elected official) be recalled from the office of (office)? Yes___ No___

A majority vote on the question is required to recall an officer. Failure to recall an elected official prevents the filing of a new recall petition within six months after the election. A successful recall requires that an election be conducted for its successor at least ten but not more than 45 days after the date of the recall election, except that the election for the successor may be held at a regular election if occurring within 75 days of the recall election.

RECALL PETITION

THE PETITION FOR RECALL OF ASSEMBLYPERSON DOROTHY JONES (Rejected) Page 1 of 13

THE UNDERSIGNED VOTERS of the Matanuska-Susitna Borough Assembly District 5, currently composed of Precincts 3, 8, 15, 17, 21, and 50, seek the recall of DOROTHY JONES due to incompetency and/or failure to perform prescribed duties. Each of the undersigned states that he/she petitions for the recall of DOROTHY JONES for each of the instances of incompetency and/or failure to perform prescribed duties cited below with or without the other, and whether such instances constitutes incompetence, failure to perform assigned duties, or both: (1) Has generally failed to consult with constituents and has failed to keep citizens informed concerning the various activities of the Borough Assembly and Borough Government; (2) Has failed to inform constituents concerning the true size and scope of Borough Government and the sources of revenues for the operation of Borough Government. This was especially true during early 1981 at Borough budget meetings; (3) Has failed to inform and/or consult with constituents concerning future property tax liabilities if and when present sources of state and federal revenues should cease to be available for the operation of the Borough Government. Specifically, she failed to discuss these matters at Borough budget meetings in 1981; (4) Has failed to recognize the desires of many constituents to lead quiet, peaceful, and uncomplicated lifestyles with a minimum of government regulation, intrusion, and interference. Has sponsored and/or voted for ordinances which interfere with privacy rights and individual freedoms of citizens; and (5) Has favored and/or voted for more expensive and burdensome Borough Government despite the objections of many of her constituents. Specifically, in May 1981, she ignored a petition signed by approximately 50 of her constituents, the purpose of which was to inform the Borough Assembly that many Borough citizens were against the addition of permanent employees to the general Borough Government staff.

RECALL PETITION

THE PETITION FOR RECALL OF ASSEMBLYPERSON KATHRYN R. SCHMALL

The undersigned voters of the Matanuska-Susitna Borough Assembly District 4, currently composed of precincts 18, 19 and 35, seek the recall of Kathryn R. Schmall due to incompetence and/or misconduct. Each of the undersigned states that he/she petitions for the recall of Kathryn R. Schmall for each of the instances of incompetence and/or misconduct cited below with or without the others, and whether such instance constitutes misconduct, incompetence, or both.

A. Voting at the Assembly meeting on June 3, 1980 to dismiss the Borough Manager, constituting incompetence because (1) the vote was based upon unsubstantiated charges presented at an executive session, which charges affected the character and reputation of the Manager, without allowing the Manager an opportunity to respond to the charges or confront the witnesses against him; (2) failing to publish the topic of the Manager's dismissal on the Assembly's agenda, not allowing for appropriate input from all interested segments of the community; and (3) voting to dismiss the Manager capriciously, without making any provision for a smooth administrative transition at a critical period in the development of several major economic development projects in the Point McKenzie area, generating the likelihood of great economic loss to the Borough and its residents.

B. Voting to hold executive sessions beyond the authority granted by statutes, in derogation of the people's right to attend and observe the Assembly's deliberations.

C. Refusing to discuss Borough Assembly actions with constituents, who have a right to know.

D. Making slanderous remarks against the Borough Manager at the Wasilla Chamber of Commerce meeting of May 20, 1980.

RECEIVED
JAN 07 1983
OFFICE OF THE OMBUDSMAN

The voters of Assembly District 4 respectfully request that a recall election be held as soon as possible.

RECALL PETITION

Certified for submission to the lieutenant. 123 signatures. Evelyn Thompson Borough Clerk 5-1-80

THE PETITION FOR RECALL OF ASSEMBLYPERSON JAMES (JIM) M. HITCHCOCK

The undersigned voters of the Matanuska-Susitna Borough Assembly District 3, currently composed of precincts 10 and 30, seek the recall of James (Jim) M. Hitchcock due to incompetence and/or misconduct. Each of the undersigned states that he/she petitions for the recall of James (Jim) M. Hitchcock for each of the instances of incompetence and/or misconduct cited below with or without the others, and whether such instance constitutes misconduct, incompetence, or both.

A. Voting at the Assembly meeting on June 3, 1980 to dismiss the Borough Manager, constituting incompetence because (1) the vote was based upon unsubstantiated charges presented at an executive session, which charges affected the character and reputation of the Manager, without allowing the Manager an opportunity to respond to the charges or confront the witnesses against him; (2) failing to publish the topic of the Manager's dismissal on the Assembly's agenda, not allowing for appropriate input from all interested segments of the community; and (3) voting to dismiss the Manager capriciously, without making any provision for a smooth administrative transition at a critical period in the development of several major economic development projects in the Point McKenzie area, generating the likelihood of great economic loss to the Borough and its residents.

RECEIVED JAN 07 1983 OFFICE OF THE OMBUDSMAN

B. Being absent from an excessive number of regular and special Assembly meetings, and frequent tardiness at meetings he attended. These absences have substantially hindered the conduct of Borough business by necessitating postponements and reconsiderations of important Borough legislation to the detriment of the Borough and its residents.

The voters of Assembly District 3 respectfully request that a recall election be held as soon as possible.

Petition for recall, Upper Railbelt school board

FROM: Rodger W. Pegues
Assistant Attorney General

As you requested, we have reviewed the recall petition from REAA #14, the Upper Railbelt School District. In our opinion, the petition meets the statutory requirements, and we advise that it be accepted as sufficient in form and substance. */

By law, the grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties. AS 29.28.140. The recall petition must contain a statement of the grounds, "with particularity as to specific instances." AS 29.28.150(a)(3). **/ While certain of the recall petition's allegations are vague and do not meet the statutory requirements for particularity, the petition recites that the "aim is to correct the incompetency of the School Board," and the petition states two particular instances of alleged misconduct or incompetency: (1) the board's approving a new position of assistant superintendent, and (2) the board's approving funds for a computer. Accordingly, while far from a perfect instrument, the petition does facially meet the statutory requirements.

It is not the role of the officer charged with ascertaining the petition's sufficiency to judge the merit or truth of the grounds asserted. 60 Am. Jur.2d Public Officers and Employees § 245. "It suffices that the reasons have been stated and with sufficient particularity to inform the office holder and the electorate. The latter will determine the merit of the charges.

*/ This assumes that a check of the signatures results in a determination that the petition has been signed by the required number of qualified voters.

**/ AS 14.08.081 makes REAA school board members subject to recall under AS 29.28.130--250, except that the commissioner of education performs the municipal clerk's functions and the state Board of Education performs the functions of the assembly. All elected public officials in Alaska, except judicial officers, are subject to recall. Alaska Const., art. XI, § 8.

In preparing the recall ballot, you are required to include on it "the grounds as stated in the recall petition." AS 29.28.210(1). In our view, this should be interpreted to mean the grounds as stated with particularity so as to comply with AS 29.28.150(a)(3), which requires particularity. Therefore, the statement of grounds on the ballot should exclude the non-specific grounds and include those stated "as to specific instances."

The first statement of grounds in the petition (consistently ignored the will, etc.) may or may not meet these criteria. It is probably sufficiently particular to advise the officers and the electorate in the district. It does not give "specific instances." You should exercise your own judgment as to whether it should be included on the ballot based on your knowledge of the situation, i.e., if you believe that, under the circumstances, the statement adequately recites the alleged misconduct, you should include it on the ballot.

The second statement (created dissension, etc.) is facially inadequate. It states a broad conclusion without the slightest reference to a particular act or instance. It should not be placed on the ballot.

The third statement (new position) and the fourth statement (allocated funds for a computer) are particularized and give specific instances. They should be placed on the ballot.

The statements of grounds placed on the ballot are to be "as stated in the recall petition." AS 29.28.210(1). Following these allegations, the official's rebuttal or defense of not more than 200 words is placed. AS 29.28.010(2).

This is a proceeding without precedent in Alaska, and if you require additional assistance, please do not hesitate to request it.

Recall petition of the Upper Railbelt School Board
A.G. File No. J-66-512-77

This will confirm my oral advice to you of May 19, 1977 in response to certain questions which you raised as to whether or not the charges contained in the recall petition filed in the above-referenced matter were legally sufficient to require that a recall election be undertaken. I advised you that those charges were in fact sufficient, despite some substantial questions which you had raised as to the apparent untruth of certain of the factual allegations.

While a review of the relevant school board minutes for the Upper Railbelt School District does seem to indicate that certain of the factual allegations contained in the petitions are indeed not correct, this factor, under applicable judicial decisions dealing with the question of recall elections, is irrelevant to the question of whether or not the recall petition is legally sufficient to bring on the holding of the recall election. This point has been addressed in numerous judicial decisions throughout the United States, although it has not yet been addressed in Alaska. The decisions of those courts are virtually unanimous in their holding that the question as to whether or not the charges contained in the petition are true or false is irrelevant. According to those decisions, the only question to be decided is whether or not the charges which have been made are sufficiently specific to allege incompetence or misfeasance if they were in fact true. As recently stated by the Wisconsin Supreme Court in In re Recall of Certain Officials, 217 N.W.2d 277 (1974), "recall is political in nature and it is for the people and not the courts to decide the merits of the reasons stated in the petition."

The power of the people to recall their elected officials is established by our state constitution in Article XI, Section 8 which provides as follows:

> All elected public officials in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedures and grounds for recall shall be prescribed by the legislature.

In those states where the power of recall is constitutionally established, the courts have viewed recall as a "fundamental right" and have consistently said that statutes dealing with recall should be liberally interpreted and that any restrictions which are placed on the power of recall must be strictly construed. See, for example, Bunnen v. City of Boulder, 525 P.2d 416 (Col., 1974).

Although you and the state Board of Education may disagree with respect to the established policy behind the widespread judicial support for recall powers, and though you have substantial concerns over the truth of the factual allegations made in the petitions, neither of these areas are concerns with which either you or the Board in your respective roles in the recall procedure have any vested authority. Consequently, neither you nor the Board may determine the propriety of the policy in this area or the sufficiency of the petitions based on potential factual inaccuracies. A good general description of the judicial approach to recall can be found in State ex rel. Citizens Against Mandatory Busing v. Brooks, 492 P.2d 536 (Wash., 1972):

> This court has on numerous occasions interpreted and applied these constitutional and statutory provisions. Some basic rules may be gleaned from these prior cases. First, in determining the validity of recall charges, courts are limited to examination of the charges stated and cannot inquire into factual matters extraneous to the allegations. Second, courts must assume the truth of the charges in determining whether legally sufficient grounds for recall have been stated. Third, just as there can be no inquiry into the truth of falsity of the charges, there can be no inquiry into the motives of those filing the charges. Fourth, recall charges are sufficiently specific if they are definite enough to allow the charged official to meet them before the tribunal of the people. Finally, any one sufficient charge requires the holding of a recall election. (Citations omitted.)

Consequently, as you can see from the above, I am able to reach only one conclusion in this matter and that is that you and the State Board must proceed to hold the recall election called for under AS 14.08.081.

RWL:jf

Municipality of Anchorage

MEMORANDUM

ATTACHMENT #4

DATE: January 11, 1983

TO: Municipal Clerk

FROM: Municipal Attorney

SUBJECT: Petition for Recall of Gerry O'Connor, Assemblyman, Section 2, Seat C

ISSUE PRESENTED

Are the grounds set forth in the above referenced recall petition sufficient as a matter of law under the provisions of AS 29.28.150 to permit a submission by the Clerk to the Municipal Assembly for the purpose of calling an election pursuant to AS 29.28.200?

CONCLUSION

The above referenced petition is legally insufficient and no recall election may therefore be called. Under AS 29.28.160 - .170, the Municipal Clerk is required within 10 days of submission to examine the sufficiency of the recall petition, both as to the adequacy of signatures and for content with respect to compliance with AS 29.28.130 - .150. On the basis of the authorities and the reasoning referenced below, it is my opinion that an individual assembly member's vote on an ordinance approving the municipal budget cannot, as a matter of law, constitute misconduct in office, incompetence, or failure to perform prescribed duties under the meaning of AS 29.28.140, if that vote was in compliance with state and municipal law governing ethics and conflicts of interest and if the measure passed was in all respects a lawful action.

DISCUSSION

The necessity and sufficiency of specific grounds to support a recall petition is a matter governed by applicable constitutional or statutory provisions. For this reason, the weight given to various legal precedents from other jurisdictions depends on an examination of the specific legal framework involved. Generally, there would be no examination of the legal sufficiency of grounds where the governing statute permits removal from office for any reason or where grounds must be stated in a general manner. This is the case in many states, including, for example, Colorado, Michigan, Oklahoma and Wisconsin. In those states, it is held that recall can be based merely on a disagreement with the policies of the officeholder. A different rule applies, however, where, as in Alaska, the governing statute dictates that only certain grounds are suf-

ficient and that those grounds must be stated "with particularity" and be based on "specific instances". The rule is well stated by Antieau in his treatise on the Law of Municipal Corporations:

> Generally, courts refuse to allow recall proceedings to go forward where the grounds or charges stated in the petition do not satisfy local constitutions or legislation. Where local constitutions, statutes or charters limit the recall to malfeasance, misfeasance. nonfeasance in office or comparable grounds, it has been held that the petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Local Government Law, § 22.20.

The statute in question clearly applies to home rule municipalities. AS 29.28.130. It is equally clear that the remedy of recall is only available for certain specified reasons comparable to malfeasance, misfeasance, or nonfeasance in office:

> AS 29.28.140 Grounds. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties.

This degree of particularity coupled with the stated limitation on grounds constitutes by itself a strong implication that it is insufficient to rely merely on a disagreement with the officeholder's policies. The cited statutes would be superfluous if, as under the governing laws of some states, recall could be applied at any time to test the political strength of the legislator. This principle was well articulated by the Supreme Court of West Virginia in the case of State ex rel Perkins v. City Council of City of Parkersburg, 121 S.E. 489:

> To adopt the view of petitioner [that it is sufficient to allege mere political disagreement] would make it unnecessary for the petition to contain any real grounds. The official could be recalled as well on account of his religious beliefs or political affiliations, as for corruption or malfeasance in office; and if those who desire his removal were unsuccessful in one election the process might be continued inde-

> finitely at the expense of the taxpayers. And suppose the faction seeking power through recall of those in office should be successful and the first, second, or third attempt, then the ousted faction could then in turn employ the same in repeated trials to regain its lost prestige, and the interminable wrangell and turmoil would go on. This would result in the fostering and maintaining of political feuds to the detriment of society and the great expense of the taxpayers. 121 S.E. at 493.

Additional support for this conclusion is found in AS 29.28.160 entitled, EXAMINATION FOR SUFFICIENCY. That section requires that the Municipal Clerk review a recall petition for content as well as for signatures. Since a petition is required to contain only dated signatures with addresses and a statement of grounds, the term "content" could refer only to the statement of grounds. Any other conclusion would make the use of the term "content" superfluous. On this point, note that AS 29.28.170(a) provides for a supplemental petition if, and only if, it is rejected on the basis of insufficient signatures. The statute also provides that "if the petition is insufficient for any other reason, it shall be rejected and filed as a public record." (emphasis added). Obvious from the emphasized language, the legislature contemplated that the Clerk's duties include an examination of the petition for compliance with other requirements. This interpretation of the Clerk's authority is consistent with the Alaska Supreme Court's decision in Warren v. Boucher, 543 P.2d 731. In that case, the Court approved the Lt. Governor's determination that an initiative petition was "substantially the same" as a measure passed by the legislature and therefore barred from the ballot. The Court's approval of the Lt. Governor's authority in that case involved a statute which, like the one under analysis here, permitted the highest election officer of the jurisdiction to make certain threshold decisions on the validity of a petition. This is not an unusual position. In the case of Steadman v. Halland, 641 P.2d 448, the Supreme Court of Montana addressed the same issue; "We agree that the statement of grounds for recall to be included in the petition is 'part of the form of the petition' and find that the filing officer not only is 'empowered to' but is required to reject the petition when it does not comply with statutory requirements." (emphasis added) 641 P.2d at p. 453.

The inquiry need not be confined to the governing statute alone as there exists precedent from other states with similar statutory language.

In Jacobsen v. Nagle, 96 N.W.2d 569, the Supreme Court of Minnesota was called upon to apply constitutional and charter provisions similar to those applicable here. That court found that where recall is founded on specific grounds relating to misconduct in office, the allegations must state more than criticism of the officeholder's policies or positions.

The courts of Florida have also ruled that there must be a statement of facts charging specific misdeeds related to performance of office. In the case of Piuer v. Stallman, 198 So.2d 859, for example, the court specifically stated that the valid exercise of a legislative judgement was not grounds for recall. In another case, the court stated that "errors in judgement cannot be sufficient grounds for recall, nor can legitimate and authorized actions, no matter how unpopular they are." Taines v. Galvin, 279 So.2d 9. In Richard v. Tomlinson, 49 So.2d 798, the court held a charge did not sufficiently comply with the statutory language when it merely alleged activities that were "inimical to the best interest of the citizens".

The basis for recall in Washington, like here, is related to malfeasance, misfeasance and nonfeasance in office. The Washington Supreme Court has observed: "Misfeasance or malfeasance...have been held to be comprehensive terms that include any wrongful conduct that affects, interprets, or interferes with the performance of official duties....Additionally, we have held that 'misfeasance' means 'the improper doing of an act an officer might lawfully do; or, in other words, it is the performance of a duty in an improper manner.' Malfeasance means the commission of an unlawful act, or the doing of an act which the person ought not to do at all." Bocek v. Bayley, 505 P.2d 814; State ex rel LaMon v. Westport, 438 P.2d 200.

In addressing the petition in question relating to Assemblyman Gerry O'Connor, it is apparent that the petitioners have alleged two of the three grounds specified in AS 29.28.140, namely incompetence and a failure to perform prescribed duties. With respect to compliance with AS 29.28.150(a)(3) (which requires that the listed grounds be based on a specific instance of conduct) the petition lists only Mr. O'Connor's vote on the 1983 municipal budget. A vague reference is also made to "his other past actions" and "dereliction of duty of his representation of Eagle River and Chugiak", but these later two items are not insufficiently specific to comply with the statute and should therefore be ignored in any analysis of the sufficiency of petition.

In states where the law permits recall to be based on political grounds alone, the above referenced statement (or any statement for that matter) would be sufficient. It is, however, insufficient to support the grounds of incompetence or failure to perform prescribed duties.

Relative to removal from public office, the terms "incompetence" and "dereliction of duty" have well established meanings. 63 Am.Jur.2d, Public Officers, §§ 191-192. The petition describes one act allegedly constituting incompetence. The allegation does not meet judicially defined standards for "incompetence" as that term has been defined by the courts. "Incompetence" means "some demonstrated lack of capacity or ability to perform the professional functions of office", Vivian v. Examining Board of Architects, 213 N.W.2d 359 (Wisc. 1974), including physical handicap inability to perform official functions; Tafoya v. New Mexico State Police Board, 472 P.2d 973 (N.M. 1970), or other legal disqualification, incapacity, or fitness to discharge the required duty. It means want of physical, intellectual, or moral ability, insufficiency, inadequacy, want of legal qualifications. Appeal of School District of Bethleham, 30 A.2d 726 (Pa. Super. 1943); Hughes v. Hughes, 271 P.2d 172 (C.A. 4th 1954). The allegation in the petition falls short of claiming lack of capacity, ability, or physical, educational or mental ability to perform official functions; rather the allegation merely recites an action of the Assembly to which petitioners object. Failure to perform prescribed duties means a failure to carry out those responsibilities of the office set out in state or local law. Prescribed duties are numerous, from the obligation to attend assembly meetings unless excused to voting on matters for which one is not excused on the basis of a conflict of interest. A prescribed duty may be created by implication, as for example, when the assembly as a whole is required to perform a function. It is the implicit duty of each official who is a member to aid in the performance of that function. It is not, however, a prescribed duty of each assembly person to take every conceivable action which might make that official more informed or a more popular representative. Thus, it is not a prescribed duty to attend meetings which are not official or are sponsored by other nonmunicipal organizations. It is not a prescribed duty of an assembly person to inform all constituents of the basis of his or her political decisions, nor is it a prescribed duty to follow the popular will of ones constituency on any particular issue.

While the Alaska Supreme Court has not ruled on the precise question addressed here, at least one Superior Court Judge has

stated that under AS 29.28.130-.170, the legal sufficiency of stated grounds should be examined and that allegations of "misconduct" cannot be based on "discretionary" items, but rather must be founded on an unlawful or unethical act. White v. Baker, 3KO-80-263. The opinion stated here is also consistent with seve ıl that have been given to the Matanuska-Susitna Borough Assembly by various attorneys retained or employed by that body.

LAWS OF ALASKA

1983

Source

CSSB 85(Fin)

Chapter No.

95

AN ACT

Amending or repealing provisions related to state aid for health facilities, certificate of need, Medicaid and general relief medical assistance; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 11

UNDERLINED MATERIAL INDICATES TEXT THAT IS BEING ADDED TO THE LAW AND BRACKETED MATERIAL IN CAPITAL LETTERS INDICATES DELETIONS FROM THE LAW; COMPLETELY NEW TEXT OR MATERIAL REPEALED AND RE-ENACTED IS IDENTIFIED IN THE INTRODUCTORY LINE OF EACH BILL SECTION.

Approved by the Governor: July 25, 1983
Actual Effective Date: July 26, 1983

Chapter 95

AN ACT

Amending or repealing provisions related to state aid for health facilities, certificate of need, Medicaid and general relief medical assistance; and providing for an effective date.

---

* Section 1. AS 18.07.031 is amended to read:

Sec. 18.07.031. CERTIFICATE OF NEED REQUIRED. No person may make an expenditure of $1,000,000 or more for any of [UNDERTAKE] the following unless authorized under the terms of a certificate of need issued by the office:

(1) construction of a health care facility;

(2) alteration of the bed capacity of a health care facility; or

(3) addition or elimination of a category of health services provided by a health care facility.

* Sec. 2. FINDINGS AND DECLARATION OF POLICY. The legislature acknowledges the need to pay health facilities for services provided to beneficiaries of state programs at a level that will meet the proportionate share of the total financial requirements of the facilities that are attributable to those programs given prudent and cost-effective management and operation of such facilities. The legislature finds that, because Medicaid is a joint state and federal program and because federal Medicaid funds have been and are likely to continue to be reduced dramatically, a retrospective payment system no longer serves as an appropriate method of compensation,

not does it respond with appropriate flexibility to continued federal cutbacks. A prospective payment system is necessary to prudently address payments to health facilities under the Medicaid and general relief medical assistance programs.

* Sec. 3. AS 47.07.070 is repealed and reenacted to read:

Sec. 47.07.070. PAYMENT TO HEALTH FACILITIES. (a) The commission shall determine prospectively the rate of payment to a health facility under this chapter and AS 47.25.120 - 47.25.300 based on a fair rate for reasonable costs incurred by the facility. The commission shall by regulation list the factors it considers in making its rate determinations under this section.

(b) In determining a rate of payment to a health facility under this section, the commission shall consider the proportionate share of the facility's financial requirements for patient care for

(1) costs of current operations, including salaries and wages, purchased services, supplies, insurance, leases, depreciation, taxes, interest expense, maintenance and other health facility operating expenses; and

(2) education, research, and appropriate capital development.

(c) In determining a rate of payment to a health facility under this section, the commission may consider whether the rate of utilization of the facility has been reduced because of improvident or careless development of the facility.

* Sec. 4. AS 47.07 is amended by adding new sections to read:

Sec. 47.07.071. REPORTS BY HEALTH FACILITIES. Not later than 120 days after the end of each fiscal year of a health facility, the facility shall submit to the commission a report on the facility's financial performance during the fiscal year.

* Sec. 9. The sponsor of a hospital or health facility construction project who is receiving or entitled to receive state aid under AS 29.90 on the day preceding the effective date of this Act shall continue to receive state aid until the sponsor has received an amount which, combined with state matching money for construction of the hospital or health facility, equals 25 percent of the total project cost. Money received for construction may not be used for any other purpose.

* Sec. 10. AS 29.90 and AS 47.07.080(1) are repealed.

* Sec. 11. This Act takes effect immediately in accordance with AS 01.10.070(c).

the commission shall elect a chair from among its members.

Sec. 47.07.170. MEETINGS AND QUORUM. The commission shall meet as often as necessary to conduct its business. Three members of the commission constitute a quorum.

Sec. 47.07.180. DUTIES. The commission shall review proposed payment rates and budgets of health facilities and establish payment rates for health facilities under this chapter and AS 47.25.120 - 47.25.300.

Sec. 47.07.190. EMPLOYMENT OF PERSONNEL. The commission may employ and determine the salary of an executive director. With the approval of the commission, the executive director may select and employ additional staff. The commission shall be assisted by the officers or personnel of the department as the commissioner of health and social services shall direct. The executive director of the commission is in the exempt service under AS 39.25.

* Sec. 7. AS 47.25 is amended by adding a new section to read:

Sec. 47.25.195. PAYMENT TO HEALTH FACILITIES FOR TREATMENT OF NEEDY PERSONS. (a) The department may make payments to a health facility for the treatment of a needy person.

(b) A health facility receiving a payment under this chapter is subject to the requirements of AS 47.07.070 - 47.07.075.

(c) For purposes of this section, "health facility" includes a hospital, skilled nursing facility, intermediate care facility, intermediate care facility for the mentally retarded, rehabilitation facility, inpatient psychiatric facility, home health agency, rural health clinic, and outpatient surgical clinic.

* Sec. 8. INTERIM PROSPECTIVE PAYMENT SYSTEM. The department shall establish an interim system of prospective payments for health facilities under this Act for the period July 1, 1983, to June 30, 1984.

Sec. 47.07.072. REPORT BY THE COMMISSION. Not later than September 30 of each year, the commission shall submit to the governor a report on the prospective payments made under this chapter during the current fiscal year and an estimate of the prospective payments that will be made during the remainder of the current fiscal year and the next fiscal year. The report shall state the assumptions that are used as a basis for the estimates.

Sec. 47.07.073. UNIFORM ACCOUNTING, BUDGETING, AND FINANCIAL REPORTING. (a) The commission by regulation shall require a uniform system of accounting, budgeting, and financial reporting for health facilities receiving prospective payments under this chapter. The regulations shall provide for reporting revenues, expenses, assets, liabilities, and units of service. The commission shall specify the date the system becomes effective for each health facility.

(b) In adopting regulations under this section, the commission shall consider

(1) accounting, budgeting, and financial reporting procedures used by health facilities;

(2) variations among health facilities in the types of health care services provided by health facilities;

(3) the size and organizational structure of health facilities;

(4) the methods used by health facilities to obtain payments; and

(5) other factors the commission considers relevant.

(c) The commission may waive or modify a requirement for accounting, budgeting, or financial reporting for a health facility if waiver or modification is

(1) necessary to avoid excessive costs to the facility; and

(2) consistent with the policies of this chapter.

(d) Notwithstanding other provisions of this section, the commission may, by regulation, modify the system of accounting, budgeting, and financial reporting required under this section for a health facility having less than 25 acute care beds in order to reduce the operating costs of that facility.

Sec. 47.07.074. AUDITS AND INSPECTIONS. As a condition of obtaining payment under AS 47.07.070, a health facility shall allow

(1) the department and the commission reasonable access to the financial records of medical assistance beneficiaries; and

(2) inspection of financial records by state and federal agencies to the extent required by federal law.

Sec. 47.07.075. APPLICATION OF ADMINISTRATIVE PROCEDURE ACT. Actions of the commission under AS 47.07 and AS 47.25.120 - 47.25.300 are subject to the provisions of the Administrative Procedure Act (AS 44.62).

* Sec. 5. AS 47.07.080 is amended by adding new paragraphs to read:

(6) "commission" means the Medicaid Rate Commission;

(7) "health facility" includes a hospital, skilled nursing facility, intermediate care facility, intermediate care facility for the mentally retarded, rehabilitation facility, inpatient psychiatric facility, home health agency, rural health clinic, and outpatient surgical clinic.

* Sec. 6. AS 47.07 is amended by adding new sections to read:

ARTICLE 2. MEDICAID RATE COMMISSION.

Sec. 47.07.110. MEDICAID RATE COMMISSION ESTABLISHED. The Medicaid Rate Commission is established in the Department of Health and Social Services.

Sec. 47.07.120. COMPOSITION OF COMMISSION. The commission

consists of five members as follows:

(1) the chief executive officer of a health facility that is licensed by the state but not owned or operated by the state or federal government and that is subject to the budget review process under this chapter;

(2) the commissioner of administration, the commissioner of health and social services, or the appointed designee of either commissioner;

(3) a physician licensed to practice medicine in the state who is actively engaged in the practice of medicine and who is not employed by the state;

(4) a certified public accountant with relevant experience;

(5) a person representing consumers of health services who does not have a direct or indirect interest in an entity that provides health care services.
