Sec. 47.07.130. APPOINTMENT OF MEMBERS. Members of the commission are appointed by the governor and serve at the pleasure of the governor.

Sec. 47.07.140. TERM OF MEMBERSHIP. The term of a member of the commission appointed under AS 47.07.120(1), (3), (4), or (5) is three years. A member may not be appointed to a successive term. The terms of the members shall be staggered. A member appointed to fill a vacancy serves for the unexpired term of the member. A term shall be measured from January 1 of the year in which the term of the vacant position begins, regardless of when the vacancy is filled.

Sec. 47.07.150. COMPENSATION. A member of the commission serves without compensation but is entitled to per diem and travel expenses authorized by law for boards and commissions under AS 39.20.180.

Sec. 47.07.160. OFFICERS. At the first meeting of each year,

RE: Comparison of Municipal Revenue Sharing Entitlements
Research Request No. 81-34

The enclosed computer printout provides the comparison you requested of revenue sharing entitlements for FY 1980 and FY 1981 at funding levels of $33.5 and $51.9 million. The following information is listed:

1. Fiscal year 1980 entitlements (funding level $27,000,000).
2. Fiscal year 1981 entitlements (funding level $33,500,000).
3. Amount of entitlement increase between (1) and (2).
4. Percentage increase between (1) and (2).
5. Fiscal year 1981 entitlements (funding level $51.9 million).
6. Amount of entitlement increase between (1) and (5).
7. Percentage increase between (1) and (5).

As the comparison shows, the percentage increases in entitlements vary widely among the different municipalities. At the $51.9 million funding level, the increases in entitlements range from about 25 percent for some cities such as Barrow and Valdez up to several hundred percent for a number of other cities and boroughs.

As I mentioned at the Senate Finance Committee hearing on SB 125, the primary factor which accounts for the wide range in entitlement increases is the local tax effort or mill rate equivalent. Road, hospital and health facility entitlements affect entitlement increases to a lesser degree. The present revenue sharing program is designed to provide more funding to municipalities with higher local tax effort or tax burden. All other things being equal, such as population and road and hospital entitlements, a community with a higher local tax effort than

another will receive a larger revenue sharing entitlement. Although on the surface it appears that this relationship would induce municipalities to raise taxes in order to increase their entitlement, the ratio between tax effort and entitlements is such that local taxes would have to be increased by about ten dollars to gain one additional dollar of revenue sharing funding.

Entitlements per capita are not equal and differ substantially under the present revenue sharing program, again primarily because of differences in local tax effort. Per capita entitlements range from $21 dollars per resident for Barrow up to several hundred dollars per capita for some small villages receiving the $25,000 minimum entitlements (at the $51.9 million funding level). At this funding level, Sitka receives about $72 per capita, while Anchorage receives $100 per resident. When making these comparisons, it is important to consider the entitlements for cities within boroughs such as Fairbanks, Haines, and others that are not unified municipalities. In many cases, the entitlements for cities within boroughs are as large or larger as the borough entitlements.

I hope this information is useful. If we may be of further assistance, please let us know.

2nd Session
13th Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Fellow Legislators:

During the First Session of the Thirteenth Alaska State Legislature, the House Community and Regional Affairs Committee held extensive hearings on HB172, the Municipal Code revision. Eight amendments have received Committee approval. Some other amendments have been proposed to the Committee for consideration early in the Second Session.

HB172 has many complex issues within its scope. The House Community and Regional Affairs Interim Committee has prepared a report covering this legislation and its history. The main purpose of this report is to give a concise overview of the bill and its issues.

The previous veto by Gov. Hammond of similar legislation was brought about by the addition of many well intentioned, but problematical amendments from the Floor. The current bill, HB172, does not contain any of those amendments. Many people believe that HB172 makes major alterations to Title 29. In fact, the major revisions to Title 29 have been passed thru separate legislation in the 1st Session of the 13th Legislature. At this time, HB172 is an editing and clarifying bill to aid the municipalities of the State in accurately interpreting Title 29.

It is the Committee's desire to give each legislator adequate time to suggest any changes during the Committee process. This report features the progression of the bill and the proposals to be considered by the Committee. Any other ideas, comments and suggestions should be directed to the Community and Regional Affairs Committee as soon as conveniently possible. It is the feeling of the Interim House Community and Regional Affairs Committee Chairman that any other major amendments should be dealt with in separate legislation.

The House Community and Regional Affairs staff has devoted much time to the preparation of this report. I hope it is beneficial to you.

Sincerely,

Milo H. Fritz

Representative Milo H. Fritz, M.D.
Interim Chairman
House Community and Regional Affairs Committee

MEMORANDUM

TO: REPRESENTATIVE FRITZ and
REPRESENTATIVE MILLER, (NP)

FROM: EVE FOX
C&RA COMMITTEE STAFF

DATE: NOVEMBER 8th, 1983

RE: INTERIM DRAFT REPORT and AK MUNICIPAL LEAGUE CONVENTION

Enclosed is a complete copy, including support documents, of the House Committee on Community and Regional Affairs interim draft report. Final comments of the draft report are forthcoming from Legal Services, the Alaska Municipal League, the Department of Community and Regional Affairs, Legislators, and legislative staff. These final comments are essential in order for the above instrumentalities to draw a consensus and prepare for the issues that will be discussed by committee members during the up-coming legislative session.

In preparation for the up-coming legislative session, the Alaska Municipal League held it's 33rd annual convention here in Juneau during the week of November 2nd, with prime emphasis placed on the 1984 draft policy statement composed by the League's Legislative Committee and Directors (copy of policy statement and convention agenda enclosed).

During Monday, Tuesday, and Wednesday of the convention, I attended the finance officers meetings. These meetings covered a wide array of policy issues from the permanent fund, to bond capabilities of municipalities, to school foundation formula, to municipal assistance and/or revenue sharing, etc.. On Thursday morning I attended the Local Government Powers Policy meeting which covered several policy areas such as communities upgrading, programs that assist communities, and the question of communities opting out of being organized, etc.. During the afternoon I attended the Economic Development Policy meeting. This meeting covered numerous regional and statewide economic activities and policies therein. On Friday I attended the Capital Projects - State and Local Programs meeting where members of the Governor's capital projects mini cabinet spoke on the rules for requesting capital project funding through the Governor for FY'85, guidelines for prioritizing projects, and the prognosis for funding levels.

Numerous changes, additions, and deletions were placed on the policy draft during the meetings by designated committee members of the League and were voted upon by all attending delegates during the business meeting on November 5th (the final 1984 policy statement will be sent to you, from the League, upon it's completion sometime by November 18th).

Comments and questions for the House Committee on Community and Regional Affairs interim draft report are being received by Representative Fritz's office, House Committee on Community and Regional Affairs, 500

"L" Street, Suite 301, Anchorage, Alaska 99501, 277-9569. Your suggested changes will be reviewed and possibly incorporated into the draft report, the result being the final committee interim report. The final report will be sent to the printers and final copies sent to House C&RA committee members and the below listed persons prior to the 1984 legislative session.

IN THE SENATE BY THE JUDICIARY COMMITTEE

HOUSE CS FOR CS FOR SENATE BILL NO. 180 (Judiciary) am H

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to municipal government,

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.03 is amended by adding a new section to read:

Sec. 29.03.030. PLATTING AUTHORITY. Subject to AS 40.15.075, the Department of Natural Resources is the platting authority in the unorganized borough in the area outside all cities.

* Sec. 2. AS 29 is amended by adding a new chapter to read:

CHAPTER 04. CLASSIFICATION OF MUNICIPALITIES.

Sec. 29.04.010. HOME RULE. A home rule municipality is a municipal corporation and political subdivision. It is a city or a borough that has adopted a home rule charter, or it is a unified municipality. A home rule municipality has all legislative powers not prohibited by law or charter.

Sec. 29.04.020. GENERAL LAW. A general law municipality is a municipal corporation and political subdivision and is an unchartered borough or city. It has legislative powers conferred by law.

Sec. 29.04.030. CLASSES OF GENERAL LAW. General law municipalities are of five classes:

(1) first class boroughs;

(2) second class boroughs;

(3) third class boroughs;

(4) first class cities;

(5) second class cities.

AMENDMENT NO. 3

Sec. 29.60.140. STATE AID TO UNINCORPORATED COMMUNITIES. (a) The Department of Community and Regional Affairs shall pay an entitlement of $25,000 each fiscal year to each unincorporated community to be used for a public purpose. The Department of Community and Regional Affairs with advice from the Department of Law shall determine whether there is in each unincorporated community an incorporated nonprofit entity or a Native village council that will agree to receive and spend the entitlement. If there is more than one qualified entity in an unincorporated community, the Department of Community and Regional Affairs shall pay the money under the entitlement to the entity that the department finds most qualified to receive and spend the money. The Department of Community and Regional Affairs may not pay money under an entitlement to a Native village council unless the council waives immunity from suit for contract claims arising out of activities of the council related to the entitlement. A waiver of immunity from suit under this subsection must be on a form provided by the Department of Law. Neither this subsection nor any action taken under it enlarges or diminishes the governmental authority or jurisdiction of a Native village council. If there is no qualified incorporated nonprofit entity or Native village council in an unincorporated community that is willing to receive money under an entitlement, the entitlement for that unincorporated community may not be paid.

(b) In this section "unincorporated community" means a place in the unorganized borough that is not incorporated as a city and in which 25 or more persons reside as a social unit.

Page 86, Line 13: Delete paragraph (1) and renumber following paragraphs.

page 94, line 7. After subsection (6), insert new subsection (7):

(7) forest land as defined in AS 41.17.950(6).

page 94, line 8, insert new subsection:

(8) real property or interests in real property that are exempt from taxation under 43 U.S.C. 1620(d), as amended, as more fully provided in (k) and (l) of this section.

page 96, line 22, add new subsections:

(k) The tax exemption required by 43 U.S.C. 1620(d), as amended, shall be implemented according to the following conditions and interpretations.

(1) "developed" means a purposeful modification of the property from its original state that effectuates a condition of gainful or productive present use without further substantiation modification, surveying, construction of roads, providing utilities or other similar actions normally considered to be component parts of the development process, but which do not create the above conditions, do not constitute a developed state within the meaning of this paragraph; developed property, in order to remove the exemption, must be developed for purposes other than exploration, and be limited to the smallest practicable tract of the property actually used in the developed state;

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources,

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of exploration and development, this exemption shall continue with respect to that portion of the leased tract that is used solely for the purpose of exploration.

(l) If the property or interest in the property reverts to an undeveloped state, or if the lease is terminated, the exemption shall be reinstated, subject to the provisions of (k) of this section.

page 187, add new sections:

Sec. 83. AS 29.45.030(a)(8), (k) and (l) as enacted in sec. 11 of this Act are retroactive to December 31, 1980.

Sec. 84. AS 29.45.030(a)(8), (k) and (l) as enacted in sec. 11 of this Act and sec. 83 of this Act take effect immediately in accordance with AS 01.10.070(c).

Sec. 85. Except for AS 29.45.030(a)(8), (k) and (l) as enacted in sec. 11 of this Act, and sec. 83 of this Act, this Act takes effect July 1, 1982.

Page 187, line 17, delete sec. 83.

CITY OF BETHEL

P.O. Box 388 • Bethel, Alaska 99559

543-2297—Area Code 907

MAR 28 1983

March 10, 1983

Rep. Bette Cato
State Capitol
Pouch V.
Juneau, Alaska 99811

Dear Representative Cato:

As presented in the enclosed Resolution #398, the City of Bethel has gone on record fully supporting the adoption of legislation revising and reorganizing Title 29 of the Alaska Statutes.

A great deal of work has gone into this most important piece of legislation; but more importantly, the communities of Alaska need Title 29 revised. Not only does this piece of legislation make the municipal code more understandable, but it also grants to local governments greater flexibility in handling local problems. Bethel's difficulty in moving Home Rule status demonstrates the need for such flexibility in the municipal code statute. At the present time Bethel is a second class city. The community has considered the option of becoming a first class city and assuming the administration of the Bethel school system. However, Bethel is reluctant to do so because first class status is more restrictive than Home Rule. But Bethel is precluded from going directly to the more favorable Home Rule status under the present Title 29 provisions. The flexibility given to local governments under the proposed Title 29 revisions would save Bethel the unneeded expense and time delay now required by Title 29 to achieve its goal of Home Rule.

The City of Bethel requests your full support for the Title 29 revision now before the Legislature in the form of SB 1.

Thank you.

Sincerely,

Lyman Hoffman
City Manager

LH:skj

RESOLUTION #398

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BETHEL, ALASKA, FULLY SUPPORTING THE ADOPTION OF LEGISLATION REVISING AND REORGANIZING THE MUNICIPAL CODE AS PRESENT IN THE FORM OF SENATE BILL NO. 1.

WHEREAS, the existing Alaska Statute, Title 29, Municipal Government, has been amended numerous times; and

WHEREAS, the revision of the Municipal Government Statute was mandated in 1980 by SCR66 "Directing the Alaska Legislative Council to revise AS 29 (Municipal Government)"; and

WHEREAS, a thirteen (13) member Policy Advisory Group was appointed from the Legislature and various levels of local government to draft a revision of AS 29; and

WHEREAS, the present Senate Bill No. 1 revision represents a simplification of the title's organization and provides for maximum flexibility in the structure and functioning of local government; and

WHEREAS, several drafts and much work at numerous meetings have resulted in this revision; and

WHEREAS, communities across the State of Alaska are awaiting the adoption of this most important piece of legislation,

NOW THEREFORE BE IT RESOLVED that the City Council of Bethel, Alaska, fully supports the adoption of legislation revising and reorganizing the Municipal Code as present in the form of Senate Bill No. 1.

PASSED AND APPROVED THIS 28th DAY OF February, 1983.

John Guinn, Mayor

ATTEST:

Wayne J. Maiers, City Clerk

LAWS OF ALASKA

1983

Chapter No.: 63

AN ACT

Relating to the budget of the state and bills related to the budget and merging the division of budget and management, the division of policy development and planning and the latter's office of coastal management into one office; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 13

UNDERLINED MATERIAL INDICATES TEXT THAT IS BEING ADDED TO THE LAW AND BRACKETED MATERIAL IN CAPITAL LETTERS INDICATES DELETIONS FROM THE LAW; COMPLETELY NEW TEXT OR MATERIAL REPEALED AND RE-ENACTED IS IDENTIFIED IN THE INTRODUCTORY LINE OF EACH BILL SECTION.

Approved by the Governor: July 14, 1983
Actual Effective Date: Sections 1 - 13, 15 - 26 and AS 37.07.120(7), added by Section 14, take effect July 15, 1983; and AS 37.07.120(8), added by Section 14, takes effect January 1, 1984

AN ACT

Relating to the budget of the state and bills related to the budget and merging the division of budget and management, the division of policy development and planning, and the latter's office of coastal management into one office; and providing for an effective date.

* Section 1. PURPOSE AND INTENT. (a) It is the purpose of this Act, in the best interests of efficient administration and state planning, to merge the division of budget and management, the division of policy development and planning, and the latter's office of coastal management, including both capital and operating expenditures, into one office.

(b) It is the intent of the legislature that the powers conferred by this Act be exercised by the executive branch and its agencies, divisions, and departments in cooperation with the legislature and its committees.

* Sec. 2. AS 24.20.231(4) is amended to read:

(4) cooperate with the office of management and budget [DIVISION OF BUDGET AND MANAGEMENT] in establishing a comprehensive system for state budgeting and financial management as set out in the Executive Budget Act (AS 37.07);

* Sec. 3. AS 24.30.035 is amended to read:

Sec. 24.30.035. FISCAL NOTES ON BILLS. (a) Before a bill or resolution, except an appropriation bill, is reported from the committee of first referral, there shall be attached to the bill a fiscal

note containing an estimate of the amount of the appropriation increase or decrease which would result from enactment of the bill for the current [ENSUING] fiscal year and five [AT LEAST TWO] succeeding fiscal years or, if the bill has no fiscal impact, a statement to that effect shall be attached. The fiscal note or statement shall be prepared in conformity with the requirements of this section by the department or departments affected and may be reviewed by the office of management and budget. The fiscal note or statement shall be delivered to the committee requesting it within five days of the request or within two days if the request is made after the 90th day of a regular session, or during a special session of the legislature. If the bill is presented by the governor for introduction in accordance with AS 24.30.060(b) and the uniform rules of the legislature, the fiscal note or statement shall be attached to the bill before the bill is introduced. An amendment or a substitute bill proposed by a committee of referral that changes the fiscal impact of a bill shall be explained in a revised fiscal note or statement attached to the bill.

* Sec. 4. AS 24.30.035 is amended by adding new subsections to read:

(b) In addition to the fiscal note required by this section, the sponsor of a bill or resolution may prepare a fiscal note in conformity with the requirements of this section and submit it to the committee of first referral or the finance committee. A committee may prepare an additional fiscal note in conformity with the requirements of this section.

(c) A fiscal note for a bill or resolution must contain the following information:

(1) the fiscal impact on existing programs;

(2) the fiscal impact of new programs or activities;

(3) a line item detail of the fiscal impact;

(4) the source of funds expected to be utilized by general fund source, federal fund source, or other identified source;

(5) the number of new positions which may be required, identified as full-time, part-time, or temporary;

(6) an analysis of how the figures in the fiscal note were derived;

(7) additional information necessary to explain the fiscal note;

(8) a fiscal impact projection for the current fiscal year and for the succeeding five fiscal years; and

(9) formal information consisting of

(A) the bill or resolution number,

(B) the name of the prime sponsors,

(C) the date the fiscal note was prepared,

(D) the name of the committee requesting the fiscal note,

(E) the name and phone number of the person who prepared the fiscal note, and

(F) the budget request unit, program, or subprogram affected.

(d) The original of a fiscal note shall be submitted to the Division of Legislative Finance and copies shall be sent to the prime sponsor, the committee requesting the fiscal note, and the office of management and budget.

* Sec. 5. AS 37.07.040 is amended to read:

Sec. 37.07.040. OFFICE OF MANAGEMENT AND BUDGET [DIVISION OF BUDGET AND MANAGEMENT]. The Alaska office of management and budget [BUDGET AND MANAGEMENT DIVISION] shall

(1) assist the governor in the preparation and explanation of the proposed comprehensive program and financial plan, including the coordination and analysis of state agency goals and objectives, plans, and budget requests;

(2) prepare for submission to the governor an annually updated six-year capital improvements program and the proposed capital improvements budget for the coming fiscal year, the latter to include individual project justification with documentation of estimated project cost;

(3) develop procedures to produce the information needed for effective policy decision making, including procedures to provide for the dissemination of information about plans, programs, and budget requests to be included in the annual budget and opportunity for public review and comment during the period of budget preparation;

(4) assist state agencies in their statement of goals and objectives, preparation of plans, budget requests, and reporting of program performance; all documents forwarded by the office [DIVISION] to a state agency containing instructions for the preparation of program plans and budget requests and the reporting of program performance are public information after the date they are forwarded;

(5) administer its responsibilities under the program execution provisions of this chapter so that the policy decisions and budget determinations of the governor and the legislature are implemented;

(6) provide the legislative finance division with the budget information it may request;

(7) provide the legislative finance division with an advance copy of the governor's budget workbooks by the first Monday in January of each year, except that following a gubernatorial election

year the advance copy shall be provided by the second Monday in January.

* Sec. 6. AS 37.07.040 is amended by adding a new paragraph to read:

(8) prepare the proposed capital improvements budget for the coming fiscal year evaluating both state and local requests from the standpoint of need, equity, and priorities of the jurisdiction; other factors such as project amounts, population, local financial match, federal funds being used for local match, municipality or unincorporated community acceptance of the facility and all associated costs of the facility may be considered.

* Sec. 7. AS 37.07.070(1) is amended to read:

(1) Requests by the governor for supplemental appropriations for state agency operating and capital budgets for the current fiscal year may be introduced by the rules committee only through the 30th [45TH] legislative day.

* Sec. 8. AS 37.07.070(2) is amended to read:

(2) Requests by the governor for budget amendments to state agency budgets for the budget fiscal year may be received and reviewed by the finance committees only through the 60th [75TH] legislative day.

* Sec. 9. AS 37.07.080(b) is amended to read:

(b) Each state agency shall prepare an annual plan for the operation of each of its assigned programs except for programs that are exempted from this requirement by the office [DIVISION]. The operations plan shall be prepared in the form and content and be transmitted on the date prescribed by the office [DIVISION].

* Sec. 10. AS 37.07.080(c) is amended to read:

(c) The office [DIVISION] shall

(1) review each operations plan to determine that it is

consistent with the policy decisions of the governor and appropriations by the legislature, that it reflects proper planning and efficient management methods, that appropriations have been made for the planned purpose and will not be exhausted before the end of the fiscal year;

(2) approve the operations plan if satisfied that it meets the requirements under (1) of this subsection; otherwise, the office [DIVISION] shall require revision of the operations plan in whole or in part. [;

(3) REPEALED.]

* Sec. 11. AS 37.07.080(e) is amended to read:

(e) Transfers or changes between objects of expenditures or between allocations may be made by the head of a state agency upon approval of the office [DIVISION]. No transfers may be made between appropriations except as provided in an act making the transfers between appropriations.

* Sec. 12. AS 37.07.080(f) is amended to read:

(f) The office [DIVISION] shall report quarterly to the governor and the legislature on the operations of each state agency, relating actual accomplishments to those planned and modifying, if necessary, the operations plan of any agency for the balance of the fiscal year.

* Sec. 13. AS 37.07.100 is amended to read:

Sec. 37.07.100. PROPOSED SUPPLEMENTAL OR SPECIAL [DEFICIENCY] APPROPRIATIONS. The governor from time to time may transmit to the legislature proposed supplemental or special [DEFICIENCY] appropriations in accordance with AS 37.07.070 which in the governor's [HIS] judgment are necessary [ON ACCOUNT OF LAWS ENACTED AFTER THE TRANSMISSION OF THE BUDGET, OR ARE OTHERWISE IN THE PUBLIC INTEREST]. However, if the governor finds that an emergency situation

necessitates the proposal of supplemental or special appropriations, the governor may transmit them to the legislature at any time. The governor [HE] shall accompany each proposal with a statement of the reasons for it, including the reasons for its omission from the budget.

* Sec. 14. AS 37.07.120 is amended by adding new paragraphs to read:

(7) "office" means the Alaska office of management and budget established in the Office of the Governor by AS 44.19.141;

(8) "capital projects" and "capital improvements" mean an allocation or appropriation item for an asset with an anticipated life exceeding one year and a cost exceeding $25,000 and include land acquisition, construction, structural improvement, engineering and design for the project, and equipment and repair costs.

* Sec. 15. AS 44.19.141 is amended to read:

ARTICLE 12. OFFICE OF MANAGEMENT AND BUDGET [DIVISION OF POLICY DEVELOPMENT AND PLANNING].

Sec. 44.19.141. ALASKA OFFICE OF MANAGEMENT AND BUDGET [DIVISION OF POLICY DEVELOPMENT AND PLANNING]. There is in the Office of the Governor the Alaska office of management and budget [DIVISION OF POLICY DEVELOPMENT AND PLANNING].

* Sec. 16. AS 44.19.142 is amended to read:

Sec. 44.19.142. DIRECTOR. The office of management and budget [DIVISION OF POLICY DEVELOPMENT AND PLANNING] is administered by a director who is appointed by, and serves at the pleasure of, the governor.

* Sec. 17. AS 44.19.143 is amended to read:

Sec. 44.19.143. PERSONNEL. The director shall employ such personnel as may be necessary to carry out the provisions of AS 44.19.-141 - 44.19.152 and the relevant provisions of AS 37.07.

* Sec. 18. AS 44.19.144(a) is amended to read:

(a) The director shall

(1) supervise and administer the activities of the office [DIVISION];

(2) advise the governor on matters of comprehensive state planning;

(3) make an annual report to the governor of the activities of the office [DIVISION].

* Sec. 19. AS 44.19.144(b)(3) is amended to read:

(3) on behalf of the state, accept and expend any gifts or grants made to the state with the approval of the governor where such gifts or grants were made for the purposes of furthering the objectives of the office [DIVISION].

* Sec. 20. AS 44.19.145 is amended to read:

Sec. 44.19.145. FUNCTIONS AND DUTIES OF THE OFFICE [DIVISION]. (a) The office [DIVISION] shall

(1) provide technical assistance to the governor and the legislature in identifying long range goals and objectives for the state and its political subdivisions;

(2) prepare and maintain a state comprehensive development plan;

(3) provide information and assistance to state agencies to aid in governmental coordination and unity in the preparation of agency plans and programs;

(4) review planning within state government as may be necessary for receipt of federal, state or other funds;

[(5) REPEALED.]

(5) [(6)] participate with other countries, provinces, states or subdivisions of them [THEREOF] in international or

interstate planning, and assist Alaska's local governments, governmental conferences and councils, in planning and coordinating their activities;

[(7) REPEALED.]

(6) [(8)] encourage educational and research programs that further state planning and development, and provide administrative and technical services for them;

(7) [(9)] publish such statistical information or other documentary material as will further the provisions and intent of AS 44.19.141 - 44.19.152;

(8) [(10)] assist the governor and the Department of Community and Regional Affairs in coordinating the activities of state agencies which have an impact on the solution of local and regional development problems;

(9) [(11)] serve as a clearinghouse for information, data, and other materials which may be helpful or necessary to federal, state or local governmental agencies in discharging their respective responsibilities or in obtaining federal or state financial or technical assistance;

(10) [(12)] review all proposals for the location of capital improvements by any state agency and advise and make recommendations concerning location of these capital improvements;

(11) render, on behalf of the state, all federal consistency determinations and certifications authorized by sec. 307 of the Coastal Zone Management Act of 1972, as amended, 16 U.S.C. sec. 1456, and a conclusive state consistency determination when a project requires two or more state or federal permits, leases, or authorizations.

(b) The office [DIVISION] shall, in carrying out its functions, consult with local, regional, state and federal officials, private

groups and individuals, and with officials[,] of other countries, provinces and states, and may hold public hearings to obtain information for the purpose of carrying out the provisions of AS 44.19.141 - 44.19.152.

(c) The governor may establish coordinating or advisory planning groups.

(d) The office [DIVISION] shall

(1) coordinate its services and activities with those of other state departments and agencies to the fullest extent possible to avoid duplication;

(2) prepare an integrated annual report on the long-range development program of the state and submit it to the governor for incorporation into the governor's [HIS] report to the legislature;

(3) cooperate with the University of Alaska and other appropriate public and private institutions in research and investigations.

* Sec. 21. AS 44.19.152 is amended to read:

Sec. 44.19.152. DEFINITIONS. In AS 44.19.141 - 44.19.152,

[(1) "DIVISION" MEANS THE DIVISION OF POLICY DEVELOPMENT AND PLANNING;]

(1) [(2)] "director" means the director of the office of management and budget; [DIVISION OF POLICY DEVELOPMENT AND PLANNING]

(2) "office" means the Alaska office of management and budget.

* Sec. 22. AS 44.19.155(a)(2)(A) is amended to read:

(A) the director of the office of management and budget [DIVISION OF POLICY DEVELOPMENT AND PLANNING];

* Sec. 23. AS 44.19.155(d) is amended to read:

(d) Each member of the council shall select one person to serve

as a permanent alternate at meetings of the council. If a member of the council is unable to attend, the member [HE] shall advise the alternate who may attend and act in the place of the member. The alternate for a public member appointed after July 9, 1978 under (a)(1) of this section shall, at the time of the alternate's [HIS] designation and throughout the period of [HIS] service as a permanent alternate, be the mayor or member of the assembly or council of a municipality within the region from which the permanent member is appointed. The alternate for the director of the office of management and budget, serving under (a)(2)(A) of this section, shall be the director's designee within that office. The alternate for a designated member serving under (a)(2)(B) - (G) of this section shall be a deputy commissioner of the department or the director of a division in the department. The names of alternates shall be filed with the council.

* Sec. 24. AS 44.19.162 is amended to read:

Sec. 44.19.162. COUNCIL STAFF. The council shall use [UTILIZE] the staff of the office of coastal management within the office of management and budget [DIVISION OF POLICY DEVELOPMENT AND PLANNING] in discharging its powers and duties. The coordinator of the office of coastal management, under the direction of the council co-chair who is selected from among the members designated in AS 44.19.155(a)(2), [, WITH THE CONCURRENCE OF THE COUNCIL], may contract with or employ personnel or consultants the coordinator [HE] considers necessary to carry out the powers and duties of the council.

* Sec. 25. AS 44.83.030(2) is amended to read:

(2) the director of the office of [DIVISION OF BUDGET AND] management and budget, or the director's designee within that office, and three commissioners of principal executive departments appointed

by the governor.

* Sec. 26. AS 37.07.120(2) is repealed.

* Sec. 27. TRANSITION. All litigation, hearings, investigations and other proceedings pending under a law amended or repealed by this Act, or in connection with functions transferred by this Act, continue in effect and may be continued and completed notwithstanding a transfer or amendment or repeal provided for in this Act. Certificates, orders, and regulations issued or adopted under authority of a law amended or repealed by this Act remain in effect for the term issued, or until revoked, vacated, or otherwise modified under the provisions of this Act. All contracts, rights, liabilities, and obligations created by or under a law amended or repealed by this Act, and in effect on the effective date of this Act, remain in effect notwithstanding this Act's taking effect. Records, equipment, and other property of agencies of the state whose functions are transferred under this Act shall be transferred commensurate with the provisions of this Act.

* Sec. 28. NAME CHANGE. To be consistent with the changes made by this Act, wherever in the Alaska Statutes and in regulations adopted under those statutes "division of budget and management" and "division of policy development and planning," and other terms identifying those divisions, are used, they must be read as referring to the office of management and budget. Similarly, references to the directors of those divisions must be read as references to the director of the office of management and budget. Under AS 01.05.031, the revisor of statutes shall implement this section in the statutes, and, under AS 44.62.125(b)(6), the regulations attorney shall implement this section in the administrative regulations.

* Sec. 29. AS 37.07.120(8), added by sec. 14 of this Act, takes effect January 1, 1984.

* Sec. 30. AS 37.07.120(7), added by sec. 14 of this Act, and secs. 1 - 13 and 15 - 26 of this Act take effect immediately in accordance with AS 01.10.070(c).

Proposed Amendment.

~~Sec 29.91.050 Populatio~~

In order to make this legislation consistent with previous legislation pertaining to population determination passed by this committee, the following ~~Amend~~ changes to HB 312 is proposed.

~~Sec~~. page 7, line 21

~~Sec. 29.91.050 Population determination.~~

Sec. 29.91.050 POPULATION DETERMINATION. (a) For purposes of this chapter, population shall be determined by the latest figures of the United ~~States~~ Bureau of the Census or by another method of determining the actual population based on current criteria of the United States Bureau of the Census that is equally reliable.

(b.) The population of an area for which a population determination is made under this section includes all persons who usually reside within the area and the population of any military reservation that is a part of the area. A person may not be included in the population of more than one area for which a population determination is made under this section.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

July 15, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mr. President:

Under Article II, Sec. 15, of the Alaska Constitution, I have vetoed HCS CSSB 180(Jud) am H, relating to municipal government.

I regret having to take this action for several reasons. Certainly, the bill contains many meritorious revisions and improvements to the municipal code. These were the product of an arduous undertaking accomplished after three years of unprecedented cooperation among legislators, state and local government officials and staff. Further, there are some concepts contained within questionably designed and inadequately considered amendments which I believe should be addressed responsibly by the next Legislature. While perhaps none of these amendments is individually sufficiently flawed to warrant a veto of the entire measure, a combination of them creates significant problems that have incurred greater collective public opposition than has almost any other legislative action in my entire political experience. It's for these reasons that I have regretfully concluded that it is simply not in the best public interest to permit this bill to become law.

For example, the amendment redefining "population" and permitting the counting of workers at "isolated job sites" appropriately recognizes that the influx of seasonal employees can significantly impact local services for which there is now no readjustment provided under revenue sharing statutes. However, I am advised by counsel that the manner in which this matter is handled in SB 180 seriously jeopardizes the resolution reached by the state with the U.S. Census Bureau and could incur substantial losses in federal funding to both state and local governments. While I believe some redistribution of state funds is warranted to assist communities most impacted by seasonal and temporary influxes of population, (whether they be "isolated" communities or otherwise), I am concerned with the potential

inequity created by this amendment. The vagueness of the term "isolated job site," I am advised, could result in endless litigation no matter what clarifying efforts might be made through regulation. This questionable feature, coupled with prospective revenue losses to the state treasury ascribed to it by the Department of Revenue in their request for veto, are but two of several causes for concern.

I as well favor the basic policy decision of the Legislature that forest values above ground, (just as mineral values beneath it), should be accorded different status for purposes of municipal taxation. However, the provision exempting forest lands from municipal property taxation contains a definition by reference that poses substantial problems of interpretation and impact according to all concerned state agencies. I am advised by the Department of Law, for example, that the definition problem alone would probably induce costly and unnecessary litigation.

Perhaps more importantly, bond counsel advises that the bill would gravely impede local government general obligation bond programs in progress and significantly harm the credit ratings of virtually all Alaska communities. This feature is perhaps the most damaging potentially of all the questionable features contained in SB 180 and, in the view of most financial consultants, would alone warrant veto. I am certainly in no position to second guess and override them in this conclusion. They assert the resulting adverse effect of this feature is likely to be a decline in market value of outstanding issues and an increase in the costs for new financing. Potential impact on the state's bond bank is, of course, of equal concern.

Additionally, the Department of Natural Resources has expressed major concerns over the manner in which this amendment might apply, despite their agreement with the avowed basic philosophical intent of the amendment's sponsors. They point to the Oregon forest value taxing policies as a far preferable approach to meet that objective. Accordingly, I have directed that legislation be drafted which would more appropriately address this matter.

Another problem rests in the attempt to clarify statutory references regarding tax exemptions of undeveloped Alaska Native Claims Settlement Act lands. Agencies have raised unanswered questions as to whether the language is indeed clarified. Moreover, a retroactivity feature of this provision casts serious "public purpose" doubts upon the legality of the proposed solution.

The amendment prohibiting local governments from passing ordinances relating to firearms has been violently objected to by some law enforcement people. It causes me concern as well because of my reluctance to permit state government to impede the ability of local communities to govern in a manner deemed by themselves most responsive to their unique needs.

Objected to by many others requesting veto is the further intrusion into the conduct of local government business represented by amendment 13. This would expand the initiative and referendum process to include local administrative matters. Those requesting veto assert that actions of the governing body elected by the public should be subject of initiative and referendum; but that ongoing daily administrative matters should be subjected to the usual review and oversight inherent in the concept of a governing body of elected officials held accountable for actions of those whom they employ. For state government to impose its will in such matters upon local governments without far more public debate than was accorded this amendment, appears to me to be yet another undue incursion of "Big Brother" into local matters.

Another section affects a major change in public utility regulatory philosophy, and reverses the direction chosen with deregulation in 1980. In urging veto a multitude of agencies and utilities pled for further public hearings and agency consideration before so drastic a change be contemplated. Again, if this alone were the measure's greatest flaw, I perhaps would not have vetoed it. However, in conjunction with a multitude of other alleged defects and public confidence eroding features, it adds one more reason for my action.

A final problem is one related to language, not concept. This provision allows municipalities to use the group insurance concept for the purpose of pooling their workers compensation liabilities and claims handling. The language appears to mandate board adoption of regulations permitting a municipal employer group to recede under any circumstances. It seems only prudent that qualifications be stipulated so that municipalities requesting approval for group self insurance status are subject to the same regulatory criteria as any other self-insured employer.

The subject legislation has produced more controversy and debate than any other to emerge from the 12th Legislature. Because I find some issues addressed in the amendments, as well as the municipal code revisions, to be desirable, I am taking specific steps to encourage the 13th Legislature to address these issues. Accordingly, I have directed that

legislation be drafted which would accomplish the municipal code revisions effective prior to the floor amendments. This would address the problem areas in a manner both acceptable to me and, I believe, to most legislators.

I have also directed that legislation be prepared to address the forest lands and taxation issues in a more acceptable manner to accommodate the appropriate intent of these amendments' sponsors.

I have also directed legislation be prepared to address the workers compensation provisions allowing local governments to use the group self-insurance concept for the purpose of pooling their workers compensation liabilities and claim handling.

Further, I'm directing the Department of Community and Regional Affairs to draft regulations on the provision of state assistance to local governments in a manner which compensates more equitably those communities impacted by seasonal, temporary and isolated workers. Minimally, I would hope that in the short term we could at least "hold harmless" the North Slope Borough, which otherwise stands to lose about $2 million in revenues from the amount they received last year. All other municipalities would receive, I'm told, increases. Accordingly, I would hope that all other municipalities, which rose in violent protest over the prospects of revenue losses to themselves were SB 180 to become law, would be equally concerned about revenue losses incurred by other municipalities through this measure's veto.

I do not intend to submit legislation re-regulating public utilities at the municipal level unless some valid arguments can be presented for this change.

The legislative package presented to the 13th Legislature will, of course, be that of the future governor. Therefore, I cannot guarantee that all these proposals will come before the House and Senate. However, several key legislators who are likely to return assure me of their dedication toward address of these matters.

Despite the bill's problems, I was at first inclined to go along with policy decisions rendered by the Legislature in their passage of 180. After all, by so doing I could assure these issues would be addressed next session if as serious as opponents were contending. However, a growing crescendo of public opposition, virtually unanimous staff and agency veto recommendations, plus pleas from some legislators who now wish to do penance for having voted for the measure, cause me to conclude that while a veto does a disservice to

the legitimate concerns of some communities and interests, permitting the bill to become law could incur even more disservice to all others. Finally, as one of two senators who will assuredly return next session, let me urge you, Mr. President, to place this crucial issue high upon your agenda.

Sincerely,

Jay S. Hammond

RE: HOUSE BILL 172, AMENDMENT #9 (UTILITIES)

The following language has been proposed by Lee Sharp as compromise language between that contained in HB 172 and the changes requested by the utility representatives.

The compromise is primarily in allowing for the Alaska Public Utilities Commission to rule that a municipality should not regulate a utility because of no legitimate public interest in regulation. This appears to be a mid-point position between the two extreme positions of whether a municipality may, or a municipality may not, regulate a utility not regulated by A.P.U.C.

The utility representatives request to cross reference the overiding authority of A.P.U.C. and AS 42.05 has been deleted.

The request of the utility representatives to specifically limit the extension of a municipal utilities service to areas adjacent to the municipal boundaries have been deleted.

Page 77, line 7-22 delete section 29.35.070 and insert:
AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).

(b) A municipality may not regulate a utility

(1) to the extent it is subject to regulation under AS 42.05; or
(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711 (d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711 (e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

FILE: HB 172

SUBJECT: Substitute Utility Language
for Title 29 Revision

Dear Bob:

If the House Community and Regional Affairs Committee would like to consider alternative language to that which has been proposed for the utilities section of the Title 29 revision, may I suggest the following. This language, I believe, accommodates the interests of the municipalities and of the utilities. It would exempt from municipal regulation those utilities, including co-ops, which have elected to exempt themselves from APUC regulation by a vote of the subscribers or members. It would also exempt from municipal regulation those small electric, telephone and garbage utilities which are presently exempt from APUC regulation but which may come under APUC regulation if 25% of the subscribers petition the commission for regulation. In addition, it would exempt from municipal regulation those utilities which the APUC itself exempts upon a finding of no legitimate public interest in regulation if the commission also finds that the utility should also be exempt from municipal regulation. If cable TV is given an exemption from APUC regulation, and the legislature believes that it should also be exempt from municipal regulation, a simple amendment to the following language making reference to the statute exempting cable TV would extend the exemption to municipal regulation of cable TV also. The substitute language would be as follows:

AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).

(b) A municipality may not regulate a utility

(1) to the extent it is subject to regulation under AS 42.05; or

(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

Conversation with Doug Griffin re: FN HB 172 - February 18

dThe fiscal note which is presently in the packets is outdated in form but not in content and does not contain the department assumptions which Doug Griffin should be bringing to meeting today.

The increase and the money is due to an increase in organizational grants.

New boroughs will go from 25.0 to 600.0 over three years and it is assumed that there will not be a new borough formation in the first two years.

2nd class to 1st class will go from 25.0 to 75.0 and this is paid out over 2 year period. Assumption that in the first year there will be 2 city incorporations for 100.0 and in the 2nd year, 1 city will incorporate for 50.0 and the two from the first year will get the 100.0.

The big jump from 25.0 - 600.0 is as an incentive to new borough formation.

All the money comes under the grants.

MEMORANDUM March 3, 1983

SUBJECT: Impact of land use regulation on development of energy resources (Work Order No. 13-0881)

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel TBC

You have asked whether the changes in HB 172 to the provisions dealing with land use regulation discourage development of energy resources as compared to existing laws that authorize land use regulation by municipalities.

Under AS 29.33.090, a municipality is required to regulate the use of land in accordance with a comprehensive plan through zoning by districts. The zoning regulations must be uniform for each type of building or area within a particular district, but the regulations may differ between the various districts. In addition, a municipality is authorized to rezone property to a less restricted use if the owner of the property agrees to place restrictions on the use of the land beyond those restrictions imposed under the general zoning requirements. Subsection (b) of that section contains a list of the types of restrictions that may be imposed through zoning. While paragraphs (2) - (6) deal with very specific restrictions relating to buildings, paragraph (1) grants broad authority to restrict "land use". It should be noted that the list is by way of example of various zoning restrictions and does not limit the types of restrictions that a municipality may impose through zoning. However, under this section a municipality is authorized to regulate land use only through zoning and may not use other land use techniques.

In contrast to existing law, under sec. 29.40.040 of HB 172, a municipality may implement the comprehensive plan through zoning, land use permit requirements, or any other method of

land use regulation. To the extent that greater flexibility is authorized in the implementation of a comprehensive plan, HB 172 makes it more practical for a municipality to adopt measures that may have the effect of discouraging the development of energy resources. Nevertheless, under both HB 172 and under existing law a municipality has the general authority to regulate land use regardless of whether this regulation places burdens on the development of energy resources and thereby discourages that development. In addition, the change in HB 172 that allows municipalities to use other techniques in addition to zoning impacts only general law municipalities, since under existing law home rule municipalities are not limited to the use of zoning in regulating land use.

In considering whether the changes in HB 172 may discourage development of energy resources it is necessary to determine whether the power to regulate land use has been significantly expanded under this bill with respect to each class of municipality. Under secs. 29.10.200(32), 29.35.180(b), 29.35.250(c), and 29.35.260(c) of HB 172, a home rule borough and home rule city in the organized borough or in the third class borough must provide for land use regulation, but a home rule municipality is not bound by the general provisions dealing with land use regulation set out in Title 29. Under existing law, although some provisions appear contradictory, most home rule municipalities are not required to provide land use regulation, nor are they restricted from providing land use regulation. A home rule municipality that does regulate land is not required to comply with provisions contained in Title 29 dealing with land use regulation except for provisions dealing with zoning and platting of state land (AS 29.13.100(37) and (39)). The general requirement that boroughs provide for planning, platting and zoning contained in AS 29.33.070 is not a home rule limitation. Under AS 29.43.040 home rule cities in third class boroughs and outside boroughs are required to provide for planning, platting and zoning ". . . as provided for boroughs". This is a home rule limitation under AS 29.13.100(12). Since, under AS 29.43.010, powers incorporated by reference to laws governing boroughs apply to home rule cities outside boroughs only if applicable to home rule boroughs and home rule boroughs are not required to provide for planning, platting and zoning, the net result is that only home rule cities in third class boroughs are required to provide land use regulation.

In summary, under HB 172, home rule boroughs and home rule cities in the third class borough or in the unorganized borough must provide land use regulation, but need not comply with provisions dealing with land use regulation contained in Title 29. Under existing law, only home rule cities in the third class borough are required to provide land use regulation, but home rule boroughs and home rule cities in the unorganized borough are not prohibited from providing land use regulation. No home rule municipality must comply with provisions contained in Title 29 dealing with land use regulation, with the minor exception of the provisions dealing with state land. The changes in HB 172 do not appear to confer broader authority upon home rule municipalities than they now have in the area of land use regulation, and consequently should not present any special discouragement to the development of energy resources in nome rule municipalities.

HB 172 does not appear to expand the authority of the various classes of general law municipalities to provide land use regulation. As in existing law, these must comply with specific provisions regarding land use regulation contained in Title 29. Under AS 29.33.070, first and second class boroughs must provide for planning, platting and zoning. Under secs. 29.35.180(a) and 29..40.010 of HB 172 first and second class boroughs must provide for land use regulation. AS 29.41.010(b) allows third class boroughs to exercise the power of planning, platting and zoning in service areas. Secs. 29.35.220 and 29.35.300(b) of HB 172 provide for exercise of the power of land use regulation by third class boroughs in service areas. AS 29.43.040 authorizes first class cities and second class cities in the unorganized borough or in the third class borough to provide for planning, platting and zoning. Secs. 29.35.250 and 29.35.260 of HB 172 grant the same authority to regulate land use to these cities. HB 172 does not grant the power to regulate land use to any general law municipality that does not have that power under existing law, so, in that respect, does not present additional impediments to development of energy resources.

line 8 file

Page 107 - lines 22-26 - This reads as if the record owner should provide a copy to the Assessor. See AS 29.53.100(b) as now written.

Page 186 - line 1 - should be record.

Page 50 - line 29 - This is from present statute. As deeds are not acceptable for recordation unless fully acknowledged, perhaps this should be deleted. Perhaps this is a carryover from when deeds were witnessed.?????

MEMORANDUM

Re: Proposed Municipal Code Revisions;
Planning, Platting and Zoning Authority
of Local Governments

A. SUMMARY.

There are no significant differences between SB 180 as it passed the House and the October 1982 redraft with regards to the planning, platting and zoning authority of municipal governments. As with Senate Bill 180, the October 1982 redraft would greatly expand the land use planning authority of municipalities. The use or misuse of this authority could lead to arbitrary or unreasonable exclusion or restriction of natural resource development, particularly on state or fee lands.

Amendatory language to limit this authority may be proposed to either Title 29 or Title 38.

B. HISTORY OF SB 180

As the culmination of approximately 3 years of work by a special joint committee, Senate Bill 180, which completely rewrote the municipal code of Title 29, was adopted by the House on May 26, 1982. The Governor vetoed the bill on July 15, 1982. The veto message issued by the Governor (published in the Senate Journal on July 22, 1982

at 1788-1792 (copy attached)) set forth seven reasons for the veto, none of which relate to the land use planning chapter of the bill.

Bills vetoed after the adjournment after the last regular session of the legislature can be reconsidered only in a special session of that same legislature. Alaska Constitution Art. II, Sec. 16; AS 24.30.100. Therefore, Senate Bill 180 cannot now be reconsidered and is dead. In October of 1982, the Department of Community and Regional Affairs produced a rewrite of Senate Bill 180. The redraft is substantially the same as the bill which passed the legislature, but several of the last minute house amendments have been deleted, apparently in response to the Governor's veto message.

With regard to the planning, platting and zoning authority of municipalities, there are only three differences between the October 1982 redraft and SB 180 as it passed the legislature, all of which are minor. They are as follows:

1. On page 87, lines 9 and 14, the word "comprehensive" has been added to clarify the term "planned" as used in those sections.

2. On page 89, line 27, subpart 1 of AS 29.40.090(a) has been reinstated, after elimination by a house amendment to SB 180. This subpart requires that the abbreviated plat procedure apply only to subdivisions

containing four lots or less.

3. On page 89 at line 2, the October 1982 redraft has deleted a sentence at the end of AS 29.40.060(b) as it appeared in SB 180 which read as follows: "A proceeding under this section has preference over all other civil actions and proceedings."

C. THE PROBLEM.

The bill provides virtually unlimited planning, platting and zoning powers to home rule municipalities, and greatly expands the powers given to other municipalities. An elucidation of this matter is given in the attached memorandum which discusses the same provisions in House Bill 170 and Senate Bill 180.

Such a sweeping grant of power to the municipalities, particularly to the North Slope Borough, would allow the municipalities to severely inhibit the development of natural resources, particularly oil and gas. An attempt to do this has already been made in the North Slope Borough's proposed zoning ordinance. In fact, the North Slope Borough has adopted an interim zoning ordinance which requires oil and gas facilities to be permitted by the Borough.

The problem is not perceived to be quite as severe on Federal lands, in view of a Ninth Circuit Court of Appeals decision which holds that municipal governments may

not impede the development of natural resources on land owned by the federal government. Ventura County v. Gulf Oil Corporation, 601 F.2d 1080 (9th Cir. 1979), aff'd per curiam, 100 S.Ct. 1593 (1980). However, state and fee land may be at the mercy of municipalities. See the attached memorandum.

D. PROPOSED SOLUTIONS.

The intent of Chapter 40 of the proposed municipal code revision is to increase the authority of local governments with regard to planning, platting and zoning within their respective jurisdictions. Planning, platting and zoning are tools used by local governments to regulate the growth of the urban environment. Unfortunately, in Alaska, municipal government has been expanded to cover vast regions of open and unoccupied space. Zoning was never intended to be a method by which use of the non-urban environment could be regulated.

However, with the North Slope Borough interim zoning ordinance, and proposed final zoning ordinance, it is clear that zoning will be used at least by that municipality to the maximum extent possible to restrict and exclude resource development in open spaces.

The objective of any amendment to the October 1982 municipal code revision, therefore, should be to limit municipal power in planning, platting and zoning with

respect to the development of natural resources in the non-urban environment. Such activities are fully regulated by federal and state agency, and an additional layer of local control will add significantly to the time and expense involved in developing natural resources, with a de minimus contribution to environmental quality.

Article 10, Sec. 1 of the Alaska Constitution provides that: "A home rule borough or city may exercise all legislative powers not prohibited by law or by charter." Although this constitutional provision applies expressly only to home rule municipalities, it appears that the Alaska Supreme Court applies the same test for state preemption to both home rule and general law municipalities. Liberati v. Bristol Bay Borough, 584 P.2d 1115 (Alaska 1978). The test set forth in the Liberati case requires either an express legislative direction or a direct conflict with a statute such that the municipal ordinance under consideration substantially interferes with the effective functioning of a

state statute or regulation or its underlying purpose. 584 P.2 at 1121-1122.*

The most logical way to accomplish an express prohibition would be the insertion of appropriate language in Title 29, Chapter 40 as proposed by the October 1982 revision of the municipal code.

In the alternative, the only other logical place in the Alaska Statutes to put such an amendment would be Title 38, relating to natural resources. A limitation could be placed in the Alaska Lands Act, AS 38.05, but logically that limitation could only relate to development of natural resources on state land. A limitation could also be placed in the miscellaneous chapter of Title 38, AS 38.95, and, in such a context, could perhaps include fee lands as well as state lands.

We have developed five alternatives, three of which would amend AS 29.40 as proposed by the October 1982 municipal code revision, and two of which would amend Title 38, one in the Alaska Lands Act, and the other under the miscellaneous provisions of AS 38.95.

---

* An excellent discussion of home rule authority in Alaska is contained in Sharp, "Home Rule in Alaska: A Clash Between the Constitution and the Court," 3 UCLA-Alaska Law Review 1-54 (1978).

1. Alternative One: This alternative would add a new section to AS 29.40 as proposed in the October 1982 redraft. The limitation would be worded in terms of activities authorized by state or federal agencies. The idea would be that for such activities, no local review of the activity is required in order to insure environmental safety, and therefore none should be undertaken by the local government.

> Sec. 29.40.210. ACTIVITIES AUTHORIZED BY STATE OR FEDERAL AGENCIES. (a) Ordinances, regulations or permit decisions adopted or promulgated under AS 29.35.180 or AS 29.40 may not preclude or otherwise impede an activity or project conducted pursuant to a lease, license, permit or other authorization issued by a state or federal regulatory agency or department having jurisdiction over the activity or project.
>
> (b) The provisions of this section apply to home rule and general home rule and general law municipalities.

2. Alternative 2: This alternative would track the language contained in the Alaska Coastal Zone Management Act which prohibits arbitrary or unreasonable restriction or exclusion of uses of state concern by district coastal management programs. Cf. AS 46.40.060(a) and AS 46.40.210(6).

Sec. 29.40.210. USES OF STATE CONCERN. (a) Ordinance, regulations and permit decisions adopted or promulgated under AS 29.35.180 or AS 29.40 may not arbitrarily or unreasonably restrict uses of state concern as defined in subsection (b) of this section.

(b) "Uses of state concern" means those land and water uses which would significantly affect long term public interest. These uses include:

(1) Uses of national interest, including the use of resources for the siting of ports and major facilities which contribute to meeting the national energy needs, construction and maintenance of navigational facilities

and systems, resource development of fedral land, and national defense and related security facilities;

(2) Uses of more than local concern, including those land and water uses which confer significant environmental, social, cultural, or economic benefits or burdens beyond a single municipality;

(3) The siting of major energy facilities, activities pursuant to a state oil and gas lease, or large scale industrial or commercial development activities which are dependent on a particular location in a municipality and which, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

(4) Facilities serving statewide or inter-regional transportation and communication needs; and

(5) Uses in areas established as state parks or recreational areas under

AS 41.20.010-41.20.505 where a state game refuge is, game sanctuaries or critical habitat areas under AS 16.20.010-16.20.312.

(c) The provisions of this section apply to home rule and general law municipalities.

3. Alternative 3: This alternative would recognize the traditional role of zoning as a method of regulating the development of the urban environment, and would limit the use of planning, platting and zoning powers by municipalities to such urban environments. This alternative strikes a reasonable balance between the legitimate authority of local governments to regulate the location and operation of urban facilities, and at the same time prohibit the use of land use planning tools by local governments outside the urban environment.

Sec. 29.40.210. PLANNING, PLATTING AND ZONING POWERS LIMITED TO URBAN AREAS. (a) Planning, platting and zoning powers granted pursuant to AS 29.35.180 and AS 29.40 may be exercised only within five miles of the outer boundary of a permanent community or settlement.

NO
Borough could not control any activities outside of cities

(b) "Permanent community or settlement" means a settlement of at least 50 persons who reside within one mile of each other on a year round basis.

(c) "Outer boundary" means the maximum area encompassed by drawing a series of straight lines between the individual permanent buildings of the settlement.

(d) The provisions of this section apply to home rule and general law municipalities.

4. Alternative 4. This alternative would be placed in the general provisions article of the Alaska Lands Act, AS 38.05.350-.370. Since it would be contained in the Alaska Lands Act, it would apply only to land owned by the state or the university system. Article 12 of the Alaska Lands Act is a logical location for this provision, since the opening section, AS 38.05.350, states the policy of the State of Alaska with regard to its resources: "It is the policy of the state to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest." The proposed provision would read as follows:

Sec. 38.05.352. MUNICIPAL REGULATION OF ACTIVITIES ON STATE LAND. (a) Planning, platting or zoning ordinances adopted or issued by municipal governments may not preclude or otherwise impede an activity or project conducted on state land or university land pursuant to a lease, license, permit or other authorization issued by a state or federal regulatory agency or department having jurisiction over the activity or project.

(b) The provisions of this section apply to home rule and general law municipalities.

5. Alternative 5: This alternative would be contained in the miscellaneous provisions chapter of Title 38, AS 38.95. Such a location in theory would permit the section to apply to all land, not merely state or university lands. The proposed section would read as follows:

Sec. 38.95.020. MUNICIPAL REGULATION RESOURCE DEVELOPMENT. (a) Planning, platting or zoning ordinances and decisions adopted or issued by

or otherwise impede an activity or project conducted pursuant to a lease, license, permit or other authorization issued by a state or federal regulatory agency or department having jurisdiction over the activity or project.

(b) The provisions of this section apply to home rule and general law municipalities.

E. CONCLUSION.

The use of zoning powers to regulate the development of natural resources in non-urban environments constitutes a serious threat to the oil and gas industry in Alaska. The problem is exacerbated by the existence of a home rule borough which has approximately 5,000 permanent residents and yet occupies the entire North Slope of Alaska, and which utilizes, to a maximum extent possible, the broad authority granted home rule governments by the Alaska Constitution to restrict resource development within its boundaries.

AS 29.40 as proposed by the October 1982 municipal code revision would compound this problem by giving unlimited planning, platting and zoning authority to home rule governments, and by greatly expanding the land use planning authority of other municipalities. This chapter would

validate an otherwise questionable North Slope Borough zoning ordinance, and result in yet another layer of regulatory bureaucracy with little benefit to the public interest.

For these reasons, it is imperative that modifications be made to the October 1982 redraft, or amendments be made to Title 38 in order to protect oil and gas interests. Five alternatives are proposed in this memorandum.

SB 515 (Cont.)

changing court rules. However, even if a two-thirds vote was necessary, the Senate's vote to concur in the House amendments was not affected by the subsequent failure to adopt the rule changes. The vote to concur passed by the required 11 votes, and that vote was to adopt the identical bill that had passed the House. Under Rule 39(c) the failure of the Senate to take a separate vote on the rule change simply meant only that secs. 43 and 44 (and potentially their respective companios -- 18 and 40) are now "void and without effect."

the issue that is presented is very similar to one which has arisen when one house votes to concur in amendments made by the other house, but then fails to adopt, for example, an immediate effective date included in the bill by a two-thirds vote as required by Rule 39(f). The procedure specified in Rule 39 (c) pertaining to votes on court rule changes is virtually identical to the language in Rule 39 (f) pertaining to votes on special effective date clauses. There is ample authority in support of the rule that a failure to adopt a special effective date by a two-thirds vote after concurring in a bill by a majority vote means that the bill has been adopted with an ordinary 90-day effective date. This authority rests on a construction of the effective date as not being a material factor influencing the favorable vote. This rule should apply by analogy to the failure of the Senate to vote separately on the rule change provisions in this bill. Consequently, I have concluded that HCS CSSB 515 (Jud) am H has been adopted by the legislature but without the effect of changing the court rules cited in sec. 43 and 44.

Sincerely,

/s/Jay S. Hammond
Jay S. Hammond
Governor

SB 180 VETOED

July 15, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under Article II, Sec. 15, of the Alaska Constitution, I have vetoed HCS CSSB 180 (Jud) am H, relating to municipal government.

SB 180 (Cont.)

I regret having to take this action for several reasons. Certainly, the bill contains many meritorious revisions and improvements to the municipal code. These were the product of an arduous undertaking accomplished after three years of unprecedented cooperation among legislators, state and local government officials and staff. Further, there are some concepts contained within questionably designed and inadequately considered amendments which I believe should be addressed responsibly by the next Legislature. While perhaps none of these amendments is individually sufficiently flawed to warrant a veto of the entire measure, a combination of them creates significant problems that have incurred greater collective public opposition than has almost any other legislative action in my entire political experience. It's for these reasons that I have regretfully concluded that it is simply not in the best public interest to permit this bill to become law.

For example, the amendment redefining "population" and permitting the counting of workers at "isolated job sites" appropriately recognizes that the influx of seasonal employees can significantly impact local services for which there is now no readjustment provided under revenue sharing statutes. However, I am advised by counsel that the manner in which this matter is handled in SB 180 seriously jeopardizes the resolution reached by the state with the U.S. Census Bureau and could incur substantial losses in federal funding to both state and local governments. While I believe some redistribution of state funds is warranted to assist communities most impacted by seasonal and temporary influxes of population, (whether they be "isolated" communities or otherwise), I am concerned with the potential inequity created by this amendment. The vagueness of the term "isolated job site," I am advised, could result in endless litigation no matter what clarifying efforts might be made through regulation. This questionable feature, coupled with prospective revenue losses to the state treasury ascribed to it by the Department of Revenue in their request for veto, are but two of several causes for concern.

I as well favor the basic policy decision of the Legislature that forest values above ground, (just as mineral values beneath it), should be accorded different status for purposes of municipal taxation. However, the provision exempting forest lands from municipal property taxation contains a definition by reference that poses substantial problems of interpretation and impact according to all concerned state agencies. I am advised by the Department of Law, for example, that the definition problem alone would probably induce costly and unnecessary litigation.

Perhaps more importantly, bond counsel advises that the bill would gravely impede local government general obligation bond programs in progress and significantly harm the credit ratings of virtually all Alaska communities. This feature is perhaps the most damaging potentially of all the questionable features contained in SB 180 and, in the view of most financial consultants, would alone warrant veto. I

SB 180 (Cont.)

are certainly in no position to second guess and override them in this conclusion. They assert the resulting adverse effect of this feature is likely to be a decline in market value of outstanding issues and an increase in the costs for new financing. Potential impact on the state's bond bank is, of course, of equal concern.

Additionally, the Department of Natural Resources has expressed major concerns over the manner in which this amendment might apply, despite their agreement with the avowed basic philosophical intent of the amendment's sponsors. They point to the Oregon forest value taxing policies as a far preferable approach to meet that objective. Accordingly, I have directed that legislation be drafted which would more appropriately address this matter.

Another problem rests in the attempt to clarify statutory references regarding tax exemptions of undeveloped Alaska Native Claims Settlement Act lands. Agencies have raised unanswered questions as to whether the language is indeed clarified. Moreover, a retroactivity feature of this provision casts serious "public purpose" doubts upon the legality of the proposed solution.

The amendment prohibiting local governments from passing ordinances relating to firearms has been violently objected to by some law enforcement people. It causes me concern as well because of my reluctance to permit state government to impede the ability of local communities to govern in a manner deemed by themselves most responsive to their unique needs.

Objected to by many others requesting veto is the further intrusion into the conduct of local government business represented by amendment 13. This would expand the initiative and referendum process to include local administrative matters. Those requesting veto assert that actions of the governing body elected by the public should be subject of initiative and referendum; but that ongoing daily administrative matters should be subjected to the usual review and oversight inherent in the concept of a governing body of elected officials held accountable for actions of those whom they employ. For state government to impose its will in such matters upon local governments without far more public debate than was accorded this amendment, appears to me to be yet another undue incursion of "Big Brother" into local matters.

Another section affects a major change in public utility regulatory philosophy, and reverses the direction chosen with deregulation in 1980. In urging veto a multitude of agencies and utilities pled for further public hearings and agency consideration before so drastic a change be contemplated. Again, if this alone were the measure's greatest flaw, I perhaps would not have vetoed it. However, in conjunction with a multitude of other alleged defects and public confidence eroding features, it adds one more reason for my action.

SB 180 (Cont.)

A final problem is one related to language, not concept. This provision allows municipalities to use the group insurance concept for the purpose of pooling their workers compensation liabilities and claims handling. The language appears to mandate board adoption of regulations permitting a municipal employer group to recede under any circumstances. It seems only prudent that qualifications be stipulated so that municipalities requesting approval for group self insurance status are subject to the same regulatory criteria as any other self-insured employer.

The subject legislation has produced more controversy and debate than any other to emerge from the 12th Legislature. Because I find some issues addressed in the amendments, as well as the municipal code revisions, to be desirable, I am taking specific steps to encourage the 13th Legislature to address these issues. Accordingly, I have directed that legislation be drafted which would accomplish the municipal code revisions effective prior to the floor amendments. This would address the problem areas in a manner both acceptable to me and, I believe, to most legislators.

I have also directed that legislation be prepared to address the forest lands and taxation issues in a more acceptable manner to accommodate the appropriate intent of these amendments' sponsors.

I have also directed legislation be prepared to address the workers compensation provisions allowing local governments to use the group self-insurance concept for the purpose of pooling their workers compensation liabilities and claim handling.

Further, I'm directing the Department of Community and Regional Affairs to draft regulations on the provisions of state assistance to local governments in a manner which compensates more equitably those communities impacted by seasonal, temporary and isolated workers. Minimally, I would hope that in the short term we could at least "hold harmless" the North Slope Borough, which otherwise stands to lose about $2 million in revenues from the amount they received last year. All other municipalities would receive, I'm told, increases. Accordingly, I would hope tht all other municipalities, which rose in violent protest over the prospects of revenue losses to themselves were SB 180 to become law, would be equally concerned about revenue losses ocurred by other municipalities through this measure's veto.

I do not intend to submit legislation re-regulating public utilities at the municipal level unless some valid arguments can be presented for this change.

The legislative package presented to the 13th Legislature will, of course, be that of the future governor. Therefore, I cannot guarantee that all these proposals will come before the House and Senate. However, several key legislators who are likely to return assure me of their dedication towards

SB 180 (Cont)

address of these matters.

Despite the bill's problems, I was at first inclined to go along with policy decisions rendered by the legislature in their passage of 180. After all, by so doing I could assure these issues would be addressed next session if as serious as opponents were contending. However, a growing crescendo of public opposition, virtually unanimous staff and agency veto recommendations, plus pleas from some legislators who now wish to do penance for having voted for the measure, cause me to conclude that while a veto does a disservice to the legitimate concerns of some communities and interests, permitting the bill to become law could incur even more disservice to all others. Finally, as one of two senators who will assuredly return next session, let me urge you, Mr. President, to place this crucial issue high upon you agenda.

Sincerely,

/s/ Jay S. Hammond

DETAILED ANALYSIS OF LAND USE REGULATION BY MUNICIPALITIES UNDER CSSB 180 (C & RA) AND CSHB 170 (C & RA)

A. Current law.

Land use regulation by municipal governments is currently governed by A.S. 29.33.070-.245. A.S. 29.33.070 requires all boroughs to provide for planning, platting and zoning on a "area-wide basis." A.S. 29.43.040 grants the same power to home rule and first and second class cities located outside organized boroughs.

A.S. 29.33.080 and .085 require the assembly to adopt a "comprehensive plan" containing policy statements, goals, standards and maps. A.S. 29.33.090 requires the municipal assembly to regulate land use "by districts or contract zoning." It requires land use regulations to be uniform for each class of use in each district. Contract zoning is defined as allowing a "zoning reclassification" to a less restricted use where the owner agrees to place restrictions on the use of the land beyond the zoning requirements generally attaching to the new classification. This section also states the purposes for which zoning ordinances may be adopted. The stated purposes clearly envision zoning in an urban environment.

The current law applies to all local governments, and therefore limits the power of home rule boroughs. The current

law has no provision authorizing the regulation of land use by the adoption of a permit system. Additionally, the current law does not allow cities located in third class boroughs to provide for planning, platting and zoning.

B. Land use regulation under CSSB 180 and CSHB 170.

Under CSSB 180 and CSHB 170, land use regulation by local governments would be governed by A.S. 29.40.010-.200.

A.S. 29.35.190(b) requires a home rule borough to provide for planning, platting and zoning. No limitations are imposed upon that power, nor are any guidelines set forth limiting the exercise of that power.

A.S. 29.35.180(a) requires first and second class boroughs to provide for planning, platting and zoning pursuant to A.S. 29.40. A.S. 29.40.010 also requires first and second class boroughs to provide for planning, platting and zoning.

A.S. 29.35.220 and .300(b) would allow a third class borough to acquire the power to provide for planning, platting and zoning within a service area by the adoption of a referendum to that effect.

A.S. 29.35.250(b) requires a home rule or first class city within a third class borough to provide for planning, platting and zoning under A.S. 29.40, and allows a second class city located within a third class borough to so provide.

A.S. 29.35.260(c) requires home rule and first class cities outside a borough and permits a second class city outside a borough to provide for planning, platting and zoning under A.S. 29.40.

These provisions apparently impose no limitation on the planning, platting and zoning authorities of home rule boroughs. It appears that A.S. 29.40 does not apply to the exercise of those powers by home rule boroughs. A.S. 29.35.180(b); compare A.S. 29.35.180(a).

Article X, Section 11 of the Alaska Constitution provides: "A home rule borough or city may exercise all legislative powers not prohibited by law or by charter."

Given this provision and the apparent lack of any explicit limitations on the zoning authorities of home rule boroughs, home rule boroughs would have greatly expanded zoning authority under the bill. As the Supreme Court has stated:

> A municipal ordinance is not necessarily invalid in Alaska because it is inconsistent or in conflict with a state statute. The question rests on whether the exercise of authority has been prohibited to municipalities. The prohibition must be either by express terms or by implication such as where the statute and ordinance are so substantially irreconcilable that one cannot be given its substantive effect if the other is accorded the weight of law.

Jefferson v. State, 527 P.2d 37, 43 (footnotes omitted, emphasis added).

This position was reiterated by the Supreme Court in Liberati v. Bristol Bay Borough, 584 P.2d 1115 (Alaska 1978).

> Merely because the State has enacted legislation concerning a particular subject does not mean that all municipal power to act on the same subject is lost. We have consistently rejected application of any such concept in our cases dealing with home rule municipalities. We do so now with respect to general law municipalities because our constitution requires that their powers be liberally construed as well. We believe that an appropriate accomodation can be made between the State and general law municipalities by a rule which determines pre-emption to exist, in the absence of an express legislative direction or a direct conflict with a statute, only where an ordinance substantially interferes with the effective functioning of a state statute or regulation or its underlying purpose.

584 P.2d at 1121-1122 (footnotes omitted, emphasis added).

It appears that the Alaska Supreme Court is applying the same test for state pre-emption to both home rule and general law municipalities. In summary, in order for a local ordinance to be determined invalid pursuant to Article X, Section 11 of the Alaska Constitution, there must be a prohibition by state statute, express or implied, or the ordinance must substantially interfere with the effective functioning of the state statute or regulation or its underlying purpose.

Under CSSB 189 and CSHB 170, there would be no explicit prohibition of any zoning ordinance adopted by a home rule municipality.

Federal lands may be unaffected by the zoning ordinances adopted by home rule boroughs in any event. See Ventura County v. Gulf Oil Corp., 601 F.2d 1080 (9th Cir. 1979), affirmed per curiam 100 S. Ct. 1593 (1980).

Private land may be totally at the mercy of local zoning ordinances except insofar as inverse codemnation can be claimed and proved. It could be argued that, as applied to land granted to the natives by the Alaska Native Land Claims Settlement Act, zoning ordinances which prohibit development are inconsistent with the purposes of that act and therefore invalid. There is no precedent for such an argument and the success of such a position is questionable.

Any argument opposing the restriction of energy development on state lands by a local zoning ordinance adopted by a home rule borough would have to rely on the claimed inconsistency of the ordinance with the state's right to develop its natural resources. In that regard, determination of whether there is a limit to the home rule borough's authority to adopt ordinances prohibiting or restricting the development of energy sources requires a two-fold inquiry:

1. Are there Alaskan constitutional and statutory provisions which seek to implement a statewide policy with reference to the subject matter of the ordinances?

2. Do the proposed borough ordinances impede implementation of that policy?

While control of natural resources of the State of Alaska is specifically retained by state government pursuant to Article VIII of the Alaska Constitution, it is by no means certain that a court would rule that a local zoning ordinance which impedes or prohibits development of oil and gas in certain specific locations would be struck down as unconstitutional or unauthorized. In any event, the adoption of the current provisions concerning home rule regulationof land use as stated in CSSB 180 and CSHB 170 would insure extensive constitutional litigation to resolve these questions.

The question is further complicated by the fact that A.S. 29.40.040(a)(2) in the two bills would specifically authorize the use of a permitting system to regulate land use. This section places far greater authority in local government than the current law does. It is conceivable that an ordinance could be adopted which would prohibit all uses unless a land use permit is obtained from the local government involved. This would allow local governments to assess energy development projects on a case by case basis thus adding another layer to the regulation of energy development in general.

It should be noted that this permit procedure would be available to any local government that possesses or obtains planning, platting or zoning authority under A.S. 29.35 and A.S. 29.40 as proposed in CSSB 180 and CSHB 170.

A few suggested changes to SB 1.

page 8, line 26. AS 29.05.120(a)(2) ELECTION OF INITIAL OFFICERS. Add "of a first class city." to the end of the subsection to avoid conflict with law regarding 2nd class cities and current practice with many home rule municipalities.

Page 28. CHARTERS. Consider changing the procedure for going directly from unincorporated status to home rule to a two-step process similar to the unification process: (1) start with a vote on the question and at the same time elect a charter commission, (2) vote on the charter, with provision for one charter rewrite if the first one fails.

page 29, line 8. AS 29.10.010 (e) MUNICIPAL CHARTER ADOPTION. for clarification, add "of seven elected members" after "charter commission".

Page 29, line 14. AS 29.10.010 (f) MUNICIPAL CHARTER ADOPTION. if the procedure for going directly from unincorporated to home rule is not changed to provide for an elected charter commission, then this section should be clarified by adding "prepared by the petitioners and" before the word, "filed" in the middle of line 14.

Page 36, starting on line 9 and continuing through page 39, line 3. Replace AS 29.20.070 ASSEMBLY COMPOSITION AND FORM OF REPRESENTATION and AS 29.20.080 ASSEMBLY RECOMPOSITION AND REAPPORTIONMENT with the attached proposed amendments, which substantially simplify the language and clarify the process, without changing the basic intent.

page 45, line 25. AS 29.20.220 EXECUTIVE POWER. Delete the second sentence which is an undue infringement on home rule powers, and delete the third sentence, the contents of which are covered in AS 29.20.230 ELECTION AND TERM OF MAYOR.

page 63, line 26. INITIATIVE AND REFERENDUM. AS 29.26.120 (a)(1) change "bill" and "act" to "ordinance and resolution" to conform language to municipal enactments.

page 64, line 15. AS 29.26.120 (b). same changes as page 63.

WORK DRAFT COPY WORK DRAFT COPY

Proposed Amendment to SB 1 standing on p. 36, line 9

IN THE SENATE TY AND RS COMMITTEE

COMMITTEE SUBSTI

IN THE LEGISLAT

TWELFTH LEGIS

For an Act entitled: "An Act relating to assembly composition, form of representation and apportionment."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.~~23.023~~ 20.070 and AS 29.~~23.025~~ 20.080 are repealed.

* Section 2. AS 29.~~23.023~~ 20.070 is re-enacted to read:

Sec. 29.~~23.023~~ 20.070. Assembly composition, form of representation and apportionment.

(a) The borough assembly shall provide for its composition and for the form of its representation consistent with the standards of AS 29.~~23.021~~ 20.060.

(b) [Before the] Not later than first regular election [that occurs] after the report of a Federal decennial census, the assembly shall [adopt] propose and submit to the voters of the borough, at that regular or special election called for the purpose, one or more forms of assembly representation providing a form of assembly representation and a corresponding plan of apportionment. The forms of representation which the assembly may [adopt] submit to the voters are listed in subsection (f) of this section.

(c) If a petition signed by not less than 50 registered voters who are residents of the borough requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.~~23.021~~ 20.060, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall consider the question and make a determination within two months of the receipt of the petition.

(d) The assembly may consider at any time whether its apportionment meets the standards of AS 29.~~23.021~~ 20.060. Whenever an assembly determines that its apportionment does not meet the standards of AS 29.~~23.021~~ 20.060, the assembly shall, within six months provide by ordinance for a change in the existing appor-

tionment and may, by ordinance, change the composition of the assembly.

(e) An ordinance adopted by the assembly under (b) or (d) of this section shall be submitted to the voters for approval at the first regular election following its adoption. In order for the ordinance to be approved, it must receive the approval of a majority of votes cast on this question.

(f) The forms of representation an assembly may adopt are:

(1) election of members of the borough assembly at large by the ~~qualified~~ voters throughout the borough;

(2) election of members of the borough assembly by district, including

(A) election at large by the ~~qualified~~ voters throughout the borough, but with a requirement that a candidate live within an election district established by the borough for election of assembly members; or

(B) election from election districts established by the borough for the election of assembly members by the ~~qualified~~ voters of a district;

(3) election of members of the borough assembly both at large and by district.

(g) If an assembly's apportionment does not meet the standards of AS 29.~~23.021~~ 20.060 and it fails to adopt an ordinance for reapportionment and have the ordinance approved by the voters as specified under (b) or (d) of this section, the commissioner of the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.~~23.021~~ 20.060 by preparing an order of reapportionment and delivering the order to the borough mayor.

(h) Subsections (e) and (f) of this section do not apply

(1) to a unified municipality ~~incorporated under~~

"ARTICLE 4. COMMUNITY FACILITIES GRANTS.

Sec. 29.60.320. CIVIC, CONVENTION AND COMMUNITY RECREATION CENTERS. (a) Within the limits of legislative appropriations for the purpose, the state shall make matching grants to local governments or their nonprofit designees equal to 50 percent of the estimated reasonable costs of land acquisition, planning, and construction of municipal civic, convention and community recreation centers and 50 percent

of the cost of feasibility studies relating to these facilities, in accordance with the provisions of this section.

(b) Grants for only one study and one project may be awarded to a local government under this section. Applications for grants shall be made in a form prescribed by the commissioner. A grant shall be allotted according to an agreement made between the commissioner on behalf of the state and the local government receiving the grant. The agreement may include any provision agreed upon by the parties and shall include in substance the following provisions:

(1) estimates of reasonable costs of a study or project as approved by the commissioner after consultation with the Department of Public Works;

(2) a schedule of grant disbursements, if, as determined by the commissioner, a grant is to be disbursed other than in one sum;

(3) agreement by the local government to

(A) proceed with and complete the proposed study or project expeditiously;

(B) not discontinue operation or dispose of all or part of a project for which it receives a grant without the approval of the commissioner;

(C) apply for, and make reasonable efforts to secure, federal assistance that may be available for the study or project, subject to any conditions the commissioner may require in order to maximize the amounts of that assistance received or to be received for all projects in the state;

(D) provide for payment of the local government's

share of the cost of the study or project;

(4) agreement by the local government that, if federal assistance for a study or project becomes available to the local government that was not included in the calculation of the amount of a grant authorized and disbursed under this section, the value of the federal assistance shall be ascertained and subtracted from the total value of the project and the balance shall be equally divided between the state and local government;

(5) provision for alteration or modification of an approved study or project and for remedies in case of failure to perform the agreement between the parties or noncompliance with regulations promulgated by the commissioner under this section;

(6) provision for alteration or modification of an existing facility that would have qualified under this section as a civic, convention or community recreation center at the time of initial construction if this section had been in effect and provision for remedies in case of failure to perform the agreement between the parties or noncompliance with regulations promulgated by the commissioner under this section.

(c) If funds appropriated by the legislature to provide grants under this section are not adequate to satisfy amounts required by approved grant applications, funds shall be allocated on the basis of priority established by the Department of Economic Development by regulations promulgated to carry out the provisions of this section.

(d) This section does not require that a local government receiving a grant for a feasibility study under this section must

proceed with construction of a project, notwithstanding the project is determined to be feasible.

(e) The commissioner shall require in the negotiations and agreements with the local government that continued maintenance of the facility is the responsibility of the local government and the local government must show the feasibility of this before authorization of state funds.

(f) The commissioner shall provide an annual report to the legislature with respect to grants made under this section.

(g) The commissioner may adopt regulations to carry out the purpose of this section.

(h) In this section

(1) "commissioner" means the commissioner of economic development;

(2) "local government" means a city of any class or a borough having power to implement the studies or projects for which grants are authorized in this section;

(3) "costs of construction" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative

and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary; it does not include the cost of feasibility studies."

Page 193, after line 15, insert:

"* Sec. 55. AS 38.09.080 is amended to read:

Sec. 38.09.080. LAND WITHIN MUNICIPALITIES. (a) If a municipality has filed a selection of state lands under AS 29.65 and former AS 29.18.210 - 29.18.213 with the commissioner, the state lands selected may not be designated for homestead entry, if the commissioner determines that land selected by a municipality is not available for patent to the municipality under AS 29.65 and former AS 29.18.210 - 29.18.213, the state land is available for designation by the commissioner for homestead entry under AS 38.09.010.

(b) The disposal of homestead entry land is subject to local platting, recording, or subdivision requirements established under AS 29.40 [AS 29.33] and AS 40.15."

Renumber the following sections accordingly.

Page 195, after line 22, insert:

"* Sec. 63. AS 42.05.711(1) is amended to read:

(l) A person, utility, or cooperative that is exempt from regulation under AS 42.05.711(a) or (d) - (k) is not subject to regulation by a municipality under AS 29.35.070 [AS 29.48.060 - 29.48.090]."

Renumber the following sections accordingly.

SUBJECT: Title 29 revision
(HB 172)

TO: Representative Milo Fritz

FROM: Tamara Brandt Cook
Legislative Counsel

Here is the amendment that you requested which incorporates laws passed during the First Session of the Thirteenth Legislature into HB 172. The changes in this amendment come from Chapters 30, 95, 97, and 103, SLA 1983. AS 43.18.300 was renumbered by the revisor of statutes as 29.89.110, so that material is included in this amendment. This amendment also alters the effective dates of HB 172 to reflect the passage of one year since its introduction.

For your information, there were several other laws passed that impact the Title 29 revision bill, but that did not create a need for amendment of that bill. Chapter 44, SLA 1983 amends both existing law and the revision bill (assuming it is passed by the Thirteenth Legislature) and no change needs to be made to HB 172 to reflect that fact. Chapter 67, SLA 1983 deletes a definition of resident that is in existing law, but that was already deleted from HB 172. Sec. 4, Chapter 91, SLA 1983 contains a reference to AS 29.18.201 - 29.18.213 which is renumbered in HB 172. However, under that chapter, implementing action takes place prior to July 1, 1984, the new effective date of HB 172 under this amendment, so no further change is needed to HB 172.

Please let me know if you would like these amendments incorporated into a CSHB 172 (C&RA) along with any other changes desired by the House Community and Regional Affairs Committee.

February 3, 1984

Honorable Mike Miller
Chairman, House Committee & Regional Affairs Committee
Alaska State House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Miller:

I regret that I was unable to visit with you this last week when the Legislative Committee of the Alaska Municipal League met in Juneau.

As I am sure you are aware, the League strongly supports HB-172, the codification of Title 29. As noted in the enclosed letter to Representative Fritz, the compilation that he has had done clearly identifies the need for the codification from both the Legislature and municipality point of view.

We both need one "sheet of music," one organized document to enable us all to better do our job for the people of the State as a whole and our individual municipalities in particular.

I for one would like to see some additional revision to Title 29, but those items are in no way as important as codification with the revisions as currently agreed upon.

On behalf of the Municipal League, we request your support in moving HB-172 toward enactment.

Sincerely,

John E. Wise
Member, Kenai City Council
Member, Legislative Committee, Alaska Municipal League

Honorable Milo Fritz, M.D.
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Fritz:

The Municipal League Legislative Committee, in accordance with policy established by the League Board of Directors, is encouraging passage of HB-172 - Codification of Title 29. The committee had planned to do a compilation of events to date on that bill. We then discovered that your office had, in fact, done just that.Your compilation is an excellent piece of work - you and your staff are to be congratulated.

It is quite clear, now more than ever before, that we all need the codification to be enacted this session. Inasmuch as Title 29 is indeed a living document as you and your colleagues update it more than once each session, a codification would be invaluable.

The Municipal League strongly endorses the proposed codification as too many of us simply cannot keep up with the currently disjointed, contradictory language of Title 29 as it now exists.

Again we applaud your efforts and ask for your continued support.

Sincerely,

John E. Wise
Member, Kenai City Council
Member, Alaska Municipal League Legislative Committee

January 23, 1984

2nd Session
13th Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Fellow Legislators:

During the First Session of the Thirteenth Alaska State Legislature, the House Community and Regional Affairs Committee held extensive hearings on HB172, the Municipal Code revision. Eight amendments have received Committee approval. Some other amendments have been proposed to the Committee for consideration early in the Second Session.

HB172 has many complex issues within its scope. The House Community and Regional Affairs Interim Committee has prepared a report covering this legislation and its history. The main purpose of this report is to give a concise overview of the bill and its issues.

The previous veto by Gov. Hammond of similar legislation was brought about by the addition of many well intentioned, but problematical amendments from the Floor. The current bill, HB172, does not contain any of those amendments. Many people believe that HB172 makes major alterations to Title 29. In fact, the major revisions to Title 29 have been passed thru separate legislation in the 1st Session of the 13th Legislature. At this time, HB172 is an editing and clarifying bill to aid the municipalities of the State in accurately interpreting Title 29.

It is the Committee's desire to give each legislator adequate time to suggest any changes during the Committee process. This report features the progression of the bill and the proposals to be considered by the Committee. Any other ideas, comments and suggestions should be directed to the Community and Regional Affairs Committee as soon as conveniently possible. It is the feeling of the Interim House Community and Regional Affairs Committee Chairman that any other major amendments should be dealt with in separate legislation.

The House Community and Regional Affairs staff has devoted much time to the preparation of this report. I hope it is beneficial to you.

Sincerely,

Milo H. Fritz

TITLE 29

HISTORY

When our constitution was adopted in 1956, its provisions for local government were the most advanced in the nation. Title 29 of the Alaska Statutes, "Municipal Government" is the codification of session laws pertaining to Municipalities and sets forth the authority and responsibilities of local governments. Title 29 is divided into chapters dealing with local government's functions and services.

Although updated in 1972, it was not until the beginning of 1980 that Senate Concurrent Resolution 66 authorized the Alaska legislature to revise the municipal government statute. A Policy Advisory Group, composed of municipal officials, 2 Senators, 2 Representatives and assisted by a Technical Group of municipal attorneys and a city clerk, was formed to assist in interpreting provisions of the law and in revising specific statutes. Policy decisions were finalized by the Policy Advisory Group. The Group developed two basic guidelines, the simplification of the title's organization and the achievement of maximum flexibility in the structure and functioning requirements of local government.

Simplifying Title 29 meant clarifying how those powers were to be assumed and administered. In addition, to meet the desire for more flexibility in carrying out day-to-day administrative and procedural responsibilities, the Group found that less technical assistance in defining local government's structure and procedure would be required by local governments once the revision is adopted. Furthermore, it was recommended that the capability of the Department of Community and Regional Affairs be expanded to provide technical assistance to match the future demand for the Department's services.

The public, in testimony, asked for a variety of proposals; demanding more local direction of state programs, the granting of municipal rights and powers to Native governments along with the desire for self-governing regional organizations. State agencies proposed that local governments consider taking over "local" agency programs. Local governments were concerned with two things: the increasing or decreasing costs due to decentralization; and, if those programs could be responsibly administered.

Rural residents of Alaska were concerned over the multiplication of agencies and organizations formed to respond to state and federal program requirements. These may include a city council, Indian Reorganization Act Council, village corporation board and subcommittees, membership in various non-profit organizations (formed to provide health services, regional housing authorities) and regional Coastal Resource Service Areas and Regional Education Attendance Areas, etc. Some rural residents felt that the creation of separate single-purpose service areas led to a fragmenting of local control. Others believed that service areas would be the best vehicle for additional public services in the unorganized borough.

The Group proposed revisions for Title 29 addressing many of the difficulties of administering mandated state and federal programs. The third draft of a proposed revision of Title 29 was approved and submitted to the Legislature for consideration (S.D.#1).

During the 12th Legislature, SB180 and HB170 provided revisions and improvements to the municipal code. These changes were accomplished with overwhelming cooperation among legislators, state and local government officials and staff. The bills received numerous committee hearings, addressing the major concerns expressed by the public and state agencies. Major amendments, made on the Floor of the House during the hectic final hours of the Session, caused Governor Jay Hammond to veto the bill (S.D.#2).

A list of the reasons Gov. Hammond used to support his veto follows. Asterisks (*) will refer you to the method in which the concerns are presently being handled, either through separate legislation or through HB172 amendments. Material within parenthesis (S.D.#) will refer you to support documents.

1). An amendment redefining "population" permitted the counting of workers at isolated areas to recognize seasonal employees. The results would significantly impact local services (S.D.#1).

HB42*, presently under consideration by the Senate Finance Committee, relates to the determination of population for purposes of calculating amounts of state aid (S.D.#3). The language states that no person may be included in the population count of more than one taxing unit. The population of a taxing unit, including any military reservation that is part of the taxing unit, shall be determined annually by the latest figures of the U. S. Census Bureau. Gov. Hammond requested the Department of Community and Regional Affairs to draft regulations for state assistance to local governments compensating more equitably those communities impacted by seasonal, temporary and isolated workers (S.D.#2).

2). Under a proposed definition of "developed", a provision exempting forest lands from municipal property taxation contains a definition of developed by reference to Federal law that posed substantial problems of interpretation and impact. The Department of Law advised that the definition of "developed" would probably induce costly and unnecessary litigation.

Bond Council advised Gov. Hammond that the bill could impede local government General Obligation bond programs in progress and significantly harm the credit ratings of virtually all Alaskan communities (S.D.#2).

This concern was addressed in separate legislation, SB260* (S.D.#4), Chapter 97, 1983 Session Laws, see proposed amendment #10.

3). One section affected a major change in public utility regulatory philosophy, reversing the direction chosen with deregulation in 1980. Gov. Hammond questioned re-regulating public utilities at the municipal level unless arguments are raised to change them. Further, he recommended that this concern be addressed in a separate piece of legislation (S.D.#2).

This concern was addressed in separate legislation, HB274*, Chapter 30, 1983 Session Laws, see proposed amendment #10 (S.D.#5).

Although, there were other concerns Gov. Hammond listed, the three above were the most important. SB1 (S.D.#8) was prefiled in the Senate. Later, Governor Sheffield introduced HB172 (S.D.#6) thru the Rules Committee to parallel the Senate bill (S.D.#7).

SYNOPSIS OF CHAPTERS

The following is a brief synopsis of the chapters in Title 29 as written in HB172.

CHAPTER 4 deals with the classification of municipalities.

Municipalities are divided into two classes, Home Rule and General Law. Home Rule Municipalities have all legislatives powers not prohibited by law. General law municipalities have specific powers conferred by law. There are five classes of general law municipalities. Chapter 4 also delineates the process for reclassification of a municipality.

CHAPTER 5 deals with incorporation.

Article I sets forth the requirements necessary for incorporation; minimum number of people, adequate size, and adequate financial resources.

Article II sets forth the procedures necessary to become incorporated, providing for a service area to integrate into the new municipality within two years of incorporation. A legal challenge to the formation of a municipality must occur within six months after the date of incorporation.

Article III establishes transitional assistance, setting forth the amounts that a new or reclassifying municipality receives as a grant to help defray costs. It establishes an Organizational Grant Fund in the Department of Community and Regional Affairs and requires the Department to provide organizational assistance to the municipality in developing its tax structure.

CHAPTER 6 deals with the alteration of municipalities.

Article I provides for name changes to a municipality.

Article II establishes the procedures for annexation and detachment.

Article III establishes the procedures for merger and consolidation.

Article IV relates to unification of municipalities, establishment of

Charter Commission procedures for proposal of a home rule charter and voter approval. It defines election of members, organization and procedures of the commission and other necessary provisions. The powers of a unified municipality are those powers not prohibited by law and given to a home rule borough.

Article V establishes the method of dissolution.

CHAPTER 10 defines the organization and powers of home rule municipalities.

Article I provides for the establishment of a new charter and requires the Department of Community and Regional Affairs to prepare a model charter for the charter commission to use. A provision in the charter for initiative and referendum procedures is also required. Article 1 sets forth the events which follow rejection of the charter by the voters.

Article II sets forth the limitations placed on home rule municipalities. This article provides that the Home Rule municipalities abide by the itemized sections of Title 29.

CHAPTER 20 sets the guidelines for municipal officers and employees.

Article I requires the municipality to adopt a conflict of interest ordinance which requires that all meetings of municipal bodies be public in adherence with AS 44.62.310 and that the public be provided with the opportunity to be heard.

Article II establishes the governing bodies. The legislative authority in a borough will be vested in the assembly. The legislative authority of a city will be in the council. It requires equal representation as set by the Constitution of the United States. It establishes the forms of representation to be proposed to the voters. The procedures for recomposition and reapportionment are established along with composition requirements. There are some restrictions as to the qualifications the municipality places on the members. The minimum procedures of the governing bodies are 1 meeting per month, 24 hour notice for

special meetings, a quorum being a majority of the total membership and the requirement of all members voting.

Article III establishes that the municipal executive is the Mayor. If the municipality has not established a city manager type of government, the mayor is also the manager of the city. This section provides the right of veto to the mayor with certain exceptions. Qualifications for office, election procedures, absences and vacancies are provided.

Article IV regulates boards and commissions with provisions for school boards and utility boards and allowance of other boards and commissions necessary to the operation of the local government.

Article V which covers other officials and employees, provides that the municipal clerk, attorney, treasurer, and police chief are appointed by the chief executive with approval by the governing body, unless by ordinance another system of selection is designated. This article provides for the duties of the offices, and allows a municipality to develop departments and a personnel classification system.

Article VI covers the adoption and use of a manager plan of government, including the procedures for election of a plan, appointment of a manager, and the powers and duties of the manager.

Article VII contains miscellaneous provisions. It establishes that before taking office, all municipal officials will in writing affirm an oath of office. It requires bonding and certain reports.

CHAPTER 25 covers municipal enactments.

Certain actions must be done by ordinance, including dealing with departments, issues dealing with or requiring a fine or other penalty, issues dealing with taxes, other major business type dealings, etc. The ordinance procedure to be followed includes public notice five days in advance, a public hearing, official action being taken and written copies being available to the public. Upon finding that a fact supported emergency exists, ordinances can be adopted to meet the emergency. The ordinance, which can be passed at its introductory meeting, must be passed by three quarters of the governing body or

by all members present. Copies of the emergency ordinance must be made available to the public. An emergency ordinance, effective for a period of 60 days, may not be used to levy taxes, extend a franchise or to regulate rates charged by a public utility. A municipality must establish a code of regulations and must codify each ordinance passed. Resolutions must be placed on permanent file. Penalties for a violation of municipal ordinances may not be greater than those imposed for a Class B misdemeanor. Actions may be brought by the municipality or by an aggrieved person. Penalties, authorized under Chapter 26, may not be imposed if copies of the ordinance are not made available at cost or less to the public.

CHAPTER 26 deals with elections.

Article I deals with regular and special elections providing for administration of the elections, the nomination process, 20 days notice of an election and voter qualification. A person can hold more than one office, but may not hold simultaneously the seat of borough mayor and assembly member or of city mayor and city council. Unless otherwise provided for by ordinance in a first class city, a runoff election is required for the office of mayor or member of governing body or school board if a candidate does not receive over 40% of the total votes cast. A run off election is required for an "at large" seat if no candidate receives a number of votes greater than 40% of the total votes cast, divided by the number of seats to be filled. An election must be contested before or during the first canvas of the ballots. Court action must be initiated within 10 days, or the election results are conclusive and valid.

Article II provides for initiatives and referendums. 10 voters of a municipality may file an initiative or referendum petition application with the municipal clerk. The clerk shall certify the application if it does not conflict with AS 29.26.100, includes a single subject, is a legislative matter and is enforceable as a matter of law. Within two weeks after certification, the municipal clerk must prepare a petition containing a summary of the ordinance or resolution, the complete

version sought by the sponsors and other administrative information. Petition signatures are to be collected in pen or indelible pencil within 60 days after the clerk issues the petition. In municipalities of 7500 people or less, a petition must be signed by a number equal to 25% of the voters who voted in the last regular election. A number equal to 15% of the votes cast, in a city with 7500 people or more, must be collected. The petition will be submitted as a single instrument and the municipal clerk has ten days to certify the sufficiency of the petition or identify the areas which are insufficient. If the petition is rejected, the sponsors have 10 days to file additional signatures. Then, the clerk has another 10 days to certify the petition. If the petition is again rejected, it is filed as a public record. A protest of a rejection must be filed within 7 days to the mayor and brought before the governing body at the next regular meeting. Failure of a petition does not preclude a new petition, but a petition on similar material may not be filed for six months. The initiative vote must be held at the next regular election or at a special election, not before 45 days or later than 75 days after certification. An ordinance or resolution may not be changed, repealed, or enacted within one year of the effective date of an initiative.

Article III addresses the procedure for recall of an elected official who has held office for at least 120 days. The application for a recall petition will be filed with the municipal clerk and shall contain the signatures and addresses of 10 municipal voters, the address that all correspondence will be sent to and the statement of reasons for recall in 200 words or less. If the petition application is determined to meet the requirements of AS 29.26.260, the clerk will prepare a recall petition with the name of the person to be recalled, the reasons for recall as stated in the original petition application and other administrative information. The signature requirements are identical to Article II except that the petition must contain a number of signatures equal to 35% of the number of people who voted for that office. The sufficiency of the petition must be determined by the clerk within 10 days. If there are more than 180 days before the end of said term and the total of valid and invalid signatures is equal to or greater

than the required number, the sponsors have an additional ten days to gather the necessary additional signatures. Article II sets the new recall time limits, election time limits, the recall ballot form and how successors will be selected to vacant offices.

CHAPTER 35 deals with municipal powers and duties.

Article I sets forth the general powers of a municipality. All municipalities have the power to provide for operation of its departments and facilities. Those powers include setting salaries of the elected and appointed officials. General provisions provide for the ability to tax, enforce ordinances, prescribe penalties, deal in real and personal property, expend funds for public purpose, regulate municipal rights-of-way, facilities or services, borrow money, acquire certain memberships, enter into agreements with other governmental agencies and sue or be sued. In certain instances, a municipality is allowed to have extraterritorial jurisdiction over certain facilities or services. Municipalities can exercise eminent domain, use emergency disaster powers, provide garbage and solid waste services and require use thereof. A city may not prohibit a person with a valid Alaska Public Utilities permit from continuing that service. Before providing the same services, a city must purchase the permit and equipment of a carrier. Article I provides for franchises and permits, limited public utility regulation, control over alcoholic beverages, rules for land transactions, budget and capital programs, expenditure of borough revenues, establishment and operation of emergency services communication centers. An annual independent audit of each municipality's finances is required.

Article II sets forth mandatory areawide powers. Each borough constitutes a school district. A school district will be established, maintained and operated in all areas, except military reservations. All boroughs shall assess and collect all taxes levied within it's boundaries. The borough must return all city taxes collected to the city. First and second class boroughs must provide for platting, planning

and land use regulation in accordance with AS 29.40. Home rule boroughs are required to provide for planning, platting and land use regulation.

Article III establishes additional powers, giving a first class borough power to establish on a non-area wide basis all powers not prohibited by law. First class boroughs are given the ability to establish certain areawide powers including the provision of transportation systems, water pollution control, air pollution control, licensing of day care centers and the licensing, impoundment, and disposal of animals. Second class boroughs are given the power to exercise certain areawide powers and any non-areawide power not prohibited by law that is approved by a majority of the voters living in the borough. Third class boroughs are restricted to areawide powers of tax assessment and collection and education. Other powers can be exercised within service areas only.

Article IV establishes city powers. A city, within a borough, may exercise any power not otherwise prohibited by law. No city may exercise a power being exercised by the local borough. Home rule and first class cities, in a third class borough, may be required to exercise land use planning and regulation. Cities, outside a borough, may exercise a power not prohibited by law. A home rule or first class city, outside a borough, is a school district and shall provide for land use regulation and planning.

Article V allows acquisition of additional powers. Powers are transferred by a city to a borough or by areawide election. A number of voters filing a petition or the assembly proposing the acquisition of the power initiates official action. Within 30 days, the assembly must have one public hearing and evaluate the ability of the borough to exercise that power. Within 60 days after the borough's findings, an election must be ordered. The election process is detailed, with the specific requirement that the city and outside areas be tallied separately. Both groups must vote favorably. The power will be assumed within 30 days of a favorable election. The specific effects of acquiring an areawide power are detailed.

Article VI shows the construction of powers. A liberal construction

shall be given to all powers and functions given by Title 29. Also, unless limited by law, all powers necessary for the implementation of powers and functions conferred in Title 29 may be exercised.

Article VII allows for the establishment of service area controlled by ordinance. A city can be included in an areawide service area if the city passes an ordinance to that effect or if both city and non-city voters approve in an election. The controlling board may be elected or appointed. The levying of taxes and issuance of bonds is allowed but must be approved by the assembly. Article VI states what powers may be established in different classes of boroughs. Owners of real property may consent, in writing, to establishment of a service area in a place where no voters reside.

Article VIII is the miscellaneous provision defining "power" as the provision of a public facility and service, or the exercise of a regulatory power.

CHAPTER 40 provides for the functions of planning, platting and land use regulation for any first or second class borough.

The borough may transfer any of its powers to a city, but can unilaterally revoke the transfer. A planning commission must be established with the duties of preparing a proposed comprehensive plan and measures necessary to implement the comprehensive plan once it is established. The commission must be apportioned to reflect the population living in first class and home rule cities. The makeup of the comprehensive plan is outlined with the requirement of periodic overall review included. In accordance with the comprehensive plan, the assembly is required to adopt or amend provisions governing the use and occupancy of land. By ordinance, the assembly must provide for the appeal of an administrative decision, but are allowed to decide who will handle the appeal and how it will be handled. Chapter 40 requires an appeal of the second decision to be directed to the superior court which will handle an administrative appeal based on the record established by the first reviewer. By ordinance, the assembly must adopt platting regulations and a platting authority must be established

to administer subdivision regulations and other prescribed duties. An abbreviated plat procedure must be established for a plat that meets certain requirements. A waiver of platting requirements is required if the abbreviated plat requirements are met and only lots five acres or larger. The platting procedure is established with a specific time frame of 60 days being used. A recorded plat may not be altered, except on petition from the state, the borough, a public utility or the owners of a majority of the land affected. A notice of hearing with certain required information must be posted and a platting authority hearing held before a decision can be made. Addressed is the requirement of recording, handling of the title of vacated areas and the delegation of authority by the platting commission. A person who violates a land use regulation or requirement is guilty of a Class B misdemeanor. A civil action can be brought against a person who violates a section of the land use chapter. An injunction must be given by the superior court when a violation or a threatened violation occurs. Subdivisions of state land can not be required to meet capital requirements of a platting authority.

CHAPTER 45 authorizes municipal taxation.

Article I allows a unified municipality to levy a property tax. Boroughs are allowed to levy a property tax for services provided. The municipality must publish a notice to taxpayers explaining the amount of State municipal assistance programs received. Article I also deals with 7 classes of exemptions. All household furniture of the head of a household is now exempt. The new title will allow property of an auxiliary of a nonbusiness organization to be exempt. Lots adjacent to a structure used for religious purposes are no longer exempt. The exemption for 65 years or older persons' residences must be applied for in writing no later than January 31 unless a delayed date of March 31 has been adopted by ordinance. The governing body may waive the time required for a good cause. The State of Alaska will reimburse the municipalities for revenues lost by these exemptions. The law requires property tax equivalency payments to renters 65

years or older. The section dealing with 43 U.S.C. 1620(d) was changed by SB 260 (S.D. #4). A municipality may provide some optional exemptions, including the allowance of an exemption of property taxes for a residence with a $10,000 maximum amount. Other exemptions, exclusions, and classifications may be given if certain requirements are met. The requirement which did not allow taxation based on tonnage of a vessel to exceed prescribed amounts has been eliminated. Farm or agricultural use land shall be assessed on the full value of farm use (see Amendment #7). Exemption of greenhouses has been deleted. Taxes must be paid for the preceding 7 years if the land is sold or converted to uses incompatible with agriculture. Mobile homes established to a location will be classified as real property. An oil and gas production tax will be levied by one of two methods in A.S. 29.45.080. Taxes are limited to a maximum of $1500 per year per person within the municipality or the product of 225% of the average per capita assessed full and true value of property in the state multiplied by the number of residents of the taxing municipality. There are no limitations on taxes to pay the principal and interest on bonds. Assessments will be made at full and true value. Inventories may be valued as of January 1 or by the average monthly method of assessment. Each person having ownership of interest in property may be required to submit a prescribed form to the assessor. The assessor has the right to do an on premises independent investigation and may require a person to answer questions under oath. It is a class B misdemeanor to take actions with the intent of tax evasion. Re-evaluations made by the tax assessor will be done in accordance with a resolution or other directive of the municipality in a systematic manner. The assessor must annually prepare an assessment role with the description of all taxable property, assessed value of said property and the name and addresses of all property owners. The assessor is required to provide each owner a notice of assessed value of the property, the dates taxes are due, delinquent, subject to penalty and interest and the dates when the board of equalization will sit. The assessor may make corrections with the land owner having 30

days to appeal the amended assessment to the board. Article I provides for the makeup and operation of the board of equalization. A municipality may readjust assessments on property when a disaster zone is declared by the President of the United States or by the Governor of the State of Alaska. The tax levy and rate must be set by ordinance. The annual rate of levy must be determined before June 15. A penalty not to exceed 20 % of the tax due may be added, interest not to exceed 15 % per year shall accrue until the date the amounts are paid in full. A tax liability is a personal liability. A property tax lien is paramount to all other liens.

Article II provides for the enforcement of tax liens. The certified assessment and tax roles are valid and binding. The municipality may collect the tax in a personal action. The procedure for distraint and sale of property must be made by ordinance. A demand of payment to the property owner and the sale of the property by auction are required to make a sale legal and valid. If the property sold is insufficient to satisfy the debt, other personal property may be seized up to the amount of the debt. Excess funds from a sale of seized property must be paid to the former owner of record upon receipt of a proper claim within six months of the date of sale. Article II establishes that all real property tax liens shall be enforced by annual foreclosure. The procedures of foreclosure are given with the information necessary for administration of the process. The subjects covered in the rest of Article II are the foreclosure list , clearing delinquencies, list to lienholder, general foreclosure, answer and objection, judgment, transfer and appeal, redemption period, effect, additional liens, possession during the redemption period, expiration, deed to borough or city, disposition and sale of foreclosed property, repurchase by record owner, proceeds of tax sale, payment of taxes upon public utilization, and refund of taxes. These sections have had a few changes. A person with a lien on part of a piece of property can no longer redeem that part without redeeming the total property. The receipt of the redemption payment releases the judgement held by the municipality. It does not release all claims of the municipality against the property. The clerk is allowed to delegate the

publication of the redemption period expiration notice and the notice of hearing. The clerk would have been required to send a copy of the notice to holders of liens if the property was valued over $100,000. Committee Amendment #4 lowers the dollar amount to a $20,000 value. The last change is the allowance of a municipality to refund taxes that in the municipality's judgement would be required to be refunded by a court upon litigation. The governing body is permitted to correct manifest clerical errors.

Article III delineates the cities property taxing power. Home rule and first class cities, outside a borough, may levy taxes as provided by AS 29.45.010 - 29.45.500. Home rule and first class cities, within boroughs, may levy a property tax as provided by statute in section 560. Differential tax zones are allowed to pay for services not generally provided in the city. A second class city may levy property taxes, with a maximum limit of ½ of 1% of the property's assessed value,except when the taxes are used to repay bonded indebtedness. A ballot proposition to establish a second class city can include the proposition of a stated property tax. The petition may have the binding request that incorporation be dependent on the passage of a property tax proposition.

Article IV provides for borough sales and use tax. A borough may levy and collect a sales tax not exceeding 6% on sales, rents and services within the borough. If the borough levies a sales tax, it may also levy a use tax equal to the sales tax. The use tax will be levied only on buyers. The interest rate on delinquent amounts of sales or use tax may not exceed 15%. A notice of a sales and use tax must be given before the municipality can receive municipal assistance and revenue sharing. A sales or use tax, or an increase in either, must be approved by a majority of the voters.

Article V provides for city sales and use tax. The city may tax on all sources taxed by the borough and can also tax other sources authorized by the borough assembly. A sales and use tax may be incorporated in a petition for a second class city. If a petition asks for incorporation dependent on passage of a sales and use tax and the tax fails, the incorporation also fails.

CHAPTER 46 sets forth special assessments.

An assessment proposal, to the governing body, may be made by a petition from the owners having ½ of the property in value. An assessment proposal, also, may be made by the governing body. The procedure will be set by the municipality following certain requirements stated in Chapter 46. Objections must be filed within 60 days of publication of notice. If 50% or more of the owners of record object in writing during the period set, the improvement can not proceed until the objections are reduced to less than 50%. If, after the hearing and errors and inequities in the assessment roll are done, the assessment must be increased, a new hearing must be held. The procedures for payments, exemptions and the effect of liens is delineated. The State of Alaska will reimburse a municipality for any revenue lost due to Section 80, Chapter 46. The allowable costs of a special assessment district are outlined. The total amount of the assessment roll may not exceed actual costs, but actual costs may include reasonable estimates of the costs incurred in connection with issuances of bonds. An objection and appeal can only be made by an owner who objected in writing to the proposed district within 30 days of the confirmation date of the assessment role. A municipality may provide, by resolution or ordinance, for the issuance of notes for interim financing. Special assessment bonds may be authorized, by ordinance or resolution, to pay all or part of the cost of an improvement. A guarantee fund must be established in an amount adequate to cover a deficiency in meeting payments of principal and interest before the issuance of special improvement bonds.

CHAPTER 47 deals with municipal debt.

Article I deals with revenue anticipation notes. Any municipality may borrow money to meet appropriations in anticipation of receiving the necessary funds, with the requirement that the note be paid by the end of the next fiscal y[illegible] Notes must be authorized by ordinance and resolution under the terms described. Notes in anticipation of State or Federal grants may be made under the described method.

The payment of anticipation notes is from revenues and shall be secured by a pledge of the full faith and credit of the municipality issuing them.

Article II allows bond anticipation notes. A municipality can issue bond anticipation notes if the general obligation bonds have been authorized by ordinance and approved by the voter or if revenue bonds have been authorized by ordinance. Notes for amounts borrowed can not exceed one year. The notes are payable from proceeds of bond sales or from issuance of new notes. The total amount of notes outstanding may not exceed the amount of bonds authorized. The proceeds of the notes may only be used for the purposes of the bonds authorized.

Article III regulates general obligation bonds. General obligation bonds may be issued to raise revenue for capital projects. An election must be held to approve a bond authorization ordinance. A public notice shall be issued 20 days before the election. The notice will include the current general obligation bonded indebtedness, the cost of the debt service, and the total assessed value of property in the municipality. The full faith and credit of the municipality is pledged for the payment of principal and interest.

Article IV regulates revenue bonds. Revenue bonds may be issued to raise revenue for a public enterprise or public corporation. Revenue bonds can be used to finance the purchase of residential mortgage loans. No elections are required and revenue bonds are excluded from the application of the prohibition against a political subdivision of the state making a subscription to the capital stock of a corporation, lending its credit for the use of a corporation, or borrowing money for the use of a corporation.

Article V authorizes the refunding of bonds, both general obligation and revenue bonds by ordinance or resolution. All or part of the bonds can be redeemed with no requirement of an election.

Article VI contains miscellaneous provisions. A municipality may authorize revenue bonds for any project which meets a public need. The payment of these bonds may only be from bond revenue, and the city does not pledge its faith and credit. The municipality sets the terms

and conditions by ordinance and can set the interest rate without limitation to AS 45.45.010. Borough indebtedness is on an areawide basis for areawide functions and on a non-areawide basis for non-areawide services.

CHAPTER 55 provides for municipal programs.

The governing body of a municipality may establish a local historical district or designate the planning commission or itself as the historical district commission. A historical district shall be of a reasonably compact area containing two or more structures important in state or national history, and related by physical proximity or historical association. The establishment of a historical district under this section shall be consistent with any applicable comprehensive plan for the municipality.

CHAPTER 60 establishes state programs.

Article I is a continuation of the municipal tax resource equalization. The equalization entitlement computed for a taxing unit is based on population, the units ability to generate revenue and the amount of taxes paid. A formula of the entitlement = P X R where P = population and R = the millage rate equivalent. The population must be determined annually by the latest figures of the United States Bureau of Census or equally reliable figures. The determination of the millage rate must be initially made by the department, with the final determination no later than December 15. The millage rate is determined according to factors established in article 1. The payments may not be made until the required reports of the estimated revenue and financial report are submitted. A limitation on the computation and use of payments, the administrative authority and necessary definitions are also included in this article.

Article II provides state aid for miscellaneous purposes. State aid for roads is set at $2500 per mile of road properly maintained by the municipality and $1500 per mile for designated ice roads. State aid for health facilities and hospitals is set at $50,000 for facilities with less

than 10 beds and $250,000 for 10 beds or more. State aid to volunteer fire departments registered with the state fire marshal serving in an unorganized area will receive an amount equal to $10 per person served. State aid to unincorporated communities is set at $25,000 per year. A cost of living differential will be reflected in payments to the above Article II programs. The miscellaneous services account is established to carry out the provisions of A.S. 29.60.100 - 29.60.180 and the authority for the necessary regulations given.

Article III providing state aid for hospital and health facility construction was repealed and changed by SB-85 (S.D.18) (see Amendment #10).

Article IV sets administration of state aid programs. Each year the amounts determined by the legislature will be allocated to the accounts established in Chapter 60. The qualifications for minimum payments are set forth along with the procedure for handling proration of payments.

Article V establishes the municipal assistance fund. The legislature may appropriate an amount equal to or greater than 30 percent of the income tax revenue. The money must be distributed to the municipalities on an annual basis with a base amount being the amount the municipality or a like municipality received in FY78. Any amount above the base will be distributed on population. Population will be determined by the Commissioner of the Department of Community Regional Affairs. The intent of municipal assistance above the base amount is to reduce the tax burden of the municipal taxpayer. Article V provides the general provisions. The definition of a health facility and of a hospital are given.

CHAPTER 65 deals with the general land grants.

It has not been changed from the current Title 29. The determination of the entitlement of municipalities is given. A city is entitled to 10% of the maximum total vacant, unappropriated land. The requirements, procedures and actions necessary to obtain a land grant from the State of Alaska, or from school, university, or mental health land, and/or to

receive payments for land deficiency are in this Chapter. This Chapter authorizes land exchanges in the public interest. A municipality must decide if they will continue litigation of claims under former AS 29.18.190 and 29.18.200 or obtain the benefits given by this Chapter. The Commissioner of the Department of Natural Resources may adopt the necessary regulations.

CHAPTER 71 establishes the general provisions of Title 29.

A municipality may not be divested of title to real property by adverse possession. Dedication of streets, rights-of-way, easements or other public use areas does not require the city to maintain, improve, or provide services and does not impose a liability. A municipality may not be taxed by the State unless expressly provided for by law. The necessary terms are defined as to general context. No agency may acquire property which will change municipal boundaries unless the platting authority approves a replat. Elections shall be held on the first Tuesday in October. The elections shall be supervised by the Director of Elections in the Lt. Governor's office. The Lt. Governor shall adopt regulations for the conduct of elections of the regional school board members as comparable to the election of other school board members as possible. The rural school boards are subject to recall and the director of the division of elections shall perform the duties of municipal clerk. A single body can act as both the assembly and school board if certain conditions are met. A bond is required before an officer responsible for a school districts money can take office. The Department of Community and Regional Affairs will prepare a determination of the full value of taxable real and personal property in each district by October 1. There are also many sections which are reworded to conform to the new numbering of HB172.

Article XII establishes the ability of the Commissioner of the Department of Community and Regional Affairs to contract for a feasibility study of establishing boroughs in the unorganized borough. It requires that an appropriation be made for that purpose and that a request come from an individual living in the area to be studied. How to request the study, the boundary requirements and how contracts will be handled is delineated.

AMENDMENTS

The following is a list that presents a brief explanation of the amendments that were discussed and that received approval from the House Committee on Community and Regional Affairs during the 1983 legislative session. The following amendments 1 through 10, cover the concerns brought out from the proposals previously conducted by the Hammond Administration as well as progressively bringing further clarity and flexibility to Title 29.

AMENDMENT #1 - clarifies the participation of a municipal employee or official in instances where the employee or official has substantial financial interest that may constitute a conflict of interest. Other items on the amendment are grammatical changes and general house keeping changes to further clarify the language (S.D.#9). passed

AMENDMENT #2 - removes the requirement of determining the "sufficiency of grounds" for a recall election. It replaces "providing legal grounds" with "providing reasons for" and amends the percentage amount of signatures required to constitute a recall election from 25% to 35% (S.D.#10). DNP

AMENDMENT #3 - defines the intent of eminent domain process. As written, the statement may have not met the intent of allowing municipalities to exercise the right of eminent domain to acquire specific certificates or properties (S.D.#11). passed

AMENDMENT #4 - lowers the minimum value of property to be foreclosed upon without notification to the owner by certified mail to $20,000.00 from the proposed limit of $100,000.00 (S.D.#12). Presently, property of any value must be notified. passed

AMENDMENT #5 - specifies the date that Chapter 45 of Title 29 as written in House Bill 172 will go into effect. The amendment will avoid the possibility of a split tax year and will provide lead time for municipal planning and department assistance for mandated state and federal programs (S.D.#13).

passed

AMENDMENT #6 - This amendment did not receive committee approval (S.D. #14).

dnp

AMENDMENT #7 - deletes "greenhouses" from being considered under a special lower assessment for property taxes on farm use land. The special taxing provisions for farm use land is designed to help farmers resist pressures to sub-divide their land (S.D.#15).

passed

AMENDMENT #8 - deals with required tax exemptions which contain new language that defines "developed" for the implementation of a required federal tax program. This concern was addressed and resolved in Senate Bill 260 (S.D.#16).

dnp

AMENDMENT #9 - relates to the Alaska Public Utilities Commission. The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is not subject to regulation by the Alaska Public Utilities Commission (S.D.#17). Please review HB274 (S.D.#5) which dealt with this issue.

dnp.

PROPOSED AMENDMENTS FOR CONSIDERATION DURING 1984 SESSION

AMENDMENT #10 - Legal Services is preparing this amendment, by request of the Chairman, to be considered by the Committee on Community and Regional Affairs during the 1984 legislative session. It will encompass all legislation that was signed into law during the 1983 session that pertains to Title 29. This action is necessary in order to reflect changes made to Title 29 that are not now incorporated in the revision bill.

passed

Three separate pieces of legislation became law. SB85 relates to the certificate of need program and construction funding for health facilities (S.D.#18).

Senate Bill 260 which provides for the definition of "developed" as it relates to lands that are exempt from taxation as stated by federal law (S.D.#4). House Bill 274 would exempt a utility which furnishes cable television from the provisions of the Alaska Public Utilities Commission Act (AS 42.05.010 thru AS 42.05.721) with the exception of provisions requiring a certificate of public convenience and necessity (AS 42.05.221 thru AS 42.05.281), unless 25 percent of the subscribers petition the commission for regulation (S.D.#5).

AMENDMENT #11 - "special hospitals" to be included in definition of health facilities - AS 29.60.800(2), page 169, line 3 of House Bill 172. That section as currently drafted discriminates against special hospitals by excluding them from hospital revenue sharing. Since these facilities are required to be built to acute hospital standards and function as an acute facility with a specialty license, language to resolve this discrepancy may read as follows:

passed

> AS 29.60.800(2),
> "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general or special hospital; the term excludes a facility operated or wholly supported by the state of the federal government (S.D.#19).

The following amendment is the differences between House Bill 172 and CS Senate Bill 1 at present. If adopted, both bills would be in line.

AMENDMENT #12 - page 33, after line 28, insert new line (26) 29.3-5.060 (franchise and permits) and renumber following paragraphs accordingly.

page 77, after line 6, add a new subsection - (c) this section applies to home rule and general law municipalities.

page 77, line 9, after "regulate" delete [,] and add a utility service and"

page 77, line 12 after "is" delete [not] and after AS 42.05, delete [and] and add "or"

page 77, line 14 delete [(2)...law.] and add (2) municipal regulation is prohibited by AS 42.05.711 (k) or other law.

page 77, line 17-20, delete subsection (c) and add a new subsection (c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose, the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

page 77, lines 21-22, delete subsection (d) and add a new subsection (d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges established under this section shall be reasonable and permit a fair return on invested capital.

page 77, Sec. 29.35.070, add new subsection (e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

page 77, Sec. 29.35.070, add a new subsection (f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

page 77, Sec. 29.35.070, add a new subsection (g) This section applies to home rule and general law municipalities.

page 195, line 22, add Sec. 62. AS 42.05.711 is amended by adding a new subsection (k) A public utility that is exempt or partially exempt under this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a municipality. This subsection does not apply to a public utility exempt under (b) of this section.

Renumber the following sections accordingly.

page 107, line 29, after "borough" delete [including...period;]

page 61, line 10, after "(3) delete [is] and add "has been
after "elections" add for at least 30 days immediately preceding the municipal election; and

page 1[illegible], lines 17-26, after "action." add The standards and procedures established under this subsection that apply to detachment shall be the same as the standards and procedures that apply to annexation, except that the standards and procedures that apply to detachment must include provisions for equitable prorated payment of debts acquired by the municipality before the detachment.

page 14, line 19 after (1) add, subject to (2) and (3) of this subsection,

page 14, line 23 after "annexed" delete [by ordinance ...approval] and add or detached by ordinance without an election;

page 14, line 24 after "annexed" add or detached

page 14, after subsection (3) add a new subsection (4) within 90 days after receipt of a petition for annexation or detachment, the Local Boundary Commission shall make a decision on the petition. (S.D.#20)

AMENDMENT #13 - Change effective dates to present year.

passed

Official Business

MEMORANDUM 12 February 1981

TO: Representative Hugh Malone
Chairman, Legislative Council

FROM: Senator Arliss Sturgulewski
Chairman, Title 29 Revision Policy Advisory Group

As chair of the Title 29 Policy Advisory Group, I am pleased to submit a bill revising Title 29 of the Alaska statutes. This revision of the municipal government statutes was mandated last year by SCR 66 "Directing the Alaska Legislative Council to revise AS 29 (Municipal Government)". Under this resolution, a thirteen member Policy Advisory Group was appointed to oversee the revision process. In addition to four legislative members; Senator Bob Ralcahy, Representative Charles Parr, Representative Margaret Branson, and myself, nine members represented various levels of local government and geographic areas of the state.

This proposed bill represents a tremendous volume of work completed within a limited time frame. However, the revision of Title 29 has been throughly and carefully considered in spite of this time constraint. This is due in large measure to the real concern about local government shared by all members of the Policy Advisory Group. Excellent assistance was provided by a Technical Group composed of two Advisory Group members, municipal attorneys, and a city clerk. This Technical Group was formed to assist the legislative legal staff and the Advisory Group in interpreting provisions of the law and in revising specific statutes. Policy decisions were made by the Policy Advisory Group.

Since the first organizational meeting in August 1980, three complete redrafts of Title 29 have been prepared and reviewed. The legislative Legal Services staff, under the direction of Billy Berrier, is due special recognition for the tremendous amount of staff work provided to the Policy Advisory Group, especially Ms. Tamara Brandt Cook, who was responsible for the successive drafts of Title 29.

SB
180

Public testimony was received during the monthly meetings of the Policy Advisory Group from representatives of local government, Native organizations and state agencies. Numerous presentations were made to interested organizations, including a work session at the Alaska Federation of Natives annual meeting, participation at the annual Alaska Municipal League conference and numerous presentations to various interest groups.

A complete report of all changes proposed in Title 29, as well as a explanation of those sections that were deleted from the final bill, has been prepared. This section-by-section analysis will be submitted to respective Senate and House committees of first referral.

The Policy Advisory Group voted unanimously to recommend this bill to the Legislature for passage. While, overall, the committee is satisfied with this bill, it necessarily represents compromises on issues of local government structure by all members of the group. The Policy Advisory Group provided for the submission of minority reports with the Title 29 bill. One minority report was received, and is being submitted with the proposed bill.

The Policy Advisory Group, in its initial meetings, developed two basic guidelines for its revision of Title 29. These can be characterized as the simplification of the title's organization and the achievement of maximum flexibility in the structure and functioning of local government. Simplification of the organization of Title 29 will make it easier for everyone involved with, or interested in municipal government to understand the state's municipal code. Simplification included the clarification of the range of local governmental powers and how those powers can be assumed.

Flexibility in carrying out local administrative and procedural responsibilities meant reducing unnecessary statutory directives on local actions. The Policy Advisory Group recommended the deletion of a number of technical requirements on how local governments were to undertake day-to-day functions. These provisions included requirements for specifying a particular date for council and assembly meetings, the form of local ordinances, specific election dates and procedures, and so on.

However, in meeting the public's desire for more flexibility in the functioning of local government, the Policy Advisory Group was well aware that they were in effect eliminating a model for governmental activities that could be used by newly formed municipalities. Although it does not appear in the proposed revision of Title 29, the Policy Advisory Group found that more technical assistance in defining local government's structure and procedure will be required by local governments once the revision of Title 29 is adopted. To this end, the committee recommends that the capability of the Department of Community and Regional Affairs to provide expanded technical assistance be evaluated and matched to the future demand for the Department's services.

The mandate given the Policy Advisory Group was to prepare a revision of Title 29 for submission to the Legislature. With the submission of this bill, the Policy Advisory Group has fulfilled their mandate. However, there were a number of major policy issues brought before the Policy Advisory Group that could not be addressed within the scope of the revision of Title 29. I would like to outline some of these major issues which the Policy Advisory Group feels will merit further consideration by the Legislature.

SB
180

The major policy issue beyond the scope of the Title 29 revision was the widespread demand for more local control, both over local matters and over state and federal programs affecting communities. The public brought a variety of proposals before the Policy Advisory Group, from demands for more local direction of state programs, to the granting of municipal rights and powers to Native governments; to the desire for self-governing regional organizations that would be something other than boroughs or unified municipalities. Major policy issues relating to these proposals include the constitutional and statutory basis of such self-governing organizations; questions of representation that must meet federal Supreme Court mandates; and problems of designing mechanisms that will enable the diverse range of local governments to effectively influence state and federal programs.

In testimony before the Policy Advisory Group, two state agencies proposed that local governments consider taking over those agency programs that were primarily local in nature. While responding to the desire for more local control over their programs, neither agency had a clear idea of the cost or manpower requirements such decentralization would place on local governments. As a result, it was not possible to determine whether the total costs of these programs would increase with decentralization, when staff and program costs would be duplicated among several local governments. An important question to be answered by the Legislature, is how much the state is willing to pay to meet the demands for local control. Local governments will need support to carry out statutory mandates. Is the Legislature willing to provide more support to local governments than it presently provides state agencies?

A common problem faced by rural residents is the multiplication of agencies and organizations formed to respond to state and federal program requirements. There was a general call for coordinating and streamlining requirements that now result, in some cases, in up to 10 local boards and organizations. These may include a city council, IRA council, village corporation board and subcommittees, membership in various non-profit organizations (formed to provide health services, state and federal contract construction services, BIA funded social services, regional housing authorities, and so on) and regional Coastal Resource Service Areas and Regional Education Attendance Areas and so on.

Comments on the "pros" and "cons" of the service area concept and its use were brought to the Policy Advisory Group. Some rural residents expressed a strong feeling that the creation of separate single-purpose service areas led to a fragmenting of local control. Others felt that service areas would be the best vehicle for additional public services in the unorganized borough. In any event, the creation of additional single-purpose service areas, to be superimposed on the existing system of REAAs, Coastal Resources Service Areas and Aquaculture Districts, needs to be given serious thought. This is especially true in light of the constitutional intent of a simplified system of local government. Or, put in another way, should the Legislature create a multi-layered type of governmental system in the unorganized borough that is considered undesirable within an organized city or borough?

SB
180

In short there is a widespread and growing concern in all areas of the state about the nature and structure of local government. The proposed revision of Title 29 addresses many of the difficulties of organized local governments, and will hopefully make it easier for areas to incorporate and function as municipalities. In addition to this revision the legislature will be faced with a number of questions on the very substance and purpose of local government and local self-determination that go far beyond the recommended revision of Title 29. In order to answer these public concerns, the Legislature will have to be prepared to reassess the constitutional and philosophical foundations of local government in Alaska.

I see the revision of Title 29 as the first ne[illegible]ep in this reevaluation of the structure and function of l[illegible]overnment in our state. When our constitution was adopted in 1956, its provisions for local government were the most advanced in the nation. As with the update of the municipal code in 1972, the present effort to revise Title 29 reflects a continuing commitment to developing a healthy, flexible, and most functional system of local government possible to meet Alaska's needs.

In closing, I would like to request that this memorandum be made a part of the Journal Supplement upon submission of this bill.

January 21, 1981

Senator Arliss Sturgulewski
Chairman
Title 29 Revision Commission
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

As we discussed during the Title 29 Revision Commission meeting of January 17-18, 1981, I wish to submit a minority report.

In general, I agree with the direction taken, and in some instances do not consider issues of sufficient import to justify taking written exception. I think it speaks well for the Commission that mine will probably be the only minority report, and that I can confine myself to two issues.

It was a pleasure to work with you.

Sincerely,

Charles H. Parr

TITLE 29 REVISION COMMISSION

Minority Report

At the first meeting of the Commission I laid out what appeared to me to be two general directions in which work should proceed:

1 - The garage mechanic, housewife, or other average citizen, when elected to the city council or borough assembly, should be able to read the Code and understand it.

2 - After ensuring that the Code contained provisions which would guarantee democratic rights common to all citizens of the State, we should "take the strings off" the municipalities as much as possible.

In my view, the Commission's work went a long way toward reaching this first goal. Although the Code is still somewhat confusing, it is much improved in organization and a number of passages with convoluted syntax have been removed.

I do not agree with the Commission's recommendation for abolition of the third class borough. No one has, in my judgment, presented compelling arguments for depriving citizens of this local government alternative. The third class borough at the present time offers a form of local government which is less demanding than that of the first and second class borough, and yet it has powers other than education. It may exercise these powers on a service area basis.

Apparently the crux of the matter is the fact that the third class borough is not required to exercise planning and zoning functions and this is anathema to the professional planners in our midst. I can find no other justification for their opposition.

The second point on which I wish to disassociate myself from the Commission's majority recommendations is that of State compliance with local subdivision regulation. It is common knowledge that the present administration, by its refusal to release land into private ownership, held down the safety valve on the steam boiler and caused the Beirne initiative explosion. We were rescued from the (probably) devastating effects of the initiative by the Supreme Court ruling that it was an appropriation and therefore unconstitutional. In an attempt to release some pressure from the "boiler", the Legislature has established the land disposal program and is insistent that sufficient land be made available to prevent a future such initiative which might meet constitutional tests.

If the State must meet subdivision requirements, several things will happen:

1 - The land disposal program will be delayed as necessary roads, and perhaps other improvements, must be constructed and pass municipal inspection before the land can be disposed of.

2 - The cost of improvements will be high and the State will be faced with a large subsidy for each parcel disposed of. If this large subsidy is not to be made, the parcels of land will be priced out of reach of many of the persons who would like to have them (especially young couples getting started).

3 - Subdivision standards vary from place to place. The State will be, in effect, favoring those municipalities which have higher subdivision standards. This could well lead to municipalities upgrading their standards in order to receive more from the State.

The whole issue of what the State should do in land disposal will be before the Legislature this year and a number of major policy decisions need to be made. I do not consider it appropriate to make such decisions in what was intended to be a non-policy revision of Title 29.

SB 535 (Cont.)

changing court rules. However, even if a two-thirds vote was necessary, the Senate's vote to concur in the House amendments was not affected by the subsequent failure to adopt the rule changes. The vote to concur passed by the required 11 votes, and that vote was to adopt the identical bill that had passed the House. Under Rule 39(e) the failure of the Senate to take a separate vote on the rule change simply meant only that secs. 43 and 44 (and potentially their respective companios -- 18 and 40) are now "void and without effect."

The issue that is presented is very similar to one which has arisen when one house votes to concur in amendments made by the other house, but then fails to adopt, for example, an immediate effective date included in the bill by a two-thirds vote as required by Rule 39(f). The procedure specified in Rule 39 (e) pertaining to votes on court rule changes is virtually identical to the language in Rule 39 (f) pertaining to votes on special effective date clauses. There is ample authority in support of the rule that a failure to adopt a special effective date by a two-thirds vote after concurring in a bill by a majority vote means that the bill has been adopted with an ordinary 90-day effective date. This authority rests on a construction of the effective date as not being a material factor influencing the favorable vote. This rule should apply by analogy to the failure of the Senate to vote separately on the rule change provisions in this bill. consequently, I have concluded that HCS CSSB 535 (Jud) am H has been adopted by the legislature but without the effect of changing the court rules cited in sec. 43 and 44.

Sincerely,

/s/Jay S. Hammond

SB 180 VETOED

July 15, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under Article II, Sec. 15, of the Alaska Constitution, I have vetoed HCS CSSB 180 (Jud) am H, relating to municipal government.

SB 180 (Cont.)

I regret having to take this action for several reasons. Certainly, the bill contains many meritorious revisions and improvements to the municipal code. These were the product of an arduous undertaking accomplished after three years of unprecedented cooperation among legislators, state and local government officials and staff. Further, there are some concepts contained within questionably designed and inadequately considered amendments which I believe should be addressed responsibly by the next Legislature. While perhaps none of these amendments is individually sufficiently flawed to warrant a veto of the entire measure, a combination of them creates significant problems that have incurred greater collective public opposition than has almost any other legislative action in my entire political experience. It's for these reasons that I have regretfully concluded that it is simply not in the best public interest to permit this bill to become law.

For example, the amendment redefining "population" and permitting the counting of workers at "isolated job sites" appropriately recognizes that the influx of seasonal employees can significantly impact local services for which there is now no readjustment provided under revenue sharing statutes. However, I am advised by counsel that the manner in which this matter is handled in SB 180 seriously jeopardizes the resolution reached by the state with the U.S. Census Bureau and could incur substantial losses in federal funding to both state and local governments. While I believe some redistribution of state funds is warranted to assist communities most impacted by seasonal and temporary influxes of population, (whether they be "isolated" communities or otherwise), I am concerned with the potential inequity created by this amendment. The vagueness of the term "isolated job site," I am advised, could result in endless litigation no matter what clarifying efforts might be made through regulation. This questionable feature, coupled with prospective revenue losses to the state treasury ascribed to it by the Department of Revenue in their request for veto, are but two of several causes for concern.

I as well favor the basic policy decision of the Legislature that forest values above ground, (just as mineral values beneath it), should be accorded different status for purposes of municipal taxation. However, the provision exempting forest lands from municipal property taxation contains a definition by reference that poses substantial problems of interpretation and impact according to all concerned state agencies. I am advised by the Department of Law, for example, that the definition problem alone would probably induce costly and unnecessary litigation.

Perhaps more importantly, bond counsel advises that the bill would gravely impede local government general obligation bond programs in progress and significantly harm the credit ratings of virtually all Alaska communities. This feature is perhaps the most damaging potentially of all the questionable features contained in SB 180 and, in the view of most financial consultants, would alone warrant veto. I

SB 180 (Cont.)

am certainly in no position to second guess and override them in this conclusion. They assert the resulting adverse effect of this feature is likely to be a decline in market value of outstinding issues and an increase in the costs for new financing. Potential impact on the state's bond bank is, of course, of equal concern.

Additionally, the Department of Natural Resources has expressed major concerns over the manner in which this amendment might apply, despite their agreement with the avowed basic philosophical intent of the amendment's sponsors. They point to the Oregon forest value taxing policies as a far preferable approach to meet that objective. Accordingly, I have directed that legislation be drafted which would more appropriately address this matter.

Another problem rests in the attempt to clarify statutory references regarding tax exemptions of undeveloped Alaska Native Claims Settlement Act lands. Agencies have raised unanswered questions as to whether the language is indeed clarified. Moreover, a retroactivity feature of this provision casts serious "public purpose" doubts upon the legality of the proposed solution.

The amendment prohibiting local governments from passing ordinances relating to firearms has been violently objected to by some law enforcement people. It causes me concern as well because of my reluctance to permit state government to implede the ability of local communities to govern in a manner deemed by themselves most responsive to their unique needs.

Objected to by many others requesting veto is the further intrusion into the conduct of local government business represented by amentment 13. This would expand the initiative and referendum process to include local administrative matters. Those requesting veto assert that actions of the governing body elected by the public should be subject of initiative and referendum; but that ongoing daily administrative matters should be subjected to the usual review and oversight inherent in the concept of a governing body of elected officials held accountable for actions of those whom they employ. For state government to impose its will in such matters upon local governments without far more public debate than was accorded this amendment, appears to me to be yet another undue incursion of "Big Brother" into local matters.

Another section affects a major change in public utility regulatory philosophy, and reverses the direction chosen with deregulation in 1980. In urging veto a multitude of agencies and utilities pled for further public hearings and agency consideration before so drastic a change be contemplated. Again, if this alone were the measure's greatest flaw, I perhaps would not have vetoed it. However, in conjunction with a multitude of other alleged defects and public confidence eroding features, it adds one more reason for my action.

SB 180 (Cont.)

A final problem is one related to language, not concept. This provision allows municipalities to use the group insurance concept for the purpose of pooling their workers compensation liabilities and claims handling. The language appears to mandate board adoption of regulations permitting a municipal employer group to recede under any circumstances. It seems only prudent that qualifications be stipulated so that municipalities requesting approval for group self insurance status are subject to the same regulatory criteria as any other self-insured employer.

The subject legislation has produced more controversy and debate than any other to emerge from the 12th Legislature. Because I find some issues addressed in the amendments, as well as the municipal code revisions, to be desirable, I am taking specific steps to encourage the 13th Legislature to address these issues. Accordingly, I have directed that legislation be drafted which would accomplish the municipal code revisions effective prior to the floor amendments. This would address the problem areas in a manner both acceptable to me and, I believe, to most legislators.

I have also directed that legislation be prepared to address the forest lands and taxation issues in a more acceptable manner to accommodate the appropriate intent of these amendments' sponsors.

I have also directed legislation be prepared to address the workers compensation provisions allowing local governments to use the group self-insurance concept for the purpose of pooling their workers compensation liabilities and claim handling.

Further, I'm directing the Department of Community and Regional Affairs to draft regulations on the provisions of state assistance to local governments in a manner which compensates more equitably those communities impacted by seasonal, temporary and isolated workers. Minimally, I would hope that in the short term we could at least "hold harmless" the North Slope Borough, which otherwise stands to lose about $2 million in revenues from the amount they received last year. All other municipalities would receive, I'm told, increases. Accordingly, I would hope tht all other municipalities, which rose in violent protest over the prospects of revenue losses to themselves were SB 180 to become law, would be equally concerned about revenue losses ocurred by other municipalities through this measure's veto.

I do not intend to submit legislation re-regulating public utilities at the municipal level unless some valid arguments can be presented for this change.

The legislative package presented to the 13th Legislature will, of course, be that of the future governor. Therefore, I cannot guarantee that all these proposals will come before the House and Senate. However, several key legislators who are likely to return assure me of their dedication towards

SB 180 (Cont)

address of these matters.

Despite the bill's problems, I was at first inclined to go along with policy decisions rendered by the Legislature in their passage of 180. After all, by so doing I could assure these issues would be addressed next session if as serious as opponents were contending. However, a growing crescendo of public opposition, virtually unanimous staff and agency veto recommendations, plus pleas from some legislators who now wish to do penance for having voted for the measure, cause me to conclude that while a veto does a disservice to the legitimate concerns of some communities and interests, permitting the bill to become law could incur even more disservice to all others. Finally, as one of two senators who will assuredly return next session, let me urge you, Mr. President, to place this crucial issue high upon you agenda.

Sincerely,

/s/ Jay S. Hammond

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 42 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA -

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the determination of population for purposes of calculating amounts of state aid; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.88.015 is amended to read:

Sec. 29.88.015. DETERMINATION OF POPULATION. (a) For purposes of AS 29.88, the population of a taxing unit shall be determined annually by the latest figures of the United States Bureau of the Census or by another method of determining the actual [OTHER] population based on current criteria of the United States Bureau of the Census that [DATA WHICH], in the judgment of the department, is equally reliable.

(b) The population of the taxing unit includes all persons who usually reside within the taxing unit and the population of any military reservation that [WHICH] is a part of the taxing unit. No person may be included in the population of more than one taxing unit.

* Sec. 2. AS 29.89.060 is amended to read:

Sec. 29.89.060. POPULATION DETERMINATION. (a) For purposes of AS 29.89, population shall be determined by the latest figures of the United States Bureau of the Census or other reliable population data, including current criteria of the United States Bureau of the Census, [BUT NOT LIMITED TO] public school enrollment figures, public utility connection, registered voters or certified employment payrolls.

* Sec. 3. AS 29.89.060 is amended by adding a new subsection to read:

(b) The population of an area for which a population determination is made under this section includes all persons who usually reside within the area and the population of any military reservation that is a part of the area. A person may not be included in the population of more than one area for which a population determination is made under this section.

* Sec. 4. This Act takes effect July 1, 1983.

6

Chapter 97

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of exploration and development, this exemption shall continue with respect to that portion of the leased tract that is used solely for the purpose of exploration.

(l) If property or an interest in property that is determined not to be exempt under (a)(9) of this section reverts to an undeveloped state, or if the lease is terminated, the exemption shall be granted, subject to the provisions of (a)(9) and (k) of this section.

* Sec. 3. This Act takes effect January 1, 1984.

AN ACT

Relating to exemption from municipal property taxation of certain property exempt from taxation under federal law; and providing for an effective date.

---

* Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(9) real property or an interest in real property that is exempt from taxation under 43 U.S.C. 1620(d), as amended.

* Sec. 2. AS 29.53.020 is amended by adding new subsections to read:

(k) For the purpose of determining property exempt under (a)(9) of this section, the following definitions apply to terms used in 43 U.S.C. 1620(d) unless superseded by applicable federal law:

(1) "developed" means a purposeful modification of the property from its original state that effectuates a condition of gainful and productive present use without further substantial modification; surveying, construction of roads, providing utilities or other similar actions normally considered to be component parts of the development process, but which do not create the condition described in this paragraph, do not constitute a developed state within the meaning of this paragraph; developed property, in order to remove the exemption, must be developed for purposes other than exploration, and be limited to the smallest practicable tract of the property actually used in the developed state;

Chapter 30

AN ACT

Relating to the regulation of public utilities; and providing for an effective date.

---

* Section 1. AS 42.05.711 is amended by adding new subsections to read:

(k) A utility which furnishes cable television service is exempt from the provisions of this chapter other than AS 42.05.221 - 42.05.281 unless 25 percent of the subscribers petition the commission for regulation.

(l) A person, utility, or cooperative that is exempt from regulation under AS 42.05.711(a) or (d) - (k) is not subject to regulation by a municipality under AS 29.48.060 - 29.48.090.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

HOUSE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to municipal government; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.03 is amended by adding a new section to read:

Sec. 29.03.030. PLATTING AUTHORITY. Subject to AS 40.15.075, the Department of Natural Resources is the platting authority in the unorganized borough in the area outside all cities.

* Sec. 2. AS 29 is amended by adding a new chapter to read:

CHAPTER 04. CLASSIFICATION OF MUNICIPALITIES.

Sec. 29.04.010. HOME RULE. A home rule municipality is a municipal corporation and political subdivision. It is a city or a borough that has adopted a home rule charter, or it is a unified municipality. A home rule municipality has all legislative powers not prohibited by law or charter.

Sec. 29.04.020. GENERAL LAW. A general law municipality is a municipal corporation and political subdivision and is an unchartered borough or city. It has legislative powers conferred by law.

Sec. 29.04.030. CLASSES OF GENERAL LAW. General law municipalities are of five classes:

(1) first class boroughs;

(2) second class boroughs;

(3) third class boroughs;

(4) first class cities;

(5) second class cities.

Sec. 29.04.040. RECLASSIFICATION OF SECOND CLASS CITIES. (a) A second class city may be reclassified as a first class city by holding an election on the question, if the department determines from the best figures available that the population of the city has reached 600 permanent residents.

(b) An election on the question of reclassification may be initiated in two ways:

(1) a number of voters equal to 15 percent of the number of votes cast in the city at the preceding regular election may file a petition with the council; or

(2) the council may propose reclassification.

(c) The council shall hold at least one public hearing in the city on the question of reclassification. The council shall then evaluate the ability of the city to assume first class status and make its findings public.

(d) The council shall, within 30 days after its findings have been made public, order an election on the question of reclassification. The election shall be held at least 30 days after the order and not later than the next regular election occurring after the 30-day period. If more than one question is to be voted on at the election, each shall appear separately on the ballot.

(e) The council shall certify the election results to the department. If the majority of votes cast is favorable, the city shall be considered reclassified to first class status 30 days after certification of the election results.

Sec. 29.04.050. RECLASSIFICATION OF SECOND CLASS BOROUGHS. A second class borough may reclassify as a first class borough in the manner provided by AS 29.35.320 - 29.35.330 for the addition of an areawide power by a first or second class borough, except the petition

or proposal requests reclassification instead of requesting addition of a power.

Sec. 29.04.060. RECLASSIFICATION OF THIRD CLASS BOROUGHS. (a) A third class borough may reclassify as a first or second class borough in the manner provided by AS 29.35.320 - 29.35.330 for the addition of an areawide power by a first or second class borough, except the petition or proposal requests reclassification instead of requesting addition of a power. At the time of voting on reclassification of a third class borough to first or second class status, voters shall vote also on whether the borough shall on reclassification retain a combined assembly and school board or elect a separate assembly and board as otherwise provided for first and second class boroughs.

(b) If a combined assembly and school board are approved at the reclassification election, the assembly serving at the time of the election continues to serve as the assembly and board on voter approval of reclassification and until terms of assembly members expire as provided before reclassification. If a separate assembly and school board are approved at the reclassification election, a school board shall be elected in conformity with AS 14.12.030 - 14.12.100 at the next regular election, if it occurs within 90 days of the date of the reclassification election, or otherwise at a special election within 90 days of the date of the reclassification election. Expiration dates of terms of school board members elected at a special election must coincide with the date of the regular election. Until a board is elected and qualified, the assembly continues to serve as the board.

* Sec. 3. AS 29 is amended by adding a new chapter to read:

CHAPTER 05. INCORPORATION.

ARTICLE 1. REQUIREMENTS.

Sec. 29.05.010. INCORPORATION OF A CITY. (a) A community that meets the following standards may incorporate as a home rule or first class city:

(1) the community has 600 or more permanent residents;

(2) the boundaries of the proposed city include all areas necessary to provide municipal services on an efficient scale;

(3) the economy of the community includes the human and financial resources necessary to provide municipal services; in considering the economy of the community, the Local Boundary Commission shall consider property values, economic base, personal income, resource and commercial development, anticipated functions, and the expenses and income of the proposed city, including the ability of the community to generate local revenue;

(4) the population of the community is stable enough to support city government;

(5) there is a demonstrated need for city government.

(b) A community that meets all the standards established in (a) of this section except (a)(1) may incorporate as a second class city.

Sec. 29.05.020. LIMITATIONS ON INCORPORATION OF A CITY. (a) A community in the unorganized borough may not incorporate as a city if the services to be provided by the proposed city can be provided by annexation to an existing city.

(b) A community within a borough may not incorporate as a city if the services to be provided by the proposed city can be provided on an areawide or nonareawide basis by the borough in which the proposed city is located, or by annexation to an existing city.

Sec. 29.05.030. INCORPORATION OF A BOROUGH. (a) An area that meets the following standards may incorporate as a home rule, first class, or second class borough:

(1) the population of the area is interrelated and integrated as to its social, cultural, and economic activities, and is large and stable enough to support borough government;

(2) the boundaries of the proposed borough conform generally to natural geography and include all areas necessary for full development of municipal services;

(3) the economy of the area includes the human and financial resources capable of providing municipal services; evaluation of an area's economy includes land use, property values, total economic base, total personal income, resource and commercial development, anticipated functions, expenses, and income of the proposed borough;

(4) land, water, and air transportation facilities allow the communication and exchange necessary for the development of integrated borough government.

(b) An area may not incorporate as a third class borough.

ARTICLE 2. PROCEDURE.

Sec. 29.05.060. PETITION. Municipal incorporation is proposed by filing a petition with the department. The petition shall include the following information about the proposed municipality:

(1) class;

(2) name;

(3) boundaries;

(4) maps, documents, and other information required by the department;

(5) composition and apportionment of the governing body;

(6) a proposed operating budget for the municipality projecting sources of income and items of expenditure through the first full fiscal year of operation;

(7) for a borough, based on the number who voted in the

respective areas in the last general election, the signature and resident address of 15 percent of the voters in

(A) home rule and first class cities in the area of the proposed borough; and

(B) the area of the proposed borough outside home rule and first class cities;

(8) for a first class borough, a designation of areawide powers to be exercised;

(9) for a second class borough, a designation of areawide and nonareawide powers to be exercised;

(10) for a first or second class city, a designation of the powers to be exercised;

(11) for a home rule or first class city, based on the number who voted in the area in the last general election, the signatures and resident address of 50 voters in the proposed city or of 15 percent of the voters in the proposed city, whichever is greater;

(12) for a second class city, based on the number who voted in the area in the last general election, the signature and resident address of 25 voters in the proposed city or of 15 percent of the voters in the proposed city, whichever is greater;

(13) for a home rule municipality, a proposed home rule charter.

Sec. 29.05.070. REVIEW. The department shall review an incorporation petition for content and signatures and shall return a deficient petition for correction and completion.

Sec. 29.05.080. INVESTIGATION. (a) If an incorporation petition contains the required information and signatures, the department shall investigate the proposal and shall hold at least one public informational meeting in the area proposed for incorporation. The

department shall publish notice of the meeting.

(b) The department may combine incorporation petitions from the same general area.

(c) The department shall report its findings to the Local Boundary Commission with its recommendations regarding the incorporation.

Sec. 29.05.090. HEARING. The Local Boundary Commission shall hold at least one public hearing in the area proposed to be incorporated for the purpose of receiving testimony and evidence on the proposal.

Sec. 29.05.100. DECISION. (a) If the Local Boundary Commission determines that a proposed municipality fails to meet the standards for incorporation, it shall reject the petition. If the commission determines that the proposed municipality meets the standards, it shall accept the petition. If the commission determines that the proposed boundaries can be altered to meet the standards, it may alter the boundaries and accept the petition.

(b) A Local Boundary Commission decision under this section may be appealed under the Administrative Procedure Act (AS 44.62).

Sec. 29.05.110. INCORPORATION ELECTION. (a) The Local Boundary Commission shall immediately notify the director of elections of its acceptance of an incorporation petition. Within 30 days after notification, the director of elections shall order an election in the proposed municipality to determine whether the voters desire incorporation and, if so, to elect the initial municipal officials. If incorporation is rejected, no officials are elected. The election must be held not less than 30 or more than 90 days after the date of the election order. The election order must specify the dates during which nomination petitions for election of initial officials may be filed.

(b) A voter who has been a resident of the area within the proposed municipality for 30 days before the date of the election order may vote.

(c) Areawide borough powers included in an incorporation petition are considered to be part of the incorporation question. In an election for the incorporation of a second class borough, each nonareawide power to be exercised is placed separately on the ballot. Adoption of a nonareawide power requires a majority of the votes cast on the question, and the vote is limited to the voters residing in the proposed borough but outside all cities in the proposed borough.

(d) A home rule charter included in an incorporation petition under AS 29.05.060(13) is considered to be part of the incorporation question. The home rule charter is adopted if the voters approve incorporation of the municipality.

(e) The director of elections shall supervise the election in the general manner prescribed by the Alaska Election Code (AS 15). The state shall pay all election costs under this section.

Sec. 29.05.120. ELECTION OF INITIAL OFFICIALS. (a) Nominations for initial municipal officials are made by petition. The petition shall be in the form prescribed by the director of elections and shall include the name and address of the nominee and a statement of the nominee that the nominee is qualified under the provisions of this title for the office that is sought. A person may file for and occupy more than one office, but may not serve simultaneously as

(1) borough mayor and as a member of the assembly; or

(2) city mayor and as a member of the council in a first class city.

(b) Except for a proposed second class city, petitions to nominate initial officials must include the signature and resident address

of 50 voters in the area of the proposed municipality, or that area of the proposed municipality from which the officials are to be elected under the composition and apportionment set out in the accepted incorporation petition.

(c) Petitions to nominate initial officials of a second class city must include the signature and resident address of 10 voters in the area of the proposed city.

(d) The director of elections shall supervise the election in the general manner prescribed by the Alaska Election Code (AS 15). The state shall pay all election costs.

(e) The initial elected officials take office on the first Monday following certification of their election.

(f) The initial elected members of the governing body shall determine by lot the length of their terms of office so that a proportionate number of terms expire each year, resulting in staggered terms of office for members subsequently elected.

Sec. 29.05.130. INTEGRATION OF SPECIAL DISTRICTS AND SERVICE AREAS. (a) A service area in a newly incorporated municipality shall be integrated into the municipality within two years after the date of incorporation. On integration the municipality succeeds to all the rights, powers, duties, assets and liabilities of the service area. On integration all property in the service area subject to taxation to pay the principal and interest on bonds at the time of integration remains subject to taxation for that purpose.

(b) After integration, the municipality may exercise in a former service area all of the rights and powers exercised by the service area at the time of integration, and, as successor to the service area, may levy and collect special charges, taxes, or assessments to amortize bonded indebtedness incurred by the service area or by a

municipality in which the service area was formerly located.

Sec. 29.05.140. TRANSITION. (a) The powers and duties exercised by cities and service areas that are succeeded to by a newly incorporated municipality continue to be exercised by the cities and service areas until the new municipality assumes the powers and functions, which may not exceed two years after the date of incorporation. Ordinances, rules, resolutions, procedures, and orders in effect before the transfer remain in effect until superseded by the action of the new municipality.

(b) Before the assumption, the new municipality shall give written notice of its assumption of the rights, powers, duties, assets, and liabilities under this section and AS 29.05.130 to the city or service area concerned. Municipal officials shall consult with the officials of the city or service area concerned and arrange an orderly transfer.

(c) After the incorporation of a new municipality, no service area in it may assume new bonded indebtedness, make a contract, or transfer an asset without the consent of the governing body.

(d) This section applies to home rule and general law municipalities.

Sec. 29.05.150. CHALLENGE OF LEGALITY. A person may not challenge the formation of a municipality except within six months after the date of its incorporation.

ARTICLE 3. TRANSITIONAL ASSISTANCE.

Sec. 29.05.180. ORGANIZATION GRANTS TO CITIES. (a) To defray the cost of transition to city government and to provide for interim government operations, each city incorporated after July 1, 1983 is entitled to an organization grant of $50,000 for the first full or partial fiscal year after incorporation.

(b) To defray the cost of reclassification, each second class city in the unorganized borough incorporated before July 1, 1983 that reclassifies as a home rule or first class city after July 1, 1983 is entitled to an organization grant equal to $50,000 for the first full or partial fiscal year after reclassification.

(c) A city entitled to an organization grant under (a) or (b) of this section is entitled to a second organization grant of $25,000. The Department of Community and Regional Affairs shall disburse the second organization grant within 30 days after the beginning of the city's second fiscal year after incorporation or reclassification, or as soon after that time as money is appropriated and available for the purpose.

(d) The Department of Community and Regional Affairs shall disburse an organization grant under (a) and (b) of this section within 30 days after certification of the incorporation election or the reclassification election, or as soon after certification as money is appropriated and available for the purpose.

Sec. 29.05.190. ORGANIZATION GRANTS TO BOROUGHS. (a) For the purpose of defraying the cost of transition to borough government and to provide for interim governmental operations, each borough incorporated after July 1, 1983, is entitled to organization grants as follows:

(1) $300,000 for the borough's first full or partial fiscal year;

(2) $200,000 for the borough's second fiscal year; and

(3) $100,000 for the borough's third fiscal year.

(b) The department shall disburse the first organization grant to a borough within 30 days after certification of the incorporation election favoring incorporation of a borough, or as soon after that as

money is appropriated and available for the purpose. The second grant shall be disbursed within 30 days after the beginning of the borough's second fiscal year, or as soon after that as money is appropriated and available for the purpose. The third grant shall be disbursed within 30 days after the beginning of the borough's third fiscal year, or as soon after that as money is appropriated and available for the purpose.

(c) This section does not apply to a borough incorporated by consolidation or to a unified municipality.

Sec. 29.05.200. ORGANIZATION GRANT FUND. (a) The organization grant fund is established in the department. An appropriation made to the fund shall be used for organization grants to municipalities that qualify under AS 29.05.180 or 29.05.190.

(b) Before August 31 of each fiscal year the department shall submit a report to the Department of Administration indicating

(1) each municipality expected to qualify to receive an organization grant during the next fiscal year;

(2) the amount of money needed to cover all organization grants expected to be awarded during the next fiscal year.

Sec. 29.05.210. TRANSITIONAL ASSISTANCE TO BOROUGHS. (a) Within 30 days after the date of incorporation of a borough incorporated after July 1, 1983, the department shall determine the population of the borough.

(b) The department shall provide assistance to each borough incorporated after July 1, 1983, in

(1) establishing the initial sales and use tax assessment and collection department if the borough has adopted a sales or use tax;

(2) determining the initial property tax assessment roll if

the borough has adopted a property tax, including contracting for appraisals of property needed to complete the initial assessment.

(c) This section does not apply to a borough incorporated by consolidation or to a unified municipality.

* Sec. 4. AS 29 is amended by adding a new chapter to read:

CHAPTER 06. ALTERATION OF MUNICIPALITIES.

ARTICLE 1. CHANGE OF NAME.

Sec. 29.06.010. CHANGE OF MUNICIPAL NAME. (a) The governing body of a municipality may change the official municipal name by adopting an ordinance for the purpose and filing the ordinance with the office of the lieutenant governor. Upon receipt of an ordinance ratified by the voters, the lieutenant governor shall issue an order to the municipality changing its existing name. The name change shall become effective on a date fixed in the order and occurring within 45 days after receipt of the ordinance. A copy of the order shall be transmitted to the department.

(b) If an ordinance adopted under (a) of this section that results in a change of the municipal name is subsequently repealed, the lieutenant governor shall issue an order reinstating the former name within 45 days after the date of the order, unless a different name is adopted as provided in (a) of this section.

(c) When a municipal name change takes effect by means of an order issued under (a) or (b) of this section, a civil or criminal suit, application, petition, hearing or other proceeding to which the municipality is a party and that is pending at or brought after the date the name change takes effect shall proceed in the municipal name as changed by the order.

(d) This section applies to home rule and general law municipalities.

ARTICLE 2. ANNEXATION AND DETACHMENT.

Sec. 29.06.040. LOCAL BOUNDARY COMMISSION. (a) The Local Boundary Commission may consider any proposed municipal boundary change. It may reject the proposed change, accept the proposed change, or alter the boundaries and accept the proposal as altered. A Local Boundary Commission decision under this subsection may be appealed under the Administrative Procedure Act (AS 44.62).

(b) The Local Boundary Commission may present a proposed municipal boundary change to the legislature during the first 10 days of a regular session. The change becomes effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

(c) In addition to the regulations governing annexation by local action adopted under AS 44.47.567, the Local Boundary Commission shall establish procedures for annexation and detachment of territory by municipalities by local action. The procedures established under this subsection include a provision that

(1) a proposed annexation and detachment must be approved by a majority of votes on the question cast by voters residing in the area proposed to be annexed or detached;

(2) municipally owned property adjoining the municipality may be annexed by ordinance without voter approval; and

(3) an area adjoining the municipality may be annexed by ordinance without an election if all property owners and voters in the area petition the governing body.

(d) A boundary change effected under (a) and (b) of this section prevails over a boundary change initiated by local action, without regard to priority in time.

Sec. 29.06.050. ANNEXATION OF MILITARY RESERVATIONS. A military reservation may be annexed to a municipality in the same manner as prescribed for other territory under AS 29.06.040. If a city in a borough annexes a military reservation under this section, the area encompassing the military reservation automatically is annexed to the borough in which the city is located.

Sec. 29.06.060. APPLICATION. AS 29.06.040 - 29.06.060 apply to home rule and general law municipalities.

ARTICLE 3. MERGER AND CONSOLIDATION.

Sec. 29.06.090. MERGER AND CONSOLIDATION. (a) Two or more municipalities may merge or consolidate to form a single municipality, except a third class borough may not be formed through merger or consolidation.

(b) Two methods may be used to initiate merger or consolidation of municipalities:

(1) petition to the Local Boundary Commission under regulations adopted by the commission; or

(2) the local option method specified in AS 29.06.100 - 29.06.160.

Sec. 29.06.100. PETITION. (a) Residents of two or more municipalities may file a merger or consolidation petition with the department. The petition must be signed by a number of voters of each existing municipality equal to at least 25 percent of the number of votes cast in each municipality's last regular election.

(b) The petition includes

(1) the name and class of each existing municipality;

(2) the name and class of the proposed municipality;

(3) the proposed composition and apportionment of the governing body;

(4) maps, documents, and other information that shows that the proposed municipality meets the standards for municipal incorporation.

Sec. 29.06.110. REVIEW. (a) The department shall review a merger or consolidation petition for content and signatures and shall return a deficient petition for correction or completion.

(b) If the petition contains the required information and signatures, the department shall investigate the proposal.

(c) The department shall report its findings to the Local Boundary Commission with its recommendations regarding the merger or consolidation.

Sec. 29.06.120. HEARING. After receipt of the report by the department on a merger or consolidation petition, the Local Boundary Commission shall hold at least one public hearing in each of the existing municipalities included in the petition, unless officials of the municipalities agree to a single hearing.

Sec. 29.06.130. DECISION. (a) If the Local Boundary Commission determines that the proposed municipality fails to meet the standards for incorporation, it shall reject the merger or consolidation petition. If the commission determines that the proposed municipality meets these standards, it shall accept the petition. If the commission determines that the proposed boundaries or the composition and apportionment of the governing body can be altered to meet the standards, it may alter the proposal and accept the petition.

(b) A Local Boundary Commission decision under this section may be appealed under the Administrative Procedure Act (AS 44.62).

Sec. 29.06.140. ELECTION. (a) The Local Boundary Commission shall immediately notify the director of elections of its acceptance of a merger or consolidation petition. Within 30 days after

notification, the director of elections shall order an election in the area to be included in the new municipality to determine whether the voters desire merger or consolidation. The election must be held not less than 30 or more than 90 days after the election order. A voter who is a resident of the area to be included in the proposed municipality may vote.

(b) The director of elections shall supervise the election in the general manner prescribed by the Alaska Election Code (AS 15). The state shall pay all election costs.

(c) The director of elections shall certify the election results. If merger or consolidation is approved, the director of elections shall, within 10 days, set a date for election of officials of the new municipality. The election date must be not less than 60 or more than 90 days after the election order and it is the effective date for the merger or consolidation.

Sec. 29.06.150. ASSETS AND LIABILITIES. (a) When two or more municipalities merge, one succeeds to the rights, powers, duties, assets, and liabilities of the others.

(b) When two or more municipalities consolidate, the newly incorporated municipality succeeds to the rights, powers, duties, assets, and liabilities of the consolidated municipalities.

Sec. 29.06.160. TRANSITION. After merger or consolidation, the ordinances, resolutions, regulations, procedures, and orders of the former municipalities remain in force in their respective territories until superseded by the action of the new municipality.

Sec. 29.06.170. APPLICATION. AS 29.06.090 - 29.06.170 apply to home rule and general law municipalities.

ARTICLE 4. UNIFICATION OF MUNICIPALITIES.

Sec. 29.06.190. UNIFICATION OF MUNICIPALITIES AUTHORIZED. A

borough and all cities in the borough may unite to form a single unit of home rule government by complying with AS 29.06.190 - 29.06.410.

Sec. 29.06.200. UNIFICATION PROPOSED. (a) Formation of a charter commission to prepare a unification charter shall be proposed by resolution of the assembly or by petition. A resolution to propose formation of a charter commission may be adopted not more often than once every 12 months.

(b) An assembly, a council, or a person living in the area proposed for unification may initiate a unification petition.

Sec. 29.06.210. PETITION REQUIREMENTS. (a) A unification petition shall read:

"PETITION FOR ELECTION OF CHARTER COMMISSION TO PROPOSE UNIFICATION CHARTER. We, the undersigned, qualified voters of the borough do hereby petition that the following proposition be placed before the voters as provided by law: 'Shall a charter commission be formed (and charter commission members be elected as elsewhere provided on this ballot) to prepare, adopt and submit to the voters for their approval or rejection a proposed charter uniting the borough and all cities within it as a single unit of home rule government having the powers, duties and functions of a unified municipality as authorized by law? Yes [] No []'

Signature	Address	Inside First Class or Home Rule City [ ]	Outside First Class or Home Rule City [ ]"

(b) The petition shall be signed by at least

(1) the number of voters residing outside all home rule and first class cities in the borough equal to 25 percent of the votes cast in that area in the last regular borough election; and

(2) the number of voters residing in home rule or first

class cities in the borough equal to 25 percent of the votes cast in all home rule and first class cities in the borough in the last regular borough election.

Sec. 29.06.220. REVIEW OF PETITION. The assembly shall review a unification petition within 15 days to determine whether it complies with AS 29.06.210. If the petition does not meet the designated requirements, it shall be immediately returned to the person who initiated the petition with a statement indicating which requirements have not been satisfied.

Sec. 29.06.230. DUTIES OF CHARTER COMMISSION. The charter commission shall prepare, adopt, and submit to the voters for approval or rejection a proposed home rule charter for the area to be unified.

Sec. 29.06.240. COMPOSITION OF CHARTER COMMISSION. The charter commission shall consist of 11 voters, three of whom are residents elected at large from the borough and eight of whom, proportionate to the population as determined by the department, are

(1) residents of and elected from the area outside all home rule and first class cities in the borough; or,

(2) residents of and elected from home rule or first class cities in the borough.

Sec. 29.06.250. CHARTER COMMISSION NOMINATIONS. (a) If the assembly determines that a unification petition meets the requirements of AS 29.06.210, or the assembly by its resolution proposes an election on formation of a charter commission, the assembly shall issue a call for the nomination of commission candidates, specifying the filing deadline and the procedure for making nominations.

(b) Charter commission candidates shall be nominated by petition signed by at least 50 voters of the area from which the candidate seeks election, or by a number of voters from that area equal to at

least 10 percent of the number of votes cast from that area in the last regular borough election, whichever is less.

(c) Nomination petitions shall be filed with the borough clerk at least 30 days after notice of the call for nominations has been given and on or before a date fixed by the assembly.

(d) If at least one nomination of a qualified charter commission candidate for each available seat is not filed, the unification petition or resolution to propose formation of a charter commission is void and no election on the question shall be held.

Sec. 29.06.260. QUALIFICATIONS OF CANDIDATES. A person is eligible to be nominated as a candidate for the charter commission if that person was a voter of the area from which election is sought for at least one year immediately preceding the date the nomination petition is filed.

Sec. 29.06.270. ELECTION OF CHARTER COMMISSION. (a) After receipt of a valid unification petition or adoption of an assembly resolution to propose formation of a charter commission, the assembly shall submit to the voters the question of whether a charter commission shall be formed to prepare a proposed unification charter. The vote shall be held at the next regular borough election scheduled at least 90 days after receipt of the petition or adoption of the resolution. The ballot shall be worded exactly as in AS 29.06.210(a).

(b) The election of charter commission members shall take place at the same time as the election on the question of formation of the commission.

(c) All costs incurred in conducting an election under AS 29.-06.190 - 29.06.410 shall be paid by the borough.

Sec. 29.06.280. REQUIREMENTS FOR APPROVAL OF FORMATION AND ELECTION OF CHARTER COMMISSION. (a) The votes on the question of

formation of a charter commission shall be tabulated in two separate classifications. One classification consists of all votes cast in first class and home rule cities in the borough. The other classification consists of all votes cast in the remaining area of the borough. In order for formation of a charter commission to be approved, a majority of the votes in each classification must favor formation of the commission.

(b) If formation of a charter commission is approved, the candidates who received the highest number of votes from their respective areas shall serve as members of the commission.

Sec. 29.06.290. CHARTER COMMISSION ORGANIZATION AND PROCEDURE. (a) The charter commission shall hold its first meeting within 30 days after certification of its election. The commission shall elect from among its members a chairman and a deputy chairman.

(b) A majority of the total membership of the charter commission constitutes a quorum. A decision of the commission is not valid or binding unless approved by the number of members necessary to constitute a quorum.

(c) The charter commission may elect other officials from among its membership, adopt rules governing its procedures that are consistent with AS 29.06.190 - 29.06.410 and hire and discharge employees.

(d) Meetings of the charter commission shall be open to the public at all times. A journal of commission proceedings shall be kept and made available for public inspection at the borough office.

Sec. 29.06.300. VACANCIES. (a) Vacancies on the charter commission shall be filled by a majority vote of the commission, except the assembly shall appoint members to fill vacancies if, after a proposed charter is rejected by the voters, more than one-half of the members resign.

(b) A person who fills a vacancy on the charter commission must be a voter of the same area as the person succeeded and must have been a voter of that area for at least one year immediately preceding the date the vacancy is filled.

Sec. 29.06.310. PER DIEM. The assembly may grant a per diem allowance to members of the charter commission and may reimburse the members for travel expenses incurred in carrying out the duties prescribed by AS 29.06.190 - 29.06.410. Costs, fees, and other expenses incurred by the commission are a debt of the borough and shall be paid upon proper verification.

Sec. 29.06.320. CHARTER PROVISIONS. The charter shall include

(1) provision for

(A) adjustment of existing bonded indebtedness and other obligations in a manner that will assure a fair and equitable burden of taxation for debt service, subject to AS 29.06.-380;

(B) the establishment of service areas;

(C) if election of members of the governing body is not areawide, the establishment of districts for the election of members of the governing body of the proposed unified municipality and procedures by which to reapportion the election districts;

(D) reapportionment of districts if they are established;

(E) nonpartisan government, and the selection, organization, authority, and responsibilities of the governing body and its executive and administrator;

(F) the transfer or other disposition of property and other rights, claims, assets, and franchises of the

municipalities to be unified under the charter;

(G) exercise of the rights of initiative and referendum;

(2) a method of amending the charter;

(3) the date on which the charter, if approved at the charter election, is effective;

(4) designation of the proposed unified municipality's official name;

(5) other charter provisions that may be included in a home rule charter.

Sec. 29.06.330. PUBLIC HEARINGS. Both before and after drafting the proposed home rule charter, the charter commission shall hold a public hearing in each area represented on the assembly. Other public hearings may be held by the commission as it considers necessary.

Sec. 29.06.340. FILING OF PROPOSED CHARTER. Upon the adoption of a proposed home rule charter by the charter commission, the charter shall be signed by at least a majority of the total membership of the commission and shall be filed with the borough clerk. A copy of the charter with signatures affixed shall also be filed with the clerk of each city in the borough.

Sec. 29.06.350. PUBLICATION AND POSTING OF PROPOSED CHARTER. Within 10 days after filing the proposed home rule charter, the borough clerk shall have it published. In addition, the clerk shall have a copy of the proposed charter posted in at least three public places in each city and each unincorporated community in the borough. Copies of the proposed charter shall be made available by the assembly to the public at both the office of the borough clerk and the office of the clerk of each city in the borough. The clerk shall have notice of the publication, posting, and availability of the proposed charter

published.

Sec. 29.06.360. ELECTION ON CHARTER. (a) The proposed home rule charter adopted by the charter commission shall be submitted to the voters at a borough election held within 60 days of the date of publication and posting of the proposed charter. The borough clerk shall prepare the ballots for use in the election and shall give notice of the election by radio and television in a manner intended to apprise the entire borough population of the election. The election shall be conducted under procedures applicable to regular elections.

(b) A person who is a voter of the borough may vote in the election on the proposed charter.

(c) If a majority of the votes in the area of the borough outside all home rule or first class cities, and a majority of the votes in all home rule and first class cities in the borough are cast in favor of the proposed charter, the charter is ratified. If the charter is ratified, election results shall be certified to the commission and two copies of the charter shall be filed with

(1) the lieutenant governor;

(2) the commissioner of the department;

(3) the district recorder for the area of the borough;

(4) the clerk of the borough;

(5) the clerk of each city in the borough.

(d) If a proposed charter is rejected, the charter commission shall prepare, adopt, and submit another proposed charter to the voters at a borough election held within one year after the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved and the question of unification shall be treated as if it had never been proposed or approved.

Sec. 29.06.370. EFFECT OF THE CHARTER AFTER RATIFICATION. Upon ratification, the home rule charter of a unified municipality operates to dissolve all municipalities in the area unified in accordance with the charter.

Sec. 29.06.380. ASSETS AND LIABILITIES. A unified municipality shall succeed to all the assets and liabilities of the municipalities it unified. A bonded indebtedness or other debt incurred before unification remains the tax obligation of the area that contracted the debt, except that by ordinance the tax obligation may be assumed by a larger area if the governing body determines that the asset for which the bonded indebtedness or other debt was incurred benefited the larger area before unification, or benefits the larger area after unification. However, bonded indebtedness or other debt for sewage collection systems, water distribution systems, and streets, even if determined to be benefiting a larger area than that which incurred the debt, remains the tax obligation of the area that incurred the debt.

Sec. 29.06.390. TRANSITION. Within two years after ratification of the home rule charter, the unified municipality shall revise, repeal, or reaffirm all municipal ordinances, resolutions, and orders in effect in the area of the unified municipality on the date of unification. Each ordinance, resolution, regulation, or order in effect on the date of unification remains in effect until superseded by action of the unified municipality.

Sec. 29.06.400. RIGHT TO STATE AND FEDERAL AID. All provisions of law authorizing aid from the state or federal government to a former municipality that was in the area of a unified municipality remain in effect after unification.

Sec. 29.06.410. POWERS OF A UNIFIED MUNICIPALITY. A municipality unified under AS 29.06.190 - 29.06.410 has all powers

(1) not prohibited by law or charter; and

(2) granted to a home rule borough.

Sec. 29.06.420. APPLICATION. AS 29.06.190 - 29.06.420 apply to home rule and general law municipalities.

ARTICLE 5. DISSOLUTION.

Sec. 29.06.450. METHODS OF DISSOLUTION. (a) Two petition methods may be used to initiate dissolution of a municipality;

(1) petition to the Local Boundary Commission under regulations adopted by the commission; or

(2) the local option method specified in AS 29.06.460 - 29.06.510.

(b) The department shall investigate a municipality that it considers to be inactive and shall report to the Local Boundary Commission on the status of the municipality. The commission may submit its recommendation to the legislature that the municipality be dissolved in the manner provided for submission of boundary changes in art. X, sec. 12 of the state constitution.

(c) A borough is dissolved when its entire territory is included in a home rule or first class city or cities. A city is dissolved when all its powers become areawide borough powers.

Sec. 29.06.460. PETITION. (a) Residents of a municipality may file a dissolution petition with the department in the form prescribed by the department. The petition must be signed by a number of voters equal to at least 25 percent of the number of votes cast in the last regular election in that municipality.

(b) The petition must include

(1) the name of the municipality;

(2) maps, documents, and other information showing that the municipality meets the standards for dissolution.

Sec. 29.06.470. STANDARDS. (a) Except as provided in (b) of this section, residents of a municipality may petition for dissolution when the municipality is free of debt, or, if in debt, each of its creditors is satisfied with a method of repayment and

(1) it no longer meets the minimum standards prescribed for incorporation by AS 29.05, or former AS 29.18.030 if it is a third class borough; or

(2) the municipality ceases to use each of its mandatory powers.

(b) Residents of a city in a borough may petition for dissolution of the city if the borough consents to assume the city's rights, powers, duties, assets, and liabilities. The consent must be ratified by a majority of borough voters voting on the question.

Sec. 29.06.480. REVIEW. (a) The department shall review a dissolution petition for content and signatures, and shall return a deficient petition for correction or completion.

(b) If the petition contains the required information and signatures, the department shall investigate the proposal.

Sec. 29.06.490. REPORT AND HEARING. (a) The department shall report its findings to the Local Boundary Commission with its recommendation regarding the dissolution of a municipality .

(b) The Local Boundary Commission shall hold at least one public hearing in the municipality proposed to be dissolved.

Sec. 29.06.500. DECISION. (a) If the Local Boundary Commission determines that a municipality fails to meet the standards for dissolution, it shall reject the petition. If the commission determines that the municipality meets the standards, it shall accept the petition.

(b) A Local Boundary Commission decision under this section may

be appealed under the Administrative Procedure Act (AS 44.62).

Sec. 29.06.510. ELECTION. (a) The Local Boundary Commission shall immediately notify the director of elections of its acceptance of a dissolution petition. Within 30 days after notification, the director of elections shall order an election in the municipality to determine whether the voters desire dissolution. The election must be held at least 30 and not more than 90 days after the election order. A person who is a voter of the municipality may vote in the dissolution election.

(b) The director of elections shall supervise the election in the general manner prescribed by the Alaska Election Code (AS 15). The state shall pay all election costs.

(c) The director of elections shall certify the election results. If dissolution is approved, the director of elections shall declare that the municipality is dissolved effective on the date of certification.

Sec. 29.06.520. SUCCESSION. The government succeeding to a dissolved municipality succeeds to all its rights, powers, duties, assets, and liabilities.

Sec. 29.06.530. APPLICATION. AS 29.06.450 - 29.06.530 apply to home rule and general law municipalities.

* Sec. 5. AS 29 is amended by adding a new chapter to read:

CHAPTER 10. HOME RULE MUNICIPALITIES.

ARTICLE 1. CHARTERS.

Sec. 29.10.010. MUNICIPAL CHARTER ADOPTION. (a) A general law borough or first class city may adopt a charter for its own government. A second class city may adopt a charter for its own government if the department determines from the best figures available that the population of the city is at least 600 permanent residents.

(b) At an election to incorporate as a city, an unincorporated community with at least 600 permanent residents may adopt a charter for its own government and incorporate as a home rule municipality.

(c) At an election for borough incorporation, an area in the unorganized borough may adopt a charter for its own government and incorporate as a home rule municipality.

(d) A home rule municipality may adopt a new charter.

(e) A proposed charter for an existing municipality is prepared by a charter commission of seven elected members. A charter commission election is called by filing a petition with the governing body or by resolution of the governing body. The petition shall be signed by a number of voters equal to 15 percent of the votes cast in the last regular election in the municipality.

(f) The proposed charter for an unincorporated community or an area of the unorganized borough shall be prepared by the petitioners and filed with the petition to incorporate a home rule municipality filed under AS 29.05.060.

Sec. 29.10.020. MODEL CHARTERS. The department shall prepare at least one model home rule charter for a borough and at least one model home rule charter for a city. The model charters shall be made available to persons interested in filing a petition to incorporate a home rule municipality under AS 29.05.060.

Sec. 29.10.030. INITIATIVE AND REFERENDUM. (a) A home rule charter shall provide procedures for initiative and referendum.

(b) A charter may not require an initiative or referendum petition to have a number of signatures greater than 25 percent of the total votes cast in the municipality at the last regular election.

(c) A charter may not permit the initiative and referendum to be used for a purpose prohibited by art. XI, sec. 7 of the state

constitution.

Sec. 29.10.040. CHARTER COMMISSION CANDIDATES. (a) A candidate for a charter commission shall be a voter of an existing municipality for three years immediately preceding the charter commission election.

(b) A charter commission candidate is nominated by a petition signed by at least 50 voters or the number of voters equal to 10 percent of the number of votes cast in the municipality during the last regular election, whichever is less. A nomination petition shall be filed with the municipal clerk on or before a date fixed by the governing body.

(c) If at least seven nominations for qualified charter commission candidates are not filed, the petition or resolution calling for a charter commission is void and no election on the question may be held.

Sec. 29.10.050. CHARTER COMMISSION ELECTION. At a charter commission election the voters of an existing municipality shall consider the question "Shall a charter commission be elected to prepare a proposed charter?" and shall elect the members of the commission. If the question is approved, the seven candidates receiving the highest number of votes shall immediately organize as a charter commission.

Sec. 29.10.060. PREPARATION OF CHARTER BY CHARTER COMMISSION. The charter commission shall, within one year, prepare a proposed home rule charter for an existing municipality. The proposed charter shall be signed by a majority of the members of the commission and filed in the office of the municipal clerk. Within 15 days, the clerk shall have the proposed charter published and make copies available. The commission shall give published notice of and hold at least one public hearing on the proposed charter before the signing and filing of the charter.

Sec. 29.10.070. CHARTER ELECTION. The proposed home rule charter for an existing municipality shall be submitted to the voters at an election held not less than 30 days or more than 90 days after the proposed charter is published. The proposed home rule charter for an unincorporated community or area in the unorganized borough shall be submitted to the voters at an incorporation election held under AS 29.05.110.

Sec. 29.10.080. CHARTER ADOPTION. (a) If a majority of those voting in an existing municipality favor the proposed charter or if a majority of those voting in an unincorporated area in the unorganized borough favor incorporation of a home rule municipality, the proposed charter becomes the organic law of the municipality effective on the date the election is certified. Thereafter, a court shall take judicial notice of the charter. The new home rule municipality shall file the indicated number of copies of the charter with

(1) the lieutenant governor -- two copies;

(2) the department -- two copies;

(3) the district recorder -- one copy;

(4) the municipal clerk -- one copy.

(b) At the time of voting on the proposed charter in a third class borough, voters shall vote also on whether the borough shall on adoption of the charter retain a combined assembly and school board or elect a separate assembly and board as otherwise provided for home rule boroughs. If a combined assembly and school board are approved at the charter election, the assembly serving at the time of the election continues to serve as the assembly and board on voter approval of the charter and until terms of assembly members expire as provided before adoption of the charter. If a separate board and assembly are approved at the charter election, a school board shall be

elected in conformity with AS 14.12.030 - 14.12.100 at the next regular election, if it occurs within 90 days of the date of the charter election, or otherwise at a special election within 90 days of the date of the charter election. Expiration dates of terms of school board members elected at a special election must coincide with the date of the regular election. Until a board is elected and qualified, the assembly continues to serve as the board.

Sec. 29.10.090. CHARTER REJECTION. (a) If a proposed charter for an existing municipality is rejected, the charter commission shall prepare another proposed charter to be submitted to the voters at an election to be held within one year after the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved and the question of adoption of a charter shall be treated as if it had never been proposed or approved.

(b) If incorporation of a home rule municipality is rejected by the voters in an unincorporated community or area in the unorganized borough, the proposed charter is rejected.

Sec. 29.10.100 CHARTER AMENDMENT. (a) A home rule charter may be amended as provided in the charter except that no amendment is effective unless ratified by the voters.

(b) This section applies to home rule municipalities.

ARTICLE 2. HOME RULE LIMITATIONS.

Sec. 29.10.200. LIMITATION OF HOME RULE POWERS. Only the following provisions of this title apply to home rule municipalities as prohibitions on acting otherwise than as provided. These provisions supersede existing and prohibit future home rule enactments that provide otherwise:

(1) AS 29.05.140 (transition)

(2) AS 29.06.010 (change of municipal name)

(3) AS 29.06.040 - 29.06.060 (annexation and detachment)

(4) AS 29.06.090 - 29.06.170 (merger and consolidation)

(5) AS 29.06.190 - 29.06.420 (unification of municipalities)

(6) AS 29.06.450 - 29.06.530 (dissolution)

(7) AS 29.10.100 (charter amendment)

(8) AS 29.20.010 (conflict of interest)

(9) AS 29.20.020 (meetings public)

(10) AS 29.20.050 (legislative power)

(11) AS 29.20.060 - 29.20.120 (assembly composition and apportionment)

(12) AS 29.20.140 (qualifications of members of governing bodies)

(13) AS 29.20.150 (term of office)

(14) AS 29.20.220 (executive power)

(15) AS 29.20.630 (prohibitions)

(16) AS 29.20.640 (reports)

(17) AS 29.25.010(a)(10) (municipal exemption on contractor bond requirements)

(18) AS 29.25.050 (codification)

(19) AS 29.25.060 (resolutions)

(20) AS 29.26.030 (notice of elections)

(21) AS 29.26.050 (voter qualification)

(22) AS 29.26.240 - 29.26.360 (recall)

(23) AS 29.35.020 (extraterritorial jurisdiction)

(24) AS 29.35.030 (eminent domain)

(25) AS 29.35.050 (garbage and solid waste services)

(26) AS 29.35.070 (public utilities)

(27) AS 29.35.080 (alcoholic beverages)

(28) AS 29.35.120 (post audit)

(29) AS 29.35.150(b) (effect of areawide exercise of borough powers)

(30) AS 29.35.160 (education)

(31) AS 29.35.170(b) (assessment and collection of taxes)

(32) AS 29.35.180(b) (land use regulation)

(33) AS 29.35.250 (cities inside boroughs)

(34) AS 29.35.260 (cities outside boroughs)

(35) AS 29.35.340 (acquisition of areawide power)

(36) AS 29.40.160(a) - (c) (title to vacated areas)

(37) AS 29.40.200 (subdivisions of state land)

(38) AS 29.45.010 - 29.45.570 (property taxes)

(39) AS 29.45.650(c) and (d) (sales and use tax)

(40) AS 29.46.090 (exemption from special assessment)

(41) AS 29.47.200(b) (security for bonds)

(42) AS 29.47.260 (construction)

(43) AS 29.60.050(a) (limitation on computation and use of payment)

(44) AS 29.60.120(a) and (c) (state aid for health facilities and hospitals)

(45) AS 29.60.230 (state aid for hospital and health facility construction)

(46) AS 29.65.010 - 29.65.140 (general grant land)

* Sec. 6. AS 29 is amended by adding a new chapter to read:

CHAPTER 20. MUNICIPAL OFFICERS AND EMPLOYEES.

ARTICLE 1. CONFLICT OF INTEREST AND PUBLIC MEETINGS.

Sec. 29.20.010. CONFLICT OF INTEREST. (a) Each municipality shall adopt a conflict of interest ordinance that provides that

(1) a member of the governing body shall declare a substantial financial interest the member has in an official action and ask to be excused from a vote on the matter;

(2) the presiding officer shall rule on a request to be excused from a vote; and

(3) the decision of the presiding officer on a request to be excused from a vote may be overridden by the majority vote of the governing body.

(b) This section applies to home rule and general law municipalities.

Sec. 29.20.020. MEETINGS PUBLIC. (a) Meetings of all municipal bodies shall be public as provided in AS 44.62.310. The governing body shall provide reasonable opportunity for the public to be heard at regular and special meetings.

(b) This section applies to home rule and general law municipalities.

ARTICLE 2. GOVERNING BODIES.

Sec. 29.20.050. LEGISLATIVE POWER. (a) The legislative power of a borough is vested in the assembly. The legislative power of a city is vested in the council.

(b) This section applies to home rule and general law municipalities.

Sec. 29.20.060. ASSEMBLY COMPOSITION AND APPORTIONMENT. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of

members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting.

(d) A member of the assembly may not be elected or appointed by and from the council of a city in the borough.

(e) This section applies to home rule and general law municipalities.

Sec. 29.20.070. ASSEMBLY COMPOSITION AND FORM OF REPRESENTATION. (a) The assembly shall provide for its composition and for the form of its representation.

(b) Not later than the first regular election that occurs after the report of a federal decennial census, the assembly shall propose and submit to the voters of the borough, at that regular election or at a special election called for the purpose, one or more forms of assembly representation. The forms of representation that the assembly may submit to the voters are:

(1) election of members of the assembly at large by the voters throughout the borough;

(2) election of members of the assembly by district, including

(A) election at large by the voters throughout the borough, but with a requirement that a candidate live in an election district established by the borough for election of assembly members; or

(B) election from election districts established by the borough for the election of assembly members by the voters of

a district;

(3) election of members of the assembly both at large and by district.

(c) A form of assembly representation that includes election of assembly members under (b)(2) or (b)(3) of this section shall be submitted to the voters of the borough with a plan of apportionment as required by AS 29.20.080.

(d) The assembly shall, within 30 days after certification of the results of the election held under this section, adopt an ordinance providing for

(1) composition of the assembly;

(2) the form of assembly representation that received the most votes; and

(3) if applicable, the apportionment of assembly seats in accordance with the form of representation that received the most votes.

(e) This section does not apply to a

(1) unified municipality;

(2) home rule borough if the home rule charter contains procedures for changing assembly composition and form of representation.

Sec. 29.20.080. ASSEMBLY RECOMPOSITION AND REAPPORTIONMENT. (a) Not later than two months after the official report of a federal decennial census, the assembly shall determine and declare by resolution whether the existing apportionment of the assembly meets the standards of AS 29.20.060. If the assembly submits to the voters a form of representation that includes election of assembly members under AS 29.20.070(b)(2) or (b)(3) the assembly shall submit with the proposition a proposed plan of apportionment that corresponds to the form

of representation proposed. The assembly shall describe the plan of apportionment in the ballot proposition, and may present the plan in any manner that it believes accurately describes the apportionment that is proposed under the form of representation. If the assembly determines that its existing apportionment meets the standards of AS 29.20.060, the assembly may include the existing apportionment as a proposed plan of apportionment of assembly seats that corresponds to a form of representation that is proposed.

(b) The assembly shall provide, by ordinance, for a change in an existing apportionment of the assembly whenever it determines that the apportionment does not meet the standards of AS 29.20.060. At the same time, the assembly may, by ordinance, change the composition of the assembly.

(c) If a petition signed by not less than 50 voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.20.060, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may make the determination requested. The assembly shall make a determination required by this subsection within two months of receipt of a petition that meets the requirements of this subsection.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of the votes cast.

(e) Within six months after a determination by the assembly under (b) or (c) of this section that the current apportionment does not meet the standards of AS 29.20.060 the assembly shall adopt an ordinance providing for reapportionment and submit the ordinance to

the voters. If, at the end of the six-month time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner shall provide for the reapportionment in accordance with the standards of AS 29.20.060 by preparing an order of reapportionment and delivering the order to the borough mayor.

Sec. 29.20.090. APPORTIONMENT APPEALS. (a) A reapportionment ordinance approved by the voters, or a decision of the assembly that the standards of AS 29.20.060 do not require a change in apportionment, may be appealed to the commissioner. Fifty voters may submit a petition to the commissioner requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters meets the standards of AS 29.20.060 or whether a decision of the assembly that the standards of AS 29.20.060 do not require a change of apportionment is correct. If the petition asks the commissioner to review an ordinance approved by the voters under AS 29.20.080(e), the petition shall be delivered to the commissioner not later than 20 days after certification of the election. If the petition asks the commissioner to review a decision of the assembly under AS 29.20.080(c), the petition shall be delivered to the commissioner within 20 days of the decision of the assembly.

(b) The commissioner shall review the petition and may make the determination requested. The commissioner shall provide copies of the determination to the persons petitioning for appeal and to borough officials not later than 60 days after the commissioner receives the petition.

(c) If the commissioner determines that the proposed reapportionment ordinance approved by the voters does not meet the standards of AS 29.20.060, or if the commissioner determines that the decision of the assembly that the standards of AS 29.20.060 do not require a

change of apportionment is not correct, the commissioner shall, by order, direct the assembly to prepare a reapportionment ordinance that meets the standards of AS 29.20.060 and submit the ordinance to the voters.

(d) When the assembly has been directed by the commissioner to prepare a reapportionment ordinance under (c) of this section, the assembly shall, within two months after its receipt of the commissioner's order, adopt an ordinance providing for reapportionment. The assembly shall submit an ordinance adopted under this subsection to the voters at an election held within 60 days after the date of adoption of the reapportionment ordinance.

(e) If at the end of the time period provided under (d) of this section an ordinance providing for reapportionment has not been approved by the voters, the commissioner shall provide for the reapportionment of the assembly in accordance with the standards of AS 29.-20.060 by preparing an order of reapportionment and delivering the order to the borough mayor.

Sec. 29.20.100. JUDICIAL REVIEW AND RELIEF. (a) The commissioner may request the superior court to enforce a reapportionment order issued under AS 29.20.090(e).

(b) Each of the following is subject to judicial review:

(1) a plan of reapportionment approved by the voters under AS 29.20.080(a);

(2) a determination by the assembly under AS 29.20.080 that the standards of AS 29.20.060 do not require a change in apportionment;

(3) a reapportionment ordinance approved by the voters under AS 29.20.080(d);

(4) a reapportionment order of the commissioner made under

AS 29.20.090(c);

(5) a reapportionment ordinance approved by the voters under AS 29.20.090(d); and

(6) a reapportionment order of the commissioner made under AS 29.20.090(e).

Sec. 29.20.110. EFFECTIVE DATE OF APPORTIONMENT. (a) A change in assembly apportionment or composition under AS 29.20.080 or 29.20.-090 is effective beginning with the first regular election for members of the assembly that is held more than 60 days after the later of

(1) approval of a reapportionment ordinance by the voters under AS 29.20.080(a), 29.20.080(e), or 29.20.090(d); or

(2) the delivery to the mayor of a reapportionment order of the commissioner under AS 29.20.090(d).

(b) The provisions of (a) of this section do not apply to a borough in which a change in assembly composition or apportionment is subject to review and approval or determination of nonobjection by the Attorney General of the United States under the Voting Rights Act of 1965, as amended (42 U.S.C. 1971 - 1974). A change in assembly composition or apportionment subject to review under the Voting Rights Act of 1965, as amended, is effective beginning with the first regular election for members of the assembly that is held more than 60 days after

(1) receipt by the assembly of approval by the Attorney General of the United States of the proposed change in the composition or apportionment of the assembly;

(2) the delivery to the mayor of a reapportionment order of the commissioner under AS 29.20.090(e); or

(3) the last day on which the Attorney General of the United States may review a proposed change in the composition or

apportionment of the assembly.

Sec. 29.20.120. APPLICABILITY OF APPORTIONMENT PROVISIONS. The provisions of AS 29.20.080 - 29.20.110 do not apply to a

(1) unified municipality;

(2) home rule borough if the borough, by home rule charter, provides for reapportionment of the assembly.

Sec. 29.20.130. CITY COUNCIL COMPOSITION. Each first class city has a council of six members elected by the voters at large. Each second class city has a council of seven members elected by the voters at large. The council of a first or second class city may by ordinance provide for election of members other than on an at-large basis for all members.

Sec. 29.20.140. QUALIFICATIONS. (a) A borough voter is eligible to be a member of the assembly and a city voter is eligible to be a member of the council. A member of the governing body who ceases to be a voter in the municipality immediately forfeits his office.

(b) A municipality may by ordinance establish a durational residency requirement not to exceed three years for members of the governing body.

(c) A municipality may by ordinance establish district residency requirements for members of its governing body. A member of the governing body who represents a district and who becomes a resident of another district in the municipality continues to serve until the next regular election unless provided otherwise by ordinance.

(d) Except by ordinance ratified by the voters, no limit may be placed on the total number of terms or number of consecutive terms a voter may serve on the governing body.

(e) This section applies to home rule and general law municipalities.

Sec. 29.20.150. TERM OF OFFICE. (a) A member of the governing body is elected for a three-year term and until his successor qualifies, unless a different term not exceeding four years is prescribed by home rule charter or ordinance.

(b) Except when otherwise required by a change in composition or apportionment, if the term of a member of a governing body is changed by charter or ordinance the term of the member holding office when the change becomes effective is not affected.

(c) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by charter or ordinance.

(d) This section applies to home rule and general law municipalities.

Sec. 29.20.160. PROCEDURES OF GOVERNING BODIES. (a) The assembly shall elect from among its members a presiding officer and a deputy presiding officer to serve at the pleasure of the members, except that in a borough that has adopted a manager form of government under AS 29.20.460 - 29.20.520 the mayor serves as presiding officer. In a city the mayor serves as presiding officer. If the presiding officer is not present or if the presiding officer is personally disqualified, the deputy presiding officer shall preside.

(b) A governing body shall hold at least one regular meeting each month unless otherwise provided by ordinance. If a majority of the members are given at least 24 hours oral or written notice and reasonable efforts are made to notify all members, a special meeting of the governing body may be held at the call of the presiding officer or at least one-third of the members. A special meeting may be conducted with less than 24 hours notice if all members are present or if absent members have waived in writing the required notice. Waiver of

notice can be made before or after the special meeting is held. A waiver of notice shall be made a part of the journal for the meeting.

(c) A majority of the total membership of a governing body authorized by law constitutes a quorum. A member disqualified by law from voting on a question may be considered present for purposes of constituting a quorum. In the absence of a quorum any number of members may recess or adjourn the meeting to a later date.

(d) Actions of a governing body are adopted by a majority of the total membership of the body. Each member present shall vote on every question, unless required to abstain from voting on a question by law. The final vote of each member on each ordinance, resolution, or substantive motion shall be recorded "yes" or "no", except that if the vote is unanimous it may be recorded "unanimous".

(e) A governing body shall maintain a journal of its official proceedings that shall be a public record.

(f) To the extent otherwise permitted by law, a governing body may determine by ordinance its own rules of procedure and order of business.

Sec. 29.20.170. VACANCIES. The governing body may provide by ordinance the manner in which a vacancy occurs in any elected office except the office of mayor or school board member. Unless otherwise provided by ordinance, the governing body shall declare an elective office, other than the office of mayor or school board member, vacant when the person elected

(1) fails to qualify or take office within 30 days after election or appointment;

(2) is physically absent from the municipality for 90 consecutive days unless excused by the governing body;

(3) resigns and the resignation is accepted;

(4) is physically or mentally unable to perform the duties of office as determined by two-thirds vote of the governing body;

(5) is convicted of a felony or of an offense involving a violation of the oath of office;

(6) is convicted of a felony or misdemeanor described in AS 15.56 and two-thirds of the members of the governing body concur in expelling the person elected;

(7) is convicted of a violation of AS 15.13;

(8) no longer physically resides in the municipality and the governing body by two-thirds vote declares the seat vacant; or

(9) if a member of the governing body, misses three consecutive regular meetings and is not excused.

Sec. 29.20.180. FILLING A VACANCY. (a) If a vacancy occurs in a governing body, the remaining members shall, within 30 days unless a different period is provided by ordinance, appoint a qualified person to fill the vacancy. If less than 30 days remain in a term, a vacancy may not be filled.

(b) Notwithstanding (a) of this section, if the membership is reduced to fewer than the number required to constitute a quorum, the remaining members shall, within seven days, appoint a number of qualified persons to constitute a quorum.

(c) A person appointed under this section serves until the next regular election, when a successor shall be elected to serve the balance of the term.

ARTICLE 3. MUNICIPAL EXECUTIVE AND ADMINISTRATOR.

Sec. 29.20.220. EXECUTIVE POWER. (a) The executive power in a municipality is vested in a mayor. The mayor of a home rule or unified municipality is elected by the voters. The mayors of other municipalities are elected in accordance with AS 29.20.230.

(b) The mayor acts as ceremonial head of government, executes official documents on authorization of the governing body, and is responsible for additional duties and powers prescribed by this chapter or by home rule charter.

(c) This section applies to home rule and general law municipalities.

Sec. 29.20.230. ELECTION AND TERM OF MAYOR. (a) The mayor of a borough or first class city is elected at large. The mayor of a borough or first class city serves a term of three years, unless by ordinance a different term not to exceed four years is provided. The current term of an incumbent mayor may not be altered. The regular term of a mayor of a borough or first class city begins on the first Monday following certification of the election.

(b) The mayor of a second class city is elected by and from the council, and serves until a successor is elected and qualifies. The council of a second class city shall meet on the first Monday after certification of the regular election and elect a mayor who takes office immediately. The mayor of a second class city serves a one-year term, unless a longer term is provided by ordinance. The mayor of a second class city may serve only while a member of the council regardless of the term established for the office of mayor.

(c) Except by ordinance ratified by the voters, no limit may be placed on the total number of terms or number of consecutive terms a mayor may serve.

Sec. 29.20.240. QUALIFICATIONS FOR THE OFFICE OF MAYOR. (a) A voter of the municipality is eligible to hold the office of mayor in a borough or first class city. A member of the city council is eligible to hold the office of mayor in a second class city.

(b) Residency requirements for the office of mayor not exceeding

three years may be prescribed by ordinance.

Sec. 29.20.250. POWERS AND DUTIES OF MAYOR. (a) If a municipality has not adopted a manager plan of government, the mayor is the chief administrator and the mayor has the same powers and duties as those of a manager under AS 29.20.500.

(b) The mayor may take part in the discussion of a matter before the governing body. The mayor may not vote, except that the mayor of a first class city or the mayor of a borough with a manager form of government may vote in the case of a tie. The mayor of a second class city, as a council member, may vote on all matters.

Sec. 29.20.260. EXECUTIVE ABSENCE. The borough mayor, subject to assembly approval, shall designate a person to act as mayor during the borough mayor's temporary absence or disability. If a manager plan has been adopted, the assembly shall designate by resolution a borough administrative official to act as manager during the manager's absence or disability.

Sec. 29.20.270. VETO. (a) Except as provided in (c) and (d) of this section, the mayor may veto an ordinance, resolution, motion, or other action of the governing body and may strike or reduce appropriation items.

(b) A veto must be exercised before the next regular meeting of the governing body and must be accompanied by a written explanation of the reasons for the veto. A veto may be overridden by vote of two-thirds of the authorized membership of the governing body within 21 days following exercise of the veto, or at the next regular meeting, whichever is later.

(c) The veto does not extend to

(1) appropriation items in a school budget ordinance;

(2) actions of the governing body sitting as the board of

equalization or the board of adjustment;

(3) adoption or repeal of a manager plan of government.

(d) The mayor of a second class city has no veto power.

Sec. 29.20.280. VACANCY IN THE OFFICE OF MAYOR. (a) The governing body shall, by two-thirds concurring vote, declare the office of mayor vacant only when the person elected

(1) fails to qualify or take office within 30 days after election or appointment;

(2) unless excused by the governing body, is physically absent for 90 consecutive days;

(3) resigns and the resignation is accepted;

(4) is physically or mentally unable to perform the duties of office;

(5) is convicted of a felony or of an offense involving a violation of the oath of office;

(6) is convicted of a felony or misdemeanor described in AS 15.56;

(7) is convicted of a violation of AS 15.13;

(8) no longer physically resides in the municipality; or

(9) if a member of the governing body in a second class city, misses three consecutive regular meetings and is not excused.

(b) A vacancy in the office of mayor occurring six months before a regular election shall be filled by the governing body. The person appointed serves until the next regular election when a successor is elected to serve the balance of the term. If a member of the governing body is appointed mayor, the member shall resign the seat on the governing body. If a vacancy occurs more than six months before a regular election, the governing body shall call a special election to fill the unexpired term.

(c) Notwithstanding (b) of this section, a vacancy in the office of mayor of a second class city shall be filled by and from the council. A mayor appointed under this subsection serves the balance of the term to which appointed, except the mayor may serve only while a member of the council.

ARTICLE 4. BOARDS AND COMMISSIONS.

Sec. 29.20.300. SCHOOL BOARDS. (a) Each municipal school district has a school board. Except as provided in (b) of this section, members of a school board are elected at the regular election for three-year terms and until their successors take office. Members are elected at large unless a different method of election has been approved by the voters in a regular election.

(b) The assembly is the school board for a third class borough. The mayor is the presiding officer of the assembly and president of the school board. However, the mayor may not veto an action of the school board.

Sec. 29.20.310. UTILITY BOARDS. (a) The governing body of a municipality operating a public utility may provide by ordinance for a utility board of five members and define the board's powers and duties.

(b) As determined by ordinance, members of a utility board are either appointed by the mayor and confirmed by the governing body or are elected at a regular election. The term of a utility board member is two years and until a successor is selected and qualifies. However, the governing body may by ordinance provide for a different term not to exceed four years. The current term of an elected incumbent may not be altered.

(c) Vacancies on a utility board are filled by the mayor. Executive appointments shall be confirmed by the governing body. A

person appointed to fill a vacancy on a utility board serves until the expiration of the term for which appointed and until a successor is elected and qualifies.

(d) Unless otherwise provided by ordinance, a utility board shall

(1) choose its chairman and secretary;

(2) appoint the manager of the public utility for a term not longer than five years and set the manager's salary;

(3) formulate and enforce the general rules and policies of the utility.

Sec. 29.20.320. OTHER BOARDS AND COMMISSIONS. (a) The governing body may by ordinance establish advisory, administrative, technical, or quasi-judicial boards and commissions.

(b) Members of boards and commissions, except for members of the board of adjustment and assembly members serving on the board of equalization, are appointed by the mayor and confirmed by the governing body.

ARTICLE 5. OTHER OFFICIALS AND EMPLOYEES.

Sec. 29.20.360. APPOINTMENT OF OFFICIALS. Unless otherwise provided by ordinance, the municipal clerk, attorney, treasurer, and police chief are appointed by the chief administrator. Unless otherwise provided by ordinance, an official described in this section serves at the pleasure of the appointing authority and, if appointed by the chief administrator, must be confirmed by the governing body.

Sec. 29.20.370. MUNICIPAL ATTORNEY. The municipal attorney is the legal advisor of the governing body, the school board, and the other officials of the municipality. The municipal attorney represents the municipality as attorney in civil and criminal proceedings. The school board may hire independent counsel when in its judgment

independent counsel is needed.

Sec. 29.20.380. MUNICIPAL CLERK. (a) The municipal clerk shall

(1) give notice of the time and place of meetings of the governing body to the governing body and to the public;

(2) attend meetings of the governing body and keep the journal;

(3) arrange publication of notices, ordinances, and resolutions;

(4) maintain and make available for public inspection an indexed file containing municipal ordinances, resolutions, rules, regulations, and codes;

(5) attest deeds and other documents;

(6) perform other duties specified in this title or prescribed by the chief administrator or by the governing body.

(b) The governing body may combine the office of clerk with that of treasurer. If the offices are combined, the clerk-treasurer shall, as required of the treasurer, give bond to the municipality for the faithful performance of the duties as clerk-treasurer.

Sec. 29.20.390. MUNICIPAL TREASURER. (a) Except as provided in AS 14.14.060, the treasurer is the custodian of all municipal funds. The treasurer shall keep an itemized account of money received and disbursed. The treasurer shall pay money on vouchers drawn against appropriations.

(b) The treasurer shall give bond to the municipality in a sum that the governing body directs.

Sec. 29.20.400. DEPARTMENTS. (a) The governing body may establish municipal departments and distribute functions among them.

(b) Each municipal department is administered by a department head. With the consent of the governing body, the mayor may serve as

head of one or more departments or a single administrator may serve as head of two or more departments.

Sec. 29.20.410. PERSONNEL SYSTEM. (a) Except as provided by (b) of this section, appointments and promotions of municipal employees are made on the basis of merit. The governing body may provide for a personnel system and classified service.

(b) By ordinance the governing body may designate confidential or managerial positions that are wholly or partially exempt from the classified service. A wholly or partially exempt position is filled by a person who serves at the pleasure of the appointing authority and whose term of employment is determined by the appointing authority.

ARTICLE 6. MANAGER PLAN.

Sec. 29.20.460. MANAGER PLAN. A municipality may adopt a manager plan of government. Adoption of a manager plan may be initiated either by petition or by motion of the governing body. A petition for the adoption of a manager plan is submitted to the governing body. The petition must be signed by a number of voters equal to the following percentage of the votes cast at the preceding regular election:

(1) 25 percent if the municipality has fewer than 7,500 persons;

(2) 15 percent if the municipality has 7,500 persons or more.

Sec. 29.20.470. ELECTION ON ADOPTION OF MANAGER PLAN. On receipt of a petition to adopt a manager plan or on its own motion to adopt a manager plan, the governing body shall provide by ordinance or resolution for a vote on the question at the next election.

Sec. 29.20.480. ADOPTION OF MANAGER PLAN. (a) If a manager plan is approved, the governing body shall, within 60 days, adopt the plan by ordinance or resolution.

(b) The governing body shall notify the department of the adoption of a manager plan.

Sec. 29.20.490. APPOINTMENT OF MANAGER. (a) The governing body shall appoint a manager by a majority vote of its membership. A manager is chosen on the basis of administrative qualifications and receives the compensation set by the governing body. A member of the governing body may not be appointed manager of the municipality sooner than one year after leaving office, except by a vote of three-fourths of the authorized membership of the governing body.

(b) Subject to the contract of employment, the manager holds office at the pleasure of the governing body.

Sec. 29.20.500. POWERS AND DUTIES OF A MANAGER. The manager may hire necessary administrative assistants and may authorize an administrative official to appoint, suspend, or remove subordinates. As chief administrator the manager shall

(1) appoint, suspend, or remove municipal employees and administrative officials, except as provided otherwise in this title and AS 14.14.065;

(2) supervise the enforcement of municipal law and carry out the directives of the governing body;

(3) prepare and submit an annual budget and capital improvement program for consideration by the governing body, and execute the budget and capital improvement program adopted;

(4) make monthly financial reports and other reports on municipal finances and operations as required by the governing body;

(5) exercise custody over all real and personal property of the municipality, except property of the school district;

(6) perform other duties required by law or by the governing body; and

(7) serve as personnel officer, unless the governing body authorizes the manager to appoint a personnel officer.

Sec. 29.20.510. INTERGOVERNMENTAL APPOINTMENT OF MANAGER. A borough adopting a manager plan may, on agreement with a city in the borough, provide that the manager of the city serve also as borough manager. A city adopting a manager plan may, on agreement with the borough in which it is located, provide that the manager of the borough serve also as city manager. Appointment and service of the manager shall be as provided in AS 29.20.490 - 29.20.500. Nothing in this section affects the authority of the governing body to provide for other dual officeholding if the dual offices held are compatible, or otherwise to appoint officials and employees in accordance with law.

Sec. 29.20.520. REPEAL OF MANAGER PLAN. A municipality may repeal a manager plan in the same manner used for its adoption. Within 60 days after repeal of a manager plan, the governing body shall enact provisions for the reorganization of the municipal executive and administrative functions.

ARTICLE 7. MISCELLANEOUS PROVISIONS.

Sec. 29.20.600. OATHS OF OFFICE. Before taking office a municipal official shall affirm in writing that the duties of the office will be honestly, faithfully, and impartially performed by the official. The oath is filed with the municipal clerk.

Sec. 29.20.610. BONDING. The manager and the other municipal officials or employees that the governing body may designate shall give bond in the amount and with the surety prescribed by the governing body. Premiums on bonds are paid by the municipality.

Sec. 29.20.620. COMPENSATION FOR ELECTED OFFICIALS. The governing body shall by ordinance provide a method of determining the

salaries of elected officials. The salary of the mayor may not be reduced durin , the term of office of the mayor, unless during the term a manager plan is adopted. An elected official may not receive compensation for service to the municipality in addition to the salary received as an elected official, unless otherwise provided by ordinance. Per diem payments or reimbursements for expenses are not compensation under this section.

Sec. 29.20.630. PROHIBITIONS. (a) Subject to AS 14.14.140, a state employee or school district employee may not be denied the right to serve as an elected municipal official because of employment by the state or a school district. For purposes of this section a school district employee is not a municipal employee.

(b) This section applies to home rule and general law municipalities.

Sec. 29.20.640. REPORTS. (a) A municipality shall file with the department

(1) maps and descriptions of all annexed or detached territory;

(2) a copy of the annual audit, or, for a second class city, an audit or statement of annual income and expenditures;

(3) tax assessment and tax levy figures as requested;

(4) a copy of the current annual budget of the municipality;

(5) a summary of the optional property tax exemptions authorized together with the estimate of the revenues lost to the municipality by operation of each of the exemptions.

(b) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under AS 29.60.010 - 29.60.080 and state aid for miscellaneous

municipal services under AS 29.60.100 - 29.60.180. If a municipality does not comply with this section, the department shall withhold the allocations until the required reports are filed.

(c) This section applies to home rule and general law municipalities.

* Sec. 7. AS 29 is amended by adding a new chapter to read:

CHAPTER 25. MUNICIPAL ENACTMENTS.

Sec. 29.25.010. ACTS REQUIRED TO BE BY ORDINANCE. (a) In addition to other actions that this title requires to be by ordinance, the governing body of a municipality shall use ordinances to

(1) establish, alter, or abolish municipal departments;

(2) provide for a fine or other penalty, or establish rules or regulations for violation of which a fine or other penalty is imposed;

(3) provide for the levying of taxes;

(4) make appropriations, including supplemental appropriations or transfer of appropriations;

(5) grant, renew, or extend a franchise;

(6) adopt, modify, or repeal the comprehensive plan, land use and subdivision regulations, building and housing codes, and the official map;

(7) approve the transfer of a power to a first or second class borough from a city;

(8) designate the borough seat;

(9) provide for the retention or sale of tax-foreclosed property;

(10) exempt contractors from compliance with general requirements relating to payment and performance bonds in the construction or repair of municipal public works projects within the

limitations set out in AS 36.25.025; this paragraph applies to home rule and general law municipalities.

(b) This section grants no authority but requires the governing body to use ordinances in exercising certain of its powers.

Sec. 29.25.020. ORDINANCE PROCEDURE. (a) An ordinance is introduced in writing in the form required by the governing body.

(b) The following procedure governs the enactment of all ordinances, except emergency ordinances:

(1) an ordinance may be introduced by a member or committee of the governing body, or by the mayor or manager;

(2) an ordinance shall be set by the governing body for a public hearing by the affirmative vote of a majority of the votes authorized on the question;

(3) at least five days before the public hearing a summary of the ordinance shall be published together with a notice of the time and place for the hearing;

(4) copies of the ordinance shall be available to all persons present at the hearing, or the ordinance shall be read in full;

(5) during the hearing the governing body shall hear all interested persons wishing to be heard;

(6) after the public hearing the governing body shall consider the ordinance, and may adopt it with or without amendment;

(7) the governing body shall print and make available copies of an ordinance that is adopted.

(c) An ordinance takes effect upon adoption or at a later date specified in the ordinance.

Sec. 29.25.030. EMERGENCY ORDINANCES. (a) To meet a public emergency the governing body may adopt an emergency ordinance

effective on adoption. Each emergency ordinance shall contain a finding by the governing body that an emergency exists and a statement of the facts upon which the finding is based. An emergency ordinance may be adopted, amended and adopted, or rejected at the meeting at which it is introduced. The affirmative vote of all members present, or the affirmative vote of three-fourths of the total membership, whichever is less, is required for adoption of an emergency ordinance. The governing body shall print and make available copies of adopted emergency ordinances.

(b) An emergency ordinance may not be used to levy taxes, to grant, renew, or extend a franchise, or to regulate the rate charged by a public utility for its services.

(c) An emergency ordinance is effective for 60 days.

Sec. 29.25.040. CODES OF REGULATION. The governing body may in a single ordinance adopt or amend by reference provisions of a published code of municipal regulations. The procedure under AS 29.25.-020 applies to an ordinance adopted under this section, except that neither the ordinance or its amendments must be distributed to the public or read in full at the public hearing. For a period of 15 days before adoption of an ordinance under this section, at least five copies of the code of regulations shall be made available for public inspection at a time and place set out in the hearing notice. Only the ordinance must be printed after it is adopted under this section. The governing body shall provide for an adopted code of regulations to be made available to the public at no more than cost.

Sec. 29.25.050. CODIFICATION. (a) Each ordinance shall be codified after it is adopted.

(b) Within three years after incorporation of a municipality, the municipal clerk or the clerk's designee shall have prepared a

general codification of all municipal ordinances of general applicability having the force and effect of law. The municipal code shall be revised and printed at least every five years, unless the code is kept current by regular supplements.

(c) In (a) of this section, "codified" means

(1) the ordinance has been given a serial number or other permanent identifying number, and, bearing a notation of the date of adoption and the adopting authority, it has been entered by the municipal clerk in a properly indexed book maintained for the purposes of organizing and recording the ordinances; or

(2) the ordinance is a provision that establishes a rule of conduct or behavior and that is included, or to be included, in a code of ordinances or other complete system of law enacted and kept current at reasonable intervals.

(d) This section applies to home rule and general law municipalities.

Sec. 29.25.060. RESOLUTIONS. (a) The governing body shall provide for the maintenance of a permanent file of resolutions that have been adopted.

(b) This section applies to home rule and general law municipalities.

Sec. 29.25.070. PENALTIES. (a) For the violation of an ordinance, a municipality may by ordinance prescribe penalties not to exceed those imposed for a class B misdemeanor.

(b) The municipality or an aggrieved person may institute a civil action against a person who violates an ordinance. In addition to injunctive and compensatory relief, a civil penalty not to exceed $1,000 may be imposed for each violation. An action to enjoin a violation may be brought notwithstanding the availability of any other

remedy. On application for injunctive relief and a finding of a violation or a threatened violation, the superior court shall grant the injunction. Each day that a violation of an ordinance continues constitutes a separate violation.

(c) The penalties authorized under this section may be imposed only if copies of the ordinance are made available for distribution to the public at no more than cost.

* Sec. 8. AS 29 is amended by adding a new chapter to read:

CHAPTER 26. ELECTIONS.

ARTICLE 1. REGULAR AND SPECIAL ELECTIONS.

Sec. 29.26.010. ADMINISTRATION. The governing body shall prescribe the rules for conducting an election and shall appoint an election board composed of at least three judges for each precinct. A judge shall be a voter of the precinct for which appointed unless no voter is willing to serve.

Sec. 29.26.020. NOMINATIONS. (a) Subject to other provisions of this title, the governing body shall provide by ordinance for nominations of elected officials by providing for declaration of candidacy or for petition requiring the signatures of not more than 10 voters, or for both.

(b) A person may be nominated for and occupy more than one office, but may not serve simultaneously as borough mayor and as a member of the assembly or, in a first class city, as city mayor and as a member of the council.

Sec. 29.26.030. NOTICE OF ELECTIONS. (a) Subject to other provisions of this title, a municipality shall give at least 20 days notice of an election.

(b) This section applies to home rule and general law municipalities.

Sec. 29.26.040. DATE. The date of a regular election is the first Tuesday of October annually, unless a different date or interval of years is provided by ordinance.

Sec. 29.26.050. VOTER QUALIFICATION. (a) A person may vote in a municipal election only if the person

(1) is a United States citizen who is qualified to vote in state elections;

(2) has been a resident of the municipality for 30 days immediately preceding the election;

(3) is registered to vote in state elections; and

(4) is not disqualified under art. V of the state constitution.

(b) Voter registration by the municipality may not be required. However, a municipality may by ordinance require that a person be registered to vote in state elections in the precinct in which that person seeks to vote in municipal elections.

(c) This section applies to home rule and general law municipalities.

Sec. 29.26.060. RUNOFF ELECTIONS. (a) Unless otherwise provided by ordinance, a runoff election shall be held if no candidate receives over 40 percent of the votes cast for the office of

(1) mayor; or

(2) member of the governing body or school board if candidates run for a designated seat.

(b) Unless otherwise provided by ordinance, if candidates for the governing body or school board run at large, a runoff election for a seat shall be held if no candidate receives a number of votes greater than 40 percent of the total votes cast for all candidates divided by the number of seats to be filled.

(c) Unless otherwise provided by ordinance, a runoff election shall be held within three weeks after the date of certification of the election for which a runoff is required, and notice of the runoff election shall be published at least five days before the election date. The runoff election shall be between the two candidates receiving the greatest number of votes for the seat.

Sec. 29.26.070. ELECTION CONTEST AND APPEAL. (a) The governing body may provide by ordinance the time and procedure for the contest of an election.

(b) Unless otherwise provided by ordinance, an election may be contested only by a voter by filing a written affidavit with the municipal clerk specifying with particularity the grounds for the contest. An election may be contested before or during the first canvass of ballots by the governing body.

(c) Unless otherwise provided by ordinance, the governing body shall declare the election results at the first meeting to canvass the election, record the results in the minutes of that meeting, and authorize the results to be certified.

(d) A contestant shall pay all costs and expenses incurred in a recount of an election demanded by the contestant if the recount fails to reverse a result of the election, or the difference between the winning and losing vote on the result contested is more than two percent.

(e) A person may not appeal or seek judicial review of an election for any cause unless the person is a municipal voter, has exhausted all administrative remedies before the governing body, and has commenced, within 10 days after the governing body has declared the election results, an action in the superior court in the judicial district in which the municipality is located. If court action is not

commenced within the 10-day period, the election and election results are conclusive and valid.

ARTICLE 2. INITIATIVE AND REFERENDUM.

Sec. 29.26.100. RESERVATION OF POWERS. The powers of initiative and referendum are reserved to the residents of municipalities, except the powers do not extend to matters restricted by art. XI, sec. 7 of the state constitution.

Sec. 29.26.110. APPLICATION FOR PETITION. (a) An initiative or referendum is proposed by filing an application with the municipal clerk containing the ordinance or resolution to be initiated or the ordinance or resolution to be referred and the address to which all correspondence relating to the petition may be sent. An application shall be signed by at least 10 voters who will sponsor the petition. An additional sponsor may be added at any time before the petition is filed by submitting the name of the sponsor to the clerk. Within two weeks the clerk shall certify the application if the clerk finds that it is in proper form and, for an initiative petition, that the matter

(1) is not restricted by AS 29.26.100;

(2) includes only a single subject;

(3) relates to a legislative rather than to an administrative matter; and

(4) would be enforceable as a matter of law.

(b) A decision by the clerk on an application for petition is subject to judicial review.

Sec. 29.26.120. CONTENTS OF PETITION. (a) Within two weeks after certification of an application for an initiative or referendum petition, a petition shall be prepared by the municipal clerk. Each copy of the petition shall contain

(1) a summary of the ordinance or resolution to be

initiated or the ordinance or resolution to be referred;

(2) the complete ordinance or resolution sought to be initiated or referred as submitted by the sponsors;

(3) the date on which the petition is issued by the clerk;

(4) notice that signatures must be secured within 60 days after the date the petition is issued;

(5) spaces for each signature, the printed name of each signer, the date each signature is affixed, and the residence and mailing addresses of each signer;

(6) a statement, with space for the sponsor's sworn signature and date of signing, that the sponsor personally circulated the petition, that all signatures were affixed in the presence of the sponsor, and that the sponsor believes the signatures to be those of the persons whose names they purport to be; and

(7) space for indicating the total number of signatures on the petition.

(b) If a petition consists of more than one page, each page shall contain the summary of the ordinance or resolution to be initiated or the ordinance or resolution to be referred.

(c) Copies of the petition shall be provided to each sponsor by the clerk.

Sec. 29.26.130. SIGNATURE REQUIREMENTS. (a) The signatures on an initiative or referendum petition shall be secured within 60 days after the clerk issues the petition. The statement provided under AS 29.26.120(a)(6) shall be signed and dated by the sponsor. Signatures shall be in ink or indelible pencil.

(b) The clerk shall determine the number of signatures required on a petition and inform each sponsor. A petition shall be signed by a number of voters based on the number of votes cast at the last

regular election held before the date the petition was issued equal to

(1) 25 percent of the votes cast if a municipality has fewer than 7,500 persons; or

(2) 15 percent of the votes cast if a municipality has 7,500 persons or more.

(c) Illegible signatures shall be rejected by the clerk unless accompanied by a legible printed name. Signatures not accompanied by a legible residence address shall be rejected.

(d) A petition signer may withdraw the signer's signature on written application to the clerk before certification of the petition.

Sec. 29.26.140. SUFFICIENCY OF PETITION. (a) All copies of an initiative or referendum petition shall be assembled and filed as a single instrument. Within 10 days after the date the petition is filed, the municipal clerk shall

(1) certify on the petition whether it is sufficient; and

(2) if the petition is insufficient, identify the insufficiency and notify the sponsors at the address provided under AS 29.-26.110(a) by certified mail.

(b) A petition that is insufficient may be supplemented with additional signatures obtained and filed within 10 days after the date on which the petition is rejected.

(c) A petition that is insufficient shall be rejected and filed as a public record unless it is supplemented under (b) of this section. Within 10 days after a supplementary filing the clerk shall recertify the petition. If it is still insufficient, the petition is rejected and filed as a public record.

Sec. 29.26.150. PROTEST. If the municipal clerk certifies an initiative or referendum petition is insufficient, a signer of the petition may file a protest with the mayor within seven days after the

certification. The mayor shall present the protest at the next regular meeting of the governing body. The governing body shall hear and decide the protest.

Sec. 29.26.160. NEW PETITION. Failure to secure sufficient signatures does not preclude the filing of a new initiative or referendum petition. However, a new petition on substantially the same matter may not be filed sooner than six months after a petition is rejected as insufficient.

Sec. 29.26.170. INITIATIVE ELECTION. (a) Unless substantially the same measure is adopted, when a petition seeks an initiative vote the clerk shall submit the matter to the voters at the next regular election occurring no sooner than 45 days after certification of the petition. If no regular election occurs within 75 days after the certification of a petition, the governing body shall hold a special election within 75 days, but not sooner than 45 days after certification.

(b) If the governing body adopts substantially the same measure, the petition is void and the matter initiated may not be placed before the voters.

(c) The ordinance or resolution initiated shall be published in full in the notice of the election, but may be summarized on the ballot to indicate clearly the proposal submitted.

(d) If a majority vote favors the ordinance or resolution, it becomes effective upon certification of the election, unless a different effective date is provided in the ordinance or resolution.

Sec. 29.26.180. REFERENDUM ELECTION. (a) Unless the ordinance or resolution is repealed, when a petition seeks a referendum vote the clerk shall submit the matter to the voters at the next election occurring no sooner than 45 days after certification of the petition.

If no election occurs within 75 days of certification of a petition, the governing body shall hold a special election within 75 days, but not sooner than 45 days after certification.

(b) If a petition is certified before the effective date of the matter referred, the ordinance or resolution against which the petition is filed shall be suspended pending the referendum vote. During the period of suspension, the governing body may not enact an ordinance or resolution substantially similar to the suspended measure.

(c) If the governing body repeals the ordinance or resolution before the referendum election, the petition is void and the matter referred shall not be placed before the voters.

(d) If a majority vote favors the repeal of the matter referred, it is repealed. Otherwise, the matter referred remains in effect or, if it has been suspended, becomes effective on certification of the election.

Sec. 29.26.190. EFFECT. (a) An ordinance or resolution may not be repealed or amended within one year after its effective date if adopted in an initiative election or if adopted after a petition that contains substantially the same measure has been filed.

(b) If an ordinance or resolution is repealed in a referendum election or by the governing body after a petition that contains substantially the same measure has been filed, substantially similar legislation may not be enacted by the governing body for a period of one year.

(c) If an initiative or referendum measure fails to receive voter approval, a new petition application for substantially the same measure may not be filed sooner than six months after the election results are certified.

ARTICLE 3. RECALL.

Sec. 29.26.240. RECALL. An official who is elected or appointed to an elective municipal office may be recalled by the voters after the official has served the first 120 days of the term for which elected or appointed.

Sec. 29.26.250. GROUNDS FOR RECALL. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties.

Sec. 29.26.260. APPLICATION FOR RECALL PETITION. (a) An application for a recall petition shall be filed with the municipal clerk and shall contain

(1) the signatures and residence addresses of at least 10 municipal voters who will sponsor the petition;

(2) the address to which all correspondence relating to the petition may be sent;

(3) a statement in 200 words or less of the grounds of the recall stated with particularity.

(b) An additional sponsor may be added at any time before the petition is filed by submitting the name of the sponsor to the clerk.

Sec. 29.26.270. RECALL PETITION. (a) If the municipal clerk determines that an application for a recall petition meets the requirements of AS 29.26.260, the clerk shall prepare a recall petition. All copies of the petition shall contain

(1) the name of the official sought to be recalled;

(2) the statement of the grounds for recall as set out in the application for petition;

(3) the date the petition is issued by the clerk;

(4) notice that signatures must be secured within 60 days after the date the petition is issued;

(5) spaces for each signature, the printed name of each

signer, the date of each signature, and the residence and mailing addresses of each signer;

(6) a statement, with space for the sponsor's sworn signature and date of signing, that the sponsor personally circulated the petition, that all signatures were affixed in the presence of the sponsor, and that the sponsor believes the signatures to be those of the persons whose names they purport to be; and

(7) space for indicating the number of signatures on the petition.

(b) Copies of the petition shall be provided to each sponsor by the clerk.

Sec. 29.26.280. SIGNATURE REQUIREMENTS. (a) The signatures on a recall petition shall be secured within 60 days after the date the clerk issues the petition. The statement provided under AS 29.26.-270(a)(6) shall be completed and signed by the sponsor. Signatures shall be in ink or indelible pencil.

(b) The clerk shall determine the number of signatures required on a petition and inform each sponsor. If a petition seeks to recall an official who represents the municipality at large, the petition shall be signed by a number of voters equal to 25 percent of the number of votes cast for that office at the last regular election held before the date the petition was issued. If a petition seeks to recall an official who represents a district, the petition shall be signed by a number of the voters residing in the district equal to 25 percent of the number of votes cast in the district for that office at the last regular election held before the date the petition was issued.

(c) Illegible signatures shall be rejected by the clerk unless accompanied by a legible printed name. Signatures not accompanied by

a legible residence address shall be rejected.

(d) A petition signer may withdraw the signer's signature upon written application to the clerk before certification of the petition.

Sec. 29.26.290. SUFFICIENCY OF PETITION. (a) The copies of a recall petition shall be assembled and filed as a single instrument. A petition may not be filed within 180 days before the end of the term of office of the official sought to be recalled. Within 10 days after the date a petition is filed, the municipal clerk shall

(1) certify on the petition whether it is sufficient; and

(2) if the petition is insufficient, identify the insufficiency and notify the sponsors at the address provided under AS 29.-26.260(a)(2) by certified mail.

(b) A petition that is insufficient may be supplemented with additional signatures obtained and filed within 10 days after the date on which the petition is rejected if

(1) the petition contains an adequate number of signatures, counting both valid and invalid signatures; and

(2) the supplementary petition is filed more than 180 days before the end of the term of office of the official sought to be recalled.

(c) A petition that is insufficient shall be rejected and filed as a public record unless it is supplemented under (b) of this section. Within 10 days after the supplementary filing the clerk shall recertify the petition. If it is still insufficient, the petition is rejected and filed as a public record.

Sec. 29.26.300. NEW RECALL PETITION APPLICATION. A new application for a petition to recall the same official may not be filed sooner than six months after a petition is rejected as insufficient.

Sec. 29.26.310. SUBMISSION. If a recall petition is sufficient,

the clerk shall submit it to the governing body at the next regular meeting or at a special meeting held before the next regular meeting.

Sec. 29.26.320. ELECTION. (a) If a regular election occurs within 75 days but not sooner than 45 days after submission of the petition to the governing body, the governing body shall submit the recall at that election.

(b) If no regular election occurs within 75 days, the governing body shall hold a special election on the recall question within 75 days but not sooner than 45 days after a petition is submitted to the governing body.

(c) If a vacancy occurs in the office after a sufficient recall petition is filed with the clerk, the recall question may not be submitted to the voters. The governing body may not appoint to the same office an official who resigns after a sufficient recall petition is filed naming him.

Sec. 29.26.330. FORM OF RECALL BALLOT. A recall ballot shall contain

(1) the grounds of recall as stated in 200 words or less on the recall petition;

(2) a statement by the official named on the recall petition of 200 words or less, if the statement is filed with the clerk for publication and public inspection within 20 days before the election;

(3) the following question: "Shall (name of person) be recalled from the office of (office)? Yes [ ] No [ ]".

Sec. 29.26.340. EFFECT. (a) If a majority vote favors recall, the office becomes vacant upon certification of the recall election.

(b) If an official is not recalled at the election, an application for a petition to recall the same official may not be filed

sooner than six months after the election.

Sec. 29.26.350. SUCCESSORS. (a) If an official is recalled from the governing body, the office of that official is filled in accordance with AS 29.20.180. If all members of the governing body are recalled, the governor shall appoint three qualified persons to the governing body. The appointees shall appoint additional members to fill remaining vacancies in accordance with AS 29.20.180.

(b) If a member of the school board is recalled, the office of that member is filled in accordance with AS 14.12.070. If all members are recalled from a school board, the governor shall appoint three qualified persons to the school board. The appointees shall appoint additional members to fill remaining vacancies in accordance with AS 14.12.070.

(c) A person appointed under (a) or (b) of this section serves until a successor is elected and takes office.

(d) If an official other than a member of the governing body or school board is recalled, a successor shall be elected to fill the unexpired portion of the term. The election shall be held not more than 60 days after the date the recall election is certified, except that if a regular election occurs within 75 days after certification the successor shall be chosen at that election.

(e) Nominations for a successor may be filed until seven days before the last date on which a first notice of the election must be given. Nominations may not be filed before the certification of the recall election.

Sec. 29.26.360. APPLICATION. AS 29.26.240 - 29.26.360 apply to home rule and general law municipalities.

* Sec. 9. AS 29 is amended by adding a new chapter to read:

CHAPTER 35. MUNICIPAL POWERS AND DUTIES.

ARTICLE 1. GENERAL POWERS.

Sec. 29.35.010. GENERAL POWERS. All municipalities have the following general powers, subject to other provisions of law:

(1) to establish and prescribe a salary for an elected or appointed municipal official or employee;

(2) to combine two or more appointive or administrative offices;

(3) to establish and prescribe the functions of a municipal department, office, or agency;

(4) to require periodic and special reports from a municipal department to be submitted through the mayor;

(5) to investigate an affair of the municipality and make inquiries into the conduct of a municipal department;

(6) to levy a tax or special assessment, and impose a lien for its enforcement;

(7) to enforce an ordinance and to prescribe a penalty for violation of an ordinance;

(8) to acquire, manage, control, use, and dispose of real and personal property, whether the property is situated inside or outside the municipal boundaries; this power includes the power of a borough to expend, for any purpose authorized by law, money received from the disposal of land in a service area established under AS 29.-35.450;

(9) to expend money for a community purpose, facility, or service for the good of the municipality to the extent the municipality is otherwise authorized by law to exercise the power necessary to accomplish the purpose or provide the facility or service;

(10) to regulate the operation and use of a municipal right-of-way, facility, or service;

(11) to borrow money and issue evidences of indebtedness;

(12) to acquire membership in an organization that promotes legislation for the good of the municipality;

(13) to enter into an agreement, including an agreement for cooperative or joint administration of any function or power with a municipality, the state, or the United States;

(14) to sue and be sued.

Sec. 29.35.020. EXTRATERRITORIAL JURISDICTION. (a) To the extent a municipality is otherwise authorized by law to exercise the power necessary to provide the facility or service, the municipality may provide parks, playgrounds, cemeteries, emergency medical services, solid and septic waste disposal, utility services, airports, streets (including ice roads), trails, transportation facilities, wharves, harbors and other marine facilities outside its boundaries and may regulate their use and operation to the extent that the jurisdiction in which they are located does not regulate them. A regulation adopted under this section must state that it applies outside the municipality.

(b) A municipality may adopt an ordinance to protect its water supply and watershed, and may enforce the ordinance outside its boundaries. Before this power may be exercised inside the boundaries of another municipality, the approval of the other municipality must be given by ordinance.

(c) This section applies to home rule and general law municipalities.

Sec. 29.35.030. EMINENT DOMAIN. (a) A municipality may exercise the powers of eminent domain and declaration of taking in the performance of a power or function of the municipality under the procedures set out in AS 09.55.250 - 09.55.460.

(b) This section applies to home rule and general law municipalities.

Sec. 29.35.040. EMERGENCY DISASTER POWERS. (a) A municipality that is wholly or partially in an area that is declared by the President or governor to be a disaster area may participate in and provide for housing, urban renewal, and redevelopment in the same manner as a home rule city. The exercise of these powers by a borough shall be on a nonareawide basis, except a borough may exercise the powers transferred to it by a city as provided by AS 29.35.310.

(b) Powers granted by this section must be initiated within a period of not more than five years after the date of declaration of a natural disaster by the President or governor, but these powers may be extended for an additional period of not more than three years.

Sec. 29.35.050. GARBAGE AND SOLID WASTE SERVICES. (a) A municipality may by ordinance

(1) provide for the establishment, maintenance, and operation of a system of garbage and solid waste collection and disposal for the entire municipality, or for districts or portions of it;

(2) require all persons in the municipality or district to use the system and to dispose of their garbage and solid wastes as provided in the ordinance;

(3) award contracts for collection and disposal, or provide for the collection and disposal of garbage and solid waste by municipal officials and employees;

(4) pay for garbage and solid waste collection and disposal from available money;

(5) require property owners or occupants of premises to use the garbage and solid waste collection and disposal system provided by the municipality;

(6) fix charges against the property owners or occupants of premises for the collection and disposal; and

(7) provide penalties for violations of the ordinances.

(b) The governing body of a municipality may not prohibit a person holding a valid certificate from the Alaska Public Utilities Commission from continuing to collect and dispose of garbage, refuse, trash, waste material, or provide other related services in an area in the municipality if the certificate authorizes the collection and disposal of garbage, refuse, trash, or other waste material and providing of other services in the area, and the certificate was originally issued before the municipality provided similar services. A municipality may not provide for a garbage, refuse, trash, or other waste material collection and disposal service in an area to the extent it lies in an area granted to a garbage, refuse, trash, or other waste material carrier by a certificate issued by the Alaska Public Utilities Commission to the carrier until it has purchased the certificate, equipment and facilities of the carrier, or that portion of the certificate that would be affected, at fair market value. A municipality may exercise the right of eminent domain to determine fair market value.

(c) This section applies to home rule and general law municipalities.

Sec. 29.35.060. FRANCHISES AND PERMITS. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may grant franchises, including exclusive franchise privileges, to a person, corporation, organization, or utility not certificated by the Alaska Public Utilities Commission and may permit the use of streets and other public places by the franchise holder under regulations prescribed by ordinance.

(b) Unless the grant is made on a competitive basis, the grant of an exclusive right to use a public street or right-of-way for more than five years to a utility or a transportation system not certificated by the Alaska Public Utilities Commission or by the Alaska Transportation Commission shall be valid only if approved by a majority of the voters at an election.

Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate, fix, establish, and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility to the extent

(1) that it is not subject to regulation under AS 42.05; and

(2) not otherwise prohibited by law.

(b) A municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) Unless the utility is owned by the municipality, all rates, charges, and regulations established under this section shall be established by ordinance and shall be reasonable and permit a fair return on invested capital.

(d) This section applies to home rule and general law municipalities.

Sec. 29.35.080. ALCOHOLIC BEVERAGES. (a) A municipality may regulate the barter, sale, importation, and consumption of alcoholic beverages in accordance with AS 04.11.480 - 04.11.506 and AS 04.21.-010.

(b) This section applies to home rule and general law municipalities.

Sec. 29.35.090. MUNICIPAL PROPERTY. The governing body shall by

ordinance establish a formal procedure for acquisition and disposal of land and interests in land by the municipality.

Sec. 29.35.100. BUDGET AND CAPITAL PROGRAM. (a) The governing body shall establish the manner for the preparation and submission of the budget and capital program. After a public hearing, the governing body may approve the budget with or without amendments, and shall appropriate the money required for the approved budget.

(b) The governing body may make supplemental and emergency appropriations. Payment may not be authorized or made and an obligation may not be incurred except in accordance with appropriations.

Sec. 29.35.110. EXPENDITURE OF BOROUGH REVENUES. Borough revenues received through taxes collected on an areawide basis by the borough may be expended on general administrative costs and on areawide functions only. Borough revenues received through taxes collected on a nonareawide basis may be expended on general administrative costs and functions that render service only to the area outside all cities in the borough.

Sec. 29.35.120. POST AUDIT. (a) The governing body shall provide for an annual independent audit of the accounts and financial transactions of the municipality or, in the case of a second class city, an audit or statement of annual income and expenditures. To make the audit the governing body shall designate a public accountant who has no personal interest, direct or indirect, in the fiscal affairs of the municipality. Copies of the audit shall be available to the public upon request.

(b) This section applies to home rule and general law municipalities.

Sec. 29.35.130. EMERGENCY SERVICES COMMUNICATIONS CENTERS. (a) A municipality may establish an emergency services communications

center with one or more other municipalities and one or more state, federal, or private agencies that provide emergency service communications to the same geographic area. An emergency services communications center established under this section may be organized and operated as a public nonprofit corporation under AS 10.20.

(b) An emergency services communications center under this section may be governed by a board of directors. A member of a board of directors of an emergency services communications center serves without compensation but is entitled to per diem and travel expenses. If an emergency services communications center is organized as a nonprofit corporation, a member of its board of directors may not be employed by the nonprofit corporation.

(c) An emergency services communications center may assess the feasibility and desirability of providing emergency services communications for the geographic area in which it is located through one central office. An emergency services communications center may

(1) combine or coordinate the existing emergency services communications programs of the participating municipalities and agencies;

(2) operate a dispatch center to receive all requests for emergency services and dispatch those services;

(3) study the need for improvement in the timely delivery of emergency services to residents of the participating municipalities;

(4) hold public hearings to obtain information concerning the timely delivery of emergency services;

(5) apply for and accept federal, state, municipal, and private money, property, or assistance for use in providing the timely delivery of emergency services;

(6) enter into contracts to carry out the provisions of this section;

(7) employ personnel necessary to carry out the provisions of this section.

(d) In this section

(1) "emergency services" means services provided by law enforcement agencies, fire departments, ambulance services, and other organizations that are intended to respond to emergency situations of imminent danger to life or property;

(2) "state agency" means a department, division, or office in the executive branch of state government.

ARTICLE 2. MANDATORY AREAWIDE POWERS.

Sec. 29.35.150. SCOPE OF AREAWIDE POWERS. (a) A borough shall exercise the powers as specified and in the manner specified in AS 29.35.150 - 29.35.180 on an areawide basis.

(b) A city may not exercise an areawide power once that power is being exercised by a borough. This subsection applies to home rule and general law municipalities.

Sec. 29.35.160. EDUCATION. (a) Each borough constitutes a borough school district and establishes, maintains, and operates a system of public schools on an areawide basis as provided in AS 14.-14.060. A military reservation in a borough is not part of the borough school district until the military mission is terminated or until inclusion in the borough school district is approved by the Department of Education. However, operation of the military reservation schools by the borough school district may be required by the Department of Education under AS 14.14.110. If the military mission of a military reservation terminates or continued management and control by a regional educational attendance area is disapproved by the Department of

Education, operation, management, and control of schools on the military reservation transfers to the borough school district in which the military reservation is located.

(b) This section applies to home rule and general law municipalities.

Sec. 29.35.170. ASSESSMENT AND COLLECTION OF TAXES. (a) A borough shall assess and collect property, sales, and use taxes that are levied in its boundaries, subject to AS 29.45.

(b) Taxes levied by a city shall be collected by a borough and returned in full to the levying city. This subsection applies to home rule and general law municipalities.

Sec. 29.35.180. LAND USE REGULATION. (a) A first or second class borough shall provide for planning, platting, and land use regulation in accordance with AS 29.40.

(b) A home rule borough shall provide for planning, platting, and land use regulation.

ARTICLE 3. ADDITIONAL POWERS.

Sec. 29.35.200. FIRST CLASS BOROUGH POWERS. (a) A first class borough may exercise by ordinance on a nonareawide basis any power not otherwise prohibited by law.

(b) A first class borough may by ordinance exercise the following powers on an areawide basis:

(1) provide transportation systems;

(2) provide water pollution control;

(3) provide air pollution control in accordance with AS 46.03.140 - 46.03.240;

(4) license day care facilities;

(5) license, impound, and dispose of animals.

(c) In addition to powers conferred by (b) of this section, a

first class borough may, on an areawide basis, exercise a power not otherwise prohibited by law if the power has been acquired in accordance with AS 29.35.300.

Sec. 29.35.210. SECOND CLASS BOROUGH POWERS. (a) A second class borough may by ordinance exercise the following powers on a nonareawide basis:

(1) provide transportation systems;

(2) regulate the offering for sale, exposure for sale, sale, use or explosion of fireworks;

(3) license, impound, and dispose of animals;

(4) provide garbage, solid waste, and septic waste collection and disposal;

(5) provide air pollution control in accordance with AS 46.03.140 - 46.03.240;

(6) provide water pollution control;

(7) participate in federal or state loan programs for housing rehabilitation and improvement for energy conservation;

(8) provide for economic development;

(9) provide for the acquisition and construction of local service roads and trails under AS 19.30.111 - 19.30.251;

(10) establish an emergency services communications center under AS 29.35.130.

(b) A second class borough may by ordinance exercise the following powers on an areawide basis:

(1) provide transportation systems;

(2) license, impound, and dispose of animals;

(3) provide air pollution control in accordance with AS 46.03.140 - 46.03.240;

(4) provide water pollution control;

(5) license day care facilities.

(c) In addition to powers conferred by (a) of this section, a second class borough may, on a nonareawide basis, exercise a power not otherwise prohibited by law if the exercise of the power has been approved at an election by a majority of voters living in the borough but outside all cities in the borough.

(d) In addition to powers conferred by (b) of this section, a second class borough may, on an areawide basis, exercise a power not otherwise prohibited by law if the power has been acquired in accordance with AS 29.35.300.

Sec. 29.35.220. THIRD CLASS BOROUGH POWERS. (a) A third class borough may borrow money and issue negotiable or nonnegotiable bonds or other evidences of indebtedness as provided by AS 29.47.

(b) Areawide exercise of a power by a third class borough other than education and tax assessment and collection is not authorized.

(c) A third class borough may acquire under AS 29.35.300(b) the power to provide for planning, platting, and land use regulation as provided in AS 29.40 for first and second class boroughs, except the power may only be exercised within a service area.

(d) A third class borough may acquire under AS 29.35.300(b) any power not otherwise prohibited by law, except the power may only be exercised within a service area.

ARTICLE 4. CITY POWERS.

Sec. 29.35.250. CITIES INSIDE BOROUGHS. (a) A city inside a borough may exercise any power not otherwise prohibited by law.

(b) On adoption of a borough ordinance to provide for areawide exercise of a power, no city may exercise the power unless the borough ordinance provides otherwise or the borough by ordinance ceases to exercise the power.

(c) A home rule city in a third class borough shall provide for planning, platting, and land use regulation as provided by AS 29.35.-180(b) for home rule boroughs. A first class city in a third class borough shall provide for planning, platting, and land use regulation as provided by AS 29.35.180(a) for first and second class boroughs. A second class city in a third class borough may provide for planning, platting, and land use regulation as provided by AS 29.35.180(a) for first and second class boroughs.

(d) This section applies to home rule and general law cities.

Sec. 29.35.260. CITIES OUTSIDE BOROUGHS. (a) A city outside a borough may exercise a power not otherwise prohibited by law. A provision that is incorporated by reference to laws governing boroughs applies to home rule cities outside boroughs only if the provision is made applicable to home rule boroughs.

(b) A home rule or first class city outside a borough is a city school district and shall establish, operate, and maintain a system of public schools as provided by AS 29.35.160 for boroughs. A second class city outside a borough is not a school district and may not establish a system of public schools.

(c) A home rule city outside a borough shall provide for planning, platting, and land use regulation as provided by AS 29.35.180(b) for home rule boroughs. A first class city outside a borough shall, and a second class city outside a borough may, provide for planning, platting, and land use regulation as provided by AS 29.35.180(a) for first and second class boroughs.

(d) This section applies to home rule and general law cities.

ARTICLE 5. ACQUISITION OF ADDITIONAL POWERS.

Sec. 29.35.300. ADDITIONAL POWERS. (a) A first class borough acquires an additional areawide power by transfer of the power by a

city or by holding an areawide election on the question.

(b) A second class borough acquires an additional power by transfer of the power by a city or by holding an election on the question. For acquisition of an areawide power, the election shall be held areawide. For acquisition of a nonareawide power, the election shall be held nonareawide.

(c) A third class borough acquires an additional power to exercise in a service area in accordance with AS 29.35.490(b) and (c).

Sec. 29.35.310. TRANSFER BY CITY. (a) A city in a first or second class borough may transfer to the borough in which it is located any of its powers or functions, subject to the approval of the assembly.

(b) A first or second class borough shall exercise all powers transferred to it by a city.

Sec. 29.35.320. INITIATION OF ACQUISITION OF POWER. (a) An election on the question of adding an areawide power in a first class borough or of adding an areawide or nonareawide power in a second class borough may be initiated in two ways:

(1) a number of voters equal to 15 percent of the number of votes cast at the preceding regular election in the area, either areawide or nonareawide, in which the election is to be held may file a petition with the borough clerk; or

(2) the assembly may propose the acquisition of the power.

(b) An election on the question of adding a power in a third class borough for exercise in service areas may be initiated in tw ways:

(1) a number of voters equal to 15 percent of the number of votes cast at the preceding regular election in a proposed service area in which the power is sought to be exercised may file a petition

with the assembly; or

(2) the assembly may propose the acquisition of the power.

(c) The borough clerk shall certify whether a petition filed under (a) or (b) of this section contains the required number of signatures.

(d) Within 30 days after a petition is certified as containing the required number of signatures or the assembly proposes the acquisition of a power, at least one public hearing shall be held in the borough on the question. The assembly shall then evaluate the ability of the borough to exercise the power and make its findings public. Within 60 days after its findings have been made public, the assembly shall order an election on the question.

Sec. 29.35.330. ELECTION. (a) If more than one power is proposed for acquisition under AS 29.35.320, each shall appear separately on the ballot.

(b) A vote on the question of adding an areawide power in a first or second class borough shall be tabulated in two separate classifications. One shall consist of all votes cast in all cities located in the borough. The other shall consist of all votes cast in the borough area outside all cities. If the majority of the votes cast in each classification is favorable, the borough shall assume the added power within 30 days after certification of the election results.

(c) If a majority of the votes cast on the question of adding a nonareawide power in a first or second class borough or a power to be exercised in service areas in a third class borough is favorable, the borough shall assume the added power within 30 days after certification of the election results.

(d) The borough mayor shall certify the election results to the

department.

Sec. 29.35.340. EFFECT OF ACQUIRING AN AREAWIDE POWER. (a) On acquisition of an areawide power the first or second class borough succeeds to all of the rights, powers, and duties of any city or service area with respect to that power. The borough succeeds to claims, franchises, and other contractual obligations, liability for bonded and all other indebtedness, and to all of the right, title, and interest in the real and personal property held by a city or service area for the exercise of the power.

(b) The assembly may levy and collect special charges, taxes, or assessments including interest for the purpose of amortizing bonded indebtedness previously incurred by a city or service area for exercising an areawide power acquired by the borough. When a city or service area had previously incurred bonded indebtedness, all property that was in the city or service area at the time the bonds were issued remains subject to taxation to pay the principal of and interest on the bonds.

(c) On acquisition of an additional areawide power the first or second class borough, in consultation with the city or service area personnel, shall arrange for an orderly and equitable transfer of rights, assets, liabilities, powers, duties, and other matters related to acquisition of the areawide powers.

(d) This section applies to home rule and general law cities.

ARTICLE 6. CONSTRUCTION OF POWERS.

Sec. 29.35.400. GENERAL CONSTRUCTION. A liberal construction shall be given to all powers and functions of a municipality conferred in this title.

Sec. 29.35.410. EXTENT OF POWERS. Unless otherwise limited by law, a municipality has and may exercise all powers and functions

necessarily or fairly implied in or incident to the purpose of all powers and functions conferred in this title.

Sec. 29.35.420. ENUMERATION OF POWERS. Specific examples in an enumerated power or function conferred upon a municipality in this title is illustrative of the object and not a limitation on or exclusion from the exercise of the power or function.

ARTICLE 7. SERVICE AREAS.

Sec. 29.35.450. SERVICE AREAS. (a) A service area to provide special services in a borough may be established, operated, altered, or abolished by ordinance. Special services include services not provided on an areawide or nonareawide basis in the borough, or a higher or different level of service than that provided on an areawide or nonareawide basis. The borough may include a city in a service area if

(1) the city agrees by ordinance; or

(2) approval is granted by a majority of voters residing in the city, and by a majority of voters residing inside the boundaries of the proposed service area but outside of the city.

(b) A new service area may not be established if, consistent with the purposes of art. X of the state constitution, the new service can be provided by an existing service area, by annexation to a city, or by incorporation as a city.

Sec. 29.35.460. SERVICE AREA BOARDS. The assembly may provide for an appointed or elected board to supervise the furnishing of special services in a service area.

Sec. 29.35.470. FINANCING. The assembly may levy or authorize the levying of taxes, charges, or assessments in a service area to finance the special services. If the assembly authorizes the levying of taxes, charges, or assessments, the rate of taxation and the

issuance of bonds are subject to assembly approval.

Sec. 29.35.480. SERVICE AREAS IN FIRST CLASS BOROUGHS. In a first class borough, the assembly may exercise in a service area any power granted a first class city by law. The assembly may exercise in a service area any nonareawide power that may be exercised by a first class borough.

Sec. 29.35.490. SERVICE AREAS IN SECOND AND THIRD CLASS BOROUGHS. (a) A second class borough may exercise in a service area any power granted a first class city by law or a nonareawide power that may be exercised by a first class borough if

(1) the exercise of the power is approved by a majority of the voters residing in the service area; or

(2) all owners of real property in the service area consent in writing to the exercise of the power if no voters reside in the service area.

(b) If the exercise of the power is approved by a majority of the voters residing in the service area, a third class borough may exercise in a service area any power that may be acquired by a second class borough under AS 29.35.300(b).

(c) A second or third class borough may establish a service area that includes only vacant, unappropriated, and unreserved land owned by the borough. A second or third class borough may establish a service area, with the concurrence of the commissioner of natural resources, that includes only vacant, unappropriated, and unreserved land owned by the state and classified for disposal to individuals. By ordinance a second or third class borough may provide the services in a service area established under this subsection necessary to develop state or municipal land as required by the planning, platting, and land use regulations of the borough.

ARTICLE 8. MISCELLANEOUS PROVISIONS.

Sec. 29.35.700. DEFINITION. In AS 29.35.200 - 29.35.340 "power" means the provision of a public facility or service, or the exercise of a regulatory power.

* Sec. 10. AS 29 is amended by adding a new chapter to read:

CHAPTER 40. PLANNING, PLATTING, AND LAND USE REGULATION.

Sec. 29.40.010. PLANNING, PLATTING, AND LAND USE REGULATION. (a) A first or second class borough shall provide for planning, platting, and land use regulation on an areawide basis.

(b) If a city in a borough consents by ordinance, the assembly may by ordinance delegate any of its powers and duties under this chapter to the city. The assembly may by ordinance, without first obtaining the consent of the city, revoke any power or duty delegated under this section.

Sec. 29.40.020. PLANNING COMMISSION. (a) Each first and second class borough shall establish a planning commission consisting of five residents unless a greater number is required by ordinance. Commission membership shall be apportioned so that the number of members from home rule and first class cities reflects the proportion of borough population residing in home rule and first class cities located in the borough. A member shall be appointed by the borough mayor for a term of three years subject to confirmation by the assembly, except that a member from a home rule or first class city shall be selected from a list of recommendations submitted by the council. Members first appointed shall draw lots for one, two, and three year terms. Appointments to fill vacancies are for the unexpired term. The compensation and expenses of the planning commission and its staff are paid as directed by the assembly.

(b) In addition to the duties prescribed by ordinance, the

planning commission shall

(1) prepare and submit to the assembly a proposed comprehensive plan in accordance with AS 29.40.030 for the systematic and organized development of the borough;

(2) review, recommend, and administer measures necessary to implement the comprehensive plan, including measures provided under AS 29.40.040.

Sec. 29.40.030. COMPREHENSIVE PLAN. (a) The comprehensive plan is a compilation of policy statements, goals, standards, and maps for guiding the physical, social, and economic development, both private and public, of the first or second class borough, and may include, but is not limited to, the following:

(1) statements of policies, goals, and standards;

(2) a land use plan;

(3) a community facilities plan;

(4) a transportation plan; and

(5) recommendations for implementation of the comprehensive plan.

(b) With the recommendations of the planning commission, the assembly shall adopt by ordinance a comprehensive plan. The assembly shall, after receiving the recommendations of the planning commission, periodically undertake an overall review of the comprehensive plan and update the plan as necessary.

Sec. 29.40.040. LAND USE REGULATION. (a) In accordance with a comprehensive plan adopted under AS 29.40.030 and in order to implement the plan, the assembly by ordinance shall adopt or amend provisions governing the use and occupancy of land that may include, but are not limited to,

(1) zoning regulations restricting the use of land and

improvements by geographic districts;

(2) land use permit requirements designed to encourage or discourage specified uses and construction of specified structures, or to minimize unfavorable effects of uses and the construction of structures;

(3) measures to further the goals and objectives of the comprehensive plan.

(b) A variance from a land use regulation adopted under this section may not be granted if

(1) special conditions that require the variance are caused by the person seeking the variance;

(2) the variance will permit a land use in a district in which that use is prohibited; or

(3) the variance is sought solely to relieve pecuniary hardship or inconvenience.

Sec. 29.40.050. APPEALS FROM ADMINISTRATIVE DECISIONS. (a) By ordinance the assembly shall provide for an appeal from an administrative decision of a municipal employee, board, or commission made in the enforcement, administration, or application of a land use regulation adopted under this chapter. The assembly may provide for an appeal to a court, hearing officer, board of adjustment, or other body. The assembly shall provide for an appeal from a decision on a request for a variance from the terms of a land use regulation when literal enforcement would deprive a property owner of rights commonly enjoyed by other properties in the district.

(b) By ordinance the assembly may provide for appointment of a hearing officer, or for the composition, appointment, and terms of office of a board of adjustment or other body established to hear appeals from administrative actions. The assembly may define proper

parties and prescribe evidentiary rules, standards of review, and remedies available to the hearing officer, board of adjustment, or other body.

Sec. 29.40.060. JUDICIAL REVIEW. (a) The assembly shall provide by ordinance for an appeal by a municipal officer or person aggrieved from a decision of a hearing officer, board of adjustment, or other body to the superior court.

(b) An appeal to the superior court under this section is an administrative appeal heard solely on the record established by the hearing officer, board of adjustment, or other body.

Sec. 29.40.070. PLATTING REGULATION. By ordinance the assembly shall adopt platting requirements that may include, but are not limited to, the control of

(1) form, size, and other aspects of subdivision, dedications, and vacations of land;

(2) dimensions and design of lots;

(3) street width, arrangement, and rights-of-way, including requirements for public access to lots and installation of street paving, curbs, gutters, sidewalks, sewers, water lines, drainage and other public utility facilities and improvements;

(4) dedication of streets, rights-of-way, public utility easements and areas considered necessary by the platting authority for other public uses.

Sec. 29.40.080. PLATTING AUTHORITY. (a) The assembly by ordinance shall establish a platting authority to administer subdivision regulations and to perform other duties as required by the assembly. The platting authority may consist of members of the planning commission or of other municipal residents.

(b) The assembly may by ordinance provide for an administrative

official to act as the platting authority with regard to abbreviated plats.

Sec. 29.40.090. ABBREVIATED PLATS AND WAIVERS. (a) Notwithstanding other provisions of this chapter, the assembly shall by ordinance establish an abbreviated plat procedure for a plat that will

(1) subdivide a single lot into not more than four lots;

(2) provide legal and physical access to a public highway or street for each lot created by the subdivision;

(3) not contain or require a dedication of a street, right-of-way, or other area;

(4) not require a vacation of a public dedication of land or a variance from a subdivision regulation.

(b) The platting authority shall waive the preparation, submission for approval, and recording of a plat on satisfactory evidence that the subdivision meets the requirements of (a) of this section and each lot created by the subdivision is five acres or larger.

Sec. 29.40.100. INFORMATION REQUIRED. A plat shall show

(1) initial point of survey;

(2) original or reestablished corners and their descriptions;

(3) actual traverse showing area of closure and all distances, angles, and calculations required to determine initial point, corners, and distances of the plat; and

(4) other information that may be required by ordinance.

Sec. 29.40.110. PLAT PROCEDURE. (a) The platting authority shall approve or disapprove a plat within 60 days after it is filed, or shall return it to the applicant for modification or correction. Unless the applicant for plat approval consents to an extension of time, the plat is considered approved and a certificate of approval

shall be issued by the platting authority on demand if the platting authority fails to act within 60 days.

(b) The platting authority shall state in writing its reasons for disapproval of a plat. If the platting authority approves a plat, the plat shall be acknowledged and filed in accordance with AS 40.15.-010 - 40.15.020.

Sec. 29.40.120. ALTERATION OR REPLAT PETITION. A recorded plat may not be altered or replatted except by the platting authority on petition of the state, the borough, a public utility, or the owners of a majority of the land affected by the alteration or replat. A platted street may not be vacated, except on petition of the state, the borough, a public utility, or owners of a majority of the land fronting the part of the street sought to be vacated. The petition shall be filed with the platting authority and shall be accompanied by a copy of the existing plat showing the proposed alteration or replat.

Sec. 29.40.130. NOTICE OF HEARING. The platting authority shall fix a time for a hearing on an alteration or replat petition that may not be more than 60 days after the petition is filed. Notice shall be published by the platting authority stating when and by whom the petition was filed, its purpose, and the time and place of the hearing. The notice shall generally describe the alteration or replat sought. The platting authority shall also mail a copy of the notice to each affected property owner who did not sign the petition.

Sec. 29.40.140. HEARING AND DETERMINATION. (a) The platting authority shall consider the alteration or replat petition at a hearing and make its decision on the merits of the proposal.

(b) Vacation of a city street may not be made without the consent of the council. Vacation of a street in the borough area outside all cities may not be made without the consent of the assembly. The

governing body shall have 30 days from the decision of the platting authority in which to veto a vacation of a street. If no veto is received by the platting authority within the 30-day period, consent is considered to have been given to the vacation.

Sec. 29.40.150. RECORDING. If the alteration or replat is approved, the revised plat shall be acknowledged and filed in accordance with AS 40.15.010 - 40.15.020.

Sec. 29.40.160. TITLE TO VACATED AREA. (a) The title to the street or other public area vacated on a plat attaches to the lot or lands bordering the area in equal proportions, except that if the area was originally dedicated by different persons, original boundary lines shall be adhered to so that the street area that lies on one side of the boundary line shall attach to the abutting property on that side, and the street area that lies on the other side of the boundary line shall attach to the property on that side. The portion of a vacated street that lies inside the limits of a platted addition attaches to the lots of the platted addition bordering on the area. If a public square is vacated, the title to it vests in a city if it lies inside the city, and in the borough if it lies inside the borough but outside all cities. If the property vacated is a lot, title vests in the rightful owner.

(b) If the municipality acquired the street or other public area vacated for legal consideration or by express dedication to the municipality other than as a subdivision platting requirement, before the final act of vacation the fair market value of the street or public area shall be deposited with the platting authority to be paid to the municipality on final vacation.

(c) The provisions of (a) and (b) of this section apply to home rule and general law municipalities.

(d) The council of a second class city located outside a borough may vacate streets, alleys, crossings, sidewalks, or other public ways that may have been previously dedicated or established when the council finds that the streets, alleys, crossings, sidewalks, or other public ways are no longer necessary for the public welfare, or when the public welfare will be enhanced by the vacation. If the council determines that all or a portion of the area vacated under this subsection should be devoted to another public purpose, title to the area vacated and held for another public purpose does not vest as provided in (a) of this section but remains in the city.

Sec. 29.40.170. DELEGATIONS. The planning commission and the platting authority may, as authorized by ordinance, delegate powers to hear and decide cases under this chapter, including, but not limited to, delegations to

(1) one or more members of the planning commission or platting authority;

(2) other boards or commissions;

(3) a hearing officer designated by the planning commission or platting authority.

Sec. 29.40.180. VIOLATIONS. It is unlawful for the owner of land located in a subdivision to transfer, sell, offer to sell, or enter into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and filed in accordance with this chapter. It is unlawful for a person to file a plat or other document depicting subdivided land in a public recorder's office unless the plat or document has been approved by the platting authority. A person convicted of violating a provision of this chapter, a subdivision regulation adopted under this chapter, or a term, condition, or limitation imposed by a platting authority in the exercise of

its powers under this chapter is guilty of a class B misdemeanor.

Sec. 29.40.190. REMEDIES. (a) The municipality or an aggrieved person may institute a civil action against a person who violates a provision of this chapter, a subdivision regulation adopted under this chapter, or a term, condition, or limitation imposed by a platting authority. In addition to other relief, a civil penalty not to exceed $1,000 may be imposed for each violation. An action to enjoin a violation may be brought notwithstanding the availability of any other remedy. Upon application for injunctive relief and a finding of a violation or threatened violation, the superior court shall grant the injunction.

(b) Each day that an unlawful act or condition continues constitutes a separate violation.

Sec. 29.40.200. SUBDIVISIONS OF STATE LAND. (a) The subdivision requirements adopted under this chapter apply to a subdivision plat of undeveloped state land for disposal under AS 38.05 or AS 38.08 filed with the platting authority. The platting authority may not disapprove the subdivision plat on the basis of requirements for capital improvements on or to state land included in the subdivision plat. Subdivision ordinances and regulations adopted after the platting authority is notified by the commissioner of natural resources of a proposed sale of subdivided state land under AS 38.05 or AS 38.08 do not apply to the state land in the proposed sale.

(b) The platting authority must approve and sign a subdivision plat of state land within 60 days after its receipt from the commissioner of natural resources unless the platting authority

(1) determines that the plat does not comply with subdivision requirements other than those requiring capital improvements to state land; and

(2) notifies the commissioner of each determination of non-compliance within the 60-day period established in this subsection.

(c) The commissioner of natural resources may withdraw the subdivision plat and amend it in response to the determination of non-compliance by the platting authority under (b) of this section. The platting authority shall respond within 30 days to the amendment or response from the commissioner of natural resources.

(d) Notwithstanding any other provision of law, the provisions of this section apply to all disposals of land under AS 38.05 or AS 38.08.

(e) Nothing in this section relieves the Department of Natural Resources of its obligation to provide legal access to a subdivision.

(f) As used in this section, "capital improvements" includes but is not limited to access roads, other physical improvements, and their design and engineering.

(g) This section applies to home rule and general law municipalities.

* Sec. 11. AS 29 is amended by adding a new chapter to read:

CHAPTER 45. MUNICIPAL TAXATION.

ARTICLE 1. MUNICIPAL PROPERTY TAX.

Sec. 29.45.010. PROPERTY TAX. (a) A unified municipality may levy a property tax. A borough may levy

(1) an areawide property tax for areawide functions;

(2) a nonareawide property tax for functions limited to the area outside cities;

(3) a property tax in a service area for functions limited to the service area.

(b) A home rule or first class city may levy a property tax subject to AS 29.45.550 - 29.45.560. A second class city may levy a

property tax subject to AS 29.45.590.

(c) If a tax is levied on real property or on personal property, the tax must be assessed, levied, and collected as provided in this chapter.

Sec. 29.45.020. TAXPAYER NOTICE. (a) If a municipality levies and collects property taxes, the governing body shall provide the following notice:

"NOTICE TO TAXPAYER

For the current fiscal year the (city)(borough) has been allocated the following amount of state aid for school and municipal purposes under the applicable financial assistance Acts:

PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE (AS 14.17)	$
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT (AS 43.18.100)	$
MUNICIPAL TAX RESOURCE EQUALIZATION ASSISTANCE (AS 29.60.010 - 29.60.080)	$
STATE AID FOR MISCELLANEOUS MUNICIPAL SERVICES (AS 29.60.100 - 29.60.180)	$
TOTAL AID	$

The millage equivalent of this state aid, based on the dollar value of a mill in the municipality during the current assessment year and for the preceding assessment year, is:

	MILLAGE EQUIVALENT	
	PREVIOUS YEAR	THIS YEAR
PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	....MILLS	....MILLS
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	....MILLS	.. .MILLS

MUNICIPAL TAX RESOURCE EQUALI-
ZATION ASSISTANCE ....MILLS ....MILLS
STATE AID FOR MISCELLANEOUS
MUNICIPAL SERVICES ....MILLS ....MILLS
TOTAL MILLAGE EQUIVALENT ....MILLS ....MILLS"

Notice shall be provided

(1) by furnishing a copy of the notice with tax statements mailed for the fiscal year for which aid is received; or

(2) by publishing in a newspaper of general circulation in the municipality a copy of the notice once each week for a period of three successive weeks, with publication to occur not later than 45 days after the final adoption of the municipality's budget.

(b) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under AS 29.60.010 - 29.60.080 and state aid for miscellaneous municipal services under AS 29.60.100 - 29.60.180. The department shall withhold annual allocations under those sections until municipal officials demonstrate that the requirements of this section have been met.

Sec. 29.45.030. REQUIRED EXEMPTIONS. (a) The following property is exempt from general taxation:

(1) municipal, state, or federally owned property, except that a private leasehold, contract, or other interest in the property is taxable to the extent of the interest;

(2) household furniture of the head of a family or household;

(3) property used exclusively for nonprofit religious, charitable, cemetery, hospital, or educational purposes;

(4) property of a nonbusiness organization or its auxiliary

composed entirely of persons with 90 days or more of active service in the armed forces of the United States whose conditions of service and separation were other than dishonorable;

(5) money on deposit;

(6) the real property of certain residents of the state to the extent and subject to the conditions provided in (e) of this section;

(7) real property or interests in real property that are exempt from taxation under 43 U.S.C. 1620(d), as amended, as more fully provided in (m) and (n) of this section.

(b) "Property used exclusively for religious purposes" includes the following property owned by a religious organization:

(1) the residence of a bishop, pastor, priest, rabbi, minister, or religious order of a recognized religious organization;

(2) a structure, its furniture, and its fixtures used solely for public worship, charitable purposes, religious administrative offices, religious education, or a nonprofit hospital;

(3) lots required by local ordinance for parking near a structure defined in (2) of this subsection.

(c) Property described in (a)(3) or (4) or (b) of this section from which income is derived is exempt only if that income is solely from use of the property by nonprofit religious, charitable, hospital, or educational groups. If used by nonprofit educational groups, the property is exempt only if used exclusively for classroom space.

(d) Laws exempting certain property from execution under the Code of Civil Procedure (AS 09) do not exempt the property from taxes levied and collected by municipalities.

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of

the assessed value of the real property. Real property may not be exempted under this subsection that the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 and 44.62.570.

(f) An exemption may not be granted under (e) of this section except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15, or a date provided by ordinance that is not later than March 31, of the assessment year for which the exemption is sought. The governing body of the municipality for good cause shown may waive during a year the claimant's failure to make timely application for exemption for that year and authorize the assessor to accept the application as if timely filed. The claimant must file a separate application for each assessment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, the assessor shall allow an exemption in accordance with the provisions of this section. If a failure to file by January 15, or a date provided by ordinance that is not later than March 31, of the assessment year has been waived as provided in this subsection and the application for exemption is approved, the amount of tax that the claimant has already paid for the assessment year for the property exempted shall be refunded to the claimant. The assessor may at any time require proof in the form the assessor considers necessary of the right and amount of an exemption claimed under (e) of this section.

(g) The state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of (e)

of this section. However, reimbursement will be made to a municipality for revenue lost to it only to the extent that the loss exceeds an exemption that was granted by the municipality, or that on proper application by an individual would have been granted under AS 29.45.050(a).

(h) Except as provided in (g) of this section, nothing in (e) - (j) of this section affects similar exemptions from property taxes granted by a municipality on September 10, 1972, or prevents a municipality from granting similar exemptions by ordinance as provided in AS 29.45.050.

(i) In (e) - (i) of this section "real property" includes but is not limited to mobile homes, whether classified as real or personal property for municipal tax purposes.

(j) One motor vehicle per household owned by a resident 65 years of age or older on January 1 of the assessment year is exempt either from taxation on its assessed value or from the registration tax under AS 28.10.431. An exemption may be granted under this subsection only upon written application on a form prescribed by the Department of Public Safety. The state shall reimburse a municipality for tax revenues lost to it because of the exemption required by this subsection. Reimbursement to a municipality equals the amount of registration tax authorized under AS 28.10.431(b) for each vehicle exempted under this subsection.

(k) The department shall adopt regulations to implement the provisions of (g) and (j) of this section.

(l) Two percent of the assessed value of a structure is exempt from taxation if the structure contains a fire protection system approved under AS 19.70.081, in operating condition, and incorporated as a fixture or part of the structure. The exemption granted by this

subsection is limited to

(1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if the fire protection system is a fixture of the structure on January 1, 1981; or

(2) an amount equal to two percent of the value of the structure based on the assessment as of January 1 of the year immediately following the installation of the fire protection system if the fire protection system becomes a fixture of the structure after January 1, 1981.

(m) The tax exemption required by 43 U.S.C. 1620(d), as amended, shall be implemented according to the following conditions and interpretations:

(1) "developed" means a purposeful modification of the property from its original state that effectuates a condition of gainful or productive present use without further substantial modification; surveying, construction of roads, providing utilities or other similar actions normally considered to be component parts of the development process, but which do not create the condition described in this paragraph, do not constitute a developed state within the meaning of this paragraph; developed property, in order to remove the exemption, must be developed for purposes other than exploration, and be limited to the smallest practicable tract of the property actually used in the developed state;

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of

exploration and development, this exemption shall continue with respect to that portion of the leased tract that is used solely for the purpose of exploration.

(n) If the property or interest in the property reverts to an undeveloped state, or if the lease is terminated, the exemption shall be reinstated, subject to the provisions of (m) of this section.

Sec. 29.45.040. PROPERTY TAX EQUIVALENCY PAYMENTS. (a) A resident of the state 65 years of age or older who rents a permanent place of abode is eligible for tax equivalency payments from the state through the department.

(b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax. The property tax equivalent percentage applied to the annual rent charged to the applicant equals the property tax equivalency payment payable under this section.

(c) To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year on forms and in the manner prescribed by the department. Each applicant shall submit with the application rental receipts or, if rental receipts are not available, other evidence satisfactory to the department for determination of the fact of payment of rent and the amount paid.

(d) If two or more persons occupy a residence as tenants, not all of whom are eligible for tax equivalency payments under this section, the assessor shall determine equitable partial payments to be made to the eligible tenants. However, tax equivalency payments to an eligible applicant may not be reduced because the spouse is less than 65 years of age. If all occupants in a residence are eligible for tax

equivalency payments under this section, the occupants shall decide between and among themselves which shall receive payment.

Sec. 29.45.050. OPTIONAL EXEMPTIONS AND EXCLUSIONS. (a) A municipality may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at an election. An exclusion or exemption authorized by this section may not exceed the assessed value of $10,000 for any one residence.

(b) A municipality may by ordinance

(1) classify boats and vessels for the purposes of taxation and may establish the assessed valuation of boats and vessels on the basis of their registered or certificated net tonnage;

(2) classify and exempt from taxation

(A) the property of an organization not organized for business or profit-making purposes and used exclusively for community purposes if the income derived from rental of that property does not exceed the actual cost to the owner of the use by the renter;

(B) historic sites, buildings, and monuments;

(C) land of a nonprofit organization used for agricultural purposes if rights to subdivide the land are conveyed to the state and the conveyance includes a covenant restricting use of the land to agricultural purposes only; rights conveyed to the state under this subparagraph may be conveyed by the state only in accordance with AS 38.05.069(c);

(3) exempt personal property from taxation.

(c) The provisions of (a) of this section notwithstanding,

(1) a borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of a city in the borough, including but not limited to, excluding personal

property from taxation, establishing exemptions, and extending the redemption period;

(2) a home rule or first class city has the same power to grant exemptions or exclude property from borough taxes that it has as to city taxes if

(A) the exemptions or exclusions have been adopted as to city taxes; and

(B) the city appropriates to the borough sufficient money to equal revenues lost by the borough because of the exemptions or exclusions, the amount to be determined annually by the assembly;

(3) a city in a borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of the borough, including but not limited to exempting or partially exempting property from taxation.

(d) Exemptions or exclusions from property tax that have been granted by a home rule municipality in addition to exemptions authorized or required by law, and that are in effect on September 10, 1972, and not later withdrawn, are not affected by this chapter.

(e) A municipality may by ordinance classify and exempt or partially exempt from taxation privately owned land, wet land and water areas for which a scenic, conservation, or public recreation use easement is granted to a governmental body. To be eligible for a tax exemption, or partial exemption, the easement must be in perpetuity. However, the easement is automatically terminated before an eminent domain taking of fee simple title or less than fee simple title to the property, so that the property owner is compensated at a rate that does not reflect the easement grant.

(f) A municipality may by ordinance exempt from taxation all or

part of the increase in assessed value of improvements to real property if an increase in assessed value is directly attributable to alteration of the natural features of the land, or new maintenance, repair, or renovation of an existing structure, and if the alteration, maintenance, repair, or renovation, when completed, enhances the exterior appearance or aesthetic quality of the land or structure. An exemption may not be allowed under this subsection for the construction of an improvement to a structure if the principal purpose of the improvement is to increase the amount of space for occupancy or nonresidential use in the structure or for the alteration of land as a consequence of construction activity. An exemption provided in this subsection may continue for up to four years from the date the improvement is completed, or from the date of approval for the exemption by the local assessor, whichever is later.

(g) A municipality may by ordinance exempt from taxation all or part of the increase in assessed value of improvements to a single-family dwelling if the principal purpose of the improvement is to increase the amount of space for occupancy. An exemption provided in this subsection may continue for up to two years from the date the improvement is completed, or from the date of approval of an application for the exemption by the local assessor, whichever is later.

Sec. 29.45.060. FARM OR AGRICULTURAL LAND AND GREENHOUSES. (a) Farm use land included in a farm unit and not dedicated or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use and may not be assessed as if subdivided or used for some other nonfarm purpose. A farm use greenhouse, whether classified as real or personal property for municipal tax purposes, shall be assessed on the basis of full and true value for farm use. The assessor shall maintain records valuing the land or greenhouse for

both full and true value and farm use value. If the land or greenhouse is sold, leased, or otherwise disposed of for uses incompatible with farm use or converted to a use incompatible with farm use by the owner, the owner is liable to pay an amount equal to the additional tax at the current mill levy together with eight percent interest for the preceding seven years, as though the land or greenhouse had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the municipality.

(b) An owner of farm use land or a farm use greenhouse must, to secure the assessment under this section, apply to the assessor before May 15 of each year in which the assessment is desired. The application shall be made upon forms prescribed by the state assessor for the use of the local assessor, and shall include information that may reasonably be required to determine the entitlement of the applicant. If the land or greenhouse is leased for farm use purposes, the applicant shall furnish to the assessor a copy of the lease bearing the signatures of both lessee and lessor along with the completed application. The applicant shall furnish the assessor a copy of the lease covering the period for which the exemption is requested.

(c) In this section "farm use" means the use of land or a greenhouse for profit for raising and harvesting crops or ornamental plants, for the feeding, breeding, and management of livestock, for dairying, or another agricultural use, or any combination of these. To be farm use land, the owner or lessee must be actively engaged in farming the land, and derive at least 10 percent of yearly gross income from the land. To be a farm use greenhouse, the owner or lessee must derive at least 10 percent of yearly gross income from the

greenhouse or from the greenhouse together with other commercial greenhouses or farm use land. This section does not apply to land for which the owner has granted, and has outstanding, a lease or option to buy the surface rights. A property owner wishing to file for farm use classification having no history of farm-related income may submit a declaration of intent at the time of filing the application with the assessor setting out the intended use of the land or greenhouse and the anticipated percentage of income. An applicant using this procedure shall file with the assessor before February 1 of the following year a notarized statement of the percentage of gross income attributable to the land or greenhouse. Failure to make the filing required in this subsection forfeits the exemption.

(d) In the event of a crop failure by an act of God the previous year, the owner or lessee may submit an affidavit affirming that 10 percent of gross income for the past three years was from farming.

(e) Subject to legislative appropriations for the purpose, the state shall reimburse a borough or city, as appropriate, for the property tax revenues lost to it by the operation of this section.

Sec. 29.45.070. MOBILE HOMES. Mobile homes, trailers, house trailers, trailer coaches and similar property used or intended to be used for residential, office, or commercial purposes and attached to the land or connected to water, gas, electric, or sewage facilities are classified as real property for tax purposes unless expressly classified as personal property by ordinance. This section does not apply to house trailers and mobile homes that are unoccupied and held for sale by persons engaged in the business of selling mobile homes.

Sec. 29.45.080. TAX ON OIL AND GAS PRODUCTION AND PIPELINE PROPERTY. (a) A municipality may levy and collect taxes on property taxable under AS 43.56 only by using one of the methods set out in (b)

or (c) of this section.

(b) A municipality may levy and collect a tax on the full and true value of property taxable under this chapter and under AS 43.56 as valued by the Department of Revenue at a rate not to exceed that which produces an amount of revenue from the total municipal property tax equivalent to $1,500 a year for each person residing in its boundaries.

(c) A municipality may l y and collect a tax on the full and true value of that portion of property taxable under this chapter and under AS 43.56 as assessed by the Department of Revenue which value, when combined with the value of property otherwise taxable by the municipality, does not exceed the product of 225 percent of the average per capita assessed full and true value of property in the state multiplied by the number of residents of the taxing municipality. For purposes of this subsection, the average per capita assessed full and true value of property in the state shall be calculated without regard to the assessed value of taxable property under AS 43.58.

(d) By February 1 of each assessment year a taxing municipality must inform the Department of Revenue which method of taxation the municipality will use.

(e) For purposes of this section, population shall be determined by the commissioner based on the latest statistics of the United States Bureau of the Census or on other reliable population data, and the commissioner shall advise each municipality of its population by January 15 of each year.

Sec. 29.45.090. TAX LIMITATION. (a) A municipality may not, during a year, levy and tax for any purpose in excess of three percent of the assessed value of property in the municipality. All property on which a tax is levied shall be taxed at the same rate during the

year.

(b) A municipality, or combination of municipalities occupying the same geographical area, in whole or in part, may not levy taxes

(1) that will result in tax revenues from all sources exceeding $1,500 a year for each person residing within the municipal boundaries; or

(2) upon value that, when combined with the value of property otherwise taxable by the municipality, exceeds the product of 225 percent of the average per capita assessed full and true value of property in the state multiplied by the number of residents of the taxing municipality.

(c) The commissioner shall apportion the lawful levy and equitably divide the tax revenues on the basis of need, services performed, and other considerations in the public interest if two or more municipalities occupying the same geographical area, in whole or in part, attempt to levy a tax

(1) the combined levy of which would result in tax revenues from all sources exceeding $1,500 a year for each person residing within the municipal boundaries; or

(2) upon value that, when combined with the value of property otherwise taxable by the municipality, exceeds the product of 225 percent of the average per capita assessed full and true value of property in the state multiplied by the number of residents of the taxing municipality.

(d) For the purpose of (b) and (c) of this section, population shall be determined by the commissioner based on the latest statistics of the United States Bureau of the Census or on other reliable population data. For purposes of (b) and (c) of this section, the average per capita assessed full and true value of property in the state shall

be calculated without regard to the assessed value of taxable property under AS 43.58.

Sec. 29.45.100. NO LIMITATIONS ON TAXES TO PAY BONDS. The limitations provided for in AS 29.45.080 - 29.45.090 do not apply to taxes levied or pledged to pay or secure the payment of the principal and interest on bonds. Taxes to pay or secure the payment of principal and interest on bonds may be levied without limitation as to rate or amount, regardless of whether the bonds are in default or in danger of default.

Sec. 29.45.110. FULL AND TRUE VALUE. (a) The assessor shall assess property at its full and true value as of January 1 of the assessment year, except as provided in this section, AS 29.45.060, and 29.45.230. The full and true value is the estimated price that the property would bring in an open market and under the then prevailing market conditions in a sale between a willing seller and a willing buyer both conversant with the property and with prevailing general price levels.

(b) Assessment of business inventories may be based on the average monthly method of assessment rather than the value existing on January 1. The method used to assess business inventories shall be prescribed by the governing body.

(c) In the case of cessation of business during the tax year, the municipality may provide for reassessment of business inventories using the average monthly method of assessment for the tax year rather than the value existing on January 1 of the tax year, and for reduction and refund of taxes. In enacting an ordinance authorized by this section, the municipality may prescribe procedures, restrictions, and conditions of assessing or reassessing business inventories and of remitting or refunding taxes.

Sec. 29.45.120. RETURNS. (a) The municipality may require each person having ownership or control of or an interest in property to submit a return in the form prescribed by the assessor, based on property values existing on January 1, except as otherwise provided in this chapter.

(b) The assessor may, by written notice, require a person to provide additional information within 30 days.

Sec. 29.45.130. INDEPENDENT INVESTIGATION. (a) The assessor is not bound to accept a return as correct. The assessor may make an independent investigation of property returned or of taxable property on which no return has been filed. In either case, the assessor may make the assessor's own valuation of the taxable property and this valuation is prima facie evidence of the value of the property.

(b) For investigation, the assessor or the assessor's agent may enter a premise during reasonable hours and may examine property on the premise. The assessor or the assessor's agent may examine all property records involved. A person shall, on request, furnish to the assessor or the assessor's agent every facility and assistance for the investigation. The assessor may seek a court order to compel entry and production of records needed for assessment purposes.

(c) An assessor may examine a person on oath. On request, the person shall submit to examination at a reasonable time and place selected by the assessor.

Sec. 29.45.140. VIOLATIONS. A person who knowingly fails to file a statement required by ordinance or who knowingly makes a false affidavit to a statement required by a tax ordinance relative to the amount, location, kind or value of property subject to taxation with intent to evade the taxation, is guilty of a class B misdemeanor.

Sec. 29.45.150. REEVALUATION. A systematic reevaluation of

taxable real and personal property undertaken by the assessor, whether of specific areas in which real property is located or of specific classes of real or personal property to be assessed, shall be made only in accordance with a resolution or other act of the municipality directing a systematic reevaluation of all taxable property in the municipality over the shortest period of time practicable, as fixed in the resolution or act.

Sec. 29.45.160. ASSESSMENT ROLL. (a) The assessor shall prepare an annual assessment roll. The roll shall contain

(1) a description of all taxable property;

(2) the assessed value of all taxable property;

(3) the names and addresses of persons with property subject to assessment and taxation.

(b) The assessor may list real property by any description that may be made certain. Real property is assessed to the record owner. The district recorder shall at least monthly provide the assessor a copy of each recorded change of ownership showing the name and mailing address of the owner and the name and mailing address of the person recording the change of ownership. Other persons having an interest in the property may be listed on the assessment records with the owner. The person in whose name property is listed as owner is conclusively presumed to be the legal record owner. If the property owner is unknown, the property may be assessed to "unknown owner". An assessment is not invalidated by a mistake, omission, or error in the name of the owner, if the property is correctly described.

Sec. 29.45.170. ASSESSMENT NOTICE. (a) The assessor shall give each person named in the assessment roll a notice of assessment, showing the assessed value of the person's property. On each notice is printed a brief summary of the dates when taxes are payable,

delinquent and subject to penalty and interest, and the dates when the board of equalization will sit.

(b) Sufficient assessment notice is given if mailed by first class mail 30 days before the equalization hearings. If the address is not known to the assessor, the notice may be addressed to the person at the post office nearest the property. Notice is effective on the date of mailing.

Sec. 29.45.180. CORRECTIONS. (a) A person receiving an assessment notice shall advise the assessor of errors or omissions in the assessment of the person's property. The assessor may correct errors or omissions in the roll before the board of equalization hearing.

(b) If errors found in the preparation of the assessment roll are adjusted, the assessor shall mail a corrected notice allowing 30 days for appeal to the board of equalization.

Sec. 29.45.190. APPEAL. (a) A person whose name appears on the assessment roll or the agent or assigns of that person may appeal to the board of equalization for relief from an alleged error in valuation not adjusted by the assessor to the taxpayer's satisfaction.

(b) The appellant shall, within 30 days after the date of mailing of notice of assessment, submit to the assessor a written appeal specifying grounds in the form that the board of equalization may require. Otherwise, the right of appeal ceases unless the board of equalization finds that the taxpayer was unable to comply.

(c) The assessor shall notify an appellant by mail of the time and place of hearing.

(d) The assessor shall prepare for use by the board of equalization a summary of assessment data relating to each assessment that is appealed.

(e) A city in a borough may appeal an assessment to the borough

board of equalization in the same manner as a taxpayer. Within five days after receipt of the appeal, the assessor shall notify the person whose property assessment is being appealed by the city.

Sec. 29.45.200. BOARD OF EQUALIZATION. (a) The governing body sits as a board of equalization for the purpose of hearing an appeal from a determination of the assessor, or it may delegate this authority to one or more boards appointed by it. An appointed board may be composed of not less than three persons, who may be members of the governing body, municipal residents, or a combination of members of the governing body and residents. The governing body shall by ordinance establish the qualifications for membership.

(b) The board of equalization is governed in its proceedings by rules adopted by ordinance that are consistent with general rules of administrative procedure. The board may alter an assessment of a lot only pursuant to an appeal filed as to the particular lot.

(c) Notwithstanding other provisions in this section, a determination of the assessor as to whether property is taxable under law may be appealed directly to the superior court.

Sec. 29.45.210. HEARING. (a) If an appellant fails to appear, the board of equalization may proceed with the hearing in the absence of the appellant.

(b) The appellant bears the burden of proof. The only grounds for adjustment of assessment are proof of unequal, excessive, improper, or under valuation based on facts that are stated in a valid written appeal or proven at the appeal hearing. If a valuation is found to be too low, the board of equalization may raise the assessment.

(c) The board of equalization shall certify its actions to the assessor within seven days. Except as to supplementary assessments,

the assessor shall enter the changes and certify the final assessment roll by June 1.

(d) An appellant or the assessor may appeal a determination of the board of equalization to the superior court as provided by rules of court applicable to appeals from the decisions of administrative agencies. Appeals are heard on the record established at the hearing before the board of equalization.

Sec. 29.45.220. SUPPLEMENTARY ASSESSMENT ROLLS. The assessor shall include property omitted from the assessment roll on a supplementary roll, using the procedures set out in this chapter for the original roll.

Sec. 29.45.230. TAX ADJUSTMENTS ON PROPERTY AFFECTED BY A NATURAL DISASTER. (a) The municipality may provide for assessment or reassessment and reduction of taxes for property destroyed, damaged, or otherwise reduced in value as a result of a natural disaster.

(b) An assessment or reassessment under this section may be made by the assessor only upon the receipt of a sworn statement of the taxpayer that losses exceed $1,000. A reduction of taxes may be made only on losses in excess of $1,000 for the remainder of the year following the disaster. On reassessment, the municipality shall recompute this tax and refund taxes that have already been paid.

(c) The municipality shall give notice of assessment or reassessment under this section and shall hold an equalization hearing as provided in this chapter, except that a notice of appeal must be filed with the board of equalization within 10 days after notice of assessment or reassessment is given to the person appealing. Otherwise, the right of appeal ceases unless the board finds that the taxpayer is unable to comply.

(d) In enacting an ordinance or resolution authorized by this

section the municipality may, consistent with this section, prescribe procedures, restrictions, and conditions of assessing or reassessing property and of remitting, refunding, or forgiving taxes.

(e) In this section "disaster" means a major disaster declared by the President of the United States under the provisions of the Federal Disaster Act of 1950, Title 42, United States Code, sec. 1855-1855g, or other federal law, or a disaster declared by the governor under AS 26.23.010 - 26.23.110.

Sec. 29.45.240. TAX LEVY AND RATE. (a) The power granted to a municipality to assess, levy, and collect a property tax shall be exercised by means of an ordinance. The rate of levy, the date of equalization, and the date when taxes become delinquent shall be fixed by resolution.

(b) A municipality shall annually determine the rate of levy before June 15. By July 1 the tax collector shall mail tax statements setting out the levy, dates when taxes are payable and delinquent, and penalties and interest.

Sec. 29.45.250. RATES OF PENALTY AND INTEREST. (a) A penalty not to exceed 20 percent of the tax due may be added to all delinquent taxes, and interest not to exceed 15 percent a year shall accrue upon all unpaid taxes, not including penalty, from the due date until paid in full. A municipality may impose a penalty not to exceed 20 percent of the tax due upon the late return of personal property assessment forms. A penalty under this section may be imposed according to a formula that increases the amount of the penalty as the length of time increases during which payment is delinquent or assessment forms are not returned.

(b) If a taxpayer is given the right to pay the tax in two installments, penalty and interest on an unpaid installment accrues from

the date the installment becomes due.

ARTICLE 2. ENFORCEMENT OF TAX LIENS.

Sec. 29.45.290. VALIDITY. Certified assessment and tax rolls are valid and binding on all persons, notwithstanding a defect, error, omission, or invalidity in the assessment rolls or proceedings pertaining to the assessment roll.

Sec. 29.45.300. TAX LIABILITY. (a) The owner of assessed personal property is personally liable for the amount of taxes assessed against the property. The tax, together with penalty and interest, may be collected in a personal action brought in the name of the municipality.

(b) Property taxes, together with penalty and interest, are a lien upon the property assessed, and the lien is prior and paramount to all other liens or encumbrances against the property.

Sec. 29.45.310. ENFORCEMENT OF PERSONAL PROPERTY TAX LIENS BY DISTRAINT AND SALE. (a) A lien for personal property taxes may be enforced by distraint and sale of the property. The municipality shall provide the procedure for distraint and sale by ordinance. A seizure, levy, or distraint is not legal unless demand is first made of the person assessed for the amount of the tax, penalty, and interest, and a sale is not valid unless made at public auction no sooner than 15 days after notice is published. The seizure is made by virtue of a warrant issued by the municipal clerk to a peace officer.

(b) If the personal property sold is not sufficient to satisfy the tax, penalty, and interest, and costs of sale, the warrant may authorize the seizure of other personal property sufficient to satisfy the tax, penalty, interest, and costs of sale. If the property is sold for more money than is needed to satisfy the tax, the municipality shall remit the excess to the former record owner upon

presentation of a proper claim. A claim for the excess filed after six months of the date of sale is forever barred.

Sec. 29.45.320. REAL PROPERTY TAX COLLECTION. (a) The municipality shall enforce delinquent real property tax liens by annual foreclosure, unless otherwise provided by ordinance.

(b) If the tax on property described in AS 29.45.070 or on a taxable interest in tax-exempt property is not paid when due, a municipality may enforce the tax by a personal action against the delinquent taxpayer brought in the district or superior court, in addition to other remedies available to enforce the lien.

Sec. 29.45.330. FORECLOSURE LIST. (a) A municipality shall

(1) annually present a petition for judgment and a certified copy of the foreclosure list for the previous year's delinquent taxes in the superior court for judgment;

(2) publish the foreclosure list for four consecutive weeks in a newspaper of general circulation distributed in the municipality or, if there is no newspaper of general circulation distributed in the municipality, post the list at three public places for at least 30 days;

(3) within 10 days after the first publication or posting, mail to the last known owner of each property as the owner's name and address appear on the list a notice advising of the foreclosure proceeding in which a petition for judgment of foreclosure has been filed and describing the property and the amount due as stated on the list.

(b) The list shall be arranged in alphabetical order as to the last name and shall include

(1) the last known owner;

(2) the property description as stated on the assessment roll;

(3) years and amounts of delinquency;

(4) penalty and interest due;

(5) a statement that the list is available for public inspection at the clerk's office;

(6) a statement that the list has been presented to the superior court with a petition for judgment and decree.

(c) Completion of the requirements of (a) of this section constitutes and has the same force and effect as the filing of an individual and separate complaint and service of summons to foreclose a lien against each property described on the foreclosure list.

Sec. 29.45.340. CLEARING DELINQUENCIES. During the publication or posting of the foreclosure list and up to the time of transfer to the municipality a person may pay the taxes, together with the penalty, interest, and costs. The collector shall note payment on the foreclosure list.

Sec. 29.45.350. LIST TO LIENHOLDER. A holder of a mortgage or other lien on real property may request the clerk to send by certified mail notice of a foreclosure list that includes the real property.

Sec. 29.45.360. GENERAL FORECLOSURE. A municipality shall bring one general foreclosure proceeding in rem against the properties included in the foreclosure list. If the owner is unknown, the property is proceeded against as belonging to "unknown owner".

Sec. 29.45.370. ANSWER AND OBJECTION. A person having an interest in a lot on the foreclosure list may file an answer within 30 days of the date of last publication, specifying the person's objection. The court shall make its decision in summary proceedings. The foreclosure list is prima facie evidence that the assessment and levy of the tax is valid and that the tax is unpaid.

Sec. 29.45.380. JUDGMENT. The court shall in a proper case give

judgment and decree that the tax liens be foreclosed. It is a several judgment against each lot and a lien on each lot.

Sec. 29.45.390. TRANSFER AND APPEAL. (a) Foreclosed properties are transferred to the municipality for the lien amount. When answers are filed the court may enter judgment against and order the transfer to the municipality of all other properties on the list pending determination of the matters in controversy. The court shall hear and determine the issues raised by the complaint and answers in the same manner and under the same rules as it hears and determines other actions.

(b) The court clerk shall deliver a certified copy of the judgment and decree to the municipal clerk. The certified judgment and decree constitutes a transfer to the municipality.

(c) The judgment and decree stops objections to it that could have been presented before judgment and decree. Appeal from a judgment and decree of foreclosure, or from a final order in the proceeding, may be taken in the manner provided for appeals in civil actions.

Sec. 29.45.400. REDEMPTION PERIOD. Properties transferred to the municipality are held by the municipality for at least one year. During the redemption period a party having an interest in the property may redeem it by paying the lien amount plus penalties, interest, and costs, including all costs incurred under AS 29.45.440(a). Property redeemed is subject to all accrued taxes, assessments, liens, and claims as though it had continued in private ownership. Only the amount applicable under the judgment and decree must be paid in order to redeem the property.

Sec. 29.45.410. EFFECT. Receipt of redemption money by the municipality releases the judgment obtained under AS 29.45.380. The clerk or the clerk's designee shall record the redemption and issue a

certificate containing a property description, the redemption amount, and the dates of judgment and decree of foreclosure. The clerk or the clerk's designee shall collect the recording fee at the time of redemption and shall file the certificate with the record as part of the judgment roll.

Sec. 29.45.420. ADDITIONAL LIENS. If a property included in a foreclosure list is removed after payment of delinquencies or redemption by another lienholder, the payment represented by receipt for payment constitutes an additional lien on the property, collectible by the lienholder in the same manner as the original lien.

Sec. 29.45.430. POSSESSION DURING REDEMPTION PERIOD. Foreclosure does not affect the former owner's right to possession during the redemption period. If waste is committed by the former owner or by anyone acting under the permission or control of the former owner, the municipality may declare an immediate forfeiture of the right to possession.

Sec. 29.45.440. EXPIRATION. (a) At least 30 days before the expiration of the redemption period the clerk or the clerk's designee shall publish a redemption period expiration notice. The notice shall contain the date of judgment, the date of expiration of the period of redemption, and a warning that all properties ordered sold under the judgment, unless redeemed, shall be deeded to the municipality immediately on expiration of the period of redemption and that every right or interest of a person in the properties will be forfeited forever to the municipality. The notice appears once a week for four consecutive weeks in a newspaper of general circulation distributed in the municipality. If there is no newspaper of general circulation distributed in the municipality, the notice is posted in three public places for at least four consecutive weeks. The clerk shall send a copy of the

notice by certified mail to each record owner of property against which a judgment of foreclosure has been taken and, if the assessed value of the property is more than $100,000, to all holders of mortgages or other liens of record on the property. The notice shall be mailed within five days after the first publication. The mailing shall be sufficient if mailed to the property owner and to the holder of a mortgage or recorded lien at the last address of record.

(b) The right of redemption expires 30 days after the date of the first notice publication.

(c) Costs incurred in the determination of holders of mortgages and other liens of record and costs of notice publication incurred by a municipality under (a) of this section are a lien on the property and may be recovered by the municipality.

Sec. 29.45.450. DEED TO BOROUGH OR CITY. (a) Unredeemed property in the area of the borough outside all cities is deeded to the borough by the clerk of the court. Unredeemed property in a city is deeded to the city subject to the payment by the city of unpaid borough taxes and costs of foreclosure levied against the property before foreclosure. The deed shall be recorded in the recording district in which the property is located.

(b) Conveyance gives the municipality clear title, except for prior recorded tax liens of the United States and the state.

(c) If unredeemed property lies in a city and if the city has no immediate public use for the property but the borough does have an immediate public use, the city shall deed the property to the borough. If unredeemed property lies in the borough outside all cities and if the borough does not have an immediate public use for the property but a city does have an immediate public use, the borough shall deed the property to the city.

(d) No deed is invalid for irregularities, omissions, or defects in the proceedings under this chapter unless the former owner has been misled so as to be injured. Two years after the date of the deed, its validity is conclusively presumed and a claim of the former owner or other person having an interest in the property is forever barred.

Sec. 29.45.460. DISPOSITION AND SALE OF FORECLOSED PROPERTY. (a) The municipality shall determine by ordinance whether foreclosed property deeded to the municipality shall be retained for a public purpose. The ordinance shall contain the legal description of the property, the address or a general description of the property sufficient to provide the public with notice of its location, and the name of the last record owner of the property as the name appears on the assessment rolls.

(b) Tax-foreclosed property conveyed to a municipality by tax foreclosure and not required for a public purpose may be sold. Before the sale of tax-foreclosed property held for a public purpose, the municipality, by ordinance, shall determine that a public need does not exist. The ordinance shall contain the information required under (a) of this section.

(c) The clerk or the clerk's designee shall send a copy of the published notice of hearing of an ordinance to consider a determination required under (a) or (b) of this section by certified mail to the former record owner of the property that is the subject of the ordinance. The notice shall be mailed within five days after its first publication and shall be sufficient if mailed to the last record owner of the property as the name appears on the assessment rolls of the municipality.

(d) The provisions of (c) of this section do not apply with respect to property that has been held by the municipality for a

period of more than 10 years after the close of the redemption period.

Sec. 29.45.470. REPURCHASE BY RECORD OWNER. (a) The record owner at the time of tax foreclosure of property acquired by a municipality, or the assigns of that record owner, may, within 10 years and before the sale or contract of sale of the tax-foreclosed property by the municipality, repurchase the property. The municipality shall sell the property for the full amount applicable to the property under the judgment and decree, with interest not to exceed 15 percent a year from the date of entry of the judgment of foreclosure to the date of repurchase, delinquent taxes assessed and levied as though it had continued in private ownership, and costs of foreclosure and sale.

(b) After adoption of an ordinance providing for the retention of tax-foreclosed property by the municipality for a public purpose, the right of the former record owner to repurchase the property ceases.

Sec. 29.45.480. PROCEEDS OF TAX SALE. (a) On sale of foreclosed real or personal property the municipality shall divide the proceeds less cost of collection, between the borough and the city having unpaid taxes against the property. The division is in proportion to the respective municipal taxes against the property at the time of foreclosure.

(b) If tax-foreclosed real property that has been held by a municipality for less than 10 years after the close of the redemption period and never designated for a public purpose is sold at a tax-foreclosure sale, the former record owner is entitled to the portion of the proceeds of the sale that exceeds the amount of unpaid taxes, the amount equal to taxes that would have been assessed and levied after foreclosure if the property had continued in private ownership, penalty, interest, and costs to the municipality of foreclosing and

selling the property. If the proceeds of the sale of tax-foreclosed property exceed the total of unpaid and delinquent taxes, penalty, interest, and costs, the municipality shall provide the former owner of the property written notice advising of the amount of the excess and the manner in which a claim for the balance of the proceeds may be submitted. Notice is sufficient under this subsection if mailed to the former record owner at the last address of record of the former record owner. On presentation of a proper claim, the municipality shall remit the excess to the former record owner. A claim for the excess filed after six months of the date of sale is forever barred.

Sec. 29.45.490. PAYMENT OF TAXES UPON PUBLIC UTILIZATION. If a municipality takes title to tax-foreclosed property for a public purpose, the municipality shall satisfy unpaid taxes and assessments against the property held by other municipalities, with accrued interest but without penalty. If the amount required to satisfy the unpaid taxes and assessments exceeds the assessed value of the property, the municipality shall pay the other municipalities the assessed value, which shall be divided between the other municipalities in proportion to their respective taxes and assessments against the property at the time of foreclosure.

Sec. 29.45.500. REFUND OF TAXES. (a) If a taxpayer pays taxes under protest, the taxpayer may bring suit in the superior court against the municipality for recovery of the taxes. If judgment for recovery is given against the municipality, or, if in the absence of suit, it becomes obvious to the governing body that judgment for recovery of the taxes would be obtained if legal proceedings were brought, the municipality shall refund the amount of the taxes to the taxpayer with interest at eight percent from the date of payment plus costs.

(b) If, in payment of taxes legally imposed, a remittance by a taxpayer through error or otherwise exceeds the amount due, and the municipality, on audit of the account in question, is satisfied that this is the case, the municipality shall refund the excess to the taxpayer with interest at eight percent from the date of payment. A claim for refund filed one year after the due date of the tax is forever barred.

(c) The governing body may correct manifest clerical errors at anytime.

ARTICLE 3. CITY PROPERTY TAX.

Sec. 29.45.550. CITIES OUTSIDE BOROUGHS. Home rule and first class cities outside boroughs may assess, levy, and collect a property tax. A property tax if levied must be assessed, levied, and collected as provided by AS 29.45.010 - 29.45.500.

Sec. 29.45.560. CITIES INSIDE BOROUGHS. Home rule and first class cities inside boroughs may levy a property tax. A property tax, if levied, is subject to AS 29.45.010 - 29.45.050, 29.45.090 - 29.45.100, 29.45.250, 29.45.400 - 29.45.440 and 29.45.460 - 29.45.500. The council shall by June 15 of each year present to the assembly a statement of the city's rate of levy unless a different date is agreed upon by the borough and city.

Sec. 29.45.570. APPLICATION. AS 29.45.010 - 29.45.570 apply to home rule and general law municipalities.

Sec. 29.45.580. DIFFERENTIAL TAX ZONES. A city may by ordinance establish, alter, and abolish differential tax zones to provide and levy property taxes for services not provided generally in the city or a different level of service than that provided generally in the city.

Sec. 29.45.590. LIMITED PROPERTY TAXING POWER FOR SECOND CLASS CITIES. A second class city may by referendum levy property taxes as

provided for first class cities. However, levy by a second class city may not exceed one-half of one percent of the assessed value of the property taxed, except that the limit does not apply to a levy necessary to avoid a default upon payment of principal and interest on bonded or other indebtedness that is secured by a pledge to levy ad valorem or other taxes without limit to meet debt payments.

Sec. 29.45.600. COMBINING PROPERTY TAX WITH INCORPORATION OF A SECOND CLASS CITY. A petition for second class city incorporation may request that a property tax proposal be placed on the same ballot. The petition must state the proposed tax rate. The petition may request that incorporation be dependent on the passage of the property tax proposition. If so, the incorporation proposition fails if the property tax fails.

ARTICLE 4. BOROUGH SALES AND USE TAX.

Sec. 29.45.650. SALES AND USE TAX. (a) A borough may levy and collect a sales tax not exceeding six percent on sales, rents, and on services provided in the borough. The sales tax may apply to any or all of these sources. Exemptions may be granted by ordinance.

(b) A borough levying a sales tax may also by ordinance levy a use tax on the storage, use, or consumption of tangible personal property in the borough. The use tax rate must equal the sales tax rate and the use tax shall be levied only on buyers.

(c) A person who furnishes proof, in the form required by the borough tax collector, that the person has paid a sales tax on the source on which a use tax is levied by the borough is required to pay the use tax only to the extent of the difference between the amount of the sales tax paid and the amount of the use tax levied by the borough. This subsection applies to a sales tax levied in any taxing jurisdiction whether inside or outside the state.

(d) If the assembly charges interest on sales taxes not paid when due, the rate of interest may not exceed 15 percent a year on the delinquent taxes and shall be charged from the due date until paid in full. This subsection applies to home rule and general law municipalities.

(e) A borough may provide for the creation, recording, and notice of a lien on real or personal property to secure the payment of a sales and use tax, and the interest, penalties, and administration costs in the event of delinquency. When recorded, a lien authorized under this section has priority over other liens except those for property taxes and special assessments.

Sec. 29.45.660. NOTICE OF SALES AND USE TAX. (a) If the borough levies and collects only a sales tax and use tax, the assembly shall provide a notice substantially in the form set out in AS 29.45.020. In providing notice under this subsection, the assembly shall substitute for the millage equivalency its estimate of the equivalent sales tax rate for each of the categories of financial assistance set out in AS 29.45.020. Notice shall be provided

(1) by publishing in a newspaper of general circulation in the borough a copy of the notice once each week for a period of three successive weeks, with publication to occur not later than 45 days after the final adoption of the borough's budget; or

(2) if there is no newspaper of general circulation in the borough, by posting a copy of the notice for at least 20 days in at least two public places in the borough, with posting to occur not later than 45 days after the final adoption of the borough's budget.

(b) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under AS 29.60.010 - 29.60.080 and state aid for miscellaneous

municipal services under AS 29.60.100 - 29.60.180. The department shall withhold annual allocations under those sections until municipal officials demonstrate that the requirements of this section have been met.

Sec. 29.45.670. REFERENDUM, ADOPTION, AND MODIFICATION. A new sales and use tax or an increase in the rate of levy of a sales tax approved by ordinance does not take effect until ratified by a majority of the voters at an election.

ARTICLE 5. CITY SALES AND USE TAXES.

Sec. 29.45.700. POWER OF LEVY. (a) A city in a borough that levies and collects areawide sales and use taxes may levy sales and use taxes on all sources taxed by the borough in the manner provided for boroughs, except that the assembly may by ordinance authorize a city to levy and collect sales and use taxes on other sources.

(b) A city in a borough that does not levy and collect sales and use taxes for areawide borough functions may levy and collect sales and use taxes in the manner provided for boroughs.

(c) A city outside a borough may levy and collect sales and use taxes in the manner provided for boroughs.

Sec. 29.45.710. COMBINING SALES AND USE TAX WITH INCORPORATION OF A SECOND CLASS CITY. A petition for incorporation of a second class city may request that a sales and use tax proposal be placed on the same ballot. The petition must state the proposed tax rate. The petition may request that incorporation be dependent on the passage of the tax proposition. If so, the incorporation proposition fails if the tax fails.

* Sec. 12. AS 29 is amended by adding a new chapter to read:

CHAPTER 46. SPECIAL ASSESSMENTS.

Sec. 29.46.010. ASSESSMENT AND PROPOSAL. The municipality may

assess against the property of a state or federal governmental unit and private real property to be benefited by an improvement all or a portion of the cost of acquiring, installing, or constructing capital improvements. The state shall pay an assessment levied, except as otherwise provided by law and subject to its right of protest under AS 29.46.020(a)(8). If a governmental unit other than the state benefited by an improvement refuses to pay the assessment, it shall be denied the benefit of the improvement. An improvement proposal may be initiated by

(1) petition to the governing body of the owners of one-half in value of the property to be benefited; or

(2) the governing body.

Sec. 29.46.020. PROCEDURE. (a) The municipality may prescribe by ordinance the procedures relating to creating special assessment districts, making local improvements, levying and collecting assessments, and financing improvements, including the following:

(1) a procedure for filing petitions;

(2) a survey and report by the mayor concerning the need for, desirable extent of, and estimated cost of each proposed local improvement;

(3) a public hearing on the necessity for the proposed local improvement;

(4) a resolution or ordinance determining to proceed or not to proceed with the proposed local improvement;

(5) a public hearing by the governing body on the special assessment roll for the proposed local improvement;

(6) published notice of each public hearing required by this section and mailing notice to each record owner of real property in the special assessment district;

(7) a resolution or ordinance confirming the special assessment roll for the proposed local improvement.

(b) If protests as to the necessity of a proposed local improvement are made by owners of property that will bear 50 percent or more of the estimated cost of the improvement, the governing body may not proceed with the improvement until the objections have been reduced to less than 50 percent, except on approval of not fewer than three-fourths of the governing body.

(c) To the extent that the municipality does not prescribe a procedure for special assessments as permitted by this section, the municipality shall comply with the special assessment procedures set out in AS 29.46.030 - 29.46.100.

Sec. 29.46.030. CREATION OF DISTRICT. (a) When an improvement proposal is filed with the municipal clerk and presented to the governing body, the municipality shall find by resolution or ordinance whether (1) the improvement requested is necessary and should be made, and (2) if by petition, the request has sufficient and proper petitioners. The findings under this section are conclusive.

(b) If the municipality approves an improvement proposal, it shall develop a proposed improvement plan including the total cost estimate and the percentage of the cost to be assessed against the benefited property. The improvement plan shall be filed with the municipal clerk.

(c) The governing body shall set a time for public hearing on the improvement plan and the period for filing objections to the plan. The governing body shall publish a notice of the hearing and of the period during which objections may be filed at least once a week for four consecutive weeks in a newspaper of general circulation if distributed in the municipality and shall send notice by mail to every

record owner of property in the special assessment district.

Sec. 29.46.040. RECORD OWNER. The person in whose name property is listed on the municipal property tax roll as owner is conclusively presumed to be the legal owner of record. If the owner is unknown, the assessment roll may designate "unknown owner".

Sec. 29.46.050. OBJECTIONS AND REVISION. (a) Objections to an improvement plan may be filed during a period of 60 days after publication of notice. The municipality may by resolution or ordinance approve the plan and order the improvement subject to the limitation of (b) of this section.

(b) If objections are made in writing during the period set for objections by the owners of property bearing 50 percent or more of the estimated total cost of the improvement, the governing body may not proceed with the improvement unless it revises the plan to meet the objections and the objections are reduced to less than 50 percent. A revised plan shall be approved and adopted as an original plan in accordance with AS 29.46.030.

Sec. 29.46.060. ASSESSMENT ROLL. (a) At any time after approval of an improvement plan, the governing body shall assess the authorized percentage of the cost against property in the district included in the plan in proportion to the benefit received.

(b) The special assessment roll shall contain property descriptions, names of record owners, and assessment amounts.

(c) The governing body shall fix a time to hear objections to the roll. The municipal clerk shall send an assessment and hearing notice by mail to each record owner of an assessed property not less than 15 days before the hearing.

Sec. 29.46.070. HEARING AND SETTLEMENT. After the public hearing, the governing body shall correct errors and inequalities in the

roll. If an assessment is increased, a new hearing shall be set and notice published, except that a new hearing and notice is not required if all record owners of property subject to the increased assessment consent in writing to the increase. Objections to the increased assessment shall be limited to record owners of property on which the assessment was increased. When the roll is corrected, it shall be confirmed by resolution or ordinance.

Sec. 29.46.080. PAYMENT. (a) The governing body shall fix times of payment, penalties on delinquent payments, and the rate of interest on the unpaid balance of the assessment. Payment may be in one sum or by installments. If payment is to be in one sum, payment may not be required sooner than 60 days after mailing of the assessment statement. The entire assessment may be prepaid without interest or penalty within 30 days after mailing of the assessment statement, and thereafter the assessment may be prepaid in whole or in part with interest to the payment date.

(b) Within 30 days after fixing the time of payment the municipal clerk shall mail a statement to the record owner of each property assessed. The statement designates the property, the assessment amount, method of payment, rate of interest on the unpaid balance of the assessment, the time of delinquency, and penalties on delinquent payments. Within five days after the statements are mailed, the clerk shall have notice published that the statements have been mailed.

(c) Assessments are liens on the property assessed and are prior and paramount to all liens except municipal tax liens. They may be enforced as provided in AS 29.45.320 - 29.45.470 for enforcement of property tax liens.

Sec. 29.46.090. EXEMPTION. (a) The real property owned and occupied by a resident 65 years of age or over, or the spouse, widow,

widower, or minor heir of the original applicant, on which is located only the permanent abode of the applicant that is a single-family residence, is exempt from (1) special sewer assessments levied by a municipality after September 2, 1975, and (2) special water assessments levied by a municipality after September 2, 1975. Only one exemption may be granted with respect to the same property, and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. Real property may not be exempted under this subsection that the municipality determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the municipality is appealable under AS 44.62.560 - 44.62.570.

(b) An exemption may not be granted under this section except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors and in accordance with the following requirements:

(1) The claimant must file the initial application during the period of time between the date the assessment roll is confirmed and the time of payment fixed by the governing body. Within one year after the date the assessment roll is confirmed the governing body for good cause shown may waive the claimant's failure to make timely initial application for the exemption and authorize the assessor to accept the application as if timely filed.

(2) A claimant receiving the exemption must file with the assessor by March 15 of each subsequent year a separate application proving eligibility as of January 1 in order to retain the exemption. Within the same year the assessor for good cause shown may waive the

claimant's failure to make timely application and approve the application as if timely filed.

(3) If an application is filed within the required time under this subsection and is approved by the governing body, the exemption shall be allowed in accordance with the provisions of this section. If a waiver under this subsection is granted and the application for exemption approved, the amount of any assessment, penalty, or interest that the claimant has already paid on the assessment shall be refunded to the claimant. The municipality may at any time require proof in the form considered necessary of the right and amount of an exemption claimed under this section.

(c) The state shall reimburse a municipality for the sewer and water assessment revenues that it would receive but for the operation of this section. Reimbursement under this subsection is a lien in favor of the state against the property exempted to the extent of the assessment against the property exempted. When properly recorded, the lien is prior and superior to other liens against the property except for property taxes or other special assessments and may be enforced by lien foreclosure. The lien becomes immediately due and payable

(1) upon sale or other transfer of the property except to a spouse, widow, widower, or minor heir; however, if the property is transferred to a minor heir the lien becomes due and payable on the date the minor heir reaches the age of 25 years;

(2) when property exempted under (a)(1) or (2) of this section receives more than one sewer connection or more than one water connection; or

(3) when the claimant fails to prove eligibility under (b)(2) of this section.

(d) This section applies to home rule and general law

municipalities.

(e) In this section

(1) "minor heir" means a person who, at the time of transfer of the property, has not attained the age of 19 years or who, if under 22 years of age, is a full-time student at an educational institution or a member of the armed forces of the United States;

(2) "real property" includes, but is not limited to, mobile homes, whether classified as real or personal property for municipal tax purposes.

Sec. 29.46.100. REASSESSMENT. (a) The governing body shall within one year correct any deficiency in a special assessment found by a court. Notice and hearing must conform to the initial assessment procedures.

(b) Payments on the initial assessment are credited to the property upon reassessment. The reassessment becomes a charge upon the property notwithstanding failure to comply with any provision of the assessment procedure.

Sec. 29.46.110. ALLOWABLE COSTS. (a) When a special assessment district is created, there may be included in the assessments

(1) all of the cost of acquiring, installing, making, or constructing the local improvement;

(2) the costs of all engineering and surveying to be done in connection with creating the district or improvement;

(3) the cost of mailing and publishing notices;

(4) interest on interim financing;

(5) the cost of legal services and other expenses incurred in the formation of the special assessment district;

(6) the cost of completing the improvement and financing the improvement, including the issuance of bonds.

(b) The total amount of the assessment roll may not exceed actual costs, but actual costs may include reasonable estimates of the costs to be incurred in connection with issuance of bonds.

Sec. 29.46.120. OBJECTION AND APPEAL. (a) The validity of an assessment may not be contested by a person who did not file with the municipal clerk a written objection to the assessment roll before its confirmation.

(b) The decision of the governing body on an objection may be appealed to the superior court within 30 days after the date of confirmation of the assessment roll. If no objection is filed or appeal taken within that time, the assessment procedure is considered valid in all respects.

Sec. 29.46.130. INTERIM FINANCING. (a) A municipality may provide by resolution or ordinance for the issuance of notes in payment of the costs of a local improvement project, payable out of special assessments for the improvement. The notes shall bear interest at a rate or rates authorized by the resolution or ordinance, and shall be redeemed either in cash or bonds for the improvement project.

(b) Notes issued against assessments shall be claims against the assessments that are prior and superior to a right, lien or claim of a surety on the bond given to the municipality to secure the performance of its contract for a local improvement project, or to secure the payment of persons who have performed work or furnished materials under the contract.

(c) The municipal treasurer may accept notes against special assessments on conditions prescribed by the governing body in payment of

(1) assessments against which the notes were issued in order of priority;

(2) judgments rendered against property owners who have become delinquent in the payment of assessments; and

(3) certificates of purchase when property has been sold under execution or at tax sale for failure to pay the assessments.

Sec. 29.46.140. SPECIAL ASSESSMENT BONDS. (a) The municipality may by ordinance authorize the issuance and sale of special assessment bonds to pay all or part of the cost of an improvement in a special assessment district. The principal and interest of bonds issued shall be payable solely from the levy of special assessments against the property to be benefited. The assessments shall constitute a sinking fund for the payment of principal and interest on the bonds. The benefited property may be pledged by the governing body to secure a payment.

(b) On default in a payment due on a special assessment bond, a bondholder may enforce payment of principal, interest, and costs of collection in a civil action in the same manner and with the same effect as actions for the foreclosure of mortgages on real property. Foreclosure shall be against all property on which assessments are in default. The period for redemption is the same as for a mortgage foreclosure on real property.

(c) Before the governing body may issue special assessment bonds, it shall establish a guarantee fund and appropriate to the fund annually a sum adequate to cover a deficiency in meeting payments of principal and interest on bonds if the reason for the deficiency is nonpayment of assessments when due. Money received from actions taken against property for nonpayment of assessments shall be credited to the guarantee fund.

* Sec. 13. AS 29 is amended by adding a new chapter to read:

CHAPTER 47. MUNICIPAL DEBT.

ARTICLE 1. REVENUE ANTICIPATION NOTES.

Sec. 29.47.010. BORROWING IN ANTICIPATION OF REVENUE. A municipality that is authorized to incur indebtedness may borrow money to meet appropriations for any fiscal year in anticipation of the collection of the revenues for that year, but all debt so contracted shall be paid before the end of the next fiscal year. Negotiable or nonnegotiable revenue anticipation notes may be issued as evidence of the borrowing.

Sec. 29.47.020. ISSUANCE OF NOTES. A municipality may by ordinance or resolution authorize the issuance of revenue anticipation notes. The governing body may delegate to its chief fiscal officer the power to issue the notes from time to time under the terms and conditions of the ordinance or resolution that provides for the manner of their sale.

Sec. 29.47.030. ISSUANCE OF NOTES IN ANTICIPATION OF STATE, FEDERAL GRANTS. (a) A municipality, on adoption of a long-range capital improvement budget by ordinance or resolution, may by resolution provide for negotiable or nonnegotiable revenue anticipation notes in an amount not to exceed the total amount of any state or federal grants finally committed for these projects. The notes mature no later than the end of the next fiscal year. The notes may be for single or multiple projects outlined in the adopted capital improvement budget.

(b) If the state or federal grants for capital improvement projects have not been paid to the municipality before maturity of the notes issued in anticipation of the receipt of the revenue, the governing body may issue new notes in order to meet payment of the notes then maturing or may renew the outstanding revenue anticipation notes. New notes issued or renewals of outstanding revenue anticipation notes

mature not later than the end of the next fiscal year.

Sec. 29.47.040. PRIORITY OF REPAYMENT. The payment of the principal and interest on revenue anticipation notes is payable from revenues, and their payment additionally shall be secured by a pledge of the full faith and credit of the municipality issuing them.

ARTICLE 2. BOND ANTICIPATION NOTES.

Sec. 29.47.080. BOND ANTICIPATION BORROWING. A municipality may borrow money in anticipation of the sale of general obligation and revenue bonds if

(1) the general obligation bonds to be sold have been authorized by ordinance and ratified by a majority vote at an election;

(2) the revenue bonds to be sold have been authorized by ordinance.

Sec. 29.47.090. ISSUANCE OF NOTES. The governing body shall issue negotiable or nonnegotiable notes for the amounts borrowed with a maturity date not to exceed one year from the date of issue. All notes and the interest on them are payable at fixed places on or before a fixed time from the proceeds of the sale of bonds in anticipation of which the original note or notes were issued, unless the bonds have not been sold by the maturity date of the notes.

Sec. 29.47.100. ISSUANCE OF NEW NOTES. If the sale of the bonds has not occurred before the maturity of the notes issued in anticipation of the sale, the governing body shall issue new notes in order to meet payment of the notes then maturing, or shall renew the outstanding bond anticipation notes. New notes issued or renewals of outstanding bond anticipation notes bear a maturity date not to exceed one year from the date of issue. Notes, new notes, and renewals of notes may not be outstanding for a total elapsed time of more than

three years.

Sec. 29.47.110. REPAYMENT OF NOTES. Every note is payable from the proceeds of the sale of bonds that the notes anticipated or from the proceeds of the sale of new bond anticipation notes.

Sec. 29.47.120. SECURITY. (a) Notwithstanding other provisions of this chapter as to payment of notes, notes issued in anticipation of the sale of general obligation bonds and the interest on them are secured by the full faith and credit of the municipality. The municipality may levy ad valorem taxes for payment without limitation of rate or amount.

(b) Notes issued in anticipation of the sale of revenue bonds and the interest on them are secured in the same manner as are the revenue bonds in anticipation of which the notes are issued.

Sec. 29.47.130. LIMITATION. The total amount of notes issued and outstanding may at no time exceed the total amount of bonds authorized to be issued.

Sec. 29.47.140. USE OF PROCEEDS. The proceeds from the sale of notes shall be used only for the purposes for which the proceeds from the sale of bonds may be used, or to meet payment of outstanding bond anticipation notes.

ARTICLE 3. GENERAL OBLIGATION BONDS.

Sec. 29.47.180. GENERAL OBLIGATION BONDS. A municipality may acquire, construct, improve, and equip capital improvements and issue negotiable or nonnegotiable general obligation bonds for these purposes.

Sec. 29.47.190. VOTE AND NOTICE OF EXISTING INDEBTEDNESS REQUIRED. (a) A municipality may incur general obligation bond debt only after a bond authorization ordinance is approved by a majority vote at an election. Any municipal voter may vote in the bond

election, except as otherwise provided by law.

(b) Before a general obligation bond issue election, the governing body shall have published a notice of the total existing bond indebtedness at least once a week for three consecutive weeks. The first notice shall be published at least 20 days before the date of the election. A notice shall include

(1) the current total general obligation bonded indebtedness, including authorized but unsold bonds of the municipality;

(2) the cost of the debt service on the current indebtedness;

(3) the total assessed value of property in the municipality.

Sec. 29.47.200. PAYMENT. (a) The full faith and credit of a municipality are pledged for the payment of principal and interest on general obligation bonds. The municipality may levy ad valorem taxes for payment without limitation of rate or amount to pay or secure the payment of the principal and interest on bonds, regardless of whether the bonds are in default or in danger of default.

(b) General obligation bonds issued for acquiring, constructing, improving and equipping a municipally owned utility or other revenue-generating enterprise may be additionally secured by a pledge of the revenue derived from operation. Bonds so secured are not subject to a debt limitation imposed by a home rule charter. This subsection applies to home rule and general law municipalities.

ARTICLE 4. REVENUE BONDS.

Sec. 29.47.240. REVENUE BONDS. (a) A municipality may issue negotiable or nonnegotiable revenue bonds for a public enterprise or public corporation of the municipality where the only security is the revenue of the public enterprise or corporation.

(b) A municipality may issue its revenue bonds to finance the purchase of residential mortgage loans. The revenue bonds issued under this subsection are payable solely from the principal and interest of the mortgage loans and from other amounts pledged by the municipality, except the pledge of revenues derived from taxes. Revenue bonds issued under this subsection do not constitute a general obligation of the municipality.

Sec. 29.47.250. NO ELECTION REQUIRED. An election is not required to authorize the issuance and sale of revenue bonds, unless otherwise provided by ordinance.

Sec. 29.47.260. CONSTRUCTION. The prohibitions of AS 37.10.085 do not apply to the issuance of revenue bonds or the use of proceeds from revenue bonds by a home rule or general law municipality.

ARTICLE 5. REFUNDING BONDS.

Sec. 29.47.300. AUTHORIZATION. If a municipality has outstanding general obligation or revenue bonds and the governing body determines that it would be financially advantageous to refund the bonds, the municipality may provide by ordinance or resolution for the issuance of negotiable or nonnegotiable

(1) general obligation refunding bonds; or

(2) revenue refunding bonds.

Sec. 29.47.310. EFFECT OF REFUNDING BONDS. The refunding bonds may take up and refund all or part of outstanding bonds at or before their maturity or redemption date. The governing body may include various series and issues of bonds in a single issue of refunding bonds.

Sec. 29.47.320. NO ELECTION REQUIRED. An election is not required to authorize the issuance and sale of refunding bonds. Their issuance may be authorized and all proceedings with reference to them

prescribed by ordinance. However, when it is desirable to use general obligation bonds to refund a revenue bond issue, the governing body shall call an election on the question.

Sec. 29.47.330. PAYMENT OF REFUNDING BONDS. General obligation refunding bonds are payable according to AS 29.47.200. Revenue refunding bonds are payable according to AS 29.47.240.

Sec. 29.47.340. SALE OF REFUNDING BONDS. General obligation or revenue refunding bonds may, at the discretion of the governing body, be exchanged for the bonds being refunded, or may be sold at public or private sale. They may be issued and delivered at any time before the date of maturity or redemption of the refunded bonds.

ARTICLE 6. MISCELLANEOUS PROVISIONS.

Sec. 29.47.390. OTHER MUNICIPAL FINANCING. (a) A municipality may authorize by ordinance or resolution the issuance of negotiable or nonnegotiable revenue bonds to finance any project that serves a public purpose, and the bonds shall be secured and payable from any source except revenues, including tax revenue, of the municipality.

(b) Bonds issued under this section are not a debt or liability of the municipality and do not create or constitute an indebtedness, liability, or obligation of the municipality, nor do they constitute a pledge of faith, credit, or taxing power of the municipality. Each bond must contain on its face a statement that the municipality is not obligated to pay the principal or the interest on the bonds except from those sources indicated, and that neither the faith and credit nor the taxing power of the municipality is pledged to the payment of principal or interest on the bond.

(c) A municipality may

(1) loan the proceeds of the bonds issued under this section;

(2) pledge, mortgage or assign money, leases, agreements, property, or other assets of the project being financed;

(3) enter into covenants and agreements concerning bonds issued under this section that the municipality determines to be desirable;

(4) provide for any matter that affects the security of the bonds.

(d) In this section

(1) "bonds" means bonds, notes, or other evidence of indebtedness;

(2) "project" includes but is not limited to commercial, manufacturing, agricultural, industrial, residential housing, recreation, tourism, and medical projects and programs.

Sec. 29.47.400. SALE. Bonds and notes issued under this chapter may be sold at either public or private sale by the municipality in the manner and at the price it determines.

Sec. 29.47.410. FORMS AND TERMS. The municipality may by ordinance or resolution fix the date, denominations, maturities, rate or rates of interest, redemption terms, registration privileges, manner of execution, signatures required, purchase price, manner of sale, and other requirements for issuing bonds or notes under this chapter. If an official whose signature appears on the bonds or coupons ceases to be an official before delivery of the bonds, the signature of the former official is valid as if the former official had remained in office until delivery.

Sec. 29.47.420. INTEREST RATE. The interest rate payable on a bond or note issued under this chapter shall be determined by the municipality and is not subject to the usury rate limitations of AS 45.45.010.

Sec. 29.47.430. REDEMPTION BEFORE MATURITY. A bond or note issued under this chapter may be made subject to redemption before maturity as stated in the authorization or in the bond or note.

Sec. 29.47.440. BOROUGH INDEBTEDNESS. (a) A borough may incur indebtedness

(1) on an areawide basis for areawide functions; or

(2) on a nonareawide basis for functions performed only in the borough area outside all cities; or

(3) on a service area basis for functions performed only in a service area.

(b) Payment of debt principal and interest as well as other costs shall be derived from the area incurring the debt under (a)(2) or (a)(3) of this section, except that the full faith and credit of the entire borough may be pledged to guarantee payment of principal and interest.

(c) If the bonded debt to be incurred by a borough is an areawide debt, the vote is areawide. If the full faith and credit of the entire borough is pledged for the payment of the debt of the borough area outside all cities or of a service area, an areawide election is held and the proposition must pass both areawide and in the area that will benefit from the improvement. If the bonded indebtedness to be incurred is limited to the borough area outside all cities, the vote is limited to voters outside all cities. If the indebtedness to be incurred is limited to a service area, the vote is limited to voters in the service area. Only the full faith and credit of the area voting on the indebtedness is pledged for the payment of the debt.

(d) The indebtedness of a municipality reclassified under AS 29.04.040 - 29.04.060 is not affected by reclassification. All property in a municipality that is reclassified remains subject to

taxation to amortize bonded or other indebtedness affecting the municipality and authorized on the effective date of reclassification.

Sec. 29.47.450. SERVICE AREA DEBT. The indebtedness of a service area acquired under AS 29.47.440 remains the indebtedness of the area that incurred the debt, notwithstanding a subsequent court determination that the service area was not validly formed under law or by virtue of a defect in the proceedings creating the service area. All property in the service area remains subject to taxation to pay the bonded indebtedness.

* Sec. 14. AS 29 is amended by adding a new chapter to read:

CHAPTER 55. MUNICIPAL PROGRAMS.

Sec. 29.55.010. CREATION OF LOCAL HISTORICAL DISTRICT COMMISSIONS. The governing body of a municipality may establish a local historical district commission or designate the planning commission or itself to serve as the historical district commission.

Sec. 29.55.020. ESTABLISHMENT OF HISTORICAL DISTRICTS. (a) In addition to existing municipal authority providing for the preservation, protection, and maintenance of historic sites, the local historical district commission, in consultation with the Historic Sites Advisory Committee in the Department of Natural Resources, may establish historical districts within the boundaries of the municipality.

(b) A historical district shall be a reasonably compact area of historical significance in which two or more structures important in state or national history, and related by physical proximity or historical association, are located. For purposes of this section, "structures important in state or national history" means properties recommended by historical district commissions that are listed in the National Register of Historic Places or are characteristic of the Russian-American period before October 18, 1867, the early territorial

period before 1930, or early Native heritage, reflecting the indigenous characteristics of Native culture in Alaska. On recommendation of the governing body of a municipality and the Historic Sites Advisory Committee, the Department of Natural Resources may by regulation formulate additional criteria for the establishment of historical districts not inconsistent with this subsection.

(c) The establishment of a historical district under this section shall be consistent with any applicable comprehensive plan for the municipality.

* Sec. 15. AS 29 is amended by adding a new chapter to read:

CHAPTER 60. STATE PROGRAMS.

ARTICLE 1. MUNICIPAL TAX RESOURCE EQUALIZATION.

Sec. 29.60.010. STATE EQUALIZATION OF TAX RESOURCES FOR MUNICIPAL SERVICES. (a) During each fiscal year the department shall compute an equalization entitlement for municipal services provided by a taxing unit.

(b) The equalization entitlement computed for a taxing unit is based on the population, relative ability to generate revenue, and local tax burden of the taxing unit and is determined by the application of the formula

Entitlement = P x R

where P = population, and

R = millage rate equivalent, determined by dividing the sum of the locally generated revenue of the taxing unit by one-tenth of one percent of the full and true value of assessed property of the taxing unit determined under AS 29.60.030(d); however, the per capita property value used under this subsection may not be less than 15 percent of the statewide average per capita full and true assessed property value.

(c) For purposes of this section, locally generated revenue

(1) includes

(A) the actual revenue derived from the levy and collection of local taxes in the taxing unit for municipal services during the preceding fiscal year of the taxing unit;

(B) motor vehicle payments received by the municipality during the preceding fiscal year under AS 28.10.431;

(C) revenue from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the municipality for a function or service over which it has control, including revenues derived from parks and recreation services, mass transit, offstreet parking, and garbage and solid waste disposal services;

(D) special assessments received during the preceding fiscal year; and

(E) payments received by a municipality from a utility that are in place of taxes levied and collected by the municipality;

(2) excludes

(A) revenue derived from the levy and collection of municipal taxes and appropriated for the operating expenses and debt service of utilities;

(B) revenue from interest earned on investments and from the sale and lease of land or equipment; and

(C) all other revenue from whatever service derived.

Sec. 29.60.020. DETERMINATION OF POPULATION. For purposes of AS 29.60.010 - 29.60.080, the population of a taxing unit shall be determined annually by the latest figures of the United States Bureau of the Census or other population data that in the judgment of the

department is reliable.

Sec. 29.60.030. DETERMINATION OF MILLAGE RATE EQUIVALENT. (a) The department may require a municipality to return a certification, signed by the municipal treasurer or manager and the mayor, that provides an estimate of the locally generated revenue received by the municipality during the preceding fiscal year.

(b) By October 15 of each year, the department shall make an initial determination of the millage rate equivalent of each taxing unit to be used for computing and distributing equalization entitlements for the current fiscal year under AS 29.60.010 - 29.60.080. The department shall base the initial determination on the estimates in the certification returned by a municipality under (a) of this section.

(c) As early as possible, but not later than December 15 of each year, the department shall make a final determination of the millage rate equivalent of each taxing unit to use to compute and distribute equalization entitlements under AS 29.60.010 - 29.60.080. The department shall base the determination on audits, financial statements and other financial reports prepared and submitted by a municipality. The department shall adjust the locally generated revenue reported by a municipality to exclude the municipal revenue claimed that does not qualify for inclusion in or recognition as locally generated revenue for municipal purposes under AS 29.60.010(c)(1). The adjustment shall be made by deducting from total revenue claimed by the municipality the amount of the department's estimate of revenue that is not recognized for municipal purposes.

(d) The full and true assessed property value shall be determined by the department in the manner provided for the computation of state aid to education under AS 14.17.140. When the determination of

locally generated revenue includes revenue of a utility received under AS 29.60.010(c)(1)(E), the full and true assessed property value shall include the computed assessed value of the utility, determined by dividing the amount of the payment in place of taxes made by the utility by the millage rate that would apply to the utility if the utility were subject to levy and collection of taxes under AS 29.45.

(e) In addition to the computation for municipalities that levy and collect a property tax, the department shall determine an estimated full and true assessed property value under (d) of this section for

(1) each municipality that is a school district and that does not levy and collect a property tax;

(2) each second class city with a population of 750 or more persons; however, a computation is not required under this paragraph more often than once during a period of three successive calendar years; and

(3) all other second class cities, by determining the average per capita full and true assessed property value of all cities having a population of less than 750 persons in which an assessment has been completed by a municipality or for which a determination is not made under (1) or (2) of this subsection.

(f) The department shall annually compute a statewide average per capita full and true assessed property value.

Sec. 29.60.040. REPORTS. A payment of an equalization entitlement may not be made to a municipality under AS 29.60.010 - 29.60.080 until the municipality has submitted its certificate of estimated revenue and its financial report to the department for the fiscal year preceding the year for which the equalization entitlement is sought, together with a budget for the municipality's current fiscal year.

The financial report shall include a listing of general revenue collected from taxes levied and assessed and any other revenue that, in the opinion of the municipal officials, is eligible for inclusion in computations of the locally generated revenue of the taxing unit.

Sec. 29.60.050. LIMITATION ON COMPUTATION AND USE OF PAYMENTS. (a) An equalization entitlement generated by the tax levy of a taxing unit may be used only for authorized expenditures of that taxing unit, but up to 15 percent of the payment of an equalization entitlement generated by areawide revenue of a municipality may be used by the municipality for areawide or nonareawide purposes at the discretion of its governing body. This subsection applies to home rule and general law municipalities.

(b) An equalization entitlement determined with reference to revenue other than revenue obtained from the levy and collection of taxes may be used for areawide or nonareawide purposes, at the discretion of the governing body.

Sec. 29.60.060. TAX EQUALIZATION ACCOUNT. The tax equalization account is established. Money to carry out the provisions of AS 29.-60.010 - 29.60.080 shall be allocated by the department to the account. The amount allocated to the account shall be fully distributed by the department as payments to municipalities to fulfill each share authorized under AS 29.60.010. The amount allocated to the account shall be distributed by the department pro rata among eligible municipalities.

Sec. 29.60.070. ADMINISTRATION. (a) The department may adopt regulations necessary to implement AS 29.60.010 - 29.60.080. The regulations shall include, among other provisions,

(1) procedures and filing dates for submitting certification and financial reports;

(2) procedures for obtaining information required to compute and determine the municipality's millage rate equivalent; and

(3) procedures by which the department shall notify a municipality in writing of the reasons for a proposed disallowance or adjustment of any factor bearing upon the determination of the municipality's entitlement and by which the municipality will be provided reasonable time in which to respond or to challenge the department's determination.

(b) The department shall make reasonable efforts to advise and assist municipalities in collecting information and completing reports necessary for the determination of entitlements under AS 29.60.010 - 29.60.080.

(c) The department shall, by regulation, classify for inclusion or exclusion as a component of a municipality's millage rate equivalent under AS 29.60.010 any tax revenue appropriated for a utility not included in the definition set out in AS 29.60.080(2).

Sec. 29.60.080. DEFINITIONS. In AS 29.60.010 - 29.60.080

(1) "taxing unit" means a municipality and

(A) in a borough or unified municipality, a service area or the entire area outside cities;

(B) in a city, a differential tax zone;

(2) "utility" means electric, water, sewer, gas heat, telephone, or refuse and garbage collection service.

ARTICLE 2. STATE AID FOR MISCELLANEOUS PURPOSES.

Sec. 29.60.100. REVENUE SHARING PAYABLE. In addition to the equalization entitlements paid under AS 29.60.010 - 29.60.080, during each fiscal year the department shall pay aid

(1) to a municipality or other eligible recipient that has the power to provide the services described in AS 29.60.110 -

29.60.130 and exercises the power in the manner required by AS 29.60.100 - 29.60.180;

(2) to an unincorporated community under AS 29.60.140.

Sec. 29.60.110. STATE AID TO MUNICIPALITIES FOR ROADS. (a) The department shall pay to a municipality that has power to provide for road maintenance and exercises that power, $2,500 a mile for each mile of road, street, or highway maintained by the municipality, excluding (1) the official state highway system, (2) roads, streets, or highways not dedicated to public use, (3) roads, streets, or highways maintained under the local service road program (AS 19.30.111 - 19.30.-251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. A payment may not be made under this subsection for maintenance of a road that is not used by automotive equipment.

(b) A frozen waterway and a connection from an inhabited area to a waterway that may be safely used for public transportation by automotive equipment and is so used during a portion of a year is eligible for a payment of $1,500 per mile if the waterway and connection are maintained during the period of use by a municipality or combination of municipalities. The department, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipalities shall receive the payments under this subsection, unless the municipalities involved have agreed in writing to a particular distribution.

Sec. 29.60.120. STATE AID TO MUNICIPALITIES AND OTHER ELIGIBLE RECIPIENTS FOR HEALTH FACILITIES AND HOSPITALS. (a) The department shall pay

(1) to a municipality that has the power to provide hospital facilities and services and that exercises that power, $1,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the hospital, or $250,000 a hospital for those hospitals with 10 or more beds, or $50,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; money received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(2) on the basis set out in (1) of this subsection to a municipality for a nonprofit hospital not operated by a municipality if the municipality first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals that have been adopted by the municipality; money may not be paid on behalf of a nonprofit hospital without this certification; payments to the municipality shall be transferred to the nonprofit hospital in accordance with the basis by which the payment was generated by the hospital, and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(3) to a municipality in which a health facility is operated, $2,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $8,000 per health facility as the municipality determines.

(b) A hospital may not receive payment under both (a)(1) and (a)(2) of this section.

(c) Money received by a municipality under (a)(3) of this section shall be used for expenses of health services or operation and

maintenance of health facilities as the municipality determines.

(d) Before money may be distributed under this section, the commissioner of health and social services shall certify to the commissioner of community and regional affairs that any accumulation of assets by nonprofit corporations or other recipients under this section is dedicated irrevocably to a public purpose.

(e) Subsections (a) and (c) of this section apply to home rule and general law municipalities.

Sec. 29.60.130. STATE AID TO VOLUNTEER FIRE DEPARTMENTS NOT IN ORGANIZED MUNICIPALITY. (a) The department shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized municipality a sum for protection purposes equal to $10 per capita for the population served by the fire department, as determined by the state fire marshal.

(b) A grant shall be made under (a) of this section to facilitate the organization of a volunteer fire department in an area not in an organized municipality, upon application of the proposed fire protection group to the state fire marshal and upon approval of applications according to standards of organization and service prescribed by regulations adopted by the state fire marshal.

Sec. 29.60.140. STATE AID TO UNINCORPORATED COMMUNITIES. (a) The Department of Community and Regional Affairs shall pay to each unincorporated community an entitlement of $25,000 each fiscal year to be used for a public purpose. The Department of Community and Regional Affairs with advice from the Department of Law shall determine whether there is in each unincorporated community an incorporated nonprofit entity or a Native village council that will agree to receive and spend the entitlement. If there is more than one qualified entity in an unincorporated community, the Department of Community and

Regional Affairs shall pay the money under the entitlement to the entity that the department finds most qualified to receive and spend the money. The Department of Community and Regional Affairs may not pay money under an entitlement to a Native village council unless the council waives immunity from suit for claims arising out of activities of the council related to the entitlement. A waiver of immunity from suit under this subsection must be on a form provided by the Department of Law. If there is no qualified incorporated nonprofit entity or Native village council in an unincorporated community that is willing to receive money under an entitlement, the entitlement for that unincorporated community may not be paid. Neither this subsection nor any action taken under it enlarges or diminishes the governmental authority or jurisdiction of a Native village council.

(b) In this section "unincorporated community" means a place in the unorganized borough that is not incorporated as a city and in which 25 or more persons reside as a social unit.

Sec. 29.60.150. POPULATION DETERMINATION. For purposes of AS 29.60.100 - 29.60.180, population shall be determined by the latest figures of the United States Bureau of the Census or other population data that in the judgment of the department is reliable.

Sec. 29.60.160. AREA COST-OF-LIVING DIFFERENTIAL. (a) Payments to a municipality or other eligible recipient under AS 29.60.110 - 29.60.130 shall reflect area cost-of-living differentials. Payments shall be based on the sum of per capita, per mile and per bed or facility grants due each municipality or other recipient multiplied by the appropriate area cost-of-living differential. The area cost-of-living differential for each recipient shall be determined annually by election district under the provisions of AS 39.27.030. Application of the area cost-of-living differential may not result in distribution

of an amount less than the amount of the payment determined without reference to application of this section.

(b) The election districts used to establish area cost-of-living differentials under (a) of this section are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

Sec. 29.60.170. MISCELLANEOUS SERVICES ACCOUNT. The miscellaneous services account is established. Money to carry out the provisions of AS 29.60.100 - 29.60.180 shall be allocated by the department to the account in accordance with AS 29.60.280. If amounts in the account are insufficient to pay each municipality's or other recipient's share authorized under AS 29.60.100 - 29.60.180, the amounts that are available shall be distributed pro rata among eligible municipalities and other recipients.

Sec. 29.60.180. REGULATIONS. The department shall adopt regulations necessary to carry out the purposes of AS 29.60.100 - 29.60.180. The regulations shall include minimum standards required to qualify a municipality or other recipient for payments for each service. The department may require a municipality or other recipient to submit a performance report adequate to demonstrate to the department that a service for which payment is requested under AS 29.60.100 - 29.60.180 was performed by the municipality or other recipient and meets minimum standards of service prescribed by regulation.

ARTICLE 3. STATE AID FOR HOSPITAL AND HEALTH FACILITY CONSTRUCTION.

Sec. 29.60.230. STATE AID FOR HOSPITAL AND HEALTH FACILITY CONSTRUCTION. (a) If construction of a hospital began after January 1, 1968, or if construction of a health facility began after January 1,

1968, and before July 1, 1980, and state matching aid for construction approved for payment to a municipality or other hospital or health facility sponsor constitutes less than 25 percent of the total project cost, the department shall pay to the municipality or other hospital or health facility sponsor each fiscal year $2,500 a bed for the maximum number of beds provided for in the construction design of the hospital or health facility or five percent of the total project cost, whichever is greater. State aid provided for in this section shall continue until the municipality or other hospital or health facility sponsor has received an amount that, combined with state matching money for construction of the hospital or health facility, equals 25 percent of the total project cost. Money received for construction may not be used for any other purpose.

(b) In this section "total project cost" means

(1) costs directly related to the project; and

(2) the total of all costs of financing and carrying out the project, including but not limited to,

(A) the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property, and the acquisition of machinery and equipment as may be necessary in connection with the project;

(B) an allocable portion of the administrative and operating expenses of the municipality or other hospital or health facility sponsor;

(C) the cost of financing the project, including interest on bonds issued to finance the project; and

(D) the cost of other items, including any indemnity

and surety bonds and premiums on insurance. legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

(c) This section applies to home rule and general law municipalities.

Sec. 29.60.240. HOSPITAL AND HEALTH FACILITY CONSTRUCTION ASSISTANCE ACCOUNT. The hospital and health facility construction assistance account is established. Money to carry out the provisions of AS 29.60.230 - 29.60.240 shall be allocated by the department to the account in accordance with AS 29.60.280. If amounts in the account are insufficient to pay each recipient's share authorized under AS 29.60.230 - 29.60.240, the amounts that are available shall be distributed pro rata among eligible recipients.

ARTICLE 4. ADMINISTRATION OF STATE AID PROGRAMS.

Sec. 29.60.280. ALLOCATION AND DISTRIBUTION. (a) Each year, the department shall allocate money appropriated to the accounts established in AS 29.60.060, 29.60.170, and 29.60.240 in the amounts determined by the legislature.

(b) Money in the miscellaneous services account established in AS 29.60.170 that exceeds the amount required to fully fund distributions authorized by AS 29.60.100 - 29.60.180 shall be reallocated to the tax equalization account established in AS 29.60.060 and distributed according to the provisions of AS 29.60.010 - 29.60.080.

(c) Money in the hospital and health facility construction assistance account established in AS 29.60.240 that exceeds the amount required to fully fund distributions authorized by AS 29.60.230 - 29.60.240 shall be reallocated to the tax equalization account established in AS 29.60.060 and distributed according to the provisions of

AS 29.60.010 - 29.60.080.

Sec. 29.60.290. QUALIFICATION FOR MINIMUM PAYMENT. (a) A municipality qualifying for an entitlement under AS 29.60.010 - 29.60.080 or 29.60.100 - 29.60.180 shall receive a minimum payment of $25,000 plus an area cost-of-living differential for each fiscal year if

(1) the municipality has conducted a regular election during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.60.010 - 29.60.080 or 29.60.100 - 29.60.180 and has reported the results of the election to the commissioner;

(2) regular meetings of the governing body are held in the municipality during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.60.010 - 29.60.080 or 29.60.100 - 29.60.180 and a record of the proceedings is maintained;

(3) a municipal budget has been adopted for the fiscal year during which payment of an entitlement is authorized by AS 29.60.010 - 29.60.080 or 29.60.100 - 29.60.180 and an audit or financial statement for the preceding fiscal year has been prepared and furnished to the department in accordance with AS 29.20.640(a); and

(4) local ordinances adopted by the municipality have been codified in accordance with AS 29.25.050.

(b) The area cost-of-living differential payable to each municipality under this section shall be determined annually by election district under the provisions of AS 39.27.030 Except as provided in AS 29.60.300, application of the area cost-of-living differential may not result in a payment that is less than the minimum payment determined under (a) of this section. For purposes of this subsection, the election districts used are those designated by the proclamation of

reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

(c) The department shall pay to each municipality eligible to receive a minimum payment under this section an amount equal to the difference between the minimum payment determined under (a) and (b) of this section and the sum of the amounts payable for the same fiscal year under AS 29.60.010 - 29.60.080 and 29.60.100 - 29.60.180.

(d) A payment under this section may be prorated and reduced under AS 29.60.300.

(e) Payments under this section shall be made from the money allocated to the tax equalization account established in AS 29.60.060.

Sec. 29.60.300. PRORATION OF PAYMENTS. (a) Payments under AS 29.60.290 and 29.60.010 - 29.60.180 shall equal the amount allocated to the tax equalization account (AS 29.60.060), adjusted in accordance with AS 29.60.280.

(b) Adjustments of payments shall be determined by prorating amounts payable under AS 29.60.290 and amounts payable under AS 29.60.010 - 29.60.180 by a factor that, when applied, reduces all payments in equal proportion so that payment under AS 29.60.290 and payments under AS 29.60.010 - 29.60.180 equal the amount allocated to the tax equalization account established in AS 29.60.060.

ARTICLE 5. MUNICIPAL ASSISTANCE.

Sec. 29.60.350. MUNICIPAL ASSISTANCE FUND. (a) There is established in the department the municipal assistance fund. The legislature may appropriate to the municipal assistance fund during each fiscal year an amount equal to or greater than 30 percent of the income tax revenue received by the state under AS 43.20.011(e) for the previous fiscal year.

(b) The department shall distribute money from the municipal assistance fund to each municipality on an annual basis as provided in AS 29.60.360 and 29.60.370. A municipality may not receive payment until it submits to the department a resolution approved by the governing body of the municipality that requests the money. Distribution of money from the municipal assistance fund to a municipality with a fiscal year beginning on January 1 shall be made on February 1 of the state fiscal year for which the appropriation to the fund is made. Distribution of money from the municipal assistance fund to all other municipalities shall be made on June 1 of the state fiscal year for which the appropriation to the fund is made. A municipality that incorporates after December 31 of a state fiscal year is not eligible for a distribution under this section until the following state fiscal year.

Sec. 29.60.360. BASE AMOUNT OF ASSISTANCE. (a) The base amount to be distributed from the municipal assistance fund to each municipality for the fiscal year shall be the amount received by the municipality during fiscal year 1978 under AS 43.70.080. A city incorporated within a borough after June 30, 1977, shall receive as a base amount a share of the amount distributed to the borough in which it is located based on the ratio of population in the city to the total population in the borough. A city incorporated outside a borough after June 30, 1977, shall receive as a base amount the amount received by the city in the state most closely approximating it in population at the time of its incorporation. A borough incorporated after June 30, 1977, shall receive as a base amount the amount received by the borough in the state most closely approximating it in population at the time of its incorporation.

(b) If the amount appropriated to the municipal assistance fund

by the legislature during a fiscal year is insufficient for distribution of the full base amount to each municipality, the department shall prorate the amount available for distribution on the basis of amounts received during the fiscal year 1978 under AS 43.70.080.

Sec. 29.60.370. INCREASED ASSISTANCE. (a) If the amount in the municipal assistance fund at the time of distribution exceeds the base amount to be distributed under AS 29.60.360, the excess amount shall be distributed to each municipality on the basis of population. Population for the purpose of this section shall be as certified by the commissioner of community and regional affairs. In determining the population of a borough, the population of all cities in the borough shall be deducted from the total population of the borough.

(b) The intent of (a) of this section is that a municipality that levies property taxes reduce those levies in reasonable proportion to the amount of increased state aid received by the municipality. The governing body of each municipality shall furnish a notice with each tax statement describing its use of this increased state aid.

ARTICLE 15. GENERAL PROVISIONS.

Sec. 29.60.800. DEFINITIONS. In this chapter

(1) "health facility"

(A) means a facility that is licensed, when required, by the state under AS 18.20.010 - 18.20.130 and that is owned or operated or both by a municipality or by a nonprofit corporation or other nonprofit sponsor;

(B) includes a public health center, maternity home, community mental health center, facility for the mentally or physically handicapped, nursing home, or convalescent center;

(C) excludes a facility operated or wholly supported

by the state or the federal government;

(2) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes a facility operated or wholly supported by the state or the federal government.

* Sec. 16. AS 29 is amended by adding a new chapter to read:

CHAPTER 65. GENERAL GRANT LAND.

Sec. 29.65.010. DETERMINATION OF ENTITLEMENT OF BOROUGHS AND UNIFIED MUNICIPALITIES. The general grant land entitlement of each of the municipalities in this section is the amount set out opposite each:

(1) Municipality of Anchorage - 44,893 acres;

(2) City and Borough of Juneau - 19,584 acres;

(3) City and Borough of Sitka - 10,500 acres;

(4) Bristol Bay Borough - 2,898 acres;

(5) Fairbanks North Star Borough - 112,000 acres;

(6) Haines Borough - 2,800 acres;

(7) Kenai Peninsula Borough - 155,780 acres;

(8) Ketchikan Gateway Borough - 11,593 acres;

(9) Kodiak Island Borough - 56,500 acres;

(10) Matanuska-Susitna Borough - 355,210 acres;

(11) North Slope Borough - 89,850 acres.

Sec. 29.65.020. DETERMINATION OF ENTITLEMENT FOR CITIES. The general grant land entitlement of a city formerly eligible to receive general grant land under the provisions of AS 29.18.190 and 29.18.200 is 10 percent of the maximum total acreage of vacant, unappropriated, unreserved land in the boundaries of each city at any time between the initial date of eligibility under former AS 29.18.190 and 29.18.200 and July 1, 1978. Within six months after July 1, 1978, the director

shall determine the entitlement for each city eligible to receive general grant land under this section and certify that entitlement to the city.

Sec. 29.65.030. DETERMINATION OF ENTITLEMENT FOR NEWLY INCORPORATED MUNICIPALITIES. (a) The general grant land entitlement of a municipality incorporated after July 1, 1978, is 10 percent of the total acreage of vacant, unappropriated, unreserved land within the boundaries of the municipality on the date of its incorporation.

(b) Within six months after the date of incorporation of a municipality that is incorporated after July 1, 1978, the director shall determine the entitlement of each municipality eligible to receive general grant land under (a) of this section and certify the entitlement to the municipality.

Sec. 29.65.040. STATUS OF ENTITLEMENTS. (a) After July 1, 1978, general grant land entitlements provided in AS 29.65.010 and 29.65.020 are vested property rights that must be fulfilled as provided in AS 29.65.050 or 29.65.080.

(b) General grant land entitlements provided by AS 29.65.030 are property rights that vest on the date of incorporation of the municipality. The entitlement must be fulfilled as provided in AS 29.65.-050.

(c) Land may be selected or nominated for selection by a municipality to satisfy a general grant land entitlement under AS 29.65.010 and 29.65.020 at any time before October 1, 1980. However, if a municipal selection or nomination or a part of a municipal selection or nomination is rejected by the director, the municipality may, not later than 90 days after receipt of the director's rejection, select additional state land as necessary to satisfy its entitlement.

(d) Land may be selected by a municipality to satisfy a general

grant land entitlement under AS 29.65.030 at any time within one year after the director certifies the entitlement to the municipality.

(e) The time limitations imposed by (c) and (d) of this section for exercising a vested general grant land entitlement do not apply to

(1) the portion of an entitlement that cannot be satisfied by that date because of a shortage of land suitable for residential, commercial, and industrial purposes that is vacant, unappropriated, unreserved land;

(2) payments for land deficiency under AS 29.65.080;

(3) the portion of an entitlement that cannot be satisfied because the land selected by a municipality has been selected by a party entitled to select land owned by the United States or the state; or

(4) the portion of an entitlement that cannot be satisfied because the land nominated for selection by the municipality is not tentatively approved for patent to the state.

Sec. 29.65.050. FULFILLMENT OF LAND ENTITLEMENTS. (a) The acreage of each municipality's land selections for which patent has been issued before July 1, 1978, shall be credited toward fulfillment of the entitlement of that municipality.

(b) All approved selections under former AS 29.18.190 and 29.18.200 for which patent has not been issued to a municipality on July 1, 1978, shall be reviewed by the director within nine months after July 1, 1978. Any approved selection of land that was vacant, unappropriated, or unreserved on the date of selection is valid as of the date of the approval under former AS 29.18.190 and 29.18.200, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey. The acreage shall be credited toward fulfillment of the municipality's entitlement. A

municipality is not entitled to receive patent under this chapter to more than its entitlement determined under AS 29.65.010 - 29.65.030. Any prior approval by the director of municipal selections for land that was not vacant, unappropriated, or unreserved on the date of selection shall be rescinded, and patent may not be issued except when disposal to a third party by sale or lease has occurred. Transfers of land to municipalities under this chapter are subject to AS 38.05.321. Classification actions as reflected on the land status records of the Department of Natural Resources are determinative of land classification status for purposes of this chapter.

(c) The director shall approve each selection for patent within nine months of its selection by a municipality, and a patent shall be issued to the municipality for land selected in satisfaction of a general grant land entitlement vested under AS 29.65.010 - 29.65.030 within three months after approval by the director of a plat of survey.

Sec. 29.65.060. SCHOOL, UNIVERSITY, AND MENTAL HEALTH LAND. (a) If an entitlement determined in AS 29.65.010 or 29.65.020 results in a per capita entitlement for the municipality of less than one and one-half acre, the municipality may select vacant school, university, or mental health land in the municipality in partial fulfillment of its land entitlement under this chapter. School, university, or mental health land may be selected notwithstanding the fact that these lands are not unappropriated and unreserved within the meaning of this chapter and under former AS 29.18.190 and 29.18.200, but each selection of school, university, or mental health land by a municipality must be vacant, unappropriated, or unreserved land as defined in this chapter, except that it need not be general grant land.

(b) The acreage of school, university, or mental health land, if

any, in a municipality may not be included in the determination of entitlement under AS 29.65.010 or 29.65.020.

(c) Land conveyed under this section will be credited against a municipality's remaining land entitlement under this chapter.

(d) Within six months after approval of a municipal selection of school, university, or mental health land, the director shall identify state general grant land of approximately equal value to the land requested by the municipality and shall propose the replacement land for the concurrence of the appropriate board. If a proposal by the director is rejected by the board, the director shall meet with the board as often as necessary to determine the type and amount of equal value replacement land that would be required to obtain the board's concurrence, and shall propose the replacement land for consideration by the board. The replacement land shall thereafter be managed for the purposes for which the land selected by the municipality was acquired by the Territory and State of Alaska.

(e) The notice and review provisions of AS 38.05.305 and 38.05.345 apply to the designation of other general grant land as school, university, or mental health land in replacement of land selected under this section. The provisions of AS 38.50 and AS 38.05.032 do not apply to such designations under this section. The provisions of AS 38.05.030(a), 38.05.030(e), and 38.05.035(a)(13) that require the approval of the respective trust board before disposal of land by the director do not apply to selections of school, university, or mental health land by a local government under this section.

(f) For purposes of determining the per capita entitlement under (a) of this section, the population of a municipality shall be the population determined by the commissioner under former AS 43.18.010 for the program year beginning July 1, 1978, for a municipality whose

entitlement is determined under AS 29.65.010.

Sec. 29.65.070. SELECTION AND CONVEYANCE PROCEDURE. (a) If land selected by a municipality is unsurveyed at the time of approval, the director shall survey, or may approve the municipality's survey of, the exterior boundaries of an approved selection without interior subdivision, and shall issue patent in terms of the exterior boundary survey. The cost of the survey shall be borne by the municipality. If land selected by a municipality has been surveyed at the time of its selection, the boundaries shall conform to the public land subdivisions established by the approved survey.

(b) The director may approve municipal selections of land that have been tentatively approved or patented to the state by the federal government but may not issue patent to a municipality until the land has first been patented to the state. After approval of a selection by the director, but before patent to a municipality, the municipality may execute conditional leases and make conditional sales only with the consent of the director. Conditional sales and conditional leases made before July 1, 1978, do not require the consent of the director.

(c) Nothing in this chapter affects a valid existing claim, location, or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way, or other purposes. Nothing in this chapter affects the rights of an owner, claimant, locater, or entryman to the full use and enjoyment of the land so occupied.

Sec. 29.65.080. PAYMENT FOR LAND DEFICIENCY. (a) The Alaska municipal land account is established in the general fund for the following purposes:

(1) providing payment to the boroughs and unified municipalities designated in AS 29.65.010 for a deficiency of land

physically suitable for residential, commercial, or industrial purposes; or

(2) providing payment to the boroughs and unified municipalities designated in AS 29.65.010 for certain general grant lands selected by the state and conveyed to a Native corporation under the provisions of the Alaska Native Claims Settlement Act.

(b) A municipality shall receive payment for its land deficiency from the municipal land account. A municipality is eligible to receive payment for land deficiency if, after July 1, 1980, the amount of land selected by a municipality that is physically suitable for residential, commercial, or industrial purposes amounts to less than one-third acre per capita. Any entitlement under AS 29.65.010 that is less than one- third acre per capita will, for the purposes of this subsection, be considered a land deficiency. An unselected remaining entitlement will, for the purpose of deficiency payment under this subsection, be considered as land physically suitable for residential, commercial, or industrial purposes. A municipality eligible under this subsection is entitled to receive a payment for land deficiency equal to $1,000 per acre for a number of acres equal to the difference between one-third of the population of the municipality less the number of acres physically suitable for residential, commercial or industrial purposes that has been selected by the municipality. For the purpose of this subsection, the population of the municipality shall be the population determined in accordance with AS 29.65.060(f). No payment may be made to a municipality under this subsection in excess of $9,000,000.

(c) If a municipality selected vacant, unappropriated, unreserved land on or before December 18, 1971, to which the state had received tentative approval or patent, and that land was also selected

by a Native corporation organized under the Alaska Native Claims Settlement Act (P.L. 92-203), and title to that land is ultimately vested in that Native corporation, the municipality may, at its option, request payment for land deficiency from the municipal land account. The acceptance of payment under this subsection by a municipality constitutes a relinquishment of any other right, title, or claim to the land by that municipality. The total payment to a municipality under this subsection may not exceed $1,000 per acre to a maximum of 8,000 acres.

(d) The governor shall annually submit to the legislature a request for an appropriation to the municipal land account for the municipalities that have elected to receive payments under (b) or (c) of this section. The request for appropriation shall distinguish between amounts necessary to make payments for land deficiency under (b) of this section and those required to make payments for land deficiency under (c) of this section.

(e) For purposes of fulfilling entitlements under this section, the legislature is authorized to appropriate

(1) not more than $4,000,000 per fiscal year, and not more than $12,000,000 in total, for the purpose of paying entitlements under (b) of this section;

(2) not more than $1,000,000 per fiscal year, and not more than $8,000,000 in total, for the purpose of paying entitlements under (c) of this section.

(f) If an annual appropriation is not sufficient to meet the amount due to all municipalities that have elected to accept payment for land deficiency under (b) or (c) of this section, the governor shall apportion the appropriation among the municipalities in proportion to the payment calculated for each municipality for that year.

When a distribution of payments is made under (c) of this section, the remaining entitlement of a municipality to which payment is made shall be reduced in an amount equal to the number of acres for which payment was received. An appropriation made under this section is in addition to other grants and entitlements authorized to eligible municipalities.

(g) Payments authorized by this section may not be made to a municipality eligible for an entitlement under AS 29.65.020 or 29.65.030.

(h) Payments made under this section shall be used by a municipality that levies property taxes to reduce the levy in proportion to the amount of state payments received by the municipality for a given fiscal year. The governing body of each municipality shall furnish a notice with the tax statement describing the effect on property tax levies of payments received under this section.

Sec. 29.65.090. AUTHORIZATION FOR LAND EXCHANGES. The director, with the concurrence of the commissioner, and a municipality are authorized to exchange land or interests in land when it is in the public interest. Land or interests in land exchanged under this section must be of approximately equal value, including the nonmonetary value of public benefits. Exchange procedures shall comply with applicable law and municipal ordinances. The notice and review provisions of AS 38.05.305 and 38.05.345 apply to exchanges of land under this section. The provisions of AS 38.50 do not apply to exchanges of land under this section.

Sec. 29.65.100. PUBLIC PURPOSE AND EXPANSION NEEDS. (a) Consistent with the best interests of the state, if a municipality does not contain and cannot reasonably acquire sufficient nonfederal land within its boundaries to meet its legitimate needs for public or

private settlement or development, it shall be the policy of the state to select federal land reasonably necessary to meet the needs of the municipality and to make the land selected available to the municipality under AS 38.05.315 or (b) of this section.

(b) Where state land is the most logical location for demonstrated municipal expansion for nonpublic settlement and development purposes, and when an exchange of land under AS 29.65.090 is not possible or is not in the public interest, it is the policy of the state to sell or lease the land at public auction. The state may contract with a municipality to act as its agent in an auction of state land under applicable statutes. When a municipality acts as the agent of the state in an auction, the municipality may retain from the proceeds of the auction the expenses that the director determines to be necessary and reasonable.

(c) Nothing in this chapter limits or impairs the authority of the director to transfer land to municipalities, without limit or consideration, for public purposes in accordance with AS 38.05.315. If there is a remaining entitlement of the municipality, land transferred under AS 38.05.315 shall be credited toward fulfillment of the entitlement.

Sec. 29.65.110. ELECTION OF BENEFITS. (a) A municipality that on July 1, 1978, is engaged in litigation, or that becomes engaged in litigation, regarding a claim to state land under former AS 29.18.190 and 29.18.200 shall elect either to obtain the benefits provided in this chapter or to pursue the litigation and waive any claim to entitlement under this chapter. An election shall be made by filing a motion for dismissal with prejudice in the court in which the litigation is pending. If the claim involves a municipality identified in AS 29.65.010, the municipality shall file its motion for dismissal

within 60 days after July 1, 1978. If a claim involves a city eligible to receive an entitlement under AS 29.65.020 the city shall file its motion for dismissal within 60 days after receiving the certificate of entitlement provided by the director under AS 29.65.020. Failure of the municipality to file a motion for dismissal during the time period provided in this subsection is considered a waiver of entitlement under this chapter.

(b) A municipality that was eligible to file land selections under former AS 29.18.190 and 29.18.200 and that does not enter into litigation over a claim to rights under those sections before the expiration of the time period within which it could make an election under (a) of this section is considered to have elected to receive benefits under this chapter and to have waived any claim that might have been raised under former AS 29.18.190 and 29.18.200.

(c) The provisions of this chapter do not affect the rights of a party to litigation regarding the former AS 29.18.190, 29.18.200 or 29.18.420 maintained by a municipality that has elected not to obtain the benefits provided by this chapter.

Sec. 29.65.120. ADMINISTRATION. The commissioner of natural resources may adopt regulations in accordance with the Administrative Procedure Act (AS 44.62) necessary to carry out the purposes of this chapter.

Sec. 29.65.130. DEFINITIONS. In this chapter, unless the context otherwise requires,

(1) "approved selection" means a municipal land selection that has been approved in writing by the director for transfer by patent to a municipality;

(2) "director" means the director of the division of lands, Department of Natural Resources, or the director's designee;

(3) "general grant land" means land patented or tentatively approved to the state from the United States under sec. 6(a) or (b) of the Alaska Statehood Act;

(4) "mental health land" means land granted under Title II, sec. 202 of P.L. 84-830, as amended before or after July 1, 1978;

(5) "municipal land selection" means a request by a municipality, filed in writing with the director under authority of former AS 29.18.190 and 29.18.200 or under this chapter for vacant, unappropriated, unreserved general grant land within its municipal boundaries in partial fulfillment of its municipal entitlement;

(6) "patent" means a document, issued by the director to a municipality for a previously approved selection, that conveys and quitclaims all the right, title, and interest of the state without reservation or condition except as may be required by law;

(7) "remaining entitlement" means the general grant land entitlement determined in accordance with this chapter, reduced by the total acreage of approved selections, including both patented and unpatented parcels;

(8) "school land" means those rectangular sections 16 and 36 within each township surveyed on or before January 3, 1959, and confirmed and transferred to the State of Alaska upon its admission under sec. 6(k), Alaska Statehood Act, 72 Stat. 339, and any other land designated solely for school revenues;

(9) "university land" means all sections 33 reserved to the university under 38 Stat. 1214, as amended (48 U.S.C. 353) and all land granted to or reserved for the benefit of the university;

(10) "vacant, unappropriated, unreserved land" means general grant land as defined in (4) of this section, excluding minerals as required by sec. 6(i) of the Alaska Statehood Act, that

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) has not been approved for patent to a municipality under this chapter or former AS 29.18.190 and 29.18.200; or

(C) is unclassified or, if classified under AS 38.05.-300, is classified for agricultural, grazing, commercial, industrial, private recreational, residential, utility, or open-to-entry purposes, or is classified in accordance with an agreement between a municipality and the state providing for state management of land of the municipality.

Sec. 29.65.140. APPLICATION. This chapter applies to home rule and general law municipalities.

* Sec. 17. AS 29 is amended by adding a new chapter to read:

CHAPTER 71. GENERAL PROVISIONS.

Sec. 29.71.010. ADVERSE POSSESSION. A municipality may not be divested of title to real property by adverse possession.

Sec. 29.71.020. DEDICATION OF MUNICIPAL PROPERTY. Dedication of streets, rights-of-way, easements or other areas for public use may not be construed to require the municipality to maintain, improve or provide for municipal services in the area dedicated and the dedication does not impose any liability on the municipality for the condition of the area dedicated.

Sec. 29.71.030. TAXATION OF MUNICIPALITIES. No state law or regulation may assess or tax, or be construed to assess or tax, a municipality unless the law or regulation expressly provides that the municipality is to be assessed or taxed by the particular law or regulation.

Sec. 29.71.800. DEFINITIONS. In this title, unless otherwise provided or the context otherwise requires,

(1) "areawide" means throughout a borough, both inside and outside all cities in the borough;

(2) "assembly" means the governing body of a borough;

(3) "borough" means a general law borough or a home rule borough;

(4) "city" means a general law first or second class city or a home rule city;

(5) "commissioner" means the commissioner of community and regional affairs;

(6) "consolidation" means dissolution of two or more municipalities and their incorporation as a new municipality;

(7) "council" means the governing body of a city;

(8) "department" means the Department of Community and Regional Affairs;

(9) "election" means a regular or special municipal election and does not include a state election;

(10) "governing body" means the legislative body of a municipality that is the assembly of a borough or the council of a city;

(11) "majority" means a simple majority;

(12) "merger" means dissolution of a municipality and its absorption by another municipality;

(13) "municipality" means a political subdivision incorporated under the laws of the state that is a home rule or general law city, a home rule or general law borough, or a unified municipality;

(14) "nonareawide" means throughout the area of a borough outside all cities in the borough;

(15) "owner" or "record owner" means the owner of record or purchaser of record as shown in the records of the district recorder;

(16) "personal property" means tangible property other than

real property, such as merchandise, stock in trade, machinery, equipment, furniture, fixtures, vehicles, boats, and aircraft;

(17) "property" means real and personal property;

(18) "published" means appearing at least once in a newspaper of general circulation distributed in the municipality or, if there is no newspaper of general circulation distributed in the municipality, posting in three public places for at least five days;

(19) "real property" means land and improvements, all possessory rights and privileges appurtenant to the property, and includes personal property affixed to the land or improvements;

(20) "regular election" means the municipal election held on the first Tuesday of October annually, or on a different date or interval of years provided by ordinance or charter;

(21) "special election" means a municipal election and does not include a regular election or a state election;

(22) "street" includes streets, avenues, boulevards, roads, lanes, alleys, and other ways;

(23) "subdivision"

(A) means the division of a parcel of land into two or more lots or other divisions for the purpose of sale or building development, includes resubdivision, and relates to the process of subdividing or to the land subdivided;

(B) does not include cadastral plats, cadastral control plats, open-to-entry plats, or remote parcel plats created by or on behalf of the state regardless of whether these plats include easements or other public dedications;

(24) "unified municipality" means a municipality unified in accordance with AS 29.06.190 - 29.06.410;

(25) "voter" means a United States citizen who is qualified

to vote in state elections, has been a resident of the municipality for 30 days immediately preceding the election, is registered to vote in state elections, and is not disqualified under art. V of the state constitution.

* Sec. 18. AS 01.10.060 is amended by adding a new paragraph to read:

(15) "municipality" means a political subdivision incorporated under the laws of the state that is a home rule or general law city, a home rule or general law borough, or a unified municipality.

* Sec. 19. AS 09.55.275 is amended to read:

Sec. 09.55.275. REPLAT APPROVAL. No agency of the state or municipality may acquire property located within a municipality exercising the powers conferred by AS 29.35.180 or AS 29.35.260(c) that [AS 29.33.150 - 29.33.245 WHICH] results in a boundary change unless the agency or municipality first obtains from the municipal platting authority preliminary approval of a replat showing clearly the location of the proposed public streets, easements, rights-of-way, and other taking of private property. Final approval of replat shall be similarly obtained. However, if a state agency clearly demonstrates an overriding state interest, a waiver to the approval requirements of this section may be granted by the governor. The platting authority shall treat applications for replat made by state or local governmental agencies in the same manner as replat petitions originated by private landowners.

* Sec. 20. AS 09.65.070(e)(1) is amended to read:

(1) "municipality" means a home rule borough or city, a general law borough or city of any class, or a unified municipality [ESTABLISHED UNDER AS 29.68.240 - 29.68.440, OR A MUNICIPALITY ESTABLISHED BY MERGER OR CONSOLIDATION UNDER AS 29.68.030 - 29.68.110]; the term includes a public corporation established by a municipality;

* Sec. 21. AS 14.08.071(b) is amended to read:

(b) Except for the first election of regional school members under (a) of this section, elections [ELECTION] shall be held annually on the first Tuesday in October. Elections shall be supervised by the director of elections in the office of the lieutenant governor, but shall be administered within second class cites as part of the regular municipal election. The lieutenant governor shall adopt [PROMULGATE] regulations for the conduct of the election of regional school board members comparable, as far as practicable, to those prescribed for election of school board members under AS 14.12 and AS 29.20.300 [AS 29.28] except that the majority election requirements of AS 29.-26.060 [AS 29.28.040] do not apply to, nor may the regulations require runoff elections for, the first election of regional school board members under (a) of this section or, if a school board by resolution so requests, to subsequent elections in the regional educational attendance area served by that school board.

* Sec. 22. AS 14.08.081 is amended to read:

Sec. 14.08.081. RECALL. The members of a regional school board are subject to recall in accordance with AS 29.26.240 - 29.26.360 [AS 29.28.130 - 29.28.250], except that the director of the division of elections shall perform the functions of a municipal clerk, and the lieutenant governor shall perform the functions of the assembly or council under those sections.

* Sec. 23. AS 14.12.030(c) is amended to read:

(c) The [NOTWITHSTANDING THE] provisions of (a) and (b) of this section do not apply if [, WHERE] the [BOROUGH] assembly serves as the school board of the borough school district [UNDER AS 29.41.020 THE NUMBER OF MEMBERS OF THE ASSEMBLY-SCHOOL BOARD SHALL BE DETERMINED IN THE MANNER PRESCRIBED BY AS 29.23.020].

* Sec. 24. AS 14.12.110 is amended to read:

Sec. 14.12.110. SINGLE BODY AS ASSEMBLY AND SCHOOL BOARD. Notwithstanding the provisions of this chapter or other law, a single body may serve as both the [BOROUGH] assembly and [BOROUGH] school board in the manner provided for third class boroughs under AS 29.20.300(b) [AS 07.17.030], if

(1) an [A BOROUGH] ordinance for that purpose is approved by the assembly and ratified by a referendum of a majority of the qualified borough voters voting on the question at a regular or special election; [,] and

(2) [IF] the public school population within the borough is 500 pupils or less.

* Sec. 25. AS 14.14.020 is amended to read:

Sec. 14.14.020. BOND REQUIRED. Before the officer responsible for custody [OF], investment, or management of school district money enters upon the duties of office, the district, or the municipality if the treasury is centralized, shall obtain a bond with sufficient sureties in an amount equal to the money that may come into the officer's official custody, but not to exceed $50,000. The bond shall be conditioned on the officer's honest and faithful disbursement and accounting of all money that may come into the official custody of the officer. The bond shall be filed with the clerk of the school board. This section does not apply to an officer who has been bonded under AS 29.20.610 [AS 29.23.520].

* Sec. 26. AS 14.14.050(d) is amended to read:

(d) The school board shall not make the audit if an audit that [WHICH] satisfies the requirements of this section and that [WHICH] is filed and posted as required by this section [,] is made according to AS 29.35.110 [AS 29.48.220].

* Sec. 27. AS 14.17.140(a) is amended to read:

(a) To determine the equalized percentage to be applied to basic need under AS 14.17.021, and the matching ratio for required local effort under AS 14.17.071, the Department of Community and Regional Affairs, in consultation with the assessor for each district, shall determine the full value of the taxable real and personal property in each district. Exemptions granted under ch. 129, SLA 1957, known as the Alaska Industrial Incentive Act (AS 43.25), shall be honored. If there is no local assessor or current local assessment for a district, then the Department of Community and Regional Affairs shall make the determination of full value from information available. In making the determination, the Department of Community and Regional Affairs shall be guided by AS 29.45.110 [AS 29.53.060]. The determination of full value shall be made before October 1 and sent by certified mail, return receipt requested, before that date to the president of the school board in each district. Duplicate copies shall be sent to the commissioner. The governing body of the municipality that [BOROUGH OR CITY WHICH] is the district may obtain judicial review of the determination by filing a motion in the superior court of the judicial district in which the district is located within 30 days after receipt of the determination. The superior court may modify the determination of the Department of Community and Regional Affairs only upon a finding of abuse of discretion or upon a finding that there is no substantial evidence to support the determination.

* Sec. 28. AS 15.13.010(a) is amended to read:

(a) This chapter applies in every election for governor, lieutenant governor, a member of the state legislature, a delegate to a constitutional convention, or judge seeking electoral confirmation. It also applies to every candidate for election to a municipal office

in a municipality [CITY OR BOROUGH] with a population of more than 1,000 inhabitants according to the latest United States census figures or estimates of population certified as correct for administrative purposes by the Department of Community and Regional Affairs. A municipality may exempt its elected municipal officers from the requirements of this chapter if a majority of the voters voting on the question at a [ANY] regular election, as defined by AS 29.71.800(20) [AS 29.78.010(14)], or a special municipality-wide election called for that purpose, vote to exempt its elected municipal officers from the requirements of this chapter. The question of exemption from the requirements of this chapter may be submitted by the governing body [CITY COUNCIL OR BOROUGH ASSEMBLY] by ordinance or by initiative election [ORDINANCE]. Nothing in this chapter prohibits a municipality from regulating by ordinance campaign contributions and expenditures.

* Sec. 29. AS 15.13.120(f)(3) is amended to read:

(3) AS 29.20.170 [AS 29.23.060(c)], if the candidate is a candidate for the borough assembly;

* Sec. 30. AS 15.13.120(f)(4) is amended to read:

(4) AS 29.20.280 [AS 29.23.130(f)], if the candidate is a candidate for borough mayor;

* Sec. 31. AS 15.13.120(f)(5) is amended to read:

(5) AS 29.20.170 [AS 29.23.210(b)], if the candidate is a candidate for city council;

* Sec. 32. AS 15.13.120(f)(6) is amended to read:

(6) AS 29.20.280 [AS 29.23.255], if the candidate is a candidate for city mayor;

* Sec. 33. AS 15.56.110(b)(2) is amended to read:

(2) a member of the borough assembly [ASSEMBLYMAN] under

AS 29.20.170(6) [AS 29.23.060(c)];

* Sec. 34. AS 15.56.110(b)(3) is amended to read:

(3) a borough mayor under AS 29.20.280(6) [AS 29.23.130-(f)];

* Sec. 35. AS 15.56.110(b)(4) is amended to read:

(4) a member of the city council [COUNCILMAN] under AS 29.-20.170(6) [AS 29.23.210(b)];

* Sec. 36. AS 15.56.110(b)(5) is amended to read:

(5) a city mayor under AS 29.20.280(6) [AS 29.23.255];

* Sec. 37. AS 16.20.036(g) is amended to read:

(g) The establishment of a refuge under this section does not impair or alter existing rights of a municipality [BOROUGH OR CITY] to state land selected [SELECT STATE LAND] under former AS 29.18.190 - 29.18.200.

* Sec. 38. AS 16.20.038(g) is amended to read:

(g) The establishment of a refuge under this section does not impair or alter existing rights of a municipality [BOROUGH OR CITY] to state land selected [SELECT STATE LAND] under former AS 29.18.190 - 29.18.200.

* Sec. 39. AS 18.26.250(2) is amended to read:

(2) municipality [MUNICIPAL CORPORATION OR POLITICAL SUB-DIVISION OF THE STATE AS THE TERMS ARE USED IN AS 29];

* Sec. 40. AS 18.80.290(d) is amended to read:

(d) The governing [LEGISLATIVE] body of a general law or home rule municipality has the authority under AS 29.20.320 [AS 29.48.035] to grant to local commissions powers and duties similar to those exercised by the Alaska Human Rights Commission under the provisions of this Act.

* Sec. 41. AS 19.30.241(2) is amended to read:

(2) "home rule city" means a city as defined in AS 29.04.-010 [AS 29.08.010];

* Sec. 42. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality [ORGANIZED UNDER AS 29.68.240 - 29.68.-440], a home rule city, or a first class city [OF THE FIRST CLASS];

* Sec. 43. AS 26.23.230(5) is amended to read:

(5) "political subdivision" means a home rule or general law borough or city [, WHETHER HOME RULE OR OTHERWISE,] including a unified municipality [MUNICIPALITIES UNIFIED UNDER AS. 29.68.240 - 29.68.440], an unincorporated village, or other unit of local government;

* Sec. 44. AS 28.15.051(d) is amended to read:

(d) The department may issue a special driver's permit to a person who is at least 14 years of age with the consent of his parents or guardians for the purpose of driving a motor-driven cycle. This permit may be issued upon application and successful completion of all prescribed tests and fees, and is valid for the same period of time as a driver's license. The permit is not valid in a municipality that [WHICH] by ordinance prohibits the driving of a motor-driven cycle by a person under the age of 16 years; a borough may adopt the ordinance on a nonareawide basis only, unless the power to adopt it on an areawide basis is acquired under AS 29.35.300 - 29.35.330 or former AS 29.33.250 - 29.33.290.

* Sec. 45. AS 38.04.020(b)(1) is amended to read:

(1) land nominated for selection or selected by a municipality to satisfy a general grant land entitlement under AS 29.65 or former AS 29.18.201 - 29.18.213;

* Sec. 46. AS 38.04.020(e)(4) is amended to read:

(4) for preliminary feasibility studies, engineering design work, and construction of access roads and capital improvements required by municipal subdivision ordinance or regulation of the platting authority [BOARD UNDER AS 29.33.150]; if an accurate determination of the amounts necessary for access roads or capital improvements cannot be made at the time the estimate is submitted, a schedule for obtaining the estimates, constructing the access roads or capital improvements, and disposing of the land shall be submitted;

* Sec. 47. AS 38.04.021(a) is amended to read:

(a) A municipality may apply for financial assistance for the execution of a land disposal program of general grant land entitlements received from the state under AS 29.65 or former AS 29.18.201 - 29.18.213 by submitting a request to the commissioner for inclusion in the request submitted to the legislature under AS 38.04.020(e). A municipality may request financial assistance for expenses of surveying land, designing subdivision plats, installing improvements required by municipal ordinance or regulation of the local platting authority [BOARD], and other reasonable direct costs of land disposal.

* Sec. 48. AS 38.04.021(d) is amended to read:

(d) A grant made under this section may not exceed five times the amount of money appropriated by a first class city, a borough, or a unified municipality [UNIFIED UNDER AS 29.68.240 - 29.68.440] for the disposal of municipal land in the current fiscal year unless the commissioner exempts the municipality from this subsection.

* Sec. 49. AS 38.04.021(e)(2) is amended to read:

(2) a first class city, a borough, or a unified municipality that [UNIFIED UNDER AS 29.68.240 - 29.68.440 WHICH] is exempted by the commissioner under (d) of this section.

* Sec. 50. AS 38.04.900(b) is amended to read:

(b) A municipality has standing to petition the commissioner for the adoption of a regulation, or for the amendment or repeal of an existing regulation, or to appeal a decision of the commissioner with respect to classification, management, or disposal of land made under authority of a regulation adopted under (a) of this section with respect to state land outside the corporate boundaries of the municipality to protect any interest which the municipality is authorized to regulate outside its boundaries under AS 29.35.020 [AS 29.48.037].

* Sec. 51. AS 38.05.127(d) is amended to read:

(d) Upon application by a municipality or an affected owner of land, the department may vacate, release, modify, or relocate an easement and right-of-way for public access to or along navigable or public waters reserved by the department in a patent issued under AS 29.18.510 - 29.18.610, AS 29.05, AS 29.65, or former AS 29.18.011 - 29.18.460, [AS 29.18] if the commissioner determines the action is consistent with the public interest.

* Sec. 52. AS 38.05.290(b) is amended to read:

(b) Consistent with the best interests of the state, in the selection of general grant land it is the policy of the state to make available the maximum land area from which municipalities may fulfill land entitlements under AS 29.65 or former AS 29.18.201 - 29.18.213.

* Sec. 53. AS 38.05.321(b) is amended to read:

(b) State land classified as agricultural land that [WHICH] has been selected by a municipality under former AS 29.18.190 - 29.18.200 or former AS 29.18.205(e) may be approved by the director for patent under AS 29.65.050(c) or former AS 29.18.205(f); however, only rights in the land for agricultural purposes may be transferred and all other interests in the land will remain with the state. Agricultural land approved for patent to a municipality [UNDER AS 29.18.205(f)] shall be

credited, acre for acre, toward fulfillment of that municipality's entitlement under AS 29.65.010 - 29.65.030 or former AS 29.18.201 - 29.18.203. If the director later determines it to be in the best interests of the state to transfer some or all of the additional rights in that approved or patented agricultural land, those rights shall pass without consideration to the municipality in which the land is located. The notice and review provisions of [AS 38.05.305 AND] AS 38.05.345 are applicable to conveyance of rights under this section.

* Sec. 54. AS 38.05.321(c) is amended to read:

(c) The provisions of this section do not apply to state land classified as agricultural land which has been selected by a municipality under the provisions of former AS 29.18.190 - 29.18.200 if the selection is an approved selection before April 1, 1978 and is otherwise valid under AS 29.65.050(b) or former AS 29.18.205(b).

* Sec. 55. AS 38.05.362(b) is amended to read:

(b) Nothing in this section affects the selection rights of a municipality [BOROUGH OR CITY] under former AS 29.18.190 - 29.18.200 for areas selected as of July 1, 1977, or a valid existing claim, location, or entry under law, as of July 1, 1976.

* Sec. 56. AS 39.50.145 is amended to read:

Sec. 39.50.145. PARTICIPATION BY MUNICIPALITIES. A municipality may exempt its municipal officers from the requirements of this chapter if a majority of the voters voting on the question at a [ANY] regular election, as defined by AS 29.71.800(20) [AS 29.78.010(14)], or a special municipality-wide election, vote to exempt its municipal officers from the requirements of this chapter. The question of exemption from the requirements of this chapter may be submitted by the city council or borough assembly by ordinance or by initiative

election [ORDINANCE].

* Sec. 57. AS 39.50.200(a)(6) is amended to read:

(6) "municipal officer" includes a borough or city mayor, borough assemblyman, city councilman, school board member, elected utility board member, city or borough manager, members of a city or borough planning or zoning commission within a home rule or general law city or borough or [INCLUDING BUT NOT LIMITED TO] a unified municipality [UNDER AS 29.68];

* Sec. 58. AS 40.15.075 is amended to read:

Sec. 40.15.075. AUTHORITY IN THE UNORGANIZED BOROUGH AND THIRD CLASS BOROUGHS. The division of lands is the platting authority in the area outside organized boroughs and outside cities in the unorganized borough and in the third class borough for only the purposes of hearing and acting on petitions for the change or vacation of plats and shall execute this function substantially in conformity with the provisions of AS 29.40.130 - 29.40.160 [AS 29.33.210 - 29.33.240]. Costs of publication and mailing [AS WELL AS OTHER COSTS] authorized in AS 29.40.130 [AS 29.33.210] shall be paid to the division by the petitioner. The Department of Natural Resources shall adopt reasonable regulations governing the exercise of the authority conferred by this section upon the division of lands.

* Sec. 59. AS 40.15.200 is amended to read:

Sec. 40.15.200. APPLICATION TO STATE AND POLITICAL SUBDIVISIONS. All subdivisions of land made by the state, its agencies, instrumentalities and political subdivisions are subject to the provisions of this chapter and AS 29.40.070 - 29.40.160 [AS 29.33.150 - 29.33.240], or home rule ordinances or regulations governing subdivisions, and shall comply with ordinances and other local regulations adopted under this chapter and AS 29.40.070 - 29.40.160 or former

AS 29.33.150 - 29.33.240, or under home rule authority, in the same manner and to the same extent as subdivisions made by other landowners.

* Sec. 60. AS 41.22.020(d) is amended to read:

(d) In (a) of this section "municipalities" includes cities or organized boroughs of any class and unified municipalities exercising powers to initiate projects described in AS 41.22.020 and acquire parks and open space land, as otherwise authorized by law [, AND INCLUDES BUT IS NOT LIMITED TO UNIFIED MUNICIPALITIES ORGANIZED UNDER AS 29.68.240 - 29.68.440].

* Sec. 61. AS 41.35.180(5) is amended to read:

(5) consult with local historical district commissions regarding the establishment of historical districts under AS 29.55.010 - 29.55.020 [AS 29.48.108 - 29.48.110] and the approval of project alterations under AS 45.98.040; recommend, if appropriate, the formulation of additional criteria for the designation of historical districts under AS 29.55.020(b) [AS 29.48.110(b)]; approve plans for and evaluate the suitability of specific structures for purposes of loan eligibility and continuance under the historical district revolving loan fund (AS 45.98); and consult with the Department of Commerce and Economic Development relative to the adoption of regulations for historical district loans under AS 45.98.

* Sec. 62. AS 43.18.430 is amended to read:

Sec. 43.18.430. POWER OF MUNICIPALITY. A municipality may own, maintain and employ a facility constructed under AS 43.18.400 - 43.18.460. The exercise of this power on an areawide basis is at the option of the borough and is not subject to the restrictions on acquiring additional areawide powers in AS 29.35.300 - 29.35.330 [AS 29.33.250 - 29.33.290].

* Sec. 63. AS 43.18.500(d)(2)(A) is amended to read:

(A) has the authority under AS 29.35 [AS 29.41 OR AS 29.48] to provide and maintain a cultural facility;

* Sec. 64. AS 43.56.010(b) is amended to read:

(b) A municipality may levy and collect a tax under AS 29.45.080 [AS 29.53.045] at the rate of taxation that applies to other property taxed by the municipality. The tax shall be levied at a rate no higher than the rate applicable to other property taxable by the municipality. No municipality may exempt from taxation property authorized to be taxed under this chapter. Exemptions shall be limited to those in AS 29.45.030, 29.45.050, [AS 29.53.020 AND AS 29.53.025] and AS 43.56.020.

* Sec. 65. AS 43.56.010(c) is amended to read:

(c) If the total value of assessed property of a municipality taxing under AS 29.45.080(c) [AS 29.53.045(c)] exceeds the product of 225 percent of the average per capita assessed full and true value of property in the state (to be determined by the department and reported to each municipality by January 15 of each year) multiplied by the number of residents of the taxing municipality, the department shall designate the portion of the tax base against which the local tax may be applied. For purposes of this subsection the average per capita assessed full and true value of property in the state shall be calculated without regard to the assessed value of taxable property under AS 43.58.

* Sec. 66. AS 43.56.010(d) is amended to read:

(d) A tax paid to a municipality under AS 29.45.080 [AS 29.53.045] on or before June 30 of the tax year shall be credited against the tax levied under (a) of this section for that tax year. If, however, a tax is not paid to a municipality until after June 30 of

the taxable year, the department upon application shall refund to the taxpayer the amount of tax paid to the municipality under AS 29.45.080 [AS 29.53.045]. The credit or refund of taxes paid to a municipality may not exceed the total amount of tax levied by the department upon the taxpayer for the tax year, under (a) of this section.

* Sec. 67. AS 43.56.060(a) is amended to read:

(a) The department shall assess property for the tax levied under AS 43.56.010(b) and AS 29.45.080 [AS 29.53.045] on property used or committed by contract or other agreement for use fo the pipeline transportation of gas or unrefined oil or for the production of gas or unrefined oil at its full and true value as of January 1 of the assessment year.

* Sec. 68. AS 43.75.130(1) is amended to read:

(1) to each unified municipality [UNIFIED UNDER AS 29.68.240 - 29.68.440,] and to each city located in the unorganized borough, 50 percent of the amount of tax revenue collected in the municipality from taxes levied by AS 43.75;

* Sec. 69. AS 44.07.360(8) is amended to read:

(8) "municipality" means a home rule or general law city or borough including but not limited to the capital city and a unified municipality [ORGANIZED UNDER AS 29.68.240 - 29.68.440];

* Sec. 70. AS 44.47 is amended by adding new sections to read:

ARTICLE 12. BOROUGH FEASIBILITY STUDIES.

Sec. 44.47.700. BOROUGH FEASIBILITY STUDIES. (a) The commissioner may contract for studies of the feasibility of establishing boroughs in the unorganized borough. A study may be conducted under this section only if

(1) appropriations are available for that purpose; and

(2) the study is requested by a person residing in the area

to be studied or by a city located in the area to be studied.

Sec. 44.47.710. REQUESTS FOR STUDIES. A request for a study of the feasibility of establishing a borough in the unorganized borough shall be submitted to the commissioner in writing and shall include

(1) a description of the boundaries of the area of the proposed study; and

(2) an indication of local interest in the proposed study consisting of either

(A) a petition requesting the study containing the signatures and addresses of five percent of the voters residing in the area of the proposed study based on the number of voters who voted in the area in the last statewide election; or

(B) resolutions requesting the study adopted by the governing bodies of at least five percent of the cities within the area of the proposed study.

Sec. 44.47.720. BOUNDARIES. The boundaries of an area studied shall conform to the boundaries indicated in the request for the study under AS 44.47.710 unless the commissioner, after a public hearing held in the area of the proposed study, determines that the boundaries should be altered. In determining the boundaries of an area to be studied, the commissioner shall consider

(1) the standards applicable to the incorporation of boroughs under AS 29.18.030;

(2) boundaries of regional corporations established under 43 U.S.C. 1606;

(3) census divisions of the state used for the 1980 census;

(4) boundaries of the regional educational attendance areas established under AS 14.08.031; and

(5) boundaries of coastal resource service areas organized

under AS 46.40.110 - 46.40.210.

Sec. 44.47.730. CONTRACTS. (a) The commissioner shall contract for a study of the feasibility of establishing a borough in the unorganized borough by following the procedures set out in AS 36.98. The commissioner shall include terms in the contract that provide for

(1) public participation in the preparation of the study;

(2) completion of the study not later than June 30 of the third year after the year the contract is executed.

(b) A study under this section shall include

(1) a recommendation for or against incorporation of a borough containing all or part of the area studied;

(2) an evaluation of the economic development potential of the area studied;

(3) an evaluation of capital facility needs of the area studied;

(4) an evaluation of demographic, social, and environmental factors affecting the area studied;

(5) an evaluation of the relationships among regional educational attendance areas, coastal resource service areas, and other regional entities responsible for providing services in the area studied;

(6) an evaluation of the relationships between the existing cities within the area studied and regional entities responsible for providing services in the area; and

(7) specific recommendations for

(A) organization of a home rule or general law borough government if one is recommended;

(B) changes in organization of cities in the area studied; or

(C) the improvement of the delivery of services to the public by the state in the area studied.

* Sec. 71. AS 44.83.162(m) is amended to read:

(m) For purposes of (c) of this section, the number of residents of the community equals the number of residents of the community determined by the Department of Community and Regional Affairs in accordance with AS 29.60.020 [AS 29.88.015].

* Sec. 72. AS 44.85.270(i) is amended to read:

(i) All references to the "reserve fund" in this section include special accounts within the reserve fund which may be created by the authority to secure the payment of particular bonds, including, without limitation, bonds issued by the capital city established under AS 29.14.010 [AS 29.18.510]. The commissioner of revenue may lend surplus money in the general fund to the authority for deposit to any account in the reserve fund in an amount equal to the required debt service reserve. The loans shall be made on such terms and conditions as may be agreed upon by the commissioner of revenue and the authority, including, without limitation, terms and conditions providing that the loans need not be repaid until the obligations of the corporation secured and to be secured by the account in the reserve fund are no longer outstanding.

* Sec. 73. AS 44.85.410(3)(A) is amended to read:

(A) a general obligation bond that [WHICH] is a direct and general obligation of a political subdivision of the state, all the taxable property within which is subject to taxation to pay the bond, note or evidence of debt, and the interest without limitation, as to rate or amount generally to the extent permitted by law or to avoid a default as provided for second class cities under AS 29.45.590 [AS 29.53.410]; or

* Sec. 74. AS 44.85.410(3)(D) is amended to read:

(D) a bond of a borough issued as a general obligation of a service area under AS 29.47.440 or former AS 29.58.340; [.]

* Sec. 75. AS 45.98.020 is amended to read:

Sec. 45.98.020. HISTORICAL DISTRICT LOANS. Upon endorsement and plan approval by a local historical district commission established under AS 29.55.010 or former AS 29.48.108 and the recommendation of a majority of the members of the Historic Sites Advisory Committee, the Department of Commerce and Economic Development may make loans to a person, firm, business or municipality subject to applicable laws for the restoration, improvement, rehabilitation, or maintenance of a structure that [WHICH] is

(1) within the boundaries of a historical district established under AS 29.55.020 or former AS 29.48.110;

(2) identified as important in state or national history as provided for in AS 29.55.020(b) or former AS 29.48.110(b); and

(3) another building or structure within a historical district, and suitable for superficial modification so that it can conform to the period or motif of the surrounding buildings or structures that are the reason for the area's designation as a historical district.

* Sec. 76. AS 46.03.210(a) is amended to read:

(a) A municipality with a population in excess of 1,000 may, within five years from August 5, 1969, establish and administer within its jurisdiction an air pollution control program. Organized boroughs may establish an air pollution control program on an areawide basis, and the exercise of powers with respect to the program is not subject to the restrictions on acquiring additional areawide powers specified in AS 29.35.300 - 29.35.330 [AS 29.33.250 - 29.33.290]. Local

programs shall

(1) provide by ordinance for requirements compatible with those imposed by the provisions of AS 46.03.140 and 46.03.170 and applicable regulations;

(2) provide for the enforcement of the requirements imposed through appropriate administrative and judicial processes;

(3) provide for a local administrative organization, staff, and other resources necessary to effectively carry out the purposes of the program; and

(4) be approved by the department as being satisfactory to meet the requirements of AS 46.03.140 - 46.03.170 and the applicable regulations.

* Sec. 77. AS 46.11.040(3)(A) is amended to read:

(A) is constructed under an exception to the municipal building code granted <u>because the exception will result in increased energy efficiency</u> [UNDER AS 29.33.080(g)];

* Sec. 78. AS 46.11.900(8) is amended to read:

(8) "state financial assistance" means a loan, grant, guarantee, insurance, payment, rebate, subsidy, or other form of state assistance (other than aid under <u>AS 29.60</u> [AS 29.88, AS 29.89, AS 29.90, AS 29.95] and AS 43.18) including the purchase by a state agency of a loan to finance the construction of a new residential, commercial, or industrial building;

* Sec. 79. AS 46.35.200(3) is amended to read:

(3) "local government" means a city or borough including a <u>unified</u> municipality [UNIFIED UNDER AS 29.68.240 - 29.68.440];

* Sec. 80. AS 46.40.140(h) is amended to read:

(h) Members of coastal resource service area boards are subject to recall on the same grounds and in the same manner as provided for

recall of municipal officials in AS 29.26.240 - 29.26.350 [AS 29.28.-130 - 29.28.250]. The lieutenant governor functions in place of the assembly or council and municipal clerk for receipt and review of recall petitions and the conduct of recall elections.

* Sec. 81. AS 46.40.210(2)(A) is amended to read:

(A) unified municipalities [ESTABLISHED UNDER AS 29.-68.240 - 29.68.440];

* Sec. 82. AS 47.35.010(b) is amended to read:

(b) The department shall, within 90 days after receiving a written request that it do so, delegate its powers relating to nurseries under this section and under AS 47.35.040, 47.35.050 and 47.-35.060 to a municipality which has adopted an ordinance providing for day care licensing under home rule powers or as authorized under AS 29.35.200 - 29.35.210 [AS 29.48.035(a)(20)]. A municipality to which these powers have been delegated may waive or modify any regulation or standard established by the department under the authority of AS 47.35.010 - 47.35.080 as it applies to nurseries or the application of any such regulation or standard as it applies to a particular day care licensee but must notify the department of any waiver.

* Sec. 83. The following laws are repealed: AS 04.11.400(c); AS 04.-21.080(11); AS 14.56.065(b), 14.56.180(3); AS 15.13.130(6); AS 18.55.950-(10); AS 18.20.015(f); AS 24.55.330(3); AS 28.35.260(a)(10); AS 29.08; AS 29.13; AS 29.18; AS 29.23; AS 29.28; AS 29.33; AS 29.38; AS 29.41; AS 29.43; AS 29.48; AS 29.53; AS 29.58; AS 29.63; AS 29.68; AS 29.73; AS 29.-78; AS 29.88; AS 29.89; AS 29.90; AS 29.95; AS 30.15.070(3); AS 30.30.170-(2); AS 35.15.120(3); AS 42.06.630(6); AS 43.18.500(j)(6); AS 43.20.016; AS 43.56.210(8); AS 44.47.310(5); and AS 44.85.410(4).

* Sec. 84. A right or liability of a municipality existing on July 1, 1983, is not affected by the enactment of this Act. Ordinances and

regulations in effect on July 1, 1983, remain in effect unless they conflict with provisions of this Act. Ordinances and regulations in effect on July 1, 1983, that conflict with provisions of this Act remain in effect for 180 days after July 1, 1983. The terms of elected or appointed municipal officials in office on July 1, 1983, are not affected by this Act, and their terms expire as provided before July 1, 1983.

* Sec. 85. AS 29.45 as enacted in sec. 11 of this Act is retroactive to January 1, 1983.

* Sec. 86. AS 29.45 as enacted in sec. 11 of this Act and sec. 85 of this Act take effect immediately in accordance with AS 01.10.070(c).

* Sec. 87. Except for AS 29.45 as enacted in sec. 11 of this Act and except for sec. 85 of this Act, this Act takes effect July 1, 1983.

Section-by-Section Analysis
CSSB 1 (C&RA)

Sec. 29.03.030. This is added to the chapter dealing with the unorganized borough in order to cross-reference the section authorizing the division of lands to act as the platting authority in the unorganized borough.

CHAPTER 04. CLASSIFICATION OF MUNICIPALITIES.

Sec. 29.04.010. This section is altered to allow a city of any class to adopt a home rule charter, whereas existing law allows only a first class city to adopt a charter. Unified municipalities are included within the definition of home rule municipality. (AS 29.-08.010)

Sec. 29.04.020. No change. (AS 29.08.020)

Sec. 29.04.030. No change. (AS 29.08.030)

Sec. 29.04.040. (a) The phrase "as provided in this subsection" is deleted as unnecessary. To reclassify as a first class city, a second class city must have 600 residents, whereas existing law requires only 400 residents for reclassification. (AS 29.08.040(a))

(b) No change. (AS 29.08.040(b))

(c) No change. (AS 29.08.040(c))

(d) Minor rewording, but no substantive change. (AS 29.-08.040(d) and (e))

(e) "Department of Community and Regional Affairs" is altered to read "department". This bill adds "department" to the definitions section and uses that term throughout the title in place of "Department of Community and Regional Affairs". (AS 29.08.040(f))

Sec. 29.04.050. This deletes the provision for reclassification of a second class borough to a third class borough. (AS 29.08.040(g))

The material currently dealing with reclassification to third class status is deleted. (AS 29.08.040(h), and (j))

Sec. 29.04.060. (a) Minor rewording, but no substantive change. (AS 29.08.040(g) and (h))

(b) Minor rewording, but no substantive change. (AS 29.-08.040(i))

CHAPTER 05. INCORPORATION.

Sec. 29.05.010. (a) A community that meets certain standards may incorporate as a home rule or first class city, whereas existing law provides for incorporation of a first class city only. (AS 29.18.011)

(1) A community must have 600 residents to incorporate as a home rule or first class city, whereas existing law requires 400 residents for incorporation as a first class city. (AS 29.18.011(a)(1))

(2) No change. (AS 29.18.011(a)(2))

(3) The term "local services" is altered to "municipal services". (AS 29.18.011(a)(3))

(4) The term "local government" is altered to "city government". (AS 29.18.011(a)(4))

(5) The term "local government" is altered to "city government". (AS 29.18.011(a)(5))

(b) No change. (AS 29.18.011(b))

Sec. 29.05.020. (a) No change. (AS 29.18.021(a))

(b) The term "organized borough" is altered to "borough", which is defined for the title. (AS 29.18.020(b))

Sec. 29.05.030. (a) This provides for incorporation of a home rule, first class, or second class borough, but not for incorporation of a third class borough. This section contains several technical changes. The term "organized borough" is replaced with "borough" since that is defined. The term "local services" is replaced by "municipal services". The term "local government" is replaced by "borough government" as being more precise since this section deals with the incorporation of boroughs and not cities. (AS 29.18.030)

(b) This is new and provides that an area may not incorporate as a third class borough.

Sec. 29.05.060. "Department of Community and Regional Affairs" is replaced by the word "department" which is defined for the title. The paragraphs are reorganized so that the most general requirements precede the most specific requirements for incorporation. (AS 29.18.050)

(7) Signature requirements apply to home rule and first class cities as a unit and then to the rest of the voters in the area of the proposed borough as another unit. Under existing law only first class cities are treated as a special unit for the purpose of gathering signatures. (AS 29.18.050(10))

(11) Signature requirements for incorporation of a first class city must also be complied with for incorporation of a home rule city. (AS 29.05.060(8))

(13) A new provision for incorporation of a home rule municipality requiring that a proposed home rule charter be filed with the incorporation petition.

Sec. 29.05.070. Minor rewording, but no substantive change. (AS 29.18.060)

Sec. 29.05.080. (a) Combines material currently found in two subsections. Adds requirement that notice of the meeting be published. "Published" is defined for the title. (AS 29.18.070(a) and (c))

(b) No change. (AS 29.18.070(b))

(c) No substantive change. (AS 29.18.080(a))

Sec. 29.05.090. "Department of Community and Regional Affairs" is altered to "department". (AS 29.18.080(b))

Sec. 29.05.100. No substantive change. (AS 29.18.090)

Sec. 29.05.110. This section contains a few minor changes, so that the use of language is consistent throughout the bill. The word "officer" is changed to "official" and that is the term used throughout. Currently, Title 29 uses the terms municipal "officer" and "official" interchangeably. Effective January 1, 1981, the director of elections became responsible for conducting state elections rather than the lieutenant governor and here the responsibility for the election is conferred on the director of elections. (AS 29.18.110)

Sec. 29.05.120. This section is reorganized. Current references to the lieutenant governor are changed to the director of elections. (AS 29.18.120)

(a) Contains material currently found in AS 29.18.120(b).

(b) Contains material currently found in AS 29.18.120(b).

(c) Contains material currently found in AS 29.18.120(b).

(d) Contains material currently found in AS 29.18.120(c).

(e) Contains material currently found in AS 29.18.120(d).

(f) Contains material currently found in AS 29.18.120(e).

Sec. 29.05.130. The phrase "borough assembly or city council" is replaced by the phrase "governing body" which is defined for the title. The last line of the current section is dropped as no longer necessary. The provisions of this section apply to all organized boroughs whether incorporated or organized before or after September 10, 1972. (AS 29.18.130)

Sec. 29.05.140. Minor wording changes are made to improve readability and to insure that terms are used consistently throughout the title. (AS 29.18.140)

(d) Added to indicate that the section applies to home rule and general law municipalities, however, this is not a substantive change because the section currently applies to home rule municipalities under AS 29.13.100.

Sec. 29.05.150. No substantive change. (AS 29.18.150)

Sec. 29.05.180. This section now applies only to organization grants for cities. A new section has been added to the bill to deal with organization grants for boroughs. A newly incorporated city or a second class city in the unorganized borough that reclassifies shall be entitled to a first year organization grant of $50,000 and to a second organization grant of $25,000. Under existing law, a municipality is entitled to receive $10 for every voter or $25,000 minimum, and the municipality receives no grant the second year. (AS 29.18.180)

Sec. 29.05.190. This section deals with organization grants to boroughs only and applies to boroughs incorporated after July 1, 1983. A borough shall be entitled to a first year organization grant of $300,000; a second year grant of $200,000; and a third year grant of $100,000. Under existing law a borough receives $10 for every voter or a minimum $25,000 grant. (AS 29.18.180)

Sec. 29.05.200. This is new material establishing an organization grant fund. The Department of Community and Regional Affairs is required to prepare a yearly report on the fund to be presented to the Department of Administration.

Sec. 29.05.210. This is new material which requires the Department of Community and Regional Affairs to determine the population of a newly incorporated borough, help the borough establish an initial assessment and collection department if it has adopted a

sales or use tax; and help the borough to determine the initial assessment roll if the borough has adopted a property tax.

CHAPTER 06. ALTERATION OF MUNICIPALITIES.

Sec. 29.06.010. The phrase "qualified voters voting on the question at a regular or special election" is replaced by "voters after an election". Both "voters" and "election" are defined for the title. References to the lieutenant governor are changed to the director of elections. (AS 29.73.050)

(d) This is added and applies the section to home rule municipalities. This is not a substantive change since the section is a home rule limitation under AS 29.13.100.

Sec. 29.06.040. (a) Authorizes an appeal of a decision of the Local Boundary Commission regarding a proposed municipal boundary change. (AS 29.68.010(a))

(b) Minor rewording. (AS 29.68.010(a))

(c) Adds a new provision that standards and procedures that apply to detachment shall be the same as standards and procedures that apply to annexation, except that provisions for equitable prorated payment of debts must be included in the case of detachment. Requires the Local Boundary Commission to make a decision on a petition for annexation or detachment within 90 days. (AS 29.68.010(b))

(d) Minor reorganizing but no substantive change. (AS 29.68.-010(c))

Sec. 29.06.050. No substantive change. (AS 29.68.020)

Sec. 29.06.060. This is new material specifically applying all sections dealing with annexation as home rule limitations. The material contained in sec. 29.06.040 of this bill is currently a limitation on home rule municipalities.

Sec. 29.06.090. Adds a provision that a third class borough may not be formed through merger or consolidation. (AS 29.68.030)

Sec. 29.06.100. The word "existing" is added to make it clear that some requirements refer to an existing municipality and some to a proposed municipality. (AS 29.68.040)

Sec. 29.06.110. "Department of Community and Regional Affairs" is changed to "department". (AS 29.68.050, 29.68.060 29.-68.070(a))

Sec. 29.06.120. No substantive change. (AS 29.68.070(b))

Sec. 29.06.130. "Assembly or council" is changed to "governing body". Material contained in the last sentence under current law is placed into a new subsection (b). (AS 29.68.080)

Sec. 29.06.140. Material currently contained in AS 29.68.090(a) and (b) is combined into (a). The statutory reference in AS 29.-68.090(d) is eliminated as unnecessary. References to "lieutenant governor" are changed to "director of elections". (AS 29.68.090)

Sec. 29.06.150. No substantive change. (AS 29.68.100)

Sec. 29.06.160. No substantive change. (AS 29.68.110)

Sec. 29.06.170. This is a new section providing that the article on merger and consolidation applies to home rule municipalities. These sections are currently applied to home rule municipalities under AS 29.13.100.

Sec. 29.06.190. No substantive change. (AS 29.68.240)

Sec. 29.06.200. No substantive change. (AS 29.68.250)

Sec. 29.06.210. "Unification" is added to make it clear that this is a special type of petition. (b)(1) and (2) are slightly rewritten for clarity. (AS 29.68.260)

Sec. 29.06.220. No substantive change. (AS 29.68.270)

Sec. 29.06.230. New section setting out duties of charter commission. (AS 29.68.350(a))

Sec. 29.06.240. This is rewritten for clarity. Under existing law membership is divided between the area outside cities and the area inside cities. This approach is altered so that membership is divided between the area outside home rule and first class cities and the area inside home rule and first class cities in the borough. (AS 29.68.310)

Sec. 29.06.250. (a) No substantive change. (AS 29.68.280)

(b) No substantive change. (AS 29.68.290(a))

(c) No substantive change. (AS 29.68.290(b))

(d) This is new material providing that a resolution or petition for unification is void if insufficient nominations are received for the charter commission.

Sec. 29.06.260. No substantive change. (AS 29.68.300)

Sec. 29.06.270. (a) The question submitted is whether a charter commission shall be formed, not whether unification shall take place. (AS 29.68.320(a) and (b))

(b) No substantive change. (AS 29.68.320(c))

(c) No substantive change. (AS 29.68.320(d))

Sec. 29.06.280. Reworded to clarify that formation of a charter commission is being considered, not unification. (AS 29.68.330)

Sec. 29.06.290. No substantive change. (AS 29.68.340(a) - (d))

Sec. 29.06.300. No substantive change. (AS 29.68.340(e), 29.68.390(e))

Sec. 29.06.310. No substantive change. (AS 29.68.340(f))

Sec. 29.06.320. The language "at a regular or special borough election called by the borough assembly held within 60 days of the date of publication and posting of the proposed charter as required in sec. 380 of this chapter" is deleted since this appears elsewhere. Parts have been slightly rewritten for clarification and statutory references to other sections in AS 29.68.350(a)(5) and (7) are deleted as unnecessary. AS 29.68.350(b) is deleted as unnecessary. (AS 29.68.350)

Sec. 29.06.330. Some excessive verbage is eliminated. (AS 29.-68.360)

Sec. 29.06.340. No substantive change. (AS 29.68.370)

Sec. 29.06.350. The language "once in at least one newspaper having general circulation distributed within the borough, if there is a newspaper having general circulation distributed in the borough" is eliminated as unnecessary since "published" is defined for the title. (AS 29.68.380)

Sec. 29.06.360. (a) No substantive change. (AS 29.68.635(a), 29.68.390(a))

(b) No substantive change. (AS 29.68.390(b))

(c) No substantive change. (AS 29.68.390(c))

(d) No substantive change. (AS 29.68.390(d))

Sec. 29.06.370. The statutory referance to the article on unification is eliminated as unnecessary. (AS 29.68.400)

Sec. 29.06.380. This section is slightly reworded for clarity. (AS 29.68.410)

Sec. 29.06.390. This section is slightly reworded for clarity. (AS 29.68.420)

Sec. 29.06.400. This is reworded for clarity and the statutory reference to the unification article is deleted as unnecessary. (AS 29.68.430)

Sec. 29.06.410. (2) is changed so that it is clear that a unified municipality has the powers of a home rule borough, since a unified municipality is a home rule unit of government. (AS 29.68.440)

Sec. 29.06.420. This is a new section making the provisions dealing with unification applicable to home rule municipalities. Although annexation, merger and consolidation, and dissolution are currently home rule limitations, the sections dealing with unification are not applicable to home rule municipalities as limitations under existing law.

Sec. 29.06.450. No changes other than changes in terminology used consistently throughout in this bill. (AS 29.68.500)

Sec. 29.06.460. No changes except for minor rewording for clarity. (AS 29.68.510)

Sec. 29.06.470. No changes, except for minor rewording for clarity. (AS 29.68.520)

Sec. 29.06.480. "Department of Community and Regional Affairs" is altered to "department". (AS 29.68.530, 29.68.540)

Sec. 29.06.490. No changes except for minor rewording for clarity. (AS 29.68.550)

Sec. 29.06.500. (a) No change. (AS 29.68.560)

(b) Provides for an administrative appeal of a Local Boundary Commission decision.

Sec. 29.06.510. Material contained in AS 29.68.570(a) and (b) is consolidated into (a). References to the "lieutenant governor" are changed to the "director of elections", who is now in charge of state elections. (AS 29.68.570)

Sec. 29.06.520. The statutory reference contained in existing law is deleted as unnecessary. (AS 29.68.580)

Sec. 29.06.530. This is a new section providing that the article dealing with dissolution applies to home rule municipalities. AS 29.13.100 makes these sections applicable to home rule municipalities under current law.

CHAPTER 10. HOME RULE MUNICIPALITIES.

Sec. 29.10.010. A city or borough of any class may adopt a home rule charter, but a second class city must have at least 600 residents before it may adopt a charter. This is a significant change from existing law which allows first class boroughs and cities, and second class boroughs to adopt a charter, but does not authorize a second class city to adopt a charter. An unincorporated community with at least 600 residents may adopt a charter and incorporate as a home rule city. An area in the unorganized borough may adopt a charter and incorporate as a home rule borough. A proposed charter for an unincorporated community or area is prepared by the petitioners and filed with the incorporation petition. (AS 29.13.010)

(b) This is new and allows an unincorporated community with at least 600 residents to adopt a charter and incorporate as a home rule city.

(c) This is new and allows an area in the unorganized borough to adopt a charter and incorporate as a home rule borough.

(e) This is new and requires the proposed charter for an unincorporated community or area to be filed with the incorporation petition.

Sec. 29.10.020. This is new and requires the Department of Community and Regional Affairs to prepare model charters to be available to persons interested in filing a petition to incorporate a home rule municipality.

Sec. 29.10.030. No substantive change. (AS 29.13.050)

Sec. 29.10.040. (a) This has been reworded slightly, but contains no significant changes. (AS 29.13.010)

(b) No substantive change. (AS 29.13.020)

(c) This is new material providing that if enough nominations for candidates are not filed no election is held on the question of forming a charter commission.

Sec. 29.10.050. Changed to reflect the fact that a charter commission is elected only in an existing municipality considering the question of home rule. For incorporation of a home rule

municipality, the charter is prepared and filed by the petitioners with the incorporation petition. (AS 29.13.030)

Sec. 29.10.060. The clerk shall have the charter published, which is defined, and shall make copies available. Under existing law the governing body is responsible for publishing a charter. (AS 29.13.040)

Sec. 29.10.070. "Municipal" is deleted as no longer necessary as "voter" is defined. "Regular or special" is deleted since "election" is defined. Adds a provision that a proposed charter for an unincorporated community or area shall be voted on at the incorporation election. (AS 29.13.060)

Sec. 29.10.080. (a) The provision that the charter becomes effective on the date the election is certified has been added. (AS 29.13.070)

(b) This is new and authorizes voters to determine if a combined assembly and school board should be retained when voting on adoption of a home rule charter in a third class borough.

Sec. 29.10.090. (a) No substantive change. (AS 29.13.070(b))

(b) This is new providing that if incorporation of a home rule municipality is rejected, the proposed charter is rejected as well.

Sec. 29.10.100. The provision that a charter may be amended by initiative referendum has been deleted. The charter is amended as provided in the charter itself. (AS 29.13.080)

Sec. 29.10.200. The following paragraphs contain sections which are added to the limitations of home rule powers:

(5) unification of municipalities;

(10) legislative power;

(11) assembly composition and apportionment (only one section on assembly composition and reapportionment, AS 29.-23.021 which is, now sec. 29.60.060, is a limitation under existing law), however, AS 29.20.033 provides that the other section might apply to some home rule municipalities;

(12) qualifications of members of governing bodies;

(14) executive power;

(28) alcoholic beverages;

(32) assessment and collection of taxes;

(33) land use regulation;

(37) title to vacated areas;

(39) property taxes (this adds sec. 29.45.450 - 500 and sec. 29.45.550 to the limitations listed under existing law);

(43) construction;

(47) general grant land;

The following paragraphs under AS 29.13.100 no longer appear as limitations:

(4) election and term of mayor;

(8) municipal elections (material now contained in AS 29.-28.010 is not a limitation under this bill; material in AS 29.28.020(b) is expanded so that the notice requirement covers both regular and special elections and the requirement is a limitation under this bill);

(15) borough building code jurisdiction within cities (the material is deleted from this bill);

(20) expenditures of borough revenue;

(25) bond attorneys (the material is deleted from this bill);

(35) bonded debt for school construction (the material is deleted from this bill);

(37) zoning of state land for homesite entry (this was repealed in 1979);

(39) applicability of local platting regulations (the material is deleted from this bill);

(40) expulsion of borough assemblymen (this material is substantially rewritten and not made binding upon home rule municipalities);

(41) removal of borough mayor from office (this material is substantially rewritten and not made applicable as a home rule limitation);

(42) expulsion of city councilmen (this material is substantially rewritten and not made applicable as a home rule limitation);

(43) removal of mayor from office (this material is substantially rewritten and not made applicable as a home rule limitation);

(44) expulsion, removal from office (this material is substantially rewritten and not made applicable as home rule limitation).

CHAPTER 20. MUNICIPAL OFFICERS AND EMPLOYEES.

Sec 29.20.010. Each municipality must adopt a conflict of interest ordinance. A member of the governing body shall declare a financial interest he has in an official action and ask to be excused. The presiding officer rules on the question and his decision may be overridden. Under existing law an officer or employee is required to disqualify himself from participating in an official action in which he has a substantial financial interest. (AS 29.23.555)

Sec. 29.20.020. "Assembly and council" is altered to "governing body" and the section is divided into subsections for ease of use. (AS 29.23.580)

Sec. 29.20.050. The second sentence is new material, however it does not substantively change existing law since it can be implied that the legislative power of a city is vested in the council. This is made applicable as a home rule limitation. (AS 29.23.010)

Sec. 29.20.060. No substantive change. This is made specifically applicable to home rule municipalities, but is a home rule limitation now under AS 29.13.100(3). (AS 29.23.021)

Sec. 29.20.070. "Borough" is dropped before the word "assembly" when it appears and "assembly" is defined for the title. The statutory reference contained in AS 29.23.023(e)(1) is deleted as unnecessary since "unified municipality" is defined. (AS 29.23.023)

Sec. 29.20.080. "Borough" is deleted as unnecessary when it appears before the word "assembly". In (e) "of the Department of Community and Regional Affairs" is deleted since "commissioner" is defined for the title. Statutory references are altered to reflect new numbering. (AS 29.23.025)

Sec. 29.20.090. "Borough" is deleted as unnecessary when it appears before "assembly". "Of Community and Regional Affairs", appearing several times in the section, is deleted since "commissioner" is defined for the title. Statutory references are altered to reflect renumbering. (AS 29.23.027)

Sec. 29.20.100. "Borough" is deleted where it appears before "assembly". "Of Community and Regional Affairs" is deleted since "commissioner" is defined for the title. Statutory references are altered to reflect new numbering. (AS 29.23.029)

Sec. 29.20.110. Statutory references are altered to reflect new numbering. (AS 29.23.031)

AS 29.20.120. The statutory reference in (1) is deleted since "unified municipality" is defined for the title. Statutory references are revised to reflect new numbering. (AS 29.23.033)

Sec. 29.20.130. No change. (AS 29.23.200(a))

Sec. 29.20.140. This section is substantially rewritten to combine material concerning the qualifications for membership in assemblies with material concerning the qualifications for membership in councils.

(a) Rewritten, but no substantive change. (AS 29.23.050, 29.-23.200(b))

(b) Combines material currently found in different sections. (AS 29.23.050, 29.23.200(b))

(c) This contains new material allowing a municipality to establish district residency requirements for members of the assembly or council. Current law allows an assemblyman elected from one district who becomes a resident of another district to serve only until the next regular election. The subsection allows a municipality to provide otherwise by ordinance. It is also made applicable to city councils. Under existing law a council may be elected by district rather than at-large, but no provision deals with the possibility that a councilman might change his district residency. (AS 29.23.050, 29.23.200(a))

(d) New material prohibiting a municipality from limiting the number of terms or number of consecutive terms a voter may serve on the assembly or council, unless the limit is ratified.

(e) This is applicable to both home rule and general law municipalities. Under current law the qualifications for assemblymen are applicable to home rule and general law municipalities but the qualifications for city councilmen are not. (AS 29.23.050, 29.-23.200)

Sec. 29.20.150. Combines material dealing with the term of office of members of the assembly with material dealing with the term of office of members of the council.

(a) This is substantially rewritten, however, the only substantive change is that members of the council may serve different terms when allowed by charter, as well as by ordinance. (AS 29.23.-040(a), 29.23.200(c))

(b) No substantive change. (AS 29.23.040(a), 29.23.200(c))

(c) The material permitting a different date to be prescribed by charter or ordinance is made applicable to city councils. (AS 29.23.040(b), 29.23.200(c))

(d) This is added as a home rule limitation with respect to city councils. (AS 29.23.040(c))

Sec. 29.20.160. Combines material dealing with assemblies and with councils into one section.

(a) The last line dealing with the presiding officer is new material as it applies to the council. (AS 29.23.060(b), 29.23.240)

(b) The material dealing with the calling of a special meeting is substantively changed. Under existing law a special meeting may not be called unless all members receive 24 hours written notice or, if there is an emergency and all absent members waive the notice. As rewritten, a special meeting may be held if a majority of the members receive 24 hours notice and reasonable efforts are made to notify all members. (AS 29.23.060(a), 29.23.210(a))

(c) A member of the governing body disqualified from voting is considered present for purposes of constituting a quorum. A majority of the membership of a council constitutes a quorum, while under existing law four councilmen constitute a quorum. This is not a substantive change, since a first class city has a council of six members and second class city has a council of seven members. Four councilmen are still required for a quorum. (AS 29.23.060(d), 29.23.210(c))

(d) Actions are adopted by a majority of the total membership of the governing body, while under existing law actions are adopted by a majority of votes authorized on the question. All members vote and unless they are required to abstain by law, while under existing law a member may abstain if permitted by the governing body, and must abstain if he has a substantial financial interest in the question. This section is applicable to city councils as well as to assemblies. (AS 29.23.060(d), 29.23.210(c))

(e) Specifically provides that the journal shall be a public record. (AS 29.23.060(c), 29.23.210(b))

(f) Requires a governing body to determine by ordinance its rules and order of business. (AS 29.23.060(c), 29.23.210(b))

Sec 29.20.170. This allows the governing body to prescribe the manner in which a vacancy occurs in any elected office, other than the office of mayor or member of the school board. The governing body is required to declare an elective office vacant under specific conditions, unless a municipality establishes otherwise by ordinance. (AS 29.23.060(c), 29.23.080, 29.23.210(b), 29.23.220, 29.23.570)

Sec. 29.20.180. (a) Requires a vacancy to be filled within 30 days unless a different period is established by ordinance. If less than 30 days remain in a term, a vacancy need not be filled, unless filling the vacancy is necessary to preserve a quorum. The material contained in AS 29.23.080 dealing with filling a vacancy in dual assembly council seats has been deleted. (AS 29.23.080, 29.23.220)

(b) This is new material requiring appointments within seven days if needed to preserve a quorum.

(c) No substantive change. (AS 29.23.080, 29.23.220)

Sec. 29.20.220. This section is substantially rewritten to combine material dealing with the mayor of a city with material dealing with the mayor of a borough.

(a) This is a clear statement that the executive power is vested in a mayor, which is only implied with reference to cities under current law. The mayor of a home rule or unified municipality is elected by the voters, which is not a substantive change. (AS 29.23.200(a) and (c), 29.23.240)

(b) This material currently exists with respect to city mayors but not with respect to borough mayors, although these duties may be implied for borough mayors. The language "and is responsible for additional duties and powers prescribed by this chapter or by home rule charter" is new, but is not a substantive change. (AS 29.23.240)

(c) This section is a limitation on home rule municipalities. Under existing law it is not listed as a limitation.

Sec. 29.20.230. This is substantially rewritten in order to combine material dealing with the election and term of a borough mayor and a city mayor.

(a) No substantive change. (AS 29.23.130(c), 29.23.250(b) and (d))

(b) Allows a second class city to provide by ordinance for a term longer than one year for the office of mayor, as long as the mayor is a member of the council. Existing law provides a one-year term

of office for the mayor of a second class city. (AS 29.23.250(c) and (d))

(c) This is new material providing that the number of terms or number of consecutive terms a mayor may serve may not be limited.

Sec. 29.20.240. Rewritten to combine sections dealing with the mayor of a borough and the mayor of a city.

(a) No substantive change. (AS 29.23.130(b), 29.23.250(a) and (c))

(b) The reference in AS 29.23.250(a) to additional residency requirements prescribed by charter is eliminated. This section is not a limitation on home rule governments, so a home rule municipality may prescribe additional residency requirements by charter without statutory authority. (AS 29.23.130(b), 29.23.250(a))

Sec. 29.20.250. This is rewritten to combine sections dealing with a city and sections dealing with a borough, and to achieve a clear statement of existing law.

(a) No substantive change. (AS 29.23.130(a), 29.23.290)

(b) Authorizes the mayor of a borough with a manager form of government to vote in the case of a tie. The fact that a mayor may take part in discussions is not stated with respect to the mayor of a city under existing law. (AS 29.23.160, 29.23.260)

Sec. 29.20.260. No change, except for minor rewording for clarity. (AS 29.23.150)

Sec. 29.20.270. This is substantially rewritten in order to combine sections dealing with the mayor of a borough and the mayor of a city.

(a) No substantive change. (AS 29.23.270(a))

(b) The material requiring that a veto be overridden within 21 days after the exercise of the veto or during the next regular meeting is new. Current law does not specify a time period during which a veto may be overridden. (AS 29.23.170(a), 29.23.270(a))

(c) A veto does not extend to actions of a city council sitting as a board of equalization or a board of adjustment, nor may the city mayor veto the adoption or repeal of a manager form of government. Current law is silent as to these issues with respect to a city. (AS 29.23.170(a) and (b), 29.23.270)

(d) No change. (AS 29.23.270(b))

Sec. 29.20.280. (a) Under existing law the governing body has the option of declaring the office of mayor vacant when he is convicted of a corrupt practice. (AS 29.23.130(f), 29.23.255, 29.-23.570)

(b) No substantive change. (AS 29.23.180, 29.23.280(a))

(c) No substantive change. (AS 29.23.280(b))

Sec. 29.20.300. The statutory reference to a repealed section is deleted. School board members may be elected by area rather than at-large, if approved by the voters. (AS 29.23.310)

Sec. 29.20.310. No change, except for minor rewording so the usage is consistent throughout the title. (AS 29.23.340)

Sec. 29.20.320. This is new material allowing the governing body to establish boards and commissions. Arguably, this power is implied to exist in current law as part of the ability of a governing body to delegate responsibility. (AS 29.48.010(1))

Sec. 29.20.360. Certain officials shall be appointed by the chief administrator unless otherwise provided by ordinance. Under current law these officials are appointed by the chief administrator or by the governing body as determined by ordinance. Current law provides that appointments by the chief administrator are subject to confirmation, and this section allows a municipality to provide otherwise by ordinance. (AS 29.23.360)

Sec. 29.20.370. No change, except for minor rewording to achieve consistent usage throughout the title. (AS 29.23.370)

Sec. 29.20.380. No change, except for minor rewording in order to achieve consistent usage. (AS 29.23.380)

Sec. 29.20.390. The statutory reference is added to provide notice that, when a central treasury is established for the school board and the municipality, the treasurer is not custodian of the funds. (AS 29.23.390)

Sec. 29.20.400. Slightly reworded for clarity. (AS 29.23.070)

Sec. 29.20.410. Allows the governing body to provide for a classified service and to designate positions which are wholly or partially exempt from the classified service. (AS 29.23.550)

Sec. 29.20.460. No change, except for minor rewording to achieve consistent usage. (AS 29.23.410, 29.23.420)

Sec. 29.20.470. The last line dealing with notice requirements is omitted because notice requirements for elections are now contained in Sec. 29.26.030. At least 20 days notice shall be provided, while under current law 30 days notice is required before an election to adopt a manager plan. (AS 29.23.430)

Sec. 29.20.480. No change, except for minor rewording to achieve consistent usage. (AS 29.23.440)

Sec. 29.20.490. In the second line the word "solely" and the word "executive" have been omitted, so that the manager is to be chosen on the basis of his administrative qualifications. A member of the governing body may not be appointed manager until one year after leaving office unless authorized by more than a majority vote. Under existing law this limitation applies to all elected municipal officials. (AS 29.23.450, 29.23.460)

Sec. 29.20.500. This is substantially rewritten so that material dealing with duties of a city manager and material dealing with duties of a borough manager are combined. A statutory reference to the section concerning appointment of school employees is added for clarification. The requirement that the manager prepare and make available to the public an annual report on municipal affairs is deleted. AS 29.23.140(10)(A) and (C), requiring the borough manager to administer functions of borough employees and to administer public works is deleted because those requirements appear adequately covered by (1) and (5) of this section. (AS 29.23.140, 29.23.290)

Sec. 29.20.510. Rewritten slightly for clarity. (AS 29.23.130(e))

Sec. 29.20.520. After repeal of a manager plan, the governing body has 60 days to reorganize the municipal executive and administrative functions. Under existing law, no time period is provided for reorganization. (AS 29.23.480)

Sec. 29.20.600. No change, except for rewording to achieve uniform usage. (AS 29.23.500)

Sec. 29.20.610. No change, except for minor rewording to achieve uniform usage. (AS 29.23.520)

Sec. 29.20.620. A method of determining salaries shall be provided by ordinance, while under current law the governing body fixes by ordinance the salaries of elected officials. The salary of the mayor may be reduced during his term of office if a manager plan is adopted. An elected official may not receive compensation for additional service to the municipality, unless provided otherwise by ordinance. (AS 29.23.530)

Sec. 29.20.630. Material currently contained in AS 29.23.540(a) is deleted. Subject to requirements contained in the title dealing with education, a school district employee, or state employee may not be denied the right to serve as an elected municipal official. Current law allows a municipality to prohibit the right to serve by charter or ordinance. (AS 29.23.540)

Sec. 29.20.640. No changes, except for rewording for consistency and changes in statutory references to reflect renumbering. (AS 29.23.560)

CHAPTER 25. MUNICIPAL ENACTMENTS.

Sec. 29.25.010. The governing body is no longer required to fix the compensation of members of the assembly or council by ordinance, nor is it required to regulate the rate charged by a public utility by ordinance. (AS 29.48.130)

Sec. 29.25.020. This is substantially reorganized, but contains no substantive changes. (AS 29.48.140, 29.48.150)

Sec. 29.25.030. No change, except for minor word changes in order to achieve maximum clarity. (AS 29.48.160)

Sec. 29.25.040. Requires the governing body to see that the adopted code is made available to the public at no more than cost, while existing law requires the governing body to provide for the adopted code to be sold to the public. (AS 29.48.170)

Sec. 29.25.050. (b) allows the designee of the municipal clerk to prepare a general codification of municipal ordinances and deletes the requirement that the codification be prepared with the assistance of a legal advisor. The rest of the section is unchanged. (AS 29.48.180)

Sec. 29.25.060. This has been made applicable as a home rule limitation. (AS 29.48.185)

Sec. 29.25.070. A penalty not to exceed that imposed for a class B misdemeanor may be imposed for a violation of an ordinance. The maximum fine for a class B misdemeanor is $1,000 and the maximum sentence of imprisonment is 90 days. Under existing law punishment not to exceed $500 or imprisonment for 30 days is provided for. A mandatory, nonsuspendable term of imprisonment for 5 days may be imposed for violation of an ordinance. The municipality or aggrieved person may institute a civil action against a person who violates an ordinance, and a civil penalty of up to $1,000 may be imposed for each violation. An action to enjoin a violation may be brought and, upon a finding of a violation, the superior court shall grant the injunction. Each day that a violation of an ordinance continues is a separate violation.

These penalties are authorized only if copies of the ordinance are made available. (AS 29.48.200)

CHAPTER 26. ELECTIONS.

Sec. 29.26.010. A judge shall be a voter of the precinct for which he is appointed unless no voter is willing to serve. The language "the municipality may not alter voter qualification requirements of this title" is deleted as unnecessary. This is no longer a limitation on home rule municipalities. (AS 29.28.010)

Sec. 29.26.020. The language "subject to other provisions of this title" is added because other sections in the title provide a procedure for the nomination of candidates, for example, see secs. 29.06.250 and 29.10.040. (AS 29.28.015)

Sec. 29.26.030. At least 20 days notice of a regular or special election is required. This applies as a limitation on home rule municipalities, whereas under existing law only the notice requirement for a special election applies. (AS 29.28.020(b))

Sec. 29.26.040. No change, except for minor rewording for clarity. (AS 29.28.020(a))

Sec. 29.26.050. This has been reorganized. To qualify to vote in municipal elections a person must have been registered to vote in state elections for at least 30 days preceding the municipal election. Existing law requires only that the person be registered to vote in state elections without a durational requirement. A municipality may require a person to be registered to vote in the precinct in which he seeks to vote. (AS 29.28.030)

Sec. 29.26.060. The runoff election requirement is limited to the office of mayor, member of the governing body, or school board and the municipality may adopt an ordinance to alter this runoff requirement. A runoff election shall be held three weeks after the date of certification of the original election, rather than within two weeks, and is between the two candidates that received the greatest number of votes for the seat. (AS 29.28.040)

Sec. 29.26.070. This has been rewritten for clarity. A requirement that the governing body authorize the election results to be certified is added in (c). The provision that expulsion of certain officials is final and not subject to judicial review contained in AS 29.28.050(f) is deleted. In this bill there is no provision denying judicial review in cases involving the declaration of vacancy in office. (AS 29.28.050)

Sec. 29.26.100. No substantive change. (AS 29.28.060)

Sec. 29.26.110. This is new material establishing a process for applying for a petition for initiative or referendum. An application is signed by ten voters who sponsor the petition. If the clerk finds that an application is in proper form and that the four listed requirements are met, he shall certify the application. A decision by the clerk on an application for petition is subject to judicial review.

Sec. 29.26.120. Within two weeks after certification of application a petition is prepared by the municipal clerk. Signatures must be obtained within 60, rather than 90 days from the date the petition is first circulated. Spaces are provided for signatures, the printed name of each signer, the date signature is affixed, and the residence and mailing addresses of each signer. Each petition contains a statement that the sponsor circulated the petition, that all signatures were fixed in his presence, and that he believes the signatures to be those of the persons whose names they purport to be. Spaces are provided for indicating the total number of signatures on a petition. If the petition consists of more than one page, each page contains a summary of the matter to be initiated or referred. Copies of the petition are supplied to each sponsor. (AS 29.28.065)

Sec. 29.26.130. Signatures must be secured within 60, rather than 90 days. The clerk shall determine the number of signatures required on a petition and inform each sponsor. The number of signatures required remains identical to the number required under current law, except that no provision is made for signatures only from persons in services areas or outside cities when the matter to be initiated or referred applies only to the service area or area outside cities. Illegible signatures must be rejected by the clerk, whereas under existing law they may be rejected. A signer may withdraw his signature before certification of the petition, whereas under existing law he may only withdraw his signature within 7 days after the petition is filed. (AS 29.28.070)

Sec. 29.26.140. All copies of a petition are filed as a single instrument. An insufficient petition may be supplemented only with signatures obtained within ten days after the date the petition is rejected, while under current law there is no requirement that the signatures be obtained during this period. (AS 29.28.073)

Sec. 29.26.150. No change, except for minor rewording for consistency. (AS 29.28.075)

Sec. 29.26.160. "On substantially the same matter" has been added so that it is clear that the waiting period for filing a new petition does not apply if the petition sought to be filed deals with a different subject. (AS 29.28.077)

Sec. 29.26.170. Unless the same measure is adopted, the clerk submits a petition seeking an initiative vote to the voters at the next regular election occurring no sooner than 45 days after certification of the petition, or, if no regular election occurs within 75 days, a special election is held. If the governing body adopts the same measure, the petition is void and the subject is not placed before the voters, while under existing law the governing body may not adopt an ordinance or resolution within 10 days from the date of election. If the vote is favorable, the ordinance or resolution becomes effective upon certification of the election unless a different effective date is provided in the ordinance or resolution, while under existing law an ordinance or resolution becomes effective when the election results are declared. There is no provision for the governing body to reject a petition, as there is in current law. (AS 29.28.080)

Sec. 29.26.180. When a petition seeks a referendum vote the clerk shall submit the matter to the voters in the same manner as provided for an initiative election. Under current law the vote is held during the next regular or special election, or within 75 days of filing the petition. If a petition is certified before the effective date of the matter referred, the ordinance or resolution is suspended, while under existing law the suspension occurs if a sufficient petition is filed within 30 days after passage of the ordinance or before the effective date of the ordinance. If the governing body repeals the ordinance or resolution, the petition is void and no election is held. If a majority vote does not favor repeal of the matter referred, it remains in effect, or, if it has been suspended becomes effective upon certification of the election. Existing law is silent as to the effective date of a suspended ordinance in this situation. (AS 29.28.090)

Sec. 29.26.190. If adopted in an initiative election or if adopted after a petition has been filed, an ordinance or resolution may not be repealed or amended within one year. If an ordinance or resolution is repealed in a referendum election, or after a petition has been filed, similar legislation may not be enacted for a period of one year. Existing law provides that the governing body may not act in any way within two years to modify or negate the effect of a successful initiative or referendum and if an ordinance has been repealed after a petition has been filed, the governing body may not enact similar legislation for one year. (AS 29.28.110)

Sec. 29.26.240. This is broadened to include an official appointed to elected office, because when a vacancy occurs an official may, in certain cases, be appointed. He will be subject to recall just as an elected person would be. An official may be recalled when he has served six months of a term for which elected or appointed, while under existing law there is some ambiguity as to the status of an official who is reelected to the same office. (AS 29.28.130)

Sec. 29.26.250. No change. (AS 29.28.140)

Sec. 29.26.260. This is new material establishing a procedure for applying for a recall petition. The application must contain information concerning 10 voters who will sponsor the petition, the address to which correspondence relating to the application may be sent, and a statement in 200 words or less of the grounds of the recall. Additional sponsors may be added.

Sec. 29.26.270. A recall petition is prepared by the clerk. It contains the names of the official sought to be recalled, the grounds for recall, the date the petition is issued by the clerk, notice that the signatures are secured within 60 days after the date the petition is issued (while under existing law a petition must be filed within 60 days after the date of the earliest signature on it), spaces for signatures, printed name, date of each signature, and residence and mailing addresses of each signor, a statement that the sponsor personally circulated the petition, all signatures where fixed in his presence, and he believes the signatures to be those of the persons they purport to be, and space for indicating the number of signatures on the petition. Copies of the petition are provided to each sponsor. (AS 29.28.150)

Sec. 29.26.280. Signatures are secured within 60 days after a recall petition is issued. Signatures not accompanied by a legible residence address are rejected. The clerk determines the number of signatures required and informs each sponsor. If a petition seeks to recall an official who represents the municipality at large, the petition shall be signed by a number of voters equal to 25 percent of the number of votes cast for that office. If a petition seeks to recall an official who represents a district, the petition shall be signed by a number of voters residing in the district equal to 25 percent of the number of votes cast in that district for the office. Under existing law signature requirements are identical to the requirements for initiative and referendum. (AS 29.28.150, 29.28.160)

Sec. 29.26.290. Copies of a recall petition are filed as a single instrument. An insufficient petition may be supplemented with additional signatures obtained within ten days after the date on which the petition is rejected, while under existing law there is no requirement that the signatures be obtained during that time period. A petition which does not contain an adequate number of signatures, both valid and invalid signatures, may not be supplemented and this is a new provision not contained in existing law. (AS 29.28.160, 29.28.170)

Sec. 29.26.300. Reworded so that it is clear that the six-month waiting period before a new petition may be obtained applies only to a petition seeking to recall the same official. (AS 29.28.180)

Sec. 29.26.310. No change, except for minor rewording for consistency. (AS 29.28.190)

Sec. 29.26.320. The requirement that an election to recall an official not be held sooner than 45 days after submission of the petition to the governing body is added. The governing body may not appoint to the same office an official who resigns after a petition is filed. (AS 29.28.200)

Sec. 29.26.330. The grounds for recall must be stated in 200 words or less. (AS 29.28.210)

Sec. 29.26.340. The provision that an office becomes vacant upon certification of the election is added. (AS 29.28.230, 29.28.240)

Sec. 29.26.350. When an official is recalled, his office is filled in accordance with the provision dealing with vacancies. If all members of a governing body are recalled the governor appoints three persons and they appoint additional members needed to fill vacancies in accordance with the provisions dealing with vacancies. If all members of the school board are recalled the governor appoints three persons and they appoint additional members to fill remaining vacancies. A person appointed by the governor serves until a successor is elected. After an official is recalled, the clerk conducts an election for a successor. The election is held not more than 60 days from the date the recall election is certified unless a regular election is held within 75 days, in which case the successor is chosen at the regular election. Nominations may be filed until seven days before the last date upon which notice of the election must be published, but they may not be filed until the election is certified. Under existing law the election of successor shall be held at least ten but not more than 45 days from the date of the recall election and there are no provisions dealing with a situation involving the recall of all members of the governing body or school board. (AS 29.28.250)

Sec. 29.26.360. The sections dealing with recall are made applicable as limitations on home rule municipalities, and are currently limitations under AS 29.13.100(9).

CHAPTER 35. MUNICIPAL POWERS AND DUTIES.

Sec. 29.35.010.

(1) No change. (AS 29.48.010(2))

(2) No change, except for rewording due to a change in organization. (AS 29.23.510)

(3) No change. (AS 29.48.010(1))

(4) Minor rewording. (AS 29.48.010(5))

(5) Minor rewording. (AS 29.48.010(3))

(6) "and impose liens for their enforcement" is added. (AS 29.48.010(7))

(7) No change. (AS 29.48.010(8))

(8) "for a purpose authorized under this title, federal law, or other law, or in accordance with such law" is deleted as excessive verbage. (AS 29.48.010(9))

(9) "facility or service" is added. (AS 29.48.010(11))

(10) This is added as a general power. Under existing law the power may be exercised by a first class borough on a nonareawide basis, so long as the borough seeks to have it transferred from cities or proposes joint city/borough exercise of the power. A first class borough may exercise the power on an areawide basis if it is assumed. A second class borough may exercise the power on an areawide or nonareawide basis if it is assumed. (AS 29.38.010, 29.48.035(a) and (b))

(11) No change. (AS 29.48.010(12))

(12) Minor rewording. (AS 29.48.010(10))

(13) Minor rewording. (AS 29.48.010(4))

(14) No change. (AS 29.48.010(6))

Sec. 29.35.020. A municipality may not exercise outside of its boundaries a power which it may not exercise within its boundaries. The word "roads" has been changed to "streets" which is defined for the title. The following have been included within the list of facilities which a municipality may provide outside its boundaries: solid and septic waste facilities, transportation facilities, wharves, harbors and other marine facilities. A municipality which provides a facility outside its boundaries may regulate its use to the extent that the jurisdiction in which the facility is located does not regulate it. Existing law provides that a municipality may regulate a facility outside its boundaries, and provides no right for the municipality within which the facility is located to regulate it. (AS 29.48.037)

Sec. 29.35.030. Allows all classes of municipalities to exercise eminent domain and declaration of taking. Under existing law a second class city may not exercise the power without formal approval of the Department of Community and Regional Affairs, and

must exercise the power by ordinance approved by the voters. This is a limitation on home rule municipalities, and is an existing limitation under AS 29.13.100(29). (AS 29.73.020)

Sec. 29.35.040. This becomes applicable when a disaster is declared by the governor as well as by the President. Since (a) allows a municipality within a disaster area to exercise the powers in the same manner as a home rule city, the subsection providing that differences between areawide and nonareawide powers do not apply has been eliminated as redundant. (AS 29.48.270)

Sec. 29.35.050. This is reorganized and minor changes are made to the wording for clarity. The phrase "provide the charges for collection and disposal shall be paid by the property owner or occupants of the premises" is eliminated as implied within the specified ability to fix charges. (AS 29.48.033)

Sec. 29.35.060. (a) The language "for the construction, operation and maintenance of bus transportation systems and public utilities" is eliminated, so that franchises and permits may be granted without restrictions as to type of franchise involved. This applies only to an entity not certificated by the Alaska Public Utilities Commission. (AS 29.48.050(a)) Not CS HB 172

(b) Unless a grant of a franchise or permanent permit is made on a competitive basis, the grant of any exclusive right to use a public street or right-of-way for more than five years to a utility or transportation system which is not certificated is valid only if approved by vote. Under existing law no franchise is valid unless it is submitted to the qualified voters for approval. The material dealing with use of streets by utilities contained in AS 29.48.-040(c) is deleted. (AS 29.48.050(b))

(c) This is made a home rule limitation and is one under existing law. (AS 29.13.100(17))

Sec. 29.35.070. The governing body may regulate a utility except to the extent that it is subject to regulation by the state or otherwise prohibited by law. Under existing law, a municipality may regulate only a municipally owned utility which is not regulated by the state. A municipality must adopt an ordinance that provides procedures for regulating service, rates and charges and that provides procedures necessary to insure due process. This section applies as a home rule limitation, and is an existing limitation under AS 29.13.100(17). (AS 29.48.060, 29.48.070)

Sec. 29.35.080. Requires municipal regulation of alcoholic beverages to conform to state requirements and is made a home rule limitation. (AS 29.48.035(a)(10))

Sec. 29.35.090. The governing body is required by ordinance to establish a formal procedure for acquisition and disposal of land. The provisions authorizing a municipality to acquire, hold and dispose of real property are deleted as unnecessary. The provisions dealing with the requirements which must be met in the formal procedure established for disposal of land have been eliminated to provide more flexibility. The provisions dealing with restricting land to agricultural use have been deleted. (AS 29.48.260)

Sec. 29.35.100. Under existing law, obligations requiring payment of funds from appropriations of later years must be approved by ordinance. This has been eliminated as misleading in that it could be construed to suggest that bonded indebtedness may be acquired, whether or not for a capital project, so long as the indebtedness is approved by ordinance. AS 29.48.190(d) is eliminated as unnecessary. (AS 29.48.190)

Sec. 29.35.110. This is rewritten for clarity. (AS 29.48.210)

Sec. 29.35.120. No change, except for minor rewording to achieve consistent usage throughout the title. (AS 29.48.220)

Sec. 29.35.130. No substantive change. (AS 29.73.080)

Sec. 29.35.150. Statutory references have been added to reflect reorganization. Subsection (b) is applicable as a home rule limitation, and exists as a home rule limitation under AS 29.13.100(10). (AS 29.33.010, 29.41.010(d))

Sec. 29.35.160. No change, except for minor rewording to achieve consistent usage. This is a home rule limitation, and exists as a limitation under AS 29.13.100(34). (AS 29.33.050)

Sec. 29.35.170. The subsection dealing with collection by a borough of taxes levied by a city is made applicable as a limitation on home rule municipalities. (AS 29.33.030)

Sec. 29.35.180. This is a new statement requiring first and second class boroughs to provide for planning and land use regulation under provisions of Chapter 40 so that this article will contain a complete list of areawide powers. A home rule borough is required to provide for planning, platting, and land use regulation.

Sec. 29.35.200. (a) Allows a first class borough to exercise on a nonareawide basis any power not otherwise prohibited by law. Under existing law a first class borough may exercise on a nonareawide basis any general law municipal power, but before exercising the power, the borough must seek to have it transferred from cities or propose joint city/borough exercise. (AS 29.38.010)

(b) No change. (AS 29.48.030, 29.48.035(b))

(c) Allows a first class borough to exercise on an areawide basis any power not prohibited by law if it has been acquired. Under existing law, a first class borough may acquire additional areawide municipal powers, but only the powers listed in Title 29. The authority to acquire powers which is granted in this bill is broader, since a borough may acquire any power not specifically prohibited by statute whether or not it is identified as a municipal power in Title 29. (AS 29.33.250)

Sec. 29.35.210. (a) Allows a second class borough to exercise certain powers on a nonareawide basis. Under existing law before a nonareawide power may be exercised, the borough must seek to have it transferred from cities or propose joint borough/city exercise of the power, and the requirement is not contained in this bill. (AS 29.38.020)

(1) No change. (AS 29.48.030(a)(12))

(2) No substantive change. (AS 29.48.020(1))

(3) No change. (AS 29.48.020(2), 29.48.035(a)(5) and (b))

(4) Under existing law this power is subject to the section dealing with garbage and solid waste, sec. 29.35.050 of this bill. (AS 29.48.020(5))

(5) Under existing law providing air pollution control is permitted on an areawide basis only. (AS 29.48.035(a)(18) and (b))

(6) No change. (AS 29.48.020(6), 29.48.035(a)(17) and (b))

(7) Minor rewording. (AS 29.48.020(7))

(8) This is new material.

(9) No change. (AS 29.48.020(8))

(10) No change. (AS 29.48.020(9))

Under existing law a second class borough may exercise the following additional nonareawide powers not specified in this bill:

(1) powers approved at incorporation (AS 29.38.020);

(2) regulate snow vehicles, subject to other law (AS 29.48.020(4));

(3) licensing of day care facilities (AS 29.48.035(a)(20) and (b)).

(b)(1) No change. (AS 29.48.030(12))

(2) No change. (AS 29.48.035(a)(5) and (b))

(3) No change. (AS 29.48.035(a)(18) and (b))

(4) No change. (AS 29.48.035(a)(17) and (b))

(5) No change. (AS 29.48.035(a)(20) and (b))

(c) Allows a second class borough to exercise a nonareawide power not otherwise prohibited by law if the exercise of the power is approved by the voters living in the borough area outside the cities. Under existing law a second class borough may acquire additional nonareawide powers upon approval of the voters. However, the powers which may be acquired are limited to those itemized in Title 29, so under this bill broader authority to acquire powers is provided. (AS 29.38.030, 29.38.040, 29.38.050)

(d) Allows a second class borough to exercise an areawide power not otherwise prohibited by law if the exercise of the power is approved by the voters or transferred by the cities in the borough. Under existing law a borough may acquire only the powers authorized in Title 29. (AS 29.33.250)

Sec. 29.35.220. (a) No substantive change. (AS 29.41.010(c))

(b) No substantive change. (AS 29.41.010(a))

(c) No substantive change. (AS 29.41.010(b))

(d) A third class borough may acquire any power not prohibited by law for exercise in a service area. (AS 29.41.010(b))

Sec. 29.35.250. This expands the authority of the city to exercise powers, since under existing law a city may only exercise listed municipal powers. A city may not exercise a power once that power has been exercised on an areawide basis by the borough. Existing law is in conflict as to whether a city may exercise a power being exercised on an areawide basis by the borough. In one section, existing law provides that the city may not do so, while in another section it provides that a city may exercise the power if the borough by ordinance permits exercise of the power by the city or ceases to exercise the power. (AS 29.33.010(b), 29.43.040(b), 29.48.035(b))

Sec. 29.35.260. (a) A city outside a borough may exercise a power not otherwise prohibited by law. Under existing law, a city

is granted only enumerated powers, so this is a broader authorization. (AS 29.43.010)

(b) Minor rewording. (AS 29.43.030)

(c) Requires a home rule city to provide for planning, platting, and land use regulation but it does not have to comply with Chapter 40. General law cities that provide for land use regulation must do so in accordance with Chapter 40. (AS 29.43.040)

(d) This is new making the section applicable as a home rule limitation. Under existing law material contained in (c) is not a limitation on home rule municipalities.

Sec. 29.35.300. Combines material dealing with the acquisition of areawide and nonareawide powers. (AS 29.33.250, 29.41.010)

Sec. 29.35.310. No change, except for minor rewording for consistent usage. (AS 29.33.260)

Sec. 29.35.320. Provides that a petition shall be filed with the borough clerk who certifies whether it contains sufficient signatures. After certification the assembly orders an election to be held within 60 days of the order, while under existing law, the election is held at least 30 days after the order, but not later than the next regular election. (AS 29.33.270, 29.33.280, 29.33.290(a), 29.38.030, 29.38.040, 29.38.050(a), 29.41.010(b))

Sec. 29.35.330. No change, except for minor rewording to achieve consistent usage. (AS 29.33.290(b) and (c), 29.38.050(b) and (c))

Sec. 29.35.340. Reorganized, but no substantive change. (AS 29.33.290(c))

Sec. 29.35.400. No substantive change. (AS 29.48.310)

Sec. 29.35.410. No substantive change. (AS 29.48.320)

Sec. 29.35.420. No substantive change. (AS 29.48.330)

Sec. 29.35.450. (a) Allows a borough to include a city in a service area if the city council agrees by ordinance or if approval is granted by a majority of voters residing in the city and by a majority of voters residing outside the city, but within the service area boundaries. Existing law is silent as to whether a city may be included within a service area. (AS 29.63.090(a))

(b) No change. (AS 29.63.090(d))

Sec. 29.35.460. No substantive change. (AS 29.63.090(c))

Sec. 29.35.470. No substantive change. (AS 29.63.090(b) and (e))

Sec. 29.35.480. No substantive change. (AS 29.63.090(a) and (e))

Sec. 29.35.490. New material has been added to allow owners of real property within a service area to consent in writing to the exercise of a power if no voters reside within the service area. (AS 29.41.010(b), 29.63.090(a) and (e))

(b) No change. (AS 29.41.010(b), 29.68.010(f))

Sec. 29.35.700. This is new and provides a definition of "power".

CHAPTER 40. PLANNING, PLATTING, AND LAND USE REGULATION.

The word "zoning" has been replaced by the phrase "land use regulation" throughout the title in order to confer broader planning powers on municipalities. The term "land use regulation" allows a municipality to use a variety of planning tools which might not necessarily be regarded as falling within traditional "zoning" practices.

Sec. 29.40.010. The assembly may delegate any of its planning responsibilities to a city if the city consents by ordinance. The assembly may, without obtaining the consent of the city, revoke the power delegated. Under existing law, there is no requirement that a city consent to the delegation of planning power. (AS 29.-33.070)

Sec. 29.40.020. Membership on the planning commission shall be apportioned so that the number of members from home rule and first class cities reflects the proportion of borough population residing in those cities. Under existing law membership is apportioned so that the number of members from first class cities reflects the proportion of borough population residing in first class cities, but the population of home rule cities is not taken into account. The planning commission shall prepare measures necessary to implement the comprehensive plan, while under existing law the planning commission is required to prepare a zoning ordinance to implement the plan. Under this bill, the planning commission has authority to utilize methods other than zoning to implement a plan. (AS 29.33.080(a) and (b))

Sec. 29.40.030. This is reorganized and reworded for clarity. After receiving the recommendations of the planning commission, the assembly is required periodically to undertake an overall review of the plan and update it as necessary. Under existing law, the planning commission is required to undertake an overall

review of the plan at least once every two years and present recommendations to the assembly. (AS 29.33.085)

Sec. 29.40.040. (a) This is substantially new material. It requires the assembly to implement a comprehensive plan through zoning regulations, land use permit requirements, or other methods. The material dealing with "contract zoning" has been eliminated. The list of items for which zoning may be used in AS 29.33.090(b) and (c) has been eliminated. The material contained in AS 29.33.090(e), allowing a business licensed by the Alcoholic Beverage Control Board to continue to operate before the adoption of the zoning ordinance, is eliminated. (AS 29.33.090(a))

(b) No substantive change. (AS 29.33.110(c))

Sec. 29.40.050. (a) Requires the assembly to provide for an appeal from the application of a land use regulation. Under existing law, the board of adjustment hears appeals. (AS 29.33.110(b))

(b) Allows the assembly to provide for the appointment of hearing officers or of a board of adjustment to hear appeals. Under existing law, the assembly is the board of adjustment, but may delegate its functions. (AS 29.33.110(a))

Sec. 29.40.060. (a) Allows for an appeal from a decision dealing with land use regulation. Under existing law, appeals are limited to decisions from the board of adjustment. (AS 29.33.130(a) and (b))

(b) An appeal from a land use regulation is an administrative appeal. The provision in AS 29.33.130(c), that an appeal stays enforcement proceeding unless the court issues an enforcement order, has been eliminated. (AS 29.33.130(d) and (e))

Sec. 29.40.070. Material in paragraph (4) dealing with dedication of rights-of-way and easements is added. (AS 29.33.150(a))

Sec. 29.40.080. This is new material requiring the assembly to establish a platting authority. Under existing law, the planning commission acts as platting authority. The material contained in AS 29.33.150(b) dealing with subdivisions of state land, is eliminated. (AS 29.33.150(a))

Sec. 29.40.090. (a) This is new and requires the assembly to establish an abbreviated plat procedure for plats meeting certain requirements.

(b) Authorizes waiver of plat requirements if a subdivision meets requirements for an abbreviated plat and each lot is five acres or larger. (AS 29.33.170)

Sec. 29.40.100. Rewritten for clarity. (AS 29.33.180)

Sec. 29.40.110. This is rewritten for clarity. Material dealing with filing a preliminary subdivision plat contained in AS 29.33.-160(c) has been eliminated. (AS 29.33.160(a) and (b))

Sec. 29.40.120. Allows a plat to be altered upon petition of the state, the borough, a public utility, or the owners of a majority of the land affected. Existing law allows a plat to be altered only upon petition of the owners of a majority of the land or by the platting board. A platted street may be vacated upon petition of the state, the borough, a public utility, or owners of the majority of the land fronting the portion of the street sought to be vacated. Under existing law, only the municipality or owners of the majority of the land fronting the part of the street sought to be vacated may petition to vacate a street. (AS 29.33.200)

Sec. 29.40.130. Requires the platting authority to publish notice of a hearing for a replat petition. "Published" is defined to require publication once in a newspaper of general circulation or posting in three public places. Under existing law, notice is required to be published once a week for two consecutive weeks. (AS 29.33.210)

Sec. 29.40.140. Rewritten for clarity. (AS 29.33.220)

Sec. 29.40.150. Requires a plat to be acknowledged and filed by the recorder with a certificate that taxes have been paid. (AS 29.33.230)

Sec. 29.40.160. Minor rewording. The material in (a) - (c) has been applied as a home rule limitation. None of this section is a limitation under existing law. (AS 29.33.240)

Sec. 29.40.170. Rewritten for clarity. (AS 29.33.245)

Sec. 29.40.180. A person who violates a land use regulation, condition imposed by a platting authority, or a section of law under the chapter dealing with land use regulation is guilty of a class B misdemeanor. (AS 29.33.190)

Sec. 29.40.190. A civil action may be initiated against a person who violates a section of law of the chapter dealing with land use regulation, a subdivision regulation or a term imposed by the platting authority. An action to enjoin may be brought and the superior court shall grant an injunction upon a finding of violation or threatened violation. In addition, a civil penalty not to exceed $1,000 may be imposed and each day that an unlawful condition continues constitutes a separate violation. Under existing law, a person who transfers land in a subdivision before a plat has been recorded, and a person who records a plat which has not been

approved by the platting board may be punished by a fine of not more than $500. (AS 29.33.190)

Sec. 29.40.200. Made applicable to home rule municipalities. Under existing law only the material contained in (a) of this section is a home rule limitation under AS 29.13.100(39). (AS 29.33.150(b) - (g))

CHAPTER 45. MUNICIPAL TAXATION.

Sec. 29.45.010. Authorizes a municipality to levy a property tax on real or on personal property. The distinction between areawide and nonareawide property taxes as applied to a unified municipality is eliminated. A property tax may be levied in a service area for functions in the service area. Cross-references to the provisions dealing with the taxing power of cities are added. (AS 29.53.010)

Sec. 29.45.020. No substantive change. (AS 29.73.070(a) and (c))

Sec. 29.45.030. Household furniture is exempt from taxation without regard to the value of the furniture. Property of an auxiliary of a nonbusiness organization is exempt. Under existing law, lots supporting and adjacent to a structure used for religious purposes are exempt from taxation. That exemption is eliminated. Property from which income is derived is exempt if used by nonprofit educational groups for classroom space, or by nonprofit religious, charitable or hospital groups. Under existing law, there is some ambiguity as to whether property, other than property used for classroom space, is exempt. An exemption for real property owned as a permanent place of abode by a resident 65 years of age or over may not be granted except upon written application. Under existing law, there is some ambiguity as to whether any exemption may be granted without a written application. One motor vehicle per household owned by a resident 65 years of age or older is exempt. A provision for implementation of a federal tax exemption is included. (AS 29.53.020)

Sec. 29.45.040. No change, except that "Department of Community and Regional Affairs" is replaced by "department". (AS 29.73.060)

Sec. 29.45.050. (a) No change, except "regular or special" is deleted since "election" is defined. (AS 29.53.025(a))

(b) Eliminates the requirement that a tax based upon tonnage not exceed [illegible] dollars a year for a boat of less than five net tons, and not exceed fifteen dollars a year for a boat of more than five tons. The optional exemption of household furniture over five hundred dollars in value has been eliminated since all household furniture is exempted under this bill. (AS 29.53.025(b))

(c) The reference to "weighted" voting is eliminated. (AS 29.53.025(c))

(d) "Act" has been changed to "chapter". (AS 29.53.025(d))

(e) No substantive change. (AS 29.53.025(e))

(f) Minor rewording. (AS 29.53.025(f))

(g) No change. (AS 29.53.025(g))

Sec. 29.45.060. Provides that a farm use greenhouse be assessed on the basis of value for farm use. "Farm use" includes the use of property for raising ornamental plants. (AS 29.53.035)

Sec. 29.45.070. No substantive change. (AS 29.53.040)

Sec. 29.45.080. No substantive change. (AS 29.53.045)

Sec. 29.45.090. Requires all property upon which a tax is levied to be taxed at the same rate during the year. Reorganized and slightly reworded for clarity. (AS 29.53.050)

Sec. 29.45.100. Statutory references are altered to reflect new numbering. (AS 29.53.055)

Sec. 29.45.110. Statutory reference is altered to reflect new numbering. (AS 29.53.060)

Sec. 29.45.120. "Assembly" is replaced by "governing body". (AS 29.53.070)

Sec. 29.45.130. Allows the assessor to seek a court order to compel production of records, as well as to compel entry. (AS 29.53.080)

Sec. 29.45.140. A person who fails to file a tax statement or makes a false tax statement is guilty of a class B misdemeanor. Under existing law, he is guilty of a misdemeanor punishable by a fine of $500 or by imprisonment for up to 30 days or both. (AS 29.53.090)

Sec. 29.45.150. "Assembly" is replaced by "governing body" and "borough" is replaced by "municipality". (AS 29.53.095)

Sec. 29.45.160. Minor rewording. (AS 29.53.100)

Sec. 29.45.170. Minor rewording. (AS 29.53.110)

Sec. 29.45.180. Minor rewording for clarity. (AS 29.53.120)

Sec. 29.45.190. Minor rewording for clarity. (AS 29.53.130)

Sec. 29.45.200. (a) Requires an appointed board to be composed of no less than three persons, and eliminates the requirement that the board consist of the number of members of the assembly above the number required for a quorum. Requires the governing body to establish by ordinance the qualifications for board membership. (AS 29.53.135)

(b) Allows the board to alter an assessment only if an appeal is filed as to that particular lot. (AS 29.53.135)

(c) This subsection is new, allowing an appeal directly to the superior court on the issue of whether property is taxable.

Sec. 29.45.210. Provides that if, upon appeal, a valuation is found to be too low, the board may raise the assessment. An appeal to the superior court shall be tried as an administrative appeal, while under existing law an appellant may demand a jury trial. (AS 29.53.140)

Sec. 29.45.220. No change. (AS 29.53.150)

Sec. 29.45.230. Reassessment is permitted when property is affected by a disaster declared by the President, or by the governor. Under existing law, this section applies only when property is affected by a disaster declared by the President. (AS 29.53.-160)

Sec. 29.45.240. Minor rewording. (AS 29.53.170)

Sec. 29.45.250. Allows a penalty not to exceed 20 percent of the tax due to be added to delinquent taxes and interest at the rate of 15 percent a year to accrue upon unpaid taxes. Under existing law, a penalty not to exceed 10 percent may be added, and interest at the rate of eight percent shall accrue. A penalty not to exceed 20 percent of the tax due may be imposed upon the late return of personal property assessment forms. Under existing law, only 10 percent of the tax due may be imposed. If a taxpayer may pay a tax in two installments, penalty and interest on the unpaid installment accrues from the date the installment becomes due. Under existing law, if the taxpayer does not pay the first half when due, the entire tax becomes delinquent. A penalty of eight percent is added on delinquent taxes until the due date fixed for payment of the second half, and after the due date of the payment of the second half, the penalty may be increased to 10 percent. (AS 29.53.180)

Sec. 29.45.290. No substantive change. (AS 29.53.200)

Sec. 29.45.300. Property taxes, together with penalty and interest are a lien upon the property assessed, while under this section of existing law, only real property taxes are mentioned as a lien upon the property assessed. However, under AS 29.53.220 it is clear that unpaid personal property taxes are also a lien. (AS 29.53.210)

Sec. 29.45.310. If property is sold for more money than needed to satisfy the tax, the municipality is required to remit the excess to the former record owner. A claim for the excess filed after six months is barred. Under existing law, there is no provision for remitting the excess to the former record owner. (AS 29.53.220)

Sec. 29.45.320. Reworded slightly, and the statutory reference is altered to reflect new numbering. (AS 29.53.230)

Sec. 29.45.330. Minor rewording. (AS 29.53.240)

Sec. 29.45.340. "Borough" is altered to "municipality". (AS 29.53.250)

Sec. 29.45.350. "Such" is altered to "the". (AS 29.53.260)

Sec. 29.45.360. Minor rewording, and the statutory reference is altered to reflect new numbering. (AS 29.53.270)

Sec. 29.45.370. "Tract" is altered to "lot". (AS 29.53.280)

Sec. 29.45.380. Minor rewording. (AS 29.53.290)

Sec. 29.45.390. Minor rewording and reorganization. (AS 29.-53.300)

Sec. 29.45.400. The material currently contained in AS 29.-53.310(b), allowing a person holding a lien against part of real property included in a judgment and decree of foreclosure to redeem only that part, has been eliminated. (AS 29.53.310)

Sec. 29.45.410. Receipt of redemption money by the municipality releases the judgment obtained through foreclosure. Under existing law, receipt of redemption by the clerk releases all claims of the municipality to the property. (AS 29.53.320)

Sec. 29.45.420. No change. (AS 29.53.330)

Sec. 29.45.430. No substantive change. (AS 29.53.340)

Sec. 29.45.440. Allows the clerk's designee to publish a redemption period expiration notice. Requires the clerk to send a copy of the notice to holders of liens if the assessed value of property

being foreclosed is over $100,000. Under existing law, notice must be sent if the assessed value is over $10,000. (AS 29.53.350)

Sec. 29.45.450. Minor rewording. (AS 29.53.360)

Sec. 29.45.460. Allows the designee of the clerk to send a copy of the published notice, while under existing law, the clerk is required to send the copy. (AS 29.53.370)

Sec. 29.45.470. Minor rewording. (AS 29.53.375)

Sec. 29.45.480. No substantive change. (AS 29.53.380)

Sec. 29.45.490. "City or borough" is changed to "municipality". (AS 29.53.385)

Sec. 29.45.500. New material is added to this section so that if, in the absence of suit, it becomes obvious to the governing body that judgment for recovery of taxes would be obtained, the municipality shall refund the amount of taxes plus interest. The governing body is permitted to correct manifest clerical errors at any time. (AS 29.53.390)

Sec. 29.45.550. Minor rewording. (AS 29.43.020)

Sec. 29.45.560. Statutory references are altered to reflect new numbering. All sections under existing law which apply to taxes levied by a city apply under this bill as well. Sec. 29.45.250, dealing with rates of penalty and interest; sec. 29.45.460, dealing with disposition and sale of foreclosed property; sec. 29.45.470, dealing with repurchase by record owner; sec. 29.45.490, dealing with payment of taxes upon public utilization; sec. 29.45.500, dealing with refund of taxes have been added as provisions which a city is subject to. (AS 29.53.400)

Sec. 29.45.570. This is new, applying the provisions dealing with property taxes to home rule municipalities as a limitation.

Sec. 29.45.580. Minor rewording. (AS 29.53.405)

Sec. 29.45.590. No substantive change. (AS 29.53.410)

Sec. 29.45.600. This is new material allowing a petition for second class city incorporation to request that a property tax proposal be placed on the same ballot. The petition may request that incorporation be dependent on passage of the property tax. Under existing law, a petition may combine a request for sales and use tax with a request for incorporation, but no provision exists for combining a request for property tax with a request for incorporation.

Sec. 29.45.650. Interest at the rate of 15 percent, rather than eight percent may be charged on delinquent sales and use taxes, and this is made applicable as a home rule limitation. Material in (e) has been added to allow a lien to be placed on the property to secure the payment of a sales and use tax. (AS 29.53.415)

Sec. 29.45.660. Minor rewording. (AS 29.73.070(b) and (c))

Sec. 29.45.670. The requirement that a sales tax proposition be presented only once a year has been eliminated. Material now in AS 29.53.420(b) is deleted. (AS 29.53.420(a))

Sec. 29.45.700. Allows the borough assembly by ordinance to authorize the city to levy and collect sales and use taxes on sources other than the sources being taxed by the borough. Under existing law, a city within a borough may levy sales and use taxes only upon sources taxed by the borough. The provision that a city outside a borough may levy and collect sales and use taxes in the manner provided for boroughs has been added. (AS 29.53.440, 29.53.450)

Sec. 29.45.710. No substantive change. (AS 29.53.460)

CHAPTER 46. SPECIAL ASSESSMENTS.

Sec. 29.46.010. Minor rewording and the statutory reference is altered to reflect new numbering. (AS 29.63.010)

Sec. 29.46.020. A list of procedures which the governing body may prescribe includes procedures relating to creating special assessment districts, making local improvements, levying and collecting assessments, and financing improvements. Under existing law, the governing body is authorized to prescribe the complete special assessment procedure for local improvements. Statutory references are altered to reflect new numbering. (AS 29.63.015)

Sec. 29.46.030. The heading is altered from "DECISION AND NOTICE" to "CREATION OF DISTRICT". Minor rewording. (AS 29.63.020)

Sec. 29.46.040. Minor rewording. (AS 29.63.025)

Sec. 29.46.050. Objections may be filed any time within 60 days after publication of notice. Under existing law, objections to an improvement plan may be filed not less than 30 nor more than 60 days after publication of notice on a date specified by the governing body. Minor rewording. (AS 29.63.030)

Sec. 29.46.060. Minor rewording for clarity. (AS 29.63.040)

Sec. 29.46.070. Requires a new hearing if the assessment is increased as a result of correcting errors and inequalities in the assessment roll. Objections to the increased assessment are limited to record owners of property on which the assessment was increased. Under existing law, there is no provision for an additional hearing if an assessment is increased as a result of correcting errors. (AS 29.63.050)

Sec. 29.46.080. Minor rewording for clarity, and statutory references are altered to reflect new numbering. (AS 29.63.060)

Sec. 29.46.090. Slightly reorganized, and statutory references are altered to reflect new numbering. The section is applicable as a home rule limitation, and is a limitation now under AS 29.13.-100(36). (AS 29.63.065)

Sec. 29.46.100. Minor reorganization and rewording. (AS 29.63.070)

Sec. 29.46.110. (a) This is new material itemizing the costs which may be included in a special assessment.

(b) The total amount of the assessment roll may not exceed actual costs, but actual costs may include reasonable estimates of the costs incurred in connection with issuance of bonds. (AS 29.-63.040(a))

Sec. 29.46.120. Minor rewording and reorganization. (AS 29.63.080)

Sec. 29.46.130. This is new material allowing the governing body to issue notes to secure payment of the costs of a local improvement project. The notes are payable out of special assessments for the improvement and the notes are claims against the assessments.

Sec. 29.46.140. Minor rewording. The last line of AS 29.-63.085(c), providing that interest on the guarantee funds are a cost of the improvement district, is eliminated. (AS 29.63.085)

CHAPTER 47. MUNICIPAL DEBT.

Sec. 29.47.010. Minor rewording. (AS 29.58.010)

Sec. 29.47.020. Minor rewording. (AS 29.58.020)

Sec. 29.47.030. Minor rewording. (AS 29.58.040)

Sec. 29.47.040. Minor rewording. (AS 29.58.050)

Sec. 29.47.080. Minor rewording. (AS 29.58.070)

Sec. 29.47.090. "Assembly or council" is replaced with "governing body". (AS 29.58.080)

Sec. 29.47.100. "Assembly or council" is replaced by "governing body".

Sec. 29.47.110. No substantive change. (AS 29.58.100)

Sec. 29.47.120. Minor rewording. (AS 29.58.110)

Sec. 29.47.130. Minor rewording. (AS 29.58.120)

Sec. 29.47.140. No change. (AS 29.58.130)

Sec. 29.47.180. Minor rewording. (AS 29.58.150)

Sec. 29.47.190. Minor rewording. The reference to a charter is eliminated since this section does not apply as a home rule limitation. (AS 29.58.160)

Sec. 29.47.200. Minor rewording. The last sentence in (b) is added since this subsection applies to home rule municipalities as a limitation. It is currently a limitation under AS 29.13.100(24). (AS 29.58.180)

Sec. 29.47.240. Rewritten for clarity. (AS 29.58.200)

Sec. 29.47.250. Minor rewording. (AS 29.58.205)

Sec. 29.47.260. This is a new section excluding revenue bonds from the application of the prohibition against a political subdivision of the state making a subscription to the capital stock of a corporation, lending its credit for the use of a corporation, or borrowing money for the use of a corporation.

Sec. 29.47.300. Minor rewording. (AS 29.58.240)

Sec. 29.47.310. No substantive change. (AS 29.58.250)

Sec. 29.47.320. "Assembly or council" is replaced by "governing body". (AS 29.58.260)

Sec. 29.47.330. The statutory reference is altered to reflect new numbering and the fact that sections dealing with payment on bonds are combined into one section. (AS 29.58.270)

Sec. 29.47.340. The requirement that refunding bonds be exchanged at par for bonds being refunded is eliminated, so that refunding bonds may be exchanged at the discretion of the governing body. (AS 29.58.280)

Sec. 29.47.390. This contains new material allowing the issuance of revenue bonds to finance any project and to be secured and payable solely from the revenue and property of the project. The city or borough is not obligated to make payments on the bonds from any other sources. (AS 29.58.200(c))

Sec. 29.47.400. Bonds and notes may be sold in the manner and at the price determined by the municipality. Under existing law, no bonds may be sold at less than par value. (AS 29.58.060, 29.58.140, 29.58.300)

Sec. 29.47.410. Minor rewording. (AS 29.58.170, 29.58.210)

Sec. 29.47.420. Allows the interest rate payable on a bond or note to exceed the usury rate. Under existing law, no bond or note may bear an interest which exceeds the contract usury rate. (AS 29.58.310)

Sec. 29.47.430. No substantive change. (AS 29.58.320)

Sec. 29.47.440. Rewritten for clarity. The statutory reference is altered to reflect new numbering. (AS 29.58.340)

Sec. 29.47.450. This is new material providing that the indebtedness of a service area will remain a debt even though a court subsequently determines that the service area was not validly formed under law.

CHAPTER 55. MUNICIPAL PROGRAMS.

Sec. 29.55.010. "General or home rule" is eliminated since "municipality" includes by definition both a general law and a home rule municipality. (AS 29.48.108)

Sec. 29.55.020. The statutory reference to the preceding section is eliminated as unnecessary. (AS 29.48.110)

CHAPTER 60. STATE PROGRAMS.

Sec. 29.60.010. "Local government services" is replaced by "municipal services". (AS 29.88.010)

Sec. 29.60.020. Material in AS 29.88.015(b) is deleted. Since municipal tax resource equalization is organized as an article, rather than a chapter, the statutory reference is added. (AS 29.88.015)

Sec. 29.60.030. Statutory references are added since this material is no longer located in a separate chapter. (AS 29.88.020)

Sec. 29.60.040. Statutory references are added since this material no longer appears as a separate chapter. (AS 29.88.025)

Sec. 29.60.050. Subsection (a), dealing with limitation on use of payments, is a home rule limitation. Under existing law all of the tax equalization program is a home rule limitation under AS 29.13.-100(46). "Assembly or council" is replaced by "governing body". (AS 29.88.030)

Sec. 29.60.060. Statutory references are added, since this material is no longer contained in a separate chapter. The statutory references currently contained in this section are altered to reflect new numbering. (AS 29.88.035)

Sec. 29.60.070. Statutory references are added, since this material is no longer contained in a separate chapter. Statutory references currently contained in this section are altered to reflect new numbering. (AS 29.88.040)

Sec. 29.60.080. Definitions of "department" and "municipality" are eliminated since these are now defined with respect to the entire title. (AS 29.88.045)

Sec. 29.60.100. Statutory references are altered to reflect new numbering. Provision for revenue sharing payable to a "Native village government" is altered to "an unincorporated community". (AS 29.89.010)

Sec. 29.60.110. "Local government" is replaced by "municipality". (AS 29.89.020)

Sec. 29.60.120. Subsections (a) and (c) dealing with distribution and use of money, are home rule limitations. Under existing laws all of the program of aid for miscellaneous services is a limitation under AS 29.13.100(47). (AS 29.89.030)

Sec. 29.60.130. "Borough or city" is replaced by "municipality". (AS 29.89.040)

Sec. 29.60.140. Provides for aid to unincorporated communities rather than to Native village governments. The Department of Community and Regional Affairs shall pay the money to the entity in an unincorporated community most qualified to receive it. No money may be paid to a Native village council unless it waives immunity from suit. If there is no entity in an unincorporated community willing to receive the money, the community receives no entitlement. (AS 29.89.050)

Sec. 29.60.150. The last portion of the section listing possible sources of population data is eliminated. Statutory references are

added, since this material is no longer organized as a separate chapter. (AS 29.89.060)

Sec. 29.60.160. Statutory references are altered to reflect new numbering. Authorizes area cost-of-living differentials to be reflected in payments to volunteer fire departments. (AS 29.89.-070)

Sec. 29.60.170. Statutory references are added, since this material is no longer organized as a separate chapter. The statutory reference currently contained in this section is altered to reflect new numbering. (AS 29.39.080)

Sec. 29.60.180. Statutory references are added, since this material is no longer organized as a separate chapter. (AS 29.89.090)

Sec. 29.60.230. Made applicable as a home rule limitation. (AS 29.90.010, 29.90.030(3))

Sec. 29.60.240. Statutory references are added, since this material is no longer organized as a separate chapter. The statutory reference currently contained in this section is altered to reflect new numbering. (AS 29.90.020)

Sec. 29.60.280. The statutory references currently contained in this section are altered to reflect new numbering. (AS 29.95.010)

Sec. 29.60.290. The statutory references currently contained in this section are altered to reflect new numbering. (AS 29.95.020)

Sec. 29.60.300. The statutory references currently contained in this section are altered to reflect new numbering. (AS 29.95.030)

Sec. 29.60.350. Administration of the municipal assistance fund is transferred from the Department of Revenue to the Department of Community and Regional Affairs. (AS 43.20.016(a))

Sec. 29.60.360. No substantive change. (AS 43.20.016(b))

Sec. 29.60.370. No substantive change. (AS 43.20.016(c) and (d))

Sec. 29.60.800. No substantive change. (AS 29.89.100(2) and (3), 29.90.030(2) and (4))

CHAPTER 65. GENERAL GRANT LAND.

Sec. 29.65.010. No change. (AS 29.18.201)

Sec. 29.65.020. No substantive change. (AS 29.18.202)

Sec. 29.65.030. Minor rewording. (AS 29.18.203)

Sec. 29.65.040. The statutory references currently contained in this section are altered to reflect new numbering. (AS 29.18.204)

Sec. 29.65.050. The statutory references to repealed sections are deleted as unnecessary in (a). The statutory references contained in this section are altered to reflect new numbering. (AS 29.18.-205)

Sec. 29.65.060. Statutory references are altered to reflect new numbering. (AS 29.18.206)

Sec. 29.65.070. No substantive change. (AS 29.18.207)

Sec. 29.65.080. Reworded for clarity. The statutory references contained in this section are altered to reflect new numbering. (AS 29.18.208)

Sec. 29.65.090. "Any" is changed to "a". (AS 29.18.209)

Sec. 29.65.100. The statutory reference contained in this section is altered to reflect new numbering. (AS 29.18.210)

Sec. 29.65.110. The statutory reference contained in this section is altered to reflect new numbering. (AS 29.18.211)

Sec. 29.65.120. Since this material is now organized in a separate chapter, the statutory reference to the sections dealing with general grant land is eliminated. (AS 29.18.212)

Sec. 29.65.130. Since this material is now organized in a separate chapter, the statutory reference is eliminated. The definition of "municipality" is eliminated since that term is now defined for the entire title. (AS 29.18.213)

Sec. 29.65.140. This is a new section indicating that the chapter dealing with general grant land applies to home rule municipalities as well as to general law municipalities. This material is not a home rule limitation under existing law.

CHAPTER 71. GENERAL PROVISIONS.

Sec. 29.71.010. No substantive change. (AS 29.73.030)

Sec. 29.71.020. This is a new section providing that dedication of rights of way or other areas for public use does not require the municipality to maintain, improve, or provide for municipal services in the area dedicated and does not impose any liability on the municipality for the condition of the area dedicated. The section is applicable to home rule municipalities.

Sec. 29.71.030. No substantive change. (AS 29.73.040)

Sec. 29.71.800. The following definitions are added or changed from existing law:

(1) "areawide" is defined to include cities in the borough. (AS 29.78.010(18))

(2) this is added;

(3) includes home rule as well as general law boroughs; (AS 29.78.010(1))

(4) includes home rule as well as general law cities; (AS 29.78.010(2))

(5) this is added;

(7) this is added;

(8) this is added;

(9) "election" includes both regular and special municipal elections, but does not include a state election; (AS 29.78.-010(7))

(10) this is added to refer to either a borough or city legislative entity;

(13) "municipality" includes a home rule or general law borough, city, or unified municipality, while the existing definition includes only general law municipal corporations; (AS 29.78.010(8))

(14) "nonareawide" includes the area of a borough outside cities in the borough, while under existing law "nonareawide power" is defined; (AS 29.78.010(19))

(15) "owner" or "record owner" means the owner of record shown in the records of the district recorder; (AS 29.-78.010(9))

(20) minor rewording; (AS 29.78.010(14))

(21) this has been added;

(23) subparagraph (A) has been reworded and (B) is new; (AS 29.78.010(16))

(24) this has been added; and

(25) a person qualified to vote in municipal elections under the applicable statute is a "voter". (AS 29.78.010(17))

The definition of "conditional use" has been eliminated. (AS 29.-78.010(3))

* Sec. 18. A definition of "municipality" is added for all Alaska Statutes.

* Sec. 20. The statutory references are altered to reflect new numbering. References to merger and consolidation are eliminated as unnecessary.

* Sec. 21. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 22. The statutory references are altered to reflect new numbering.

* Sec. 23. Reworded to delete incorrect statutory references.

* Sec. 24. References to third class boroughs have been eliminated. Subsection (b) has been added containing material currently made applicable by the reference to third class boroughs.

* Sec. 25. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 26. The statutory references are altered to reflect new numbering.

* Sec. 27. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 28. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 29. The statutory references are altered to reflect new numbering.

* Sec. 30. The statutory references are altered to reflect new numbering.

* Sec. 31. The statutory references are altered to reflect new numbering.

* Sec. 32. The statutory references are altered to reflect new numbering.

* Sec. 33. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 34. The statutory references are altered to reflect new numbering.

* Sec. 35. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 36. The statutory references are altered to reflect new numbering.

* Sec. 38. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 39. Minor rewording for consistency.

* Sec. 40. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 41. The statutory references are altered to reflect new numbering.

* Sec. 42. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 43. Minor rewording. Incorrect statutory references are deleted.

* Sec. 44. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 45. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 46. The statutory reference is deleted as unnecessary.

* Sec. 47. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 48. The statutory references are deleted as unnecessary.

* Sec. 49. The statutory references are deleted as unnecessary.

* Sec. 50. The statutory reference is altered to reflect new numbering.

* Sec. 51. The statutory references are altered to reflect new numbering. Some references are eliminated as unnecessary. "Former" is added before citations to sections repealed in this bill.

* Sec. 52. The statutory references are altered to reflect new numbering. "Former" is added before citations to sections repealed in this bill.

* Sec. 53. The word "former" is added before the statutory citation because those sections are repealed in this bill.

* Sec. 54. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 55. "Former" is added before citations to sections previously repealed.

* Sec. 56. Minor rewording. The statutory reference is altered to reflect new numbering.

* Sec. 57. Minor rewording. The statutory reference is deleted as unnecessary.

* Sec. 58. Minor rewording. The statutory references are altered to reflect new numbering.

* Sec. 59. The statutory references are altered to reflect new numbering. "Former" is added before citations to sections repealed in this bill.

* Sec. 60. The statutory reference is deleted as unnecessary.

* Sec. 61. The statutory references are altered to reflect new numbering.

* Sec. 62. This is new material that precludes a municipality from regulating utilities exempt from regulation by the Alaska Public Utilities Commission, except for certain municipally owned utilities.

* Sec. 63. The statutory references are altered to reflect new numbering.

* Sec. 64. The statutory references are altered to reflect new numbering.

* Sec. 65. The statutory references are altered to reflect new numbering.

* Sec. 66. The statutory references are altered to reflect new numbering.

* Sec. 67. The statutory references are altered to reflect new numbering.

* Sec. 68. The statutory references are altered to reflect new numbering.

* Sec. 69. Minor rewording. The statutory references are deleted as unnecessary.

* Sec. 70. The statutory references are deleted as unnecessary.

* Sec. 71. Adds new sections dealing with borough feasibility studies. Authorizes the commissioner of community and regional affairs to contract for a study requested by a person residing in the area to be studied. Sets out requirements for the contract and what a study must include.

* Sec. 72. The statutory reference is altered to reflect new numbering.

* Sec. 73. The statutory reference is altered to reflect new numbering.

* Sec. 74. The statutory reference is altered to reflect new numbering.

* Sec. 75. The new statutory reference is inserted and "former" added before the citation to a section repealed by this bill.

* Sec. 76. The new statutory references are inserted and "former" added before citations to sections repealed by this bill.

* Sec. 77. The statutory references are altered to reflect new numbering.

* Sec. 78. The statutory reference to a repealed section is deleted and language inserted to take the place of the deleted reference.

* Sec. 79. The statutory references are altered to reflect new numbering.

* Sec. 80. The statutory references are deleted as unnecessary.

* Sec. 81. The statutory references are altered to reflect new numbering.

* Sec. 82. The statutory references are deleted as unnecessary.

* Sec. 83. The statutory references are altered to reflect new numbering.

* Sec. 84. All of Title 29 is repealed except for AS 29.03.010 and AS 29.03.020. Additional provisions are repealed to reconcile this bill with other titles.

* Sec. 85. A right or liability of a municipality in existence on the effective date of this Act is not affected by this Act. Ordinances and regulations in effect on the effective date of this Act remain in effect unless they conflict with a provision of this Act. If an ordinance or regulation conflicts, it remains in effect for 180 days. The terms of elected or appointed municipal officials are not affected by the Act and their terms expire as they would have before the effective date of this Act.

* Sec. 86. The chapter on taxation is retroactive to January 1, 1983, the beginning of the tax year.

* Sec. 87. An immediate effective date is provided for the retroactive clause and the chapter on taxation.

* Sec. 88. The rest of the Act takes effect July 1, 1983.

In addition to the material already noted as having been deleted from this bill, the following sections have been eliminated entirely:

AS 29.18.202 (determination of entitlement for cities);

AS 29.18.220 - 29.18.460 (development cities);

AS 29.18.510 - 29.18.610 (Capital City Incorporation Act);

AS 29.23.395 - 29.23.401 (involvement of young people in local government);

AS 29.23.470 (appointment of temporary or new manager);

AS 29.28.220 (election procedure);

AS 29.33.120 (adjustment procedure);

AS 29.43.100 - 29.43.110 (curfews)

AS 29.45.480 (proceeds of tax sale);

AS 29.48.070 (hearing for regulation of utilities rates);

AS 29.48.080 (right to participate and compel testimony);

AS 29.48.090 (further proceedings);

AS 29.48.100 (application);

AS 29.48.250 (centralized purchasing);

AS 29.53.030 (mining claims);

AS 29.58.220 (payment);

AS 29.58.315 (bond attorneys, bond and financial consultants);

AS 29.58.345 (bonded indebtedness for school construction);

AS 29.58.350 (bond guarantee fund).

TBC:ljb

HB 172

was read the first time and referred to the Community & Regional Affairs and the Judiciary Committees.

HB 172 was accompanied by a fiscal note which appears in House Journal Supplement No. 4, and the following letter:

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill revising the municipal code (AS 29). By our using the data base prepared by the Legislative Affairs Agency, this bill is identical to the bill introduced this session as Senate Bill No. 1, except for the correction of a typographical error (page 35, line 5 -- "overridden"), the justification of the right-hand-margin on several pages, and 11 rather technical changes that are described below. The bill was modeled on the bill approved last session by the House Finance Committee as HCS CSSB 180 (Fin). A detailed section-by-section analysis of SB 1 is being prepared by the Legislative Affairs Agency.

The bill does not contain any of the provisions which were criticized by Governor Hammond in his July 15, 1982 veto message for HCS CSSB 180(Jud) am H. See 1982 Senate Journal, pages 1788 -- 1792. This bill makes many non-controversial improvements to our municipal code and I urge its prompt consideration and passage. It is my hope that the AS 29 issues on which last year's amendments created such a controversy will be addressed by separate legislation so that this needed code revision is not once again delayed.

For your convenience in comparing SB 1 and this bill, here is a list of the 11 changes from SB 1 which are contained in this bill (with page and line numbers referring to SB 1):

1. page 8, line 26 -- following "council" the phrase "in a first class city" is added;

2. page 11, line 1 -- between the words "city" and "incorporated," the phrase "in the unorganized borough" is added;

3. page 29, line 8 -- following the first use of "commission," the phrase "of seven elected members" is added;

HB 172

4. page 29, lines 14 and 15 -- following "shall be" on line 14, the phrase "prepared by the petitioners and" is added and the word "incorporation" is deleted; following "petition" on line 15, the phrase "to incorporate a home rule municipality" is added;

5. page 62, line 3 -- a sentence to read "The runoff election shall be between the two candidates receiving the greatest number of votes for the seat." is added to sec. 29.26.060(c);

6. page 63, lines 7 and 26, and page 64, line 15 -- replace the words "bill" and "Act" with the phrase "ordinance or resolution";

7. page 82, line 18 -- following "emergency," the word "services" is added, and following "center," the phrase "under AS 29.35.130" is added;

8. page 85, lines 4 and 5 -- subsection (c) is amended as follows:

(c) A third class borough acquires an additional power to exercise in a service area in accordance with AS 29.35.490(b) and (c) [AREAS BY HOLDING AN ELECTION ON THE QUESTION IN WHICH EACH PERSON WHO IS A VOTER OF THE BOROUGH MAY VOTE].

9. page 106, line 8 -- the first sentence of sec. 29.45.040(b) is amended as follows:

(b) For purposes of determining payments to eligible persons, the department shall calculate at the rate of one percent per mill a property tax equivalent percentage for each municipality that levies a property tax [AT THE RATE OF ONE PERCENT PER MILL].

10. page 161, line 20 -- "29.60.120" is replaced with "29.60.130;"

11. page 182, line 1 -- following "general law," the phrase "first or second class" is deleted.

Sincerely,

Bill Sheffield

MEMORANDUM February 24, 1983

SUBJECT: Recall of municipal officials
(Work Order No. 13-0837)

TO: Representative Barbara Lacher

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked what the responsibility of the clerk is in reviewing recall petitions for sufficiency.

What a recall petition must contain and the method of determining the sufficiency of a petition depends on the specific statute involved and these types of laws vary from state to state. Some statutes require only a general statement of the grounds for recall and an official may be recalled for purely political reasons. However, other statutes require grounds for recall that are more than simple disagreement with matters of policy and the grounds stated must actually constitute misfeasance, malfeasance or nonfeasance in office. McQuillan, Municipal Corporations, vol. 4, sec. 12.251b: Noel v. Oakland County Clerk, 284 N.W.2d 761 (Michigan 1979); Bent v. Ballantyne, 368 S.2d 351 (Florida 1979); Tolar v. Johns, 147 S.2d 196 (Florida 1962); Jacobsen v. Nagel, 96 N.W.2d 569 (Minnesota 1959).

Where petitioners are required to state only general grounds, the recall petition need not state the cause for removal with the same particularity as where the requirement is that reasons for removal be stated clearly. The purpose of a general statement of grounds is to furnish information to electors upon which a political and not a legal issue may be raised. Under statutes providing that a statement of grounds for recall is for the information of the electors, the question of the sufficiency of those grounds is also for the electors, but under provisions authorizing recall for malfeasance or similar language, the sufficiency of the grounds provided is a legal question. 63 Am. Jur.2d, Public

Officers and Employees, sec. 245; Pybus v. Smith, 141 P. 203 (Washington 1914).

Statutory provisions as to recall are to be liberally construed in favor of the electorate's right to exercise recall. Hazelwood v. Saul, 619 P.2d 199 (Colorado 1980). Under this principle and in the absence of statutory language limiting the recall to specific, indicated reasons, the adequacy of grounds stated in a petition is treated as a political matter and courts refuse to enjoin recall petitions on complaints that charges are insufficient. However, where recall is limited to specified grounds of malfeasance or similar language it is generally held that

> . . . petitions are inadequate when they indicate only disagreement on matters of policy or political criticism. Antieau, Municipal Corporation Law, sec. 22.200, pages 22-304 - 22-305.

The officer designated to ascertain the sufficiency of a petition in a particular statute may be required to determine legal sufficiency rather than matters of form only. Unless an appeal is specifically provided for, the officer's determination as to sufficiency of a recall petition is final and subject only to judicial correction if the determination is capricious, arbitrary, or plainly erroneous as a matter of law. McQuillan, supra., vol. 4, sec. 12.251(d); Hold v. Trantham, 575 S.W.2d 83 (Texas 1979).

Article XI, section 8 of the Constitution of the State of Alaska provides:

> All elected public officials, in the State, except judicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedure and grounds for recall shall be prescribed by the legislature. (Emphasis added)

In carrying out this constitutional responsibility the legislature has provided under AS 29.28.140 that misconduct in office, incompetence, and failure to perform prescribed duties are the grounds for recall. In addition, under AS 29.28.150(a)(3), a petition for recall must contain ". . . a statement of the grounds of the recall stated with particularity as to specific instances". (Emphasis added)

The municipal clerk is required to review the petition ". . . for content and signatures . . ." under AS 29.28.160.

These statutory provisions dealing with recall have not been judicially construed by the Supreme Court in this state, so it cannot be determine with certainty whether the clerk is required to review the petition for signatures and form only or whether the clerk must determine as a legal matter whether the specific instances set out in a petition, if true, constitute misconduct in office, incompetence or failure to perform prescribed duties. Under the principles set out previously in this memorandum it appears that the clerk is required to determine whether the specific instances set out support a claim of misconduct in office, incompetence or failure to perform prescribed duties because AS 29.28.150 demands more than just a general statement of the grounds for recall and does not specifically indicate that the stated grounds are for the information of the voters only.

Under both versions of the bill revising Title 29, SB 1 and HB 172, the grounds for recall remain unchanged although the procedure for recall has been substantially changed. Nevertheless, an applicant for a recall petition under Sec. 29.26.260(a)(3) is still required to set out the grounds ". . . with particularity". The clerk must prepare a recall petition only if the clerk determines that the application for the petition meets the requirements of AS 29.26.260, including the requirement that grounds be ". . . stated with particularity" (Sec. 29.26.280). After a petition is filed the clerk must again determine whether the petition is sufficient and, if insufficient, ". . . identify the insufficiency and notify the sponsors. . ." (Sec. 29.-26.290). It seems clear that since the clerk must identify the insufficiency, a determination of sufficiency is not limited to review of signatures, even though (b) and (c) of the section only provide for correcting a petition insufficient for lack of signatures. It appears under these sections that the clerk would still be required to determine whether the grounds stated, if true, actually constitute misconduct in office, incompetence, or failure to perform prescribed duties.

I believe that this interpretation conforms to the intent of the policy committee that produced the original version of a Title 29 revision bill. There was considerable discussion of the recall provisions by that committee and at one point

the committee considered requiring only a general statement of reasons for recall and allowing recall to proceed upon purely political grounds. It was even suggested that grounds for recall be eliminated entirely. That approach was specifically rejected by the committee. Consequently, I would recommend that HB 172 be amended to clearly reflect the fact that the clerk is to review a recall petition for form and signatures only, and not to determine whether grounds stated actually constitute misconduct in office, incompetence, or failure to perform prescribed duties, if that is the result intended by the legislature.

RE: House Bill 172 amendment 6

The attached letter of intent and proposed language for implementation was prepared during hearings of SB 1, comparison legislation to HB 172.

Present law requires first class and home rule cities in the unorganized borough to accept the responsibility for delivery of Educational services. It is perceived that the requirement to be responsible for educational services may be a deterrant to certain cities or areas to organizing or upgrading to first class or home rule status. The opposition for a city to assume the educational powers could come either from an existing REAA or the city.

The proposed change to HB 172 would resolve the issue of the assumption of education powers by vote of the residents in the city and in the REAA.

LETTER OF INTENT
TO CSSB 1

February 24, 1983

It is the intent of the Senate Community and Regional Affairs Committee that the assumption of the education power by newly formed or upgraded first class or home rule cities be dependent upon a vote in the existing Regional Education Attendance Area. If the vote both within the city and in the remainder of the REAA was not in favor of the city assuming the education power, it would not.

This Letter of Intent was discussed and unanimously approved by the Senate C & RA Committee. The attached page labelled "Proposed Amendment #10" is what the committee members had in front of them when the Letter of Intent was endorsed. The longer attached amendment, drafted by Legal Services, represents all of the actual changes that need to be made to SB 1 to carry out the Letter of Intent.

Though the committee strongly endorses this concept it was felt the full amendment should be available for review before it was adopted, which is why this method of presentation was followed. The Community and Regional Affairs Committee urges the Finance Committee to incorporate the intent of the attached proposed Amendment #10 into SB 1.

RE: House Bill 172 amendment 7

During Committee review of HB 172 there was discussion but no apparent concensus concerning the exemption of greenhouses from assessement at full valuation for taxation purposes (Page 109, line 22).

The existing law does not give special treatment for greenhouses. The intent of providing special tax treatment for farm lands (not including barns, houses, sheds, etc.) was to assist the farmer in resisting the pressures of urban growth rather than being forced to subdivide farm land because of inflated land values. The effect of the new language is to provide a special tax treatment for greenhouses, including commercial greenhouses raising ornimental flowers.

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "develcped" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation.

Matanuska-Susitna Borough
BOX B, PALMER, ALASKA 99645 • PHONE 745-4801
BOROUGH ATTORNEY'S OFFICE

April 6, 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: HB 172 "DEVELOPED" DEFINITION

The present version of HB 172 provides for a tax exemption as required by 43 U.S.C. 16.20(d) for certain Native lands. This exemption provides a definition of "developed" for implementing the federal law. I recommend that this matter be treated in a separate bill rather than in HB 172 or SB 1, the parallel bills intended as housekeeping measures to revamp Title 29.

During the last legislative session certain amendments were made to the Title 29 bill on the House floor which caused a great deal of controversy. In re-introducing the Title 29 in the present legislature, all of these amendments were removed except for the provisions for implementing the tax exemptions under 43 U.S.C. 16.20(d). This amendment was incorporated in AS 29.45.030 of the bill.

Pursuant to federal law, certain Native lands are not taxable until "developed". The intent of the proposed definition in AS 29.45.030 is to clarify what improvements of land will constitute "development" for tax exemption status.

I believe that the intent of this section is to assure that lands will not be taxed simply because an access road is constructed to the property or improvements are placed on the property in anticipation of future development. However, the language is sufficiently ambiguous to permit the interpretation that even a regular, residential or commercial subdivision development would not be taxable until the lots were sold. Once land is subdivided, roads are constructed and other improvements are put in place, the available lots become the sale inventory of the real estate developer. An exemption from taxation of these lots would give the exempted developer an unfair advantage over other developers with which it was in competition.

Because this provision is not in existing Title 29 and because there is potential controversy involved, I recommend that

it not be included in HB 172, a housekeeping bill. As a separate bill, I believe that the Borough would support a definition between a taxable subdivision development and tax exempt lands which have been surveyed and have constructed roads.

Sincerely,

Steven H. Morrissett
Borough Attorney

Bob Harris
House Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

FILE: HB 172

SUBJECT: Substitute Utility Language
for Title 29 Revision

Dear Bob:

If the House Community and Regional Affairs Committee would like to consider alternative language to that which has been proposed for the utilities section of the Title 29 revision, may I suggest the following. This language, I believe, accommodates the interests of the municipalities and of the utilities. It would exempt from municipal regulation those utilities, including co-ops, which have elected to exempt themselves from APUC regulation by a vote of the subscribers or members. It would also exempt from municipal regulation those small electric, telephone and garbage utilities which are presently exempt from APUC regulation but which may come under APUC regulation if 25% of the subscribers petition the commission for regulation. In addition, it would exempt from municipal regulation those utilities which the APUC itself exempts upon a finding of no legitimate public interest in regulation if the commission also finds that the utility should also be exempt from municipal regulation. If cable TV is given an exemption from APUC regulation, and the legislature believes that it should also be exempt from municipal regulation, a simple amendment to the following language making reference to the statute exempting cable TV would extend the exemption to municipal regulation of cable TV also. The substitute language would be as follows:

> AS 29.35.070 PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service and may fix, establish and change the rates and charges imposed for a utility service provided to the municipality or its inhabitants by a utility except as provided in (b).
>
> (b) A municipality may not regulate a utility
>
> (1) to the extent it is subject to regulation under AS 42.05; or

(2) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(d) if the commission finds that no legitimate public interest will be served by regulation by the commission or a municipality; or

(3) exempt from Alaska Public Utility Commission regulation under AS 42.05.711(e), (f), (g), (h) or (i); or

(4) specifically exempted by law from municipal regulation.

(c) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(d) Unless the utility is owned by the regulating municipality, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality which sets forth the procedures for regulating service and establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee the utility due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(e) This section applies to home rule and general law municipalities.

Sincerely,

Gerald L. Sharp
City/Borough Attorney

FROM: Staff

DATE: April 25, 1983

RE: House Bill 172 proposed amendment number 9

The attached amendment proposed by representatives of utility companies is a significant change from present law.

The net effect of the amendment is to prohibit municipalities from regulating utilities unless the type of regulation proposed or the particular utility is also subject to regulation by the Alaska Public Utilities Commission. Stated in another way, if the Alaska Public Utilities Commission does not or can not regulate a utility or a matter pertaining to a utility, then a municipality may not impose a regulation.

Present law provides municipalities the power to regulate utilities and matters pertaining to utility services to the extent the utilities are not regulated by the Alaska Public Utility Commission.

In several instances, the regulation of a condition of service by a utility company, or the regulation of a utility company is optional for the Public Utilities Commission, or optional for the utility.

In cases where utilities are not regulated by the Alaska Public Utilities Commission, Municipalities generally feel they need to have the authority to exercise regulatory powers. On the other hand, utility companies believe that; if the Alaska Public Utility Commission does not regulate them, then the municipalities should not have the authority to provide regulation.

"Sec. 29.35.070. PUBLIC UTILITIES. (a) The assembly acting for the area outside all cities in the borough and the council acting for the area in a city may regulate the service, and may fix, establish, and change the rates and the charges imposed for a utility service provided to the municipality or its inhabitants by a utility except to the extent

(1) the utility is subject to regulation under AS 42.05; or

(2) municipal regulation is prohibited by AS 42.05.711(k) or otherwise specifically prohibited by law.

(b) The municipality may provide for a reasonable deposit for meters and service to be given if interest is paid on the deposit.

(c) Unless the utility is owned by the municipality that is regulating it, all rates, charges and regulations established under this section shall be established as provided by an ordinance of the municipality establishing

the procedures for regulating service and procedures for establishing and changing the rates and charges of the utility. The ordinance shall provide for notice, hearing and other procedures necessary to guarantee due process. The rates and charges established shall be reasonable and shall permit a fair return on invested capital.

(d) This section applies to home rule and general law municipalities.

Page 77, after line ~~19~~ 22, insert:

"Sec. 29.35.075. DISPUTES AND CONFLICTS WITH STATE CERTIFICATED UTILITIES. (a) A dispute as to the reasonableness of the fees for or the terms, conditions, or exceptions to a permit for a utility certificated under AS 42.05 to use municipal streets, alleys or other public ways of the municipality shall be decided under AS 42.05.251.

(b) In case of a conflict between the provisions of AS 29.35.070 or AS 42.05 or an action taken under either as to the regulation of service, rates or charges of a utility, the provisions of AS 42.05.641 apply.

(c) This section applies to home rule and general law municipalities.

Page 195, after line ~~19~~ 22, insert:

"*Sec. 62. AS 42.05.711 is amended by adding a new subsection to read:

delete [(k) Except for municipally owned and operated utilities subject to (b) of this section, municipalities may not regulate utility services, including but not limited to rates, terms and conditions of services, provided by a person, utility or cooperative that is exempt from regulation under AS 42.05.711."

Renumber following sections accordingly.

Lee Sharp
City-Boro Attorney Juneau.

Chugach Elec. Ass'n, Sup. Ct. Op. No. 1636 (File Nos. 2969, 2993), 580 P.2d 687 (1978); B-C Cable Co. v. City of Juneau, Sup. Ct. Op. No. 2112 (File No. 4587), 613 P.2d 616 (1980).

Sec. 42.05.711. Exemptions. (a) The provisions of AS 42.05.010 — 42.05.721 do not apply to a person who furnishes water, gas or petroleum or petroleum products by tank, wagon, or similar conveyance, unless the person is thereby supplying water, gas, petroleum or petroleum products to a public utility in which he has an "affiliated interest."

(b) Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with any other utility, are exempt from the provisions of AS 42.05.010 — 42.05.721, other than the provisions of AS 42.05.221 — 42.05.281, unless the owner and operator elects to be subject to all provisions of AS 42.05.010 — 42.05.721.

(c) The ownership in whole or part, of the corporate stock of a public utility does not make the owner a public utility.

(d) The commission, on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of AS 42.05.010 — 42.05.721.

(e) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, any electric or telephone utility that does not gross $50,000 annually is exempt from regulation under AS 42.05.010 — 42.05.721 unless 25 percent of the subscribers petition the commission for regulation.

(f) Notwithstanding any other provisions of AS 42.05.010 — 42.05.721, an electric or telephone utility that does not gross $325,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(g) A utility, other than a telephone or electric utility, that does not gross $100,000 annually may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721 other than AS 42.05.221 — 42.05.281 under the procedure described in AS 42.05.712.

(h) A cooperative organized under AS 10.25.010 — 10.25.650 may elect to be exempt from the provisions of AS 42.05.010 — 42.05.721, other than AS 42.05.221 — 42.05.281, under the procedure described in AS 42.05.712.

(i) A utility which furnishes collection and disposal service of garbage, refuse, trash, or other waste material and has annual gross revenues of $200,000 or less is exempt from the provisions of this chapter, other than the certification provisions of AS 42.05.221 — 42.05.281,

unless 25 percent of the subscribers or subscribers representing 25 percent of the gross revenue of the utility petition the commission for regulation.

(j) The provisions of this chapter do not apply to sales, exchanges or gifts of energy to an electric utility certificated under AS 42.05.010 — 42.05.721 when the energy which is the subject of the sale, exchange or gift is waste heat, electricity, or other energy which is surplus or the by-product of an industrial process. In an area in which no electric utility is certificated for service, energy provided by sale, exchange or gift may be provided to any utility which is certificated for service to that area. A contract for the sale, exchange or gift of energy exempt under this subsection does not make the supplier a public utility, and does not transfer the responsibility to provide utility services from a certificated utility to any other person. (§ 6 ch 113 SLA 1970; am § 3 ch 76 SLA 1973; am § 8 ch 83 SLA 1980; am §§ 7-9 ch 136 SLA 1980; am § 89 ch 59 SLA 1982)

Revisor's notes. — As enacted by chs. 83 and 136, SLA 1980, present subsections (j) and (i) were designated as subsections (f) and (j), respectively, but were redesignated by the revisor of statutes pursuant to AS 01.05.031(b). Former subsection (i) of this section was transferred as § 13, ch. 136, SLA 1980 to the 1980 Temporary and Special Acts and Resolutions by the revisor of statutes pursuant to AS 01.05.031(b).

Effect of amendments. — The first 1980 amendment added subsection (j).

The second 1980 amendment deleted "excepting the furnishing of collection and disposal service of garbage, refuse, trash or other waste material" following "none of whose utilities" near the beginning of subsection (b), deleted the former second sentence in subsection (b), which read: "Notwithstanding any other provisions of this chapter, municipalities providing collection and disposal service of garbage, refuse, trash or other waste material within their corporate boundaries are not subject to regulation by the Alaska Public Utilities Commission unless the municipality elects to be subject to the provisions of this chapter," substituted "$50,000" for "$25,000" following "does not gross" near the middle of subsection (e), substituted "under this chapter" for "hereunder" following "exempt from regulation" near the middle of subsection (e), and added subsections (f) through (i).

The 1982 amendment, effective May 28, 1982, deleted "on June 30, 1980" preceding "a utility," and inserted "annual" preceding "gross revenue" in subsection (i).

Editor's notes. — Section 13, ch. 136, SLA 1980, as revised by the revisor of statutes, provides: "Cable television systems are exempt from the provisions of AS 42.05 [AS 42.05.010 — 42.05.721], other than the provisions of AS 42.05.221 — 42.05.281, until July 1, 1983. This exemption does not apply in cities or villages which have a population of less than 3,500 people and which are not located on a state road or marine highway. The effects of the exemption of cable television systems from rate regulation by the Alaska Public Utilities Commission provided in this section shall be reviewed by the legislature before July 1, 1983. If the legislature fails to extend the exemption before July 1, 1983, this section is repealed on that date and cable television systems lose their exempt status on that date and become subject to regulation by the Alaska Public Utilities Commission."

Opinions of attorney general. — An electrical utility owned and operated by a regional electrical authority would continue to qualify for the broad exemption from this chapter, available to political subdivisions under subsection (b) of this section once the regional electrical authority had completed its proposed organization as a nonprofit corporation pursuant to AS 10.20.005 et seq. June 7, 1976, Op. Att'y Gen.

LAWS OF ALASKA

1983

Source

CSSB 85(Fin)

Chapter No.

95

AN ACT

Amending or repealing provisions related to state aid for health facilities, certificate of need, Medicaid and general relief medical assistance; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 11

UNDERLINED MATERIAL INDICATES TEXT THAT IS BEING ADDED TO THE LAW AND BRACKETED MATERIAL IN CAPITAL LETTERS INDICATES DELETIONS FROM THE LAW; COMPLETELY NEW TEXT OR MATERIAL REPEALED AND RE-ENACTED IS IDENTIFIED IN THE INTRODUCTORY LINE OF EACH BILL SECTION.

Approved by the Governor: July 25, 1983
Actual Effective Date: July 26, 1983

AN ACT

Amending or repealing provisions related to state aid for health facilities, certificate of need, Medicaid and general relief medical assistance; and providing for an effective date.

* Section 1. AS 18.07.031 is amended to read:

Sec. 18.07.031. CERTIFICATE OF NEED REQUIRED. No person may make an expenditure of $1,000,000 or more for any of [UNDERTAKE] the following unless authorized under the terms of a certificate of need issued by the office:

(1) construction of a health care facility;

(2) alteration of the bed capacity of a health care facility; or

(3) addition or elimination of a category of health services provided by a health care facility.

* Sec. 2. FINDINGS AND DECLARATION OF POLICY. The legislature acknowledges the need to pay health facilities for services provided to beneficiaries of state programs at a level that will meet the proportionate share of the total financial requirements of the facilities that are attributable to those programs given prudent and cost-effective management and operation of such facilities. The legislature finds that, because Medicaid is a joint state and federal program and because federal Medicaid funds have been and are likely to continue to be reduced dramatically, a retrospective payment system no longer serves as an appropriate method of compensation,

nor does it respond with appropriate flexibility to continued federal cutbacks. A prospective payment system is necessary to prudently address payments to health facilities under the Medicaid and general relief medical assistance programs.

* Sec. 3. AS 47.07.070 is repealed and reenacted to read:

Sec. 47.07.070. PAYMENT TO HEALTH FACILITIES. (a) The commission shall determine prospectively the rate of payment to a health facility under this chapter and AS 47.25.120 - 47.25.300 based on a fair rate for reasonable costs incurred by the facility. The commission shall by regulation list the factors it considers in making its rate determinations under this section.

(b) In determining a rate of payment to a health facility under this section, the commission shall consider the proportionate share of the facility's financial requirements for patient care for

(1) costs of current operations, including salaries and wages, purchased services, supplies, insurance, leases, depreciation, taxes, interest expense, maintenance and other health facility operating expenses; and

(2) education, research, and appropriate capital development.

(c) In determining a rate of payment to a health facility under this section, the commission may consider whether the rate of utilization of the facility has been reduced because of improvident or careless development of the facility.

* Sec. 4. AS 47.07 is amended by adding new sections to read:

Sec. 47.07.071. REPORTS BY HEALTH FACILITIES. Not later than 120 days after the end of each fiscal year of a health facility, the facility shall submit to the commission a report on the facility's financial performance during the fiscal year.

Sec. 47.07.072. REPORT BY THE COMMISSION. Not later than September 30 of each year, the commission shall submit to the governor a report on the prospective payments made under this chapter during the current fiscal year and an estimate of the prospective payments that will be made during the remainder of the current fiscal year and the next fiscal year. The report shall state the assumptions that are used as a basis for the estimates.

Sec. 47.07.073. UNIFORM ACCOUNTING, BUDGETING, AND FINANCIAL REPORTING. (a) The commission by regulation shall require a uniform system of accounting, budgeting, and financial reporting for health facilities receiving prospective payments under this chapter. The regulations shall provide for reporting revenues, expenses, assets, liabilities, and units of service. The commission shall specify the date the system becomes effective for each health facility.

(b) In adopting regulations under this section, the commission shall consider

(1) accounting, budgeting, and financial reporting procedures used by health facilities;

(2) variations among health facilities in the types of health care services provided by health facilities;

(3) the size and organizational structure of health facilities;

(4) the methods used by health facilities to obtain payments; and

(5) other factors the commission considers relevant.

(c) The commission may waive or modify a requirement for accounting, budgeting, or financial reporting for a health facility if waiver or modification is

(1) necessary to avoid excessive costs to the facility; and

(2) consistent with the policies of this chapter.

(d) Notwithstanding other provisions of this section, the commission may, by regulation, modify the system of accounting, budgeting, and financial reporting required under this section for a health facility having less than 25 acute care beds in order to reduce the operating costs of that facility.

Sec. 47.07.074. AUDITS AND INSPECTIONS. As a condition of obtaining payment under AS 47.07.070, a health facility shall allow

(1) the department and the commission reasonable access to the financial records of medical assistance beneficiaries; and

(2) inspection of financial records by state and federal agencies to the extent required by federal law.

Sec. 47.07.075. APPLICATION OF ADMINISTRATIVE PROCEDURE ACT. Actions of the commission under AS 47.07 and AS 47.25.120 - 47.25.300 are subject to the provisions of the Administrative Procedure Act (AS 44.62).

* Sec. 5. AS 47.07.080 is amended by adding new paragraphs to read:

(6) "commission" means the Medicaid Rate Commission;

(7) "health facility" includes a hospital, skilled nursing facility, intermediate care facility, intermediate care facility for the mentally retarded, rehabilitation facility, inpatient psychiatric facility, home health agency, rural health clinic, and outpatient surgical clinic.

* Sec. 6. AS 47.07 is amended by adding new sections to read:

ARTICLE 2. MEDICAID RATE COMMISSION.

Sec. 47.07.110. MEDICAID RATE COMMISSION ESTABLISHED. The Medicaid Rate Commission is established in the Department of Health and Social Services.

Sec. 47.07.120. COMPOSITION OF COMMISSION. The commission

consists of five members as follows:

(1) the chief executive officer of a health facility that is licensed by the state but not owned or operated by the state or federal government and that is subject to the budget review process under this chapter;

(2) the commissioner of administration, the commissioner of health and social services, or the appointed designee of either commissioner;

(3) a physician licensed to practice medicine in the state who is actively engaged in the practice of medicine and who is not employed by the state;

(4) a certified public accountant with relevant experience;

(5) a person representing consumers of health services who does not have a direct or indirect interest in an entity that provides health care services.

Sec. 47.07.130. APPOINTMENT OF MEMBERS. Members of the commission are appointed by the governor and serve at the pleasure of the governor.

Sec. 47.07.140. TERM OF MEMBERSHIP. The term of a member of the commission appointed under AS 47.07.120(1), (3), (4), or (5) is three years. A member may not be appointed to a successive term. The terms of the members shall be staggered. A member appointed to fill a vacancy serves for the unexpired term of the member. A term shall be measured from January 1 of the year in which the term of the vacant position begins, regardless of when the vacancy is filled.

Sec. 47.07.150. COMPENSATION. A member of the commission serves without compensation but is entitled to per diem and travel expenses authorized by law for boards and commissions under AS 39.20.180.

Sec. 47.07.160. OFFICERS. At the first meeting of each year,

the commission shall elect a chair from among its members.

Sec. 47.07.170. MEETINGS AND QUORUM. The commission shall meet as often as necessary to conduct its business. Three members of the commission constitute a quorum.

Sec. 47.07.180. DUTIES. The commission shall review proposed payment rates and budgets of health facilities and establish payment rates for health facilities under this chapter and AS 47.25.120 - 47.25.300.

Sec. 47.07.190. EMPLOYMENT OF PERSONNEL. The commission may employ and determine the salary of an executive director. With the approval of the commission, the executive director may select and employ additional staff. The commission shall be assisted by the officers or personnel of the department as the commissioner of health and social services shall direct. The executive director of the commission is in the exempt service under AS 39.25.

* Sec. 7. AS 47.25 is amended by adding a new section to read:

Sec. 47.25.195. PAYMENT TO HEALTH FACILITIES FOR TREATMENT OF NEEDY PERSONS. (a) The department may make payments to a health facility for the treatment of a needy person.

(b) A health facility receiving a payment under this chapter is subject to the requirements of AS 47.07.070 - 47.07.075.

(c) For purposes of this section, "health facility" includes a hospital, skilled nursing facility, intermediate care facility, intermediate care facility for the mentally retarded, rehabilitation facility, inpatient psychiatric facility, home health agency, rural health clinic, and outpatient surgical clinic.

* Sec. 8. INTERIM PROSPECTIVE PAYMENT SYSTEM. The department shall establish an interim system of prospective payments for health facilities under this Act for the period July 1, 1983, to June 30, 1984.

* Sec. 9. The sponsor of a hospital or health facility construction project who is receiving or entitled to receive state aid under AS 29.90 on the day preceding the effective date of this Act shall continue to receive state aid until the sponsor has received an amount which, combined with state matching money for construction of the hospital or health facility, equals 25 percent of the total project cost. Money received for construction may not be used for any other purpose.

* Sec. 10. AS 29.90 and AS 47.07.080(1) are repealed.

* Sec. 11. This Act takes effect immediately in accordance with AS 01.10.070(c).

Page 1&2, Line 3

Subject: Senate Bill 1

Dear Senator Ray:

You have before you SB 1, the municipal code revision which includes in it revisions to the existing law, AS 29.89, state aid to municipalities and other eligible recipients for health facilities and hospitals.

That section as currently drafted, AS 29.60.120 in SB 1, continues to discriminate against the Juneau Regional Rehabilitation Hospital by excluding it from hospital revenue sharing. This, inspite of the fact that the facility was required to be built to acute hospital standards and functions as an acute facility with a specialty license. The specific problem is caused in the definition section of Article 15, General Provisions, Section 29.60.800(2). This should be changed to read as follows:

> (2) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general or special hospital; the term excludes a facility operated or wholly supported by the state or the federal government.

Your assistance in securing this amendment would be greatly appreciated.

Sincerely,

Dennis L. DeWitt
President

SUBJECT: Difference between CSSB 1 and HB 172

DATE: March 22, 1983

HB 172 amendments needed to make it the same as CSSB 1:

p. 33, after line 28, insert new line (26) 29.35.060 (franchise and permits) and renumber following paragraphs accordingly.

p. 77, after line 6, add a new subsection
(c) this section applies to home rule and general law municipalities.

p. 77, line 9, after "regulate" delete [,] and add a utility service and"

p. 77, line 12 after "is" delete [not]
after AS 42.05, delete [and] and add "or"

p. 77, line 14 delete [(2)...law.] and add (2) municipal regulation is prohibited by AS 42.05.711 (k) or other law.

p. 77, line 17 -20, delete subsection (c) and add a new subsection
(c) A municipality that owns or operates a utility may extend service to adjacent areas outside its municipal boundaries. For that purpose, the municipality may acquire, maintain, and operate utility facilities together with necessary interests in real property outside its municipal boundaries.

p. 77, lines 21-22, delete subsection (d) and add a new subsection
(d) Unless a utility is owned by the municipality that is regulating it, all rates, charges, and regulations shall be established by the municipality in accordance with an ordinance that provides procedures for regulating service and establishing and changing rates and charges. The ordinance shall provide for procedures necessary to guarantee due process, including notice and hearing requirements. Rates and charges

established under this section shall be reasonable and permit a fair return on invested capital. p. 77, Sec. 29.35.070, add new subsection (e) A dispute involving a utility certificated under AS 42.05 as to the reasonableness of the fees or the terms, conditions, or exceptions to a permit to use municipal streets shall be decided under AS 42.05.251.

p. 77, Sec. 29.35.070, add a new subsection

(f) In case of a conflict between the provisions of this section and AS 42.05 or concerning an action taken under this section or AS 42.05 involving the regulation of service or the rates or charges of a utility certificated under AS 42.05, the provisions of AS 42.05.641 apply.

p. 77, Sec. 29.35.070, add a new subsection
(g) This section applies to home rule and general law municipalities.

p. 195, line 22, add
*Sec. 62. AS 42.05.711 is amended by adding a new subsection (k) A public utility that is exempt or partially exempt under this section from the provisions of AS 42.05.010 - 42.05.721 may not be regulated by a municipality. This subsection does not apply to a public utility exempt under (b) of this section.

Renumber following sections accordingly.

p. 107, line 29, after "borough" delete [including...period;]

p. 61, line 10, after "(3) delete [is] and add "has been
after "elections" add for at least 30 days immediately preceeding the municipal election; and

p. 14, lines 17-26, after "action." add The standards and procedures established under this subsection that apply to detachment shall be the same as the standards and procedures that apply to annexation, except that the standards and procedures that apply to detachment must include provisions for equitable prorated payment of debts acquired by the municipality before the detachment.

p. 14, line 19 after (1) add, subject to (2) and (3) of this subsection,

p. 14, line 23 after "annexed" delete [by ordinance ...approval] and add or detached by ordinance without an election;

p. 14, line 24 after "annexed" add or detached

p. 14, after subsection (3) add a new subsection
(4) within 90 days after receipt of a petition for annexation or detachment, the Local Boundary Commission shall make a decision on the petition.

RE: HB 227

House Bill 227, introduced at the request of the Governor, contained several supplemental appropriations for various state programs and, the appropriations to fund salary increases that have been paid since January 1, 1983.

At the request of the Committee, CSHB 227 deletes all supplemental appropriations in HB 227 except for appropriations for salary increases. The amount of the appropriation for legislative branch employees has been reduced by the amount that would have been paid to legislators retroactively to Janurary 1, 1983. (page 3, line 26, CSHB 227).

The title of CSHB 227 has been changed to relate only to salary increases.

TO: COMMITTEE ON COMMUNITY & REGIONAL AFFAIRS

FROM: STAFF

DATE: MARCH 18, 1983

SUBJECT: HB 227

In accordance with instructions from the Committee a CSHB 227 has been prepared. The CS contains only those portions of HB 227 that pertain to salary increases; and, the amount of $312,200 for the Legislative Affairs Agency was reduced to $273,265. The difference, $38,935, is the amount in the Legislative Affairs Agency appropriation that was designated for salary increase of Legislators.

The staff is having a committee sponsored bill prepared that will include all remaining appropriations from the original HB 227 except that the amounts for municipal aid and revenue sharing will reflect the same amounts previously approved by the committee for those purposes.

The Division of Retirement and Benefits estimates the cost of employee benefits to be 33 percente of salary. Benefits include health insurance, SBS which replaced Social Security, unemployment insurance, workers' compensation, life insurance, liability, the Legal Trust, and contributions to the retirement system.

The "average" GGU member is a Range 13, which receives $2,100.00 per month. The new salary schedule would require a contribution of $693.00 per month to the benefit package.

The "average" Supervisory Unit member is a Range 20, which receives $3,469.00 per month. Under the salary schedule the monthly benefit contribution would be $1,144.77.

Bargaining unit positions are distributed as follows:

House of Representatives
Committee on Community & Regional Affairs

M E M O R A N D U M

TO: Representative Al Adams
Chairman, House Finance Committee

FROM: Representative Barbara Lacher
Chairman, House C & R A Committee

SUBJECT: HB 227

DATE: March 14, 1983

In order that HB 227 may quickly pass through the legislative process, the House C & R A Committee held abbreviated hearings on HB 227 and refers the legislation to the House Finance Committee.

Section 4 through Section 11 did not receive close examination by the House C & R A Committee because the appropriations contained therein are more properly within the real of the Finance Committee's expertise and responsibility.

Section 1 of HB 227 pertains to legislation previously addressed by this committee and referred to the Finance Committee in the form of HB 153. Testimony and evidence presented to the committee substantiated that the amount of $25.1 million, as stated in HB 153, is the required funding level. The committee requests that HB 227 be amended by the Finance Committee to reflect the amount of $25,100,000 on page 1, line 9.

Sections 2 and 3 of HB 227 have been reviewed by this committee. In each instance, the committee believes the appropriation to be proper and required. CSHB 152, previously referred to the Finance Committee, appropriates funds for the same purposes as in Section 2 of HB 227.

Bill Sheffield, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POSITION PAPER

RE: HB 227

SPONSOR: Rules by Request

Program Effects

Section 3 of the Bill provides a supplemental appropriation of $2,500,000 to fully fund the Aid to Unincorporated Communities program for FY 83. The supplemental would partially offset cuts made last year which resulted in a "short funding" of the program.

Comments

Presently, the Department's FY 83 funding does not contain sufficient funds to fully fund the Aid to Unincorporated Communities Program.

Because of the current shortfall, and existing contractual commitments of full $1,000 per capita allotments to 26 communities, the balance of unincorporated communities will be receiving an estimated entitlement of only $550 per capita. This disparity would be eliminated if this measure were adopted.

FISCAL NOTE

ANALYSIS:

This Fiscal Note deals only with Section 3 of the bill. This section provides supplemental funding for Aid to Unincorporated Communities Program and would not create any additional impact.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 227 (corrected version) Date on Bill: 2/25/83
Title: An Act making miscellaneous supplemental appropriations.
Sponsor: Rules Committee, for the Governor
Requestor: C&RA, Finance

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating								
Total			22.1 mill					

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:
Section 1 of this bill would appropriate $16.1 million to the Department of Revenue to be distributed in accordance with the provisions of AS 43.20.016 for FY 83. Upon receipt of the appropriation, the Department would make a per capita distribution to those cities and boroughs who qualified for a February 1, 1983 payment. The Department would make a per captia distribution to those cities and boroughs who qualified for the June 1, 1983 payment in conjunction with that payment. Section 8 would appropriate $6.0 million to the Department of Revenue to fund the added costs of the political campaign contribution refund program. As a result of record contributions exceeding $12 million in 1982, the Department is expecting in excess of 60,000 applications for the refundable credit.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

CITY OF KENAI

RESOLUTION NO. 83-35

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA REQUESTING THE THIRTEENTH LEGISLATURE OF THE STATE OF ALASKA TO SUPPORT SB 17 AND/OR HB 136 BOTH OF WHICH REPRESENT SUPPLEMENTAL MUNICIPAL ASSISTANCE FUNDING FOR MUNICIPALITIES THROUGHOUT THE STATE OF ALASKA.

WHEREAS, the supplemental appropriation of $25 million for FY 83 municipal assistance revenues is designed to fully fund the entitlement at the amount had not the method of taxation of the petroleum industry been changed during the 1981 State Legislative Session, and

WHEREAS, it was the intent of the Twelfth Legislature to provide this funding for the purpose of permitting local governments to reduce taxes in the local community, and

WHEREAS, the City of Kenai, Alaska used all of its municipal assistance funding for the purpose for which the Twelfth Legislature intended municipal assistance to be used by reducing the mill levy to 2.1 mills for the property taxpayers within the City of Kenai, and

WHEREAS, the City anticipated full funding of municipal assistance at the same rate previously provided by the old corporate income tax, and

WHEREAS, to maintain this low mill levy and to meet the anticipated expectations of the local taxpayers, the supplementary municipal assistance funding becomes extremely important to the City of Kenai, Alaska, and

WHEREAS, the Twelfth Legislature of the State of Alaska is basically and primarily responsible for the actions of the Kenai City Council in reducing its mill levy and therefore entitled to a major portion of the credit for the low mill levy in the City of Kenai.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, that said Council go on record urging the Thirteenth Legislature of the State of Alaska to fund the supplemental municipal assistance bill which will permit the City of Kenai to carry out the Legislature's original intent to permit that money to be used in the General Fund Budget for the sole purpose of reducing the mill levy for local taxpayers and to

DEPARTMENT OF COMMUNITY & REGIONAL AFFAIRS
DIVISION OF LOCAL GOVERNMENT ASSISTANCE

FEBRUARY 1, 1983

The following assumptions were used to compute the attached:

All applicants were included that have applied for the program in a timely manner.

We are using the FY 1983 State Revenue Sharing Program, Provisional Population figures.

$3.5 million was added to the Chapter 89 funding, which includes funding for the following:

Public Roads	$2,500/per mile
Ice Roads	$1,500/per mile
Health Facilities	$4,000/per facility or
	$2,000/per bed
Hospitals	$250,000/per hospital (with 10 or more beds)or
	$50,000/per hospital (with 10 or less beds)or
	$1,000/per bed
Volunteer Fire Departments	$10/per capita
Unincorporated Communities	$25,000

Area cost-of-living adjustment was added to roads, health facilities and hospitals.

OK. Doug Griffin

MEMORANDUM State of Alaska

RECEIVED
DEC 3 1982
BUDGET AND MANAGEMENT

DEPARTMENT OF COMMUNITY & REGIONAL AFFAIRS

TO: Ron Lehr
Director

DATE: December 2, 1982

FILE NO: 1403X/nk

TELEPHONE NO:

FROM: Lee McAlearney
Commissioner

SUBJECT: Unincorporated Community Aid

As part of a larger program the Aid to Unincorporated communities program was established by the Legislature. This program was established to entitle all unincorporated communities in the state to $1,000 per resident to be used for various local projects.

For purposes of funding these entitlements the Legislature appropriated funds in two fiscal years. During the last session the Legislature saw fit to substantially reduce the funding.

The original funding level of $13,131,100 for FY82 and $5,246,700 for FY83 was more than sufficient for all eligible communities to receive the full entitlement. For the first year of operation the Department signed contracts with all participants to give them their $1,000 per capita in fact a considerable sum has been distributed at that rate. The reduction in funding will not allow all communities to participate at this level. The following is a breakdown of the current projections.

Currently obligated by Contract	$4,491,000
Contract currently being prepared	$4,406,000
Communities preparing proposals	$ 685,000
Communities needing to form Non-Profit Corporations	$ 540,000
Additional for Communities not having Applied	$ 124,000
Total funding required	$10,246,000
Total appropriation as reduced	$7,746,000
Total to be requested	$2,500,000

It is obvious that the Department will not be able to grant the full entitlement to all eligible communities without this supplemental appropriation. If this were to happen the Department would have two alternatives. The first would be to distribute the balance on hand to all communities currently under contract (including those currently being prepared) on a prorata basis. This alternative would not allow the State to fulfill it's portion of those contractual obligations. The second alternative would be for the Department to only contract for the amount currently appropriated. This would mean not signing all the contracts currently being prepared and not accepting any more applications for funds. This would require the Department to tell all communities applying and some that are currently having contracts prepared that even though they are eligible under the law that they will not be able to receive their entitlement due to the lack of available funds. It is obvious that either of the alternatives do not afford equitable treatment of all of the States unincorporated communities.

3. Section

MEMORANDUM State of Alaska

TO: B.J. Lewis, Assist A.G.
Department of Law

DATE: January 28, 1983

FILE NO: 8852

THRU: Mary Halloran, Director
Division of Management

TELEPHONE NO: 465-2407

FROM: Virginia Stonkus
Deputy Director
Division of Management
Dept. of Natural Resources

SUBJECT: Municipality of Anchorage - Deficiency Payment

This is in response to your January 17, 1983 request for an analysis of the Municipality of Anchorage's land selection deficiency payment.

The acreage figures below are summary figures taken from the Division of Land and Water Management files and from Division of Technical Services compilations.

Land Entitlement (AS 29.18.201)

Municipality of Anchorage	44,893 Acres

Land Selections and Conveyances

Total Patented to Municipality	15,514 acres (DTS 1-3-83)
Total Patents in Progress	319 acres (DTS 1-3-83)
Selections Approved	5,599 acres (SCD 12-31-82)
	21,442 acres
Selections Pending	3,858 acres (SCD)

The selection pending acreage (22 casefiles) is in various stages of processing (see attached summary). We anticipate less than 1000 acres will be approved. The balance has been rejected and is in various stages of appeal or will be rejected due to land status. Department of Natural Resources has submitted a request for an AG's opinion on several management issues (copy of request is attached).

Selection Potential

The Division of Land and Water Management has recently searched all townships within the Anchorage area for land which could provide DHSS with prison facility locations. That search leads us to believe there is no other significant selection potential for the Municipality unless major land status changes were to occur within the military complexes or Chugach State Park. A.S. 29.18.210 does provide that, consistent with the best interests of the

Sec 4 & 5

State, land could be selected outside the Municipality under AS 38.05.315. In summary the selection potential within the municipality is quite small, probably limited to 1000 acres or less.

Presently Unfulfilled Entitlement

Total Entitlement	44,893 acres
Approved Selections & Patents	21,442 acres
Remaining Entitlement (less some small acreage now under appeal or small selection yet to be made)	23,451 acres

The inescapable conclusion is that the State cannot convey a sufficient land entitlement, barring a major change in the land status of the military complex or Chugach State Park. Recent contact with the Division of Research and Development related that the recent Eklutna - Municipal - State Agreement will not affect the Municipal Entitlement under AS 38.18.201.

AS 29.18.208 Deficiency Provisions

This section of the law allows for a monetary payment of $1000 per acre for the number of acres of deficiency due to municipality. The deficiency calculation is based on a land entitlement of 1/3 acre per capita as of the program year beginning July 1, 1978.

Anchorage population *(1978) 183,600

183,600 X 1/3 acre per capita = 61,200 acres

This calculation obviously exceeds the stated entitlement in AS 28.18.201 of 44,983, therefore we again interpret the deficiency to be 23,451 acres as previously calculated above.

*This population figure is from the State of Alaska demographer (Department of Labor, Juneau). The Department of Community and Regional Affairs, which is charged with delivering this figure (see AS 29.18.206(f) could not do so upon request. The State demographer related they (DCRA) would have revenue sharing population figure which would be higher than those supplied by the State demographer. The Municipality of Anchorage was contacted and their demographer supplied the figure of 180,246 for 1978.

Sec 4 B5

23,451 acres deficiency times $1000 per acres would lead us to a figure of $23,451,000 as proper for deficiency payment. However, AS 29.18.208(b) limits the deficiency payments resulting from a lack of available land to $9,000,000 for any one municipality.

The Municipality also has a 1968 selection of 138.33 acres (40281) rejected due to conveyances to Eklutna, Inc. This would appear to qualify for a deficiency payment under AS 29.18.208(c), if the Municipality so requests. Care should have to be taken to avoid duplicate counting of this acreage in the deficiency counted under AS 29.18.208(b).

Limitations on the deficiency payments are found in AS 29.18.208(e)(1) of a maximum of $4,000,000 in any one calendar year. AS 29.18.208(f) requires apportioning between municipalities if the requests for all municipalities exceeds $4,000,000 in any one year.

Our determination is that the $5,000,000 request does not exceed the total amount due them under 29.18.208(c). This is based on the following calculation:

Deficiency payment due (Statutory Limit)	$9,000,000
Prior deficiency payment paid	4,000,000
Amount due	$5,000,000

The $5,000,000 request, however, does exceed the $4,000,000 per year limit found in AS 29.18.208(e)(1).

DATE: November 19, 1982

FILE NO: 2381

TELEPHONE NO: 276-2653

SUBJECT: Appeal Municipal Selections ADL 201143 & ADL 201182

Enclosed is an appeal received from the Municipality of Anchorage in response to a proposed decision dated August 10, 1982 concerning Municipal Selections ADL 201143 and ADL 201182.

These selection files have been involved in a series of actions over the past three years. Three proposed decisions have been issued. The lands have been subject to negotiations between the State and Eklutna, Inc. Several third party interests has developed over this period of time.

The Municipality has raised several procedural and legal questions concerning past actions by the State in regards to these selections.

In order that we may properly answer the appeal we are requesting your opinions on the following:

(1) In accordance with A.S. 29.18.205(f) is the director required by law to convey selected lands within 9 months of its selection? ADL 201182 was selected on May 25, 1979 and ADL 201143 was selected on May 14, 1979. Also, if the municipality did not appeal a proposed decision in 30 days, is the DNR then obligated to convey the subject land in accordance with the provisions of the proposed decision?

(2) In reference to A.S. 29.18.207(d), can a proposed decision convey management rights or can this right only be conveyed with a final decision? Also, did the State imply the municipality had property management rights by the act of requesting the municipalities concurrence prior to granting a right-of-way across selected lands?

(3) In reference to the Municipality's point #3, what is the authority of the director to stipulate conditions upon a proposed municipal conveyance?

(4) Can the Department of Natural Resources add reservations after issuance of a proposed decision? In this case the proposed decision of August 10, 1982 was subject to several more third party interest than the original proposed decision of September 12, 1979.

MEMORANDUM

State of Alaska

TO:
Norman Gorsuch
Attorney General
State of Alaska

DATE: December 13, 1982

FILE NO:

TELEPHONE NO:

FROM:
Ronald D. Lehr, Director
Division of Budget and Management
Office of the Governor

SUBJECT:
Preparation of Special Legislation

Attention: Jim Baldwin

Please prepare a bill to provide retroactive payment to the Municipality of Anchorage for the $5,000,000 balance of its land deficiency payment pursuant to AS 29.18.208.

Under section 29.18.208 (2)(e)(1), the legislature is authorized to appropriate not more than $4,000,000 per fiscal year, and not more than $12,000,000 in total, for the purpose of paying land deficiency entitlements to municipalities. In addition section 29.18.208 (2)(b) allows a total of only $9,000,000 to any one municipality for land deficiency payments. The Municipality of Anchorage was appropriated its first entitlement payment of $4,000,00 in FY 81. Since that time no further entitlement payments have been authorized by legislature for the Municipality of Anchorage even though it has been requested in the Governor's budgets in FY 82 and FY 83.

The legislation proposed herein will accomplish two results:

1) it will provide the Municipality of Anchorage its full remaining entitlement of $5,000,000 under section 29.18.208 (2)(b);

2) it will preclude the necessity of having to amend section 29.28.208 (2)(e)(1) which limits the legislature to an entitlement payment of not more than $4,000,000 in any one fiscal year.

OFFICE OF
MANAGEMENT & BUDGET
JAN 25 1983
BUDGET REVIEW

Sec 4 & 5

(d) The director may approve municipal selections of land which have been tentatively approved or patented to the state by the federal government, but he may not issue patent to a municipality until the land has first been patented to the state. After approval of a selection by the director, but before patent to a municipality, the municipality may execute conditional leases and make conditional sales only with the consent of the director. Conditional sales and conditional leases made before July 1, 1978 do not require the consent of the director.

(e) Nothing in this chapter affects a valid existing claim, location or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purposes. Nothing in AS 29.18.011 — 29.18.610 affects the rights of an owner, claimant, locator or entryman to the full use and enjoyment of the land so occupied. (§ 2 ch 180 SLA 1978; am § 45 SLA 1979)

Effect of amendments. — The 1979 amendment repealed subsections (a) and (b), providing for selections to be in reasonably compact tracts whenever possible and for relinquishment of selections, and providing for certification of certain information to each municipality having an entitlement under AS 29.18.201 — 29.18.203, respectively.

Sec. 29.18.208. Payment for land deficiency. (a) There is established within the general fund the Alaska municipal land account for the following purposes:

(1) providing payment to the boroughs and unified municipalities designated in AS 29.18.201 for a deficiency of land physically suitable for residential, commercial or industrial purposes; or

(2) providing payment to the boroughs and unified municipalities designated in AS 29.18.201 for certain general grant lands selected by the state and conveyed to a Native corporation under the provisions of the Alaska Native Claims Settlement Act.

(b) A municipality shall receive payment for its land deficiency from the account established in (a) of this section. A municipality is eligible to receive payment for land deficiency if, after July 1, 1980, the amount of land selected by a municipality which is physically suitable for residential, commercial or industrial purposes amounts to less than one-third acre per capita. Any entitlement under AS 29.18.201 which is less than one-third acre per capita will, for the purposes of this subsection, be considered a land deficiency. An unselected remaining entitlement will, for the purpose of deficiency payment under this subsection, be considered as land physically suitable for residential, commercial or industrial purposes. A municipality eligible under this subsection is entitled to receive a payment for land deficiency equal to $1,000 per acre for a number of acres equal to the difference between one-third of the population of the municipality less the number of acres physically suitable for residential, commercial or industrial purposes which has been selected by the municipality. For the purpose of this

Sec 4 & 5

subsection, the population of the municipality shall be the population determined in accordance with AS 29.18.206(f). No payment may be made to a municipality under this subsection in excess of $9,000,000.

(c) If a municipality selected vacant, unappropriated, unreserved land on or before December 18, 1971, to which the state had received tentative approval or patent, and such land was also selected by a Native corporation organized under the Alaska Native Claims Settlement Act (P.L. 92-203), and title to that land is ultimately vested in that Native corporation, the municipality may, at its option, request payment for land deficiency from the account established in (a) of this section. The acceptance of payment under this subsection by a municipality constitutes a relinquishment of any other right, title or claim to the land by that municipality. The total payment to a municipality under this subsection may not exceed $1,000 per acre to a maximum of 8,000 acres.

(d) The governor shall annually submit to the legislature a request for an appropriation to the account for the municipalities which have elected to receive payments under (b) or (c) of this section. The request for appropriation shall distinguish between amounts necessary to make payments for land deficiency under (b) of this section and those required to make payments for land deficiency under (c) of this section.

(e) For purposes of fulfilling entitlements under this section, the legislature is authorized to appropriate

(1) not more than $4,000,000 per fiscal year, and not more than $12,000,000 in total, for the purpose of paying entitlements under (b) of this section;

(2) not more than $1,000,000 per fiscal year, and not more than $8,000,000 in total, for the purpose of paying entitlements under (c) of this section.

(f) If an annual appropriation is not sufficient to meet the amount due to all municipalities which have elected to accept payment for land deficiency under (b) or (c) of this section, the governor shall apportion the appropriation among the municipalities in proportion to the payment calculated for each municipality for that year. When a distribution of payments is made under (c) of this section, the remaining entitlement of a municipality to which payment is made shall be reduced in an amount equal to the number of acres for which payment was received. An appropriation made under this section is in addition to other grants and entitlements authorized to eligible municipalities.

(g) Payments authorized by this section may not be made to a municipality eligible for an entitlement under AS 29.18.202 or 29.18.203.

(h) Payments made under this section shall be used by those local governments which levy property taxes to reduce those levies in proportion to the amount of state payments received by a local government for a given fiscal year. The governing body of each local government shall furnish a notice with the tax statement describing the effect on

Sec 4 ES-

property tax levies of payments received under this section. (§ 2 ch 180 SLA 1978; am §§ 4, 5 ch 85 SLA 1979)

Effect of amendments. — The 1979 amendment substituted "residential, commercial or industrial purposes" for "the purposes described in AS 29.18.205(g)(1)" in paragraph (1) of subsection (a), and in subsection (b), substituted "selected by a municipality which is physically suitable for residential, commercial or industrial purposes" for "physically suitable for the purposes described in AS 29.18.205(g)(1) for which approval has been given by the director under AS 29.18.205(g) within one year of selection" in the second sentence, "for residential, commercial or industrial purposes" for "the purposes described in AS 29.18.205(g)(1)" in the fourth sentence, and "residential, commercial or industrial purposes for which has been selected by the municipality" for "the purposes described in AS 29.18.205(g)(1) for which approval has been given by the director under AS 29.18.205(g)" in the fifth sentence.

Sec. 29.18.209. Authorization for land exchanges. The director, with the concurrence of the commissioner, and any municipality are authorized to exchange land or interests in land when it is in the public interest. Land or interests in land exchanged under this section must be of approximately equal value, including the non-monetary value of public benefits. Exchange procedures shall comply with applicable law and municipal ordinances. The notice and review provisions of AS 38.05.305 and 38.05.345 are applicable to exchanges of land under this section. The provisions of AS 38.50.010 — 38.50.170 do not apply to exchanges of land under this section. (§ 2 ch 180 SLA 1978)

Editor's notes. — AS 38.05.305, referred to in this section, was repealed by § 45, ch. 113, SLA 1981.

Sec. 29.18.210. Public purpose and expansion needs. (a) Consistent with the best interests of the state, if a municipality does not contain and cannot reasonably acquire sufficient nonfederal land within its boundaries to meet its legitimate needs for public or private settlement or development, it shall be the policy of the state to select federal land reasonably necessary to meet the needs of the municipality and to make the land selected available to the municipality under AS 38.05.315 or (b) of this section.

(b) Where state land is the most logical location for demonstrated municipal expansion for nonpublic settlement and development purposes, and when an exchange of land under AS 29.18.209 is not possible or is not in the public interest, it is the policy of the state to sell or lease the land at public auction. The state may contract with a municipality to act as its agent in an auction of state land under applicable statutes. When a municipality acts as the agent of the state in an auction, the municipality may retain from the proceeds of the auction the expenses which the director determines to be necessary and reasonable.

BUDGET AND MANAGEMENT

FROM: Commissioner Lisa Rudd
Department of Administration

SUBJECT: Supplemental Request for FY 82

A supplemental budget request is necessary for the TRS State Match to meet FY 82 and FY 83 obligations. Funding for the TRS State Match is required by AS 14.25.080. To fully meet the FY 82 obligations requires an additional $1,467.3. To fund the anticipated requirements of FY 83 will require an additional $2,136,600. This money is needed to fully meet the actuarially determined benefit costs of the system.

The TRS State Match is calculated as a specific percentage times the gross payroll for all TRS members for each Fiscal Year. The percentage is determined on an annual basis by actuarial determinations. It is exactly one-half of the total Employer Contribution percentage for that year, so in essence, the employers pay one half of their costs and the State matches those contributions. The Division of Retirement and Benefits has no control over increasing salaries to teachers which precipitate increasing demand for matching contributions from the State. The FY 82 estimated need, proposed by percentage by the Division of Retirement and Benefits, fell short.

The amount of short fall for FY 82 is $1,467,300, as mentioned above, and with the contributions for TRS thus far in FY 83, there will be a projected short fall for FY 83 of $2,136,500. This supplemental request is for a grand total of $3,603,900. The TRS State Match is totally General Funded. An actuarial analysis of the FY 84 request indicates it is "on track" with these adjusted FY 82 and FY 83 levels.

Rev. sec. 8 MEMORANDUM State of Alaska

TO: Ron Leir, Director
Division of Budget and Management
Office of the Governor

DATE: November 16, 1982

FILE NO:

TELEPHONE NO: 465-2300

FROM: Thomas K. Williams, Commissioner
Department of Revenue

SUBJECT: FY 83 Supplemental Requests

RECEIVED
NOV 17 19
BUDGET AND MANA

The Department of Revenue will be requesting supplemental appropriations for Fiscal Year 1983 in the following areas:

Alcoholic Beverage Control Board	$ 20.0
Child Support Enforcement Division	65.7
Refundable Credits	6,000.0
Permanent Fund Dividend Payments	12,000.0

An ABC Board investigator position was held vacant in FY81 due to "sunset legislation" review. When the Board was continued for FY82, personal services was underfunded by $41.3. This underfunding has resulted in an abnormally high vacancy factor in the FY83 budget and even with the investigator position vacant ABC projects a shortfall of $10.0 in personal services. Shortfalls in contractual services in the amount of $10.0 are also anticipated. ABC Board has experienced higher costs than expected in obtaining transcripts of Administrative hearings and other hearing officer related activities. These costs have amounted to approximately $9.0 in the first four months compared to a budgeted amount of $11.8 for the whole year.

Child Support Enforcement Division has been partially funded in the past year by Federal Funds (75%), and General Fund and Program Receipts (25%). With the approval of the Federal Budget for the year beginning October 1, 1982 CSED is to receive Federal Funds amounting to only 70% of their total budget. A request for $130.7 of Federal Budget Impact Funds appropriated by chapter 125 SLA 82 has resulted in replacement of $65.0 of the lost federal funds. This supplemental request for $65.7 would restore the balance of those federal funds lost and would be used to reduce vacancies and allow child support collections to continue. This would also help to lessen the pressures on welfare related programs.

The FY83 budget request for Refundable Credits was $1,758.0 for Political Contributions Credits and $1,033.0 for Child Care Credits. The appropriation for Refundable Credits was $1,033.0 for the two programs. Reports from APOC indicate that Political Contribution refund requests will be in the amount of $6,000.0.

Permanent Fund Dividend payment began in late June 1982. At that time our expectation for total applications received was 420,000. To date we have received over 480,000 applications and although we anticipate rejecting many as nonqualified, we anticipate a shortfall of $12,000.0. As we process the approximately 60,000 applications currently in reject status, we will be fine-tuning this request. Your early consideration of this request is greatly appreciated.

Commissioner
Department of Revenue

SUBJECT: FY83 Supplemental Appropriation for Refundable Credits

The Department of Revenue requests a supplemental appropriation in the amount of $6,000,000 for FY 83 Political Contribution Credits, a component of Refundable Credits. The FY 83 budget request for Refundable Credits was $1,758,000 for Political Contribution Credits and $1,033,000 for Child Care Credits; however, only $1,033,000 was funded for the programs.

Reports from APOC indicate that Political Contribution refund requests will be in the amount of $6,000,000. APOC has on file potential refunds of $3,000,000 for contributions of $100 or less and $3,000,000 worth of refunds for contributions over $100. Applications for Child Care Credits and Political Contribution Credits should start coming into the Department in January 1983.

MEMORANDUM State of Alaska

TO: Gene Dusek
Associate Director
Division of Budget Review
Office of Management & Budget

DATE: 1/28/82

FILE NO:

TELEPHONE NO:

FROM: Robert London Smith
Robert London Smith, Ph.D.
Commissioner
Department of Health & Social Services

SUBJECT: Supplemental Appropriation
Department of Health & Social Services, Division of Adult Corrections

The Department of Health & Social Services, Division of Adult Corrections, requests approval of a supplemental totaling $1,972,696 for the period September 1, 1982, to June 30, 1983. The purpose of this supplemental request is to cover operational costs of on-going programs, to secure appropriate spaces for inmate populations, and to satisfy legal requirements arising from recent litigation. Existing programs cannot be further curtailed in order to resolve the need for additional funding. Failure to secure supplemental funding will leave the State in a position of legal jeopardy, but perhaps of greater concern is the realization that overcrowding pressures may lead to inmate disturbances or emergency release of prisoners due to lack of institutional space. Annualized cost in FY'84 for programs implemented by this supplemental, exclusive of one time items, would be $2,516,426. Budget amendments to incorporate this supplemental request will be forthcoming.

The primary cause for this funding request is unprecedented overcrowding. The July 1982 average inmate population was 1,186. The October average increased to 1,330. If this trend is to continue throughout the fiscal year we will end with an average inmate population of 1,390. The overcrowding crisis directly impacts legal issues in that lack of inmate space and insufficient resources form the basis of the Cleary vs. Beirne lawsuit.

The $1,972,696 supplemental request is contained in the following components:

Institutional Shortfall ($861,524)
Cleary Lawsuit ($298,339)
Field Misdemeanant Unit ($285,335)
Diversion Unit ($79,772)
Ridgeview Men's Facility ($50,454)
Hiland Mountain Correctional Center ($16,173)
Career Enhancement Training ($15,166)
Fairbanks Correctional Center ($103,895)
Palmer Correctional Center ($176,013)
Director's Office ($86,025)

Institutional Shortfall: (Tabs A-1 to A-23) $861,524

A supplemental appropriation request is necessary for the normal operating budget to meet on-going expenses. Because of inmate population increases well beyond the budget base, overexpenditure patterns have developed primarily in the areas of food/clothing, medical services and personal services. For example, the Ridgeview Men's facility was budgeted to house 45 inmates. In October, 1982, the average daily count was 123 inmates. All inmates must be provided security and the basic necessities of life. Increased populations within the various correctional centers have resulted in increased overtime hours worked to provide security and supervision of the inmates.

For the Division of Adult Corrections to internally adjust for the above identified funding deficits, it would have been necessary to eliminate approximately two-thirds of the existing educational program and one-half of the psychological/alcoholism counseling and sex offender counseling programs to function within the appropriated budget.

Cleary Lawsuit: (Tab B) $298,339

This sweeping class action lawsuit by prisoners alleges that the State is not sufficiently providing for inmate constitutional rights in almost every aspect of prison life from adequate space to inmate programs. Its initiation is clearly tied to overcrowding which impacts the Division's ability to provide for inmate rights at a level acceptable to the courts.

This $298,339 would fund the partial out-of-court settlement regarding those aspects of the case that the State is willing to implement at this time. The funding request provides minimal staff to accomplish those things requiring implementation beginning December 9, 1982. Added staff would be compliance monitors at each institution, a central office compliance monitor, two correctional officers for recreation at Fairbanks, three central office positions to manage institutional populations, institutional programs and a clerk typist to support these activities. Without this additional staff resource the Division of Adult Corrections will likely be subject to court action due to non-compliance with the partial settlement agreement.

Field Misdemeanant Unit: (Tab C) $285,335

Much as the central intake system will reduce overcrowding by providing the court alternatives to confining offenders, so will the program of providing information to the court on individual cases at sentencing of misdemeanants, and the provision of supervision services to misdemeanants placed on probation or in community programs by the court operate to reduce overcrowding. At present the court only has the option of releasing misdemeanants without supervision, or committing them to jail. This unit of probation officers and clerk typists would offer the benefit of street supervision of misdemeanant offenders who may productively remain in the community and therefore reduce institutional overcrowding.

Diversion Unit: (Tab D) $79,772

A further method of reducing institutional overcrowding is that of diverting persons, coming into contact with the Division, from incarceration. This unit would provide the necessary staff and support funding so that background information could be compiled on persons brought into custody. This information would then be presented to the court so that it would have a better basis upon which to determine whether a person should be incarcerated or placed back in the community under probation supervision.

Ridgeview Men's Facility: (Tab E) $50,454

As inmate populations in the Anchorage area continue to run at all time highs and the Cook Inlet Pre-Trial facility continues to be delayed in opening, it becomes necessary to retain more inmates at the Ridgeview Men's facility. These positions will provide the additional security coverage necessary for inmate supervision at this facility.

Hiland Mountain Correctional Center: (Tab F) $16,173

The Hiland Mountain Correctional Center and the Meadow Creek Correctional Center have been built adjacent to one another utilizing many common facilities such as the sewage treatment plant. The operation of this sewage treatment plant requires a degree of mechanical ability not currently available to the Hiland Mountain Correctional Center.

The Department of Environmental Conservation has indicated that if this Division cannot properly operate and maintain the sewage treatment facility it will impose restrictions upon operations of these two institutions which may require a partial closure of operations. This position would provide a full time person with sufficient mechanical ability to operate the treatment facility.

Career Enhancement Training: (Tab G) $15,166

With the acquisition of Careage House, the Division of Adult Corrections is utilizing that facility for Central Office functions as well as the training academy. There is sufficient space in this location to allow for on site housing of all persons attending the training academy. The addition of a cook to the training center would allow us to provide room and board to all trainees at an approximate cost of $310 for the three week training academy versus the present $1,800 currently paid to trainees who must secure food and lodging elsewhere on a per diem basis.

Fairbanks Correctional Center: (Tab H) $103,895

The physical configuration of the 56-bed modular unit recently installed at the Fairbanks Correctional Center does not allow for full security coverage by sight and sound by the existing complement of officers assigned to this unit. This request would provide funding to establish one additional security post which would allow for full security coverage on a 24-hour per day/7-day per week basis.

Palmer Correctional Center: (Tab I) $176,013

The original staffing authorized to operate the medium custody facility at Palmer was not adequate. This reduced staff does not allow the assignment of officers to the individual housing units. This lack of security coverage has resulted in escapes, damage to the facility and inmates doing harm to one another. Security must be increased to protect the public, inmates and the facility.

This request will provide additional security staff to monitor the housing unit as well as providing additional counseling staff to work with inmates towards resolution of problems which led to incarceration and arise as a result of incarceration.

Director's Office: (Tab J) $86,025

With the acquisition of Careage House and the establishment therein of the Anchorage area Central Office functions for the Division of Adult Corrections, the Division intends to establish a 24-hour per day/7-day per week central information and security service. This request would provide for officers to be on duty at all times to provide building security and respond to requests from law enforcement agencies, members of court and requests from other institutions arriving via the AJIS and OBSCIS systems.

Funding of this FY'83 request in the amount of $1,972.7 would allow the Division of Adult Corrections the resources necessary to manage the problems arising from unprecedented overcrowding.

MEMORANDUM State of Alaska

RECEIVED
JAN 19 1983
BUDGET AND MANAGEMENT

TO: Gene Dusek, Associate Director
Division of Budget Review
Office of Management and Budget
Office of the Governor

DATE: January 18, 1983

FILE NO:

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: Judgments
Supplemental FY83

The Department of Law requests a supplemental appropriation in the amount of $89,100 to cover the costs of judgments against the State for FY83. The actual amount of judgments we expect to pay is $116,600. Of this amount, $17,400 has already been paid from our existing authorization, which was included in our FY83 operating budget for this purpose, and $10,100 has been paid and will be reimbursed to us by interagency services clients. This leaves a balance of $89,100 yet to be paid, including post judgment interest, which accrues at the statutory rate of 10.5%. Accrued interest has been arrived at by estimating a payment date of June 1, 1983. Payment after that date, as might be caused by a delay in a supplemental appropriation, will result in additional interest costs of approximately $14.66 per day.

The department submits a supplemental judgments request each year because of the relatively small appropriation ($17.4 in FY83) provided for this purpose in the department's annual operating budget. During the past several years judgments costs have varied from a low of about $60.0 to a high just over $1.1 million. A more realistic figure for our annual appropriation would be about $125,000, which is probably a little more than we will be paying this year. The Legislature, which is its right, has not been inclined to increase our annual judgments appropriation, but prefers to review judgments individually and fund their payment during the supplemental appropriation process.

During the past fiscal year the department closed 2,448 litigation matters and it expects to close 2,750 such matters this year. Thus the numbers of matters resulting in judgments against the State, 10 paid and 11 yet to be paid, appears to be relatively small considering the overall number of matters in which the State is engaged. Conversely, the State has collected $125,366 in judgment settlements, from cases where the State has prevailed, during just the first six months of FY83.

Attached for your review is a list of the judgments yet to be paid and for which a supplemental appropriation is requested.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 227

"An Act making miscellaneous supplemental appropriations; and providing for an effective date."

Sec. 9 of House Bill No. 227 appropriates $1,972,700 from the general fund to the Department of Health and Social Services to fund the costs of increased prisoner population. This amount would cover operational costs of ongoing programs to secure appropriate spaces for inmate populations, and to satisfy legal requirements arising from recent litigation. Failure to secure this supplemental funding will leave the State in a position of legal jeopardy, but perhaps of greater concern is the realization that overcrowding pressures may lead to inmate disturbances or emergency release of prisoners due to lack of institutional space. Annualized cost in FY 1984 for programs implemented by these supplemental funds, exclusive of one time items, would be $2,516,426. This amount has been incorporated into the FY 1984 budget revision for the Department of Corrections submitted to OMB on March 2, 1983.

The primary cause for this funding request is unprecedented overcrowding. The July 1982 average inmate population was 1,186. The October average increased to 1,330. If this trend is to continue throughout the fiscal year, we will end with an average inmate population of 1,390. The overcrowding crisis directly impacts legal issues in that lack of inmate space and insufficient resources form the basis of the Cleary vs. Beirne lawsuit.

The $1,972,696 supplemental request is contained in the following components:

Institutional Shortfall ($861,524)
Cleary Lawsuit ($298,339)
Field Misdemeanant Unit ($285,335)
Diversion Unit ($79,772)
Ridgeview Men's Facility ($50,454)
Hiland Mountain Correctional Center ($16,173)
Career Enhancement Training ($15,166)
Fairbanks Correctional Center ($103,895)
Palmer Correctional Center ($176,013)
Director's Office ($86,025)

Institutional Shortfall: $861,524

A supplemental appropriation request is necessary for the normal operating budget to meet ongoing expenses. Because of inmate population increases well beyond the budget base, overexpenditure patterns have developed primarily in the areas of food/clothing, medical services, and personal services. For example, the Ridgeview Men's Facility was budgeted to house 45 inmates. In October 1982, the average daily count

was 123 inmates. All inmates must be provided security and the basic necessities of life. Increased populations within the various correctional centers have resulted in increased overtime hours worked to provide security and supervision of the inmates.

For the Division of Adult Corrections to internally adjust for the above identified funding deficits, it would have been necessary to eliminate approximately two-thirds of the existing educational program and one-half of the psychological/alcoholism counseling and sex offender counseling programs to function within the appropriated budget.

Cleary Lawsuit: $298,339

This sweeping class action lawsuit by prisoners alleges that the State is not sufficiently providing for inmate constitutional rights in almost every aspect of prison life from adequate space to inmate programs. Its initiation is clearly tied to overcrowding which impacts the Division's ability to provide for inmate rights at a level acceptable to the courts.

This $298,339 would fund the partial out-of-court settlement regarding those aspects of the case that the State is willing to implement at this time. The funding request provides minimal staff to accomplish those things requiring implementation beginning December 9, 1982. Added staff would be compliance monitors at each institution, a central office compliance monitor, two correctional officers for recreation at Fairbanks, three central office positions to manage institutional populations, institutional programs and a clerk typist to support these activities. Without this additional staff resource, the Division of Adult Corrections will likely be subject to court action due to non-compliance with the partial settlement agreement.

Field Misdemeanant Unit: $285,335

Much as the central intake system will reduce overcrowding by providing the court alternatives to confining offenders, so will the program of providing information to the court on individual cases at sentencing of misdemeanants, and the provision of supervision services to misdemeanants placed on probation or in community programs by the court operate to reduce overcrowding. At present, the court only has the option of releasing misdemeanants without supervision, or committing them to jail. This unit of probation officers and clerk typists would offer the benefit of street supervision of misdemeanant offenders who may productively remain in the community and, therefore, reduce institutional overcrowding.

Diversion Unit: $79,772

A further method of reducing institutional overcrowding is that of diverting persons, coming into contact with the Division, from incarceration. This unit would provide the necessary staff and support funding so that background information could be compiled on persons brought into custody. This information would then be presented to the court so that it would have a better basis upon which to determine

whether a person should be incarcerated or placed back in the community under probation supervision.

Ridgeview Men's Facility: $50,454

As inmate populations in the Anchorage area continue to run at all-time highs and the Cook Inlet Pre-Trial Facility continues to be delayed in opening, it becomes necessary to retain more inmates at the Ridgeview Men's facility. These positions will provide the additional security coverage necessary for inmate supervision at this facility.

Hiland Mountain Correctional Center: $16,173

The Hiland Mountain Correctional Center and the Meadow Creek Correctional Center have been built adjacent to one another utilizing many common facilities such as the sewage treatment plant. The operation of this sewage treatment plant requires a degree of mechanical ability not currently available to the Hiland Mountain Correctional Center.

The Department of Environmental Conservation has indicated that if this Division cannot properly operate and maintain the sewage treatment facility, it will impose restrictions upon operations of these two institutions which may require a partial closure of operations. This position would provide a full-time person with sufficient mechanical ability to operate the treatment facility.

Career Enhancement Training: $15,166

With the acquisition of Careage House, the Division of Adult Corrections is utilizing that facility for central office functions as well as the training academy. There is sufficient space in this location to allow for on-site housing of all persons attending the training academy. The addition of a cook to the training center would allow us to provide room and board to all trainees at an approximate cost of $310 for the three-week training academy versus the present $1,800 currently paid to trainees who must secure food and lodging elsewhere on a per diem basis.

Fairbanks Correctional Center: $103,895

The physical configuration of the 56-bed modular unit recently installed at the Fairbanks Correctional Center does not allow full security coverage by sight and sound by the existing complement of officers assigned to this unit. This request would provide funding to establish one additional security post which would allow for full security coverage on a 24-hour per day/7-day per week basis.

Palmer Correctional Center: $176,013

The original staffing authorized to operate the medium custody facility at Palmer was not adequate. This reduced staff does not allow the assignment of officers to the individual housing units. This lack of security coverage has resulted in escapes, damage to the facility and

inmates doing harm to one another. Security must be increased to protect the public, inmates, and the facility.

This request will provide additional security staff to monitor the housing unit as well as providing additional counseling staff to work with inmates towards resolution of problems which led to incarceration and arise as a result of incarceration.

Director's Office: $86,025

With the acquisition of Careage House and the establishment therein of the Anchorage area central office functions for the Division of Adult Corrections, the Division intends to establish a 24-hour per day/7-day per week central information and security service. This request would provide for officers to be on duty at all times to provide building security and respond to requests from law enforcement agencies, members of court and requests from other institutions arriving via the AJIS and OBSCIS systems.

Funding of this FY 1983 request in the amount of $1,972.7 would allow the Division of Adult Corrections the resources necessary to manage the problems arising from unprecedented overcrowding.

CLEARY LAWSUIT (IMMEDIATE SETTLEMENT)

The preliminary settlement in the Cleary vs. Beirne suit requires that the Division take certain actions by December 9, 1982.

These actions include increased recreational opportunities, increased visitation, food service reforms etc.

The following outline lists the resources required, on a statewide basis, to allow the Division to come into compliance.

Cleary Lawsuit (Immediate Settlement)
12/1 to 6/30/83

Assistant Superintendent	2,894 x 5	$ 14,470
Program Coordinator (Ed/Couns Prgms)	3,249 x 5	16,245
Criminal Justice Planner I (Suprv Pop Mgmt)	3,475 x 5	17,375
Clerk Typist III	1,530 x 5	7,650
Correctional Officer III	2,295 x 5 x 4	45,900
Correctional Officer III (Fairbanks)	2,639 x 5	13,195
Correctional Officer III (Nome)	3,041 x 5	15,205
Correctional Officer III (Palmer)	2,379 x 5	11,895
* Correctional Officer II (Fairbanks)	2,379 x 5 x 2	23,790
		$165,725
Benefits		63,114
Total Salaries 13 Permanent Full Time Positions		$228,839
Travel		$ 10,000
Contractual Services		11,000
Commodities		7,500
Equipment		41,000
		$ 69,500
Total Estimated Costs		$298,339

* These positions have been requested in the FY'84 budget.

CAREER ENHANCEMENT TRAINING

The correctional officer training academy is operating on a near continual basis and based on the proposed training schedule, will continue to do so.

All out-of-town personnel will be provided room and board at the Careage House facility at a substantial cost saving over what it would cost to have personnel on a per diem basis. Presently the division expends $1,800 per employee for each three week training academy on a per diem basis. Providing room and board will require the division to pay only $330 per employee.

This position will utilize existing kitchen facilities for providing meals to personnel quartered at Careage House.

FAIRBANKS CORRECTIONAL CENTER

The configuration of the 56 bed modular unit is such that a single security post is not adequate to provide sight and sound coverage of the entire unit. It is therefore necessary to establish a second 24 hour/day, 7 day/week security post. A security post is a position/function that must be staffed three shifts per day every day of the year for a total of 1,095 eight hour shifts per year. These positions will provide that coverage.

The funding below provides for staff and necessary support resources to operate for the remainder of FY'83.

PALMER CORRECTIONAL CENTER

The original staffing authorized to operate the medium custody facility at Palmer is not adequate. This reduced staff does not allow the assignment of officers to the individual housing units. This lack of security coverage has resulted in escapes, damage to the facility and inmates doing harm to one another. Security must be increased to protect the public, inmate and the facility.

The counseling staff is also inadequate to provide service to all inmates at the facility.

HILAND MOUNTAIN CORRECTIONAL CENTER

When the Meadow Creek Correctional Center was designed and built, it was done so that as many support services as possible could be provided by the adjacent Hiland Mountain facility. One area to be shared was the sewage treatment facilities. The existing plant was redesigned and constructed to service both facilities. The Department of Environmental Conservation will not issue a certificate of operation without a fully trained person to operate/maintain the treatment plant.

POSITION PAPER

RE: HB 255
SPONSOR: Representative Malone

PROGRAM EFFECTS:

This bill allows municipalities to totally or partially exempt residential property from taxation.

COMMENTS:

Although the exemption created by this bill would be a local option, it would allow a dramatic shifting of the tax burden.

Currently the taxation section of the municipal code is relatively restrictive and requires all municipalities to comply. This insures an equitable distribution of the cost of local government and insulates local governing bodies from special interest pressures in the area of local taxation.

It is the position of this Department that if optional exemptions are to be expanded, that they should be expanded to include all property and not just specific classes.

Approved: Emil Notti
Emil Notti, Commissioner

STATE OF ALASKA 1984 LEGISLATIVE SESSION
FISCAL NOTE

Revision Date: 12/29/83

Bill/Resolution No.: HB 255
Title: Exemption of Residential property

ANALYSIS:

Assumptions: The four municipalities which currently employ the $10,000 residential exemption, and which receive substantially high revenues through the taxation of oil and gas property, would opt for 100 exemption of their residential property.

Positions:

Other Expenditures:

Funding:

Section Cost Analysis:

Computations: Attached

Economic Impact: Revenues lost through the operation of the residential exemption would be supplanted to some extent by higher municipal taxes on oil and gas properties. The State forgives the oil companies for payments made to municipalities. Therefore as the oil companies' local tax bills increase, the tax they pay to the State decreases proportionately.

Impact on Local Government:
See Position Paper.

Attachments Computations

Attachment

	% of revenues generated from oil & gas property		Estimated residential revenues		Loss of revenues to state
North Slope Borough	91%	X	$ 482,000	=	$ 438,600

tioned in this section, is not subject to valuation by first class cities for the purposes of AS 14.17.010 et seq., to the extent that it is exempt from taxation. 1962 Op. Att'y Gen., No. 18.

Exclusive employment of occupants of properties sought to be taxed was such as to bring these properties within the exemptions provided in subsections (b)(1) and (b)(2) for residences of ministers owned by religious organizations, or property used for "solely charitable purposes" or "religious education." North Pac. Union Conference Ass'n of Seventh Day Adventists v. Harmon, 5 Alaska L.J. No. 11, p. 228 (Nov., 1967).

The providing of recreational facilities, such as accommodations for campers, is a charitable use of the property. Matanuska-Susitna Borough v. King's Lake Camp, Sup. Ct. Op. No. 472 (File No. 857), 439 P.2d 441 (1968).

Ordinance exempting from local taxation any class of real or personal property.—A home rule city has the power to enact an ordinance exempting from local taxation any class of real or personal property, if such an exemption is not prohibited by the city's home rule charter. 1969 Op. Att'y Gen., No. 1.

Electric cooperative operating under arrangement with federal agency is not exempt.—A nonprofit cooperative is not an agency of the United States government simply by virtue of an "arrangement" with the Rural Electrification Administration pursuant to 7 USC §§ 901—915, and therefore immune from local taxation. City of Anchorage v. Chugach Elec. Ass'n, 17 Alaska 481, 252 F.2d 412 (9th Cir. 1958).

There is no statutory authority exempting the property of Chugach Electric Association from taxation by the city of Anchorage and the Anchorage independent school district. City of Anchorage v. Chugach Elec. Ass'n, 17 Alaska 481, 252 F.2d 412 (9th Cir. 1958).

Exemption of property on federal land inapplicable to Railroad Reserve. — The doctrine that property located upon federally owned land is immune from local taxation is inapposite where it is not shown that the Railroad Reserve is "federal property" or under the exclusive jurisdiction of the federal government. City of Anchorage v. Chugach Elec. Ass'n, 17 Alaska 481, 252 F.2d 412 (9th Cir. 1958).

Sec. 29.53.025. Optional exemptions and exclusions. (a) Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election.

(b) Municipalities may by ordinance

(1) classify boats and vessels for purposes of taxation and may establish the assessed valuation of boats and vessels on the basis of their registered or certificated net tonnage; a tax based upon a tonnage valuation shall not exceed $5 a year for a boat or vessel of less than five net tons and shall not exceed $15 a year for a boat or vessel of more than five net tons;

(2) classify and exempt from taxation

(A) the household furniture over $500 in value and the effects of the head of a family or a householder; and

(B) the property of an organization not organized for business or profit-making purposes and used exclusively for community purposes, provided that income derived from rental of such property does not exceed the actual cost to the owner of the use by the renter; and

(C) historic sites, buildings and monuments.

(c) The provisions of (a) of this section notwithstanding,

(1) a home rule or first or second class borough may, by ordinance adopted without weighted voting, adjust its property tax structure in whole or in part to the property tax structure of a city within it, including but not limited to, excluding personal property from taxation, establishing exemptions, and extending the redemption period;

(2) a home rule or first class city shall have the same power to grant exemptions or exclude property from borough taxes that it has as to city taxes, provided that the exemptions or exclusions have been adopted as to city taxes and further provided that the city appropriate to the borough sufficient money to equal revenues lost by the borough because of the exemptions or exclusions, the amount to be determined annually by the assembly without weighted voting.

(d) Exemptions or exclusions from property tax which have been granted by home rule municipalities in addition to exemptions authorized or required by law, and which are in effect on September 10, 1972 and not later withdrawn, are not affected by this Act. (§ 2 ch 118 SLA 1972)

City may not exempt property without express authority.—The authority of a municipal corporation to allow exemptions of particular property from taxation, unless expressly conferred by law, has very generally been denied. Valentine v. City of Juneau, 36 F.2d 904 (9th Cir. 1929).

Ordinance exempting from local taxation any class of real or personal property.—A home rule city has the power to enact an ordinance exempting from local taxation any class of real or personal property, if such an exemption is not prohibited by the city's home rule charter. 1969 Op. Att'y Gen., No. 1.

Valuation of full and true value not precluded. — The fact that first class cities may choose the tonnage valuation of ships for the purposes of taxation does not preclude them from making a valuation of full and true value for the purposes of taxation. It necessarily follows that boats and vessels should be valued at full and true value for the purpose of AS 14.17.010 et seq. 1962 Op. Att'y Gen., No. 18.

Rules applicable to second class cities.—The rules applicable to boats and vessels in first class cities apply equally to those under the jurisdiction of second class cities. 1962 Op. Att'y Gen., No. 18.

Sec. 29.53.030. Mining claims. The assessed value of an unimproved unpatented mining claim which is not producing, and a nonproducing patented mining claim upon which the improvements originally required for patent have become useless and valueless through depreciation, removal or otherwise, is fixed at $200 for each 20 acres or fraction of 20 acres. If the surface ground of a claim has a separate and independent value for nonmining uses, the real and personal property is assessed at its full and true value. (§ 2 ch 118 SLA 1972)

Sec. 29.53.025. Optional exemptions and exclusions. (a) Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election. An exclusion or exemption authorized by this section may not exceed $10,000 for any one residence.

(b) Municipalities may by ordinance

(1) classify boats and vessels for purposes of taxation and may establish the assessed valuation of boats and vessels on the basis of their registered or certificated net tonnage; a tax based upon a tonnage valuation shall not exceed $5 a year for a boat or vessel of less than five net tons and shall not exceed $15 a year for a boat or vessel of more than five net tons;

(2) classify and exempt from taxation

(A) the household furniture over $500 in value and the effects of the head of a family or a householder; and

(B) the property of an organization not organized for business or profit-making purposes and used exclusively for community purposes, provided that income derived from rental of such property does not exceed the actual cost to the owner of the use by the renter; and

(C) historic sites, buildings and monuments;

(D) land of a nonprofit organization used for agricultural purposes if rights to subdivide the land are conveyed to the state and the conveyance includes a covenant restricting use of the land to agricultural purposes only; rights conveyed to the state under this subparagraph may be conveyed by the state only in accordance with AS 38.05.069(c).

(c) The provisions of (a) of this section notwithstanding,

(1) a home rule or first or second class borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of a city within it, including but not limited to, excluding personal property from taxation, establishing exemptions, and extending the redemption period;

(2) a home rule or first class city shall have the same power to grant exemptions or exclude property from borough taxes that it has as to city taxes, provided that the exemptions or exclusions have been adopted as to city taxes and further provided that the city appropriate to the borough sufficient money to equal revenues lost by the borough because of the exemptions or exclusions, the amount to be determined annually by the assembly without weighted voting;

(3) a home rule or general law city within an organized borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of the borough, including but not limited to exempting or partially exempting property from taxation.

(d) Exemptions or exclusions from property tax which have been granted by home rule municipalities in addition to exemptions authorized or required by law, and which are in effect on September 10, 1972 and not later withdrawn, are not affected by this Act.

(e) Municipalities may by ordinance classify and exempt or partially exempt from taxation privately owned land, wet land and water areas for which a scenic, conservation, or public recreation use easement is granted to a governmental body. To be eligible for a tax exemption, or partial exemption, the easement must be in perpetuity. However, the easement is automatically terminated before an eminent domain taking of fee simple title or less than fee simple title to the property so that the property owner is compensated at a rate which does not reflect the easement grant.

(f) A municipality may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to real property if an increase in assessed value is directly attributable to alteration of the natural features of the land or new maintenance, repair or renovation of an existing structure and if the alteration, maintenance, repair or renovation, when completed, enhances the exterior appearance or aesthetic quality of the land or structure. No exemption may be allowed under this subsection for the construction of an improvement to a structure if the principal purpose of the improvement is to increase the amount of space for occupancy or nonresidential use within the structure or for the alteration of land as a consequence of construction activity. An exemption provided in this subsection may continue for up to four years from the date the improvement is completed or from the date of approval for the exemption by the local assessor, whichever is later.

(g) A municipality may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to a single family dwelling if the principal purpose of the improvement is to increase the amount of space for occupancy. An exemption provided in this subsection may continue for up to two years from the date the improvement is completed or from the date of approval of an application for the exemption by the local assessor, whichever is later. (§ 2 ch 118 SLA 1972; am § 2 ch 1 FSSLA 1973; am § 1 ch 33 SLA 1975; am § 1 ch 111 SLA 1976; am § 1 ch 262 SLA 1976; am § 1 ch 95 SLA 1977; am § 31 ch 94 SLA 1980)

Effect of amendments. — The 1973 amendment added the second sentence of subsection (a).

The 1975 amendment added subsection (e).

The first 1976 amendment added paragraph (3) of subsection (c).

The second 1976 amendment added paragraph (2)(D) of subsection (b).

The 1977 amendment added subsections (f) and (g).

The 1980 amendment deleted "adopted without weighted voting" near the beginning of paragraph (1) of subsection (c).

City may not exempt property without express authority. — The authority of a municipal corporation to allow exemptions of particular property from taxation, unless expressly conferred by law, has very generally been denied. Valentine v. City of Juneau, 36 F.2d 904 (9th Cir. 1929).

Ordinance exempting from local taxation any class of real or personal property. — A home rule city has the power to enact an ordinance exempting from local taxation any class of real or personal property, if such an exemption is not prohibited by the city's home rule charter. 1969 Op. Att'y Gen., No. 1.

Valuation of full and true value not precluded. — The fact that first class cities may choose the tonnage valuation of ships for the purposes of taxation does not preclude them from making a valuation of full and true value for the purposes of taxation. It necessarily follows that boats and vessels should be valued at full and true value for the purpose of AS 14.17.010 et seq. 1962 Op. Att'y Gen., No. 18.

Rules applicable to second class cities. — The rules applicable to boats and vessels in first class cities apply equally to those under the jurisdiction of second class cities. 1962 Op. Att'y Gen., No. 18.

REPRESENTATIVE HUGH MALONE

HOUSE BILL NO. 255
by Malone

BILL TITLE: "An Act relating to the exemption of residential property from the property tax.

BILL ANALYSIS: The purpose of this Legislation is to give local governments the authority to exclude or exempt or partially exempt residential property from taxation; pending ratification of ordinances by the voters. In essence, this bill is a step toward increasing the control and flexibility local governments should have over their taxing structure and policies.

It should be noted this bill imposes no obligation on the state to compensate for reduced revenues, if local voters wish to reduce or abolish their property taxes.

BILL ANALYSIS

RE: HB 255

SPONSOR: Representative Malone

Program Effects of Bill

This bill would expand the Residential Property Tax Exemption currently found in AS 29.53.025.

Currently municipalities may exempt up to $10,000 of value on residential property. This bill would allow unlimited exemption of residential property as an option.

COMMENTS

Although the exemption created by this bill would be a local option, it would allow a tremendous shifting of tax burden.

Currently the taxation section of the municipal code is quite restrictive and requires all municipalities to comply. This insures an equitable distribution of the cost of local government and insulates local governing bodies from special interest pressure, at least in the area of local taxes.

It is the position of this Department that if optional exemptions are to be extended, that they should be expanded to include all property and not just specific classes.

Additionally, we feel that exempting residential property from local taxation may have a substantial impact upon citizen interest in local government.

Mark Lewis, Commissioner

ANALYSIS

This bill would not create additional direct costs to state government; but could reduce local government revenues substantially.

The attached page from ALASKA TAXABLE 1982 shows municipal revenues from local sources. Based on that information it is easy to see that at optional removal of residential property from tax rolls would cause a shift of tax burden.

Mark Lewis, Commissioner

CHAPTER 113

AN ACT RELATING TO WAGES, HOURS AND WORKING ARRANGEMENTS.

(H.B. 683 am S.)

Be it enacted by the Legislature of the State of Alaska:

Secs. 1—3. Permanent laws. See Table of Disposition of Acts.

Sec. 4. This Act is applicable to organized boroughs and political subdivisions of the state, home rule or otherwise, unless the legislative body of the political subdivision, by ordinance or resolution, rejects having its provisions apply.

Approved June 7, 1972
Effective September 5, 1972

CHAPTER 118

AN ACT TO REVISE AND CODIFY THE LAW RELATING TO CITIES AND BOROUGHS.

(F.C.C.S. S.C.S. C.S.H.B. 208)

Be it enacted by the Legislature of the Sta . of Alaska:

Secs. 1, 2. Permanent laws. See Table of Disposition of Acts.

Sec. 3. A right or liability of a home rule or general law city or borough existing on September 10, 1972 is not affected by the enactment of this Act. Except for those provisions of ordinances in conflict with the provisions of AS 29.28.040, existing ordinances remain in force and effect for a period of 180 days from September 10, 1972, unless earlier superseded, in order to permit amendment of the ordinances to comply with the provisions of this Act. On September 10, 1972, the provisions of AS 29.28.040 supersede any conflicting provisions of ordinances of general law cities and boroughs.

Secs. 4—16. Permanent laws. See Table of Disposition of Acts.

Sec. 17. Secs. 10—16 of this Act take effect upon the condition and at the time that the Supreme Court of the State of Alaska finds that sec. 4, art. X of the Constitution of the State of Alaska as it relates to representation of cities on borough assemblies is in violation of the Constitution of the United States or an amendment to the Constitution of the State of Alaska relating to assembly rep-

resentation and consistent with the provisions of secs. 6—12 of this Act becomes effective, whichever occurs earlier.

Editor's note.—The Alaska constitutional amendment referred to in § 17, ch. 118, SLA 1972 (i.e., the one proposed in 1972 SJR 52) was approved by the voters August 22, 1972.

Secs. 18, 19. Permanent laws. See Table of Disposition of Acts.

Sec. 20. The terms of elected officials who are incumbents on September 10, 1972 are not affected by this Act. Their terms expire as provided before enactment of this Act.

Approved June 12, 1972
Effective September 10, 1972

CHAPTER 119

AN ACT RELATING TO CRIMINAL RESPONSIBILITY; AND CHANGING RULES 12(b) AND 23(a), RULES OF CRIMINAL PROCEDURE.

(H.B. 341 am S.)

Be it enacted by the Legislature of the State of Alaska:

Secs. 1—6. Permanent laws. See Table of Disposition of Acts.

Sec. 7. In sec. 1 of this Act, AS 12.45.085 has the effect of changing Rule 12(b), Rules of Criminal Procedure, in that it adds to the defenses which must be raised before trial, and AS 12.45.083(d) changes Rule 23(a) of the Rules of Criminal Procedure in that the defendant may, without the consent of the state, waive a jury trial if his defense is based on mental disease or defect excluding responsibility.

Approved June 12, 1972
Effective September 10, 1972

CHAPTER 125

AN ACT APPROPRIATING TO THE DEPARTMENT OF ADMINISTRATION; AND PROVIDING FOR AN EFFECTIVE DATE.

(H.B. 764 am)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The sum of $112,200 is appropriated from the general fund to the Department of Administration for estimated additional costs resulting from the Juneau Community College Building fire of February 22, 1972 for the period ending June 30, 1972.

TO: COMMITTEE ON COMMUNITY & REGIONAL AFFAIRS

FROM: STAFF

DATE: MARCH 18, 1983

SUBJECT: HB 227

In accordance with instructions from the Committee a CSHB 227 has been prepared. The CS contains only those portions of HB 227 that pertain to salary increases; and, the amount of $312,200 for the Legislative Affairs Agency was reduced to $273,265. The difference, $38,935, is the amount in the Legislative Affairs Agency appropriation that was designated for salary increase of Legislators.

The staff is having a committee sponsored bill prepared that will include all remaining appropriations from the original HB 227 except that the amounts for municipal aid and revenue sharing will reflect the same amounts previously approved by the committee for those purposes.

TO: All Community and Regional Affairs Committee Members.

FROM: House Community and Regional Affairs Staff.

RE: HB 285

House Bill 285 was prepared at the direction of the committee. It contains all of the supplemental appropriations that were originally in HB 227 except for appropriations for salary increases which are in CSHB 227.

The amount of supplemental appropriations in Section 1 and Section 2 of HB 285 have been changed from the amounts requested in HB 227. Section 1 was changed from 16.1 million to 25.1 million and Section 2 was changed from 2.9 million to 2.938 million because the Committee previously acted on legislation that appropriated the higher amounts for the respective purposes.

Staff attempted to have the title of HB 285 further specified to be more restrictive but was advised by Legal Affairs that in this case, it was not possible.

Effect of amendments. — Section 14, ch. 3, SLA 1980 applicable to calendar year 1979, retroactive to January 1, 1979, rewrote this section to read as follows:

"Sec. 24.15.020. Annual legislative compensation. (a) The annual salary for each member of the legislature is $15,500, payable monthly in 12 equal installments. The president of the senate and speaker of the house of representatives are each entitled to an additional $500 a year during tenure of office.

"(b) Except as provided by a general law applicable to all officers of the state, the compensation of a member of the legislature may not be reduced during his term of office."

Section 28 of ch. 3 retroactive to January 1, 1980, again rewrote the section.

Sec. 24.15.050. Legislative transportation. A member of the legislature is entitled to reimbursement for the expense of moving between his place of residence and the capital city for the purpose of attending a regular session of the legislature. Reimbursement shall be as provided by regulations covering state employees adopted by the commissioner of administration under AS 39.20.160. (§ 1 ch 36 SLA 1959; am § 4 ch 100 SLA 1963; am § 1 ch 106 SLA 1975; am § 29 ch 3 SLA 1980)

Effect of amendments. — The 1980 amendment retroactive to January 1, 1980, rewrote the section.

FROM: SARAH ROBINSON

SUBJECT: C&RA RURAL HOUSING ASSISTANCE PROGRAM

DATE: April 19, 1983

John Aycock called from Kotzebue today to voice a complaint to the C&RA Committee concerning an "unfair" January 1983 decision made by the Department of Community and Regional Affairs for a "90% mortgage ceiling on rural housing loans." He requested that Representative Lacher, as chairperson of the House C&RA Committee, look into this matter and correct the "unfair" decision. He further argued that this program prevented native residents from affording home investments due to the high down payment required with a 90% loan ceiling. "This policy prevents native residents from purchasing homes and forces them to live in apartments. There are many native friends of mine who would like to purchase this home, but can ill afford the down payment."

Upon questioning I determined from Mr. Aycock, that he has lived in Alaska for the past four years. All of these four years have been spent in his job in Kotzebue with the Department of Education. He is the outgoing principle of the Kotzebue Elementary School. Mr. Aycock is trying to sell his house for $112,500.00, and he claims that with the 90% ceiling this requires the purchaser to come up with a $13,000.00 down payment. He has been unable to locate a buyer for his house.

I contacted Ray Price of the Housing Assistance Division of the Department of Community and Regional Affairs, and asked him about the program for rural housing loans. As illustrated in the audit report we just received in this office (filed under Audit), urban housing loans are under a separate program from rural housing loans. The urban housing loans receive an interest rate according to a percentage chart provided in the audit report. For example the interest rate is 10% up to $90,000.00 and then it rises, with price increases in the homes, according to an established table. For rural housing loans, in contrast, the interest rate is a flat 10.5% irregardless of the cost of the home. I inquired about the 90% ceiling on loans and Mr. Price explained that the ceilings are, as a rule, 95% for rural housing loans.

The only exception being a decision made by Barbara Morse-Quinn, Director of the Housing Assistance Division of C&RA, this last January for one class of homes built in rural areas that do not meet state housing standards. The Kotzebue case under examination falls into this category.

John Aycock is trying to sell his house built by Jo Max Contractors, and constructed by Ben Lowman Construction, in Kotzebue. This housing was determined to be poorly built and therefore C&RA changed its loan ceiling to 90% for this and several other similar cases. In either the 90% or 95% case, the amount is determined between the lowest of two valuations: 1) the appraisal price, or 2) the sales price. Obviously Mr. Aycock's sales price is higher than the appraised valuation of his home.

Mike Scott, Aide to Senator Ferguson, and resident of Kotzebue completed the picture. Three years ago, Jo Max obtained a HUDD contract in Kotzebue. The resulting housing had collapsing walls, no roof insulation, poorly fitting doors and windows, and so on. Jo Max then went into the construction of private single family homes in the same region. C&RA became involved following a number of complaints. The Department of C&RA almost took Jo Max to court over this case, but instead settled for a lower loan ceiling on these houses. Mr. Scott says that C&RA was very responsible about this and that they had on site inspections, etc. Mr. Scott further informed me that the "natives" are not "restless" to get out of apartments into Jo Max housing. In fact they have no problems obtaining available housing in the area. The Jo Max homes are notorious in the region for their poor construction and are not in that much demand in the local real estate market. When informed of the sale price on Mr. Aycock's home, Ferguson's Aide said that these houses (1,000 square feet max.) were selling for $95,000.00 only last year, and that Mr. Aycock is clearly trying to make a profit before he leaves the "bush" for bigger things. The issue of the "poor suffering natives," in other words, is a cloak behind which Mr. Aycock hides his self-interests. The reason he called Representative Lacher, House Chairperson of C&RA, rather than Senator Ferguson, Senate Chairperson of C&RA, is obvious--he went seeking sympathy to an ear he hoped would be ignorant of the situation. The catch? He says he is moving to the Palmer area later this year.

Please advise.

POSITION PAPER

RE: CS For HB 302 (C&RA)

SPONSOR: Community and Regional Affairs Committee

Program Effects of Bill

Section 1 eliminates the one year residency requirements affecting veterans. The new provision allows a greater number of veterans to qualify for a 1% reduction in interest rates on mortgages for urban nonconforming mortgage loans. The division concurs with this section.

Section 3 creates a revolving loan fund in the division. The creation of a revolving loan fund will permit the division to retain principal payments received from borrowers. The revolving loan fund, in time, will reduce future capital budget requests. The division is in concurrence with this Section.

Section 4 creates within the division a Home ownership Assistance Fund. The creation of this fund, and the subsidy it provides will assist low and moderate income persons in purchasing single family homes. The impact, both fiscal and in activity will be tremendous. The subsidy fund will allow persons who ordinarily would not qualify for a housing loan to do so. The division expects to expend a large portion of its loan fund allocation in this area. The division is in favor of the creation of this fund.

Section 5 repeals the law mandating an 80%/20% split in loan fund allocations for nonconforming housing loans. Currently rural Alaska receives 80% of the funding. Section 5 will also allow the division to allocate nonconforming funds in a more productive manner. In addition to eliminating the 80%/20% split in nonconforming loans, Section 5 will eliminate a second rural definition. The division concurs with this Section.

Section 6 provides for an immediate effective date for all Sections. The division feels the effective date of Section 4 of this bill should be January 1, 1984. This date will allow the division time to properly implement the program. The division concurs with this Section.

Mark Lewis, Commissioner

Home Ownership Assistance Fund (HOAF) Assumptions for Fiscal Note

1. AHFC made 381 HOF loans in FY'81 for $24.7 million with an average loan amount of $64,829.00. AHFC made 903 HOF loans in FY'82 for $58.1 million with an average loan amount of $64,341.00. HAD's average loan amount is $87,500.00 HAD projects a FY'84 HOAF program of 176 loans at $85,000.00 each for a total of $15 million in loans made.

2. HAD projects a HOAF Program based on rural Alaskan needs as follows:

   a. Dwelling Price Maximums

1 or 2 member family	$100,000
3 member family	105,000
4 member family	110,000
5 or more member family	120,000

   b. Income Maximums

Adult family members	30,000
1st child	5,000
Each additional child to program maximum of	1,500 39,000

   c. Asset Maximums
   3 times income for all borrowers

3. Subsidies are calculated for payments of 1 adult and 2 children in rural Alaska to be subsidized from ratchet rate of 10% to HOAF rate of 6%. Average salary is computed at $2,835 per month with subsidy of $236.30 per month.

4. Capital projections assume accumulated subsidy projections. Annual subsidy rates are noted.

5. Revenue projections assume accumulated interest of 6% returning to the General Fund. Annual interest earnings are noted. Principal repayment is assumed to revolve back to the fund and is not calculated as revenue.

6. Position requests assume a specialization of duties and can absorb the year round program levels projected with no increased staff.

7. Travel is assumed to reflect both direct and indirect lending services of the division. FY'84 travel reflects the following specific assumptions:

2,500	Loan Examiner I to hearings in six field locations
3,600	Accountant, 6 trips to Juneau
5,000	Central office to bring field staff for training on new program
30,000	6 field offices @ 5,000 each for increased direct services and program outreach

8. Contractual assumptions were as follows:
   8,500 New regulations - HOAF
   3,500 Computer programming

9. Commodities assumptions were based on present cost of equipment for desks, chairs, files, WANG stations and data processing equipment.

10. Equipment is assumed at $500 per new position plus $500 for extra supplies to field.

11. Annual projections carry a 6% inflation calculation.

Notes for Form 13 Calculations

1. All salaries are based on GGU Salary Schedule for A ranges effective 1/1/83 for number of months requested.

2. Benefits were calculated at .0613 of gross salaries.

3. Supplemental benefits were calculated at DCRA FY'84 variable rate of .1537.

4. Fixed benefits were calculated at gross salary x 240.

Notes for Personal Services Category Projections

1. FY'84 impacts for new positions varied between 12 and 6 months. FY'85 projections assume all positions at 12 month plus 6% salary inflation costs. Subsequent years assume only annual inflation rate of 6%.

Notes for Revenue Projections

1. Monthly distribution of capital funds and, therefore, monthly interest calculations due on payments of first year operations cannot be accurately projected until program becomes operational. These figures are division's best estimates.

PLEASE NOTE: THE FOLLOWING PAGES WERE TREATED AS A UNIT IN THE ORIGINAL DOCUMENT

April 1, 1983

Mr. Gerald L. Wilkerson
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: "A Report on the Department of Community and Regional Affairs, Housing Assistance Loan Fund, For the Fiscal Year Ended June 30, 1982." Preliminary Audit Report (CONFIDENTIAL)

This letter comes in response to your communications of March 9 and 10, 1983 on the above referenced audit document.

A. Recommendation No. 1
HAD should assess the interest rate on mortgage loans in compliance with Alaska Statutes.

The department concurs with this recommendation. On December 28, 1982 a letter announcing an interest rate change for the Housing Assistance Loan Fund, Nonconforming Loan Program, was forwarded in response to Interim Letter No. 1 on your audit findings. Enclosed as Enclosure A-1 please find our interest rate notification letter of November 18, 1982 and our subsequent interest rate notification letter of March 11, 1983 (Enclosure A-2).

In addition to implementing a fixed date procedure for interest rate changes, enclosed you will also find our January 31, 1983 Request for Opinion of the Attorney General on this subject. (Enclosure A-3). Because of bond sale reserves at Alaska Housing Finance Corporation, taxable sales are frequently held well in advance of commitment issue. Unless the interest rates between sales rates are significantly different, funds from one sale are usually fully expended before funds from a subsequent sale are drawn. As this opinion request infers, AHFC announces interest rate changes as their funds dictate, with no particular formula in relation to the bond sale date. A verbal opinion from Assistant Attorney General John Rubini indicates

that our interest rate conversion dates should not predate those of AHFC, regardless of delay from date of sale. We anticipate issuing interest rate conversion notices within 48 hours of notification of rate change from AHFC.

B. Recommendation No. 2
HAD should strengthen controls over mortgage loans.

The department concurs with this recommendation. Enclosed as Enclosure B-1 please find a form now being used by the Housing Assistance Division entitled "Certification of Costs for Owner/Builder New Construction." This form is to be executed by the borrowers and seller/servicer representative before loan purchase is finalized. It has been published in the new handbooks of the Housing Assistance Loan Program, along with several revised forms of the Division. This book is available for your review upon request.

In addition to implementing this form, the division has requested further certification on the part of the seller/servicers, as exemplified in the enclosed Seller/Servicer Letter of March 17, 1983. (Enclosure B-2).

To correct the audit exceptions on three specific files still in question, the division has contacted the two seller/servicers involved in these transactions and requested their review of these files.

The following information has been obtained to date:

Loan #02-343-00213 $5,053 - No further information.

Loan #01-861-00454 $36,765 -All documentation to account for costs in excess of $67,000 has been received by seller/servicer and will be forwarded to division.

Loan #02-343-00213 $94,053. Loan fully repaid. No longer held in division's portfolio.

A full written response on each review is anticipated prior to April 30, 1983.

C. Recommendation No. 3

HAD should establish written guidelines to aid its staff in determining acceptable nonconforming characteristics.

The department concurs in this recommendation. Enclosed as Enclosure C-1 is the written definition of nonconforming characteristics established by the division on February 4, 1983. This definition has been publicized by staff and is available to all borrowers or seller/servicers for their review.

In addition to finalizing this definition, the division has recently completed the publication of a Housing Assistance Loan Program handbook and brochures. The publications fully define our loan programs and are available for review in any of our Housing Assistance Division offices.

D. Recommendation No. 4

HAD should improve its accounting system.

(1) HAD does not reconcile its loan receipts and disbursements and other operating expenditures to the State accounting system (PBA).

The department concurs in this recommendation. The division has been working very hard in conjunction with the Division of Administrative Services staff to identify responsibilities, monitor actions and insure fiscal accountability for all loan fund expenditures with regard to reconciliation with PBA. Enclosure D-1 outlines the new reporting procedures which have now been implemented at HAD. Procedures for reconciliation of loan disbursements are now in place and are being performed on a monthly basis. We anticipate completion of reconciliation procedures for loan receipts and other operating expenditures for the April 30, 1983 PBA report.

(2) Interest income is recorded net of service fees.

The department concurs in this recommendation. In consultation with the Department of Law, it has been determined a revised program request will be presented

before the Legislative Budget and Audit Committee to receive and expend a portion of the interest income for payment of service fees. In addition, the department will establish a system to properly account for the expenditures in accordance with AS 37.05.150.

Thank you for the opportunity to comment on this report. Please contact me or Barbara Horse-Quinn at 272-4585 should you have any questions regarding this correspondence. I hope this letter will sufficiently address all your concerns. We look forward to receiving the final audit report as soon as it becomes available.

Sincerely,

Mark Lewis
Commissioner

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

HOUSING ASSISTANCE DIVISION

November 18, 1982

To: ALL SELLER SERVICES

The Housing Assistance Division announces the reduction of interest rates for the Nonconforming Loan Program of the Housing Assistance Loan Fund. The new rates are attached. The authority for this reduction is found in AS 44.47.410 and AS 18.56.098(g).

As a reminder, all rural loan rates are fixed by the Legislature and are not adjusted with State Mortgage Bond sales.

Any loan committment issued after November 17, 1982 for the Nonconforming Loan Program will be at the new rate.

Sincerely,

Barbara Morse-Quinn

Enclosure A-1

MEMORANDUM

State of Alaska
Community and Regional Affairs

TO: The Honorable Norman Gorsuch
Attorney General
Department of Law
Attn: John Rubini
Asst. A.G.

DATE: January 31, 1983

FILE NO:

TELEPHONE NO: 272-4585

FROM: MARK LEWIS
COMMISSIONER

SUBJECT: Request for Opinion
Effective Date for Interest
Rates under AS 44.47.410(a)

By: _____
Barbara Morse-Quinn, Director
Housing Assistance Division
Community and Regional Affairs

Alaska Statute 44.47.410(a) mandates that our urban interest rates are "equal to the interest rate, as determined under AS 18.56.098(a) from the proceeds of the most recent applicable issue of taxable bonds." On January 19, 1983, Alaska Housing Finance Corporation sold series I of taxable bonds. This sale resulted in a reduction of the interest rates from 10.125% to 10% on the first $90,000 for non-veterans and from 9.125% to 9% on the first $90,000 for qualified veterans. However, AHFC has not put these rates into effect for their programs until they have exhausted the funds from the series H sale of taxable bonds.

Our question to you is, do we adjust our rates on the date of the last sale of the taxable bonds which was January 19, 1983 or on the date AHFC makes the rates effective for their programs which they anticipate will be mid-February?

Enclosure A-3

CERTIFICATION OF COSTS FOR OWNER/BUILDER NEW CONSTRUCTION

NONCONFORMING DEFINED

Effective February 4, 1983

Nonconforming housing is housing which is structurally sound and presents no health or safety hazards to the occupants but because of outmoded construction practices, changes in current design, a lack of normal amenities common to the area of the structure or a lack of utilities common to the area of the structure cannot be financed through any other state or federal mortgage loan program.

It has been our experience that the following list are the prevalent types of nonconformities:

1. Untreated wood foundations.
2. Untreated piling foundations.
3. Crib foundations.
4. Lack of a foundation.
5. Variations in foundation systems.
6. Dwellings with less than 1 full bathroom.
7. Dwellings with room layouts which affect the privacy of the bath or bedrooms.
8. Dwellings with ceiling heights less than 8' in the living areas.
9. Dwellings with rooms in tandem.
10. Dwellings with gross living areas less than 600 square feet.
11. Disjointed structures.
12. Dwellings which do not enjoy the utilities (electric, water or wastewater) which are common for the immediate area in the which the dwelling is located, such as:
    A. Private electric
    B. Lack of electricity
    C. Shallow wells
    D. Cisterns
    E. Surface water collection systems
    F. Holding tanks for water
    G. Sewage haul systems
    H. Water haul systems
    I. Graywater systems
    J. Outhouses
13. Dwellings which rely upon space heaters or woodstoves and their sole source of heat.
14. Dwellings constructed around a mobile home frame.
15. Restricted Titles due to ANCSA

This list is not finite and can be expanded upon as more characteristics unacceptable to other mortgage lending programs become known to the Division.

MEMORANDUM

State of Alaska

Community & Regional Affairs

TO: Barbara Morse-Quinn, Director
Ray Price, Deputy Director
Housing Assistance Division

DATE: February 8, 1983

FILE NO:

TELEPHONE NO:

FROM: Remond Henderson, Internal Auditor RH
Division of Administrative Services

SUBJECT:

Attached are a number of schedules which can be used in the reconciliation of HAD loan reports to the state PBA system. Although these schedules are designed to be used only in reconciling funds available per HAD reports to funds available per PBA, it is an example of formal reconciliation and communication procedures which must exist within HAD and between HAD and the Juneau Fiscal section. The attached schedules and/or related procedures may change once the conversion to an automated mortgage loan system has occured, however, I recommend their implementation at this point in time. Under the present system each month a number of differences occur between loans encumbered by HAD and those encumbered by Fiscal. If the recommended procedures are not implemented, these differences will continue to occur each month and will result in a large difference at the time of conversion to the automated system. Identifying the cause of a large difference could be extremely time consuming. Therefore, a monthly reconciliation should be performed.

I have performed a reconciliation between HAD and PBA reports for the month of December noting a net difference of $450,000. Although the net amount difference is inmaterial it should be identified and corrected as soon as PBA reports are available, I will perform the reconciliation for the month of January and will identify the difference at that time. However, to insure the difference does not increase as a result of the routine procedures performed by HAD and the Fiscal section, I recommend the following:

1. Preparation of SCHEDULE I (a summary schedule of loan activity by year of loan fund; ie; encumbrances, cancellations, increases, decreases).

2. Preparation of SCHEDULES II, III, and IV. These are schedules for each loan fund (by year) and provides the detail support for the summary schedule described in 1 above. In preparing schedules II, III, and IV a number of procedures must be followed by HAD and Fiscal. These procedures are discussed below:

a. HAD's Accounting Technician should continue to maintain the Loan Activity Log. All encumbrances, transfers, increases, adjustments, etc. should be entered in the log. In effect, the Loan Activity Log should reflect all activity which affects loan encumbrances.

b. The Loan Closer should forward a copy of requests for warrants to the Accounting Technician in order for her to determine amounts requested are in agreement with amounts encumbered. If there is a difference, the Accounting Technician will enter the increase or decrease in the Loan Activity Log and applicable schedule. If an increase or decrease in a loan amount is known by the Loan Closer in advance, the Loan Closer should forward a document indicating the change to the Accounting Technician.

c. The Loan Closer should forward a copy of all warrant cancellation requests to the Accounting Technician. (This has no effect on schedules II, III, or IV, however, effects the HAD reports prepared by the Accounting Technician.

d. All items entered in the Activity Log (see [a] above) by the Accounting Technician should be entered in the Wang and on the applicable SCHEDULES, II, III, or IV. The Accounting Technician should establish a cut-off date at the end of each month. This will be important for reconciliation purposes. All activity input in the Wang (per activity log) in a particular month and included in HAD Loan Reports for that month should be entered on SCHEDULES II, III, or IV for the same month. For example, information entered in the Wang on January 5th and included in the December 31st (or January 1st) HAD Loan Reports should be included in the schedules for the month of December.

e. The Accounting Technician should forward SCHEDULE's I, II, III, and IV to Fiscal on a routine basis, preferably weekly. The Fiscal section will complete the schedules and return them to HAD as documents are received by the Department of Administration. If an item submitted by HAD is indicated by Fiscal as not being recorded, it should appear on the reconciliation schedule (SCHEDULE's V, VI, and VII attached) at month end. This is an item which will be included in the HAD Loan Report for the current month, however, will not be reflected in the Current Year Authorization Balances report (PBA Report) for the month.

f. The Accounting Technician should review SCHEDULE's II, III, and IV as they are received from Fiscal for potential reconciling items. As described in [e] above, items not recorded by the Department of Administration will be reconciling items. Additionally, items recorded by the Department of Administration in the month following the month submitted by HAD will be reconciling items (i.e; included in December HAD Loan Report, however, recorded by the Department of Administration on January 10th).

3. Preparation of SCHEDULES V, VI and VII (the reconciliation schedules) on a monthly basis. These schedules are the basis of reconciling the Current Year Authorization Balances Report (PBA Report) to the HAD Loan Reports prepared at month end. A loan report should always be printed at month end. If the PBA Report has not been received by the 15th of the current month, please notify Fiscal.

Performance of the above procedures will be the first step in reconciling PBA reports to HAD reports. Should you have any questions regarding these procedures, please contact me. I will discuss these procedures with the Fiscal section immediately.

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO: The Honorable Norman Gorsuch
Attorney General
Department of Law

DATE: January 24, 1983

FILE NO:

TELEPHONE NO: 465-4709

FROM: Mark Lewis
Commissioner

SUBJECT: REQUEST FOR OPINION
HAD Service Fee

The Department of Community & Regional Affairs requests your assistance in providing an opinion on the proper source of funding of service fees paid to financial institutions by the Housing Assistance Loan Fund. Alaska Statute 44.47.460 states that "Before purchasing or participating in the purchase of a loan, the director shall enter into a loan servicing agreement with the private financial institution from which the loan is to be purchased." It further states that, "Under the servicing agreement, the private financial institution or the regional native housing authority shall administer the loan and may charge the division a negotiated origination or servicing fee on the division's share of the loan".

Since the inception of the Housing Assistance Loan Program (previously Non-conforming Housing Loan Program) the Division has negotiated contracts with financial institutions for the servicing of loans. After a loan has been purchased and payments from the borrower are received, the financial institutions deduct the amount of their service fee and forward the remaining remittance to the Division. The loan payments are then transmitted to the Treasury through the Division of Administrative Services, for deposit, net the service fees retained by the financial institutions. This transmittal of loan payments is performed on a monthly basis.

This procedure is not adequate to properly reflect the amount of interest revenue actually received by the State. It has been determined that to accommodate this situation, an accounting entry is required at the time of deposit to reflect the total amount of revenue received (principal and interest) and an adjustment to the expenditure journal for the service fees deducted. To accomplish this accounting adjustment, expenditure authority must be provided to the Department for the service fees. The Department is willing to go to LB&A for a request to receive and expend program receipts. A problem may exist in identifying a portion of the earnings from a loan fund, currently unrestricted revenue, as restricted revenue to pay for services rendered to the loan fund. The only other alternatives we have at this point is a supplemental request, (there is little chance it will be approved) or identifying a portion of the loan fund itself for this purpose.

was to be future legislature

Enclosure D-2

02-001A (Rev. 10/79)

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

The effect of this situation is that FY82 interest income (and corresponding expenditure amounts) are understated by over $60,000. It is anticipated that in FY83 this figure could be as high as $325,000.

Your assistance in this matter would be greatly appreciated. If you require any further information please call Bob Rehfeld at 465-4708.

March 17, 1983

To: ALL SELLER/SERVICERS

In a recent review of our seller/servicer files we have observed a lack of documentation which authorizes designated personnel to act on behalf of an originating lender. This documentation is necessary when considering the signatures on commitment contracts or agreements which the lender may enter into on behalf of a borrower with this division.

Please provide by April 15, 1983 documentation which would designate the personnel authorized to enter into contracts or agreements, along with any exceptions or limits to this authority, on behalf of your institution. The documentation should contain the statement that the authorized officer's signature carries the full faith and credit of the lender, and is a binding agreement regardless of future personnel assignments within your institution.

Thank you for your cooperation and compliance with this request.

Sincerely,

Barbara Morse-Quinn

March 11, 1983

To: ALL SELLER/SERVICERS

The Housing Assistance Division announces the reduction of interest rates for the Nonconforming Loan Program of the Housing Assistance Loan Fund. The new rates are attached. The authority for this reduction is found in AS 44.47.410 and AS 18.56.098(g).

As a reminder, all rural loan rates are fixed by the legislature and are not adjusted with State Mortgage Bond sales.

Any loan commitment issued on or after March 14, 1983 for the Nonconforming Loan Program will be at the new rate.

Sincerely,

Barbara Morse-Quinn

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

M E M O R A N D U M April 8, 1983

SUBJECT: Comparison of HB 302 and HB 305

TO: Representative Barbara Lacher
Chairman, House Community and
Regional Affairs Committee

FROM: Linn H. Asper
Legislative Counsel

You have requested a comparison of HB 302 and HB 305, concerning state housing loan programs.

Provisions that are the same in both bills:

Section 6 of HB 302, concerning eligibility for veterans interest rates on AHFC loans (AS 18.56.101), is the same as Sec. 4 of HB 305.

Section 7 of HB 302, concerning retention of a financial advisor for AHFC bond sales, is the same as Sec. 5 of HB 305.

Section 8 of HB 302, concerning application of certain provisions of the Act, is essentially the same as Sec. 11 of HB 305.

Section 9 of HB 302, repealing AS 44.47.385, is essentially the same as Sec. 12 in HB 305.

Section 10 of HB 302 (immediate effective date) is essentially the same as Sec. 14 of HB 302.

Provisions that are similar in both bills:

Sections 4 and 5 of HB 302, concerning interest rates for AHFC loans, are similar to Secs. 1 through 3 of HB 305. Each changes the method of calculating AHFC interest rates in a similar manner. HB 305 would increase the subsidized portion of AHFC loans from the

present $90,000 amount to $100,000. HB 302 makes no change in the subsidized portion of AHFC loans. HB 305 would put a 12.5 percent ceiling on AHFC interest rates. HB 302 places no ceiling on interest rates.

Provisions that are found only in HB 302:

Sections 1 through 3 of HB 302 would have the effect of increasing the amount of money that could be loaned for a single-family residence from $160,000 to $250,000.

Provisions that are found only in HB 305:

Section 6 of HB 305 would make it clear that the housing assistance loan fund (AS 44.47.380) is a revolving fund.

Section 7 of HB 305 would establish a home ownership assistance fund in the Department of Community and Regional Affairs for housing loan assistance to low and moderate income families, similar to the AHFC home ownership fund (AS 18.56.091).

Section 8 of HB 305 would allow a borrower to have both a nonconforming or rural housing loan and a loan for nonowner occupied housing, amending AS 44.47.390.

Section 9 of HB 305 would amend the method of computing interest rates for nonconforming and rural housing loans under AS 44.47.410.

Section 10 of HB 305 would redefine the term "rural" as that term is used in connection with nonconforming and rural housing loans made or purchased by the Department of Community and Regional Affairs.

Section 13 would make Secs. 7, 8, 10, and 12 of HB 305 effective January 1, 1984.

BILL ANALYSIS

RE: HB 302

SPONSOR: House Special Committee on State Loans

Program Effects of Bill

Section 6 of the bill eliminates the resident requirements affecting veterans in the past. The new provision allows a greater number of Veterans to qualify for a 1% reduction in interest rates on the mortgage.

Section 9 of the bill makes it possible for the Division to operate under one definition of rural. Moreover, Section 9 repeals the law mandating an 80%/20% in loan fund allocation for nonconforming loans. Currently rural Alaska receives 80% of the funding. Section 9 will allow the Division to allocate nonconforming funds in a more productive manner. Fiscal impact should be minimal.

Comments

The Department suggests that the effective date of Section 9 be immediate.

Mark Lewis, Commissioner

21-P1LH

IV. Analysis for HB 302

It is estimated that AHFC would receive 250 additional loans that they do not now receive which require an additional $50 million of bond financing. Based on a mix of one-third veterans and two-thirds non-veterans, this would require subsidy funds of $9 million. Raising the change in the ratchet from three percent to four percent will have a cost of $20 million. If no other bills with a fiscal impact for AHFC are passed, the Corporation would be able to accommodate the $29 million cost within its current FY 84 $150 million capital budget request.

April 6, 1983
Proposed House Bill 302

REMARKS BY REPRESENTATIVE RICK UEHLING

The bill before you today is House Bill 302, "An Act relating to the Alaska Housing Finance Corporation; relating to rural and nonconforming housing loans; and providing for an effective date." It makes a number of substantive changes in the present AHFC program.

First, it establishes a new limit of $250,000 for first mortgages purchased by AHFC -- thereby deleting the provision that loan limits be tied to the Federal National Mortgage Association limits. For example, the total amount loaned for a single family residence is $160,000 under FNMA limits. The legislation before you raises that limit to $250,000.

Secondly, it eliminates the "Roger's Ratchet" and sets a flat four percent subsidy on all loans up to $90,000. Over that, the cost of funds are the determining factor. Essentially, this bill eliminates unnecessary language in present statute and allows the subsidy to be at a constant level. This gives AHFC and the Legislature a consistent level of appropriation for future fiscal years. In essence, this streamlines and simplifies present law.

Thirdly, this legislation cleans up existing statute in the section defined as "eligible veteran" by deleting questionable residency requirements and changing the National Guard and Reserve service requirement. This change has been suggested by the Governor in HB 305.

Fourthly, this bill makes the retention of a financial advisor by the AHFC for the negotiation of private sales of bonds optional instead of mandatory.

The fifth, and final, point I would like to make is that this legislation repeals the allocation formula for nonconforming housing, which is based on population.

Department of Community and Regional Affairs

Analysis
of
Proposed Amendments to HB 302

1. Section 3 (page 1 line 22) - Includes language to limit the effects of this section to single family dwellings. This has impact on AHFC only and is a change requested by them. Limits for Housing Assistance Division programs are set by the Federal National Mortgage Association and are $162,450 for single family dwellings and $207,750 for duplexes. No effect on HAD.

2. Section 4 (page 1 line 27) - The amount up to which the subsidized interest rates set by this section are applicable is changed from $90,000 to $100,000. Again this is an AHFC requested amendment and would have no impact upon HAD programs.

3. Section 8 (page 3, line 26) - This changes the sections of HB 302 addressed by section 8 from sections 4 and 5 to sections 1 through 5. These sections apply to AHFC mortgages only. This would have no effect upon HAD programs.

4. Section 8 (page 3, line 28) - Changes bonds <u>issued</u> to bonds <u>sold</u> and includes language to cover use of any other available funds. Again this alteration has no effect upon HAD programs.

M E M O R A N D U M March 29, 1983

SUBJECT: AHFC and housing assistance loans (HB 302, Work Order No. 13-1140)

TO: Representative Rick Uehling

FROM: Linn H. Asper
Legislative Counsel

You have asked for a sectional analysis of HB 302, relating to the Alaska Housing Finance Corporation and housing assistance loans administered by the Department of Community and Regional Affairs.

Section 1 deletes the provision that now ties the maximum amount of AHFC loans to Federal National Mortgage Association limits.

Section 2 makes the same deletion with regard to second mortgages that Sec. 1 makes for first mortgages.

Section 3 establishes a new limit of $250,000 for first mortgages purchased by AHFC, and a limit of $250,000 for second mortgages when combined with the outstanding balance of the first mortgage.

Section 4, in combination with the repeal of AS 18.-- 56.098(g)(2) made in Sec. 9 of the bill, eliminates the "Rogers ratchet" method of determining interest rates on AHFC loans. Instead, a flat four percent subsidy is enacted so that the interest rate on an AHFC loan will be four percent less than the cost of funds for that loan, with two exceptions:

(1) if the cost of funds is less than 10 percent, the interest rate equals the cost of funds; and

(2) if the cost of funds is more than 10 percent the interest rate may not be less than 10 percent.

Section 5 makes technical changes to AS 18.56.098(g)(5) to conform that paragraph with the changes made elsewhere in the section.

Section 6 changes the definition of "eligible veteran" for the purposes of the increased veteran's subsidy for AHFC loans, by deleting questionable residency requirements and by changing the national guard and reserve service requirements.

Section 7 makes the retention of a financial advisor by the AHFC for the negotiation of private sales of bonds optional instead of mandatory.

Section 8 is a transitional provision that ties the changes in the method used to compute AHFC interest rates to bond sales that take place after the effective date of the Act.

Section 9 repeals AS 18.56.098(g)(2), referred to above in connection with Sec. 4, and repeals AS 44.47.385, which established an allocation formula, based on population, for nonconforming housing loan money administered by the division of housing assistance in the Department of Community and Regional Affairs.

Section 10 provides an immediate effective date for the Act.

12/029

SUMMARY COMPARISON OF HB 302 AND HB 305

EXISTING	HB 302	HB 305	COMMITTEE DETERMINATION
Maximum subsidized portion of AHFC Loans is $90,000	$90,000	$100,000	
Contains several residency requirements for Veterans	Eliminates special Veteran residency requirements	Eliminates special Veteran residency requirements	
Requires AHFC to retain independant financial advisor for bond sales	Makes bond advisor optional	Makes bond advisor optional	
Requires Department of Community and Regional Affairs (DCRA) to commit 80 percent of funds to rural loans, and 20 percent to urban areas.	Eliminates 80-20 requirement	Eliminates 80-20 requirement	
Persons with subsidized loans for non-owner occupied housing can not have additional loan for owner occupied	No change	Permits borrowers to have loans for owner occupied and non-owner occupied housing	
No specific loan fund for low and moderate income housing in DCRA that is similar to AHFC program	No change	Establishes a revolving loan fund in DCRA for low and moderate income housing. Provides for interest rates to be ¼% higher than the taxable bond rate for urban non-conforming housing than for rural non-conforming housing. Provides for loans 1% less than the taxable bond rate for rural housing loans, but not for urban housing loans.	

EXISTING	HB 302	HB 305	COMMITTEE DETERMINATION
Maximum limit on loans for single family residences are tied to Federal Nat'l Mortgage Association (FNMA) ($162,450) same provisions apply to second mortages.	Removes linkage to FNMA and establishes maximum loan for single family residences at $250,000. Same limits $250,000 for second mortages.	No change to existing law.	
AHFC provides 3 percent maximum subsidy rate on loans.	Establishes 4 percent subsidy except: (a) if cost of funds is less than 10%, the interest rate equals the cost of funds. (b) if cost of funds is more than 10%, the interest rate may not be less than 10 percent.	Same as HB 302 but adds: the interest rate may not exceed 12.5 percent.	
Definition of rural: AS 44.47.560 "rural" means: (a) a community in the second, third, or fourth judicial district of the state with a population of 4,500 or less that is not connected by road or rail to Anchorage or Fairbanks; or (b) a community in the first judicial district of the state with a population of 4,500 or less;	No change	"rural" means of or relating to a community in the state with a population of 4,500 or less, as determined by the department under AS 29.88.015, that (a) is not connected by road or rail to Anchorage or Fairbanks; or (b) is connected by road or rail to Anchorage or Fairbanks, but is more than 100 air miles from Anchorage and from Fairbanks.	

(1) nonconforming and rural housing mortgage loans;

(2) loans made for building materials for nonconforming and rural housing;

(3) loans made for renovations or improvements to nonconforming and rural housing;

(4) loans made for the construction of owner-occupied nonconforming and rural housing other than loans to builders or contractors or loans that compensate an owner for the owner's labor or services in constructing the owner's own housing. (§ 73 ch 106 SLA 1980; am § 6 ch 115 SLA 1981; am § 38 ch 113 SLA 1982)

Effect of amendments. — The 1981 amendment added "originate" preceding "purchase" in the second sentence of the introductory language and added paragraph (4).

The 1982 amendment, effective June 25, 1982, substituted "housing assistance loan fund" for "nonconforming housing loan fund" in one place in the first sentence and in two places in the second sentence, and inserted "and rural" in paragraphs (1)-(4).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 44.47.385. Eligible locations. (a) The director may make loans from the housing assistance loan fund only for nonconforming and rural housing loans to qualified buyers for nonconforming and rural housing.

(b) Not more than 20 percent of the total principal amount of loans made for nonconforming housing may be made in cities of organized boroughs and service areas of unified municipalities where the population of the city or service area exceeds 3,500.

(c) For purposes of (b) of this section, population shall be determined with reference to the 1980 preliminary census report as published in "Alaska 1980 Population" and released January 1, 1981, by the Department of Labor.

(d) In allocating money under (b) of this section, if a home proposed for financing is in more than one service area, that home shall be considered to be in the service area with the smallest population. (§ 17 ch 115 SLA 1981; am § 39 ch 113 SLA 1982)

Effect of amendments. — The 1982 amendment, effective June 25, 1982, in subsection (a), substituted "housing assistance loan fund" for "nonconforming housing loan fund" and inserted "and rural" in two places.

Sec. 44.47.390. Limitations on use of housing assistance loan fund. The director may not use the money in the housing assistance loan fund to

(1) originate a direct loan or purchase or participate in the purchase of a nonconforming or rural housing mortgage loan that exceeds the limitations on mortgage loans purchased by the Federal National Mortgage Association as to principal amount or loan-to-value ratio;

(f) A regulation adopted under (b) — (e) of this section becomes effective immediately upon its adoption by the board, unless otherwise specifically provided by the order of adoption.

(g) The provisions of (b) — (e) of this section do not apply to regulations governing interest rates on the corporation's mortgage loan programs.

(h) The board shall adopt regulations in accordance with (a)—(f) of this section which establish a procedure by which a seller of mortgage loans may appeal a decision of the corporation not to purchase mortgage loans offered by the seller. (§ 5 ch 167 SLA 1978; am § 19 ch 106 SLA 1980; am § 17 ch 113 SLA 1982)

Effect of amendments. — The 1982 amendment, effective June 25, 1982, added paragraph (5) to subsection (c).

Sec. 18.56.096. Limitation on power to make or purchase mortgage loans. The corporation may not make, participate in the making of, purchase, or participate in the purchase of

(1) a first mortgage loan under this chapter that exceeds the limitations on first mortgage loans purchased by the Federal National Mortgage Association as to principal amount and loan-to-value ratio; or

(2) a second mortgage loan the amount of which, when combined with the principal balance of a first mortgage loan on the property, exceeds the limitation on the amount set out in (1) of this section or that has a loan-to-value ratio, when considered with the principal balance of the first mortgage loan, that exceeds 90 percent.

(3) a mortgage loan to finance the purchase of new housing or for the improvement or rehabilitation of existing housing, unless the construction, improvement, or rehabilitation work has been performed by a contractor who is registered to work as a contractor under AS 08.18; this paragraph does not apply if the construction, improvement, or rehabilitation work

(A) has been totally or substantially performed by the borrower;

(B) has been performed by a borrower who acts as the contractor for the construction, improvement, or rehabilitation work; or

(C) has been performed in an area designated by the corporation as exempt from the requirements of this paragraph because of the unavailability of registered contractors in that area. (§ 27 ch 106 SLA 1980; am § 3 ch 115 SLA 1981; am § 18 ch 113 SLA 1982)

Effect of amendments. — The 1982 amendment, effective June 25, 1982, added paragraph (3).

Sec. 18.56.098. Special mortgage loan purchase program. (a) The corporation shall establish a special mortgage loan purchase program. Under the special mortgage loan purchase program, the corporation may purchase first or second mortgage loans, including graduated payment mortgage loans, made for the purchase, improvement, or rehabilitation of residences.

(b) The corporation shall adopt regulations under AS 18.56.088 to establish minimum construction standards which a residence must meet before the corporation may purchase a mortgage loan on the residence under (a) of this section. The minimum construction standards shall include standard deviations from the minimum construction standards to allow the corporation to purchase loans on residences which do not meet the minimum construction standards but which are certified by an engineer to be within the standard deviations. The standard deviations shall include, but are not limited to, provisions relating to water holding tanks, on-site water and sewer systems, and foundations.

(c) The corporation may pledge mortgage loans purchased by the corporation under (a) of this section, mortgage loans assigned to the corporation for the special mortgage loan purchase program, and mortgage loans purchased with amounts appropriated to the corporation for the special mortgage loan purchase program to pay the principal, interest, and redemption premium, if any, on bonds or bond anticipation notes issued by the corporation for the special mortgage loan purchase program and may expend amounts appropriated to the special mortgage loan purchase program for mortgage loan subsidies or other purposes of the program as necessary to cause the interest rate on mortgage loans purchased under the special mortgage loan purchase program and retained by the corporation or sold under AS 18.56.099 to equal the rates specified in this section.

(d) Repealed by § 51 ch 115 SLA 1981.

(e) The corporation shall establish regulations in accordance with AS 18.56.088 to implement the special mortgage loan purchase program. The regulations shall include provisions allowing, prohibiting, or restricting the right to assume or the right to provide for the payment of mortgage loans purchased under (a) of this section by a person other than the mortgager. A provision in a mortgage loan purchased by the corporation after June 30, 1981, that prohibits or restricts the right to assume or the right to provide for the payment of mortgage loans is enforceable. The corporation shall enforce the regulations adopted under this subsection.

(f) In this section and in AS 18.56.099,

(1) "graduated payment mortgage loan" means a mortgage loan the terms of which provide for monthly principal and interest payments which

(A) during the first year of the mortgage loan are lower than the monthly principal and interest payments that would be required under the terms of a level payment mortgage loan made at the same interest rate; and

(B) during subsequent years of the mortgage loan are graduated to provide for the same return over the term of the loan that would have been provided by a level payment mortgage loan made at the same interest rate;

(2) "mortgage loan" includes a beneficial interest or participation in a mortgage loan;

(3) Repealed by § 51 ch 115 SLA 1981.

(4) "residence" means an owner-occupied, single-family residence, including a mobile home, or an owner-occupied duplex, triplex or four-plex.

(g) The corporation shall establish the interest rate on a first mortgage loan purchased under (a) of this section in accordance with the following:

(1) The interest rate on the first $90,000 of a mortgage loan purchased with the proceeds of the first issue of taxable bonds of the corporation is 10 percent or the cost of funds, whichever is less.

(2) The interest rate on the first $90,000 of a mortgage loan purchased with the proceeds of a second or subsequent issue of taxable bonds of the corporation shall be determined as follows:

(A) If the cost of funds of an issue of taxable bonds is more than the cost of funds of the preceding issue of taxable bonds, the interest rate shall be increased by an amount equal to the difference between the cost of funds of the two bond issues.

(B) Except as provided in (C) and (D) of this paragraph and (3) of this subsection, the interest rate may not be less than 10 percent and may not be reduced.

(C) If the difference between the cost of funds of an issue of taxable bonds and the interest rate established for a mortgage loan purchased with the proceeds of the previous issue would be equal to or less than three percent, the interest rate on mortgage loans purchased with the proceeds of that taxable bond issue and subsequent taxable bond issues is three percent less than the cost of funds of the taxable bond issue that is used to purchase the mortgage loan.

(D) The interest rate on a mortgage loan purchased with the proceeds of a taxable bond issue may not be less than 10 percent unless the cost of funds of the taxable bond issue is less than 10 percent, in which case the interest on a mortgage loan purchased with the proceeds of a taxable bond issue is equal to the cost of funds.

(E) If the proceeds of a taxable bond issue are to be used only for the purchase of mortgage loans for triplex and four-plex residences, the cost of funds of that bond issue is not considered in determining the interest rate on the first $90,000 of a mortgage loan. The interest rate

on the first $90,000 of a mortgage loan that is purchased with the proceeds from a taxable bond issue used solely for the purchase of mortgage loans for triplex and four-plex residences is equal to the interest rate, as determined under this paragraph, on a mortgage loan purchased with the proceeds of the preceding issue of taxable bonds.

(3) An interest rate determined under this subsection on the first $90,000 of a mortgage loan that is not purchased from the proceeds of bonds that are qualified veterans' mortgage bonds under the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103(A)), as amended, shall be reduced by one percentage point if the loan is made to an eligible veteran under AS 18.56.101.

(4) The interest rate for the amount of a mortgage loan purchased under (a) of this section that exceeds $90,000 is equal to the cost of funds to the corporation attributable to that part of the loan.

(5) The interest rate on a mortgage loan purchased from money appropriated to the corporation is the rate the corporation determines is appropriate by application of the provisions of (1) — (4) of this subsection. The rate may be based on an estimate of the cost of funds of a proposed issue or issues of bonds.

(6) The interest rate on the first $90,000 of a mortgage loan purchased from the proceeds of bonds that are exempt from taxation under the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103(A)), as amended, other than bonds that constitute qualified veterans' bonds under (i) of this section, is 10 percent or the cost of the funds, whichever is less. A higher or lower interest rate shall be established on the entire loan amount if required under the Mortgage Subsidy Bond Tax Act.

(7) In this subsection

(A) "cost of funds" means the true interest cost expressed as a rate on bonds of the corporation plus an additional percentage as determined by the corporation to represent the allocable expenses of operation, costs of issuance, and mortgage servicing;

(B) "taxable bonds" means bonds bearing interest that is taxable under the provisions of the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103A) issued to finance the purchase of first mortgage loans.

(h) The corporation shall establish the interest rate on a second mortgage loan purchased under (a) of this section in the manner established for computing the interest rates on a first mortgage loan under (g) of this section except that, in the case of a second mortgage loan, if the first mortgage loan made to the same borrower is held by the corporation and was purchased under the special mortgage loan purchase program, the outstanding principal balance of the existing first mortgage loan is subtracted from $90,000 to determine the amount of the loan that is eligible for an interest rate on a second mortgage loan determined by reference to (g) of this section.

(i) The interest rate on the first $90,000 of a mortgage loan purchased from the proceeds of bonds that constitute qualified veterans'

mortgage bonds under the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103(A)) as amended, is the greater of (1) four percent less than the cost of funds or (2) the rate for other loans to veterans under AS 18.56.098(g)(3). A higher or lower interest rate shall be established on the entire loan amount if required under the Mortgage Subsidy Bond Tax Act of 1980.

(j) If the money used to purchase a mortgage loan made to a veteran under this section comes from an issue of bonds of the corporation guaranteed by the state, each bond must be issued as part of an issue substantially all of the proceeds of which are used to provide residences for qualifying veterans. In this subsection a qualifying veteran is a person who is a "qualified veteran" as the term is defined or may subsequently be defined under the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103(A)), as amended.

(k) The interest rate limitations of AS 45.45.010 do not apply to loans purchased under this section or to loans that the corporation has, in any manner, committed itself to purchase. (§ 27 ch 106 SLA 1980; am §§ 4 — 7, 51 ch 115 SLA 1981; am § 1 ch 35 SLA 1982; am §§ 19 — 24 ch 113 SLA 1982)

Effect of amendments. — The first 1982 amendment, effective May 18, 1982, in subsection (h), inserted "in the case of a second mortgage loan, if the first mortgage loan made to the same borrower is held by the corporation and was purchased under the special mortgage loan purchase program."

Sections 19, 20 and 24, ch. 113, SLA 1982, the second 1982 amendment, effective June 25, 1982, added "triplex or four-plex" to the end of paragraph (4) of subsection (f), added subparagraph (2)(E) to subsection (g), and added subsection (k). Sections 21-23 of ch. 113 inserted the language beginning "that is not purchased from the proceeds of bonds" and ending "as amended" in paragraph (3) of subsection (g), inserted "as amended, other than bonds that constitute qualified veterans' bonds under (i) of this section" in paragraph (6) of subsection (g), and added subsections (i) and (j).

Section 76, ch. 113, SLA 1982, makes §§ 21-23 of the act effective on the date of approval by the voters of the state of a constitutional amendment to Alaska Const., art. IX, § 8 to allow the state to contract debt for housing loans for veterans. Such an amendment to the Alaska constitution may be found in Legislative Resolve No. 18, SLA 1982, to be voted on at the next general election to be held in November, 1982.

Editor's notes. — Section 68, ch. 113, SLA 1982, provides: "If a newly constructed owner-occupied triplex or four-plex is completed between the effective date of this Act [June 25, 1982] and October 1, 1984, and the triplex or four-plex is eligible for financing under the provisions of the special mortgage loan purchase program of the Alaska Housing Finance Corporation (AS 18.56.098), the interest rate determined under AS 18.56.098(g)(2), (3) and (6) shall apply to the first $105,000 of a mortgage loan for a triplex and to the first $140,000 of a mortgage loan for a four-plex. In this section "newly constructed owner-occupied triplex or four-plex" means an owner-occupied triplex or four-plex that is not occupied before the effective date of this Act and for which a mortgage loan has not been previously purchased by the Alaska Housing Finance Corporation."

Sec. 18.56.100. Housing development fund. (a) There is created a housing development fund to be administered by the corporation as a trust fund separate and distinct from any other money or funds administered by the corporation.

(4) security for repayment shall be specified and shall be upon terms and conditions as the corporation considers necessary or practicable to insure all repayments. (§ 1 ch 107 SLA 1971; am § 4 ch 81 SLA 1972; am § 28 ch 106 SLA 1980)

Effect of amendments. — The 1980 amendment, in subsection (e), substituted "money" for "funds" following "purposes of providing" and deleted the former second through fifth sentences of that subsection which read: "The commissioner of revenue is authorized to purchase fund notes with surplus funds in the state treasury. Before submission of the executive budget to the legislature, the commissioner of revenue shall annually recommend to the governor the anticipated amounts of surplus funds available for purchase of fund notes in the fiscal year encompassed by the budget. In making his recommendation to the governor, the commissioner of revenue shall consider the expenditure and revenue projections contained in the most recent revenue source document prepared for and submitted to the legislature by the administration. If the governor agrees with the recommendation of the commissioner of revenue, he shall forward the recommendation to the corporation.

Sec. 18.56.101. Eligibility for veterans' interest rates. The following persons are eligible veterans for the purposes of AS 18.56.098(g) and (h):

(1) a person who served in the armed forces of the United States for 90 days or more, or whose service was for less than 90 days because of injury or disability incurred in the line of duty, after April 6, 1917,

(A) who at the time of induction into the service was a resident of the territory or state, who had been a resident for not less than one year immediately before his induction, and who returned to the territory or state within one year after discharge as a resident with the intention of remaining in the territory or state; or

(B) who, not being a bona fide resident of the territory or state at the time of entry into the service, has been a resident of the territory or state for at least one year at the time of the loan application and has been a resident of the territory or state for at least five years; and

(C) whose discharge was under honorable conditions;

(2) the widow or widower of a member of the armed forces of an eligible veteran if

(A) the member or veteran was a resident of the territory or state for one year before induction into the service;

(B) the member or veteran served in the armed forces for at least 90 days after April 6, 1917; and

(C) his discharge was under honorable conditions;

(3) a person who has served in the Alaska Army National Guard, the Alaska Air National Guard, or the Alaska Naval Militia or who has served in a reserve unit of the United States armed forces in Alaska if the reserve unit required, as a minimum, one weekend each month of duty and 15 consecutive days of active duty training each year for not less than five years and whose discharge was under honorable conditions. (§ 29 ch 106 SLA 1980; am § 8 ch 115 SLA 1981)

AS 18.56.098

(5) The interest rate on a mortgage loan purchased from money appropriated to the corporation is the rate the corporation determines is appropriate by application of the provisions of (1) — (4) of this subsection. The rate may be based on an estimate of the cost of funds of a proposed issue or issues of bonds.

(6) The interest rate on the first $90,000 of a mortgage loan purchased from the proceeds of bonds that are exempt from taxation under the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103A) is 10 percent or the cost of the funds, whichever is less. A higher or lower interest rate shall be established on the entire loan amount if required under the Mortgage Subsidy Bond Tax Act.

(7) In this subsection

(A) "cost of funds" means the true interest cost expressed as a rate on bonds of the corporation plus an additional percentage as determined by the corporation to represent the allocable expenses of operation, costs of issuance, and mortgage servicing;

(B) "taxable bonds" means bonds bearing interest that is taxable under the provisions of the Mortgage Subsidy Bond Tax Act of 1980 (26 U.S.C. 103A) issued to finance the purchase of first mortgage loans.

(h) The corporation shall establish the interest rate on a second mortgage loan purchased under (a) of this section in the manner established for computing the interest rates on a first mortgage loan under (g) of this section except that the outstanding principal balance of the existing first mortgage loan is subtracted from $90,000 to determine the amount of the loan that is eligible for an interest rate on a second mortgage loan determined by reference to (g) of this section. (§ 27 ch 106 SLA 1980; am §§ 4 — 7, 51 ch 115 SLA 1981)

Effect of amendments. — The 1981 amendment added "first or second" preceding "mortgage loans," added "improvement, or rehabilitation" preceding "of residences," deleted paragraph designation (1) preceding "for the purchase" and deleted "or (2) for the refinancing of a mortgage loan on a residence if the purpose of the refinancing is to provide money for the improvement or rehabilitation of the residence" in subsection (a). In subsection (c), the amendment added the language beginning "and may expend amounts" and ending "equal the rates specified in this section" near the end of the subsection. In subsection (e), the amendment substituted "the" for "in order to discourage the speculative use of mortgage credit under the special mortgage loan purchase program for purposes other than home ownership, the" at the beginning of the second sentence, substituted "restricting" for "otherwise setting conditions on" preceding "the right to assume," added "or the right to provide for the payment of" preceding "mortgage loans purchased" and added "by a person other than the mortgagor" following "of this section" at the end of the second sentence and added the present third and fourth sentences of the subsection. The amendment also added subsections (g) and (h) and repealed subsection (d) concerning interest rates charged on mortgage loans purchased under subsection (a) and repealed subsection (f) (3) which defined "mortgage program cost."

Editor's notes. — For 1980 priorities in the purchase of mortgage loans by the Alaska Housing Finance Corporation, see § 11, ch. 106, SLA 1980, in the 1980 Temporary and Special Acts and Resolves.

Effect of amendments. — The 1981 amendment added subsection (g).

Sec. 18.56.115. Independent financial advisor. In negotiating the private sale of bonds or bond anticipation notes to an underwriter, the corporation shall retain a financial advisor who is independent from the underwriter. (§ 4 ch 102 SLA 1974; am § 2 ch 130 SLA 1978)

Effect of amendments. — The 1978 amendment rewrote this section.

Sec. 18.56.120. Validity of any pledge. The pledge of assets or revenues of the corporation to the payment of the principal or interest on any obligations of the agency is valid and binding from the time the pledge is made and any such assets or revenues are immediately subject to the lien of the pledge without physical delivery or further act. The lien of any pledge is valid and binding against all parties having claims of any kind in tort, contract or otherwise against the corporation, irrespective of whether those parties have notice of the lien of the pledge. Nothing her[illegible] prohibits the corporation from selling assets subject to any pledge, except that any sale may be restricted by the trust agreement or resolution providing for the issuance of the obligations. (§ 1 ch 107 SLA 1971)

Sec. 18.56.125. Capital reserve fund. (a) For the purpose of securing any one or more issues of its obligations, the corporation may establish one or more special funds, called "capital reserve funds", and shall pay into those capital reserve funds (1) any money appropriated and made available by the state for the purpose of any of those funds, (2) any proceeds of the sale of its obligations, to the extent provided in the resolution or resolutions of the corporation authorizing their issuance, and (3) any other money which may be made available to the corporation for the purposes of those funds from any other source. All money held in a capital reserve fund, except as provided in this section, shall be used as required, solely for (1) the payment of the principal of obligations or of the sinking fund payments with respect to those obligations, (2) the purchase or redemption of obligations, (3) the payment of interest on obligations, or (4) the payment of any redemption premium required to be paid when those obligations are redeemed before maturity; however, money in any fund may not be withdrawn from it at any time in an amount which would reduce the amount of that fund to less than the capital reserve requirement set out in (b) of this section, except for the purpose of making, with respect to those obligations, payment, when due, of principal, interest, redemption premiums and the sinking fund payments for the payment of which other money of the corporation is not available. Any income or interest earned by, or increment to, a capital reserve fund, due to the investment of the fund

A Report on Housing Financing and Related Issues, Phase I

for

Governor William Sheffield

STATE OF ALASKA

TASK FORCE ON HOUSING

A Report on Housing Financing and Related Issues, Phase I

for

Governor William Sheffield

December 1982 - January 1983

January 14, 1983

The Honorable William J. Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

It is my pleasure to present to you the following report of the Task Force on Housing. We have evaluated the issues and problem areas of providing affordable housing to Alaskans. The enclosed report represents Phase I of the Task Force's recommendations. A Phase II report which will include an investigation of low and/or special incomes, elderly and disabled handicapped programs will be forwarded when further research is concluded.

We are hopeful you will find the Task Force policy recommendations useful to develop a sound housing program. The Task Force is committed to the need to enact legislation to create a housing revolving loan fund. We are also in favor of the Permanent Fund becoming a major source of funds for the revolving fund. Many other specific recommendations have been made, but the above two issues were unanimously supported by Task Force members as being a key to establishing a long term solution to the problems in financing homes for Alaskans.

The work of the Task Force has been challenging, educational and complex, but ultimately a rewarding opportunity to explore solutions to the housing needs throughout the state of Alaska for people of every economic and sociological status.

It is our hope that you will find this report of the Task Force and its policy recommendations useful in promulgating a "Housing Plan" to serve all Alaskans.

We, on the Task Force, wish to thank you for the opportunity to serve you and the citizens of the State. It has been a satisfying experience.

Sincerely yours,

Rob Gamel

Rob Gamel
Chairman
Task Force on Housing

INTRODUCTION

GOVERNOR'S CHARGE

INTRODUCTION

GOVERNOR'S CHARGE

Governor Sheffield created a Task Force to consider housing in the State of Alaska.

On December 21, 1982 the Governor met with the Task Force and charged them with development of a "sound housing program." In elaboration Governor Sheffield directed that the Task Force consider all forms of housing to include rental, single family, special needs and programs that would reach more Alaskans, rural and urban. Special concern was to be given to providing stable and predictable programs that would promote long-term well being, opportunity and benefit the populace. The Governor directed the Housing Task Force to consider interest rates, costs, use of the Permanent Fund, public access to agencies and corporations providing for housing and the methods by which loans are made.

The Task Force accepted the charge and committed itself to finding workable solutions to provide Alaskans with affordable housing, to benefit the economy in general and to provide for real social concerns.

SUMMARY OF RECOMMENDATIONS

SUMMARY OF RECOMMENDATIONS

The following statements represent summarized recommendations of the Task Force on Housing as discussed in this report. They are offered only as a capsule of comprehensive issues presented in later sections and should be reviewed only in context of those discussions.

1. The Governor and the Legislature should create a revolving loan fund entitled the Alaska Housing Finance Fund (AHFF). This fund should be administered by the Department of Revenue.

2. The Governor should appoint an Alaska Housing Finance Fund Policy Board to be comprised of five to seven members representing all existing State housing agencies and the Alaska Permanent Fund.

3. The Governor shall direct the purpose of the Alaska Housing Finance Fund to make loans for all State housing loan programs. This fund will finance programs currently being administered by AHFC, CRA/HAD, AIDA, ASHA, Commerce or any other vehicle delivering housing loan services for the State.

4. The funding sources for creation of the Alaska Housing Finance Fund are recommended to be principal repayment and interest earned from:

   (a.) Annual General Fund appropriations;
   (b.) Mortgage bond sales;
   (c.) Blended portfolio income from existing State housing agencies;
   (d.) Federal housing loan funds dedicated to Alaska; and
   (e.) Alaska Permanent Fund investments.

5. The Task Force recommends meeting an FY'84 funding demand of $1.3 billion for statewide housing programs and presumes no absorption of currently funded federal programs. A further recommendation is to institute an 18 month funding cycle for all housing loan programs.

6. The Governor should direct the AHFF to annually determine and publish the rates of interest to be charged on housing loan programs administered by any state agency. The Legislature shall have the power to adjust rates and vary features of the various loan programs administered by each agency through fund appropriations. The Task Force recommends an irrevocable rate schedule for all programs be published annually for the following calendar year. Further, the Task Force recommends the FY'84 Legislature seek maximum rates on the first $90,000 at 10% for Conventional Financing, 9% for Veteran's Preference Financing. A 6% rate for HOF Programs, and 5% rate for energy renovation programs is also recommended. In the event the Legislature does not see fit to establish a fixed rate annually, then the interest rate spread between the cost of funds and the mortgage rate made available to borrowers should be increased to 4% to reduce the impact of accelerating interest rates.

7. Permanent Fund contributions to the AHFF should begin immediately with an FY'84 investment of not less than 3% of the body of the Fund, up to the current allowable maximum for real estate mortgages of 15%. The Task Force further recommends new legislation and/or a constitutional amendment be originated by the Governor to allow for real estate investment by the Permanent Fund of up to 25% of the corpus.

8. The Task Force recommends legislation be introduced to create a Home Ownership Fund (HOF) Program within Community and Regional Affairs, Housing Assistance Division, for specific application in rural communities. Other legislation should be introduced to remove rural or urban distinctions from Nonconforming Loan Funds for FY'82 and thereafter as administered through this agency.

9. The Task Force encourages the Alaska Housing Finance Corporation to consider a program of delegated underwriting as described in a staff paper submitted to the Task Force. A recommendation is offered for the AHFC Board to prepare such a program after receiving suggestions from mortgage bankers, home builders, and other affected members of the public.

10. The Task Force recommends regional housing information offices be opened in Fairbanks and Juneau as well as maintenance of rural field offices in Bethel, Nome, Kotzebue, and Dillingham within Community and Regional Affairs, Housing Assistance Division.

11. The Task Force has identified the following housing related issues for further consideration and in need of in-depth investigation by another group charged with more specific responsibilities: forward commitments; reservation system for funding; shared appreciation mortgages; third party programs for participation, bridging sales and interest rate buy-downs; discount points; conventional and uniform underwriting standards; clear and concise lending and approval procedures; apportionment and restructuring of the various housing related boards; development of a housing interagency liason; masterplan for rental, low-income and special needs housing; develop incentive programs for low-income housing projects.

12. The Task Force recommends publication and distribution of existing housing programs information in all public agency locations in Alaska.

13. The Task Force concludes that a comprehensive report on housing issues must include an investigation of low and/or special incomes, elderly and disabled handicapped programs. It was also concluded that further investigation of these complex subjects was necessary. A special committee charged with publication of a Phase II Report has been created by the Task Force to accomplish this further investigation.

14. The Task Force recommends extension of the sunset provision on tax exempt revenue housing bonds known as the Uhlman Act. The Governor and the Legislature are asked to convey this recommendation to our Congressional Delegation in Washington, D.C.

RECOMMENDATIONS AND NARRATIVE STATEMENTS

ALASKA HOUSING FINANCE FUND

Recommendation #1: The Governor and the Legislature should create a revolving loan fund entitled the Alaska Housing Finance Fund (AHFF). This fund should be administered by the Department of Revenue.

Narrative: The Task Force has concurred in recommending the establishment of Alaska Housing Finance Fund, a revolving loan fund to be established within the confines of the Department of Revenue. It is our recommendation that Alaska Housing Finance Fund (AHFF) be the source of funding for all housing programs including those of Alaska Housing Finance Corporation, Alaska Industrial Development Authority, Housing Assistance Division of Community and Regional Affairs, Alaska State Housing Authority, Division of Business Loans of the Department of Commerce and such other appropriate agencies. We believe the most effective use of the funds for housing could be obtained by having AHFF established as the central source and depository for funding of all of the housing programs in the state of Alaska.

Administration of AHFF would be by the Department of Revenue under the direction of the Commissioners of Revenue, Community and Regional Affairs, and Commerce, together with the Directors of the various agencies directly involved in the funding of housing plus appropriate public members. This policy board would meet on a regular basis to establish the priorities for investment of housing funds by AHFF. Hands-on management would be accomplished by the Department of Revenue.

AHFF would be a revolving fund to receive mortgage principal repayments, mortgage interest and other receipts not pledged to pay bond debt service of all the above agencies. Money so received and held by the Fund could be spent for any of its authorized purposes including, of course, the making of additional mortgage loans. All appropriations for the financing of housing would be deposited with the Fund and the Fund would reserve any excess subsidy appropriations not spent in a particular fiscal year which might otherwise lapse.

The Fund would be authorized to borrow, pledge its assets, issue bonds, notes of indebtedness, collect funds, invest monies and do whatever else is necessary to enhance the growth and development of the Fund. Its purpose would be simply to provide a vehicle for

furnishing monies necessary for each finance agency on an on-going basis. It is contemplated the fund would be authorized by statute to borrow from or receive monies directly from the Permanent Fund.

Questions of constitutionality of a revolving loan fund receiving and retaining all earnings from its assets have been raised. The Task Force recommends steps be immediately taken to clarify the status of earnings of such a Fund and if it is determined such action may be unconstitutional, then the necessary legal steps be taken to place the matter before the voters to change the State's constitution. It is paramount that the principal and interest payments remain in the AHFF if it is ever to become self-perpetuating.

AHFF could be the vehicle with adequate state appropriations, investment from the Permanent Fund and by reinvesting mortgage prepayments and interest to effectively develop a self-perpetuating, revolving loan fund that would free the state housing industry from the vagaries of world money markets.

AHFF POLICY BOARD

Recommendation #2: The Governor should appoint an Alaska Housing Finance Fund Policy Board to be comprised of five to seven members representing all existing State housing agencies and the Alaska Permanent Fund.

Narrative: The agencies that presently participate in housing programs may or may not currently benefit from unified policy making. Many of them have their own governing bodies or oversight committee. An Alaska Housing Finance Fund Policy Board could serve to reduce the number of like panels while promoting a consistent policy throughout each agency.

AIDA, ASHA, CRA, AHFC, Commerce, and the Alaska Permanent Fund could each be represented along with public members. Financial policy and administrative policy would originate, be controlled and evaluated from the same board. The Policy Board could also be the single point of contact for legislative and administrative action.

Our present system may not be subject to recomposition. The Permanent Fund Trustees have a different charter than the governing bodies of ASHA or AHFC. However, the special nature of each housing agency is not a defense for independence and the absence of common goals. Managerial tasks will provide independence under a common policy established by the Board.

A Policy Board could contribute to better definition of housing programs in the public's perception. One clearly defined source of information would certainly provide for better understanding of public policy.

Legislative funding and clarity in the budget process are other benefits. The Policy Board might receive and disburse the funds designated for the separate entities. The Policy Board then becomes the clearing house for the state housing agencies. Existing boards would then be reduced and a simplified, more efficient system evolve.

This Policy Board proposal does not create a panacea. It does, however, provide for an immediate improvement in the achievement of the housing program goal. In its simplest form it would insure that all state housing programs would be coordinated, clear in their missions and with suitable interagency distinctions to provide attainment of objectives.

PURPOSE OF AHFF

Recommendation #3: The Governor shall direct the purpose of the Alaska Housing Finance Fund to make loans for all State housing loan programs. This fund will finance programs currently being administered by AHFC, CRA/HAD, AIDA, ASHA, Commerce or any other vehicle delivering housing loan services for the STate.

Narrative: The Alaska Housing Finance Fund is recommended as an oversight fund for delivery of all housing services in Alaska. While like item agency requests would be maintained, appropriations (exclusive of grant funds) to meet those requests would go into the AHFF for annual allocation to each agency and program. Annual agency performance would be evaluated by AHFF managers and incorporate review of all state housing loan programs. Further, all new requests would be reviewed by AHFF. No direct appropriations to any individual, group or community for housing or housing related development should be funded without concurrence of AHFF managers. Finally, Fund managers are encouraged to contact any state agency currently providing employee housing and bring all future employee housing development under its review.

FUNDING SOURCES

Recommendation #4: The funding sources for creation of the Alaska Housing Finance Fund are recommended to be principal repayment and interest earned from:

a. Annual General Fund appropriations;
b. Mortgage bond sales;
c. Blended portfolio income from existing State housing agencies;
d. Federal housing loan funds dedicated to Alaska; and
e. Alaska Permanent Fund investments.

Narrative: The table below outlines current housing loan programs available in Alaska. Funding sources for FY'84 are presumed to be a continuation of the FY'83 levels described in this table. It should be noted that existing grant programs for housing are not included in financing of the AHFF in this report. It would be desirable, however, to have all housing grant funding reviewed by the AHFF Policy Board to avoid duplication of service for any one location or to any particular interest group.

FUNDING DEMAND

Recommendation #5: The Task Force recommends meeting an FY'84 funding demand of $1.244 billion for statewide housing programs and presumes no absorption of currently funded federal programs. A further recommendation is to institute a 18 month funding cycle for all housing loan programs.

Narrative: The Task Force reviewed projected FY'84 departmental budgets for the five state agencies involved with housing programs. The chart below outlines the total projected demand and the current budget request of each agency. The chart also identifies where additional funds will be needed, as labeled in the column titled "Unappropriated Balance"

FY84 (In Millions)

Projected Demand		Projected General Fund Appropriations	Unappropriated Balance
AHFC	$1,100	$250	$850
CRA/HAD	50	50	-0-
Commerce/Energy Loans	11	11	-0-
AIDA	75	-0-	-0- (1)
ASHA	8	8	-0-
	$1,244	$319	$850 (2)

(1) AIDA operates in the tax exempt bond markets and passes 100% of the costs of its funds to its borrowers. In 1982 the Legislature appropriated $21 million to AIDA in order to be pledged as reserves for tax exempt bond sales. Therefore, AIDA will not request an additional general fund appropriation for FY84 to sell a projected $75 million in bonds.

(2) The unappropriated balance of $850 million for AHFC can be funded by the following means:

Unappropriated Balance (in millions)		$850
General Obligation Bonds (Veterans) projected	$300	
Tax exempt bonds projected	100	
Other earnings projected	50	(450)
Subtotal		$400
Amount funded through taxable bond sales and/or Permanent Fund investments		(400) (3)
Total Unfunded		-0-

(3) Most likely due to leveraging the general fund appropriation, the amount of additional borrowings will be close to $500 million.

The Task Force recommends as further explained in recommendation #7 that the Permanent Fund be utilized as an investment vehicle to supply as much as $500 million to the AHFF in FY84. This could save the AHFF millions of dollars of costs associated with marketing, advertising and underwriting massive bond sales as well as to bring home a portion of the Permanent Fund to Alaskans.

Further, the Task Force recommends a one time eighteen month appropriation to the AHFF. Subsequent sessions of the Legislature will only need to make a normal twelve month appropriation.

This will help create stability in the AHFF by eliminating the uncertainty that the public faces every spring. In recent years the capital budget has not been passed by the Legislature and signed by the the Governor until May or June. This has caused considerable concern to the public by the fact that the entire existence of the various programs are up for renewed funding and possible restructuring, or even elimination by the Legislature or Governor.

INTEREST RATES

Recommendation #6: The Governor should direct the AHFF to annually determine and publish the rates of interest to be charged on housing loan programs administered by any state agency. The Legislature shall have the power to adjust rates and vary features of the various loan programs administered by each agency through fund appropriations. The Task Force recommends an irrevocable rate schedule for all programs be published annually for the following calendar year. Further, the Task Force recommends the FY'84 Legislature seek maximum rates on the first $90,000 at 10% for Conventional Financing, 9% for Veteran's Preference Financing. A 6% rate for HOF Programs and 5% rate for energy renovation programs is also recommended. In the event the Legislature does not see fit to establish a fixed rate annually, then the interest rate spread between the cost of funds and the mortgage rate made available to borrowers should be increased to 4% to reduce the impact of accelerating interest rates.

Narrative: The Task Force wrestled with the problem of establishing interest rates on the various loan programs administered or funded by state agencies. The obvious problem faced in this matter is the adverse affect on both the economy and the ability to acquire needed shelter by citizens of this state when rates accelerate or remain at high levels for a long period of time. High interest rates contributed significantly to the depressed housing conditions existing in the late 1970's and early 1980's. The Legislature adopted a means of controlling the amount of subsidy dollars that would be required in any given fiscal year by establishing a maximum spread of 3% between the cost of funds and the actual rate paid by the borrowers. This effectively assured that the required appropriations for covering the cost differential of interest could be controlled when using bonds to fund Alaska Housing Finance Corporation, but the effect on many individuals within the State of Alaska both home buyers and builders was disastrous when rates were moving upward. The Task Force was of the opinion that steps have to be taken to avoid the horrendous results of substantial increases in the mortgage interest rates during the middle of the construction season, particularly when it is impossible to obtain forward commitments for a sufficient time to protect the builder and the home buyer. In the last critical situation, the party most affected was the owner/builder who often was not able to qualify after the interest rate increase for the home he had built for his own occupancy. It is the position of the Task Force that the Governor should direct AHFF to annually determine and publish the rates of interest to be charged on housing loan programs administered by any

state agency. Appropriately, the Legislature shall have the power to adjust rates and vary features of the various loan programs on a fiscal basis. It is the position of the Task Force that steps should be taken to ascertain in advance the needs for mortgage financing and acquire those funds from whatever source at a cost that will meet the objectives and goals of the Legislature and provide housing to the home buyers at the lowest possible cost.

Further, the Task Force recommends that the fiscal year '84 legislature set maximum rates on the first $90,000 at 10% for conventional financing and 9% for veterans financing wherein taxable bond funds must be used. It is recommended that the rate established for the homeowners fund (HOF) loans be set at a minimum of 6% and escalated in accordance with the prescribed methods of establishing rates under the existing Alaska Housing Finance Corporation program. The Task Force also recommends the continuance of the 5% energy renovation loan programs as being beneficial to citizens throughout the state.

Administration of the interest rates is a critical question and represents one of the most important reasons why the State of Alaska is involved in funding of loans. Certainly, the only other factor more important than the interest rate is the availability of funds for housing. Obviously, in times of tight money and high interest rates, to obtain a compatible situation may be impossible without a tremendous expense to the State of Alaska. If the legislature is unable to reach an agreement based upon the fixed rates, then we would recommend that the spread be increased from the above mentioned 3% to 4% for funds obtained through the sale of bonds. This would reduce the impact of accelerating interest rates and still give a measure of protection to our citizens.

In addition, it is our position that the policy board of AHFF be given authority to reduce interest rates on loans made by the revolving loan fund from time to time should the situation require.

There are many other programs wherein funds are provided by the Federal Government to assist in providing shelter for low to moderate income peoples. The State of Alaska should continue through its various agencies to make use of all such programs that will effectively reduce the required participation by the State of Alaska in funding subsidies for home finance.

PERMANENT FUND

Recommendation #7: Permanent Fund contributions to the AHFF should begin immediately with an FY'84 investment of not less than 3% of the body of the Fund, up to the current allowable maximum for real estate mortgages of 15%. The Task Force further recommends new legislation and/or a constitutional amendment be originated by the Governor to allow for real estate mortgage investment by the Permanent Fund of up to 25% of the corpus.

Narrative: The Task Force recommends that the Governor instruct the trustees of the Permanent Fund and the Alaska Housing Finance Fund to develop a plan whereby a portion of the principal of the Permanent Fund can be invested in mortgages or securities of AHFF. Initially, mortgages and/or securities of AHFC would probably represent the most marketable investments for the Permanent Fund. It is also possible that the AHFF could provide securities of AIDA for investment by the Permanent Fund.

The Permanent Fund is currently authorized to invest up to 15% of its principal in mortgages which, by regulation, are limited to variable rate mortgages. The Fund is, however, authorized to invest up to 50% in corporate stocks and debt securities under Alaska Statute 37.13.120 (g), (8). Alaska Statute 37.13.120 (g), (8) permits the investment of the Permanent Fund in "corporate debt securities which are rated AA or better by a national recognized rating service". AHFC is presently issuing bonds which receive an AA rating. In theory, the Permanent Fund could invest up to 50% of its assets in these marketable securities.

It is the recommendation of the Task Force that steps be taken immediately for the Permanent Fund to invest in mortgage originations of AHFC not less than 3% of its assets. It would be contemplated that in not more than 5 years, 15% of the assets of the Permanent Fund would be invested in mortgages in the state of Alaska.

In addition, it is the position of the Task Force that steps should be taken to introduce legislation to allow the Permanent Fund a much larger investment in Alaskan loans. We believe it is totally compatible with the purpose of the Permanent Fund to invest up to 25% of its assets in housing finance in Alaska.

In compliance with the desire of the majority of the Alaskan people to see the Permanent Fund invested in Alaska in home mortgages, it would be reasonable that these funds be invested at less than market rates if the circumstances so dictate. Initially, it would be

appropriate in order to encourage the immediate investment in Alaskan mortgages by the Permanent Fund that appropriations be made to AHFF to subsidize any differential between established market rates and those of the loans purchased through AHFF and originated by AHFC.

Finally, in view of declining oil revenues, it is apparent that the only means of establishing an on going revolving loan fund within the state of Alaska to bring stability to the housing finance industry and thereby provide adequate, affordable housing for all Alaskans, is the involvement of the Permanent Fund in the purchase of Alaskan mortgages. The Permanent Fund must become an investor in AHFF if the revolving loan fund is to be an assured success.

DCRA HOF PROGRAM

Recommendation #8: The Task Force recommends legislation be introduced to create a Home Ownership Fund (HOF) Program within Community and Regional Affairs, Housing Assistance Division, for specific application in rural communities. Other legislation should be introduced to remove rural or urban distinctions from Nonconforming Loan Funds for FY'82 and thereafter as administered through this agency.

Narrative: The existing Home Ownership Fund Program administered by AHFC is not reaching into rural locations as extensively as it could. A parallel program should be created to be administered within DCRA/HAD. This deep subsidy program fills a large gap in reaching first time homebuyers. Many borrowers can meet monthly payments if they are not significantly increased from rental payments or mobile home mortgages. Meeting payments and accruing mortgage equity under the HOF program allows a homeowner to either achieve permanent ownership or finance more substantial investments at a later date. The Legislature should give authority to DCRA/HAD to adjust income criteria and maximum home values as required by circumstances.

The creation of this program should be done only in the context of an interest rate review for all housing programs. Currently, DCRA rates on rural programs for conventional financing are fixed by the Legislature. There does not exist a rural, veterans' preference rate. AHFC rates are currently tied to the most recent bond sale. Parity, therefore, does not exist and, depending upon the most recent market, rates may be weighted in favor of either rural or urban Alaska and may shift back and forth frequently during any given period of 90 days or more.

The Task Force recommends the Governor direct management of the AHFF, the Legislature and others involved in this discussion to affix reasonable rates of interest on all housing programs so as to achieve parity wherever housing services may be delivered in the State.

DELEGATED UNDERWRITING

Recommendation #9: The Task Force encourages the Alaska Housing Finance Corporation to consider a program of delegated underwriting as described in a staff paper submitted to the Task Force. A recommendation is offered for the AHFC Board to prepare such a program after receiving suggestions from mortgage bankers, home builders, and other affected members of the public.

Narrative: The Task Force agreed that AHFC acting as a secondary mortgage market for mortgage lenders should immediately take steps to adopt regulations implementing delegated underwriting. The lending institutions making mortgage loans would then make the sole determination as to whether the borrower and property meet sound underwriting standards and the requirements of AHFC loan programs under which they will be ultimately funded. It was the position of the Task Force that this would be a very positive benefit by enabling the loan applicant to receive a commitment directly from the lending institution and allow for closing of the loan immediately, subsequent to approval. AHFC would not underwrite on a case-by-case basis, but would spot check loan originations by the mortgage lender. If non-compliance were found and the violation sufficiently flagrant, the mortgage lender would then be prohibited to continue to sell loans to AHFC. Any loans wherein fraud or serious malfeasance was evident would be repurchased by the mortgage lender.

It is understood that not all lending institutions would want to participate in this system and that AHFC must continue to underwrite loans for those institutions not able or willing to assume responsibility for their underwriting function. Further, from time to time, it will be necessary on a case-by-case basis to submit loans to AHFC for review and this should be permitted under the system of delegated underwriting adopted.

It is evident that a good system of delegated underwriting would not reduce the quality of loans ultimately sold to AHFC, but should reduce the dual expense of operating two underwriting offices, that of the lender and Alaska Housing Finance Corporation. Overall, it should be a much more efficient system, benefiting not only AHFC but also the mortgage lender and the public.

REGIONAL INFORMATION OFFICES

Recommendation #10: The Task Force recommends regional housing information offices be opened in Fairbanks and Juneau as well as maintenance of rural field offices in Bethel, Nome, Kotzebue, and Dillingham within Community and Regional Affairs, Housing Assistance Division.

Narrative: Regional field offices can offer potential fund users located in or near that region more personalized service in distribution of housing information. Staff of AHFC to be located in field situations could disseminate information, track delayed applications or provide other housing services as instructed by the AHFC Board of Directors. DCRA staff in field services would continue to offer application processing and loan closing activites in addition to general information and education services whenever requested. Staffing in all locations by personnel completely familiar with loan processing procedures would be desirable.

The public can best be served by a regionalized office placed in visible street front locations in core areas of any given community. Community and Regional Affairs currently maintains regional offices in Anchorage, Fairbanks, Bethel, Dillingham, Kotzebue, and Nome.

The Fairbanks office serves the North Slope Borough, upper Yukon, and the Alaska highway system to Tok and Cantwell. It also offers service to McGrath and Fairbanks and vicinity. This office could be placed in close proximity to an AHFC Fairbanks office and relinquish its urban functions to AHFC staff while continuing to emphasize its primarily rural focus. Establishment of services to Southeast Alaska have long been contemplated by the Community and Regional Affairs Housing Assistance Division.

A minimal southeast office with one and a half positions for $77,300 in Juneau is requested in the FY'84 operating budget of DCRA/HAD. Again, a consolidated housing information office with AHFC staff could be achieved and may be desirable.

Maintenance of the existing rural field offices in DCRA/HAD is recommended.

TASK FORCE COMMENTS

Recommendation #11: The Task Force has identified the following housing related issues for further consideration and in need of in-depth investigation by another group charged with more specific responsibilities: forward commitments; reservation system for funding; shared appreciation mortgages; third party programs for participation, bridging sales and interest rate buy-downs; discount points; conventional and uniform underwriting standards; clear and concise lending and approval procedures; apportionment and restructuring of the various housing related boards; development of a housing interagency liason; masterplan for rental, low-income and special needs housing; develop incentive programs for low-income housing projects.

Narrative: When considering the primary issues of a housing program, participants were frequently reminded of numerous specific issues directly involved or closely related to public perceptions of housing.

Some of these "issue items" are mechanical. Some are administrative, and many others are conceptual. These items should be explored in detail and when found realistic and of public benefit be incorporated in the body of the housing program.

Employment of forward commitments and use of a Fund Reservation System are mechanical and during times of interest instability can be of benefit to consumers.

Third party participation vehicles also can benefit consumers in that more private investments can be attracted to worthwhile projects or in the case of guaranteed sales, equities be freed from existing homes to permit the purchase of new homes and, again, the burden is to private investment while the benefit is to the consumer.

Reintroduction of discount points may provide an optional method of avoiding interest rate increases and still provide for the consumers' ability to purchase or the developers' ability to initiate a multi-family project.

Use of conventional underwriting standards will permit a coherent lending policy that employs the same standards for rural or urban housing purchase. Buyers are evaluated on the basis of credit worthiness, commitment and ability to repay. The property is then evaluated as is common to the area.

Additional public benefit will also occur when present approval methods for multi-unit projects are standardized, and if the prerequisites are available to developers in clear, concise and consistent form.

Consistent with in-depth development of master plans for rental programs, low income and special needs categories is the creation of an Interagency Liaison. The very complex web of interrelated jurisdictions makes achievement of a housing plan difficult unless the various Federal, State, and local government units are working toward the same ends with mutual commitment.

Incentives for greater public-private cooperation can be devised to open the way for better housing development and redevelopment.

All of these "special" items and many others will enhance our ability to deliver a housing program. Each possesses a degree of complexity that requires in-depth, further investigation, and the Task Force recommends continuing the effort.

PUBLICATIONS

Recommendation #12: The Task Force recommends publication and distribution of existing housing programs information in all public agency locations in Alaska.

Narrative: The publication and information distribution efforts of state housing agencies are found to be inadequate. Present materials may be located in various financial houses or agencies themselves, but do not appear to reach a large number of potential buyers, sellers, investors, or other fund users. Certain publications require more explanation than the reader may possess and should be more clearly marked with telephone numbers and addresses to assist the reader in obtaining further information. Outdated materials should be replaced at all distribution points as often as necessary. Mass mailings or distribution through targeted periodicals should occur at least once a year to inform the public of current interest rates, available terms and locations in their vicinity from which loan applications may be originated. This public information outreach effort should attempt to coordinate information on all existing housing programs and should be administered by the Department of Revenue on behalf of each housing agency.

Rural publications should be printed in languages indigenous to the region as well as in English. Desirable texts to be developed are those which are concise and simply stated. Industry jargon should be used only as necessary and the need for glossary development per publication should be reviewed.

FURTHER INVESTIGATIONS

Recommendation #13: The Task Force concludes that a comprehensive report on housing issues must include an investigation of low and/or special incomes, elderly and disabled handicapped programs. It was also concluded that further investigation of these complex subjects was necessary. A special committee charged with publication of a Phase II Report has been created by the Task Force to accomplish this further investigation.

Narrative: In the charge to the Task Force, the Governor emphasized that the housing program should reach more of the population. Governor Sheffield went on to include that low income, elderly, handicapped and other special needs be considered and that the consideration reach rental as well as owned homes.

The Task Force recognizes that there are very complex underlying issues including some that would represent a departure from conventional development and funding practice. In spite of the complexities, the Task Force recommends that immediate steps be initiated to adopt these recommendations and to devise more creative forms of private investment participation in all special programs. Specific proposals include: a demonstration program to construct as many as 300 living units for low income and special needs citizens; a fund provided specifically to meet the needs of handicapped citizens of any income level. Too frequently handicapped citizens are restricted to their homes when simple adaptations could be retrofitted into their homes allowing greater mobility. Likewise, in the construction of new buildings in many respects this program would be similar to the energy conservation program now in effect. Several other provisions are also considered. They deal principally with the use and administration of funds as well as allowing a wider range of participants to compete for funding to develop the programs.

Public and private tax-exempt, nonprofit corporations might be more productive and recognizing non-traditional approaches to problem solving, they should be encouraged to participate.

An excellent model for this involvement is the Neighborhood Housing Service (NHS). NHS is a local arm of the Neighborhood Re-investment Corporation, a federally supported corporation. NHS pursues renovation of old or decaying housing, redevelopment of neighborhoods through new construction and a comprehensive use of various funds from a variety of public and private sources.

Another series of points is that low interest loans or incentive participation for investors be encouraged to provide rental housing. Traditionally, the vehicle is for low interest loans.

While the loan vehicle is most understood, incentive plans, third party investors and equity exchange programs might reduce reliance on government money and provide for expanded benefit while producing the housing stock. Whenever possible, the programs should be self-sustaining requiring a form of payback even if interest free. It is possible and practical that with specific executive direction and Legislative support that many innovative programs can be developed and operating in an immediate time frame.

The resources of the municipalities, private and public non-profit groups, the Regional Corporations, and private investors can be channeled to overcome many of the obstacles and permit the attainment of this very ideal goal.

SUNSET PROVISIONS

Recommendation #14: The Task Force recommends extension of the sunset provision on tax-exempt revenue housing bonds known as the Uhlmann Act. The Governor and the Legislature are asked to convey this recommendation to our Congressional Delegation in Washington, D.C..

Narrative: The Task Force unanimously request that the Governor, by executive order, and the Legislature, by resolution, request that our congressional delegation immediately take steps to introduce legislation which will preempt the Sunset Provisions of the commonly referred to Uhlman Act which provides that tax-exempt revenue housing bonds may not be issued after December 31, 1983. It is critical for the future of AHFF to be able to issue tax-exempt revenue bonds for enhancement of housing finance and reduction of subsidies required by the State of Alaska.

SPECIFIC COMMENTS BY TASK FORCE MEMBERS

SPECIFIC COMMENTS BY TASK FORCE MEMBERS

The Task Force members were polled as to their opinions of this report. The members approved the report generally as written with minor language modifications in certain areas. When points were voiced by members regarding specific concerns of theirs which were not necessarily those of the Task Force as a whole we agreed to summarize them below.

Comments by Andy Edge: Mr. Edge's main concern was that rural areas be provided with a lower interest rate for their programs within CRA/HAD than for comparable AHFC programs. The reasoning he gave was because construction costs are higher in rural areas, and the average income is lower.

Comments by Laurie Terrall: Ms. Terrall's main concern was that something should be done for those individuals who have an income slightly above the 6% HOF program limitations, and yet cannot afford to purchase a home at the substantially higher interest rates of other AHFC programs. Also, she wanted to see more stability within the HOF program. Apparently, new buyers are told that the program is subject to a 30 day notice of termination.

Comments by Frank Roppell: Mr. Roppell was in basic agreement with the Task Force recommendations. He did believe that the AHFF should be administered by and under the control of AHFC.

Comments by Commissioner Heath: Commissioner Heath was appointed after the Task Force had begun replacing Task Force member, Acting Commissioner of Revenue Joe Donahoe. Commissioner Heath did not have enough time to make a thorough review of this report. However, he had no major objections.

Comments by Richard Hall: Mr. Hall stated that "now is the time to establish a revolving loan fund." Mr. Hall believes the amount of dollars available will have to be prioritized into areas where the most need occurs, such as elderly and low income. Mr. Hall further stated, "AHFC already is in the process of providing $450 million[1] in loans at less than market rates. If that is not enough, then an appropriation to a revolving fund or a subsidy concept for leverage purposes could be made."

[1]Apparently Mr. Hall was referring to the Congressionally legislated subsidy from the Federal Treasury of tax exempt bond sales of $100 million for first time pruchasers and $300 million estimated for veterans. Also, AHFC expects a cash flow of approximately $50 million from prior mortgage investments.

Comments by Dave Rose: Written comments were received by Mr. Rose, Executive Director of the Alaska Permanent Fund Corporation, offering his opinions to the Task Force's recommendations. Mr. Rose restated that as presently legislated, the Permanent Fund cannot make investments at less than market rates. However, he said, the "simultaneous sale of AHFC paper on the market and sale to the Fund of the same paper at the same price and time can save the management fee associated with the sale of bonds." This could result in a savings of one-half percent. He further stated that the Permanent Fund "should not duplicate or replace AHFC" and that "the Permanent Fund can be a purchaser of securities backed by mortgages, not mortgages themselves." Mr. Rose was also concerned that we not recommend the abolishment of the well recognized and highly regarded AHFC in favor of a new and unknown debt issuer, namely, the AHFF. Also, Mr. Rose did not concur and stated he "would not recommend to the Trustees that the fund invest up to 25 percent of its assets in housing mortgages."

Comments by Commissioner Lewis, Department of Community and Regional Affairs: Commissioner Lewis' main concern was that unless the AHFF was administered under the Department of Revenue as recommended in this report, that the portion of the revolving fund relating to rural loans be administered under CRA.

INTERESTED PARTICIPANTS

INTERESTED PARTICIPANTS

Those individuals listed below attended one or more of the meetings held by this Task Force or its subcommittees. The Task Force would like to thank them for their verbal and written contributions to the discussion of issues and for their interest in our work.

Ms. Mary Afcan

Mr. Willie Ratcliff

Mr. Clay McDowell

RESIDENT ADDRESS

MEMORANDUM

TO: Housing Task Force
Office of the Governor

DATE: December 27, 1982

FROM: David A. Rose
Executive Director
Alaska Permanent Fund Corporation

SUBJECT: Housing

The following investment categories are permissible under current statutory law. Each of them could be used to finance housing within the state to some extent. There are two major concerns: the availability of money and the cost of money. This memorandum addresses the availability of money.

The Permanent Fund is required by statutory law to obtain nationally competetive market rates of return on its investments, and these categories cannot therefore address the cost of money.

1. Residential Mortgages. The Alaska Permanent Fund Corporation may purchase first lien residential mortgages which include owner occupied one-to-four unit dwellings, if they carry private mortgage insurance and the loan to value ratios do not exceed 90 percent. Minimum insurance coverage is computed as follows:

Loan to Value Ratio	
0 - 69	None
70 - 89	10%
90	20%

By regulation the Fund is limited to adjustable rate residential mortgages only. Terms and conditions are identical to FNMA program #8.

2. Commercial Mortgages. The Alaska Permanent Fund Corporation may purchase first lien commercial mortgages, including multi-family dwellings in excess of four units, if they carry private mortgage insurance and the loan to value ratio does not exceed 75 percent. Minimum coverage is computed as follows:

Loan to Value Ratio	
0 - 49	None
50 - 60	10%
61 - 75	15%

The Permanent Fund Corporation is not limited to adjustable rate mortgages and may purchase fixed rate commercial mortgages.

3. Corporate Debt. The Alaska Permanent Fund Corporation may purchase mortgage-backed debt securities which are rated "AA" by Moody's and S & P. This provision theoretically includes:
   a) AHFC bonds,
   b) privately insured pool certificates issued by MGIC or similar institutions.

4. Federally Guaranteed Debt. The Alaska Permanent Fund Corporation may purchase the guaranteed portion of debt issued by the following agencies of the federal government:

   a) SBA,
   b) VA,
   c) FmHA.

5. Equity Real Estate. The Alaska Permanent Fund Corporation may participate in the direct ownership of income-producing real estate, including apartment buildings, as long as:

   a) the participation does not exceed 40 percent of the total equity, and
   b) the manager has at least five years institutional real estate experience.

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY
MULTI-FAMILY HOUSING PROGRAM

The 1982 session of the Legislature enacted Chapter 113 which authorizes the Authority to provide financing for Multi-Family Housing. Funding for the program is provided by selling bonds and using the proceeds to purchase participations in qualifying projects from private lending institutions. The Legislature also appropriated $29 million to the Authority as security, should any projects default. The $29 million was reduced to $21 million based upon an opinion from the Attorney General's office.

The enabling legislation was drafted in such a manner that the Authority receives none of the principal, interest or any access to the security fund unless there is secondary debt on the project and the project defaults. The Authority has assumed this is a drafting error and has proceeded to implement a Multi-Family Program while simultaneously preparing remedial legislation for consideration.

The Authority has implemented a Multi-Family Program which will be effective until December 31, 1983. As of December 15, 1982, $37,994,150 of pre-applications for 1015 units have been approved. The number of pre-applications which will become actual multi-family units is impossible to determine but 50% could be a reasonable estimate. Geographically the units are spread as follows:

Anchorage	886 units	$33,586,300
Juneau	76 units	2,435,000
Homer	22 units	595,000
Ketchikan	5 units	360,000
Nome	14 units	607,500
Wasilla	6 units	190,350
Palmer	6 units	220,000

The Authority has issued commitments on 262 units totaling $8,775,000. These projects are currently in various stages of construction. The units for which commitments have been issued are geographically spread as follows:

Anchorage	252 units	$8,505,000
Homer	10 units	270,000

Synopsis of Multi-Family Program

A. Maximum allowable loan is 75% of appraised value.

B. Interest rate is 11% (set by Board, effective through 12/31/82). Should the bond rate exceed 11% the differential will be made up by increasing the loan payment beginning in year 2. Staff will recommend to the Board that the 11% be continued for 1983.

C. The full faith and credit of the Authority are pledged to the bond issue.

D. The Authority pays the capital reserve fund contribution.

E. Five units or more.

F. 20% of units must be made available to persons of lower or moderate income.

G. Restrictions on condo conversion.

H. The Authority purchases 90% of loan, originating financial institution retains 10% of loan.

I. U.S. Treasury regulations on tax-exempt bonds apply.

MINUTES OF THE GOVERNOR'S TASK FORCE

December 21, 1982
3601 C Street, Room 758
Anchorage, Alaska 99503

The first meeting of the Governor's Housing Task Force convened shortly after 1:30 p.m. on December 21, 1982 at the Governor's Office, Frontier Building, in Anchorage.

An introduction was made by CHAIRMAN ROB GAMEL. Members of the task force, guests and observers then introduced themselves. Those present were:

MR. ROB GAMEL
MR. JESS HALL
MR. CLARK GRUENING
MR. RICHARD T. HALL
MR. ANDY EDGE
MR. JESSIE ARRINGTON
MS. LAURIE TERRALL
MR. DAVE RIBACCHI
COMMISSIONER DICK LYON
COMMISSIONER JOE DONAHOE
MR. PETE SPIVEY
MS. LENNIE BOSTON
MR. RAY PRICE
MR. JIM KELLY
MS. MARY AFCAN
MS. BARBARA MORSE-QUINN
MR. HARRY GOLDBAR
MR. JOEL DIGANGHI
MR. MARK CAMERON
MS. LUCILLE STEITZ

A short discussion of general purpose preceded GOVERNOR SHEFFIELD'S entrance. The Governor thanked those present for their participation and charged them with assisting him in the creation of a sound housing program, inclusive of new construction, multi-family and rental unit development. Other desirable criteria for a housing program mentioned by the Governor were self-perpetuity of funds and availability of housing for first time homebuyers on limited incomes. The group was asked to suggest ways to prevent costly, duplicative efforts of the public and private sectors, and to review outreach efforts, particularly in the Fairbanks region. GOVERNOR SHEFFIELD concluded his remarks and departed the meeting.

Extensive conversations as to the focus and purpose of the task force followed the Governor's remarks. This informal dialogue resulted in the creation of two subcommittees of the task force, which were:

The Subcommittee on Socio/Economic Considerations of Housing Policies; and
The Subcommittee on Administration and Finance.

A core group was appointed to each subcommittee with others invited to participate in the group of their choice.

Further discussion then ensued regarding uses of the Permanent Fund, subsidies, bonding costs and a general review of the Governor's "Blueprint For Building Affordability Into Alaska's Housing Picture".

A general timetable was discussed with the conclusions that the January 3, 1983 deadline for a report could only bring a preliminary document to the Governor. February 1, 1983 was suggested as a more realistic goal for a final report.

A date for the next meeting was set for December 28, 1982 at 1:30 p.m. (AST) in the same location. Teleconfering with Juneau, Bethel and Fairbanks participants was suggested.

CHAIRMAN GAMEL adjourned the meeting at approximately 3:45 p.m. with each subcommittee convening immediately thereafter. Subcommittee chairmen were selected by each group with MR. DAVE RIBACCHI chairing the Subcommittee on Socio/Economics and MR. DICK HALL chairing the Subcommittee on Administration and Finance.

Respectfully submitted,

Rob Gamel
Chairman

MINUTES OF THE GOVERNOR'S TASK FORCE ON HOUSING

January 3, 1983
AHFC Board Room
Anchorage, AK 99503

Present in Anchorage for the teleconference meeting were the following task force members:

MR. ROB GANIEL, CHAIRMAN
MR. JESS HALL
MR. CHARLES HOMAN
MR. DAVE RIBACCHI
MS. LAURIE TERRALL
MR. DICK HALL

In Bethel: MR. ANDY EDGE

In Fairbanks: MR. JESS ARRINGTON

In Juneau:

MR. DAVE ROSE
COMMISSIONER MARK LEWIS
MR. JOE DONAHOE

Anchorage task force and administration staff present:

MS. BARBARA MORSE-QUINN
MR. ERIC WOHLFORTH
MR. JOEL DIGIACOMI
MR. HARRY GOLDBAR
MR. RAY PRICE

Juneau administration staff members present:

MR. PETE BUSHRE
MR. JIM KELLY

The following members of the public also participated in this meeting: MS. LUCILLE STIETZ, MS. MARY AFCAN, MR. CLAY MCDOWELL and MR. WILLIE RATCLIFFE.

With MR. ROB GANIEL chairing, the minutes from the previous meeting were read, and the two subcommittees reported. (MR. EDGE in Bethel and MR. ARRINGTON in Fairbanks both eventually dropped out of the teleconference due to poor audio. Notes were to be forwarded to them for their comments.)

The Subcommittee on Administration and Finance presented their findings:

Item 1. It was unanimously agreed that AHFC be authorized to develop a system of forward commitments for owners and builders.

Item 2. The task force recommended AHFC consider a program of delegated underwriting as described in a staff paper submitted to the Task Force. A recommendation is offered for the AHFC Board to prepare such a program after receiving suggestions from mortgage bankers, home builders, and other affected members of the public.

Item 3. The subcommittee recommended a revolving AHFC Fund and, if required, an amendment to the constitution authorizing the statute. MR. DONAHOE reported that MR. RON LORENSEN, the Deputy Attorney General, has a draft opinion stating the use of interest in this case is likely unconstitutional but it is defendable. MR. GAMEL suggested adopting this suggestion with MR. HALL pointing out that the Legislators may want the option of allocating the interest. The Task Force adopted the subcommittee recommendations.

Item 4. The subcommittee recommends a revised FY84 18 month appropriation for subsidy purposes paid into the AHFC Fund. A long discussion ensured on this point, but no concurrence was reached. It was decided to table and redraft this point and submit it to the committee again. Four sub-points are to be considered:

1. 18 month appropriation
2. Appropriate to revolving and subsidy.
3. Interest rate question.
4. Prioritization.

MR. WILLIE RADCLIFFE spoke up to say he would like to see fee simple loans, the use of church groups to reach people currently unable to afford a home, and cutting out the heavy financing fees now being charged.

Item 5. The Task Force tabled any action on the subcommittees recommendation on prioritization.

Item 6. The Task Force agreed with this recommendation. It was recommended that the Trustees of the Permanent Fund and the Board of Alaska Housing Finance Corporation develop a plan whereby up to 15% of the principal of the Permanent Fund be invested in a combination of mortgages or securities of the Corporation. Currently, the Fund is authorized to invest up to 15% of its principal in variable rate mortgages. However, the Fund is authorized to invest up to 50% in corporate debt securities which are rated "AA" or better by a nationally recognized rating service. It was further recommended that the 15% investment of the Permanent Fund be accomplished over five years and that not less than three percent of the Permanent Fund be so invested during the first year.

Item 7. This item pertains to revolving funds for the Housing Assistance Division and eliminates the distinction between urban and rural from the Housing Assistance Fund Program. It also establishes A Home Ownership Fund (HOF) Program within the Housing Assistance Division. MS MORSE-QUINN recommended that the third line be changed to eliminate rural and urban from the "nonconforming HAD loan fund and that the the HOF be under this division. In debate over this particular point, it was agreed that parity should be addressed, though it was pointed out that legislation had been aimed at making up for the higher construction costs in rural Alaska. MR. GAMEL suggested they explore this further at a later time. However, he felt the committee should take a stand in support of extending the sunset provision for tax exempt bonds (Uhlman Act). MR. HALL supported this and recommended having the Governor send letters to get a resolution passed in our state legislatures. The Task Force agreed.

MR. RIBACCHI provided his first preliminary report for the Subcommittee on Socio/Economics.

Item 1. He pointed out that housing is a social/economic issue. A commonality of language doesn't exist and snags will result because of this. There are three types of housing: conventional, rental, and low income or special income. The subcommittee developed three time frames for action: immediate, intermediate (within ten months), and long-range (two or three to five years).

Item 2. The Subcommittee Report suggested that conventional loans be dealt with first because a commonality of language already exists and that the others be studied further. MR. RIBACCHI also suggested announcing AHFC meetings, teleconferences and follow-up. He also suggested information centers for the public with a variety of possibilities. For instance, there are many agencies in scattered towns throughout the state which could provide information to people without the expense of a staff for just this purpose. Item 3. The key problem is that it isn't clear what is to be dealt with or what's available in other programs. It was suggested that appointments and reappointments to AHFC executive staff be accomplished as soon as possible.

The Subcommittee Report suggested the following for intermediate action:

A. Delegated underwriting was agreed upon by everyone.
B. As a political issue, the AHFC restructuring should be defined and taken care of ASAP.
C. There should be an intergovernment liaison thru existing departments.
D. Planning and effecting a consolidation of state housing is suggested breaking it into more applicable programs.

Items 4 and 5. MR. CLAY MCDOWELL was introduced by subcommittee member, Laurie Terrall, and pointed out that a crisis need for shelter exists for the handicapped. It was suggested that these items be given immediate action. The Phase I report of the Alaska Statewide Housing Needs Study is available and should be reviewed by Task Force members seeking further information on these subjects.

A subcommittee consisting of MS. BARBARA MORSE-QUINN, MR. ROB GAMEL, MR. DICK HALL, Mr. Chuck Homan, and MR. DAVE RIBACCHI was appointed to draft a preliminary report to the Governor outlining the work thus far accomplished and identifying areas needing further research. (Phase I Report.)

An additional subcommittee was established to research and define goals for the low or special incomes, disabled and/or senior citizen needs. MS. TERRALL, MR. RIBACCHI, MR. DICK PRYOR and an AHFC representative will form this subcommittee. (Phase II Report.)

The meeting was adjourned at approximately 3:45 p.m. AST.

Respectfully Submitted,

_____

PURPOSE OF THE REPORT

In accordance with the provisions of Title 24 of the Alaska Statutes, an examination of the Department of Community and Regional Affairs, Housing Assistance Loan Fund was conducted to determine:

1. If the financial statements for the 1982 Fiscal Year are fairly presented.

2. The compliance by the Department of Community and Regional Affairs with applicable State statutes and regulations governing fiscal activities of the Fund.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

The Housing Assistance Loan Fund (HALF) was created in the Department of Community and Regional Affairs by AS 44.47.380. HALF is within the General Fund which consists of money appropriated to it by the Legislature. The Housing Assistance Division (HAD) administers the Fund which provides financing for originating, purchasing or participating in the purchase of the following types of loans:

1. Nonconforming and rural mortgage loans.

2. Loans made for building materials for nonconforming and rural housing.

3. Loans made for renovation or improvements to nonconforming and rural housing.

4. Loans made for the construction of owner-occupied nonconforming and rural housing other than loans to builders or contractors or loans that compensate an owner for his labor or services in constructing his own housing.

5. Loans made for the purchase or development of non-owner occupied housing in rural areas.

"Nonconforming housing" is defined at AS 44.47.560(4) as housing which does not conform to minimum building standards under any State or federal program that provides loans for housing purchases. "Rural housing" is defined at AS 44.47.560(6) as housing, whether or not it is nonconforming, that is located in a rural area of the State.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

HAD should assess the interest rate on mortgage loans in compliance with Alaska Statutes.

HAD is required by AS 44.47.410 to set interest rates on nonconforming mortgage loans equal to those rates established by the Alaska Housing Finance Corporation (AHFC) per their most recent issue of taxable bonds.

During Fiscal Year 1982, several office memos were issued to the staff and seller/servicers establishing the effective date of rate changes. Our review of 50 loan files disclosed that the Division was inconsistent in its assessment of interest rates. In some cases, the rates were assessed when the application was received and others, when the loans were committed. However, in both cases we noted that the applied rates were not equivalent to those of AHFC. Using the commitment date as a base, we found 32 loan files had incorrect interest rates. Additionally, 23 loan files had incorrect interest rates per the application date.

One of the purposes of the Housing Assistance Loan Program is to provide State financing for nonconforming housing equitable to that provided for conforming housing. This purpose is defeated when the interest rates are not properly assessed. HAD should establish a written policy defining when the interest rate for a loan is set, preferably at the date of loan commitment and ensure that applicable interest rates at that date are assessed.

Recommendation No. 2

HAD should strengthen controls over mortgage loans.

It is the Division's policy to provide financing for mortgage loans up to 95% of the appraised value, or sales price whichever is less. Per our review of 59 loan files we noted that in 15 cases the borrower was given cash after settlement of all costs. Cash given to the borrowers ranged from $601 to $94,653. In most cases, the loan financed owner/builder constructed homes. These homes were financed at a percentage of the appraised value rather than total construction cost. Thus, the excess was given to the borrower.

Alaska Statute 44.47.380 prohibits HAD from originating, purchasing, or participating in the purchase of loans which compensate an owner for his labor or services in constructing his own home. This statute became effective July 28, 1981.

Seven of the fifteen loans were committed and closed after that date. HAD required the seller/servicer to provide a letter certifying construction costs equalled or exceeded the loan amount in order to ensure compliance with the new law. Five of the seven loan files contained the required signed letter from the seller/servicer. In a review of the seller/servicer's loan files we could find no documentation, i.e., invoices and receipts, to substantiate the statements in three of the five letters. Those three borrowers received $5,073, $36,765, and $94,653 in cash, respectively, after all closing costs and outstanding debts related to the construction of the homes were paid.

All mortgage loans are purchased by HAD without recourse unless a misstatement of a material fact is disclosed within one year after the loan purchase date. If a misstatement of fact is discovered, the seller/servicer may be required to repurchase the loan for an amount equal to the unpaid principal balance plus accrued interest. We recommend HAD review loans made in Fiscal Year 1983 to determine if any additional borrowers were compensated for labor or services in the construction of their homes and then take appropriate action to ensure loans currently held by the Division include only those loans in compliance with law.

Additionally, in order to strengthen controls HAD should develop a standard certification letter to include the following:

A. Statement of actual construction costs, along with detailed documentation if a borrower is receiving any cash from the loan purchase.

B. Statement certifying that the amount is accurate and does not include costs representing the owner's labor and services.

C. Signatures of the borrower and an authorized bank official.

Recommendation No. 3

HAD should establish written guidelines to aid its staff in determining acceptable nonconforming characteristics.

In our prior audit of the Division we recommended the adoption of regulations and formal procedures to substantiate the nonconformity of home loans purchased. We found in our prior review that 47% of the files and property appraisals acceptable to AHFC. Also we found 55% of the files did not contain a statement from the seller/servicer describing the nonconforming feature and explaining why it is unacceptable under other conventional financing programs.

Our current review of loan files indicated that the problem still exists. Of 50 files reviewed we found 22 or 44% did not contain the written statement from the seller/servicer as required by 19 AAC 95.070(6). According to Division staff it is difficult for the seller/servicer to determine the nonconforming features due to the frequency of its variations.

Nonconforming housing is defined at AS 44.47.560(4) as housing which does not conform to minimum building standards under any State or federal housing program. Loan applications are judgementally analyzed by HAD loan examiners. No written guidelines have been established to ensure uniformity and consistency in each examiner's evaluation of acceptable nonconforming features.

Recommendation No. 4

HAD should improve its accounting system.

In our prior audit we noted that the Division had not established an accounting system or written policies and procedures to account for its loan activities. Although the Division has made significant progress in implementing this recommendation, the following exceptions were noted in our current review.

1. HAD does not reconcile its loan receipts and disbursements and other operating expenditures to the State accounting system (PBA).

   The Division thought this function was performed by the Division of Administrative Services. However a review of the services provided by Administrative Services showed that the reconciliation of revenues and expenditures was not included. In order to ensure revenues and expenditures are properly budgeted and recorded in PBA, and fairly presented in the State's Annual Financial Report, HAD should, at a minimum, reconcile its records to PBA monthly.

2. Interest income is recorded net of service fees.

   Principal and interest payments from mortgage loans purchased by HAD are collected and transmitted monthly to the Division by the seller/servicer at a fee not to exceed 1/2 of 1% of the interest collected. The fees are deducted by the seller/servicer prior to remitting the cash to HAD. An account has not been established by HAD to record service fee expenditures, thus interest income is improperly recorded net of the service fees. As a result, interest income for Fiscal Year 1982 is understated by $61,773 and expenditures are understated by the same amount.

Alaska Statute 37.05.150 states that the State accounting system shall be in accordance with the generally accepted principals of governmental accounting and it shall provide records showing actual revenue and total expenditures. AS 37.05.170 states no payment may be made and no obligation incurred against any fund unless an appropriation or expenditure authorization has been made for the purposes of the expenditure. Therefore, HAD should include service fee charges in its operating budget and establish a system to properly account for the expenditures.

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

AUDIT DIVISION
POUCH W—ALASKA OFFICE BUILDING

JUNEAU, ALASKA 99811

December 23, 1982

Members of the
Legislative Budget and Audit Committee:

We have examined the Balance Sheet of the Housing Assistance Loan Fund as of June 30, 1982, and the related Statement of Revenues, Expenditures, and Changes in Fund Balance; Statement of Revenues - Budget and Actual; and the Statement of Expenditures and Encumbrances Compared with Appropriations for Operating Programs for the year then ended. Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the financial position of the Housing Assistance Loan Fund as of June 30, 1982, and the results of operations and the changes in fund balance for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

HOUSING ASSISTANCE LOAN FUND
NOTES TO THE FINANCIAL STATEMENTS
For the Fiscal Year Ended June 30, 1982

Note 1 - Summary of Significant Accounting Policies

The following is a summary of the significant policies of the State of Alaska applicable to the Department of Community and Regional Affairs, Housing Assistance Loan Fund:

A. Fund Accounting. The State of Alaska maintains its accounting in accordance with the principles of fund accounting. A fund is a fiscal and accounting entity established by law to segregate and account for designated resources and activities. Housing Assistance Loan Fund activities are in the General Fund.

B. Basis of Accounting. The Financial Statements for the General Fund are reported on the modified accrual basis of accounting. Modifications to the accrual basis are as follows:

1. Revenues susceptible to accrual (primarily reimbursable items and investment income) are reported on accrual basis. Revenues not susceptible to accrual are reported on cash basis.

2. Expenditures are generally recognized on accrual basis. The following exceptions are considered expenditures when paid:

   a. inventories of materials and supplies,
   b. prepaid insurance and similar items,
   c. accumulated unpaid annual and sick leave.

C. Encumbrances. Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditures of monies are recorded in order to reserve that portion of the applicable appropriation, is employed in the General Fund. Encumbrances outstanding at year end are reported as reservations of fund balances since they are neither expenditures nor liabilities.

D. Budgetary Control. All money received is deposited in the State Treasury, and may not be expended without appropriation. An appropriation is an authorization to spend money and incur obligations. It is a legal limit as to purpose, time, and amount.

Appropriations are enacted by the Legislature and approved by the Governor. Expenditures are reported at the appropriation level to show compliance with the law.

Loan Types and Terms

As specified by AS 44.47.380 and AS 44.47.410, the following types of loans are made:

Type	Limit	Current Interest Rate	Terms	Purpose
Residential Mortgages				
Urban Nonconforming Owner Occupied	$160,500 - Single Family 205,200 - Duplex	Veterans - 11.375% on first $90,000 16.590% on balance over $90,000 Non - Veterans - 12.375% on first $90,000 16.590 on balance over $90,000	30 years or remaining economic life, whichever is less	To originate, purchase, or participate in the purchase of loans for existing housing, or housing under construction or to be constructed.
Rural Owner Occupied	Same as above	10.5%	30 years or 80% of remaining physical life	Same as above
Rural Non-Owner Occupied	$300,000	10.5%	30 years	Same as above
Building Materials	$45,000 or 80% of the appraised value of the work completed or 90% of the value of other property pledged as security	Same as for Residential Mortgages	15 years	To originate, purchase, or participate in the purchase of loans made for building materials for housing.
Renovations and Improvements	1st Deed of Trust $136,425 - Single Family $174,420 - Duplex	Same as for Residential Mortgages	30 years or 80% of remaining physical life	To originate, purchase, or participate in the purchase of loans made for renovation or improvements to existing housing with or without consolidation of existing loans on the subject property.
	2nd Deed of Trust $25,000	Same as for Residential Mortgages	15 years

LEGISLATIVE AUDIT

Mr. Gerald L. Wilkerson
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: "A Report on the Department of Community and Regional Affairs, Housing Assistance Loan Fund, For the Fiscal Year Ended June 30, 1982." Preliminary Audit Report (CONFIDENTIAL)

This letter comes in response to your communications of March 9 and 10, 1983 on the above referenced audit document.

A. Recommendation No. 1
HAD should assess the interest rate on mortgage loans in compliance with Alaska Statutes.

The department concurs with this recommendation. On December 28, 1982 a letter announcing an interest rate change for the Housing Assistance Loan Fund, Nonconforming Loan Program, was forwarded in response to Interim Letter No. 1 on your audit findings. Enclosed as Enclosure A-1 please find our interest rate notification letter of November 18, 1982 and our subsequent interest rate notification letter of March 11, 1983 (Enclosure A-2).

In addition to implementing a fixed date procedure for interest rate changes, enclosed you will also find our January 31, 1983 Request for Opinion of the Attorney General on this subject. (Enclosure A-3). Because of bond sale reserves at Alaska Housing Finance Corporation, taxable sales are frequently held well in advance of commitment issue. Unless the interest rates between sales rates are significantly different, funds from one sale are usually fully expended before funds from a subsequent sale are drawn. As this opinion request infers, AHFC announces interest rate changes as their funds dictate, with no particular formula in relation to the bond sale date. A verbal opinion from Assistant Attorney General John Rubini indicates

that our interest rate conversion dates should not predate those of AHFC, regardless of delay from date of sale. We anticipate issuing interest rate conversion notices within 48 hours of notification of rate change from AHFC.

B. Recommendation No. 2
HAD should strengthen controls over mortgage loans.

The department concurs with this recommendation. Enclosed as Enclosure B-1 please find a form now being used by the Housing Assistance Division entitled "Certification of Costs for Owner/Builder New Construction." This form is to be executed by the borrowers and seller/servicer representative before loan purchase is finalized. It has been published in the new handbooks of the Housing Assistance Loan Program, along with several revised forms of the Division. This book is available for your review upon request.

In addition to implementing this form, the division has requested further certification on the part of the seller/servicers, as exemplified in the enclosed Seller/Servicer Letter of March 17, 1983. (Enclosure B-2).

To correct the audit exceptions on three specific files still in question, the division has contacted the two seller/servicers involved in these transactions and requested their review of these files.

The following information has been obtained to date:

Loan #02-343-00218 $5,053 - No further information.

Loan #01-861-00454 $30,765 -All documentation to account for costs in excess of $67,000 has been received by seller/servicer and will be forwarded to division.

Loan #02-343-00213 $94,653. Loan fully repaid. No longer held in division's portfolio.

A full written response on each review is anticipated prior to April 30, 1983.

C. Recommendation No. 3

HAD should establish written guidelines to aid its staff in determining acceptable nonconforming characteristics.

The department concurs in this recommendation. Enclosed as Enclosure C-1 is the written definition of nonconforming characteristics established by the division on February 4, 1983. This definition has been publicized by staff and is available to all borrowers or seller/servicers for their review.

In addition to finalizing this definition, the division has recently completed the publication of a Housing Assistance Loan Program handbook and brochures. The publications fully define our loan programs and are available for review in any of our Housing Assistance Division offices.

D. Recommendation No. 4

HAD should improve its accounting system.

(1) HAD does not reconcile its loan receipts and disbursements and other operating expenditures to the State accounting system (PBA).

The department concurs in this recommendation. The division has been working very hard in conjunction with the Division of Administrative Services staff to identify responsibilities, monitor actions and insure fiscal accountability for all loan fund expenditures with regard to reconciliation with PBA. Enclosure D-1 outlines the new reporting procedures which have now been implemented at HAD. Procedures for reconciliation of loan disbursements are now in place and are being performed on a monthly basis. We anticipate completion of reconciliation procedures for loan receipts and other operating expenditures for the April 30, 1983 PBA report.

(2) Interest income is recorded net of service fees.

The department concurs in this recommendation. In consultation with the Department of Law, it has been determined a revised program request will be presented

before the Legislative Budget and Audit Committee to receive and expend a portion of the interest income for payment of service fees. In addition, the department will establish a system to properly account for the expenditures in accordance with AS 37.05.150.

Thank you for the opportunity to comment on this report. Please contact me or Barbara Morse-Quinn at 272-4585 should you have any questions regarding this correspondence. I hope this letter will sufficiently address all your concerns. We look forward to receiving the final audit report as soon as it becomes available.

Sincerely,

Mark Lewis
Commissioner

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

HOUSING ASSISTANCE DIVISION

November 18, 1982

To: ALL SELLER SERVICES

The Housing Assistance Division announces the reduction of interest rates for the Nonconforming Loan Program of the Housing Assistance Loan Fund. The new rates are attached. The authority for this reduction is found in AS 44.47.410 and AS 18.56.098(g).

As a reminder, all rural loan rates are fixed by the Legislature and are not adjusted with State Mortgage Bond sales.

Any loan committment issued after November 17, 1982 for the Nonconforming Loan Program will be at the new rate.

Sincerely,

Barbara Morse-Quinn

FROM: MARK LEWIS
COMMISSIONER

SUBJECT: Request for Opinion
Effective Date for Interest
Rates under AS 44.47.410(a)

By: _____
Barbara Morse-Quinn, Director
Housing Assistance Division
Community and Regional Affairs

Alaska Statute 44.47.410(a) mandates that our urban interest rates are "equal to the interest rate, as determined under AS 18.56.098(a) from the proceeds of the most recent applicable issue of taxable bonds." On January 19, 1983, Alaska Housing Finance Corporation sold series I of taxable bonds. This sale resulted in a reduction of the interest rates from 10.125% to 10% on the first $90,000 for non-veterans and from 9.125% to 9% on the first $90,000 for qualified veterans. However, AHFC has not put these rates into effect for their programs until they have exhausted the funds from the series H sale of taxable bonds.

Our question to you is, do we adjust our rates on the date of the last sale of the taxable bonds which was January 19, 1983 or on the date AHFC makes the rates effective for their programs which they anticipate will be mid-February?

Enclosure A-3

CERTIFICATION OF COSTS FOR OWNER/BUILDER NEW CONSTRUCTION

We certify that we have spent the total proceeds of our loan from DCRA/HAD in the amount of $_____ for materials to construct our house or for labor which was contracted to be performed to complete the house. March 17, 1983

To: ALL SELLER/SERVICERS

In a recent review of our seller/servicer files we have observed a lack of documentation which authorizes designated personnel to act on behalf of an originating lender. This documentation is necessary when considering the signatures on commitment contracts or agreements which the lender may enter into on behalf of a borrower with this division.

Please provide by April 15, 1983 documentation which would designate the personnel authorized to enter into contracts or agreements, along with any exceptions or limits to this authority, on behalf of your institution. The documentation should contain the statement that the authorized officer's signature carries the full faith and credit of the lender, and is a binding agreement regardless of future personnel assignments within your institution.

Thank you for your cooperation and compliance with this request.

Sincerely,

Barbara Morse-Quinn

Barbara Morse-Quinn
Director

NONCONFORMING DEFINED

Effective February 4, 1983

Nonconforming housing is housing which is structurally sound and presents no health or safety hazards to the occupants but because of outmoded construction practices, changes in current design, a lack of normal amenities common to the area of the structure or a lack of utilities common to the area of the structure cannot be financed through any other state or federal mortgage loan program.

It has been our experience that the following list are the prevalent types of nonconformities:

1. Untreated wood foundations.
2. Untreated piling foundations.
3. Crib foundations.
4. Lack of a foundation.
5. Variations in foundation systems.
6. Dwellings with less than 1 full bathroom.
7. Dwellings with room layouts which affect the privacy of the bath or bedrooms.
8. Dwellings with ceiling heights less than 8' in the living areas.
9. Dwellings with rooms in tandem.
10. Dwellings with gross living areas less than 600 square feet.
11. Disjointed structures.
12. Dwellings which do not enjoy the utilities (electric, water or wastewater) which are common for the immediate area in the which the dwelling is located, such as:
    A. Private electric
    B. Lack of electricity
    C. Shallow wells
    D. Cisterns
    E. Surface water collection systems
    F. Holding tanks for water
    G. Sewage haul systems
    H. Water haul systems
    I. Graywater systems
    J. Outhouses
13. Dwellings which rely upon space heaters or woodstoves and their sole source of heat.
14. Dwellings constructed around a mobile home frame.
15. Restricted Titles due to ANCSA

This list is not finite and can be expanded upon as more characteristics unacceptable to other mortgage lending programs become known to the Division.

MEMORANDUM

Ray Price, Deputy Director
Housing Assistance Division

DATE: February 8, 1983

FILE NO:

TELEPHONE NO:

FROM: Remond Henderson, Internal Auditor RH
Division of Administrative Services

SUBJECT:

Attached are a number of schedules which can be used in the reconciliation of HAD loan reports to the state PBA system. Although these schedules are designed to be used only in reconciling funds available per HAD reports to funds available per PBA, it is an example of formal reconciliation and communication procedures which must exist within HAD and between HAD and the Juneau Fiscal section. The attached schedules and/or related procedures may change once the conversion to an automated mortgage loan system has occured, however, I recommend their implementation at this point in time. Under the present system each month a number of differences occur between loans encumbered by HAD and those encumbered by Fiscal. If the recommended procedures are not implemented, these differences will continue to occur each month and will result in a large difference at the time of conversion to the automated system. Identifying the cause of a large difference could be extremely time consuming. Therefore, a monthly reconciliation should be performed.

I have performed a reconciliation between HAD and PBA reports for the month of December noting a net difference of $450,000. Although the net amount difference is inmaterial it should be identified and corrected as soon as PBA reports are available, I will perform the reconciliation for the month of January and will identify the difference at that time. However, to insure the difference does not increase as a result of the routine procedures performed by HAD and the Fiscal section, I recommend the following:

1. Preparation of SCHEDULE I (a summary schedule of loan activity by year of loan fund; ie; encumbrances, cancellations, increases, decreases).

2. Preparation of SCHEDULES II, III, and IV. These are schedules for each loan fund (by year) and provides the detail support for the summary schedule described in 1 above. In preparing schedules II, III, and IV a number of procedures must be followed by HAD and Fiscal. These procedures are discussed below:

Enclosure D-1

a. HAD's Accounting Technician should continue to maintain the Loan Activity Log. All encumbrances, transfers, increases, adjustments, etc. should be entered in the log. In effect, the Loan Activity Log should reflect all activity which affects loan encumbrances.
b. The Loan Closer should forward a copy of requests for warrants to the Accounting Technician in order for her to determine amounts requested are in agreement with amounts encumbered. If there is a difference, the Accounting Technician will enter the increase or decrease in the Loan Activity Log and applicable schedule. If an increase or decrease in a loan amount is known by the Loan Closer in advance, the Loan Closer should forward a document indicating the change to the Accounting Technician.
c. The Loan Closer should forward a copy of all warrant cancellation requests to the Accounting Technician. (This has no effect on schedules II, III, or IV, however, effects the HAD reports prepared by the Accounting Technician.
d. All items entered in the Activity Log (see [a] above) by the Accounting Technician should be entered in the Wang and on the applicable SCHEDULES, II, III, or IV. The Accounting Technician should establish a cut-off date at the end of each month. This will be important for reconciliation purposes. All activity input in the Wang (per activity log) in a particular month and included in HAD Loan Reports for that month should be entered on SCHEDULES II, III, or IV for the same month. For example, information entered in the Wang on January 5th and included in the December 31st (or January 1st) HAD Loan Reports should be included in the schedules for the month of December.

e. The Accounting Technician should forward SCHEDULE's I, II, III, and IV to Fiscal on a routine basis, preferably weekly. The Fiscal section will complete the schedules and return them to HAD as documents are received by the Department of Administration. If an item submitted by HAD is indicated by Fiscal as not being recorded, it should appear on the reconciliation schedule (SCHEDULE's V, VI, and VII attached) at month end. This is an item which will be included in the HAD Loan Report for the current month, however, will not be reflected in the Current Year Authorization Balances report (PBA Report) for the month.

f. The Accounting Technician should review SCHEDULE's II, III, and IV as they are received from Fiscal for potential reconciling items. As described in [e] above, items not recorded by the Department of Administration will be reconciling items. Additionally, items recorded by the Department of Administration in the month following the month submitted by HAD will be reconciling items (i.e; included in December HAD Loan Report, however, recorded by the Department of Administration on January 10th).

3. Preparation of SCHEDULES V, VI and VII (the reconciliation schedules) on a monthly basis. These schedules are the basis of reconciling the Current Year Authorization Balances Report (PBA Report) to the HAD Loan Reports prepared at month end. A loan report should always be printed at month end. If the PBA Report has not been received by the 15th of the current month, please notify Fiscal.

Performance of the above procedures will be the first step in reconciling PBA reports to HAD reports. Should you have any questions regarding these procedures, please contact me. I will discuss these procedures with the Fiscal section immediately.

SPONSOR STATEMENT ON HB 328 & HB 320

HB328 - The intent of this legislation is to restore. the power of local municipalities to set standards for local subdivisions and subdivision roads. This power was removed a few years ago to speed up state land disposals and has resulted in non-conforming subdivisions, sometimes with inadequate access and roads.

HB320 - This legislation is a companion to HB 328 and provides a mechanism whereby the cost of road construction in a state subdivision can be met from part of the proceeds of the sale of the land within the subdivision. Currently road construction in a state subdivision has required a separate appropriation of state monies or has fallen to the taxpayers of the municipality within which the subdivision has been located.

RE: HB 328

The effect of HB 328 would be to require the state to comply with the planning commission and platting board regulations pertaining to subdivisions in the same manner that private developers are required to comply with the regulations.

The primary issue concerns municipal requirements to insure physical access to the land or lots being sold. At present, the state agencies are exempted from providing any capital improvements to the lands being sold regardless of municipal requirements to the contrary. The construction of access trails or roads to or within the subdivision is considered a capital improvement.

FISCAL IMPACT - HB 328

This fiscal note is based upon the following assumptions:

1. Disposal Year 600 Lots; 5-1/4 acre average = 3,150 acres.
2. Subdivisions kept within three (3) miles of existing road system (average distance).
3. Subdivision size; 100 acres or greater.
4. No road construction in areas where proposed primary access is boat or plane.
5. Estimates based on FY 84 road/lot ratio.

Roads Built to Borough Standards

Subdivision Roads	$347,939/Mile	46.14 miles X 347,939	=	$ 16,054,000
Access Roads	$345,797/Mile	27 miles X 345,797	=	$ 9,337,000
		TOTAL	=	$ 25,391,000

NOTES:

1. No bridges are included. Add 10,000 for miscellaneous bridges or similar structures ($35,400,000 total).
2. No attempt was made to estimate the recovery costs from land sales.
3. Costs for years beyond FY 84 would be comparable.
4. Assumes that disposal program proceeds as planned; if program is reduced in scope, costs would be lower.

POSITION PAPER

RE: HB 328

SPONSOR: Representative Koponen, et al

Program Effects of Bill

The general impact of this legislation will be to require that proposed state land disposals conform to the same local regulatory standards as are applied to any subdivision proposed for development within a local municipal jurisdiction.

Comments

The legislation would allow more consistent local control of development. State land disposals would have to be planned in a manner conforming to local comprehensive and capital improvement plans. Under current statute, State land disposals are exempted from meeting local standards, imposing difficulties associated with non-conforming developments in local communities and disrupting local efforts to develop long range development plans.

By requiring local regulatory approval, this legislation advocates and supports increased local control and responsibility for development planning and capital project implementation.

Mark Lewis, Commissioner

Matanuska-Susitna Borough
BOX B, PALMER, ALASKA 99645 • PHONE 745-4801
DEPARTMENT OF ADMINISTRATION

April 19, 1983

APR 24 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Re: HOUSE BILLS 328 AND 330

As you know, the Matanuska-Susitna Borough has always asked that the State provide physical access to subdivisions not on lakes or streams, as required by House Bill 328 "An Act relating to subdivisions of state land" and consider the present State policy of turning its back on access as irresponsible.

In fact, if a private person tried to peddle such lots in interstate commerce, he would go to jail for violating the consumer fraud provisions of the federal Interstate Land Sales Act.

There is a particular problem when the State tries to place a new residential subdivision in the midst of residential subdivisions which have been built to Borough subdivision requirements. An example of this would be the proposed State subdivision near the Beverly Lake subdivision in the Meadow Lakes area. The Borough, since 1972, has required construction of subdivision roads to a certain minimum standard--generally 18-20 foot travelled width, one foot of gravel, ditching, drainage, no excessive grades, etc. as a condition of subdivision approval. This means that the subdivisions have come in since 1972 are all pretty good, the roads can be used year-round and we can maintain them at reasonable expense. Some of our pre-1972 subdivisions, when these requirements were not in place, are a disgrace and a constant problem. Where roads can be maintained, the cost of road maintenance is excessive, which is unfair to those persons in road service area where a proper initial investment was made in road construction.

There are a couple of technical points to be kept in mind in connection with House Bill 328, which might be addressed separately from House Bill 328. Very often access to the subdivision is much more important than access within the subdivision. To date, we have been able to prevail upon the State to designate feasible constructable access to a new

subdivision so that if monies should ever become available for construction of the road, the road could be constructed. A certain amount of money should be appropriated each year to the Department of Natural Resources, or the Department of Natural Resources should be able to reach revenues from land sales, for the purpose of building access roads to new State subdivisions to some standard--perhaps a Pioneer access road standard. At the very least, the road should be built to a standard which would qualify the road for the State road revenue sharing program so that the road, once constructed by the Department of Natural Resources, can be maintained.

And, very rarely there is a problem of legal access, where the only good physical access crosses parcels where there is some question about the State's right to locate a road. In those cases, it is much better for the State to spend a dollar for right of way acquisition than to create a situation where the State or the local government or local residents are put in a position to construct a round about road which is not the most feasible and direct route. So, the Department of Natural Resources should always be able to use monies appropriated for State subdivision design and surveying for right of way acquisition, even though there may not be one cent available for road construction. Road right of way acquisition would not be a significant part of the cost of getting a State subdivision ready for sale and would not ordinarily be required.

House Bill 330 "An Act relating to construction of streets and subdivision of state lands" is a creative approach to getting roads built within a subdivision with monies bid in by buyers of lots. It should be possible for the Department of Natural Resources to use some of the money coming in for lot sales in new subdivisions for constructing and upgrading both access road to the subdivision and roads within the subdivision. The source of the money to be placed in escrow under the proposed Subsection (h) could be a separate appropriation to the Department of Natural Resources or this could simply be handled by permitting the Department of Natural Resources to reach into the monies generated by lot sales for State subdivision road purposes. This would, in effect, be a revolving fund with monies coming in from lot sales and money going out for roads to the subdivision and within the subdivision.

Since the State owns the area within any State subdivision before sale of lots, the State should always ask the local government for the creation of a road service area for the area of the subdivision. This means that once the lots are sold, the residents of the subdivision have the legal means to help themselves with respect to roads to the subdivision and within the subdivision. This is not an alternative to construction of roads as proposed by House Bill 330, because the opportunity to build roads to a certain standard occurs at the time monies come in from lot sales and never again would a substantial lump sum be generated which could be immediately available for construction.

The use of a service area would be almost entirely for maintenance of roads previously constructed, since it would take a very long time to accumulate enough money through the property tax on individual lots within the service area to raise a fund sufficient to build roads.

I am glad that there are legislators who would want to see the State held to the same standards that the private sector is required to follow in Alaska and in most other states. There is a reason why land is no longer sold in California, New Mexico and Arizona like it was in the 1960's. Subdivision ltos without a reasonable prospect of access sooner or later becomes a vehicle for consumer fraud. Maybe the first buyer from the State knows what he is getting (or not getting) but the unsuspecting second or third buyer probably will not know.

Sincerely,

Gary Thurlow

Section AS 29.33.150(e) is amended to read:

(h) As a condition of approving a subdivision plat of undeveloped state land, the platting board may by regulation require the Commissioner of Natural Resources to ESTABLISH A SERVICE AREA WITHIN THE LAND TO BE DISPOSED OF AND TO deposit money in an escrow account established by the municipality to be used to construct streets AND OTHER IMPROVEMENTS REQUIRED BY LOCAL ORDINANCE within the subdivision. The platting board may not require a deposit of money into the escrow account until after the first lot in the subdivision is disposed of. The amount of funds required to be deposited into an escrow shall be equal to the municipalities estimate of construction cost per road mile, or fraction thereof, for platted roads AND OTHER IMPROVEMENTS REQUIRED BY LOCAL ORDINANCE that are adjacent to property that has been disposed of. The estimate of road construction costs shall be the estimate to construct a road AND OTHER IMPROVEMENTS REQUIRED BY LOCAL ORDINANCE to minimum standards to qualify for state aid to municipalities for roads AND OTHER IMPROVEMENTS REQUIRED BY LOCAL ORDINANCE under AS 29.89.020.

Pink outlining is difference between HB330 language and Committee request language.

Above was approved by Committee to be entered in CSHB330.

Passed with 5 do passes. Taken to legal for draft of

ACTION NARRATIVE

0007

Chairman Miller calls the House Community & Regional Affairs Committee Meeting to order. Roll call shows the following members present: Rep. Cato, Rep. Lacher, Rep. McBride and Rep. Miller. (Rep. Phillips joins the meeting at 0132 of the tape meter.) Roll call shows the following members absent: Rep. Hurlbert and Rep. Lindauer. The Chairman announces the bill to be heard in committee: HB 330 - "An act relating to the construction of streets in subdivisions of state land." The Chairman then introduces the prime sponsor of the bill, Rep. Niilo Koponen, and asks him to address the Committee.

0018

Rep. Koponen offers his support and testimony for HB 330. "What I was trying to do with the two bills, SB 28 and [HB] 330 was to have specific legislation that would deal...would provide certain incremental changes to deal with specific problems..."

0054

All of the committee members discuss their questions and comments regarding Rep. Koponen's testimony.

0248

Chairman Miller excuses Rep. Koponen and introduces the first witness, Mr. Scott Burgess, Executive Director of the Alaska Municipal League.

0253

Mr. Burgess gives his testimony on HB 330 (see attachment #1).

0310

Representatives Phillips, McBride and Lacher discuss their comments and questions with Mr. Burgess regarding his testimony on HB 330.

0438

Chairman Miller announces that he wishes to pass HB 330 out of Community and Regional Affairs and on to the next committee of referral, House Resources in order for it to be in the committee when Senator Fahrenkamp's bill, SB 375 regarding Title 38 also reaches House Resources. This is the intent of the Chair because it will be beneficial for the Resources Committee to consider the two bills at the same time.

0443

Rep. Phillips states that the Committee might wish to consider some suggested language changes in the bill.

0449

Chairman Miller opens the meeting for discussion of the language changes among the members.

0452

Representatives Phillips, Cato and Koponen discuss the possibility of sending the suggested language changes to the next committee of referral in order to allow them to make any amendments to the bill that they wish.

0463

Rep. McBride proposes a possible change in language that could be adopted by the C & RA Committee.

0468

The members discuss the changes and are agreeable with them.

0510

Rep. McBride moves to adopt the amendment to HB 330.

0511

Hearing no objection, the Chairman orders that the amendment to HB 330 be adopted.

0513

Rep. McBride moves and asks unanimous consent that the Committee Substitute for House Bill 330 be passed out of the Community & Regional Affairs Committee with individual recommendations.

0515

Hearing no objection, the chairman orders that the CS for HB 330 be passed out of the C & RA Committee with individual recommendations.

0516

Chairman Miller announces that the C & RA Committee will meet only two days per week rather than three, Monday and Wednesday, due to lack of a large number of bills in the Committee He also gives a brief summary of the next meeting.

0532

With no further discussion the Chairman adjourns the meeting at 3:52 p.m..

Re: Hb 330 - Construction of Streets in State Subdivisions

The League urges the passage of legislation which requires the State of Alaska to comply with all local subdivision ordinances and regulations in connection with state land disposal programs. The state should meet the same local requirements imposed on private citizens.

Because the lack of funding is used as the main reason why state subdivisions were specifically exempted from the capital improvement requirements of AS 29.33.150, HB 330 provides one mechanism to require the state to provide the funding. However, if the money is available to the state to create an escrow account, why not simply remove the state's exemptions from AS 29.33.150 and include the costs of capital improvements in the state disposal program?

RE: HB 330

HB 330 provides a means to enable municipalities to acquire funds to construct roads within a subdivision of underdeveloped state lands that have been sold to individuals. Funds from the sale of lots within a state subdivision are deposited into the state general fund. The proposed legislation requires the Department of Natural Resources, upon the sale of lots in a state subdivision, to deposit money in a municipal escrow account to be used by the municipality to construct streets within the subdivision.

Under present ciscumstances, the purchasers of lots within a state subdivision cannot absorb road construction costs and no other means, except direct legislative appropriation, are available to fund the road construction. In the event that private developers subdivide and sell lots, the developer is generally required to construct streets to a specified standard before selling the lots.

FISCAL IMPACT - HB 330

This fiscal note is based upon the following assumptions:

1. Disposal Year 600 Lots; 5-1/4 acre average = 3,150 acres.

2. Subdivisions kept within three (3) miles of existing road system (average distance).

3. Subdivision size; 100 acres or greater.

4. No road construction in areas where proposed primary access is boat or plane (no road).

5. Estimates based on FY 84 road/lot ratio.

Since this bill applies to streets within the subdivision the anticipated funds to be escrowed are:

If Borough Standard Roads: 46.14 miles X 347,939 = $16,054,000

NOTES:

1. No attempt was made to estimate the recovery costs from land sales.

2. Costs for years beyond FY 84 would be comparable.

3. Assumes that disposal program proceeds as planned; if program is reduced in scope, costs would be lower.

re: HB 330 - Escrow Account for State Subdivision Streets

Summary: This bill gives municipal platting authorities the option of requiring an escrow account for the future construction of streets in a subdivision, instead of requiring that the streets be built before the lots are sold. AS 29.33.150 is the section of Title 29 outlining "Platting jurisdiction and power".

Section 1: Subsection (e) is amended to include the new subsection proposed in Section 2.

Section 2: This sections adds a new subsection giving platting authorities the option of requiring the state to deposit money in an escrow account after the first lot of a state subdivision is disposed of. The account would be used by the municipality for the construction of streets in a state subdivision instead of requiring construction prior to disposal.

Alaska Municipal League supports this bill because it provides added flexibility for the state and municipalities to time the construction of streets in state subdivisions when they are needed by the property owners.

re: HB 328 - State Subdivions/Municipal Platting Regulations

Summary: Four years ago during the big push to dispose of large quantities of state land, municipal subdivision regulations were partially overridden because they were perceived as a hindrance to the disposals. Actually what happened was that people got land that they had no way to get or to use. Municipalities then were besieged by state subdivision land owners to provide the streets and in some cases utilities that any other subdivider would have had to provide before the lots could have been sold. This bill repeals the special status given the state in disposing of land and requires the state to follow the same ground rules as any other subdivider.

Section 1: AS 29..33.150 is the "Platting jurisdiction and power" section of Title 29. The changes proposed in subsection (b) remove the special exemption from any requirements for providing capital improvements that had been granted to the state, but preclude the municipality from changing the "rules of the game" once a plat for a proposed subdivision has been filed.

Section 2: AS 29.33.150(c) requires the platting board to approve a state subdivision plat unless (1) it determines the plat does not comply with subdivision regulations and (2) notifies the DNR commissioner within 60 days. This bill allows the platting board to disapprove a state subdivision plat if it does not provide for required capital improvements.

Section 3: This section strengthens the wording which gives the state responsibility to provide legal access and to comply with regulations requiring physical access to state subdivisions.

Section 4: This section repeals AS 29.150(g) defining "capital improvements". The definition is no longer needed because references to capital improvements are deleted from the preceding subsections.

Alaska Municipal League supports this bill because there appear to be no good reasons why the state should follow a different set of rules than everyone else when disposing of land. Subdivision regulations are adopted to protect the property owner and purchaser, not to hinder development.

HB 329 (cont'd)

Introduced April 6 and referred to Community and Regional Affairs.

State Land (construction of streets in subdiv.)

HOUSE BILL NO. 330, by Reps. Koponen, Clocksin, Wendte and McBride. Relates to construction of streets in subdivisions of state land. Amends AS 29.33.150 (Platting Jurisdiction and Power) by adding a new subsection stating that the platting board may require, as a condition of approving a subdivision plat of undeveloped state land, that the commissioner of natural resources deposit money in an escrow account established by the municipality to be used by the municipality to construct streets in the subdivision. The board may not require a deposit in the escrow account until after the first lot in the subdivision is disposed of. Before approving a subdivision plat of undeveloped state land, the platting board shall notify the commissioner of natural resources of the amount of each deposit required by regulation, the total number of deposits, and the date upon which each deposit is due.

Does not provide for an effective date (becomes law 90 days after Governor's approval).

Introduced April 6 and referred to Community & Regional Affairs, Resources and Finance.

Bidding on State Grants/ Appropriations

HOUSE BILL NO. 331, by the Labor and Commerce Committee. Would require all recipients of a state grant or appropriation including municipalities, unincorporated communities, and agencies of the state, to comply with the Alaska bidder preference in AS 37.05.230(1) in expending all or part of the grant or appropriation to construct or repair any public facility or improve any real property. The grant or appropriation recipient may not provide for a preference to a local bidder in the award of any construction project funded in whole or in part by state funds unless the preference is granted to an "Alaska bidder" as defined in AS 37.05.230(5) (a person who holds a current Alaska business license, submits a bid for goods or services, has maintained a place of business within the state for six months immediately preceding the date of the bid). Does not provide for an effective date (becomes law 90 days after Governor's approval).

Introduced April 7 and referred to Labor & Commerce, Finance.

State Medical Board (extending)

HOUSE BILL NO. 332, by the Labor & Commerce Committee. Would extend the termination date of the State Medical Board until June 30, 1987 (currently scheduled to terminate June 30, 1983). Provides Act takes effect immediately.

Introduced March 7 and referred to Health, Education & Social Services, Finance.

The following Labor & Commerce Committee letter accompanied the bill upon introduction:

BILLS PASSED IN THE HOUSE

Appropriation (special) (AK Housing Fin. Corp.) — CS FOR HOUSE BILL NO. 336 (FINANCE), (see pages 483;549; 564). On April 18 the Finance substitute was adopted. The bill then passed the House, 39-0-1. Excused: Cato. The effective date clause was adopted.

Nikishka Speed Zone (requesting) — CS FOR HOUSE CONCURRENT RESOLUTION NO. 25 (TRSP), (see pages 335;493;564). On April 19 the Transportation substitute was adopted (see page 493). The resolution then passed the House, 38-0-1-1. Excused: Cato. Absent: Grussendorf.

Trapping (use of info. for land use planning & disposal) — HOUSE CONCURRENT RESOLUTION NO. 27, (see page 384; ,this report). Passed the House April 22, 32-0-5-3. Excused: Bettisworth, Cato, Flood, Martin, Wendte. Absent: Hayes, Lindauer, Ringstad.

OTHER ACTION IN THE HOUSE

Auto Liab. Insurance (req'd under state law) — SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 7, (see pages 27;105; 415;496). On April 20 the Speaker changed the committee referrals to Labor & Commerce, Judiciary, and Finance. The bill is currently in Labor & Commerce.

Appropriation (supplemental) (sch. const. debt) — HOUSE BILL NO. 137, (see pages 99;258). On April 22 Reps. Lacher and Clocksin were added as co-sponsors.

Optometry (practice/ use of drugs) — HOUSE BILL NO. 225, (see page 222). On April 20 Rep. Martin was added as a co-sponsor.

Attorney Fees (payment by municipality) — HOUSE BILL NO. 327, (see page 477). On April 20 Rep. Pestinger moved that the bill be withdrawn. Rep. Clocksin objected. The bill was withdrawn, 28-10-1-1. Nays: Clocksin, Davis, Duncan, Koponen, Malone, McBride, M. M. Miller, Vaska, Wendte, Zharoff. Excused: Cato. Absent: Phillips. On April 20 Rep. Clocksin was added as a co-sponsor.

State Land (muni. plat. jurisdic.) — HOUSE BILL NO. 328, (see page 477). On April 22 Rep. Lacher was added as a co-sponsor.

State Land (construction of streets in subdiv.) — HOUSE BILL NO. 330, (see page 479). On April 22 Rep. Lacher was added as a co-sponsor.

Public Utility Income (exempting from taxat.) — HOUSE BILL NO. 346, (see page 526). On April 20 the State Affairs referral was waived at the request of the Chairman. To Labor & Commerce.

Naturopathic Medicine — HOUSE BILL NO. 347, (see page 526). On April 21 Rep. Abood was deleted as a co-sponsor.

ANALYSIS:

Municipal platting boards may, by regulation, require the Commissioner to establish a road service area within lands to be disposed of by the state. It is envisioned that the Commissioner would establish the road service area as a condition of the sale of lands. In that the road service area regulations are established by a municipality, the rules governing the new service area would be compatible with and administered within a municipality's road service area structure.

The administration of the escrow account established by the municipality is similar to established procedures for existing road service areas, except that the funds deposited are for construction of roads as opposed to maintenance.

No funds can be required to be deposited until the first lot is disposed of and, the rate of deposit of funds will be equal to the rate at which lands adjacent to platted roads are sold.

The amount of funds to be deposited will be determined by the estimated cost per road mile to construct roads to minimum standards to qualify for state road maintenance assistance. The road service area will be responsible to maintain the roads in accordance with established procedures.

The funds generated to the state from the sale of lands will continue to go to the general fund. The Department of Natural Resources will require additional appropriations to implement the program. However, the proceeds from the land sales should, on the average, exceed the appropriations required for purposes of road construction. The income generated from land sales varies from $200 per acre for agricultural lands to $3,000 to $6,000 per for highly desirable lands in five acre lots. The following data will assist in evaluating potential costs of the proposed amendment.

One linear mile of road is equivalent to 80 acres in linear distance. A road should serve properties on each side of the road.

Funds received from land disposals depend upon the selling price per acre.

Construction costs for new roads to meet minimum standards may vary from $80,000 per road mile to $500,000 per road mile. The lower costs are generally associated with lands suitable for agricultural use. The higher costs are encountered in very swampy or muskeg lands.

The amount of acreage sold per road mile will vary widely, depending upon the configuration and size of lots in respect to a platted road. As an example, five acre lots, each with 2½ acres fronting the road, would result in a total of 80 acres on one mile of road. Assuming a selling price of $3,000 per acre, the state would receive $120,000 for the land on one side of the road, or $240,000 if the same criteria were followed on both of the road.

If the five acre lots were configured so that each lot only had one acre of road frontage, the total acres sold per road mile would be 400 acres

on each side of the road. At $3,000 per acre, the state receipts for both sides of the road would be $2,400,000.

In the case of agricultural land disposals involving larger parcels of land at less cost per acre, the state receipts may be as follows:

> A 100 acre tract, 10 acres on each side would be equivalent to 1/8 of a mile. If the tract were sold for $200 per acre, the price would be $20,000. Potentially, eight such tracts could be sold on each side of one mile of road for $320,000.

The above examples describe ideal land conditions for subdivision and as such would rarely be encountered. However, the examples shown do indicate that with proper planning and land selections, the cost of the proposed legislation should not exceed the net gain to the state form the land disposals. Individual land disposals may be a net loss, but on the average, the state should continue to gain from the sale of the first lot, or at any specific time thereafter until all of the lands adjacent to each mile of road are sold.

POSITION PAPER

RE: HB 330

SPONSOR: Representative Koponen, et al

Program Effects of Bill

This legislation would impose a fiscal responsibility on the State, as is customarily fixed upon any developer, to insure that basic access and road improvements inherent in a subdivision plan are satisfactorily executed. The bill requires deposit of money in an escrow account by the Commissioner of Natural Resources for this purpose. Local platting boards would establish, under regulation, the amount due for this escrow deposit and the dates deposits are due.

Comments

Such proposed escrow requirements are not uncommon in local subdivision ordinances and regulations already in place across the State. Some local regulations currently require escrow arrangements for water and sewer as well, as prerequisites for final plat approval. When viewed as a companion bill to HB 328 this proposed legislation would further increase local responsibilities and capabilities in planning for and managing development.

Mr. Marvin Yoder
Borough Manager
Ketchikan Gateway Borough
344 Front Street
Ketchikan, Alaska 99901

RE: Assistance for the South Tongass Service Area Land Owners
(Mt. Point State Subdivision Lottery Recipients)

Dear Mr. Yoder:

As per instructions from the State Officials and the Borough Ordinances, we the Advisory Board for the South Tongass Service Area are submitting this written notice on behalf of 43 property owners of the Mountain Point State Subdivision, requesting the following assistance:

1: Boro to obtain thru proper channels Direct Appropriations for the construction of proposed roads into the Mt. Point Subdivision(State Land Lottery) for the purpose of 43 land owners to gain access to their properties, so as to start building their homes. As of June 83, it will be one year (since lottery) with 4 years left to not only build our homes but also live on the property 35 months, for the Homesites. Time is of the essence. This will also create jobs in the area, which is also very much needed.

2: Boro to obtain cost estimates and design plans for roads and a sewer collector system to Tidewater in the Mt. Point Subdivision.

3: Boro to request assistance and funding from the Community of Regional Affairs, Mark Lewis, Commissioner, Pouch B, Juneau,Alaska 99811. (roads and sewer)

4: Boro to request assistance and funding for roads from the Dept. of Transportation & Public Facilities, Daniel Casey, Commissioner, Pouch Z, Juneau, Alaska 99811.

5: Boro to request assistance and funding for sewer from the Dept. of Environmental Conservation, Richard Neve', Commissioner, and also Gene Rehfield, Construction Grants Dept., Pouch O, Juneau, Alaska 99811.

6: Boro to request assistance and funding from the Environmental Protection Agency, Jan Hastings and Don Dossett, 1200 Sixth Avenue Mail Stop 521, Seattle, Washington 98101, this is for sewer, due to the very fact that sewage is and has been a vital issue in the Mt. Point area.

We would also like to take this opportunity as land owners of the South Tongass Service Area (Mt. Point State Subdivision) to thank all of you for your immediate attention

and assistance on this very important issue and we will be awaiting your prompt response.

We also want to thank you for the opportunity to work closely with you, we hope that working as a group we can set a possitive and upbuilding example on team-work.

Sincerely,

Tom Leigh-Kendall

RE: State Land Lottery
Mountain Point Subdivision, ASLS 80-187

Dear Mr. Mc Bride:

This letter is a request from the "South Tongass Service Area" (Mt. Point State Land Lottery Subdivision) land lottery recipients for funds of 1.7 million dollars for the construction of ACCESS ROADS and SEWER LINES in the Subdivision. This we are asking from the Alaska State Legislature.

This figure is a rough estimate based on a 1982 preliminary, engineering cost estimates done by Pool Engineering, Inc. in Ketchikan.

Details and more accurate information is in process through the Ketchikan Gateway Borough. The Borough at this time is quite involved in serious administrative affairs, so things appear to be going very slow as far as getting assistance at this time.

Sad to say, that we as land recipients CANNOT remain at a standstill, as was mentioned many many times before, the homesite recipients have a 5 year requirement to build our homes, of which as of June, 1983 one year has come and gone. So now we have only 4 years left to build our homes. The need is great to get our access roads and sewer lines in.

We thank you for any and all immediate assistance on this timely matter.

Sincerely,

Tom Leigh-Kendall

RE: MUD-BIGHT SUBDIVISION

TO ALL CONCERNED:

In the last couple of weeks, much study has been made into the development of the Mud-Bight Subdivision.

On February 21, 1983, an informal meeting was held in the city council chambers to get as many people together and form a group to get things underway. It was decided upon, that we call ourselves, "The Mud-Bight Subdivision Group". From the people in attendance, five people volunteered to form a committee to do the leg-work as far as keeping everyone informed as to what information is needed and where to go to get it. The committee members are:

Robert Cowan - Chairman, Lottery owner
Roger Slaven - Co-Chairman, Homesite owner
Rick Williams - Lottery owner
Alan Bengaard - Homesite owner
Georgia Cowan - Secretary, Lottery owner

The group unanimously agreed to have the committee go to the Borough Assembly and request that a Service Center be formed to establish sewer & road powers for the Mud-Bight Subdivision.

On March 14, 1983 the group will be recognized at the Borough Assembly meeting with our request that a Service Center be formed. We are on the agenda for that meeting and as many landowners as possible from the Mud-Bight Subdivision are urged to attend and support the need for this Service Center.

In the near future you will be receiving a letter with a petition from the Borough. Please respond to this petition as soon as possible as a majority of the landowners approval is needed to get this Service Center established.

Our next meeting is being planned for March 24, 1983 at 7:00 pm in the city council conference room. Your attendance is very important if we are to succeed in getting this land developed. Everyone needs to know what is going on and how much progress we are making. If a change in the time or place of the meeting occurs, we will try to let you know either in the newspaper or on the radio.

Thank you in advance for your cooperation.

Sincerely,

Robert L. Cowan

Re: A.D.L. Subdivision, Mud Bay, Alaska

Dear Claud:

This letter is to inform you that we are holding back from doing any work on a preliminary layout for Mud Bay subdivision, per your verbal request on Thursday, August 31.

Currently we are finishing the paper work from the field data collected in Phase I: topo map; plats for penetration tests, test pits, and percolation tests. Upon completion of our office work we will bring a stop to all work other than correspondence.

Last Friday I had a meeting with Mark Berger of the Department of Environmental Conservation. His opinion at that time was that we do not have adequate ground cover above bedrock for on-site sewage treatment. This will eliminate a subdivision designed for year-round living, although he did say that it could possibly be satisfactory for recreational use; summer homes using a Forest Service type outhouse. The Department of Environmental Conservation should be giving us a formal reply this week.

Enclosed is a map of our penetration test, test pits and percolation tests along with logs of the test pits and results of the perc tests. We are waiting for further instruction from your office.

Sincerely,

TRYCK, NYMAN & HAYES

Enclosure

March 28, 1983

Attention: Representative Jack McBride

I received a phone call from Bourough Assembly Mayor Carol Fader after his return from Juneau and a conference with Commissioner Richard Neve from the Department of Environmental Conservation. Mr. Fader said the outlook on our direct appropriation was not good. I expressed my feelings of negative attitudes to Mr. Fader.

I cannot express the importance of this appropriation in order to get McKnight Subdivision underway. In the Assembly meeting of March 21st. We were put on priority for a direct appropriation and forming a service area. Because of Ruling of the State a service area is a problem. We are also on the Capital Funding Priority List Revised 2/11/83 through the A.D.E. C. 50/50 matching fund program. If that is not available or adequate a direct appropriation in the amount of approximately 1 million dollars would help both of the subdivision McKnight and Mountain Point. I ask you Jack, what happened to our priorities?

I see a problem for us receiving any type of loan for the roads and sewer being the State has only received tentative approval for the property from Bureau of Land Management and not final title until the land is paid off.

I am sending a copy of a Letter to you concerning the Department of Environmental Conservation opinion, the land could be satisfactory only for recreational use.

Jack, opinions like this make us feel the State is obligated to help us with direct appropriations. We have no security to lay our money on. I expect a response on this at the April 13th Teleconference, as I promised you in some sent through the Legislative Affairs Office in Ketchikan March 17, 1983. I will have 50% of the landowners at the April 13th Teleconference. Thanks.

Robert L. Cowan

Matanuska-Susitna Borough
BOX B, PALMER, ALASKA 99645 • PHONE 745-4801
DEPARTMENT OF ADMINISTRATION

April 19, 1983

APR 2[illegible]

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Re: HOUSE BILLS 328 AND 330

As you know, the Matanuska-Susitna Borough has always asked that the State provide physical access to subdivisions not on lakes or streams, as required by House Bill 328 "An Act relating to subdivisions of state land" and consider the present State policy of turning its back on access as irresponsible.

In fact, if a private person tried to peddle such lots in interstate commerce, he would go to jail for violating the consumer-fraud provisions of the federal Interstate Land Sales Act.

There is a particular problem when the State tries to place a new residential subdivision in the midst of residential subdivisions which have been built to Borough subdivision requirements. An example of this would be the proposed State subdivision near the Beverly Lake subdivision in the Meadow Lakes area. The Borough, since 1972, has required construction of subdivision roads to a certain minimum standard--generally 18-20 foot travelled width, one foot of gravel, ditching, drainage, no excessive grades, etc. as a condition of subdivision approval. This means that the subdivisions have come in since 1972 are all pretty good, the roads can be used year-round and we can maintain them at reasonable expense. Some of our pre-1972 subdivisions, when these requirements were not in place, are a disgrace and a constant problem. Where roads can be maintained, the cost of road maintenance is excessive, which is unfair to those persons in road service area where a proper initial investment was made in road construction.

There are a couple of technical points to be kept in mind in connection with House Bill 328, which might be addressed separately from House Bill 328. Very often access to the subdivision is much more important than access within the subdivision. To date, we have been able to prevail upon the State to designate feasible constructable access to a new

subdivision so that if monies should ever become available for construction of the road, the road could be constructed. A certain amount of money should be appropriated each year to the Department of Natural Resources, or the Department of Natural Resources should be able to reach revenues from land sales, for the purpose of building access roads to new State subdivisions to some standard--perhaps a Pioneer access road standard. At the very least, the road should be built to a standard which would qualify the road for the State road revenue sharing program so that the road, once constructed by the Department of Natural Resources, can be maintained.

And, very rarely there is a problem of legal access, where the only good physical access crosses parcels where there is some question about the State's right to locate a road. In those cases, it is much better for the State to spend a dollar for right of way acquisition than to create a situation where the State or the local government or local residents are put in a position to construct a round about road which is not the most feasible and direct route. So, the Department of Natural Resources should always be able to use monies appropriated for State subdivision design and surveying for right of way acquisition, even though there may not be one cent available for road construction. Road right of way acquisition would not be a significant part of the cost of getting a State subdivision ready for sale and would not ordinarily be required.

House Bill 330 "An Act relating to construction of streets and subdivision of state lands" is a creative approach to getting roads built within a subdivision with monies bid in by buyers of lots. It should be possible for the Department of Natural Resources to use some of the money coming in for lot sales in new subdivisions for constructing and upgrading both access road to the subdivision and roads within the subdivision. The source of the money to be placed in escrow under the proposed Subsection (h) could be a separate appropriation to the Department of Natural Resources or this could simply be handled by permitting the Department of Natural Resources to reach into the monies generated by lot sales for State subdivision road purposes. This would, in effect, be a revolving fund with monies coming in from lot sales and money going out for roads to the subdivision and within the subdivision.

Since the State owns the area within any State subdivision before sale of lots, the State should always ask the local government for the creation of a road service area for the area of the subdivision. This means that once the lots are sold, the residents of the subdivision have the legal means to help themselves with respect to roads to the subdivision and within the subdivision. This is not an alternative to construction of roads as proposed by House Bill 330, because the opportunity to build roads to a certain standard occurs at the time monies come in from lot sales and never again would a substantial lump sum be generated which could be immediately available for construction.

The use of a service area would be almost entirely for maintenance of roads previously constructed, since it would take a very long time to accumulate enough money through the property tax on individual lots within the service area to raise a fund sufficient to build roads.

I am glad that there are legislators who would want to see the State held to the same standards that the private sector is required to follow in Alaska and in most other states. There is a reason why land is no longer sold in California, New Mexico and Arizona like it was in the 1960's. Subdivision ltos without a reasonable prospect of access sooner or later becomes a vehicle for consumer fraud. Maybe the first buyer from the State knows what he is getting (or not getting) but the unsuspecting second or third buyer probably will not know.

Sincerely,

Gary Thurlow

RE: MUD BIGHT SUBDIVISION

I'M A HOMESITE OWNER AT MUD BIGHT SUBDIVISION. I RECEIVED MY PERMIT IN 1980 AND AM CONCERNED THAT THERE HAVEN'T BEEN ANY FUNDS AVAILABLE FOR DEVELOPMENT CONSIDERING THE TIME LIMITATION IMPOSED ON HOMESITE OWNERS. I HAVE ONE YEAR LEFT TO COMMENCE LIVING ON THE SITE TO MEET THREE-YEAR CONSECUTIVE OCCUPATION. PLEASE CONSIDER AN EXTENSION FOR THE TIME LIMIT.

THANK YOU. EOM/JR

RE: Acquisition of Right of Way by State for State Subdivisions and Land Disposals

Dear Barbara:

A very short fiscal note to the State Department of Natural Resources appropriate for State subdivisions and land disposals would clear the way for at least one State subdivision and maybe others.

The note would read:

> "Monies appropriated for preparation of State subdivisions and land disposals may be used for right of way acquisition and monies from any special assessment district for such subdivisions and land disposals may be applied to right of way acquisition and construction".

If its too much trouble to explain to your fellow legislators the use of a special assessment district the last clause referring to monies from special assessment districts could be dropped.

We and the Division of Technical Services of the Department of Natural Resources thougnt that we had a very simple solution to handling access into the Chickaloon Bench Subdivision a couple of miles north of the Glenn Highway just east of the Chickaloon River. This is a very well designed subdivision with many lots and with a long linear greenbelt running down the middle.

Our Platting Board approved the subdivision contingent upon the State of Alaska producing evidence that there is legal right of way to the Subdivision along the old Chickaloon River Trail, which runs along the west side of the River from the end of the State maintained road. The Department of Natural Resources claimed that their documentation of the right of way shows that legal access does exist. Unfortunately, there are at least three locations along this trail, where the status of the right of way is highly confused. The rights of way are based upon a series of documents going back at least 70 years which are based upon innumerable Federal statutes, regulations and acts of one kind or another, all of which are very difficult to evaluate as to their effect today.

Our Platting Board took the position that if the Department of Natural Resources could nail down the right of way through a quiet title action or through negotiation with the individual owners, then the buyers of lots would have assured access over the right of way. The State would not actually physically construct anything within the right of way, but if the homeowners or others could find a way of constructing a road or trail, then they would have legal right of way within which to do it.

Since it would be necessary to acquire relatively few square feet to resolve the issues of legal title to the right of way, and since the cost of the right of way would be very minor and a very small percentage of the total project cost for this State subdivision, we thought it would be desirable if the State could simply go ahead and acquire the right of way by filing a legal action or by purchasing the right of way.

We suggested that the Borough could establish a special assessment district for the new State subdivision so that the buyers of the lots could deposit a certain amount per lot into a fund at the time they buy their property and so that these monies could be used to pay off any of the costs of right of way acquisition and, if there are any monies left over from this fund, so that these monies could be applied towards the cost of construction of a road to their subdivision. This would be a one shot contribution towards access and the only monies that the lot buyers would be paying would be a specific dollar amount on their lot for the special assessment district at the time they purchase the lot from the State. Then, the monies raised by this special assessment district would be used to reimburse the State for its right of way acquisition costs. State law does not now permit the Borough to reimburse the Department of Natural Resources for right of way acquisition costs from a special assessment district fund. If the Borough attempted to turn over monies to the State, it would simply go into the State general fund, and there would be no way for the Department of Natural Resources to acquire monies to pay to property owners short of a specific legislative appropriation in some subsequent year. So, under existing law, we can not make the special assessment district work. The Borough could not just go ahead and create a special assessment district and use the proceeds to establish a right of way because the Borough does not have areawide road powers and the proposed road is outside of any Borough road service area.

If this fiscal note is tacked onto the appropriation, we can work together with the State Department of Natural Resources to make sure that this Chickaloon Bench Subdivision can be marketed and insure that the buyers of the parcels will be spared the burden of horrendous right of way disputes.

We do not want to raise the question of whether the State should spend money to construct roads into new State subdivisions or land disposal areas, because that is a much weightier issue, which we would prefer to be dealt with separately.

Sincerely,

Gary Thurlow

HB 330 "An Act relating to construction of streets in subdivisions of state land."

WITNESS REGISTER

Representative Niilo Koponen
Alaska State Legislature
Behrends Building, Room 216
Pouch V
Juneau, Alaska 99811
465-4992
Position Statement: Prime Sponsor of HB 328 and HB 330.

Bob Arnold, Deputy Commissioner
Department of Natural Resources
Pouch M
Juneau, Alaska 99811
465-2400
Position Statement: Testified that the Department agrees wholly with HB 328 and HB 330 in their goals, but the problem is that the legislation would require a large appropriation from the State if subdivision continues in existing areas; he offers several alternatives and supports the Department's needs for more time to address the issue.

Bill Zybach, Special Assistant
FNSB
(No address given)
(No phone number given)
Position Statement: Testified in favor of the bill; cited Title 17; argues that a good mechanism for

provision of access -- Borough would prefer that there would not be disposals unless access is provided; and cited problem has existed since 1980; two problems: (1) road within subdivision; and (2) problem with access to subdivision.

Ginny Chitwood, Executive Director
Alaska Municipal League
204 North Franklin Street
Juneau, Alaska 99801
586-1325
Position Statement: Testified in favor of HB 328.

ACTION NARRATIVE

TAPE#051183 (Side A)

Recording Number	
0000	Chairwoman Lacher calls the meeting to order at 3:15 p.m. Members present were: Representatives Lacher, Tischer, Phillips, Clocksin and Szymanski; Fritz and McBride were absent.
0024	Representative Niilo Koponen, Prime Sponsor of HB 328 and HB 330, begins testimony on the legislation.
0049	(Rep. Szymanski gives Chairwoman Lacher a note and leaves the meeting.) Rep. Koponen's testimony continues. He lists the history of problem with examples to illustrate the need for the legislation. AS 29.33.150 is amended to speed up subdivision process (at some earlier date).
0110	HB 328 changes the amendment back -- regarding platting board.
0125	AS 29.33.150 (HB 328) was amended without provisions for physical access for State.
0138	Actually in violation of Federal law.
0140	Rep. Tischer asks a question regarding preface.
0143	Rep. Koponen responds.
0154	The witness continues his testimony regarding the amendment to AS 29.33.150 in HB 328.
0182	Rep. Koponen states that it is not his intent in HB 328 to require that the State spend any more money than at present on this program.
0207	He states that it is the intent of this bill to provide for funding.
0217	(Rep. Szymanski returns.)
0218	Rep. Koponen continues his testimony on HB 328. He states the Department of Natural Resources could ask the Legislature for appropriations for the roads, but the intent

was that the land purchase price include the cost of roads.

Number 0279 — AS 08.88.055 is then addressed.

Number 0288 — (Rep. Fritz joins the meeting at 3:35 p.m.)

Number 0339 — Rep. Koponen continues his testimony and mentions Rep. McBride's example. He then gives more examples of the access and bonding problems as reason for the legislation.

Number 0376 — End of Rep. Koponen's testimony on HB 328.

Number 0377 — Rep. Phillips asks a question regarding POM's for requests -- cites examples where people knew they were responsible for the roads.

Number 0409 — Rep. Koponen states that the two pieces of legislation are intend to prevent further problems.

Number 0411 — Rep. Tischer agrees with Rep. Phillips and agrees that constituents are on their own.

Number 0437 — (Rep. Clocksin leaves the meeting.) Rep. Tischer continues that she feels that people should build their own.

Number 0475 — Rep. Koponen cites the method of a local bond election as means of getting a road.

Number 0480 — Rep. Tischer questions how many people.

Number 0482 — Rep. Koponen replies that it varies.

Number 0487 — Rep. Tischer continues the argument that if people want service they should pay for it.

Number 0500 — Rep. Koponen replies that the bills are designed to take care of this in the land price.

Number 0510 — Rep. Tischer asks about the examples.

Number 0512 — Rep. Koponen replies. Discussion between Representatives Tischer and Koponen follows.

Number 0524 — Rep. Koponen continues to elaborate.

Number 0544 — Rep. Tischer suggests that the committee should prevent the State from going into the

subdivision business; it should be a private sector issue.

Number 0561 — Rep. Koponen argues that the statutes and practice has varied over the years; it is hard to prevent the State's involvement in subdivisions.

Number 0580 — Chairwoman Lacher introduces Mr. Phillips, who answers questions regarding the intent.

Number 0585 — Rep. Koponen comments.

Number 0597 — Rep. Phillips questions.

Number 0604 — Rep. Szymanski clarifies the argument.

Number 0619 — Rep. Phillips comments that he is against the bill.

Number 0628 — Chairwoman Lacher would appreciate it if they would quit calling the State 'Charlie'.

Number 0633 — There is discussion between Representatives Szymanski and Phillips.

Number 0653 — Chairwoman Lacher also states that they should not put the burden on the local government.

Number 0659 — There is brief discussion.

Number 0670 — Rep. Koponen comments.

Number 0680 — Rep. Phillips comments on homesteader sales to developers.

Number 0696 — (Rep. Clocksin returns to the meeting.) Discussion continues.

Number 0710 — Chairwoman Lacher calls point of order.

Number 0712 — Rep. Tischer makes a statement.

Number 0729 — Chairwoman Lacher sums up the discussion.

Number 0749 — Bob Arnold, Deputy Commissioner of the Department of Natural Resources, comes before the committee to give testimony. He notes the large volume of mail regarding the access problem and gives history of problem and the State's position. The Department agrees wholly with the two bills in their goals, but the problem is that the bills

would require a large appropriation from the State if subdivision continues in existing areas. He offers several alternatives and supports the Department's needs for more time to address the issue.

Number 0830 — Rep. Szymanski questions the likeness of the Department to developers.

Number 0847 — Deputy Commissioner Arnold answers Rep. Szymanski's question and lists technical issues needing to be addressed and requests time for the issue.

Number 0865 — (Rep. Phillips leaves the meeting.)

Number 0866 — Rep. Szymanski questions.

TAPE#051183 (Side B)
Recording
Number 0886 — There is discussion between the witness and Rep. Szymanski.

Number 0929 — Rep. Clocksin asks a questions regarding earlier land disposal.

Number 0945 — Deputy Commissioner Arnold replies that Sharon Barton can answer that question.

Number 0969 — There is discussion.

Number 0970 — (Rep. Phillips returns to the meeting.)

Number 0971 — Rep. Clocksin comments.

Number 1005 — Deputy Commission Arnold comments.

Number 0019 — Rep. Tischer address problems and discussion with the witness follows; argues regarding extra administrative expense.

Number 0171 — The point that some people cannot afford costs of parcels if road costs are built in is brought up and discussion follows.

Number 0185 — Deputy Commissioner Arnold comments.

Number 0204 — Chairwoman Lacher thanks the witness.

Number 0205 — Bill Zybach, Special Assistant with FNSB, testifies in favor of the bill; cites Title 17 also.

Number 0237 — Mr. Zybach continues his testimony.

Number 0268 — He argues that a good mechanism for provision of access -- Borough would prefer that there would not be disposals unless access is provided. He cites problem has existed since 1980; two problems: (1) road within subdivision; and (2) problem with access to subdivision.

Number 0314 — Chairwoman Lacher calls point of order; the committee is discussing HB 328, there has been latitude to HB 330.

Number 0323 — Rep. Szczanski asks a question and discussion with the witness follows. The witness talks of the Borough policy of identification of 'Service Area'. Discussion follows.

Number 0375 — Chairwoman Lacher gives summary and there is discussion.

Number 0400 — Rep. Tischer asks a question regarding the point of law regarding access.

Number 0436 — Deputy Commissioner Arnold comments regarding right-of-way.

Number 0440 — Rep. Tischer comments.

Number 0482 — Rep. Phillips questions regarding access (the question is directed to Deputy Commissioner Arnold). Chairwoman Lacher calls point of order.

Number 0500 — Rep. Clocksin directs a question to Rep. Tischer and discussion follows. He argues that Rep. Tischer is off the issue and cites 1978 statute change.

Number 0514 — Rep. Clocksin continues his comments and makes strong argument in favor of HB 328.

Number 0526 — Chairwoman Lacher gives the committee 20 minutes and states that the intent is to pass out HB 328.

Number 0530 — Rep. Tischer comments against HB 328.

Number 0560 — Chairwoman Lacher suggests that Rep. Tischer is a little off course; cites 5 acre subdivisions of the State; and states that HB 328 will stop the State from doing this.

Number 0584 — Chairman Lacher and Rep. Tischer discuss.

Number 0612	Rep. Clocksin clarifies the issue for Rep. Tischer; argues that HB 328 creates impetus for State responsibility.
Number 0633	Deputy Commissioner Arnold gives acreage.
Number 0637	Chairman Lacher comments.
Number 0639	Ginny Chitwood, Executive Director of the Alaska Municipal League, testifies in favor of HB 328.
Number 0644	Rep. Phillips moves that HB 328 be moved from committee with individual recommendations.
Number 0650	HB 330 is then brought before the committee for consideration.
Number 0659	Rep. Clocksin comments regarding the Department of Natural Resources' timeframe requested.
Number 0665	Chairwoman Lacher gives summary.
Number 0675	Rep. Koponen comes before the committee to answer questions. Rep. Phillips asks a question regarding escrow.
Number 0680	Rep. Koponen responds and there is discussion.
Number 0713	Deputy Commissioner Arnold joins the table.
Number 0717	Representatives Phillips and Lacher invite open discussion.
Number 0718	Deputy Commissioner Arnold addresses the escrow issue.
Number 0737	Chairwoman Lacher suggests that perhaps this is an interim issue and cites need for local government input. Rep. Phillips asks a question regarding unorganized areas without local government and what recourse they have. Deputy Commissioner Arnold replies that the Department of Natural Resources handles them, not the Department of Community and Regional Affairs.
Number 0764	Chairwoman Lacher adjourns the meeting.

RE: HB 330

HB 330 provides a means to enable municipalities to acquire funds to construct roads within a subdivision of underdeveloped state lands that have been sold to individuals. Funds from the sale of lots within a state subdivision are deposited into the state general fund. The proposed legislation requires the Department of Natural Resources, upon the sale of lots in a state subdivision, to deposit money in a municipal escrow account to be used by the municipality to construct streets within the subdivision.

Under present ciscumstances, the purchasers of lots within a state subdivision cannot absorb road construction costs and no other means, except direct legislative appropriation, are available to fund the road construction. In the event that private developers subdivide and sell lots, the developer is generally required to construct streets to a specified standard before selling the lots.

SUBJECT: CS HB 339

DATE: May 9, 1983

As you know Special Olympics is a program staffed entirely by volunteers who serve the particular needs of children who suffer from mental retardation throughout the state. This not-for-profit organization is requesting only 10% of its total financial need in CSHB 339, all of which is will be used directly for the children who are participants in the Special Olympics Games.

The purpose of CSHB 339 is to provide funding for the conduct of the 1984 Alaska Special Olympic Games. The activities to be funded include a State Bowling Tourney, and the State Winter and Summer Games.

I urge your support of this worthy program.

Re: HB 339

The purpose of HB 339 is to provide funding for the conduct of the 1984 Alaska Special Olympic games. The activities to be funded include a State Bowling Tourney, State Winter Games and State Summer Games. These activities serve citizens from communities statewide who share the special needs of the mentally retarded.

Background information on the Special Olympic programs and FY 84 budget data are included in your file.

SPECIAL OLYMPICS
INFORMATION GUIDE FOR

Parents and Guardians

What is Special Olympics?

- The mission of Special Olympics is to provide year round sports training and athletic competition in a variety of well-coached Olympic-type sports for mentally retarded individuals by providing them with continuing opportunities to develop physical fitness, prepare for entry into school and community sports programs, express courage, experience joy and participate in the sharing of gifts, skills and friendship with their families, other Special Olympians and the community.
- Special Olympics offers sports training to mentally retarded people in the United States and 40 foreign countries.
- Special Olympics began in 1968 with a national meet of 1,000 athletes. Today nearly 1 million mentally retarded persons participate in some phase of Special Olympics sports training and competition.
- Special Olympics offers 16 official sports:

Winter Sports
- Alpine Skiing
- Cross Country Skiing
- Ice Skating

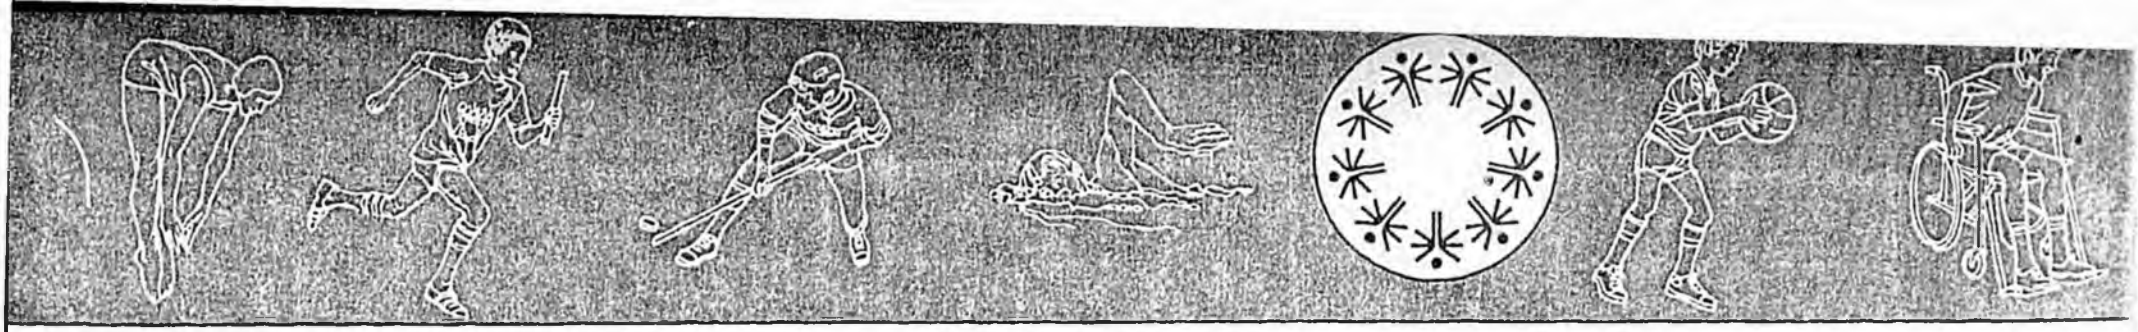
Summer Sports
- Basketball
- Bowling
- Diving
- Floor Hockey
- Frisbee Disc
- Gymnastics
- Poly Hockey
- Softball
- Soccer
- Swimming
- Track & Field
- Volleyball
- Wheelchair Events

Special Olympics provides a way for special people to:

- Participate in a year round sports training program
- Achieve and do the best they can
- Meet Challenges . . . try something new . . . do more than expected
- Demonstrate abilities and skills through competition
- Learn to work with people . . . be a part of a team
- Share winning and losing with friends . . . experience sportsmanship
- Develop with their family sports skills important now and later in life

Special Olympics, Inc.
Created and Sponsored by the
Joseph P. Kennedy, Jr. Foundation

"Let me win, but if I cannot win, Let me be brave in the attempt."



Who are Special Olympians?

They are people who:

- are 8 years of age or older
- have been assigned by school systems or human services agencies to programs to meet the needs of the mentally retarded
- live at home or in residential facilities
- attend public or private schools, activity centers, workshops, or are employed
- may or may not receive physical education services
- are presently not a member of any interscholastic or other team organized to participate in competitive sports

How to become a Special Olympian

If you are helping a prospective athlete, here is how you can enroll him/her in Special Olympics

- *complete an application to participate in Special Olympics*
- suggest the sport(s) in which the athlete would like to train
- record the athlete's address and phone number
- *Special Olympics requires a physical examination before an athlete is allowed to begin training.*
- be sure to take the physical/entry form to the doctor's appointment
- be sure the doctor, nurse, practitioner or paramedical person completes and signs the exam portion of the form after the examination
- be sure to return the completed application and medical form to the athlete's coach by date he/she has requested
- *join a Sports Training Program*
- training programs can take place at:
  - schools
  - recreation departments
  - workshops
  - residential facilities
  - home

Special Olympics sports training program

When Special Olympics athletes participate in a Sports Training Program they are expected to:

- follow instructions from their coach
- attend practices. SPECIAL OLYMPIANS MUST TAKE PART IN SPORTS TRAINING SESSIONS.
- practice at home with their parents, brothers, sisters or friends
- learn to cooperate with other team members
- take part in Special Olympics Games and competition

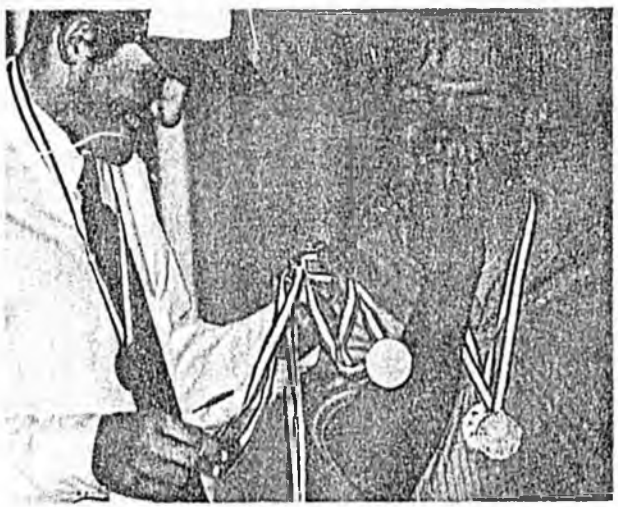
As Parents, Guardians or Friends you can:

- assist with training at home
- volunteer as a coach
- work on a Special Olympics Committee
- help raise funds
- come to the Games and cheer your Special Olympian on to victory

The Spirit of Special Olympics *For great world athletes, the contest may last only minutes—then it is over, and they have won or lost. But for Special Oly begins each day. What they win by their courageous efforts is far greater than any game. They are winning life itself, and in doing so they give to*

ALASKA SPECIAL OLYMPICS

"Let me win, but if I cannot win, let me be brave in the attempt"



SPONSOR AN ALASKA SPECIAL OLYMPIAN

In Alaska we have over 500 athletes involved in 15 areas of the State. Our State-wide program is conducted almost totally by volunteers and funded by contributions.

Your support is necessary to continue the Alaska Special Olympics program.

"Enos" came from Hazzard County to share a New Kind of Joy

Special thanks to Phototech for the printing of this brochure.

(Photo courtesy of Soho)

Special Olympics is an international program of physical fitness sports training and athletic competition for mentally retarded children and adults. Nearly one million athletes participate each year in all 50 states and 50 foreign countries.

Special Olympics contributes to the physical, social and psychological development of mentally and physically handicapped participants. Through successful experience in sports, they gain confidence and build a positive self-image associated with success rather than failure. Special Olympics offers fifteen official sports-track and field, swimming, diving, gymnastics, ice skating, skiing, basketball, volleyball, soccer, floor hockey, poly hockey, bowling, frisbee-disc and wheelchair events.

QUESTIONS AND ANSWERS

WHAT IS SPECIAL OLYMPICS?
It is the world's largest sports training and competition program for the mentally retarded.

DO SPORTS TRULY HELP THE RETARDED?
Yes, scientific research has proven that it improves both body and mind.

WHO RUNS SPECIAL OLYMPICS?
Volunteers! This means your sponsorship goes to benefit your athlete — not to pay excessive overhead expenses.

WILL I SEE MY ATHLETE COMPETE?
You will receive his/her name and when and where he/she will compete.

IS MY CONTRIBUTION TAX DEDUCTIBLE?
Yes! A receipt of your donation will be sent to you for your records.

MAY GROUPS OR ORGANIZATIONS SPONSOR ATHLETES?
Yes, they may want to sponsor more than one. Or, they may wish to sponsor an event at one of the games — such as the 50 meter dash or the 25 meter backstroke. If you know of an organization which is interested, please ask for more information.

Created by
Joseph P. Kennedy Jr. Foundation

HOW TO SPONSOR

PARTIAL SPONSORSHIP - $50.00
For each sponsorship you will receive the name, area, and age of *your* athlete, a certificate of appreciation and a picture of your athlete. In late June you will receive a follow-up letter stating the results of your athlete from the State Games.

FULL SPONSORSHIP - $250.00
For each sponsorship you will receive the name, area and age of *your* athlete and a photo plaque commemorating your generosity. In late June a follow-up letter will be sent stating your athletes results from State Games.

YES, I wish to sponsor an
Alaskan Special Olympian!

A Special Time

By Empire Staff

It was a special day for special people, as the Alaska Winter Olympics took to the slopes of the Eaglecrest Ski Area.

Proving that everyone can be a winner, 60 mentally retarded athletes from across the state and the Yukon Territory competed Saturday.

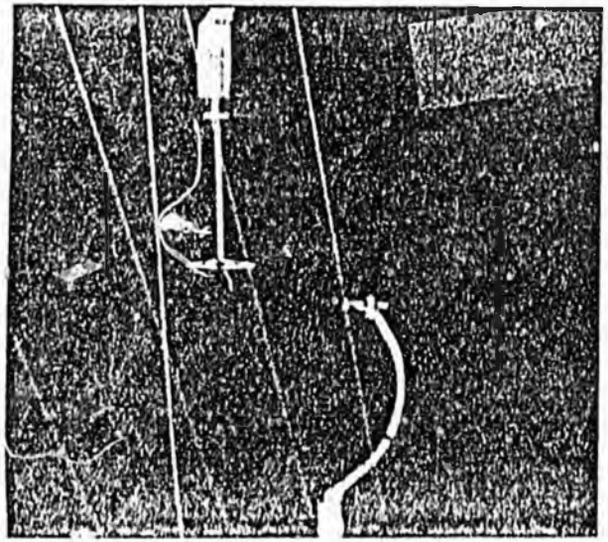
The full day of events provided plenty of smiles and tender moments for competitors, coaches, volunteers and parents. And it provided confidence for the athletes, in themselves and in their athletic prowess.

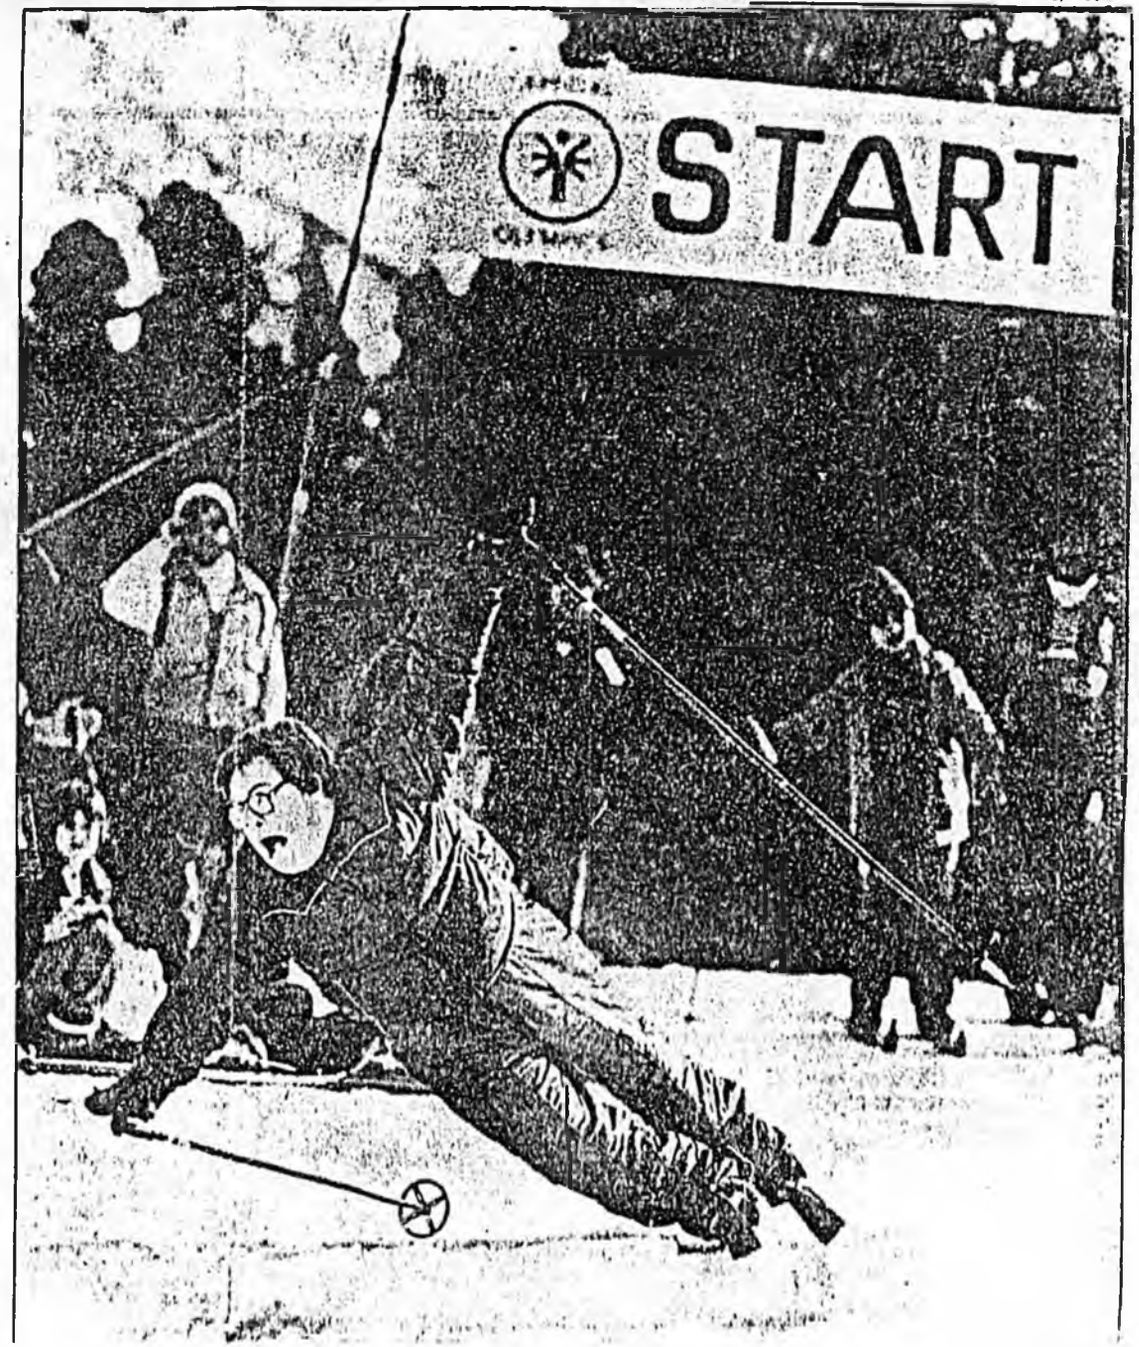
Champions all, the athletes made new friends, competed in a variety of cross-country and downhill ski events and had the opportunity to see Juneau, many for the first time.

The games were so successful that Special Olympics Executive Director Claudia Sayles said the games will probably be in Juneau again next year.

The games added meaning to the Special Olympic oath, which each athlete professed:

"Let me win, but if I don't, let me be brave and be a champ."





Priscilla Dodds rides the platter pull with contestant Joel Symons.

Tom Jacobson gets a flying start in the 100-meter cross-country ski race.

Photos by Ken's Avery

Heidi Borson coaches Fairbanks contestant Dede Horeaux on the cross-country track.

With hands raised in victory, Juneau's Jeff Larrabee crosses the finish line.

PROPOSAL FY'84
ALASKA SPECIAL OLYMPICS

Alaska Special Olympics is beginning its 11th year of service to our Mentally Retarded Citizens through year-round sports training, conditioning, and competition.

Currently we are training more than 400 athletes in 17 areas of our State by 200 volunteer coaches and coordinators. The entire program is achieved by volunteers. There is one paid Professional who acts as the Director for the State.

We are a community based program with all 17 areas actively campaigning for community funds. Our efforts are devoted but volunteer contributions are not keeping up with the increasing demands.

Of our enclosed FY'84 budget we are requesting from you; $45,000 funding for State Games Competition. Please refer to our enclosed Budget. The budget reflects the needs and efforts of the State Office. In addition to our State Office efforts, our 17 areas themselves raise in excess of $80,000 for area travel, equipment, and partial uniforms.

We want to raise community funds and keep community involvement. It is vital to the overall experience of our athletes.

Of the $132,000 needed by the State and the $80,000 needed by our local areas, our reque of $45,000 for Games is less than 25% needed to run our program.

Please feel free to contact me at 277-2242 anytime for further information.

Sincerely,

Claudia Sayles
Executive Director

POSITION PAPER

ALASKA SPECIAL OLYMPICS

In 1968, the Joseph P. Kennedy, Jr. Foundation created Special Olympics. Since then, it has become the largest program of sports training and athletic competition for mentally retarded children and adults in the world. For mentally retarded individuals, sports and physical activity are the quickest, surest road to health, growth and self-confidence. Mentally retarded individuals have always been told, "You can't do it." Special Olympics says: You can do it. All you need is a chance.

Creation, Purpose & Sponsors

The Alaska Chapter of Special Olympics was created eleven years ago under the guidance of Special Olympics, Inc. Created by The Joseph P. Kennedy Jr. Foundation. It was created to serve the mentally retarded citizens of our State through year-around sports training, conditioning and competition. The Alaska Chapter serves 17 areas within the state (see attached List) with over 400 athletes currently competing at State and local area games. This group is augmented by an equal number of voluntary coaches, trainers and coordinaters who plan, organize and implement the year-around training and the conduction of the State Games.

The Alaska Special Olympics is directed by a voluntary board of directors whose background includes business, medical and education. The Board provides direction and managemen.. of all the State and local programs as well as attendance of our athletes at the International Special Olympics. Each area is managed by an Area Coordinator who sees to the developement of the athletes and coaches, the conduct of all local games and the raising of funds for their local area.

Financial support for Alaska Special Olympics comes from the individual communities. Funds from the annual Special Olympics Mileage Event (S.O.M.E.) sponsored by the Alaska State Troopers, Sponsor an Athlete program and various community fund raising events provide the majority of the State and area monies. An additional amount is received from a direct appropriatior from the Governcr.

The involvement of the community in providing the bulk of Special Olympics funding is the underlying concept of the program. Community participation and funding makes the Special Olympics a community experience and is vital to the athletes development.

All funds collected by the areas are expended on behalf of the athletes in that area. Funds administered by the State Chapter are disbursed on behalf of all 17 areas athletes. The majority of the funds are used to provide transportation, food and lodging for athletes, coaches and coordinators at the Winter and Summer Games. Additionally, funds will be expended to send 36 athletes and 13 coaches to the International Games this July in New Orleans, Louisiana. The International Games occur once every four years and athletes are chosen based on their performance during the State Summer Games.

The State Chapter employee is a full time Executive Director to oversee all area coordination involvement and assist in the development and implementation of area and State Games. Remaining expenditures by the Alaska Chapter are for necessary administrative expenditures.

The requested funding from the Alaska Legislature would be used in direct association with the State Winter and Summer Games and the State Bowling Tourney. Funds would be used to provide transportation, food and lodging for area athletes who are selected to attend these games. The requested funds would only provide a portion of the funds necessary for these activities. The seventeen areas are responsible for providing the remaining funds.

By requesting only a small portion of Special Olympics funding from the Alaska Legislature. Community involvement will remain the conerstone of Alaska Chapter program.

ALASKA SPECIAL OLYMPICS
PROPOSAL TO THE
GOVERNORS OFFICE
AUGUST 1982

In 1975 the Governor's Office was most generous in assisting Alaska Special Olympics with a line item appropriation. This item of $27,000 was appropriated towards the travel of our 1975 delegation of Special Olympians to travel to Michigan for International competition. In addition, $5,000 was appropriated towards the operation of Alaska Special Olympics on a year round basis. Through the years, our operational appropriation has grown to $15,000 annual and in 1979, the next " International Year ", we were appropriated $25,000 for our delegations travel to New York.

Alaska Special Olympics exists solely on donations and public assistance. The appropriation from the Governors Office forms our solid base to insure the continuation of Special Olympics for our mentally retarded citizens. Our areas continue to gain community support and supplemental financial aid toward increased training opportunities for their athletes. In 1982, it took Alaska Special Olympics 100,000 dollars to operate a year round training and competitive sports program for 414 athletes in 17 areas of our State.

Since the inception of the Governors Line Item Appropriation, we have grown

- -from less than 100 athletes, to 414 current, with 100 new athletes expected to register
- -from 7 areas to 17 areas, with 3 more known to join this year
- -to add 7 new sports totaling 11 currently taught
- -to conduct the year-round program with 600 volunteers
- -to clinic 200 coaches
- -to form a State Board of Directors
- -to have a full time Executive Director, effective Feb. 15, 1982

The Executive Director;

-assists all 17 areas administratively
-acquires new areas, orients them, performs evaluations
-does all Fund Raising & Public Relations
-does all clerical work, writes grants
-trains/clinics the coaches
-researches new sports, techniques, theories
-acts as liason with the parent organization & our State areas
-and whatever else it takes to make the program run, with quality & professionalism

Our competitions include an annual Local Meet in every area and all are eligible to go on to a State Games meet. In March of 1982, we held our 1st Winter State Games so now we offer both Summer & Winter Sports Annual State Competitions. Every 4 years, there is International Summer competition and every 2 years after the Summer International competition there is Winter International competition. Now that we are actively training in Winter Sports, we will be eligible to go to International Winter Games in 1985.

July 1983, will be the Summer International Games in Baton Rouge, Louisiana. There will be all 50 States represented and 50 foreign countries. Alaska will take a delegation of 49. We plan to use a theme of " 49 from the 49th ". Research from the airlines concludes that travel will cost $1,000 per person.

We respectfully request:

$ 49,000 for International Games travel — For FY'84

$ 25,000 for our operational program — for Governors Sp. approp.

Included is our Proposed Budget for FY '83.

The State support money from the Governors Office would continue to be a real foundation for the success of Alaska Special Olympics. Many, many States are partially , if not fully, funded by their State Government and we appreciate our State Governments interest in us.

Monthly, our office receives calls from outlaying areas of our State requesting information on Special Olympics, criteria, eligibility etc. Financially, we are only able to accomodate a few areas. It takes a full week in each new community to establish Special Olympics in the community and to insure it has

had the proper orientation to conduct a quality program.

Your continued operational support would allow us to reach more communities, better provide public education, reach more athletes, train more coaches.

Thank you for considering our fast growing program for the Mentally Retarded. The latest DVR report indicates that we still have approximately 800-1200 eligible athletes to reach. It just takes money, time and people. Your support will help us reach farther each year.

I would be happy to answer any questions at any time. Thank you again. We look forward to your response.

Claudia Sayles
Executive Director

Alpine Alternatives: New heights for the handicapped

Photo by Doug O'Harra

Adam Long heads downhill, with instructor Janie Evanson-Decker close behind.

By C.L. GILBERT
and DOUG O'HARRA
Special to the Daily News

Encephalitis struck Kim McConkey when she was 10 months old, depriving her of her hearing, speech and the full use of her right hand.

She grew up in a silent world, where the simplest conversation became a frustrating task.

Nurtured by her family, she attended public school and learned to communicate. She took ice skating lessons. She participated as well as she could in family activities. But always, the weight of her disabilities bore down, keeping her dependent and awkward.

This winter her parents sent Kim, now 7, to Alpine Alternatives, a local organization that teaches outdoor sports to handicapped and disabled people.

"In just three lessons, they've taught her to ski," says Kim's father, William McConkey. "And I mean to ski better than I can... You just can't believe what they've done for her."

Kim's mother, Sandy McConkey agrees that Kim's entire life has undergone an abrupt change since she learned to ski. She's become confident, even bold. Her teachers report a more positive attitude at school.

"She's never had anything that she could do, that she could get any kind of positive feedback from," explains Kim's father. "And now, thanks to Alpine Alternatives, she's found something she can do well."

The program, now in its third year in Anchorage, offers up to 175 children and adults weekly lessons in skiing and ice skating. During the summer participants switch to canoeing, sailing, horseback riding, hiking and orienteering.

In both seasons, the program puts people with physical or mental handicaps face-to-face with the outdoors — and with their problems.

"We take them out of their regular environment and put them in an alternative environment and try to teach them something about themselves," says Jack Bellorado, an instructor with Alpine Alternatives.

Marty Decker, coordinator of the program and director of the ski school at Arctic Valley, says "kids need to have that experience of falling down and crashing and getting nicks and scrapes."

Getting that experience has given Kim a whole new sense of confidence and accomplishment," says her mother. "The first time she went up the rope tow and came down by herself, that child was just elated. And I stood there and just cried. Alpine Alternatives has been a godsend for us and for Kim," she adds.

Other parents echo the McKonkeys' feelings. Deanna Essert says her 10-year-old autistic son, Ben, began sledding by himself on a hill near their home — something he had never done before — after participating in the program. He even began smiling more.

Debra Long, mother of seven-year-old Adam Long, says that until Adam started skiing in Alpine Alternatives there was no physical activity he wanted to try. "He doesn't enjoy walking," she says. "It's work to him." Afflicted with cerebral palsy, Adam needs crutches to walk. Skiing, says his mother, has lifted his morale and boosted his self-esteem. "He hates to miss it."

The program has changed

Outdoor recreation program offers new hope to handicapped persons

Continued from Page F-1

many lives. Families have been brought together. Confidence and self-esteem have been increased. Motor skills lost through disease or disability have returned.

The program gave skiing back to Anne Morsell, who was diagnosed as having multiple sclerosis in 1974.

"I'd been skiing since I was 13 and had to give it up," says the 38-year-old Morsell. "I never thought I'd be back on skis."

But, after working with instructor Janie Evanson-Decker for a winter, she relearned.

"I can't ski at the same level as before, but that really doesn't matter to me," she says. "The fact that I really could ski was monumental to me... it was wonderful for my morale.

Each week, nine instructors work with about 20 classes of students from Anchorage and Matanuska Valley schools and give private lessons at city parks and at Arctic Valley. Ice skating lessons are given at Ben Boeke Arena.

A chart of each student's progress is filled out by the instructors after each lesson. The charts state the skill and behavorial objectives for the day and the progress made in each area.

Skill objectives might be to control speed or to ride the rope tow. Behavioral objectives might be to cooperate or to pay attention.

When the children are hearing impaired or deaf, the voiced instructions of the instructors are replaced by pantomimes and what the instructors call "pidgin sign language." Those children who learn to sign "Exact English" at Russian Jack School are among the swiftest learners according to instructors.

"This is a hot group," says 26-year-old instructor Alan Colter. "They take jumps at the bottom of the hill. They're running gates. We're the handicapped ones when we're with them because we don't know sign language."

Although some instructors have taken signing classes, others have only rudimentary signing skills. Working with those instructors gives the students valuable experience in communicating with the general public.

"That's the real world," says teacher Barbara Kovarik. "That's what they're going to be up against; they have to learn other modes of communication."

But for children — and adults — with other forms of orthopedic or neurological handicaps, the problems go far beyond mere communication. Sometimes, especially with orthopedic handicaps, the instructors must use specially designed equipment to compensate for the handicap.

For example, if a student cannot walk or ski without crutches, the staff will provide "outriggers" — crutches with skis mounted on the bottom. Others simply need wedges in their boots or under their bindings.

For those with little or no use of their arms or legs, the staff supplies a "sitski," which is simply a fiberglass sled with two edges built into the bottom. Once in the sitski the students are given two very short ski poles. They steer the sitski by leaning and dragging the poles in the snow.

For 15-year-old Joji Flagan, the sitski is the "only real source of activity," according to his father. Joji does not have the use of his arms or legs because of cerebral palsy, and skiing in the program has become the high point of his life.

The "level of professionalism" among the staff has impressed Marilyn Ballagh, a teacher at Susitna School. "Theyre not just skiers," she says. "They really know how to work with kids."

"As an instructor," says Bellorado, "I have to act like this is the first time I've done this to keep it exciting. I have to keep myself open and aware enough to witness when (a student) has a gain. If I'm bored, that won't happen."

Several of the instructors are working on a better design for the sitski. While the one they use now is "state of the art," Decker says Alpine Alternatives is working on a ski that will turn more readily — more like a regular ski. They hope to market their design and become more independent financially so they don't have to spend so much of their time fund-raising.

Begun in 1980 with five volunteers and about $10,000 in donations, the program now has so many students that it would cost about $130,000 to run it all year. But this year, even with a $58,000 municipal grant and donations of services and money from such groups as Sohio, Alascom and the Lion's Club, the program has only about half of what it needs, according to Decker. Unless other funds are found, he says, there will be no summer program this year.

Many of the instructors, who are paid between $600 and $1,500 a month, began as volunteers in the early days of the program and have worked for no pay when funds ran low in the past.

"It's fun and it's really good for the kids," says Evanson-Decker. "And the sense of accomplishment from teaching people just to buckle their boots can be elating."

Juneau, Alaska 9811

Dear Representative Lacher:

For your information the attached information concerning Alpine Alternatives, Matanuska-Susitna Handicapped Winter Sports Program is being forwarded to you for your review.

As you can see by the copy of the letter which was sent to Edna Armstrong, Borough Mayor, a request has been made to the Borough for funding of this project.

If, after review, you feel Alpine Alternatives is a worthy program, consideration might be given for at least partial funding by State funds.

Your assistance is greatly appreciated.

Sincerely,

Karen Siry

ITEM FOR BOARD INFORMATION

BOARD MEETING DATE: March 28, 1983

MEMORANDUM NUMBER: 82-142

SUBJECT: Alpine Alternatives

FROM: Jean Goodwin, Director of Elementary Education

EXPLANATION:

Attached is information which was requested concerning the Matanuska-Susitna Handicapped Winter Sports Program which has been carried out with the assistance of Alpine Alternatives, an Anchorage-based organization. The bulk of the effort and hours of hard work to carry out this program has been borne by Lucy Hope and Jim Davis, special education teachers at Iditarod, with assistance from Mary Pomeroy, physical therapist.

The attached information is a proposal which outlines the cost of continuing the program with and without the help of Alpine Alternatives. At this point in time the staff of Alpine Alternatives are optimistic about funding for next year but there is no guarantee. It should be emphasized that the equipment included in the proposal would be used to add downhill ski training to the cross-country component already in place as a result of intensive fundraising activities and volunteer work. As the program expands, Lucy and Jim do not feel that they will be able to continue this work. The part-time coordinator would assume this responsibility.

Since no funds are budgeted, there is a need to request funding from the Borough, or perhaps from the Legislature, if the program is to continue. The amount of money needed is contingent or continued funding for Alpine Alternatives. It is at this time the only sports program in which these students participate, and at the same time it provides them with a life-long leisure activity. While other activities are open to them, in reality their participation is extremely limited.

lr

MAT-SU HANDICAPPED WINTER SPORTS
PROGRAM

For the past two years, students from the Mat-Su School District have been participating in a sports instructional program offered by Alpine Alternatives. Alpine Alternatives is a non-profit organization formed in 1980, to offer downhill ski instruction to moderately and severely handicapped individuals. They since have expanded to include cross-country skiing, ice skating, and several outdoor summer sports such as hiking and canoeing. The director of Alpine Alternatives, Marty Decker, approached self-contained teachers and physical therapist in fall of 1981 to offer their winter sports instruction to our students, and we have been participating in the program for the past two years, at no cost to ourselves, the students, or the school district.

At this time, we see great value in the winter sports program and would like to see it continued and expanded for next year. Since Alpine Alternatives is partially funded by the Municipality of Anchorage, we would like to ask that the Mat-Su Borough appropriate some funds to support our athletes' continued participation in this program. We have projected 50 moderately and severely handicapped students to be involved in a Handicapped Winter Sports program for 1983-84 school year. Therefore, we have included 2 budgets, one if we would continue to work with Alpine Alternatives, and one if we were to run the program without Alpine Alternatives.

In looking at the cost for this program, it is important to realize that these students will never be involved in organized extra-curricular or school sponsored sports, due to the nature of their handicapping conditions. This winter sports program is their only opportunity for sports training.

Thank you for your time and consideration.

Lucy Hope
Jim Davis
Mary Pomeroy

Transportation		
Trips to Anchorage to include: 2 hrs travel, 2 hrs ski instr. 5 trips per week, 12 weeks	9600	9600
Trips to Hatcher Pass can be substituted for trips to Anchorage; cost would be same		
*Transportation so far has been provided by existing activity busses; when available. This has worked out well for the limited program we have been running. Hopefully it will contine to work out.		
Rental and Facilities Use		
Downhill Skiing- $5.00/ lift ticket 50 students for 12 weeks	3000	no cost
Cross Country Skiing- use of school fields and Hatcher Pass Touring Center	no cost	no cost
Ice Skating- Ben Boeke Rink $90.00/hr 1 hour/wk for 12 weeks	1080	no cost
School Rinks when available	no cost	no cost
TOTAL	$38,797.00	$22,856.00

IN LIGHT OF THE COST DIFFERENCE, QUALITY INSTRUCTION, AND EXCELLENT SERVICES WE HAVE RECEIVED IN THE PAST TWO YEARS WITH ALPINE ALTERNATIVES, WE RECOMMEND THAT WE CONTINUE TO WORK WITH THIS ORGANIZATION IN THE FUTURE. HOWEVER, WE FEEL THAT WE SHOULD HELP TO REIMBURSE ALPINE ALTERNATIVES FOR THE COST OF THEIR SERVICES. WE ALSO RECOMMEND HIRING A COORDINATOR AS STATED IN THE FIRST BUDGET ITEM. AS MORE AND MORE STUDENTS MOVE TO THIS AREA, AND PROGRAMS ARE SPREAD THROUGHOUT THE DISTRICT, IT IS INCREASINGLY DIFFICULT FOR TEACHERS TO COORDINATE AND ORGANIZE WINTER SPORTS INSTRUCTION EFFECTIVELY.

MAT-SU PARTICIPANTS IN ALPINE ALTERNATIVES SPORTS INSTRUCTIONAL PROGRAM

1981-82

Self-contained classes at Iditarod Elementary.....14
Included mentally retarded, severely learning disabled, emotionally disturbed students

Self-contained class at Wasilla High..... 9
Severely learning disabled students

Orthopedically Handicapped students from Sherrod, Swanson, Iditarod, WJH, Butte.....10

33

1982-83

Self-contained classes at Iditarod Elementary.....18
Included mentally retarded, emotionally disturbed, autistic, severely learning disabled, multiply handicapped, neurologically impaired students

Orthopedically handicapped students from Butte, Swanson, WJH, WHS, Iditarod.....12

30

Next year, we hope to include students in self-contained classrooms at Butte, WHS, and WJH. Any other students in the district with moderate and severe handicapping conditions would have this opportunity also.

RE: HB 339

SPONSOR: Representative Lacher

Program Effects of the Bill

This bill appropriates $45,000 through the Department of Community and Regional Affairs to the Joseph P. Kennedy Foundation for the 1984 Special Olympics.

Comments

The Department feels that the Special Olympics is a worthwhile program and can administer the appropriation without additional administrative costs.

RE: House Bill 366 - Senior Citizen Housing.

The Senior Housing Needs Assessment surveyed the Matanuska-Susitna Borough and identified the need for 32 units of senior housing located in Wasilla. Unfortunately, during FY'82-'83 only 18 of the 32 units were funded for planning and construction. Section 1 of HB 366 grants 1.4 million to the City of Wasilla for the construction of 14 units that experienced shortfall last fiscal year.

Section 2 of HB 366 appropriates $100,000 as a grant to the City of Palmer for site preparation and design for senior citizen housing. The housing will be located in close proximity to the existing Palmer Senior Center in order to share infrastructures such as medical, recreational, and nutritional services. This concept of sharing services will bring a great savings to the state as well as to the Mat-Su Borough.

The teleconference is scheduled today in order to address state-wide senior citizen housing needs, in addition to the shortfalls experienced in the Mat-Su area.

Dear Representative Lacher:

RE SENIOR CITIZEN HOUSING DEVELOPMENT FUND

In response to a telephone request by Eve Fox of your staff to Dick Pryor of my staff, the attached data on the Senior Citizen Housing Development Fund is provided.

The Palmer and Wasilla Phase II projects are not included in these figures because we have not at this time received a grant application. When the initial grant application materials are received we will include the projects in our future funding projections.

I hope this information is adequate for your needs. If we can be of further assistance, please call us.

Sincerely,

Mark Lewis
Commissioner

1-P5LH

SENIOR CITIZENS HOUSING DEVELOPMENT FUND

FUND STATUS

FY'82-83 APPROPRIATIONS	$26,000,000
COMMITTED TO PROJECTS	$22,696,676
AVAILABLE TO COMMIT	$ 3,303,324

The $22,696,676 is committed to the following projects:

ANCHORAGE	$ 7,836,000
ANGOON	$ 30,000
CHUGIAK/EAGLE RIVER	$ 2,500,000
FAIRBANKS	$ 4,052,176
HOMER	$ 2,400,000
KENAI	$ 1,066,000
KLAWOCK	$ 30,000
KODIAK	$ 52,500
NINILCHIK	$ 500,000
PETERSBURG	$ 50,000
SITKA	$ 50,000
ST. PAUL	$ 30,000
VALDEZ	$ 1,500,000
WASILLA	$ 1,600,000
WRANGELL	$ 1,000,000
TOTAL	$22,696,676

Projects in the planning and grant application process:

ANGOON	$1,200,000
BARROW	$1,600,000
DILLINGHAM	$ 30,000
KLAWOCK	$1,000,000
METLAKATLA	$1,500,000
SITKA	$1,800,000
ST. PAUL	$1,400,000
ST. MARYS	$ 800,000
TOTAL	$9,330,000

If all these projects currently in the grant application process successfully complete their grant applications and require the full $100,000/unit funding we will have a $6,026,676 fund shortfall:

GRANT APPLICATIONS PENDING	$9,330,000
FUNDS AVAILABLE	$3,303,324
FUNDS SHORTFALL	$6,026,676

If we receive the 2.5 million dollars requested in the FY'84 budget we could still have a $3,526,676 shortfall.

CURRENT SHORTFALL	$6,026,676
FY84 BUDGET REQUEST	-$2,500,000
POSSIBLE SHORTFALL	$3,526,676

We anticipate that all of the projects being planned may not successfully complete the grant application process and some may receive HUD funding thereby reducing the amount of state funding required. We therefore expect to have adequate funding to meet the needs of these projects.

RESOLUTION NO. W83-F-1

A RESOLUTION OF THE CITY COUNCIL OF WASILLA, ALASKA, REQUESTING FUNDING FOR FOURTEEN (14) ADDITIONAL SENIOR HOUSING UNITS.

WHEREAS, the Senior Housing Needs Assessment surveyed the Matanuska-Susitna Borough and identified the need for thirty-two (32) units of senior housing to be located in Wasilla; and

WHEREAS, sufficient land has been acquired and a plan developed to accomodate thirty-two (32) units of housing, eighteen (18) to be built during 1983; and

WHEREAS, the additional fourteen (14) units could be built more economically if built at the same time if funding is available;

NOW, THEREFORE, BE IT RESOLVED, that the City of Wasilla requests additional funding to complete the entire thirty-two (32) units during the 1983 construction season.

I certify that a resolution in substantially the above form was passed by a majority of those voting at a duly called and conducted meeting of the governing body of the City of Wasilla, this 28th day of March, 1983.

Re: Your letter of 3/14/83

Dear Barber Lacher;

Upon receiving and reading your letter of March 14th, I felt compelled to reply to some of your statements.

I feel that it is only natural for many of the newly elected officials to want to change some of the existing laws on the books. (Not that some of them are in need of a change.) However since the future status of the Permanent Fund Dividend Program will , in some way affect each and every resident of the state, as you stated, I feel that each and every one of us should have a say as to what changes should or should not be made.

Your Bill (HB164) causes me to think that you have formed your own opinion of this matter as you did in the recent matter in a local issue re: trapping and the setting of such traps in certain areas.

As an elected official, one needs to govern by the wishes of the people and not of ones own wishes.

You mention in your letter of the declining oil revenue. This alone should cause you to think of using any of this fund for Capital Projects even in what you call our local area. "The Projects are built","The Oil Revenue is down","Where,Just where is the money coming from to maintain these projects" THINK THINK THINK.

An example of this can be seen in my own home town,($700,000.00) to build a new community center (Free Grant Money) Free my Butt. Taxpayers,one way or the other. Maintaining and upkeep ???? For the once a year Willow Winter Carnavel.

No, Iam sorry Barber, open your ears in Mat Sue Area and let the people Vote on this most important issue. Then and maybe then, you will have my vote of a differant view.

I live here in the area and there is no way that the local government could have devided this money in a better way that so many of us could have benifited as we did this year. I say leave "Hands Off" of a good thing.

Thank you for your time;

Sincerely Yours ;

James Herzog

DEPARTMENT OF ADMINISTRATION

MAR 16 1983

March 14, 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: SENIOR CITIZEN HOUSING IN PALMER

Sarah asked us to give you a detailed account of possible financing for senior citizen housing in Palmer.

The attached letter to David Soulak describes a possible senior citizen housing project in Palmer.

In the past several days I have discussed a trade of land with persons at an intermediate administrative level within the University of Alaska, have discussed senior citizen financing with the U. S. Farmers Home Administration and have discussed with David Soulak, Palmer City Manager the idea of the City of Palmer acting as owner or sponsor of a senior citizen housing project.

From discussions with the foregoing persons, I believe that we have good reason to assume that:

1. The University of Alaska would be interested in a trade, particularly if the project were staged so that only the western 2.5 acres--the area next door to the Palmer Senior Center--were developed at the beginning so that the eastern 2.5 acres could continue to be used for plant experimentation with perennials already in the ground for a while longer.

2. The U. S. Farmers Home Administration has monies which can be made available for the project, but any application would probably have to be received by FmHA within the next 30 to 60 days before all available monies are committed to other projects.

3. The City of Palmer would probably be willing to be owner of congregate housing units. We will know this after the City Planning Commission looks at a rezoning of the parcel from R-1 to multi-family and after the City Council has reviewed David Soulak's proposal that the City act as sponsor and owner.

4. If there is a problem in obtaining funding for congregate type of facilities (such as a dining hall and recreation area) using just U. S. Farmers Home Administration monies, and if there are no state monies that can be obtained for this purpose from the State Senior Citizen Housing Program, the Palmer Senior Citizens Center, which is adjacent to the site, could probably satisfy many of the functions of a congregate housing facility. Specifically, the Palmer Senior Citizens facility could serve meals and could meet some of the recreational requirements of occupants of the units. The Palmer Senior Citizens, Inc. has plans for building an elevator that will provide easy access from the south to both floors of the building.

If U.S. Farmers Home Administration monies can be obtained for the project, an adequately funded State Senior Citizens Housing Program would still be important. Among other things, there may be a fairly tight limit on the amount FmHA will loan per unit, probably about $60,000 per unit, which means that there may not be enough money in the project for congregate facilities for dining and recreation. To the extent that the U. S. FmHA monies are insufficient for congregate facilities, we would want to seek that money from the State. I do not think that we would have to wait for State monies before proceeding with the project, because we could probably make do with Palmer Senior Citizen facilities for an interim period of time.

The tenants would move into a U. S. Farmers Home Administration funded project on a somewhat different basis than they would move into the Pioneer's Home or, probably, other senior congregate housing in other parts of the State. The rules probably would be the same as housing being built by the City of Wrangell for Wrangell senior citizens, which is being funded by the U. S. Farmers Home Administration.

These are the rules:

1. If the cost of the housing is distributed equally among each of the tenants, then each tenant would have to pay, as a maximum, a little more than one-half of the rent for their unit as they would have to pay if the unit were a new unit just being put on the market for rental. The reason that the monthly payment would be so much lower than market rent is because the monthly mortgage payment is so very low, being based upon a 50 year term with 1% interest. This would result in much lower monthly payments than a 20 or 30 year mortgage with 12 or 13% interest.

2. There would be a second ceiling on how much each tenant would have to pay and that ceiling would be 25% of the tenant's gross annual income. In many cases the tenants' gross annual income would be the combined payments the husband and wife receive from social security so the maximum rent that they would have to pay would be 25% of what they are receiving each month as social security payments. The U. S. Farmers Home Administration

would make a rent subsidy payment to the City of Palmer to make up the difference between the rents that the tenant should be paying with the heavily subsidized mortgage and the rent that the tenant is actually paying based upon the 25% limitation on tenants' liability for rent payments. So, the City would come out whole even though some of the tenants may be paying very little each month for rent.

The combination of very low monthly mortgage payments and the ceiling on the monthly rent that each tenant must pay means that the units would be within the means of most older people on limited incomes.

A U. S. FmHA financed project owned by the City of Palmer should not be a burden on the City, because the project, if properly administered, would not result in the City having to contribute any monies. The U. S. Farmers Homes Administration allows the owner to incur certain management costs, usually somewhere between 5 to 7% of the gross rental revenues, plus certain other accounting and administrative costs as part of the rent for which the owner receives rent subsidies. So, the City should be able to hire such managerial, accounting and bookkeeping assistance it needs to make the project work and to make sure that the City does not have to incur any liability with respect to the project.

So, to summarize, the State Senior Citizen Housing Program is a worthwhile program which should be of value to the Valley if funded, even though we may seek FmHA financing. In fact, the City of Palmer would probably submit two applications for (1) senior housing and (2) congregate facilities--one to FmHA for mortgage financing and rent subsidies and the other to the State for senior citizen housing. That way there would be a fall back position if one financing approach fell through.

Sincerely,

Gary Thurlow

Commissioner Mark Lewis
Department of Community & Regional Affairs
Pouch B
Juneau, Alaska 99811

Dear Commissioner Lewis:

On February 17, 1983, I received a copy of the letter sent by you to Mr. John Curtis of the Alaska State Housing Authority stating that $1.6 million had been reserved from the Senior Citizen Housing Development Fund for the development of 18 units of housing for the senior citizens of Wasilla. I was very pleased to be notified of this development.

There are an additional 14 units that have been identified in the Wasilla area, at a cost of $1.4 million. In addition, other housing needs are being identified throughout the state that will have to be addressed by both the legislature and the Department. To this end, legislation is being drafted to assist in supplying funding for senior housing needs not only in the Mat-Su area, but throughout the state.

I am hopeful that you will be able to provide the same quality assistance for this new legislation as you, and your department, have provided regarding the Wasilla Senior Housing.

Sincerely,

Barbara Lacher
Representative
District 16

cc: Mr. John Curtis
Alaska State Housing Authority
Rep. Herrmann

MEMORANDUM

TO: Representative Adelheid Herrmann

FROM: Beth Robinson

DATE: February 23, 1983

SUBJECT: Senior Citizens Housing Development Fund

I spoke with Dick Pryor, Division of Housing Assistance, 272-4585, who told me about the FY84 budget for Senior Citizens Housing Development.

The division originally requested $10 million which was reduced by the Sheffield Administration to $2.5 million. There is $3.659 million left over from their FY83 money, which, added to the $2.5 million, gives them a total of $6.159 available for housing construction. APIA's request will probably be for $1.5 million (they are still in the planning stages and haven't submitted a grant proposal, yet). So far, the division has five applications pending, including APIA's. Added up, they total $7.8 million, leaving a shortfall of $1.64 million.

It's hard to predict how much money the program will need. Dillingham, Anchorage, or other communities may submit requests, putting further demands on the division's FY 84 budget. Or it could be that applicants will withdraw their proposals because of HUD Sec. 8 budget cuts. HUD rental subsidy money is needed in order for some projects to be feasible. Although the state builds the housing units, the operations and maintenance costs must be paid by the renters. Many, of course, can't afford it unless they receive federal rental subsidy.

I think it's fair to say there will probably be more demand than money available. Mr. Pryor said a tight budget makes planning difficult. People are hesitant to go through all the work of putting a project together if there's no money for construction.

In the case of Dillingham, the director of the Senior Center has requested information on the program. Mr. Pryor said if a proposal for Dillingham were to be submitted, it's his understanding that the proposal would come through the city.

Matanuska-Susitna Borough
BOX B, PALMER, ALASKA 99645 • PHONE 745-4801
DEPARTMENT OF ADMINISTRATION

March 10, 1983

David Soulak, City Manager
City of Palmer
P. O. Box 1368
Palmer, Alaska 99645

Dear Dave:

Re: Senior Citizen Housing in Palmer, Alaska

In late January, 1983, the Assembly, acting upon a request of the Borough Senior Citizens Advisory Board, endorsed congregate senior housing for the Palmer area near the Pioneer Home. I know that the City of Palmer has taken an interest in senior citizen housing also.

Even though the State of Alaska Senior Citizen Housing Program has limited monies for senior housing for the FY 82-83 fiscal year, we might better our chances of getting funding for congregate senior housing within the City of Palmer if we went ahead and filed a formal application using the State forms. I have reviewed the forms and I believe that they would be fairly easy to fill out.

In the past we have talked primarily about site acquisition and planning for senior congregate housing in Palmer.

I believe that the process can be substantially accelerated, if we are able to arrange for a trade of the parcel on Chugach Street between the Pioneers Home and University of Alaska grounds immediately south of the Palmer Senior Citizens Center.

This 4.8 acre parcel is owned by the University of Alaska and portions of it have been devoted to the raising of perennial trees and shrubs for experimentation purposes. East Fern Avenue and East Geranium Avenue, although they are platted streets, have never been built and the land area within those two streets could presumably be added on to the 4.8 acres.

I think that it is probable that the University of Alaska would be interested in a trade for a portion or all of the 4.8 acres, if the Borough could find land of equal value to them for plant experimentation purposes or other University purposes. It might be possible to acquire rights to just the westerly half of the property for a stage one effort on senior citizen housing with an option to acquire the eastern half at some later date for

senior citizen housing. There are a number of perennials along Chugach Street and it should be possible to save many of the trees and shrubs along the street.

I have a strong impression that an exchange of Borough land for University land at this location would not materially affect the University's mission with respect to plant experimentation and that, if the University could acquire greater acreage for the same purpose at another location, their mission would be furthered.

Accordingly, I would propose that the City of Palmer and the Matanuska-Susitna Borough approach the University of Alaska with respect to this acreage and, if it appears that it is available, that we proceed with the filing of an application for senior citizen housing monies to the State of Alaska Department of Community and Regional Affairs for a congregate senior citizen housing project on this acreage. Any effort of this kind would, of course, require review and approval by the Assembly of the Matanuska-Susitna Borough and the City Council of the City of Palmer.

We have discussed site criteria for senior citizen housing in the Palmer area before. The Borough Senior Citizen Advisory Board has also discussed site criteria. In my opinion, the 4.8 acres described above would probably come closest to meeting agreed upon site criteria than any other parcel. There may be other publically and privately owned lands close to the Pioneers Home that would also be suitable for senior citizen housing, but regardless of whether there is such acreage or not, a siting of senior citizen housing on the 4.8 acres should meet all site criteria for at least a stage one effort for senior citizen housing.

I would like to list some probable features of senior citizen housing at this location and site criteria as follows:

1. Number of units. At 14units per acre, there would be room for about 70 units on the five acre parcel. U. S. Housing and Urban Affairs Department minimum property standards would suggest that density be limited to about 14 units to an acre. If each unit physically occupies five hundred square feet, this would mean that about one-sixth of the area would be in housing, with about five-sixths being left for side yards, patios, setbacks, separation between buildings, clearances and parking. The development would probably consist of various groups of one story townhouses. There should be some open space saved where existing perennials could be retained.

If the project were staged into two halves, then the first half could include as many as 35 units upon 2½ acres with stage two being accomplished at some later date if the need justified additional units. I believe that for planning purposes it is possible to make some gross estimates as to number of units

per acre it being understood that the actual density and siting of buildings would await schematics prepared by an architect.

2. Type of housing. The housing would be single story housing all on one grade to avoid any problems of foot access or access by handicapped persons. The size of the units would probably be somewhat smaller than the units in Wasilla, because the amount of housekeeping activities occuring within the unit would be less. The units would be designed for indepenent living, but they would also be designed for greater access to other senior citizen facilities than is the case with Wasilla senior housing. Congregate housing, which would be built at this location, provides more ready physical access to an area where meals can be taken and where adult day care and medical services can be readily obtained.

This particular location is about as close to the Pioneers Home as you can get. It is only three blocks away from the Valley Hospital. This site would rank very high within the City of Palmer, within the Matanuska-Susitna Borough and in the State at-large, with respect to closeness of facilities needed for congregate housing.

Among other things, the site provides closeness to:

a. Pioneers Home with its clustering of facilities, including facilities for social events.

b. Palmer senior citizen facility which serves lunches, is a center for social activities and is also an origination point for transportation.

c. Closeness to Valley Hospital and medical care.

d. A location two blocks from stores, restaurants and shops, all of which are within easy walking distance of the site.

e. A site that is one and one-half blocks from a museum, ballfields, proposed Palmer Library and landscaped areas.

f. A site that is close to the regular meeting places of The Pioneers of Alaska, the Grange, Lions, Kiwanis, Historic Preservation Committees etc.

g. A site on a paved street without excessive traffic, with sewer, water and electricity.

h. An especially friendly environment to older persons whether they use the automobile or depend on walking.

i. A handsome setting.

j. Good climate.

We should be able to work from information previously compiled for the Wasilla senior citizen housing. Our Planning Department can immediately undertake a needs assessment. There is a 90 person waiting list for the Pioneers Home, which is some indication of the need for congregate housing in the Palmer area.

As I understand it, the State of Alaska Department of Community and Regional Affairs makes its decision to allocate senior citizen housing according to objective criteria such as demand for units, convenience of units with respect to facilities that senior citizens desire or need, level of community support etc.

I would think that if there is competition for a limited amount of senior citizen housing, the City of Palmer, working with the Matanuska-Susitna Borough, could present a case to the Department of Community and Regional Affairs that would result in a very high priority being assigned to additional senior citizen housing units in this part of Alaska.

Sincerely,

Gary Thurlow

Gary Thurlow

Matanuska-Susitna Borough

assembly memorandum

245-4801

no. AM 83-27

from: Gary Thurlow, Borough Manager date: 1/25/83

subject: SENIOR HOUSING IN THE MATANUSKA-SUSITNA BOROUGH

The Borough Senior Citizens Advisory Board has studied proposals now under consideration by the State Office of Management and Budget that 1.8 million dollars additional money be allocated to senior citizen housing in Wasilla and Palmer.

The Matanuska-Susitna Borough Senior Citizens Advisory Board thought that good planning would call for constructing fourteen additional units in Wasilla at this time for a total of 32 units--18 units already funded plus 14 additional units from the 1.8 million and that the balance of approximately $400,000 ought to be allocated for planning and site acquisition for congregate housing in Palmer.

The board considers that the status of planning for the Wasilla project is such that the new units could be constructed and occupied at an early date and that planning for the Palmer area has not yet reached a point where early construction could be anticipated.

In planning for senior housing in the Matanuska-Susitna Borough, the board concluded that there is a need for a balance of two different types of senior housing:

Clustered independent housing of the type already planned for Wasilla.

Congregate housing, which is primarily independent housing, but which provides more ready physical access to an area where meals can be taken and where adult day care and medical services can be readily obtained. Palmer is the best location for this type of housing because the Pioneer Home and the Valley Hospital are located there.

In the judgment of the advisory board, recent needs assessment information shows that there is a sufficient demand for the additional housing in Wasilla. Although the board believes that there is sufficient demand for congregate housing in Palmer, there being a 90 person waiting list for the Pioneer Home, a full needs assessment has not been carried out for congregate housing. Additional time for senior housing in Palmer

Appv 1-26-83 E T

would make it possible to compile more reliable assessment needs information for congregate housing in Palmer.

Congregate housing should be located so that there would be ready access to certain facilities in the Pioneers Home, which means that closeness to the Pioneers Home would be an important site selection criterion. Among other things the Pioneer Home is the origination point for transportation and is the location of many social functions.

It is the opinion of the advisory board that the overall and long-term housing needs of senior citizens in the Valley could be best met if available state senior housing resources were used in this way. The above approach has been thoroughly reviewed with both the Wasilla and Palmer Senior Citizen organizations and they are agreed that this is the best way to pursue an adequate program of senior housing in the Borough.

If the Assembly agrees with this analysis, a copy of this memorandum will be sent to the Office of Management and Budget within the Office of the Governor, to the State Department of Community and Regional Affairs, to our legislative delegation, to the House and Senate Committees on Health and Social Services, to John Wolfe, Executive Director, Older Alaskans Commission, Pouch C, Juneau, Alaska (9811 and to Louis Odsather, Chairman, Pioneer Homes Advisory Board, P. O. Box 178, Wasilla, Alaska 99687.

Respectfully submitted,

Gary Thurlow
Borough Manager

January 24, 1982

Mrs. Rose Palmquist
325 Dawson Street
Leslie Building
Anchorage, Alaska 99503

Dear Rose,

You may recall I informed you last year in August, 1982, that I had applied for an apartment in the Chugach View Senior Apartments, Anchorage. At the time I applied, I was number 90 on the waiting list. Now, five months later, I am number 78 on the list, which, according to Chugach View management indicates a two-year wait for an apartment.

I have been ill and thus far unable to work even part time. The rent for my small, one-bedroom apartment with no storage, has gone up four times since 1981, for a total of 78%. Now management has notified us that they are going to remodel all of the apartments because the new owner (someone Outside) may want to sell in two or three years and won't be able to make a profit unless there's some improvements made to the apartments. The building is 20 years old, as is the carpeting and other items in the apartments. The remodeling will increase the price of the apartment by $200, for a total of $600 for this small, one-bed-room apartment.

This new rent outlay will not leave much from a small fixed income, grateful as I am for it.

I am writing to inquire if you see any indication that our legislators will provide the necessary funds for the much talked about 120 additional units at Chugach View, so badly needed.

Sincerely,

Bess Ferrara

HOUSING NEEDS OF THE ELDERLY IN THE MATANUSKA-SUSITNA BOROUGH

Introduction

The purpose of this study is to provide an assessment of the present housing condition and the housing needs of the elderly residing in the Mat-Su Borough. This requires a description of the demography of the elderly and their housing situation as to type, payment, quality and general condition. This information base provides the possibility of producing quantitative indicators of need. Measures include financial needs (costs exceeding the capacity to pay), structural needs (relating to serious structural defects in their housing), energy needs (the lack of energy efficient systems), and utility needs (inadequacy in water, sewer, heat, etc.). The discussion will conclude with the perceived desirability of future housing alternatives.

Methodology

The analysis is based on a survey of 679 randomly sampled households in the Mat-Su Borough. Areas not connected by road or sufficiently sparse in estimated population were excluded. The remaining available for sampling was estimated to be 85 to 87 percent of the Borough population. Therefore, approximately 13 to 15 percent of the more rural population was excluded from the sampling process. This could effect the accuracy of estimation of a number of population characteristics, particularly in the area of housing. Thus, the reader is cautioned as to the limitations of the sample. (See appendix for methodology)

The population estimate of the Matanuska-Susitna Borough for December 1979 is 18,536. This is 4,651 people below the official 1979 Borough estimate accepted

by the Department of Community and Regional Affairs (23,177), but is higher than 1978 estimates made by the Department of Labor (15,400) and Bureau of the Census (16,100).

Demographic Characteristics of the Elderly Residing in Mat-Su Borough

Defining the number of elderly in the Borough is generally done by estimating the number of people above a specified age. About 5.6 percent of the Borough is 60 years of age or more, which is 1,040 individuals. An additional 7.8 percent of the population is 50 through 59 years of age (1,442). Table 1 estimates each of the age categories and the proportion falling in each, while figure 1 attempts to display the age distribution of the over 50 population.

TABLE 1: ESTIMATED ELDERLY MAT-SU POPULATION BY AGE CATEGORY

Age	% of Population	Population Estimate
50-54	4.6	845
55-59	3.2	597
60-61	1.0	179
62 and over	4.6	861

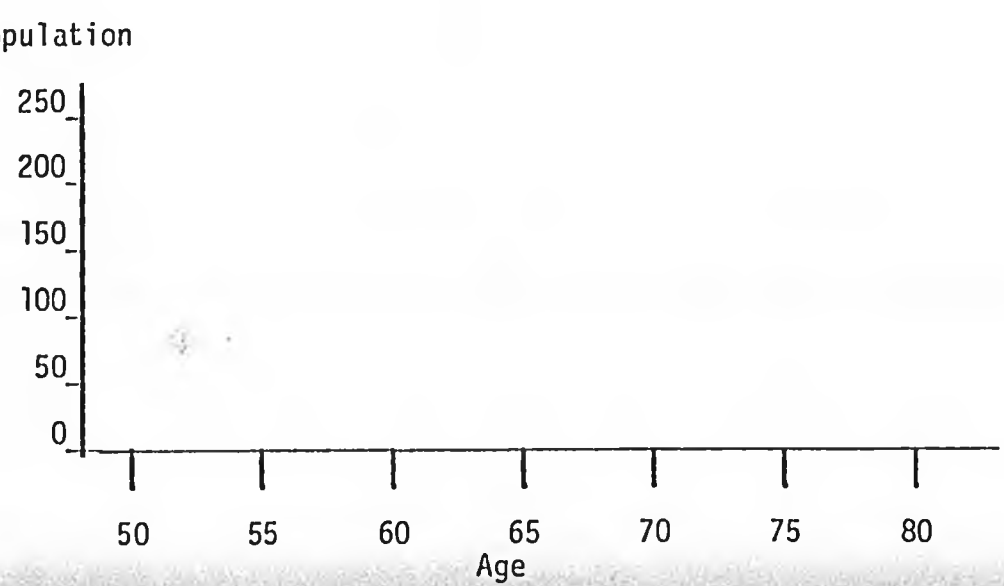

FIGURE 1: FORECASTED AGE CURVE OF MAT-SU ELDERLY
(Actual curve would not be expected to be perfectly smooth)

Though the 60 years and over elderly population is only 5.6 percent of the population, they are spread throughout 11.6 percent of the households. Thus, of the estimated 5,546 occupied households in the Mat-Su, 645 have one or more persons 60 years of age or more, or 1.6 elderly persons per elderly household.

Table 2 highlights the distribution of six measures by four age categories. The key observation is the marked difference between those 50 to 59 years and those 60 years and over. The incidence of widowed status rises measurably after 60 as does retired employment status. Educational attainment also falls as age increases. Race remains fairly constant though the proportion of non-whites increases slightly above 62 years of age. A constant 55 percent male, 45 percent female distribution is reversed for the 60-61 year group. It is difficult to tell if this is due to actual differences occuring or the small size of the 60-61 subgroup.

Another question focuses on where elderly households are located. Generally, senior citizen households are distributed fairly evenly in proportion to the total population. For example, 10.1 percent of the elderly households sampled were in the Butte area while 9.4 percent of all households were located in Butte. There are two important exceptions to this that involve the two most heavily populated areas of the Mat-Su. While 39.6 percent of the sample came out of the Wasilla area, only 25.3 percent of the senior households were from Wasilla. The reverse was true for the Palmer area with 26.2 percent of the total sample and 40.5 percent of the elderly households responding.

Characteristics of Households With an Elderly Member

In addition to discussing the characteristics of individual senior citizens, it is necessary to assess households in which elderly reside. Fro example, the question of relative deprivation is an important one. This includes housing and economic status comparisons to the general population. Table 3 compares senior and total households on ten selective measures. A senior citizen household is defined as any unit with at least one individual who is 60 years of age or more.

Senior households are smaller (an average of 2.5 persons per household versus 3.3) compared to the general populations. This is largely due to the absence of children in the household. Adults per household are essentially the same comparing senior and general households. Senior households have an average residence in the Mat-Su more than twice that of the total population. They also have lived in their present residence sever years more than all households.

Looking at housing characteristics, senior citizen households are somewhat more likely to be single family structures (though most housing in the Borough is single family). Also senior households are almost two times more likely to own their home outright which results in average housing payments less than one-half the total population. Lower payments are also due to the fact that 50 percent of the senior households have resided in their home prior to 1973 suggesting lower interest rates for those buying their home. Senior housing is logically older reflecting the longer time in residence. Though there is a greater incidence of single family residence, the older housing produces slightly smaller homes for seniors. Their homes average 5.0 census rooms, 2.4 bedrooms and 1.4 bathrooms compared to 5.3 census rooms, 2.6 bedrooms and 1.4 bathrooms for the general population. Considering the lower average household size of seniors it is unlikely that the problem of crowding occurs with any frequency.

Median	19.9 yrs.	5.0 yrs.

A key characteristic in any analysis of housing need is income as a measure of financial capacity. Total income of senior citizen households is significantly lower than the population. The median income of seniors is almost $10,000 below all households suggesting a markedly reduced capacity in affording housing options. Almost one-quarter of senior households earned less than $12,500 in 1979. In addition to employment income, 40.3 percent of the elderly households receive the Alaska Longevity Bonus. Private pension income goes to 35.5 percent of senior households; 72.7 percent receive social security; and only 1.3 percent receive old age assistance. The incidence of these income sources increases significantly as age increases.

Income ceilings developed by the Department of Housing and Urban Development provide a method to measure financial need. The approach uses the total income of the household and relates this to the number of people residing in the home. Table 4 shows the 1979 HUD income ceilings for Anchorage which would be generally applicable to the Mat-Su.

Using these guidelines, 40.7 percent of the Mat-Su senior citizen households qualify for HUD assistance. This is substantially above the proportion eligible within the general Mat-Su population (27.5 percent) or those eligible in Anchorage (25.5 percent).

TABLE 4: HUD INCOME ELIGIBILITY GUIDELINES

Size of Family	Income Ceiling
1	$14,000
2	16,000
3	18,000
4	20,000
5	21,250
6	22,500
7	23,750
8+	25,000

The Quality of Present Housing

Present housing quality is an important measure of housing needs. Those living in housing which is unsatisfactory in terms of structural deficiencies, absence of standard utilities or equipment, or the lack of other necessary characteristics produce a greater need for programmatic action. Tables 5 and 6 provide a number of housing condition measures both from the viewpoint of the respondent as well as objective indicators.

The data presented generally support the conclusion that there is a small group of senior citizen households (about 2.5 to 3.0 percent) whose housing is seriously deficient and is measured that way both objectively and subjectively. The result was that 2.6 percent of the elderly households rated their present housing as poor, though a general assessment by field interviewers found no senior housing so poor that it was structurally not worth repairing and could be expected to leave the market.

Added to those elderly living in poor conditions, another eight to ten percent reside in fair housing. This could be defined as housing which had defects which are important but either not serious or correctable by making reasonable (in terms of cost) repairs. Generally, the quality of senior housing is somewhat better in terms of quality compared to the total stock. This does not overshadow the fact that a small number of elderly are found with heating, water, facility, a structural inadequacies. This means 20 to 80 households affected by deficiencies depending on the exact measure.

One interesting crosscheck of data involves comparing perceived crowding by respondents and an objective measure of crowding. Crowding is defined as more than 1.01 persons per census room. While 6.4 percent of the senior households

perceived overcrowded conditions, only 3.8 percent could be objectively measured as crowded. This compares to 14.7 percent of all households who perceived themselves as crowded while 9.6 percent were measured as crowded.

TABLE 5: COMPARISON OF SENIOR CITIZEN AND TOTAL SAMPLE HOUSEHOLDS ON PERCEIVED QUALITY OF HOUSING

Perceived Housing Condition	% Senior Households	% Total Households
Heating System Does Not Keep Home Warm in the Winter	3.8	6.9
Overcrowded Housing	6.4	14.7
Housing too Expensive	5.1	16.8

Refrigerator	3.8	4.0
Hot and Cold Running Water	2.6	9.3
Flush Toilet	2.6	9.6
Tub or Shower	2.6	9.6

Preference for Future Housing

In general terms, senior households want much the same in housing as everyone else residing in the Borough (see table 7). Only 5.1 percent of elderly households sought to relocate their housing during the previous six months. This included one elderly respondent who was looking to relocate to retirement housing. Most (92.4 percent) prefer the single family unit as a desirable housing style though their bedroom needs (2.16) are less than the general households (2.74) reflecting their smaller size. Ownership of housing is almost a universal desire with only 6.6 percent preferring a rental situation. However, the perceived maximum housing payment that a senior citizen household could make each month is considerably below that of all units (averaging $331 versus $419). This difference is reasonable considering the lower median incomes of elderly households.

On the subject of alternative housing styles, the elderly are not much different from the general population. Only 12.7 percent responded in any positive way to a condominium arrangement, and 7.6 percent were positive toward a mobile home park option. Four elderly respondents noted that condominiums would be a good option for returement housing (5.1 percent), and another 19 respondent households with no senior member expressed the same opinion.

For those households with a senior citizen present, three questions were asked relating to retirement housing (see table 8). The first measured interest in moving to senior citizen housing in the Borough. A projected 114 elderly households in the Mat-Su would consider this housing option, if available, but 522 would not. To measure a greater level of commitment, only 7.7 percent of senior households (a projected 50) responded with a willingness to move into senior housing within the next year. An estimated 595 households would not be interested.

TABLE 7: COMPARISON OF SENIOR CITIZEN AND TOTAL SAMPLE HOUSEHOLDS ON HOUSING PREFERENCES

	Senior Households	Total Households
Looked for Other Housing in Past Six Months	5.1%	12.1%
Housing Preference		
Single Family	92.4%	94.8%
Duplex	2.5%	1.3%
Apartment	.0%	0.4%
Townhouse-Condo	2.5%	0.6%
Mobile Home	1.3%	1.0%
Other	.0%	1.6%
Undecided	1.3%	0.1%
Average number of Bedrooms Needed	2.16	2.74
Prefer to Buy Housing Rather than Rent	93.4%	95.8%
Maximum Amount Could Pay		
$\bar{X}$	$331	$419
Median	$299	$400
Would Consider Condominiums	12.7%	11.7%
Would Consider Mobile Home Park	7.6%	9.3%

The final question dealt with the location of future senior citizen housing. Thirty percent of the elderly were unwilling to give a location because they saw no needs. For those with an opinion, the Wasilla area had the most support with 31.6 percent, with Palmer the second preference (20.3 percent). Locations west of Wasilla was preferred by 8.9 percent and Chugiak was mentioned by 2.5 percent. Generally, residents selected locations near their present home. Wasilla received support because it was the primary choice (when one was made) of living in Wasilla, and areas to the west such as Houston, and Willow; and was also selected by 26 percent of the Palmer and, 28.6 percent Butte residents who gave a site choice.

TABLE 8: PREFERENCES FOR SENIOR CITIZEN HOUSING

	YES	NO	DON'T KNOW
Would Consider Moving to Senior Citizen Housing in Borough			
%	17.7	81.0	1.3

Don't Know; Don't Care	8.9	57

[a]Towns not mentioned (such as Houston) are due to the use of an open-ended question and no one in the sample referred to those particular communities.

Housing Scenario Based on Elderly Needs

Based on the data available the following scenario was developed to meet the husing needs of the elderly in the Mat-Su Borough. See Table 9 for a breakdown of demand.

- Locate 20 units in the Wasilla area in relative proximity to basic services, possibly keeping in mind the location of the proposed senior citizen's center.

- These units should be clustered, but constructed to provide a sense of space reflected in the dominant lifestyle of Mat-Su area. This might mean clustered fourplexes constructed in a row style to give all occupants individual access to their units and a small semi-private garden area. Structures larger than a fourplex or of an traditional apartment style construction would reduce their attractiveness to potential clients.

- Based on the desires of these interested in senior citizen housing, ten of the units should be constructed as one bedroom and ten units as two bedroom. If this were not done, there is no way to predict if demand would be reduced below the level predicted.

This scenario is based on the following points:

- The demand of the entire Borough for subsidized elderly housing is only about 50 units. Of that, it is estimated that up to 28 units of the demand would prefer Wasilla. One additional reason a population center was chosen rather than any point along the Parks Highway was the point

that seniors interested in this type of housing were dissatisfied with their present housing due to its remoteness from services and social interactions.

- Even though the optimal demand is 28 units, the number of refinements cuts this number to 20. Only one-fifth prefer structural configurations other than the single family house, and only 21 percent would prefer renting. An addition, 60 percent of the potential clients own their homes outright which reduces the economic impetus to relocate.

- Elements which reinforce demand is that those interested in relocating to senior citizen housing are twice as likely to have inadequate heating systems, perceive their present housing as too expensive and four times as likely to have insufficient hot water and presently have fair to poor housing compared to other seniors.

- Economic status also plays an important role in leading to demand for senior citizen housing. The perceived housing payment affordable to those interested in senior housing is lower than other elderly. Sixty-four percent of those interested stated they could only pay $200 or less a month, while 63 percent of other seniors could afford to pay over $200 a month for their housing.

TABLE 9: PROJECTION OF SENIOR CITIZEN HOUSING DEMAND

Interested in senior citizen housing	114
Would most likely move in	50
Would move in if located in Wasilla	28
Would move in, if located in Wasilla, in a low density rental configuration	20

APPENDIX

METHODOLOGY OF THE MAT-SU HOUSING AND ECONOMIC DEVELOPMENT STUDY

INTRODUCTION

The general goals of this study were to document the attitudes, behavior and characteristics of a sample of the Matanuska-Susitan Borough's population related to housing needs and issues of economic development. The success of the study depended on the close cooperation of a number of agencies and organizations. The base funding for the study came from a grant made by the Department of Community and Regional Affairs to the Cook Inlet Native Association (CINA). While the grant was the key, it was not sufficient to cover the cost of the entire effort. CINA contracted with the Mat-Su Borough to act as the prime sponsor of the study. The Mat-Su Overall Economics Development Plan, Inc. (OEDP) joined the project by providing the field work management at no cost. The Borough contributed substantial CETA funds and other indirect monies to underwrite a portion of the field work, a field work supervisor, printing of the questionnaire, and other costs. Policy Analysts, Limited provided the technical expertise in questionnaire design, sampling, data processing, and analysis. While it is difficult to assess the total cost of the project, it easily exceeded $20,000.

The Questionnaire

The survey instrument was 18 pages in length and was designed by Policy Analysts, Limited. This included 13 pages in the main body of the

questionnaire plus five handout sheets to be filled in or to understand particular questions. The interview varied among respondents but averaged about 30 minutes. There were 85 questions or question groups asked which resulted in 185 discrete pieces of datum coded from each interview.

The field work was conducted during the months of November 1979 to January 1980. Twelve interviewers were employed to complete the 679 total surveys. All the staff went through one training session to familiarize each interviewer with the particular aspects of this schedule and review basic interviewing techniques. In addition, completed material was reviewed to detect initial field problems. In order to monitor progress, interviewers had to maintain daily contact with the field work supervisor.

A copy of the complete questionnaire is presented in the back of this publication.

Sample Design

A skip interval areal probability cluster housing technique forms the basis for this sample survey. A complete list of the distribution and location of housing in the Mat-Su Borough does not exist in one place.

A planned complete housing count was abandoned for lack of funds. The following process was utilized to produce the most complete housing

count by location.

- Step 1

  Data from Mat-Su Borough computer listing of plot ownership were compiled to check for assessed building evaluation.

  Residential units were identified on the basis of assessed building evaluation using a base of $4,000 building evaluation on taxable land pieces for a residential status in the Palmer, Wasilla and Big Lake areas unless contrary information was available. The $4,000 cut off assessment evaluation reflects $2,500 for a well and $1,000 for a septic structure which is consistent with Borough assessor evaluations.

  The base evaluation rate used for outlying areas; such as Eureka, Chickaloon, Sutton, Houston, Willow, Talkeetna, Skwentna, and other outlying areas was $2,000 (unless otherwise discernible) for building improvement assessments to determine residential status. The $2,000 minimum level for the more rural areas reflects possible very low cost structures, such as cabins. Anything with an assessed value above $180,000 was considered commercial unless otherwise verified by the research group.

  Data were transferred from computer listings onto the Mat-Su Road System Map to identify specific locations. In the case

of subdivisions, information was cross-referenced with the Tax Assessment Map to find exact ownership location.

In the first step, no attempt was made to differentiate between multi-family, single family, recreational; trailer or commercial dwellings, unless the specific location was discernible; except for assessed evaluations in excess of $180,000, which are considered non-residential.

The first step mapping code system for dwelling was "0". Eventually this evolved to a more complex system as follows:

Single family Dwelling	0
Multi-family Dwelling	Ø
Trailer	T
Recreational	R
Commercial	C

Step 2

The mapped information from Step 1 was compared with the 1976 Land Use Survey map to check residential status and add discernible specific data (such as trailers, single or multi-family dwelling, and commercial buildings.

Maps were also cross checked for dwellings that were arbitrarily left out under the $4,000 building evaluation in Palmer and Wasilla areas and under the $2,000 building evaluation in outlying areas.

- Step 3

  The data base from Step 2 was reviewed with the Borough assessors to determine:

  1) Correctness of 1978 compiled data
  2) New additions since 1978
  3) Specific types of dwellings (commercial, single or multi-family, trailer, and recreational)

- Step 4

  Any areas in question were surveyed visually by driving to areas and confirming the type of dwelling.

The above process produced a structure count of 6,075. This included 147 commercial buildings, and 1,141 recreational structures, leaving 4,787 residential dwellings. This number was adjusted by 250 because an assessor's analysis suggested the 60 multi-family structures produced about 310 multi-family separate units. This produces 5,037 identified units. A breakdown of the units by area is noted in table 10. The boundaries of the areas is given in figure 2. A discussion of these counts with actual estimates is noted in the following section.

TABLE 10: HOUSING COUNTS BY AREAS OF THE BOROUGH

Area	Total Residential	Single Family	Multi-Family	Mobile Homes	Recreational	Commercial
Talkeetna	94	92	—	2	22	4
Montana	70	69	—	1	44	3
Caswell	39	39	—	—	31	1
Willow	164	162	—	2	274	4
Houston	214	205	—	9	92	6
Big Lake	392	371	3	18	530	8
Goose Bay - Knik	62	62	—	—	13	—
Point MacKenzie	17	17	—	—	—	—
Wasilla	1,826	1,761	22	43	133	85
Palmer	1,297	1,207	31	59	2	24
Butte	476	440	4	32	—	11
Sutton - Chickaloon - Independence Mine	136	136	—	—	—	1
Adjustment	250	—	250	—	—	—
Total	5,037	4,561	310	166	1,141	147

Based on the final counts, 150 clusters of six designated units were apportioned to the base maps by the percent of units each map had. Base maps without road access or in which the number of units fell below 20. In all, 64 maps were discarded, of which 16 had no residential units, and six had only one unit. Non-road areas outside the mapped locations were also excluded. The sample thus was a random distribution of the road areas of the Borough with at least a minimum population. This constitutes about 85 percent of the population. The clusters allocated to each map were then apportioned to one of nine sections on the map based on the unit distribution. Start points for each cluster within a cluster was selected by a random number generator from a set of random start points. Once a start point was fixed, every third unit was sampled for a total of six units.

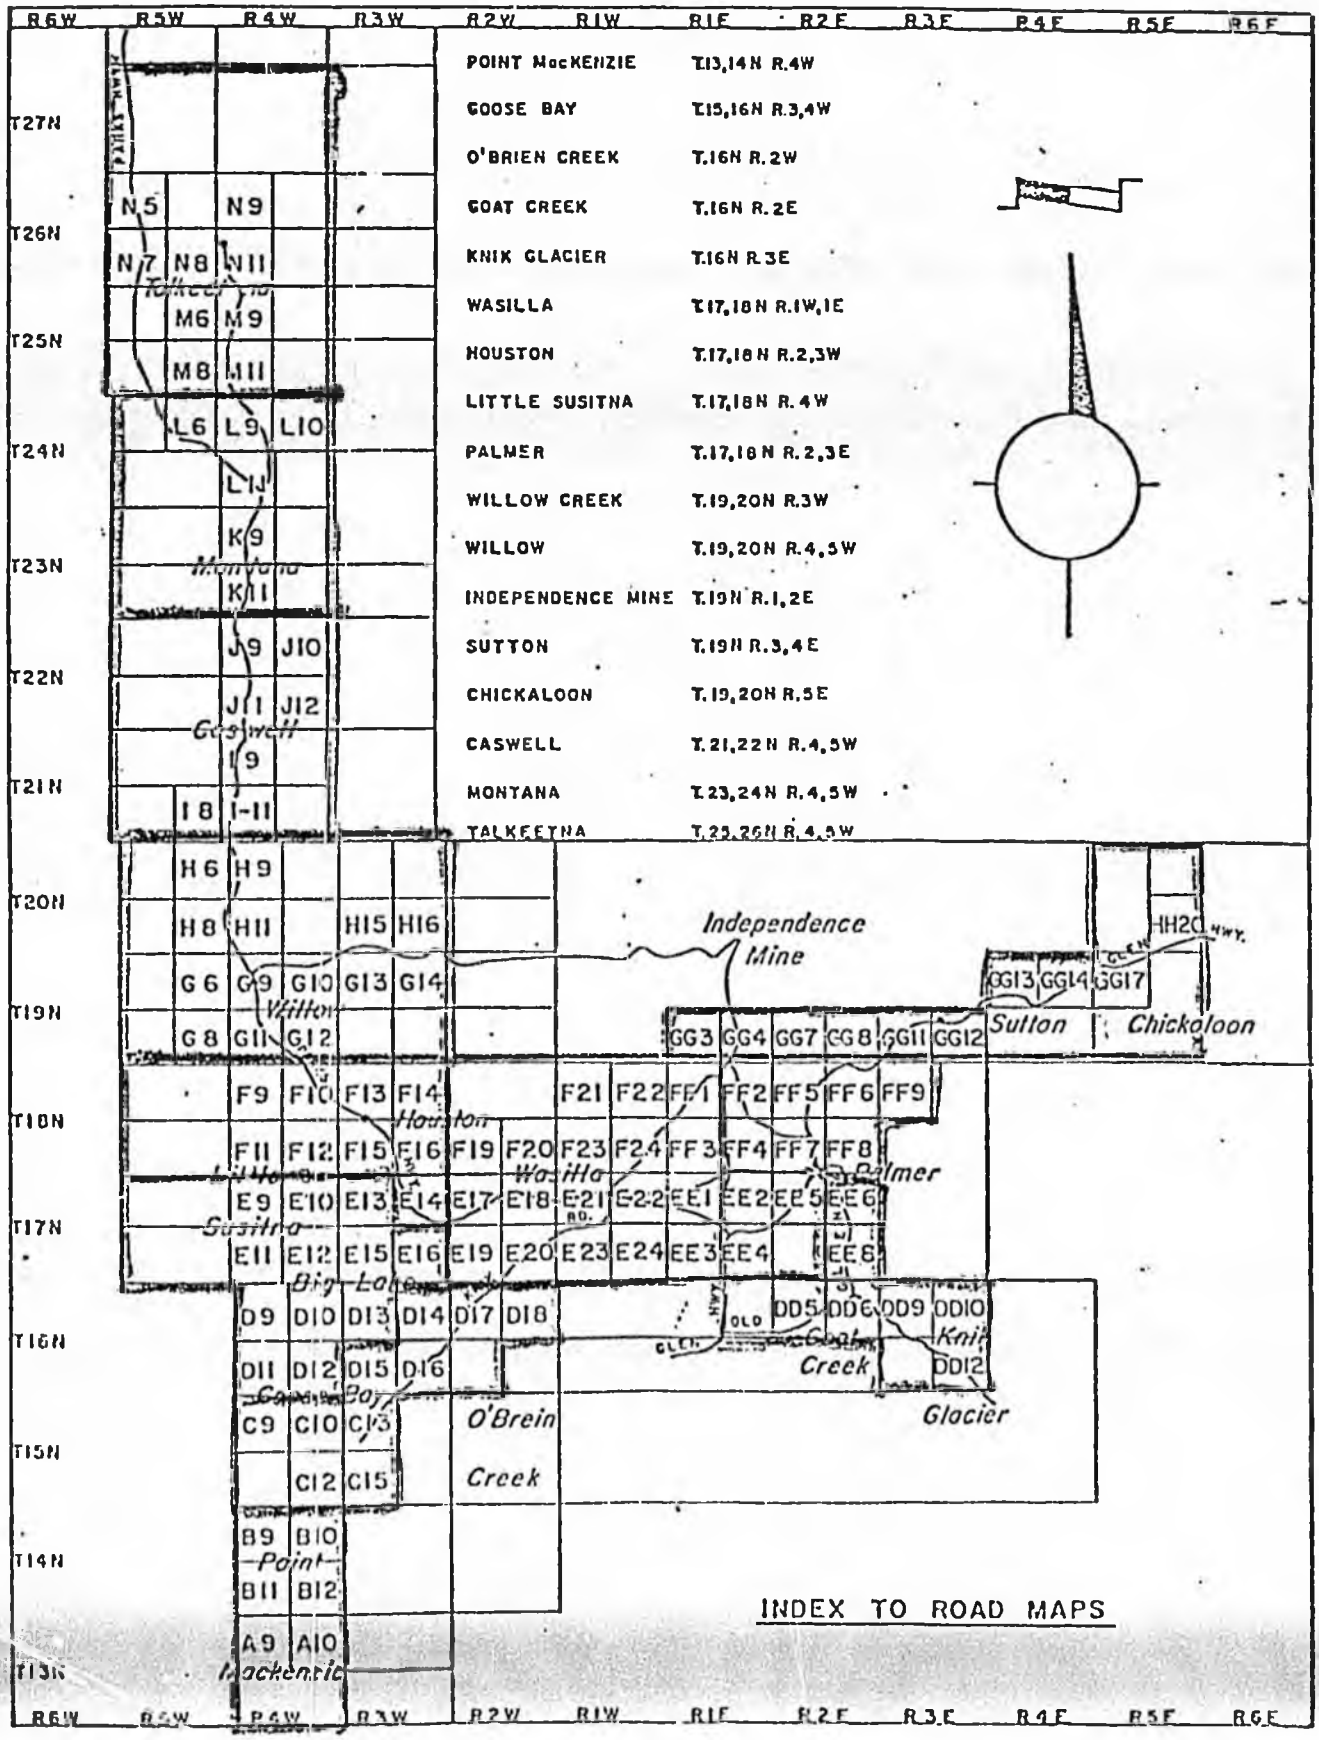

FIGURE 2: Road Connected Areas of Mat-Su Borough Showing Subarea Demarcations

This information was transferred to a special field map showing the location of the clustered units (one field map per cluster was prepared). Of the 900 units sampled, 679 interviews were completed. Most sample points had four to five interviews completed. An analysis of completed interviews suggested that it was a randomly distributed sample of the road connected areas of the Borough, and constituted about 12.2 percent of the total occupied housing stock in the Borough

Projection of Housing and Population

While 5,037 units were identified in the sampling process, it is estimated that there are 5,844 dwelling units in the Borough. The difference is due to two things: roadless areas were not counted, and the approach used produces an undercount in the road connected areas. It is estimated that 8.5 percent of total stock lie in the roadless areas. In addition, the methodology used could not be completely precise. Units misidentified as recreational, below assessment limits, not showing up in records, built too recently to be included, and generally poor records make accuracy a problem. This produced about a 5.3 percent undercount.

Of the 5,844 units estimated to exist, 5,546 are occupied. This produces a 5.1 percent vacancy rate. The data are not sufficiently precise to say what the vacancy rates are in each area of the Borough, but information does suggest that vacancies in the Palmer area are the highest in the Mat-Su (probably twice that of comparable areas). Rural areas have the lowest vacancy rates. Of the 5,844 units, it is esti-

mated that 4,850 are single family, 310 are multi-family and 663 are mobile homes. The number of mobile homes are substantially higher than the table 1 count because that approach aggregated mobile homes on private lots and single family into one category. The mobile homes identified were largely those located in parks. Single family units include stereotypical units as well as cabins and assorted non-conventional units in which only one family resides. Finally, there are an estimated 21 "other" dwellings not accounted for, included people living in commercial structures, at least one tepee, etc.

These residential estimates do not include a projected 1,141 recreational units heavily concentrated in Big Lake, Willow, Wasilla and Houston. Based on employment data, housing estimates, labor force participation rates, and household size, it is estimated that the population of the Mat-Su Borough in December 1979 was 18,536.

MAT-SU HOUSING AND ECONOMIC DEVELOPMENT SURVEY

_____ (3) ID#

30-35 _____ (6) Assessor's Block Number

43 SUBSTITUTION: [0.NA] [1.YES] [2.NO]

Hello, My name is _____, and I am conducting a housing and economic survey for the Mat-Su Overall Economic Development Program and the University of Alaska under a grant from Department of Community and Regional Affairs. The questions are about housing, the census characteristics of the household and economic development in the Mat-Su area. Your answers are important because they help local public and private groups in deciding the future direction of the valley by listening to your household. This information will be used to assist the Mat-Su public in planning for its own future. The answers you give are strictly confidential, voluntary and very much appreciated. (Thank you for participating)

We need to talk to an adult in the household, either a male or female spouse, or head of household.

(To have a balance between males and females for the survey, is there a male/female adult present who could be interviewed)?

NOTE: Original Questionnaire was printed on 8½ X 14 inch paper (except accompanying handout sheets which were printed on 8½ X 11.) This appendix is a photo reduction of the original.

MAP #

NAT-SU HOUSING AND ECONOMIC DEVELOPMENT SURVEY

ID# 1-3

CD# 4-(1)

B1. The first questions deal with your housing.
Would you describe your current housing as a -- (mention most appropriate)
single-family house, a multi-family home, a mobile home, or what?

1. SINGLE-FAMILY HOUSE

B1a. Are there any separate rental apartments or rooms in your house?

1. YES

2. NO (GO TO B2)

5

2. MULTI-FAMILY

6-7

B1b. Including your own, how many separate housing units are there in the building you live in?

NUMBER OF UNITS: _____

(GO TO B3) Page 2

3. MOBILE HOME

(GO TO B4) Page 3

4. OTHER (Describe):

_____

_____

(GO TO B6) Page 4

B2. (For single-family only)
Are you renting your (housing), are you buying it, do you own it free and clear, or is there some other arrangement?

8

1. RENTING

2. BUYING IT

3. OWN IT (GO TO B6) Page 4

4. OTHER (Describe)

_____

_____

(GO TO B6) Page 4

9-12

B2a. What is the Monthly rent?

$ _____

How much is the Monthly payment?

AMOUNT: _____

13-17

18-20

B2c. What utilities are covered in your monthly rent? (Check those mentioned)

____1. Electricity
____2. Water
____3. Sewer
____4. Fuel Oil
____5. Solid Waste (Garbage)

(GO TO B6) Page 4

B2d. Does that regular payment include:

	Yes	No
(1) Real estate taxes on the property?	1	2
(2) Fire and hazard insurance?	1	2
(3) Special Improvement District?	1	2

(GO TO B6) Page 4

B3. (For multi-family only) Are you renting your home, are you buying it, do you own it free and clear, or is there some other arrangement?

8

1. RENTING

2. BUYING IT

3. OWN IT

4. OTHER (Describe)

_____

_____

9-12

B3a. What is the monthly rent?

AMOUNT: $

(GO TO B6)
Page 4

B3b. Are you (Buying), (Own) just the unit you live in or the entire building?

1. Just Unit

2. Whole Building

13-17

B3c. What utilities are covered in your Monthly rent?
(Check those mentioned)

____ 1. Electricity

____ 2. Water

____ 3. Sewer

____ 4. Fuel Oil

(9-12) ____ 5. Solid Waste (Garbage)

(GO TO B6)
Page 4

B3d. (For buyers) How much is the monthly payment?

AMOUNT: $

18-20

B3e. Does that regular payment include:

	YES	NO
(1) Real Estate taxes on the property?	1	2
(2) Fire and hazard insurance?	1	2
(3) Special Improvement District?	1	2

(GO TO B6)
Page 4

8

B4. (For Mobile Homes) Are you renting your home, are you buying it, do you own it free and clear, or is there some other arrangement?

1. RENTING | 2. BUYING IT | 3. OWN IT (GO TO B5) | 4. OTHER (Describe) _____ _____

9-12

B4a. What is the monthly rent?

AMOUNT:

(GO TO B5)

B4b. How much is the Monthly payment?

AMOUNT: $

13-17

B4c. What utilities are covered in your monthly rent? (Check those mentioned)

18-20

___ 1. Electricity
___ 2. Water
___ 3. Sewer
___ 4. Fuel Oil
___ 5. Solid Waste (Garbage)

B4d. Does that regular payment include:

	YES	NO
(1) Real Estate taxes on the property?	1	2
(2) Fire and hazard insurance?	1	2
(3) Special Improvement District?	1	2

B5. (For Mobile Homes) About the land the home is sitting on, are you renting the space, are you buying it, do you own it free and clear, or is there some other arrangement?

21

1. RENTING | 2. BUYING IT | 3. OWN IT (GO TO B6) | 4. OTHER (Describe) _____ _____ _____ (GO TO B6)

22

B5a. Is the (rent) (payment) for the land included in the monthly payment you just gave me for the home?

1. YES (GO TO B6) | 2. NO

23-26

B5b. What is the cost of the additional (Payment/rent) for the land?

AMOUNT: $

B6. Now I have some questions about the actual housing unit. . . .
When was the housing structure or building originally built - in what year?
(IF NOT SURE: What's your best guess about the year it was built?)

27-28 YEAR BUILT: _____

B7. And when did your family or household move in - in what year?
(IF NOT SURE: Well, what's your best guess?)

29-30 YEAR MOVED IN: _____

B8. Now I need to know about the kitchen facilities that are solely for use by your household - do you have. . .

		YES	NO
31	(a) a kitchen sink with piped water? . .	1	2
32	(b) a range or cook stove?	1	2
33	(c) and, a refrigerator?	1	2

B9. This next set of questions is about plumbing facilities - do you have hot and cold piped water in your (individual housing unit)?

34 [1. YES] [2. NO]

B10. Do you have a flush toilet in your (individual housing unit)?

35 [1. YES] [2. NO]

B11. What about a bathtub or shower - do you have one of these in your (housing unit)?

36 [1. YES] [2. NO]

B12. Now, thinking about the number of rooms in your (housing unit) - how many rooms are there altogether in your (housing unit)? Do not count bathrooms, open porches, balconies, foyers, halls, half-rooms, laundry or furnace rooms, unfinished attics or basements, other unfinished storage space, and areas like that.

37-38 NUMBER OF ROOMS: _____

B13. How many of these rooms are bedrooms? This would include any rooms used mainly for sleeping even if they are also used for other purposes.

39 NUMBER OF BEDROOMS: _____

B14. And how many bathrooms do you have?

40 NUMBER OF BATHROOMS: _____

B15. What kind of fuel do you use to heat your home - fuel oil, electricity, propane, coal, wood or what?

41 [1. Fuel Oil] [2. Electric] [3. Propane] [4. Coal] [5. Wood]

[6. Other (Describe)_____]

B16. What kind of heating system do you have - central warm air, circulating water, permanent baseboard or wall electric, room heaters, fireplace or stove, or what?

[1. Central air] [2. Circulating water]

42 [3. Built in electric] [4. Room heaters] [5. Fireplace/stove]

[6. Other (Describe)_____]

B17. Does your heating system keep your home warm enough in winter?

43 [1. YES] [2. NO] [3. Don't Know]

INTERVIEWER: Ask B18 first. If R says YES to B18, ask B18a next. (If applicable). Continue through the entire list of 7 items in this manner.

B18. This next set of questions concerns your current housing. Here is a list of conditions which many people experience with their housing. We would like to know which, if any, you have.

	Do you have	NO	YES	IF "YES" IN B18: B18a. Is it so objectionable that you would like to move? NO	YES
44	(1) Overcrowded housing?	1	2	3	4
45	(2) Housing that is too expensive?	1	2	3	4
46	(3) Insufficient hot water?	1	2	3	4
47	(4) Poor insulation?	1	2	3	4
48	(5) Housing that is in run-down condition?	1	2	3	4
49	(6) A need for storm windows?	1	2	3	4
50	(7) A home that is too far from your job, shopping or friends?	1	2	3	4

B19. Overall, how would you rate your present housing as a place to live -- would you say it is excellent, good, fair, or poor? 51

[1. EXCELLENT] [2. GOOD] [3. FAIR] [4. POOR]

B20. Do you know how much insulation you have in your walls and ceilings? 52

[1. YES] [2. NO (GO TO B21]

B20a. How many inches are in your. . .
Walls _____ inches 53-54
Ceiling _____ inches 55-56

Type of insulation: [1. Fiberglass] [2. Foam] [3. Other] 57

B21. During the past two years, have you done any of the following things to your homes to save energy:

68	a. Added insulation	1. YES	2. NO
69	b. Added weatherstripping or caulking	1. YES	2. NO
70	c. Added storm or improved windows	1. YES	2. NO
71	d. Installed a water flow restrictor	1. YES	2. NO
72	e. Installed an automatic thermostat	1. YES	2. NO

B22. To make new buildings more energy efficient, which of the following government actions would you support and which would you oppose:

73	a. Energy education for homebuyers and contractors	1.SUPPORT	2.OPPOSE
74	b. Tax incentives for more energy efficiency	1.SUPPORT	2.OPPOSE
75	c. Energy building standards for new construction	1.SUPPORT	2.OPPOSE
76	d. Low interest loans for energy efficient measures	1.SUPPORT	2.OPPOSE

C1. Within the past six months, have you made any effort to look for other housing -- that is, other than the housing you have now?

67

[1.YES] [2. NO (GO TO C3)]

C2. Why are you looking for other housing -- what is your major reason?

68-69
70-71

_____

_____

C3. What kind of housing structure do you prefer to live in -- a single-family house, a duplex, an apartment building, a townhouse/or condominium, a mobile home, or what?

72

[1. HOUSE] [2. DUPLEX] [3. APARTMENT BUILDING]

[4. TOWNHOUSE/CONDO] [5. MOBILE HOME]

[6. OTHER (Describe):_____]

73 C4. How many bedrooms would you need? [ ]

74 C5. And would you prefer to rent or buy? [1. RENT] [2. BUY]

C6. Given your household's current monthly income, what is the maximum you would be able to pay each month just for your housing unit? This would not include utilities, taxes, or anything like that -- just for the housing unit.

75-77 [AMOUNT:]

1-3
4-(2)
5-b

C7. What about a condominium arrangement, where you would buy a multi-family unit rather than rent it. How would you feel about buying a condominium?

(Why is that? Any particular reason? Anything else?)

6-7
8-9

_____

_____

_____

C8. How would you feel about living in a mobile home in a planned mobile home park? This is an area that is zoned just for mobile homes and has utilities, laundry and recreation facilities, a central meeting room, and some shopping available. What are your feelings about that?

(Why is that? Any particular reason? Anything else?)

10-11
12-13

_____

_____

_____

D1. Now I would like to turn to the topic of economic development. Here is a list of economic and development activities (HAND RESPONDENT SHEETS A1-A2) Please check each one on whether you think it be encouraged or discouraged for the future of the Mat-Su Borough?

D2. As far as the economy of the Valley is concerned over the next two to five years, do you think the future looks pretty good or do you see some problems ahead?

14 [1. PRETTY GOOD (GO TO D3)] [2. PROBLEMS AHEAD] [8. UNDECIDED (GO TO D3)]

D2a. What problems do you see in the Valley's future?

15-16 _____

17-18 _____

D3. On a seven-point scale, with 1 indicating no more development and seven representing a lot more development, where do you place yourself?

19 [ ]

D4. How much influence do "outside" business interests have in Alaska, a great deal, some, or not very much?

20 [1. A Great Deal] [2. Some] [3. Not Very Much] [8. D.K.]

D5. Do you think the influence that "outside" business interests have on Alaska is good or bad for the state or doesn't it make much difference.

21 [1. Good] [2. No Difference] [3. Bad]

D6. Would you support joint ventures between Alaska and out-of-state or international firms if the results meant more income and jobs for Alaskans?

22 [1. YES] [2. NO] [8. Don't Know]

D7. Do you generally favor or oppose incentives to encourage business to come to Alaska?

23 [1. FAVOR] [2. OPPOSE] [8. Don't Know]

The final section deals with you and your household. These questions are important in gaining an understanding of the people in the Mat-Su area, and are for statistical purposes only.

24-26 E1. How long have you lived in the Mat-Su area? ____YEARS ____MONTHS

27 E2. How many times have you moved your residence in the past three years? [ ]

E3. Where did you live before moving to the Mat-Su area? (Last move to area)

28-29 _____

E4. Why did you move to the Mat-Su area? _____

30-31

32-33 _____

E5. How many people, adults and children, are presently living in your household?

34-35 # [ ]

E6. How many of these are 18 years of age or older?

36 [ ]

E7. Now I need to ask some census questions about each adult in the Household. You said there were _____adults, let's begin with yourself.

	R	2	3	4
Are you/ is the person male or female?	1. Male 2. Female	1. Male 2. Female	1. Male 2. Female	1. Male 2. Female
(SKIP FOR RESPONDENT) How is he/she related to you?		1. Spouse 2. Son/Daugh. 3. Other _____ 8. Not related	1. Spouse 2. Son/Daugh. 3. Other _____ 8. Not related	1. Spouse 2. Son/Daugh. 3. Other _____ 8. Not related
(For Respondent use "You") Is he/she presently married, single, divorced, widowed, or what?	1. Married 2. Single 3. Divorced 4. Widowed 5. _____	1. Married 2. Single 3. Divorced 4. Widowed 5. _____	1. Married 2. Single 3. Divorced 4. Widowed 5. _____	1. Married 2. Single 3. Divorced 4. Widowed 5. _____
How old is he/she? (Record number of years)				
how many weeks has he/she been employed in the past twelve months?				
Is he/she presently employed, unemployed, retired, student or homemaker.	1. Employed 2. Unempl. 3. Retired 4. Student 5. Homemaker	1. Employed 2. Unempl. 3. Retired 4. Student 5. Homemaker	1. Employed 2. Unempl. 3. Retired 4. Student 5. Homemaker	1. Employed 2. Unempl. 3. Retired 4. Student 5. Homemaker
(If employed) How many hours does he/she work each week?				
(If employed) Is the job located less than 10 miles from your home, in the Borough, Anchorage, or somewhere else?	1. Local 2. Borough 3. Anchorage 4. Else	1. Local 2. Borough 3. Anchorage 4. Else	1. Local 2. Borough 3. Anchorage 4. Else	1. Local 2. Borough 3. Anchorage 4. Else
(If employed) In which of these categories does his/her primary job fit? (USE EMPLOYER SHEET-B)				
(If employed) In which of these categories does his/her main occupation fit? (USE SHEET-C)				
How many years of school did he/she complete?				
What is his/her race?	1. White 2. Black 3. Native 4. Other	1. White 2. Black 3. Native 4. Other	1. White 2. Black 3. Native 4. Other	1. White 2. Black 3. Native 4. Other

If additional adults go to the next column. ____ ____ ____

E8. How many children 17 years of age or younger are living in your household? 37

E9. Could you please list their ages and sex from youngest to oldest?

	YOUNGEST -							-OLDEST
AGE 38-53								
SEX (M,F) 54-61								

(If Any Are Older Than 12 Years)

E10. Are any employed Full-time or Part-time? 62-63

0. NO 2. # FULL-TIME_____ 3. # PART-TIME_____

E11. Is there anyone in your household who is mentally or physically handicapped? 64

1.YES 2.NO (GO TO E12)

E11a. How many handicapped adults, 18 years of age or older are there in the household? 65

#

E11b. How many handicapped children, 17 years of age or younger are there in the household? 66

#

E12. Last of all, to get an accurate picture of people's financial situations, we need to know the income of all the households we interview -- this would be all the income you (and your family or household) receive in 1979, from all sources, not just from wages, and before any taxes and other deductions.

(HAND RESPONDENT CARD D) Just give me the letter of the correct income category. (IF DON'T KNOW) What is your best estimate of total household income? 67-68

(If any adult in the household is 60 years of age or older skip to E13, otherwise end interview with following.)

Thank you very much for your cooperation. Because we are talking to over 800 Mat-Su residents, we have a verification system to check to see if the interviews were really completed.

I need your first name only and telephone number, but do want to stress the confidential nature of the survey.

FIRST NAME_____ PHONE #_____

IF ANY ADULT IN THE HOUSEHOLD IS OVER 60 YEARS OF AGE, ASK THE FOLLOWING:

E13. Does any of the household's income come from (READ EACH)

69 _____Alaska Longevity Bonus

70 _____Private Pension

71 _____Old Age Assistance

72 _____Social Security

(If Senior Citizen member of household is present ask he/she, otherwise ask non-senior respondent)

E14. If special housing were built for senior citizens in the Borough, would you (your_____) be interested in moving into it?

73 [1. YES] [2. NO]

E15. If senior citizens housing were built in the Borough would you (your_____) want to move into it within the next twelve months?

74 [1. YES] [2. NO]

E16. If you (he/she) could select its location, in what town would you (he/she) prefer to locate the senior citizen housing?

75 _____

(Respondent to E14-E16 is

76 [OVER 60] [UNDER 60])

Thank you very much for your cooperation. Because we are talking to over 800 Mat-Su residents, we have a verification system to check to see if the interviews were really completed.

I need your first name only and telephone number, but do want to stress the confidential nature of the survey.

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 377 (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act financing regional transportation facilities by the Alaska Industrial Development Authority; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. In addition to the findings in AS 44.88.010, the legislature finds that:

(1) In most areas of the state, there is a lack of basic transportation and port facilities adequate to permit the development of nonrenewable natural resource enterprises, including mining enterprises.

(2) The development of nonrenewable natural resource enterprises, including mining enterprises, is essential to the long-term economic growth of the state and will directly and indirectly alleviate unemployment in the state.

(3) The achievement of full employment and the establishment and continuing development of nonrenewable natural resource enterprises in the state will be accelerated by authorizing the creation of instrumentalities in the various areas of the state with powers to borrow money to provide for the development of transportation and port facilities, as provided in this chapter.

* Sec. 2. PURPOSE. In addition to the purposes specified in AS 44.88.070, the purpose of the authority is to promote the development of transportation facilities by providing financing for transportation facilities or by owning and operating transportation facilities.

* Sec. 3. POWERS. In addition to the powers conferred on the authority

under AS 44.88.080 and under other law, the authority has the power to

(1) acquire, rent, hold, use, and dispose of real and personal property necessary, useful, or convenient for its purposes;

(2) grant, by franchise, lease or otherwise, the use of any project, facilities or property owned or controlled by it to any person for the consideration and period of time and upon the other terms and conditions it may fix and agree upon;

(3) lease or agree with others to use a project for the rentals and upon the terms and conditions the authority may consider advisable;

(4) charge and collect rents, rates, fees, or other charges for its services and facilities;

(5) issue bonds in accordance with sec. 4(b) of this Act and AS 44.88.090(b) - (f) to pay the cost of a transportation facility and to secure payment of the bonds by any means provided in AS 44.88; and

(6) establish insurance funds, reserve funds, or other funds and accounts with money provided by the sale of bonds or collateral provided by participating businesses, as the authority determines to be appropriate to further the purposes described in this Act.

* Sec. 4. REGIONAL TRANSPORTATION FACILITY DEVELOPMENT FUND. (a) There is established in the authority the regional transportation facility development fund. The fund consists of money or assets appropriated or transferred to the authority for transportation facilities and other money or assets deposited in the fund by the authority. The fund may be used to finance or develop a transportation facility or to secure bonds issued to finance transportation facilities.

(b) If a transportation facility is financed or developed through use of the assets of the regional transportation facility development fund, the authority may not pledge or use other assets of the authority to assist in the financing or development of the transportation facility. With respect

to assets of the authority, bonds issued to finance transportation facilities constitute limited obligations of the authority, secured only by assets in the regional transportation facility development fund. If a transportation facility is also a qualified "project," as defined in AS 44.88.220(5), the limitation described in this section does not impair or restrict in any manner the authority's ability to finance the project under the programs established in AS 44.88.

* Sec. 5. REGIONAL DEVELOPMENT ADVISORY COUNCIL. (a) A Regional Development Advisory Council may be established in each of the six economic regions recognized by the Bureau of Labor Statistics, United States Department of Labor, for the purpose of

(1) conducting hearings on and approving or rejecting proposed transportation facilities, unless proposed to be located wholly within the boundaries of a municipality; and

(2) advising the authority in the development, maintenance, and operation of transportation facilities.

(b) A Regional Development Advisory Council shall be organized in a region only after the authority has received a proposal for the development of a transportation facility within the region.

(c) A Regional Development Advisory Council consists of nine members registered to vote in the region. The governor shall appoint the members to reflect the economic and geographic diversity of the region. Council members serve three-year terms at the pleasure of the governor, except that the initial members may be appointed for less than three years so that the term of one-third of the council expires each year. The governor shall appoint a chairperson who shall call meetings as required and preside over the deliberations of the council. A majority of the council constitutes a quorum for transacting the affairs of the council.

(d) Members of a Regional Development Advisory Council receive no

compensation for their services on the council, but are entitled to per diem and travel expenses authorized by law for state boards and commissions under AS 39.20.180.

* Sec. 6. APPROVAL AND FINDINGS REGARDING TRANSPORTATION FACILITIES. (a) Before entering into an agreement with respect to the financing or development of a proposed transportation facility the authority shall obtain the approval of each Regional Development Advisory Council in which the proposed transportation facility is to be located, unless the proposed transportation facility is to be located wholly within the boundaries of a municipality, in which case the council shall obtain the approval of the municipality. Approval under this subsection shall be evidenced by a certified copy of a resolution of the council or governing body of the municipality.

(b) Before issuing bonds to provide financing for a transportation facility the authority shall obtain approval under (a) of this section and find, on the basis of all information reasonably available to it, that

(1) the transportation facility and its development under this chapter will be economically advantageous to the state and the general public welfare and will contribute to the economic growth of the state;

(2) the transportation facility applicant is financially responsible;

(3) the transportation facility is financially feasible and able to produce revenue adequate to repay the bonds with which it is financed;

(4) provision to meet increased demand on public facilities that might result from the transportation facility is reasonably assured;

(5) the transportation facility will provide or retain employment reasonably related to the amount of the financing by the authority considering the amount of investment per employee for comparable facilities and other relevant factors; and

(6) the scope of the transportation facility is sufficient to provide a reasonable expectation of a benefit to the economy of the state.

* Sec. 7. HEARING TO CONSIDER PROPOSED TRANSPORTATION FACILITY. Before considering a resolution regarding the approval or rejection of the development or financing of a proposed transportation facility, a Regional Development Advisory Council shall conduct a public hearing in at least three different locations within the region or, if applicable under sec. 6(a) of this Act, the governing body of a municipality shall conduct a hearing.

* Sec. 8. APPOINTMENT OF TWO AUTHORITY MEMBERS TO REPRESENT COUNCIL OR GOVERNING BODY. (a) If the development or financing of the proposed transportation facility is approved, the Regional Development Advisory Council or governing body of a municipality, as the case may be, may designate two persons to serve as voting members of the authority in connection with subsequent action by the authority that exclusively concerns the transportation facility. If the transportation facility is located in the jurisdiction of more than one council, the authority may, by resolution, prescribe the manner in which local representation is provided.

(b) The two members designated under (a) of this section are subject to the provisions of AS 44.88.180, except that they may vote on a decision even though they may be regular shareholders of a native corporation affected by the decision. However, they may not vote on the decision if they are officers or employees of the native corporation.

* Sec. 9. DEVELOPMENT, MAINTENANCE, AND OPERATION OF TRANSPORTATION FACILITIES. The authority must obtain approval of the Regional Development Advisory Council or governing body of a municipality, as the case may be, in which the transportation facility is located before the adoption or execution of contracts, agreements, resolutions, or other matters that directly concern the development, maintenance, and operation of the

transportation facility.

* Sec. 10. EQUAL USE AND ACCESS. If the authority owns, leases, or otherwise operates or controls, or participates in the financing of a transportation facility, the authority shall, to the maximum extent possible, provide for equal rights of access to and use of the facility by members of the public and other persons or entities, and the access to and use of the facility shall be upon terms and conditions which are fair and reasonable. However, this section does not prevent the authority from establishing fair and reasonable limitations on use of or access to a facility to the extent the limitations are necessary in connection with the nature of the facility or the demand for use of or access to the facility. This section applies to the establishment of rates and rate structures as well as all other factors, terms and conditions relating to the use of or access to the facility, including without limitation the design and location of the facility. The members of the authority shall make a written finding concerning compliance of the facility with the provisions of this section.

* Sec. 11. DEFINITIONS. In this Act, unless the context requires otherwise,

(1) "authority" means the Alaska Industrial Development Authority;

(2) "transportation facilities" or "facilities" means harbor, port, shipping and transportation facilities of all kinds, including without limitation harbors, channels, turning basins, anchorage areas, jetties, breakwaters, waterways, canals, locks, tidal basins, wharves, docks, piers, slips, bulkheads, public landings, warehouses, terminals, refrigerating and cold storage plants, rolling stock, car ferries, tugs, boats, conveyors, tunnels, bridges, highways, roads and railroads, and appliances of all kinds for the handling, storage, inspection and transportation of freight

and natural resource products; it also includes without limitation all property, rights, easements and franchises relating to a facility and necessary or convenient for the acquisition, construction or operation of the facility.

* Sec. 12. EFFECTIVE PERIOD. The powers described in this Act to finance or develop a transportation facility expire on December 31, 1985. Nothing in this section modifies the provisions of this Act with regard to transportation facilities approved, financed, and developed under this Act before December 31, 1985.

* Sec. 13. This Act takes effect immediately in accordance with AS 01.-10.070(c).

CSHB 377 (LOANS)
Fiscal Note Analysis 5/27/83

Language in Section 5(b) of this committee substitute ties the establishment of a Regional Development Advisory Council to the Submission of a transportation facility proposal to AIDA. Costs incurred by the Council would be charged back to the project. If that language is deleted, and regional councils are established regardless of proposed projects, there would be fiscal impact to the department as indicated in the fiscal note dated 5/9/83.

RE: CSHB 377: Proposed Amendments

The attached amendments to CSHB 377 have been requested by representatives of the Alaska Environmental Lobby. The proposals have been numbered for the purpose of easy reference.

Proposed Amendments to CS for House Bill No. 377 (C&RA)
May 14, 1983

1/ Page 2, line 14-17
Change language to read "(6) establish insurance funds, reserve funds, or other funds and accounts with monies provided by the sale of bonds or collateral provided by participating businesses, as the Authority determines to be appropriate to further the purposes described in this Act."

Comment: The current version makes reference to capital reserve funds. In the existing AIDA statutues (AS 44.88.105), capital reserve funds are set up to imply the moral obligation of the state to repay Industrial Development Bonds if project revenues are insufficient to cover them. The state, as a practical matter, is at risk for any tax exempt bonds it issues, but the "moral obligation" phrase increases the risk.

The intent of the amendment is to retain the use of insurance funds and reserve funds, which protect the state from risk, but to have those funds filled with private monies, not state monies. They would also serve to reduce interest rates.

2/ page 3, line 16,17
Change language to read "A Regional Development Advisory Council consists of nine members who are registered to vote in the Advisory Council Region. They will be appointed by the Governor to reflect the economic and geographic diversity of the region."

Comment: The present language does not insure local representation. These changes would encourage the Governor to see that local interests are represented.

3/ page 4, line 16
Add a new point after (2) "The proposed project is financially feasible and able to produce revenues adequate to repay the bonds with which it is financed"

Comment: At present, the findings of AIDA required before bonds are sold do not include a specific examination of the viability of the project which is to be financed.

4/ page 5, line 4 and 5
change to "may designate two persons to serve as voting members of the authority in connection with subsequent action by the authority that concern the transportation facility exclusively"

Comment: "voting" and "exclusively" are added to make the role of the two members more clear. The tow added members would not be able to vote on issues that affect transportation facilities state wide.

5/ page 5, line 5
Add a new line or lines that states that the two designated members of the authority are subject to the AIDA conflict of interest law (AS 44.88.180) except that they may be regular shareholders of a native corporation that is affected by an AIDA decision and still vote on that decision. However, they may not be employees or officers of the native corporation and vote.

Comment: As the CS is currently written, most people in the NANA region could not serve as voting Authority members on the Red Dog Mine Proposal, since NANA is in a joint venture on the projects, and most residents are shareholders of NANA.. The legal aspect of this modification needs to be checked--I do not know how specifically the statutes can exclude somebody from conflict of interest requirements.

6/ page 5, line 15.
Add "A public hearing on any issue requiring approval of the Regional Development Advisory Council must be held at the request of 5 or or more residents."

Comments: The intent is to provide public hearings on the development, maintenance and operation of the transportation facility, if there is a need for them. In the present CS, they are not provided for.

7/ Page 3, line 15. (OUT OF ORDER)
Add "Advisory Councils will be formed only after transportation facilities have been proposed to AIDA for that region."

Comments: The administration has suggested that these councils could serve purposes other than evaluating AIDA transportation facility programs, but they have not been listed in this legislation. Since, at present, councils serve no purpose until proposals are made, their formation need not be immediate.

Proposed Amendments to CS for House Bill No. 377 (C&RA)
May 14, 1983

1/ Page 2, line 14-17
Change language to read "(6) establish insurance funds, reserve funds, or other funds and accounts with monies provided by the sale of bonds or collateral provided by participating businesses, as the Authority determines to be appropriate to further the purposes described in this Act."

Comment: The current version makes reference to capital reserve funds. In the existing AIDA statutues (AS 44.88.105), capital reserve funds are set up to imply the moral obligation of the state to repay Industrial Development Bonds if project revenues are insufficient to cover them. The state, as a practical matter, is at risk for any tax exempt bonds it issues, but the "moral obligation" phrase increases the risk.

The intent of the amendment is to retain the use of insurance funds and reserve funds, which protect the state from risk, but to have those funds filled with private monies, not state monies. They would also serve to reduce interest rates.

2/ page 3, line 16,17

HOUSE BILL 377

ASSUMPTIONS:

1. An election will be held in one REAA area creating one Regional Resource Development Authority. If the election does not take place at the same time as a regularly scheduled REAA election, there will be a fiscal impact.

2. The above question passes and an election of the initial five member board take place not less than 60 nor more than 90 days after the order of election. There will be a fiscal impact.

3. Subsequent election of members, after the initial members' terms have expired, takes place at the same date as a regularly scheduled REAA election. Only the Contractual Services category will be affected and is figured at 6% inflation.

4. This analysis is computed for an election of an RRDA and board members for one REAA area. If there should be elections in all 21 REAA areas, multiply $20.6 x 21 to compute the fiscal impact. (432.6)

Ms. Barbara Lacher
Chairperson
House Community and Regional Affairs Committee
Alaska House of Representatives
Juneau, Alaska 99801

RE: House Bill 377
Regional Resource
Development Authorities

Dear Ms. Lacher:

This letter is to express GCO Minerals Company's interest in and support for House Bill 377. GCO Minerals Company, a wholly owned subsidiary of International Paper Company, has been involved in exploration and development of hardrock mineral resources in Alaska since the late 1960's. Since the late 1970's GCO Minerals Company, along with various partners, has been directly involved in efforts to develop our interests in an asbestos deposit in east-central Alaska and a lead-zinc-silver deposit in northwestern Alaska. Both of these deposits represent significant mineral resources which should be developed.

GCO Minerals Company, along with many others, has seen much of our effort to develop potential resources in Alaska stymied by the lack of existing transportation facilities and the high cost of construction of these facilities. The ability to construct these facilities using tax exempt bonds would greatly facilitate the development of the mineral wealth of the state and insure that Alaska's mineral resources can economically compete on world markets. House Bill 377 is a significant step in this direction.

In GCO Minerals Company's consideration of this legislation, we have worked closely with Nana Regional Corporation, Cominco Alaska, Inc. and others to insure that the legislation provides fair and reasonable access to facilities on an equal basis to any potential user. This important aspect of the legislation has

been addressed throughout the bill, but specifically in Section 130. This section should insure that the state, local regions and potential users derive maximum benefit from the legislation.

GCO Minerals Company strongly supports the concept and implementation of House Bill 377.

Very truly yours,

GCO MINERALS COMPANY

FROM: REPRESENTATIVE BARBARA LACHER

SUBJECT: HB 377, SB 151; Relating to establishment of Regional Resource Development Authorities.

DATE: April 28, 1983

The attached correspondence echos my concerns on Hb 377 which is scheduled for first hearing in the House Community and Regional Affairs Committe on May 4, 1983. While the author of the attached material was referring to SB 150, and certain revisions have been made in HB 377, the following question persists:

1) Is the establishment and proposed activities of Regional Resource Development Authorities, as implemented in HB 377, within the authority of the State Constitution?

I realize that I am requesting a response in an unusually limited time frame and only do so because of the importance of this issue.

BOROUGH ATTORNEY'S OFFICE

April 22, 1983

MEMORANDUM

To: Gary Thurlow, Borough Manager

From: Steven H. Morrissett, Borough Attorney

Subject: SB 151: REGIONAL RESOURCE DEVELOPMENT AUTHORITY BILL

The bill was introduced April 6, 1983, by Kerttula, Farenkamp, Ferguson and Paul Fisher which is intended to create "regional resource development authorities". The boundaries of any authorities created would be the regional education attendance areas for school districts. The authorities would operate as public corporations.

The control of a resource development authority would be through a board of governors. Three of the members would be appointed by the Governor. Five of the members would be elected pursuant to the Alaska Election Code. Candidates would be nominated by a petition signed by 20 voters in the area. Elections would be held on the first Tuesday of October, the same time as municipal elections. Terms for board members would be two years.

My first concern is that the bill appears to establish the authorities as "political subdivisions" at least for issuance of bonds and tax exempt status. I think it is likely that this conflicts with the State Constitution. Article 10, Section 1 provides "the purpose of this article is to provide for maximum local self-government with a minimum of local government units..." Article 10, Section 2 provides "all local government powers shall be vested in boroughs and cities." It is my opinion that creation of a "political subdivision" which is not a city or borough under the appropriate statutes would probably violate the Alaska Constitution.

The practical effect of this potential conflict is that an authority which was created very well may find its bonds to be unsaleable. Since I have no particular expertise in the area of municipal bonds, it would be best to request the advice of knowledgable bond counsel. However, it is my understanding that a legal question striking at the validity of a corporation which issues bonds would similarly effect the validity of those bonds.

A second problem with this bill is that it creates a direct competition with the Borough's responsibility and powers

to develop transportation systems (MSB 2.04.167, AS 29.48.030(a)(12)), powers to develop harbors, wharves and marine facilities (MSB 2.04.150) and powers to promote economic development through the other borough powers. A parallel local government authority exercising "resource development" responsibilities may find itself in direct competition with the Borough for bond sales, economic development programs and other areas where there may be duplicate responsibilities.

A third problem is that the real and personal property of the authority would be exempt from taxation as "property of a political subdivision of the state". Again, there appears to be a conflict with the Alaska Constitution, because the authority is neither a city nor a borough and is not controlled by a city or a borough. The bill attempts to create a tax exemption by declaring the authority to be a "political subdivision" rather than a state agency.

I believe that this bill deserves comment by this Borough, other municipalities and the Alaska Municipal League.

Honorable Arliss Sturgulewski
Alaska Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Re: CSSB 151
Our file no.: 366-575-83

Dear Senator Sturgulewski:

This letter responds to your inquiry regarding the establishment of regional resource development authorities (authorities) under CSSB 151.

The proposed establishment of up to 21 authorities in the unorganized borough, each with authority to issue bonds to finance the development of regional transportation facilities, raises a myriad of complex policy and legal concerns. Resolution of the difficult policy considerations has been actively pursued through the several committee hearings, and has resulted in the adoption of numerous amendments, many of which relate to your concerns regarding the propriety of more extensive executive oversight of the formation and bonding activities of an authority.

Resolution of the legal questions is no less difficult. The legal questions addressed in this letter are quite novel, and cannot be answered with any degree of certainty. Indeed, this letter can perhaps be more accurately described as identifying the relevant legal concerns rather than offering a legal analysis and result. In substantial part, the legal uncertainty reflects the curious endowment of each authority with attributes of both a political subdivision and a state agency. While the difficulty in assigning a label may not be significant in itself, the cumulative lack of legal certainty may itself implicate separate policy considerations.

With the foregoing qualification in mind, it is our view (1) that an authority is a permissible limited purpose political subdivision of the state, (2) that the state has no

legal liability in the event that an authority defaults on its debts, and (3) that the proposed provisions for succession to a subsequently established local government are adequate. We explain our conclusion below.

1. Is establishment of an authority permissible under art. X of the Alaska Constitution?

The bill proposes the establishment of authorities across the unorganized borough in areas contermnious with the existing boundaries of Rural Education Attendance Areas (REAAs). Though limited in other respects, an authority would have broad, if not plenary power with respect to the financing of a transportation facility within its jurisdiction. Article X, section 2 of the Alaska Constitution provides, however, that "[a]ll local government power shall be vested in boroughs and cities." Since, of course, an authority is neither a borough or a city, it is arguable that their establishment is contrary to the constitutional provision.

Testifying in support of the legislation, representatives of the NANA Development Corporation suggested that an authority does not possess the requisite "local government power" to be subject to the article X prohibition. The argument posits a distinction, at least with respect to the applicability of article X, between governmental and proprietary functions of local governmental entities.

Though the proffered argument is plausible, we have substantial reservations whether a court would similarly conclude that the proposed authorities are beyond the scope of article X. It is first arguable that the powers of an authority are governmental, not proprietary. The determination of whether a function is governmental or proprietary is "often a difficult question to answer." 5 E. McQuillin, The Law of Municipal Corporations 10.05, at p. 743 (1979). Among other considerations, the extent to which a function is traditionally engaged in by local government is entitled to substantial weight. Id. Under present law, the power to provide for facilities proposed for financing by an authority is one traditionally accorded to municipalities in Alaska, suggesting that the power of an authority to provide for transportation facilities is a local government power. See AS 29.48.030(a)(3), (8) and (12). In the same vein, AS 29.58 authorizes municipalities to issue revenue bonds to finance the

development of capital projects, again suggesting that the financing powers of an authority parallel the traditional powers of local governments in Alaska. More fundamentally, our research discloses no case authority or historical documentation to suggest that the constitutional framers intended to limit the scope of the art. X prohibitions in the suggested fashion. To the contrary, the desire to avoid the proliferation of local governmental units explicitly articulated in sec. 1 would appear to be as salient regardless of whether an entity is exercising what may be labeled proprietary rather than governmental functions. And, the explicit exception in art. IX, sec. 11 relating to revenue bonds issued by a public corporation established by a political subdivision further suggests that in other instances where a political subdivision acts in what may be regarded as a proprietary capacity, it remains subject to constitutional limitation.

That an authority is within the ambit of art. X does not, however, necessarily lead to the conclusion that their establishment is unconstitutional. Section 5 of art. X authorized the assembly of an organized borough to create service areas for the provision of special services not common to the entire borough. Article X, sec. 6 authorizes the establishment of comparable service areas in the unorganized borough:

> The legislature shall provide for the performance of services it deems necessary or advisable in unorganized boroughs, allowing for maximum local participation and responsibility. It may exercise any power or function in an unorganized borough which the assembly may exercise in an organized borough.

In our view, the legislature may establish regional resource development authorities in its role as the assembly for the unorganized borough. The resultant authorities serve a limited purpose -- the promotion and financing of transportation facilities in a specific area of the unorganized borough. And, since the unorganized borough itself a political subdivision of the state, Walters v. Cease, 388 P.2d 263, 264 n.1 (Alaska 1964), a constituent part of the unorganized borough must as well be a political subdivision. See generally 1977 Op. Att'y Gen. No. 15 (March 26) (REAAs are limited purpose political subdivisions).

We do recognize that an authority has certain attributes of a state agency. See e.g., Alaska State Operated School System v. Muller, 536 P.2d 99 (Alaska 1975). The governor must certify the need for establishment of an authority. The

governor is futher authorized to appoint three of the eight board members from among the principal heads of executive departments. And, the state bond committee, comprised of the commissioners of commerce, revenue and administration (AS 37.15.010) is accorded oversight responsiblities.

On balance, however, we conclude that organization through local election in addition to the numerous other provisions establishing a modicum of local autonomy are more determinative of the characterization of an authority. If, in the unlikely event that a court were to conclude otherwise, the failure to place the authories within an executive branch department would be problematic. Alaska Const. art. III, sec. 22.

2. It there any potential for the state to be liable in the exteit than an authority is unable to satisfy its debts?

Assuming that a regional resource development authority constitutes a permissible political subdivision of the state, you ask if that relationship imposes any possible legal obligation for the state to satisfy debt service obligations in the event that the assets of an authority prove inadequate. As a general proposition, the state has no legal obligation to guarantee satisfaction of debt service obligations on bonds issued by a political subdivision of the state. See Kenai Peninsula Borough v. State, 532 P.2d 1019, (Alaska 1975); cf. Walker v. Alaska State Mortgage Association, 416 P.wd 245 (Alaska 1966); DeArmond v. Alaska State Development Corp., 376 P.2d 717 (Alaska 1962). While SB 151 purports to immunize the state from any potential liability, sec. 30.13.090(b), we caution that it is arguable that in certain instances the legislature may have a constitutional obligation to preserve the ability of an authority to maintain its operation of a transportation facility. That argument derives from the requirement in art. X, sec. 6 for the legislature to "provide for the performance of services it deems necessary or advisable in unorganized boroughs."

Under the authority of article X, sec. 6, we have previously advised the legislature that it "may well have an obligation to satisfy judgments against REAA's." Inf. Att'y Gen. Op. (April 22, 1982; J66-668-81). It is our estimation that whatever the legal obligation for the state to satisfy the debts of an REAA, it is a tenuous proposition at best to extend that analysis to impose a requirement for the state to satisfy bond obligations of an authority. First, the provision of education in the unorganized borough is mandated under article VII of the

DATE: April 26th, 1983

RE: House Bill 377

HB 377 is a companion bill to SB 151. The legislation establishes a mechanism for the creation of a Regional Resource Development Authority (RRDA). The purpose of an RRDA is the improvement, establishment, and development of facilities in its district for transportation purposes in connection with natural resource enterprises.

The legislation provides for the RRDA to issue bonds and to deposit or invest funds, and, to enter into contracts with public or private entities. Neither the members of an RRDA nor the persons executing the bonds are personally liable on bonds of the authority. Language is included providing that bonds issued by an RRDA do not become an indebtedness of the state or local subdivision.

The real and personal property of an RRDA, assets, and income are exempt from all taxes and special assessments of the state and political subdivisions. The RRDA is not subject to the jurisdiction of the Alaska Transportation Commission.

RREA's are to be established only in the unorganized borough. The boundaries will be the same as the Rural Education Area Authority in which the RRDA is located. Upon municipal incorporation of the geographical area in which the RRDA is located, the RRDA will become integrated into the newly formed borough or home rule municipality. The newly formed borough or municipality may not levy taxes to pay the indebtness of an RRDA that is absorbed by the local government.

M E M O R A N D U M April 25, 1983

SUBJECT: Regional resource development authorities (HB 377)

TO: Represenative Barbara Lacher

FROM: James H. Lear
Legislative Counsel

You have requested our office to provide a sectional analysis of HB 377 which is an Act relating to Regional Resource Development Authorities. We offer the following information.

Section 1. Legislative findings and policy are set forth with emphasis on the need for the creation of instrumentalities in the various areas of the state with powers to borrow money to provide for the development of transportation and port facilities to encourage the development of natural resource enterprises, including mining enterprises, essential to the long-term economic growth of the state.

Section 2. This section amends AS 30 by adding a new chapter 13 pertaining to regional resource development authorities.

Sec. 30.13.010 addresses creation of an authority. An authority may only be created by the residents within the boundaries of a regional educational attendance area by petition filed with the Department of Community and Regional Affairs and a supporting statement submitted to the governor outlining the purposes and projects contemplated. If the governor determines that the goals and potential projects of the proposed authority would not be advantageous to the economic growth of the region and the state, the petition may not be submitted to the voters. However, if the governor makes affirmative findings as to the purposes and potential projects of the proposed authority or fails to submit his findings to the director of elections within 90 days, the director of elections must order an election in the area of the proposed authority if the petition is in proper form.

The election for the creation of an authority must be held between 30 and 120 days after the date of the election order. If creation of an authority is approved, another election is held to choose the five initially elected members of the board of governors of the authority. The initially elected members of the board of governors serve staggered terms ranging from approximately one to three years. The director of elections supervises both elections in the general manner prescribed by AS 15 and the state bears the costs of the elections. Election materials are filed with the director of elections and the date of that filing constitutes the date of creation of an authority for all legal purposes.

Sec. 30.13.020 provides for a board of governors consisting of eight members, five of whom are elected and three of whom are appointed by the governor. The term of a regularly elected member is two years. The three members appointed by the governor must be heads of principal departments of the executive branch. The members of the board of governors elect a chairperson and a vice chairperson from among its members and a majority of the members of the board at a meeting at which a quorum is present may transact business. The board of governors may delegate powers and duties that it considers proper and may appoint officers and employ professionals and employees it considers advisable.

Subsection (e) addresses conflicts of interests that may arise when the board of governors votes on agreements to be entered into by the authority. A member may not vote if the member is a party to the agreement or has a direct ownership or equity interest, beneficially or of record, exceeding one percent in, or is employed by, a firm, partnership, corporation or association that is a party to the agreement.

Sec. 30.13.030 sets forth the purpose of an authority as being the improvement, establishment, and development of facilities in its district for transportation purposes in connection with natural resource enterprises. The purpose may be accomplished either directly or by agreement with any public or private entity or person.

Sec. 30.13.040 designates the powers of an authority. The enumerated powers are similar to those granted by statute to public corporations. The more remarkable provisions are those authorizing the authority to issue bonds and to deposit or invest its funds, subject to agreements with bondholders, and those provisions authorizing the authority to enter into

contracts or other transactions with public or private entities or persons consistent with the exercise of the other powers of the authority.

Sec. 30.13.050 sets forth certain limitations on powers of the authority. An authority does not have powers of eminent domain, taxation, land use planning, zoning, permitting, or other similar governmental powers.

Sec. 30.13.060 addresses bonds of an authority. Those provisions delineate how the authority may borrow money and issue bonds. Much of this section is standard bond language. However, subsection (f) is worthy of note. Before issuing bonds for a project under this chapter an authority must submit a description of the bond issue and an independent economic feasibility analysis of the project and expected revenues to the state bond committee. The bonds may not be issued unless the state bond committee finds that the project revenues can be reasonably expected to be adequate for payment of the principal and interest on the bonds to be issued, and that issuance of the bonds by the authority would not be expected to adversely affect the ability of the state or its political subdivisions to market bonds.

Sec. 30.13.070 addresses trust indentures and trust agreements used by an authority to secure an issue of bonds. Paragraph (1) sets forth the covenants and agreements that the authority may make with the trustee or the holders of the bonds as to use and disposition of the proceeds of the bonds, the fixing and collection of rents or other consideration associated with a project agreement, assignment by the authority of its rights in a mortgage or other security interest, et cetera.

Sec. 30.13.080 sets forth the intention of the legislature that a pledge made in respect of bonds be perfected and valid and binding from the time the pledge is made regardless of whether the resolution, trust agreement or any other instrument by which the pledge is created is recorded or filed under the provisions of the Uniform Commercial Code.

Sec. 30.13.090 clarifies that neither the members of an authority nor persons executing the bonds are personally liable on bonds of the authority. Furthermore, the bonds issued by an authority do not constitute an indebtedness of the state or local subdivision.

Sec. 30.13.100 provides protection for bondholders by stating that the state will not limit or alter the rights and powers vested in an authority by this chapter or in anyway impair the rights and remedies of the holders until the bonds and interest and expenses are fully met and discharged.

Sec. 30.13.110 exempts the real and personal property of an authority and its assets and income from all taxes and special assessments of the state or a political subdivision of the state. Additionally, interest on bonds issued by the authority are tax exempt. However, this section does not limit other provisions of Alaska law pertaining to license fees, property taxes, or excise, income or other taxes, nor does it create a tax exemption with respect to the interest of any business enterprise or other person other than the authority.

Sec. 30.13.120 specifies that the bonds of an authority constitute securities in which all public officers may legally invest in the discharge of their fiduciary responsibilities.

Sec. 30.13.130 requires that an authority provide equal use and access to the public if the authority owns, leases, or otherwise operates or controls or participates in the financing of a facility. Reasonable terms and conditions may be imposed by the authority, but the members of the authority must make a written finding concerning compliance of the facility with the provisions of this section.

Subsection (b) requires an authority to make a finding, before issuing bonds for a project, that the project and its development will be economically advantageous to the state and region, that the project would be financially feasible, and that the scope of the project is sufficient to provide a reasonable expectation of a benefit to the region and the economy of the state.

Sec. 30.13.140 declares that an authority is not subject to the jurisdiction of the Alaska Transportation Commission.

Sec. 30.13.150 provides a mechanism by which an authority is integrated into a borough or home rule municipality within one year of incorporation of a first or second class borough or a home rule municipality created within an area coterminous with the authority. This section does specify that the newly created borough or home rule municipality may not levy any

taxes to pay the indebtedness of an authority that is absorbed by the local subdivision.

Sec. 30.13.900 contains definitions that would apply in the newly created chapter. Paragraph (6) defines "transportation facilities", or "facilities", or "projects" by broadly enumerating mechanisms for transporting, handling, and storing freight and natural resource products. The definition also includes all property, rights, easements, and franchises relative to a facility but does not include airport facilities.

Section 3 provides for an immediate effective date.

Hopefully, this information is responsive to your request. If you wish further information, do not hesitate to contact us.

LEGISLATURE

Red Dog mine measure amended

by Bill White
Times Juneau Bureau

Juneau — A bill designed to spur development of the rich Red Dog zinc mine near Kotzebue underwent heavy amending Friday to assure the state doesn't make a sour multimillion-dollar investment in the project.

The bill would let each of the state's 21 Bush school districts form a Regional Resource Development Authority. Each authority could issue tax-free bonds to generate money to build mining roads and ports in rural areas.

The bonds would be paid off by charging the mining companies fees to use the roads and ports.

The bill was drafted with the aid of Cominco America Inc., which has bought production rights to the 85 million-ton Red Dog mine 90 miles north of Kotzebue.

Development of that mine, rich in zinc, lead and silver deposits, is clouded by a lack of funds to build a 55-mile road to tidewater, absence of port facilities, need for federal and state approval for its access route, and a world metals market that's nearly hit rock bottom.

But some Senate Resource Committee members, led by Sens. Arliss Sturgulewski, R-Anchorage, and Vic Fischer, D-Anchorage, questioned what protection the state would have from bad investments made by the authorities.

The committee adopted a dozen amendments to the bill Friday, before sending the measure to the Finance Committee. They include changes to:

• Require the governor to issue a finding, before an authority may be created, that the authority's projects and goals would aid the economic growth of the region and state. The governor also must find the authority is a desirable way to accomplish those goals and projects.

• Raise to 100, from 50, the minimum number of residents that may petition for a vote on the creation of an authority.

• Require the state bond committee to find a project's revenues can be expected to repay the bonds, and that the bond issue won't hurt the state's credit rating, before an authority may sell bonds.

• Set a limit of June 30, 1986, on the creation of authorities.

Those four amendments help insure the authorities make good investments, Pat Pourchot, a Resource Committee aide, told the panel members.

But environmentalists asked for stricter assurances.

The state would have little control over the debt these authorities incur, said Jay Nelson, head of the Alaska Environmental Lobby.

"If one of these organizations ever went bankrupt, the state would be obligated to bail them out (by covering their bonds), not morally or legally, but financially to protect its own credit rating," he said.

Nelson circulated a cartoon depicting a baby elephant, symbolic of an authority, at the state's front door asking for a handout. The caption reads, "If you don't feed me, I'll die in your front yard."

He recommended three alternatives to authorities.

First, new boroughs could be formed in areas that want roads and ports. The boroughs would have concerns other than just developing a mine, he said.

The state also could fund development through its business loan agency or through tax-free bonds issued by the Transportation Department.

Dan Casey, head of that department, said the administration thinks the bill's concept is good, but some changes may be needed. One concern is of user fees remaining imposed on mining companies after the bonds are paid off, he said.

Committee on Resources

April 6, 1983

Memo

To: Senator Bennett, Co-Chairman Finance Committee
Senator Sackett, Co-Chairman Finance Committee

From: Senator Bettye Fahrenkamp

Subject: CSSB 151, Regional Resource Development Authorities

As you know, the Finance Committee has recently received the above bill for consideration from the Resources Committee. This bill would authorize the establishment of authorities in the unorganized borough for the purpose of developing infrastructures for resource development projects. Funding for the developments would primarily come from the issuance of tax-exempt revenue bonds by the authority to be repaid with user fees from the developments.

In testimony and discussion before the Resources Committee several criticisms of the bill as originally drafted surfaced: 1) lack of guarantees of equal access to facilities which may be developed; 2) the possibility of proliferation of authorities throughout the unorganized borough; 3) the encouragement of less-than-sound economic projects by authorities; 4) the possibility that bonds issued by authorities may in some way create a liability to the state or add to the state's overall bond indebtedness; and 5) the possibility that the issuance of bonds by authorities might in some way affect the ability of the state or its political subdivisions to market their revenue bonds.

In response to these criticisms the Resources Committee adopted several major changes and additions to the bill including:

1) Page 2, lines 19-29, the Governor must make a positive finding that an authority's goals and projects would be economically advantageous to the region and state and that the authorit is an appropriate and desireable method of accomplishing the goals and projects prior to establishment of an authority.

2) Page 2, lines 8-11, the ability to petition for establishment of an authority expires on July 1, 1986.

3) Page 2, lines 13-14, a petition to call for an election to establish an authority must be signed by 100 persons of a district.

4) Page 4, lines 26-29, the Board of Governors of an authority shall consist of eight members, five elected locally and three Department heads appointed by the Governor.

5) Page 8, subsection (f), Prior to issuance of bonds an authority must submit an independent economic analysis of a project and its revenues to the state bond committee. The committee must find that project revenues are adequate for payment of the bonds and that the issuance of bonds would not adversely affect the ability of the state or localities to market their bonds.

6) Page 11, subsection (b), bonds issued by an authority do not constitute any liability or indebtedness to the state or political subdivision, nor can an authority pledge the faith or credit of the state or local government.

7) Page 13, subsection (a), ensures fair and equal access and fee assessements for users of facilities.

8) Page 13-14, subsection (b), an authority must find that prior to issuance of bonds that a project would be economically advantageous to the state and general public welfare and that the project is economically viable.

9) Page 14, section 30.13.150 provides that an authority would be integrated into a local government should it be established, but that an indebtedness of an authority does not constitute an obligation of the new government.

I think that these provisions adequately address the concerns that were raised. However, several other possible amendments were suggested that might further clarify the intent of this legislation which were suggested too late to be properly integrated into the committee substitute. I would urge the Finance Committeeto consider the following possible changes:

1) Changing the number of petitioners calling for an election to establish an authority from an absolute number of 100 to a percentage formula similar to other regional elections. (Attached is a possible formula suggested by the Division of Elections).

2) Any monies received by the state may not be used to satisfy bond obligations or collateral by an authority (attached are draft suggestions from the Department of Law).

3) Change a quorum of the Board from a majority to a majority plus one. (Suggested by the Alaska Environmental Lobby; see attached comments).

4) Ensure that proposed projects get fair and equal consideration within a district by an authority. (See attached language submitted by the Alaska Miners Association).

In addition, several technical changes should be made in the bill. The folling should be made to correct changes which were made by the Legal Division in the CS:

1) On page 5, lines 12-13, delete the phrase "at a meeting at which a quorum is present". This simply clarifies that a quorum constitutes a majority of the members of the board of governors.

2) On page 6, lines 16-17, delete the phrase "in accordance with the Administrative Procedure Act (AS 44.62)". This phrase was not contained in the CS which passed out of the Resources Committee and could be construed as evidence that authorities are somehow to be viewed as quasi-agencies of the state.

3) On page 8, line 25 delete "AS 30.13.060(f)(1)" and insert in lieu thereof "this subsection". There is no subsection (f)(1).

4) On page 15, line 18, add a comma after the words "rolling stock".

Finally, I would call your attention to the Letter of Intent which was passed out with the bill. This further clarifies that it is the intent that the bonds issued by the authorities not constitute any liability to the state or local governments or taxpayers in a successor government.

I would be happy to appear before your Committee to further explain this legislation and the actions of the Resource Committee. In addition, I have asked my staff to provide whatever assistance you may need on the bill. I remain convinced that this legislation could be of tremendous value in facilitating the development of resource projects in our state which would have tremendous economic and social benefits to regions as well as the state. I would hope the Finance Committee could expedite its consideration of this important legislation.

Senator Vic Fischer
Alaska State Legislature
Pouch V • Juneau, Alaska 99811 • (907) 465-4954

March 22, 1983

TO: Senator Bettye Fahrenkamp
Chair, Senate Resources Committee

FROM: Senator Vic Fischer

Thank you for the opportunity to consider possible amendments to SB 151.

Amendment 1 does not entirely reflect my concerns about the possibility of a proliferation of authorities. The intent of my suggestion was that the Governor be required to find that the creation of a particular authority is necessary and desirable. This would seem to require a new subsection in Sec. 2 to require submittal of a statement to the Governor to include (1) purpose of the proposed authority, (2) the goals it would seek to meet, (3) analysis of the options other than an authority for obtaining the desired goals, and (4) justification for the choice of an authority over other options for meeting the stated goals. This step would logically come at the same time as petition to C&RA. The Governor would then be required to find that (1) meeting the proposed authority's goals would be advantageous to the state and the region's economic growth, and (2) the authority's creation would be necessary to obtain those goals.

In light of the attached article, which describes the problem of independent authorities and corporations incurring debt for which the state may become at least morally liable, I would like to suggest a further amendment. This would be a new section requiring the Commissioner of Revenue to approve the sale of revenue bonds by an authority. The authority would submit a statement detailing (1) the prospectus of the bond issue and (2) an economic feasibility analysis of the proposed development project and its expected revenues. The Commissioner of Revenue would then be required to find that (1) the project appeared to be capable of producing adequate revenues to repay the bonds and (2) bonds of the authority would not be expected to negatively affect the ability of the state or its subdivisions to market their own bonds and meet their financial obligations.

I'm sure that the legal people can put these suggested amendments into their proper form. Feel free to contact either me or my staff if you need further clarification.

FORMULA DETERMINATIONS : GATHERING OF SIGNATURES SB 151

FORMULA 1

The most direct formula for the creation of Regional Resource Development Authorities in the REAA districts is the initiative formula presently in use for REAAs and CRSAs under AS 29.28.070 (b).

In REAAs smaller than 7500 residents, this would require signatures in a number equal to 25% of the qualified voters voting in the last General Election or special election called for the purpose of electing city, borough (or REAA) officers.

In REAAs greater than 7500 residents, the formula would be 15%. There is no requirement for gathering signatures in any set percentage of the villages in an REAA, such as 50% or 66%.

FORMULA 2

Under 15.25.170, Alaska Election Laws,"Required number of signatures for a district-wide office", petitions for the nomination of a state representative or senator require signatures equal in number to 3% of the number of votes cast in the respective election or senate district in the preceding general election, provided that no nomination petition is required to contain more than 200 or less than 50 signatures for any district.

The same requirements apply for the nomination of candidates not representing a political party, under AS 15.40.440.

Note:
The requirements for a statewide initiative are more demanding; a petition must be signed by qualified voters equal in number to 10% of those who voted in the preceding General Election and resident in at least 2/3 (two-thirds) of the election districts of the state. This is cited in AS 15.45.140. The same requirements hold for the state-wide referendum, contained in AS 15.45.370.

In any formula adopted by the final legislation, there should be provision for review of the signatures on the petition, notification of the proper or improper filing, and provision for supplementary petition filing where necessary, as is currently authorized in both the municipal statutes, AS 29, and the State Election Laws.

from Mary Lou Meiners,
DN. Elections 3-23-83

Senate Resources Committee
Beltz Meeting Room, 3 pm

Friday, March 25

SB 151, Creation of Regional Resource Development Authorities

FORMULA DETERMINATION, Gathering of Signatures

As now proposed in the legislation, 50 signatures would be required from any REAA district to petition for a special election to create a Regional Resource Development Authority (RRDA). After that election, another 50 signature petition would instigate a second election for voting on board members for the new RRDA. The signatures for the petition could be gathered from any one village in the REAA area, proposing an election for the entire area.

A new formula for the gathering of signatures could be devised from elements of present law that would still give equitable access to the ballot, yet more fully inform and involve the residents of the entire area that new elections and an RRDA are proposed.

FORMULA PROPOSAL

Using the Initiative and Referendum formula for municipalities and service areas, AS 29.28.070, this would require that in each REAA (except #4)that signatures be gathered equal to 25% of the number of voters voting in the last REAA election. This would be a greater task than the gathering of 50 signatures, yet give a better measure of the RRDA acceptance in the service area.

To insure that signatures are not gathered from one town or village, an element of the statewide initiative requirements should be incorporated, requiring that signatures be gathered from more than one village, except in REAAs that are composed of just one village. Not to be prohibitive, this section could read, "..with signatures secured from voters residing in more than one village area within an REAA district, except those REAAs composed of one village area."

Finally, an element of AS 15.25.170 could be incorporated to give the dimensions of the signature gathering task; requiring that any petition requesting a RRDA election contain no less than 50 valid voter signatures.

In summary, an RRDA election petition would be based on the present initiative statute for municipalities, AS 29.28.070, would contain signatures of voters from more than one village area within an REAA district, and have no less than 50 valid voter signatures from the REAA district.

Finally, in any formula adopted by the legislation, there should be a provision for review of the signatures on the petition, notification of the proper or improper filing, and provision for supplementary petition filing where necessary, elements that are currently authorized in both the municipal statutes, AS 29, and state election law, AS 15.

LETTER OF INTENT

SENATE RESOURCES COMMITTEE

CSSB 151 (RES)

It is the intent of the Committee to authorize the establishment of regional authorities which will have the ability to issue tax-exempt revenue bonds for the purpose of enhancing the development of resource enterprises which would contribute to the economic growth of the State. It is the intent of the Committee that the authorities established pursuant to this legislation would not create any financial liability or obligation by the state for bonds issued for resource enterprises. Nor is it the intent that the issuance of any such bonds by authorities adversely affect the ability of the state or any of its political subdivisions to market their own bonds. Rather, to the maximum extent possible, liability for bonds issued rest exclusively with the regional authority and the specific resource enterprise involved, not the state, successor boroughs or other municipalities or other projects or citizens in the region or state.

SB 151

Senate

Committee on Resources

1) Senator Fischer and Senator Sturgulewski expressed concern that the legislation could create a proliferation of authorities throughout the unorganized borough, not all of which might be well thought out, economically-sound entities. One possible safeguard which was discussed was to require a finding by the Governor that the project developments would be economically advantageous to the state and the general public welfare and other positive findings.

A possible amendment to the committee substitute for SB 151 to achieve this purpose might be the following:

On page 8, add to section 30.13.050 the following new subsection:

"(f)Prior to issuing bonds for any project under this chapter:

1) An authority shall submit to the Governor a description of the project and its expected impacts on regional and statewide economies; and

2) The Governor must find that the project and its development will be economically advantageous to the state and the general public welfare and will contribute to the economic growth of the region within which the authority has jurisdiction. Failure to make a finding within 60 days of receipt of a project description shall constitute an affirmative finding for the purposes of issuing bonds for the project."

2) Senator Mulcahy expressed concern that the petitioning requirements for calling for elections were not restrictive enough to prevent possible "frivolous" elections and the creation of many ill-conceived authorities.

A possible amendment to strengthen the petitioning requirement might be:

On page 2 in Sec. 30.13.010 make the following change:

"The petition must be signed by [50] 100 residents of the proposed area of the authority."

3) The Division of Elections raised the question of expense of the elections involved. One change to encourage consolidated elections might be:

On page 2, in Sec. 30.10.010 (b) make the following changes:

"The election must be held not less than 30 or more than [90] 120 days after the date of the election order. To the extent feasible and practical the election shall be held on a day coincidental to other regional elections."

4) Senator Fischer raised a question on the language which would limit the succession of an authority to only a first or second class borough. He suggested that all home-rule municipalities should also be included as in the following possible amendment:

On page 15 in Sec. 30.13.150 make the following change:

"Whenever a borough of the first or second class or a home rule municipality is created with an area coterminous with the area of an authority, the authority shall be integrated into the borough or home rule municipality within one year of incorporation. On integration the borough or home rule municipality succeeds to all the rights, powers, duties, assets, and liabilities of the authority, provided, that, any indebtedness of an authority does not constitute a general obligation of the borough or home rule municipality payable from taxes levied by the borough or home rule municipality."

5) There may be cases where a borough or a home rule municipality might be created which would encompass the entire region of an authority but whose boundaries would be outside and not coterminous with those of the authority (i.e. the borough would be larger than the authority). Staff would recommend the following possible amendment:

In the above amendment number 4 change the appropriate line to read:

"...is created with an area coterminous with or inclusive of the area of an authority..."

6) Senator Fahrenkamp and Senator Fischer had questioned as to whether or not a termination date for the bill might be a check on authority proliferation and offer the legislature a chance to review the legislation in several years. A possible amendment might be the following:

On page 4 in section 30.13.010 add the following new subsection:

"(g)The authority to petition and hold elections for the purpose of creating an authority under this section shall cease on June 30, 1986.

7) Senator Ziegler suggested that such authorities may be desirable in some regions of the state such as Southeastern where infrastructure development may be for renewable resource development such as fishing or timber harvesting. The current language on page 1, section 1 speaks to only "nonrenewable" resources. A possible amendment might be:

On page 1, in section 1, part (1), (2) and (3) after the word "nonrenewable" add the words "or renewable".

Alternatively, in the above subsections the word "nonrenewable" could be deleted so that the findings would simply address "natural resource enterprises".

DATE: February 15, 1983

A question has been raised under Article X of the Alaska Constitution concerning the validity of a draft bill prepared by this office to create regional transportation authorities. The draft bill would authorize the residents of the regional education attendance areas (REAAs) to form transportation authorities to serve their areas by petitioning the Department of Community and Regional Affairs. Following the petition, an election would be held in the particular REAA to decide whether the authority should be created. If the voters of the REAA approve formation of the authority, another election would be held to elect members of the board of directors of the authority. In addition to the elected members of the board, the governor would appoint two commissioners to serve on the board. Once formed, the authority would have the ability to issue bonds to finance transportation facilities in connection with resource development projects. It is worth noting that the authority would not have powers of taxation, eminent domain, planning, platting, zoning, or other land use powers, or other powers beyond those necessary to accomplish its purpose of financing transportation facilities. Since an authority could only be formed in an REAA, the jurisdiction of an authority would be limited to a specific area of the unorganized borough.

The constitutional question, it is believed, arose largely because the draftman of the bill stated at a hearing before the Joint House and Senate Resource Committees on February 9, 1983, that the bill provided for "limited local government" by the proposed authorities. We are convinced, however, that the powers to be granted to the proposed authorities are not "local government powers" contemplated by Article X, section 2, to be vested in boroughs and cities and that the creation of the proposed authorities is within the discretion of the legislature under Article X, section 6.

There are three pertinent sections in Article X; they are Sections 1, 2, and 6. These sections state:

> Section 1. The purpose of this article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions. A liberal construction shall be given to the powers of local government units.
>
> Section 2. All local government powers shall be vested in boroughs and cities. The State may delegate taxing powers to organized boroughs and cities only.
>
> Section 6. The legislature shall provide for the performance of services it deems necessary or advisable in unorganized boroughs, allowing for maximum local participation and responsibility. It may exercise any power or function in an unorganized borough which the assembly may exercise in an organized borough.

The initial question is whether the power to provide financing for transportation facility projects in connection with natural resource development is a "local government power" such that granting the power to a public corporation would violate Section 2 by vesting a "local government power" in an entity other than a borough or city.

The Minutes of the Constitutional Convention (herein "Minutes") reflect little or no discussion of the nature of "local government powers". However, there is considerable discussion of the results the delegates intended to avoid by requiring that such powers be vested in boroughs and cities. The delegates were well aware of the proliferation in other states of local entities which exercised governmental powers. These local entities were autonomous from the municipalities within which they operated, and their powers weakened the ability of the municipalities to coordinate and control governmental activities. The results, which the delegates sought to avoid, were conflicts among the various autonomous entities, as well as between the entities and the municipalities, overlapping jurisdictions, and multiple taxation uncontrolled by a single governmental body. By placing local government powers in a

borough or city, the delegates felt that a single body -- the assembly or council -- would be able to orchestrate the activities of the various municipal departments and the activities of the boards and commissions established to administer special service areas within the municipality. The exercise of the governmental power on a local level by a single body would avoid the conflicts resulting from the exercise of various governmental powers by a number of bodies within the same overlapping jurisdictions.
In this regard, the following comments of the delegates reflect the concerns summarized above and the intent behind Section 2 (page numbers are from the Minutes):

> TAYLOR: I think the purpose of this article is to simplify our governmental procedure and also to prevent an overlapping of government functions. Now, we have two governmental functions set up here, the cities and the boroughs. I think that is plenty. They can provide for everything including the schools. So now, if the camel gets his head in the tent by adopting this amendment [to add school districts to the list of entities in which local goverament powers shall be vested under Section 2] as proposed by Mr. Johnson, he probably will be all in the tent, bringing with him the amendments that establish public utility districts, health districts, public improvement districts, and we will be right back to our old method of numerous taxing bodies which we want to get away from. Now, with the borough and the city I don't believe that there is any reason at all but what the taxing purposes for schools can be set up something along the same lines as it is now.

Pages 2669 -- 2700

. . . .

> HILSCHER: Bearing on this particular subject, a conversation I had last year with an editor of a paper in the State of Washington, a city of about 15,000, he informed me that they had 11 taxing jurisdictions in the particular area in which he lived and if I remember some of them, they were welfare, hospitals, sanitary, harbor, and even a trunk sewer system, and he said that was the one thing that was causing them the greatest worry of

all and that was the spread of the taxing power. I am against it [the amendment vesting local government powers in school districts].

Page 2701

. . . .

V. RIVERS: [I] am trying to separate just the idea of schools and trying to hold to the principles as to whether the principle of the disbursing and the approvals of budgets shall lie in the body of one general governing body of government or whether you shall have an autonomy without any co-relation between the other activities of government -- whether you shall have an autonomy in just one function and one activity of government. I think that that covers what I have to say except that on the broad principle, I think you can have better government at less expense by correlating the taxing activities and channeling them through one body with one set of appraisers, one set of collectors, one set of condemnors and tax sale experts, and having that money go into one fund for distribution by a general body elected by all of the people no matter what level of government we operate at.

Page 2703

. . . .

LONDBORG: I have gone along with the Committee in their general thinking of trying to get rid of this overlapping of taxes and [sic] has been mentioned, 10, 12, 15 different agencies, each with a blank check to write all they wish to write on it.

Page 2704

. . . .

HINCKEL: I would like to ask a question if I may. Your interpretation of Section 2, also, that the borough in an organized borough would probably be the one and only taxing authority? That is, they would handle all of the taxes, and only in unorganized boroughs would the state tax? Would

that be the way to expect the thing would work out?

V. FISCHER: Yes. We would assume a consolidation there.

Page 2707

. . . . .

ROSSWOG: Our main intention was to try not to have a lot of separate little districts set up, you know, handling only one problem and try to combine them.

Page 2715

. . . . .

These concerns were concisely stated several years after the convention in a book written by a former delegate to the convention. Although without legal value in determining the delegates' intent, the following passage from Alaska's Constitutional Convention by Victor Fischer (University of Alaska Press, 1975), page 119, is helpful as a precis of the delegates' comments:

> As seen by delegates, the inadequacies of conventional counties were limited functional jurisdiction, frozen boundaries, an overabundance of constitutionally established elective offices, inadequacy of fiscal powers, and lack of specifically local (as against state) governmental authority. They noted also that numerous special districts were being created to fill service gaps left by counties and municipalities, resulting in a multiplicity of overlapping tax jurisdictions.

It should be apparent that the intent behind Article X, Section 2, was not to make cities and boroughs the sole repositories of all powers which could possibly be exercised by a city or borough. Such an interpretation would virtually prohibit the state from acting within an organized borough or city. It would cast serious doubt on the validity of any state action taken on a regional basis. Moreover, it could even be said that most non-profit corporations would be prohibited from conducting business in the state, since a city or borough would be capable of exercising their charitable or eleemosynary powers.

The more rational and more likely interpretation is that the delegates intended to vest those powers which are peculiarly "governmental", and which are provided on a local basis, in cities and boroughs. The distinction between local "governmental" powers and other ("proprietary") powers exercised by municipalities has long been recognized. McQuillin, in his treatise, Municipal Corporations (3rd Edition), describes the factors denoting "governmental" functions performed by municipalities:

> [A]mong the factors denoting a governmental function is the fact that an activity was historically engaged in by local government, that it is uniformly so furnished today, that it could not be performed as well by a private corporation, that it is not undertaken for profit or for revenue, and that it is not within the imperative public duties imposed on a municipality as agent of the state.

Volume 2, section 10.05, page 743 (footnote omitted). In describing municipal "proprietary" functions (which McQuillin describes as "private"), McQuillin states:

> Private, municipal, proprietary functions and powers are those relating to the accomplishment of private corporate purposes in which the public is only indirectly concerned, and as to which the municipal corporation is regarded as a legal individual.... All functions of a municipal corporation not governmental have been said to be private.

Volume 2, section 10.05, page 744 (footnotes omitted).
The Attorney General's Office has described, without expressly recognizing, the distinction between governmental powers and proprietary powers. In considering a statute under the municipal revenue sharing program which would have allowed payments to be made by the state to a "Native village government for a village which is not incorporated as a city", Assistant Attorney General Rodger W. Pegues discussed the provisions of Article X, sections 1 and 2. After reviewing the history and purpose of those sections, Assistant Attorney General Pegues stated in his opinion:

> The use of traditional village councils or IRA councils to provide local government services is at odds with the constitution's provisions on local government. The public services they would perform are those which local governments perform.

Op. Att'y Gen., April 27, 1981, p. 3. As noted earlier in this memorandum, two of the factors denoting governmental powers are "the fact that an activity was historically engaged in by local government" and "that it is uniformly so furnished today". Assistant Attorney General Pegues then acknowledged the difference between governmental and proprietary functions, again without expressly so designating them, by stating:

> This is not to say that the state cannot contract with a racially (or religiously) exclusive group to provide public services or manage a public facility on a non-discriminatory basis for all the residents of a community. On a limited basis, therefore, grants can be made to IRA councils in their capacity as business corporations to provide some public services. The state constitution, however, bars the de facto establishment under state law of these councils as the local governments of Alaska's villages.

Id. at pages 3 and 4. Thus, provision for the performance of essentially proprietary services in the unorganized borough by a private corporation, in the opinion of the Attorney General's Office, would not violate the constitution.

The distinction between "governmental" and "proprietary" functions was also set out in Britt v. City of Wilmington, 73 S.E. 2d 289 (N.C. 1952), as follows:

> So then, generally speaking, the distinction is this: If the undertaking of the municipality is one in which only a governmental agency could engage, it is governmental in nature. It is proprietary and "private" when any corporation, individual, or group of individuals could do the same thing.

73 S.E. 2d at 293 (citation omitted).

The financing of transportation facilities in connection with resource development projects is not an activity historically engaged in by local governments and is certainly not uniformly furnished by local governments today. It is a function which could be, and undoubtedly is, performed by private corporations. In performing this function, the acts of the transportation authorities would only indirectly concern the public at large. Under McQuillin's description, this power is clearly "proprietary" and not "governmental". The operation of a transportation facility has been found to be a proprietary function (Albuquerque v. New Mexico State Corp. Commission, 605 P.2d 227 (New Mexico 1980)), and the financing of privately owned facilities, as may be the case with the authorities, is characterized as "private activity" financing in the conference report accompanying the Tax Equity and Fiscal Responsibility Act of 1982. Bonds of local governments or public corporations issued for these purposes enjoy tax exemption only if issued for certain narrowly defined purposes or in limited amounts.

It is the exercise of the "governmental" powers by more than one municipal unit with the same or overlapping jurisdictions which results in the kind of conflict and duplication the delegates to the constitutional convention sought to avoid. Placing in the proposed transportation authorities the power to assist in the financing of private projects without more (that is, without placing in them any power of eminent domain, any power of taxation, any power of regulation, or any other "governmental" power) could hardly lead to the problems perceived by the delegates. If authorizing the creation of such entities with such limited powers is a violation of Article X, section 2, then the state must carefully review its corporations code, in which authorization for the incorporation of such entities by private individuals is also provided.

Even if the powers contemplated for the proposed authorities should be considered "local government powers" for purposes of Section 2, the legislature nevertheless derives authority for the creation of such authorities in the unorganized borough from the provisions of Article X, section 6. Section 6 expressly directs the legislature to provide for the performance of services it deems necessary or advisable in unorganized boroughs and, in connection with those services, further directs the legislature to allow for maximum local participation and responsibility. The use of the language,

"deems necessary or advisable", was expressly considered by the delegates to clarify their intention to allow wide discretion in the legislature in determining what services to perform. Delegate Ralph Rivers explained the significance of the words:

> The point was made yesterday that where it says, "the legislature shall provide for the performance of necessary functions," and somebody said, "Who decides what is necessary?" and the Committee said it would take it under advisement. I pursued the point a little bit and drafted this language, "for the performance of services it deems necessary or advisable". In the first place, it specifies that the legislature is the one who shall use its discretion; it clears up that point and also improves the context a little.

Minutes, Part 4, page 2720. There was no intent that, in order to receive services which could be performed by a local government unit, the unorganized area should have to organize into a borough or city. Provision of services by the legislature until such time as organization occurred was clearly foreseen. Delegate Rivers further stated:

> Speaking of unorganized areas where they don't have any self-fun[illegible]ioning. [sic] Here the state would perform those services that the legislature deems necessary or advisable until such time as the area does get organized.

It cannot reasonably be disputed that, within the unorganized borough, the legislature may provide for the services contemplated in the proposed legislation. The local election of members of the board of directors of the proposed authorities simply complies with the dictates of Section 6 to allow for maximum local participation and responsibility.

It should be emphasized that Section 6 authorizes the legislature to provide for services in the unorganized borough; it does not require that the legislature or the state actually perform the services. This point was discussed at the convention, as reflected in the following dialogue between Delegates Taylor and McLaughlin at page 3609 of the Minutes:

TAYLOR: Mr. McLaughlin, isn't it a fact that that [the phrase "shall provide for the performance of services"] would possibly mean that the legislature would provide a manner in which unorganized boroughs could provide their people in that borough with these certain services? The legislature is not going to provide the services or performance of services, are they?

McLAUGHLIN: When they say "shall provide for the performance of services", it means they shall make provision for them.

TAYLOR: Then in an unorganized borough then, if they were in need of garbage services, the legislature would hire garbage men? Is that right?

McLAUGHLIN: It doesn't necessarily mean that. There are two possible meanings. If we said the legislature "shall" provide the services, that would be one thing; but if we say the legislature shall provide for the performance of services, I think that that means another thing. That is, they can set up the rules and conditions and circumstances under which the services will be provided.

It was the latter phrase ("shall provide for the performance of services") which the delegates chose. The reasonable conclusion, based upon Delegate McLaughlin's explanation, is that the state need not perform the services but can "set up the rules and conditions and circumstances under which the services will be provided."

For the foregoing reasons, we are convinced that (1) the powers granted to the proposed authorities are not "local government powers" which must be vested in cities or boroughs; and (2) the creation of the proposed authorities is well within the authority of the legislature to provide for services in the unorganized borough, allowing for maximum local participation and responsibility.

ANALYSIS OF IMPACT FOR HB 396

"An Act relating to certain audit and financial statement requirements."

The following are the numbers of cities or communities and the total dollars that would be affected by Sections 2 and 3 of HB 396.

Section 2

31 second class cities received over $100,000 in combined funding in FY 82 under the State Revenue Sharing, Municipal Assistance, and Raw Fish Tax programs. This funding totalled $5,016, 273. A list of these cities is attached.

Section 3

Legislative grants to named second class cities in the FY 83 budget which were $100,000 or greater totalled $17,810,000. There were 87 grants in the budget (SCSHB 148 (Fin)) which fell into this category.

There are presently 61 grants to named unincorporated communities which equal or exceed $100,000 and they total $14,040,185.

For Informational Purposes

Grants under SB 168 to unincorporated communities would not be affected by this legislation, but at the request of the House Community and Regional Affairs Committee it is provided for informational purposes. There are approximately 43 grants under this program which total $6,881,000.

Summary

Section 2--31 second class cities (SRS, MA, Raw Fish)	$5,016,273
Section 3--87 second class cities (Legislative grants)	17,810,000
61 unincorporated communities (Leg. grants)...	14,040,185
TOTAL	$36,866,458

re: HB 396 - Audit Requirements for Second Class Cities

Summary: This bill requires all municipalities to provide for annual independent audits of the accounts and financial transactions, except second class cities receiving less than $100,000 from revenue sharing, municipal assistance, and raw fish tax. Currently, no second class city is required to provide for an audit, but all other municipalities are. This bill also authorizes state agencies to require an independent audit of municipal grants for projects over $100,000. The purpose of the bill is to ensure good financial procedures and accountability.

Section 1: AS 29.23.560 lists reports that municipalities must file with the Department of Community and Regional Affairs in order to be eligible for revenue sharing payments. Currently, second class cities are required to provide only statements of income and expenditures, but with this bill would be required to provide for independent audits if they receive $100,000 or more from revenue sharing, municipal assistance, and raw fish tax.

Section 2: Chapter 48 of Title 29 is "Powers Applicable to All Municipalities". This bill amends AS 29.48.220. Post Audit to require second class cities to provide for an annual independent audit if they receive at least $100,000 from the following sources:

AS 29.88 - Revenue Sharing, Municipal Tax Resource Equilization (the main, formula part of revenue sharing)

AS 29.89 - Revenue Sharing, State Aid for Miscellaneous Purposes (roads, hospitals & health facilities, etc.)

AS 29.90 - Revenue Sharing, State Aid for Hospital Construction

AS 29.95 - Revenue Sharing, Administration (minimum entitlements & cost of living differentials)

AS 43.20.016 - Sharing of Corporate Income Tax Revenue with Municipalities (Municipal Assistance Fund)

AS 43.75.130 - Refund to Local Governments of Fisheries Taxes (Raw Fish Tax)

Section 3: This section of the bill amends the law to allow state agencies to require an audit of a grant for a capital improvement project if over $100,000 is provided through AS 37.05.315 - Grants to Municipalities, AS 37.05.316 - Grants to Named Recipients, or AS 37.05.317 - Grants to Unincoporated Communities.

DATE: May 10th, 1983

RE: House Bill 396

HB 396 was introduced by the Committee on Community and Regional Affairs upon the request of the Administration.

The intent of the proposed legislation is to require second class cities that receive more than $100,000 from various state funding sources including capital project grants, state revenue sharing, municipal aid and the raw fish shared tax, to have an independent financial audit performed annually.

Present law provides second class cities the option of preparing a financial statement or an independent audit.

May 9, 1983

POSITION PAPER

RE: HB 396
SPONSOR: House Community and Regional Affairs

Program Effects of the Bill

This bill would require second class cities receiving more than $100,000 in combined funding under the State Revenue Sharing, Municipal Assistance and the Raw Fish Shared Tax programs to prepare an annual independent audit. The bill would also allow state agencies to require an independent audit of a capital improvement project funded under AS 37.05.315-37.05.317 if the grant exceeds $100,000.

Comments

The standard of requiring second class cities to provide certified annual income and expenditure statements in lieu of a complete independent audit was enacted when the level of State aid to municipalities was substantially less. With increased appropriations to the Municipal Assistance Program and the establishment of minimum entitlements under the State Revenue Sharing there is justification for increased accountability. An audit could, in fact, pay for itself through improvements in recordkeeping and efficiency.

Similarly, projects funded under AS 37.05.315-37.05.317 which exceed $100,000 may need to be audited to insure proper accountability of the State funds. The Department would recommend at least giving the State the option of requiring an audit for these large grant projects.

Date: February 29, 1984

Re: HB 461 - Municipal Assistance Distributions

The League endorses HB 461 and urges its passage. The bill would change the existing Municipal Assistance Program to provide for the disbursement of municipal assistance funds to all municipalities on February 1 of each year.

Currently municipalities whose fiscal years do not coincide with the calendar year are penalized by having to wait for four months. Municipalities depend on municipal assistance funds to provide needed services while holding down taxes. In addition to waiting longer for the money unnecessarily because of a local budget decision, these municipalities lose the potential interest on that money during the four month period.

The League supports HB 461.

POSITION PAPER

RE: HB 461
SPONSOR: Representative Grussendorf

PROGRAM EFFECTS:

The bill would provide for all municipalities to receive Municipal Assistance distribution on February 1 each year. Only municipalities with calendar fiscal years presently receive this early payment. The Municipal Assistance Program is administered by the Department of Revenue; however, because this Department works closely with municipalities throughout the State, it has been asked to comment on this bill.

COMMENTS:

The timing of the distribution of State aid to municipalities is an important consideration, particularly in this era of stagnant or declining State revenues. The date when funding is made available affects municipal cash flow management and can allow municipalities to get more use out of the limited State dollars shared with them.

Many municipalities believed they were unfairly and arbitrarily penalized under the dual payment formula that was enacted in 1981 (Chapter 51, SLA 1981). This statute change allowed municipalities that were on a calendar fiscal year to receive their Municipal Assistance funding February 1, four months earlier than all other municipal recipients. This gave these selected municipalities the use of their money for 120 days before the other municipalities saw any of their funding. The basis for this dual payment plan, the attempt to increase predictability and provide the funds at the most optimum time, have not justified the basic inequity of the formula.

House Bill 461 will correct this dual payment plan and allow for all municipalities to have their Municipal Assistance funding distributed on February 1. This is more equitable and, therefore, this Department supports this legislation as introduced by Representative Grussendorf.

House of Representatives

January 10, 1984

Ms. Shirley Minnish
Department of Revenue
Accountant Technician II Shared Revenue
MS 0400
Juneau, Alaska 99811

Dear Ms. Minnish:

Enclosed you will find a copy of House Bill 461 by Representative Grussendorf relating to distributions from the municipal assistance fund. The effect of this legislation is to treat all boroughs and cities equitably concerning the distrubitions of municipal assistance money. It would allow all boroughs and cities to recieve their municipal assistance funds at the same time, February 1 of the state fiscal year for which the appropriation to the fund is made.

Representative Grussendorf would like you, or someone else in the Department who is familiar with the municipal assistance fund, to comment on HB 461. He would also like a list of the cities and organized boroughs who are eligible for municipal assistance monies and when they have been receiving them.

Thank you for your time and consideration.

Sincerely,

Kate Tesar

Juneau, AK 99811

Dear Ms. Tesar:

Attached is a list of the cities and boroughs receiving Municipal Assistance funds. This list indicates when the cities would receive their sharing as required by AS 43.20.016.

We have not received a resolution stating operating year for those cities and boroughs with a check mark. The sharing date for them will be based on their FY 83 resolution.

A fiscal note is being prepared and will be forwarded.

Sincerely,

Robert D. Heath

Analysis for HB 461

HB 461 proposes three changes to AS 43.20.016, the statute which establishes the Municipal Assistance Fund and provides for distributions from that fund to qualifying cities and boroughs:

1) Reference to "revenues received under AS 43.21" is removed. Since AS 43.21 has been repealed, this would appear to be a house-cleaning amendment only, and in no way affects future appropriations, since the Legislature is free to appropriate any amount.

2) The change on line 18 and 19 is a technical wording change only, and does not affect the program.

3) The most significant change is to the date(s) of distribution. HB 461 provides for all distribution to be done on February 1 each year. This change will have no administrative effect on the Department of Revenue. Currently the total effort is roughly several days, and most of that takes place just before the February 1 distribution.

The estimates reflect the loss of General Fund interest earnings which the state would forego to municipalities if the municipal assistance distribution of June 1 was changed to February 1. The estimates were computed using the following assumptions: a 9 percent annual interest rate was applied, the full 30 percent was appropriated per formula, and population figures were held constant.

Dear Sirs:

Enclosed is our Resolution No. 83-239 requesting municipal assistance funding.

I appreciate this funding, but must again mention my objection to the discriminating law that allows some governments to receive this funding four months earlier than other governments simply because of varying fiscal years start dates. Makes no sense.

Sincerely yours,

Richard Anderson
Finance Director

CITY AND BOROUGH OF SITKA

RESOLUTION NO. 83-239

A RESOLUTION OF THE ASSEMBLY OF THE CITY AND BOROUGH OF SITKA REQUESTING MUNICIPAL ASSISTANCE FUNDING FROM THE STATE OF ALASKA

WHEREAS, A.S. 43.20.016(a) requires the governing body of a municipality to approve a resolution requesting municipal assistance funding; and

WHEREAS, this resolution must be submitted to the Department of Revenue or the Department of Community and Regional Affairs; and

WHEREAS, the City and Borough of Sitka has a fiscal year beginning July 1 and ending on June 30; and

WHEREAS, the City and Borough of Sitka is desirous of receiving municipal assistance funding;

NOW, THEREFORE, BE IT RESOLVED that the Assembly of the City and Borough of Sitka by this resolution hereby requests distribution of funding from the municipal assistance fund to the City and Borough of Sitka by the Department of Revenue on the date required by law.

PASSED, APPROVED, AND ADOPTED by the Assembly of the City and Borough of Sitka, Alaska on this 27th day of SEPTEMBER, 1983.

105 MUNICIPAL WAY, SUITE 301
JUNEAU, ALASKA 99801

1984 POLICY STATEMENT

The Alaska Municipal League is a voluntary, non-profit nonpartisan organization whose member cities, boroughs, and unified municipalities represent approximately 95% of Alaska's population. The League provides a forum through which local government officials may assist each other in the solution of municipal problems and may express their common concerns to state and federal officials. A major objective of the League is to advance the interests and well-being of the people residing within the state by promoting the betterment of every aspect of local government in Alaska.

This 1984 municipal statement was adopted November 5, 1983 by the delegates attending the Alaska Municipal League 33rd Annual Local Government Conference in Juneau. It represents the collective philosophy, goals, responsibilities, and ideals of Alaska's local government officials. Items included in the statement have been reviewed and debated for several months by municipal officials who are concerned on a day-to-day basis with the many complex problems facing local governments in Alaska. The statement is a guide to the priority concerns of AML member municipalities.

Alaska MUNICIPAL League

GINNY CHITWOOD
EXECUTIVE DIRECTOR

105 MUNICIPAL WAY, SUITE 301
JUNEAU, ALASKA 99801

(907) 586-1325

school foundation, and school construction programs and that the legislature begin setting aside funds in FY85 so that the program may be fully implemented at the earliest possible date.

6. Criteria Based Budgeting: The League supports criteria based budgeting systems and encourages the administration to notify the public and local governments of the proposed criteria and to consistently follow this system once finalized through executive, legislative, and local government cooperation.

C. MUNICIPAL ASSISTANCE/REVENUE SHARING PROGRAMS

1. Consolidation of Municipal Assistance and State Revenue Sharing Programs: The League endorses the consolidation of the current Municipal Assistance and State Revenue Sharing Programs together with the funding of the consolidated program at a level of at least 8% of the prior year's state operating budget so that municipalities can continue to provide important, needed services while holding down taxes.

2. State Revenue Sharing: (a) If the Legislature does not consolidate the current State Revenue Sharing and Municipal Assistance programs, the League supports annual increases in the State Revenue Sharing Program. The annual appropriation by the Legislature to the State Revenue Sharing Program should include an increase of the FY 84 legislative appropriation based on such criteria as state population, inflation, cost of local government services, and other timely considerations.

(b) In those cases where legislation is approved increasing the state revenue sharing entitlement for specific recipients or for a specific purpose, the League advocates that the total funding for state revenue sharing be increased accordingly in order to preclude the dilution of funding to other recipients.

(c) The League supports an increase in the state revenue sharing minimum allocation to $100,000 for each municipality and $50,000 for each eligible unincorporated community.

(d) The League supports continued full state funding for road maintenance at levels determined by the First Session of the 11th State Legislature and adjusted annually to reflect increased cost of maintenance.

3. Municipal Assistance: (a) If the Legislature does not consolidate the current State Revenue Sharing and Municipal Assistance Programs, the League supports the funding of the FY 85 entitlement at the statutory level of at least 30% of the FY 84 corporate income tax proceeds.

(b) The League further endorses a change to the existing Municipal Assistance Program that would provide for the disbursement of municipal assistance funds to all municipalities on February 1 of each year.

4. FY 84 Supplemental Appropriation: The League supports the supplemental appropriation of $9.4 million FY 84 Municipal Assistance revenues to fully fund the entitlement at the level authorized by state statutes. The

Presidential Party Primary Election (repeal of provisions)

HOUSE BILL NO. 459, by Reps. Ward and Martin. Would repeal the provisions of law that relate to the presidential party primary election: AS 15.13.011 (State Election Campaigns. Inapplicability to Presidential Primary), AS 15.25.220 - 15.-25.280 (Presidential Party Primary Election), and section 4, chapter 20, SLA 1980 which repeals the law creating the presidential primary on July 1, 1985. The bill also states that if this law becomes effective before March 13, 1984, the presidential party primary election scheduled for March 13, 1984 be cancelled and not be held in 1984. Provides Act takes effect immediately.

Introduced January 9 and referred to State Affairs, Finance.

Presidential Party Primary Election

HOUSE BILL NO. 460, by Rep. Lacher. See HB 459, above, identical.

Introduced January 9 and referred to State Affairs, Finance.

Revenue Sharing (fiscal/ calendar year)

HOUSE BILL NO. 461, by Rep. Grussendorf. Amends AS 43.20.-016(a) (Sharing of Corporate Income Tax Revenue with Municipalities) by deleting reference to distribution based on fiscal or calendar years. Under this bill distribution of money from the fund would be made on February 1 of the state fiscal year for which the appropriation to the fund is made (currently cities or organized boroughs with a fiscal year beginning January 1 would receive money on February 1, and all other cities and organized boroughs receive funds on June 1 of the state fiscal year for which the appropriation to the fund is made). Provides Act takes effect July 1, 1984.

Introduced January 9 and referred to Community & Regional Affairs, Finance.

Dental Hygienists (temporary licenses)

HOUSE BILL NO. 462, by Rep. Grussendorf. Adds a new section to AS 08.32 (Dental Hygienists) allowing the Board of Dental Examiners to issue without examination a temporary license to a qualified applicant who is licensed to practice in another state. The temporary license would terminate at the time notice is given of the results of the applicant's exam. The hygienist practicing under a temporary license would be subject to all other provisions regulating hygienists. Time in active clinical dental hygiene practice under a temporary license could not be credited toward licensure by credentials. Does not provide for an effective date (becomes effective 90 days following Governor's signature).

Introduced January 9 and referred to Labor & Commerce, Health, Education & Social Services.

Appropriation (special) (Whittier prison)

HOUSE BILL NO. 463, by Reps. Furnace and Cowdery. Makes a special appropriation in the amount of $25 million to the Department of Health & Social Services to construct a prison in Whittier. Provides appropriation is for a capital project and is subject to competitive bidding requirements. Provides Act takes effect immediately.

Introduced January 9 and referred to Health, Education & Social

CHAIRMAN

Public Employ. Retirement (earlier service credit)

HOUSE BILL NO. 254, by Rep. Koponen. Amends law governing credited service for employment with the state or territory prior to January 1, 1961. Current law (AS 39.35.360) provides that an employee who was employed before January 1, 1980 who completes three years of credited service with the state after January 1, 1961 for which the employee makes retroactive contributions is entitled to credited service (without making retroactive contributions) for service rendered (1) before January 1, 1961, as an employee of the state or former Territory of Alaska; (2) before January 1, 1961, as an employee of the U.S. government in Alaska, excluding military service; or (3) after January 1, 1961, as a peace officer, correctional officer, or fireman of a participating political subdivision of the state.

The bill would allow vested or retired members who are not eligible to receive credited service for employment prior to January 1, 1961 under (1) and (2) above, to receive credited service if they elect to do so within a specified time frame and make retroactive contributions. The contributions would be in the amount of 4-1/2% of the compensation earned during the employment for which credited service is claimed plus compound interest at a rate prescribed by regulation from the date of the earlier service to the date of making the retroactive contribution.

Provides Act effective July 1, 1983.

Introduced March 11 and referred to State Affairs and Finance.

Residential Property Tax Exemptions (municipal)

HOUSE BILL NO. 255, by Rep. Malone. Would repeal the $10,000 limit on municipal tax exemptions for residential property contained in AS 29.53.025(a). That portion of the law authorizes municipalities to exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election. The bill repeals: "An exclusion or exemption authorized by this section may not exceed $10,000 for any one residence." Does not provide for an effective date (becomes law 90 days after Governor's signature).

Introduced March 11 and referred to Community & Regional Affairs.

Salmon Spawning Streams (resource permits)

HOUSE BILL NO. 256, by Reps. Flood, Uehling and Grussendorf. Transfers from the Dept. of Health and Social Services to the Dept. of Environmental Conservation responsibility for issuing permits for natural resource development projects that could have a negative impact on salmon spawning streams and waters. (Amends AS 16.10.020.) Does not provide for an effective date (becomes law 90 days after Governor's signature).

Introduced March 11 and referred to Resources.

Health Ins. Policies (limitations & exclusions)

HOUSE BILL NO. 257, by Rep. Ward. Adds new section to AS 21.41 (The Insurance Contract) relating to limitations and exclusions in health insurance policies. New section reads: "An individual or group health insurance policy that provides coverage on an expense incurred basis or an individual or group service or indemnity type contract issued by a nonprofit

POSITION PAPER

RE: HB 537
SPONSOR: Representative Grussendorf

PROGRAM EFFECTS:

Allows municipalities to exempt by ordinance, Motor Vehicles from taxation.

COMMENTS:

Currently, municipalities' handling of motor vehicles assessment ranges from full exemption to full market assessment. This optional language would enable those communities which wish to exempt motor vehicles to do so and would not affect those jurisdictions where exemption it not desired and where various other taxing arrangements are currently employed. The Department has no objection to this bill.

Rep. Ben Grussendorf
Alaska House of Representatives
Pouch V M/S 3100
Juneau, Alaska 99811

Dear Dick and Ben:

The assembly has asked that I request you to work toward and support a change in Title 29, concerning municipal taxation of motor vehicles.

The taxation provisions of Title 29 are mandatory on all municipalities, including home rule domains like Sitka. Title 29 specifically lists the tax exemptions which we may grant. The problem is that the assembly wishes to exempt motor vehicles from the ad valorem tax, but is not allowed to under the statute.

Some municipalities such as Juneau, do not tax motor vehicles under a grandfather clause in the statute [A.S.29.53.025(d)]. This option is not open to Sitka.

Other municipalities let the state collect a local fee set by statute at the time of vehicle registration [A.S.28.10.431] however, the statutory fee is overall much higher than Sitka's ad valorem rate and the assembly does not wish to burden Sitkans with increased taxes.

With the statute requiring taxation of vehicles, Sitka is forced to comply; however, collection appears to be uneconomic. We have approximately 4,000 cars in Sitka and receive $25,000 to $35,000 in taxes on them annually. Most, if not all of that revenue is offset by the cost of collection and enfcrcement. A tax which did not produce any net revenue, but only paid the

salary of the tax collector might be considered by some to be a significant comment on modern government. We just don't want that comment to be made about Sitka.

In the past we coupled tax collection with a vehicle safety inspection, but the safety inspection ordinance has been repealed leaving us with only the tax gathering function.

I would suggest that A.S. 29.53.025 be amended by adding a subsection (h) to read as follows, "municipalities may by ordinance classify and exempt or partially exempt from taxation motor vehicles".

Such an enactment would save Sitkans much time and effort if it could go into effect by January 1, 1985. Since we don't know what the fate of the proposed new Title 29 will be this year, perhaps you could not only try to get this idea into the new 29 draft, but simultaneously attempt to amend the existing statute.

The assembly would greatly appreciate your efforts and comments on this matter.

Sincerely,

Pete Hallgren

The proposed bill is strictly a housekeeping measure and has no fiscal impact on either the operating or capital budget. No additional positions are required.

The proposed bill revises A.S. 19.30 in two areas:

1) AS 19.30.127 and AS 19.30.131(a) are reworded to make allocation district boundaries coincide with DOT&PF's regional boundaries. This simplifies the allocation process of LSR&T monies.

2) AS 19.30.161 is reworded to require LSR&T projects constructed on a Federal-aid secondary route to be approved by the Commissioner of DOT&PF. This language change is needed to assure that Federal requirements for roadway width, design standards and right-of-way are met.

HB 558

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 31, 1984

The Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, Ak 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the local service roads and trails program. The bill makes minor amendments to existing statutes.

Section 1 repeals and reenacts AS 19.30.127. The current language establishes five allocation districts. The proposed language creates allocation districts by simply saying that they are identical to the Department of Transportation and Public Facilities' operating regions. When the local service roads and trails program was enacted in 1971 there were five highway districts within the Department of Highways. The allocation districts established in the statute coincided with those highway districts. Those allocation districts bear little relationship to the manner in which the state's highway program is administered today. There are currently three regional offices with headquarters in Anchorage, Fairbanks, and Juneau, respectively. This amendment will allow the program to be administered in a way that is consistent with the Department of Transportation and Public Facilities' current administrative structure. The amendment will enable the allocation districts to match any future changes in geographic organization of the department.

Additionally, sec. 1 of the bill provides a mechanism to address the problem of local governments which lie within two allocation districts. Subsection (b) of AS 19.30.127 will provide that the boundary between the allocation districts is to be adjusted to include the local government within the allocation district in which the largest portion of the local government's land is located.

Section 2 amends AS 19.30.131(a) by deleting the reference to five allocation districts. This amendment is necessary because of the new method of establishing the allocation districts found in sec. 1 of the bill.

Section 3 amends AS 19.30.161 by adding language requiring the prior approval of design standards, rights-of-way, and widths for projects which are constructed on a federal-aid secondary route, even though the project will be constructed by a local government that has assumed road powers. As a general proposition under the local service roads and trails program, if a local government has assumed road powers it is responsible for the maintenance of the facility after construction. Consequently, the state has little concern over the standards. In 1981, the nature of the program changed when AS 19.30.111 was amended to allow the use of program money on the federal-aid secondary highway system. These facilities can be quite complicated and the state is required to comply with various standards to continue to receive federal aid for the route. It is therefore appropriate that the commissioner of DOT/PF have a right of prior approval of design standards, rights-of-way, and width.

Sincerely,

Bill Sheffield
Governor

The Committee Substitute for House Bill 558 has no fiscal impact on either the operating or capital budget. No additional positions are required.

The proposed Committee Substitute revisions are as follows:

1. AS 19.30.127 and AS 19.30.131(a) are reworded to make allocation district boundaries coincide with DOTPF's regional boundaries. This simplifies the allocation process of LSR&T monies. (As in HB 558)

2. AS 19.30.131(c) and AS 19.30.141 deletes first class cities from direct allocations. Per the Department, the need for this change is to provide first class cities with adequate funds to construct local service roads. Presently, the law treats allocations for most first class cities are not adequate to construct a local service road project. This change in the law allows funding of projects for first class cities through their respective borough or unorganized borough on a priority basis.

3. AS 19.30.161 is reworded (per the Department's request) to require LSR&T projects constructed on a Federal-aid secondary route to be approved by the Commissioner of DOTPF. This language change is needed to assure that Federal requirements for roadway width, design standards and right-of-way are met.

4. AS 19.30.241(3) adds language which includes second class cities to conform with the definition of municipality in AS 29.78.010(8). Per the Department, this change is necessary to enable any political subdivision of the State to construct and maintain a project under the provisions of this act.

5. AS 19.30.241(4) adds language to the definition of local service roads to include an average daily traffic count of fewer than 400 vehicles to target LSR&T monies for projects which the LSR&T program was originally intended to do.

COMMITTEE SUBSTITUTE FOR HOUSE BILL 558 (TRANSPORTATION)

Section 1. creates allocation districts by simply saying that they are identical to DOT's operating regions.

provides mechanism to address the problem of local governments which lie within 2 allocation districts; includes the local government within allocation district in which largest portion of the local government's land is located.

Section 2. deletes reference to FIVE allocations.

Section 3. deletes first class cities from direct allocation. The need for this change is to provide first-class with adequate funds to construct local service roads. Presently, the law treats allocation of funds to first-class cities the same as home rule cities. Present allocations for most first class cities are not adequate to construct local service road project. This change in the law allows funding of projects for first class cities through their respective borough or unorganized borough on a priority basis.

Section 4. deletes first class cities from direct allocation.

Section 5. allows the use of program money on the federal-aid secondary highway system.

Section 6. adds language to include second class cities to conform with the definition of municipality in AS 29.78.010(8). Necessary to enable political subdivision of the State to construct and maintain a project under the provisions of this act.

adds language to the definition of local service roads to include an average daily traffic count of 400 vehicles in order to give alleviate the problem of LSR&T funds to be used on major urban roads.

COUNCIL ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

POSITION PAPER

HB 562

"An Act relating to service of process in cases involving domestic violence."

The Council on Domestic Violence and Sexual Assault supports HB 562 "An Act relating to service of process in cases involving domestic violence."

The Council is concerned about the right of victims to be protected by a domestic violence restraining order as soon as possible. In communities that have police departments, local police officers are in the best position to respond quickly. If there are no peace officers in a municipality, this revision in the legislation enables the court to designate any other peace officer as the server. Thus state peace officers could concentrate on areas with no other police protection and respond in a more timely manner to their needs.

Dear Representative,

Request that House Bill No. 562 be defeated. This is the bill relating to the service of domestic violence orders. This request is made for the following reasons:

1) At present all civil process is vested in the Commissioner of Public Safety. The Commissioner of Public Safety is the executive officer of all Alaskan Courts. This is a centralized system that has proven far more effective than in many states where this responsibility is dispersed among several agencies.

2) The Department of Public Safety presently has a judicial services section that performs the function of process service. This legislation would require that municipalities set up similar systems in order to carry out this function. This could result in a net increase in cost to the public.

3) As the subjects of these orders cross jurisdictional lines it would be necessary to transfer these orders from one agency to another. This builds in the possibility of error and time delays in service.

If lack of resources on the part of the Department of Public Safety is one of the primary reasons for this legislation, I would request that they be funded at a level sufficient to handle it. To change the present centralized system that has functioned well should only be done after careful consideration. It would seem ill-advised to do it on a piece meal manner.

Respectfully submitted,

Richard A. Ross

SUBJ: HB562

As per the Chairman's instructions, staff contacted the Chief of Police of Anchorage, Fairbanks, Nome, Palmer, Valdez and Juneau.

At this time, Palmer and Fairbanks have sent the attached letters, one in support, the other with a no action recommendation.

Staff spoke to aide Ruth Rockwell of the Chief of Police Bob Kauer's staff in Nome. Ms. Rockwell stated that the Nome Police Department already aid the State Police in the serving of writs within Nome's perimeters. She felt no great impact would be felt and has no problem with this bill. She stated that it could clarify and ascertain jurisidiction within the city's boundaries and that in most cases, the local police would be more effective in getting the job done quickly and with a minimum of distress to the recipient as the local police were generally more familiar figures of authority than the state police.

Valdez Chief of Police Pat Shelly's response to HB562 was that it was a good bill. For his size of community, he would prefer to have the control. He stated that generally his people were first on the scene, familiar with the people involved and the situation that had occurred. He felt the service of process gave his department a chance to follow up on the situation, to answer subject's questions concerning his rights, limitations and property and for the officer to offer to act as a mediator and arrange a convenient time for subject's personal articles to be removed from household.

Staff met with Chief of Police Joseph Ciraulo of Juneau. He offered to testify before the Committee if he was available at the time of the hearing. Staff is expecting him. However, he stated he believed that this bill would cost the city more money. Also, he believed that the state troopers has a special team and funding for this type of action. If bill was passed, he would use opportunity to gain another much needed staff position. He stated that already his department did step into help state police serve these writs. Also, it was up to the local department to enforce the writs. His personal feeling was that if

there was any way a civilian could handle this job, it would be better. The less a uniformed officer, whether they be state or city paid, was visible in these cases, the less likely the chance of more violence taking place.

Staff called the City of Anchorage; Chief of Police Brian Porter's office and Daniel Cowden with the Muni's Program Planning and Budget. Cowden said they would try to work out a probable fiscal note. The Chief's secretary said the Chief was in Juneau. Staff left messages at the meeting site and his hotel about the bill and asking for his position. No response has been forthcoming from either gentlemen. Staff did renotify Mr. Cowden and his statement was that he had notified the departments involved and they had not responsed. This led him to believe that this bill was not a priority with the city.

All the above contacts said that they would send letters of back up but none have arrived so far except the two attached.

Re: House Bill No. 562
An Act relating to service of process in cases involving domestic violence.

Dear Representative Miller:

I wish to express my support for this bill as I believe it would not only keep us informed of potential problems but also would allow us contact with the individuals in a non-arrest atmosphere. In this atmosphere an officer could offer services that could prevent future problems and officer risk. As an example, when papers are served there may be items in the residence such as clothes, tools, etc. that the person may need, but is restrained from getting. We could offer to stand by or to pick up the items for them. This process allows us to practice crime prevention which is preferable to being called to a crisis which does not allow us any alternatives and often is to late to prevent injury.

I believe this bill goes a long way in addressing domestic problems.

Sincerely,

Patrick M. Shely
Chief of Police

Re: House Bill No. 562

Dear Rep. Miller:

Section 25.35.040 Service of Process as amended by House Bill No. 562, would place an extra costly burden upon the City of Fairbanks Police Department at a time when the Department is seeking ways of reducing budget dollars by eliminating unnecessary services by police officers.

During the previous year the Police Department has, with the assistance of the City of Fairbanks Attorney's office, instituted a procedure whereby all subpoena and criminal summonses are first served by Registered Mail. This procedure has resulted in a 60 to 80 per cent service record. Those not received are then served by a police officer or legal aid.

The City of Fairbanks Police Department is also supporting a State funded telecommunications link between the District Court and the State correctional facility in Fairbanks. This communications system is scheduled to be implemented during the summer of 1984, and will eliminate the majority of police officer escorted transports of prisoners from State Jail to Court for arraignment, thereby reducing the police officer man-hours necessary to accomplish this service.

The City of Fairbanks Police Department has also considered using civilian employees for the purpose of serving court processes in lieu of highly paid and trained police officers.

It is my recommendation that your committee take no action on House Bill 562. The State Troopers are funded and have the manpower for service of processes under AS 25.35.010 or AS 25.35.020. It will be my further recommendation that if the committee is looking at reducing the responsibility of highly trained police officers in serving processes from Superior and District Courts, that the committee look at amending the State statute to allow court officers to serve these processes.

Other law enforcement agencies have used civilian employees in handling domestic violence disputes with a high degree of success and with very little violence towards civilians. The civilian employee does not pose a threat to the parties involved as does the police officer having the authority to make arrests. Therefore, I am of the opinion that a civilian officer of the court could execute processes issued under AS 25.35.010 or 25.35.020 without any danger to his person.

The cost of training and equipping police officers to perform enforcement duties is done at considerable expense. I believe it is necessary to look at alternatives to using police officers outside of the job for which they have been trained. I would request that your committee give consideration to my recommendations when discussing House Bill No. 562.

Yours truly,

REF: House Bill 562, Service of Process in
Cases Involving Domestic Violence

I would like to take this opportunity to express my support for House Bill 562. It is my feeling that City Police departments should serve local domestic violence processes. As I am sure you and your committee are aware, these situations can be very touchy ones. In many small communities, the Police Officers would more than likely know the parties involved and have some insight into the best ways to approach them. I do not feel that this additional responsibility would place any undo strain on city departments.

If I can be of any assistance, or if you have any questions, please do not hesitate to contact me.

Very truly yours,

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 562

Support

During the last two years the tremendous increase in the number of domestic violence orders to be served has placed a severe drain upon the manpower of the Alaska State Troopers and has caused some delay in the services of these orders. This legislation transfers the primary responsibility for the service of these injunctions from the State Troopers to local police departments. State Troopers would continue to serve these orders when local officers are not available.

Domestic violence injunctions are served by Troopers assigned to the Judicial Services section of the Alaska State Troopers. This section is also responsible for courtroom security, prisoner transportation and the service of subpoenas and warrants. The Alaska State Troopers have never received funding to cover the costs associated with the service of domestic violence orders. Thus this increased work load falls on an already overloaded unit and the service of these orders must sometimes be subordinated to other law enforcement demands.

The majority of domestic violence orders are served within the boundaries of political subdivisions which have their own police agencies. The local police are often more familiar with the locations and individuals involved in domestic violence situations and therefore can more safely and efficiently serve orders.

Robert J. Sundberg
Commissioner

REQUIRE THAT THE RESULTING COURT ORDER BE SERVED BY A STATE TROOPER WHOSE PRIMARY PATROL AREA IS OFTEN OUTSIDEOF THE CITY OR BOROUGH AND WHO HAS HAD NO PREVIOUS CONTACT WITH THE VICTIM OR THE CASE IS NOT AN EFFICIENT USE OF LAW ENFORCEMENT RESOURCES, AND MAY CAUSE A DELAY IN THE SERVICE OF THE ORDER. IN THE LARGER CITIES, SERVICE OF THESE INJUNCTIONS IS MADE BY OFFICERS IN THE JUDICIAL SERVICES SECTION OF THE STATE TROOPERS. THE NEED TO ENSURE ADEQUATE SECURITY IN COURTROOMS, TRANSPORT PRISONERS, AND SERVE CRIMINAL ARREST WARRANTS AND SUBPOENAS SEVERELY LIMITS THE AMOUNT OF TIME AND EFFORT A JUDICIAL SERVICES OFFICER MAY DEVOTE TO SERVICE OF DOMESTIC VIOLENCE INJUNCTIONS.

IN THE INTERESTS OF PROVIDING THE QUICKEST AND BEST POSSIBLE PROTECTION FOR VICTIMS OF DOMESTIC VIOLENCE, AND OF MAKING THE WISEST POSSIBLE USE OF AVAILABLE LAW ENFORCEMENT RESOURCES, I URGE YOUR PROMPT PASSAGE OF THIS BILL.

ALASKA NETWORK ON DOMESTIC
VIOLENCE AND SEXUAL ASSAULT
110 SEWARD #13 JUNEAU ALASKA 99801
(907)586-3650

POSITION PAPER

HB 562: An Act relating to service of process in cases involving domestic violence

The Alaska Network on Domestic Violence and Sexual Assault, representing 20 programs statewide that provide services to victims of domestic violence and sexual assault, supports HB562 which provides for service of process in cases involving domestic violence.

Some Network member programs, especially those in rural areas, have experienced difficulties in the service of Temporary Restraining Orders (TROs) under the current statute, which requires that a State peace officer serve and execute process. In communities where State Troopers are not permanently stationed this results in a delay in service and execution of the TRO. Allowing municipal peace officers and Village Public Safety Officers (VPSOs) to serve TROs would alleviate this problem.

The Network feels that timely service, whether by a VPSO, municipal peace officer, or State Trooper, is the critical issue. The purpose of securing a TRO is to protect the victim from further harm. The court is required to notify the appropriate law enforcement agency that an order has been issued, and law enforcement is charged with serving the order. If there is a delay in notification by the court or service by law enforcement, the purpose of securing the order is thwarted, and can result in further harm to the victim.

IN THE HOUSE BY MCBRIDE

HOUSE BILL NO. 590

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for Indian tribes located on certain federally established Indian reserves; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. INTENT. It is the intent of the legislature that the Metlakatla Indian Community qualify to receive state assistance commensurate with the services provided by the Metlakatla Indian Community to the residents of the Annette Island Reserve. Neither this Act nor any action taken under it should be construed to expand or diminish the authority or jurisdiction of any Native village council.

* Sec. 2. AS 29.88.010(c) is amended to read:

(c) For purposes of this section, locally generated revenue

(1) includes

(A) the actual revenue derived from the levy and collection of local taxes in the taxing unit for local government services during the preceding fiscal year of the taxing unit;

(B) motor vehicle payments received by the municipality during the preceding fiscal year under AS 28.10.431;

(C) revenue from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the local government [MUNICIPALITY] for a function or service over which it has control, including revenues derived from parks and recreation services, mass transit, offstreet parking, and garbage and solid waste disposal services;

(D) special assessments received during the preceding fiscal year; and

(E) payments received by a local government [MUNICIPALITY] from a utility that [WHICH] are in place of taxes levied and collected by the local government [MUNICIPALITY];

(2) excludes

(A) revenue derived from the levy and collection of local [MUNICIPAL] taxes and appropriated for the operating expenses and debt service of utilities;

(B) revenue from interest earned on investments and from the sale and lease of land or equipment; and

(C) all other revenue from whatever service derived.

* Sec. 3. AS 29.88.020(a) is amended to read:

(a) The department may require a local government [MUNICIPALITY] to return a certification, signed by the appropriate local official that [MUNICIPAL TREASURER OR MANAGER AND THE MAYOR, WHICH] provides an estimate of the locally generated revenue received by the local government [MUNICIPALITY] during the preceding fiscal year.

* Sec. 4. AS 29.88.020(b) is amended to read:

(b) By October 15 of each year, the department shall make an initial determination of the millage rate equivalent of each taxing unit to be used for computing and distributing equalization entitlements for the current fiscal year under this chapter. The department shall base the initial determination on the estimates in the certification returned [BY A MUNICIPALITY] under (a) of this section.

* Sec. 5. AS 29.88.020(c) is amended to read:

(c) As early as possible, but not later than December 15 of each year, the department shall make a final determination of the millage rate equivalent of each taxing unit to use to compute and distribute

equalization entitlements under this chapter. The department shall base the determination on audits, financial statements and other financial reports prepared and submitted by the local government [A MUNICIPALITY]. The department shall adjust the locally generated revenue reported [BY A MUNICIPALITY] to exclude the [MUNICIPAL] revenue claimed by the local government that [MUNICIPALITY WHICH] does not qualify for inclusion in or recognition as locally generated revenue for local government purposes under AS 29.88.010(c)(1). The adjustment shall be made by deducting from total revenue claimed by the local government [MUNICIPALITY] the amount of the department's estimate of revenue that [WHICH] is not recognized for local government purposes.

* Sec. 6. AS 29.88.020(d) is amended to read:

(d) The full and true assessed property value shall be determined by the department in the manner provided for the computation of state aid to education under AS 14.17.140. When the determination of locally generated revenue includes revenue of a utility received under AS 29.88.010(c)(1)(E), the full and true assessed property value shall include the computed assessed value of the utility, determined by dividing the amount of the payment in place of taxes made by the utility by the millage rate that [WHICH] would apply to the utility if the utility were subject to levy and collection of local taxes [UNDER AS 29.53.010 - 29.53.420].

* Sec. 7. AS 29.88.020(e) is amended to read:

(e) In addition to the computation for local governments that [MUNICIPALITIES WHICH] levy and collect a property tax, the department shall determine an estimated full and true assessed property value under (d) of this section for

(1) each municipality that [WHICH] is a school district and

that [WHICH] does not levy and collect a property tax;

(2) each second class city or Indian reserve with a population of 750 or more persons; however, a computation is not required under this paragraph more often than once during a period of three successive calendar years; and

(3) all other second class cities and Indian reserves, by determining the average per capita full and true assessed property value of all cities and Indian reserves having a population of less than 750 persons in which an assessment has been completed by a municipality or for which a determination is not made under (1) or (2) of this subsection.

* Sec. 8. AS 29.88.025 is amended to read:

Sec. 29.88.025. REPORTS. A payment of an equalization entitlement may not be made to a local government [MUNICIPALITY] under this chapter until the local government [MUNICIPALITY] has submitted its certificate of estimated revenue and its financial report to the department for the fiscal year preceding the year for which the equalization entitlement is sought, together with a budget for the local government's [MUNICIPALITY'S] current fiscal year. The financial report shall include a listing of general revenue collected from taxes levied and assessed by the local government [MUNICIPALITY] and any other revenue that [WHICH], in the opinion of the local [MUNICIPAL] officials, is eligible for inclusion in computations of the locally generated revenue of the taxing unit.

* Sec. 9. AS 29.88.030(b) is amended to read:

(b) An equalization entitlement for a municipality determined with reference to revenue other than revenue obtained from the levy and collection of taxes may be used for areawide or nonareawide purposes, at the discretion of the assembly or council.

* Sec. 10. AS 29.88.035 is amended to read:

Sec. 29.88.035. TAX EQUALIZATION ACCOUNT. The tax equalization account is established. Money to carry out the provisions of this chapter shall be allocated by the department to the account. The amount allocated to the account shall be fully distributed by the department as payments to local governments [MUNICIPALITIES] to fulfill each local government's [MUNICIPALITY'S] share authorized under AS 29.88.010. The amount allocated to the account shall be distributed by the department pro rata among eligible local governments [MUNICIPALITIES].

* Sec. 11. AS 29.88.040(a) is amended to read:

(a) The department may adopt regulations necessary to implement AS 29.88.010 - 29.88.045. The regulations shall include, among other provisions,

(1) procedures and filing dates for submitting certification and financial reports;

(2) procedures for obtaining information required to compute and determine the local government's [MUNICIPALITY'S] millage rate equivalent; and

(3) procedures by which the department shall notify a local government [MUNICIPALITY] in writing of the reasons for a proposed disallowance or adjustment of any factor bearing upon the determination of the local government's [MUNICIPALITY'S] entitlement and by which the local government [MUNICIPALITY] will be provided reasonable time in which to respond or to challenge the department's determination.

* Sec. 12. AS 29.88.040(b) is amended to read:

(b) The department shall make reasonable efforts to advise and assist local governments [MUNICIPALITIES] in collecting information

and completing reports necessary for the determination of entitlements under AS 29.88.

* Sec. 13. AS 29.88.040(c) is amended to read:

(c) The department shall, by regulation, classify for inclusion or exclusion as a component of a local government's [MUNICIPALITY'S] millage rate equivalent under AS 29.88.010 any tax revenue appropriated for a utility not included in the definition set out in AS 29.88.045(4).

* Sec. 14. AS 29.88.045(3) is amended to read:

(3) "taxing unit" means an Indian tribe located on a federally established Indian reserve or a municipality and

(A) in a borough or unified municipality, a service area or the entire area outside cities and outside federally established Indian reserves;

(B) in a city, a differential tax zone;

* Sec. 15. AS 29.88.045 is amended by adding new paragraphs to read:

(5) "local government" means a municipality or an Indian tribe located on a federally established Indian reserve;

(6) "Indian reserve" means a federally established Indian reserve in existence before enactment of 43 U.S.C. 1601 - 1628 (Alaska Native Claims Settlement Act) and continued in existence under 43 U.S.C. 1618(a).

* Sec. 16. AS 29.89.020 is amended to read:

Sec. 29.89.020. STATE AID TO MUNICIPALITIES FOR ROADS. (a) The department shall pay to a local government that [MUNICIPALITY WHICH] has power to provide for road maintenance and exercises that power, $2,500 a mile for each mile of road, street or highway maintained by the local government, excluding (1) the official state highway system, (2) roads, streets or highways not dedicated to public use, (3) roads,

streets or highways maintained under the local service road program (AS 19.30.111 - 19.30.251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. A payment may not be made under this subsection for maintenance of a road that [WHICH] is not used by automotive equipment.

(b) A frozen waterway and a connection from an inhabited area to a waterway that [WHICH] may be safely used for public transportation by automotive equipment and is so used during a portion of a year is eligible for a payment of $1,500 per mile if the waterway and connection are maintained during the period of use by a local government [MUNICIPALITY] or combination of local governments [MUNICIPALITIES]. The department, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the [CORPORATE] limits of a local government [MUNICIPALITY], which local governments [MUNICIPALITIES] shall receive the payments under this subsection, unless the local governments [MUNICIPALITIES] involved have agreed in writing to a particular distribution.

* Sec. 17. AS 29.89.030(a) is amended to read:

(a) The department shall pay

(1) to a local government that [MUNICIPALITY WHICH] has the power to provide hospital facilities and services and that [WHICH] exercises that power, $1,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the hospital, or $250,000 a hospital for those hospitals with 10 or more beds, or $50,000 a hospital for those hospitals with less than 10 beds, as the local government [MUNICIPALITY] may elect; money received under this paragraph may be used only for

hospitals and shall be apportioned among qualifying hospitals as the local government [MUNICIPALITY] determines;

(2) on the basis set out in (1) of this subsection to a local government [MUNICIPALITY] for a nonprofit hospital not operated by a local government [MUNICIPALITY] if the local government [MUNICIPALITY] first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals that [WHICH] have been adopted by the local government [MUNICIPALITY]; money may not be paid on behalf of a nonprofit hospital without this certification; payments to the local government [MUNICIPALITY] shall be transferred to the nonprofit hospital in accordance with the basis by which the payment was generated by the hospital, and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(3) to a local government [MUNICIPALITY] in which a health facility is operated, $2,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $8,000 per health facility as the local government [MUNICIPALITY] determines.

* Sec. 18. AS 29.89.030(c) is amended to read:

(c) Money received by a local government [MUNICIPALITY] under (a)(3) of this section shall be used for expenses of health services or operation and maintenance of health facilities as the local government [MUNICIPALITY] determines.

* Sec. 19. AS 29.89.050 is amended to read:

Sec. 29.89.050. STATE AID TO NATIVE VILLAGE GOVERNMENTS. The state shall pay $25.00 to a Native village government for a village that [WHICH] is not incorporated as a city under AS 29.03.010 .

29.95.030. In this section, "Native village government" means

(1) a local governing body organized by authority of [THE ACT OF CONGRESS OF JUNE 18, 1934 (] 25 U.S.C. [SEC.] 476 [)] other than the governing body of an ~~Indian tribe~~ located on a federally established Indian reserve existing before enactment of 43 U.S.C. 1601 - 1628 (Alaska Native Claims Settlement Act) and continued in existence under 43 U.S.C. 1618(a); or

(2) a traditional village council or, if there is no traditional village council, the paramount chief or other governing body of a Native village that [WHICH] meets the requirements of [THE ALASKA NATIVE CLAIMS SETTLEMENT ACT (] 43 U.S.C. [SECS.] 1601 - 1628 (Alaska Native Claims Settlement Act).

* Sec. 20. AS 29.89.100 is amended by adding a new paragraph to read:

(4) "local government" means a municipality or an Indian tribe located on a federally established Indian reserve existing before enactment of 43 U.S.C. 1601 - 1628 (Alaska Native Claims Settlement Act) and continued in existence under 43 U.S.C. 1618(a).

* Sec. 21. AS 29.95.020(a) is amended to read:

(a) An Indian tribe qualifying for an entitlement under AS 29.88 or AS 29.89 shall receive a minimum payment of $25,000 plus an area cost-of-living differential for each fiscal year. A municipality qualifying for an entitlement under AS 29.88 or AS 29.89 shall receive a minimum payment of $25,000 plus an area cost-of-living differential for each fiscal year if:

(1) the municipality has conducted a regular election under AS 29.28.010 - 29.28.050 during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and has reported the results of the election to the commissioner of the Department of Community and Regional Affairs;

(2) regular council meetings are held in the municipality in accordance with the requirements of AS 29.23.210 during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and a record of the proceedings is maintained;

(3) a municipal budget has been adopted for the fiscal year during which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and an audit or financial statement for the preceding fiscal year has been prepared and furnished to the Department of Community and Regional Affairs in accordance with AS 29.23.560(a); and

(4) local ordinances adopted by the governing body of the municipality have been codified in accordance with AS 29.48.180.

* Sec. 22. AS 29.95.020(b) is amended to read:

(b) The area cost-of-living differential payable to each Indian tribe and municipality under this section shall be determined annually by election district under the provisions of AS 39.27.030. Except as provided in AS 29.95.030, application of the area cost-of-living differential may not result in a payment which is less than the minimum payment determined under (a) of this section. For purposes of this subsection, the election districts used are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

* Sec. 23. AS 29.95.020(c) is amended to read:

(c) The Department of Community and Regional Affairs shall pay to each Indian tribe and municipality eligible to receive a minimum payment under this section an amount equal to the difference between the minimum payment determined under (a) and (b) of this section and the sum of the amounts payable for the same fiscal year under AS 29.88

and AS 29.89.

* Sec. 24. AS 29.95.020 is amended by adding a new subsection to read:

(f) In this section, "Indian tribe" means an Indian tribe located on a federally established Indian reserve in existence before enactment of 43 U.S.C. 1601 - 1628 (Alaska Native Claims Settlement Act) and continued in existence under 43 U.S.C. 1618(a).

* Sec. 25. AS 43.20.016(a) is amended to read:

(a) There is established within the Department of Revenue the municipal assistance fund. The legislature may appropriate to the fund during each fiscal year an amount equal to or greater than 30 percent of the income tax revenue received by the state under AS 43.-20.011(e) [AND AS 43.21] for the previous fiscal year. The Department of Revenue shall distribute money from the fund to each Indian tribe and municipality [ORGANIZED BOROUGH AND EACH CITY OF ANY CLASS] on an annual basis as provided in (b), [AND] (c) and (e) of this section. An Indian tribe or a municipality [A BOROUGH OR CITY] may not receive payment under (b), [OR] (c) or (e) of this section until it submits to the Department of Revenue a resolution approved by the governing body [OF THE MUNICIPALITY] that requests the funds. Distribution of money from the fund to an Indian tribe or a municipality [CITY OR ORGANIZED BOROUGH] with a fiscal year beginning on January 1 shall be made on February 1 of the state fiscal year for which the appropriation to the fund is made. Distribution of money from the fund to all other Indian tribes [CITIES] and municipalities [ORGANIZED BOROUGHS] shall be made on June 1 of the state fiscal year for which the appropriation to the fund is made. A municipality [BOROUGH OR CITY] that incorporates after December 31 of a state fiscal year is not eligible for a distribution under this section until the following state fiscal year.

* Sec. 26. AS 43.20.016(c) is amended to read:

(c) If the amount in the fund at the time of distribution exceeds the base amount to be distributed under (b) and (e) of this section, the excess amount shall be distributed to each Indian tribe [BOROUGH] and municipality [CITY] on the basis of population. For the purpose of this subsection, the population of each Indian tribe and each [A] city within an organized borough shall be deducted from the population of the borough. Population, for the purpose of this section, shall be as certified by the commissioner of community and regional affairs.

* Sec. 27. AS 43.20.016 is amended by adding new subsections to read:

(e) The base amount to be distributed during each fiscal year from the municipal assistance fund to each Indian tribe within a borough or unified municipality shall be a share of the amount distributed to the borough or unified municipality in which the reserve is located based on the ratio of population in the reserve to the total population in the borough or unified municipality. The base amount to be distributed to each Indian tribe outside a borough or unified municipality shall be the amount received as a base amount by the city most closely approximating the reserve in population at the time of the city's incorporation.

(f) In this section, "Indian tribe" means an Indian tribe located on a federally established Indian reserve in existence before enactment of 43 U.S.C. 1601 - 1628 (Alaska Native Claims Settlement Act) and continued in existence under 43 U.S.C. 1618(a).

* Sec. 28. This Act takes effect July 1, 1984.

POSITION PAPER

RE: HB 590
SPONSOR: Representative McBride

PROGRAM EFFECTS:

The bill would require the Department to pay State Revenue Sharing to Indian tribes located on federally established Indian reserves at the same level as funding currently is being provided to municipalities of the state. The Metlakatla Indian Community located on the Annette Island Reserve is the only recognized tribe located on an Indian reserve.

COMMENTS:

The Metlakatla Indian Community is a federally chartered city and as such provides a wide range of services to its residents. The community has an elected local government and is similar in many ways to cities organized under State law. As a functioning local government, Metlakatla must meet minimum levels of service and administer its local government based on standards set out in its federal charter. Section 8 (p.4, line 12) of this bill will require that Metlakatla meet the same reporting and documentation requirements that other municipalities under State law must adhere to in order to receive State Revenue Sharing funds.

The Department believes that Metlakatla operates as a municipal government and should be recognized as such and compensated accordingly. Therefore, the Department supports enactment of this legislation.

APPROVED: Emil Notti

Bill/Resolution No.: HB 590
Title: An Act relating to state aid for Indian tribes...

ANALYSIS:

Assumptions: It is impossible at this time to make a determination about the additional amount of State Revenue Sharing funds available to the Metlakatla Indian Community under AS 29.88 and AS 29.89. Depending upon such variables as population,, millage rate, road mileage, number of health facilities, and amount of locally generated revenues, a final entitlement determination is impossible to predict. A current determination cannot be made at this time because of an unavailability of adequate information.

Positions:

Other Expenditures:

Funding:

Section Cost Analysis:

Computations: Dependent upon variables such as road mileage ($2,500 per road mile/ $1,500 per ice road mile), number of health facilities ($8,000 per facility or $2,000 per bed).

Economic Impact:

Impact on Local Government:

HB 590

ANALYSIS:

Assumptions: I assume the substitution of the word "municipalities" in place of "organized boroughs and cities of any class" does not further broaden the field of eligible recipients of municipal assistance.

For purposes of municipal assistance, the Department of Revenue uses populations certified by the Commissioner of C&RA. The definition statement in Section 27 should be clarified as to which persons would be counted (i.e. all persons residing within the Indian reserve, or just members in good standing who reside in the reserve, or all members, regardless of residence).

This bill will have no effect on the administrative cost of the municipal assistance program in the Department of Revenue. The effect of section 27 will be to dilute the amount to be shared per capita, as a result of increasing the base amount shared. Since the population of the only known such Indian Reserve (Metlakatla) is approximately 1050 persons, the effect on other communities will be minimal.

ACTION NARRATIVE

TAPE 1 for 06/15/83, SIDE A.
Recording
Number 000

The meeting of the Senate Judiciary Committee was called to order by Chairman Ray at 1:30 p.m. All members were present. Senator Rick Halford also was in attendance.

The first order of business was Senate Committee Substitute for Committee Substitute for House Bill 163 (Jud) -- Relating to harassment of persons lawfully engaged in hunting, fishing, camping, or trapping. The bill was returned to the Committee for additional amendments.

Mr. Jay W. Nelson, Director of the Alaska Environmental Lobby, testified and pointed out three areas of major concern. The first being that the bill is perceived as being directed at environmentalists and that these groups resent the implementations. Secondly, he pointed out that at the present time there are no cases of harassment in this state and that the bill was initiated because of a case in British Columbia and in Massachusetts. He also pointed out that in private discussions he had with legislators, the consensus was that this statute would most likely never be used because of law enforcement being sparse in this State and, therefore, what is the necessity for this bill. Senator Josephson voiced his concerns and suggested that Mr. Nelson should perhaps use a reverse tactic, rather than make the accusation that the Legislature doesn't act until a problem exists. He pointed out that this piece of legislation was not directed to any environmentalist groups in the State, but the problem has occurred in other states, and, therefore, was initiated as a

preventative measure and that harassment of hunters will not be tolerated in Alaska. Mr. Nelson agreed with Senator Josephson, but feels that should this bill pass, it will not effect "environmentalists" in this state and reiterated that it would most likely not be enforceable. Senator Pettyjohn pointed out that guides who feel they have a vested interest in certain game areas, are actually using harassment tactics on hunters. Senator Josephson supports this legislation and explained his reasoning to the committee.

Senator Ray referred to Alaska Statutes Section 16.05.926 and stated he felt this section is superfluous, as it is already covered in the Alaska Statutes Section 16.05.925. Senator Rick Halford advised the committee that he had spoken to the prime sponsor and suggested that the section be deleted. Senator Pettyjohn concurred with the deletion and pointed out a number of problems that could occur if that section were not deleted.

Mr. Ron Somerville, representing the Alaska Sportsman Council, testified in support of the bill and the deletion of the AS 16.05.926 and reiterated to the committee that the bill was not directed to environmental groups. He also pointed out that this legislation would address seal hunting on the Pribilof Islands and marine mammal management in Alaska game reserves which are both "high priority issues." He further stated that Green Peace and other organizations have addressed these priorities and stressed the importance of establishing ground rules now, so that it is not just for the sports hunters but for commercial enterprises as well.

Senator Ray suggested on line 17, page 1 to insert the words "harassing or" after the word "hindering", whereupon Ms. Horetski, from the Dept. of Law, advised against this insertion and explained this would prohibit action rather than speech and explained that the first amendment allows people to speak their minds.

Senator Pettyjohn moved an amendment to delete Alaska Statutes Section 16.05.926,

and on page 2, lines 7 and 10, deleting references to that section, and there being no objections, it was so ordered.

Senator Pettyjohn moved to pass the bill from committee, as amended, with individual recommendations. All members signed "Do Pass".

The second order of business was Committee Substitute for Senate Bill 228 (C&RA) -- relating to state aid for Indian tribes located on certain federally established Indian reserves, whereupon Senator Ziegler, the prime sponsor, referred to Mr. Lee Sharp's letter of June 13th which explained that this bill would have no effect on the Juneau Indian Village.

Mr. Steven S. Anderson, attorney for the Metlakatla Indian Community, testified in favor of the bill. Mr. Anderson submitted written testimony and briefly explained that the main purpose of the bill is to extend the benefits of these state revenue sharing programs to the Metlakatla Indian Community. At present, under Alaska state law, only state municipalities which have been created by state law are eligible to receive revenue sharing monies. Although Metlakatla is organized under federal law, they actually perform the same type of governmental functions as state law municipalities do. He went on to explain that the bill had been drafted to apply only to the Metlakatla Indian Community, and explained that after the passage of the Native Land Claims Settlement Act, it is the only remaining Indian reserve in Alaska; that they have functioned as any other community, providing public works and services without state revenue sharing and that the citizens who are non-members of the Metlakatla Community do not have the same rights as the members. He cited the example that, non-members can not vote for Metlakatla's twelve-man governing council. Senator Ray stated that if the non-members could not vote, then perhaps the state should not provide them with money. Mr. Anderson responded that the limited amount of non-members have all the governmental benefits as everyone else, except the right to vote for mayor or council, although this doesn't apply to

school board and the expenditure of funds.

Senator Josephson questioned that if this bill were passed, would it be opening up a potential for other native groups and could Metlakatla be treated in this special manner. In Mr. Anderson's opinion, it could because the Metlakatla Community did not participate in the Native Land Settlement Act, they are the only Indian reserve in Alaska, and equitably speaking, other Indian communities are "incorporated" under state law. They receive federal funds as well as revenue sharing money as long as they live in or near a first or second class city. This perhaps creates a double payment standard, but with Metlakatla this would not happen.

Mr. Anderson responded to Senator Eliason's questions regarding federal benefits, stating that these benefits are also extended to other native tribes and reservations.

Senator Ray questioned whether or not the use of fish traps had been abolished, whereupon Mr. Anderson responded that the use of fish traps had not been abolished.

Discussion was had by the committee as to why the Metlakatla Indians opted not to petition for the Native Claims Settlement Act. It was pointed out that at the time of the petition, the people chose to remain a traditional Indian reservation.

Advantages were discussed and the reasoning behind the trade off and perhaps the principle value was the "fish traps" which was used to provide revenues for their community, but because of this trade off they did not receive the monetary benefits that the others did.

Mr. Anderson strongly expressed that they are not asking for anything special, but only that the Alaska citizens who live in Metlakatla be able to receive the comparable benefits which other Alaskan natives receive.

Discussion was had in reference to the non-members who live in Metlakatla and it was

suggested that perhaps state aide should be provided to those non-members (approx. 100). Mr. Anderson, reminded the Committee that the members are Alaskan citizens, too.

Senator Josephson briefly summarizes Mr. Anderson's testimony and feels that basically at the time of the Alaska Native Claims Settlement Act, the native reserves (seven total) were each given the right by election to either affiliate with a regional corporation, and become a village corporation under the act and take revenues and benefits of the act and go into the corporate shareholder mode or to opt out and retain their reserve status, by opting out they did not foresee that they would be creating a disability in terms of not being eligible for state programs.

Mr. Anderson explained that prospect of the Alaskan citizens who reside there, because other state citizens located in other locations in the state receive their share of these monies, using gym and library as an example, with the exception of the Alaska citizens who live on the Metlakatla reserve.

Senator Eliason questions revenue sharing before the Alaska Native Claims Settlement Act if it did exist and what the federal cutback were at this time. If infact because of the cutbacks is this not what the push for this bill all about, this of course being the case.

Senator Ray expressed his concerns of the broadening of the use of the word "local government" instead of "municipality". Ms. Tamara Cooke, representing Legislative Legal Counsel and drafted the bill, explained that the definition of "municipality" did not apply to the Community of Metlakatla.

Senator Josephson requested that should the bill pass from Committee he would like to have a "letter of Intent" explaining why Metlaktla is receiving this treatment, because he foresees other unincorporated communities requesting the same. Chairman Ray requested that Senator Josephson write a letter of intent, and rescheduled the bill for Friday, June 17th.

The third order of business was Committee Substitute for House Bill 323 (Fin) am - - residency requirements. Mr. Robert Maynard from the Dept. of Law was available to answer questions and explained the amendments which were incorporated into the work draft. The first amendment was sec. 9, page 6, amending the student loan residency requirement which would assure that if a dependent lives out of the state and qualifies for a student loan, because his parent or guardian is in this state, that dependent would have some contact in the state within five years. The second amendment is to delete sec. 10 on page 6, changing the residency of one who can collect bounties to six months.

Senator Pettyjohn moved to pass the bill out of Committee with individual recommendations. All members signed "Do Pass".

The final order of business was the following bill assignments:

SCSHB126 Limiting the liability of aircraft owners or operators for personal injury or death to guest passengers to Senator Eliason.

CSHB 130 Relating to homesteads to Senator Josephson.

There being no further business the meeting adjourned at 2:20 p.m.

COMMITTEE LETTER OF INTENT
ON
CS FOR SENTATE BILL 228 (JUDICIARY)

In the Legislature of the State of Alaska
13th Legislature - 1st Session

The purpose of Senate Bill 228 is to extend to the Metlakatla Indian Community the benefits of two ongoing state revenue sharing programs, the Municipal Assistance Fund, AS 43.20.016, and the Municipal Tax Resource Equalization Program, AS 28.88.010 et seq. Under existing state law, the Metlakatla Indian Community is not eligible to participate in these programs because it is not technically a state-law "municipality." Senate Bill 228 applies only to the Metlakatla Indian Community and does not affect the legal status or rights of any Indian Reorganization Act entities, traditional councils or village or regional corporations organized under the Alaska Native Claims Settlement Act.

The Committee believes that in fairness the Metlakatla Indian Community must be distinguished from other Native organizations in Alaska with respect to state revenue sharing. The Metlakatla Indian Community has a legal status in Alaska that is absolutely unique. Because the Metlakatla Indian Community elected to forgo the benefits of the Alaska Native Claims Settlement Act, the reservation status of the Annette Islands Reserve was preserved. Metlakatla was the only reserve in Alaska to make this choice. Thus section 19 of the Alaska Native Claims Settlement Act extinguishes all previously existing federal Indian reserves in Alaska

but specifically excepts the Annette Islands Reserve. As a federal Indian reservation, located on federal trust land, the Community cannot incorporate under state law.

It is true that the Metlakatla Indian Community is eligible for various federal assistance programs made available to tribes throughout the United States. However, the Metlakatla Indian Community enjoys no special advantage vis-a-vis other Alaska Native groups in this regard. Section 2(c) of the Alaska Native Claims Settlement Act provides that the Act does not diminish the responsibility of the federal government to Alaska Natives and Alaska Native groups. The various federal statutes extending benefits to Indian tribes have therefore been amended to provide that the term "tribe" includes the traditional councils, the Indian Reorganization Act entities, and the village and regional corporations located in Alaska. These entities, as well as the Metlakatla Indian Community, therefore receive federal aid under the Indian Self-Determination Act and other federal programs. Unfortunately, this federal aid for Indian entities throughout the United States has substantially eroded. According to the Bureau of Indian Affairs, the federal cutbacks in Indian programs under the Reagan administration have averaged 45%. The Metlakatla Indian Community must now look to other sources for funding.

With respect to state aid, the Metlakatla Indian Community is at a special disadvantage compared to non-Native and predominately Native communities in Alaska. The Metlakatla Indian Community provides substantial governmental services for the approximately

1300 persons who reside on the Annette Islands Reserve, including both members and non-members of the Community. Its governmental expenses are commensurate with these responsibilities, averaging approximately $1.7 million per year. But because the Metlakatla Indian Community is chartered under federal, not state, law, it is not eligible for the state revenue sharing benefits that are extended to other Alaska communities. In contrast, the other Native communities in Alaska, at least those of a size comparable to Metlakatla, are incorporated under state law and the Alaskans resident there enjoy the indirect benefits of state revenue sharing. For example, the City of Hydaburg is organized as a first class city and is eligibile to receive state revenue sharing. At the same time, this predominately Native community also receives substantial federal benefits, under the Indian Self-Determination Act and other programs, because of the presence there of the Haida Corporation, an ANCSA village corporation, and the Haida Cooperative Association, an Indian Reorganization Act entity set up pursuant to section 16 of the Indian Reorganization Act. The Metlakatla Indian Community is eligible to receive the federal but not the state benefits. Senate Bill 228 will eliminate this disparity of treatment between state citizens by extending the state revenue sharing benefits that other Alaska communities now enjoy to the Metlakatla Indian Community.

At the Committee hearing, concern was expressed that the phrase "local government," referring both to state law municipalities and to the Metlakatla Indian Community, was unnecessarily

broad. The Committee has discussed this matter with legislative counsel and recommends that this language be eliminated and that the phrase "municipality and federal Indian reserve tribe" be used to refer to the legal entities eligible for revenue sharing under these two state programs. The existing definition section, clarifying that the "federal Indian reserve tribe" refers only to Metlakatla, should be retained.

LAW DEPARTMENT - 586-5242

June 13, 1983

The Honorable Robert H. Ziegler, Sr.
Alaska State Senator
107 Capitol Building
Juneau, Alaska 99801

File: Legislature - 1983 - General Correspondence

Subject: CSSB 228 (C&RA)

Dear Senator Ziegler:

Following your telephone conversation this morning I reviewed CSSB 228 (C&RA) to determine whether it would have any effect on Juneau area Indian tribes or the Indian-owned property on Willoughby Avenue often referred to as the Juneau Indian Village or the village.

It is my reading of the bill, particularly in light of the intent section, that it will have no effect on any Juneau area Indian tribe or on the village. The bill affects only those Indian tribes located on a "federally established Indian reserve" and there are no federally established Indian reserves in Juneau. In fact, all Indian reserves in Alaska except the Annette Island Reserve (Metlakatla) were revoked by Section 19(a) of ANCSA.

The village is a 1964 townsite plat known as the Juneau Indian Village Addition to the Juneau Townsite. The federal townsite trustee conveyed property to Alaska Natives occupying property within the Juneau Indian Village Addition by means of deeds entitled "Native Restricted Trustee Deed." The deeds, pursuant to 43 USC 733, provided that the land

> shall not be alienated or encumbered without the consent of the Secretary of Interior, and shall not be subject to taxation, to levy and sale in satisfaction of debts, contracts or liabilities, or to any claim of adverse occupancy or law of prescription . . .

With the consent of the Secretary of Interior the restricted status of much of the village property has been lifted and the property conveyed to non-natives. The village is now a patchwork of restricted and non-restricted titles. In any event, the village created by the Juneau Indian Village Addition townsite plat was not then, and is not now, a federally established Indian reserve and would not be affected by CSSB 228 (C&RA).

In reading sections 27 and 28, the addition of the phrase "Indian tribe and" to the sections of Title 29 being amended caused me some concern over the fact that "Indian tribe" was not defined and could be read to mean any Indian tribe. However, upon reading AS 29.95.020 (a), (b) and (c) as amended by sections 26 through 28 of the bill, it becomes clear that the term "Indian tribe" is limited to Indian tribes qualifying for state aid under AS 29.88 and AS 29.89.

In summary, I do not believe the subject bill would have any effect on the Juneau Indian Village on Willoughby Avenue nor on any Indian tribe in the Juneau area.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

SB 228

IV. ANALYSIS:

This bill will have no effect on the administrative cost of the municipal assistance program in the Department of Revenue. The effect of section 30 will be to dilute the amount to be shared per capita, as a result of increasing the base amount shared. Since the population of the only known such Indian Reserve (Metlakatla) is approximately 1200 persons, the effect on other communities will be minimal.

Assumptions: I assume the substitution of the word "municipalities" in place of "organized boroughs and cities of any class" does not further broaden the field of eligible recipients of municipal assistance.

Re: CSSB 228

Dear Senator Gilman:

At your request we have reviewed the proposed CSSB 228. You asked whether the bill would affect the State's relationship with unincorporated communities or Native village governments. The bill amends the revenue sharing (AS 29.88 and AS 29.89) and municipal assistance (AS 43.20.016) programs to include Indian tribes located on federally established reserves which were not revoked by the Alaska Natives Claims Settlement Act (ANCSA), 43 U.S.C. 1601-1628. The only community which fits this description is the Metlakatla Indian community.

We see no legal problem with including Metlakatla as a recipient of the various programs established to benefit local governments. However, we believe that the use throughout the bill of the term "Indian tribe", and the omission of any reference to Metlakatla, may suggest to a reader not intimately familiar with AS 29 and ANCSA, that the effect of the bill is much broader. This effect could be avoided by replacing all references to "Indian tribe" with "the Metlakatla Indian community." We believe that the specific reference to Metlakatla would not cause the bill to be viewed as a local or special act in violation of Alaska Const. art. II, § 19, because it would have precisely the same effect as the use of the term "Indian tribe" as defined in CSSB 228 -- that is, "Indian tribe" as defined in the bill is a class of one, Metlakatla being the only federally established Indian reserve in Alaska not revoked under ANCSA. In order to simplify the statute and avoid confusing the reader we suggest referring to Metlakatla specifically, as well as identifying it as the only federally established Indian reserve in Alaska.

We note that AS 29.89.050 "State Aid to Native Village governments" is amended in the bill, to clarify that Metlakatla may not qualify both as a local government and as a Native village government. We have advised in the past that AS 29.59.050

could be challenged on equal protection grounds by an unincorporated community which is not a Native village. We suggest repealing AS 29.89.050, and supplanting it with a provision for aid to unincorporated communities generally.

As a general practice in drafting legislation affecting Native villages in Alaska, you should consider including a provision of legislative intent to the effect that neither the act nor any action taken under it shall be interpreted to either expand or diminish the authority or jurisdiction any Native village council may have. This would reduce the possibility that any legislative act benefitting Native village communities may be interpreted to alter the relationship between the State and those communities.

We hope that this brief response is helpful in your consideration of CSSB 228.

Very truly yours,

POSITION PAPER

RE: CSSB 228

SPONSOR: Senator Ziegler

PROGRAM EFFECTS OF THE BILL

Allows federally established Indian reserves to be considered "local governments" for purposes of the State Revenue Sharing and Municipal Assistance grant programs. In effect, only one community, Metlakatla, would benefit from this legislation because it is the only Indian reservation in Alaska. Under the terms of the Alaska Native Claims Settlement Act no new reservations may be established in the State.

COMMENTS

The Department generally favors this bill from the perspective that it extends the benefits of two vital State aid programs to another type of municipality that is providing needed services to its residents. Metlakatla Indian Community is a federally chartered municipality and, therefore, is not empowered by Title 29 of the Alaska Statutes. However, it functions like a municipality and is providing a full range of local services to the Alaskans living on the reserve and should be afforded the most liberal interpretation possible under the State Revenue Sharing and Municipal Assistance programs.

The Department cannot comment on the possible legal ramifications or precedents that might occur with passage of this legislation as they relate to dealing with other unincorporated communities and Indian tribes. The Department defers to the Department of Law on this question.

Re: SB 228 (Relating to State aid for Indian tribes located on federally-established Indian reserves)

Dear Senator Ziegler:

Assistant Attorney General Larry D. Wood of the Department of Law office in Fairbanks recently brought this bill to my attention. In particular, he noted that the provisions of the bill would apply to an "Indian tribe located on a federally established Indian reserve." Neither "Indian tribe" nor "federally established Indian reserve" are defined or further identified in the bill.

As you may know, there is considerable uncertainty regarding those terms and concepts in Alaska. However, everyone seems to agree that the Metlakatla Indian Community qualifies as an "Indian tribe located on a federally established Indian reserve." Accordingly, if it is your intent to ensure that the Metlakatla Indian Community may receive state aid, we believe it would be desirable to amend the bill to reach only the Metlakatla Indian Community. We recognize that this may present some problem under the prohibition on local and special legislation in Art. II, sec. 19 of the Alaska Constitution. However, that provision of the Constitution prohibits local and special legislation only if a general law cannot be made applicable. Given the uncertainty regarding the concepts of "Indian tribe" and "federally established Indian reserve," we believe there is sufficient justification for limiting the reach of this bill to the Metlakatla Indian Community.

We will be happy to work with you, a designated legislative committee, or the Legal Affairs Division of the

Legislative Affairs Agency in working on this measure. We look forward to hearing from you at your convenience.

Sincerely,

NORMAN C. GORSUCH

Re: Metlakatla Indian Community's Eligibility for Municipal Aid

Dear Sandra:

As we discussed the other day on the telephone, I have prepared a paper for Senator Ziegler outlining the basis for the Metlakatla Indian Community's request that various state statutes be amended so that the Metlakatla Indian Community qualifies for state revenue sharing and other state municipal aid programs. I enclose a copy for your reference. Since the Community's position as to precisely what programs it will seek to have amended is not yet clear, I would prefer that you withhold distribution of the paper.

In light of our earlier conversations, I would particularly call your attention to the section of the paper that discusses Metlakatla's position relative to other Native communities in Alaska. As I have explained to you, the Community does not in any way want to interfere with the efforts of other predominantly Native communities from securing state aid. At the same time, however, it must be recognized that the situation of the Metlakatla Indian Community is legally and practically unique.

It is my position that it makes the most sense to approach the question of Metlakatla's inequality of treatment first and then approach the problems of state treatment of other Native communities on an ad hoc basis. As I emphasized in the paper, it is important to realize that other Native communities, as well as the Metlakatla Indian Community, receive substantial federal aid. They qualify under federal statutes for Indian Self-Determination Act funding and most other federal programs made available to Indian tribes generally. It is also important to recognize that most Alaska Natives residing in communities of a size comparable to Metlakatla are either at or near a state municipality. Such communities, of course, are eligible for state municipal aid, and the individual Natives who live there receive the indirect benefits of such aid.

The only Natives who would not receive indirect benefits on a scale comparable to Metlakatla, if the requested amendments are enacted, would be those Natives in the unorganized borough who live in smaller communities which are not organized under state law. To my knowledge, none of these communities approach the size of Metlakatla or deliver governmental services on a scale that Metlakatla does. They do not have the same need for revenues that the Community does. If there are any such communities, however, that do deliver substantial governmental services, I see no reason that their situation could not also be remedied by an amendment to the state law. They would be in a much stronger position, however, if Metlakatla got its amendments through first so that they could point to similarities in their situation to that of the Metlakatla Indian Community. On the other hand, for communities that are organized under state law, duplication of state funding would occur if revenue sharing were made available to traditional or IRA councils within the same geographic boundary.

My greatest concern is that the problems that Metlakatla faces should not be ignored simply because it is difficult to deal with the problems concerning the treatment of other Alaska Natives. Metlakatla's situation is not controversial - its governmental status and the extent of its responsibilities are quite clear.

I will be happy to discuss this matter with you further at your convenience. Thank you again for your attention to Metlakatla's concerns.

Very truly yours,

Re: Elgibility of the Metlakatla Indian Community for State Municipal Aid

Dear Representative Wendte:

I am writing on behalf of the Metlakatla Indian Community to request your assistance in securing legislation to make the Metlakatla Indian Community eligible for various state revenue sharing programs, as well as for other financial aid which is now extended to the municipalities of the State of Alaska. I have already met with Senator Ziegler concerning this matter while I was in Juneau several weeks ago, and I understand that in your meeting with the delegation from the Metlakatla Indian Community they advised you of their concern to seek these amendments.

I enclose a copy of my letter to Senator Ziegler formally requesting his assistance, along with a position paper I have prepared outlining the basis for the Community's position. As you can see, it is premised primarily on the argument that the disqualification of the Metlakatla Indian Community from state revenue sharing unfairly discriminates against Alaska state citizens who live on the Annette Islands Reserve as compared to other citizens residing in comparable communities. It seems to me that state revenue sharing for such communities should not turn whether they are organized under federal or state law, but rather on whether they exercise substantial governmental functions and are in need of state assistance. Metlakatla, particularly in light of the substantial federal cutbacks under President Reagan's administration, should qualify on both counts.

I would very much like to meet with you personally to discuss these matters and think that it would be useful to have a delegation from the Community as well as the Community's lobbyist, Mr.

Kubley, present as well. We will be available to meet with you at your convenience.

In the meantime, I will be very happy to discuss any questions you may have concerning these matters over the telephone. Thank you again, on behalf of the Metlakatla Indian Community, for any assistance you can give.

Very truly yours,

Re: Metlakatla Indian Community Eligibiliy for State Revenue Sharing

Dear Senator Ziegler:

I am writing on Metlakatla's behalf, as a follow-up to our conversation in Juneau, to request your assistance in securing legislation making the Metlakatla Indian Community eligible for State revenue sharing and other State financial aid which is available to Alaska's other municipalities, including a number of like size and comparable governmental responsibilities.

Although I know you are quite familiar with Metlakatla's status and its treatment under state law, I thought it might be helpful if I provided you with a detailed explanation of the basis for the Community's position. I have prepared a paper outlining Metlakatla's arguments which I enclose for your reference. It discusses the legal status of the Community, and what I see as the primary basis for expanding the eligibility requirements of the various State municipal assistance programs. The paper is preliminary because, except for the revenue sharing programs, it does not identify precisely the programs in which Metlakatla seeks to participate. I believe that will have to wait for additional discussions with you and Representatives Wendte and McBride.

As you know, the State of Alaska has in the past provided assistance to the Metlakatla Indian Community as it has to other communities throughout the State of Alaska. Most often, as in the case of the swimming pool project, the money has been made available as part of a specific legislative grant. The Community is well aware that this has been made possible primarily through your sponsorship.

There are many on-going State assistance programs, however, for which the Community does not currently qualify. In several instances, the Community has received funds from the Department of Community and Regional Affairs under programs making the so-called "unincorporated communities" eligible for State financing. Metlakatla's classification as an "unincorporated community," however, is problematic.

Although the Metlakatla Indian Community is organized under federal law and is therefore not technically a state "municipality," in form and function it more closely resembles a "municipality" than it does an "unincorporated community." Metlakatla does not resemble those communities in the unorganized borough with no organized local government. The distributions authorized by the legislature for the unincorporated communities have been much less substantial than the distributions to the municipalities. Since Metlakatla has substantial "municipal" responsibilities, it has a correspondingly greater need for revenues than do the unincorporated communities, and it would seem that Metlakatla's elegibility for those programs should turn on the functions it performs for the Alaska citizens who reside on the Reserve, rather than on the fact that it is chartered by the United States rather than the State of Alaska.

At the present time, Alaska citizens who reside on the Annette Islands Reserve do not share the same opportunity as other state citizens residing in similar communities to enjoy the indirect benefits of state revenue sharing. The Legislature, it seems to me, has made a policy decision that some of Alaska's wealth should be made available to its citizens indirectly through the various state programs that provide direct financial aid to local governments. Such a distribution scheme has the advantage of ensuring that a substantial part of the money distributed will be invested in permanent civic improvements of long-range benefit to state citizens. When oil and gas revenues are distributed directly to individual state citizens, there is, of course, no such assurance. Considered from the perspective of the individual state citizen who lives on the Annette Islands Reserve, therefore, the State does not extend to the Metlakatlans the same indirect benefits it does to other state citizens residing in similar communities. This inequality of treatment is most clearly evident in the Municipal Assistance Fund where the State has elected to distribute 30% of the oil and gas income tax revenues to municipalities.

I am aware that some of the arguments the Community advances could also be made by other Native groups in Alaska. Neither I nor the Community have any desire to debunk the efforts of other needy Alaska Natives to obtain help from the State of Alaska. At the same time, the Community's status in Alaska law is unique and I do not think there is any unfairness in extending eligibility for municipal revenue sharing only to the Annette Islands Reserve, at least as a first step. Metlakatla's governmental and reservation status is crystal clear. The problem of treatment of other Alaska Natives can be approached on an ad hoc basis by determining which other Native communities provide governmental services similar to Metlakatla and yet are ineligible for State aid.

Most if not all of the other Native communities in Alaska with populations of the same magnitude as the Annette Islands Reserve are incorporated under state law as first or second class cities, or are located within an organized borough. As a result, Natives resident there enjoy the indirect benefits of the State distributions that Metlakatla is denied. And, as I explain more fully in the attached paper, these Native groups are also eligible for the same federal aid that is extended to Metlakatla since the various federal statutes extending aid to Native Americans have expanded the definition of "Indian tribe" to include the villages, the ANCSA village and regional corporations, and the traditional councils located throughout the State of Alaska. It is also significant, concerning equality of treatment, that the Metlakatla Indian Community and its members have been ineligible to participate in the Alaska Native Claims Settlement Act benefits that other Alaska Natives have enjoyed.

I would like to specifically request that you ask Tamara Cook of the Legislative Affairs Agency to assist on this project. As we discussed, she is currently working on the redraft of Title 29, the State Municipal Code, and is very familiar with the various State programs for municipal assistance. In addition, Senator Ziegler, I would also request that you authorize her to discuss these matters with me so that I can remain involved in the drafting process.

In analyzing the various State statutes, I have had considerable difficulty in determining which statutes the Community should seek to have amended. The clearest candidates are the two principal revenue sharing measures--the Municipal Assistance Fund, AS 43.20.016 discussed above, and the Municipal Tax Resource Equalization Program codified in AS 29.88.010 et seq., and along with them, the

corresponding program for State aid for miscellaneous municipal purposes found in AS 29.89. Not only do these revenue sharing measures clearly implicate the Community's concerns for unequal treatment of Metlakatla residents, but if extended to Metlakatla they would provide the advantage of an on-going source of support to replace, in part, the federal funding which has been evaporating under the Reagan administration.

At the same time there are a number of State programs providing monies to individual communities for particular purposes. An example is the Department of Environmental Conservation's program for assistance to municipalities for water, sewer and solid waste systems. The Attorney General has ruled that Metlakatla is ineligible for such assistance because it was not a "municipality." The problem I am having is that an attempt by Metlakatla to amend such statutes would substantially overlap with the proposal advanced to you independently by the Community for State aid for various priority projects. I am also concerned that the Metlakatla Indian Community not jeopardize its chances for increased State assistance by asking for too many changes at once. On the other hand, at least as a matter of logic, it might make sense to seek to make Metlakatla eligible for all State municipal aid programs. It seems to me that the Community and I will need your counsel on this point. A further complication arises because to the extent that the Community receives specific appropriations for individual projects (the water supply dam discussed in the Community's proposal, for example), it may not be necessary to seek to amend the general State statutes. I am clearly not in a position to make a unilateral decision as to which specific programs should be included.

Because of that uncertainty, the attached position paper is preliminary in certain respects and will probably have to be modified as the Community's position becomes more refined. I have no objections if you wish to distribute the paper and will leave that to your judgment. In light of the meeting you had last week with Governor Sheffield, I thought I should send copies of the paper to Representatives McBride and Wendte. I will ask them to consult with you as to whether they think the paper should be kept confidential at this point. I am also taking the liberty of sending a copy to Governor Sheffield's Aide for Indian Affirs, Sandra Borbridge, who has called me several times for briefing on the Community's position. I will also ask her to withhold distribution of the paper.

I would like to have another meeting along with a Metlakatla delegation with you, Representative McBride and Wendte and Wally Kubley. I will be available to come back up to Juneau at your convenience and will, of course, be happy to testify in any hearings or provide any other assistance I can in attempting to secure these amendments. In addition, I am sure that Mayor Casey Nelson and the members of the Council and staff will be available to testify or help if that becomes useful.

Once again, I would want to express my thanks and the Community's thanks for your assistance and advice.

Very truly yours,

ZIONTZ, PIRTLE, MORISSET,

MK/3483
F2/MIC/ZIE/L

MEMORANDUM State of Alaska

TO. Ernst W. Mueller, Commissioner
Department of Environmental
Conservation

DATE: July 28, 1982

FILE NO: 366-747-82

TELEPHONE NO: 465-3600

FROM: WILSON L. CONDON
ATTORNEY GENERAL

SUBJECT: Metlakatla Indian Community grant eligible under AS 46.03.030

By:
Robert E. Price
Assistant Attorney General

RECEIVED
AUG 02 1982

This is in response to your opinion request of June 7 in which you asked whether the Metlakatla Indian community is entitled to receive construction grant assistance under AS 46.03.030.

AS 46.03.030 provides for grants of state funds to a "municipality" for public water supply, sewerage and solid waste facilities.

AS 46.03.900(11) defines "municipality" as "an organized borough or an incorporated city outside an organized borough, and includes all classes of boroughs and cities whether home rule or otherwise."

The Metlakatla Indian Community is an entity organized under section 16 of the Indian Reorganization Act, 25 U.S.C. 476. It is not incorporated as a city or organized as a borough under the law of the State of Alaska.

The definition of municipality in AS 46.03.900(11) does not include the Metlakatla Indian Community. It is not an organized borough or an incorporated city within the meaning of the statute. The Alaska Constitution, Article X, deals with local government within the context of boroughs and cities which are incorporated under state law. The definition of municipality in AS 46.03.900(11) should be construed within the framework of Article X of the Alaska Constitution inasmuch as it employs the words "borough" and "city" which are set out in the constitution.

There is no equal protection problem raised by the statute caused by the exclusion of the Metlakatla Indian Community from benefits under the statute because the basis of the exclusion is governmental and not race. The Metlakatla Indian Community may become a city or borough under state law upon compliance with the applicable provisions of Title 29. The equal protection clause does not deny to States the power to treat dif-

ferent classes in different ways so long as the classification is "reasonable, not arbitrary, and must rest upon some ground of difference having a fair and substantial relation to the object of the legislation, so that all persons similarly circumstanced shall be treated alike." Reed v Reed, 404 U.S. 71, 75-76, 30 L.Ed. 225, 229 (1971).

Further, this opinion does not mean that the legislature may not make grants to the Metlakatla Indian Community by designating that entity as eligible for a grant. See page 83 of 1982 SLA 101 for a grant to Metlakatla specifically within the group of municipalities. However, the statute must either include Metlakatla within a group, for example, as an unincorporated, or specifically describe the Metlakatla Indian Community as a grant recipient.

Attorneys for the
Metlakatla Indian Community

INTRODUCTION

The purpose of this paper is to show the justification for amending Alaska's laws to make the Metlakatla Indian Community eligible for various state municipal aid programs. At the present time, the Community's treatment under Alaska law is somewhat confusing and inconsistent. On the one hand, the Alaska Attorney General has ruled that the Metlakatla Indian Community is not a "municipality" as that term is defined in various state statutes making state monies available to local governments. At the same time, however, the Attorney General has ruled that the Metlakatla Indian Community can be classified as an "unincorporated community" for certain purposes so as to be eligible for various state programs extending aid to such communities.

This paper will demonstrate that although the Metlakatla Indian Community is organized under federal law, and is therefore not a state law municipal corporation, it nevertheless functions as an established unit of local government, a fact recognized both by the State of Alaska and the United States.

Unlike the so-called "unincorporated communities," the Metlakatla Indian Community operates a "municipal" government and provides governmental services to the more than 1,300 residents of the Annette Islands Reserve. These services include police and fire protection, water, sewer and electrical service, as well as general government. Like other local governments, the Community enacts and enforces laws and has an established judicial system. For these reasons, classification of the Metlakatla

Indian Community as an "unincorporated community" ignores the realities of Metlakatla's extensive governmental operations and the needs it has for funding the services it provides. This paper will discuss in some detail the Community's status under federal and state law, the need for state revenues, and the reasons that Metlakatla's unique status justifies its inclusion within these state municipal aid programs.

THE METLAKATLA INDIAN COMMUNITY'S ELIGIBILITY FOR STATE FINANCIAL ASSISTANCE UNDER EXISTING ALASKA LAW

The State of Alaska now makes substantial sums of money available to local units of government throughout the state. This occurs not only through the State's revenue sharing programs but also through state statutes that make monies available to local governments for specific projects within local government responsibility. The primary revenue sharing programs include the Municipal Assistance Fund administered by the Department of Revenue, AS 43.20.016 and the Municipal Tax Resource Equalization Program found in AS 28.88.010 et seq. The examples of state aid for miscellaneous municipal purposes are numerous including such programs as state aid to municipalities seeking to build or improve water and sewer systems, AS 46.03.030, as well as the state program found in AS 29.89.030 et seq. providing aid for municipalities maintaining roads, operating health facilities, and maintaining volunteer fire departments.

For the most part, the Metlakatla Indian Community is not eligible for these programs because it is not a "municipality"

within the meaning of the various state statutes that make these programs available to local governments. Last year, for example, the Metlakatla Indian Community applied for aid to the Department of Environmental Conservation for a grant under AS 46.03.030 for improvements to the Community's public water system. The Department of Environmental Conservation requested an opinion from the Alaska Attorney General as to whether Metlakatla was eligible, and the Attorney General, on July 28, 1982, issued an opinion noting that the Metlakatla Indian Community was an Indian tribe organized under § 16 of the Indian Reorganization Act, 25 U.S.C. § 476 and was "not incorporated as a city or organized as a borough under the laws of the State of Alaska." As a result, the Attorney General ruled, Metlakatla was not a "municipality" within the meaning of the statute and was not eligible for state aid. The Attorney General went on to note, however, that there was no legal prohibition on the Legislature making grants available to the Metlakatla Indian Community if the Community were designated as eligible. A copy of the Attorney General's Opinion is attached.

On the other hand, the Metlakatla Indian Community <u>has</u> qualified for state aid in certain circumstances, either because the statute makes state aid available to persons or organizations other than "municipalities," or in the case of a number of state programs, because the aid has been made available to "unincorporated communities." For the most part, the amounts made available to the "unincorporated communities" are substantially less than

the amounts made available to "municipalities." For example, AS 29.88 makes a maximum grant of $25,000 available to communities not incorporated under state law, while that amount is the minimum grant for municipalities and is subject to adjustment upward based on a formula set out in the statute. The singular exception was the Municipal Aid Program, Chapter 60, SLA 1981, which made grants available to both municipalities and incorporated communities calculated on a $1,000 per capita basis. Metlakatla, like other incorporated and unincorporated communities throughout the State of Alaska will receive a substantial grant from the State under this program.

Presumably, there are several principal reasons that the Legislature has chosen to make larger sums available to municipalities than to unincorporated communities. First, municipalities have governmental responsibilities to perform and therefore need more assistance. Second, their stable governmental structures ensure that State monies are spent or invested in a responsible fashion; they are more accountable than "unincorporated communities." Third, in contrast to State programs distributing State wealth to individual Alaskans on a per capita basis, distributions of state money to local governments ensures that substantial portions of the money will be invested in permanent improvements of long-standing benefit to the citizens of the State.

Although the Metlakatla Indian Community is organized under federal rather than state law, it more closely resembles a "muni-

cipality" than it does an "unincorporated community." If the State of Alaska were to make its revenue sharing programs available to the Community, it would be assured that the money would be utilized responsibly by the Community in helping to meet its very substantial governmental responsibilities. It would result in permanent benefit to the State citizens who reside on the Annette Islands Reserve, both members and nonmembers of the Community.

THE UNIQUE LEGAL STATUS OF THE METLAKATLA INDIAN COMMUNITY IN ALASKA

The Metlakatla Indian Community is the governing body of the only remaining federal Indian reservation in Alaska, the Annette Islands Reserve. The Reservation was established by Act of Congress in 1891 and a stable council-form tribal government has been in effect continuously since that date. In 1944, the Metlakatla Indian Community adopted a Constitution under § 16 of the Indian Reorganization Act, 25 U.S.C. § 476, which provided a new federal framework for Indian tribal government. The form of the Community's government, however, remained essentially the same.

The Community's chief executive officer is the Mayor; it has a Secretary and Treasurer and its legislative body is a 12-person Council. The Community also has a judicial system headed by a federally-trained Magistrate. As a federally recognized Indian tribe the Metlakatla Indian Community enjoys the legal power to perform traditional local government functions. Like other tribes, it enacts and enforces civil and criminal laws and has

power to levy taxes, although its tax base is very limited. While Indian tribes enjoy a status in American law that is unique, for present purposes the Metlakatla Indian Community can be described as a federally chartered municipal corporation because it carries out the same types of governmental functions as do state-chartered municipal governments.

In Alaska, after the Alaska Native Claims Settlement Act was passed by Congress in 1971, Metlakatla's situation became unique. Under § 19(a) of ANCSA, all Indian reservations in Alaska, with the sole and express exception of the Annette Islands Reserve, were abolished. In addition, § 19(a) provides that no person enrolled in the Metlakatla Indian Community is eligible for benefits under the Act.

The unique status of the Metlakatla Indian Community was explicitly recognized by Congress in the Indian Tribal Governmental Tax Status Act of 1982. That statute provides that for certain federal tax purposes, Indian tribal governments shall be treated as states. The legal effect of the statute was to provide that Indian tribes, like state and local governments, would receive favorable tax treatment under the Internal Revenue Code. Thus, contributions made to Indian tribes are now tax deductible as are contributions made to state and local governments. Indian tribes are now entitled to immunity from certain federal excise taxes. And Indian tribes, like state and local governments, can now issue certain kinds of bonds, the interest on which is exempt from

federal income tax. The definition section of the statute provides that

> The term 'Indian tribal government' means the governing body of any tribe, band, community, village, or group of Indians which is determined by the Secretary, after consultation with the Secretary of Interior, to exercise substantial governmental functions and in Alaska shall include only the Metlakatla Indian Community.

Section 203.

Consistent with its clear governmental status, the responsibilities of the Metlakatla Indian Community for the governance of the more than 1,300 people resident on the Annette Islands Reserve are substantial. For the fiscal year ended September 30, 1982, the Metlakatla Indian Community had total expenses of more than 1.7 million dollars. Of this sum, approximately one million dollars are associated with general government operations including expenses for building operations, road and street maintenance as well as the expenses of general accounting and administration. The other single most important expense was the Community's Police Department which accounted for 16.4% of the total budget. The following chart shows the breakdown of expenditures by the Metlakatla Indian Community on a dollar and percentage basis.

	Expenditures	Percent of Total
General Government	$1,029,882	57.4%
Fire Department	$ 55,284	3.1%
Rental Expenses	$ 144,683	8.1%
Public Health and Sanitation Department	$ 32,263	1.8%
Sewer System	$ 6,088	0.3%
Police Department	$ 294,368	16.4%
Water Department	$ 30,928	1.7%
Garbage Department	$ 52,730	2.9%
Cable Television Department	$ 69,743	3.9%
Forestry Project	$ 76,853	4.4%

This data does not include the operation of Metlakatla Power & Light, which is responsible for providing electric power to the Reservation. Metlakatla Power & Light is fully owned and operated by the Metlakatla Indian Community and generates power from both hydrogenerators and diesels.

In sum, although the Metlakatla Indian Community is organized under federal law, not under the laws of the State of Alaska, it nevertheless performs governmental functions and has governmental responsibilities that are every bit as extensive as the municipalities of the State of Alaska serving similar population bases. It has a corresponding need for revenues to meet these expenditures.

REASONS FOR EXTENDING MUNICIPAL REVENUE SHARING AND OTHER STATE BENEFITS MADE AVAILABLE TO LOCAL COMMUNITIES TO THE METLAKATLA INDIAN COMMUNITY

1. The Residents of the Annette Island Reserve Are Citizens of the State of Alaska and Should Not Be Denied Benefits Enjoyed By Other State Citizens Through Their Units of Local Government.

It is important to remember that the residents of the Annette Islands Reserve, both members and nonmembers of the Metlakatla Indian Community, are state citizens. As such they qualify for any distributions of Alaska's wealth made available on a per capita basis to state citizens. Rather than distributing money directly to state citizens on a per capita basis, the Legislature has determined that state revenues should be shared with state citizens indirectly, through grants to individual municipal governments. The best example of this is the Municipal Assistance Fund, AS 43.20.016, under which 30% of the oil and gas corporate income tax revenues are distributed to state municipalities, the amount of the grant being directly proportional to the population of each municipality.

Metlakatla fully supports the substantial policy justification for distributing state wealth through this method. By giving the money to stable local governments, the Legislature is assured that the money will be spent responsibly. The Legislature can reasonably expect that the monies so distributed will be invested in ways that will be of lasting benefit to the citizens of the State, as when the local governments utilize the state grants to build public facilities used by state citizens.

But if the rationale for distributing state wealth to units of local government is that the Legislature wants to see substantial portions of the money permanently invested by responsible governments in a way that will be of lasting benefit to state citizens, there is no reason to distinguish the Metlakatla Indian Community. Although the Metlakatla Indian Community is chartered under federal, not state law, it exercises governmental functions just as state municipalities do. The Metlakatla Indian Community has had a stable and continuous tribal government for more than eight continuous decades. The Legislature can be assured that money distributed to Metlakatla will be applied in a responsible fashion and in ways that will provide lasting benefit to the state citizens who reside there. To deny Metlakatla participation in state revenue sharing and other municipal aid programs, is to deny Alaska state citizens residing at Metlakatla substantial benefits other citizens enjoy.

2. Because of the Very Substantial Cutbacks in Federal Aid to Indian Tribes, the Metlakatla Indian Community Is in Substantial Need of State Assistance.

Although in the past the Metlakatla Indian Community has received substantial federal aid, the situation has changed dramatically for the Metlakatla Indian Community, as for other Indian tribes, under the Reagan administration. On a national level, it is estimated by the National Tribal Chairmen's Association in Washington, D.C. that with the budget cuts of October, 1982, there has been a 45% reduction in federal dollars made available to Indians and Indian tribes on the various reservations through-

out the country. Even the Bureau of Indian Affairs concedes that there has been at least a one-third cutback in federal dollars made available to the tribes.

By way of illustration, on the Annette Islands Reserve, the following programs have received the following cutbacks:

Program	Fiscal Year 1982 Entitlement	Fiscal Year 1983 Entitlement	Percentage Reduction
CETA	$326,000	$162,000	50%
Indian Community Health Program	$ 80,000	$ 55,000	31%
EDA Grant	$ 40,000	$ 30,000	25%
Senior Citizens Program	$112,000	$ 82,000	29%
BIA Welfare Assistance	$ 20,000	-0-	100%

The Metlakatla Indian Community has had very substantial difficulties in making up for these federal cutbacks. At the present time, the level of unemployment on the Annette Island Reserve is 61%. Employment does vary seasonally, but the primary reason for the extraordinarily high level of unemployment now is that the sawmill run by Louisiana-Pacific has closed.

Metlakatla also suffers substantially because of the depressed salmon market. Although the Community itself has had no salmon recalled from its Community operated cannery, the botulism scare has had a substantial impact. This directly impacts funding of the Community's government because profits from the Community cannery and cold storage enterprise are traditionally

applied to the Community's governmental operating expenses rather than being distributed on a per capita basis to the members of the Community.

In addition, although the Community has in the past been able to enjoy substantial revenues from timber sales, the prospect for future sales looks glum. Not only is the timber market presently depressed, but first growth timber has already been largely harvested and it will be many decades before the second growth timber is marketable. The Community estimates that only ten million board feet of original growth timber remain.

3. The Metlakatla Indian Community Functions More Like a "Municipality" Than an "Unincorporated Community" and Should Be Funded Accordingly.

As explained above, the Metlakatla Indian Community, like municipalities organized under state law, has considerable governmental functions and responsibilities. It provides a stable government, substantial municipal services such as water, sewer, and electricity, and police and fire protection to name only a few examples. It also provides substantial social services to the members and nonmembers of the Community who reside on the Annette Islands Reserve.

Unlike the "unincorporated communities" in the unorganized borough, the Metlakatla Indian Community has a need for revenue that is parallel to the governmental services it provides. The mere fact that its charter derives from federal law rather than state law is not a reasonable basis for disqualifying Metlakatla from state revenue sharing programs and other types of state

municipal aid. Amendment of the State statutes to give Metlakatla entitlement will substantially help to equalize the treatment of citizens of the Metlakatla Indian Community and other citizens resident in comparable communities throughout the State.

4. Extension of State Aid to the Metlakatla Indian Community Will Not Give the Community or Its Residents More Favorable Treatment Than Other Similarly Situated State Citizens.

Although the Metlakatla Indian Community does have a unique legal status in Alaska because it is a reservation and because it is excluded from the Alaska Native Claims Settlement Act, the Community believes that its residents would not receive any undue advantage over other Alaska Natives if state laws were amended to make Metlakatla eligible for municipal revenue sharing. First, although the Metlakatla Indian Community gets federal aid because of its status as a federally recognized Indian tribe, it is important to recognize that the other Indian Reorganization Act entities and traditional councils in Alaska also receive the same aid. For example, the Indian Self-Determination Act of 1975 provides that the United States can contract with Indian tribes to allow the tribes to perform various functions that were formerly performed by the Bureau of Indian Affairs or other United States entities. Substantial federal funds, usually referred to as 638 funds, are provided to the Metlakatla Indian Community and other tribes under this program.

But Metlakatla enjoys no special benefit here because the Act defines "Indian tribe" to include not only the Metlakatla

Indian Community but also other Native groups in Alaska. The statute provides that the word "tribe" includes "any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians." Similarly, the Indian Financing Act of 1974, 25 U.S.C. § 1451 et seq., the Indian Health Care Amendments of 1980, 25 U.S.C. § 1601 et seq., the Tribally Controlled Community College Assitance Act of 1978, 25 U.S.C. § 1801 et seq., and the Indian Child Welfare Act of 1978, 25 U.S.C. § 1901 et seq., have all been extended to include other Native communities in Alaska.

Other federal programs, not administered by the Bureau of Indian Affairs, such as HUD, CETA and EDA programs, have been extended to other Alaska Native communities as well as to Metlakatla.

On the other hand, while ANCSA provides that the Metlakatla Indian Community was allowed to retain its reservation status, the statute also provides that the Metlakatla Indian Community and its members are not eligible for the benefits of the Act.

It is also important to realize that as to Natives who reside in communities of substantial size, similar to Metlakatla, state benefits are extended to them because, in most if not all situations, there is a municipality, either a first or second class city or a borough, located there. Attached to this paper is a document prepared by the Tribal Operations Office of the

Bureau of Indian Affairs showing the status of the various Native communities in Alaska. As can be seen, a very substantial number of the communities determined to be eligible by the BIA for federal assistance because of their "Indian" status are also incorporated under state law as a first or second class city. The Natives who reside in such communities, therefore, like other state citizens generally, are eligible for the benefits of state revenue sharing.

Also attached is a computer run by the Department of Community and Regional Affairs showing the amount of state revenue sharing entitlements for various state law municipalities under Title 29 for fiscal year 1982. Looking at those communities with populations similar to that of Metlakatla, one can see that the amounts of state money distributed under Title 29 to such communities are substantial. A few examples will suffice:

Municipality	Population	Fiscal Year 1982 Entitlement
Bristol Bay Borough	1,182	$ 257,237
First Class Cities:		
Craig	560	$ 142,110
Haines	1,017	$ 177,619
Second Class Cities:		
Akolmiut	695	$ 151,277

Even communities with relatively small populations are receiving substantial amounts of state money. The community of

Lower Kalskag, with a population of 244, for example, qualifies for $98,540 in revenue sharing for fiscal year 1982.

STATE PROGRAMS FOR WHICH TEE METLAKATLA INDIAN COMMUNITY DOES NOT QUALIFY

Revenue Sharing Measures.

The most important programs for which the Metlakatla Indian Community does not presently qualify are the on-going state revenue sharing programs. There are now two such primary programs in existence:

1. Municipal Assistance Fund--AS 43.20.016. Under this program, administered by the Department of Revenue, 30% of the general and petroleum corporate income tax revenues received by the State are distributed to municipalities--"organized boroughs and cities of any class." There is no specific statutory requirement as to how the funds should be used but the statute expresses the desire of the Legislature that local governments which levy property taxes should reduce those levies in reasonable proportion to the amount of increased state aid received.

2. Municipal Tax Resource Equalization--AS 29.88.010 et seq. The Department of Community and Regional Affairs administers a program under which the Department distributes state revenues to municipalities which are calculated based on a complex formula. The primary variable are population and the "millage rate equiva-

lent" which is determined according to the assessed property values in the locality. Metlakatla is not eligible for the revenue sharing program because it is not a municipality under the statute. AS 29.89.050 does provide, however, that Native Village governments, including local governing bodies organized under the Indian Reorganization Act, are eligible for a $25,000 payment. Under the Revenue Sharing Program, however, $25,000 is the minimum, not the maximum payment.

As noted above, the revenue sharing entitlements for various local governments in the State with a population similar to Metlakatla are often very substantial. The Bristol Bay Borough, with a population of 1,182, for example, has a 1982 entitlement of $157,000. Haines, a first class city with a population of 1,017, has a 1982 entitlement of $177,000. Akolmiut, a second class city with a population of 695, has a 1982 entitlement of $111,734. It is impossible to determine at this time what Metlakatla's entitlement would be, but it would presumably would be substantially more than the $25,000 it is now eligible to receive.

Other State Programs for Aid to Municipalities.

1. State Aid for Miscellaneous Municipal Purposes. AS 29.89 provides for additional state aid to municipalities for various purposes. AS 29.89.020 provides for state aid to municipalities for road maintenance. Metlakatla does not qualify for this program. The same

chapter also provides for state aid to municipalities for health facilities and hospitals. The Community does not qualify for this program. Title 29 does contain a program for which the Community does qualify, a $10 per capita grant to volunteer fire departments which does not turn on the presence of a state law "municipality."

2. Public Library Construction Grants. AS 14.56.350 provides for the administration of a program of grants to muncipalities for the construction and equipping of libraries. Metlakatla does not qualify under this grant program since it is not a municipality. Presumably Metlakatla also does not qualify for library assitance grants under AS 14.56.300.

3. Water, Sewer and Solid Waste Aid. AS 46.03.030 provides that the Department of Environmental Conservation may make grants up to 50% of the eligible costs for water supply, sewerage and solid waste facilities. Only municipalities are eligible. The State has also established a village safe water program, but Metlakatla does not qualify for this program either because only unincorporated communities with populations less than 600 persons are eligibile.

4. Outdoor Recreational, Open Space and Historic Properties Development. AS 41.22.010 provides for a grant

program to municipalities to acquire, preserve or protect historic sites, buildings and monuments. Only municipalities qualify.

5. AS 41.20.355 established a program for the establishment of public ways for trails and footpaths. Again, only municipalities qualify.

6. Municipal Airport Aid. AS 35.05.020 et seq. provides for state aid to "political subdivisions" for airports. Presumably the Community would not qualify.

7. Port Facilities Development. AS 30.15.010 provides for state grants for port facilities construction to municipalities.

This list may not be exclusive.

CONCLUSION

This paper has been designed to provide general background concerning the State of Alaska's treatment of the Metlakatla Indian Community with respect to state municipal aid programs. It has demonstrated that although the Metlakatla Indian Community is organized under federal, not state law, it nevertheless performs governmental functions and has governmental responsibilities that are every bit as extensive as the municipalities in the State of Alaska serving similar population bases. The Community believes that its disqualification from participation in such programs, particularly the revenue sharing programs, discriminates against Alaska citizens residing on the Annette Island Reserve compared to state citizens in other similar communities. This disparate

treatment is not a result of a policy decision by the state legislature to exclude Metlakatla. It should be corrected by amendment of the State statutes.

 FISCAL NOTE - (continued)

IV. Analysis

This bill would remove from the ary assistance grant program a requirement for a cost of living increase in local operating expenditures of libraries seeking grants. The requirement for COLA creates a hardship for some communities and endangers continuation of the local library service. The COLA requirement has an effect contrary to the intent to strengthen local library services with the grant program.

Increases in local expenditures for local libraries are better determined by local needs and capabilities.

BILL SHEFFIELD
GOVERNOR

HB 598

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 9, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that would eliminate the cost-of-living-adjustment (COLA) requirement in the library assistance grant program. This change was requested by the Department of Education, the state library, and several community libraries. Due to the uncertainty of revenues, public library funding entities are experiencing difficulty in maintaining local funding for library services. Requiring an annual cost-of-living increase in local funding jeopardizes continuation of local library support and handicaps the purpose of the Library Assistance Grant Program to help local libraries provide service.

Usually communities that can increase local support of their public libraries do so. The COLA requirement implies that all communities need to be motivated by a legal requirement when that might be needed for only a few.

Section 1 amends the first sentence of AS 14.56.330(b) to remove the COLA requirement and to make clear that, if a library did not exist in fiscal year 1980, the amount to which the prohibition on using the state money to supplant the local money applies is the amount equal to local expenditures in the first year a matching grant is awarded. Section 2 would make this change effective immediately.

The legislation creating this program in 1981 passed both houses unanimously, and I urge early passage of this bill.

Sincerely,

Bill Sheffield
Governor

MEMORANDUM State of Alaska

TO: The Honorable
Mike W. Miller, Chairman
Community and Regional Affairs
Alaska House of Representatives

DATE: March 2, 1984

FILE NO:

TELEPHONE NO:

FROM: Richard B. Engen, Director
Division of State Libraries
and Museums
Department of Education

SUBJECT: HB 598

Dick Engen

The Cost of Living Allowance or inflation percentage requirement applied to local support of the local public library as a provision for receiving a Library Assistance Grant from the State was intended to assure that local governments would increase local support of local libraries at least at the rate of inflation.

There are two main problems with the COLA provision. They are:

1. Inflexibility- even though local support were increased, it might not be increased enough to meet a fixed percentage; and,

2. Indirect control of local decision - local support beyond maintenance of local expenditures in the base year should be decided by the local community, not by a fixed grant program.

By FY 1984, the COLA provision has become a potential liability to the local libraries. In some of the smaller communities there may not be any more money available for offsetting inflation. This currently would mean loss of the grant and deterioration of the library service. Since matching grants for Public Library Assistance had to be prorated this year at 73%, the State moved into a position of requiring local governments to spend more to receive less.

This position is not supportive of the purpose of the Library Assistance Grant Program or of the local libraries. Local libraries are part of their communities. The grant program is meant to assist public libraries with their operating costs and to be part of the Alaska Library Network. In addition annual reports from the majority of libraries indicate increases in local support since 1980. The increase in the number of eligible library outlets from 64 in FY 1982 to 89 in FY 1984 shows that both the communities and grants are working positively to improve library service in Alaska.

Removal of the COLA provision represents removal of a built-in conflict which creates a negative result for library service.

Two sample letters are attached.

October 26, 1983

Elva R. Scott
Eagle Public Library
P.O. Box 45
Eagle, Alaska 99738

Dear Mrs Scott:

Your Basic Public Library Assistance grant is being processed for FY 1984. I am pleased to see your plan to purchase a microfiche reader. It should be very useful to you and your library users.

Please start keeping circulation records and train volunteers to keep them, too. We use circulation statistics frequently as a mesaure of library activity and it is necessary to include Eagle.

I am concerned about your grant application for FY84 in that you request matching funds. Probably this is a repeated warning but if you start having matching for local funds, you must continue the amount plus cost of living increases or forfeit your grant for at least two years. Some libraries are running into this problem already. Since what you plan to do with your local money may relate to repairs and maintenance, I wonder if you will be able to have local money in the future. I really just want to be sure you understand the commitment you are making.

Sincerely,

Margaret

Margaret Leibowtiz
Deputy Director

cc: Audrey Kolb

Margaret - Elva is gone for the winter from your 3rd paragraph, it sounds like we should not apply for the matching funds so, if possible, please cancel that part of the grant.

November 14, 1983

Margaret Leibowitz, Dep. Director
St. of Alaska/Dept. of Educ.
Alaska State Library
Pouch G
Juneau, Alaska 99811-0571

Dear Ms. Leibowitz:

The following information is what was requested on October 24th for our 1983 State Library Grant.

The library is kept open fifty weeks out of the year. We have $1101.94 left from the 1982 grant. The following orders are outstanding: World Book Encyclopedia @ $473.00; and Story House Corp. @ $310.00. That leaves about $319.00 to cover continues cataloging (card kits and labor) until the new grant arrives.

The library use statistics show the following community patron use: from November, 1980 to June, 1981 was 95 items - Cantwell started receiving television that year. July, 1981 to June, 1982 was 150 items. July, 1982 to June, 1983 was 300 items. July, 1983 to November, 1983 was 233 items. The library has one entire wall physically open to the main entrance hallway of the building with about only 35' of hallway reaching to the main doors. I had tried some evening hours in 1981, but haven't tried since then as I had had very little response. I'll be glad to approach the community about hiring someone as I as taking night classes. I do check books out for people any time I am in the building for classes or meetings. The school is still the major center for 95% of the meetings that are held in the community, and all of the adult education classes.

A Community of Cantwell, Inc. meeting was held November 9, 1983. It was decided that I should not apply for the matching grant monies even though the library has been designated to receive monies from them again. I was asked to get the complete procedures for the library grant and the matching grants. Margaret, this is the first time I have ever been told about the community being obligated forever and ever with cost of living increases. I would appreciate receiving ALL the information possible regarding this matter. Thank you.

Sincerely yours,
Armeda A. Bulard

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 625 (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to municipal taxation of agricultural land; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.035(a) is amended to read:

(a) Farm use lands included in a farm unit and not dedicated or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use, and shall not be assessed as if subdivided or used for some other nonfarm purpose. The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be sold, leased, or otherwise disposed of for uses incompatible with farm use or be converted to a use incompatible with farm use by the owner, the owner is liable to pay an amount equal to the additional tax [AT THE CURRENT MILL LEVY TOGETHER WITH EIGHT PERCENT INTEREST] for the preceding seven years [,] as though the land had not been assessed for farm use purposes, together with simple interest at the prime rate on January 1 of the year the additional tax is due, as determined by the Alaska Housing Finance Corporation, plus one percent. Payment by the owner shall be made to the state. If the state has not made full [TO THE EXTENT OF ITS] reimbursement for revenue loss under (e) of this section for the preceding seven years, the state shall pay that portion of the payment to the municipality that is necessary to fully reimburse it together with a proportional share of the interest [. THE BALANCE OF THE PAYMENT SHALL BE MADE TO THE CITY OR BOROUGH].

* Sec. 2. AS 29.53.035(b) is amended to read:

(b) An owner of farm use land must, to secure the assessment, make application to the assessor before May 15 of each year in which the assessment is desired. During the same year, however, the governing body of the municipality may for good cause shown waive the owner's failure to make timely application for the assessment for that year and authorize the assessor to accept the application as if timely filed. The application shall be made upon forms prescribed by the state assessor for the use of the local assessor and shall include information that [WHICH] may reasonably be required to determine the entitlement of the applicant. If the farm use land is leased for farm use purposes, the applicant shall furnish to the assessor a copy of the lease bearing the signatures of both lessee and lessor along with the completed application. The applicant shall furnish the assessor a copy of the lease covering the period for which the exemption is requested.

* Sec. 3. AS 29.53.035(c) is amended to read:

(c) In this section "farm use" means the use of land for raising and harvesting crops, [OR FOR] the feeding, breeding and management of livestock, [OR FOR] dairying or another agricultural use, [FOR PROFIT] or any combination of them [THEREOF]. To be farm use land, the owner or the lessee must be actively engaged in farming the land [, AND DERIVE AT LEAST 10 PER CENT OF HIS YEARLY GROSS INCOME FROM THE FARM USE LAND]. The provisions of this section do not apply to land respecting which the owner has granted, and has outstanding, a lease or option to buy the surface rights. A property owner wishing to file for farm use classification having no history of farm-related activities [INCOME] may submit a declaration of intent at the time of filing the application with the assessor setting out the intended use of the

land [AND THE ANTICIPATED PERCENTAGE OF INCOME]. An applicant using this procedure shall file with the assessor before February 1 of the following year a notarized statement detailing the farm use activities on the farm use land [OF THE PERCENTAGE OF GROSS INCOME ATTRIBUTABLE TO THE FARM USE LAND]. Failure to make the filing required in this subsection forfeits the exemption.

* Sec. 4. AS 29.53.035(e) is amended to read:

(e) Subject to legislative appropriations for the purpose, the state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of this section. ~~If appropriations are less than the amount necessary for full reimbursement to each municipality under this subsection, payments shall be determined by prorating appropriations using a factor that, when applied, reduces all payments by an equal percentage.~~ Reimbursement under this subsection is a lien in favor of the state against the farm use land to the extent of the deferred tax and interest that may be collected under (a) of this section. Upon recordation in the recording office of the district in which the farm use land is located, the lien is prior and superior to other liens against the property except for general taxes or special assessments and may be enforced by lien foreclosure. The lien becomes immediately due and payable when the property is converted to a use incompatible with farm use.

Motion defeated 4/is section - 3/26/84

* Sec. 5. AS 29.53.035(d) is repealed.

* Sec. 6. This Act takes effect January 1, 1985.

PASSED H(C&RA) -

Alaska State Legislature

House of Representatives

Committee on
Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811
(907) 465-3870

TO: House Community and Regional Affairs Committee

FROM: House Community and Regional Affairs Staff

DATE: March 26, 1984

SUBJ: CSHB625

As per Chairman Mike W. Miller's instructions, staff returned the work draft to the Dept. of Community and Regional Affairs Mike Worley, State Tax Assessor to review the date to be tied to the prime rate on line 21, page 1, section a.

The date of January 1 was chosen, rather than date of sale, as being an equitable date for all concerned because of the possibility of the land being taken out of the "farm use" category but not necessarily sold.

While reviewing the bill with Mr. Worley and Lisa McClaren of Rep. Kopenen's staff, we discovered that there was a double payment to the borough at this time in the statute. If the state has paid to the borough the full reimbursement for revenue loss, there was no need for any of the penalty monies to be passed to the municipality involved. However, if there has been a shortfall declared and the municipality did not receive full reimbursement, it is suggested to the Committee that lines 24 - 28 be added to insure the municipality of being able to recoup their loss during a seven year period.

A concern, generated by staff and shared by the tax assessor, is the possibility of a new owner having no knowledge of a large tax bill on the land he has just bought and being legally liable for this debt as the assessment and debt incurred is upon the property, not an individual. Lines 14 - 22 of page 3 have been suggested to the committee as the insurance against this happening. This language is already in place in other legislation such as AS 29.63.05 EXEMPTION so there is a precedent. This language forces the state to do the paperwork to insure a title company of finding the lien. At this time, there is an undeclared lien upon all such exempted property which is legal and binding. This language just makes sure that all persons entering into a real estate transaction will be informed of the indebtedness against such property.

Alaska State Legislature

House of Representatives

Committee on
Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811
(907) 465-3870

TO: House Community and Regional Affairs Committee

FROM: House Community and Regional Affairs Staff

DATE: March 21, 1984

SUBJ: CSHB625

The committee substitute for HB625 is suggested by staff in answer to suggestions outlined by constituents and the Department of Community and Regional Affairs.

Rep. Kopenen's original bill is intact within the committee substitute. Staff has interviewed the Dept. of C & RA and other interested parties and there has been no great show against the bill. However, in interviewing the constituency, staff found that the bill stopped short of what several organizations would like to eventually have placed in the statutes. Also, the Dept. of C & R A had some house keeping amendments that they would like see enacted. By revising HB625 into a committee substitute, the Committee can handle the other requests without drawing up separate legislation.

*Section 1 -

The Department of C & R A wanted to bring the penalties more in line with modern day inflation. There suggestion was raise the 8% interest rate to a much higher rate. The mill levy has in the last couple of years declined and the language "current mill levy" could offer substantial gains to the individual and losses to the state and borough. The reverse could also be true, as state revenues decline and mill rates are elevated. Since this particular statute was written as a deterrent to farmers selling off prime farm land to other developing interests, it is felt that tying the penalties to the fluctuating current prime rate of interest would tend to make the penalties more fair and equitable and legislation would not have to be enacted for inflation adjustment. The penalties are now being computed at compounded interest and in conversation with C & R A, it was felt that simple interest would be fair with the fluctuating prime rate tied to it.

*Section 2 -

The changes in this section have been precipitated by several associations involved with farming. "Ag rights" land has to be filed upon

initially and not until a change of lease holder, does this filing take place again. However, fee simple property has to be filed yearly by a certain date to retain "farm use" status and have a special assessment. It is felt that there is great inequity between the filing system of "ag rights" land and "fee simple" land. However, "ag rights" land is not owned by an individual and the state holds all the power on the status of that land. "Fee simple" is of course owned by the individual and therefore, the individual has the option to do anything with their land that they desire. Since the "ag rights" land can never be switched to another status without the state becoming immediately aware of the fact, there is no need to file more than initially. The local and state assessors are concerned that if only an initial filing is required on "fee simple" property, they might not be able to become aware of changes affecting the "farm use" status. The official date of tax assessing is the 1st of January of each year. In talking with local assessors, they try to have their records updated by the 1st of March. Since it is sometimes very hard to determine land status under 20 feet of snow, they make their notes and then compare them to the filing when the property owner submits it. If there is a great discrepancy or unanswered questions, the assessor will contact the property owner for the answers. The local assessor feels he needs to have the yearly filing and it should not be a great deal of time out of the land owner's year to fill out the paperwork and get it to the assessor. In talking with land owners, they did not like the deadline for fear they could lose a year's tax status inadvertantly or thru carelessness. The change suggested gives the land owner an opportunity to show good cause and gain a waiver for failure of timely application.

*Section 3 - Rep. Kopenen's bill.

*Section 4 - Rep. Kopenen's bill.

*Section 5 -

This section is suggested by the Dept. of C & R A to handle prorating in case of shortfalls. This section, staff is informed, will start being introduced in legislation to help in the future and eliminate the need for special appropriation legislation.

*Section 6 -

The effective date of this bill is changed to Jan 2 to keep this bill from being null and void when CSHB172 becomes effective. Merely a housekeeping precaution.

POSITION PAPER

RE: CS HB 625
SPONSOR: ~~Rep. Koponen~~ H(C+RA)

POSITION: No objection

PROGRAM EFFECTS

The bill removes the ten percent income requirement from the agricultural lands tax deferment program and corrects and clarifies some of that existing language.

COMMENTS

The Department supports the language in the bill which corrects or clarifies existing law.

In Section, 5, the bill allows the Department to prorate payments to municipalities in the event State revenues are not adequate to fully fund the program.

Elimination of the phrase "at the current mill levy" (Section 1), in conjunction with the adoption of a higher rate of interest, provides the means for avoiding potential problems which could result from the sale of farm property in the future. In the event municipal mill rates were to drop, the language in existing law would encourage farmers to (1) sell their property into development status, and (2) in the process of doing so, pay lower property taxes than other taxpayers have in past years.

The corrective language provides a penalty and a rate of interest which should encourage the farmer (1) not to sell at all, or, if he does sell the property, to sell it for farm use purposes, and (2) pay back taxes at a higher rate than other property owners, in the event he does sell the property into development.

The language is Section 2,which allows the local governing body to "waive the owner's failure to make timely application", is the same as existing language in statutes governing other tax programs which the Department administers. We have not seen any problems develop locally as a result of that language, and we have no objection to its introduction into the farm use program.

Shirley –

Here is the tax application form you requested, as you can see it's a ring-tailed snorter.

Am working on getting input to you regarding our conversation, but as you can guess it will take a few days to have results – only hope it will be timely enough to be usable.

Let me know if I can do more, or can expedite matters in any way.

Chuck

FARM USE ASSESSMENT APPLICATION
AS 29.53.035

Application must be filed on or before May 15, of the assessment year.
Complete a separate form for each parcel contained within the farm unit.

ALASKA STATUTES TITLE 29, MUNICIPAL GOVERNMENT
CHAPTER 53, MUNICIPAL ASSESSMENT AND TAXATION:

Sec. 29.53.035. Farm or agricultural lands. (a) Farm use lands included in a farm unit and not dedicated to or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use, and shall not be assessed as if subdivided or used for some other nonfarm purpose. The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be sold, leased, or otherwise disposed of for uses incompatible with farm use or be converted to a use incompatible with farm use by the owner, the owner shall be liable to pay an amount equal to the additional tax at the current mill levy together with eight percent interest for the preceding seven years, as though the land had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the city or borough. (sec 3 ch 229 SLA 1976)

(b) An owner of farm use land must, to secure the assessment, make application to the assessor before May 15 of each year in which the assessment is desired. The application shall be made upon forms prescribed by the state assessor for the use of the local assessor and shall include information which may reasonably be required to determine the entitlement of the applicant. If the farm use land is leased for farm use purposes, the applicant shall furnish to the assessor a copy of the lease bearing the signatures of both lessee and lessor along with the completed application. The applicant shall furnish the assessor with a copy of the lease covering the period for which the exemption is requested.

(c) In this section "farm use" means the use of land for raising and harvesting crops or for the feeding, breeding and management of livestock or for dairying or another agricultural use for profit or any combination thereof. To be farm use land, the owner or the lessee must be actively engaged in farming the land, and derive at least 10 percent of his yearly gross income from the farm use land. The provisions of this section do not apply to land respecting which the owner has granted, and has outstanding, a lease or option to buy the surface rights. A property owner wishing to file for farm use classification having no history of farm-related income may submit a declaration of intent at the time of filing the application with the assessor setting out the intended use of the land and the anticipated percentage of income. An applicant using this procedure shall file with the assessor before February 1 of the following year a notarized statement of the percentage of gross income attributable of the farm use land. Failure to make the filing required in this subsection forfeits the exemption.

(d) In the event of a crop failure by an act of God the previous year, the owner or lessee may submit an affidavit affirming that 10 percent of his gross income for the past three years was from farming.

(e) Subject to legislative appropriations for the purpose, the state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of this section.

ALASKA ADMINISTRATIVE CODE TITLE 19, DEPARTMENT OF COMMUNITY & REGIONAL AFFAIRS
CHAPTER 38, FARM OR AGRICULTURAL LANDS

19 AAC 38.010. FORMS. (a) The Department of Community and Regional Affairs Form 21-410 and Form 21-411 are adopted for use in application for the farm and agricultural land use assessment and tax deferment program.

(b) Application and authorization forms shall be made available by and shall be returned to the clerk or assessor of the municipality in which the land for which the farm use assessment and tax deferment are sought is located. (Eff. 12/31/75, Reg. 56)

19 AAC 38.020. SUPPLEMENTARY INFORMATION SUPPORTING APPLICATION FOR THE ASSESSMENT AND TAX DEFERMENT. Annulled under AS 44.62.320, passed 5/25/77.

19 AAC 38.030. APPEAL. An Applicant for the farm use assessment and tax deferment who believes that the valuation or classification assigned to the land that is the subject of the application is erroneous may appeal to the board of equalization of the municipality in which the land is located in the manner provided by AS 29.53.130. The municipality shall report the disposition of all such appeals to the state assessor. (Eff. 12/31/75, Reg. 56)

19 AAC 38.040. MAINTENANCE OF RECORDS - DUPLICATE COPIES. The municipality in which the land is located shall maintain separate files and records of all applications for the farm use assessment and tax deferment, whether allowed by the municipality or not, including valuation of the property under the full and true value standard of AS 29.53.060. Duplicate copies of all records relating to the application entered in the file shall be forwarded to the state assessor. The municipality shall investigate to determine whether title to land for which the assessment and deferment have been granted has been conveyed or alienated in such a way that the assessment or deferment may be terminated and shall advise the state assessor as to the results of its investigation. (Eff. 12/31/75, Reg. 56)

19 AAC 38.050. CONFIDENTIALITY. Tax records and other documents providing evidence of the applicant's eligibility for the farm use assessment and tax deferment are confidential and shall be used only for the purpose of ascertaining whether the applicant is entitled to the benefits of the assessment and deferment. (Eff. 12/31/75, Reg. 56)

19 AAC 38.060. DEFINITIONS. In this chapter:

(1) "farm use assessment" means the value of the unit or parcel of property for which application for a farm use assessment and tax deferment is made, based upon its highest and best use as farm or agricultural land;

(2) "yearly gross income" means the income of the applicant for the year preceding the tax year for which the application is filed and means the adjusted gross income of the applicant as defined in Section 62 of the Internal Revenue Code (26 U.S.C. 62). (Eff. 12/31/75, Reg. 56)

MAR 14 '84

Dear Rep. Miller:

Thank you for your calls for information on our experiences with farm taxation as relates to HB 625.

We strongly urge your support of HB 625. Passage would result in the people who are creating and developing farms be assessed at fatm tax status. Most farmers have a difficult time deriving any income from farms for many years so are unable to prove 10% of their gross income has come from farming.

We had hoped that legislation could be introduced so famers would not need to apply for farm tax status on a yearly basis. Perhaps such legislation will be introduced at a future date.

We are strongly opposed to HB 641 which would create a Recreation Area in Pot Latch Ponds. Some of the acres are not suitable for farming, but many of the acres in Pot Latch Ponds could be developed as good agricultural lands. Many people have waited four years to have an opportunity to do just that. We strongly urge defeat of HB 641 so farmers will be allowed to develop this area.

We would appreciate your support of HB 625 and defeat of HB 641. Thank you.

Sincerely,
McKee, Inc.

THE GRANGE

AMERICA'S FAMILY COMMUNITY FRATERNITY

Two Rivers Grange No. 3

S.R. 50985
Fa irbanks, Alaska, 99701

December 5, 1983
Representative Mike Miller
P.O. 55094
North Pole, Alaska, 99705

Representative Miller:

Farmers in the North Star Borough question the need to apply for farm tax status each year. Many of the farmers have state "Ag-Rights Only" land which limits the use of the land to agriculture. Many farmers have filed for farm tax status yearly for many years.

It is felt by many farmers that this yearly task is redundant, yet they must comply or pay full-value taxes.

We recommend that legislation be enacted to require only an initial filing for farm taxes. If land no longer is used for agricultural purposes, it would become the responsibility of the tax payer to notify the proper taxing body.

We appreciate your attention to this matter.

Yours truly,

Two Rivers Grange #3

Alice H. McKee, Sec.

Fairbanks, Alaska 99701

December 19, 1983

Dear Ms. McKee,

After reviewing your recent letter concerning farmers having to apply annually for a special tax status, I instructed a member of my staff to look into the problem.

Mr. Dave Braden's office was contacted at the Borough Assessment Department. They explained that the only farmers who need to apply for a special tax status annually are those who own "fee simple" land. It seems that in the past a few "Ag rights only" folks were erroneously required to file for the special status, however, it is not the intent of the Borough to require such action.

I hope this clears up any questions that you may have. If additional questions arise, Mr. Braden may be contacted at 452-4761, ext. 213.

Should you need additional assistance from my office please do not hesitate to call.

Sincerely,

Rep. John Ringstad

MAR 14 '84

Dear Rep. Miller·

The members of the Two Rivers Grange #3 sincerely appreciate your support for the agricultural industry.

We urge your support for HB 625. Enactment would encourage development of agricultural lands. The development stage is tremendously expensive and rarely is offset by any income. Therefore the 10% of gross income required to qualify for farm tax status is often unobtainable.

Our members are opposed to HB 641 to create a recreational area in the Pot Latch Ponds parcel. We would urge that this bill not get out of committee. Some of the land in Pot Latch Ponds is not farmable, but many acres are. Pebple should be given the opportunity to develop these acres.

We would appreciate your support for HB 625 and defeat of HB 641. Thank you.

Sincerely,
Two Rivers Grange #3

HOUSE BILL NO. 629

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing that certain Native governments and corporations are political subdivisions of the state for the purpose of receiving state funds."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.73 is amended by adding a new section to read:

Sec. 29.73.090. NATIVE GOVERNMENTS AND CORPORATIONS. A Native government organized under 25 U.S.C. 476 or a Native corporation organized under 25 U.S.C. 477 is a political subdivision of the state for the purpose of receiving state funds and qualifies for state assistance available to municipalities or other governmental entities.

POSITION PAPER

RE: CS HB 629 (C&RA)
SPONSOR: Representative Lindauer

PROGRAM EFFECTS:

This bill would qualify Native councils of a federally recognized tribe or an Indian Reorganization Act council to receive State assistance on the same basis as money is made available to second class cities. Native councils representing villages of less than 25 permanent resident voters, or representing villages that would not qualify to incorporate as cities due to population or location, would not be eligible.

Native councils receiving money under this section would have to meet the same requirements as those imposed on second class cities. This would include increased requirements in the areas of budgeting, certified financial statements, annual elections, regular and public council meetings, and a codification of ordinances passed by the council. The bill further requires that funds be used only for a public purpose in a nondiscriminatory way.

The Department shall, by January 1 of each year, certify and transmit to the Legislature a list of all communities which qualify under this provision.

The method used to implement these provisions is a bit confusing because it does not address, or even cross-reference, the actual sections of State law affected by this provision.

COMMENTS:

While the Department supports the concept of this bill, the items mentioned above would need to be addressed.

APPROVED: Emil Notti
Emil Notti, Commissioner

Analysis -- CSHB 629

700 Grants

Approximately 55 Native Councils in unincorporated communities now receive, or are eligible to receive, State Revenue Sharing of $25,000 as unincorporated communities. To pay Native Councils as second class cities receiving minimum entitlements of $25,000 plus a cost- of-living adjustment would increase the entitlement going to Native Councils by about $8,000 per council government. Therefore, part of the fiscal impact of this bill is reflected by:

55 Native Councils X $8,000 = $440,000

In addition, the bill would pay about 10 Native Village Councils located outside cities but within organized boroughs about $33,000 each on average. These communities do not presently receive anything under State Revenue Sharing. Therefore, the remainder of the fiscal impact of this bill would pay:

10 Native Councils inside organized boroughs X $33,000 = $330,000

TOTAL FISCAL IMPACT $770,000

Analysis for CS HB 629 (C&RA):

This bill will have no effect on the administrative cost of the municipal assistance program in the Department of Revenue. The effect of Section 1 would be to reduce the amount of municipal assistance shared with cities and organized boroughs currently covered under the law. The extent of this dilution would depend on the number of native governments and native corporations qualifying under Section 1. The impact would be to reduce the amount available for per capita sharing under AS 43.20.016.

Dear Representative Lindauer:

On behalf of the Board of Directors and the Shareholders of the Ukpeagvik Inupiat Corporation, we would like to commend you on taking the initiative of introducing House Bill No. 629 in the Thirteenth Alaskan Legislature. UIC represents approximately 54 % of the North Slope Inupiat.

We believe thet House Bill No. 629 is an important piece of legislation which merits a positive review by the Community and Regional Affairs, Judiciary and Finance Committees. The Ukpeagvik Inupiat Corporation Resolution 84-6, which is enclosed, affirms that position.

If we can be of any assistance to you whatsoever with reference to this legislation, please do not hesitate to contact me at your convenience.

Sincerely,

R.C. HARCHAREK, PH.D

WHEREAS, Ukpeagvik Inupiat Corporation is the village corporation of Barrow, Alaska organized pursuant to Sec. 8 of the Alaska Native Claims Settlement Act; and

WHEREAS, Article III of the Articles of Incorporation of UIC states the purposes for which this corporation is organized; and

WHEREAS, enumerated item number three (3) of Article III states as an organizational purpose: "To engage in all activities, whether economic, cultural, social or charitable to protect and preserve the well-being of the Native residents of the Native Village of Barrow, and to engage in and conduct any and all lawful activity necessary or convenient in furtherance thereof"; and

WHEREAS, enumerated item number five (5) of Article III states as an organizational purpose: "To do all and everything necessary suitable or proper for the accomplishment or attainment of any benefit or object herein set forth, including every act or thing necessary, incidental or pertinent to or growing out of or connected with the affairs of the Corporation"; and

WHEREAS, House Bill No. 629 in the Legislature of the State of Alaska, Thirteenth Legislature was introduced on 13 February 1984 by Representatives Lindauer, Adams and Hurlbert; and

WHEREAS, House Bill No. 629 in the State of Alaska Thirteenth Legislature Second Session states in §. 29.73.090. "Native Governments and Corporations. A Native government organized under 25 U.S.C. 476 or a Native Corporation organized under 25 U.S.C. 477 is a political subdivision of the state for the purpose of receiving state funds and qualifies for state assistance available to municipalities or other governmental entities."; and

WHEREAS, the Ukpeagvik Inupiat Corporation Board of Directors at their regular monthly meeting discussed and analyzed at length the intent and content of House Bill 629,

NOW THEREFORE BE IT RESOLVED, that the Ukpeagvik Inupiat Corporation be on record as endorsing House Bill 629: "An Act providing that certain Native governments and corporations are political subdivisions of the state for the purpose of receiving state funds."

BE IT FURTHER RESOLVED, that the Ukpeagvik Inupiat Corporation commends Representatives John Lindauer, Albert P. Adams and

P. O. Box 427, Barrow, Alaska 99723
(907) 852-4460 Telex 25287

Vern Hurlbert for taking the initiative of bringing this important matter before the House of Representatives.

FURTHER RESOLVED, that the Ukpeagvik Inupiat Corporation requests the Community and Regional Affairs, Judiciary and Finance Committees to take action in support of this legislation.

DATED this 14th day of March, 1984.

President

SUBJECT: State assistance to Native Councils
(CS HB 629 (C&RA))

TO: Representative Mike W. Miller
Chairman, House Community and
Regional Affairs

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

Here is the section by section analysis that you requested of the attached draft.

Section 1 A traditional Native council or Native council organized under the Indian Reorganization Act is qualified to receive state aid under any law that makes money available to second class cities. The council receives the aid on the same basis as the city would. To qualify for aid the community represented by the Native council must not be incorporated as a city, must contain at least 25 resident voters or qualify by population and location for incorporation, and must be a Native village as defined under the Alaska Native Claims Settlement Act. (Note that, despite this provision, a Native council may not qualify to receive money under every program that a second class city receives money under. For example, AS 29.88 provides money to "taxing units" and a Native council, which probably does not impose local taxes, may not qualify as a "taxing unit."

State money received by a Native council may be used only for public purposes and in a manner that does not discriminate. Expenditures are subject to audit and reporting requirements of the Department of Community and Regional Affairs. The department is authorized to adopt regulations to implement this section and is required to transmit to the legislature a list of all communities that qualify for state assistance annually. The section is not to be construed to increase or decrease the authority of a Native council.

Section 2 The Act takes effect at the beginning of the next fiscal year.

You have also asked whether Metlakatla Indian Community will qualify for aid under this draft. Metlakatla does not qualify under sec. 29.73.090(a)(3) because it is not a Native village for purpose of ANCSA. If it is the intent of the committee that Metlakatla be included, that paragraph could be amended to read:

> . . . is a Native village as defined under 43 U.S.C. 1602(c), or is a federally established Indian reserve in existence before enactment of 43 U.S.C. 1618(a) and continued in existance under 43 U.S.C. 1618(a).

If I can be of further assistance with this draft, please let me know.

Re: Proposed CS for HB 629 (C&RA)

Dear Representative Miller:

At the request of your staff we have reviewed the proposed Committee Substitute for House Bill 629, regarding state assistance to Native Councils. We limit this review to legal aspects only and do not address policy or administrative matters.

In our review of the original version of HB 629 we identified four constitutional problems and numerous other legal problems. The proposed committee substitute addresses the non-constitutional problems, but three of the four constitutional problems remain. Specifically,

1) the measure may contravene Article X, Section 2, which limits local governments to boroughs and cities, since it could be read as granting local government status, including the right to receive and spend public funds, to other entities;

2) the measure would commit the expenditure of public funds to the discretion of a group whose membership is racially restricted, i.e., to a quasi-government elected by citizens of only one race, in violation of Article I, Section 3;

3) the measure would be open to attack on equal protection grounds (Article I, Section 1) by similar groups, e.g., nonprofit organizations, performing similar functions in other communities.

In view of these problems, the Department of Law advises caution by the committee, and we are available to assist if the committee wishes to identify other avenues for providing services to rural communities which do not involve these constitutional problems.

Analysis for HB 629:

This bill will have no effect on the administrative cost of the municipal assistance program in the Department of Revenue. The effect of Section 1 would be to reduce the amount of municipal assistance shared with cities and organized boroughs currently covered under the law. The extent of this dilution would depend on the number of native governments and native corporations qualifying under Section 1. The impact would be to reduce the amount available for per capita sharing under AS 43.20.016.

Re: HB 629 - Native Governments and Corporations

The brevity of HB 629 belies the complexity of the issues it raises. However, if Native governments and corporations are recognized as political subdivisions for the purpose of receiving state funds, the League urges that the total funding for the state programs for which these entities would be eligible be increased accordingly. This is necessary to preclude the dilution of funding to the current recipients, e.g. State Revenue Sharing.

Re: HB 629

Dear Representative Miller:

At the request of your staff we have examined HB 629 for legal problems. The Department of Law believes HB 629, as written, has several significant defects which render it unconstitutional as well as impractical to implement. The bill would essentially designate native councils created under the Indian Reorganization Act ("IRA") of 1934 as "political subdivisions" of the state.

On the constitutional level, the bill may violate four separate provisions of the Alaska Constitution:

(1) Article X, Section 2 limits local government authority to boroughs and cities. HB 629 would effectively grant local government status -- including the right to receive and spend public revenues -- to entities which have not been created by the constitutional procedure for creating boroughs and cities;

(2) Article IX, Section 6 prohibits the appropriation of public money, or the transfer of public property, except for a public purpose. HB 629 would permit public funds, collected from state taxpayers, to be spent for whatever purposes the IRA council -- a group which does not represent all citizens -- deems proper. There is no requirement in the bill that these state funds be spent to benefit the whole public rather than a limited segment of it;

(3) Article I, Section 3 prohibits denial of political or civil rights on the basis of "race, color, creed, sex, or

national origin." HB 629 would designate as a political subdivision of the State of Alaska an organization which is open only to persons of one race. "Governmental" decisions on spending public funds would be made by a council for which members of all races except one are prohibited from voting;

(4) Even if the above problems were somehow avoided, the bill would still be open to challenge by other organizations occupying a parallel position in villages without IRA councils. Article I, Section 1 guarantees equal protection, which could conceivably be denied if there were no parallel provision for communities with traditional councils or other organization performing tasks similar to those performed by IRA's.

Several other legal/practical problems also exist:

(1) There are 212 communities in Alaska generally considered native villages. 117 of these have regular city governments, some 90 have traditional councils, and approximately 70 have IRA councils; there is quite a bit of overlap, with 46 communities having both city governments and IRA councils. HB 629 makes no distinction between IRA's in communities with city governments and IRA's in communities without them; presumably all IRA's could qualify, while all entities which are not IRA's would not.

(2) IRA councils vary greatly in the way they function in individual communities. In some communities they may perform functions somewhat akin to a limited local government; in other places, especially where there is a regular city government, IRA councils provide only cultural activities for the native segment of the community; in other places, IRA councils may exist on paper but are actually inactive and moribund. HB 629 contains no way to distinguish between these differing situations; presumably all IRA's, including those with no "governmental" role, would qualify.

(3) By officially designating IRA councils as "political subdivisions" of the State, HB 629 would strengthen the argument that such councils are sovereign local governments. The State is already confronting claims by IRA councils that their members are a) exempt from state fish and game laws; b) entitled to exclude non-natives from non-defined geographical areas; c) exempt from state taxation; d) entitled to state funding of social services provided by

IRA councils; and e) entitled to adjudicate the rights of members and non-members in council-created "courts." While it is clear that IRA councils may possess certain rights under federal law, the extent of those rights is not clear and is now in litigation. By designating IRA councils as "political subdivisions," HB 629 may have a serious effect on that litigation and on ongoing discussions with native sovereignty advocates aimed at gaining a consensus on these questions.

We urge the committee to be cautious in its approach to this bill in light of these comments.

Finally, we point out that if the real concern behind this bill is to provide adequate services for all rural communities, there are existing legal avenues, as well as other approaches which could be legally enacted, to achieve that end while avoiding the constitutional and practical pitfalls noted above. We would be happy to work with the committee to explore these alternatives.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

M E M O R A N D U M February 24, 1984

SUBJECT: Native governments as political subdivisions of the state (HB 629)

TO: House Community and Regional Affairs

FROM: Tamara Brandt Cook
Deputy Director TBC
Division of Legal Services

You have asked what the effect of HB 629 is. That bill provides that corporations and governments organized under the Indian Reorganization Act are political subdivisions of the state for the purpose of receiving state funds and that they qualify for state assistance available to municipalities or other governmental entities.

This provision conflicts with the various statutes that provide for state assistance and probably cannot be reconciled with them. For example, AS 29.88 provides aid based on a formula that includes consideration of locally generated tax revenue. That formula would probably make little sense if applied to IRA councils and corporations, because it is unlikely that these entities tax at all. In addition, that program provides aid to "taxing units" defined as particular tax regions of municipalities. Despite HB 629, an IRA council or corporation cannot be deemed to be either a municipality or one of its specified taxing regions that qualify for aid. Even if the organization were found to qualify for aid, it would be impossible to determine the level of aid it qualified for under the formula provided in AS 29.88 because that formula was never designed to apply to that type of organization. If it is intended that IRA councils and corporations receive assistance under AS 29.88, that program needs to be adjusted to specifically include them. The same is true of other assistance programs. Each program must be specifically amended to include IRA councils and corporations. HB 629 as it is now written only creates confusion in the application of statutes providing for state assistance.

However, simply amending each aid program so that it applies to IRA councils and corporations could create a serious constitutional problem. The United States government has a special trust relationship with Native peoples which permits the federal government to accord certain types of preferential treatment to Natives. The preferential treatment is not considered to amount to racial discrimination so long as it furthers the federal government's trust obligation. Morton v. Varconi, 417 U.S. 535 (1974). However, even the federal trust obligation is a limited one that will not justify every form of legislative preference. United States v. Mitchell, 445 U.S. 535 (1980). It is interesting to note that the extent, or even existence, of a general federal trust responsibility to Alaska Natives has been questioned. North Slope Borough v. Andrus, 642 F2d 589 (1980). In any case, state governments do not have a special trust relationship with Natives that would justify special treatment along racial lines. Oklahoma Tax Commission v. United States, 319 U.S. 598 (1943); White v. Califano, 437 F. Supp. 543 (1977). Should IRA councils and corporations be included in various aid programs, care must be taken to avoid state involvement in racial discrimination. Perhaps this could be done by requiring, as a condition of receiving state assistance, that the state money be used for the benefit of the general public.

Another constitutional problem may be created by HB 629. To the extent that IRA councils and corporations are recognized as local governments, Article X, sec. 2 of the state constitution is violated. That article provides in pertinent part:

> All local government powers shall be vested in boroughs and cities.

It should be remembered that, while IRA councils are at least governmental in nature, IRA corporations do not have the regulatory, tax, and police power of local governments and cannot properly be treated as governments. The use of IRA councils and corporations to provide local governmental services together with the granting of state money to finance governmental activities would raise them to a status dangerously close to that of local governments in violation of Article X, sec. 1, 2, 7 and 8. Consequently, if IRA councils and corporations are included in aid programs, the use that may be made of the money received by them must be carefully considered and defined by statute. For example,

the municipal assistance program, AS 43.20.016, does not require that grant money be used for any particular purpose. The intent of the program is to reduce the level of local taxes imposed by recipient municipalities. Since this intent is not applicable to IRA councils and corporations, it would appear that this statute would have to be altered considerably if it were to include those organizations.

In restructuring the various aid programs to include IRA councils and corporations, consideration should be given to the relationship between those organizations and incorporated municipalities. Otherwise, conflicting jurisdictions and duplication of efforts to provide services will result, especially as to Native villages located in boroughs.

In conclusion I must point out that the legal effect of HB 629 is far from clear. The bill may, in fact, have no legal effect because of inconsistencies between it and other statutes, and because of uncertainties regarding constitutional matters.

SUBJ: HB679 - Municipal Bond Bank Authority

Staff contacted Lee Sharp of the Juneau City and Borough government and Daniel Cowden, Anchorage Municipality (OMB).

Mr. Sharp stated that the Juneau Assembly had not addressed this bill. However, in the past, the City and Borough have always supported increases in the total amount of bonded indebtedness.

Mr. Cowden passed on my request for information to the proper departments in the Anchorage Municipality. When no information was forthcoming, staff made a follow up call. Mr. Cowden reiterated that if the department involved does not advise him negatively or if the bill is not listed on the Muni's concern list, he has no alternative but to come to the conclusion that the Muni is not overly concerned by the intent of a bill.

IV. Analysis for Municipal Bond Bank Authority

Additional increase in bonding authority from $200 million to $300 million will require an appropriation for funds leveraging of $10.0 million. Ten percent of the FY 85 borrowing must be backed up by leveraging reserves. As an example, a $50.0 million bond sale program will require $5.0 million in appropriation.

Net earnings on the appropriated reserves to the Bond Bank are returned to the General Fund on an annual basis. Attached are the annual amounts returned to date.

Financial Information

Operating Appropriations

Operations of the Bank are not funded by State of Alaska General Fund appropriation. Operational funds are provided by fees and charges and interest earned on investments. The Legislature, however, does review and approve the operational budget. Surpluses earned over and above the budgeted expenditure level are donated to the general fund. A history of operational appropriations is provided below.

General Fund Appropriations to Fund Operations and Surpluses Earned and Refunded to the State

FY-1976 Original General Fund appropriation	($ 24,000)
FY-1977 General Fund appropriation	(60,000)
FY-1978 General Fund appropriation	—0—
FY-1979 General Fund appropriation	—0—
FY-1980 General Fund appropriation	—0—
FY-1981 General Fund appropriation	—0—
FY-1982 General Fund appropriation	—0—
TOTAL operating appropriations to date	(84,000)
FY-1977 Surplus refunded to State	$ 15,872
FY-1978 Surplus refunded to State	113,934
FY-1979 Surplus refunded to State	110,759
FY-1980 Surplus refunded to State	160,619
FY-1981 Surplus refunded to State	1,140,697
FY-1982 Surplus refunded to State	1,111,785
FY-1983 Surplus refunded to State	1,207,617
Net Surplus to State since inception	4,467,540

Capital Appropriations

The capital appropriation is utilized to establish a reserve fund which remains intact; not depleted or consumed in any way. The reserve fund is normally used to leverage debt in a ten to one ratio. For every $1.0 million placed in the reserve fund, $10 million of outside capital is attracted to the State. While no capital appropriations were received in fiscal year 1982, an additional $1.8 million was received for fiscal year 1984.

BILL SHEFFIELD
GOVERNOR

HB 679

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 13, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the Alaska Municipal Bond Bank Authority. Present law limits the debt capacity of the authority to $200,000,000. To enable the authority to continue to assist municipalities to meet their financing needs, this bill increases the statutory debt capacity to $300,000,000.

While the level of public debt in the state poses a matter of increasing concern, the authorization provided for in this bill is necessary if municipalities without direct access to the capital markets are to meet their financing needs at the lowest available cost. I urge your prompt consideration of this bill.

Sincerely,

Bill Sheffield
Governor

Re: HB 679 - Municipal Bond Bank

The League adopted the following policy statement November 5, 1983 at its 33rd annual conference in Juneau:

> "The League supports the adoption of legislation which would raise the level of bonded indebtedness for the Alaska Municipal Bond Bank to $300 million and approve a suitable level of bonded indebtedness for revenue bonds."

HB 679 increases the total amount of bonded indebtedness from $200 million to $300 million; therefore, the League supports quick and favorable action by the committee and the bill's adoption.

The continued authority to sell, and the ability to market low interest bonds to finance municipal capital projects is a major concern of the League and its member municipalities. As the state continues to grow and develop, its municipalities are facing increasing needs and complex problems with decreasing financial assistance from the state, e.g. shortfalls in the Municipal Assistance and State Revenue Sharing Programs and decreasing state assumption of debt for schools. Many of our municipalities are also facing hard economic times, especially the coastal communities which rely on the fishing industry.

Municipal bonding is an important mechanism to provide necessary community facilities such as schools, libraries, etc. Public capital facilities are necessary not only to provide for the needs of our current residents, but also to attract new business and industry to the state and its communities.

Again, the League supports HB 679.

The Honorable Mike W. Miller
Alaska House of Representatives
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Representative Miller:

We would urge you to support House Joint Resolution #59 disapproving the Local Boundary Commission recommentation for annexation of territory to the City of Haines.

The Haines City Council and Haines Borough Assembly both agreed that the annexation would not be in the best interest of either party if it would be possible to form a unified government. The City and Borough, in a joint meeting agreed according to minutes of that meeting "to place an effective date of two years on the annexation petition or until the City and Borough of Haines have completed the unification process". Somehow, the last part of the request was not transmitted to the Local Boundary Commission, and as a result, they asked for only a two year delay.

It is our feeling that we have a great deal of education to do before our constituents will vote for unification. It is doubtful if we can do more than get started on the unification process in that time. Our citizens have diverse interests and it will take a long time to develop a charter acceptable to the majority.

Then we have conflicting legal questions. Can the Local Boundary commission delay the effective date for two years? Can the Local Boundary Commission specify a particular type of government be formed? Lastly, if a two year effective date is proven illegal, then annexation would become effective immediately. This would destroy all chances for unification.

To explain our Borough, we are at present the only Third-class Borough in the State. The City of Haines has a population of approximately 1000 and 800 live outside the City. The annexation proposal would bring 500 more into the City, leaving 300, thirty miles or more from town. These people see little incentive for unification, but I can sell unification to the majority of the present 800, but that will take time.

In closing I urge your support for House Joint Resolution #59. This would give the City and Borough of Haines an opportunity to work together for a unified government without a time restriction. Annexation disrupts our community year after year. Unification would solve this problem forever. But in order to form an acceptable Charter, we must not be limited in time, as we want the best Charter we can develop for our community.

Sincerely,

R. E. Henderson
Mayor

Feb. 8, 1984

Dear Sir:

Would you please help us by not allowing the annexation proposed for the city of Haines? The city has gone against the wishes of the majority of the people and is trying to get the annexation through.

I see this as the first step in annexing more people to the city. If this goes through the borough will be left with so few people that we won't have a say in any rules and regulations that the city will want the borough to make.

Even though our area (27 mile Haines Hiway) isn't in this annexation plan, it will still effect us with higher taxes. Also, the idea that the annexation will go through if we don't get a unified government, doesn't leave us the choice to stay as we are. Under the unified plan we

would have planning and zoning which we don't want, but nothing in the way of "conveniences."

Please say "no" to the annexation.

Sincerely,

Dorothy McLaughlin

Boards & Commissi...
January 7, 1984

Dear Mr. Miller,

I am writing to ask you to vote against the local Boundary Commission's recommendation to the Legislature for annexation of lands to the City of Haines.

My wife and I recently built a home outside the City of Haines in the Borough. It was our choice to live outside the City, beyond the utility serviced areas, and beyond the higher city taxes. If this annexation is allowed to go through, there will be only 300 of us left in the Borough who are not annexed into the City. Since we will then be only a mile and a half from the City limits, it will be just a matter of time until we too are annexed.

It seems to me that this process of annexing people into the city who have clearly said they don't want to be annexed goes against our whole form of government. Borough residents outside the city let it be known both at the Boundary Commissions Public Hearings and in the Oct. 4, 1983 election (80% opposed), that

they didn't want to be annexed.

I ask that you consider my concerns.

Thank you.

Juneau, Alaska 99811

Dear Rep. Miller

I am writing to state our strong opposistion to the proposed plan of annexation presented by the Local Boundary Commission. This is a plan imposed from "the top" totally against the expressed desire of the people of the area concerned.

We are residents of the Haines Borough and wish to make this our permanent residence. Presently we are living on Small Tract Rd.

The Local Boundary Commission's statement calling our area "The Greater Haines Area" is a creation of their imagination. There simply is no such entity and they obviously do not grasp what is the nature of this area. This becomes even more evident when they classify it as urban in character. I don't care how you stretch the word "urban", it simply can not be applied to this area.

The Borough Assembly does have the power now to plan and zone in its territory and also to create service areas. There is no need to belong to the city to do this.

Finally, we question the motivation involved in the extreme pressure to push this annexation. The City Council can not meet its financial obligation of past bills and is simply looking for more to share their bad investments claiming it's for our good that we be annexed.

Thank you for your attetion on this matter.

Senator Eliason Reports on the Haines Annexation Issue

Now that the proposed Haines Annexation has entered the Legislative arena it is important that everyone understand where things stand and how and why we are where we are.

As you know, the boundary change question has had much debate at the local level but the Legislature also has an oversight role mandated by state law in boundary changes. The statutes require the Local Boundary Commission (which is under the Department of Community & Regional Affairs) to submit a report of its proposed changes in local boundaries to the Legislature during the first 10 days of the session. The Haines annexation was submitted this session and referred to the Community & Regional Affairs Committees of each house. The Legislature then reviews these reports and can 1) take no action which then results in the change taking place as proposed or 2) within 45 days of receiving the report, pass a resolution disapproving the change which effectively kills it. Generally the chairpersons of the C& RA Committees will follow the lead of the representatives and senators of the district wherein the boundary changes are proposed. This is where my involvement and that of Rep. Goll come in.

I respect the autonomy of individual communities and am very careful not to interfere with issues best left for resolution at the local level. But in this instance I fear that Haines has already suffered some interference by the state in its efforts to manage its own affairs.

I see my role as one of making sure that everyone understands the process and their rights, and that any annexation that takes place is done properly. Rep. Goll and I held the teleconference last week to discuss the whole issue with the people of the area and get a feel for the questions and concerns. I thank everyone who attended and participated in the teleconference. It was constructive and informative. I know many of you traveled some distance to be there.

Several major concerns have convinced me to take action to insure that the issue and the options remain alive. My main concerns include: (1) The Local Boundary Commission initiated this annexation. While not illegal it seems unwise and a dangerous loss of local autonomy. The Legislature has an obligation to see that the state bureaucracy doesn't get out of hand and begin usurping local initiative. (2) The local vote was against this annexation. We don't want to risk undermining the people's trust in the public input process which becomes a charade if it is ignored and powerless. (3) The clause calling for annexation to kick-in in two years unless unification takes place first. The Attorney General says the delayed effective date is okay but the Legislature's Legal Staff says it is not. But the ringer is the most recent legal opinion, obtained since the teleconference, which says that if the two-year clause were thrown out by a court, the rest of the annexation proposal would stand, meaning the annexation would be immediately in effect. That circumvents the intent to allow time to consider unification and abolishes the compromise which made the proposal palatable to the parties who did sign off on it. (4) I am worried about the precedent set by holding a hatchet over a community's head to "unify or else". Annexation and unification ought to each be weighed and decided on their own merits. Also the big plus in any possible decision to unify is the "custom-built" charter which could, if given enough time and consideration, be drawn up to respond to the variety of special needs and goals of different areas within a unified city and borough. Such a charter could allay many of the objections and fears and allow the community to enter into a unification willingly and comfortably.

Few annexations go through without some objections. Certainly no one would expect 100% consensus on this in Haines where feelings have been strong on these matters for years. But I believe there needs to be more discussion and so I introduced Senate Joint Resolution 34 in the Senate (and Rep. Goll introduced the same one in the House) to disapprove of the proposed annexation.

Now the matter is in the two C& RA Committees which plan to hold hearings and a teleconference. If the Legislature passes the resolution within the 45 days allowed, the annexation as proposed would die and the matter goes back to the drawing board.

So that's where we are right now. I believe we are being fair and sensible in our consideration and action on this matter and hope the people of Haines will agree. I urge your continued involvement in this process and your efforts to make the C& RA Committee members aware of your opinions and concerns as they deliberate on whether to pass the resolutions of disapproval.

I thank the Lynn Canal News for the opportunity to present my viewpoint on this matter of such importance to its readers.

Sincerely,

Senator Dick Eliason

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

M E M O R A N D U M February 2, 1984

SUBJECT: Annexation of territory to Haines (W.O. 13-1776)

TO: Senator Richard I. Eliason

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

You have asked whether the annexation of territory to the City of Haines will take place within the time required by the constitution or whether the entire annexation is invalid if the delayed effective date provided in the Local Boundary Commission's Recommendation Number One is invalid.

Recommendation Number One contains two parts. The first part of the recommendation states in part the annexation ". . .will become effective two years from the date of the Legislature's approval of the commission's recommendation and then only if the City of Haines and the Haines Borough have not unified. . ." The second part of the recommendation provides for the actual annexation of territory. The question of what happens to the second part of the recommendation if the first part is invalid is essentially a separability question. In the area of statutory construction the general rule is that separability questions are to be determined according to either the will of the legislature or its manifested meaning. (Sutherland Statutory Construction, section 44.03) While the recommendation at issue here is not a statute, it seems likely that a court faced with determining the validity of the recommendation will use those principals of statutory construction that it commonly relies on.

It is clear that the Local Boundary Commission possesses the authority to recommend a boundary change to the legislature, (Art. X, sec. 12, Constitution of the State of Alaska). In this particular case, it is also clear from the letter of recommendation itself that the commission intended to

approve the annexation and only added the delayed effective date later at the request of the municipalities concerned. (See paragraphs 4 and 5 of "Recommendation Number One to the Second Session of the Thirteenth Legislature", Senate and House Joint Journal Supplement No. 16). This appears to be an indication that the Local Boundary Commission's primary intent was to recommend annexation rather than to recommend the delayed effective date. While it is a very close question, I believe that a court would be more likely to find the annexation valid and effective within the time required by the constitution in order to carry out the will of the commission rather than finding the annexation invalid and, thus, thwarting the constitutional power of the commission to recommend boundary changes.

However, this question cannot be resolved with certainty until the issue is presented and decided by the court. The entire problem will, of course, be avoided if the legislature acts to disapprove the annexation.

MEMORANDUM January 31, 1984

SUBJECT: Haines Annexation Recommendation

TO: Representative Peter Goll

FROM: Billy G. Berrier BGB
Director
Division Legal Services

You have asked several questions concerning the Recommendation for the Annexation of Territory to the City of Haines by the Local Boundary Commission which is Recommendation No. 1 to the Second Session of the Thirteenth Legislature dated January 17, 1984.

You have asked whether this recommendation essentially ordered unification and whether the commission has the power to order unification.

A local boundary commission is mandated by the Constitution of the State of Alaska and is constitutionally given broad power over local government boundary changes.

Section 12 of Article X provides:

> SECTION 12. A local boundary commission or board shall be established by law in the executive branch of state government. The commission or board may consider any proposed local government boundary change. It may present proposed changes to the legislature during the first ten days of any regular session. The change shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house. The commission or board, subject to law, may establish procedures whereby boundaries may be adjusted by local action.

The Commission was established by law (AS 44.47.565) and is generally regulated by AS 29.18.011 - 150. It has regulations at 19 AAC 10.

Our Supreme Court has had questions before it concerning the Local Boundary Commission several times. It has stated the purpose for the commission saying, for example, in Oesau v. City of Dillingham 439 P.2d 180 (Alaska 1968):

> The basic purpose for creating the boundary commission and conferring upon it the powers that it possesses was to obviate the type of situation that existed here where there was a controversy over municipal boundaries which apparently could not be settled at the local level. As we pointed out in the Fairview case, the concept that was in mind when the local boundary commission section of the Constitution was being considered by the constitutional convention was that local political decisions do not usually create proper boundaries and that boundaries should be established at the state level. The purpose of the boundary change effected in this case by the boundary commission and the legislature was to establish boundaries at a state level, and resolve a conflict that could not be properly solved at the local level, by doing away with two separate governments in a single community and avoiding multiplication of facilities and services, duplication of tax burdens, and inevitable jurisdictional conflict and chaos.

The Commission does not have authority to itself unify local governments. That procedure is established in AS 29.68.240 - 440 and requires approval at an election.

However, the commission does have broad power and, even though a boundary changed it purposes would result in dissolution of a municipality without following the dissolution procedure, that is within its power. In the case cited above the commission extended the boundaries of the City of Dillingham to encompass all of the City of Wood River. The court held this valid stating:

> When the boundary change became effective, the city of Wood River was extinguished as a municipal corporation and its property, powers and duties were then vested in the City of Dillingham.

Therefore in my opinion the boundary change is within the power of the Commission even if it were to include all the borough territory and effectively dissolve the borough. It should be noted that the result is not the result reached by unification under AS 29.68.240 - 440 since the result is not one home rule unit of local government.

You have also asked whether the part of the recommendation which reads:

> 1. The annexation of territory to the City of Haines, as herein described, will become effective two years from the date of the Legislature's approval of the Commission's recommendation and then only if the City of Haines and the Haines Borough have not unified pursuant to the provisions of AS 29.68.240 - 580; and

is valid in our opinion.

In my opinion it is clearly invalid.

The constitution itself clearly states the effective date of a proposed change. In Sec. 12 of Article IX the constitution states:

> The commission or board may consider <u>any proposed local government boundary change</u>. It may present <u>proposed changes</u> to the legislature during the first ten days of any regular session. <u>The change</u> shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house. (emphasis added)

There is no ambiguity. The change becomes effective at the time stated and that phrase clearly refers to "any proposed local government boundary change." The annexation is the boundary change, not the recommendation, and the Commission is not empowered to vary the constitution by providing a different effective date for that change.

BGB:ojb
J3/019

MEMORANDUM

State of Alaska

TO: Jim Sanders
Local Boundary Commission

DATE: January 17, 1984

FILE NO:

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: Delaying effective date of boundary change

By: James L. Baldwin
Assistant Attorney General
Governmental Affairs-Juneau

By: Fran Bremer, Legal Intern
Governmental Affairs-Juneau

You have asked us whether the local boundary commission can validly delay the effective date of a boundary change for two years, contingent on the holding of an election for the unification of the Borough and City of Haines. The answer is yes.

Article X, section 12 of the Alaska Constitution provides for the establishment of a local boundary commission, which may present a proposed boundary change to the legislature within the first 10 days of the session. Section 12 provides, "[t]he change shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house." AS 44.47.583 repeats essentially the same language: "the change becomes effective 45 days after the presentation ...."

An examination of the minutes of the constitutional convention shows that the wording of section 12 was not intended to set a definite date on which the boundary change was to physically occur. 4 Proceedings of the Alaska Constitutional Convention 2750-2753 (Jan. 20, 1956). Rather, the language was intended as a limit on the legislature's power to disapprove a proposed boundary change.

At the convention, an amendment was introduced which required active legislative approval of a proposed boundary change. The delegates discussed the merits of permitting the proposed change to occur without legislative intervention, and rejected the amendment. 4 Proceedings at 2751. It is clear from comments made during floor debate that the delegates' main concern was the potential for delay caused by conditioning a boundary change on legislative approval. A delegate noted that a boundary change could be "difficult to get through if it is going

to affect somebody's constituents." Id. Others noted that changes must be submitted to the legislature "but in the press of business ... they may not get around to consider such little things as a minor boundary change ... " and that "this little boundary adjustment will go from session to session ... because they won't have time to make it approved." Id. The 45-day limit on the legislature's power to disapprove avoided the possibility that the boundary change could go "from session to session" without being decided. See also A.L.I.V.E. Voluntary, 606 P.2d 769 (Alaska 1980)(discussion of article X, section 12 in terms of the power of the legislature to veto executive action).

We believe the provisions of section 12 do not restrict the power of the local boundary commission to delay the operative date of the boundary change. Alaska courts have recognized that annexation decisions involve policy choices that are incapable of judicial resolution. Port Valdez Co., Inc. v. City of Valdez, 522 P.2d 1147 (Alaska 1974); U.S. Smelting, Refining & Mining Co. v. Local Boundary Comm'n, 489 P.2d 140 (Alaska 1971). The local boundary commission was created to provide an expert and experienced agency to make these policy choices within the guidelines set out by law and regulation. See Town of Stillwater v. Minn. Municipal Comm'n, 219 N.W.2d 82, 87 (Minn. 1974)(commenting on the Minnesota Municipal Commission, whose structure and function is similar to that of the local boundary commission). Accordingly, the statutory scheme grants the commission broad power in matters affecting local boundaries. AS 44.47.565 -- 44.47.583. There is no express provision in either the statute or the regulations dictating the time that a boundary change is to become operative. Therefore, the only restraint on the agency's choice of annexation method is the requirement that there be no abuse of discretion. Port Valdez, 522 P.2d at 1151. The commission's decision to allow a two-year delay was a reasoned choice between the competing objectives of encouraging cooperation between the city and borough, and that of settling boundary questions promptly to facilitate planning and assure responsiveness to current conditions. The commission's choice of method -- to delay the operative date -- is analogeous to an agency's power to delay the effective date of a regulation under AS 44.62.180(4). We, therefore, conclude that the commission has the power to delay the operative date of the annexation for two years.

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

M E M O R A N D U M January 11, 1984

SUBJECT: Local boundary commission recommendations

TO: Senator Richard Eliason

FROM: Richard A. Bradley
Legislative Counsel

Rocky Plotnick has asked whether the effective date of the recommendations of the local boundary commission may be delayed for a year or more.

It seems that they may not.

The Alaska Constitution provides at art. X, sec. 12 (in part):

> It (the commission) may present proposed changes to the legislature during the first ten days of any regular session. The change shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

While I have not seen the particular recommendation that is of concern (because it has not been presented), at this time I do not see how a recommendation with delayed effectiveness can be squared with art. X, sec. 12.

If I may be of further assistance, please advise.

HAINES BOROUGH

P.O. BOX H
HAINES, ALASKA 99827
(907) 766-2711

February 6, 1984

The Honorable Don Gilman
Alaska Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Gilman:

I am writing you because you have been interested in the Haines Borough and I have a great respect for your integrity.

I am requesting your support for a resolution that Senator Eliason (Goll) will introduce against the annexation of some 7 square miles by the City of Haines.

The proposed annexation will pull into the City some 500 citizens now living outside the city. This will give the City of Haines a population of some 1500, while only 300 would remain outside. Since municipal assistance is based on population of a borough outside of a city, the borough would have just 300 citizens and our State funds would be reduced to a very low level. Furthermore, the city has 3 members on the current Assembly, the outside area 2 members and 1 member-at-large who now comes from the outside area. If annexation occurred, only 1 member would come from outside and five from the new city. This would not give outside citizens much representation on our Assembly.

In the October election 382 citizens voted against annexation and 255 citizens favored annexation (66% favored).

Both City and Borough have been trying to work out our problems. We feel that a unified government would solve our problem. At a joint meeting of the Council and Assembly, we agreed to request the Local Boundary Commission to delay the effective date of the annexation petition for two years or until the City and Borough have completed the unification process.

Unfortunately, the Local Boundary Commission delayed the annexation for two years, only. Thus on March 3, 1986, if the unification process is not completed, annexation will occur. I do not feel that a Charter Commission, to do the best job, should have to meet deadlines. We have a diversity of people and it is going to take a long time to get a charter that the majority can approve.

Furthermore, there seems to be a question of legality as to whether the Local Boundary Commission can set a date (other than 45 days of legislature after the petiton is introduced), as well as specify the kind of government that must be formed. Some legal opinions also tell us that if the present petition is approved by the Legislature and it is challenged in court and found at fault, then annexation would occur immediately.

Because of all these questions, I believe that the Local Boundary Commission recommendation should be rejected. This would allow the City and Borough of Haines to work out our differences and hopefully come up with a unified government that we can all live with that would benefit us all and thereby solve the annexation problem that disrupts our community every few years.

I sincerely hope that you will help us in any way you can to resolve this issue.

Sincerely,

R E Henderson

R. E. Henderson
Mayor

REH:AMJ

HISTORY OF HAINES ANNEXATION ISSUE

1977 - City purchased Lutak Dock from State.

1979 - City proposes annexation.
Area -wide advisory vote - 63% opposed annexation
Voters protest to city - annexation proposal withdrawn.

Sept. 15, 1982 - City petitions State for annexation of 3.5 square miles.Made necessary by AG's opinion that operation of dock outside city's limit is illegal

Oct. 6, 1982 - C&RA accepts petition.

Oct. 19, 1982 - Borough resolution to allow the City to operate the dock facility exterritorially.

Nov. 5, 1982 - C&RA written report to Local Boundary Commission -- recommends annexation of 6.9 square miles. They felt compelled to recommend annexation of larger area than petitioned for because the 3.5 mile annexation " didn't meet certain of the regulatory standards which apply" (i.e. urban in character), having an extremely low population density (4 persons per square mile) while " the Greater Haines Area meets more of the standards and to a far greater extent." (38 persons per square mile)

Nov. 10, 1982 - Letter from C&RA to Local Boundary Commission - " anticipates substantial opposition from residents in area to be annexed, particularly in light of Department's recommendation."

Nov 23, 1982 - Borough resolution rejects Local Boundary Commission's recommendation.

Dec. 2, 1982 - 345 residents sign petition requesting City to withdraw annexation resolution.

Dec. 12, 1982 - Local Boundary Commission holds public meeting in Haines, which is cut short by a power failure before all testimony can be heard.

Jan. 14, 1983 - Commission meets in Anchorage - recommends annexation of dock only. Due to letters received from Haines residents, the Commission decides to hold second public meeting in Haines on proposed annexation of territory other than the dock.

Annexation of dock is not disapproved by the First Session of the Thirteenth Legislature.

Jan. 20, 1983 - Borough requests Local Boundary Commission postpone the public hearing until fall because of planned proposition to be put before the public on Borough's acquiring the powers of planning and zoning and hopes that the new Administration would change attitude re: Third Class Borough.

There is a widespread perception in Haines that C&RA is intentionally trying to eliminate the Third Class Borough despite strong local support.

The suggested annexation of 6.9 miles would leave only 301 residents in the Borough crippling it as a political subdivision

Feb.19, 1983 - Local Boundary Commission holds second public hearing in Haines, despite Borough's request to postpone until fall.

According to the Lynn Canal News, Feb. 24, 1983 almost 70 people were in attendance, the meeting lasted four hours and "besides the several city officials ... less than a handful of the audience was in favor of it" (the annexation).

March 26, 1983 - Local Boundary Commission holds decisional meeting in Anchorage finding:

1. Greater Haines Area is urban in character (population density greater than that which defines a community -14 persons per square mile.)

2. Greater Haines receives municipal services which can only be provided by the City.

3.Growth potential - need for planning and zoning.

4. Conditions exist which endangers health, welfare and safety of city residents (sewage contamination within Piedad Road area).

5. Direct and indirect benefits to Greater Haines Area from City without tax contributions.

Local Boundary Commission expands City's petition for annexation to fit C&RA's recommendation and approves annexation.

December, 1982 - Legal Brief submitted by the Haines Citizen's Against Annexation claims:

1. The area to be annexed is <u>not urban</u> in character. The Commission would be well advised to utilize a lay definition of "urban"-"characteristic of a city as distinguished from country". (Webster's New World Dictionary)

2. 70% of City's budget is generated by 4% sales taxes which are paid by all residents. A further portion is generated by user fees from residents who live outside the City and pay for their own fire protection and water supply.

3. Borough provides all schools, the museum, the library, the swimming pool and the Chilkat Center for the Arts. The funding comes from municipal assistance and revenue sharing which depends on number of citizens living <u>outside</u> city. City residents do not contribute to these facilities.

4. Proposed annexation would halt development of 550 acres presently owned by the Borough which are presently planned for land disposal.

In addition Planning and Zoning was approved by Borough voters in October, prior to this annexation order.

October 1983 - 1. Area-wide vote on annexation question.

Total vote: 391 (64%) opposed;
216 approved.

Outside city: 243 opposed;
26 approved.

Inside city: 148 opposed;
190 approve.

2. Borough's voters approved planning, platting and zoning.

Total vote: 382 approve;
255 opposed.

Inside city: 193 approve;
172 opposed.

Outside city: 189 approve
53 opposed

3. Favored form of government.

Total vote: 284 - Third Class Borough
217 - Unified Government
52 - Second Class Borough

December 5, 1983 - Division of Legal Services memo in response to request for comments as to how citizen input into annexation decisions can be guaranteed within the limits of existing constitutional restraints:

- advisory vote best way to insure residents feelings being heard.

- Local Boundary Commission would be advised of majority's feeling.

- if after negative vote, Local Boundary Commission still approves annexation, the unpopularity of the decision would be immediately clear to the legislature. Legislature would undoubtly take that into consideration.

- as a vocal minority can predominate at public hearings it is easier for any agency to ignore public input than to ignore a vote that reflects majority opinion.

Dec. 7, 1983 - letter from City of Haines to Representative Goll stating agreement with Borough to request Local Boundary Commission to forestall effective date until Borough has opportunity to conduct elections on unification.

December 29, 1983 - Borough letter to Local Boundary Commission requests reconsideration of annexation proposal and two year delay to allow the community to work together to solve its problems.

January 7, 1984 - Local Boundary Commission approves two year extension.

January 9, 1984 - Special meeting of Borough Assembly called at 4:03 p.m.to approve the two year extension. One of the Borough members opposing annexation arrived late, the 40 mile member was never called. Motion to accept LBC's decision passed.

Jan. 17, 1984 - Local Boundary Commission's Report of 1983. Recommends annexation to become effective in two years if the City and Borough have not unified during that period. Different from agreement reached between City and Borough according to Borough.

Jan 17, 1984 - Memo from Attorney General to Local Boundary Commission concludes that the LBC has the power to delay the effective date for two years.

Jan 31, 1983 - Division of Legal Services Memo concludes that the Commission does not have the authority to itself unify local governments, although by annexation it can eliminate the Borough. But the result would not be that reached by unification.

Note: no Borough wide annexation was

recommended.

Expresses the opinion that the delayed effective date is clearly invalid. The change becomes effective at the time stated in the constitution. Local Boundary Commission is not empowered to vary the Constitution by providing a different effective date for the change.

Jan 31, 1984 - Senator Eliason and Representative Goll hold special teleconference with Haines sites to hear public opinion. Over 50 residents were in attendance. Of the thirty people testifying, 26 were in opposition to annexation.

Feb. 2, 1984 - Division of Legal Services opinion on validity of LBC's final recommendation with delayed effective date.

Indication that the LBC's primary intent was to recommend annexation rather than to recommend the delayed effective date.

Feb. 6, 1984 - Matching resolutions filed in the Senate and the House to <u>disapprove</u> the Local Boundary Commission's recommendation of Haines annexation.

EXCERPTS FROM PUBLIC TESTIMONY GIVEN AT LOCAL BOUNDARY COMMISSION MEETING IN HAINES FEB. 19, 1983

From the LYNN CANAL NEWS Feb. 24,1983

Residents say to city: 'No trespassing please'

Pete LaRoque: "I was all for progress in Anchorage" years ago "and today I've yet to apologize to a lot of old timers for it. I'm sure we all like progress, but now that I'm older I'd like to see it come a little slower."

John Koehler: "We're being railroaded ... why they keep trying to push this down our throats I don't know."

David Menaker: "I've got about all the government I can handle right now. I don't need anymore."

Tim June: "These are real people who bought property outside the city because they wanted to go their own way. There's no sense in making them part of the city when they originally chose not to live in it."

Paul Nelson: "After all my daily dealings with the city I'd say they'd be well advised to get their act together before they take on any more."

Joey Hinman: "People in the city go clear out the highway to get their water" because they can't drink the city's water. "Now, they want to give us city water too—no thanks."

Pete LaRoque: "I can flush my toilet at home (and it's clean), but when I come to the city and flush my toilet it looks like I just used it."

Marge Matthews: "Sewage isn't the issue here, it's our way of life."

City Mayor Jon Halliwill: "We do have differences of opinion" on annexation here.

Borough Mayor Bob Henderson: "It shouldn't be the boundary commission's intent to push one municipality against another in order to make one strong and one weak."

Gordon Sandy: "People in the city don't understand my problems. I'd rather deal with my neighbors who do."

Diane Benson: "People are getting tired. You guys won't leave them alone. It shouldn't be this way. The people voted it (annexation) down once and it should stay that way. What we want to know is why our vote doesn't count."

Bruce Gilbert: "My dog killed my neighbors chicken and their pig comes down and makes doo-doos in my garage. It's an even exchange. We all get along. It's the city we don't get along with."

Buster Benson: "If my sawmill is annexed it'll probably put me out of business. I'm agin' annexation."

Ray Menaker: "I hope people who want to be annexed have an opportunity to be annexed and that those who don't want to be annexed aren't."

Borough Mayor Bob Henderson: "If the borough and the city spent as much time cooperating as they do fighting we'd be a much better place."

January 19, 1984

Dear Representative Goll:

Hopefully the question of annexation of Haines Borough lands by the City of Haines will come before the legislature this coming session. Please vote AGAINST this annexation.

As you are probably aware, the state Boundary Commission voted to allow the Haines City to annex many square miles of Haines Borough lands last year. This is wrong and strange, as the majority of the people in the Haines Borough are against annexation. In a recent vote 64.4% of the population voted against annexation. At a Boundary Commission hearing in Haines an overwhelming number of citizens spoke out against annexation (approximately 45 to 4).

The City of Haines cannot supply all of its present residents with basic services like sewer, water, and roads. So we can't expect them to properly service newly annexed areas. Notwithstanding its inability to render such services, the city would be happy to collect more tax money from newly annexed areas. This would be wrong!

Haines Borough residents have a different lifestyle and values than City residents. Please respect our wishes and vote against the Boundary Commission's recommendation to the legislature to annex Haines Borough lands into the City of Haines.

Thank you,

Katya Kirsch

Dear Peter –

I'm sure you are aware of the events relating to annexation in Haines.

A significant majority of our voting citizens — 64.4% — are against the proposed annexation, as we indicated at the polls last October.

Please vote against the Boundary Commission's recommendation to the legislature for annexation to the City of Haines.

Thank you!

Yours truly,
Carol R Gilliam

Dear Representative Goll:

It has been brought to our attention, that the Boundry Commission is still considering annexation of areas outside Haines City Limits, as you are aware we do not wish to be annexed, as we will not benefit in any ways. and it will only bring about an increase in property taxes.

Representative Goll, please vote against the Boundry Commission's recommendation which is to annex the out lying area of Haines.

Thank you.

Sincerely
Georgene Koehler.

Sir,

Please vote against the Boundry Comissions recomendation to the Legislature of lands for Annexation to the city of Haines Alaska.

The Annexation will take in my Sawmill that I have operated ln this area since 1977. I beleive this will create a hardship on me and the people I sell Lumber.

This proposal has been voted down by the people twice but they keep pushing it on us. Thank you very much.

Yours Truly

The Honorable Peter Goll
Representative, State of Alaska
P.O. Box 581
Haines, Alaska 99827

Subject: ANNEXATION OF LANDS BY THE CITY OF HAINES, ALASKA

Dear Representative Goll:

In 1977 the City of Haines and the State of Alaska negotiated a purchase for the City of Haines of the Lutak Dock. Later the City of Haines claimed that they asked the State of Alaska Attorney General for a dicision on this dock to see if it was legal to operate. The decision was handed down that it was illegal in that it was not adjacent to the City of Haines.

The City of Haines also owns another dock at about five mile on Mud Bay Road. This dock brings in revenue for the City, and the State or the City does not claim that this dock is illegal.

In October, 1979, the City of Haines attempted to annex an area about three times the size that it is now, and an area-wide vote was taken which shows 63% were against annexation. The voters protested to the City, and the annexation proposal was withdrawn.

In September, 1981, the City again passed a resolution asking the Department of Regional Affairs to let them annex an area to Lutak Dock.

Regional Affairs again in 1982 proposed that the City annex an area about seven times its size as they did in 1979. The Boundary Commission promised two hearings, and they came the first time in early January of 1983 and the City officials and one local real estate company asked to have the proposed area annexed.

Another hearing was held in Haines,and there were the same few that stood up and asked to have the annexation go through. Many, many people stood up and asked for the annexation NOT to go through.

It is quite apparent that this did not make any impression on the Boundary Commission, as on March 26, 1983, they had a meeting in Anchorage to decide on the annexation. (They had promised to do it in Haines after the last meeting.)

The Boundary Commission allowed two people from Haines to be at the final decision meeting. These two people were for annexation as they had some acreage to sell that was located near the City of Haines, and the annexation would bring it into the City limits and therefore make it more valuable to sell.

These two people not doubt put pressure on the Boundary Commission to pass on full annexation. If the Commission allowed this, which they did, they should have invited people against the annexation also from Haines. This was

very unfair, unwise, and it has caused much distrust of the Boundary Commission by the people of the Haines Valley.

IN OCTOBER, 1983, AN AREA-WIDE VOTE WAS TAKEN BY THE BOROUGH, AND 64.4% OF THE VOTERS VOTED AGAINST THE PROPOSED ANNEXATION.

These proposed areas for annexation have fire protection, and this past October 4, the people of the Haines Valley voted in by majority to have planning, platting, and zoning in any service area that wishes to have another vote, etc., so most of these people have or can have all the services they wish without the extra taxes that would be imposed if they are annexed.

At the present time, there are many families living in the city limits of Haines who have lived here for several years. Many do not have any sewers, one has no road to their property, nor sewer, nor water.

If the City cannot deliver the services these many families are paying maximum city taxes for, how can the City of Haines give the people they propose to annex any more services?

It is quite clear that this annexation is strictly a scheme to get more taxes for the City of Haines without any concern for most of the residents outside of the present City limits.

Most of the people that would be annexed by the present proposal have water, sewer, electricity, etc. The annexation would give them absolutely no benefits. Their taxes would go up, and rules and regulations would be imposed that they do not need or want.

The few people that do need or want sewers outside of the present City limits can get those services by a Local Improvement District (L.I.D.).

The Boundary Commission in their March 26, 1983, report states on Page 3 the following:

> 5. The residents and property owners within the Greater Haines Area receive direct and indirect benefits of City government without commensurate tax contributions.

THE FACTS ARE: In 1982 the City of Haines mill rate was 6.0. The total city property tax was $150,756.00. The area to be annexed paid into the City for fire service 2.6 mills outside of the City of Haines, totaling $27,366.00. Each user of city water pays for it.

Sales tax collected on everything sold within the City of Haines is 4%, totaling $471,455.57. This tax is paid by everyone in the valley.

Beyond this, the Borough completely supports the Haines Library, museum, swimming pool, Chilkat Center for the Arts, and the Haines Public Schools, all of which are within the City of Haines.

The Haines museum, library, and arts center are financed by funds from municipal assistance and revenue sharing. The funding depends upon the number of citizens

who live outside the City of Haines. In other words, City of Haines citizens do not contribute to any of these facilities.

We ask you , as an understanding representative, to vote NO on this annexation proposal. We believe in a democratic system, and if this annexation goes through, these people will be forced into rules and regulations they do not want nor need.

May the holiday season be pleasant and peaceful for you and yours.

Sincerely yours,

HAINES BOROUGH CITIZENS AGAINST ANNEXATION

Louis O. Nelson, President

P.S. FOR FURTHER INFORMATION AND OUR ATTORNEY'S BRIEF, PLEASE FEEL FREE TO WRITE R.E. HENDERSON, P.O. BOX 105, HAINES, AK 99827.

December 5, 1983

Representative Peter Goll
Pouch V
State Capitol
Juneau, Ak. 99811

Dear Mr. Goll:

I am writing to urge you to vote against the Local Boundary Commission's recommendation to the Legislature for annexation of lands to the City of Haines. Please consider the following points.

When the Local Boundary Commission held public hearings in Haines, an overwhelming majority of the citizens testifying, opposed annexation. This opposition was further emphasized when sixty four percent (64%) of the entire borough (including the City of Haines), voted against annexation on the advisory ballot question in the October 4, 1983 Municipal election. Eighty percent (80%) of the borough residents residing outside the City of Haines voted against annexation in the same election.

The Local Boundary Commission is recommending that the city annex an area about three times the city's present size. This includes far removed areas such as the Haines Cannery and the airport. The city cannot possibly provide services such as water and sewer to many of these areas, however, they would raise taxes from the present 1.6 mills to 7.6 mills. There are already many residents in the present city boundaries who do not receive these services, but still pay the higher tax rate.

The Local Boundary Commission cited the lack of planning and zoning powers by the borough as one of the reasons for the city to annex such a large area. In the October 4, 1983 Municipal Election, the citizens of the Haines Borough voted in favor of planning, platting and zoning by service area, which enables each service area to make its own decisions on these matters, if the people of that area vote to enact such powers. All of the service areas in the proposed annexation currently have fire protection, which was voted on by each service area, and are taxed an additional rate of 1.0 to 2.2 mills, depending on the area.

Most of us who live outside the city made the choice to live beyond the services and higher taxes. I urge you to consider the above concerns and vote AGAINST the Local Boundary Commission's recommendation to the Legislature for annexation of lands to the City of Haines.

Sincerely,

Florence Jemmie

November 28, 2983

Representative Peter Goll
Pouch V
State Capital
Juneau, Ak. 99811

Dear Representative Goll,

I'm sure you have heard many versions of the annexation proposal for the Haines area.

At present the Borough and City are trying to come to some kind of an agreement but it is difficult. It remains unclear where the annexation issue now is, even though the City has agreed to give the Borough two years before they go for the annexation, that is now proposed. At this point the City is using the annexation issue to force the Haines Borough into a unified municipality. They refer to the annexation as a hammer to get unification.

This is typical of the operation of the Haines City Government. The entire annexation issue came up over trying to operate their new dock. They did annex it into the City and may now operate it legally. In the mean time, the Boundary Commission suggested they annex an area three times the size of Haines. Haines City Council agreed and that is how we got started. There is little to be known other than the Boundary Commission has chosen to listen to City officals only. There were residents of the City of Haines who testified about the services they do not receive and pay taxes for, questions were asked about how Haines could provide services for the new residents, no answers were given.

There is a definite break in the Borough, City relations. The City is quick to reply that they are stepping in because the Borough is a third class Borough. They continually become involved in issues stiring people up and creating an atmosphere of division. Reguardless of the people's desires.

Please vote against the Boundary Commissions recommendation for annexation to the City of Haines. As the votes of the people have clearly shown their opposition to annexation and also to unification.

Sincerely

Judy K. Bolander
Borough Assembly Member

P.S. I have delayed sending the pending the outcome of any tangible results between the City & Borough. To date there have been no formal actions.

Dec. 29, 83

Rep. Peter Goll:
District 2
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

This is to urge you to introduce a bill against annexation of additional area at Haines, Alaska, for the following reasons.

1. Much of the proposed annexed area is in five acre parcels. If these parcels were taxed at the same rate (city area) as the present city rate, the taxes would be so high that many people would be forced to either sell part of their land or sell all & relocate.

2. To sell part means to subdivide & the cost is enormous. Also there are State laws concerning on-lot water & sewer on parcels smaller than 5 acres.

3. Those on fixed incomes, as we are, (we are retired) can not meet the added expense of more taxes.

4. By vote the people have shown that they do not want to be annexed.

5. Many of those living in the area to be annexed built the home with their own hands. It is a way of life to live on a larger parcel instead of a smaller city lot. In Alaska acre

(over)

such right should be preserved.

6. The people presently outside the city already pay the same sales tax and the same salaries. All of the stores are in the city limits. Also the fire districts are paying towards fire protection.

7. More Police services would be required, at city expense. Therefore we might be in jeopardy of losing our State Patrolman.

There are other reasons as well, but sure you are aware of.

Think upon.

Sincerely,

Edna F. Hatch

James I Hatch

MRS. A. W. JURGELEIT

BOX 292
HAINES, ALASKA 99827
December 21, 1983

Representative Peter Goll
P. O. Box 581
Haines, Alaska 99827

Dear Peter -

This letter is to ask you to vote <u>against</u> the Local Boundary Commission's recommendation to the Legislature concerning the annexation of lands to the City of Haines.

There are many reasons why the annexation should not take place but uppermost in my opinion is that the people involved have spoken, written, and voted against it repeatedly. At the last hearing held here at least thirty spoke against the annexation and four were in favor of it. The results of a straw vote showed 80% of the voters living outside the city limits voting against annexation. The total area-wide vote showed 64.4% of the voters as being against the annexation.

As I understand it, the Boundary Commission felt planning and zoning were necessary in the area affected and would come with the annexation. However, at the last election, held October 4, 1983, residents of the Borough voted in favor of the powers by service areas. So - that need is no longer existent.

Those of us who live outside the city limits do so by choice. We can see no benefit to be derived from living inside the city limits except the questionable one of paying higher taxes. At the present time the City of Haines cannot - or does not - furnish the usual city services to many residents already within their limits. I can see no way they could take on greater responsibilities and honor them.

Again, I urge you to please vote <u>against</u> the Local Boundary Commission recommendation to the Legislature for annexation of lands to the City of Haines.

Yours truly,

Harriett L. Jurgeleit (Mrs. A. W.)

SUBJECT: ANNEXATION OF LANDS BY THE CITY OF HAINES, ALASKA

Dear Representative Goll:

We have been living on Small Tract Road for many years and things in general have been good to us.

We voted against the advisory vote this past fall regarding annexation.

The vote for the area was 64.4% of the voters against annexation.

We hope that you might help stop this annexation as it will impose more taxes upon us, and the services the city promises we do not need, nor want.

We have fire protection and we pay for that.

Most of the people on Small Tract Road and Mud Bay Road that we know are against this annexation proposal.

Thank you for your cooperation on this matter and may the year of 1984 be good for you and your peers.

Respectfully yours,

Mr. and Mrs. Fritz Katzenmeyer

Alberta Katzenmeyer
Fritz Katzenmeyer

Sir:

We the under-signed do not wish any land near Haines annexated. We wish to remain a therd-class borough.

Honorable Peter Goll:

Dear Sir,

I am writting in regards of the annexation of lands near Haines by the City of Haines.

I strongly object the annexation or change of our government. I feel we should be left to the 3rd Class Borough.

I sure would appreciate any and all help that you can be to stop the City of Haines and the Department of Community and Regional Affairs from doing something that we do not want.

Sincerely,
Janet M. Kurz

Re: Annexation of
lands by city
of Haines

The Honorable Peter Goll
Pouch V Juneau Alaska 99827

Dear Peter Goll,

I am opposed to the annexation of lands by the city of Haines because the majority of the people do not wish to be annexed. In a Democracy the will of the people should be ~~heeded~~ what decides this type of issue, not members of an appointed Commission or a Vociferous minority.

Please do anything you can to prevent our Third Class Borough being destroyed by this forcing of a choice of annexation or a unified government, neither of which is wanted.

Sincerely,
Jerry Potter

Rep. Peter Hall
Room N Alt Capitol
Juneau, Ak. 99811

Dear Rep. Peter Hall,

Regarding the proposed annexation to the City of Haines, Lutak Road, the Borough Commission passed it because the Borough did not have Planning + Zoning -- which they do now have, since last fall + outside City folk voted in that election for powers of Planning, Platting + Zoning for the Borough -- so now there is no need for the annexation.

The City thought these outside areas were not paying their share of taxes for benefits received. Well, we pay 2½ mills property tax for Fire Protection. Also, the Borough maintains the Library, the Museum + the Chilkat Arts Center, which are all most beneficial to the City.

Lutak inside the city, but if sewer only, sewer is not what is needed.

It is an unhappy situation which is not necessary at this time. It is a parking ticket just + endangers the rural lifestyle.

Please vote against the proposed annexation to Haines.

Respectfully,
Laura Hamstad

January 16, 1984

The Honorable Peter Goll
Representative, District 2
Pouch V, Juneau Alaska, 99811

Dear Peter Goll,

I am opposed to the proposed annexation of lands by the City of Haines because it is too large an area for the city to provide services to, inside a reasonable time frame. The voters clearly made their wishes known on this annexation on October 1983 vote, by voting against annexation.

The 2 year delay granted by the Boundary Commission before annexation takes place if

a Unified government is not in force, is nothing but a ploy to blackmail the people of the Haines Borough into accepting a form of government we do not want. Please do not allow our Third Class Borough to be destroyed by this strategy. Alaska may wish to have this form of government for remote and/or rural areas, so they can tax for the support of their schools, so should protect it for future use.

Best wishes,

Bonnie Bottles

Dear Representative Goll

I ask you as an understanding Representative to vote No on the annexation proposal.

I believe in a Democratic system and if this annexation goes through we will be forced into taxes we do not want or need.

In the City of Haines we have a few power-hungry people that wish to dominate the people in the proposed annexed area. It's against all principles of democracy.

Please vote against the Boundary-Commission recommendation to the legislature of land for annexation to the City of Haines.

Dear Representative Goll;

As a life long Alaskan, I am appalled at the powers of the Boundry Commission or Regional Affairs, and how they listen to the Special Interest Groups and not the majority who voted down annexation time and again.

People living outside the City of Haines only get fire protection and ambulance service (which is in limbo now) for which we pay taxes.

My husband, Niles, feels the same as I do.

Please vote NO on annexation.

I am writing to ask that you take the necessary steps to introduce a bill to reject the Local Boundary Commission's recommendation to the legislature for annexation of lands to the City of Haines.

As you know, Robbie and I have recently built a home outside the City of Haines in the Borough. It was our choice to live outside the City, beyond the utility serviced areas, and beyond the higher city taxes. If this annexation is allowed to go through, there will be only 300 of us left in the Borough who are not annexed into the City. Since we will then be only a mile and a half from the City limits, it will be just a matter of time until we too are annexed.

It seems to me that this process of annexing people into the City who have repeatedly said they don't want to be annexed goes against our whole form of government.

I don't favor any compromises with the City on two year waiting periods or similar "deals". I feel the Borough residents outside the City made their feelings known at the Boundary Commission's Public Hearings and in the Oct. 4, 1983 Election (80% opposed).

I ask that you consider my concerns.

Thank you.

Sincerely,

Ed Hays

January 4, 1984

Box 247 Haines, Alaska 99827

Representative Peter Goll
Pouch V
State Capitol
Juneau, Ak. 99811

Dear Mr. Goll:

I am writing to urge you to vote against the Local Boundary Commission's recommendation to the Legislature for annexation of lands to the City of Haines. Please consider the following points.

When the Local Boundary Commission held public hearings in Haines, an overwhelming majority of the citizens testifying, opposed annexation. This opposition was further emphasized when sixty four percent (64%) of the entire borough (including the City of Haines), voted against annexation on the advisory ballot question in the October 4, 1983 Municipal election. Eighty percent (80%) of the borough residents residing outside the City of Haines voted against annexation in the same election.

The Local Boundary Commission is recommending that the city annex an area about three times the city's present size. This includes far removed areas such as the Haines Cannery and the airport. The city cannot possibly provide services such as water and sewer to many of these areas, however, they would raise taxes from the present 1.6 mills to 7.6 mills. There are already many residents in the present city boundaries who do not receive these services, but still pay the higher tax rate.

The Local Boundary Commission cited the lack of planning and zoning powers by the borough as one of the reasons for the city to annex such a large area. In the October 4, 1983 Municipal Election, the citizens of the Haines Borough voted in favor of planning, platting and zoning by service area, which enables each service area to make its own decisions on these matters, if the people of that area vote to enact such powers. All of the service areas in the proposed annexation currently have fire protection, which was voted on by each service area, and are taxed an additional rate of 1.0 to 2.2 mills, depending on the area.

Most of us who live outside the city made the choice to live beyond the services and higher taxes. I urge you to consider the above concerns and vote AGAINST the Local Boundary Commission's recommendation to the Legislature for annexation of lands to the City of Haines.

Sincerely,

Gary D. Matthews

Dear Peter Goll,

We urge you to support Senator Ellason in his opposition to this annexation. We are terribly discouraged by the representation at the borough level and their refusal to follow the mandate given them by their constituents in the 64% opposition to this annexation.

If they will not listen to this what will they listen to - ? the answer is, of course, big business that have plans for this area. You must help to stop these individuals or this beautiful country will be at their mercy. And the salmon, eagles and quality of life here will be gone forever -

Yours sincerely
Ellen + Scott Carey

Dear Peter Goll,

Although we are newcomers here we do own land and pay taxes, and we are opposed to annexation. We have listened via KHNS to the latest developments regarding the question of constitutionality on the 2 year delay.

We have followed recent borough meetings and attended the latest one where the borough voted to go along with the 2 year delay. Very few people attended and we feel that there has been a feeling of discouragment because of the disregarding of the people's vote. Please take this vote into consideration and introduce a resolution to stop this annexation this session if the Boundary Commission does not withdraw it. Thank you for your work + concern

Sincerely, Scott+Ellen Cox

Borough accepts commission's decision

Juneau Empire Jan 12 1984

In a special five minute meeting Monday, the Haines Borough Assembly voted unanimously to accept the local Boundary Commission's two year extension on annexation, and not to have Haines Representative Peter Goll pursue the matter in this year's legislative session.

Noting that the chance of defeating annexation in this year's legislative session would be "quite small," Borough Assembly Mayor Bob Henderson said that such a move at this time would "cause a lot of problems and create a lot of hard feelings."

If annexation was followed through with, continued Henderson, "It would definitely cripple the third class borough financially and in other ways as well. It would mean that the people of the valley would have little or no representation in the borough assembly."

The two year extension was given by Henderson as a major reason for this decision. "By accepting the boundary commission's findings, we could at least have a two year reprieve and conditions could change very greatly in two years," he said.

Henderson added that the only disadvantage of such a move would be that the "school board would be different from the borough assembly" and added that perhaps there was a way the borough charter could be worked out so it "would not be such a conflict in other areas."

Box 555

Dear Peter:

I understand that people are determined to destroy our 3rd class Borough either with a "Unified Government" or by "annexation." That the Boundary Commission can do that to us.

The Boundary Commission members are not elected representatives & it sounds very arbitrary to me. How I went through all this in the Juneau area.

I hope that we do not have our type of government forced upon us.

Thank-you for your consideration.

With sincere best wishes

Janet Woodruff

POSITION PAPER

RE: HJR 61
SPONSOR: Representative Koponen

Program Effects:

HJR 61 proposes an amendment to the Alaska Constitution which would allow municipalities to govern themselves as direct democracies instead of by elected representative councils or assemblies.

If approved, this amendment would pave the way for legislative revisions to Title 29, the State Municipal Code, sanctioning the creation or reorganization of municipalities in Alaska along the lines of New England-type towns.

Comments:

There are about fourteen hundred such towns in New England; others are also found in the states of New York, Wisconsin, and Minnesota. The form of government of a New England-type town has been described as a pure or direct democracy as distinguished from a representative democracy. The powers of a town are exercised by the vote of all adult residents at a town meeting rather than by an elected council or assembly.

HB 615 would carry out the intent of the constitutional amendment, if adopted. This bill would amend statutes found in the State Municipal Code (Title 29) and elsewhere to authorize the incorporation of "town meeting home rule cities", set forth some standards for their organization and operation, and define their powers.

The Department finds both pieces of legislation intriguing, but cannot support either at this time without further study. It is not clear at this point whether the New England-type town model of local government can be adapted to Alaska's unique conditions or that the idea is attractive to municipalities or communities.

Town meetings work in New England because they have been enshrined in that region's political tradition since before the Declaration of Independence was signed in 1776. In Alaska and

most other states, this form of local government is unknown and might be confusing or difficult to manage. Also, it might not be adaptable to the political culture of Alaskan Native villages where there is a tradition of deference to tribal or village elders.

A town meeting-type government can only work if there is mass participation coupled with political maturity. People must obey basic rules of conduct and respect each others rights or else total anarchy can ensue at town meetings. Since Alaska is not familiar with town meetings, there might be a tendency for them to degenerate into chaos and confusion with a resulting deadlock in decision-making that now can be broken by an elected council or assembly.

There are some positive aspects of a town meeting government which are worth investigating in Alaska, possibly with some modifications. For example, there are many communities in Alaska which are not interested in or ready to incorporate as second or first class cities, but already have in place community associations which tend to act as de facto or informal town meetings, though they are not recognized by the State as such. Organizing these communities as New England-type towns rather than representative cities might be an acceptable and effective way of dealing with the need for some kind of organized and recognized decision-making in the absence of elected councils or assemblies. Timing of town meetings could be a crucial matter because many communities are subject to drastic seasonal changes in population, which means residents present at the summer meeting might undo what was approved at the winter meeting and vice versa.

However, the Department cannot now support either HJR 61 or its companion legislation - HB 615 - without further investigation to determine whether town meeting local governments are needed, desired or practical in Alaska. This would involve consultation with a wide range of affected parties including, among others, the Alaska Municipal League.

MEMORANDUM

TO: Representative Koponen

FROM: Deborah Niedermeyer, Legislative Aide DMN

RE: HB 615 and HJR 61, Direct Democracies

DATE: March 24, 1984

HISTORY

Although most Alaskans may consider the Town Meeting a traditional form of government for New England, the Town Meeting also has deep roots in Alaskan history in the form of Miners' Meetings.

According to a 1898 special mining edition of the Alaska Morning Record, Alaska's first Miners' Meeting was held in Juneau in 1881 at the Flag of All Nations for the purpose of framing mining laws for the Juneau district. The laws which came out of this and similar Miners' Meetings in Juneau and the Interior were know as the Miners' Code. The code dealt not only with matters of claim staking and recording, but also with criminal law and sentencing, marriage and divorce and anything else of common concern to the diverse people living in Alaska's young and growing communities at the turn of the century.

Miners' Meetings were organized at each camp or diggings and had only one elected official, the recorder. They had certified legal jurisdiction, but in the days when law enforcement was essentially non-existent in the Territory, before Alaska even had a non-voting representative to Washington, the only official legal power over marriages, criminal activity, or mining laws was the U.S. Congress. In light of the impracticality of depending on Congress for what amounted to municipal ordinances, Miners' Meetings were the de facto government of Alaska's early white settlements.

THE PRESENT

Town meetings remain the de facto form of government in most of Alaska's unincorporated communities. The meetings may be organized by community residents simply to deal with community issues. In other cases, the Department of Community and Regional Affairs has required these communities to set up non-profit membership corporations in order to establish some legal body to accept state funds. The town meeting them becomes a shareholders' meeting. To some extent, town meetings take the place of municipal government in these communities, but, as was the case for the earlier Miners' Meetings, the decisions made do not

have the certified force of law. This has created problems in present day Alaska that did not occur for the earlier Miners' Meetings. Dissenters to a community decision sometimes threaten to sue.

Although there are various barriers to incorporation, a law providing the option for a town meeting style of government would maintain the existing decision-making system rather than requiring the election of a representative city council. This simplification might well help small communities to incorporate in order to solve the problem of no one but the State itself having any real legal jurisdiction.

PRACTICAL CONSIDERATIONS

The Town Meeting works best in communities of less than 6,000. It is altogether impractical if the population reaches 25,000. However, 92% of Alaska's incorporated municipalities do have populations of under 6,000. All of the many unincorporated communities are much smaller than that. A persistent problem for Town Meeting governments in New England has been lack of a quorum. Alaska's small communities, however, have consistently better voter turn-out than its cities. To the extent that voter turn-out is an indicator of willingness to be involved in community affairs, participation level could be expected to be a strength rather than a weekness in Alaskan Town Meetings.

HB 615 would not require small communities to use the Town Meeting form of Government, but it does provide it as one option. Both Alaska's history and its present situation indicate that Town Meetings would be a practical and, in many cases, highly desirable form of municipal government.

SUBJECT: Constitutional amendment authorizing the legislature to provide for direct democracies (HJR 61)

TO: Representative Mike W. Miller
Chairman, House Community and Regional Affairs

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

Here is the section by section analysis that you requested of HJR 61.

Section 1 amends the state constitution so that the legislature may provide for a city to be governed as a direct democracy. Now a city is required to be governed by a representative body, the council. Under a direct democracy from of government the voters would not elect representatives, but, rather, would govern the city themselves through majority action.

Section 2 requires that the amendment be placed before the voters at the next general election.

TOWN MEETINGS

. . . Each qualified inhabitant of the town has an indisputable right to vote upon every question presented, as well as to discuss it, or there is no town meeting. This is universally understood as the vital feature of the town system of government as practiced from a long time before the Declaration of Independence until the present.

— Opinion of the Justices, 229 Mass. 601, 1918

Although today there are more people living in cities than in towns, the form that still sets local government in Massachusetts apart from that in all other sections of the country outside New England is the *Town Meeting*. The following is primarily a description of the traditional town meeting, but most of the details apply equally to representative town meetings.

What is a Town Meeting?

A *town meeting* is a gathering of all the people in the town who are eligible to vote. Of course they don't all come, but those who stay away must abide by the decisions of those who attend.

It isn't just an ordinary meeting but a very special kind of meeting. Since its decisions affect the lives and the pocketbooks of all the citizens, there are very special requirements which must be followed in calling and conducting the meeting. Any failure to meet the requirements may invalidate the action of the meeting.

Here is a brief list of the most important items of business of the town meeting which come up from year to year.

1. The town meeting decides what officers the town shall have, what salary it will pay for each office, and in some cases the length of term.
2. The town meeting elects citizens to fill certain town offices.
3. The town meeting decides for what purposes the town will spend money and how much may be spent for each purpose.
4. The town meeting adopts and changes by-laws to govern the conduct of the inhabitants of the town in local affairs.

The Common Pattern

No matter how large or small, in *every* town* the town meeting follows the *same* pattern, and is conducted under the *same* laws. But within that common pattern there are allowances for variations. There is flexibility. That is why it is sometimes hard to realize that the all-day community get-together in the small farm town has anything in common with the protracted evening meetings in some of the large metropolitan towns near Boston. Let us see what some of the common factors are.

The Day. With but few exceptions, annual town meetings are held in February or March, but they may be held as late as May.

In most towns, the election of officers is held on a different day than the meeting for the conduct of other business. There is a decided preference for holding the election first and the business meeting a week or more later.

In a few towns, the election of officers is held in November, December, or January under the provisions of special Acts.

Special meetings may be called by the selectmen at any time, and must be called by them upon receipt of a request signed by 200 voters. If there

Danvers Town Seal

*Agawam and Methuen, still retaining the name of *Town*, have abandoned the town meeting and have created *town councils* of 15 and 21 members respectively. The councils have all the legislative power of a town meeting and are required to meet at least once a month.

are less than 1000 voters, only 20 percent of them need sign.

The Hour for calling the town meeting may be established in the by-laws.

The Warrant. Every town meeting is called by the issuing of a warrant. This is usually done by the selectmen, but the law authorizes other officers to do it if there are no selectmen remaining in office or if the selectmen refuse. The *warrant* is a document which states (1) the time of the meeting, (2) the place of the meeting, and (3) the business to be taken up at the meeting.

Traditionally, the warrant is addressed to the constables, who are required thereby to give notice of the meeting to the inhabitants. The law specifies only that the warrant is to be issued at least seven days before the meeting. It does not say how the constables shall notify the people. That is left to the town to prescribe in a by-law or by vote. In some towns the warrant is merely posted in a few public places. In others, a copy of the warrant is published in the local paper. In still others, a copy is delivered to every residence.

The warrant for the annual meeting usually states that the first item of business, *Article 1*, is to elect officers for the year. Then it lists every office to be filled.

Article 2 may be to hear the reports of town officers. Then follow other articles, each one naming a single subject to come before the meeting. Sometimes there are seventy or more. Different towns have different customs. In some towns there may be a separate article for the appropriation for each town department. In other towns there is a single article such as to "appropriate money for all necessary town expenses or act in any matter relating thereto."

The preparation and the wording of the warrant are important because a town meeting cannot take valid action on any subject unless it is contained in the warrant.

Any voter who gets the signatures of nine others may have any subject included in the warrant for the annual meeting by filing his request with the selectmen. To require the selectmen to include a subject in the warrant for a special meeting is more difficult. Such a request must have 100 signatures. If there are less than 1000 voters, the signatures of only ten percent of them are needed.

The Moderator is the person who presides over the town meeting. His is one of the most important positions in the town because he has great authority to direct and regulate the conduct of the meeting. In some of the smaller towns, each meeting is called to order by the town clerk. The selection of a moderator for that meeting is then the first item of business, and the clerk presides until a moderator is selected. Years ago this was the usual practice. Today, however, most towns elect a moderator to preside at all town meetings during his term of office. The term is either one or three years.

The Conduct of the Meeting is largely under the control of the moderator. He is governed by a few basic provisions in the law, and there may be by-laws regulating some aspects of the meeting. Some of the most common rules established in town by-laws regulate admission to the meeting and fix the number of voters which will constitute a *quorum*, i.e., the minimum number of voters who may legally conduct business. Some towns, including the larger ones and particularly the towns with representative town meetings, have fairly detailed rules of procedure, while the majority of small towns leave details of parliamentary procedure to the moderator.

The Town Clerk serves as clerk of the town meeting, takes the minutes, records the votes, and assists the moderator.

Voting. Although most matters are settled with simple voice votes, there are times when a voice vote is not sufficient. If the vote is questioned, the moderator may appoint tellers and then ask for a rising vote or a show of hands to be counted by the tellers. On matters which require an unusual majority — such as a two-thirds vote to borrow money — the vote must be counted unless it is unanimous.

Some towns — like Marblehead — have in their by-laws a provision that upon request of a specified number of voters the vote shall be taken by ballots collected by the tellers. Other towns — like Provincetown — go one step further and provide a formal balloting if 25 percent of the voters present and voting so request. The voting list is used and and each voter is checked as he casts his ballot.

In towns with representative town meetings the procedure is similar to that in the open town meetings. The Watertown by-law section quoted here describes the general pattern.

> *When a question is put, the sense of the meeting shall be determined by the voices of the Town Meeting members and the Moderator shall declare the vote as it appears to him. If the Moderator is unable to decide the vote by the sound of the voices, or if his decision is immediately questioned by seven or more Town meeting members rising in their places for that purpose, he shall determine the vote by ordering a show of hands or standing vote and he may appoint tellers to make and return the count. A roll call of the Town meeting members shall be ordered by the Moderator if thirty members shall by a showing of hands favor such motion.*

A few of the towns with representative town meetings — Amherst, Fairhaven, and Swampscott for example — have provisions for the use of

secret ballots. In other towns, as in Stoughton, the use of secret ballots is prohibited.

The Legislature has prohibited the use of a secret ballot in any representative town meeting "unless two-thirds of the town meeting members present and voting thereon" vote for it.

Variations and Adaptations

The separation of the elections from other business is but one of several variations or adaptations which have been developed to meet changing conditions and the problems of larger populations. The most striking variation has been the development of the *Representative Town Meeting*. The most recent, made possible by modern electronics, is the conduct of the same meeting in two or more separate halls in some large towns still holding open town meetings. This is done by using a public address system and having an assistant moderator appointed by the moderator to preside in each meeting place where the moderator is not present.

Brewster is authorized by special legislation to hold town meetings in a regional school building in neighboring Orleans for all business except elections. Elections must still be held within the town.

Separation of Elections and Other Business. In these days, when most towns hold their elections separate from the annual business meeting, it is easy to lose sight of the fact that they are both parts of the annual town meeting.

Instead of an annual town meeting, some towns have now provided in their by-laws or charters for two regular business meetings each year. The meeting held at the usual time in the early part of the year is devoted primarily to financial matters. The second meeting, in October, is devoted primarily to zoning, subdivision control, and other by-laws. Any urgent matter can of course be included in the warrant for either meeting.

Representative Town Meetings

Towns have a way of outgrowing the old-fashioned town meeting. As population increases, the number of voters increases, and it is no longer possible for them all to get into the largest hall in town. For many years the only alternative was to give up the town meeting and organize as a city. To change to a city meant that citizens would elect a few men to a city council to exercise most of the power which the town meeting had held. It has been with great reluctance that townspeople have made this major change.

The idea of keeping the town form of government and having a representative town meeting was discussed in the years when the Town of Boston was considering a change prior to 1820. It was first tried in Newport, Rhode Island, in 1906, but it was not until 1915 that Brookline became the first town to adopt it in Massachusetts. Methuen followed in 1916.

The first representative town meetings were created by the Legislature utilizing the authority of the Amendment of 1820 which authorized the creation of "municipal or city governments" in any towns with 12,000 or more inhabitants. In 1926 the voters adopted an amendment of the 1820 Article to authorize the Legislature to establish a representative town meeting in any town with a population over 6,000. The 1966 Home Rule Amendment repealed the earlier language but retained the same population minimum to prohibit the establishment of a representative town meeting by a town with a population of less than 6,000.

There is only one major difference between the government in a town with the town meeting open to every voter and the government in a town with a representative (or limited) town meeting. The difference is just what the name implies. In the towns with representative town meetings the only people who may vote on town business other than the election of officers are the members of the town meeting who have been elected by the inhabitants to represent them.

The men and women who vote in the representative town meeting are elected by their fellow voters in the precincts where they live. Each plan creating a town meeting sets up a procedure for establishing and changing the geographical areas, called *precincts*, and each fixes the number of town meeting members to be elected by each precinct. The number of precincts depends on the area of the town, geographic features, and population. There may be as few as three, but some towns are divided into ten or more.

The number of elected town meeting members varies from 45 to more than 250. The number, 240, which is the number of members in the Massachusetts House of Representatives, is a popular one. In all towns the members are elected for three-year terms, and the terms are arranged so that one-third of the members are elected each year. In addition, most of the plans name certain town officials to be members-at-large.

In setting up representative town meetings, townspeople have been careful not to vote away all their rights to have the final say on important items of town business. In every case they have stipulated that the representative town meeting will have no power to "commit the town to any measure affecting its municipal existence or substantially changing its form of government" without giving all the voters an opportunity to vote on it with ballots. In all these towns, there is also a provision for the voters to override the representative town meeting. If a specified number of voters sign and file a petition, there must be a

special election and a ballot vote on certain actions to see whether the town will support the action of the town meeting members. Such an election is called a *referendum.*

Business of the Town Meeting

We have already listed the most important types of business that come before town meetings. Some of them are treated in detail in later chapters on elections, organization for town administration, and budgeting. We need to discuss here mainly the *law-making* power of the town meeting and its broad *policy-making* function.

By-laws. The Legislature has enumerated about seventy different subjects upon which towns may adopt by-laws. These cover a wide range. At one extreme there is the simple provision specifying how the notice of town meetings shall be given. At the other extreme there are zoning by-laws often published as separate books. As a result of the Home Rule Amendment of our State Constitution, it appears that towns have more latitude in enacting by-laws and are not limited to the subjects specifically authorized by the Legislature.

The different kinds of by-laws may be arranged in five groups according to subject as follows:

1. Regulating the government of the town, i.e., the conduct of town meetings
2. Regulating the organization and procedures for administration of town business
3. Regulating the conduct of citizens
4. Regulating the use of land.
5. Regulating certain occupations.

Most by-laws must be submitted to the Attorney-General of the state for his approval but take effect after 90 days if he has not disapproved them. By-laws are also required to be published, but several alternative means of meeting the publication requirement are provided.

Town Votes. Should the chief of police be under civil service? Should the police have one day off in eight? or seven? or should they work a forty-hour week? Should the town treasurer act as tax collector? Should the town accept an established private way as a public way? Should town offices be closed on Saturdays? These are just a few of the many questions which the Legislature has authorized town meetings to decide. Sometimes all that is needed is a simple vote. In other cases, such as the acceptance of a street, a detailed and carefully written description is required in the motion and vote.

Town Committees. "Let's have a special committee to study the matter and report back to the next meeting." Just as a small neighborhood club sets up *special committees,* so do town meetings when some special problem arises which cannot be settled in the meeting. It may be to select the location for a new school, or to draft a special by-law on a new subject, or to revise an old by-law, or to study whether the town should have centralized purchasing, or a public works department, or an aerial map or to consider any one of the hundreds of questions with which town meetings are faced at one time or another. Voters realize that they cannot decide some of these questions when first brought up, so they do the sensible thing: authorize the moderator to appoint a committee.

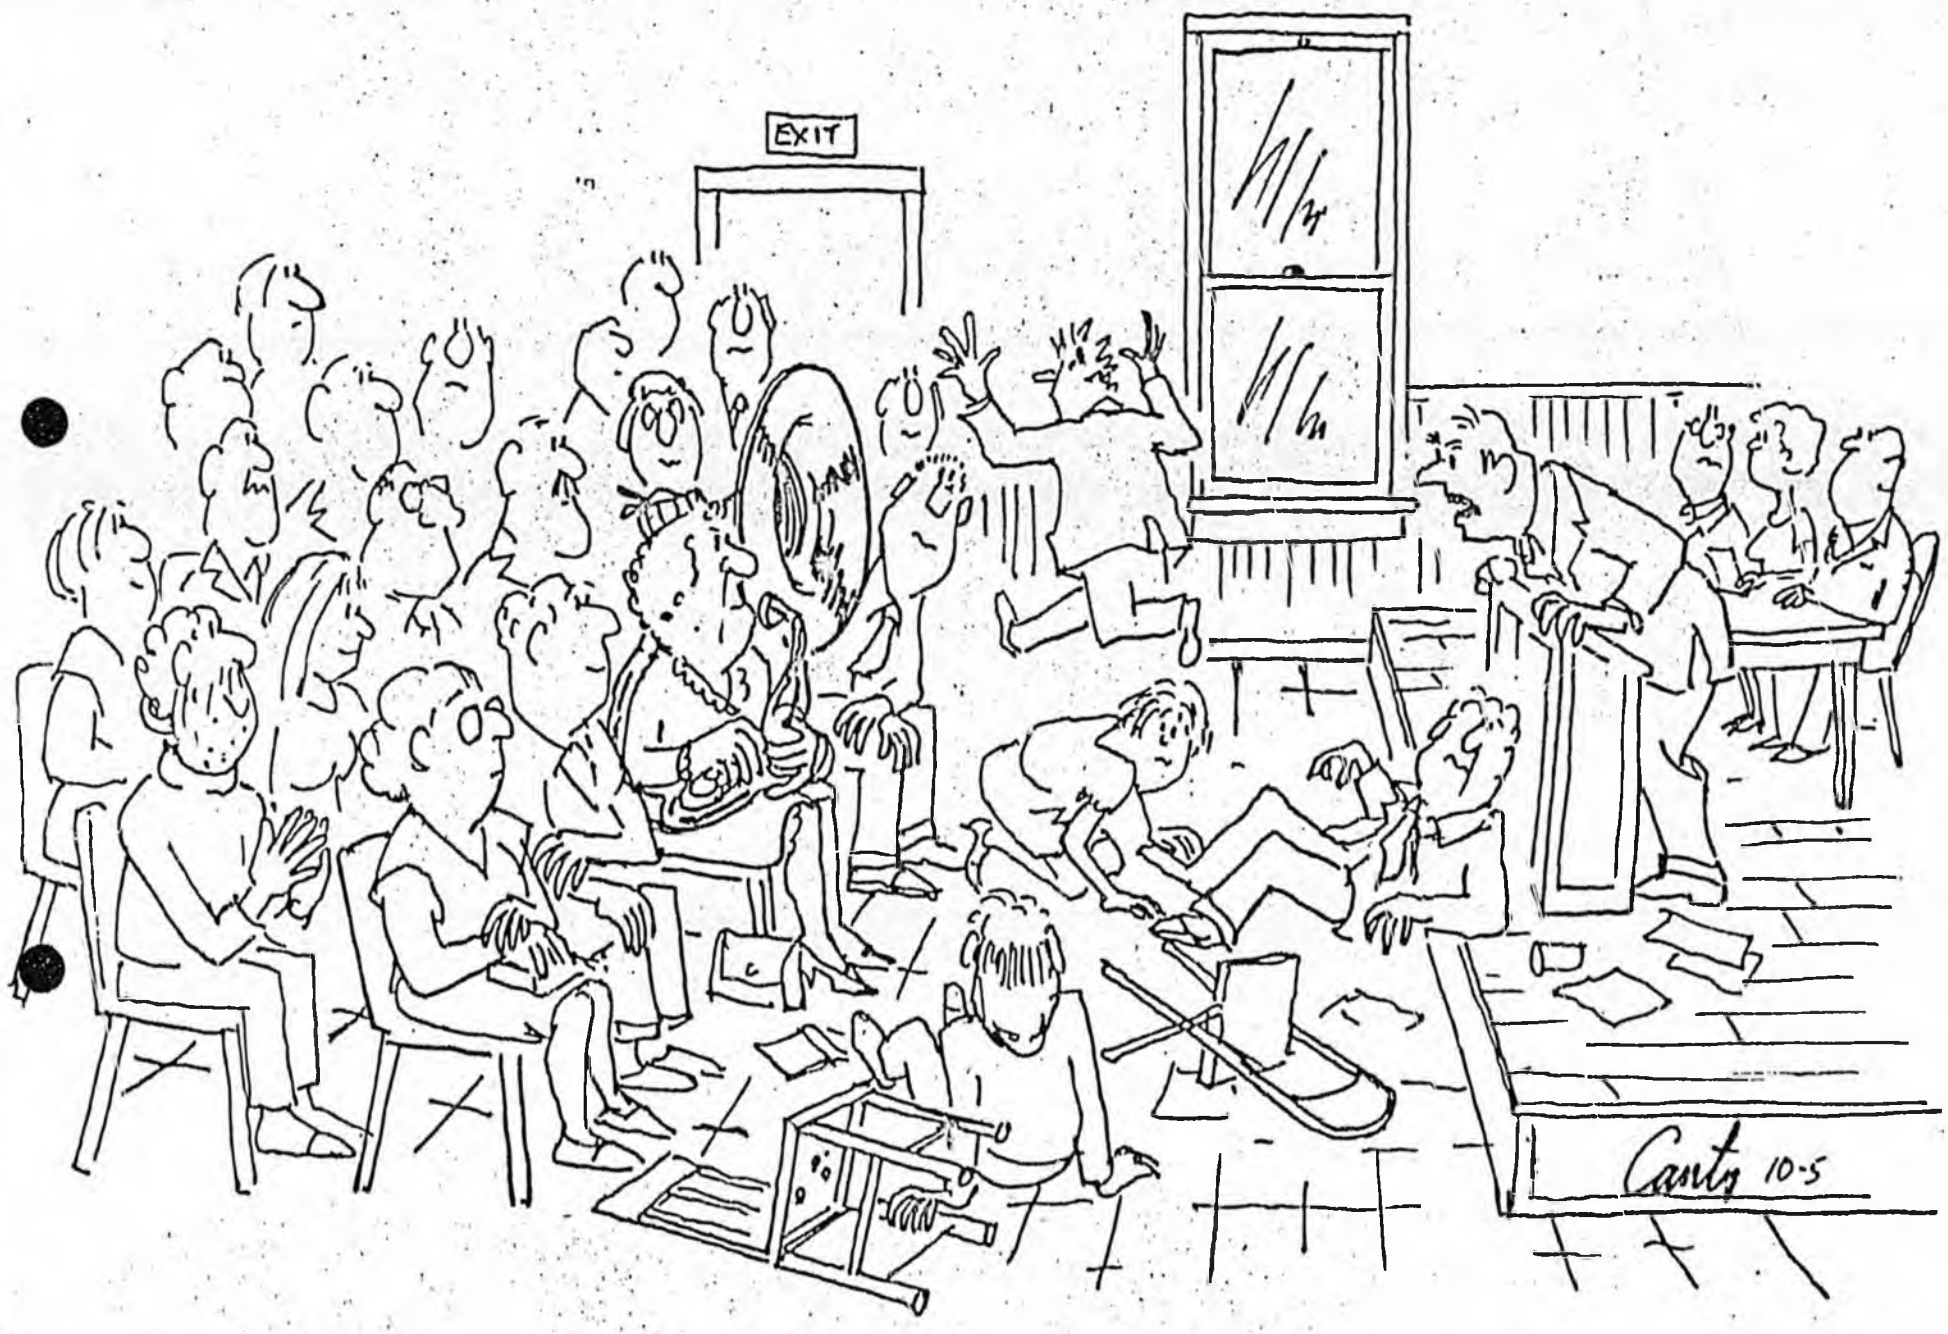
Standing Committees. To improve its functioning, the representative town meeting in Framingham has adopted a practice common among legislative bodies. It has created standing committees. There are five: public works, planning and zoning, recreation, personnel, and ways and means. Each committee is composed of ten members, each representing one of the ten precincts. Each member is elected by a majority vote of the representative town meeting members in his precinct.

The Town Finance Committee

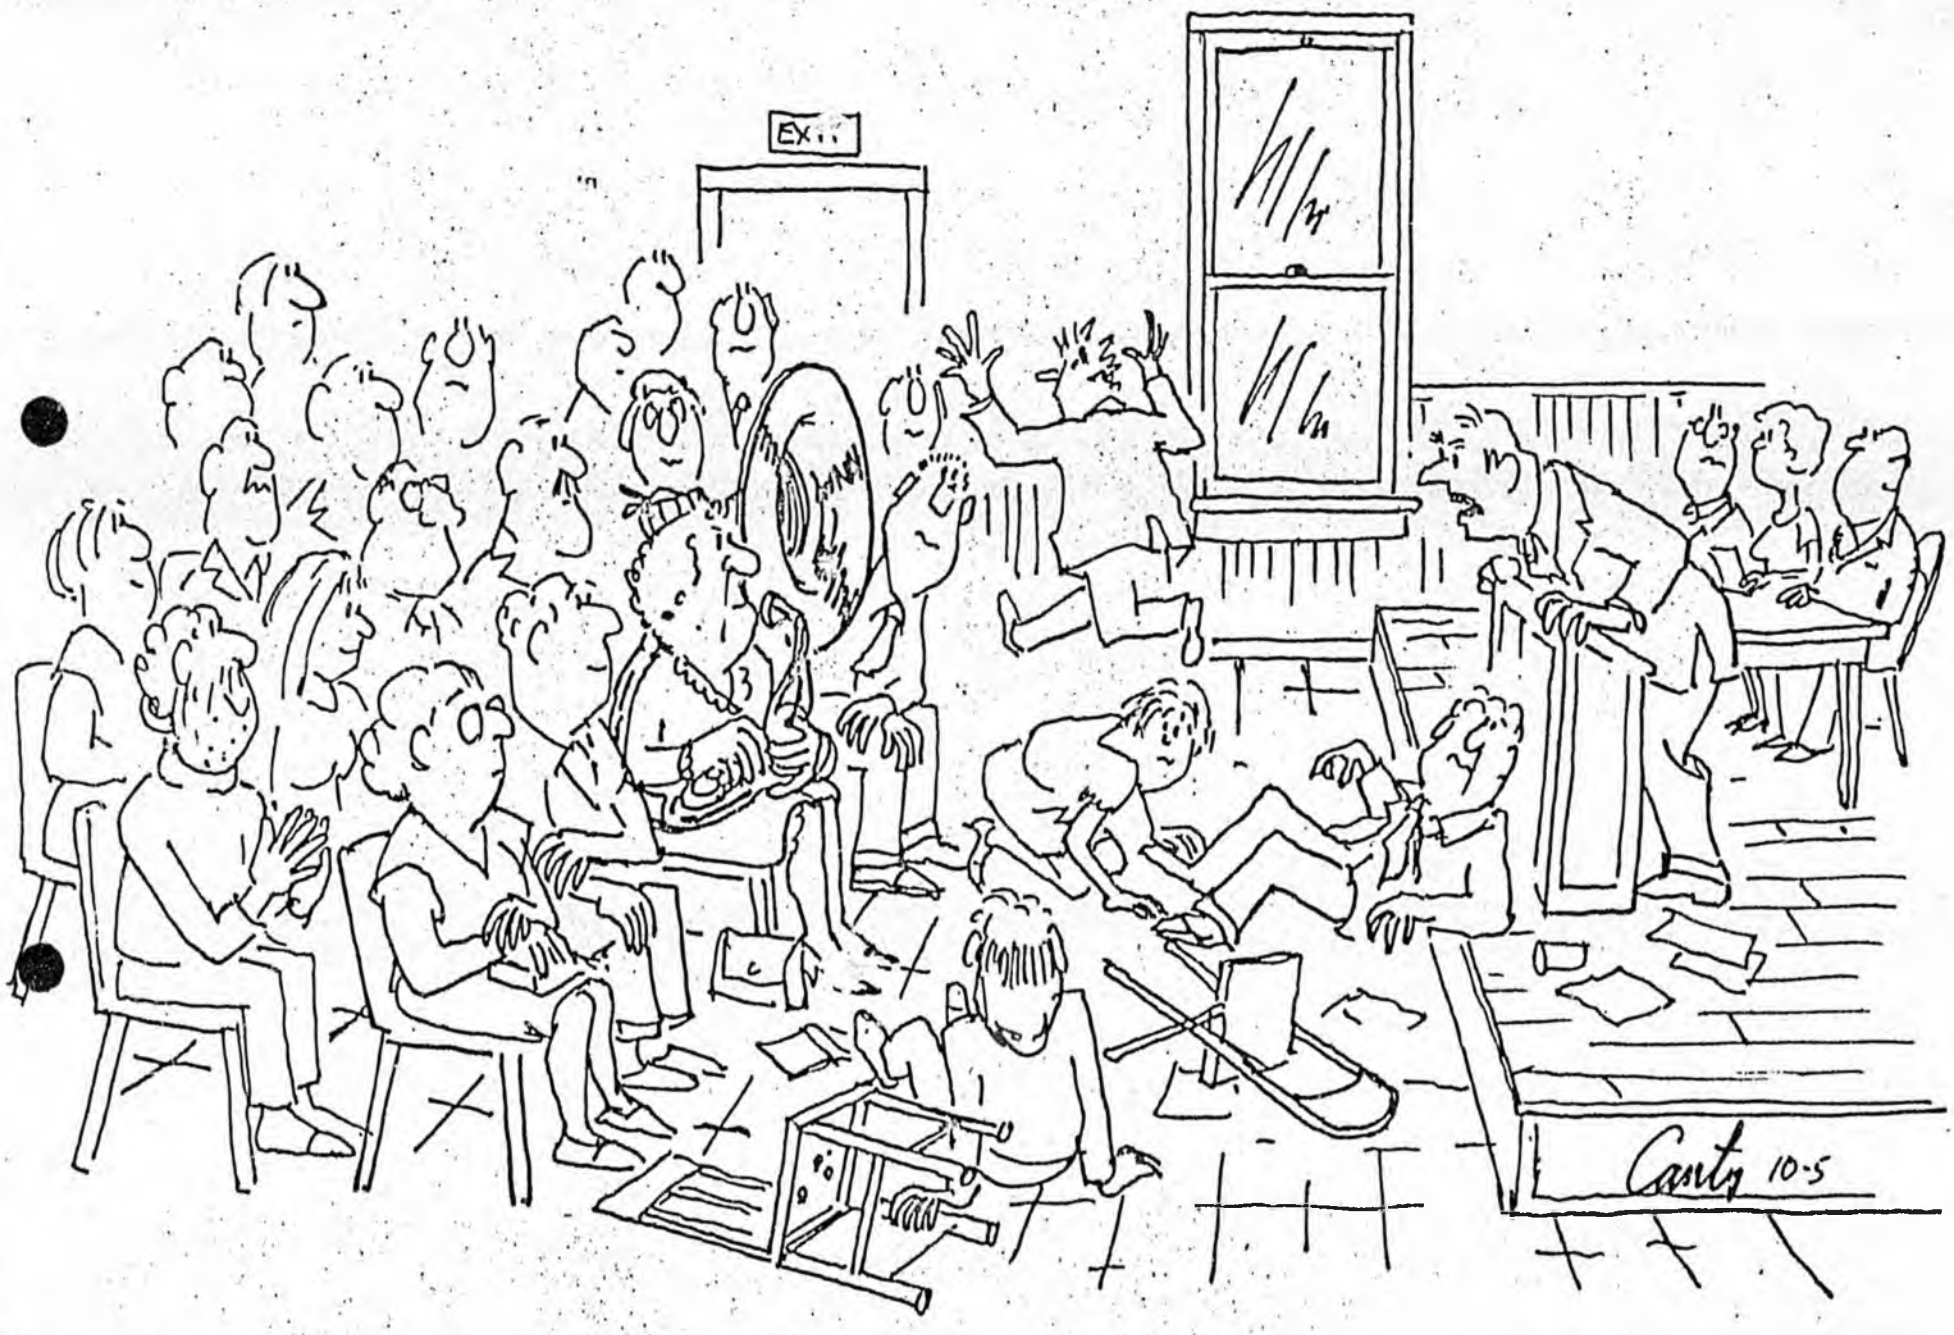
The one move which has contributed more than any other to make the town form of government practicable in the present day is the development of the town finance (or advisory, or warrant) committee as a budgeting agency. All but the smallest towns are required by law to have such a committee, and many of the small ones do. All that the law says is that some towns shall and others may have a by-law which provides for the appointment or election and sets forth the duties of such a committee, that such committees shall study any or all municipal questions and make reports and recommendations to the town.

Because the law leaves the way open for towns to experiment, the finance committees vary in size and composition. Most by-laws provide for appointment by the moderator.

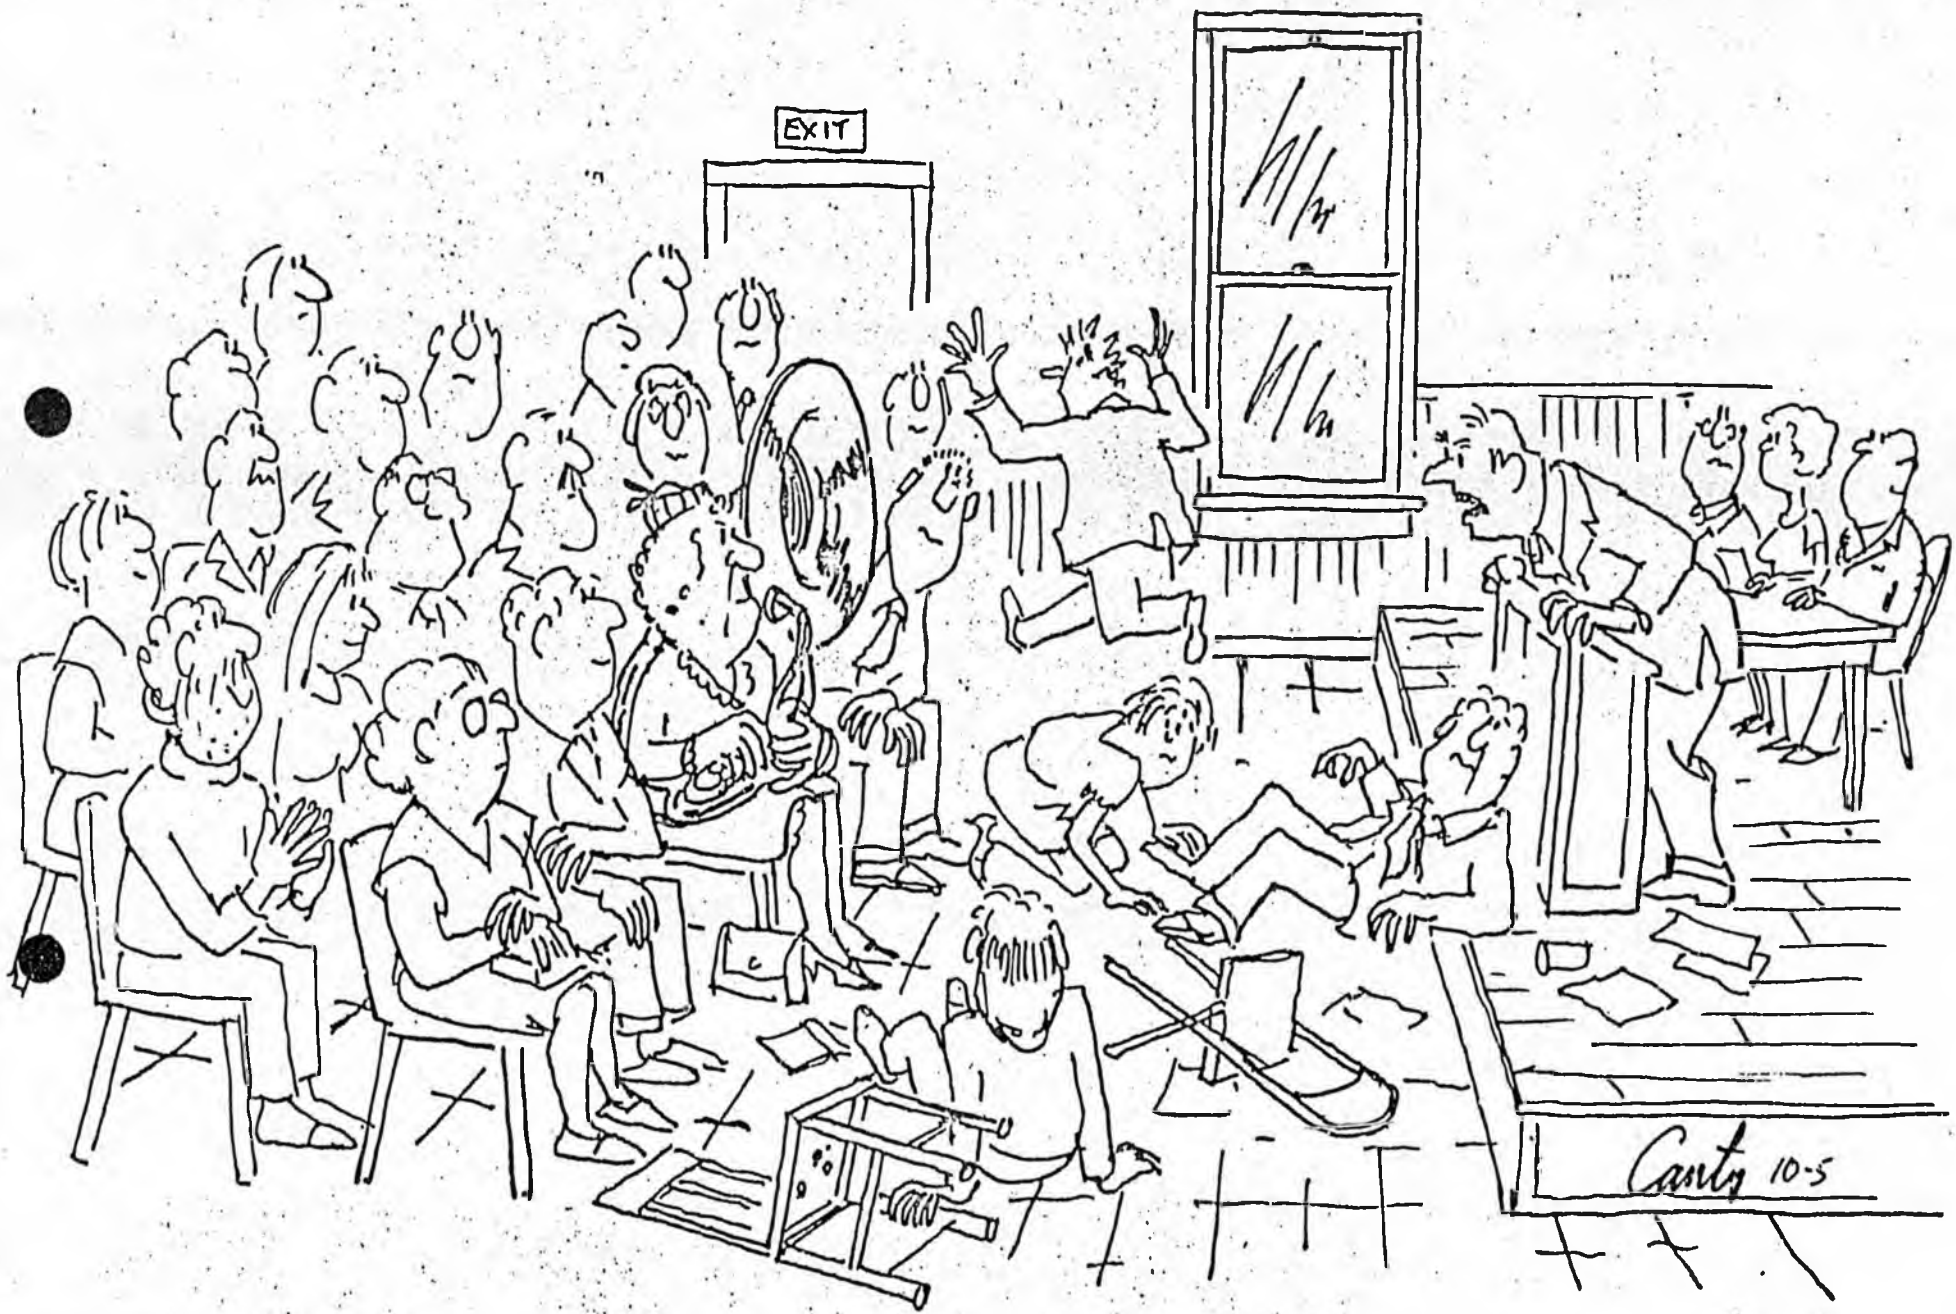
Except in those towns with by-laws or special Acts giving responsibility for preparation of the annual budget to the selectmen, the primary job of the finance committee in all towns today is the preparation of the town budget. This is described in some detail in the chapter on budgeting. Citizens in Massachusetts towns owe more than they know to the public-spirited men who give most of their spare time for three or four months in the winter to a study of the financial needs and problems of their towns.



"Mrs. Bakerman, at Town Meeting we can tolerate an occasional 'boo' or 'hiss' but one more blast from your damn tuba will warrant your dismissal!"



"Mrs. Bakerman, at Town Meeting we can tolerate an occasional 'boo' or 'hiss' but one more blast from your damn tuba will warrant your dismissal!"



"Mrs. Bakerman, at Town Meeting we can tolerate an occasional 'boo' or 'hiss' but one more blast from your damn tuba will warrant your dismissal!"

'The way I look at it, a quorum's a quorum.'

Dear Committee Members:

I am particularly interested in House Bill HJR61, introduced by Representative Niilo Koponen. As I understand it, this bill would put before the Alaska voters a constitutional amendment that would allow each municipality to consider an alternative form of government that might allow for increased public participation in the democratic process.

Kindly send me a copy of this bill for review and consider me a supporter of placing this issue before voters of our state.

Sincerely,

Betsy Pitzman

What is Town Meeting all about?

Functions — The annual town meeting is the yearly meeting of the inhabitants of a town to elect the town's officers and to conduct the town's business. It is important to remember the two distinct functions of the annual meeting: 1) to elect town officers; and, 2) to conduct the town's business.

Although some of the town's business may be conducted by ballot during the election of officers, the two functions are distinct.

The town meeting is the legal body for conducting a town's legislative affairs unless a different form of government has been adopted under the Home Rule statute (RSA 49-B). A town meeting may be held whenever necessary to conduct the affairs of the town, but the annual meeting is held to adopt annual operating and capital budgets, enact ordinances and take other actions required or authorized by law.

When and Where — The annual meeting is held on the second Tuesday of March; this year the date is March 8. Some towns operating on the optional July-June fiscal year hold their annual meeting on the second Tuesday of May.

The town meeting ought to be held in a reasonably central and accessible place in the town. (RSA 39:1-b, though, allows a town belonging to a cooperative school district to hold its meeting outside the boundaries of the town in a building owned by the district. If there is voting on prepared, preprinted ballots, that portion of the meeting must be held at the usual polling place in the town and only that business which does not involve use of these ballots can be conducted outside the town.) The place in which town meeting is held should comply with any applicable fire or safety codes. RSA 155:47 requires designation of a non-smoking area in public buildings. In places where it is not possible to effectively segregate smoking, smoking must be totally prohibited. If food will be served for consumption on the premises where town meeting will be held, a poster depicting an anti-choking maneuver, such as the "Heimlich" maneuver, must be posted.

Officers elected — Selectmen, moderator, treasurer, town clerk, supervisors of the checklist and trustees of trust funds are elected at the annual meeting. One selectman is elected each year unless the town has a 5-member board. The moderator is elected every even-numbered year and holds office from the close of the meeting at which elected until the close of the meeting at which a successor is chosen. Town clerks and treasurers are elected annually unless the town has adopted 3-year terms for these positions. One checklist supervisor is elected every even-numbered year to a 6-year term. One trustee is elected each year to a 3-year term, but a town may also choose to annually elect a single trustee or to increase its board of trustees to 5.

Towns have the option of establishing a number of other elective positions including: tax collector, combined town clerk-tax collector, police officers, sewer commissioner, board of auditors, library trustees, highway agents, overseers of welfare, planning board members and fire wards or engineers. In fact, towns can choose such officers as they deem necessary for managing their affairs.

What takes place at Town Meeting?

Moderator's role — The Moderator is the presiding officer at town meeting. RSA 40:4 requires the moderator to "preside in the town meetings, regulate the business thereof, decide questions of order, and make a public declaration of every vote passed." Although there are few general statutory requirements for specific procedures, a town meeting may adopt rules of procedure governing its operation. If formal rules have not been adopted by the town meeting, it would be wise for the moderator to have standards by which to operate. In fact, RSA 40:4 states that a moderator may prescribe rules of procedures, which may be altered by the town.

Regardless of whether formal rules are adopted or not, it is imperative to remember that neither the town nor the moderator may act contrary to state law. For example, if state law requires that an action be taken by specified officers or in a particular manner, town meeting votes inconsistent with those requirements will likely be invalid. Failure to follow state law may lead to court challenges and possible invalidation of town meeting action.

If rules of procedure have been adopted by the moderator or town meeting, motions should conform to these rules. If the town meeting has not adopted rules of procedure, the following procedure could serve as a guide to take action on an article:

(1) Read the article in full as printed in warrant;

(2) Always try to secure a main motion and a second on the article;

(3) Recognize the selectman or person responsible for giving the town meeting the necessary background on the article under consideration;

(4) Open general discussion from the floor;

(5) After the conclusion of discussion, the motion should be restated as printed or amended (it is wise to reduce all motions and subsequent amendments to writing before taking action);

(6) The vote should be taken and the outcome announced. If the vote is to be challenged, this is the appropriate time for action.

Recognition of a motion to "pass over" a warrant article can create confusion and may raise procedural questions. If no governing rules are applicable, the moderator may require motions to be stated in an unambiguous manner so that the intent of the motion is clear. For example, compare these 2 motions: "I move town meeting pass over article X"; "I move town meet-

ing postpone consideration of article X until after consideration of article Y". The exact intent of the latter motion is obviously clearer. If the intent of a motion is to postpone action on the article indefinitely, the motion should be so stated: "I move that consideration of article X be postponed indefinitely".

Actions by the moderator under his extensive traditional and statutory powers may not be reversed except by vote at the town meeting at which the ruling is made. Any qualified voter may appeal to the meeting to overrule the moderator's ruling. The voter should clearly state his objection. The moderator is then obliged to call for a vote of the meeting to see whether his ruling is sustained.

Voting — RSA 654:1 defines a legal voter as an "inhabitant of the state, having a fixed and permanent established domicile, being a citizen of the United States, of the age (of 18)..." Domicile is a "question of factual physical presence incorporating an intention to reside for an indefinite period" and is the "voter's residence" and the "place in which he dwells on a continuing basis for a significant portion of each year." Any person domiciled in the town and on the voter checklist may vote in town elections.

Methods — Most articles are adopted by a majority vote of those voters present and voting. State law may require more than a majority to pass an article, so the laws concerned with each article should be consulted to determine the required vote. Those requiring a ⅔ vote include: (1) to approve all bond and note issues except tax anticipation notes; (2) to accept and expend federal or state grants of aid in connection with any project for which the municipality will incur indebtedness in accordance with RSA 33:7-b; (3) to alter town lines; (4) to acquire or establish a municipal utility plant or ratify a contract of the selectmen for an electric utility; (5) to change the purpose of a capital reserve fund; (6) to approve amendment to a zoning ordinance if a protest petition signed by the required number of affected property owners is filed under RSA 31:64.

There are five usual methods of voting utilized by the town meeting: (1) Voice Vote; (2) Show of Hands; (3) Standing Vote; (4) Division of the House; (5) Written Ballot.

Ballot Votes — Some statutes require or authorize certain types of town business to be decided by ballot votes. If the town uses the official ballot, the procedures for such balloting are employed and the voting is conducted at the same time the election is held. Ballot questions can be placed on the same ballot as that used for the election of officers or may be put on separate ballots. Examples of items which are voted by ballot include zoning, local-option tax exemptions, and alteration in the term or composition of some local boards or officials. The official ballot cannot be used for submitting questions to voters unless use of the official ballot for that article or type of article is specifically required or authorized by law. Any other articles may be taken up only at the business session, although secret balloting is allowed at that time.

Unofficial Ballots — When secrecy of the ballot is desired and the official ballot is not used, a written ballot may be taken. This type of balloting is done when tellers pass out slips of paper on which the voter indicates his decision in writing. The votes are then delivered to the moderator and counted. This type of balloting can be used with the checklist to guarantee that only eligible voters will participate, but can be time consuming.

The moderator must conduct a secret "yes-no" ballot when five voters (three voters in a town of a population of 500 or less) make a written request prior to a voice or division vote on the article. (RSA 40:4-a). If seven or more voters question in writing or orally any non-ballot vote, immediately and before any other business is begun, the moderator must retake the vote by a secret "yes-no" ballot. (RSA 40:40b).

Whether the moderator votes or not is subject to local traditions and personal preference. If it is local tradition that the moderator does not customarily vote, two instances in which he might choose to vote are to break a tie or, if a motion he opposes would otherwise pass by one vote, to cast his vote against it, which would mean defeat of the motion.

Absentee Voting — If the town has adopted the official ballot for town elections, opportunity for absentee voting on all items which will be included on the official ballot must be provided for any registered voter who: 1) will be absent from the town on the day of the election; 2) cannot appear in public on election day due to religious commitment; or, 3) is unable to vote in person by reason of physical disability.

Election of Officers — Towns may elect officers by use of an official ballot, unofficial ballot or other means, such a voice vote, as determined by the town meeting. The official ballot is used when adopted by a previous meeting and is either partisan (Australian) or nonpartisan (RSA 669:11-13). All officers required to be elected at the annual meeting must be elected by use of the official ballot if it is used in the town, otherwise by use of the unofficial ballot. Ballot votes must also be used for election of the following optional officers: town clerk-tax collector, full-time police officers, sewer commissioners, tax collectors with 3-year terms, boards of auditors, and library trustees. Other officers which a town may choose to create and fill by election can be voted for by ballot or by other means as the voters determine. When optional officers are first created, initial officers can be elected at the same meeting by any appropriate means or interim appointments can be authorized. (RSA 669:16 and 17).

Requirements of Office — RSA 669:6 states that unless otherwise provided by law, an elective town office can be filled only by a person who has a domicile in the town. A number of town offices are incompatible under RSA 669:7: (1) No one may at the same time serve as selectman, treasurer, moderator, trustee of trust funds, tax collector, auditor or highway agent; (2) nor may one person simultaneously hold the office of treasurer, moderator, trustee of trust funds, selectman or head of a police department of full-time duty; (3) the same person could not be both treasurer and town clerk; (4) no person handling town funds may also be auditor;

(Continued on next page)

(5) no selectman, moderator, town clerk or election inspector can simultaneously serve as supervisor of the checklist; and (6) no selectman, town manager, school board member, village district commissioner or full time employee of the town, village district, school district or other associated agency may also be an at-large budget committee member under RSA 31:95 and 32. Under RSA 669:8, a town manager may also be manager of a district or precinct wholly or mainly within the town and may be elected or appointed to municipal offices under his supervision, but can hold no other public office except notary public or justice of the peace or tax collector when authorized under RSA 37:16.

Disqualifications — Under RSA 658:24 (which governs state elections but also applies to local elections conducted by official ballot), an election official whose name is on the ballot for a position other than election official is disqualified from performing the duties of election officials for that election. Likewise, RSA 659:58 prohibits an election official, other than the moderator, who is also a candidate from remaining within the guardrail during the counting of votes for the office for which he is a candidate.

The moderator oversees the counting of official ballots by other election officials, including the selectmen and the town clerk (RSA 659:60). Unofficial ballots are counted by the moderator with the assistance of the selectmen and town clerk (RSA 669:58). Officers chosen by unofficial ballot must receive a majority of votes cast to be elected. For offices filled by election by one of the official ballot systems, a plurality vote is sufficient to elect.

Two part town meetings — Some towns elect offices on one day, and complete town business on another day. This can be accomplished in one of two ways: (1) adopting a motion to recess the town meeting and to set another time, date and place to resume the meeting; (2) adopting RSA 39:2-a, which authorizes 2 sessions for the annual town meeting: the first to elect offices and transact other business by official ballot, the second to transact all other town business on a day and time chosen by the selectmen. Such a "bifurcated" town meeting takes effect at the next town meeting, with selectmen required to set the place, day and hour of the second session on the town warrant.

Tape recording — There is no prohibition against recording town meeting procedures. It may even prove useful for town officials to tape town meetings to precisely recall proceedings, such as how amendments were made to warrant items or the exact wording of amendments. Officials who utilize tape recording report that it is particularly useful for bond articles. Bond attorneys may ask about the precise wording of how a bond issue article was presented to voters or how amendments were worded. In general, a tape recording is valuable aid to the town clerk who must report on the proceedings of the meeting.

Reconsideration — A town meeting may reconsider actions previously taken in the same manner as other parliamentary bodies. Procedurally, reconsideration will be governed by the procedural rules adopted by the moderator or town meeting itself. Procedurally, reconsideration will be governed by the procedural rules adopted by the moderator or town meeting itself. A fairly uniform procedure requires that the person proposing reconsideration must have voted with the prevailing side. Sometimes, procedural rules require that reconsideration be made immediately or within a specified period of time. At any rate, reconsideration would be questionable if it were undertaken a substantial length of time after the original action was taken and if the subsequent action was inconsistent with actions taken by others who relied on the original vote and acted reasonably.

Some special considerations are also involved because of the nature of town meeting and the statutes governing town meeting conduct. While no specific statutes govern reconsideration, the distinction between "official ballot" and "deliberative session" actions envisioned by RSA 39 probably means that items required to be voted by official ballot could not be reconsidered at the deliberative session. For example, votes on zoning questions taken by officials ballot could not be revoted at the town meeting after the results of the ballot vote were announced. (In addition, special statutory procedures are called for under RSA 31:74 if someone wishes to obtain a rehearing on a zoning matter decided by town meeting.)

Related to the issue of reconsideration is the matter of attempting to regulate or mandate future town meetings procedures. It is a general rule that rules of procedure adopted by a town meeting expire at the adjournment of that meeting unless readopted at a subsequent meeting, and, in the absence of specific statutory authority, a town may not adopt procedural rules for the governing of future town meetings. That rule, coupled with the doctrine that a town may exercise only those powers granted to it by law, means, for example, that a town meeting could not adopt an ordinance and try to require a ⅔ vote of a future town meeting to repeal or amend that ordinance.

This limitation upon town meeting powers extends only to the power to bind other town meetings and does not necessarily limit a town meeting's power over the exercise of authority by town officials. Recent court decisions, though, have made it clear that a town meeting's authority over other local officials and bodies is limited by state law: if the law vests authority in an official or board other than the town meeting, it is quite possible that town meeting cannot override or alter that delegation of authority.

Recounts — Different statutes govern recounts for elections for town officials and for questions voted on at town meeting. The former are covered by RSA 669:30-35 which allow a recount if a person for whom a vote was cast applies within 15 days after the election to the town clerk and submits a fee of $10. The moderator, town clerk and selectmen constitute a board to recount the votes not less than 7 nor more than 10 days after the recount application is received.

RSA 40:4-c allows 10 or more voters to apply to the town clerk within 7 days after a meeting for a recount

of ballots cast on any question appearing on the official ballot. An application fee of $10 is required. Ballots are recounted in the same manner as an election.

Warrant — Calling a town meeting

Town meetings must be preceded by a warrant, or document, addressed to the voters, which gives notice of, or "warns", the meeting. The warrant must describe the place, day and hour of the town meeting, and specific "articles" or subjects on which the town has the power to act. Articles may be included on the warrant at the initiative of the selectmen. The warrant must include articles presented to the selectmen at least 35 days before the meeting by written petition of 10 or more voters (RSA 39:13).

The selectmen prepare and sign the warrant, and must post an attested copy at the place of meeting and an attested copy in one other public place at least 14 days before town meeting. Under statutory rules for counting, the warrant must be posted this year by February 21 (RSA 39:5). The selectmen would be well advised to have the town counsel check the legality of the warrant articles for form and content. Recent court decisions indicate it is necessary to review enabling legislation to: (1) determine the exact source of authority for town action; and, (2) see what special procedures might be required.

In a town which uses official ballots, the warrant must clearly specify those articles to be voted on by ballot at the election and those which will be considered at the business meeting. The town's annual report, including the proposed budget, must be made available 7 days before the town meeting. (For more information about annual reports, see the November 1980 issue of N.H. Town and City.) Although some warrants contain an article at the end, "To transact any other business which may legally come before the meeting", action taken under this general provision is limited in scope because of the requirement that subjects on which the meeting will act must be specifically included in the warrant.

Reminders

Many statutes were amended by the 1983 legislature. While it is not possible to address the details of all of these changes here, it is appropriate to remind municipalities of new procedures or statutory authorizations which may require consideration by the town meeting.

Deputy Tax Collectors

All towns must now have a deputy tax collector, RSA 41:38, or deputy town clerk/tax collector, RSA 41:45-c. The town should remember this when formulating its budget.

Central Business Service Districts

Municipalities are now authorized to establish central business service districts in high density areas of predominantly commercial uses. The costs of providing special services, exclusive of capital expenditures, may be an additional charge within the district. RSA 31:120-:125.

Incompatible Offices

Selectmen may not be full time employees of the town. RSA 669:7.

Bonds

RSA 33:7-b, :8 and :8-a are amended to make clear that a *ballot* vote of ⅗ of those present is necessary when issuing bonds.

Fines

RSA 31:39 was amended to increase the maximum fine which may be imposed by a municipality for violation of a local ordinance to $1,000. A town may wish to increase its fines accordingly.

Libraries

Towns may authorize their library to retain money received from its income generating equipment to be used for general repairs and upgrading and for the purchase of books, supplies and equipment. RSA 202-A:11-a and :11-b.

Road Agents

A town may elect a road agent for a term of up to three years by following the procedures contained in RSA 231:62-a and :62-b.

Town records got you down?

Do your records need organization and better accessibility? Let us help you get them computerized. We guarantee fast, dependable service in any of the following areas.

- Accounts payable
- Auto registration
- Budgeting
- General ledger
- Payroll
- Water billing
- Property taxes
- Residence taxes
- Sewer billing
- Trust fund accts
- Voter check list

Custom made services are our specialty.

Juneau, Ak. 99811

February 15, 1984

Re: City of Hoonah Annexation Petition and Brief

Dear Senator Eliason,

You are hereby requested to proceed with having the Petition for Annexation rejected by both Houses of the Legislature in its present form.

Please be informed by myself that the purpose of the request is to allow for a meaningful dialogue and exchange of ideas between the City Council of Hoonah and the affected property owners during the forthcoming year so that a future annexation request is one arrived at through a consensus of the various parties.

If you have any questions, please feel free to contact me.

Sincerely,

Michael J. Tavoliero
Hoonah City Manager

CITY of HOONAH

HOONAH, ALASKA 99829

RESOLUTION NO: CC-84-14-02-02

A RESOLUTION BY THE CITY COUNCIL OF THE CITY OF HOONAH, ALASKA, RESCINGING RESOLUTION NO. 83-09-22-01 IN ORDER THAT THE ANNEXATION ISSUE MAY BE REVIEWED FOR A PERIOD OF ONE YEAR AND REEVALUATED WITH INPUT FROM ALL AFFECTED PROPERTY OWNERS.

WHEREAS, The City of Hoonah previously passed a resolution directing the City Manager to submit a petition for annexation to the State Local Boundary Commission; and,

WHEREAS, The City Manager submitted such a petition; and,

WHEREAS, There is a legitimate concern among several of the affected property owners that there was an insufficient dialogue and exchange of ideas prior to the submission of the Petition for Annexation; and,

WHEREAS, It would be beneficial to the City of Hoonah and to the affected property owners to have such a period of dialogue with the exchange of ideas and concepts.

NOW THEREFORE BE IT RESOLVED by the Hoonah City Council that the City Manager is hereby directed to prepare and submit a letter to Senator Richard Eliason and Representative Ben Grussendorf requesting that the Petition for Annexation be rejected by both Houses of the Legislature in its present form.

FURTHER, that Senator Eliason and Representative Ben Grussendorf be informed by the City Manager that the purpose of the request is to allow for a meaningful dialogue and exchange of ideas between the City Council of Hoonah and the affected property owners during the forthcoming year so that a future annexation request is one arrived at through a consensus of the various parties.

ADOPTED this 14th day of February, 1984, by a duly constituted quorum of the City Council, Hoonah, Alaska.

H[redacted] TOTEM CORPORATION RESOLUTION [redacted]3
RESOLUTION OF THE HUNA TOTEM CORPORATION BOARD OF DIRECTORS
RE: RECOMMENDATION FOR THE ANNEXATION OF TERRITORY
TO THE CITY OF HOONAH

WHEREAS, Huna Totem Corporation is the major property owner in the area sought to be annexed; and

WHEREAS, Huna Totem Corporation has eight hundred seventy five (875) shareholders registered to Hoonah, Alaska; and

WHEREAS, Huna Totem Corporation Board of Directors is concerned that the annexation as proposed is not in the best interest of either the residents of the City of Hoonah or the shareholders of Huna Totem Corporation; and

WHEREAS, there are certain factual inaccuracies contained in the Recommendation for the Annexation of Territory to the City of Hoonah prepared by the Local Boundary Commission; and

WHEREAS, there has been a failure by the City of Hoonah to adhere to statutory and regulatory requirements for the processing of its Petition for Annexation;

NOW THEREFORE, BE IT HEREBY RESOLVED that the Huna Totem Corporation Board of Directors oppose the recommendation for the annexation of territory to the City of Hoonah in its present form; and

FURTHER, that the Board of Directors propose to the Alaska State Legislature that the annexation issue be reevaluated during the coming year; and

FURTHER, that the Huna Totem Corporation Board of Directors actively seek legislative rejection in both the Senate and House of the recommendation for annexation in its present form.

BE IT SO RESOLVED this 29th day of January 1984.

HUNA TOTEM CORPORATION

PETITION REQUESTING THAT THE LEGISLATURE REJECT ANNEXATION
OF TERRITORY TO THE CITY OF HOONAH AS PROPOSED BY
THE LOCAL BOUNDARY COMMISSION TO THE SECOND SESSION
OF THE THIRTEENTH LEGISLATURE

We the undersigned Shareholders of Huna Totem Corporation request that the Alaska State Legislature, both Senate and House, reject the recommendation of the Local Boundary Commission for the annexation of territory to the City of Hoonah. Namely, we are opposed to the annexation in the present form containing 9.68 square miles, more or less. We are opposed to the requested annexation because it is not in the best interest of either the City of Hoonah or the property owners of the area sought to be annexed.

PETITION REQUESTING THAT THE LEGISLATURE REJECT ANNEXATION
OF TERRITORY TO THE CITY OF HOONAH AS PROPOSED BY
THE LOCAL BOUNDARY COMMISSION TO THE SECOND SESSION
OF THE THIRTEENTH LEGISLATURE

We the undersigned Shareholders of Huna Totem Corporation request that the Alaska State Legislature, both Senate and House, reject the recommendation of the Local Boundary Commission for the annexation of territory to the City of Hoonah. Namely, we are opposed to the annexation in the present form containing 9.68 square miles, more or less. We are opposed to the requested annexation because it is not in the best interest of either the City of Hoonah or the property owners of the area sought to be annexed.

PETITION REQUESTING THAT THE LEGISLATURE REJECT ANNEXATION
OF TERRITORY TO THE CITY OF HOONAH AS PROPOSED BY
THE LOCAL BOUNDARY COMMISSION TO THE SECOND SESSION
OF THE THIRTEENTH LEGISLATURE

We the undersigned Shareholders of Huna Totem Corporation residing in Juneau, Alaska request that the Alaska State Legislature, both Senate and House, reject the recommendation of the Local Boundary Commission for the annexation of territory to the City of Hoonah. Namely, we are opposed to the annexation in the present form containing 9.68 square miles, more or less. We are opposed to the requested annexation because it is not in the best interest of either the City of Hoonah or the property owners of the area sought to be annexed.

LOCAL BOUNDARY COMMISSION

January 17, 1984

The Honorable Joe L. Hayes
Speaker
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Hayes:

Attached hereto is the REPORT OF CALENDAR YEAR 1983 ACTIVITIES OF THE LOCAL BOUNDARY COMMISSION AND RECOMMENDATIONS TO THE SECOND SESSION OF THE THIRTEENTH LEGISLATURE FOR CERTAIN MUNICIPAL BOUNDARY CHANGES.

The report contains recommendations for changes to the boundaries of five municipalities which, pursuant to Article X, Section 12 of the State Constitution and AS 29.68.010, are to be presented to the Legislature. These recommended boundary changes become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

The Local Boundary Commission is hoping to meet with the House and Senate Community and Regional Affairs Committees in early February to discuss its report and recommendations.

Sincerely,

Sheila Gallagher
Chairman
Local Boundary Commission

BILL SHEFFIELD, GOVERNOR

REPLY TO:

LOCAL BOUNDARY COMMISSION

March 3rd

REPORT OF CALENDAR YEAR 1983 ACTIVITIES OF THE LOCAL BOUNDARY COMMISSION AND RECOMMENDATIONS TO THE SECOND SESSION OF THE THIRTEENTH LEGISLATURE FOR CERTAIN MUNICIPAL BOUNDARY CHANGES

Submitted by: Sheila Gallagher

Sheila Gallagher
Chairman

January 17, 1984

INTRODUCTION

This document contains a report of the activities of the State Local Boundary Commission during 1983. More importantly, it contains recommendations to the Second Session of the Thirteenth Legislature for changes to the boundaries of five municipalities, pursuant to Article X, Section 12 of the State Constitution and AS 29.68.010. These recommended boundary changes become effective forty-five days after presentation or at the end of the Session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

The Local Boundary Commission consists of five members, one from each of the four Judicial Districts of the State, plus one member at large. The Commission members serve without compensation at the pleasure of the Governor. The current members of the Commission are:

SHEILA GALLAGHER, Chairman, serving at large until January 31, 1987;
JOSEPHINE ANDERSON, serving from the First Judicial District until January 31, 1986;
BERT GREIST, serving from the Second Judicial District until January 31, 1984;
Position Vacant, member from the Third Judicial District; and
CHARLES BETTISWORTH, serving from the Fourth Judicial District until January 31, 1985.

Staff support for the Local Boundary Commission is provided by the Department of Community and Regional Affairs, Municipal and Regional Assistance Division.

The Local Boundary Commission was established pursuant to Article X Section 12 of the State Constitution and Section 44.47.565 of the Alaska Statutes for the purposes of considering municipal incorporations, boundary changes and dissolutions.

Municipal incorporations are effected under the provisions of State laws and administrative regulations. It is the responsibility of the Local Boundary Commission to review and act on all petitions for municipal incorporations in accordance with AS 29.18.011-150, 19 AAC 10.010-030, 19 AAC 10.160-180 and 19 AAC 10.325-440. Unlike municipal boundary changes and dissolutions, the Legislature plays no role in municipal incorporations.

MUNICIPAL BOUNDARY CHANGES: Annexations and detachments may be effected by Local Boundary Commission action through either of two general procedures:

A. Legislative Review - The legislative review boundary change procedure assures an objective examination of the merits of a proposed municipal boundary change. In that the decision on such matters rests with the Local Boundary Commission and the Legislature, this process assures that decisions will be made with the greatest consideration given to the application of regulatory standards concerning such matters.

This process is typically initiated by municipalities in situations where there is a compelling need for the proposed boundary change, but where a majority of the residents in the territory involved in the proposed boundary change oppose it.

Under this process the Local Boundary Commission may accept and review any proposed local government boundary change. Once the Local Boundary Commission has accepted a petition proposing a local government boundary change, the Commission conducts a public hearing in the municipality proposing the boundary change. If, after the public hearing is completed, the proposed boundary change is approved by the Local Boundary Commission, the Commission presents a recommendation for the change to the Legislature during the first 10 days of any regular session. The recommended change becomes effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution receiving concurrent approval from a majority of the members of each house.

B Local Action - Municipal boundary changes subjected to this process gain final approval at the local level. The following discussion examines the three types of local action boundary change procedures:

1. An area adjoining a municipality may be annexed or detached by municipal ordinance without an election, provided all property owners and voters within the area petition the assembly or council. The annexation becomes effective with the consent of a majority of the Local Boundary Commission members.

2. Municipally owned property adjoining the municipality may be annexed by ordinance without voter approval. The annexation becomes effective with the consent of a majority of the Local Boundary Commission members.

3. A proposition for the annexation or detachment of territory may be submitted to the voters residing within the area of the proposed boundary change. To become effective the proposed boundary change must be approved by a majority of such voters. Before the proposition is submitted to the voters, the Local Boundary Commission must approve a petition for the proposed boundary change.

DISSOLUTIONS: Current activities related to the issue of sovereignty of Alaska Native villages has alerted the Commission to the need to prepare for a potentially significant number of rural city governments which might seek dissolution.

In August of 1983, the second class city of Akiachak notified the Department of Community and Regional Affairs that it wanted to consider dissolution of its municipal government. Department staff met with representatives of the City Council and the IRA Council to discuss the dissolution process.

Subsequently, but contrary to the Department's explanation of the dissolution process, the Akiachak City Council resigned and the IRA Council passed a resolution notifying the Department that the IRA Council had become the representative government for the community of Akiachak. The Department notified the IRA Council that the dissolution of the City government has not been accomplished, as the City had not followed the statutory procedures for dissolution. The Department notified the IRA Council that the Department was willing to assist the City with the preparation of a correct dissolution petition. The IRA council indicated that it did not recognize the State's authority in the dissolution process and considered the City government dissolved. To date, there has been no resolution to this issue.

The following explanation reviews the procedures for the dissolution of a municipality. The dissolution of a municipal government, in accordance with Sec. 29.68.500-580, can be effected by Local Boundary Commission action through either of two procedures:

A. Legislative Review -- The legislative review procedure assures an objective examination of the merits of a proposed dissolution. The decision for a dissolution rests with the Local Boundary Commission and the Legislature, which ensures that decisions will be made with the greatest consideration given to the application of regulatory standards concerning such matters.

This process is typically initiated through a petition by the community where the municipal government has ceased to function or by the Commissioner of the Department of Community and Regional Affairs.

Once the Department has received and approved a petition for the dissolution of a municipal government, the petition is forwarded to the Local Boundary Commission which must then hold a public hearing in the community proposing the dissolution.

In reviewing the dissolution action, the Commission will apply the standards for dissolution of cities.

These standards require that: 1.) the city has ceased, for two or more consecutive years, to exercise any of the municipal powers set forth in AS 29.48.030 - 29.48.035; 2.) the city has failed to conduct two or more consecutive regular elections in the manner provided by law; and 3.) the city no longer meets the standards for incorporation as provided by law and regulation.

If, after the public hearing is completed, the proposed dissolution is approved by the Local Boundary Commission, the Commission presents a recommendation for the action to the Legislature during the first 10 days of any regular session. The recommended dissolution becomes effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution receiving concurrent approval from a majority of the members of each house.

B Local Action - A municipal dissolution subjected to this process gains final approval at the local level. The process is initiated by municipal residents filing a dissolution petition. The petition must by signed by at least 25 percent of the number of voters who voted in the last regular municipal election.

Once the Department has received and accepted the petition, it is forward to the Local Boundary Commission. The Commission would then conduct a public hearing in the community proposing the action to determine if the standards for a local action dissolution have been met.

The standards for a local action dissolution require that: 1.) the municipality to be free of debt, or if in debt, that each of its creditors is satisfied with a method of repayment, and 2.) either it no longer meets the minimum standards prescribed for incorporation by AS. 29.18.011, or it ceases to use each and every one of its mandatory powers.

If the Commission finds that the dissolution petition meets the standards it will accept the petition and immediately notify the lieutenant governor. Within 30 days after notification, the lieutenant governor will order and election with the municipality to determine whether the voters desire dissolution.

SUMMARY OF ACTIVITIES OF THE LOCAL BOUNDARY COMMISSION DURING 1983

During 1983 the Local Boundary Commission dealt with petitions concerning the following proposed municipal incorporations and boundary changes:

1) CITY OF HAINES - The Commission approved the petition for the annexation of territory, comprising approximately 8.11 square miles. The proposed annexation is subject to Legislative review of the recommendation submitted on pages 9 through 12 of this document.

2) CITY OF KETCHIKAN - The Commission approved the two petitions for annexation of approximately 6.82 acres and 0.3 square miles. The proposed annexations are subject to Legislative review of the recommendations submitted on pages 13 through 17 of this document.

3) CITY OF POINT HOPE - The Commission approved the petition for annexation of approximately 3.03 square miles. The proposed annexation is subject to Legislative review of the recommendation submitted on pages through 18 of 21 this document.

4) CITY OF HOONAH - The Commission approved the petition for annexation of approximately 9.68 square miles. The proposed annexation is subject to Legislative review of the recommendation submitted on pages 22 through 25 of this document.

5) CITY OF KODIAK - The Commission approved the petition for annexation of approximately 10.92 acres. The proposed annexation is subject to Legislative review of the recommendation submitted on pages 26 through 33 of this document.

6) CITY OF CHIGNIK - The Commission approved the petition for the incorporation of Chignik as a city of the second class, pursuant to AS. 29.18. The voters subsequently approved the proposed incorporation. The Lieutenant Governor's office certified the election results on May 16, 1983.

7) CITY OF SAINT GEORGE - The Commission approved the petition for the incorporation of Saint George as a city of the second class, pursuant to AS. 29.18. The voters subsequently approved the proposed incorporation. The Lieutenant Governor's office certified the election results on September 13, 1983.

8) CITY OF FAIRBANKS - The Commission approved the City's local action petition authorized by City Ordinance 4241 to annex 26.86 acres.

9) CITY OF FAIRBANKS - The Commission approved the City's local action petition authorized by City Ordinance 4242 to annex 40 acres.

10) CITY OF FAIRBANKS - The Commission approved the City's local action petition authorized by City Ordinance 4244 to annex 6,810 square feet.

11) CITY OF FAIRBANKS - The Commission approved the City's local action petition authorized by City Ordinance 4265 to annex 26.86 acres.

12) CITY OF NORTH POLE - The Commission approved the City's local action petition authorized by City Ordinance 82-20 to annex 37.03 acres.

13) CITY OF NORTH POLE - The Commission reviewed the City's local action election petition authorized by City Ordinance 83-10 to annex 116.07 acres. Final action on the petition by the Commission will follow a public hearing to be held in early 1984.

14) CITY OF NORTH POLE - The Commission reviewed the City's local action election petition authorized by City Ordinance 83-14 to annex 0.3 square miles. Final action on the petition by the Commission will follow a public hearing to be held in early 1984.

15) CITY OF KETCHIKAN - The Commission approved the City's local action petition authorized by City Ordinance 999 for the annexation of 8.95 acres.

16) CITY OF KETCHIKAN - The Commission approved the City's local action petition authorized by City Ordinance 1001 for the annexation of 2.37 acres.

17) CITY OF KETCHIKAN - The Commission approved the City's local action petition authorized by City Ordinance 1002 for the annexation of 10.79 acres.

18) CITY OF KETCHIKAN - The Commission approved the City's local action petition authorized by City Ordinance 1003 for the annexation of 85.16 acres.

19) CITY OF KETCHIKAN - The Commission approved the City's local action petition authorized by City Ordinance 1004 for the annexation of 9.67 acres.

20) CITY OF PELICAN - The Commission approved the City's local action petition authorized by City Ordinance 1983-7 for the annexation of 11.43 acres.

21) CITY OF WASILLA - The Commission approved the City's local action petition authorized by City Ordinance 83-32 for the annexation of 92.77 acres.

22) CITY OF KODIAK - The Commission approved the City's local action petition authorized by City Ordinance 656 for the annexation of 12.87 acres.

23) CITY OF KODIAK - The Commission approved the City's local action petition authorized by City Ordinance 673 for the annexation of 8.54 acres.

24) CITY OF KODIAK - The Commission approved the City's local action petition authorized by City Ordinance 708 for the annexation of 8.8 acres.

The incorporation of the Cities of Chignik and Saint George brought the total number of municipal corporations in the State to 156.

STATE OF ALASKA
LOCAL BOUNDARY COMMISSION

RECOMMENDATION NUMBER FOUR TO THE SECOND
SESSION OF THE THIRTEENTH LEGISLATURE

RECOMMENDATION FOR THE ANNEXATION OF TERRITORY
TO THE CITY OF HOONAH

On September 22, 1983, the Hoonah City Council passed resolution number 83-09-22-01 authorizing the petition for the annexation of twenty-four square miles of territory. The City of Hoonah submitted its petition and supporting documentation to the Department on September 30, 1983.

The petition was determined to be sufficient as to form and content and was accepted by the Department November 2, 1983. The requirement that the petitioner give public notice of the filing of the petition was fulfilled by the posting of such notice in three public places (the City Hall, the U.S. Post Office, and the B.M. Behrends Bank).

Pursuant to proper notice, the Local Boundary Commission held a public hearing on the petition for the proposed annexation on December 18, 1983. The hearing began at 1 p.m. (local time) in the Hoonah City Council Chambers. Local Boundary Commission members present were: Charles Bettisworth and Bert Greist. Answering briefs were submitted by the Sealaska Corporation and Huna Totem Corporation. The City of Hoonah subsequently submitted a reply brief during the hearing.

Pursuant to proper notice, the Local Boundary Commission held a decisional meeting on the petition for the proposed annexation on January 7, 1984. Local Boundary Commission members present were: Sheila Gallagher (Chairman), Charles Bettisworth, Joe Anderson, and Bert Greist.

Upon consideration of the petition to annex twenty-four square miles to the City of Hoonah, the December 12, 1983 report of the Department, the answering briefs submitted by Huna Totem Corporation and Sealaska, the reply brief submitted by the City of Hoonah and the testimony presented at the public hearing, the Local Boundary Commission made the following findings of fact:

1. There are no other municipalities in the immediate area of the City of Hoonah to provide services to the approximately 200 residents of the territory proposed for annexation. As there are no other municipalities in the immediate area of the City of Hoonah, the territory is in need of municipal services which the City can provide more effectively than any other municipality.

Currently, the City of Hoonah is providing municipal services outside of the City. The City of Hoonah airport, the City landfill, and the City maintained recreational trails are all located outside of the City. The City is providing on request, police protection, emergency medical treatment, library, and health clinic services to persons residing outside of the City. With the continued expansion of the timber industry in the Hoonah area, the need for municipal services will continue to expand. It will be necessary for the City to provide for education, planning and zoning, public safety, emergency medical services in that territory proposed for annexation.

2. Given the current level of timber harvesting and plans for expansion of the timber harvesting activities in the Hoonah area, it is likely that future growth and development will occur within the territory and that annexation of the territory will enable the City to plan for and control that development.

3. Residents of Hoonah residing outside of the municipal boundaries may not participate in the democratic process which guides the municipality's direction and growth. So long as these individuals reside outside of the municipality's boundaries, they are precluded from holding office on the City Council. Further, those residents may not vote on members of the City Council and may not vote on City referenda or initiative.

4. The watershed territory proposed for annexation in the City of Hoonah's petition has been excluded from the Commission's recommendation. The Commission feels that there was not sufficient justification given for the annexation for this territory.

THEREFORE, the Commission hereby recommends to the Second Session of the Thirteen Legislature of the State of Alaska, annexation of territory to the City of Hoonah, resulting in the following legal description for the City of Hoonah:

Beginning at the NE corner of protracted Section 22, T43S, R61E, Copper River meridian (C.R.M.); thence, south to the NE corner of protracted Section 34, T43S, R61E, C.R.M.; thence east to the NE corner of protracted Section 35, T43S, R61E, C.R.M.; thence south to the SE corner of protracted Section 35, T43S, R61E, C.R.M.; thence west to the SE corner of protracted Section 34, T43S, R61E, C.R.M.; thence south to the SE corner of the North 1/2 of protracted Section 3, T44S, R61E, C.R.M.; thence west to the SW corner of the NE 1/4th of protracted Section 5, T44S, R61E, C.R.M.; thence north to the NW corner of the NE 1/4th of protracted Section 5, T44S, R61E, C.R.M.; thence west to the SW corner of protracted Section 32, T43S, R61E, C.R.M.; thence north to the NW corner of protracted Section 32, T43S, R61E, C.R.M.; thence east to the NW corner of the NE 1/4th of the NE 1/4th of

protracted Section 32, T43S, R61E, C.R.M.; thence north to a point that intersects with the line of mean high water off Inner Point Sophia; thence meandering in a generally easterly direction along the mean high tide water line of Icy Strait to a point which intersects with the northern boundary of protracted Section 21, T43S, R61E, C.R.M.; thence east to the NE corner of protracted Section 22, T43S, R61E, C.R.M., the true point of beginning, containing 9.68 square miles, more or less, all in the First Judicial District, State of Alaska.

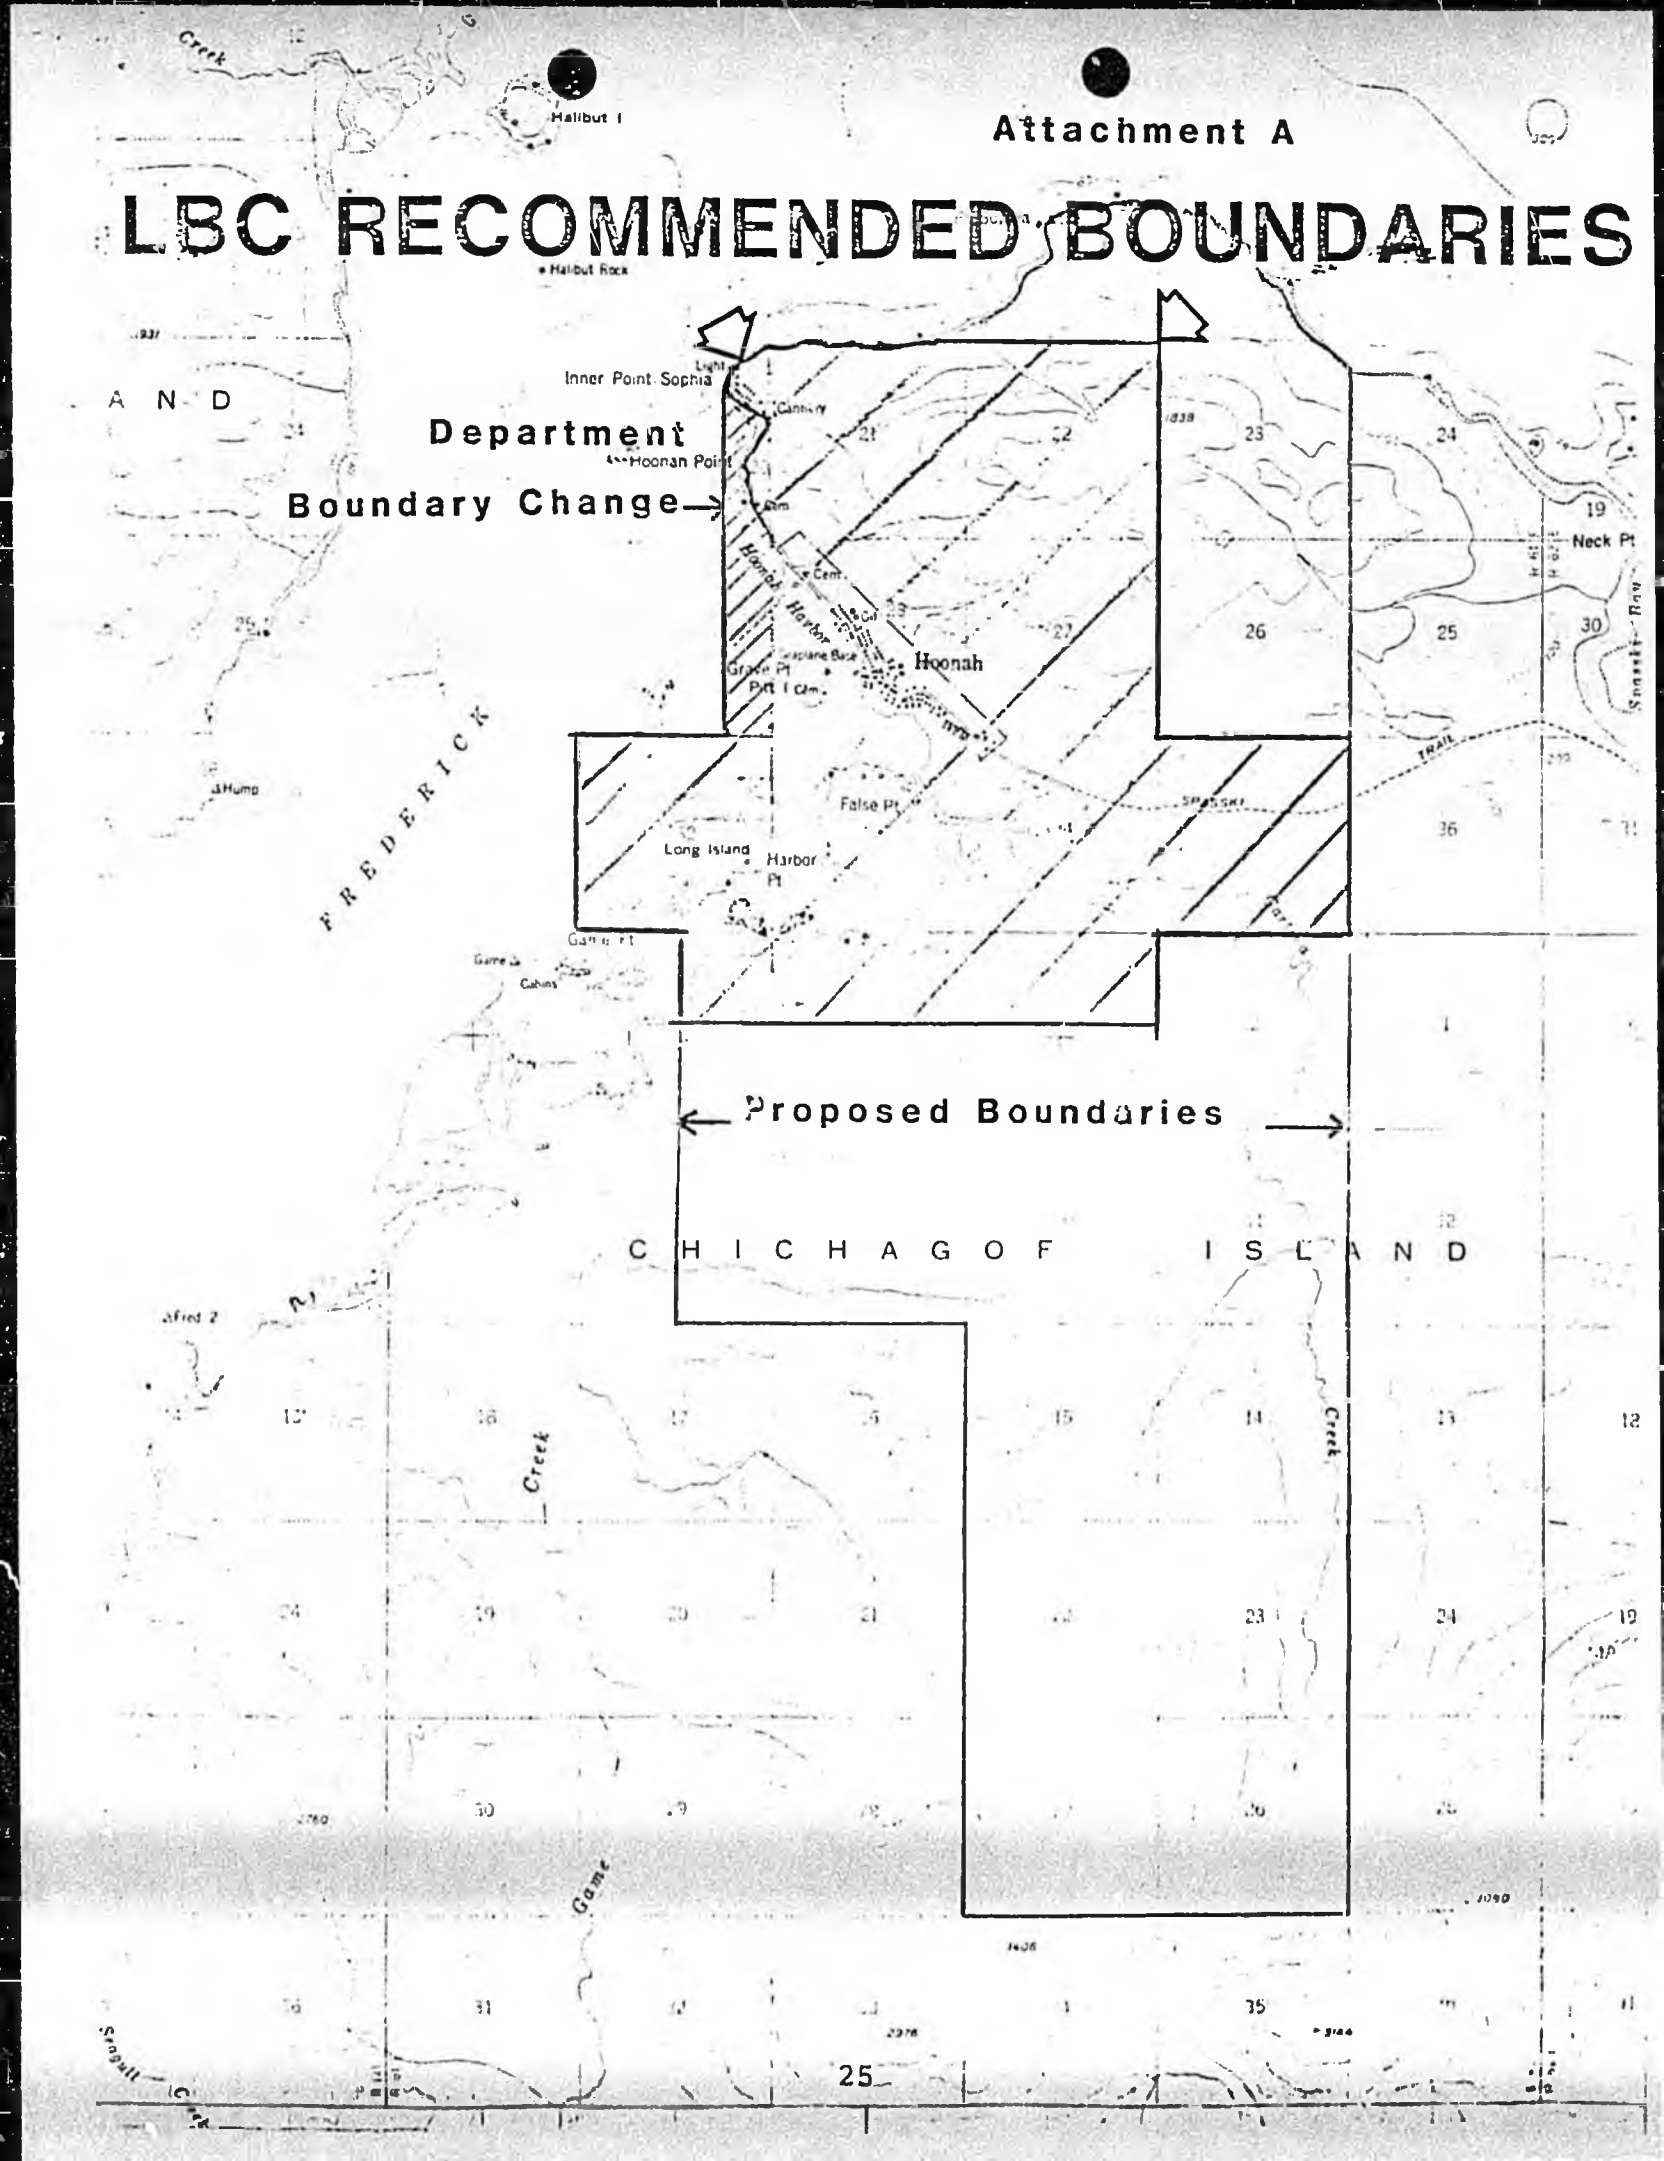
LBC RECOMMENDED BOUNDARIES



December 20, 1983

RECEIVED

DEC 30 1983

DEPT. OF COMM. & REG. AFFAIRS
DIV. OF MUNICIPAL & REG. ASST.

Local Boundary Commission
C/O Jim Sanders
Department of Community & Regional
Affairs, Local Government Assistance
225 Cordova St., Bldg. B
Anchorage, AK. 99501

Gentlemen:

Since the City has been afforded the opportunity of written rebuttal and since I limited my final remarks at the annexation hearing on 12/18/83 at the request of the acting Chairman of the Local Boundary Commission, the Huna Totem Corporation feels that a brief reply is in order. We will generally follow the order of the City's reply.

It is still our contention that the notice of the annexation was not sufficient to meet the intent of the Alaska Administrative Code even if it can be demonstrated that the City met the letter of the code, which we doubt.

In a workshop on December 9th, and 10th, 1983 the Huna Totem Corporation Board of Directors unanimously directed me as the Corporate Chief Executive Officer to oppose all annexation except the 1130 acres. I was stretching my authority when I recognized there might be some validity to annexing U.S. Survey 2414. The Board is not accustomed to passing resolutions each time they give the Chief Executive Officer a directive.

The Huna Totem Corporation brief was mailed to the address given in the public notice and hand delivered to the petitioner. (See Affidavit)

The fact that a Huna Totem Corporation Board member and an employee of the Corporation are/were councilmen and/or on the Planning & Zoning Commission is immaterial. An individual Board member does not represent the Corporation. Only the Chairman and Chief Executive Officer can commit the Corporation as individuals and then with limitations. Certainly the Board member/City Councilman is not considered as being able to speak for or commit the City in a Corporate Board meeting.

The Coastal Zone Management Plan was cited in testimony at the hearing in several instances as being the document from which many of the "Facts" were drawn. It should be noted that the Coastal Zone Management Plan has not been adopted. Additionally, the Huna Totem Corporation is on record as questioning the accuracy and completeness of the draft Coastal Zone Management Plan. The use of one inaccurate and incomplete document to validate a second document is not acceptable. Neither the City's brief nor the State's report cited the Coastal Zone Management Plan as the authority, therefore, it should come as little surprise that we ignored

the Coastal Zone Management Plan in our original brief.

The petitioner claims we did not comply with 19 AAC 10.550. 19 AAC 10.500 states in part "... the brief ... shall demonstrate that the boundary change meets the applicable standards ..."

One of the difficulties in preparing our answering brief was the fact the petitioner did not address any of the standards. We were left to guess at which standards the petitioner was trying to substantially meet and the basis for their determination. Had each standard been addressed and factual information presented demonstrating the criteria were met then our analysis could have been more thorough. As it stands there was no testimony which indicated that any statement in our original brief was materially incorrect or uncomplete. We still stand behind our statement that the City's brief was incorrect and incomplete as further evidenced by their complete failure to address any of the standards as required by 19 AAC 10.550.

The petitioner uses the State's "Report..." as substantive proof that their brief is accurate. Please refer to our comments on the Coastal Zone Management Plan. One inaccurate document cannot validate another.

Subsistance became an issue at the public hearing. Except for one "Whereas" clause in one of the supporting documents the petitioner had not addressed subsistance as justification for annexation in the actual brief. It might be of interest to point out that Mr. Hill and Mr. Greenwald who testified about subsistance, specifically herring eggs and crab pots, both enjoy family incomes substantially in excess of $50,000 per year.

In the desire to limit and control development on Corporate lands the petitioner is ignoring the whole legislative intent behind ANCSA which established the native village corporations and gave them land. The lands were given to the corporations for the purpose of development in order to establish an economic base for the residents of the native villages and allow them to rise above the subsistance level if they so desired. If the issue of City boundaries is to be based on subsistance then it would be well to hear from those forced to live the subsistance life. We do not deny that development will impact subsistance fishing and hunting. But it can be demonstrated that the impacts are, in some cases, beneficial as well as the acknowledged negative impacts. As only one example of the benefits is the fact that more areas and streams have easier and better access. As a native village corporation with 100% native shareholders you can be sure that we are aware of the subsistance issue and subsistance is taken into account in <u>all</u> development plans.

Finally, the petitioner in their brief and in the public testimony spoke at length on the need to annex the watersheds in order to control and protect them. You heard testimony from the Hoonah District Ranger, Ms. Joy Berg, who stated that annexation will <u>not</u> effect management and control one way or the other. That sort of shoots a hole in the major arguement of the petitioner, doesn't it? The FACT is that Federal statutes and regulations will supersede any control or management measures the City will try to impose and the City will be ignored.

In addition, all other forest lands in state and private ownership are regulated by the Alaska Forest Practices Act which largely follows the federal regulations. Before we do anything with our lands we must demonstrate that we are in compliance with the State's Statutes. Again, State statutes will supersede City Ordinances.

We have pointed out that the petitioner's brief is factually incomplete and incorrect as required by 19 AAC 10.550, that the State's "Report to the Local Boundary Commission..." is inaccurate and incomplete and that public testimony failed to demonstrate any valid reasons for annexation.

We have demonstrated that the actual health, welfare and safety may well be endangered if this annexation is permitted. We therefore request that the Local Boundary Commission limit the City's annexation to the 1130 acres now owned by the City.

Yours truly,

HUNA TOTEM CORPORATION

William C. Bivin

Attachment:

AFFIDAVIT

I do hereby certify and swear that on December 15, 1983 at approximately 9:45 a.m. I hand delivered one copy of the Huna Totem Corporation's brief on the City of Hoonah's proposed annexation to the City Clerk and one copy to the City Manager.

Ladonna Dybdahl
Secretary for Huna Totem Corp.

HUNA TOTEM CORPORATION
P.O. BOX 290 HOONAH, ALASKA 99829 907-945-3330

Rec'd - 12c
19, 1983
Ofs.

Huna Totem Corporation Brief

My name is William C. Bivin and I am here today representing the Huna Totem Corporation, the village corporation of Hoonah, Alaska. Huna Totem Corporation has 953 shareholders and an estimated 80% of the population of Hoonah are shareholders.

In my following remarks it is important to remember that not only do I represent a corporation but that I also have close to 7 years in City management with my most recent City position being City Manager of Kodiak, Alaska ending June 1982. In my city management experience I have been personally responsible for two extremely controversial annexations and 1 - 3, non-controversial annexations. My battle scars entitle me to speak knowledgeably about annexations in general and this one in particular.

The Huna Totem Corporation wishes to actively support the City's annexation efforts as long as they are reasonable. The Corporation whole heartedly supports annexation of the 1130 acres recently conveyed to the City and would not oppose annexation of the Parcel U.S. Survey 2414 owned by Huna Totem Corporation. This property is immediately adjacent to the City and is presently being subdivided. The Corporation is of the opinion that this annexation meets the standards of 19 AAC 10.065 through 10.080.

With the exception of the above properties the City has not demonstrated that the rest of the properties adequately meet the "Standards for Annexation" as defined in 19 AAC 10.065 - .070. If it is held that the territory is contiguous to the City (which we don't necessarily agree with) and falls within the parameters of 19 AAC 10.070 then the City has failed to meet the following specific standards:

19 AAC 10.070 (a) (1) the contiguous territory is totally surrounded by the city's boundaries;

The fact that this standard is not met is evident.

(2) the land in the territory is wholly owned by the city;

The majority of the land is in private, state or federal ownership.

(3) the territory is urban in character;

19 AAC 10.070 (d) states that "in determining whether the territory is urban in character for the purposes of (a) (3) of this section the Commission will ... consider whether the property is platted or held for sale for residential or commercial purposes..." With the exceptions noted it is obvious the vast majority of the lands proposed for annexation are not now subdivided and will never be. With very minor exceptions these lands are totally unsuitable for commercial or residential use. Further, the Huna Totem Corporation has adopted a policy that they will not sell ANCSA lands as it is felt that this is the heritage of the shareholders and natives of this community.

This paragraph goes on to state, that the Commission will consider ... "whether the population density approximates that of the annexing city,..." The population density does not approximate that of the City and there is no possibility of that ever occuring. For the population density to approximate that of the existing city the population would have to be in the 100's of thousands.

In short, there is no justifiable way of arriving at the conclusion that the territory is urban in character.

(4) the territory is in need of municipal services which the city can provide more efficiently than another municipality;

What municipal services can the City efficiently provide to the territories in question? Just last Sunday I was the recipient of a house full of raw sewage. While solving the problem it was obvious that the lines had not received any maintenance for a long, long time. The water main near my house is leaking and has been for at least two weeks. In addition the City ran a deficit last year and actually passed a deficit budget this year. This is not meant to be sour

grapes but is simply used to illustrate the following paragraph. Other examples are readily available.

Given a deficit budget, a lack of a long term capital improvements plan, lack of an adopted comprehensive land use plan, a lack of any facilities maintenance programs, one has to question the ability of the City to even provide adequate municipal services within it's existing boundaries and to it's existing population let alone extending any sort of services to territories proposed for annexation.

I am aware that the Boundary Commission has held, in the past, that the inability of a City to provide services was not sufficient reason, by itself, to deny annexation. I am also aware of the use of service districts. However, from an ex-city manager's point of view I can tell you that service districts create additional problems for, and financial demands on, a City Council and it's administration. With the City's demonstrated inability to provide adequate municipal services and it's demonstrated lack of resouces to provide such services, where is it going to get the financial and human resources to monitor and administer service (non-service) districts when they can be eliminated by simply not annexing?

The City, in it's brief, has not demonstrated that there is a need for municipal services in the territory nor has the City demonstrated that it has the finances or competance to extend and maintain such services.

(5) there is a reasonable likelihood that future growth and development will occur within the territory and that annexation of the territory will enable the city to plan for and control that development;

One of the strongest arguments the City has for the annexation of the 1130 acres conveyed to the City and possibly the U.S. Survey 2414 property is that there is a reasonable likelihood that there will be future growth and development.

Indeed, Huna Totem Corporation supports the City in their argument, based on anticipated growth, that the developable lands should be annexed and are needed to alliviate the current shortage for residential property. But annexation of these lands would adequately supply the needs of the current and future residents through the year 2000 and beyond. This argument is valid only for the 1130 acres and U.S. Survey 2414.

The City in it's brief has not adequately demonstrated that there is a reasonable likelihood for growth and development in the other areas. Their factual information is both incomplete and incorrect. For example, they indicate that the Whitestone Logging camp should be included in the annexation because it requires services of the City. But yet it excludes Mount Bether Community stating it is self sufficient and does not rely on City services. This is factually incorrect. Mount Bether owns at least one house in Hoonah and there are several families from Mount Bether Community who reside full or part-time in Hoonah and even have children in school here. During the construction and fishing season Mt. Bether residents habitually work in Hoonah and regularly sell farm produce in the City. The Mount Bether Community probably utilizes the City's services to a greater extent than the logging camp.

Take a look at the map. What conceivable growth and development, which might affect the City, can your imagine in Sections 14, 15, E.½ of 21, 22, 23, 26, E.½ of 27, and 35 of Township 43 South, Range 61 East? Or sections 2, 3, 4 (except NE¼), E.½ 5, E.½ 8, 9, 10, 11, 14, 15, 22, 23, 26, and 27? The answer is "NONE" and because of the physiography of the territory there will be none in the forseeable future.

(6) the health, welfare or safety of city residents is endangered by conditions existing or developing in the territory and annexation will enable the city to remove or relieve these conditions;

This might conceivably have been one of the City's strongest arguments but no where in the City's brief or supporting documents have they demonstrated that the health, welfare, or safety of City residents is endangered if the territory is not annexed. In fact, annexation may actually jepordize the health, welfare and safety of the City residents and may actually reduce the City's control of, or ability to control, the annexed properties.

Territory does not have to be annexed, or even owned, to be controlled. The city manager actually has a more effective control of an extra-territorial watershed, especially if it is on state or federal lands. If something occurs in the extra-territorial watershed the city manager can have the responsible agencies, with the authority and resources on site in a matter of minutes to hours. If underlings aren't responsive, the City Manager can have the responsible State Commissioner on the phone in a couple of hours and if that Commissioner is unresponsive the City manager can have the Governor on the phone within 12 hours.

If the City has annexed territory to "Protect" it and passes ordinances to effectuate control then the City is expected to use it's resources to establish and administer that control. The City and City manager's effectiveness is limited and it is only after the City has exhausted it's resources that it becomes possible to call on outside agencies for help. My point is that it is not necessary to use scarce City resources to control land outside of the City limits which is vital to its health, welfare and safety. Let others who have more adequate resources do it.

There are many cities with watersheds outside of their corporate boundaries. Portland, Oregon immediately comes to mind as does the City of Kodiak, Alaska where I was City Manager. I preferred having the watershed (and garbage dump) outside of the City limits as I felt the City had more effective control and used less City resources to get that control.

While these comments cover all of the watersheds, it must be pointed out that the Agreement conveying the 1130 acres between the City and Huna Totem

Corporation dated Jan. 26, 1982 prohibits logging or any other activities in the watershed immediately behind Hoonah without City authorization. In addition, the water rights on this same area have been quit claim deeded to the City.

It is conceivable that the welfare of the City residents could be materially damaged by this annexation. As a simple example, and more can be given, the City has indicated it wants control over Huna Totem Corporation's log transfer facility. The Planning and Zoning Commission has already recommended that temporary water storage of logs and log ship loading be banned within the City boundaries. It is my understanding that this proposal still exists. If Long Island is annexed and this occurs, 35 stevedoring jobs with a payroll of over $350,000.00 will be lost; a $2½ million dollar investment will become worthless and additional employment opportunities will permanently be lost.

Leaving aside the subject of watershed control, the City has not demonstrated that the health, welfare and safety of the residents of the City will be improved by annexation.

(7) the extension into the territory of city services or facilities is necessary to enable the city to provide adequate service to city residents, and it is impossible or impractical for the city to extend the facilities or services unless the territory is within the city's boundaries;

Again we agree that the City can demonstrate it meets this standard for the 1130 acres and possibly for U.S. Survey 2414.

The City has not demonstrated that it is necessary to extend services into these territories to provide adequate services for City residents. Annexation will place additional demands on financial and human resources which are already demonstrably inadequate.

(8) residents or property owners within the

territory receive or may be reasonably expected to receive, directly or indirectly, the benefit of city government without commensurate property tax contributions, whether city services are rendered or received inside or outside the territory;

If the City resident was being unduly burdened by property taxes because of service demands originating from property owners and residents in the territory proposed for annexation then it is conceivable that there might be a more legitimate argument. However, there are no property taxes and the City resident is not being burdened. The fact is, with the exception of the enterprise funds, the City's revenues all come from the State and Federal governments.

The City's brief stated that annexation of these territories, "Will help offset the cost of providing certain municipal services,... such as police and fire protection..." The operative words are "help offset". The City has not demonstrated that it has the ability to provide adequate services to its existing population with its existing manpower and equipment. Are they going to stretch that manpower and equipment even thinner to extend services into the annexed territories? As a City resident I can personally state that I object to having the police at Long Island, or up at the White Alice Site leaving me, my daughter and about 800+ other City residents without protection.

This would indicate the need for additional manpower and equipment. I can tell you, again from my city management experience, that the increase in revenue sharing from 250 residents will not be adequate to pay the operating expenses for additional men and equipment.

19 AAC 10.070 (e) stipulates that alternative methods for offsetting the cost of providing services to individuals or property be considered. The City's brief does not address this issue and I suggest there are methods of offsetting the costs of services which the City has failed to adequately consider.

(9) the annexation is otherwise necessary to accomplish a valid public purpose.

We have read and re-read the City's brief and have attempted to what valid public purpose annexation might accomplish. Section V, "Rationale For The Boundaries Proposed" of the City's brief states it has three purposes for annexation:

1. "First, the area offers developable land for residential purposes..." In so far as this is applied to the 1130 acres and possibly to U.S. Survey 2414, we agree and support the City. However, to assume that any of the rest of the territory is developable for residential purposes is patently ludicrous.

2. "Third, the City has a justifiable desire to include the recently conveyed 1300 (sic) acres in its jurisdiction." We agree.

3. "Second, Since the proposed area is contiguous with existing City boundaries, the City Council feels that proper control over development of the area is best placed on the City's Management."

The operative word appears to be "Control". Control for what purpose? The City has failed to demonstrate that it has the requisite financial or human resources to adequately provide services to the existing community. A deficit budget and one man professional staff is going to take on the additional burden of "controlling development"? Ludicrous!

It has been my experience that cities greatest propensities are to obstruct and obfuscate. It is a rare city that can initiate. Unfortunately, the City's entire brief clearly indicates the intent to obstruct.

The City has stated they wanted to control development. This can only be read to mean logging, as logging is the only "development" which will occur on most of the land to be annexed. One then has to assume that all of our logging plans, roadbuilding plans, etc. would have to be submitted to the City for review and approval. The City staff, City Council and it's committees and com-

missions does not have the staff, resources or expertise to adequately evaluate this type of plans. The City could only obstruct and delay and drive up costs. One must then ask who benefits? Certainly not the City and its inadequate resources; not the resident of the City who is going to be faced with fewer job opportunities and higher City administrative costs, not the Huna Totem Corporation, or it's shareholders, who will be faced with greater costs.

Section V of the City's brief speaks to certain specific parcels of land proposed for annexation and we wish to comment on each parcel.

(1) Gartina Creek Drainage. The City has not demonstrated that it has the financial and human resources or the technical expertise to effectuate control over the watershed. Because much of the watershed is on federal land the U.S. Forest Service can be forced to develop, implement and administer an appropriate watershed management plan. They have the expertise and resources which are totally lacking in the City. Use the City's scarce resources to insure the U.S. Forest Service does it's job.

(2) Hoonah Airport. The Huna Totem Corporation sees no vaild reason for annexation of the airport. Speaking from a City manager's stand point, with experience in two cities with airports in the City limits, I can assure you that an airport in the City limits is not necessarily beneficial. The only justification is if the land immediately adjacent to the runways is private ownership, can be commercially developed, and taxed. There is little likelihood for that happening. Again, why use scarce city resources on an area better served by others?

(3) Whitestone Logging. We have made several comments previously and will not repeat them here. The Huna Totem Corporation supports Whitestone Logging in whatever they wish to do.

We would like to note that the brief is factually incorrect in this section. The camp does not have to be annexed to be in the Hoonah School District. School district boundaries do not have to coincide with municipal boundaries.

(4) Long Island. Why does the fact that Long Island is a Log Transfer Facility

make it appropriate for city control? At last count there are 8 state and federal regulatory agencies with jurisdiction over Long Island and surrounding waters. These agencies have the resources and expertise to exercise control. The City has neither.

Conversations with members of the City's Planning and Zoning Commission indicate that in their annexation discussions the impression was given that whatever was satisfactory to the regulatory agencies would be acceptable to the City. If this is so, why annex? Why add a layer of bureaucracy without the resources, expertise or competance to control? What benefit will accure to the City resident, remembering that 80% of the residents are corporate shareholders?

The only benefit to the City resident we can identify would be through taxation. Because of the City's inability to put their financial affairs in order, it is felt that the City is looking to the Huna Totem Corporation to bail them out. Besides taxation there are a whole series of financial mechanisms which the City could use to increase their revenues at the expense of the Huna Totem Corporation without benefitting the Corporation. In the short run revenues might increase but in the long run the welfare of the City residents will be harmed.

Many residents of Hoonah feel the Corporation should get out of logging and will do whatever they can to stop logging. Surprisingly, the Huna Totem Corporation has a goal of being out of logging within five years with the smallest possible depletion of the timber resource. However, because of existing financial commitments some logging will be requried for a period of time. The City can do nothing to reduce the time or volume of timber logged. However, it can and will materially increase both the time Huna Totem Corporation remains in the logging business and the volume of timber logged if this annexation takes place. The very fact that the City is incapable of recogn[illegible]ing the existance of this situation is evidence of their lack of compentance to exercise any

meaningful control over Long Island or other timber lands.

(5) Excursion Inlet Packing. Huna Totem Corporation will support Excursion Inlet Packing in the decision they make.

General Comments:

The Huna Totem Corporation doubts that the City has complied with the regulations governing annexation. It is certain that the City's brief and supporting documentation is factually incorrect. The City claims, in Resolution 83-09-22-01, that public hearings were held on the proposed annexation and cites Sept. 22, 1983 as the specific example. "Exhibit F" simply indicates a public meeting between the City Council and the Planning and Zoning Commission. It is doubtful that this was a public annexation hearing or that it complies with statatory requirements regarding annexations.

Even if the Commission finds that the City was procedurally correct we still question the process... It is the Huna Totem Corporation's position that the City did not adequately allow for public input into the process. As stated earlier, I have been involved in two very controversial annexations. In order to insure adequate public input several public hearings were held. In addition to the hearings, however, I personally contacted every landowner affected with copies of maps and the final annexation proposal. Informal meetings were held at the convenience of interested parties. I understand now that it comes as a surprise that Huna Totem Corporation opposes annexing the world, but up until after the Sept. 22 meeting we understood that the City's annexation proposal just included the 1130 acres, which we have never opposed.

The City has the responsibility of informing the public and insuring the public input. The City has been derelict and grossly negligent in carrying out it's obligations.

Summary:

1. Huna Totem Corporation supports the annexation of the 1130 acres of recently conveyed, City owned land. The City has demonstrated

that this territory meets the standards for annexation.

2. The City's brief presents information which is factually incorrect and incomplete regarding all territories except 1. above. Specifically this includes information regarding:

   (a) The Mount Bether Community;

   (b) The Whitestone Logging Camp;

   (c) Public hearings;

   (d) The ability of the City to prudently manage and protect the territories to be annexed.

   (e) The ability of the City to extend and maintain municipal services to the area proposed for annexation;

   (f) Benefits to existing City residents and residents of the territories to be annexed.

In conclusion, this is a poorly thought out annexation which has a very real potential of materially endangering the health, welfare and safety of the residents of Hoonah and territories to be annexed. This proposal is an irresponsible misuse of public funds which are demonstrably inadequate to meet existing needs. We have demonstrated that the territory in question does not meet the standards for annexation and that the information presented in the brief is factually incorrect and incomplete.

It is suggested that the City withdraw its annexation petition, reduce it's scope and return when it can demonstrate that it can even provide adequate services for the existing population.

Addendum

Huna Totem Corporation Brief In Opposition

After the Huna Totem Corporation brief was written a copy was received of the "Report to the Local Boundary Commission on the Proposed Annexation of 23.91 Square Miles to the City of Hoonah," written by the Department of Community and Regional Affairs. The material contained is so erroneous and misleading that a rebuttal is called for. In several places the document purports to detail Huna Totem Corporation plans as substantive justification for finding that a standard is met. To the best of my knowledge the Corporation was not contacted regarding its plans and takes exception to the Department of Community and Regional Affair's attributing such statements to the Corporation without verification.

Specific examples of fallacious information is:

1. Page 4, Standard (4), paragraph 3 and 5. The Corporation has a goal of being out of the logging business within 5 years. The 1983 and 1984 logging seasons have and will be the peak production years. The 1984 logging season will be the last season on the East side of Port Frederick Sound. The growth has occured and no additional growth is anticipated or needed. The "Report" is inaccurate in growth projections and Huna Totem Corporation's "anticipated market".
2. Page 5, Standard (5) all. The Report is factually inaccurate and misleading in it's entire treatment of standard (5).

151.5 Million board feet and 91.6 miles of road will <u>not</u> be harvested and built by 1986 in the Hoonah area. These figures are close to 3 times as much as planned or anticipated.

The statement is made, "It is anticipate(d) that several more logging camps and logging facilities will be constructed in the territory to be annexed." This statement is totally erroneous, factually inaccurate and grossly misleading.

The log transfer and storage facility was designed for a 15 year life span and not 50-100 years. Stretch the usable period to 300 years and the report would really show an impressive volume. This paragraph is inaccurate and

misleading.

3. Page 6, Standard (6) all. The Report finds that there are no conditions endangering City residents and that have adequate protection. But then, goes on to find the standard has been met. Incredible - just incredible. The spurious thinking responsible for this finding has to be one of the classic examples of bureaucratic ineptitude. The writer of this report just received my nomination for "State Bureaucrat of The Year".

4. Page 6, Standard (7). This statement is inaccurate, incomplete and misleading.

5. Page 7, Standard (9). I feel that there are a number of residents outside of the City who would not find this to be a "valid public purpose".

The "Report to the Local Boundary Commission ..." is spurious, specious and fallacious. It has been written so as to consciously mislead the Commissioners and general public. It has been written without any attempt to validate the statements or to include material which would give a balance appraisal of the situation. As such the writer of this document is grossly negligent in carrying out his duties and responsiblities to the State, the City and to the public.

This Report should be thrown out in its entirety and the Department of Community and Regional Affairs requested to prepare a balanced unbiased report.

CS FOR HOUSE BILL NO. 101 (State Affairs)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to grants for water supply, sewerage and solid waste facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.030(b) is amended to read:

(b) The department may grant to a municipality, as funds are available, up to 75 [50] percent of eligible costs not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge systems, and solid waste processing and disposal facilities [FACILITIES] for which construction or acquisition has not commenced on or before July 1, 1983 [JUNE 21, 1976]. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (d) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

* Sec. 2. AS 46.03.030(d) is amended to read:

(d) The department shall, by regulation, identify those costs that [WHICH] are eligible costs for the purposes of this section. Eligible costs include the costs that [ESTABLISHED IN A CONSTRUCTION CONTRACT WHICH]

(1) that are necessary for construction of a project, but do not include the cost of interest and financing and right-of-way

acquisition, or costs related to operation, maintenance, repair or replacement of a project;

(2) of the initial acquisition of water delivery and sewage collection vehicles if the vehicles are determined by the department to be cost effective compared with conventional water supply and sewage collection systems;

(3) of facilities for the maintenance and storage of water delivery and sewage collection vehicles.

* Sec. 3. AS 46.03.030(e) is amended to read:

(e) The department may grant to a municipality not more than 75 [50] percent of the eligible costs that [, INCLUDING COSTS OF OBTAINING FEDERAL WAIVERS FROM THE REQUIREMENT FOR SECONDARY TREATMENT PLANTS, WHICH] are not paid for by the federal government for solid waste processing or disposal systems [FACILITIES] constructed or acquired after July 1, 1983 [1980]. However, the department may grant a municipality up to 85 [60] percent of the eligible costs not paid for by the federal government for a solid waste processing or disposal system [FACILITY] constructed or acquired after July 1, 1983 [1980], if the system [FACILITY] is used for resource recovery. The eligible costs of a solid waste processing or disposal system [FACILITY] are determined by the federal agency granting the most monetary assistance for construction or acquisition of the system [FACILITY]. For a solid waste processing or disposal system [FACILITY] for which federal money is not available, the department shall determine the eligible costs in accordance with (d) of this section. A municipality shall construct solid waste processing or disposal facilities financed by grants under this section according to plans and specifications approved by the department.

> Add Line 26, p. 2 of CSSB 21 (Fin) except change "heavy bucket" to "Sewage"

* Sec. 4. This Act takes effect July 1, 1983.

POSITION PAPER ON SENATE BILL 21
by the
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Before the
HOUSE COMMUNITY & REGIONAL AFFAIRS COMMITTEE
March 25, 1983

Senate Bill 21 amends existing statute AS 46.03.030. This statute authorizes the Department of Environmental Conservation to award grants up to 50 percent of the eligible costs for water, sewerage, and solid waste facilities. This amendment would increase the State's grant percentage from 50 to 75 percent. The bill also provides for an effective date.

This bill contains the same major provisions as SB 252 which passed the Legislature last year and was vetoed.

The Department supports this legislation for several reasons:

1) Small municipalities are often unable to raise the 50 percent local match required under the existing statute. The proposed amendment will allow many of these municipalities to improve their basic sanitation services.

2) Federal matching grants have been drastically reduced. Adoption of SB 21 with the accompanying fiscal note will help offset the impact of decreased federal revenues.

3) Alaska's residents will receive a nontaxable financial benefit. An increase in State funds will reduce LID and property assessments, thereby providing a financial benefit. Since there is no direct monetary gain for the taxpayer, there can be no increase in their federal income tax.

Adoption of SB 21 could result in construction of projects that would not have been built under the 50 percent funding program. As a practical matter, however, there is no means by which we can reliably predict which projects will be affected or their costs. The attached fiscal note estimates that if the base level of funding remains constant at $30.0 million per year, the effect of this bill will be approximately $19.5 million in FY-84.

Thank you for the opportunity to present these comments. I will be happy to address any questions you may have.

FISCAL NOTE

Bill CSSB 21 (C&RA) Am
Title: An act relating to grants for water supply, sewerage, and solid waste facilities, and providing for an effective date.

IV. Analysis

Estimating the fiscal impact of this bill requires that several assumptions be made:

1) that the base level of funding appropriated by the Legislature remains approximately $30.0 million per year;

2) that the Legislature wishes to increase the base level to fund the same number of projects at the higher level; and

3) increased funding would be provided to meet the demand created by smaller communities seeking 75% grants where they now are required to provided only a 25% match. The effect of these assumptions is an increase of approximately $19.5 million in FY-84, with a 10% annual increase thereafter.

$30.0 x 75/50 = $45.0
6.0 x .75 = 4.5
Total = $49.5

$49.5 million - $30.0 million = 19.5 million

The fiscal impact of this bill could be much larger if the Legislature attempts to appropriate funds sufficient to meet all the identified needs for water, sewerage, and solid waste facilities. A survey conducted by the Department in July of 1982 indicated a total grant demand exceeding $230 million for fiscal years 84 and 85. Assuming appropriations adequate to meet even 50 percent of this demand, the impact of increasing grants to 75 percent results in a $57.5 million impact for FY-84; therefore, it is obvious that the fiscal impact depends solely upon the size of the appropriation and can be limited to whatever the Legislature wishes.

From: Ginny Chitwood, AML Executive Director

Re: CSSB 21 (CRA) am - Grants for Water Supply, Sewerage, and Solid Waste Facilities

The Alaska Municipal League urges your favorable consideration of CSSB 21 (CRA) am, increasing the state share of construction grants for community water supply, sewerage, and solid waste facilities from 50% to 75% of the non-federal share.

Public Health Needs: Adequate and clean water, sanitary sewer, and solid waste disposal are basic public health issues that, for the most part, cannot be addressed on an individual basis. Because total costs of these projects are very large, it is hard for many areas to raise the 50% local match required by the current programs. Further compounding the problem is the decrease in the federal funding percentage from 75% to 55%.

Relief for Property Owners: The local share of water and sewer projects traditionally is paid by assessments on local property, not by general municipal taxation. Increasing the state share will provide direct relief to property owners and taxpayers by reducing local improvement district (LID) payments. Additionally, none of the state assistance dollars under this program will result in increased federal tax payments, as is the case with many of the other state revenue distribution plans. LID payments, as opposed to property and sales tax payments, are not eligible as federal income tax deductions, nor are monthly charges for water, sewer, and solid waste services.

Mandated Costs: Many of the municipal water, sewer, and solid waste projects have costly additional features, not because communities want them, but because they are mandated by federal and/or state laws and regulations. It seems only fair that a large portion of the mandated cost be borne by other than local residents.

Most areas of the state are way behind the rest of the country in having basic water supply, sewerage disposal, and solid waste facilities. Expanding the state's construction grants program is a means to accelerate the process of "catch-up". Because this is a matching grants program, an expenditure by the state will generate an increased amount of capital projects throughout the state. The new facilities will be maintained by the local governments and utility districts and will not require state operating assistance.

STATE OF ALASKA

Bill Sheffield, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811
PHONE: (907) 465-4700

March 21, 1983

POSITION PAPER

RE: CSSB 21

SPONSOR: Senate Community and Regional Affairs Committee

Program Effects of Bill

Increases from 50% to 75% the percentage of State matching funds for eligible construction costs for local water supply, treatment and discharge facilities and solid waste processing for disposal facilities constructed after July 1, 1983.

Comments

The Department supports this increase in aid to municipalities. The increase in State participation will allow a greater number of communities to afford water and sewer projects. Most local projects are partly financed through local improvement districts. At 50% State participation, many project balances could not be financed locally, due to lack of assets for bonding or high resident payback rates. The requirements that projects be pre-planned and engineered and that the local financing be arranged ensure that projects are genuine local priorities. This program has been one of most efficient capital assistance programs administered by the State.

SUBJECT: CSSB 21 (C & R A) am

DATE: March 19, 1983

Purpose of the legislation is to increase the portion of state grants for sewage, solid waste and water systems not financed by federal funding from 50 percent to 75 percent.

The other significant impact of CSSB 21 is to include the initial purchase of water delivery and honey bucket collection vehicles, as well as associated maintenance facilities, as eligible for grant funding provided the department finds them to be cost effective as compared to conventional systems.

A companion bill, CSHB 101 has been introduced by Representative Lacher. The companion bill is now in House Finance Committee. A comparison of the two bills is attached.

The following definitions are from Websters New World Dictionary, 2nd college edition, 1982:

Facility: 1. ease of doing or making; absence of difficulty.

2. a ready ability; skill; dexterity; fluency.

3. the means by which something can be done (poor transportation facilities)

4. a building, special room, etc. that facilitates or makes possible some activity (a new facility for outpatient treatment)

System: 1. a set or arrangement of things so related or connected as to form a unity or organic whole.

2. a set of facts, principles, rules, etc. classified or arranged in a regular orderly form so as to show a logical plan linking the various parts.

3. a method or plan of classification or arrangement.

POSITION PAPER ON SENATE BILL 21
by the
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Before the
SENATE FINANCE COMMITTEE
March 1, 1983

Senate Bill No 21 amends existing statute AS 46.03.030. This statute authorizes the Department of Environmental Conservation to award grants up to 50 percent of the eligible costs for water, sewerage, and solid waste facilities. The primary purpose of the amendment is to increase the State's grant percentage from 50 to 75 percent. The bill also provides for an effective date.

This bill contains the same major provisions as SB 252 which passed the Legislature last year and was vetoed by Governor Hammond due to several minor provisions not found in SB 21. In his veto statement Governor Hammond stated his support for the basic legislation and his intent to recommend that the new administration reintroduce the bill this session. The Sheffield administration also supports the concept.

The Department supports this legislation for several reasons:

1) Small municipalities are often unable to raise the 50 percent local match required under the existing statute. The proposed amendment will allow many of these municipalities to improve their basic sanitation services.

2) Federal matching grants have been drastically reduced. Adoption of SB 21 with the accompanying fiscal note will help offset the impact of decreased federal revenues.

3) Alaska's residents will receive a nontaxable financial benefit. An increase in State funds will reduce LID and property assessments, thereby providing a financial benefit. Since there is no direct monetary gain for the taxpayer, there can be no increase in their federal income tax.

The Department respectfully recommends that the committee consider one amendment to SB 21, which will make the Bill consistent with the administration's proposal. We request that SB 21 be amended as follows.

Add a provision in Section 1, AS 46.03.030 after line 19, page 1. Total State funding, from all sources, shall not exceed 75 percent of eligible project costs not financed by the federal government. This provision prevents the municipal grants program from fully matching appropriations, which would result in 100 percent project financing by the State. Requiring a minimum of 25 percent local funding will provide for more local project management.

Adoption of SB 21 will result in construction of projects that would not have been built under the 50 percent funding program. As a practical matter, however, there is no means by which we can reliably predict which projects will be affected or their costs. The attached fiscal note estimates that if the base level of funding remains constant at $30.0 million per year, the effect of this bill will be approximately $19.5 million in FY-84.

Thank you for the opportunity to present these comments. I will be happy to address any questions you may have.

and Operation
Department of Environmental
Conservation

SUBJECT: SB 21

Thank you for apprising me of the conflict that will be created by passage of SB 21 as amended. You are correct that the Department's administrative code 18 AAC 73.010 prohibits the financing of replacement projects. The committee substitute (page 1, line 28) would authorize the replacement of obsolete facilities as grant eligible and necessitate a change to the code.

I was unaware that this provision was included in Senator Sackett's amendment to finance water delivery and honey bucket collection vehicles. We strongly support the inclusion of the vehicles as grant eligible but have serious reservations on financing replacement of obsolete facilities.

The Administration's veto of SB 252 last year was partially due to the amendment in that bill, which would have authorized funding of obsolete facilities. It is the Administration's position that communities should be responsible for maintaining facilities once they are constructed and charge a user fee to cover the costs of maintenance and amortization. It is the Administration's desire not to replace facilities that have been allowed to deteriorate due to lack of maintenance by a municipality.

I have attached a copy of Governor Hammond's veto letter to Senate President Jalmar Kerttula, which includes his opposition to the replacement of obsolete facilities. As stated to you in our phone conversation, it was not my understanding that this provision was included in the committee substitute. I would be happy to work with you to clarify or modify SB 21 as necessasry to reflect everyone's concerns.

Attachment

DEPARTMENT OF ENVIRONMENTAL CONSERV

June 16, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Sec 2

Under the authority of art. II, sec. 15, of the Alaska Constitution, I have vetoed House Committee Substitute for Committee Substitute for Senate Bill 252 (Fin) am H, relating to grants for water supply, sewerage and solid waste facilities; and providing for an effective date. While I support the basic thrust of this bill - increasing the state's grant proportion of water, sewer and solid waste facilities - there are several provisions which are objectionable.

The bill would allow replacement of obsolete facilities to be grant eligible. In the past, the Department of Environmental Conservation has funded only new construction, expansion, and modification of facilities. Replacement of obsolete facilities should be funded by revenues accumulated from user charges. In this way, communities and users are encouraged to provide adequate operation and maintenance or they will foot the bill for costs to replace projects which have become "obsolete" through neglect.

The bill would also apparently allow funding of water delivery and honey bucket collection vehicles. The Attorney General has ruled that these vehicles cannot be eligible for funding through general obligation bond financing, as the Constitution restricts general obligation bonds to capital projects. General fund moneys could be used for vehicles; however, the principle source of funds for water and sewer projects has been general obligation bonds.

Finally, the bill would mandate that the Department of Environmental Conservation provide grants to communities with village safe water projects to assist in operation and maintenance of those projects. Presently, the authority to provide those grants is contained in the Village Safe Water Act and is discretionary. If the department determines that

[illegible] must have a state grant for the project to [illegible] and if the operation is sufficiently cost-efficient and funds are available, the department can fund grants to these villages. The proposed revisions would mandate these grants regardless of the community's ability to pay, the operating history of the project, or how well it is run. To the extent possible, these projects should pay their own way without relying on the state to subsidize them.

A veto of this bill would have little effect over the next year. No funds were appropriated by the legislature to implement the provisions of the bill; in fact, the Department of Environmental Conservation does not have sufficient funds to amend grants under the existing formula to the extent it has grant applications. There is also no funding available for operation and maintenance grants to communities with village safe water facilities.

I am requesting the Commissioner of Environmental Conservation to work on draft legislation addressing these issues for me to consider for submittal to the next legislature.

Sincerely,

Jay S. Hammond
Governor

February 15, 1983

The Honorable Mitchell E. Abood, Jr.
Chairman, House State Affairs Committee
Representative
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Chairman Abood:

Re: HB 101

As requested by the House State Affairs Committee, the Department of Environmental Conservation, Representative Barbara Lacher's staff, and the Alaska Municipal League met to discuss the amendments proposed for House Bill 101. The Department proposed four amendments to HB 101 in its testimony before the committee on February 11, 1983. Mr. Robert Harris, testifying for Representative Lacher, objected to three of these amendments. During our discussions we were successful in reconciling our differences on two of the three objections.

All parties now support amendments 1, 2, and 4 to HB 101, which, if adopted, will match similar changes made to SB 21.

AMENDMENT #1 - Add Section 3, AS 46.03.030(d) to read:

> The Department shall, by regulation, identify those costs which are eligible costs for the purposes of this section. Eligible costs include the costs [ESTABLISHED IN A CONSTRUCTION CONTRACT] which are necessary for the construction of a project, but do not include the cost of interest in financing and right-of-way acquisition, or costs related to operation, maintenance, repair or replacement of a project. Eligible costs include the costs of the initial purshase of water delivery and sewage collection vehicles if the water delivery and sewage collection vehicles are determined by the department to be cost effective compared with conventional water supply and sewage collection systems. Eligible costs also include the cost of facilities for the maintenance and storage of these vehicles.

AMENDMENT #2

> Delete the following clause in Section 2, AS 46.03.030(e) beginning on page 1, line 29; [INCLUDING COSTS OF OBTAINING FEDERAL WAIVERS FROM THE REQUIREMENT FOR SECONDARY TREATMENT PLANTS.] This provision is now obsolete since the time period for applying for these waivers has passed.

AMENDMENT #4

The addition to the statute contained on page 1 of the bill and beginning on line 16 with the word "If" is no longer relevant. It was originally included to provide a maximum State/federal funding ceiling of 87.5 percent when 75 percent federal grants were available from the U.S. Environmental Protection Agency. Since the EPA grants are being reduced to 55 percent in 1984 and other federal grants are scarce, this provision could probably be dropped. However, until the federal law change in 1984 it is possible for some communities to qualify for a combined State/federal grant of 92.5 percent. Deletion of the subject clause from the bill will make it possible for the higher participation.

AMENDMENT #3 - No agreement reached

Add a provision in Section 1, AS 46.03.030 after line 19, page 1. Total State funding, from all sources, shall not exceed 75 percent of eligible project costs not financed by the federal government. This provision prevents the municipal grants program from fully matching legislative appropriations, which would result in 100 percent project financing by the State. Requiring a minimum of 25 percent local funding will provide for more local project management.

We were unable to reach agreement on this proposed amendment. The Administration's philosophy to limit grant participation and extend the Department's resources does not match that of Representative Lacher. The committee's evaluation on the merits of this amendment will be required.

The undersigned agree that the above statements reflect their understanding of the agreement reached.

Representative Barbara Lacher
House of Representatives

Keith Kelton, Director
Facility Construction and Operation
Department of Environmental Conservation

Re: SB 21 - Grants for Water Supply, Sewerage, and Solid Waste Facilities

The Alaska Municipal League urges your favorable consideration of SB 21, increasing the state share of construction grants for community water supply, sewerage, and solid waste facilities from 50% to 75% of the non-federal share.

Public Health Needs: Adequate and clean water, sanitary sewer, and solid water disposal are basic public health issues that, for the most part, cannot be addressed on an individual basis. Because total costs of these projects are very large, it is hard for many areas to raise the 50% local match required by the current programs.

Relief for Property Owners: The local share of water and sewer projects traditionally is paid by assessments on local property, not by general municipal taxation. Increasing the state share will provide direct relief to property owners and taxpayers by reducing local improvement district (LID) payments. Additionally, none of the state assistance dollars under this program will result in increased federal tax payments, as is the case with many of the other state revenue distribution plans. LID payments, as opposed to property and sales tax payments, are not eligible as federal income tax deductions, nor are monthly charges for water, sewer, and solid waste services.

Mandated Costs: Many of the municipal water, sewer, and solid waste projects have costly additional features, not because communities want them, but because they are mandated by federal and/or state laws and regulations. It seems only fair that a large portion of the mandated cost be borne by other than local residents.

Most areas of the state are way behind the rest of the country in having basic water supply, sewerage disposal, and solid waste facilities. Expanding the state's construction grants program is a means to accelerate the process of "catch-up". Because this is a matching grants program, an expenditure by the state will generate an increased amount of capital projects throughout the state. The new facilities will be maintained by the local governments and utility districts and will not require state operating assistance.

POSITION PAPER ON SENATE BILL 21
by the
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Before the
SENATE COMMUNITY & REGIONAL AFFAIRS COMMITTEE
January 25, 1983

Senate Bill No 21 amends existing statute AS 46.03.030. This statute authorizes the Department of Environmental Conservation to award grants up to 50 percent of the eligible costs for water, sewerage, and solid waste facilities. The primary purpose of the amendment is to increase the State's grant percentage from 50 to 75 percent. The bill also provides for an effective date.

This bill contains the same major provisions as SB 252 which passed the Legislature last year and was vetoed by Governor Hammond due to several minor provisions not found in SB 21. In his veto statement Governor Hammond stated his support for the basic legislation and his intent to recommend that the new administration reintroduce the bill this session. The Sheffield administration also supports the concept and has directed the Department of Law to draft a bill raising the grant funding percentage. The administration's proposed bill differs slightly from SB 21 but both contain the same major provisions.

The Department supports this legislation for several reasons:

1) Small municipalities are often unable to raise the 50 percent local match required under the existing statute. The proposed amendment will allow many of these municipalities to improve their basic sanitation services.

2) Federal matching grants have been drastically reduced. Adoption of SB 21 with the accompanying fiscal note will help offset the impact of decreased federal revenues.

3) Alaska's residents will receive a nontaxable financial benefit. An increase in State funds will reduce LID and property assessments, thereby providing a financial benefit. Since there is no direct monetary gain for the taxpayer, there can be no increase in their federal income tax.

The Department respectfully recommends that the committee consider four amendments to SB 21, which will make the Bill consistent with the administration's proposal. We request that SB 21 be amended as follows.

1) Add Section 3, AS 46.03.030(d) to read:

The Department shall, by regulation, identify those costs which are eligible costs for the purposes of this section. Eligible costs include the costs [ESTABLISHED IN A CONSTRUCTION CONTRACT] which are necessary for the construction of a project, but do not include the cost of interest and financing and right-of-way <u>and land</u> acquisition, or costs related to operation, maintenance, repair or replacement of a project. <u>Eligible costs include the costs of the initial purchase of water delivery and sewage collection vehicles if the water delivery and sewage collection vehicles are determined by the department to be cost effective compared with conventional water supply and sewage collection systems. Eligible costs also include the cost of facilities for the maintenance and storage of these vehicles.</u>

2) Delete the following clause in Section 2, AS 46.03.030(e) beginning on page 1, line 29; [INCLUDING COSTS OF OBTAINING FEDERAL WAIVERS FROM THE REQUIREMENT FOR SECONDARY TREATMENT PLANTS.] This provision is now obsolete since the time period for applying for these waivers has passed.

3) Add a provision in Section 1, AS 46.03.030 after line 19, page 1. Total State funding, from all sources, shall not exceed 75 percent of eligible project costs not financed by the federal government. This provision prevents the municipal grants program from fully matching appropriations, which would result in 100 percent project financing by the State. Requiring a minimum of 25 percent local funding will provide for more local project management.

4) The addition to the statute contained on page 1 and beginning on line 16 with the word "If" is probably no longer relevant. It was originally included to provide a maximum State/federal funding ceiling when 75 percent federal grants were available from the U.S. Environmental Protection Agency. Since the EPA grants are being reduced to 55 percent in 1984 and other federal grants are scarce, this provision could probably be dropped.

Adoption of SB 21 will result in construction of projects that would not have been built under the 50 percent funding program. As a practical matter, however, there is no means by which we can reliably predict which projects

will be affected or their costs. The attached fiscal note estimates that if the base level of funding remains constant at $30.0 million per year, the effect of this bill will be approximately $19.5 million in FY-84.

Thank you for the opportunity to present these comments. I will be happy to address any questions you may have.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

June 16, 1982

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. II, sec. 15, of the Alaska Constitution, I have vetoed House Committee Substitute for Committee Substitute for Senate Bill 252 (Fin) am H, relating to grants for water supply, sewerage and solid waste facilities; and providing for an effective date. While I support the basic thrust of this bill - increasing the state's grant proportion of water, sewer and solid waste facilities - there are several provisions which are objectionable.

The bill would allow replacement of obsolete facilities to be grant eligible. In the past, the Department of Environmental Conservation has funded only new construction, expansion, and modification of facilities. Replacement of obsolete facilities should be funded by revenues accumulated from user charges. In this way, communities and users are encouraged to provide adequate operation and maintenance or they will foot the bill for costs to replace projects which have become "obsolete" through neglect.

The bill would also apparently allow funding of water delivery and honey bucket collection vehicles. The Attorney General has ruled that these vehicles cannot be eligible for funding through general obligation bond financing, as the Constitution restricts general obligation bonds to capital projects. General fund moneys could be used for vehicles; however, the principle source of funds for water and sewer projects has been general obligation bonds.

Finally, the bill would mandate that the Department of Environmental Conservation provide grants to communities with village safe water projects to assist in operation and maintenance of those projects. Presently, the authority to provide those grants is contained in the Village Safe Water Act and is discretionary. If the department determines that

a community must have a state grant for the project to survive, and if the operation is sufficiently cost-efficient and funds are available, the department can fund grants to these villages. The proposed revisions would mandate these grants regardless of the community's ability to pay, the operating history of the project, or how well it is run. To the extent possible, these projects should pay their own way without relying on the state to subsidize them.

A veto of this bill would have little effect over the next year. No funds were appropriated by the legislature to implement the provisions of the bill; in fact, the Department of Environmental Conservation does not have sufficient funds to amend grants under the existing formula to the extent it has grant applications. There is also no funding available for operation and maintenance grants to communities with village safe water facilities.

I am requesting the Commissioner of Environmental Conservation to work on draft legislation addressing these issues for me to consider for submittal to the next legislature.

Sincerely,

Jay S. Hammond
Governor

Re: SB 21 - Grants for Water Supply, Sewerage, and Solid Waste Facilities

The Alaska Municipal League urges your favorable consideration of SB 21, increasing the state share of construction grants for community water supply, sewerage, and solid waste facilities from 50% to 75% of the non-federal share.

Public Health Needs: Adequate and clean water, sanitary sewer, and solid water disposal are basic public health issues that, for the most part, cannot be addressed on an individual basis. Because total costs of these projects are very large, it is hard for many areas to raise the 50% local match required by the current programs.

Relief for Property Owners: The local share of water and sewer projects traditionally is paid by assessments on local property, not by general municipal taxation. Increasing the state share will provide direct relief to property owners and taxpayers by reducing local improvement district (LID) payments. Additionally, none of the state assistance dollars under this program will result in increased federal tax payments, as is the case with many of the other state revenue distribution plans. LID payments, as opposed to property and sales tax payments, are not eligible as federal income tax deductions, nor are monthly charges for water, sewer, and solid waste services.

Mandated Costs: Many of the municipal water, sewer, and solid waste projects have costly additional features, not because communities want them, but because they are mandated by federal and/or state laws and regulations. It seems only fair that a large portion of the mandated cost be borne by other than local residents.

Most areas of the state are way behind the rest of the country in having basic water supply, sewerage disposal, and solid waste facilities. Expanding the state's construction grants program is a means to accelerate the process of "catch-up". Because this is a matching grants program, an expenditure by the state will generate an increased amount of capital projects throughout the state. The new facilities will be maintained by the local governments and utility districts and will not require state operating assistance.

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION
FACILITY CONSTRUCTION AND OPERATION DIVISION
STATUS REPORT
OF
MUNICIPAL GRANTS PROGRM

April 1982

MUNICIPAL GRANTS

The municipal Grants Program is authorized by AS 46.03.030. This program provides grants up to 50 percent of the nonfederally financed costs for water, sewerage, and solid waste improvements. These grants may be used to pay for engineering, construction, legal, administrative and equipment costs. Grants are available only to incorporated municipalities. The State does not provide any operation and maintenance support beyond technical asistance.

Project scope, scheduling, and funding are left to local determination. The Department does not attempt to second-guess the validity or local priority of requested grants. The Department is concerned with approval of construction plans and specifications, contract documents for engineering design and for construction. Progress payments and interim contruction inspections are made duirng the course of the project. Grantees' final project costs are audited by the Department. The emphasis of the program is to minimize grant requirements with the grantees responsible for the majority of project administration.

Funding for this program has been provided by general obligation bonds approved by the voters. Bonds totaling $112.5 million have been authorized in 1970, 72, 76, 78, and 80. Grants are awarded on a first-come, first-servie basis, subject to the availability of funds. No priority system is presently utilized in awarding these grants.

The program has currently obligated all but approximately $1.0 million of the bonds approved by the voters. This $1.0 million is being held in reserve to fund grant increases due to change orders for existing projects under construction. We are in receipt of approved grant applications totaling nearly $18.7 million, which we are unable to fund at this time. The projects will be funded in the order that applications were approved, subject to the availability of funds. A list of these projects is attached.

The Governor's capital budget request obtains $10.0 million in general funds that will be available this summer, subject to approval by the Legislature. An additional $40.0 million is proposed for voter approval in this fall's general election. As can be noted, general fund approval of $10.0 million by the Legislture will result in over $8.0 million of projects that cannot be constructed this summer. Delaying these projects by a year will result in approximately a 15 percent increase due to inflation.

It is our estimate that to fully meet the needs of grantees for the 1982 construction season, $25.0 million will be required and should be available no later than June 1. The balance of program funding requirements could then be met by voter approval of bonds in the 1982 general election. It is estimated that an additional $50.0 million will need to be approved for FY-83 & 84 if the grants program is to fully responds to the public's demand for sanitation improvements.

If funding is unavailable at the estimated levels of need, we propose to develop a priority system considering public health, benefiting population, and level of existing services. If this occurs, all grantees will be asked to submit their project applications by a specified date for the full calendar year. The projects would then be ranked in accordance with the priority system.

re: SB 252 - Grants for Water Supply, Sewerage, and Solid Waste Facilities (HB 101)

Alaska Municipal League urges your favorable consideration of SB 252, increasing the state share of construction grants for community water, sewer, and solid waste projects from 50% to 75% of the non-federal share. In looking at various ways to distribute the state's revenues, this proposal should rank high on the list for many reasons:

1.-Public Health Needs. Adequate and clean water, sanitary sewer, and solid waste disposal are basic public health issues that, for the most part, cannot be addressed on an individual basis. Because total costs of these projects are very large, it is hard for most areas to raise the current 50% local match.

2.-Relief for Property Owners. The local share of water and sewer projects traditionally is paid by assessments on local property, not by general municipal taxation. Increasing the state share will provide direct relief to property owners and tax payers by reducing local improvement district (LID) payments.

3.-Federal Income Tax. None of the state assistance dollars under this program will result in increased federal income tax payments, as is the case with many of the other distribution proposals. LID payments, as opposed to property and sales tax payments, are not deductible, nor are monthly charges for water, sewer, and solid waste services.

4.-Price of Land. A big issue for the last couple of years has been the high cost of land. One reason for these high prices in developable suburban areas is the high cost of installing necessary water and sewer systems. Increasing state participation in providing these systems will help to lower the cost of making land available for use. For example, it costs an average of $13,000 per lot in Ketchikan to provide sewerage under the current state construction grants program. In Juneau, the per lot assessment for a proposed water system would drop from $1,217.19 to $608.65 for the smallest lot in the project and from $8,318.70 to $4,159.35 for the largest lot if the state share is increased to 75%.

5.-Mandated Costs. Many of the municipal water, sewer, and solid waste projects are constructed not because communities

want them but because they are mandated by federal and/or state laws. It seems only fair that a large portion of the mandated costs be borne by other than the local residents.

At one time it was feared that an increase in the state share would be a disincentive for municipalities to seek federal funds, thus increasing even more the cost to the State. It has since been determined that in many cases, "jumping through the hoops" for federal funds increases project costs so high as to negate the benefits of those funds. In addition to the extras required by the feds, the inflationary increases in the two extra years required for federal processing add tremendously to the cost of a project. In contrast, the Alaska Department of Environmental Conservation has an excellent record of timely processing applications.

hibit and prevent unnecessary radiation."

The 1981 amendment added subparagraph (I) in paragraph (10).

Editor's notes. — Section 10, ch. 172, SLA 1978, provides: "Regulations adopted under authority of statutes repealed or amended by this Act shall remain in effect until repealed by the Department of Environmental Conservation in consultation with the Department of Health and Social Services."

Sec. 46.03.030. Grants for water supply, sewerage and solid waste facilities. (a) Repealed by § 19 ch 220 SLA 1976.

(b) The department may grant to a municipality, as funds are available, up to 50 percent of eligible costs not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before June 21, 1976. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (d) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

(c) There is a water supply, sewerage and solid waste facilities fund created in the department to carry out the purposes of this section.

(d) The department shall, by regulation, identify those costs which are eligible costs for the purposes of this section. Eligible costs include the costs established in a construction contract which are necessary for construction of a project, but do not include the cost of interest and financing and right-of-way acquisition, or costs related to operation, maintenance, repair or replacement of a project.

(e) The department may grant to a municipality not more than 50 percent of the eligible costs, including costs of obtaining federal waivers from the requirement for secondary treatment plants, which are not paid for by the federal government for solid waste processing or disposal facilities constructed after July 1, 1980. However, the department may grant a municipality up to 60 percent of the eligible costs not paid for by the federal government for a solid waste processing or disposal facility constructed after July 1, 1980, if the facility is used for resource recovery. The eligible costs of a solid waste processing or disposal facility are determined by the federal agency granting the most monetary assistance for construction of the facility. For a solid waste processing or disposal facility for which federal money is not available, the department shall determine the eligible costs in accordance with (d) of this section. A municipality shall construct solid waste processing or disposal facilities financed by grants under this section according to plans and specifications approved by the department. (§ 3 ch 120 SLA 1971; am §§ 2, 19 ch 220 SLA 1976; am §§ 30, 31 ch 168 SLA 1978; am §§ 1-4 ch 163 SLA 1980)

"LETTER OF INTENT OF HOUSE

SENATE BILL NO. 53

The bill broadens municipal discretion and requires no change in municipal taxation, but it is not the intention of the House to replace revenues which may be lost by the exemption by increased municipal assistance or state aid. Local officials exercising the authority to exempt business inventories from taxation under this bill would be well advised not to anticipate compensating revenues from the state to replace such lost local tax receipts."

Adopted in the House May 13, 1983.

The first 1980 amendment, added paragraph (7) of subsection (a) and subsection (j).

The second 1980 amendment, added paragraph (8) of subsection (a).

NOTES TO DECISIONS

Strict construction.

The courts must narrowly construe statutes granting tax exemptions. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

Burden of showing eligibility for exemption. — A taxpayer claiming a tax exemption has the burden of showing that the property is eligible for the exemption. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

Exclusive use for nonprofit religious, etc., purposes must be shown. In order to qualify for an exemption, the taxpayer must show not benefits, but exclusive use for nonprofit religious, charitable, cemetery, hospital or educational purposes. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

When the property in question is used even in part by nonexempt parties for their private business purposes, there can be no exemption. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

Actual use rather than owner's use should be analyzed in determining eligibility for an exemption. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

Office space rented to doctors engaged in private practice. — Office space in a building partially used exclusively for nonprofit hospital purposes, rented to doctors engaged in the private practice of medicine by a nonprofit charitable and religious corporation, was not exempt from taxation. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

While the use of office space by doctor-tenants in conducting their private practices does provide incidental benefits to the adjacent hospital, the office space is not used exclusively for hospital purposes. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1299 (File No. 2445), 553 P.2d 467 (1976).

Sec. 29.53.025. Optional exemptions and exclusions. (a) Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election. An exclusion or exemption authorized by this section may not exceed $10,000 for any one residence.

(b) Municipalities may by ordinance

(1) classify boats and vessels for purposes of taxation and may establish the assessed valuation of boats and vessels on the basis of their registered or certificated net tonnage; a tax based upon a tonnage valuation shall not exceed $5 a year for a boat or vessel of less than five net tons and shall not exceed $15 a year for a boat or vessel of more than five net tons;

(2) classify and exempt from taxation

(A) the household furniture over $500 in value and the effects of the head of a family or a householder; and

(B) the property of an organization not organized for business or profit-making purposes and used exclusively for community purposes, provided that income derived from rental of such property does not exceed the actual cost to the owner of the use by the renter; and

(C) historic sites, buildings and monuments;

(D) land of a nonprofit organization used for agricultural purposes if rights to subdivide the land are conveyed to the state and the conveyance includes a covenant restricting use of the land to agricultural purposes only; rights conveyed to the state under this subparagraph may be conveyed by the state only in accordance with AS 38.05.069(c).

(c) The provisions of (a) of this section notwithstanding,

(1) a home rule or first or second class borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of a city within it, including but not limited to, excluding personal property from taxation, establishing exemptions, and extending the redemption period;

(2) a home rule or first class city shall have the same power to grant exemptions or exclude property from borough taxes that it has as to city taxes, provided that the exemptions or exclusions have been adopted as to city taxes and further provided that the city appropriate to the borough sufficient money to equal revenues lost by the borough because of the exemptions or exclusions, the amount to be determined annually by the assembly without weighted voting;

(3) a home rule or general law city within an organized borough may, by ordinance, adjust its property tax structure in whole or in part to the property tax structure of the borough, including but not limited to exempting or partially exempting property from taxation.

("Grandfather Clause")

(d) Exemptions or exclusions from property tax which have been granted by home rule municipalities in addition to exemptions authorized or required by law, and which are in effect on September 10, 1972 and not later withdrawn, are not affected by this Act.

(e) Municipalities may by ordinance classify and exempt or partially exempt from taxation privately owned land, wet land and water areas for which a scenic, conservation, or public recreation use easement is granted to a governmental body. To be eligible for a tax exemption, or partial exemption, the easement must be in perpetuity. However, the easement is automatically terminated before an eminent domain taking of fee simple title or less than fee simple title to the property so that the property owner is compensated at a rate which does not reflect the easement grant.

(f) A municipality may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to real property if an increase in assessed value is directly attributable to alteration of

re: SB 53 - Business Inventory Exemption

Alaska Municipal League supports passage of SB 53, authorizing municipalities to exempt business inventories from taxation.

Municipalities would like to see increased business activity in their areas. Local officials see eliminating the property tax on business inventories as one way of encouraging economic activity.

In many cases, the business inventory property tax is merely a "nuisance" tax - a hassle for both the business person and the local official withough enough money changing hands to be worth the effort.

This bill would assist municipalities in being able to design their local tax structure to fit th[illegible] local situation.

POSITION PAPER

RE: SB 53

SPONSORS: Senators Mulcahy and Kelly

Program Effects of Bill

Provides for a local option for tax exemptions on business inventories.

Comments

The Department has supported maximizing local options as opposed to mandating such tax exemptions. This measure would allow a municipality to consider such exemptions, assuring that any decision is a local one. The Department believes that the position of the Alaska Municipal League (AML) on this bill should be an important guide post. The AML has supported such a local option for sometime now and continues to do so in their 1983 Policy Statement. One reason is that business inventory taxes often cost more to collect than they bring in; another impetus is the general encouragement of private enterprise by repealing taxes such as that on business inventories.

ALASKA'S INVENTORY TAX

The inventory tax is the most unfair and inequitable business tax in Alaska today. This tax has been condemned repeatedly by the Federal Advisory Commission on Intergovernmental Relations and by innumerable state level legislative and administrative studies. Many of their conclusions are well known and we think it is unnecessary to dwell on them at length, but we do think they should be stated briefly for the record. The inventory tax is unfair in that it bears no relation to profit or loss, placing a heavy burden on one segment of the business community which is not shared, either by private citizens or by other segments of the business and professional community. The business or profession that does not hold merchandise for resale, but who may deal with services, professional or otherwise, pays no similar tax. In fact, the merchant who attempts to compete efficiently by stocking more sizes to serve the hard-to-fit, who has more inventory and less turnover, ends up paying more inventory tax -- even if there is no profit with which to pay it.

Taxes on the same amount of inventory vary widely because of different local tax rates and different methods used by taxpayers in determining "fair market value", with some taxpayers paying a tax on maximum value while others pay on a much lower amount. Inventory taxes are, by universal admission, almost impossible to administer fairly, even by the most conscientious tax assessor.

Inventory taxes discourage the warehousing of goods within the State and can cause serious disruptions in the flow of goods, higher prices (such as freight) and more inconvenience to the consumer. In Alaska, this is a matter of critical concern.

When seeking to attract new industry, nontax states openly advertise that they have no inventory tax.

Attached is a list of the forty (40) states, plus the District of Columbia, that have acted to repeal or substantially reduce the inventory tax. Note that twenty-seven (27) states, plus the District, have completely repealed it or are in process of completely phasing it out. (Note also, in this connection, that on March 14, 1979 the Illinois Supreme Court declared the personal property tax abolished as of January 1, 1979 irrespective of whether or not the legislature acts to implement its prior constitutional mandate.)

Most of these actions have occurred during the past dozen years and there is every indication that the trend will continue. No state that has repealed its inventory tax has ever reimposed it. The evidence shows just the opposite. States that have abolished the tax are reporting increased business activity and more jobs created from improvement in the state's business climate. State and local tax revenues have increased due to improved sales tax and income tax collections. Increases in the number of jobs lowers welfare and unemployment insurance costs. The repealed inventory

tax increases the efficiency of city and town administration by permitting greater attention to appraisal of real property and other items of personal property that remain subject to tax. And, most importantly, a repealed inventory tax removes the pyramiding of inventory tax costs through the various trade levels which are reflected in the price of consumer goods.

In summary, the inventory tax is unfair, unwieldy and unworkable, and has been recognized as such by most states which seek to attract and retain a wide variety of business and industry. If a tax falls unfairly upon a limited few, and if its enforcement is irregular and compliance strained, then the tax should be abolished and a better system substituted in its place. The tax on inventories should be repealed.

TAXATION OF BUSINESS INVENTORIES

Alabama	Inventory tax repealed by constitutional amendment effective 10/1/78.
Arizona	State constitution exempts all inventories effective 1964.
California	Inventories taxed at .5% of value effective 7/1/78.
Colorado	95% exemption on inventories effective 1973.
Connecticut	Inventory tax phases out by 1982.
Delaware	Exempts all personal property, including inventories, effective 1953.
District of Columbia	Inventories exempt effective 1974.
Florida	90% exemption for inventories of finished goods, 99% exemption for goods in process and raw materials, effective 1978.
Hawaii	Exempts all personal property, including inventories, effective 1947.
Idaho	Inventories exempt effective 1971.
Illinois	An approved constitutional amendment to exempt all personal property, including inventories, effective 1/1/79, has yet to be implemented by the legislature.
Indiana	35% exemption on inventories plus 20% property tax credit.
Iowa	Annually increases personal property credits until total exemption is reached, probably in 1986.
Maine	Inventories exempt effective 1977.
Maryland	Local option phase-out of inventory tax is in progress, each county having different effective dates.
Massachusetts	All personal property, including inventories, is exempt unless taxpayer is subject to the corporate excise tax.
Michigan	Inventories exempt effective 1976.
Minnesota	Inventories exempt effective 1967.
Mississippi	Exempts manufactured products in hands of manufacturer. effective 1942.
Montana	93% exemption on inventories effective 1975.

Nebraska	Inventories exempt effective 1979.
Nevada	1978 constitutional amendment phases out the inventory tax over four years and authorizes the legislature to exempt all other personal property.
New Hampshire	Exempts all personal property, including inventories, effective 1970.
New Jersey	Inventories exempt effective 1966.
New Mexico	Inventories exempt effective 1974.
New York	Exempts all personal property, including inventories, effective 1917.
North Carolina	Partially exempts manufacturers' inventories effective 1/1/80.
North Dakota	Exempts all personal property, including inventories, effective 1970.
Ohio	Phasing in an inventory tax exemption of 65%.
Oregon	Inventories exempt effective 1980.
Pennsylvania	Exempts all personal property, including inventories, effective 1939.
Rhode Island	Exempts manufacturers' inventories effective 1966.
South Carolina	Exempts manufacturers' inventories effective 1962.
South Dakota	Inventories exempt effective 1979.
Tennessee	Inventories exempt effective 1972.
Utah	Inventories exempt effective 1973.
Vermont	Inventories exempt on local option basis.
Virginia	Inventories exempt in all counties that impose license tax.
Washington	Inventory tax phase-out, with full exemption in 1983.
Wisconsin	Inventory tax phase-out, with full exemption in 1981.
Wyoming	Inventories exempt effective 1972.

KODIAK ISLAND BOROUGH
RESOLUTION NO. 83-19-R

A RESOLUTION OF THE KODIAK ISLAND BOROUGH ASSEMBLY REAFFIRMING SUPPORT TO EXEMPT BUSINESS INVENTORIES FROM PERSONAL PROPERTY TAXES.

WHEREAS, it is the intent of the Kodiak Island Borough Assembly to to allow the exemption of business inventories from personal property taxation through the initiation of legislation to amend Alaska Statute 29, Chapter 53, Municipal Assessment and Taxation, and

WHEREAS, Senate Bill No. 53 introduced in the legislature of the State of Alaska, Thirteen Legislature, First Session, is a bill entitled "An Act Authorizing Municipalities to Exempt Business Inventories from Taxation; and Providing for an Effective Date.", and

WHEREAS, the Kodiak Island Borough did by Resolution No. 82-1-R pass a resolution seeking to change municipal assessment and taxation thereby exemtping all business inventories, and

WHEREAS, the Kodiak Retailers Association has requested the Borough to initiate through legislation by local representatives the exemption of all commercial and business inventories.

NOW, THEREFORE, BE IT RESOLVED by the Kodiak Island Borough Assembly that they again reaffirm their support to exempt business inventories from personal property taxes.

BE IT FURTHER RESOLVED that the Assembly does hereby express its support for Senate Bill No. 53 introduced by Senators Mulcahy and Kelly and further request that a companion House Bill be introduced thereby exempting business inventories from taxation.

PASSED AND APPROVED this 3rd day of February, 1983 by the Borough Assembly.

Alaska MUNICIPAL League

TELEPHONES
(907) 586-1325
586-6526

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

1983 POLICY STATEMENT

The Alaska Municipal League is a voluntary, non-profit, nonpartisan organization whose member cities, boroughs, and unified municipalities represent over 95% of Alaska's population. The League provides a forum through which local government officials may assist each other in the solution of municipal problems and may express their common concerns to state and federal officials. A major objective of the League is to advance the interests and well-being of the people residing within the state by promoting the betterment of every aspect of local government in Alaska.

This 1983 municipal statement was adopted November 13, 1982 by the delegates attending the Alaska Municipal League 32nd Annual Local Government Conference in Fairbanks. It represents the collective philosophy, goals, responsibilities, and ideals of Alaska's local government officials. Items included in the statement have been reviewed and debated for several months by municipal officials who are concerned on a day-to-day basis with the many complex problems facing local governments in Alaska. The statement is a guide to the priority concerns of AML member municipalities.

1982 & 1983 Alaska Municipal League statements supporting exemption

16. Population Determination and Impact: The League supports following federal census practices for determination of population based on residency and encourages the Legislature and Governor to recognize the need for a comprehensive policy to alleviate the social and economic impact of major development on municipalities by state funding from funds appropriated separately from revenue sharing and municipal assistance funding.

17. State Aid to Municipalities for Law Enforcement: Title 18 of the Alaska Statutes confers upon the state the responsibility for law enforcement powers within the state. Municipalities may assume law enforcement powers within their jurisdiction. With the increase in crime throughout Alaska, and the resulting public demand for increased police protection, the League encourages the state to assist municipalities in assuming law enforcement powers, expanding such powers to additional areas, or improving existing services through a program which partially reimburses municipalities for the costs of providing law enforcement services.

C. LOCAL TAXES

1. State-Mandated Exemptions: The League opposes the imposition of state-mandated exemption of certain classes of property, individuals, organizations, or commodities from the application of taxes unless adequate compensation is made by the state to reimburse local governments for revenues lost due to these exemptions.

2. Payments-in-Lieu: The League endorses the position whereby the state would pay to the local governments a payment-in-lieu of ad valorum taxes for the state-owned property as well as payments for its share of the cost of improvements and services which benefit such property.

3. Right To Tax: The League opposes any further effort on the part of the state to levy a property tax which would infringe upon the rights of local governments to levy the same rate of tax as levied on other property within the taxing jurisdiction.

4. Personal Property: The League supports legislation which would provide for the optional exemption or a partial exemption of personal property and for the classification and exemption or partial exemption of classes of personal property from property taxation.

5. Interest Rate Limit: The League supports legislation to remove the limits established in Title 29 on the penalty and interest rate for delinquent property and sales tax payments and allow municipalities to set their own rates.

6. Waiver of Tax Collection: The League endorses legislation to permit the waiver of collection of taxes when collection costs exceed taxes due.

D. FORMATION OF NEW MUNICIPALITIES

The League supports legislation to provide adequate funds to assist in the study of the feasibility of forming new municipalities and in the formation of newly organized municipalities.

E. PUBLIC EMPLOYEES RETIREMENT

The League urges that in any legislation passed which increases benefits under the Public Employees Retirement System and Teachers Retirement System, the increased cost be borne by contributions from the employees. The League urges the Legislature to recognize the effect on participating municipal employers if any amendments are made to PERS and TRS.

Alaska MUNICIPAL League

TELEPHONES

JUNEAU, ALASKA 99801

1982 POLICY STATEMENT

The Alaska Municipal League is a voluntary, non-profit, nonpartisan organization whose member cities, boroughs and unified municipalities represent over 90% of Alaska's population. The League provides a forum through which local government officials may assist each other in the solution of municipal problems and may express their common concerns to state and federal officials. A major objective of the League is to advance the interests and well-being of the people residing within the state by promoting the betterment of every aspect of local government in Alaska.

This 1982 municipal statement was adopted November 7, 1981 by the delegates attending the Alaska Municipal League 31st Annual Local Government Conference in Anchorage. It represents the collective philosophy, goals, responsibilities and ideals of Alaska's local government officials. Items included in the statement have been reviewed and debated for several months by municipal officials who are concerned on a day-to-day basis with the many complex problems facing local governments in Alaska. The statement is a guide to the priority concerns of AML member municipalities.

6. Permanent Endowment For Local Government: The League supports the concept of a permanent endowment for local governments. The income from this endowment would be made available for use by local governments for operating expenses and/or capital programs. Criteria for developing any permanent endowment and allocation of income approach should include equity, predictability and maximum local control.

7. State-Collected, Locally Shared Taxes: Municipalities in Alaska presently derive significant revenues from state-collected, locally shared taxes to help meet their basic operating expenses. The League, therefore, opposes reduction of such revenues through elimination of such taxes unless other equal sources of revenue are made available to local governments, or appropriations to compensate for lost revenues are made by the state.

8. Abandoned Motor Vehicle Fund: The League continues to urge adequate funding of the Abandoned Motor Vehicle Fund with special emphasis paid to the cost incurred in handling abandoned vehicles which have no value.

9. Basic Allocations: The League supports an increase in the state revenue sharing minimum allocation to $50,000 for each city or eligible unincorporated community.

10. Administration of Grants & Entitlements: The League supports legislation eliminating delay, administrative regulations, or complexity associated with administration of municipal entitlements and grants programs by state departments and agencies. Administration of grants and entitlements should, when possible, be consolidated in a single state department. The League further supports elimination of administration fees deducted by state departments administering the grants.

11. Pass-Through Funds: The League encourages the Legislature to adopt policies for pass-through funds to non-profit corporations that do not cause any present or future liabilities to the municipality.

12. Federal Block Grant Programs: The League requests the state to publish, without further delay, its plans for implementing the Federal Block Grant Programs.

13. Increase in State Revenue Sharing For Specific Recipients: In those cases where legislation is approved increasing the state revenue sharing entitlement for specific recipients or for a specific purpose, the League advocates that the total funding for state revenue sharing be increased accordingly in order to preclude the dilution of funding to other recipients.

C. LOCAL TAXES

1. State-Mandated Exemptions: The League opposes the imposition of state-mandated exemption of certain classes of property, individuals, organizations or commodities from the application of taxes unless adequate compensation is made by the state to reimburse local government for revenues lost due to these exemptions.

2. Payments-in-Lieu: The League endorses the position whereby the state would pay to the local governments a payment-in-lieu of ad valorem taxes for the state-owned property as well as payments for its share of the cost of improvements and services which benefit such property.

3. Right To Tax: The League opposes any further effort on the part of the state to levy a property tax which would infringe upon the rights of local governments to levy the same rate of tax as levied on other property within the taxing jurisdiction.

4. Business Inventories: The League supports legislation which would provide for the optional exemption of business inventories from property tax.

5. Interest Rate Limit: The League supports legislation to remove the limits established by AS 29.53.180 and AS 29.53.415(d) on the penalty and interest rate for delinquent property and sales tax payments.

D. FORMATION OF NEW MUNICIPALITIES

1. The League supports legislation to provide adequate funds to assist in the study of the feasibility of forming new municipalities and in the formation of newly organized municipalities.

E. PUBLIC EMPLOYEES RETIREMENT

1. The League urges that in any legislation passed which increases benefits under the Public Employees Retirement System and Teachers Retirement System, the increased cost be borne by contributions from the employees. The League urges the Legislature to recognize the effect on participating municipal employers if any amendments are made to PERS and TRS.

F. LOCAL HOSPITAL USE

1. Utilization of Local Health Facilities: The League urges the state and federal agencies responsible for health care to utilize the local health facilities and to transport patients to regional centers only when necessary services are not available.

2. Increased State Funding: The League strongly supports increased state funding of hospital construction costs and of special hospital and health facility construction and operating costs.

3. Separate Funding For Hospitals: The League strongly supports funding of hospital and health facility grants outside the municipal revenue sharing program.

A BILL

For an Act entitled: "An Act authorizing municipalities to exempt business inventories from taxation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.025(b) is amended by adding a new paragraph to read:

(3) exempt business inventories from taxation.

* Sec. 2. AS 29.45.050(b) is amended by adding a new paragraph to read:

(4) exempt business inventories from taxation.

* Sec. 3. Section 1 of this Act is repealed.

* Sec. 4. Sections 2 and 3 of this Act take effect on January 1 following the effective date of a version of an Act revising AS 29 passed by the Thirteenth Legislature and enacted into law.

* Sec. 5. Section 1 of this Act takes effect immediately in accordance with AS 01.10.070(c). January 1, 1984

See attached page

If the effective date takes place when the Hon. signs off, then the municipalities would encounter an administrative burden because part of the business inventories for this year (1983) would be subject to tax and the other portion of the year (1983) business inventories would not be subject to the tax.

Final taxes are calculated from 9am. 1st to Dec 31st, taking policies and laws should also fall under the same dates, in order for laws to be administered and applied in the most cost effective and efficient manner.

POSITION PAPER

RE: CSSB 98 (Finance)

SPONSOR: Senator Sackett

Program Effects of Bill

Provides Fiscal Year 1983 supplemental appropriations in the following amounts to the following programs:

1) $25,000,000 to the Municipal Assistance Program in the Department of Revenue;

2) $2,500,000 to the Aid to Unincorporated Communities (SB 168) in the Department of Community & Regional Affairs;

3) $2,900,000 to Chapter 89, which provides assistance to municipalities for roads, ice roads, health facilities, and hospitals and annual grants to unincorporated communities and volunteer fire departments, under the State Revenue Sharing Program in the Department of Community & Regional Affairs.

Comments

This position paper will address only those sections of the bill that pertain to this Department.

There are presently 32 unincorporated communities under contract under the SB 168 program. The Department is contractually bound to "fully fund" these communities at the $1,000 per capita as provided for by law. However, due to a drastic cut in funding for this program last year, "new" applicants under the program will have to be prorated at about 50%. This creates a very unfair situation in which a majority of the recipients under the Aid to Unincorporated Communities Program will receive only one-half of the funding they are entitled to under this one-time only program.

The Department believes it is important to fully fund programs that allow municipalities and unincorporated communities to provide vital services to their residents. The current funding level for Chapter 89 requires that local allocations be prorated at about 80% of their fully funded entitlement. Chapter 89 provides funding for a wide range of recipients and services; therefore, this supplemental will benefit many Alaskans in both municipalities and unincorporated communities.

POSITION PAPER

RE: CSHB 152

SPONSOR: House Community & Regional Affairs Committee

Program Effects of Bill

The bill makes a $2.938 million supplemental appropriation to fully fund Chapter 89 State Revenue Sharing. This chapter funds road, ice roads, health facility and hospital operations, unincorporated communities and volunteer fire departments serving unincorporated areas in the unorganized borough.

Comments

The Department believes it is important to fully fund programs that allow municipalities and unincorporated communities to provide vital services to their residents. The current funding level for Chapter 89 requires that local allocations be prorated at about 81% of their fully funded level. The funding for this program must be weighed against other State needs to determine if its priority warrants full funding. The Department does not have funds available from within its FY'83 budget to reduce or offset this supplemental appropriation.

AN ACT

Relating to state assistance for municipalities and unincorporated communities; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 10

Approved by the Governor: July 10, 1981
Actual Effective Date: July 11, 1981

Chapter 60

AN ACT

Relating to state assistance for municipalities and unincorporated communities; and providing for an effective date.

---

* Section 1. MUNICIPAL AID PROGRAM. (a) During the fiscal year ending June 30, 1982, the Department of Administration shall compute and pay an entitlement to each qualified municipality. An entitlement to a municipality with a population of at least 1,000 shall be used for social services and capital projects at the discretion of the municipality. An entitlement to a municipality with a population of less than 1,000 shall be used for social services, capital projects, or operating expenses of capital projects at the discretion of the municipality. The entitlement for each municipality shall be computed in accordance with (b) of this section, and is payable by the Department of Administration in accordance with AS 37.05.315 to the extent that the provisions of AS 37.05.315 are consistent with (c), (d), and (e) of this section.

(b) Within the limits of appropriations for the purpose, each municipality is entitled to receive $1,000 per person residing within the boundaries of the municipality.

(c) A municipality may grant money received under this section to a nonprofit corporation for

(1) any capital project of the nonprofit corporation that serves a public purpose;

(2) social services;

Chapter 60

(3) the operating expenses of a capital project of the nonprofit corporation if the project serves a public purpose and the municipality has a population of less than 1,000.

(d) Before money received under this section may be used for a capital project with a total cost of $1,000,000 or more, the project must be approved by the voters of the municipality at a regular state election or a general or special municipal election. However, money received under this section may be used without voter approval for improvement or rehabilitation to an existing public facility if the total cost of the improvement or rehabilitation is not more than $5,000,000.

(e) A municipality may not receive money as an entitlement under this section until it provides the Department of Administration a copy of an ordinance or resolution adopted by it that

(1) authorizes the municipality to receive and spend the money to be provided by the entitlement;

(2) identifies the social services, capital projects, and, if the municipality has a population of less than 1,000, the operating expenses of capital projects for which the money will be spent; and

(3) indicates the total amount of money that the municipality will receive, the amount of money that will be used by the municipality or a nonprofit corporation for social services, the amount of money that will be used for each capital project, and, if the municipality has a population of less than 1,000, the amount of money that will be used for operating expenses of capital projects.

* Sec. 2. AID TO UNINCORPORATED COMMUNITIES. (a) During the fiscal year ending June 30, 1982, the Department of Community and Regional Affairs shall compute and pay an entitlement to each unincorporated community in the unorganized borough. The entitlement for each community shall be computed in accordance with (b) of this section, and is payable by the Department of

munity and Regional Affairs in accor

(b) Within the limits of appropriat
porated community in the unorganized bor
er person residing within that community

(c) By August 15, 1981, the Depar
ffairs shall notify each unincorporated
available. The Department of Community

rojects in the unincorporated communit

(e) An unincorporated community
not under this section until the reci
munity and Regional Affairs under (
ent of Community and Regional Affairs
that

(1) authorizes the recipie
provided by the entitlement;

(2) identifies the social s

munity and Regional Affairs in accordance with (c) of this section.

(b) Within the limits of appropriations for the purpose, each unincorporated community in the unorganized borough is entitled to receive $1,000 per person residing within that community.

(c) By August 15, 1981, the Department of Community and Regional Affairs shall notify each unincorporated community that its entitlement is available. The Department of Community and Regional Affairs with advice from the Department of Law shall determine whether there is, in the unincorporated community, an incorporated entity or a federally chartered entity that does not possess sovereign immunity and will agree to receive and spend the money received under the entitlement. If there is in the unincorporated community more than one qualified incorporated or federally chartered entity, the Department of Community and Regional Affairs shall pay the money under the entitlement to the entity that the department finds most qualified to receive and spend the money consistent with (d) and (e) of this section. In selecting the recipient entity, the Department of Community and Regional Affairs shall give preference to a nonprofit corporation organized by an unincorporated community for receipt of the entitlement.

(d) Money received as an entitlement under this section may be used for social services, capital projects, or operating expenses of capital projects in the unincorporated community.

(e) An unincorporated community may not receive money as an entitlement under this section until the recipient selected by the Department of Community and Regional Affairs under (c) of this section provides the Department of Community and Regional Affairs a copy of a resolution adopted by it that

(1) authorizes the recipient to receive and spend the money provided by the entitlement;

(2) identifies the social services, capital projects, and operat-

ing expenses of capital projects for which the money will be spent;

(3) indicates the total amount of money that the recipient may receive, the amount of money that will be used for social services, the amount of money that will be used for each capital project, and the amount of money that will be used for operating expenses of capital projects;

(4) identifies each party

(A) that owns or will own a capital project for which money is spent under this section; or

(B) that will be responsible for the maintenance and operation of a capital project for which money is spent under this section; and

(5) agrees that each capital project for which money is spent under this section will be operated on a nondiscriminatory basis for the benefit of the public.

(f) If there is no qualified incorporated entity or federally chartered entity willing to receive the money in an unincorporated community, the entitlement for that unincorporated community may not be paid.

* Sec. 3. DETERMINATION OF POPULATION. (a) For purposes of this Act, the population of a municipality and of an unincorporated community shall be determined from the latest figures of the United States Bureau of the Census.

(b) For purposes of determining the population of a home rule or general law borough, the population of each city located within the boundaries of the borough shall be subtracted from the population of the borough.

* Sec. 4. MUNICIPAL AID ACCOUNT. The municipal aid account is established in the Department of Administration. Money to carry out the provisions of sec. 1 of this Act shall be appropriated to the account and distributed by the Department of Administration as authorized in sec. 1 of this Act. If the amount appropriated to the account is not sufficient to finance all entitlements, the amount appropriated shall be distributed pro rata

eligible municipalities.

* Sec. 5. UNINCORPORATED COM
munity aid account is establi
egional Affairs. Money to carr
hall be appropriated to the acc
mmunity and Regional Affairs a
mount appropriated to the accoun
nts, the amount appropriated s

POSITION PAPER

RE: CSSB 98 (Finance)

SPONSOR: Senator Sackett

Program Effects of Bill

Provides Fiscal Year 1983 supplemental appropriations in the following amounts to the following programs:

1) $25,000,000 to the Municipal Assistance Program in the Department of Revenue;

2) $2,500,000 to the Aid to Unincorporated Communities (SB 168) in the Department of Community & Regional Affairs;

3) $2,900,000 to Chapter 89, which provides assistance to municipalities for roads, ice roads, health facilities, and hospitals and annual grants to unincorporated communities and volunteer fire departments, under the State Revenue Sharing Program in the Department of Community & Regional Affairs.

Comments

This position paper will address only those sections of the bill that pertain to this Department.

There are presently 32 unincorporated communities under contract under the SB 168 program. The Department is contractually bound to "fully fund" these communities at the $1,000 per capita as provided for by law. However, due to a drastic cut in funding for this program last year, "new" applicants under the program will have to be prorated at about 50%. This creates a very unfair situation in which a majority of the recipients under the Aid to Unincorporated Communities Program will receive only one-half of the funding they are entitled to under this one-time only program.

The Department believes it is important to fully fund programs that allow municipalities and unincorporated communities to provide vital services to their residents. The current funding level for Chapter 89 requires that local allocations be prorated at about 80% of their fully funded entitlement. Chapter 89 provides funding for a wide range of recipients and services; therefore, this supplemental will benefit many Alaskans in both municipalities and unincorporated communities.

2) $25,498,200 appropriation for grants to incorporated municipalities through the Department of Environmental Conservation;

3) $75,912,450 direct appropriation to specific municipalities;

4) $623,000 in grants to the unincorporated communities of Kenny Lake ($148,000), Igiugig ($250,000), and Dot Lake ($225,000);

5) $200,000 to the Department of Environmental Conservation for water and sewer feasibility studies.

4-18-83

POSITION STATEMENT ON SENATE BILL 150
by the
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Before the
HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE BILL 150 PROVIDING FOR $67,175,300 FOR THE CONSTRUCTION OF WATER, SEWAGE, AND SOLID WASTE FACILITIES BEGAN AS A $28 MILLION SUPPLEMENTAL TO THE DEPARTMENT OF ENVIRONMENTAL CONSERVATION. THE DEPARTMENT INI IATED THE REQUEST AFTER COMMUNITY OFFICIALS EXPRESSED A NEED FOR CONSTRUCTION GRANT MONIES FOR PROJECTS READY FOR CONSTRUCTION IN THE SUMMER OF 1983. AS PREVIOUSLY MENTIONED TO THIS COMMITTEE IN TESTIMONY ON SB 21, THE CONSTRUCTION GRANTS PROGRAM DID NOT RECEIVE AN APPROPRIATION LAST YEAR BECAUSE GOVERNOR HAMMOND VETOED THE BOND PROPOSITION.

THE APPROPRIATION AND PROJECTS TO BE FUNDED IN THIS BILL HAS CHANGED FROM A SUPPLEMENTAL IN FISCAL YEAR 83 TO AN APPROPRIATION FOR FISCAL YEAR 84. THE DEPARTMENT HAS PERFORMED A TECHNICAL ANALYSIS OF THE PROJECTS IN THIS BILL AND CAN IDENTIFY MANY PROJECTS THAT WILL MEET THE PRESSING COMMUNITY SANITATION NEEDS, AND WE SUPPORT THESE PROJECTS. BECAUSE OF DECREASING REVENUES, THE TOTAL REVENUES AVAILABLE WEIGHED WITH THE STATE'S NEEDS WILL HAVE TO BE CONSIDERED BEFORE THE ADMINISTRATION FORMS A POSITION ON TOTAL FUNDING FOR THIS BILL. I AM PREPARED TO DISCUSS FROM A TECHNICAL STANDPOINT THESE PROJECTS AND THE FUNDING MECHANISMS.

THIS BILL APPROPRIATES $25.7 MILLION TO THE DEPARTMENT. THESE FUNDS WILL BE ADMINISTERED THROUGH THE CONSTRUCTION GRANTS PROGRAM, WHICH REQUIRES 50% MATCH BY INCORPORATED MUNICIPALITIES. THE DEPARTMENT REQUESTED A SINGLE APPROPRIATION VERSUS PROJECT SPECIFIC APPROPRIATION. THIS METHOD WILL ALLOW UNUSED FUNDS TO BE MOVED TO OTHER PROJECTS. IN ADDITION, IT HAS BEEN OUR

EXPERIENCE THAT AFTER A GRANT HAS BEEN AWARDED, 8 TO 10% MAY BE NEEDED AS A CONTINGENCY FOR UNANTICIPATED COST INCREASES. WE HAVE AN ATTORNEY GENERAL'S OPINION WHICH INDICATES THAT MONIES CAN BE MOVED BETWEEN PROJECTS USING THE "ALLOCATIONS" METHOD USED IN SB 150.

THE PROJECTS THAT ARE LISTED FOR FUNDING BY THE DEPARTMENT WERE COMPILED FROM 213 RESPONSES FROM 52 COMMUNITIES. THESE WERE SCORED AND RANKED USING A CRITERIA SYSTEM DEVELOPED BY THE DEPARTMENT. THE CRITERIA SYSTEM IS ATTACHED FOR YOUR USE. WE WILL BE WORKING THROUGH THE MUNICIPAL LEAGUE TO REFINE THE CRITERIA SYSTEM IN THE FUTURE.

THIS BILL ALSO PROVIDED FUNDING FOR PROJECTS BY APPROPRIATIONS TO THE DEPARTMENT OF EDUCATION, TO UNINCORPORATED COMMUNITIES, AND TO MUNICIPALITIES. THESE PROJECTS WERE IDENTIFIED BY THE SENATE. I HAVE GIVEN EACH OF YOU AN ANALYSIS OF SB 150 AND SB 162. ONLY FOUR PROJECTS APPEAR TO RECEIVE FUNDING THROUGH BOTH BILLS. THESE ARE:

DELTA JUNCTION LANDFILL	$ 500,000
KOTZEBUE WATER/SEWER EXPANSION	1,000,000
SAINT MICHAEL WATER AND SEWER	$1,900,000 OR $600,000
WASILLA SEPTIC TREATMENT	186,000

FROM THE INFORMATION I HAVE, THE DELTA JUNCTION AND WASILLA PROJECTS APPEAR TO BE RECEIVING 200 PERCENT FUNDING. I DO NOT HAVE BACK UP DATA ON THE KOTZEBUE PROJECT. OUR INFORMATION INDICATES THE $600,000 FOR ST. MICHAEL IS FOR A SOLID WASTE FACILITY, AND WE ARE UNCERTAIN OF THE INTENT OF THE $1.9 MILLION REQUEST.

IN THE SECTION OF THE BILL DEALING WITH GRANTS TO UNINCORPORATED COMMUNITIES, THE DEPARTMENT RECOMMENDS IGIUGIG BE DELETED AND INSTEAD BE INCLUDED FOR AN ADDITIONAL $50,000 IN SECTION 3 FOR A WATER & SEWER FEASIBILITY STUDY. THE DEPARTMENT RECOMMENDS THIS CHANGE BECAUSE THE SCOPE OF THE PROPOSED $838,000 PROJECT NEEDS TO BE BETTER DEFINED AND TECHNICAL QUESTIONS REGARDING WATER DEVELOPMENT NEED TO BE ANSWERED.

THE BILL ALSO PROVIDES $200,000 TO THE DEPARTMENT FOR PERFORMING FEASIBILITY STUDIES. THESE STUDIES WILL:

1) PRECISELY DEFINE THE PROBLEM AND NEED;
2) ANALYZE ALTERNATIVES AND THE ASSOCIATED CAPITAL, AS WELL AS OPERATION AND MAINTENANCE COSTS; AND
3) THE COMMUNITY WILL THEN SELECT THE SOLUTION IT WANTS AND BELIEVES IT CAN AFFORD.

THESE STUDIES WILL PROVIDE A BASIS FOR REQUEST FOR APPROPRIATIONS THROUGH THE 85 CAPITAL BUDGET.

THANK YOU FOR THE OPPORTUNITY TO COMMENT ON THIS BILL. I WOULD BE HAPPY TO ANSWER ANY QUESTIONS YOU MAY HAVE.

STATE OF ALASKA
FISCAL NOTE

Revision Date 4/18 , 1983

I. REQUEST

Bill/Resolution No.: SB 150
Title: An Act making an appropriation to
Sponsor: Finance Committee
Requestor: House C&RA Committee

3/3/83

1) $1,050,000 appropriation to the Department of Education;
2) $25,659,800 appropriation for grants to incorporated municipalities through the Department of Environmental Conservation;
3) $39,279,500 direct appropriation to specific municipalities;
4) $986,000 in grants to the unincorporated communities of Kenny Lake (148,000) and Igiugig ($838,000);
5) $200,000 to the Department of Environmental Conservation for water and sewer feasibility studies.

Construction grants are for water, sewer, and solid waste facilities. The Construction Grants Program administered by the Department of Environmental Conservation was not funded for SFY 83 due to the veto of the proposed bond proposition by Governor Hammond. At the present time, there are a significant number of projects ready for construction for which no funding is available. This bill would enable construction to begin on these projects, avoiding additional cost increases due to inflation. The Department of Environmental Conservation cannot make a statement on whether the projects receiving funding through direct appropriations are ready for construction this year.

RE: CSSB 150 proposed committee substitute

CSSB 150 is the legislative appropriation for FY '84 for statewide sewer and water projects. Legislation introduced earlier that provided for various projects will not be acted upon. Included in the earlier bills (HB 102, HB 146, and SB 15) was the intent to provide the Department of Environmental Conservation (DEC) with matching funds for the Wasilla Sewer system and, to provide the necessary "up front" or non-grant eligible funding in the amount of $1,178,500.

CSSB 150 includes the $1,178,500 for non-grant eligible costs, but the DEC matching funds have not been included. Representative Lacher's intent is to combine the former DEC matching funds with the direct non-grant eligible funding appropriation for a total grant of $3,121,500.

DEC officials have stated that they will continue to process the grant applications and assist with the Federal Environmental Protection agency grant, estimated to be approximately $4 million. The City of Wasilla will issue bonding in the amount of about $2 million.

FROM: Representative Barbara Lacher

SUBJECT: HB 146

DATE: March 7, 1983

The City of Wasilla has been working with the Department of Environmental Conservation and federal environmental protection agencies since 1978 in planning a city wastewater treatment facilities system. The preliminary planning is completed and public hearings have been conducted. Final design is to be completed by July 1983, and the project ready for bid by October, 1983.

Total project costs which are eligible for grant participation are $8,000,115. Funding sources are as follows:

	FEDERAL E.P.A.	STATE D.E.C.	CITY ASSESSMENTS	TOTALS
Laterals	0 (0%)	1,338,975 (50%)	1,338,975 (50%)	2,677,950 (100%)
Collector	3,078,080 (75%)	513,180 (12.5%)	513,180 (12.5%)	4,105,440 (100%)
Small Diam.	719,950 (85%)	63,525 (7.5%)	63,525 (7.5%)	847,000 (100%)
Sewage Treatment Plant	314,265 (85%)	27,730 (7.5%)	27,730 (7.5%)	369,725 (100%)
TOTALS	4,113,295 (51.6%)	1,943,410 (24.2%)	1,943,410 (24.2%)	8,000,115 (100%)

The cost to owners of property adjacent to the sewer system will be assessed, on the average, about $1,153,100 per 50 feet of property frontage and monthly service charges will be less then $20 per month.

In addition to project costs which are eligible for grant participation, the City of Wasilla is confronted with a requirement for $1,178,500 of non-grant- eligible cost, funding for which must be firmly identified prior to state and federal committment of grant funds. These non-grant eligible costs are as follows:

Purchase of treatment plant site	
Right-of-way for trunt and collector construction	
Construction across Parks Highway	
Engineering and Administration	
Topography mapping	$ 200.000
	$ 1,178,500

For the past four years, the City of Wasilla has committed a considerable amount of scarce resources to this project and public hearings have indicated strong public support; however, the requirement for $1,178,500 "up front" funding is beyond the capability of the City. For this reason, the City of Wasilla respectfully requests the assistance of the Alaska State Legislature.

RE: Committee Substitute Senate Bill 150

In January 1983, SB 15 and HB 102 were introduced as companion bills, each appropriating $28,000,000 as supplemental appropriations to the Department of Environmental Conservation (DEC) for sewer and water projects. The projects to be funded were requested in 1982 and included in a proposed bond issue which was vetoed by the Governor.

House Bill 102 was passed out of State Affairs Committee and referred to House Finance on February 25, 1983. Senate Bill 15 was revised to CSSB 15 in the Senate Finance Committee, referred to Senate Rules Committee, and returned to Senate Finance where it remains.

In its place, CSSB 150 was introduced by the Senate Finance Committee. The supplemental appropriations originally in SB 15 were deleted; grants to DEC for matching funds for sewer and water projects were included as well as funds to the Department of Education for school water projects and grants to municipalities/unincorporated communities for sewer and water projects.

Amendment to CSSB 150 (Fin) am

Page 7, Line 20

Insert "Seward - Lowell Creek Tunnel renovation
$1,800,000 (ED 6) "

NO. 3 LOWELL CREEK DIVERSION TUNNEL REHABILITATION - $1,770,000

HISTORY: Lowell Creek Diversion Tunnel is located in Lowell Creek, within the City limits of Seward. The tunnel diverts the streamflow from the old channel that ran through town, through Bear Mountain, and into Resurrection Bay at the end of Town. The diversion dam and tunnel, including surrounding land is owned by the City. In 1945, the U.S. Army Corps of Engineers designed the project and administered the construction contract. The tunnel was repaired by the Corps of Engineers in 1969 under a special congressional authorization and appropriation. Those repairs have significantly deteriorated. The tunnel is a concrete lined horseshoe, with its invert and side walls armored with railroad rails and concrete fill between the rails.

PROJECT DESCRIPTION: Lowell Creek discharges large quantities of bedload, with the size approaching rock three feet in diameter. The abrasive action of the bedload has eroded away much of the armor rails. Major damage has occured at the tunnel entrance, where the steep intake changes to a moderate slope, causing the stream bedload to bombard the armor rails grouted in the invert and side walls.

Annual inspection by the City and Corps of Engineers reveal very serious tunnel armor deterioration, with many rails completely dislodged. To prevent the rails from catching debris and creating a blockage in the tunnel, City crews must enter the tunnel several times a year with cutting torches and remove the loose rail sections. The most recent Corps inspections have shown that tunnel deterioration is very serious and could lead to the tunnel becoming blocked. The result would be Lowell Creek running through the center of Seward causing severe property loss and very likely loss of life. (See attached copy of the most recent Corp of Engineers Inspection Report)

In an effort to secure funds to repair and rehabilitate the tunnel, the City since 1977 has aproached the Corps of Engineers and U.S. Congress. These efforts have not been successful to date; however, since the Federal Act authorizing the tunnel placed all responsibility for operation and maintenance with the City.

Utilizing State of Alaska per capita grant money, the City on August 8, 1982, entered into a contract with CH2M Hill Engineers to prepare a study of the available tunnel rehabilitation alternatives, and once an alternative is selected by the City, prepare design specifications and contract documents to perform the rehabilitation. Phase I (Study of Alternatives) will be complete by April 1983. Phase II (Design Engineering) will be complete by August 1983. If sufficient funds are available, construction can commence in the fall of 1983 and be complete by the spring of 1984.

NO. 3 LOWELL CREEK DIVERSION TUNNEL REHABILITATION (Continued)

BUDGETARY NEEDS: At this time, we have estimated the rehabilitation cost at $1,770,000. A more refined cost estimate should be available by April 1983.

OPERATION AND MAINTENANCE: The design alternative selected is intended to be the one that will solve the problems occuring within the tunnel, and once this design is effected, it is anticipated that operation and maintenance will be well within the means and capabilities of the City.

COMMUNITY IMPACT: The Seward City Council has placed a very high priority on this project as it poses a serious threat to life and property. Failure of the Diversion Tunnel would cause a major disaster to Seward.

POSITION PAPER

CSSB15(FIN)

Fiscal propriety demands that the State maintain project monitoring capability to ensure that the grant funds are spent for the project, and are managed according to Borough or Municipal fiscal procedures. Accordingly, a minimal State operating budget impact will be felt with the passage of each special appropriation under AS 37.05.315-37.05.319, such as this specific bill proposes. I should point out at this time that local governments have recognized their similar responsibilities when awarding grants to local social service providers, etc. Municipalities charge an administrative overhead fee of one to three point eight percent per grant. The Department of Administration requests that the specific grant appropriation language acknowledge a State agency overhead factor of up to .5% (one half of one percent) as Department of Administration operating costs for all special appropriations awarded AS 37.05.315.

The Department questions the historical practice promoted under AS 37.05.315 and wonders if the Department of Community and Regional Affairs might be of better assistance to local governments through its Local Government Assistance program. Whereas the Department of Administration functions as a centralized control agency for all other Executive Branch agencies, the Department of Community and Regional Affairs is specifically charged with the responsibility of assisting local government in maximizing services to citizens.

Galena — Phase I

RECOMMENDED SYSTEM IMPLEMENTATION APPROACH AND COST SUMMARY

The installation of a complete high level-of-service water and sewer utility should be a multi-step process and it is likely that all of the phases would not occur at the same time. It is recommended that a systematic approach be taken to the implementation of water and sewer system improvements. The steps are listed below in the order that they should be undertaken.

1. Perform an evaluation, modify, and repair the existing water treatment plant to increase production capacity, improve water quality, and determine the maximum production capacity of the plant. Evaluate the existing sewage treatment lagoon.

2. Design and construct a portion of the proposed water and sewer improvements in an area having the highest development density and greatest number of potential customers. This would allow a more accurate evaluation of actual equipment performance and O&M costs. This "pilot system" approach would also allow Galena to expand the system as customer demand increased and to eliminate underwriting the O&M cost of an entire system without adequate customer support. This approach might also promote development at th Alexander Lake site. People would see the advantage of having a high level-of-service water and wastewater facility.

3. Evaluate the performance of the pilot system and expand the system into other areas having an adequate number of potential customers. Water production, water storage, or sewage treatment facilities would probably have to be expanded at this time.

Table 5 is a summary of estimated construction costs for all aspects of a completely developed water and sewage collection system for all proposed distribution service areas at the Alexander Lake site. The future development density, potential customers, available funding, and other economic factors would determine which service areas would receive the water and sewer improvements first. The timing of construction for the areawide facility expansion (water plant, storage tank, waste treatment lagoon) would depend on the results of the evaluation of existing facility capacity. This evaluation could occur during the initial stages of Phase 1 water distribution and sewage collection system design. One or more service areas could be served if minor improvements were made to the existing facilities. An estimated cost for the evaluation and improvement stage of design has been included in Table 5.

This table should assist the City to plan and determine how to best utilize available funding. We believe that the phased approach would ensure that the people of Galena would receive the highest level-of-service at the lowest possible O&M costs. However, funding opportunities might dictate a more vigorous development.

SOURCE : CITY OF DELTA JUNCTION 1983 Capital Projects Request

NARRATIVE

The City of Delta Junction, owns 40 acres, where the existing sanitary landfill is utilized by the region of Delta Junction. Currently the City leases the property to a contractor who operates the facility on a part-time basis.

Open dumping is permitted, together with burning, which does not appear to affect the local residents, as the area around the landfill is sparsely populated. The facility now provides two functions which are, (1) one, the disposal of solid waste, and, (2) two, the disposal of sludge — from septic tanks, which is dumped in an open pit. An anaerobic lining has built up over the pond area which restricts the percolation of fluids into the ground. No fencing has been erected to keep out children and animals. Without monies to buy equipment for the operation of this landfill, it is not expected that conditions will not be improved.

It should be pointed out that the closest landfill to Delta Junction is near Fairbanks, 100 miles away, which, without improvements will have serious problems which may have long range implications.

A request of $500,000.00 is needed to implement the operation plan from concept to completion.

Following is a list of improvements that are planned for this project:

(A) One 32' x 72' metal shop containing but not limited to:

1. Electrical supply to the building for power tools.
2. Space heater for emergency heating.

(B) Equipment for maintenance of landfill:

1. Bulldozer
2. Backhoe or dragline
3. Truck dumpster

(C) Dumping platform

(D) Clearing of 10 acres

(E) Fencing 10 acres — 2640 L.F. + (2) gates

(F) Pilot project for sludge disposal

October 1, 1982

Dear

On June 18, 1982, we sent a letter advising you that as a result of the 1982 legislative session, we must change our method of awarding sewer, water, or solid waste grants. We enclosed a questionnaire for you to complete for each project for which you wished construction grant assistance next fiscal year. We appreciate the fact that you took time to complete a questionnaire for each of your projects. In order to keep you informed of our progress in this effort, I am presenting the following information.

We have received a total of 213 valid questionnaires from 52 communities. After receiving the questionnaires, the Department evaluated each project (using the criteria system marked as enclosure 1). The resulting evaluation was placed on word processing equipment, scores were computed, and a numeral ranking established for each project. We are submitting to the Governor, for inclusion in his capital budget, a request for $231,400,000; $109,000,000 for expenditure in FY 84 and $122,400,000 for expenditure in FY 85.

The projects are being submitted in two formats. The first is a list of projects ranked using our criteria (enclosures 2 & 3). The second is a list of projects placed alphabetically by applicant, with each project listed in the priority designated by the applicant, when a priority was specified (enclosures 4 & 5). Two lists are presented in each format, one for each fiscal year.

Sufficient time was unavailable for us to solicit public comment on our criteria system this first year. We anticipate that in future years, priority lists will be developed using criteria similar to this. To refine our system and make it as responsive as possible to your needs, we would appreciate your comments concerning the criteria we used this year.

We realize that this priority-based system for ranking projects is a significant departure from the method used in the past. It has the potential to enable the Legislature to tailor our program's resources to specifically address your demand for grant assistance. Your efforts in advance planning

and projecting funding needs is very much appreciated. In order to retain maximum flexibility and to enable the grants program to respond to your needs most effectively, we have requested that the Legislature include certain language in our appropriation. These include contingency funds, (additional unencumbered funds beyond those specifically designated to individual projects), the ability to reallocate funds between projects, and to reprogram funds slated for projects which do not proceed within a year's time.

Your continued endorsement of our program and our funding request will be an important part of our success in obtaining sufficient resources from the Legislature. Thank you for your time and effort.

Sincerely,

Keith Kelton, Director
Facility Construction
and Operation

Enclosure

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

CRITERIA SYSTEM

1. Public Health Benefit Received (Points will be scored from no more than one of the items listed under this criteria (1.A.1. - 1.D.)

   A. Health hazards alleviated (problem must be sufficiently reduced by this project to remove it from this category).

	POINTS
1. Existing hazard, documented by Department as capable of causing injury, serious illness, or death to humans.	200
2. Potential hazard which could result in injury, serious illness, or death to humans in the near future.	100

   B. Water quality problems alleviated.

1. Existing problem documented by Department as causing serious water quality violations adversely affecting health or welfare of humans or animals.	100
2. Existing problem, documented by Department as causing water quality violations not directly affecting health of humans or animals.	50

   C. Water supply problems alleviated.

1. Community water provided to supply good quality water, replace poor quality water, or to prevent interruption of supply.	100

   D. Other environmental problems alleviated (wind blown litter, obnoxious odors, etc.) 30

2. Local funding source

Percent Local Funding	Points
50% or greater	100
At least 25% but less than 50%	70
At least 10% but less than 25%	40
Less than 10%	10

3. Grant will be used to match federal funds 50

4. Population benefitted

	Points for projects benefitted	
	Existing Population	New Development
More than 10,000	150	50
3000-9999	120	40
1000-2999	90	30
Less than 1000	60	20

		Points
5.	This project involves both water supply and sewerage constructions.	50
6.	Grant funds requested	
	0--$500,000	70
	$500,000--$2,000,000	50
	More than $2,000,000	30
7.	This project is part of an overall project which is composed of more than one phase. At least one other phase has been completed, and the current project phase is necessary to complete the overall project.	50
8.	Part of system affected	
	Project will add an integral part which improves performance of system rather than extending a system to increase capacity.	50
9.	Segment of population benefitting	
	More than 90% of project directly benefits residential or commercial users (not industrial or fire flow).	100
	More than 60% (but less than 90%) of project directly benefits residential or commercial users.	50
	More than 30% (but less than 60%) of project directly benefits residential or commercial users.	30
10.	Project needs to be built in conjunction with other projects, such as road paving.	100
11.	Project is part of a comprehensive development plan.	30

Local priority will be used to differentiate between local projects having an equal number of total points. If relative rankings of local projects, based upon total points, differs from local priority ranking, the differences will be negotiated with the responsible local authorities.

Readiness to proceed will be used as a criteria for separating projects into two groups.

1) If the grantee will be ready to proceed with construction on the project by July 1, 1983, it will be placed on list 1.

2) If the grantee will be ready to proceed with construction on the project by July 1, 1984, it will be placed on list 2.

3) Otherwise, it will not be considered for inclusion in the FY-84 capital budget.

Each list of projects will be ranked separately by the criteria above and submitted with our capital budget request.

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION
PROJECT CAPITAL BUDGET QUESTIONNAIRE

Please complete a copy of this questionnaire for each capital project for which you anticipate requesting water, sewerage, or solid waste grant assistance under AS 46.03.030. A questionnaire should be completed for all unfunded projects for which you are requesting assistance, even if you have previously submitted a grant application. Please answer all questions as completely as possible, since this will be the only source of data used in preparing the Department's capital budget request.

1) Your Name_____ Telephone_____ Date_____

2) Municipality Represented:_____

3) Name of Project:_____

4) Local priority of this project compared to other questionnaires submitted by the municipality #_____

5) Type of Project: Water_____ Sewage_____ Solid Waste_____

Article 2. Department of Environmental Conservation.

Section

20. Powers of the department
30. Grants for water supply, sewerage and solid waste facilities
40. Alaska environmental plan

Collateral references. — 61A Am. Jur. 2d, Pollution Control, § 6.

39A C.J.S., Health and Environment, §§ 5, 9-15, 125-145.

Power of state to prohibit or restrict exportation of natural resources. 32 ALR 331.

Preservation or protection of animals or birds as subject of charitable trust. 66 ALR 465.

Constitutionality of reforestation or forest conservation legislation. 13 ALR2d 1095.

Right to maintain action to enjoin public nuisance as affected by existence of pollution control agency. 60 ALR3d 665.

Sec. 46.03.020. Powers of the department. The department may

(1) enter into contracts necessary or convenient to carry out the functions, powers and duties of the department;

(2) review and appraise programs and activities of state departments and agencies in light of the policy set out in AS 46.03.010 for the purpose of determining the extent to which the programs and activities are contributing to the achievement of that policy and to make recommendations to the departments and agencies, including but not limited to, environmental guidelines;

(3) consult with and cooperate with

(A) officials and representatives of any nonprofit corporation or organization in the state;

(B) persons, organizations and groups, public and private, using, served by, interested in or concerned with the environment of the state;

(4) appear and participate in proceedings before any state or federal regulatory agency involving or affecting the purposes of the department;

(5) undertake studies, inquiries, surveys or analyses it may consider essential to the accomplishment of the purposes of the department; these activities may be carried out by the personnel of the department or in cooperation with public or private agencies, including educational, civic and research organizations, colleges, universities, institutes and foundations;

(6) at reasonable times enter and inspect with the consent of the owner or occupier any property or premises to investigate either actual or suspected sources of pollution or contamination or to ascertain compliance or noncompliance with a regulation which may be promulgated under AS 46.03.020 — 46.03.040; information relating to secret processes or methods of manufacture discovered during investigation is confidential;

(7) conduct investigations and hold hearings and compel the attendance of witnesses and the production of accounts, books and documents by the issuance of a subpoena;

(8) advise and cooperate with municipal, regional and other local agencies and officials in the state, to carry out the purposes of this chapter;

(9) act as the official agency of the state in all matters affecting the purposes of the department under federal laws now or hereafter enacted;

(10) adopt regulations necessary to effectuate the purposes of this chapter, including, by way of example and not limitation, regulations providing for

(A) control, prevention and abatement of air, water, or land or subsurface land pollution;

(B) safeguard standards for petroleum and natural gas pipeline construction, operation, modification or alteration;

(C) protection of public water supplies by establishing minimum drinking water standards, and standards for the construction, improvement, and maintenance of public water supply systems;

(D) collection and disposal of sewage and industrial waste;

(E) collection and disposal of garbage, refuse, and other discarded solid materials from industrial, commercial, agricultural and community activities or operations;

(F) Repealed by § 12 ch 172 SLA 1978.

(G) control of pesticides;

(H) such other purposes as may be required for the implementation of the policy declared in AS 46.03.010;

(I) handling, transportation, treatment, storage, and disposal of hazardous wastes;

(11) after consultation with other state agencies and local government officials, identify and propose for additional or deletion, by regulation, other licenses, permits or authorizations for which the provisions of AS 46.35 are applicable, and report annually to the legislature the permits which have been included or deleted. (§ 3 ch 120 SLA 1971; am § 1 ch 220 SLA 1976; am § 2 ch 60 SLA 1977; am § 12 ch 172 SLA 1978; am § 8 ch 93 SLA 1981)

Revisor's notes. — In ch. 120, SLA 1971, paragraph (6) of this section contained a reference to AS 46.03.030 — 46.03.040. The engrossed version of the bill (SB 75 am H) referred to "this article" which includes AS 46.03.020; therefore the provision has been corrected here to a reference to AS 46.03.020 — 46.03.040. In paragraph (11), a reference to AS 46.35 was substituted for a reference to 46.30 by the revisor of statutes under the authority of AS 01.05.031.

Cross references. — For status of enforcement and inspection employees of the Department of Environmental Conservation as peace officers, see AS 46.04.090(b). For provisions relating to environmental procedures coordination, see AS 46.35.010 et seq.

Effect of amendments. — The 1977 amendment added paragraph (11).

The 1978 amendment, in paragraph (10), repealed subparagraph (F), which read "control of radiation sources to pro-

hibit and preven

hibit and prevent unnecessary radiation."

The 1981 amendment added subparagraph (I) in paragraph (10).

Editor's notes. — Section 10, ch. 172, SLA 1978, provides: "Regulations adopted under authority of statutes repealed or amended by this Act shall remain in effect until repealed by the Department of Environmental Conservation in consultation with the Department of Health and Social Services."

Sec. 46.03.030. Grants for water supply, sewerage and solid waste facilities. (a) Repealed by § 19 ch 220 SLA 1976.

(b) The department may grant to a municipality, as funds are available, up to 50 percent of eligible costs not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before June 21, 1976. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (d) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

(c) There is a water supply, sewerage and solid waste facilities fund created in the department to carry out the purposes of this section.

(d) The department shall, by regulation, identify those costs which are eligible costs for the purposes of this section. Eligible costs include the costs established in a construction contract which are necessary for construction of a project, but do not include the cost of interest and financing and right-of-way acquisition, or costs related to operation, maintenance, repair or replacement of a project.

(e) The department may grant to a municipality not more than 50 percent of the eligible costs, including costs of obtaining federal waivers from the requirement for secondary treatment plants, which are not paid for by the federal government for solid waste processing or disposal facilities constructed after July 1, 1980. However, the department may grant a municipality up to 60 percent of the eligible costs not paid for by the federal government for a solid waste processing or disposal facility constructed after July 1, 1980, if the facility is used for resource recovery. The eligible costs of a solid waste processing or disposal facility are determined by the federal agency granting the most monetary assistance for construction of the facility. For a solid waste processing or disposal facility for which federal money is not available, the department shall determine the eligible costs in accordance with (d) of this section. A municipality shall construct solid waste processing or disposal facilities financed by grants under this section according to plans and specifications approved by the department. (§ 3 ch 120 SLA 1971; am §§ 2, 19 ch 220 SLA 1976; am §§ 30, 31 ch 168 SLA 1978; am §§ 1-4 ch 163 SLA 1980)

Effect of amendments. — The 1978 amendment added "in accordance with (d) of this section" to the end of the third sentence of subsection (b) and added subsection (d).

The 1980 amendment deleted "the lesser of" preceding "50 percent of" and "the" preceding "eligible costs", and substituted "costs" for "cost or 50 percent of the eligible cost," near the beginning of subsection (b), substituted a comma for "and" following "water supply," and "and solid waste facilities" for "systems" in subsection (c), rewrote subsection (d), and added subsection (e).

Sec. 46.03.040. Alaska environmental plan. (a) The department shall formulate and annually review and revise a statewide environmental plan for the management and protection of the quality of the environment and the natural resources of the state, in furtherance of the legislative policy and purposes expressed in this chapter.

(b) The department shall submit the first plan to the governor on or before January 1, 1972, and thereafter submit periodic revisions of the plan to the governor. The plan is effective upon approval by the governor and shall serve thereafter as a guide to the public, the state government and the political subdivisions of the state in the development of the environment and natural resources of the state.

(c) In formulating the plan and any revisions, the department may consult with persons, organizations and groups, public or private, interested in or concerned with the environment of the state, and with a department, division, board, commission or other agency of the state, with a political subdivision, or with any public authority as may be necessary to enable the department to carry out its responsibilities under this section. (§ 3 ch 120 SLA 1971)

Article 3. Water Pollution Control.

Section	Section
50. Authority	100. Waste disposal permit
60. Water pollution control plan	110. Waste disposal permit procedure
70. Pollution standards	120. Termination or modification of waste disposal permit
80. Quality and purity standards	130. [Repealed]
90. Plans for pollution disposal	

Collateral references. — 61A Am. Jur. 2d, Pollution Control, §§ 134, 135, 211.

39A C.J.S., Health and Environment, §§ 125-128, 131; 93 C.J.S., Waters, §§ 43-57.

Measure and elements of damages for

Department of Transportation and Public Facilities. All bids with the names of the bidders and the amounts of the bids, together with all documents pertaining to the award of a contract, shall be made a part of a file or record and retained by the department for three years, unless reproduced by microfilming and these files or records are open to public inspection at all reasonable times. An aggrieved bidder may within five days after an award of contract appeal to the department for hearing, with notice to interested parties, for redetermination and final award in accordance with law.

(b) A contract for professional services shall be awarded in accordance with AS 24.23 or AS 36.98. (§ 4 art IV ch 82 SLA 1955; am § 1 ch 64 SLA 1976; am Executive Order No. 39, § 11 (1977); am § 9 ch 144 SLA 1982)

Effect of amendments. — The 1982 amendment, effective July 22, 1982, designated the former provisions of this section as subsection (a), and in that subsection, added "Except as otherwise provided in AS 37.05.230" to the beginning, deleted "taking into consideration conformity with the specifications, terms of delivery, and other conditions imposed in the call for bids" from the end of the first sentence, and substituted the present second, third, and fourth sentences for those set out in the main pamphlet. The amendment also added subsection (b).

Article 5. General Provisions.

Section	Section
315. Grants to municipalities	318. Exemption from regulations
316. Grants to named recipients	319. Definitions
317. Grants to unincorporated communities	

Sec. 37.05.300. Interpretation of AS 37.05.010 — 37.05.330.

Opinions of attorney general. — As to applicability of the chapter to the University of Alaska, see notes under this catchline following chapter heading.

Sec. 37.05.315. Grants to municipalities. (a) When an amount is appropriated or allocated as a grant to a municipality, the Department of Administration shall promptly notify the municipality of the availability of the grant. When the Department of Administration receives an agreement executed by the municipality which provides that the municipality (1) will spend the grant for the purposes specified in the appropriation or allocation; (2) will allow, on request, an audit by the state of the uses made of the grant; and (3) assures that, to the extent consistent with the purpose of the appropriation or allocation, the facilities and services provided with the grant will be available for the use of the general public, the Department of Administration shall pay the grant directly to the municipality. The agreement executed by a municipality under this section shall be on a form furnished by the Department of Administration and shall be executed within 60 days after the effective date of the appropriation or allocation.

(b) An appropriation or allocation for a grant to a municipality for construction of a public facility lapses if substantial, ongoing work on the project has not begun within five years after the effective date of the appropriation or allocation.

(c) In accepting a grant of money for construction of a public facility, a municipality covenants with the state that it will operate and maintain the facility for the practical life of the facility and that the municipality will not look to the state to operate or maintain the facility or pay for its operation or maintenance. This requirement does not apply to a grant of money for repair or improvement of an existing facility operated or maintained by the state at the time the grant is accepted if the repair or improvement for which the grant is made will not substantially increase the operating or maintenance costs to the state.

(d) Not less than 20 percent of a grant shall be paid to a municipality within 10 days of the effective date of the agreement under (a) of this section. The remainder of the grant shall be paid either in monthly installments equal to the amount of grant money the municipality expended in the previous month or in a lump sum as determined by the Department of Administration. (§ 1 ch 156 SLA 1980; am § 1 ch 4 SLA 1982)

Effect of amendments. — The 1982 amendment, effective January 16, 1982, in subsection (a), substituted "amount is appropriated or allocated" for "appropriation is made" in the first sentence, inserted "or allocation" in items (1) and (3) in the second sentence, and added "and shall be executed within 60 days after the effective date of the appropriation or allocation" to the end of the third sentence; redesignated the former fourth and fifth sentences of subsection (a) as subsection (d); inserted "or allocation" in two places in subsection (b); substituted "a" for "each" preceding "municipality covenants" and "the practical life of the facility and that the municipality" for "its practical life and that it" in subsection (c); added the second sentence of subsection (c); deleted the provisions of former subsections (d), (f), and (g), which may now be found in AS 37.05.316, 37.05.317, and 37.05.318, respectively; and in present subsection (d), added "under (a) of this section" to the end of the first sentence. The substance of the provisions of former subsection (e) may now be found at the end of the third sentence of subsection (a).

Sec. 37.05.316. Grants to named recipients. When an amount is appropriated or allocated to a department as a grant for a named recipient which is not a municipality, the department to which the appropriation or allocation is made shall promptly notify the named recipient of the availability of the grant and request the named recipient to submit a proposal to provide the goods or services specified in the appropriation act, or both, for which the appropriation or allocation is made. At the same time, the department may issue a request for proposals from other qualified persons to provide the same goods or services, or both, in the same area. The department shall contract with the named recipient unless the Office of the Governor, with due regard for any local expertise or experience among those making proposals, determines that an award of the contract to a different party would

MEMORANDUM

TO: COMMITTEE ON COMMUNITY AND REGIONAL AFFAIRS

FROM: STAFF

DATE: MAY 25, 1983

RE: CSSB 151 (C&RA)

During the last hearing on CSSB 151 the committee reviewed and approved a proposed committee substitute that contained two (2) amendments to CSSB 151.

The committee approved a third amendment as follows: page 7, line 29: after "and" add: able to produce revenue adequate to repay the bonds with which it is financed.

Following the above described actions, the committee failed to move the bill out of committee. A HCS CSSB 151 (C&RA) has been prepared and is ready for committee action.

HCS for CSSB 151 (C&RA) #2

Proposed Amendment:

page 7, line 29

after "and," add: able to produce revenue adequate to repay the bonds with which it is financed.

FROM: Representative Lacher, Chairperson

DATE: May 9th, 1983

RE: House Bill 377

You will recall that CS SB 151 and HB 377 are companion bills relating to the establishment of Regional Resource Development Authorities.

It is my intention to pass a version of CS SB 151 and a CS HB 377 from committee.

Proposed changes to CS SB 151 are shown on attached memorandum. Following committee decision on the proposed changes, a Community and Regional Affairs substitute may be prepared.

The administration is preparing a final version of a proposed Committee Substitute for HB 377. The proposed change will be ready for committee review on Tuesday, May 10th, 1983.

AMENDMENT #1

Page 6, line 27
After "person", delete ";" and add ", provided that state grants, appropriations, or other transfers from the state may ~~only be used for organization purposes and may~~ not be used to satisfy bond obligations or otherwise establish collateral or security for bonds issued by the authority."

Rational: ---
Bill proponents insist that authority revenue bonds will not obligate the state in any way even if the authority got into financial trouble. In addition, the letter of intent passed by the Senate (attached) states that to the "maximum extent possible" liability for the bonds rests with the regional authority. However, the current bill leaves open the possibility of state contributions towards bond payments. This amendment changes that, although the change is not absolute. A later Session could always remove the clause after an authority got into trouble. Still, the amendment makes the bill consistent with the legislative intent not to be obligated by regional authority revenue bonds.

LETTER OF INTENT

SENATE

CSSB 151 (Finance)

It is the intent of the Committee to authorize the establishment of regional authorities which will have the ability to issue tax-exempt revenue bonds for the purpose of enhancing the development of resource enterprises which would contribute to the economic growth of the State. It is the intent of the Committee that the authorities established pursuant to this legislation would not create any financial liability or obligation by the state for bonds issued for resource enterprises. Nor is it the intent that the issuance of any such bonds by authorities adversely affect the ability of the state or any of its political subdivisions to market their own bonds. Rather, to the maximum extent possible, liability for bonds issued rest exclusively with the regional authority and the specific resource enterprise involved, not the state, successor boroughs or other municipalities or other projects or citizens in the region or state.

Adopted by the Senate May 3, 1983

MEMORANDUM

To: Gary Thurlow, Borough Manager

From: Steven H. Morrissett, Borough Attorney

Subject: SB 151: RESOURCE AUTHORITY BILL

I talked with Ken Vassar of Wohlforth & Flint today, who was involved drafting SB 151. This bill would create regional resource development authorities. He had read my memorandum dated April 26, 1983, expressing concern about SB 151. Of the three questions I raised, I agree with him that the last two are based on my mis-reading of the bill.

The present bill assures that a regional development authority will not operate within organized boroughs, even if the borough is created after the authority is in existence. Proposed AS 30.13.150, which I overlooked, provides for integrating the authority into the borough within one year of incorporation of the borough. There would be no direct competition with borough responsibilities, since development authorities would exist only in the unorganized borough.

There would likely still be direct competition for the sale of bonds with cities in the unorganized boroughs and indirect competition with boroughs in other areas. There would also be an impact on cities within the jurisdiction of a development authority from the tax exempt status of any property of the authority within such a city.

I still believe a constitutional question exists by constituting the authorities as political subdivisions. Within the unorganized borough, the State Legislature remains the responsible body for performance of services. I believe the problem can be avoided only by either a state-established authority or by creating a borough government pursuant to Title 29.

Committee on Resources

April 6, 1983

Memo

To: Senator Bennett, Co-Chairman Finance Committee
Senator Sackett, Co-Chairman Finance Committee

From: Senator Bettye Fahrenkamp

Subject: CSSB 151, Regional Resource Development Authorities

As you know, the Finance Committee has recently received the above bill for consideration from the Resources Committee. This bill would authorize the establishment of authorities in the unorganized borough for the purpose of developing infrastructures for resource development projects. Funding for the developments would primarily come from the issuance of tax-exempt revenue bonds by the authority to be repaid with user fees from the developments.

In testimony and discussion before the Resources Committee several criticisms of the bill as originally drafted surfaced: 1) lack of guarantees of equal access to facilities which may be developed; 2) the possibility of proliferation of authorities throughout the unorganized borough; 3) the encouragement of less-than-sound economic projects by authorities; 4) the possibility that bonds issued by authorities may in some way create a liability to the state or add to the state's overall bond indebtedness; and 5) the possibility that the issuance of bonds by authorities might in some way affect the ability of the state or its political subdivisions to market their revenue bonds.

In response to these criticisms the Resources Committee adopted several major changes and additions to the bill including:

1) Page 2, lines 19-29, the Governor must make a positive finding that an authority's goals and projects would be economically advantageous to the region and state and that the authority is an appropriate and desireable method of accomplishing the goals and projects prior to establishment of an authority.

2) Page 2, lines 8-11, the ability to petition for establishment of an authority expires on July 1, 1986.

3) Page 2, lines 13-14, a petition to call for an election to establish an authority must be signed by 100 persons of a district.

4) Page 4, lines 26-29, the Board of Governors of an authority shall consist of eight members, five elected locally and three Department heads appointed by the Governor.

5) Page 8, subsection (f), Prior to issuance of bonds an authority must submit an independent economic analysis of a project and its revenues to the state bond committee. The committee must find that project revenues are adequate for payment of the bonds and that the issuance of bonds would not adversely affect the ability of the state or localities to market their bonds.

6) Page 11, subsection (b), bonds issued by an authority do not constitute any liability or indebtedness to the state or political subdivision, nor can an authority pledge the faith or credit of the state or local government.

7) Page 13, subsection (a), ensures fair and equal access and fee assessements for users of facilities.

8) Page 13-14, subsection (b), an authority must find that prior to issuance of bonds that a project would be economically advantageous to the state and general public welfare and that the project is economically viable.

9) Page 14, section 30.13.150 provides that an authority would be integrated into a local government should it be established, but that an indebtedness of an authority does not constitute an obligation of the new government.

I think that these provisions adequately address the concerns that were raised. However, several other possible amendments were suggested that might further clarify the intent of this legislation which were suggested too late to be properly integrated into the committee substitute. I would urge the Finance Committeeto consider the following possible changes:

* 1) Changing the number of petitioners calling for an election to establish an authority from an absolute number of 100 to a percentage formula similar to other regional elections. (Attached is a possible formula suggested by the Division of Elections).

2) Any monies received by the state may not be used to satisfy bond obligations or collateral by an authority (attached are draft suggestions from the Department of Law).

3) Change a quorum of the Board from a majority to a majority plus one. (Suggested by the Alaska Environmental Lobby; see attached comments).

* 4) Ensure that proposed projects get fair and equal consideration within a district by an authority. (See attached language submitted by the Alaska Miners Association).

In addition, several technical changes should be made in the bill. The following should be made to correct changes which were made by the Legal Division in the CS:

* 1) On page 5, lines 12-13, delete the phrase "at a meeting at which a quorum is present". This simply clarifies that a quorum constitutes a majority of the members of the board of governors.

* 2) On page 6, lines 16-17, delete the phrase "in accordance with the Administrative Procedure Act (AS 44.62)". This phrase was not contained in the CS which passed out of the Resources Committee and could be construed as evidence that authorities are somehow to be viewed as quasi-agencies of the state.

* 3) On page 8, line 25 delete "AS 30.13.060(f)(1)" and insert in lieu thereof "this subsection". There is no subsection (f)(1).

* 4) On page 15, line 18, add a comma after the words "rolling stock".

Finally, I would call your attention to the Letter of Intent which was passed out with the bill. This further clarifies that it is the intent that the bonds issued by the authorities not constitute any liability to the state or local governments or taxpayers in a successor government.

I would be happy to appear before your Committee to further explain this legislation and the actions of the Resource Committee. In addition, I have asked my staff to provide whatever assistance you may need on the bill. I remain convinced that this legislation could be of tremenodus value in facilitating the development of resource projects in our state which would have tremendous economic and social benefits to regions as well as the state. I would hope the Finance Committee could expedite its consideration of this important legislation.

* Changes made in Finance Committee plus added "cultural, environmental" to findings #4 on page 2

Committee on Resources

March 25, 1983

Memo

To: Senate Resources Committee Members

From: Senate Resources Committee Staff

Subject: Amendments to CS of SB 151, Regional Resource Authorities

The following amendments have been proposed by various interests since the CS was distributed. These four amendments would make only clarifying or technical changes to the CS:

1) On Page 2, add the following new subparagraph to the Legislative Findings and Policy:

"(4) A locally elected majority membership of an authority created under this chapter provides a method of assuring that the manner of development and the permanent features of a project will be consistent with the economic, sociological and political aspirations of the residents of the particular region."

2) On Page 7, make the following changes in subsection (9):

(9) accept gifts, loans, grants, including without limitation organizational grants, from, and enter into contracts or other transactions regarding them, with any federal, state, municipal or other agency or instrumentality, private organization, or other person;

3) On page 9, change subsection (f)(2) to read:

(2) The state bond committee shall find, based on the information submitted by the authority in AS 30.13.060(f)(1) and such other information that is reasonably available to it, that the project revenues can be reasonably expected to [ensure repayment] be adecuate for payment of the principal and

interest on [of] the bonds to be issued, and that the issuance of the bonds by the authority would not be expected to adversely affect the ability of the state or its political subdivisions to market bonds.

4) On page 15, in AS 30.13.130(a) change where it appears the word "section" to "subsection".

Committee on Resources

March 24, 1983

Memo

To: Senate Resources Committee Members

From: Senate Resources Committee Staff

Subject: Amendments to CS for SB 151

Attached is the CS for SB 151 which was adopted at the meeting of the Committee on March 18, 1983. Contained in this CS are underlined changes intended to meet the concerns of several Members which were raised at the meeting on the 18th. The proposed amendments to the CS address the following:

1) In section 1 the word "nonrenewable" was deleted to permit authorities to be formed for both nonrenewable and renewable resource enterprises;

2) In section 2 a statement was required to be submitted to the Governor in addition to the petition to the DC&RA to establish an authority. The Governor is required to issue a finding prior to the holding of an election to establish an authority that the authority would contribute to the economic growth of the region and the state, and that the authority is a desireable method of accomplishing the goals and projects.

3) The number of petitioners for an authority was raised from 50 to 100.

4) Elections are to be held coincidental to other regional elections when possible.

5) Section 30.13.020 (h) was added to sunset the ability to petition and hold elections for establishment of an authority on June 30, 1986.

6) Section 30.13.060 (f) was added to require an authority to submit economic information on a project to the State Bond Committee prior to the issuance of bonds. The committee must find that the project revenues can be expected to repay the bonds, and that the authority's bond issue will not adversely affect state and local bond issues.

7) Changes were made in Sec. 30.13.150 which clarify that when a borough or a home-rule municipality is created for a resource authority area or includes an authority's area, the authority shall be integrated

into the borough or home-rule municipality, that any indebtedness of an authority does not constitute an indebtedness to the municipality and that the municipality may not levy any taxes to pay for any such indebtedness.

8) References to an authority's "jurisdiction" have been replaced throughout the bill with references to the area within which an authority may exercise its powers, This change was to clarify the language to closely reflect the character of the authorities.

9) The words "ex officio" at the end of section 30.13.010(e) have been deleted as unnecessary and possible confusing.

10) Section 30.13.030 has been changed by adding "in connection with natural resource enterprises" after "transportation purposes" to clarify the purpose to be served by the authorities.

11) Section 30.13.040 has been changes by adding "set forth in AS 30. 13.030" after "corporate purposes" to clarify the purposes for which an authority may exercise its powers.

12) The reference in section 30.13.130(b)(2) to the project sponsor has been changed to a reference to the project itself believed to be the more important consideration.

The Committee will again consider this legislation at its meeting on Friday, March 25, at 3:00pm in the Beltz Room.

Senator Vic Fischer
Alaska State Legislature
Pouch V • Juneau, Alaska 99811 • (907) 465-4954

March 22, 1983

TO: Senator Bettye Fahrenkamp
Chair, Senate Resources Committee

FROM: Senator Vic Fischer

Thank you for the opportunity to consider possible amendments to SB 151.

Amendment 1 does not entirely reflect my concerns about the possibility of a proliferation of authorities. The intent of my suggestion was that the Governor be required to find that the creation of a particular authority is necessary and desirable. This would seem to require a new subsection in Sec. 2 to require submittal of a statement to the Governor to include (1) purpose of the proposed authority, (2) the goals it would seek to meet, (3) analysis of the options other than an authority for obtaining the desired goals, and (4) justification for the choice of an authority over other options for meeting the stated goals. This step would logically come at the same time as petition to C&RA. The Governor would then be required to find that (1) meeting the proposed authority's goals would be advantageous to the state and the region's economic growth, and (2) the authority's creation would be necessary to obtain those goals.

In light of the attached article, which describes the problem of independent authorities and corporations incurring debt for which the state may become at least morally liable, I would like to suggest a further amendment. This would be a new section requiring the Commissioner of Revenue to approve the sale of revenue bonds by an authority. The authority would submit a statement detailing (1) the prospectus of the bond issue and (2) an economic feasibility analysis of the proposed development project and its expected revenues. The Commissioner of Revenue would then be required to find that (1) the project appeared to be capable of producing adequate revenues to repay the bonds and (2) bonds of the authority would not be expected to negatively affect the ability of the state or its subdivisions to market their own bonds and meet their financial obligations.

I'm sure that the legal people can put these suggested amendments into their proper form. Feel free to contact either me or my staff if you need further clarification.

FROM: Senator Arliss Sturgulewski
Senate District F, Seat A

RE: Senate Bill 151 Regional Resource Development Authorities

I will not be able to attend the Friday Resources Committee meeting at which you will be considering SB 151. I raised a number of questions in earlier meetings and wanted to share a few additional thoughts with you. I feel the Red Dog development in the Nana Region is an exciting project that I would like to see go forward. The basic issue is, of course, the consideration of a financial structure that would be a positive benefit to the economic viability of the development.

Because of my interest in local government and delivery systems I wanted further clarification of the status of the proposed development authorities, so I have requested an opinion from the Attorney General as to the relationship of the authorities to Article X of the Alaska State Constitution. Case law dealing with limited purpose political subdivisions is sparse and yet it seems to me necessary to try to think ahead to determine what the impacts of the creation of limited political subdivisions might cause. I'm sending you a copy of a memorandum Tamara Cook issued to the Senate Advisory Council dealing with the state and regional educational attendance areas as an example of some of the concerns I see in establishing the new authorities.

I feel that we will see proposals in other areas of the unorganized borough that need assistance in development along the lines of those proposed for the nana region--that is the ability to sell bonds to finance infrastructure. It would seem to me that several approaches other than the regional resource development authorities merit consideration.

1. I think further consideration should be given to possible utilization of the Alaska Industrial Development Authority. Certain amendments would have to be made to the Authority to allow them to finance roads and possibly raise limits on single projects and total limits per year.

2. I think more work needs to be done to look at the possibility of a single statewide authority that might be able to operate in all the unorganized areas of the state. This might well prevent the proliferation of numerous authorities throughout the unorganized borough and might prevent some of the structural problems that could arise as areas where the authorities exist move to borough status.

3. The Department of Transportation and Public Facilities now has the authority to issue revenue bonds for airport construction. It seems to me that consideration should be given to looking at their ability to fast track projects such as proposed in NANA Region through the use of revenue bonds.

4. Alaska Industrial Development Authority assisted tax exempt financing for the private venture should be considered.

In the event the current legislation moves forward, I think that there should be a real strengthening of the legislation in the area of approval by the State Bond Committee of the sale of bonds, and the ability of the legislature and administration to audit the financial records of the authority. I'm sending copies to you of the Institute of Public Administration's (IPA) work regarding public corporations in Alaska. Although I feel the Attorney General may well consider these limited purpose political subdivisions, many of the questions raised by IPA seem very valid. As I have indicated to you, I want to be positive toward this development but have some major concerns in the area of financial and oversight relationships and proliferation of yet another kind of limited service district in the unorganized borough. I will be more than happy to work with you as this legislation progresses.

Enclosures

CHAPTER 52

AN ACT

Relating to the incorporation of organized boroughs and providing for certain grants to boroughs.

(C.S.H.B. 90)

Be it enacted by the Legislature of the State of Alaska:

Section 1. **Declaration of Intent.** It is the intention of the legislature to provide for maximum local self-government with a minimum number of local government units and tax-levying jurisdictions, and to provide for the orderly transition of special service districts into constitutional forms of government. The incorporation of organized boroughs by this Act does not necessarily relieve the state of present service burdens. No area incorporated as an organized borough shall be deprived of state services, revenues, or assistance or be otherwise penalized because of incorporation. With the exception of planning and zoning, education, and tax collection and assessment, all powers granted the first-class boroughs are exercised at the option of the borough assemblies.

Sec. 2. **First- and Second-Class Borough Incorporation.** In addition to the incorporation of organized boroughs by local option, first- and second-class organized boroughs are incorporated as provided by this Act.

Sec. 3. **Areas Incorporated.** (a) If an organized borough is not incorporated by local option as provided by AS 07.10.010 within areas designated in this section, each area designated becomes, on January 1, 1964, a first- or second-class organized borough as determined by local election and a municipal corporation, and possesses all the powers and privileges prescribed by AS 07. Areas designated are:

(1) Sitka Election District #3

(2) Juneau Election District #4

(3) Palmer-Wasilla-Talkeetna Election District #7

(4) Anchorage Election District #8

(5) Combined Seward Election District #9 and Kenai-Cook Inlet Election District #10

(6) Kodiak Election District #11

(7) Ketchikan Election District #2 as designated in Sec. 3, Art. XIV, of the State Constitution, except the Annette Island Indian Reservation created by Act of Congress dated March 3, 1961, 26 Stat. 1101.

(8) Fairbanks Election District #19 as designated in Sec. 3, Art. XIV, of the State Constitution.

(b) If a portion of any district designated above is incorporated by local option before October 1, 1963, and the remaining portion of the district meets the standards for incorporation as provided in AS 07.10.030, the Local Affairs Agency shall make a finding to that effect and notify the secretary of state to hold elections in the area. The area is incorporated as an organized borough on January 1, 1964.

(c) The borough assembly may select the borough seat and borough name in the boroughs designated by this section.

(d) So long as the following areas remain military reservations, they shall be excluded from any borough incorporated in accordance with this section; provided, however, that when an area shall no longer be subject to a military reservation, it shall become a part of the borough surrounding it. Areas excluded at this time are:

(1) Kodiak Naval Station (base proper)

(2) Ft. Richardson Army Base (base proper)

(3) Elmendorf Air Force Base (base proper)

(4) Ft. Wainwright Army Base (base proper)

(5) Eielson Air Force Base (base proper)

(6) Ft. Greely Army Base (base proper)

(7) Wildwood Station (base proper)

Sec. 4. **Election.** (a) On October 1,

1963, the Local Affairs Agency shall direct the secretary of state to hold elections for all borough officers and for determination of whether the borough shall be first-class or second-class in the boroughs incorporated by sec. 3 of this Act.

(b) Upon receipt of the notification, the secretary of state shall hold elections before December 15, 1963, for all borough officers as prescribed by AS 07.10.120.

Sec. 5. AS 07.05.030 is repealed and reenacted to read:

Sec. 07.05.030. **Transition of Special Service Districts.** Special service districts located in existing election districts Nos. 3, 4, 7, 8, 9, 10, and 11, and in districts Nos. 2 and 18 as designated in the State Constitution continue to exercise their powers and functions in accordance with AS 07.10.130 and 140. Other special districts continue to exercise their powers and functions under existing law until July 1, 1964.

Sec. 6. AS 07.10.010 is amended to read:

Sec. 07.10.010. **Incorporation Proposed by Petition.** The incorporation of a first- or second-class organized borough by local option is proposed by filing a petition with the Local Affairs Agency.

Sec. 7. AS 07.10 is amended by adding a new section to read:

Sec. 07.10.125. **Boundary Adjustments.** (a) The Local Boundary Commission may hold public hearings in each area incorporated as an organized borough to determine the necessity for boundary adjustments.

(b) Boundary adjustments may include expanding the boundaries, contracting the boundaries, dividing the areas into two or more areas, or combining two or more areas.

(c) Boundary adjustments made by the Local Boundary Commission shall be submitted to the legislature during the first 10 days of a regular session. The boundary adjustments shall become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

Sec. 8. AS 07.10 is amended by adding new sections to read:

Article 2

Transitional Assistance

Sec. 07.10.150. **State Lands.** An organized borough may select 10 per cent of the vacant, unappropriated, unreserved state lands located within its boundaries within five years after the date of availability of state lands in the borough. Nothing in this section affects any valid existing claim, location, or entry under the laws of the state or the United States, whether for homestead, mineral, right-of-way, or other purpose, or affects the rights of any owner, claimant, locator, or entryman to the full use and enjoyment of the land so occupied.

Sec. 07.10.160. **Selection Procedure.** (a) All selections shall be made in reasonably compact tracts, taking into account the situation and potential uses of the lands involved. The authority to make selections may not be alienated or bargained away, in whole or in part, by the borough.

(b) If lands desired by the borough are unsurveyed at the time of their selection, the Department of Natural Resources shall survey the exterior boundaries of the area requested without any interior subdivision, and shall issue a patent for the selected area in terms of the exterior boundary survey. The cost of survey is borne by the borough. If lands desired by the borough have been surveyed at the time of their selection, the boundaries of the area requested shall conform to the public land subdivisions established by the approval of the survey. Lands selected by the borough in accordance with this chapter shall be patented to the borough by the Department of Natural Resources.

(c) After the selection of the lands by the borough but before the issuance of final patent, the borough may execute conditional leases and make conditional sales of selected lands.

Sec. 07.10.170. **Organizational Grants.** (a) For the purpose of defraying the cost of transition to borough government and in order to provide for development and interim governmental operations, each organized borough is entitled to an organizational grant equal to $10 for every qualified voter within the borough

Approved April 12, 1963

CHAPTER 53

AN ACT

Relating to the election of members of the borough assembly.

(H.B. 214)

AN ACT

Be it enacted by the Legislature of the State of Alaska:

Section 1. AS 07.10.120(b) is amended to read:

(b) Qualification of voters. Any person who is a qualified voter in Alaska and is a resident of the area within the proposed organized borough is qualified to vote in the election. However, if sections have been established as provided for by AS 07.30.100, the election of assemblymen is governed by the provisions of that section.

Sec. 2. AS 07.30.100 is amended to read:

Sec. 07.30.100. Borough Sections. (a) The members of the borough assembly representing the area outside the first-class cities may establish, alter, or abolish sections for the election of assemblymen in order to provide representation to separate and distinct areas within the borough. If the assembly establishes sections, members representing the area outside the first-class cities shall be elected from the sections in which they reside. Qualified voters resident outside first-class cities may vote upon the candidacy of all the candidates, but candidates from each section run only against other candidates from the same section. The number of sections shall equal the number of assemblymen representing area outside the first-class cities. ection boundaries shall be established in such a way as to provide, insofar as possible, clarity of boundaries, compactness of area, equal voter representation among different sections, and homogeneity of interest within the section. No section may have a number of voters which is less than one-half that of any other section, as determined from the records of the last general election.

(b) If more than 40,000 people, as determined by the Local Affairs Agency on the basis of the best available information, reside in the area to be included in the proposed organized borough, the Local Affairs Agency shall, as soon as possible, and in no event later than 60 days before the initial election of borough officers, establish sections for the election of assemblymen, as provided in (a) of this section. The first election of assemblymen shall be from the sections established by this subsection.

SB 73 - Senator Mulcahy, chairman of the Fisheries Subcommittee, reported that the subcommittee had adopted a committee substitute. He then moved and asked unanimous consent that SB 73 be moved from committee with individual recommendations. There were no objections.

SB 136 - Senator Mulcahy asked that SB 136 be held until the next Resource Committee Meeting.

SB 156 - Senator Mulcahy stated the Fisheries Subcommittee had adopted a committee substitute. He then moved the committee substitute for Senate Bill 156 from committee with individual recommendations. There were no objections.

SB 151 - Pat Pourchot, Administrative Assistant to the Senate Resources Committee testified regarding changes in the committee substitute. He listed four provisions to provide safeguards to the State to protect against possible problems in creation of authorities and issuance of revenue bonds:

(1) the number of petitioners to initiate calling an election was raised from 50 to 100;

(2) a sunset provision barring establishment of authorities after June 30, 1986;

(3) A Governor's finding of an authority;

(4) A state bond committee finding prior to issuing revenue bonds.

A letter of intent was also presented which addressed liability by the state vis a vis regional authorities and tax-exempt revenue bonds.

Jay Nelson - representing the Alaskan Environmental Lobby testified that he does not support the bill as presently written. He feels it would lead o potentially unsound developments. In particular, he stated that it could result in the State obligation to bail out any project in order to keep the State's credit rating. He suggested altneratives and a list of amendments.

Mary Lou Meiners, Division of Elections presented a formula for consideration in the bill which would govern the number of signatures required for calling for an election to establish an authority.

Dan Casey, Department of Transportation testified that the Administration supports the concept, but needs more time to study the bill. He recommended that the bill not be held in the Committee.

Terry Elder, Department of Commerce and Economic Development voiced the same concerns as Dan Casey.

Senator Mulcahy moved and asked unanimous consent that committee substitute for SB 151, including proposed amendments, be passed from committee with individual recommendations. There were no objections. He then moved that the letter of intent be moved from committee. There were no objections.

Meeting adjourned 3:45 p.m.

SB 151 - An Act relating to Regional Resource Development Authorities

SB 151 sets up a procedure for establishing a regional resource authority which could finance infrastructure such as roads, pipelines and ports for resource development projects. These resource development authorities would be created with approval of voters in the regional education attendance area, and be run by an 8-member board of elected and appointed members.

A draft committee substitute containing amendments worked out by the mineral companies involved in development in northwest Alaska who may be affected by this legislation was also discussed.

Terry Elder, State of Alaska, Department of Commerce testified that the Administration has not yet taken a position on the bill. He emphasized that all Departments should have input into this decision.

Don Argetsinger, NANA corporation, testified regarding the need for transportation in the area where the Red Dog Mine project is located. Other topics discussed were the development of local government, creating a much needed tax base, and the relationship between NANA and the Authority. He stated that NANA preferred the draft committee substitute.

Senator Fischer moved that CS 151 be placed before the committee. There were no objections.

Hank Giergerich, Manager of COMINCO discussed the Red Dog Mine project including financing, mining investment costs in contrast to oil investment cost, similarities to projects in Canada and the key role of transportation to project success.

Eric Wohlforth, attorney for COMINCO discussed the changes in draft committee substitute from the original bill including terms and number of members on the board, and access to facilities. He stressed that a government entity is not being formed. Discussion followed regarding indebtedness, bonding, powers of the authority, constitutionality, the legislature's ability to repeal, the effect on state obligations and bond rating and creation of different entities vis a vis local governments.

Harris Saxon, Ely, Guess and Rudd Law firm representing GCO Minerals testified that he was particularly interested in the guaranteed equal access to facilities. He further discussed support for the committee substitute to development of minerals in Northwest Alaska.

Russ Babcock, Bear Creek Mining Company, testified in general support of SB 151.

Mary Lou Meiners, State of Alaska, Division of Elections testified that two special elections would be necessary. The fiscal note submitted to the Resource Committee details cost of one special election in an REAA District. Should this legislation pass, she suggested that elections be consolidated if possible.

Senator Mulcahy voiced an interest in whether or not 50 signatures on a petition is overly lenient to call for a special election.

Senator Sturgulewski expressed her general opposition to the creation of new authorities that may duplicate or conflict with other state and local gobernment functions.

Senator Vic Fischer expressed concern over the possible proliferation of regional authorities and inquired as to the impacts on established authorities should the authoirizing legislation be sunsetted.

Meeting adjourned at 5:35 p.m.

REGIONAL RESOURCE DEVELOPMENT AUTHORITIES: ISSUES AND PROBLEMS

INTRODUCTION

Senate Bill 151 allows the creation of 21 Regional Resource Development Authorities in Alaska, with full powers to issue revenue bonds for mining roads and ports. This bill would immediately benefit the development of the proposed Red Dog mine in northwest Alaska. But the larger issue is whether the state needs to create a new form of government in the unorganized borough which can issue unlimited amounts of tax exempt revenue bonds.

TAX EXEMPT BONDS

Bonds are usually tax exempt when they are issued by a state or local government (or an agent of a state or local government) and are used for a public purpose. Because the interest on these bonds is exempt from federal taxes, they are popular with investors, and hence have lower interest rates. General Obligation Bonds require approval by the voters and are usually paid off by taxes or any other state revenues. Revenue bonds should pay for themselves, out of the revenues from the project that was financed by the bonds, in this case a "toll" on mining developments and roads. Since these bonds are supposed to be paid off through user fees, they do not require voter approval. 85% of Alaska's $8.5 billion debt was incurred by revenue bonds--in other words, without voter approval.

After RRDA's are established by local elections, they can issue tax exempt revenue bonds for roads and harbor development. The issuing of these bonds does not require either state approval or voter approval, according to the current committee bill. Because the interest rates on these bonds would be lower than the rates for bonds issued by private corporations, they could encourage mining development that might not otherwise be possible. The effect is marginal, as the current difference in interest rates is about 3%, but the mining companies insist that this advantage is essential for profitability.

PAYING OFF REVENUE BONDS

The tolls form the roads and port facilities normally would pay the interest and principle due on the bonds. If the mining company fails to pay the tolls and charges required to pay for the road, the authority will be able to take legal action against the mining company. If, however, there is a deep slump in mineral prices, the mining company may go bankrupt, and the authority will have no way to pay off the bonds--except by going back to the state of Alaska and asking for more money.

Under SB 151, the state of Alaska has no legal obligation to help authoriities in trouble. As a practical matter, however, the state must come to the rescue, or suffer the consequences of having the reputation of Alaska's bonds all being suspect. This is a problem common to all state authorities. An article in the Sunday, March 20, edition of the Anchorage Times, "'Separate' Agencies Rely on State Backup" investigated this problem. Harold Kuplesky, of the Bankers Trust Company, authorized a $50 million line of credit to the Alaska Power Authority. The Times reported:

> Harold Kuplesky isn't worried. Why? "As a backup, we have the state of Alaska standing behind the project." And if Tyee isn't finished and the state refuses to pay off the loan? "The market looks very dimly on people who do not honor their obligations," Kuplesky replied.
>
> Kuplesky then illustrated his point. "A good example is the New York Urban Development Authority," he said. "They defaulted, and we shut off the credit to the state of New York."
>
> "What happened? "The Legislature came up with the money, and fairly quickly, too."

THE BABY ELEPHANT PHENOMENON

A report to the Legislative Budget and Audit Committee, "Alaska's Public Corporations," by the Institute of Public Administration (Jan. 1982) described this situation in more vivid terms on page 48:

> History has shown very clearly that unless state governments become involved in any bail out arrangements for their corporate subsidiaries, state credit will be damaged if not cut off by bond market participants. Market analysts call this the 'baby elephant phenonmenon' The elephant (the indebted corporation in trouble) stumbles up on the state's front porch and says, "feed me or I'll fall down dead on your doorstep."

OTHER STATE SUBSIDIES

In Senate Bill 151, elections for Regional Resource Development Authorities will be paid for by the state. The operating expenses for the authorities are not specifically provided for. The door is left open for gifts, grants, loans, and payments for contracts from the state, as well as from individuals, private organizations, municipal governments and the federal government.

LOCAL CONTROL

One of the attractive points of SB 151 is that it provides for a measure of local control of road and port development. The RRDA's will be governed by a board of eight members. Five are elected by voters in the region (a region has the same boundaries as one of the regional educational attendance areas) and three are appointed by the governor. The authority has been likened to a single purpose local government. It is established to build roads and ports, but it does not have powers of land use planning, zoning, permitting, or taxation. The bond issues are approved by the Board, but are not voted on by the members of the region.

Adevelopment authority may be succeeded by a first or second class borough. If an authority fails and goes bankrupt, the subsequent formation of a borough may be complicated or prevented by the legal and financial wreckage of the authority.

ALTERNATIVES TO REGIONAL RESOURCE DEVELOPMENT AUTHORITIES

There are several alternatives to RRDA's which provide tax exempt bonding and local control, without risking the state's credit rating.

1. One alternative is to form a new borough in the area(s) that wants to develop roads and ports. The revenue bonds would be issued by the borough or an intramentality of the borough, as was done in Valdez. Because the borough has powers of planning, zoning, and permitting, greater local control is possible than with RRDA's.

2. Another alternative is to modify the Alaska Industrial Development Authority statutes so that they can fund larger projects, and fund roads projects. (Ports are already included.) Local control language is already in place for local governments; it could be extended to include rural areas.

3. Finally, tax free revenue bonds could be issued by the Department of Transportation. This technique is already used for airport construction. With this approach, areawide transportation planning is encouraged, and the chaos of 21 spearate transportation authorities is avoided. Additional statuatory provisions for local review of state projects would be needed.

The Anchorage Times

Editorials

Roads to resources

THE STATE could get itself into another hornet's nest if the legislature approves a measure to create regional resource-development authorities.

These authorities, which would issue revenue bonds for new roads, ports and other transportation facilities needed for resource development, smack too much of the rural education attendance areas.

A few of those education units are notorious for not spending their money within established guidelines.

Fortunately, the Senate Finance Committee has held off approving the bill to create the authorities.

THOSE RURAL education areas have enough autonomy that they can get away with all sorts of foolishness. Some of them have tended to spend massive amounts for travel that cannot be justified. A number of them have failed to carry out orders to spend at least 55 percent of their budgets for classroom instruction. Still others have had more dollars left over at the end of the year than the law allows.

The proposed regional resource development authorities would have the power to issue revenue bonds and to use bond income to construct roads. The engineering and building of roads is no small matter. Large amounts of money would be handled to effect the purchase of rights of way, the engineering and the actual construction.

Under the bill, as many as 21 addtional quasi-government units could be formed. Citizens of those rural education attendance areas would be able to vote whether or not to create one of the aurhorities.

THERE ARE a number of questions that need answers before the legislature gives this measure further serious consideration.

Controls are needed because the state likely would be left holding the bag if the authorities defaulted on paybacks. And there must be a firm plan for accountability, which has not been the case with the rural education districts.

There are areas of the state which do need roads and transportation facilities in order to facilitate the extraction the resources. These resources are the key to Alaska's future.

But the state already has established channels to build transportation facilities.

Alaska has learned the hard way that local autonomy is not always the best way to go.

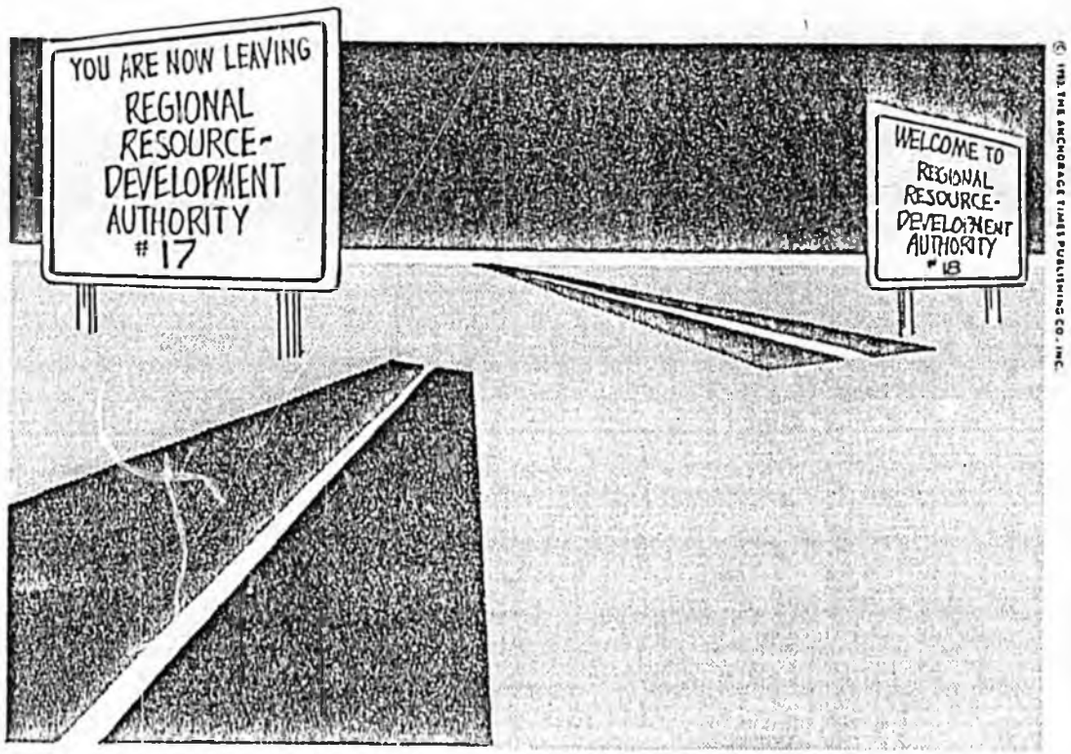
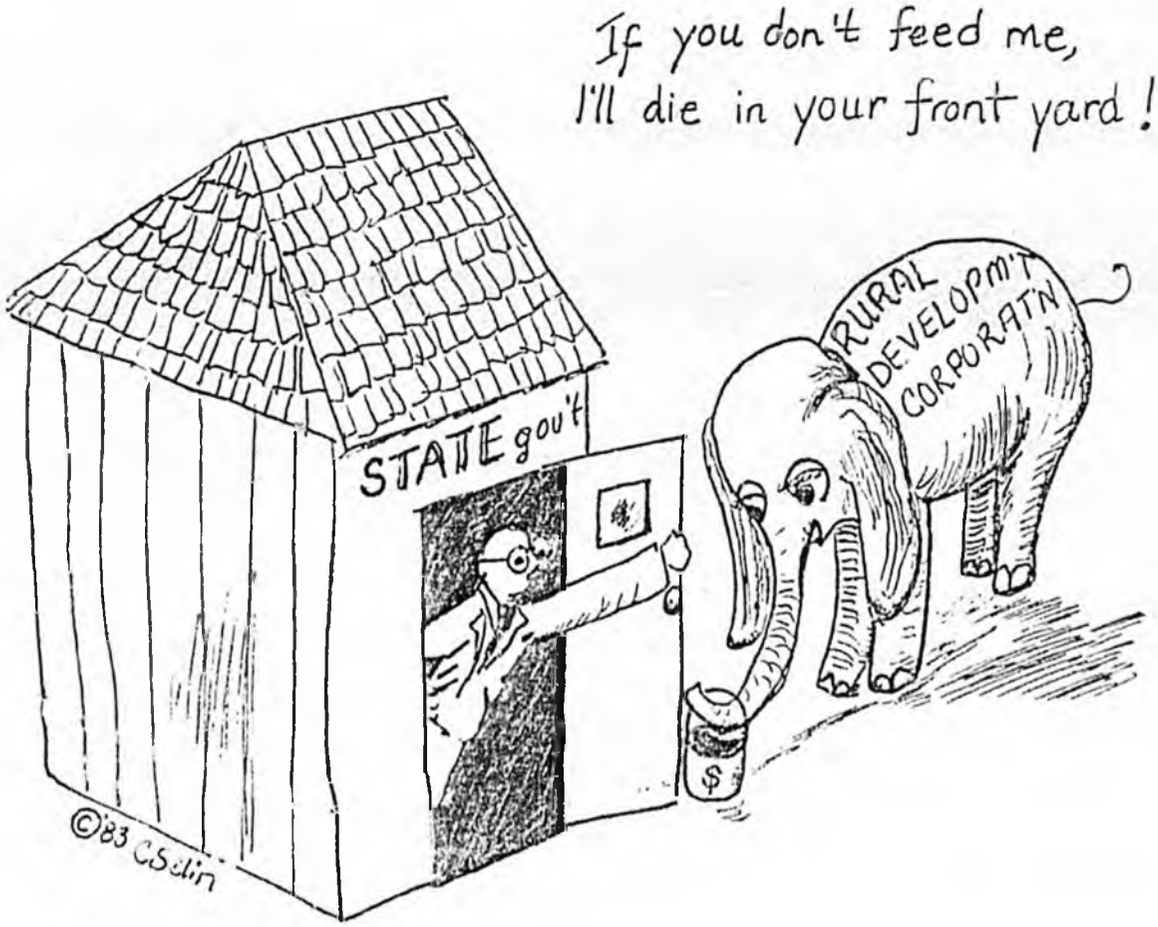
ALASKA FEVER





THE BABY ELEPHANT PHENOMENON

ALASKA ENVIRONMENTAL LOBBY

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT
POSITION PAPER

The economic development goal of SB 151 and of the Administration's alternative is the same. Both vehicles would create a financing structure for transportation facilities which would shift the bonded indebtedness from a private balance sheet to a public balance sheet. The reduced capital investment by the developer would increase its return on investment and enhance the economic feasibility of the project. It is clearly in any developer's interest to do this, and may be in the State's interest if that is what it takes to promote a specific project.

The implications of such a debt shift from a private to a public balance sheet require careful consideration. If a project can support the debt service, there is no problem. If the revenue stream is reduced or eliminated for some reason, then the location of the debt is important. There is no legal liability of the State to prevent default of bonds issued by the SB 151 authorities or by the AIDA alternative. If a capital reserve fund in AIDA is funded with State funds, then there is a moral obligation of the State. However, it is legitimate to ask whether the State could allow the default of either an authority or of AIDA. In that respect, there is little difference between the proposals. It is not a reason to oppose either proposal, but it is a reason to be certain that bonding decisions are made carefully.

While the development goals of the two proposals are similar, there are certain strengths in the AIDA approach. First, the need for transportation facilities is a statewide need and AIDA is a statewide authority. Second, AIDA is a recognized name in the investment community; it already exists, and has a professional staff, investment advisor, and bond counsel. Utilizing AIDA simply requires granting it the power to finance and own transportation facilities. Third, use of the six economic regions rather than regional education attendance areas reduces the potential coordination problems that could result when a project spans more than one REAA. Finally, there would be only one bonding authority to finance any project.

The AIDA alternative differs from SB 151 in the method of local involvement. The alternatives allow for local participation via six Regional Development Advisory Councils, appointed by the Governor. The six regions are recognized by the U.S. Department of Labor, and economic data have been collected according to these regions for several years. Local involvement is accomplished in several ways. First, AIDA must obtain the approval of an affected council prior to development of a project, and the council must hold public hearings at three locations in the region. Second, if the council approves the project, two members of the council may serve on the board of AIDA in connection with subsequent action by the authority concerning the transportation facility. Finally, the authority must solicit the advice and approval of the council prior to adopting or executing contracts, agreements, resolutions, or other matters concerning the operation and management of the facilities. These provisions provide substantial local participation in the projects.

Who is behind this legislation?

Cominco-Alaska, Inc. and NANA Corporation are partners in developing the Red Dog Mine near Kotzebue and requested this legislation. The Red Dog deposit is generally considered the richest lead and zinc find in the free world.

Cominco-Alaska's parent company, Cominco Limited of Vancouver B.C. is one of the world's largest lead and zinc producers. Cominco has vast experience in mining in the Arctic regions of Canada as well as in Greenland.

The Red Dog mine when operating will employ some 400 people directly. The mine will operate 24 hours a day, seven days a week for 50+ years. Current schedules call for completion of construction of both the mine facility and transportation systems by late 1986.

Other mining companies such as General Crude Oil Minerals and Kennecott have supported the legislation.

Why was the legislation proposed?

Given current law affecting the unorganized borough the proposed regional authority legislation was seen as the best way to achieve:

--tax exempt revenue bond financing (through lower interest rates and longer terms)

--Public ownership of a transportation system and port with equal access to any users (such as other mining projects which might come on line).

--Local input to decision making by the developer.

Why doesn't the NANA region simply form a borough?

The NANA corporation board of directors has set forming a borough government in their area as a priority. During the summer and fall of 1983 the process of beginning the process by formal discussions throughout the region will begin.

To keep the Red Dog project on schedule, the people in the region feel they cannot have the borough government in place soon enough.

HB 377 is seen as an interim neasure to keep the project on schedule until a borough is formed.

The Red Dog mine once operating will bring the regions valuation to a point where a sufficient tax base will exist for borough formation.

What State controls and oversight are contained in HB 377?

1. Authority Formation has to be approved by the Governor.
2. Three of the eight members of the Authority Board of Governors will be selected by the Governor from his cabinet.
3. Any bond sale must have advance approval of the State Bond Committee (the Commissioners of Commerce, Revenue, and Administration).
4. Financial records of the Authority are subject to audit by the Legislative Auditor; records must be established and maintained in a manner approved by the Legislative Auditor.

HOUSE BILL 377

ASSUMPTIONS:

1. An election will be held in one REAA area creating one Regional Resource Development Authority. If the election does not take place at the same time as a regularly scheduled REAA election, there will be a fiscal impact.

2. The above question passes and an election of the initial five member board take place not less than 60 nor more than 90 days after the order of election. There will be a fiscal impact.

3. Subsequent election of members, after the initial members' terms have expired, takes place at the same date as a regularly scheduled REAA election. Only the Contractual Services category will be affected and is figured at 6% inflation.

4. This analysis is computed for an election of an RRDA and board members for one REAA area. If there should be elections in all 21 REAA areas, multiply $20.6 x 21 to compute the fiscal impact. (432.6)

SB 151 - Regional Resource Development Authorities

PROPOSED AMENDMENT #1

Page 6, line 27

After "person", delete ";" and add ", provided that state grants, appropriations, or other transfers from the state may not be used to satisfy bond obligations or otherwise establish collateral or security for bonds issued by the authority."

Rational:

This would not alter the stated purpose of amendment #1 by the Alaska Environmental Lobby i.e. to preclude state contribution towards bond payments. The original amendment, however, proposed by the environmental group seeks to prevent the state from ever assisting directly in any way with the project.

Fiscal Note HESS + Analysis re introduced bills)

IV. ANALYSIS

A. Assumptions:

Passage of this Bill would require licensing representatives to provide technical assistance during the planning stages, as well as to inspect the facilities and coordinate with the State Fire Marshal and Sanitation inspectors in order to issue a license. These functions would be performed by existing staff. Without knowing the number of buildings which would be constructed, expanded or renovated, the assumption is made that it would be no more than 10 buildings a year. Licensing staff in some parts of the State are already carrying a higher than acceptable caseload. If the estimated number of buildings falling under this Bill is higher than 10, the Department would need to consider submitting a revised fiscal note to address the additional work load.

B. Program Summary:

No new positions or other costs are anticipated at this time.

C. Computations:

None

D. Economic Impact:

Enactment of this Bill is expected to have positive fiscal impact. Mr. Seuffert's study of day care states that national economists accept that each dollar changes hands eight times in twelve months; so any dollars spent on day care will circulate within the State eight times. In addition, successful programs like this help in retaining employees who require child care services, and will help university students improve their skills for later employment.

E. Impact on Local Governments:

It is anticipated there will be no fiscal impact on local governments.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 247
PAGE 1

The Department of Health and Social Services supports Senate Bill No. 247 which provides that whenever construction, expansion or major renovation of a state building occurs, there shall be consideration of the need to include plans for a child care center. This Bill impacts a number of Departments within State government: the department which is planning the construction or renovation; the Department of Labor; the Department of Community and Regional Affairs; and the Department of Health and Social Services.

The Department of Health and Social Services is impacted in that it has the responsibility to license all child care facilities. It will be important that the Department be consulted early in the planning process to ensure that any child care center meets all applicable licensing requirements including fire safety, sanitation, staffing and program requirements. These requirements should be met before a center begins operation. The responsibility to provide technical assistance to new programs is already within the scope of the Department's responsibilities and activities.

A recent publication by the Senate Advisory Council Day Care in Alaska: A Status Report by Frank W. Seuffert, speaks to the need for day care services in Alaska. Mr. Seuffert quotes a federal study which reported that in 9, 52% of American women were working; and over six million children were in some form of full or part-time day care. By 1990, 66% of all two-parent families are projected to have both parents in the work force; and over half of all mothers with children under the age of six will be working regularly. Alaska Department of Labor statistics indicate that in 1980 there were 45,905 children under the age of six; and, of these, 7,684 children lived in single parent households. Mr. Seuffert concludes that young couples in Alaska usually require two incomes to achieve a moderate standard of living. Added to the single parent households, and the scarcity of extended family members to help with child care, he feels the need for day care services in Alaska is greater than it is nationally.

Since this Bill envisions that private child care providers would contract to operate the child care centers created as a result of this Bill, the Department assumes the cost for the programs would be covered through fees to parents as well as current funding sources for day care, through the Department of Community and Regional Affairs.

H2SS Position Paper

In conclusion, the Department of Health and Social Services supports Senate Bill No. 247. The Bill incorporates good planning requirements and will help fill the need for child care services for the many Alaskan families with young children who must find day care while they work.

RE: SB 247, An Act Relating To Child-Care Centers in State Buildings

DATE: May 25, 1983

SENATE BILL 247

SB 247 provides that space for child care centers shall be incorporated in the design of state office buildings under construction, expansion or major renovation, if the need for such service is determined. It is the intent of this legislation that a provider will lease the space and that the parent will pay for the child care services.

The Departments of Labor and Community and Regional Affairs are responsible for conducting a needs assessment based on the child care requirements of the employees working in the building and neighboring buildings, and the availability of licensed child care centers conveniently located. For buildings associated with state universities a needs assessment of the students attending classes or other activities on campus will also be conducted.

If it is determined that there is a need for child care facilities within the building under consideration, the person or agency responsible for assigning or leasing the space in the building, in consultation with the Department of Community and Regional Affairs, will contract with a private child care service provider for the operation of the center.

All state licensing requirements must be met by the provider. State child care subsidies will be available for eligible providers and parents. This legislation limits the number of children that may be accommodated in a center. Not less than 40 nor more than 60 children will be provided services in the center. According to Lari, Child Care Coordinator for the Division of Employment Oppurtunity, C&RA, 40

children is the minimum number necessary for a center to operate economically. It is her conclusion that more than 60 children in one facility is not manageable nor conducive to a quality environment for children.

The use of the child care center is to be made available for the public as well as the employees in the building and surrounding buildings. It will be necessary to establish certain priorities for the use of the facility since the purpose of on-site child care is to provide services for children with parents working in the same building.

While the plans of the center should incorporate the needs of the children and the provider, this space should be so designed as to be utilized for alternate purposes in the event that there is a decreased need. Outdoor playground facilities will also be needed. It would be economical to locate the center in close proximity to a public park or playground.

PRIVATE ON-SITE CHILD CARE CENTERS

On-site child care facilities in national corporations have increased productivity, reduced absentism and tardiness, and are an effective recruiting tool.

Intermedics, Inc., reported that during the first two years of its child care center's operation, turnover decreased 60% and several thousand of hours normally lost to absenteeism became productive.[1] According to Steve Neuville, Executive Vice President of Neuvill-Mobil-Sox, Inc., this benefit has been a very effective recriuting aid and a financial reward for the employer. The center at Neuvill-Mobile-Sox is credited with reducing employee turnover and absentism.[2]

Other reasons given for providing child care include the ability to remain competitive, attract and hold top quality people, and provide working conditions that foster high morale and productivity.[3]

Among the corporations outside of Alaska offering on-site child care for their employees are Zale Corporation, Wang Laboratories, Corning Industries, Neuvill-Mobil-Sox Inc., Texas Instruments, Playboy Resorts, Stride-Rite, Intermedics Inc., Connecticut General Life Insurance, Welch Foods, Whirlpool and Emperor Clock Company.[4]

Anchorage businesses are beginning to provide these facilities. Nerland's Furniture Store and Werner Travel presently provide this service. Providence Hospital plans to open a day care center for the use of its 1,400 employees in 1984. Nordstrom's Department Store is in the process of determining the need and feasibility for an on-site facility.

PUBLIC ON-SITE CHILD CARE: NEW YORK STATE

Public on-site child care has been equally successful in increasing productivity and reducing absenteeism. The state of New York opened its first on-site child care facility, The Children's Place, in 1979. Following the success of this first center the state opened eleven more on-site child care centers throughout New York for its employees.

According to its first director, Deborah Long-Miller, the Children's Place was the product of union negotiations begun more than ten years ago. The State made a pledge to provide child care for its employees. A nonprofit corporation was established to open and operate child care centers at state facilities.[5]

Space, renovation and maintenance was provided by the state. Start up funds came from a Federal Health, Education and Welfare Research and Development Grant. Parents pay for all operating cost based on a sliding scale fee. State employees receive priority for the center's space, but the public also has access to the center. The Children's Place utilizes public parks and playgrounds located near the center.

Welfare Research, Inc., evaluated The Children's Place and released the following information in June 1980:

> Seventy-three percent of parent's reporting reduced absenteeism were State employees.
>
> Forty-seven percent of respondents indicated improved work productivity.
>
> Forty-five percent of women responding said the center enabled them to keep working, take jobs or return to work sooner.
>
> Sixty-two percent would have child care problems without the Children's Place.
>
> Eighty-three percent worry less about their child.[6]

State employees and the State of New York agree that this service has been successful and a benefit to all.[7]

THE BENEFIT FOR ON-SITE CHILD CARE IN ALASKA STATE BUILDINGS

In FY83, the state of Alaska had 18,495.9 full-time equivalent employees.[8] As of March 1983, 44.7% of the Executive Branch, 58.9% of the Legislative Branch, and 75.2% of the Juditial Branch were female employees.[9] Forty-eight percent of the University of Alaska employees were women as of December 1982.[10] These percentages do not include part-time or temporary employees.

It is unknown at this time how many of these employees have children, however the 1980 census shows that:

In 1980 the median age of the state population was 26.1.[11]

70% of the state population was under 35 years of age.[12]

26.2% of the state's population were woman of childbearing age (15-44 years of age).[13]

Alaska ranked second in the national birth rate, with 22.5 births per 1,000 people. The national average was 15.6 births per 1,000 people.[14]

There were 65,038 households in Alaska with persons under 18 years of age. Of this number there were 11,766 single parent households.[15]

In Alaska the number of mothers in the work force with children under the age of 6 years totaled 14,815.[16]

It can be assumed chat female state employees share similar characteristics with the general population. It therefore can be expected that a high porportion of female state employees are young working mothers.

Since on-site child care has proven beneficial to employers and employees in the private and public sector, it would be constructive for the State of Alaska to investigate the feasibility for child care centers in future construction and renovation of state buildings.

Building Costs-
Office & Day Care

Donn Ketner called this afternoon with the cost info you requested, as follows:

Class A Office Space (certain code, access, finish, parking requirements)

1. Leasing

ANC $175 to $200/S.F.
FAI $200 to $225/S.F.
JNU $215 to $250/S.F.

2. New Construction

ANC $100 to $120/S.F.
FAI $106 to $127/S.F. (ANC + 6%)
JNU $102 to $122/S.F. (ANC + 2%)

Child care facilities, however, are in the "institutional" classification and must meet more stringent requirements than office space. These include first floor location, separation from office spaces, access and fire protection demands, and considerably different requirements for plumbing, mechanical equipment, etc. The conversion of existing office or other spaces to child care facilities is not readily accomplished, and it can involve tremendous costs. New Construction costs area estimated as follows:

Child Care Facility

1. New Construction under Davis-Bacon

ANC $170/S.F.
FAI $180/S.F. (ANC + 6%)
JNU $173/S.F. (ANC + 2%)

2. New Construction not under Davis-Bacon

ANC $150/S.F.
FAI $159/S.F.
JNU $153/S.F.

This does not include furnishings cost.

The above data is not valid for equating price differences to arrive at renovation costs, as discussed above. These figures are only for comparing new construction with new construction. For renovation costs, the specific facility would have to be evaluated.

If you have any further questions, call Donn at 266-1535.

cc: Donn Ketner

Staffing Requirements

(2) more than a total of 10 children under age 12, including children related to the caregiver.

(d) In a day care center, the ratios of caregivers to children must be maintained at all times as follows:

(1) no newborn children may receive care in a day care center;

(2) there must be one caregiver for every five children between the ages of six weeks and 24 months;

(3) there must be one caregiver for every 10 children between their second and sixth birthdays;

(4) for school children aged six to 10 years, there must be one caregiver for every 15 children;

(5) for school children aged 10 – 14 years, there must be one caregiver for every 20 children.

(e) In a day care center where there are more than 10 children present, there must be a minimum of two caregivers on the premises.

(f) In a day care center, only caregivers who spend at least 75 percent of their working time providing direct care for children will be counted in meeting staff-to-child ratios. (Eff. 4/4/62, Reg. 5; am 2/3/77, Reg. 61)

Authority: AS 47.35.030

7 AAC 50.220. PHYSICAL PLANT. Repealed. (Eff. 2/3/77, Reg. 61)

7 AAC 50.230. EQUIPMENT. Repealed. (Eff. 2/3/77, Reg. 61)

7 AAC 50.240. GENERAL PROGRAM. (a) The program conducted in a day care facility must provide planned experiences which promote the individual child's physical, emotional, social, and intellectual growth and a positive identity. Satisfactory compliance with this subsection requires that

(1) caregivers generally follow a written schedule of daily activities which provide a balance of [illegible] activities and [illegible] snacks, [illegible] individual [illegible] however, the [illegible] facilities need [illegible]

(2) opportunities [illegible] self-expression [illegible] and creative [illegible]

(3) opportunities [illegible] physical activities [illegible] and for [illegible] taking into [illegible]

(4) opportunities [illegible] to participate [illegible] putting away [illegible] clothing and [illegible]

(5) opportunities [illegible] and social development [illegible] of games, toys, [illegible] crayons, paint [illegible] materials;

(6) opportunities [illegible] activities as [illegible] weather permits; [illegible] awareness beyond [illegible]

(7) caregivers [illegible] punishment [illegible] by the parent of the [illegible] any other [illegible] shaming, [illegible] child;

(8) the amount [illegible] equipment available [illegible] use are appropriate [illegible] of the children [illegible]

(A) the [illegible] equipment [illegible] competition and [illegible] meet criteria [illegible] (3), and (5) of this [illegible]

(B) [illegible] to each child [illegible] belongings.

(C) furniture and equipment is durable and safe and that in day care centers it is of child size or appropriately adapted for children's use.

(b) Where newborns, infants, and toddlers are in care, compliance with the criteria in subsection (a) must be appropriate to their developmental stage. In addition

(1) separate sleeping space must be provided for infants and toddlers in day care centers; a play or crawl area exclusive of crib space must be provided for their use; and provisions must be made to ensure that they are not endangered by the active play of older children;

(2) these children may not be routinely left in a crib without direct adult contact for long periods of time while awake (e.g., typically not more than 45 minutes);

(3) infants and toddlers must be allowed, under supervision, some opportunities during the day when they can explore and learn on their own;

(4) there must be toys and materials available for their use which provide opportunities for the child to learn through seeing, feeling, hearing, smelling, and tasting;

(5) there must be frequent verbal communication between caregivers and these children; and

(6) there must be physical stimulation through being held and rocked and played with as well as through being dressed, bathed, and carried. (Eff. 4/4/62, Reg. 5; am 2/3/77, Reg. 61)

Authority: AS 47.35.030

7 AAC 50.242. ENVIRONMENT REQUIREMENTS. (a) Each day care center must have sufficient indoor and outdoor space in relation to the number and ages of children in care to accommodate the physical and other developmental needs of children served. Satisfactory compliance with this subsection requires that

(1) there be at least 35 square feet of indoor space per child capacity used for the care of children, exclusive of hallways. bathrooms; lockers, closets, laundry and furnace rooms, and the kitchen;

(2) there be at least 75 square feet per child of outdoor play space for the maximum number of children on the playground at any one time; where outdoor play space is not available at the facility, parks or other outdoor facilities that are easily accessible may be used.

(b) Each day care center must have appropriate storage and work space areas convenient to the area of use. (Eff. 2/3/77, Reg. 61)

Authority: AS 47.35.030

7 AAC 50.245. FIRE SAFETY. (a) The building housing a day care center must meet the standards for buildings and life safety contained in 13 AAC 50.010 – 13 AAC 50.030 and 13 AAC 55.010 – 13 AAC 55.150.

(b) When the division receives a license application from a day care center and when new construction or remodeling is completed, a fire inspection of the premises must be made by the fire marshal or his local designee to determine conformity with existing safety standards. Subsequent annual fire inspections might be required.

(c) Family day care homes must be free of fire hazards. They must have

(1) at least one five-pound ABC dry-chemical fire extinguisher or an AC primary power or monitored battery powered smoke-detection device;

(2) two exits remote from each other that are usable year round, one of which may be a window which can be opened;

(3) at least one usable exit directly to the outside at street level where a basement is utilized;

(4) a restriction limiting occupancy to the main floor, daylight basement, or second floor of the building, when more than two children under age five are in care;

(5) at least one exit leading directly to the

MEMORANDUM

TO: Senate Finance Committee

FROM: Senator Jan Faiks

RE: Senate Bill 247

DATE: February 20, 1984

Section 1. Establishing quality child care is a legitimate interest of the State. In order to facilitate this goal, facilities will be established near the workplace and on campuses of the University of Alaska and the community colleges. The Legislature would like to encourage private employers to do likewise.

Section 2. Plans for construction, expansion, or renovation of a state building shall include plans for a child care facility to accommodate 40-60 children. A needs assessment shall be made and shall include the child care needs of public and private employers in the building and in the neighboring area, child care needs of students, and the availability of other child care centers in the neighborhood. The child care center shall be operated by a private concern. The child care center shall be open to the public.

Section 3. Effective date.

FACTS AND ISSUES RELATING TO ON-SITE DAY CARE IN ALASKA STATE OFFICE BUILDINGS

On women in the labor force:

According to U.S. Census Bureau data from the 1980 census, the participation rate of Alaskan women in the work force has increased 100% since 1970.

---70% of all Alaskan women age 16 years and older are working.

---56% of all Alaskan women with children are working.

---47% of all Alaskan women with children under the age of 6 are working.

On current availability of licensed day care in Alaska:

House Research Agency Report 81-207, completed in February, 1982, contains these facts on the availability of licensed day care in Alaska:

---In 1982, licensed day care capacity statewide, including licensed day care homes, was 6,507.

---Of 33 centers surveyed in ten communities, 16 centers (48%) were filled to capacity, and 12 of these had waiting lists.

---Centers with the longest waiting lists were in Anchorage, Fairbanks, and Juneau. (Note that these are areas with large concentrations of state workers.)

---Infant care appeared to be less readily available than day care for children two years and older.

On current need for licensed day care in Alaska:

Alaska Dept. of Labor, Research and Analysis Section, estimates that in 1982:

---There were 51,000 children under the age of 6 living in the state.

---8,200 of these children live in single-parent households.

This means that licensed day care is available for only <u>one out of eight</u> Alaskan children under the age of six.

From these facts, several conclusions can be made:

---There is a critical need in Alaska for additional licensed day care facilities, and particularly for infant care.

---That the need for such facilities is most pressing in Anchorage, Fairbanks, and Juneau (in that order).

---That because there are large concentrations of state employees in these areas, the state—as employer--has an obligation to address the needs of its employees in the area of child care.

---In addition to its role as employer, the state also has an obligation to provide for the health, education, and welfare of its citizens and for the poor in particular.

All of us who live in this state have an interest in, and a responsibility to, the children of Alaska. Without them, Alaska <u>has</u> no future.

The advantages of on-site day care:

---Employees have greater peace of mind at work and are more productive, knowing that their children are nearby and that they could respond immediately in the event of emergency. This is particularly important for parents of infants and/or children with chronic health problems.

---Mothers who are breast-feeding can return to work from maternity leave sooner.

---The benefits to the state would be many. Employers with on-site day care consistently report increased ability to recruit and train skilled workers, alleviation of scheduling problems, and reduced job turnover rates.

A major study done by Control Data Corporation showed that in their on-site center, over a 24-month period, the average monthly turnover rate for mothers using the center was 1.70%, while for all other females in the same job classes, the average monthly turnover rate was 5.47%. The study also showed less absenteeism and improved job performance by mothers using the center.

The situation as it now exists:

---With present day care arrangements, families live under the strain of complicated schedules to pick up and drop off children. This situation becomes even more of a burden when there are children who go to day care and public school, or when parents work at different locations and there is a single family car. For parents who must rely on public transportation, it is even worse, particularly in harsh weather.

---In addition, with the present arrangements, children spend little time with their parents, with such time occurring only at the end of long, busy days when both children and parents are tired. Some parents counter this by spending all their weekend and holiday time with their children, rather than socializing with adults, participating in the civic affairs of the community, or engaging in other adult growth experiences.

---Such parents often have little or no time to themselves, an important factor in working out the domestic tensions that arise in even the healthiest of relationships. Marital tensions and, in the case of low-income families, economic pressure are known to contrribute to divorce, domestic violence, child abuse and neglect, alcoholism and substance abuse, and suicide.

* * * * * *

In the past, opponents of child care legislation have based their arguments largely on the premise that women should stay home and take care of their own children. This argument carries little weight in 1983, when most women have passed the point where they have a choice about working. The structure and lifestyle of the Alaskan family has changed dramatically, and much of that change has come out of economic necessity.

Testimony given at a Joint U.S. Senate Hearing in 1975 summarizes the situation eloquently:

"Women will go on working regardless of what actions are taken by this Congress. The lack of access to quality child care will not eliminate the economic necessity of supporting one's family. Rather, failure to provide quality child care to those who need it will simply force families to settle for custodial child care. And it will be the children who will suffer as the result of this ostrich-like approach. The problem will not go away by ignoring it. It is not a question of encouraging women to leave home. Rather, women working and leaving home are

facts which exist and will continue to exist in spite of rising unemployment and in spite of decreased family size."

Unless it becomes possible for Alaskan parents to manage work and family life without undue strain for themselves and their children, our state will suffer a significant productivity loss in the labor market and the economy, and perhaps even a more important loss in terms of the quality of family life experienced by current and future generations.

With this in mind, the legislature is asked to give favorable consideration to this bill, which provides for the construction of day care facilities in new state office buildings and major renovations of existing buildings where a demonstrated need for such facilities exists.

There is a national trend toward on-site day care, and there are many precedents for government participation in areas where there are high concentrations of government employees. A comprehensive report done in 1976 by the Nevada State Department of Human Resources discusses the successful on-site centers operated at the National Institute for Health; the Department of Health, Education, and Welfare; the Social Security Administration; the Department of Agriculture, and the N.A.S.A. Goddard Child Development Centers. This report also states that onsite centers are operating at hundreds of hospitals, colleges, and universities. In the private sector, the Stride Rite Corporation, Wang Laboratories, Control Data Corp., and Hewlett-Packard are just a few employers who provide this valuable service.

Historically, society has addressed problems only after severe damage has been done, at enormous social and economic costs. The need for additional day care facilities in Alaska has already passed the critical stage, and grows worse each year. The legislature is therefore asked to consider the well-being of Alaskan children a top priority for 1983.

POSITION PAPER

RE: SB 247

SPONSOR: Senator Fahrenkamp

Program Effects:

This bill would require that in the construction, renovation or expansion of State buildings that the needs for child care be assessed. Should a need exist, licensable space will be designed into the facility. The child care facility would be open to the public.

Comments:

The Department supports the concept of onsite child care centers in State facilities.

Child care is one of the fastest growing small service industries in the State. But, even with this rapid growth, supply has not kept pace with demand. The demand is caused by both economic and social needs. The Alaska Department of Labor revealed that in 1981, 66 percent of the women in Alaska over 16 years of age were active in the labor market. Of the mothers who have children under 6 years of age, 50 percent are employed outside the home. The availability of quality, convenient child care provides for entry of more women, especially single heads of households, into the work force.

Nationally and in Alaska, employer-sponsored onsite child care is becoming an increasingly popular employee benefit. New federal tax laws and IRS clarifications have also made this a more attractive option for employers. As one of the major employers in Alaska, the State would be joining some private employers and providing a model for others in the field of onsite child care.

The Department does have a few concerns with regard to procedures outlined in the bill. We are concerned that the needs assessment required from Department of Labor and DCRA not delay design or construction schedules. Through regulation, specific timelines and clear delineation of responsibilities must be outlined.

Specifically with regard to the needs assessment, DCRA will be responsible for satisfying in a timely manner the requirements for Section 35.10.021, b, 3, "determining the availability of licensed child care centers located within a convenient distance from the building."

With regard to subsection C, the Department will seek a child care consultant or Department employee knowledgeable in this area to work with the person or agency responsible for assigning or leasing space. Through regulation, criteria for a qualified contractor should be identified. We are particularly concerned that the lowest bidder not be the only criteria used in determining the contract award.

In conclusion, there is a growing need for child care in Alaska. The State of Alaska as a major employer, can act as a model for other employers in providing a service that will hold individuals, particularly women, in the work force. Senate Bill 247 can begin to address these multiple needs.

Parents and employers: New partners in child care

RENEE Y. MAGID

MOTHERHOOD AND APPLE PIE still rate highly in contemporary society. For proof, visit the Fox Chase Medical Center in Philadelphia where both mothers and fathers may be seen snacking with young children at the newly established child care center.

The Fox Chase Medical Center is a multi-institutional campus, shared by closely cooperating institutions. The Medical Center consists of the Fox Chase Cancer Center, Institute for Cancer Research, American Oncologic Hospital, Jeanes Hospital, and Friends Hall. All the institutions are involved in one phase or another with health care delivery and biomedical research. Indeed, it may be that this cooperation among these institutions was among the significant factors which helped to foster accept-

BOON TO WORKING PARENTS: *Fox Chase Day Care center (opposite page photo) provides worry-free convenience to parents employed at the Medical Center. At right, medical professional takes time to admire Christmas tree with her child.*

FOX CHASE DAY CARE CENTER

ance of the child care center at Fox Chase.

The concept of an employer-sponsored child care center for the children of all employees of the medical center was formulated over several years; a period which clearly marked a greater public awareness of the evolving roles of women at the workplace. According to Mary Dixon, director of personnel and employee relations at Fox Chase, requests to the administration for child care "trickled in" at first. However, soon requests greatly increased, voiced by nurses, physicians, scientists, and virtually all other health and support staff personnel.

Ms. Dixon recalls that one mother, a research scientist dedicated to her work and motherhood, felt that the best way to care for her new baby was to bring the child to work with her until satisfactory arrangements could be made. Because of the constraints of such an arrangement, the need for a child care center, on or near the Fox Chase Medical Center, crystallized.

F. J. McKay, a senior administrator at the Medical Center, summed up the Fox Chase philosophy: "The child care program was a marriage of important employee and institutional needs. In research and health care, the pursuit of excellence is crucial. By responding to employees' child care needs, institutions help themselves by enlarging the pool of available talent. In adminis-

ACTS CHILD DAY CARE AND HEALTH CENTER

WORKPLACE CHILD CARE: *Employers and unions offer 'family security' as a new benefit.*

tration, we can pursue excellence by supporting medical and scientific staff in every way possible."

Thomas Garvey, associate administrator of the medical center, in analyzing the institution and its needs, said that Fox Chase employs 1,800 people, 60 percent of whom are women, who work in all sectors of the center. This includes a large percentage of women who are of childbearing age, as well as single parents and dual career parents. Garvey explained some of the factors considered in analyzing the need for a child care center at Fox Chase.

- Improved ability to recruit high-caliber staff members. The day care program would serve as an attractive fringe benefit, but would also demonstrate the Center's commitment to quality programs and staff well-being.
- Reduced turnover and improved retention. The day care program would enable well-trained staff members, particularly professional women, to remain on the staff. This would in turn contribute to the enlarged pool of available talent, as well as demonstrate actual cost savings from reduced recruiting efforts.
- More effective training. By retaining well-trained staff members, institutions continue to receive the value of prior training, and build on that training to improve the value of staff members to the Center and to themselves.
- Migration of full-time homemakers to the workplace has greatly reduced an available pool of traditional, informal child care providers (neighbors, friends, relatives).
- Local and federal child care programs are losing funding.
- Growth of private child care programs has slowed due to economic factors.
- Competitive posture for nonprofit institutions (as far as direct compensation is concerned) has traditionally been lower than that of profit-making institutions.
- Good fringe benefits have typically been an asset in hiring personnel in the nonprofit sector.

When the idea for the child care project moved through executive management to board-level management, cost effectiveness emerged as a significant factor in validating its adoption. Retirement programs can cost from 8–10 percent of total direct payroll, and basic family dental plans will generally range from 1–1.5 percent of the same payroll base. In contrast, the child care program at Fox Chase is expected to draw .5 percent of direct payroll in first year operating costs, plus approximately .3 percent of payroll for initial seed money. If this program significantly decreases turnover, increases retention, and increases effectiveness of training,

Potential Cost Factors in Center Operation

Space: Capital costs for land and building, development, utility fees, taxes, rental fees, insurance.

Equipment: Classroom, outdoor playground, office furnishings, telephone, maintenance, kitchen equipment.

Staff: Administrator, teachers, aides, clerical, custodial, cook, driver, substitutes. In addition to salaries, related costs and benefits should be taken into account—social security taxes, workers' compensation, unemployment and medical insurance, holiday and vacation pay.

Consumable supplies: Teaching supplies, food, maintenance, office and clerical.

Transportation: Van or bus may be needed unless parents are required to provide transportation for children.

Communication: Printing, postage, telephone, publicity and advertising, parent education.

Staff development: In-service training, professional publications and association memberships, workshops and seminars.

Social services: Consultations with medical, social service, and psychological personnel.

Miscellaneous: Legal, accounting, public relations, liability insurance, emergency funds (equivalent to two months operating expenses).

then the cost-benefit ratio would be great indeed.

One of the many supportive board members at Fox Chase said it best: "Organized labor has long recognized the need for job security. If you read a collective bargaining agreement, you will find the job security clause to be most prominent. If we interpret this concept more broadly to mean 'family security,' we have what many industry observers consider the key to the successful Japanese model: attention to and provisions for the family security of their employees." The labor-intensive institutions at Fox Chase have taken a long step towards total employee-family security, and toward fulfillment of human potential —both male and female. Employee-employer support of child care has thus created a new partnership for industry today.

Company and family life merge

The scenario at Fox Chase is being played out nationwide, as radical changes in lifestyles are felt by individuals, families, and by employers. Dual career families, working mothers, and single parents have become part of the American way of life. Present societal factors indicate that little will occur in the near future to alter this pattern.

A significant trend emerging from the above factors is the merger of work and family life. Dr. Stanley Nollen of Georgetown University's School of Business Administration states that "no longer can work and family life be treated as separate entities." He cites a 1977 survey of workers that indicated that 25 percent of their problems involved conflict between work and family, as compared with only one percent cited in a 1969 survey. According to Nollen, "The new worker is bringing a new set of concerns to the workplace that may highlight tension between work and family." As a result, corporations may no longer be insulated from these problems.

The Department of Labor reports that women between the ages of 18–64 represent 67 percent of the full-time labor force in the United States. Of the 67 percent cited, 60 percent are in their prime middle years, ages 25–54, and for women college graduates in the same category, the total number is over 70 percent. Married women with children under the age of six represent 47 percent of the current labor force, as compared with 32 percent in 1970.

True, the number of children in the United States has been declining due to falling birth rates, but current statistics indicate that the number of children with working mothers is increasing rapidly. There are 7.5 million children under the age of six with mothers in the labor force and, by 1990, there will be an estimated 10.4 million children under age six with working mothers. In addition, studies substantiate what the administration at Fox Chase cited: As more women enter the workplace, the availability of informal child care arrangements, such as dependence on neighbors, relatives, or friends, will be greatly reduced.

Encouraging company response

Not only at Fox Chase Medical Center, but nationwide, many employers have responded enthusiastically to contemporary lifestyles. These employers have been resourceful and creative in meeting changing needs of individuals and families. A growing number of major

corporations have implemented programs for employees' children that may help reduce potential conflict between work and family, thereby creating more satisfied, productive employees.

In the last decade, nearly the same number of employer-sponsored child care centers were established as in the 20 years preceding. A survey conducted by the Child Care Alliance indicated that most centers are located on-site, either within the institution itself or on the grounds. Care is available for children ranging from infants to school age, and hours of operation correspond with the needs of employees.

Companies such as Zale Corporation in Dallas, Texas; Neuville-Mobil Sox in Hickory, North Carolina; Red Rope Industries in Bristol, Pennsylvania; ABT Associates in Cambridge, Massachusetts; Intermedics Inc. in Freeport, Texas; and Corning Glass Works in Corning, New York have established child care facilities within, adjoining, or near to their physical plants. Degree of support, which varies in each of the centers depending on operational design, may range from total subsidization to contribution of expertise, equipment, or operating funds.

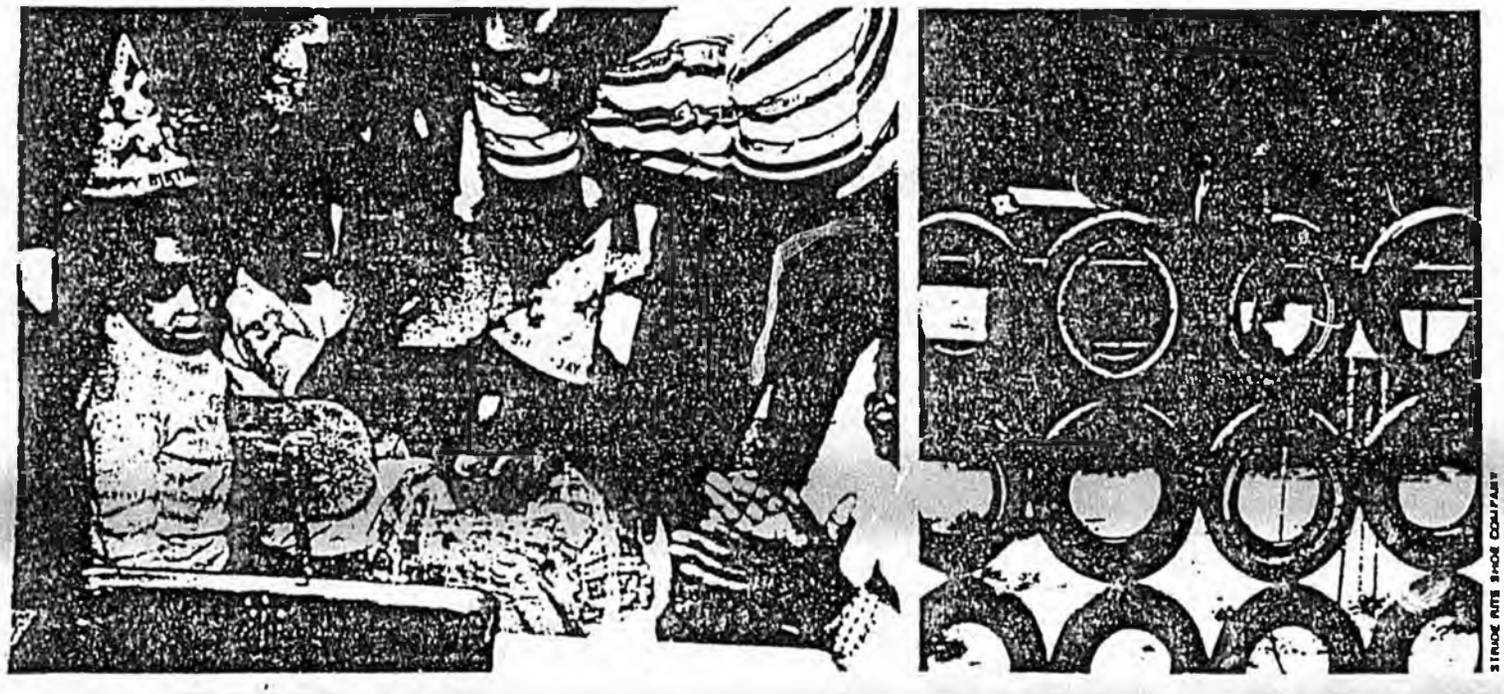
Polaroid Corporation in Cambridge, Massachusetts supports quality child care in a different way, by using an employer voucher system, which subsidizes a percentage of an employee's child care costs at any licensed family day care home or center.

Some companies have expanded their objectives to include the community at large. For example, Stride Rite Shoe Company of Boston opened the Stride Rite Children's Center in 1971 "in response to a growing need among large numbers of Stride Rite employees and the surrounding community." Stride Rite President Arnold Hiatt indicates that Stride Rite's center is working "due in large part to the decisions made at the onset of the program, company sponsorship, parent participation, careful staffing, and outside sources of funding."

The Northside Child Development Center in Minneapolis, like the Fox Chase Center, is a consortium formed by a group of companies to provide child care for company employees and the community. The consortium, including Control Data Corporation, Dayton's Department Store, Farmers and Mechanics Bank, Federal Reserve Bank, Lutheran Brotherhood Insurance Company, Northern States Power Company, Northwestern Bell Telephone Company, and the Pillsbury Company, shares tasks and costs associated with the center.

Funded by the above corporation, monies from Title IVA of the Social Security Act, and the U.S. Department of Agriculture, the

WORK AND FAMILY LIFE MERGE: *Companies are adapting to significant social and economic trends, such as the growing number of working mothers.*



STRIDE RITE SHOE COMPANY

center is a model of business, government, and community cooperation. Control Data's manager of public affairs, Gary Lohn, states, "Our company got involved and stayed involved in the center because of the benefits to the community and employees."

Merck Sharpe and Dohme in West Point, Pennsylvania found that contributing funds to an existing child care center has helped assure their employees priority at the center. However, Merck's Rahway, New Jersey plant is helping employees establish a parent-run child care facility, which will be in a church located a mile from the plant. Merck will donate "seed money" to cover renovation and other start-up costs and help the program become self-sustaining. In another approach, Illinois Bell Telephone hired personnel to assist employees in finding adequate child care services.

Unions, such as Amalgamated Clothing Workers of America (A.C.W.A.), are involved in the care of employees' children. Currently, A.C.W.A. child care centers in Virginia, Maryland, Pennsylvania, and Illinois are supported by a percentage of total gross payroll of area clothing manufacturers. Monies are paid to a joint health and welfare fund, and administered by seven representatives from labor and seven from management. The plan has worked successfully to date, and cares for more children than any other private American organization. All union members are eligible, and the large number of children served in the center indicates that many A.C.W.A. members enjoy the benefits of the program.

Planning: A priority

Obviously, there is no one best way for employers and employees to share in a partnership to support child care. The program model selected will certainly influence both start up and operating costs of a program. Employers are well-versed in the importance of careful planning before embarking on a new venture. Planning for employer support of child care requires the same consideration:

- Learn what the models are for employer-support of child care.

- Establish a task force, which should include management, labor representatives, knowledgeable employees/parents, and persons with skill in personnel, law, and public relations.
- Assess needs to determine suitability of a child care program and encourage feedback from interested employees. Needs assessment must elicit accurate information; it is crucial that needs assessments be designed for the specific population.
- Communicate results of needs assessment to employees through memos, posters, and group meetings. (This is the employer's chance to state clearly the institution's position. If communication is assumed rather than on-going, a well-intended program for child care may be doomed before it starts.)
- Evaluate existing community services.
- Support a particular model for child care at the work place, based on highest quality, best tax and financial advantage to those concerned, and least liability for the major contributor.
- Consider hiring an outside consultant to help analyze costs; assist in site selection; develop the program; store information concerning child care philosophy, goals, objectives, policy, and procedures; and evaluate the total proposed program. Consulting services may be cost effective, if those involved are not thoroughly familiar with child care programs.
- Evaluate the effectiveness of the planning process in establishing the program.

For the employer committed to the concept of quality child care at the work place, the accompanying list itemizes both start up and operating costs, as listed by the U.S. Department of Labor in a 1980 report. These items vary, depending on size, location, and decisions about type of program to be implemented.

STRIDE RITE SHOE COMPANY

NEW OPPORTUNITY TO SHARE: *Work-site day care enables parents and children to have lunch together, another way in which family relationships can be strengthened.*

Investment by employers may not be readily measurable in terms of the bottom line, but real benefits of child care to all involved may far outweigh expenditures.

At the employer–employee level, for example, operation of a child care unit helps reduce absenteeism, tardiness, and turnover; while serving to retain valuable employees, it also helps attract new applicants. It demonstrates that company management shares basic concerns of the workers, thus contributing to overall improvement in company–employee relations. In the community, the center is a highly visible charitable contribution and thus a plus for corporate public relations.

Parents (employees) are likely to adopt more positive attitudes toward their jobs; worries about separation from their children are eased by the center's proximity. The parent is available in case of an emergency, giving a better sense of security to the parents and the child.

Family relationships therefore benefit in a variety of ways. The child's day is more structured, and opportunities for child growth and development are improved.

Support of child care presents a challenge for the future. Solutions to meet the demands of contemporary lifestyles will not come easily. However, improving the quality of family and work life is necessary to keep pace with a changing workforce in a changing world. Amory Houghton, Jr., chairman of the board of Corning Glass Works noted, "We (at Corning) provide a working environment that is supportive for men and women. The Corning Children's Center helps provide that essential to all family life—the best possible care for children." •

MANAGEMENT REVIEW The magazine for motivated managers

American Association of University Women
Alaska State Division

Susan R. Clark, State Legislative Chair
1109 C Street, Juneau, Alaska 99801

May 1983

AAUW supports Senate Bill 247 which would include in the architectural plans of major state buildings the space for a child care center for employees, students and other parents who work in the vicinity.

Our society is at a point where economic conditions are forcing parents in greater and greater numbers to seek employment. Only 7 years ago for the first time nationally more women with children were employed than were working at home (a rise from 18% to 54% over the last thirty years). Now in Alaska almost 50% of all women with preschool children are employed. Women seek meaningful employment for the same reasons men do - but of economic necessity and out of a need to lead contributing, independent and challenging lives. Now that we have begun, in Alaska at least, to outlaw discrimination against women in education and employment, women have increased opportunity and are taking that opportunity to pursue professional goals - goals that must of necessity for many include less time spent exclusively parenting. Women who do choose parenting also realize that raising children usually occupies but one-third of their adult life, and that they must prepare themselves at least educationally for the economic security of that other two-thirds.

In addition to an increase in the need for two-parent incomes, we have a high percentage of single parents whose lack of alternatives for child care while they are earning a living or studying to earn one is often acute. I point out these facts to underscore the knowledge that the need for day care for infants, preschoolers, and before and after school is now a fact of life in our society as a whole and even more so in Alaska where almost one-half of all our families have pre-schoolers. But even though more parents are working outside the home, satisfactory child care arrangements are something to be envied, and in no way taken for granted. Given our need and self-interest as citizens to assure that the next generation is adequately nurtured as well as educated, we must as citizens concern ourselves with the availability of affordable, reliable, accessible quality child care for parents who must also earn a living.

The issues in the excellent proposal before you are 1) the quality of child care while parents are employed, and 2) support of families as they assume their responsibility in raising their children. That a benefit also exists to an employer in terms of lower absenteeism and reduced employee turnover, is but delightful fallout to the basic issues of quality child care in and outside the family.

On-site child care speaks to all of these issues. Picture the average employed family with young children. Depending on where parents can find a vacancy in adequate preschool care that they can afford; depending on the number of children in the family needing different kinds of care (a school child, for example, usually must receive care near the school); depending on the location of

each parent's job, the severity of rush hour traffic, and whether all this scheduling and transportation must be done in a single family car or even on public transportation, then the resulting daily logistics can easily add one hour or more to each end of the 8 hour day. For a pre-school child whose waking day is normally 12 hours, the result is the limitation of possible child-parent interaction to two hours that are traditionally ones where both parent and child are tired, hungry and rushed. Latest figures show that the average parent spends but 17 minutes a day actually interacting with his or her child - 14 minutes of which are spent in directing the child to do something. Fathers generally spend more time shaving than they do with their children!

On-site child care reduces drastically the transportation logistics giving parents the maximum time with their child before and after work, but also adds an important additional factor - parents whose children are accessible to their place of employment are provided with the important option of 1) spending additional time with their child during scheduled breaks in the work day or at lunch, and 2) being able to observe first hand and at various times during the day the adequacy or quality of the care program. For too many parents, the only knowledge they really have of their children's day care situation is what they see through the front door at drop-off and pick-up time, and given the lack of options many parents have, many just trust to luck that the arrangement is satisfactory.

These two points (time with the child and observation of the program), however, not only benefit the parent-child interaction, but also help at the same time to raise the quality of the program in general. Studies have conclusively proven that high parental involvement in any child-care program produces the highest quality of care. Not only do parents using on-site care know more fully what their chidren are doing during the day thereby exerting more control, but through visitation they also help to increase the staff-child ratio during parts of the day, which thus increases the amount of individual attention each child can receive.

Benefits to the employer or school result not only from parents' increased peace of mind, but from the consequent stable child care situation. Parents relying on sitters find that even the most reliable ones have sick days or other commitments and the turnover of family day care home providers is startlingly high. A substantial number of work days are consumed not in caring for a sick child, but in providing care when the regular provider can not or when that person abruptly seeks other employment or respite.

A national trend toward on-site or adjacent child care has begun. President Reagan even highlighted the need in his State of the Union message this year. Over the last decade the IRS has permitted businesses to deduct the expenses of providing a child care facility, but too few businesses have taken advantage of that provision which may have expired in 1982(and needs to be reinstated). One intent of this proposed legislation is to enable the state to take a leadership role in on-site child care, incouraging private employers to follow suit.

AAUW strongly supports this bill and urges prompt action

National Association
for the Education
of Young Children-
Southeast Alaska

My name is Lynn McKinnon. My husband and I are life-long Alaskans, Juneau residents for three and one-half years and the parents of two boys. I am a member of the Alaskan Association for the Education of Young Children and the volunteer legislative advocate for the Association. I am also the fund-raising chairperson of Capital School and Membership Vice-President for the Juneau Co-operative Preschool.

I am here today to urge you to support Senate Bill 247. I will tell you why I became involved, the steps that took place before this proposal became a bill and what the benefits are for on-site child care.

Quality child care means that children are in a life-safe developmentally healthy environment with caring, competent care-givers. I would like to share with you a quote from a report entitled "Child Welfare: Day Care of Children" by Theresa Lansburgh.

> "The fundamental issue in day care is how optimal nurturance of today's children can be provided at a time when both the American family and the society are undergoing vast changes.... This country primarily helps "damaged" children and broken families by providing for foster care or institutionalization. The cost of this policy -- social, financially, and in human terms -- is great. The early nurturance provided children can prevent much of the later trauma, dislocation, and disruption. Since children represent the future of the country, this policy also affects the quality of national life and the country's character and ability to meet the tests of leadership, purpose, and threats to survival. Too many children are now growing up without the opportunity to develop into contributing members of society. High-quality day care services can be an important resource for families and for enriching the development of children during their crucial formative years."

In January I read in the Empire that Governor Sheffield announced plans for new buildings to house state agencies.

National Association
for the Education
of Young Children-
Southeast Alaska

It occurred to me that plans for child care facilities for the children of those employed ought to be included in those plans. I had read several articles about successful corporate on-site child care facilities and the advantages for employers as well as parents and children. I then discovered that bills proposing this idea had been introduced in past legislatures, but had not received the attention they deserved.

With the help of a number of people, successive meetings were held to discuss a freshly written proposal. At these meetings all who would eventually be involved should this legislation become law were able to critique and offer suggestions. Participants included representatives from the Departments of Administration, Community and Regional Affairs, Health and Social Services, Education, and Transportation as well as representatives from the Child Care Coalition. The bill was revised to better reflect the concerns expressed by each of these representatives. I feel strongly that because of the work done in advance by all the people involved that this legislation has an excellent chance of being implemented smoothly. I will volunteer any assistance necessary to help in the implementation of this legislation.

A recent status report on child care in Alaska pointed out, among other needs that:

1) Alaska has a greater than average need for child care services.

2) Day care is a sound investment for the State, at least in helping the disadvantaged. Day Care Assistance can reduce welfare and the need for other social programs. Young children reap long term benefits from quality programs.

On-site child care facilities would have many advantages to the State which would include:

1) Reduced costs due to improved ability to recruit highly skilled workers. An on-site child care facility would draw many professional people to the pool of available personnel.

2) Reduced turnover and improved retention of employees. The child care facility would enable well-trained staff members, particularly professional women, to remain on the staff.

3) More effective training. By retaining existing staff the State would build on prior training and improve the value of staff.

4) Happier employees who would likely be more productive employees.

Advantages for parents and children include:

1) Relief from the anxiety of separation during the workday. Parents' accessibility to the child and availability in case of emergency helps relieve this concern and contributes to peace of mind.

2) The convenience of on-site care reduces the inherent stress from scheduling problems and leaves more time for the relationship between parent and child.

3) Nearness to the workplace allows for more time during lunch for parent and child to be together.

4) Studies have shown that the greater the parent involvement the higher the quality of the child care. A center near the workplace would increase parental involvement.

5) Women could return to employment from maternity leave sooner, and if they chose, could continue to nurse their babies.

The structure and lifestyle of the Alaskan family has changed dramatically, economic necessity dictating that many women have passed the point where they have a choice about entering or continuing in the labor force. This legislation would affect all Alaskans by demonstrating a continued commitment from the State in supporting families, and the enrichment of social, physical and intellectual experiences for children. Yes, it will cost the State money initially for the space to be included in building plans. I would like to quote an article about the on-site child care facility at the Fox-Chase Medical Center in Philadelphia regarding cost-effectiveness:

> "Retirement programs can cost from 8% to 10% of total direct payroll, and basic family dental plans will generally range from 1% to 1.5% of the same payroll base. In contrast, the child care program at Fox-Chase is expected to draw .5% of direct payroll in the first year operating costs, plus approximately .3% of payroll for initial seed money. If this program significantly decreases turnover,

National Association
for the Education
of Young Children-
Southeast Alaska

increases retention and increases effectiveness of training, then the cost-benefit ratio would be great indeed."

Senate Bill 247 allows only for space to be provided for the facility. The expense of operating the facility would primarily be born by the private provider contracting for the service.

I question whether we can afford not to implement this valuable program, and will close with another quote by Arnold Hiatt, president of the Stride Rite Center on corporate premises:

"All of today's delinquents were three and four year olds a short time ago. Efforts to train hard-core unemployables have been largely futile. Our tax dollars provide merely custodial care. The cost of teaching a child to sing, to grow and to trust peers and adults in a positive environment is small in comparison."

Children are our most important renewable resource. The relationship between the workplace and child care has great significance to fostering optimal nurturance in the family.

Lynn McKinnon

BILL SHEFFIELD
GOVERNOR

PHONE
(907) 561-4227

STATE OF ALASKA
OFFICE OF THE GOVERNOR

ALASKA WOMEN'S COMMISSION
3601 C STREET - SUITE 742
ANCHORAGE, ALASKA 99503

Written Testimony Submitted on SB 247

The Alaska Women's Commission supports SB 247, the creation of privately run child care centers in state buildings. According to 1980 census data, 56% of all Alaskan women with children are working, and 47% of all Alaskan women with children under the age of six are working. The State of Alaska has the opportunity to assure that quality day care is provided for at least some of these children by providing day care in state buildings.

Although the role of an employer in providing a site for day care is a relatively new one, studies have shown that the benefits to the employer are as significant as the benefits to the employee. The benefits to the employee are obvious--greater peace of mind and less stress, reduction in complicated schedules in picking up and dropping off children, and more time spent with children.

But employers providing child care assistance find that there are also benefits to their business. The National Employer Supported Child Care Project completed a survey in 1982 of employers providing some type of child care programs to their employees. Of the 179 employers responding, the following were highlighted as major benefits gained by offering child care services:

1. Reduced turnover. Nearly 2/3 of the respondents attributed some reduction in employee turnover to their child care program.

2. Reduced absenteeism. More than half reported reduced absenteeism.

3. Recruitment. More than 80% reported gains in recruitment.

4. Productivity. About half indicated that offering child care services had a positive influence on productivity.

Additional benefits reported by employers were in the areas of morale, scheduling flexibility, reduced tardiness, need for less overtime, less use of temporary help, as well as in the areas of equal employment opportunity and affirmative action.

VIRTUALLY NO COMPANY SURVEYED REPORTED ADVERSE EFFECTS.

One company, Intermedics, reported that turnover decreased 60% in the first 2 years after they opened an on-site center, and there was a 15,000 hour decrease in absenteeism.

What the State would be doing in allowing a site for day care is similar to what it now does in allowing a space for a food concessionaire. In each instance, private enterprise is providing a service at little or no cost to the State.

The State of Alaska has a unique opportunity to set an example to other private employers in the state in assuring that quality day care is porvided as conveniently as possible. Therefore, the Alaska Women's Commission respectfully requests passage of SB 247.

Submitted by Betty Ramage, Commissioner, Alaska Women's Commission
February 28, 1984

TESTIMONY OF SENATOR BETTYE FAHRENKAMP
BEFORE THE SENATE HEALTH AND SOCIAL SERVICES COMMITTEE
ON SENATE BILL 247

MR. CHAIRMAN, MEMBERS OF THE COMMITTEE, I WANT TO THANK YOU FOR PROVIDING ME WITH THIS OPPORTUNITY TO SPEAK IN SUPPORT OF SB 247. I AM JOINED IN MY SUPPORT BY THE DEPARTMENTS OF ADMINISTRATION, COMMUNITY AND REGIONAL AFFAIRS, AND HEALTH AND SOCIAL SERVICES AND MANY OF OUR COLLEAGUES.

THIS LEGISLATION CONTINUES TO EXPRESS THE STATE'S COMMITMENT TO THE CHILDREN AND PARENTS OF OUR STATE. IT ACKNOWLEDGES AND ACCEPTS THE EVOLVING ROLES OF WOMEN IN THE WORK PLACE AS EQUAL PARTNERS TO THEIR MALE COUNTERPARTS. ACCORDING TO THE OFFICE OF INSTITUTIONAL RESEARCH AT ANCHORAGE COMMUNITY COLLEGE, THERE WERE RECENTLY 14,815 WOMEN IN ALASKA OVER THE AGE OF 16 IN THE WORK FORCE, WITH CHILDREN UNDER THE AGE OF SIX. 47.4 PERCENT OF ALL MOTHERS IN ALASKA ARE IN THE WORK FORCE.

RECENTLY, THE U.S. CENSUS BUREAU RANKED ALASKA SECOND IN THE NATION IN NEW BIRTHS WITH 22.5 BIRTHS PER 1,000 PEOPLE PER YEAR, WITH THE NATIONAL AVERAGE AT 15.6.

ACCORDING TO A JANUARY SENATE ADVISORY COUNCIL REPORT PREPARED BY FRANK SEUFFERT, 22 OF 36 CHILD CARE CENTERS RESPONDING TO HIS SURVEY INDICATED THAT THEY HAD WAITING LISTS WITH AN AVERAGE NUMBER OF ABOUT 20 CHILDREN AND AN AVERAGE WAIT OF 3 MONTHS.

THE ANCHORAGE DAILY NEWS CARRIED AN ARTICLE REGARDING ON-SITE CHILD CARE RECENTLY. IN THE ARTICLE LARRY SNYDER, DIRECTOR OF PERSONNEL AT NERLANDS FURNITURE STORE, INDICATED THAT AS A RESULT OF THEIR ON-SITE PROGRAM "MANAGEMENT AND SUPERVISORS HAVE A MUCH BETTER LEVEL OF UNDERSTANDING OF THE ADDITIONAL RESPONSIBILITIES THIS EMPLOYEE HAS TAKEN ON." HE FURTHER NOTED THAT IN ALASKA "THERE

THE COMMITTEE SHOULD HAVE FISCAL NOTES AND POSITION PAPERS FROM THE DEPARTMENTS OF COMMUNITY AND REGIONAL AFFAIRS AND HEALTH AND SOCIAL SERVICES. THE FISCAL IMPACT IS ZERO AND BOTH DEPARTMENTS SUPPORT THE LEGISLATION.

I'VE ALSO ENCLOSED A SENATE ADVISORY COUNCIL REPORT WHICH DETAILS THE NEED AND THE RATIONALE FOR THE ADOPTION OF THIS LEGISLATION.

MR. CHAIRMAN, I WOULD BE HAPPY TO ANSWER ANY QUESTIONS YOU OR THE OTHER MEMBERS OF THE COMMITTEE HAVE AT THIS TIME. THANK YOU.

IS NOT TYPICALLY A BROAD FAMILY SUPPORT SYSTEM HERE FOR THE YOUNG FAMILY, SO THE SUPPORT THEIR FELLOW EMPLOYEES GIVE, AS THEY TAKE THIS BIG STEP INTO PAPENTHOOD, BECOMES IMPORTANT AND A POSITIVE INFLUENCE." HE INDICATED THAT THIS OVERALL POSITIVE FEELING AT THE WORKPLACE WAS HAVING A VERY GOOD EFFECT ON THEIR BUSINESS.

ACCORDING TO IED KESSEL, DIRECTOR OF THE CENTER FOR EDUCATIONAL DEVELOPMENT AT PROVIDENCE HOSPITAL, THE HOSPITAL PLANS TO OPEN A QUALITY DAY CARE CENTER BY MAY 1, 1984. THE CENTER WILL OPERATE 24 HOURS A DAY, 7 DAYS A WEEK. THE CENTER WAS A DIRECT RESPONSE TO A NEEDS ASSESSMENT SURVEY OF THE HOSPITAL'S EMPLOYEES. WERNER TRAVEL, INC., IN ANCHORAGE PROVIDES ON PREMISES DAY CARE FOR THEIR 15 EMPLOYEES.

MR. CHAIRMAN, I MAKE THESE STATISTICAL POINTS AND REFERENCES TO ON-SITE FACILITIES BECAUSE I WANT TO REINFORCE OUR INTENT WHICH IS TO ACT AS A MODEL FOR PRIVATE INDUSTRY; TO PERPETUATE AND SUPPORT QUALITY CHILD CARE AND FOSTER MORE SATISFIED AND PRODUCTIVE EMPLOYEES AND STUDENTS.

NO ONE CAN ARGUE AGAINST ENCOURAGING QUALITY CHILD CARE AND FAMILY SERVICE WHICH CONTRIBUTES TO GREATER WORKER PRODUCTIVITY AND BENEFITS CHILDREN, PARENTS AND INDUSTRY OR, IN THIS CASE, GOVERNMENT.

SPECIFICALLY, IF ENACTED THIS BILL WOULD BECOME A PLANNING TOOL FOR ENSURING THAT AS WE BUILD NEW STATE FACILITIES WE INCLUDE SPACE WHICH WILL BE CONTRACTED OUT TO PRIVATE, LICENSED CHILD CARE PROVIDERS TO OPERATE CHILD CARE FACILITIES WHOSE SERVICE WILL BE PAID FOR BY THOSE PARENTS CHOOSING TO USE THE FACILITY. THERE IS NO INTENT TO SUBSIDIZE CHILD CARE TO STATE WORKERS OR ANYONE ELSE. THE PROVIDER WOULD PAY RENT ON THE SPACE AT A RATE SIMILAR TO THAT BEING PAID BY OTHER PROVIDERS IN THEIR AREA AND THE FACILITY WOULD NOT BE LIMITED TO USE BY STATE EMPLOYEES.

FILE APR25 '84

April 23, 1984

Dear Senators and Representatives:

It has come to our attention that(Rules) CSSB 247 sponsored by Fahrenkamp, V. Fischer, is due to come on the floor for vote soon.

Please DO NOT PASS This bill for the following reasons:

1. It is a step in the wrong direction: We see this bill as encouraging parents to go to work and abrogate their responsibilities. A state should encourage families to stay together, raise their children with their own set of standards and beliefs, give them their own love and understanding, and struggle together as a family.

2. Thus, it is not in the public interest to make life so easy for everyone, that no one has to endure those struggles that make for strong individual and collective character, even if one is a single-parent.

3. It is not in the public interest to create public buildings of such expense, to furtheer the burden on the taxpayer for collective costs in child raising.

4. It is not in the public interest to teach that licensed day care is quality day care. Licensing, through the years, has proven to be as valuable as the price of the paper on which the license is written. Licensing guarantees nothing and encourages false assumptions. The private, individual baby-sitter and the church-run nurseries are the most responsive to that person's needs, due to the individual one-to-oneness of the former, and the consensus of belief of the latter.

5. It is not in the public interest to put undue strain on private enterprise, as again the state puts itself in further competition with it. Already, workers prefer state hire, due to higher benefits, salaries, etc. Now, to have the state put pressure on that sector to supply expensive, licensed day care in their buildings, is an affront to them on the part of the state.

6. It is not in the public interest for the state to use taxpayer monies to provide facilities in competition with the private provider. Churches have already stepped into the gap to provide quality, loving day care to the worker. Most of them are not licensed, yet the quality of their care is unquestioned. This this bill would impact both servicers.

7. It would be an easy answer to support this bill. It looks and sounds as if it could be good. But ease and convenience has never been the answer to development of strong character, not to the encouragement of strong families, the backbone of America

Thank you for voting NO on CSSB 247
Sincerely,

Sue Miller

Dear ¥Salutation¥:

Thank you for expressing your support for Senate Bill 247 regarding Day Care Facilities in Public Buildings.

Like yourself, I believe that the availability of convenient, quality day care facilities would be a great advantage to working parents. With the number of families, with two working parents increasing, the demand for day care services will continue to grow. To ensure an adequate supply of quality facilities, it may be best for the state to play a more active role in their construction.

SB 247 has passed Senate Rules and is currently waiting to be put on the Senate calendar. I can assure you that I will keep your comments in mind when SB 247 comes before the House.

¥Salutation¥, thanks again for your support and for contacting my office.

Sincerely,

Michael W. Miller
Representative

RE: Senate Bill 247

Dear Mike Miller:

I am a concerned student attending the University of Alaska in Fairbanks. I have become aware of the problem regarding the limited availability of child care here on campus. I am aware that there is a small facility for child care at this time, but according to studies I have seen, it is not large enough to meet the present need.

I understand that Senate Bill 247, which is an act that would provide for the creation of privately run child care centers in state buildings, is presently in the Senate Rules Committee and I encourage you to support this bill when it reaches the House of Representatives.

Sincerely,

Marilyn Dowding

POSITION PAPER

RE: SB 260

SPONSOR: Senate Community & Regional Affairs

Program Effects of Bill:

Theoretically, there should be no program effects from the passage of this legislation. Since this bill is simply a clarification of 43 U.S.C. 1601,1620(d), any impact felt would necessarily be the result of the original federal language.

History:

In December 1971, Congress adopted the Alaska Native Claims Settlement Act (ANCSA). In December of 1980, the Alaska National Interest Lands Conservation Act (ANILCA) was passed into federal law amending certain sections of ANCSA.

Section 21(d) of the amended act provided for a property tax moratorium on ANCSA lands for a period of twenty years, subject to certain provisions within the act. That section reads as follows:

TAX MORATORIUM EXTENSION

Sec. 904. Subsection (d) of Section 21 of the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601, 1620(d)), is amended to read:

"(d)(1) Real property interests conveyed, pursuant to this Act, to a Native individual, Native Group, Village or Regional Corporation or corporation established pursuant to section 14 (h)(3) which are not developed or leased to third parties or which are used solely for the purposes of exploration shall be exempt from State and local real property taxes for a period of twenty years from the vesting of title pursuant to the Alaska National Interest Lands Conservation Act or the date of issuance of an interim conveyance or patent, whichever is earlier, of those interests to such individual, group, or corporation: Provided, That municipal taxes, local real property taxes, or local assessments may be imposed upon any portion of such interest within the jurisdiction of any governmental unit under the laws of the State which

is leased or developed for purposes other than exploration for so long as such portion is leased or being developed: Provided further, That easements, rights-of-way, leaseholds, and similar interests in such real property may be taxed in accordance with State or local law. All rents, royalties, profits, and other revenues or proceeds derived from such property interest shall be taxable to the same extent as such revenues and proceed are taxable when received by a non-Native individual or corporation.

"(2) Any real property interest, not developed or leased to third parties, acquired by a Native individual, Native Group, Village or Regional Corporation, or corporation established pursuant to section 14(h)(3) in exchange for real property interests which are exempt from taxation pursuant to paragraph (1) of this subsection shall be deemed to be a property interest conveyed pursuant to this Act and shall be exempt from taxation as if conveyed pursuant to this Act, when such an exchange is made with the Federal Government, the State government, a municipal government, or another Native Corporation, or, if neither party to the exchange receives a cash value greater than 25 per centum of the value of the land exchanged, a private party. In the event that a Native Corporation simultaneously exchanges two or more tracts of land having different periods of tax exemption pursuant to subsection (d), the periods of tax exemption for the exchanged lands received by such Native Corporation shall be determined (A) by calculating the percentage that the acreage of each tract given up bears to the total acreage given up, and (B) by applying such percentages and the related periods of tax exemption to the acreage received in exchange."

A conspicuous lack of definitions for key terms along with certain ambiguities in Sec. 21(d) have caused some interpretation problems for parties impacted by the legislation. ANCSA Corporations have complained of unequal treatment from one taxing jurisdiction to the next, and local assessors have voiced their frustration in attempting to interpret and apply the language. The situation is further complicated by the fact that there is almost no legislative history available for guidance on that section.

Comments:

The language in SB 260 is intended to provide some clarification of the section and to furnish a means for the proper implementation of the moratorium. It has been drafted in an effort to more closely define those terms which have caused problems or created concerns, and in an attempt to provide some equity of application of Sec. 21 (d) statewide.

The Department is in full support of the adoption of language which would accomplish those goals. Unfortunately, the language in the bill has not been completely satisfactory to parties on either side of the issue.

We have been informed by the Alaska Association of Assessing Officers that, at the present time, meetings on this subject between their asoociation and ANCSA community are ongoing. They also informed us that they have reason to be optimistic on the two groups reaching an agreement on language which would resolve their differences on SB 260.

Considering these recent developments, the Department believes it premature to voice concerns or assume an official position at this time. If the Committee desires departmental commentary on any revised language the two groups might develop, we would be pleased to respond.

ALASKA ASSOCIATION OF ASSESSING OFFICERS

SENATE BILL NO. 260 (proposed substitute)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to exemption from municipal property

taxation of certain property exempt from taxation from federal law; and providing for effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(9) real property or an interest in real property that is exempt from taxation under 43 U.S.C. 1620(d), as amended.

*Sec. 2. AS 20.53.020 is amended by adding new subsections to read:

(k) For the purpose of determining property exempt under (a)(9) of this section, the following definitions apply to terms used in 43 U.S.C. 1620(d) unless superseded by applicable federal law:

(1) "developed" means a purposeful modification of the property from its original state that affectuates a condition of productive present use or makes the property marketable for use or development in accordance with local ordinances and state statutes without further subdivision or substantial modification. Developed property, in order to remove the exemption, must be developed for purposes other than exploration and be limited to the smallest practicable tract of the property actually used in the developed state;

(2) "exploration" means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

(3) "lease" means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of exploration and development, this exemption shall continue with respect to the portion of the leased tract that is used solely for the purpose of exploration.

(4) If property or an interest in property that is determined not to be exempt under (a)(9) of this section reverts to an undeveloped state, or if the lease is terminated, the exemption shall be granted, subject to the provisions of (a)(9) and (k) of this section

*Sec. 3. AS 209.53.060 is amended by adding a new subsection (c) reading

(c) The assessment of property which has lost its exempt status under 43 U.S.C. 1620(d) because it is developed or leased shall be based on the full and true value of the improvements to the property and of so much of the property and/or natural resource as is used or useful in connection with the improvements.

*Sec. [3]4. This Act takes effect January 1, 1984

NOTE OF INTENTION

Attached is a proposed substitute for Senate Bill 260, which is an act relating to the exemption from municipal property taxation of certain property exempt from taxation under federal law; and providing for an effective date.

The proposal was drafted at a quarterly meeting of the Alaska Association of Assessing Officers held in Soldotna on May 23 and 24, 1983.

It was the opinion of the assessing officers that the original Senate Bill 260 was unfair, as it related to other persons in the State of Alaska who are involved in the subdividing and developing of property. The original bill allowed Native organizations to completely develop a subdivision, including survey, roads and utilities, and still not be obligated to pay local taxes until such time as the property was sold. We realized that it was probably the intent of the federal government in passing the Native Land Claim Settlement Act to allow a moratorium on local taxes so that the Native organizations could get their feet on the ground and not forfeit their property to taxes in the early years. We felt the original Senate Bill 260 allowed the corporations not only to get their feet on the ground, but to remain in a tax exempt status virtually in perpetuity, as far as purposeful modifications to their property are concerned.

Our proposed bill would allow a future subdivision in the state of being developed a tax exemption, but as such time as the subdivision is completed in conformance with the subdivision agreement, it would become taxable. This, in essence, gives the Native organizations developing subdivisions or natural resources a tax free period of time during the development process, but once the development criteria has been met it places the property on the tax roll of local taxing jurisdictions.

The proposal also provides in section 2(k)(1) for the taxation of only a small portion of a a larger tract, if only that portion has been developed. It eliminates taxation as does the original Senate Bill 260 of land being used for exploration. It allows, as did the original bill, for property that has been leased to be taxed, but deletes this property from the tax roll should the lease be terminated. If the lease is terminated, and due to the lease, a portion of the property was developed, that portion would remain taxable to the Native corporation.

Our proposed bill would bestow an additional benefit on the Native corporations over what most of them have at the present time. Most of the assessing jurisdictions within the State begin to assess the property at the time it is surveyed, and continue through the development stage. As mentioned above, the proposed bill by our association would allow the development to take place prior to beginning the assessment procedures.

Should you have any questions concerning our position, please contact the undersigned.

Glenn M. "Pat" McKee, CRA 264-6595
Chairman, Legislative Committee
Alaska Association of Assessing Officers
Pouch 6-650
Anchorage, Alaska 99502

SB 258 (cont'd)

company. Does not provide for an effective date (becomes law 90 days after Governor's signature).

Introduced April 15 and referred to Labor & Commerce.

Bd. of Fisheries (membership)

SENATE BILL NO. 259, by Senator V. Fischer. Would require that at least two of the members of Board of Fisheries represent the interest of sportfishers. Amends AS 16.05.221. Does not provide for an effective date (becomes law 90 days after Governor's signature).

Introduced April 15 and referred to Resources.

Native-Owned Lands (munic. property tax exemption)

SENATE BILL NO. 260, by the Community & Regional Affairs Committee. Defines "developed" for purposes the current tax exemption granted under federal law for Native-owned land acquired under the Native Claims Settlement Act (ANCSA) or the Alaska National Interest Lands Conservation Act (ANILCA). Under the federal laws, Native-owned land is exempt from state or municipal taxation unless it is developed or leased. However, the terms are not defined.

Amends AS 29.52.020 (exemptions from municipal property taxation) so that it specifically exempts Native land under the terms of the federal legislation and adds new subsection (k):

"For the purpose of determining property exempt under (a)(9) of this section, the following definitions apply to terms used in 43 U.S.C. 1620(d) [of the ANCSA] unless superseded by applicable federal law:

"(1) 'developed' means a purposeful modification of the property from its original state that effectuates a condition of gainful or productive present use without further substantial modification; surveying, construction of roads, providing utilities or other similar actions normally considered to be component parts of the development process, but which do not create the condition described in this paragraph, do not constitute a developed state within the meaning of this paragraph; developed property, in order to remove the exemption, must be developed for purposes other than exploration, and be limited to the smallest practicable tract of the property actually used in the developed state;

"(2) 'exploration' means the examination and investigation of undeveloped land to determine the existence of subsurface nonrenewable resources;

"(3) 'lease' means a grant of primary possession entered into for gainful purposes with a determinable fee remaining in the hands of the grantor; with respect to a lease that conveys rights of exploration and development, this exemption shall continue with respect to that portion of the leased tract that is used solely for the purpose of exploration."

SB 260 (cont'd)

Provides that if property or an interest in property that is determined not to be exempt under the new definitions reverts to an undeveloped state, or if the lease is terminated, the exemption shall be granted.

Provides Act takes effect January 1, 1984.

Introduced April 15 and referred to Community & Regional Affairs and Finance.

INTRODUCTION OF RESOLUTIONS (Senate)

Natural Gas Deregulation (Alaska exemption)

SENATE JOINT RESOLUTION NO. 24, by the Resources Committee. Requests Congress to exempt Alaska from any federal legislation allowing cancellation of existing natural gas contracts. Urges the Alaska delegation to actively support such an exemption from Sec. 316 of S615 or similar legislation.

S 615 is the proposed federal "Natural Gas Consumer Regulatory Reform Amendments of 1983" and it seeks to deregulate natural gas. The resolution suggests that such action would have a disasterous effect on many Alaskans who are dependent on electric energy generated from low-cost natural gas under existing, long-term contracts. The price increases brought about by deregulation and subsequent abrogation of existing contracts could, SJR 24 asserts, "have devastating impacts on the utility rates of most Alaska consumers already faced with high living costs."

Introduced April 12 and referred to Resources and Finance.

Knik Arm Crossing (project to start by 1984)

SENATE CONCURRENT RESOLUTION NO. 15, by Senator Ferguson. Requests the Governor to direct the Commissioner of Transportation and Public Facilities, the Commissioner of the Department of Revenue, and the Director of the Municipal Bond Bank to take all neccessary action to commence construction of the Knik Arm Crossing by 1984. Financing for construction would be from revenue bonds issued through the Municipal Bond Bank Authority and the revenue bonds would be satisfied by the use of toll charges for the vehicles using the crossing.

Introduced April 11 and referred to Transportation, Finance.

Middle Turn Lanes (construc. & use of)

SENATE CONCURRENT RESOLUTION NO. 16, by Senator V. Fischer. Requests the Governor to instruct the Dept. of Transportation & Public Facilities "to construct middle turning lanes only in areas where no other alternative is available, in a manner that precludes illegal use by designs that limit the traffic flow to appropriate lanes and mark them with traffic signaling devices that

OTHER ACTION IN THE SENATE

Attorney Fees (payment by municipalities)	SENATE BILL NO. 255, (see page 502). On May 3, at the request of Sen. Ferguson, the Community & Regional Affairs referral was waived. To Judiciary.
Native-Owned Lands (prop. tax exemption)	SENATE BILL NO. 260, (see page 503). On May 3, at the request of Senator Ferguson, the Community & Regional Affairs referral was waived. To Finance.
Cook Inlet Royalty Oil (sale to Tesoro)	SENATE BILL NO. 285, (see page 620). On May 2, at the request of Sen. Ferguson, the bill was given an additional referral to Community & Regional Affairs. To Resources, C&RA and Finance.

****

ERRATA

State Land (discount program)	SENATE BILL NO. 280, (see page 615). In the report of May 2, the bill was incorrectly reported. The land discount program was eliminated based on the advice of the Attorney General following the state Supreme Court decision of Gilman v. Martin. That case involved a similar land discount program in the Kenai Borough. The court ruled against that program, and the Attorney General felt a similar discount for state land could not be legally used for the disposal of state land.

SB 120 (cont'd)

conservation the power to "(7) accept contributions in money, services, materials, or equipment from the United States or its agencies, from an agency of the state, and from any other source, for use in carrying out the purposes of this chapter."

Lobbying (public officials & employees)

SENATE BILL NO. 137, (see pages 194;460;566). Reported back to the Senate on May 17 by Finance with the committee recommending it be replaced with a Finance CS and a majority recommending it do pass. concurring: Bennett (Co-Chairman), Sackett, Mulcahy and Faiks. Josephson and Vic Fischer signed "no recommendation." To Rules.

The Finance CS expands the bill to require executive and legislative branch officers or employees who engage in lobbying to comply with the Regulation of Lobbying Act. The original bill would have applied only to officers or employees of the judicial branch, the University of Alaska, a municipality or a school district. The new law only applies if a substantial or regular portion of the activities for which the officer or employee receives compensation is for the purpose of influencing legislative action.

Grain Reserve Loan Program

SENATE BILL NO. 169, (see pages 273;511). Reported back to the Senate on May 17 by Finance with the comittee recommending the Resources CS (p. 511) be adopted and a majority do pass. Concurring: Bennett (Co-Chairman), Mulcahy, Josephson and Sackett. Faiks signed "do not pass." Vic Fischer and Ferguson signed "no recommendation." To Rules.

Local Hire (state & municipal contracts)

SPONSOR SUBSTITUTE FOR SENATE BILL NO. 174, (see pages 274;613;685). Reported back to the Senate on May 19 by Finance recommending that it do pass. Concurring: Bennett, Co-Chairman, Mulcahy, Josephson, V. Fischer, Ferguson and Sackett. Senator Faiks signed "no recommendation." To Rules.

Native-Owned Lands (property tax exemption)

SENATE BILL NO. 260, (see pages 503;692). Reported back to the Senate on May 17 by Finance with a majority recommending it do pass. Concurring: Bennett (Co-Chmn.), Josephson, Mulcahy, Vic Fischer, Ferguson and Sackett. Faiks signed "no recommendation, may need technical amendments." To Rules.

Cards, Dice & Number Wheels (permits for)

SENATE BILL NO. 265, (see pages 557;636). Reported back to the Senate on May 19 by Finance with the committee recommending the State Affairs Committee Substitute be adopted and that it do pass. Concurring: Bennett, Co-Chairman, Ferguson, Josephson, Mulcahy, Faiks, V. Fischer and Sackett. To Rules.

Prudhoe Bay Royalty Oil (sale to Tesoro)

SENATE BILL NO. 268, (see pages 558;641). Reported back to the Senate on May 19 by Resources recommending it do pass. Concurring: Fahrenkamp, Chairman, Sturgulewski, V. Fischer, Ziegler, and P. Fischer. Senator Mulcahy signed "no recommendation." To Community & Regional Affairs.

CSSB 255 (Rls) (cont'd)

A RESOLUTION OF THE ANCHORAGE ASSEMBLY URGING ALL MEMBERS OF THE LEGISLATURE TO REJECT THE PROVISIONS OF CSSB 255.

WHEREAS, in response to the needs of Anchorage residents for a higher level of public safety and in reliance on the Legislature's 1976 approval of a measure which apportioned court costs, including the costs of defending indigent offenders to be borne by the State of Alaska, the Municipality has undertaken to expand its police service areas, increase the effectiveness of its traffic and penal codes, and enlarge its police and prosecution staffs; and

WHEREAS, this endeavor has relieved various state agencies such as the Alaska State Troopers and the Anchorage office of the District Attorney, from responsibilities that would otherwise require significantly increased state funding; and

WHEREAS, in various areas, particularly those relating to alcohol and driving, Anchorage has led the way for the state and for other localities toward more effective and aggressive laws, law enforcement and prosecutions; and

WHEREAS, the cost of the increased level of public safety has been borne primarily by local property taxpayers; and

WHEREAS, the Assembly finds that the shifting of the burden of court costs contemplated in CSSB 255 would result either in a significant decrease in local public safety effort or an increase in mill rates borne by local property owners; and

WHEREAS, CSSB 255 would act to deter aggressive law enforcement and prosecution in areas where public safety is primarily provided by local government and would in other areas act to deter the assumption of such functions by local agencies.

NOW, THEREFORE, the Anchorage Assembly resolves that:

CSSB 255 is a measure which in effect is anti-local government and one that will deter aggressive law enforcement by local agencies. It is, therefore, respectfully urged that members of the legislature vote against the measure.

Passed and approved by the Anchorage Municipal Assembly this 24th day of May, 1983.

Paul Baer
Assembly Chairman

Jane Ferguson
Assembly Clerk

Native-Owned Lands (property tax exemption)

SENATE BILL NO. 260, (see pages 503;692;793;857). Passed the Senate May 24, 12-6-1-1. Nays: Faiks, P. Fischer, Halford, Pettyjohn, Ray, Rodey. Excused: Sturgulewski. Absent: Fahrenkamp. The effective date clause was adopted. Senator Ray gave notice of reconsideration, but it was not taken up and the bill was referred to the House for its consideration.

Cards, Dice & Number Wheels (permits for)

CS FOR SENATE BILL NO. 265 (STATE AFFAIRS), (see pages 557;636; 793;857). On May 25 the State Affairs substitute was adopted and the bill passed the Senate, 19-1. Nay: Kelly. Senator Kerttula changed his vote from "nay" to "yea".

State Retirement System (fireman/peace officer status)

CS FOR SS FOR SENATE BILL NO. 277 (L&C)(AMENDED), (see pages 614; 738;794;857). Reported back to the Senate May 23 by Rules recommending the Labor & Commerce substitute be adopted with a Rules Committee amendment. The report was signed by Senator Faiks, Chairman, and concurred in by Senators Bennett, Ray and

DATE: April 25, 1983

RE: House Bill 172 amendment 8

Sec. 29.45.030 dealing with required tax exemptions contains new language that defines "developed" for the implementation of a required federal tax exemption (Page 105, line 10). The new definitions are supported by Alaska Native Corporations and are opposed by municipalities. Similar definitions were added as last minute floor amendments during legislative action on the municipal code revision in 1982 which were, in large part, responsible for the subsequent Governor's veto.

In that the purpose of HB 172 is to administratively revise Title 29 into a usable document and not to make substanative or controversial changes, staff recommends that all new materials pertaining to the federal tax exemption, including references to reverting to an undeveloped state, be deleted from HB 172 and that the issue be addressed in separate legislation. Delete materials Line 10 page 105 to Line 7, page 106

BOROUGH ATTORNEY'S OFFICE

April 6, 1983

The Honorable Barbara Lacher
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Barbara:

Subject: HB 172 "DEVELOPED" DEFINITION

The present version of HB 172 provides for a tax exemption as required by 43 U.S.C. 16.20(d) for certain Native lands. This exemption provides a definition of "developed" for implementing the federal law. I recommend that this matter be treated in a separate bill rather than in HB 172 or SB 1, the parallel bills intended as housekeeping measures to revamp Title 29.

During the last legislative session certain amendments were made to the Title 29 bill on the House floor which caused a great deal of controversy. In re-introducing the Title 29 in the present legislature, all of these amendments were removed except for the provisions for implementing the tax exemptions under 43 U.S.C. 16.20(d). This amendment was incorporated in AS 29.45.030 of the bill.

Pursuant to federal law, certain Native lands are not taxable until "developed". The intent of the proposed definition in AS 29.45.030 is to clarify what improvements of land will constitute "development" for tax exemption status.

I believe that the intent of this section is to assure that lands will not be taxed simply because an access road is constructed to the property or improvements are placed on the property in anticipation of future development. However, the language is sufficiently ambiguous to permit the interpretation that even a regular, residential or commercial subdivision development would not be taxable until the lots were sold. Once land is subdivided, roads are constructed and other improvements are put in place, the available lots become the sale inventory of the real estate developer. An exemption from taxation of these lots would give the exempted developer an unfair advantage over other developers with which it was in competition.

Because this provision is not in existing Title 29 and because there is potential controversy involved, I recommend that

it not be included in HB 172, a housekeeping bill. As a separate bill, I believe that the Borough would support a definition between a taxable subdivision development and tax exempt lands which have been surveyed and have constructed roads.

Sincerely,

Steven H. Morrissett
Borough Attorney

STAN THOMPSON
MAYOR

February 24, 1983

TO: Stan Thompson, Mayor

FROM: Don Thomas, Assessor

SUBJECT: Native Lands, Title 29 Revisions – See M #1 Lines 28 + 29 Page 100 – 101

By the definition included in the work draft of Title 29 the Kenai Peninsula Borough would loose approximately 13.9 Million in assessed valuation. This would equal about $41,727 based on a 3 mill average.

This would also put the Native lands in a better position to develope and compete in the open market, if they wished. They could do all the preliminary work, such as roads, utilities, survey, and hold the property for the highest return, and still not pay taxes. – this would only affect the Native Lands which would probably be located in the Cook Inlet area as well as the Bay.
We currently have 13.9 million in assessed value that the different regions have been paying taxes on. We have had them on the tax rolls for 4 or 5 years and they paid their taxes without paying under protest.

Cook Inlet	7,281,205
Ninilchik	924,950
Seldovia Native	2,882,300
Slamatoff	589,500
English Bay	2,708,800
Port Graham	1,068,000
Total	15,454,755

Also when 20 years are up & Native Lands would come on the tax rolls – then they would be Exempt at a tremendous loss to the Boro – (taxed until sold)

HOUSE CS FOR CS FOR SENATE BILL NO. 272 (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making special appropriations for payment as grants to the Municipality of Anchorage for the Eklutna Water Project and to the City of Kotzebue for drilling geothermal wells, to municipalities for fire protection, water and sewer projects, to school districts for school construction projects and to the Department of Education for payment as a grant to Yakutat School District; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $34,000,000 is appropriated from the general fund for payment as a grant to the Municipality of Anchorage for phase III final design of the Eklutna Water Project, including design of the water treatment plant and lake intake structure; construction of pipeline segment p-2 from Eagle River to Peters Creek and pipeline segment p-3 from Peters Creek to the Eklutna River; and miscellaneous costs of permitting and right-of-way acquisition.

* Sec. 2. The sum of $7,956,000 is appropriated from the general fund for payment as a grant to the City of Kotzebue for drilling exploratory geothermal wells.

* Sec. 3. The sum of $400,000 is appropriated from the general fund for payment as a grant to the City of Akiak for construction of a water and sewer system.

* Sec. 4. The sum of $750,000 is appropriated from the general fund for

B.3 Jan metlakatla

payment as a grant to the City of Fortuna Ledge for phase II construction of a water and sewer system.

* Sec. 5. The sum of $1,500,000 is appropriated from the general fund for payment as a grant to the City of Fort Yukon for phase II construction of a water and sewer system.

* Sec. 6. The sum of $1,320,000 is appropriated from the general fund for payment as a grant to the City of Craig for completion of phase I water source development.

* Sec. 7. The sum of $150,000 is appropriated from the general fund for payment as a grant to the City of Pelican for completion of fire protection systems.

* Sec. 8. The sum of $1,480,000 is appropriated from the general fund for payment as a grant to the City of Hoonah for phase III of the water improvement project.

* Sec. 9. The sum of $350,000 is appropriated from the general fund for payment as a grant to the City of Thorne Bay for purchase and upgrade of sewer and water treatment plants.

* Sec. 10. The sum of $5,122,000 is appropriated from the general fund for payment as a grant to the City and Borough of Juneau for community wide water system construction and repair.

* Sec. 11. The sum of $1,500,000 is appropriated from the general fund for payment as a grant to the Galena City School District for construction of an elementary addition to Galena School.

* Sec. 12. The sum of $1,450,000 is appropriated from the general fund for payment as a grant to the Iditarod Area School District for construction of an elementary addition to Grayling School.

* Sec. 13. The sum of $2,500,000 is appropriated from the general fund for payment as a grant to the Lower Kuskokwim School District for construction of an elementary addition to Quinhagak School.

* Sec. 14. The sum of $1,000,000 is appropriated from the general fund for payment as a grant to the Yukon Flats School District for construction of a new school in Stevens Village.

* Sec. 15. The sum of $1,000,000 is appropriated from the general fund for payment as a grant to the Yukon/Koyukuk School District for construction of a secondary addition to Manley Hot Springs School.

* Sec. 16. The sum of $2,499,000 is appropriated from the general fund for payment as a grant to the Kodiak Island School District for deficiency repairs.

* Sec. 17. The sum of $2,500,000 is appropriated from the general fund for payment as a grant to the South West Region School District for construction of a K-12 school at Clark's Point.

* Sec. 18. The sum of $1,700,000 is appropriated from the general fund to the Department of Education for payment as a grant to the Yakutat School District for elementary school addition and remodeling.

* Sec. ~~19.~~ 21. The appropriations made by this Act shall be disbursed in accordance with AS 37.05.315 - 37.05.325.

* Sec. ~~20.~~ 22. This Act takes effect immediately in accordance with AS 01.-10.070(c).

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM April 11, 1984

SUBJECT: Title of SB 272

TO: Representative Mike W. Miller
Chairman
House Community and Regional Affairs

FROM: Billy G. Berrier
Director
Division of Legal Services

When CSSB 272 (Rls) was before the Senate it was amended to add an appropriation of $3,300,000 to the Alaska Power Authority for Chester Lake Dam. This appropriation appears as sec. 19 of CSSB 272 (Rls) am. The amendment did not change the funding information or the title.

Section 13 of Article II of the Constitution of the State of Alaska requires that "The subject of each bill shall be reflected in the title." The purpose of the requirement has been held to give general notice of the content of the bill. In this instance the title is very specific and in our opinion the appropriation to the Alaska Power Authority does not fit within the title.

The Uniform Rules of the Alaska State Legislature contain stringent limitations of changes in a bill title in the second house.

The general statement of the limitation is contained in Rule 35 concerning amendments. The relevant part of that Rule provides:

> A motion or proposition on a subject that requires a change in the title of the bill as enacted in the house of origin, other than a clerical or technical change, is not in order in the second house.

Specific application of the change is covered in other rules.

Rule 24 relating to committee referral and action provides in subsection (c):

> A committee of the second house may not report a committee substitute for a bill or an amendment to a bill that requires a change in the title of the bill, other than a clerical or technical change, as the title was enacted in the house of origin.

Rule 41 relating to amendments in the other house provides in subsection (b):

> (b) An amendment to a bill introduced in the other house is not in order if the amendment requires a change of the bill title other than a clerical or technical change.

Rule 42 relating to conference and free conference committees provides in subsection (e):

> (e) A Conference Committee, a Conference Committee with limited powers of free conference, or a Free Conference Committee may not adopt a report that requires a change in the title of a bill other than a clerical or technical change.

All these are identical in substance.

The prohibition is absolute except for the exception made in the rules. There is no provision for waiving this requirement.

The only exception in the second house is for clerical or technical change.

Clerical change is fairly clear. In my opinion, this refers to the type of changes that the enroller is authorized to make under Rule 43 or that the revisor of statutes is authorized to make under AS 01.05.031. Under Rule 43(a)

> The enrolling secretary is authorized to correct form and manifest errors which are clerical, typographical, or errors in spelling or errors by way of additions or omissions.

Under AS 01.05.031, the revisor is authorized to edit and revise the laws "without changing the meaning of any law".

The term "technical change" is more difficult to apply. In my opinion this is intended only to allow changes in the title of a bill which are necessary for technical reasons to conform the title to the subject matter in the bill as adopted in the first house without change in the scope of the bill.

In my opinion the title change here is a technical change as that term is used in the Uniform Rules since the only effect of the change is to conform the title to the bill as adopted in the Senate.

We have therefore corrected the title and the funding information.

As a procedural matter since this involves a title change in the second house I would suggest that the committee report on the bill specifically refer to the change and the reason for the change.

AKIAK - WATER AND SEWER FACILITIES (VSW) 400.0

Village Safe Water has identified Akiak as having one of the most serious water problems in the State. Residential wells are producing water which exceeds water quality standards for iron by as much as 27,000%. USPHS began drilling wells for individual homes, and, while early test results showed relatively "good" water during the early stages of the drilling program, recent water analysis has shown many wells are producing unacceptable water.

FORTUNA LEDGE WATER/SEWER SYSTEM - PHASE II

Fortuna Ledge 1,000.0

The City of Fortuna Ledge proposes to construct 10,600 linear feet of water transmission line and 15,100 linear feet of sewer main to serve the 119 lots included in the new residential subdivision area. Water and sewer study plans also provide for a lift station and water works building modifications. The proposed water and sewer extention will utilize an existing system which appears capable of handling the additional load.

Cost estimates for the water and sewer system are based on 1984 dollars and using local labor and equipment.

CONCEPTUAL COST ESTIMATE

A cost estimate has been prepared based upon the information contained in the "Design Criteria" section of this document. This estimate is based upon the premise that the new building will be located as shown on the site plan (2-3), and that construction will begin in 1984.

Listed below is a summary of the construction furnishings and equipment costs for Galena Elementary School. The costs per square foot of the building average $213.

DIVISION	1	GENERAL CONDITIONS	$ 536,000
DIVISION	2	SITE WORK	$ 47,000
DIVISION	3	FOUNDATION WORK	$ 344,000
DIVISION	5	METALS	$ 10,000
DIVISION	6	CARPENTRY	$ 269,000
DIVISION	7	MOISTURE PROTECTION	$ 221,000
DIVISION	8	DOORS & WINDOWS	$ 82,000
DIVISION	9	FINISHES	$ 265,000
DIVISION	10	SPECIALTIES	$ 36,000
DIVISION	11	EQUIPMENT	$ 8,000
DIVISION	12	FURNISHINGS	$ 250,000
DIVISION	15	MECHANICAL	$ 434,000
DIVISION	16	ELECTRICAL	$ 278,000
MARKUPS	17	OVERHEAD & PROFIT	$ 370,000
TOTAL			$ 3,150,000

Budget

INTRODUCTION

The following is a construction budget which is based on a cost of $250/square foot. This was determined as follows:

- Average bid at Nikolai in 1983 was $262/square foot. This school is of similar construction and built for the Iditarod Area School District.
- 8% escalation to summer of 1984 = $282/square foot
- Reduction due to size of Grayling and accessibility = $250/square foot

BUDGET

2,000 square feet (remodeled) X $125/square foot =	$250,000
12,588 square feet X $250/square foot =	$3,147,000
Subtotal	$3,397,000

Project Overhead and Other Costs		
Administration Cost	7.25%	$246,282
Design Costs	8.00%	$281,951
Furnishing and Equipment Costs	8.00%	$271,760
Art	1.00%	$33,970
Subtotal		$4,230,963
Project Contingency	5.00%	$211,548
Project Total		$4,442,511

This project could be funded by a direct grant from the state. The grant could be supplemented by funds available from the federal government. These funds are available to those school sites being omitted by the Bureau of Indian Affairs education program.

To begin construction in 1984 and finish before June of 1985, which is the date the B.I.A. will curtail its sponsorship of the elementary program, would should begin immediately. This would insure the state of not occupying the B.I.A. school which has never been required to meet local building codes. If the state were to occupy the school additional funding would have to be found to upgrade the existing B.I.A. school to current fire/life safety codes.

QUINHAGAK

Village Profile

Quinhagak is located on the south of the Kanektok River. The population is an estimated 340 (1980). Two school sites exist; an elementary school with current K-8 enrollment of 85, and a high school with 9-12 enrollment of 56. Total enrollment 141.

Building Data

Building 203 is a two-classroom school/quarters of wood frame construction consisting of 4,233 square feet built in 1963 and relocated in 1979. Building 204 houses storage and two standby generators in a wood frame structure of 1,332 square feet built in 1963 and relocated in 1979. Building 206 is a two-classroom wood frame structure of 2,844 square feet constructed in 1968 and relocated in 1979. Building 208 is a classroom/quarters wood frame structure of 2,880 square feet constructed in 1979. The school is of one-hour construction containing 9,480 square feet built in 1979.

Summary Diagram

1A
UPGRADE OF EXISTING ELEM SCHOOL (7,877 SQ. FT.) + 20 YEAR LIFE CYCLE

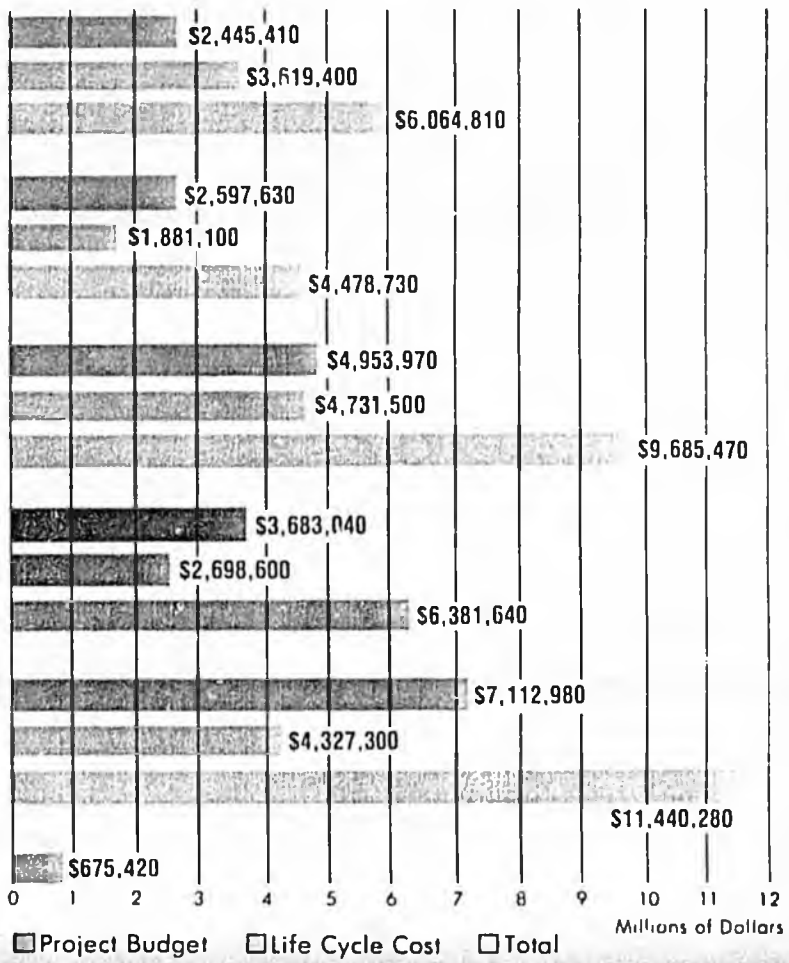
1B
ADDITION OF 7,877 SQ. FT. TO HIGH SCHOOL + 20 YEAR LIFE CYCLE

2A
REMODEL OF EXISTING ELEM SCHOOL (7,877 SQ. FT.) & ADDITION OF 3,423 SQ. FT. + 20 YEAR LIFE CYCLE

2B (Recommended)
ADDITION OF 11,300 SQ. FT. TO HIGH SCHOOL + 20 YEAR LIFE CYCLE

3
REMODEL OF EXISTING HIGH SCHOOL (9,480 SQ. FT.) & ADDITION OF 18,120 SQ. FT. + 20 YEAR LIFE CYCLE

PREVIOUS BIA STUDY



Recommendation

Alternate 2B would provide a new building which addresses the educational goals of the district as well as provides common use of staff and facility without the inherent problems of operating four separate buildings for a 20 year cost 5.5% more than Alternate 1A. Alternate 2B should be pursued.

Yukon Flats School District

Fort Yukon, Alaska 99740

CAPITAL IMPROVEMENT PROJECT

Priority Rank 2 of 11

Project: Stevens Village, New Elementary/High School

Capital Request: $2,800,000

PROJECT DESCRIPTION AND PUBLIC BENEFITS

Stevens Village is on the north bank of the Yukon River, 10 miles east of the Elliot Highway crossing and about 50 miles west of Beaver. This is a traditional Native village, settled in the late 1800's. Income here is obtained from construction work, railroad work, river transportation work, and fishing.

There were secondary age students attending Mt. Edgecumbe School. With the closing of that facility, Stevens Village school has been impacted.

Two teachers, a teacher aide, and 16 students, grades K-12, are presently housed in a 800 square foot former BIA school, circa 1960. Conditions are already extremely overcrowded and with the addition of students returning from Mt. Edgecumbe, the situation has become very difficult.

There is no room at the present site to remodel and expand the present building. The project must be relocated and a new site has been selected with the cooperation of the Village Council.

The present school is energy inefficient. There have been waste water and sewage disposal problems at each spring thaw due to the small site and inadequate space for a sewage disposal system large enough to accommodate school needs. Department of Environmental Conservation had intimated possible school closure if sewage continues to contaminate village and school property due to inability of frozen soils to disperse waste water underground.

Finally, the school does not meet minimum space requirements mandated by the Tobeluk ("Hootch") Decree.

We propose a combined K-12 facility to include an elementary classroom, a secondary classroom, a vocational shop, a multipurpose room, kitchen, and mechanical area to total 6,210 square feet.

Costs:		
	Planning and architectural	$ 270,000
	Site Development	70,000
	Construction	2,228,000
	Legal	10,000
	Administration	22,000
	Equipment	200,000
	Total Project Cost	$2,800,000

YUKON/KOYUKUK SCHOOL DISTRICT - MANLEY HOT SPRINGS SCHOOL 1,000.0

This is a direct appropriation to the Yukon/Koyukuk School District through the DOE. Manley Hot Springs currently has a high school consisting of 960 square feet of classroom space and 556 square feet of supplementary space. The school district is requesting an additional 5,700 square feet of secondary space.

EKLUTNA STATUS REPORT

March 27, 1984

In the 1983 bond election Anchorage voters supported Eklutna Water Project bonding by a 3-to-1 margin. The $55 million bonding authorization will contribute Anchorage's 25 % share of total Eklutna project cost.

Gov. Sheffield before the Alaska State Chamber of Commerce in Sitka Sept. 29, 1983 said he would work to secure funding for this vitally needed project.

The project is on schedule and within budget. Bids for the P-1 segment (Ship Creek to Eagle River) construction were opened March 15.

The Municipality's $51 million request for Eklutna will keep the project on schedule. Funding at the $34 million level will threaten continuity of the project in late 1985/early 1986. Without funding by the 1984 Legislature the project will be delayed.

Significant underfunding of Eklutna in 1984 will result in added costs during construction estimated at $6 million to $8 million per year. Delays now mean completion delays. If funding delays completion of the project until 1989, water shortages may occur.

170,400 Alaskans will reside in the Eklutna service area in 1985. By 2024 the number of residents will increase to 449,200. Based on 150 gallons per capita per day (GPCD) usage, water requirements are:

YEAR	AVERAGE	MAXIMUM
1985	26 million	46 million
2025	67 million	117million

Present water supplies (Ship Creek and wells) provide 24 million gallons per day and 22 million gallons per day respectively. Demand will exceed supply in 1988.

FUNDING SUMMARY (in $ millions)

1982	1983	1984	1985	1986
$13.6 (approp.)	$22.5 (approp.)	$51.0 (request)	$47.0 (request)	$31.0 (request)
		$17.0 (bonds)	$15.0 (bonds)	$23.0 (bonds)

INTRODUCTION

This document summarizes the salient information about the Eklutna Water Project, a major water resource development for the future. It has been written so that interested citizens and affected parties can be knowledgeable about the project. The most commonly asked questions are answered in this summary, the project's history is traced, a description of the project is given, recent project activities are described, future activities are given, and project funding is detailed.

Not all information on the project can be contained in a document this size. If unanswered questions arise about any aspect of the project, interested parties should contact the Eklutna Water Project office.

NEED FOR PROJECT

The need for an additional water source was determined based on projections of future service area populations, estimates of per capita water use, and expected capacities of existing and planned water supplies.

Since there is a large variance in the previous population projections for the Municipality that have been made by others, it was decided to utilize the Municipality's Community Planning Department's projections for the purposes of the Eklutna Water Project. Those projections have been made for the Anchorage Bowl and the Northern Communities through the turn of the century. Extrapolating the population projections to the end of the project planning period, the project team has determined that the service area population will be about 449,000 in the year 2025. Of that total, 385,000 are expected to reside in the Anchorage Bowl while the remaining 64,000 are expected to live in the communities of Eagle River, Birchwood, Chugiak, Peters Creek, and Eklutna. These population projections are shown in Table 1 by five-year increments.

TABLE 1

EKLUTNA WATER PROJECT

SERVICE AREA POPULATION PROJECTIONS

Year	Anchorage Bowl	Northern Communities	Total EWP Service Area
1985	149,600	20,800	170,400
1990	179,700	26,200	205,900
1995	209,700	31,600	241,300
2000	239,800	37,000	276,800
2005	269,900	42,400	312,300
2010	298,800	47,800	346,600
2015	327,600	53,200	380,800
2020	356,400	58,600	415,000
2025	385,200	64,000	449,200

The area to be served by the Eklutna Water Project is divided into two service areas, that of the Anchorage Bowl, and that of the Northern Communities. The Anchorage Bowl service area includes the region south of the military bases to Turnagain Arm just south of Potter Marsh, excluding some Hillside areas which use on-site supply systems. It has been assumed that the military complexes will continue to supply their own water.

The Northern Communities water service area extends from north and east of Fort Richardson to the village of Eklutna, including the communities of Eagle River, Chugiak, Peters Creek, Brichwood, and Eklutna. It is anticipated that Chugach State Park will not receive water and some rural areas will continue to supply their own water.

Data on historic water demands from 1969 to the present showed an average use of 174 gallons per capita per day (gpcd). However, because of the trend of decreasing consumption and accelerated water conservation efforts by the Municipality, an amount of only 150 gpcd was used for project planning purposes. The ratio of maximum day demand to average day demand of 1.75 has been used for the project based on historical information and risk analyses.

The water utility has instituted several measures for conserving water. Education programs are given in schools, flow restricters are continuing to be distributed, and industrial, commercial and multi-family domestic users are now billed for water consumption based on metered usage. Leak detection and repair of distribution systems is ongoing. This program has resulted in measurable water conservation throughout the system. While these methods of water conservation have been effective in limiting use, they do not have the potential of eliminating the need for expansion of the water supply.

Based on the population projections, per capita water demands, and ratios of maximum day to average day demands described in the preceding paragraphs, future water requirements were determined. These requirements are displayed in Table 2.

To meet these water demands, Anchorage will have a supply of about 46 million gallons per day (mgd). This is based on 24 mgd from the Ship Creek Water Treatment Plant after its expansion in 1985 and 22 mgd from wells. However, demand is expected to exceed supply by 1988. Therefore, a new water source must be obtained.

TABLE 2

MUNICIPALITY OF ANCHORAGE
EKLUTNA WATER PROJECT SERVICE AREA
PROJECTED WATER REQUIREMENTS

Year	Average Annual Water Requirements (mgd)	Maximum Day Water Requirements (mgd)
1985	26	46
1990	31	54
1995	36	68
2000	42	74
2005	47	82
2010	52	91
2015	57	100
2020	62	109
2025	67	117

HISTORY OF THE PROJECT

Many alternative sources of supplemental water for the Anchorage water service area have been examined over the past decade.

A report on Anchorage Water Sources (Tryck, Nyman & Hayes, et. al., 1973) examined at least 25 potential water sources, ranging from artificial recharge of Anchorage Bowl aquifers and Cook Inlet desalinization to tapping streams from Portage to Chickaloon. That study recommended offstream storage of Ship Creek water on Fort Richardson as the most feasible solution to Anchorage's water problems.

Military opposition to Tryck, Nyman & Hayes' proposal eventually led to studies performed as part of the U.S. Army Corps of Engineers' Metropolitan Anchorage Urban Study (MAUS) in 1979. The MAUS study reexamined several of the alternatives studied previously, including a different offstream storage site at Ship Creek, groundwater alternatives, and other Ship Creek, Eagle River, Eklutna Lake, and Campbell Creek alternatives. Final MAUS recommendations included development of an Eklutna diversion or an Eagle River dam and reservoir. The Ship Creek storage basin option was eventually eliminated based on military opposition, MAUS findings, and other considerations.

Between the programs mentioned above, and other studies, at least 28 alternative water sources have been considered for an Anchorage area water supply. These are listed below with summarized reasons for rejection or acceptance.

The following streams were rejected as sources primarily because of lack of a suitable storage site, inadequate discharge, high sediment loads, or long or difficult water transmission line requirements: Little Susitna River, Matanuska River, Knik River, Peters Creek, South Fork Eagle River, Campbell Creek, Chester Creek, Rabbit/Indian/McHugh Creeks, Bird Creek, Twenty-Mile River, Portage Lake, Placer River, Six-Mile Creek, Resurrection Creek, and Chickaloon River. Pt. MacKenzie surface and groundwater sources were found to be inadequate, as were Eagle River, Matanuska-Knik and Portage area groundwater sources. Desalinization of Cook Inlet would not be economically feasible, reuse of present sources would be too costly, and additional conservation measures would not be adequate.

Seven other, more apparent, potential sources were gradually narrowed down to one most feasible alternative: tapping the Eklutna drainage. Use of Anchorage Bowl groundwater resources, with or without artificial recharge of the aquifers, was rejected mainly because of already near-capacity development of that source, energy requirements, unknown impacts on present groundwater supplies, and because it offers only a short-term solution.

Use of a dam on Ship Creek, or offstream storage there, was rejected because of high capital costs, adverse environmental impacts, inadequate long-term supply and complex water and land rights problems.

Tests of Eagle River area groundwater supplies indicated that very little water is available. A dam on Eagle River was rejected because of extreme adverse environmental impacts, great capital costs, technical complexity and difficulty of land acquisition.

These latter two sources, as well as the Eklutna drainage, were examined in detail by CH_2M Hill in their 1981-82 Eagle River Water Resource Study.

Eklutna Lake was determined to be the best solution to Anchorage's long-term water supply problems. The lake would be able to supply up to 200 mgd, more than enough to meet Anchorage's anticipated needs in planning year 2025. Potential adverse environmental impacts of this project would be minimal. No geotechnical problems have been identified which would prevent or significantly complicate construction of the project, nor have other difficulties been encountered which would delay completion of the project beyond the time additional water is needed for Anchorage. Although tapping the Eklutna water source would have a high capital cost, its unit cost over the life of the project is the lowest of any alternative examined. The main disadvantages included the high capital cost, water treatment requirements, and the deprivation of power-generating water to the Eklutna powerhouse.

As recommended during CH_2M Hill's study, the potential for Eklutna water was further studied and refined. CH_2M Hill proposed three different alternatives: one tapped the Eklutna Power Plant tunnel upstream of the power plant; one tapped the tailrace after water was used for power generation; and the third proposed pumping

water from Eklutna Lake into Eklutna River, and then taking the water from the river near the lower end of the valley. The CH_2M Hill studies recommended the alternative which would take water from the tailrace because of its relative technical simplicity, and because it would not impact power plant generation.

In continuing efforts to develop a new water supply, the Anchorage Water and Wastewater Utility (AWWU) contracted with the Eklutna Water Project team in November, 1982, to act as the Program Management Consultant. The project team examined an additional means of using Eklutna water as a water source. This is known as Alternative IV and involves diversion of water directly from Eklutna Lake, or the power plant tunnel near the lake, and transmission of the water from there to Anchorage by pipeline. This alternative was found to be superior when environmental, permitting, right-of-way, geotechnical, energy, and cost aspects were considered. This is the alternative finally selected and now being developed as the Eklutna Water Project (EWP).

DESCRIPTION OF THE PROJECT

The Eklutna Water Project will divert water from Alaska Power Administration's (APA) existing tunnel connecting Eklutna Lake with the Eklutna Power Plant (EPP). From there, water will flow by gravity through another tunnel and a buried pipeline down the Eklutna River Valley to a water treatment plant located on a bench above the river. After treatment, the water will flow by gravity through a 23-mile-long buried pipeline through the communities of Eklutna, Peters Creek, Chugiak, Birchwood, and Eagle River, to the distribution system near the expanded Ship Creek Water Treatment Plant (SCWTP). Energy will be recovered from the flowing water at each treatment plant location. This system will supply water to the Anchorage service area, from Eklutna Village to Potter Marsh in South Anchorage. The selected alignment and location of facilities are depicted on Figure 1.

The maximum day design flow in the year 2025 is 70 mgd and the average flow during that year is 41 mgd. Until EWP facilities are completed, an interim booster pump station near the SCWTP will be used to supply Ship Creek water to the Eagle River area.

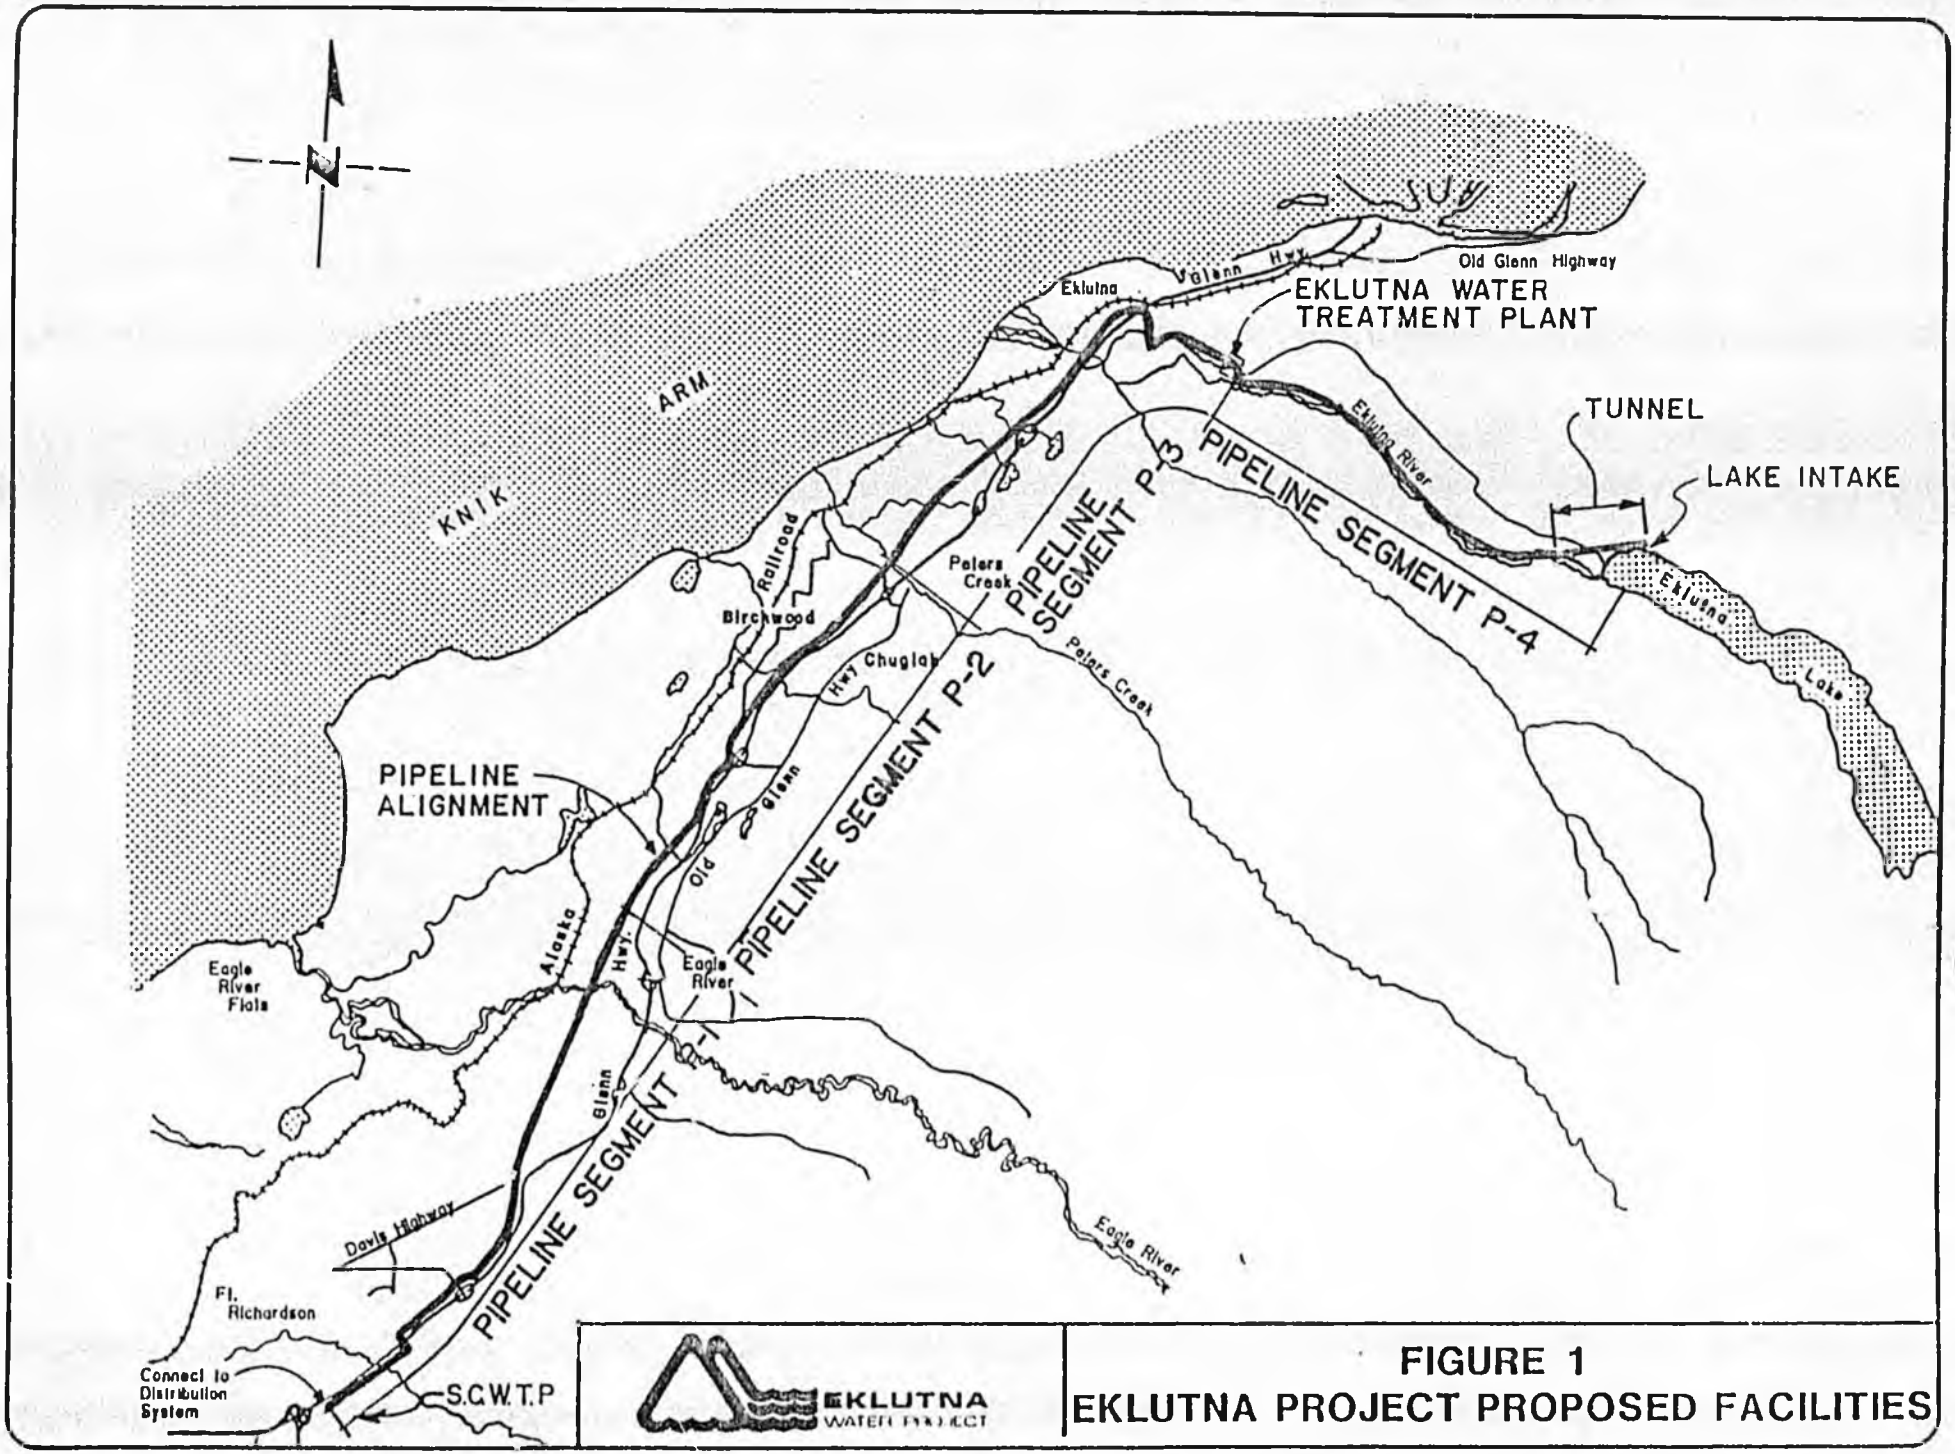

FIGURE 1
EKLUTNA PROJECT PROPOSED FACILITIES

Diversion of Eklutna Lake water involves tapping the 9-foot diameter tunnel to the Eklutna Power Plant. The new 7-foot diameter tunnel will connect this existing tunnel with a new pipeline located in the Eklutna River bed below the dam at the downstream end of Eklutna Lake. The new tunnel will be over one mile in length. Connection to the existing tunnel will be precisely planned and carefully executed so as to minimize disturbance to EPP. A gate house will be constructed near the connection of the two tunnels. The top of the gate house will be the only visible evidence of a diversion for the EWP. Downstream of the diversion tunnel, water will be conveyed in a buried 54-inch pipeline which will be constructed along the Eklutna River bed (pipeline segment P-4) to an energy recovery station at the Eklutna Water Treatment Plant (EWTP) which will be located above the river bed at about 620 feet elevation. Generating capacity of this station will be approximately 1.0 MW. It is estimated that in the year 2025, this energy recovery station will produce over eight million KWH per year with water diverted from Eklutna Lake.

The Eklutna Water Treatment Plant will be designed to use either conventional treatment or direct filtration to achieve the desired water quality. Conventional treatment entails rapid mixing, flocculation, sedimentation, and filtration. During most of the year direct filtration, which bypasses the sedimentation basins, is feasible. It is also preferable because it requires a lower coagulant dosage and reduces the amount of sludge.

Pilot water treatment plant studies have been conducted in three phases using water from Eklutna Lake during all the seasons. The first phase, which investigated treatability of Eklutna Lake water during winter, determined that good quality water could be produced using conventional treatment or direct filtration. Phase 2 examined treatability of lake water during spring transition/early summer conditions, using direct filtration. The third phase of the pilot plant studies examined treatability of lake water during the expected period of highest turbidity in the fall. The findings of the whole program are that Eklutna Lake water, with its sometimes high concentrations of glacial flour, is treatable and that direct filtration will be possible most of the year, with conventional treatment being utilized during periods of high turbidity.

A treated water reservoir will be constructed at about elevation 600 feet, just downstream of the EWTP. The purpose of the reservoir is to absorb normal diurnal

fluctuations in water demand while maintaining a relatively constant flow through the EWTP. This reservoir will have an initial capacity of 10 to 15 million gallons.

Pipeline segments P-3 and P-2 extend from the treated water reservoir to Eagle River. P-3 begins at the reservoir, running down the slope to a crossing of Glenn Highway near the community of Eklutna. From there it crosses the river, and parallels Glenn Highway a short distance on the northwest side. It then follows the APA powerline easement and residential streets to its end in Peters Creek. The P-2 segment begins at that point, crosses Peters Creek, parallels the APA powerline easement and local streets, then parallels the Glenn Highway to Chugiak High School. It skirts the high school, crosses through the Lake Ridge Terrace Subdivision along residential streets, then parallels the APA powerline easement again to Artillery Road.

This 54-inch buried pipeline will have seven turnouts for delivery of water to northern communities along the route of pipeline segments P-2 and P-3.

Construction and permanent easements must be acquired along the pipeline alignment. Most of the property along P-2 and P-3 is owned by Eklutna, Inc. Other property owners include: Alaska Division of Parks, Fort Richardson Military Reservation, Alaska Department of Transportation and Public Facilities, Federal Highway Administration, Alaska Railroad, various utilities, native corporations, and approximately 50 private property owners. Permits and/or easements will be obtained from these owners before construction takes place.

A geotechnical study concluded that no major construction problems will be encountered along P-2 and P-3. Crossings of wetlands and streams, however, are specific environmental concerns. Construction schedules and procedures have been designed to minimize disturbance of existing biological and hydrologic regimes of wetlands. Special water management, trench, and backfill techniques will also be employed. The proposed alignment was moved in several cases to avoid designated wetlands. Impacts caused by stream crossings will be mitigated by construction practices such as timing, temporary diversions and bank stabilization. Crossing plans and mitigation means will be approved by the Alaska Department of Fish and Game.

Pipeline segment P-1, the first to be constructed, will extend generally parallel to the Glenn Highway from the vicinity of the SCWTP to a powerline easement, then roughly parallel with and adjacent to that easement as far as Artillery Road near Eagle River. The pipeline will vary between 54 and 48 inches in diameter, decreasing closer to the SCWTP. A 24-inch pipeline will also be constructed along Artillery Road to connect with the existing Eagle River water supply system.

Property owners or agencies with jurisdiction in the P-1 segment include: The U.S. Army Corps of Engineers and the Bureau of Land Management, the Alaska Department of Fish and Game, the Alaska Department of Transportation and Public Facilities, the Municipality of Anchorage, and several utilities. Permits, approvals, and/or letters of non-objection must be obtained from each of these agencies for their respective areas of jurisdiction. This permitting and approval process is almost complete for pipeline segment P-1.

A booster pump station/energy recovery station will be constructed upstream of the SCWTP. Until the entire pipeline is completed and supplying water from Eklutna Lake, this station will pump as much as 4.5 mgd from the SCWTP to Eagle River. Only the booster pump portion will be constructed as part of the P-1 phase, but the facility will be designed so it can be expanded and modified easily for energy recovery. After the entire project is complete, conversion to an energy recovery station will take place. The capacity of this generating station will be about 500 kw.

Lake level and storage records are available from 1946 to the present. Annual inflow over the past 30 years has averaged 210 mgd, varying between 150 and 290 mgd. Approximately one-half of this inflow comes from glacial melt, the other half coming from runoff. Lake level is generally lowest in late spring and highest in early fall. The EWP will not impact lake levels, because all water used by EWP will be diverted from that which normally flows to the Eklutna Power Plant.

The Eklutna Power Plant currently withdraws all the inflow except for infrequent spills. When the EWP comes on line, water diversions for domestic uses will reduce the EPP supply approximately 6 to 8 percent; by the year 2025 that will increase to 21 percent. The water project will decrease the amount of energy generated by the EPP, by that same 6 to 21 percent during the period from 1988 to 2025. However, the 1.5

MW energy recovery facilities constructed as part of the EWP will recover about 45 percent of the EPP deprived energy.

The Municipality of Anchorage Water and Wastewater Utility has reached an agreement with the Alaska Power Administration for an equitable method of replacing energy taken from the EPP by the EWP.

PROJECT SCHEDULE

All Eklutna Water Project facilities should be completed by mid-1988 pending availability of sufficient funding. Dates of completion of each pipeline segment and of the other facilities are shown in Figure 2.

Bids will be received for the first pipeline segment (P-1) in March, 1984, and construction is expected to start in June. That pipeline segment will be completed in the summer of 1985.

STATUS OF THE PROJECT

Many studies and other activities have been performed by the Eklutna Water Project team in the past year. These activities, are separated by task and listed below.

- A Management Plan for Design and Construction was completed in June 1983. (Task 2)

- The Preliminary Water Supply Master Plan Update report was completed in April, 1983. (Task 3)

- The Alternative IV Evaluation (tapping the lake directly) was completed in April, 1983. (Task 4)

- A Regional Geotechnical Report was completed in September, 1983. (Task 5)

- Pilot Plant Summary Reports have been completed for all three phases of the study. A summary and conclusion report for the entire study will be completed within the next few weeks. (Task 7)

- Several reports have been produced as part of the Public Involvement task. These speak to alternative sources of supply, project funding, and the project as a whole. This Executive Summary is also part of the Public Involvement program. (Task 9)

- The Environmental Information Document was completed in June, 1983. This document was the basis of permit support. (Task 10)

- Several reports have been completed under the First Technical Advisory Committee/Value Engineering task, which reviewed the pipeline segment P-1 alignment and lake diversion alternatives. (Task 11)

- The Predesign Report - Pipeline Segment P-1 was drafted in April, 1983, and for segments P-2, P-3 in October, 1983. Work is underway on the predesign report for P-4. (Task 12)

- Two preliminary studies for the lake diversion were completed in 1983. The draft of the predesign report for the lake diversion will be completed in January, 1984. (Task 13)

- The Second Technical Advisory Committee/Value Engineering task is partially completed. In October, 1983, the first session of this task reviewed the tunnel, P-4 alignment, and pipeline in general. The second session, to be held in March, 1984, will review the water treatment plant and look at the tunnel again. The following document has been produced: Value Engineering Study - 2nd Session. (Task 16)

- The Initial Design Report Pipeline Segment P-1 was completed in July, 1983. The draft of a similar report for pipeline segment P-2 will be completed in February, 1984. (Task 17)

- Water rights are currently in the process of being secured through negotiations with the APA. Legislation will be introduced in Congress in February to secure water rights. (Task 23)

- A document on Eagle River Water Supply and Energy Recovery was produced in July, 1983. (Task 24)

- Bids were received in November, 1983, for the prepurchase of valves for pipeline segment P-1. Plans and specifications for the construction of P-1 were 95% complete in 1983. This contract will be advertised in January, 1984. (Task 52)

- Ground surveys for final design of the pipeline segment P-2 were made in 1983. (Task 53)

- Ground surveys for final design of pipeline segment P-3 were completed in 1983. (Task 54)

In addition to the numerous studies made and documents produced, several permitting and environmental activities have been performed and completed. The U.S. Army Corps of Engineers Section 404 Permit which will allow crossing of wetlands was acquired in November, 1983, for the entire pipeline. The Alaska Department of Environmental Conservation Certificate of Reasonable Assurance (protecting water quality) was obtained. The Alaska Coastal Management Plan Consistency Determination was also accomplished. The Alaska Department of Fish and Game Title 16 Anadromous Fish Protection Permit was granted for the four stream crossings made in segments P-1 through P-3. The Municipality of Anchorage Urban Beautification Commission and the Planning and Zoning Commission have approved plans for the Ship Creek Interim Booster Pump Station.

A right-of-way grant must be obtained from the Bureau of Land Management (BLM) for the entire project. The BLM has joint jurisdiction (with the U.S. Army Corps of Engineers) over the Fort Richardson land, and also serves as the lead/coordinating agency for other landholders and utilities along the alignment. The required letters of non-objection have been received from affected parties, and the right-of-way grant for the entire pipeline is expected to be received early in March, 1984.

ACTIVITIES DURING 1984

Many activities key to the progress of the project will take place during 1984. For the P-1 segment, the contract for supply of the large valves was awarded on January 3. Advertisement for bid of construction contracts will take place on January 31, and bids will be received on March 15. Construction of this segment will begin in June. The P-1 segment will be further divided into four schedules to maximize opportunities for bidding by local contractors.

Final design of P-2 is expected to be complete in July and the construction contracts for that segment will be awarded in the fall of 1984. Final design of P-3 will be complete in October, and will be advertised for bids in November. Easements for both segments will be acquired during spring and summer of 1984.

Pipeline segment P-4 will continue through the predesign and initial design phases during 1984. The predesign report will be completed in October. Initial design will be finished in December. The consultant for final design will be selected during the summer.

Initial design of the lake diversion will be completed during the summer of 1984. The final design consultant also will be selected during the summer, and final design will commence in the fall.

The predesign report for the Eklutna Water Treatment Plant will be completed in April, 1984. Initial design will be finished in September. The final design consultant will be selected during the summer, with final design beginning in the fall.

Water rights to Eklutna Lake water will be acquired in 1984. Application for these rights will be filed with DNR, Land and Water Management, in January. A bill amending the APA's enabling legislation will be introduced before the U.S. Congress in February.

PROJECT FUNDING

Construction of the Eklutna Water Project will require a total expenditure of $220 million. This figure was estimated in late 1982 and, after a year of planning and

design, still represents a viable estimate for completion of the project in 1988. Funding must be obtained in a timely manner in order to maintain costs at the $220 million level.

Initial appropriations for the project have been received from the State Legislature, and continued support from that source will be required through the years 1984 to 1986. In 1982, $13.7 million was appropriated and $22.5 million was appropriated in 1983.

In ~~November~~ OCTOBER of 1983, public approval was received with over 75% favorable vote for sale of $55 million in bonds to help fund the project. These bonds will be sold on an as-needed basis. As a result of these bond sales, usage charges will increase by approximately 40 percent over present rates, or by about $5.40 per household per month. This increased rate will not be charged until water is actually supplied. No increase in charges will result from the portion of the project funded by legislative appropriations.

Three quarters of the total funds will be requested from the State Legislature, and one quarter of the funds will be obtained from the Municipality through bond sales. In order for the project to proceed on schedule, the following additional funding will be required. In October, 1984, $68 million will be required, $51 million of which will be requested from the Legislature. In 1985, a total of $62 million is needed, including $47 million from the Legislature. In 1986, the funding required for completion of the project will be $54 million, which will necessarily include a legislative appropriation of $30.8 million.

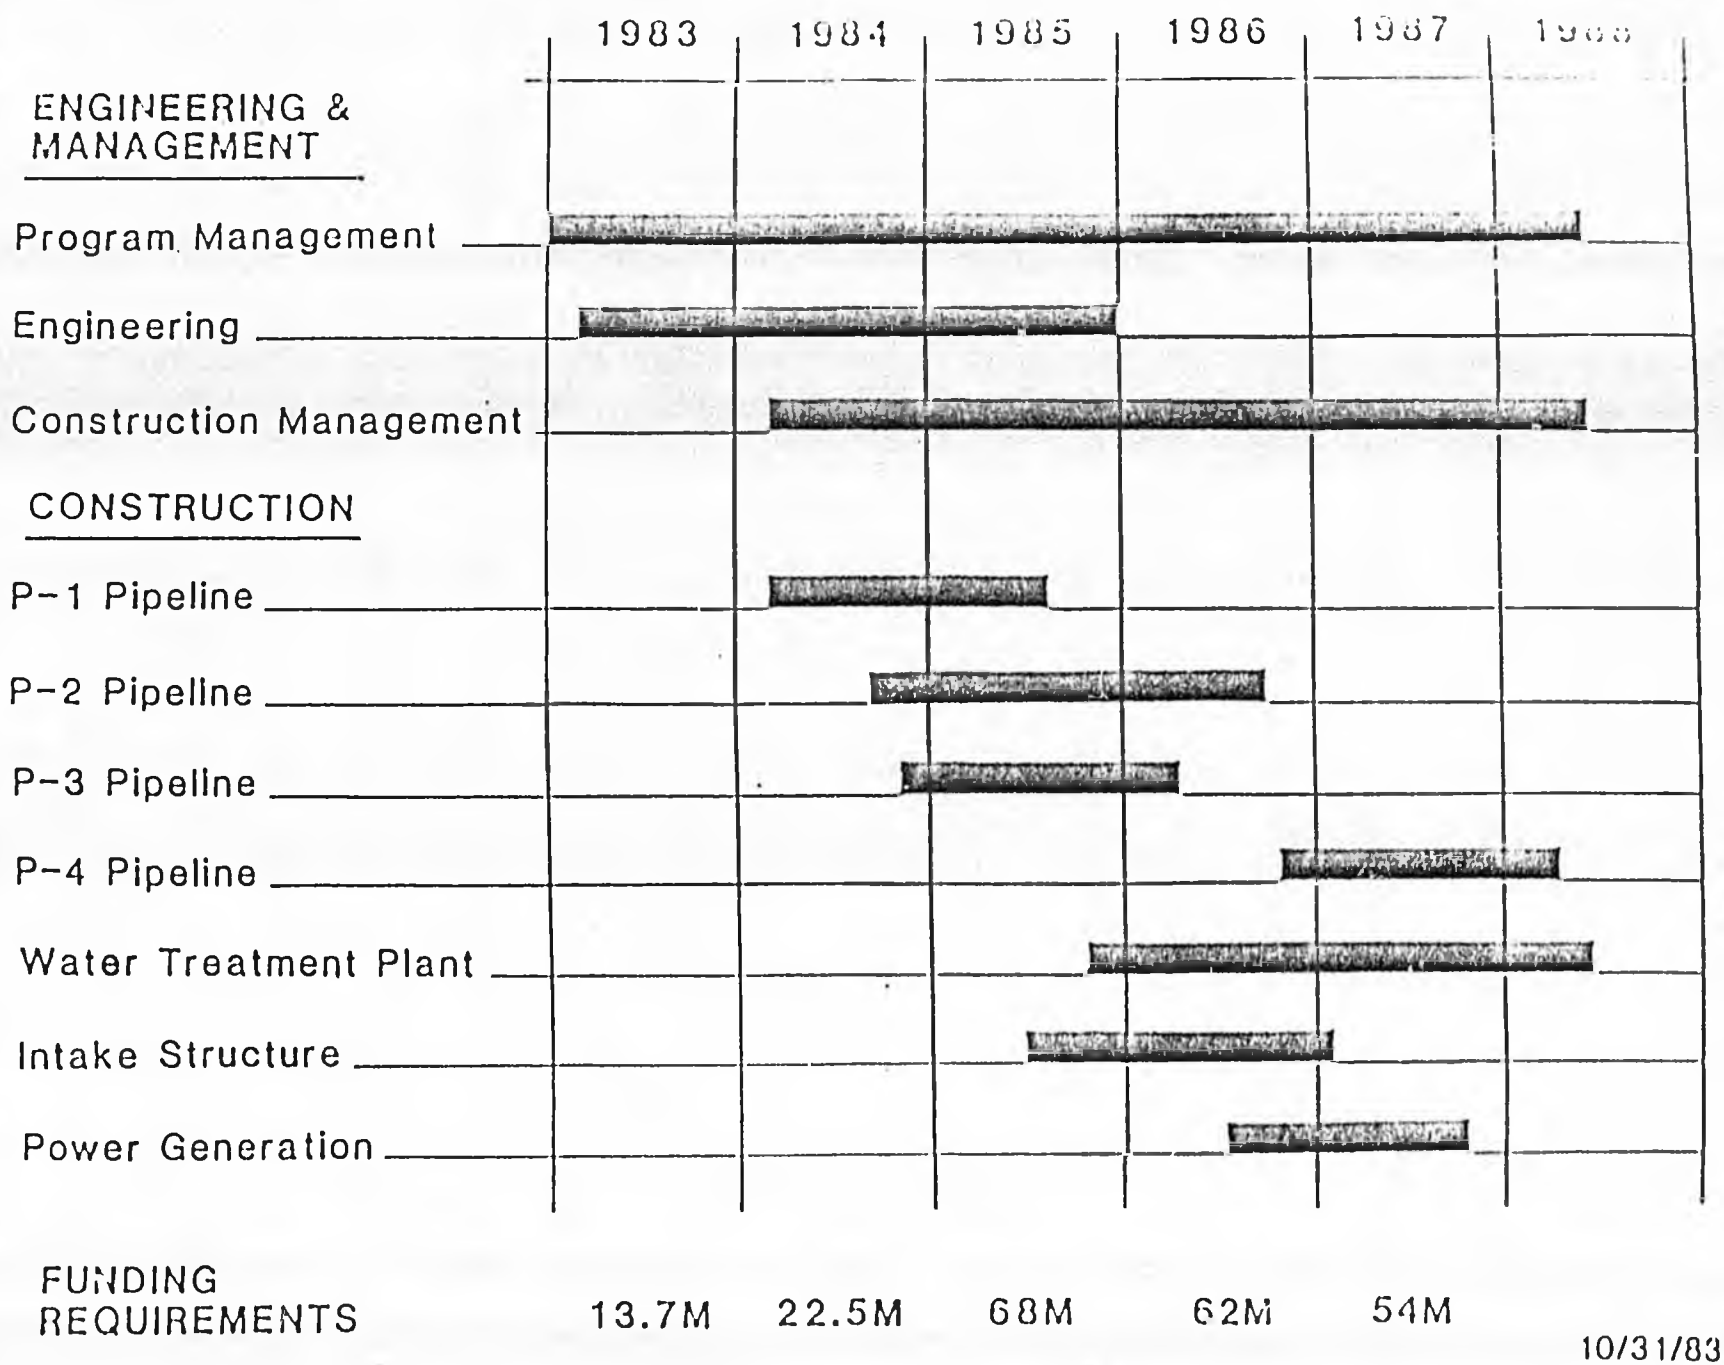
A barchart depicting funding needs and activity periods is included as Figure 3.

PROGRAM MANAGEMENT STRUCTURE

The Municipality of Anchorage Water and Wastewater Utility executed a contract in November, 1982, with James M. Montgomery, Consulting Engineers, Inc. (JMM), which placed that company in the principal role of Program Management Consultant for the Eklutna Water Project. JMM has overall responsibility for planning and design of the project, as well as supervision of construction. In addition to overall responsibility,

EKLUTNA WATER PROJECT

BAR CHART OF ACTIVITIES



10/31/83

FIGURE 3

[illegible] has primary responsibility for designing the project facilities. Three associate firms are in charge of other key aspects of the project and numerous other local firms are involved with the project.

QUADRA Engineering, Inc. is responsible for Geotechnical, Surveying, and Engineering Support for the project. QUADRA is assisted in that role by Woodward-Clyde Consultants, Inc., which is performing seismic studies.

Ott Water Engineers, Inc. is conducting the Environmental, Permitting, and Public Involvement programs, which includes obtaining necessary permits, rights-of-way and easements. Assisting with securing of Eklutna Lake water rights is the legal firm of Burr, Pease, and Kurtz. R. W. Beck and Associates, Inc. is a special consultant relating to energy replacement matters.

Sverdrup/SPCM, Inc. is responsible for Planning and Control tasks of the project, and Construction Management. In the latter responsibility, they are assisted by Triad Engineering, Inc. with consultation regarding construction practices. Sverdrup is also performing engineering for the lake diversion and tunnel.

Coffman Engineers, Inc. is conducting corrosion studies and is performing final design of the corrosion control system.

Three additional local firms have been retained for final design of segments of the pipeline. Tryck, Nyman and Hayes, Inc. is performing final design for segment P-1; DOWL Engineers, Inc. for segment P-2; and URS Engineers, Inc. for segment P-3. Other local firms will be added to perform final designs of the following facilities as the project progresses: Eklutna Water Treatment Plant, lake diversion, pipeline segment P-4, treated water reservoir, and energy recovery stations at Eklutna and Ship Creek.

The Anchorage Water and Wastewater Utility (AWWU) is the overall project administrator for the Eklutna Water Project. In that capacity, AWWU provides general direction to the consultants and makes detailed reviews of their work. AWWU has placed a full time project manager in the Eklutna Water Project office to more easily manage the large amount of work being performed on the project.

This management team has kept the project on schedule and within budget.

REPORT NO. 1

INTRODUCTION OF BILLS (Senate)

Mark Boyer 3763
Thurs. Morn. Sen. Fin.
City of North Pole hearing next wk. Mayor's office

Appropriations (special) (Fairbanks & Mat-Su activity centers)

SENATE BILL NO. 319, by Senators Fahrenkamp, Kerttula and Bennett. Appropriates $24 million for a grant to the City of Fairbanks for construction of a multipurpose spectator activity center. Appropriates $18 million for a grant to the Matanuska-Susitna Borough for construction of a multipurpose sports activity center in the Wasilla urban area. Effective immediately.

Introduced January 9 and referred to Community & Regional Affairs and Finance. 3763

Dissolution of Marriage (custody of children)

SENATE BILL NO. 320, by Senator Ray. Amends laws governing the dissolution of marriage as they pertain to custody of minor children. Adds language to portions of AS 25.24.200 - 260 (Dissolution of Marriage) explicitly requiring that the court have jurisdiction to decide custody of minor children. Petition for dissolution must state ". . . (4) the name, date of birth, and current custodial status of each minor child born of the marriage or adopted by the petitioners and facts showing whether the court has jurisdiction under AS 25.30.020 and is an appropriate forum under AS 25.30.050 and 25.30.060 to determine custody of and visitation with the children;" Provides that a decree of dissolution must state it does not bar future action on issues not resolved if "the court does not have jurisdiction ... or is not the appropriate forum ... to enter an order for custody and visitation; or the court otherwise lacks jurisdiction to grant all of the relief requested." Does not provide for an effective date (effective 90 days after Governor's signature).

Introduced January 9 and referred to Judiciary.

Office of Ombudsman (amending law)

SENATE BILL NO. 321, by Senator Ray. Makes miscellaneous changes to laws governing the Ombudsman, as follows:

--Rewrites AS 24.55.080(a) to read: "Subject to restrictions and limitations imposed by the director of the Legislative Affairs Agency, the administrative facilities and services of the Legislative Affairs Agency, including computer, data processing, and teleconference facilities, may be made available to the ombudsman to be used in the management of the office of the ombudsman to carry out the purposes of this chapter." Paragraph now reads: "The Alaska Legislative Council shall provide suitable office space and equipment for the ombudsman and his staff."

BILLS PASSED IN THE SENATE (cont'd)

Haines Annexation (disapproving)

SENATE JOINT RESOLUTION NO. 34, (see pages 166;341). Passed the Senate on February 20, 14-0-6. Excused: P. Fischer, V. Fischer. Halford, Josephson, Rodey, Sturgulewski.

OTHER ACTION IN THE SENATE

Appropriations (special) (Fbks./Mat-Su activity centers)

SENATE BILL NO. 319, (see page 1). On February 22, at the request of Senator Ferguson, the Community & Regional Affairs referral was waived. To Finance.

Legislative Immunity & Privileges

CS FOR SENATE BILL NO. 328 (JUDICIARY), (see pages 5;170). Before the Senate on February 22. Amendments 1 and 2 failed to be adopted (see below). Failed the Senate, 8-12. Yeas: Bennett, Ferguson, Josephson, Kerttula, Moss, Mulcahy, Ray, Sackett. Senator Vic Fischer gave notice of reconsideration of his vote.

Am. No. 1 by Halford failed, 4-14. It would have added a new section to the bill amending AS 24.40.031 as follows:

> Sec. 24.40.031. POSTPONEMENT OF CIVIL PROCEEDINGS WHEN A PARTY [OR ATTORNEY] IS A MEMBER OF THE LEGISLATURE. When it appears that a party [OR AN ATTORNEY OF RECORD OF A PARTY] to a civil action is a member of the legislature of this state, and that legislature is in session, the action shall be continued until 10 days after the legislature has adjourned, unless the party [OR ATTORNEY] upon the call of the action for trial waives the benefit of this section. When it appears that a party [OR AN ATTORNEY OF RECORD OF A PARTY] to a civil action is a member of the Alaska Legislative Council, the Legislative Budget and Audit Committee, or one of their subcommittees, the action shall be continued when the legislative council, budget and audit committee or the subcommittee, as the case may be, is holding a meeting, unless the party [OR ATTORNEY] upon the call of the action for trial waives the benefit of this section. When it is necessary to file a brief or memorandum of law in an action which has been continued under the provisions of this section, the action shall be continued for a time sufficient to prepare and file the brief or memorandum.

Am. No. 2 by Gilman failed, 4-16. It would have eliminated provision which grants immunity to legislators during the period from five days before until five days after a legislative committee meeting.

On February 23 Senator Vic Fischer brought up the reconsideration on CSSB 328 (Jud) and, at his request, it was held until February 28.

Oil & Gas Leases (fraudulant)

SENATE BILL NO. 432, (see page 221). On February 23 the President added a Finance referral. To Labor & Commerce, Judiciary, and Finance.

Mortician Trainees

SENATE BILL NO. 456, (see page 293). On February 23, at the request of Senator Vic Fischer, the State Affairs referral

RE: MULTIPURPOSE ACTIVITY CENTER, SB319.

MSG: I AM FOR THE FBX COMMUNITY MULTIPURPOSE ACTIVITY CENTER. FAIRBANKS' IS LONG OVERDUE FOR A BUILDING LIKE THIS.

The Fairbanks Community Multi-Purpose ACTIVITY CENTER

WHAT IS THAT?

At this point, it's only an idea . . . But, it could really happen if our communities want it to happen!

WHAT COULD I DO THERE?

As presently envisioned, the Community Activity Center would consist of three component parts:

AN ARENA

. . . that could hold around 6,000 spectators, and would be large enough to accommodate most sports uses short of football or outdoor soccer. It could serve as an exhibition hall for trade shows, etc., and could hold large entertainment events. (Remember when Johnny Cash and Billy Graham wanted to come to Fairbanks?)

A BANQUET/MEETING HALL

. . . that could seat around 1,000 people for dinner, or could be divided into smaller rooms for smaller meetings, workshops, etc.

A THEATER

. . . where up to 1,000 people could watch (or participate in) a live theatrical event (musical, drama, dance, etc.). It could also serve as a lecture hall, where seminars or large workshops are held.

OH, SO THIS IS GOING TO TAKE CARE OF ALL OUR PROBLEMS?

Not really — but it will answer our most pressing present and future needs for specialized space where the people of our communities might gather for many kinds of community activities.

WHEN ARE WE GOING TO START BUILDING?

Whoa, wait a minute! First we want to gather professional help in determining if such a facility is right for Interior Alaska. What is it going to cost to build and maintain it? Who should own it? Who should operate it?

WHERE'S THIS GOING TO BE BUILT?

That hasn't been decided, yet. Once it has been determined what kind of facility will be built, then we will know some of the places it might be built. Then the people of the community must have a chance to state their preference and the professionals must determine the advantages and disadvantages of various sites.

WHAT NOW? HOW DOES THIS INVOLVE ME?

The Community Activity Center needs everybody's support and input in order to be built. The Task Force is requesting funding from our communities and the State to perform a professional development recommendation. We need you to support that request. Also, Senators Fahrenkamp, Bennett, and Kertulla have introduced a bill in the Alaska State Senate for 24 million dollars to fund construction of the Community Activity Center. They, and our other Interior legislators, need to know that the community supports the concept of a Community Activity Center that is right for Interior Alaska. We urge you to contact our legislators and tell them you support the request for planning money as well as Senate Bill 319. Please send a Public Opinion Message via the Legislative Information Office, a telegram, or telephone our legislators immediately.

BY THE WAY . . . The following organizations have already endorsed this concept. If your club or group would like to get involved in this effort, let us know . . .

- Greater Fairbanks Chamber of Commerce
- Fairbanks Drama Association
- Fairbanks Light Opera Theatre
- Tanana Valley Fair Association
- Dance Omnium
- Molloy and Company Dance Studios
- University of Alaska — Fairbanks
- Tanana Valley Community College
- Central Labor Council
- Fairbanks Arts Association

— THE MAYOR'S COMMUNITY ACTIVITY CENTER TASK FORCE —

RESOLUTION OF CONSENSUS AND SUPPORT FOR COMMUNITY ACTIVITY CENTER CONCEPT

A group of individuals and representatives from many groups and organizations throughout the community has come together to gather support for a multi-purpose COMMUNITY ACTIVITY CENTER. Many needs in our community are not being met due to the lack of a proper facility. We believe that a facility can be designed and built which will be affordable, and will be truly useful to the majority of residents of the greater Fairbanks area. The groups and organizations listed below have reached consensus on the following points. We enthusiastically urge your support and active participation in these efforts.

1. The community needs a facility, or facilities, to accommodate large group gatherings. Residents would benefit from such facilities through participation in recreational, cultural and educational activities that improve the quality of life; by economic development of business, commercial and basic resource industries; and by bringing new people and dollars into the community through conventions and the visitor industry.

2. As presently perceived, three basic component functions need to be included in the COMMUNITY ACTIVITY CENTER:

   A. An arena with seating for at least 6000 to be used for sports, entertainment, trade shows, graduations, large meetings, rodeos, and other large attendance events.

   B. A banquet hall capable of seating at least 1000 for dinner which could also be divided into smaller rooms.

   C. A theater with seating for 800 people which could also be used as a lecture hall or auditorium even though built to theater specifications.

   One additional component we feel must be addressed, and hopefully accommodated, is small community group meeting spaces, for groups numbering 10-50.

3. It is apparent that one facility and one appropriation cannot meet all community needs. Therefore, we commit to maintain in active consideration all similar capital needs in the greater Fairbanks area as expressed by various organizations and groups in order to seek and support funding on a prioritized basis for projects which meet other needs at other sites.

4. There are several sites in the greater Fairbanks area that could be acceptable for the COMMUNITY ACTIVITY CENTER. There are many divergent considerations regarding site selection. Land availability and ownership, accessibility, availability or power and other utilities, desires of local residents and political considerations must all be taken into account. The decisions as to site selection may be controversial ones, and must be handled openly and professionally. We feel that site selection should be determined professionally during the developmental planning stages, and therefore for the purposes of planning for the type of facility desired by the community, and for gathering support, we agree to remain non-site-specific. A COMMUNITY ACTIVITY CENTER in ANY reasonable location is better than no COMMUNITY ACTIVITY CENTER at all.

5. It is imperative that any facility realized be right for the community. It must be useful for many years to come, be capable of future expansion, be complimentary to existing facilities, and must be affordable. Cost of operations and maintenance, efficient administration and management, site selection and provision of support services will be the first considerations of the professional planning effort. Funds will be sought for architectural and engineering services, selection of firms to be open to anyone interested. Community input and knowledge will be a crucial contribution during the planning effort.

Introduced by: Council Member Anderson
Council Member Immel
Date : February 27, 1984

RESOLUTION NO. 2507

A RESOLUTION TO SUPPORT THE CONCEPT OF A COMMUNITY ACTIVITY CENTER FOR THE CITY OF FAIRBANKS, ALASKA.

WHEREAS, many needs in our community are not being met due to the lack of a large scale, multi-purpose activity facility; and

WHEREAS, many organizations and individuals from the City have demonstrated their support of such a community activity center; and

WHEREAS, it is imperative that the facility be useful for many years to come, be capable of future expansion, be complementary to existing facilities, and affordable; and

WHEREAS, the Community Activity Center Task Force recommends the continuation of the effort to build such a structure; and

WHEREAS, the support of local governments is vital to the continued effort;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAIRBANKS, ALASKA, that they express their support of the community activity center concept.

PASSED and APPROVED this 27th day of February, 1984.

ORDINANCE NO. 83-20-2Y

AN ORDINANCE AMENDING THE FY 1983-84 BUDGET BY APPROPRIATING $100,000 TO PLAN FOR A COMMUNITY ACTIVITY CENTER

WHEREAS, as interest has been demonstrated in having a Community Activity Center in the Fairbanks North Star Borough; and

WHEREAS, it is in the best interest of our citizens to carefully plan for and evaluate the feasibility of such a facility; and

WHEREAS, the legislature of the State of Alaska has expressed interest in the project and requested a local commitment.

NOW, THEREFORE, BE IT ORDAINED by the Assembly of the Fairbanks North Star Borough that the FY 1983-84 budget is hereby amended by appropriating $100,000 from General Fund - Fund Balance to the Capital Projects Fund budgetary guideline entitled "Community Activity Center Planning" and increasing estimated revenue from contribution from General Fund in a like amount.

BE IT FURTHER ORDAINED that this ordinance is effective the day after a signed contract for matching funds is received from the state.

BE IT FURTHER ORDAINED that the Mayor is impowered to enter into a contract with the state for the matching funds.

WE

the groups and organizations indicated on the adjacent page, are representative of the organizations that have pledged their support to the concept of a Community Activity Center in Fairbanks. We believe that careful planning of this center now in response to the current and future needs of our citizen will result in the construction and operation of the proper facility at the right time in the correct location for the betterment of our community.

COMBINED FACILITIES
WOULD RESULT IN EFFICIENCIES AND COST SAVINGS

The Community Activity Center will be used for many different interests of the people of the Interior. The general description of this large capacity, year-round, multi-purpose activity facility includes a proscenium theatre, a banquet hall and an arena. The actual future activities within these facilities should only be limited by the imagination of the user groups in Fairbanks.

The Statement of Purpose for the Center is presented below. A preliminary description of the size of the Center is on the facing page. The facility must:

1. Serve the needs of the majority of residents of Interior Alaska,

2. Maintain acceptable ongoing maintenance and operations cost,

3. Provide positive benefits toward the overall quality of life,

4. Provide positive, long-term econcmic benefits,

5. Complement and enhance existing and planned facilties without unnecessary duplication and,

6. Generate, within the residents of the Interior of Alaska, a sense of pride.

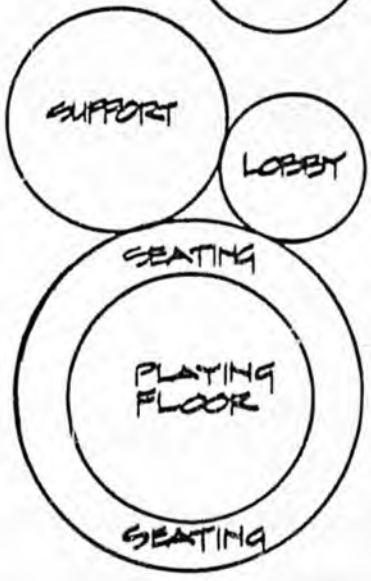
Estimated Parking Need.....	2,500 spaces



THE COMMUNITY'S NEEDS FOR THE CENTER HAVE BEEN CONFIRMED

Residents have become aware that the community is placing demands on local facilities that cannot be met at all times. Some of these demands overload the schedules of existing activity areas. In other cases, the existing facilities have not been able to accommodate the size of audience and/or type of activity. Activities have been cancelled in the community because there was no rain protection for the audience. The projected future growth of the Fairbanks population and economy suggest increasing unmet demands on the existing community facilities.

THEATER

A report in latter 1982 showed there were 58 performing arts groups in the community. These groups held most of their performances in six major facilities: The borough library auditorium (75 seats); the new FDA theater (80 seats); the Alaskaland theater (381 seats); the University of Alaska theater (481 seats); The University of Alaska concert hall (967 seats); and the Hering Auditorium (1,490 seats).

Each of these facilities has draw-backs for the performing arts such as size, acoustics and rehearsal facilities. One of the major documented problems is the inability of the performing arts groups to schedule events because of over-utilization.

The principal new facility needed in the community to meet rehearsal and performance scheduling problems, according to the 1982 needs assessment study, was an 800-1,000 seat Proscenium Theater, with orchestra pit and stagehouse with fly space.

Such a theater would have the greatest potential utilization by all types of performing arts groups in Fairbanks.

BANQUET HALL/MEETING ROOMS

The demand for meeting space is growing each year. The facility should be designed to posture Fairbanks to attract regional, national, and international meetings. The American Society of Association Executives estimates that by 1985 approximately 16,000 national, regional, and state associations will be holding 20,150 annual meetings per year. These meetings will draw 1.4 million convention delegates. Seventy percent of conventions held in the United States range in attendance from 400 to 1,500. Eighty seven percent or approximately 2,250 require less than 30,000 square feet of exhibit space or enough to accommodate an average of 200 booths. Additionally, thousands of corporate meetings with attendance ranging between 50 and 153 are held throughout the country each year. Convention delegates spend money and the economy of the host community grows stronger. If Fairbanks desirability as a meeting destination were increased, in only seven years a new meeting facility could generate more dollars to the Fairbanks economy than it cost to build. The development of a year-round visitor industry would help level off the seasonal fluctuations in the Fairbanks economy and would provide more permanent, year-round jobs.

Fairbanks' lack of an appropriate meeting facility was emphasized in 1983 when we saw fewer numbers of actual meetings held here than the previous year. This decline reflects the increased competition among Alaskan communities which now have convention facilities and are aggressively marketing them. How far we fall behind our competition depends upon the vision and committment of our community. Much of the space Fairbanks now offers is not adequate for large meetings and conventions. Experience demonstrates that Fairbanks needs a banquet facility flexibly planned capable of accommodating 1,000 to 1,500 people.

ARENA

Fairbanks is a community of active people. We are energetic participants and enthusiastic spectators. The community's available facilities to accommodate this healthy characteristic are strained to their limits. The facilities currently serving as an arena are:

UAF Patty Gym
UAF Ice Arena
Big Dipper Ice Arena
FNSB School District Facilities
Tanana Valley Fair Coliseum (summer only)

University of Alaska Fairbanks athletic and recreation facilities have reached their maximum use because of growth in student enrollment, expansion of the athletic program and an increase in the population of the Fairbanks community. Requests for use and space for community purposes must be increasingly denied.

The Big Dipper Ice Arena is now used nineteen hours a day. Since its opening in 1982 use of the Big Dipper facility has escalated by 65%. Current figures for the year 1983 indicate that there will be a 25% increase over the use level of 1982 when the monthly use was:

Public skating------	1,850	Gold King hockey----15,000	
Figure skating------	1,600	Men's hockey--------	1,000
Youth hockey--------	2,800	Co-ed hockey--------	400
Women's hockey------	400	High school hockey--	5,000
Old Timers hockey---	400	Exercise classes----	2,500

In short, the building is used to capacity and will accommodate virtually no increased use.

Facilities at the North Star Borough School District were shown by the Burcell Study in 1983 to be serving 347 community activities. These facilities are used in excess of 230,000 hours per year by over 14,000 participants. The conclusion of the fact gathering study was that the Fairbanks community would greatly benefit from a large community center.

Over the past several years numerous entertainers, professional ice shows, evangelists, and exhibitions have asked for space to present their programs. Because of the exceptionally high local use and the limited size of the facilities, most of these requests had to be denied.

The Tanana Valley Fair Master Plan, completed in 1981, has verified the need for an arena seating of 6,000 to 7,000 people in the Fairbanks area.

REPRESENTATIVE ARENA USES

Athletic Uses		Entertainment/Commercial Uses	
Figure Skating	Horse Shows	Shows	Fairs
Boxing	Olympic Archery	Concerts	Circus
Basketball	Volleyball	Religious Crusades	Cultural
Indoor Soccer	Tennis	Political Rallies	Demonstrations
Indoor track	Junior League Baseball	Exhibits	Jamborees
Curling	Rodeo	Conventions	
Hockey	Softball		

An arena with floor space sufficient to house an Olympic sheet of ice would coordinate well with the other proposed components. The size would be sufficient to accommodate most athletic uses except football and the regulation outdoor soccer. However, we do not rule out and would request that the feasibility of housing a football field or indoor soccer field be studied.

We propose that an arena be built which will accommodate 6,000 permanent seats. It is recommended that the floor space be large enough to include an Olympic size sheet of ice.

Floor space would be sufficient to meet the suggested criteria for an exhibition hall as determined by the American Society of Association Executives. The area could also house large entertainment events, laserium performances, electrical amplified productions and unstructured theater in the round.

THE PLANNING TASK FORCE

The issue of constructing major facilities in Fairbanks for community activities has been discussed before. However, 1984 appears a particularly appropriate time to begin planning for this facility. Fairbanks is a growing economic force in Interior Alaska with strong and active social groups supporting action that enhances our quality of life. There is now a "let's do it right this time" feeling in the community about the Community Activity Center. A task force appointed by the city and borough majors has been given the following charges:

1. Define the goal and objectives of the facility(ies).

2. Determine the social and economic benefits to the community at large and provide basis for your findings.

3. Determine a cost for the professional planning of the project and develop the scope of work for planning process.

4. Determine community needs for a multi-purpose facility.

5. Determine land required in terms of acreage and how site location should be determined.

6. Determine infrastructure required to support facility(ies), i.e., water, sewer, telephone, transportation access and air quality.

7. Determine construction costs.

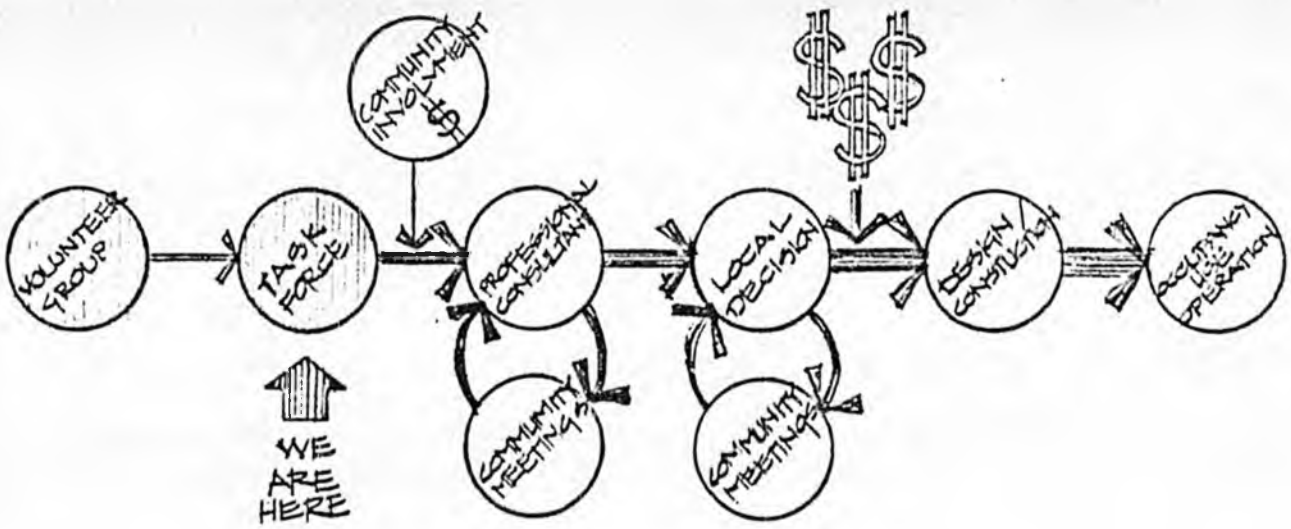
8. Determine administrative, maintenance and operations costs (all life cycle costs.)

9. Determine optimum ownership arrangement.

10. Determine source of revenue to meet administrative, maintenance and operations expenses for first five years. A pro forma profit/loss statement is required.

THE PLANNING HAS JUST STARTED

The City/Borough Task Force members recognize that a facility with the community significance of the Activity Center requires careful planning. Planning will continue to occur in careful, logical steps. Following receipt of planning funds, a professional consultant team will be engaged to answer the needs, locational and operational charges to the Task Force. Conclusions of their work will set the most realistic course for the creation of the Center in the future. Community opinion will be sought.



Local authorities will make the final decisions concerning what the Center will contain, how and when it will be constructed, where it will be located and how it will operated. Senators Bettye Fahrenkamp and Don Bennett have introduced Senate Bill 319 in the 1984 legislature. This bill could make grant money available to Fairbanks for the construction of the activity center. The infusion of capitol funding from State monies and/or local bonds will initiate design and construction of the Center. Occupancy and use could take place as early as summer 1986.

A COMMUNITY ACTIVITY CENTER FOR FAIRBANKS?

A GOOD IDEA!

TESTIMONY OF SENATOR BETTYE FAHRENKAMP
BEFORE THE SENATE FINANCE COMMITTEE
MARCH 8, 1984
SB 319

MR. CHAIRMAN, MEMBERS OF THE COMMITTEE, I WANT TO THANK YOU FOR BRINGING SB 319 PROVIDING FOR THE CONSTRUCTION OF MULTI-PURPOSE ACTIVITY CENTERS IN FAIRBANKS AND WASILLA, BEFORE THE COMMITTEE.

AS THE CHAIRMAN AND SOME OTHERS OF YOU KNOW, THE IDEA OF HAVING A MULTI-PURPOSE ACTIVITY CENTER IN THESE TWO COMMUNITIES IS NOT NEW. I THINK YOU HAVE BEFORE YOU TODAY A PLANNING DOCUMENT OF THE PROPOSED WASILLA FACILITY. HOWEVER, MANY MAY HAVE FORGOTTEN THAT OUR COMMUNITY HAS BEEN WORKING WITH THE IDEA OF A MULTIPURPOSE FACILITY TO MEET SPORTS, RECREATIONAL, SPECTATOR, CIVIC AND THEATRICAL NEEDS SINCE I'VE BEEN IN THE SENATE.

IN 1979 I WORKED TO SECURE FUNDS TO PERFORM A FACILITIES STUDY WHICH INVESTIGATED VARIOUS TYPES OF MULTIPURPOSE SPORTS AND RECREATIONAL FACILITIES WHICH WAS COMPLETED AND SUBMITTED TO THE LEGISLATURE IN 1980. AN OCTOBER 1982 NEEDS ASSESSMENT FOR PERFORMING ARTS GROUPS LOOKED AT THE USE OF EXISTING FACILITIES AND MADE RECOMMENDATIONS FOR NEW FACILITIES TO MEET THIS NEED. AND FINALLY, THE FAIRBANKS DOWNTOWN ASSOCIATION WHICH IS CHARGED WITH THE REVITALIZATION OF OUR DOWNTOWN CORE AREA HAS BEEN DISCUSSING PLANS WITH LOCAL AND NATIONAL ARCHITECTURAL FIRMS AND HOTEL OPERATORS OVER THE DESIGN AND CONSTRUCTION OF A MAJOR HOTEL DEVELOPMENT FOR DOWNTOWN.

WHY ALL THE FUSS? THE SIMPLE ANSWER IS THAT WHILE OTHER AREAS OF THE STATE HAVE BEEN UNDERGOING MAJOR EXPANSIONS IN THEIR AVAILABLE SPACE TO ACCOMMODATE LARGE GROUPS, FAIRBANKS HAS NOT ADDED ONE NEW STRUCTURE TO ACCOMMODATE A GROUP OF MORE THAN 400 PEOPLE SINCE THE CONSTRUCTION OF THE TRAVELERS INN IN THE MID

60's. THE FACT OF THE MATTER IS THAT NEARLY ANY GROUP OF ALASKANS WITH STATEWIDE REPRESENTATION WILL BRING A GROUP OF 500 OR MORE PEOPLE TOGETHER FOR A MEETING.

MOST RECENTLY, FAIRBANKS HOSTED THE WESTERN CONFERENCE OF STATE LEGISLATORS. OVER 500 WESTERN LEGISLATORS, AND THEIR STAFF CONVERGED ON FAIRBANKS. WE HAD TO HOUSE THEM IN PRIVATE HOMES AND 5 HOTELS IN TOWN. MEETINGS WERE NEARLY IMPOSSIBLE TO HOLD AS THERE IS NO FACILITY WHICH CAN ACCOMMODATE THE PLENAPY SESSIONS WHILE ALSO ACCOMMODATING THE SMALLER WORK GROUPS ASSOCIATED WITH SUCH A CONFERENCE.

AS THE HOST COMMITTEE CHAIRMAN OF THE CONFERENCE, I CAN TELL YOU THAT THE TASK OF ACCOMMODATING SUCH A GROUP WAS NO EASY TASK.

PERHAPS MOST ALARMING, HOWEVER, WAS NEWS LATER IN THE YEAR THAT TWO LARGE STATEWIDE GROUPS HAD DECLINED TO CHOSE FAIRBANKS AS THE SITE OF THEIR ANNUAL CONVENTIONS BECAUSE OF THE LACK OF HOTEL ROOMS, MEETING ROOMS, BANQUET FACILITIES AND ENTERTAINMENT FACILITIES.

THE FACT THAT THE ASSOCIATIONS OF MUNICIPAL CLERKS AND THE ASSOCIATION OF SCHOOL BOARDS CHOSE NOT TO COME TO FAIRBANKS WAS ALARMING. SO ALARMING THAT I FEEL PEOPLE IN OUR COMMUNITY HAVE AGAIN BEGUN TO FOCUS THEIR ATTENTION TO THE NEED FOR A TRULY MULTI-PURPOSE ACTIVITY CENTER TO BEGIN TO MEET THE OBVIOUS NEED.

WITH THE INTRODUCTION OF SB 319 A WIDE CROSS SECTION OF OUR COMMUNITY CAME TOGETHER TO CONCEPTUALLY DISCUSS THE IDEA OF AN ACTIVITY CENTER FOR OUR COMMUNITY. THEY ARE REPRESENTED HERE TODAY BY MR. GARY WILKEN WHO WILL TESTIFY IN MORE DETAIL IN A FEW MINUTES. WHAT I'D LIKE TO LEAVE THE COMMITTEE WITH IS THE MESSAGE THAT FAIRBANKS IS BECOMING SOLIDLY SUPPORTIVE OF THIS PROJECT AND EACH OF US WILL BE HEARING MORE FROM THEM IN THE WEEKS AHEAD. I ENCOURAGE THE COMMITTEE TO ACT FAVORABLY AND EXPEDITIOUSLY ON THIS LEGISLATION.

RESOLUTION NO. 2507

A RESOLUTION TO SUPPORT THE CONCEPT OF A COMMUNITY ACTIVITY CENTER FOR THE CITY OF FAIRBANKS, ALASKA.

WHEREAS, many needs in our community are not being met due to the lack of a large scale, multi-purpose activity facility; and

WHEREAS, many organizations and individuals from the City have demonstrated their support of such a community activity center; and

WHEREAS, it is imperative that the facility be useful for many years to come, be capable of future expansion, be complementary to existing facilities, and affordable; and

WHEREAS, the Community Activity Center Task Force recommends the continuation of the effort to build such a structure; and

WHEREAS, the support of local governments is vital to the continued effort;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAIRBANKS, ALASKA, that they express their support of the community activity center concept.

PASSED and APPROVED this 27th day of February, 1984.

BILL WALLEY, Mayor

ATTEST:

CARMA B. ROBERSON, City Clerk

Introduced:

ORDINANCE NO. 83-20-2Y

AN ORDINANCE AMENDING THE FY 1983-84 BUDGET BY APPROPRIATING $100,000 TO PLAN FOR A COMMUNITY ACTIVITY CENTER

WHEREAS, as interest has been demonstrated in having a Community Activity Center in the Fairbanks North Star Borough; and

WHEREAS, it is in the best interest of our citizens to carefully plan for and evaluate the feasibility of such a facility; and

WHEREAS, the legislature of the State of Alaska has expressed interest in the project and requested a local commitment.

NOW, THEREFORE, BE IT ORDAINED by the Assembly of the Fairbanks North Star Borough that the FY 1983-84 budget is hereby amended by appropriating $100,000 from General Fund - Fund Balance to the Capital Projects Fund budgetary guideline entitled "Community Activity Center Planning" and increasing estimated revenue from contribution from General Fund in a like amount.

BE IT FURTHER ORDAINED that this ordinance is effective the day after a signed contract for matching funds is received from the state.

BE IT FURTHER ORDAINED that the Mayor is impowered to enter into a contract with the state for the matching funds.

PASSED AND APPROVED THIS _____ DAY OF _____, 1984

_____
Presiding Officer

ATTEST:

_____
Clerk of the Assembly

SENATE BILL NO. 319

"An Act making special appropriations for payment as grants to the City of Fairbanks and the Matanuska-Susitna Borough for the construction of multipurpose activity centers; and providing for an effective date."

1/09/84	FIRST READING, SENATE Referred: C&RA, Finance
2/22/84	Moved from C&RA by unanimous consent
3/07/84	Scheduled for Senate Finance Hearing
FISCAL NOTE:	$42,000,000

SUMMARY:

SB 319 would appropriate $24,000,000 from the general fund for construction of a multipurpose spectator activity center in Fairbanks. The contract would be managed by the City of Fairbanks. A Community Activity Center Task Force (volunteer group) was appointed by the City of Fairbanks and the Fairbanks North Star Borough to further define the type of facility needed.

Attached is a copy of the pampnlet prepared by the Task Force, including a list of local organizations which support the activity center concept.

SB 319 would also appropriate $18,000,000 from the general fund for construction of a Multipurpose Activity Center in the Matanuska-Susitna Borough. In 1979 a group of Mat-Su Valley residents formed a non-profit organization called the Mat-Su Recreation Center Committee, Inc. to promote the project. In 1980 the legislature appropriated $50,000 for a feasibility study. The Multipurpose Center would be used by the school district during school hours, and by the community at other times.

Attached is additional information on the Mat-Su Multipurpose Center.

3/06/84

SB 319: Section 2

The Matanuska-Susitna Borough is the fastest growing area of the State. The area has no general use public recreation or cultural facilities. Schools in the borough are at maxium use currently. Two schools will be double shifting in the 1984-85 academic year and many "portable" classrooms are in use. The time frame for school construction is at least two years. The construction of this multipurpose center, designed eventually to grow into a major school complex, will make the construction time frame much shorter when a school is designated to be built.

Currently, there are no public use meeting rooms in the greater Wasilla and Palmer area. The largest meeting room is at Wasilla High School and holds approximately 250 people. There is a desperate need for an area for large group meetings and cultural activities and performances.

The idea of enhancing recreational and cultural opportunities in the Valley is strongly embraced. The facility would provide areas for meeting rooms, athletic facilities and, potentially, presentation rooms, a focus of community pride, and use as a true multipurpose complex.

With the rapid growth of southcentral Alaska from a rural to an urban environment, the Matanuska-Susitna Valley has been left to be a "recreational and cultural desert".

SB 319: Section 2

The attached fact sheet rom the Matanuska-Susitna Borough School District details the space and use problems that the area is working with. Page two of this memo includes explicit support for Section 2 of SB 319.

FACT SHEET ON THE MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT

The Mat-Su School District is the fastest growing district in the state. Student enrollment has increased dramatically since May, 1981, when 4,422 students were enrolled. To date, enrollments are 6,967 - more than a 50% increase in less than three years.

This growth has 16 of 20 schools at or near enrollment capacity. Following is a summary of Mat-Su facilities:

* Iditarod Elementary School - double shift next fall until the opening of Tanaina Elementary, scheduled for fall, 1985. Tanaina is predicated to be full when it opens.

* Wasilla Junior High School - double shift beginning next fall until at least the fall of 1986, when a new junior/senior high is scheduled to open. We have five portables at Wasilla Junior High now.

* A Wasilla area elementary school which opened this year is already at enrollment capacity. It lies in the fastest growing region of Wasilla.

* Wasilla and Palmer High Schools and Palmer City Elementary Schools are predicted to be at enrollment capacity next year.

* We are presently using 29 portable classrooms districtwide.

According to national statistics, Alaska is the fastest growing state in the union, and the Mat-Su Borough is the fastest growing region in Alaska. The bulk of the new population is settling in the Wasilla area, which is over-taxing schools and social service agencies. In the last 15 months we have accumulated $70 million in bonded indebtedness for school construction. At present, we are at bonded capacity. The need for state grants to accommodate new school construction for the Mat-Su School District is critical.

Since Mat-Su has more affordable housing than Anchorage, the area is attracting young families which generally have two or more children, and this rapid growth is expected to increase this summer. The district's greatest enrollments are occurring at the elementary school level, particularly in kindergarten. Our core area elementary schools are tremendously impacted, and there is presently one junior and one senior high in the Wasilla area that absorb graduating sixth graders from five elementary schools.

Also hard hit is the school district budget, which is $37.6 million for the current fiscal year. Next year's proposed budget is $50.6 million, which is a dramatic increase to local taxpayers. The Mat-Su Borough Assembly has passed a resolution on the amount they will fund the district next year. That amount falls far short of the money needed to hire new teachers, purchase materials and cover operating expenses. Unfortunately, a large increase in the construction of single family dwellings does not increase the Borough's assessed valuation in proportion to the costs of educating the new students.

It is crucial that the State of Alaska review a provision to aid areas which are experiencing extreme growth. This growth not only affects schools, it burdens social service agencies, state trooper offices and the courts. As a school district, we ask your support for all legislation which will alleviate some of the costs of educating children. We view education as a statewide issue, and support like legislation for other districts which are overburdened with population growth.

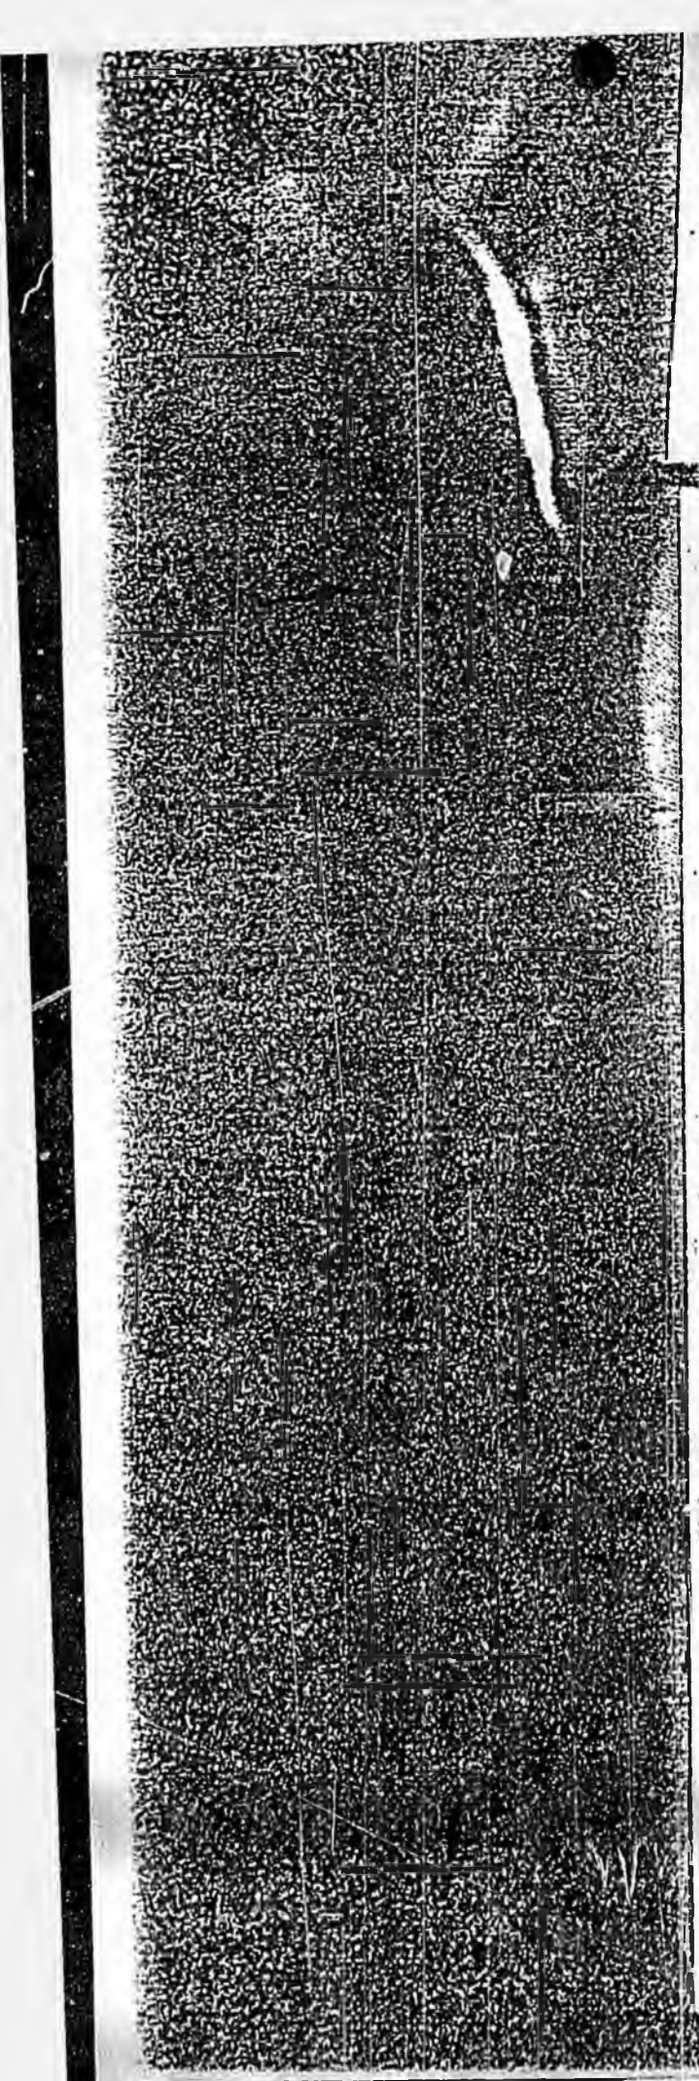
The Matanuska-Susitna Borough School District supports Senate Bill No.319 for a multi-purpose activity center to be built in the Matanuska-Susitna Borough. A recently completed census reveals that the Borough population has increased 70% since 1981. The unprecedented growth in population and the fact that the Borough has reached its maximum recommended bonding capacity has put a tremendous burden on the present school facilities for recreational and community meetings. The various public schools in the Borough are the primary focal point for community activities and recreational pastimes. Ironically at the same time the community is requesting more time for using the schools for non-school activities, the school facilities are becoming less available because of overcrowded schools, double-shifting, and budget constraints.

The District is convinced that there would be a mutual advantage in the building of the multi-purpose activity center. By building a needed secondary school on the same land as the activity center millions of dollars could be saved. The secondary school could utilize the activity center for their P.E. and fine arts programs and not have to duplicate those expensive features or buy the land.

Also, the people would begin to identify themselves with a regional concept rather than just the neighborhood school concept which the present smaller facility use seems to foster. This is a very important concept in an area of rapid growth where a community suffers from an identity crisis encouraged by commuting and the hectic pace of contemporary living standards. A regional activity center large enough to accommodate the needs of the people would polarize many facets of the community including sports clubs, civic organizations, local promotions of special events, and the public as individuals with special interests.

In summary, the Mat-Su School District enthusiastically supports Senate Bill No. 319 because it has the potential to serve the recreational and cultural interests of the community and to aid the District in fostering quality education at affordable prices through development of a multi-use concept.

Gordon C. Tope
Superintendent
Matanuska-Susitna Borough School District



...to their fires this winter if smoke pollution becomes too great.

State and local authorities have placed monitoring devices around the picturesque valley, which includes the area around the airport and the Mendenhall glacier, and specially trained officers soon will begin patrolling its neighborhoods.

Anyone violating a new city-borough woodsmoke ordinance, which means sending up a smoke plume blocking more than 20 percent of the view behind it, is subject to a $75 fine.

...has grown so severe that wood-burning bans were declared several times last year, but "nothing that lasted much more than 24 hours," said Dick Neve, who heads the state Department of Environmental Conservation.

"It's an ongoing problem in the valley," Neve said Friday. "When temperature conditions are just right, the smoke hangs in there like a blanket. There are many days when people can burn their stoves, but they'll be watched much more closely this year."

Measure would fund community centers

by Al Campbell
Times Valley Bureau

Wasilla — An $18 million, state funded community center for Wasilla would be an ideal way to ease the local taxpayers' share of meeting school and private recreational needs, according to Sen. Jay Kerttula, who has co-sponsored a bill to fund the project.

The building would be a "Taj Mahal" that would draw legislative funding from more vital services in the Matanuska-Susitna Borough, says Rep. Barbara Lacher.

Kerttula, a Democrat, will be challenged by Republican Lacher for Kerttula's borough-wide senate seat in next year's elections.

Kerttula, Sen. Bettye Fahrenkamp, D-Fairbanks, and Sen. Don Bennett, R-Fairbanks, have pre-filed a bill calling for a total of $42 million to build community centers in Fairbanks and Wasilla, with $18 million designated for this community of 3,000 people.

The senate president says the estimated $300,000-a-year operating costs should be about two-thirds paid with state reimbursement to the school district, which would be the major customer for the complex.

Kerttula says private groups who would use the sports and meeting facilities would make up most of the rest of the cost.

Kerttula acknowledged the concept is "unique, but necessary" as a way to reduce school district bonding totals which are rapidly approaching the limit of taxpayer tolerance.

He said with a central community facility, the local school district could build cheaper schools by eliminating the need for gymnasiums in many cases.

But Lacher said the $18 million would be cut from the Mat-Su Borough's "share of the pie" for capital projects, and deprive the area of roads, sewers and other projects and services.

"It would be nice to have it," Lacher said. "But we need a great many things before we need a Taj Mahal."

The freshman legislator said "the days are gone forever when the state should be funding recreational projects. There are too many people hungry for other things."

Lacher said if the money for the center could come from some sort of "grab bag" fund, she would support it, but given today's political realities, the borough would be "left short" on other priority state requests.

Kerttula said there could be a demand for the centers from other areas, and where booming school population warrants them, such as in the Matanuska-Susitna area, they should be built.

But he said communities would have to demonstrate they could support them, or they should not get the centers "just because they want them," he said.

RESOLUTION OF CONSENSUS AND SUPPORT FOR
COMMUNITY ACTIVITY CENTER CONCEPT

A group of individuals and representatives from many groups and organizations throughout the community has come together to gather support for a multi-purpose COMMUNITY ACTIVITY CENTER. Many needs in our community are not being met due to the lack of a proper facility. We believe that a facility can be designed and built which will be affordable, and will be truly useful to the majority of residents of the greater Fairbanks area. The groups and organizations listed below have reached consensus on the following points. We enthusiastically urge your support and active participation in these efforts.

1. The community needs a facility, or facilities, to accommodate large group gatherings. Residents would benefit from such facilities through participation in recreational, cultural and educational activities that improve the quality of life; by economic development of business, commercial and basic resource industries; and by bringing new people and dollars into the community through conventions and the visitor industry.

2. As presently perceived, three basic component functions need to be included in the COMMUNITY ACTIVITY CENTER:

   A. An arena with seating for at least 6000 to be used for sports, entertainment, trade shows, graduations, large meetings, rodeos, and other large attendance events.

   B. A banquet hall capable of seating at least 1000 for dinner which could also be divided into smaller rooms.

   C. A theater with seating for 800 people which could also be used as a lecture hall or auditorium even though built to theater specifications.

   One additional component we feel must be addressed, and hopefully accommodated, is small community group meeting spaces, for groups numbering 10-50.

3. It is apparent that one facility and one appropriation cannot meet all community needs. Therefore, we commit to maintain in active consideration all similar capital needs in the greater Fairbanks area as expressed by various organizations and groups in order to seek and support funding on a prioritized basis for projects which meet other needs at other sites.

4. There are several sites in the greater Fairbanks area that could be acceptable for the COMMUNITY ACTIVITY CENTER. There are many divergent considerations regarding site selection. Land availability and ownership, accessibility, availability or power and other utilities, desires of local residents and political considerations must all be taken into account. The decisions as to site selection may be controversial ones, and must be handled openly and professionally. We feel that site selection should be determined professionally during the developmental planning stages, and therefore for the purposes of planning for the type of facility desired by the community, and for gathering support, we agree to remain <u>non-site-specific</u>. A COMMUNITY ACTIVITY CENTER in ANY reasonable location is better than no COMMUNITY ACTIVITY CENTER at all.

5. It is imperative that any facility realized be right for the community. It must be useful for many years to come, be capable of future expansion, be complimentary to existing facilities, and must be affordable. Cost of operations and maintenance, efficient administration and management, site selection and provision of support services will be the first considerations of the professional planning effort. Funds will be sought for architectural and engineering services, selection of firms to be open to anyone interested. Community input and knowledge will be a crucial contribution during the planning effort.

SUBJ: SB 386 Displaced Homemakers

SB 386 changes the definition of displaced homemaker by reducing from seven to three the number of years a person must have worked as an unsalaried homemaker.

Fiscal Information

There is no fiscal impact. The position paper (enclosed) states in the last sentence that this legislation would open up available programs to more Alaskans, and would not require a funding increase.

Enclosed as back up information is:

A fiscal note from the Community and Regional Affairs Dept.

A position paper from the Community and Regional Affairs Dept.

A position paper from the Department of Labor.

A position paper from the Alaska Women's Commission.

A packet of statistical information giving a profile on displaced homemaker programs, applicants and participants (from C&RA).

Position Paper

RE: SB 386
Sponsor: Rules Committee by Request of the Governor

PROGRAM EFFECTS:

This bill allows for individuals to be enrolled in the Displaced Homemaker Program following three (3) years of unsalaried service as a homemaker versus the existing seven (7) year requirement.

COMMENTS:

The Displaced Homemaker Program is designed to prepare individuals to enter the job market following an extended period of time (seven years) serving as homemakers for their families. These individuals for the most part have not been able to prepare themselves for the responsibility of sole support for their families as the need for entering the job market is the result of tragedy including death or disability of a spouse or divorce/separation. This bill changes the seven year provision for unsalaried service in the home to three years of homemaker service, as the present requirement, under State law, is an onerous provision.

The Displaced Homemaker Program has been in operation since February 1983. Statistics formulated for the first fiscal year February 1, 1983 through June 30, 1983 indicated that 337 individuals were interviewed for eligibility. Twenty-five percent (85 individuals) were ineligible. Of those ineligible, 70% (67 people) were not eligible because they did not meet the seven years in the home requirement.

Statistics formulated during the first half of the present fiscal year (July 1, 1983 through June 30, 1984) indicate that 277 individuals have been interviewed for eligibility. Thus far the ineligible percentage has risen to 36% (100 people) ineligible. Of this 36% ineligible, 85% (85 people) are not eligible because they did not meet the seven years in the home requirement.

Contractors have indicated that advertisement of the seven year requirement may have kept away other ineligible participants.

In other ways, statistics show that the Displaced Homemaker Program is meeting its goal of placing lower income individuals in employment.

* The average monthly family income before the displaced homemaker circumstances was $2,416/mo.

* After the death, disability or divorce of the spouse the family income fell to $423.00 per month.

* The average number of dependents was three (3).

*Thus far, in FY 84, 54% of the individuals leaving the program went directly to employment (27%), school or a vocational program (27%).

* 6% of the individuals were referred to other social service programs for assistance.

* 60% of those served were white, 31% Alaskan native, 14% other minorities; 11% were handicapped.

Client profiles show that the seven year requirement discriminates against the younger displaced homemaker. The average age of a participant under the present requirements is 37 years old.

The average age of ineligible clients is 30 years old and the average number of months in the home is 3.10 years. This would indicate that the actual client population is much younger on the average.

For the aforementioned reasons we would advocate that the statutes be changed from the seven (7) year requirement to three (3) years. This would create no fiscal impact; it would merely open up the available program to more Alaskans.

Approved: Emil Notti
Emil Notti, Commissioner

Bill No. Senate Bill No. 386

Title "An Act relating to the displaced homemakers program; and providing for an effective date."

Date February 9, 1984

Contact: Eileen Plate 465-2700
Jack Shay 465-2712

The recommended change in the definition of "displaced homemaker" from a person providing unsalaried services for a family for a period of at least seven years to three years is strongly supported by the Department of Labor. The length of time a person has spent providing unsalaried services for a family generally has little relationship to the fact that a person may be displaced through death of spouse, divorce, separation, desertion, or loss of family income, and need assistance.

Senate Bill No. 386 would not have a fiscal impact on the Department of Labor.

STATE OF ALASKA
OFFICE OF THE GOVERNOR

ALASKA WOMEN'S COMMISSION
3601 C STREET - SUITE 742
ANCHORAGE, ALASKA 99503

MEMO

TO: Senate State Affairs

FROM: Kathy Marshall, Executive Director

SUBJECT: Senate Bill No. 386

DATE: February 6, 1984

The Alaska Women's Commission is firmly committed to supporting the Displaced Homemakers Programs which provides education and employment services to women who have been homemakers and due to death, divorce or separation are forced to re-enter the job market. In the past, many women who requested this service had to be denied because they had not worked as a homemaker providing unsalaried services for their families for at least seven years. Due to the high cost of living in Alaska, very few families survive for seven years without both spouses contributing to the family income. However, in most cases the homemaker's contribution was in a low paying, frequently part time capacity. As single heads of households these positions do not equip the homemaker with skills to support the family.

Of the homemakers who were refused service in the Displaced Homemakers Programs last year, the average length of time they had been homemakers without paid employment was 3.3 years.

The Commission urges State Affairs to recommend approval for the proposed amendment in SB No. 386 to change the seven year eligibility requirement to three years.

Please contact the Commission office if you need any additional information about the changes in the Displaced Homemakers legislation.

APPLICANT INFORMATION

The average age of ineligible applicants is 30 years old.

The average number of months in the home for ineligible applicants is 38 months or 3.16 years.

63% are White.
3% are Black.
4% are American Indian.
3% are Asian or Pacific Islander.
2% are Hispanic.
22% are Alaska Native.

PARTICIPANT INFORMATION

The average age of participants is 37 years old.
The average number of years in the home is 7.75 years.

60% are White.
1% are Black.
2% are American Indian.
1% are Asian or Pacific Islander.
2% are Hispanic.
31% are Alaska Native.

11% are handicapped.

38% are on public assistance.

20% are school dropouts.
47% have finished high school or gotten a GED.
30% have attended a post-secondary institution or higher.

The average monthly income before becoming a Displaced Homemaker is $2,416.

The average monthly income after becoming a Displaced Homemaker is $423.

That is an average loss of income of $1,993 per month.

72% report that the reduction in income was a result of divorce, separation or desertion.

The average number of dependents is 3.

TERMINATION INFORMATION

*29% entered full or part-time employment.
7% entered school or a vocational training program.
6% were referred to other Social Service programs for assistance.

Of those who enter employment upon termination, the average placement wage is $6.97.

* NOTE: Thus far, in FY 84, 54% of the individuals leaving the program went directly to employment, school or a vocational program.

I. RELATED SERVICES PROVIDED IN THE COMMUNITY FOR COUNSELING AND TRAINING (OTHER THAN DISPLACED HOMEMAKER PROGRAM).

PRIVATE: Nine (9) private employment agencies operate in Anchorage, requiring registration fees, another fee of 55% of first month's salary, and selecting clients with salable skills in place already.

PRIVATE & STATE-FUNDED: Educational institutions include Alaska Business College, Alaska Pacific University, Anchorage Community College, and University of Alaska. Each requires entrance standards, loans, grants, scholarships or money to attend. The student must have transportation and other means of personal support in place. None offer specific reentry programs for homemakers. The ACC Center for Women and Men provides educational programs such as "brown bag" series, conferences, workshops, lecturers, plays, etc. on a wide range of topics. They refer enrolled students who need any kind of counselling to the ACC Counseling Center. Non-students are referred to the Alaska Women's Resource Center and other social service agencies.

STATE-FUNDED PROGRAMS: The Anchorage Employment Center, or Job Service serves primarily as a clearinghouse of available jobs locally and statewide, and to monitor and assist the unemployed, especially those receiving compensation (unemployment). Anchorage Job Service reported recently to the Private Industry Council that they estimated 1,000 job seekers a month came through their doors. A very small percentage of those are seen individually. No capability exists to match job-seekers qualifications on file with incoming jobs, since most jobs are filled within the first 24-48 hours. Their counselors' time is mostly utilized in maintaining their system of meeting initially and then bi-weekly very briefly with those receiving unemployment payments who must meet these requirements. They report that little can be done to assist those with strong barriers to employment, or those who become easily discouraged when their skills are not in demand, or do not pay a liveable wage. The Division of Vocational Rehabilitation (DVR) provides services to those meeting strict criteria as having physical or mental disabilities, including handicapped, chronically alcoholic with recovery, etc. New Start is a program for ex-offenders and their family members post-incarceration, that assists them with employment and other needs. The Anchorage Community Mental Health Center charges those with no private insurance or medicare coverage on a sliding fee scale starting at twenty ($20) an hour. Services are geared for mental

health problems, the chronically mentally ill, and other psychological problems. Employment services are not provided. The Cook Inlet Native Association serves primarily Alaska Native and American Indian clients with a variety of programs funded by state, federal, municipal and other sources. Some clerical training is available.

FEDERAL PROGRAMS: The Work Incentive Program (WIN) is required of all recipients of Aid to Dependent Children (AFDC) when the children reach school age of six years or older. The program is only available to welfare recipients. To be eligible for welfare, an individual must not have excess property in the form of savings, home or car with value over the federal guideline. The Veterans Administration will assist veterans or their widows with education or on-the-job-training. No one else is eligible for these services. The Educational Opportunity Center provides testing and information on higher education to low-income persons. They do not intend to provide counseling or employment readiness services. They refer those not ready for schooling, or waiting for enrollment periods to AWRC and other social services. The Job Training Partnership Act is in the first stages of implementation in Anchorage and Alaska. It provides training and on-the-job-training to the hard-core unemployed. It is not designed to provide pre-employment and counseling services, but jobs, specifically jobs in the private rather than public sector.

More information is available at the Alaska Women's Resource Center on the eligibility and services provided by each of these. Contact information is also available.

II. HOW THE DISPLACED HOMEMAKER PROGRAM FILLS THE GAPS IN ANCHORAGE.

No other agency or individual in Anchorage has a program or service geared for re-entering homemakers. Displaced homemakers find that their calls and visits to various agencies are discouraging until they engage in services at the Alaska Women's Resource Center and get personal needs assessment, counseling and referral to any of the above services for which they are qualified. The Alaska Women's Resource Center has been the primary service agency for displaced homemakers in the community since 1981. The above agencies refer homemakers to us for support and problem-solving even when they are utilizing any of the above services. An important part of our job-readiness program is helping the homemaker define skills used in the home and apply them to available jobs. Confidence and self-esteem building take place in individual and group counseling, Job Skills Workshops and resume preparation.

The displaced homemaker is not necessarily an individual who is involved in using social services. In fact, as a homemaker, she or he is most likely to try to make it on their own, using up remaining resources before seeking help. AWRC provides regular outreach services in daytime television appearances, public speaking for a variety of community organizations, and posting informational posters and brochures in stores, professional offices and services establishments such as hairdresser, laundry, etc. With financial and legal referrals and counseling, the homemaker will make the most out of what is remaining after the displacement, financially and emotionally. The period of grief/loss can immobilize the homemaker and is a barrier that is addressed in our program.

Displaced homemakers often find that they are not eligible for many public social services due to their ownership of a home, car or other personal property. The dwindling or forced sale or these remaining resources simply encourages a downward emotional and financial spiral. An individual who has been caring for others and is capable for caring for themselves can avoid these pitfalls with support and information services offered by AWRC.

III. The Alaska Women's resource Center began providing specific services for displaced homemakers in 1981, after more than a year of effort with a VISTA volunteer, to remove the barriers to displaced homemakers within existing agencies and just provide a self-help group for support. The effort led to a recognition that services of outreach, assessment, personal support counseling (not mental health therapy), job-readiness and employment services are necessary. First funded by the Department of Health and Social Services along with domestic violence and sexual assault programs, the displaced homemaker services were also funded in the first year of existence of the Council on Domestic Violence and Sexual Assault (Dept. of Public Safety). Upon passage in 1982's Legislative session of a specific bill and appropriation for displaced homemaker services, the Council and other state agenices were unwilling to support the program any longer. It's ironic that the programs remained unfunded for months while the new legislation took effect. AWRC and others were not able to provide displaced homemaker services, but the referrals and community expectations remained constant. ALL other funds received by the Alaska Women's Resource Center from state, local or federal agencies are restricted for the specific purpose for which they are granted. Thus, funds from the Council on Domestic Violence and Sexual Assault may not be used for services to anyone but a victim of domestic violence.

AWRC currently receives a grant from the Department of Public Health for a youth program to prevent substance abuse, accidents and ill health. This program has a budget, goals and timeline which exclude any possiblity of provision of displaced homemaker services. Another grant from the Department of Education ($9500) pays only instructional materials and instructor's time for workshops AWRC provides to youth and adults on sex equity issues. A new program of the Alaska Women's Resource Center is a halfway house for public inebriate women funded by the Municipality of Anchorage. Another grant was sought last Fall from the Municipality to supplement our displaced homemaker services. Due to the transience and youth (average age of women is 24) of Anchorage's population, AWRC receives many referrals of displaced homemakers who are unable to meet the state-legislated criteria of seven years in the home. We are faced with denying services to individuals who meet all but one criteria, so have requested funds to serve those who have three years in the home. They experience many of the problems of displacement as their employability is affected by this absence from employment. This grant is still being negotiated. The funding does not in any way replace the services now being provided. It simply extends them to a wider, but still needy group.

IV. NETWORKING AND LOCAL COORDINATION

AWRC convened in 1981, and still sponsors a "Displaced Homemaker's Advisory Council" made up of representatives of most of the agencies sketched in section I. This on-going group has met quarterly and worked to maintain clear referral relationships and prevent duplication of services. Providers in the group have supported AWRC in seeking funding for displaced homemaker services. See attached letters and written service agreements which were included in our grant proposal from Job Service, ACC Center for Women and Men, Cook Inlet Native Association, the mental health center, WIN, Educational Opportunity Center and others in the Anchorage community. AWRC further coordinates with statewide displaced homemaker services, including those in Nome, Bethel, Fairbanks, Homer, Kenai/Soldotna, Juneau and Matsu Valley. The Executive Director of AWRC was appointed as a member of the Anchorage-Matsu Consortium Private Industry Council to implement JTPA. No one involved in the provision of counseling and training related services has supported the allegation that displaced homemaker services are unnecessary or duplicative.

COOPERATIVE AGREEMENT BETWEEN
THE ANCHORAGE EMPLOYMENT CENTER
AND THE
ALASKA WOMEN'S RESOURCE CENTER

I. Introduction

A. Parties to the Agreement:

This cooperative agreement is entered into between the Anchorage Employment Center and the Alaska Women's Resource Center.

B. Purpose

The purpose is to establish the means for an effective working relationship between the two parties to provide maximum service to women in obtaining employment.

II. Roles and Functions of Each Party

A. This agreement will establish areas of cooperation between the two parties and will not affect other independent operations of either.

B. Role and function of each party:

The Alaska Women's Resource Center will provide services necessary for preparing women to engage in gainful occupation.

This includes:

1. Counseling, guidance, and support groups.
2. Selection of those clients judged ready for community placement.
3. Job Bank will be used for informational purposes only. not for direct referral to employers.
4. Referral to the Anchorage Job Service for employment services.
5. Job readiness training opportunities.

The Anchorage Employment Center is responsible for providing employment services.

This includes:

1. Interviewing and registering job applicants.
2. Employment Counseling.
3. Specialized placement service.
4. Referral to job openings and/or training slots.
5. Providing the Job Bank Book and other labor market information.
6. Do follow-up to determine results of placement activity.
7. Aptitude testing for mutual clients.

III. Coordination

A. Each agency will assist the other in providing information and services necessary to achieve the employment and training of mutual clients in accordance with established policies and regulations.

B. Information will be exchanged on all individuals served by mutual efforts.

C. Representatives from each agency will meet frequently for program evaluation and possible modification of procedures.

D. Any provision of this agreement may be superseded by the policies or regulations of either agency.

E. The confidential character of information available will be preserved by all agencies, and this information will be used for the purposes for which it is prepared.

F. Representatives from each organization will meet yearly from the date of this agreement for program evaluation and possible modification of procedures and renewal of agreement. This agreement will terminate one year from the date of signing. This agreement may be terminated prior to the scheduled termination date by either party upon presentation of written notification.

Dear Mr. Fry:

Job Service and the Women's Resource Center have coordinated services through the years in order to meet the needs of our mutual clients by means of client referral, advocacy, staff training, and community awareness. The Women's Resource Center is continuing to serve our community through training, counseling, support groups, and advocacy, assisting members of our community to develop and progress through difficult life experiences. Their services are valuable to the community.

Sincerely,

Jane Harrison

RECEIVED 3-23-82

To Whom It May Concern:

The State Division of Equal Employment Opportunity, Anchorage branch office has maintained an ongoing working relationship with the Alaska Women's Resource Center since 1977. I have found the Women's Center particularly helpful to us and our referrals in many areas, specifically regarding the assistance they have provided in counseling and making job placements for displaced homemakers; the training provided via AWRC sponsored workshops to enhance job interviewing and development skills, resume preparation, assertiveness training, etc. that resulted in providing our referrals with additional information and ideas that greatly enhanced their employability.

THE AWRC has responded to our targeted recruitment efforts to secure qualified applicants for employment with the Executive branch of State government by referring many qualified individuals to our agency. I would like to note that some of the referrals who were successful in securing employment with State government made application in the first place due to the encouragement and assistance that the Women's Center gave them.

I have found this organization to be a reliable resource for information regarding the status changes of the ERA on a nation wide basis, laws and regulations prohibiting sex discrimination, educational programs and training available in the community and referral resources that address more specific needs of clients (i.e. housing, financial aide, scholarship and grant information, etc.).

I strongly support the continued funding of AWRC, as the staff there have demonstrated the necessity for their existence by the services they provide. In this era of dwindling financial and political support for "human service agencies", it is imperative that organizations such as this continue to receive active support.

Sincerely,

Jane Alexander

LETTER OF AGREEMENT

BETWEEN

ALASKA WOMEN'S RESOURCE CENTER

AND

ANCHORAGE COMMUNITY MENTAL HEALTH CENTER

This Letter of Agreement is for the purpose of utilizing the expertise of each agency and assisting each other in the goal of providing comprehensive, broad services to the citizens of the Anchorage catchment area.

The Alaska Women's Resource Center agrees to:

1. Receive upon referral from the Anchorage Community Mental Health Center any appropriate clients who may need counseling.

2. Provide back-up support, information and expertise as needed to accomplish the goals of the Anchorage Community Mental Health program in the area of:

   a. Information

   b. Staff training

   c. Education

   d. Consultation

3. Consultation to staff regarding treatment, referral and feedback to the effectiveness of treatment plans.

The Anchorage Community Mental Health Center agrees to:

1. Receive upon referral from The Alaska Women's Resource Center any appropriate clients who may need counseling, treatment, diagnostic and assessment services from qualified mental health personnel, according to attached referral policies.

2. Provide back-up support, informaton and expertise on mental illness and other personal dysfunctions to accomplish the goals of the Alaska Women's Resource Center in the areas of:

   a. Information

   b. Staff training

   c. Education

   d. Consultation

3. Consultation to the Alaska Women's Resource Center regarding treatment, referral and feedback as to effectiveness of treatment plans.

Both parties agree to:

1. Adhere to all Federal, State and local regulations concerning confidentiality.

2. Provide treatment on the basis of the sliding fee scale based on ability to pay and from third party sources.

3. Negotiate cost of services not covered in Number 2 above.

4. Terminate this agreement by either party upon request of written notice.

5. To abide by terms of the agreement, except as noted in number 4 above from January 1, 1983 until December 31, 1983.

COOK INLET NATIVE ASSOCIATION

June 14, 1983

Carol Richards, Executive Director
Alaska Women's Resource Center
241 E 5th
Anchorage, Alaska

Dear Ms. Richards:

It is our understanding that the Alaska Women's Resource Center is submitting a proposal to the Employment Opportunity Division for funding to provide counseling and referral services to displaced homemakers of the Anchorage area. CINA supports their proposal.

While the Cook Inlet Native Association is also submitting a proposal for a Displaced Homemakers Program from the same funding source, we do not view CINA as competing with the Alaska Women's Resource Center. Rather, we look upon the two programs as complementary.

The Alaska Women's Resource Center has established itself as a point of initial contact for many displaced homemakers. Through its specialized counseling and referral activities, the Center refers applicants for services to community agencies where their individual needs can be met. Alaska Women's Resource Center clients have frequently been referred to the Cook Inlet Native Association for training and job placement services.

If the Alaska Women's Resource Center's proposal is funded, we at Cook Inlet Native Association will maintain the established system for mutual referral of displaced homemakers.

Sincerely,

Leonard Hamilton, Manager
Human Resources Development Department

Re: Alaska Women's Resource Center

Dear Sir:

The Work Incentive Program has utilized the Alaska Women's Resource Center for several clients needing lawyer referral, roommate (housing) matching, assertiveness training and other women's issues needs. We feel they have been beneficial in assisting our clients to reduce some of the barriers to employment. Both of our programs expect to continue to help the needy and cooperate in this goal.

Thank you for your consideration.

Sincerely,

Dorcas Lewis

COOPERATIVE AGREEMENT

between

COOK INLET NATIVE ASSOCIATION

and the

ALASKA WOMEN'S RESOURCE CENTER

I. Introduction

A. Parties to the Agreement:

This cooperative agreement is entered into between the CINA and the Alaska Women's Resource Center

B. Purpose:

The purpose is to establish the means for an effective working relationship between the two parties to provide maximum service to Displaced Homemakers.

II. Roles and Functions of Each Party

A. This agreement will establish areas of cooperation between the two parties and will not affect other independent operations of either.

B. Role and function of each party:

The Alaska Women's Resource Center will provide services necessary for preparing clients to engage in gainful occupation.

This includes:

1. Counseling, Employment guidance, and support groups.
2. Selection of those clients evaluated as ready for training.
3. Referral to CINA for classroom training, and/or job club services.
4. Specific workshops and classes relating to health; financial management and job-readiness.

The Cook Inlet Native Association agrees to be responsible for providing employment services.

This includes:

1. Interviewing and registering training applicants.
2. Specialized classroom training in areas of clerical, distribution, bank teller and word processing and related vocational counseling.
3. Referral to AWRC for counseling and support services.
4. Career Information Systems available for mutual clients.

III. Coordination

A. Each agency will assist the other in providing information and services necessary to achieve the employment and training of mutual clients in accordance with established policies and regulations.

B. Information will be exchanged on all individuals served by mutual efforts.

C. Representatives from each agency will meet frequently for program evaluation and possible modification of procedures.

D. Any provision of this agreement may be superseded by the policies or regulations of either agency.

E. The confidential character of information available will be preserved by all agencies, and this information will be used for the purposes for which it is prepared.

F. Representatives from each organization will meet yearly from the date of this agreement for program evaluation and possible modification of procedures and renewal of agreement. This agreement will terminate one year from the date of signing. This agreement may be terminated prior to the scheduled termination date by either party upon presentation of written notification.

Carol Richards, Executive Director
Alaska Women's Resource Center
P.O. Box 188
Anchorage, Alaska 99510

Dear Ms. Richards:

I am happy to write a letter of support for your application for continued Displaced Homemaker funding for FY 1984, since the Educational Opportunity Center has worked closely with the AWRC program for several years. Many displaced homemakers have been referred from AWRC to us in order to assist with their access to postsecondary education or training programs. These clients have expressed satisfaction with the support they were receiving and have been well prepared to embark on an educational program because of the in-depth counseling and training you have provided. We have always felt comfortable in referring appropriate clients to the AWRC from our program as well.

Staff at the AWRC has continually participated in advisory boards and other in-service activities which we have offered relative to our program, and I am aware of an on-going interest in keeping a strong link between our two agencies.

I heartily support your request for continued funding. I feel the AWRC is the appropriate agency in Anchorage to handle such a program.

Sincerely,

Marge Hampton

Carol Richards, Executive Director
Alaska Women's Resource Center
P.O. Box 188
Anchorage, Alaska 99510

Dear Ms. Richards;

I am writing this letter in appreciation and support of the Alaska Women's Resource Center Displaced Homemaker program. This program has provided the support, referral and counseling, as well as guidance and training so desparately needed by the numbers of women who find themselves in the crisis of radical role change due to such events as the death of a spouse or divorce. The staff of the I.C.U. have referred women who, in order to maintain their sobriety, find themselves in the midst of changing their family structure. It is so important that these women have the Center's program to help them through the trauma of life changes.

Not only is your program important to our staff and clients, it is ever so important to the community as a whole. With the ever increasing social and economic stresses on the Alaskan family, more and more women in the Anchorage area are suffering through the total rearrangement of their lives. Although many women are leaving their homes and husbands by choice, the transition to a new lifestyle is still difficult. The A.W.R.C. has been available to all women to help them through this transition as smoothly as possible.

It is my sincere hope that the Center will be granted the funding necessary to continue the vital services of client counseling and referral, as well as client advocacy. The center has also provided invaluable staff training and community awareness services in the past and I look forward to the availability of these services in the future.

Again, we of the I.C.U. and I personally thank you and your staff for all the hard work that has been provided for our clients and our community. I fervently believe that the refunding of your programs and especially the Displaced Homemaker Program is paramount to the continued vitality and health of our Anchorage community.

Sincerely,

Nonie W. Turville

DEPARTMENT OF HUMAN RESOURCES

June 17, 1993

To Whom It May Concern

I would like to submit a letter of support regarding the continued funding of the AWCC DHP Program.

I have participated as a volunteer in this program for 4 years, and have found the AWCC staff to be well-trained, informed, sensitive, and thoroughly professional in their administration of the program. I have heard verbal and written feedback regarding the appropriateness and helpfulness of the program from a number of clients. In my position as Intervener for the Municipality, I have referred applicants who are displaced homemakers to the AWCC for counseling.

The AWCC has filled a need for training, and has fulfilled its function. I strongly urge continued funding for the Displaced Homemaker Program.

Sincerely,

[illegible]

Anchorage, AK 99510

Dear Carol:

Our agency supports your application for continued funding for the Displaced Homemaker program funded by the State of Alaska.

A review of our records, shows that during the past year, we have received a significant number of referrals from your agency. Also, we have cooperated in providing speakers for your weekly brown-bag lunch programs because we consider the program valuable.

Our staff considers the Displaced Homemaker program an important part of the social service system of the Anchorage area, and sincerely hope that it is funded during FY 84.

Sincerely yours,

Robert D. Bowers
Executive Director

Alaska Women's Resource Center
Anchorage, Alaska

SUBJECT: Continuation of the Women's Resource Center.

I began using the services of the Resource Center in March of 1983. Many programs suited my needs, especially a 2 day seminar titled "Getting Ready To Work". While still unemployed I attended an excellent all day Health workshop. The fact that I am now employed is due in part to the individual help I received from the Center's employment counselor and displaced homemaker advocate. These women gave support and information I would not have otherwise received had I not utilized the Center. I use the library and plan to participate in evening support groups.

I sincerely hope the Center receives sufficient support to continue its vital services to the community.

Vicki Wilber

Charles W. Tay, Acting Executive Director
Council on Domestic Violence and Sexual Assault
Pouch M, 312 Goldstein Building
Juneau, AK. 99811

Dear Mr. Tay:

I am pleased to offer this letter of support for the Alaska Womens' Resource Center.

Since it's inception, we have considered AWRC one of the most valuable resources in our community. We have consistently referred people to AWRC when there were specific needs which went beyond our educational programming. Staff at the center have also assisted us with program and resource materials. In both cases the exchange has been professional and helpful.

AWRC provides a specialized service to Anchorage and the state unduplicated by others. Failure to fund the center at a responsible level would not only create a hardship for those currently served, but deny numerous men and women an important avenue for their future development.

Sincerely,

Barbara G. Eichner
Extension Home Economist

I would like to take this opportunity to show our support for the Alaska Women's Resource Center in their continued Displaced Homemaker Program.

We are a non-profit Medical Clinic. One of our services is meeting the medical needs fo the Alaska people who are having financial difficulties. We have worked closely in the past with the Women's Resource Center, referring many of our displaced homemakers to them.

I feel this is a very necessary program and they have dona a fine job in helping to make these people productive citizens again.

Ms. Carol Richards
Executive Director
Akasla Womens Resource Center
P.O. Box 100-188
Anchorage, Alaska 99501

Dear Ms. Richards:

I would like to take this opportunity to say how important I feel it is that AWRC receives a grant for Displaced Homemakers. Anchorage (and Alaska) is growing at such a fast rate, and the tremendous influx of people make it critical that a Grant is allocated in 1984 for Displaced Homemakers. This money is for a most worthy, most deserving segment of society. It is our only hope of restoring (and in some case creating) confidence, pride and dignity to these women. I believe the Resource Center is doing a wonderful job and I feel sure that this Grant will be used in the most efficient, productive manner.

I definitely support appropriating a Grant for Displaced Homemakers in 1984.

Most sincerely,

Ann Sugrue
Executive Secretary

P.O.Box 2180 Anchorage, Alaska 99510
2509 Bide St. (907) 276-0281

To The Department of Community and Regional Affairs:

I fell your agency would be doing the community a valuable service in continuing to fund the Women's Resource Center Displaced Homemaker Fund.

As a member and consumer of help through Women's Resource Center I know personally the otherwise impossible to get help and services that are offered to the community. The community awareness programs of women's problems, the referrals, and advocacy make Anchorage a better community for us all.

Because Anchorage is growing at such a rapid rate we need, more than ever, the services offered through The Women's Resource Center.

I urge you to continue your support of this valuable service.

Sincerely,

Glenda Grant, Mgr.

June 20, 1985

Dear Carol,

We want to let you know that we are in full support of funding for the Displaced Homemakers program. In working with tenant problems, we are constantly working with single women with children who have housing problems because they are poor. They have either been deserted, left an abusive home environment, or are divorced and receive no child support from the father. I believe that the Displaced Homemakers program is just the first step in making life for these women more equitable. This not only would help them learn how to get into the job market but would renew their self-confidence in their ability to care for themselves, their children, and participate in their community. One example of the types of calls we receive is a woman with three children whose husband went south to get their furniture shortly after they had moved here. They borrowed money for the trip. He returned without the furniture, but with his lover. He used the next month's rent to set himself and his lover up in another apartment. The woman had received a ten-day eviction notice. She had no money, no food and could not receive any assistance for at least a month. Your program would be excellent in helping this woman through this hard time, and in teaching her how to go on, on her own.

Thank you for the good work you have done. I hope that we can continue to make referrals to your programs.

Sincerely,

Laurie Terrall

OLDER PERSONS ACTION GROUP, I

325 E. Third Avenue, Anchorage, Alaska 99501 (907) 276-1059

RECEIVED

March 12, 1982

Ms Maureen Aakre, Executive Director
Alaskan Women's Resource Center
Post Office Box 188
Anchorage, Alaska 99510

Dear Maureen:

Older Persons Action Group supports the grant request for continuation of services at the Alaskan Women's Resource Center.

Assistance to displaced homemakers is needed by all ages. Among the most vulnerable are those women who, after raising families, lose their spouse through death or divorce and find themselves at age sixty coping with marginal or poverty incomes. During the past year, this organization utilized the expertise of the Alaska Women's Resource Center to disseminate information and education through SENIOR VOICE and SENIOR SOUND about opportunities and options available to them.

Additionally, these two organizations have coordinated activities and cooperate in providing direct assistance to clients visiting the offices.

Sincerely,

Vera A. Gazaway

P.O. Box 188
Anchorage, AK 99510

Dear Carol:

Thank you for the opportunity to support the excellent services provided by the Displaced Homemaker program of the Alaska Women's Resource Center.

I was recently a guest speaker during one of the two-day workshops conducted by the Displaced Homemaker program. I was impressed with the degree of preparedness which the women participating in the program displayed. They had received counseling in the assessment of their skills and the preparation of resumes, and were consequently ready to focus on specific employment issues.

The Division of Personnel cannot provide the many services that women re-entering the workforce require in order to find a job. We are very happy to have the services of the Displaced Homemaker program available when we need to refer women who come to the Division searching for employment, but uncertain about their skills. We have information on the Displaced Homemaker program and other services of the Alaska Women's Resource Center posted in the Personnel office, and we make referrals whenever we find a need.

Sincerely,

Abby K. Smith

Mr. Charles W. Fry
Acting Executive Director
COUNCIL ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT
Pouch K, 312 Goldstein Building
Juneau, AK 99811

Dear Mr. Fry:

For a year, STAR Temporary Services has had a client referral relationship with the Alaska Women's Resource Center. STAR Temporary Services is a temporary employment service that provides skilled people to companies. The attached brochure further explains our company. In operating a temporary employment firm, I am continually recruiting for skilled individuals to fill our clients' staffing requests.

After hearing about the Alaska Women's Resource Center from individuals who turned to that organization for assistance, I set up an appointment and met with the coordinator of the Displaced Homemaker Program. Following our conversation, I was given a tour of the facilities and was introduced to the staff person who helps women with resume preparation and employment counseling. They were very appreciative of our company's interest and agreeable to establishing a client referral system with STAR Temporary Services, as this was another source for women seeking employment. It has become a worthwhile and beneficial relationship for all concerned.

I wholeheartedly support the Alaska Women's Resource Center, as this organization provides the much needed programs and resources for women today to establish their place in society. I would be glad to answer any specific inquiries you may have. My telephone number is 561-1932.

Sincerely,

STAR Temporary Services, Inc.

POSITION PAPER

RE: Analysis of CSSB 527 (Finance) - Work Draft 5/4/84
Sponsor: Senate C&RA Committee

SECTION 1 - Corrects a problem which currently exists under 28.10.411(d), whereby some municipalities receive double payments for Senior Citizen Motor Vehicle Taxes.

SECTION 2 - Requires the Department to prorate payments to municipalities in the event the Motor Vehicles Program were underfunded.

SECTION 3 - Exempts the property tax on a motor vehicle of a resident age 65 years or older.

SECTION 4 - Limits the amount of the Homeowners' exemption to a maximum assessed value of $150,000. (In hardship cases, however, the municipality may waive the limitation under state regulations). This bill also allows the spouse of a deceased homeowner to qualify for the program if the spouse is 55 years of age or older.

SECTION 5 - Clarifies existing language.

SECTION 6 - Exempts property tax on one motor vehicle owned by a resident 65 years of age or older on January 1 of the assessment year, unless otherwise exempt under AS 29.53.025(b)(4). This section also requires the Department to prorate payments to municipalities in the event the program is underfunded.

SECTION 7 - Allows the Department to waive the January 15 deadline for good cause on the Senior Citizen Renter payment. This section also requires a disabled veteran to submit evidence of the disability rating.

SECTION 8 - Requires the Department to prorate payments to eligible renters in the event the program is underfunded.

SECTION 9 - Requires the Department to prorate payment of sales taxes paid on the abode of the eligible resident.

SECTION 10 - Provides for an effective date of January 1, 1985.

COMMENTS

The Department supports passage of the bill in its current form. Besides correcting problems which exist in current law, the bill provides for an equitable prorating of payments in the event underfunding occurs in the programs we presently administer. Under current law we are required to make payments on a first-come, first-serve basis which results in unequal payments to both municipalities and individuals.

Section 4 addresses the Department's concern over the limitation on the value of property which is exempted from municipal property tax. This legislation sets the limit of property tax exemption at $150,000.

STATE OF ALASKA 1984 LEGISLATIVE SESSION
FISCAL NOTE

Revision Date: 5/2/84

Bill/Resolution No.: CSSB527(Finance)
Title: State & Municipal Tax Exemptions

ANALYSIS:

Assumptions:

Based on the attached fiscal analysis, it is assumed the (rounded) savings impact commencing in FY 85 would be $155,000. On the other hand, additional time would need to be spent reviewing the exemptions, reporting, etc. An average of one-quarter of a full-time position has been charged to this work over the fiscal years shown.

Annual rate of inflation is estimated at 10%.

Positions:

1 full-time Clerk Typist III - 3 months

Other Expenditures:

-0-

Funding:

General fund. The figures shown are estimated savings to the State.

Section Cost Analysis:

Computations:

Salary and fringes increased 6% yearly and the saving in revenues increased by 10% yearly. $45,000 of the savings is due to the correction of the motor vehicle problem, and $110,000 represents savings to the State because of the $150,000 exemption limitation.

Economic Impact:

-0-

Impact on Local Government:

Exempt Limitation: Only $150,000 of the assessed value would be exempt. Therefore, the local assessor's staff would have to compute and levy against the remaining value.

Correction of Motor Vehicle Problem: Municipalities would no longer receive double payment "reimbursements".

CSSB 77

"An Act establishing the Alaska Senior Citizen employment team program and fund"

Position Paper

The Older Alaskans Commission urges passage of this legislation which will provide long term benefits to Alaska's economy as well as the immediate benefits of employment opportunities and training to senior citizens.

The economic impact of this program is a major contribution to the economy and a significant reduction in state welfare costs.

Contribution to the economy. Although this bill does not require that potential enrollees have a low income, it is to be expected that those with a low income would have priority and that most of the enrollees would be in that category. Since salaries would probably be at entry-level in order to serve more seniors, it can be assumed that most of the salaries would be used to purchase goods and services with a resulting ripple effect in the economy. In addition, some seniors would be contributing to social security instead of drawing from it. A national study of the federally funded Title V Senior Employment Program by the American Association of Retired Persons shows that for every $1.00 spent for the program, $1.15 is returned to the economy. This program would have a similar benefit but possibly to not such a great degree since the enrollees are not necessarily poverty-level income.

It is also believed that many small businesses taking advantage of this program, could become better established, more competitive, and thus continue to provide unsubsidized employment over the years.

Reduction in state welfare costs. National studies show that older persons are not referred to job openings as often as younger persons and therefore they tend to be out of work much longer periods of time. Since this program has no income eligibility criteria, it would particularly serve two important groups of persons who have a strong potential for eventually needing welfare and are not eligible for the Federal employment program until they are eligible for welfare.

1) Those whose countable incomes (including social security, pensions, and any other) are slightly over the poverty guidelines but are still insufficient to live on, and who would use up nearly all their resources before becoming eligible for welfare.

2) Those who have just lost a job but must wait several months until their preceding year's income includes enough months without pay to become eligible for the Federal employment program and/or welfare.

By helping these people sooner, a considerable savings in unemployment insurance benefits and welfare benefits would result.

Eligibility for the Federal employment is 125% of the H&SS poverty level. However, in the current program in Alaska, 86% of those currently enrolled had family incomes at or below the following poverty levels (100%), leaving only 14% between the 100% and 125% level. Although the percentage would not be as high on this program, it still would be high enough to cause a large reduction in welfare costs.

Family Size	Family Income (including Social Security and pensions
1	$ 6,240 per year
2	8,410 per year
3	10,580 per year

In order to assure recruitment of lowest-income elderly, this office is preparing a pamphlet describing employment opportunities for the target group. This pamphlet will be mailed directly to all Public Assistance recipients as well as to current Longevity Bonus recipients. The reason for this approach is that a very large percentage of older workers are "discouraged" or "hidden" workers who do not believe they can get a job due to age discrimination and who no longer apply at job service centers.

Another reduction in state welfare costs is due to the kind of jobs many of these enrollees perform, such as home chore services for the frail elderly to help them remain in their own homes longer instead of being institutionalized. These services include preparing meals, shopping for groceries, housecleaning, hauling wood and water, snow shoveling, minor home repair and weatherization. This assistance is especially important in small communities where there are no home makers or other help available.

For example, one enrollee in a small native village usually assists three to six persons at a savings of approximately $4,000 per month each for institutional costs. In other words, $8,000 ANNUAL SALARY PLUS COSTS OF HOUSING AND FOOD FOR CLIENTS SAVES $144,000 to $288,000 ANNUALLY IN MEDICAID COSTS. There are currently 18 persons performing in a similar manner.

Thus, the savings in various welfare costs would offset costs of this program.

Dear Mr. Coalman:

RE: SENIOR CITIZENS PROPERTY TAX EQUIVALENCY PAYMENT

Your application for the Senior Citizen Property Tax Equivalency payment was received and postmarked .

Regretfully we must inform you that you are ineligible to receive this payment. You failed to apply before the January 15, 1984 deadline. According to Alaska Statute 29.73.060, which governs this program:

> "To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year..."

You may apply for the tax equivalency payment at the end of this year. We will add your name to our mailing list and you should receive an application form by December 1, 1984. If you do not receive a form by then either contact our office or pick up an application at City Hall or your local Senior Citizen Center. Be sure to mail the application before January 15, 1985.

We are pleased you are interested in the program and hope to see your application next year.

If you have any questions please feel free to contact me at the above address or call toll free Zenith 2222, in Juneau 465-4783.

Sincerely,

Patti Becker #210

Mr. Coalman has been under Dr.'s care with Herpes Zoster (shingles) which involved his left eye & head area. He has been unable to use his left eye and was told not to use his right eye any more than necessary.

He has been under emergency care since 11/22 under Dr. Page (eye specialist), Juneau which involved University of Wn. Hospital operation 11/24 and recuperation in Juneau under that Dr.'s care.

I often pick Mr. Coalman's mail and it is very possible it was put in the pile of circulars because of the type of outside mailing cover used--thinking it not dated material, etc. Urge you to show the deadline date on the front of the mailing/address area in the future. He truly doesn't understand why he doesn't remember seeing it.

If there is a possible extension ~~possible~~ to the deadine date in his case would appreaciate ~~he~~ he be considered for it. Dr. Page has said his was one of the worst cases he had ever seen and most elderly people die from the EXTREME pain and complications. It is very important that his stress be kept to a minimum. 11/22 the lens of his right eye "fell" out and they are hoping the corneal transplant won't be rejected.

P.S. Airplane Ticket Copy he has enclosed shows his recent arrival in Ketchikan

Dick Bradley,

Please prepare a Finance CS for SB 527 adding the attached wording to 29.73.060 (c).

It would probably be the new Sec 7, renumbering 7 + 8 as 8 + 9.

Thanks. Please send it to Ken Jarrett c/o myself.

Richard Hacker

(c) When a municipal name change takes effect by means of an order issued under (a) or (b) of this section, civil or criminal suits, applications, petitions, hearings and other proceedings to which the municipality is a party and pending at or brought after the date the name change takes effect shall proceed in the name of the municipality as changed by the order. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" at the end of subsection (a).

Sec. 29.73.060. Property tax equivalency payments. (a) A resident of the state 65 years of age or older who rents a permanent place of abode is eligible for tax equivalency payments from the state through the Department of Community and Regional Affairs.

(b) For purposes of determining payments to eligible persons, the department shall calculate a property tax equivalent percentage for each home rule or general law municipality which levies a general property tax at the rate of one percent per mil. The property tax equivalent percentage applied to the annual rent charged to the applicant equals the property tax equivalency payment payable under this section.

(c) To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year on forms and in the manner prescribed by the department. Each applicant shall submit with the application rental receipts or, if rental receipts are not available, other evidence satisfactory to the department for determination of the fact of payment of rent and the amount paid.

(d) If two or more persons occupy a residence as tenants, not all of whom are eligible for tax equivalency payments under this section, the assessor shall determine equitable partial payments to be made to the eligible tenants. However, tax equivalency payments to an eligible applicant may not be reduced because the spouse is less than 65 years of age. If all occupants in a residence are eligible for tax equivalency payments under this section, the occupants shall decide between and among themselves which shall receive payment. (§ 2 ch 217 SLA 1976; am § 1 ch 124 SLA 1980)

Effect of amendment. — The 1980 amendment, effective July 1, 1980, and retroactive to January 1, 1980, inserted a comma following "municipality" and "general property tax", substituted "one" for "½", substituted "The property tax equivalent" for "This", substituted "equals" for "or $375, whichever is less is", and added "payable under this section", all in subsection (b).
