PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of AS 24.20.271(1) and AS 44.66.050 (sunset legislation), a review of the Alaska State Medical Board was conducted to review Board activities and accomplishments to determine if the Board has been operating in an effective, efficient, and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Alaska State Medical Board should be reestablished. The law currently specifies that this Board will terminate on June 30, 1983, but will continue until June 30, 1984, for the purpose of concluding its affairs.

Scope

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint, and affirmative action functions. Our review consisted of analyzing and evaluating the following:

1. Applicable statutes and Board regulations;
2. tests of records and documents of the Board and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development;
3. interviews with OL employees;
4. complaints filed with OL, the Ombudsman's Office, and the Equal Employment Opportunity Office; and,
5. interviews with Board members.

ORGANIZATION AND FUNCTION

The State Medical Board is a regulatory board with 7 members: 5 licensed physicians, and 2 public members with no direct financial interest in the health care industry. It is preferable that the licensed physicians reside in as many separate Alaska judicial districts as possible.

The function of the Board is to determine the minimum quality of medical care by:

1. Examining and issuing licenses to qualified applicants.
2. Establishing or amending rules and regulations necessary and desirable to enforce the statutes of the State.
3. Holding hearings in order to revoke, annul, or suspend the license of a person violating the medical statutes and regulations.

The Board regulates the following groups engaged in medical practice in Alaska: physicians, osteopaths, physician assistants (PA's), podiatrists, and acupuncturists. Most licensing requirements are established by statute. However, statutes have granted power to waive some requirements in favor of conditions concerning special licenses--those by endorsement, those for temporary licensure up to 8 months or until the Board meets to consider the application, whichever occurs first, and a temporary locum tenens permit which is valid for 120 consecutive days.

An applicant for registration as a medical practitioner must have passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States. An oral interview is also administered by a member of the Board. Foreign medical graduates who are graduated from medical colleges not recognized by the American Medical Association or one of its agencies must be certified by the Educational Council of Foreign Medical Graduates or be licensed by examination in another state or territory of the United States or a province in Canada.

Licensure by a temporary permit allows a practitioner the opportunity to practice medicine when all other requirements are met. It is renewable only once.

REPORT CONCLUSIONS

In our opinion, the State Medical Board should be reestablished. The practices of medicine, osteopathy, and acupuncture by physicians, osteopaths, physician assistants, paramedics, and podiatrists is regulated by the Alaska State Medical Board. Because these occupations affect the public's health, safety, and welfare, in our opinion they should be subject to regulations and controls.

Establishing minimum educational and experience requirements provided reasonable assurance to the public that licensees are qualified. In addition, active investigation of complaints from the public and other practitioners ensures that licensees continue to practice in a competent manner.

In our opinion, these functions are needed for the protection of the public. Although we believe the Medical Board has effectively accomplished these functions, we are making a recommendation which we believe is needed in order for the State Medical Board to more effectively serve the Alaska public.

We recommend legislative consideration be given to statutory change which would (1) define unprofessional conduct or practices, (2) require hospitals to notify the Medical Board when a practitioner is deemed a potential danger to the public, and (3) change the composition of the Board to represent all persons regulated (see Recommendation No. 1).

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

Legislative consideration should be given to regulatory changes concerning the disciplinary process and the composition of the Board.

The 1978 audit recommended the establishment of regulations to ensure consumer complaints receive an impartial examination on the basis of merit. CSSB 237 delineated the grounds for imposition of disciplinary sanctions and disciplinary actions to be imposed. These grounds included unprofessional business practices as well as malpractice. This bill did not pass, and we recommend that it be reintroduced to the Legislature.

In addition, we believe statutory changes in the following areas would benefit the public:

- A. Hospitals should be required to notify the State Medical Board when a practitioner's hospital privileges are refused or restricted because that person is a real or potential danger to the public. If hospitals were to report such actions, the Medical Board could initiate an investigation to determine if a questionable practitioner should retain his or her license.
- B. The Board should adequately represent those persons it regulates. The Board regulates 689 physicians, 73 physician assistants, 53 paramedics, and 10 podiatrists. The Board is currently composed of 5 physicians and 2 public members. Allowing participation of all occupations regulated by the Board would ensure that one occupational group does not promote its interests over the interests of an unrepresented occupational group.

AUDITOR'S COMMENTS

The illness of one of the Division's three full-time investigators resulted in minimal investigative effort for the State Medical Board during the last year as the Division could not replace him until his resignation of June 2, 1982. The Division hired an investigator to fill this position as of June 28, 1982.

As a result of this situation, investigative effort was not sufficient to provide adequate public protection.

Once the unit is fully operational, we believe a management analysis would be in order to determine if additional resources are needed to help reduce the backlog of 44 cases, 17 of which are priority I (life threatening).

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative attainments as Board activities relate to the public need factors defined in the "Sunset" law. These analyses are not intended to be comprehensive in nature, but address those areas we were able to cover within the scope of our review.

- I. The extent to which the board, commission or program has operated in the public interest.
 - A. The following demonstrate the Board's performance in the public's best interest:
 1. The board has held an average of 4 meetings a year in various locations in Alaska.
 2. The Board provided an examination twice a year for candidates.
 3. Since 1978, the Board has established regulations for continuing Medical Education, Physician Assistants, and Paramedics.
 - B. The following conditions and activities existed which could not be demonstrated to be in the public's best interest:
 1. There has been no examination of complaints by consumers because AS 08.64.380 does not specify unethical economic or business practices as unprofessional conduct (see Recommendation No. 1).
- II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource and personnel matters.
 - A. The following enhanced the performance of the Medical Board.
 1. The Board received funding and support from OL in the amount of \$108,704 (see Appendix A).
 2. The Board received assistance in drafting legislation and regulatory changes from OL.

3. The Board receives legal assistance from the Attorney General's Office.
 4. The Board receives cooperation from the Department of Health and Social Services in licensing paramedics as a result of a Memorandum of Agreement between the two agencies.
- B. The following practices have impeded the Board's performance:
1. The Division of Occupational Licensing (OL) has not been able to provide the necessary investigative effort required by AS 08.01.050(19); and the Board has not been able to provide regulations covering unethical or improper actions on the part of licensees (see Auditor's Comments).
- III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.
- A. The following statutory changes were recommended by the Board:
1. The Board has recommended and strongly supported passage of CSSB 237 delineating grounds for imposition of disciplinary sanctions and sanctions to be imposed among other changes to the Medical Practices Act.
- IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.
- A. Encouragement of persons to report to the Board is demonstrated by the following:
1. The placement of advertisements requesting input on proposed regulation changes.
- V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.
- A. The Board's meetings and examinations are advertised in newspapers by OL to encourage public

participation. In one case, OL had not placed an advertisement for an examination.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

- A. The Office of the Ombudsman and the Attorney General's Office has no consumer complaints regarding the Alaska State Medical Board.
- B. There is no provision for consumer complaints in AS 08.64 (see Recommendation No. 1).

VII. The extent to which a board or commission which regulated entry into an occupation or profession has presented qualified applicants to serve the public.

- A. The following demonstrate the Board's performance in presenting qualified applicants, and ensuring their continued competence:
 - 1. The Board has issued 349 licenses, temporary permits, locum tenens permits, physician assistant authorizations, and paramedic authorizations since July 1981.
 - 2. The Board has demonstrated a liberal policy of licensing by endorsing physicians from other states.
 - 3. The Board requires foreign Medical Graduates to have qualifications equivalent to other applicants. This is evidenced by the requirement of the FLEX exam and of completed internship or residency. Note that the requirement of an internship or residency makes it impossible for any medical school graduate to come directly to Alaska upon graduation, since there are no internship or residency programs in Alaska.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

- A. According to the State Equal Employment Opportunity Office, applications require

unnecessary information such as an applicant's date and place of birth, weight, height, social security number, and sex. However, the Board believes this information is needed to facilitate its background investigations for licensure.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

A. The Division of Legislative Audit has recommended a review of the following statutes for possible revision:

1. A statutory change for AS 08.64.010 should be considered to allow all occupations regulated by the Board to be represented on the Board (see Recommendation No. 1).
2. A statutory change for AS 08.64.336 should be considered to require hospitals to report to the Medical Board when a practitioner's hospital privileges are refused or restricted because that person poses a danger to the public (see Recommendation No. 1).

B. The Division of Legislative Audit has recommended that the Medical Board consider regulations to protect the public in the following areas:

1. Regulations are needed to make actions on the part of licensed persons, which are unethical, improper, and not in the best interest of the welfare of the public violations of the licensing act (see Recommendation No. 1).

Therefore, we calculated and reported an average of the revenues collected in fiscal years 1980 and 1981 in order to obtain an accurate representation of collected revenues.

Direct expenditures include Board travel and those expenditures shown for the Board in the Division's accounts. Indirect expenditures are an allocated percentage of the administrative expenses of OL and an allocated percentage of the investigative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Board and OL.

RE: Performance Review of
the Alaska State Medical
Board, July 31, 1982

Dear Mr. Wilkerson:

Thank you for your recent letter, as well as the copy of the "Preliminary Audit Report". In accordance with a telephone report from Patricia Harms of your Division, I have had copies made and forwarded them to the other Board members as well as to the Division of Occupational Licensure. I have informed those who will be receiving copies that the report is confidential and not for public release.

My comments are as follows (please refer to the cited page of the audit):

Page 2: The Board also regulates mobile intensive care paramedics in addition to those professions listed. This omission is obviously an oversight since the audit recognizes (page 7, pgh 4) the Memorandum of Agreement between the Board and Department of Health and Social Services dealing with this group.

Page 4: Recommendation #1 - I agree wholeheartedly with the recommendation as stated. As I have previously indicated to the Auditors, I have some reservations relating to adequate representation of those persons it regulates. In order to obtain proportional representation, the size of the Board would have to be large, clearly resulting in "large group inefficiencies". I would be absolutely opposed to any legislation depriving us of our public members or any dilution of the medical expertise which the Board needs in dealing with disciplinary and licensing matters. In principle, I would like to see "non-M.D. professional representation" on the Board provided that the Board does not become large and unwieldy, and I would suggest that the best way to accomplish this would be a statutory change adding one additional position to the Board to be chosen from amongst the other regulated groups in whatever manner the governor deems appropriate. I do not feel that the Board has short-shrifted any of the non-physician groups which it currently regulates, however, and such a change may be simply solving a problem which does not exist. Currently, the Board makes use of the Alaskan Academy of Physician Assistants, as well as representatives of the Paramedics and Podiatrists in dealing with licensure and regulation of these groups.

Page 2

RE: Performance Review of
the Alaska State Medical
Board, July 31, 1982

continuation Page 4 -

I am personally unaware of any changes in regulations or licensing which the Board has made over the past four years, in the absence of consultation and advice of the affected group.

As regarding the remainder of the recommendation, I enthusiastically applaud the Auditor's endorsement of CSSB 237. The Board has requested that this be reintroduced into the next legislative session (Board resolution September 10, 1982 at a meeting in Nome), and this has been done. In addition to the features of the Bill which are mentioned, the Bill also creates a position of Executive Officer for the Board (certainly not a precedent - the Board of Nursing, Real Estate Examiners, etc. already have Executive Officers). The Board feels this will "keep the ball rolling" between meetings, improve the efficiency of staff support, and allow for better tracking of our various legislative concerns. Further, by establishing the position of an investigator responsible primarily to the Board, we feel that the investigative deficiencies to which the Audit refers (page 5) can be abolished.

Finally, the Board members feel that statutory change to require hospitals to notify the Board in case of serious credentialing action which would help the Board become aware of potential problems before they become actual problems.

Page 7, pgh B. The Board has not been able to provide regulations covering unethical or improper actions on the part of licensees, feeling that this is essentially an impossible task. A number of national professional groups have attempted to formulate a formal code of ethics in the past, most notably the American Medical Association, but these have been almost universally abandoned. Although the Legislature has apparently granted to the Board the power to adopt in regulation a code of ethics, AS08.64.380.G, I suspect that it would prove difficult if not impossible to formulate a comprehensive ethical code.

In summary, I feel that the "Preliminary Audit Report" is fair and accurate, with the reservations expressed above, I agree with the recommendation enclosed in the report. I feel that the report accurately reflects the public spirited efforts of the Board and its various members, and I feel that Ms. Harms and Mr. Busch have done a commendable job in identifying the problems against which the Board has to struggle in order to accomplish its goals and objectives.

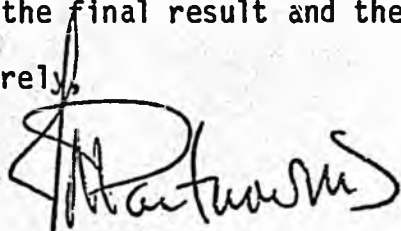

As only one of two "leftovers" from the first audit of the Board several years ago, I am personally appreciative of the time and consideration which the auditors spent in order to provide a fair and accurate assessment of the Board's status.

LEGISLATIVE
AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on your preliminary Performance Review of the Alaska State Medical Board. The Department of Commerce and Economic Development agrees with your finding that the Medical Board has been operating in the public interest and should be continued.

The department concurs with your recommendations that an equivalent to the former CSSB 237 be introduced in the 1983 legislative session and that hospitals be required to notify the Medical Board when a practitioner's hospital privileges have been refused or restricted due to the practitioner's actual or potential danger to the public.

The department does not feel that the composition of the board should be changed at this time. Liability for the authorization of physician assistants and paramedics to practice lies solely with their collaborating physicians. There are only ten podiatrists licensed by the board, of which only four presently reside in Alaska. A member from this profession on the board does not appear to be necessary.

Lastly, we are in basic agreement with the auditor's comments on page 5 of the report. The investigative unit is presently fully staffed, and complaints are being handled in an expeditious manner. As of June 30, 1982, 21 cases were reported as pending. During a recent board meeting (September 9-10, 1982) 15 were closed. There are presently six active cases, none are priority one. In this regard, we would like to comment on the choice of the word "backlog" to describe those cases which are presently under investigation. We believe that the term "backlog" may be misleading to the extent that it implies that no investigative action has been taken on a case. All complaints presently filed with the Division of Occupational Licensing are being actively investigated and their status is more correctly described as "active." A single case may remain open for an extended period of time and receive substantial attention because of its complexity and would be considered an "active" case rather than a "backlog" case in our terminology.

Mr. Gerald L. Wilkerson, CPA

The above comments notwithstanding, the department concurs with the basic recommendation that closer management analysis is appropriate here to determine whether additional investigative support is necessary.

Thank you again for the opportunity to comment on your findings.

Re: Alaska State Medical Board

Dear Mr. Speaker:

Pursuant to AS 44.66.050(a) the House Labor and Commerce Committee has held hearings regarding the above referred Board. Under AS 44.66.050(e) the Committee recommends adoption of the attached Committee Bill continuing the Board. The Legislative Budget & Audit Committee report outlined some concerns that have been reviewed by the Alaska State Medical Board. The Labor & Commerce Committee is satisfied that those concerns are being addressed in an expeditious manner.

The Committee believes the Alaska State Medical Board should be reestablished. The Alaska State Medical Board regulates the practices of medicine, osteopathy, and acupuncture by physicians, osteopaths, physician assistants, paramedics, and podiatrists. By establishing minimum educational and experience requirements and actively investigating complaints from the public and other practitioners, the Alaska State Medical Board provides a

needed public service. Specifically, the findings of the Committee of the public need for the Board as required under AS 44.66.050(c) are as follows:

AS 44.66.050(c) " A determination as to whether a board or commission or agency program has demonstrated a public need for its continued existence shall take into consideration the following factors:"

(1) the extent to which the board, commission or program has operated in the public interest;

The Alaska State Medical Board provides for examinations twice a year and has held an average of 4 meetings a year in various locations throughout the State.

2) the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters;

The Alaska State Medical Board has been impeded in its operation by the lack of statutory authority to address licensing and business practice(s) violations. Also, the Division of Occupational Licensing has been unable to provide support necessary to the Board and the Courts are not placing emphasis on the findings of the Board developed through the hearing process.

(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest;

The Alaska State Medical Board has recommended and strongly supported legislation to correct these problem areas.

(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided;

The Alaska State Medical Board has encouraged interested persons to report by advertising and requesting public input on proposed regulation changes.

(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions;

The Division of Occupational Licensing places advertisements of the Alaska State Medical Board's meetings and examinations.

(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved;

While there have been no consumer complaints filed with the Ombudsman or the Attorney General's Office regarding the Alaska State Medical Board, there is no provision for consumer complaints in AS 08.64.

(7) the extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public;

The Alaska State Medical Board has issued 349 licenses, temporary permits, locum tenens permits, physician assistant authorizations, and paramedic authorizations since July 1981. The Board has a liberal policy of licensing by endorsing physicians from other states. The Alaska State Medical Board requires the FLEX exam and of completed internship or residency which serves to protect the public.

(8) the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest; and

The Committee believes the Alaska State Medical Board to be in compliance with applicable law and regulation.

(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The Committee believes adoption of the proposed legislation would better serve to protect the interests of the public.

Pursuant to AS 44.66.050(d) the Committee recommends the following:

(d) As to each board, commission, or agency program assigned to it for purposes of review, the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding

officer of the house. The report shall contain a summary of the findings of the committee as to the compliance of the board, commission or program with the factors enumerated in (c) of this section, together with a summary or recommendations of the committee as to each of the following:

(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address;

The Alaska State Medical Board regulates the medical practice of physicians, osteopaths, physician assistants, podiatrists, and acupuncturists.

(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments;

The objective of the Alaska State Medical Board is to ensure that the public is provided safe and effective medical care by qualified health care professionals.

(3) an identification of any other programs having similar, conflicting or duplicate objectives;

The Committee found no other program having similar, conflicting or duplicate objectives.

(4) an assessment of alternative methods of achieving the purposes of the program;

The Committee could find no viable alternative method of achieving the purposes of the Alaska State Medical Board.

(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level;

The Committee believes the consequence of eliminating the Alaska State Medical Board or funding its activities at a lower level would be an unnecessary exposure to potential improper medical care.

(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts; and

The critical necessity for proper medical treatment is the primary justification for the continuation of the Alaska State Medical Board.

(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The Alaska State Medical Board should be given legislative support in addressing the concerns outlined by the Legislative Budget and Audit report.

SECTIONAL ANALYSIS OF PROPOSED CS HB 332 (FINANCE)

TITLE: An Act relating to professional licensing and to the regulation of the practice of medicine, and extending the termination date of the State Medical Board; and providing for an effective date.

SECTION 1. Allows the Board to hire an investigator to investigate consumer complaints, and lists the duties of the Board. This is in response to audit findings that there is too much lag time in investigating physicians reported to the Board.

SECTION 2. Extends the life of the Board until June 30, 1987.

SECTION 3. Amends current law to provide that physicians appointed to the Board must be licensed in Alaska and represent different geographical areas to the greatest extent possible.

SECTION 4. Amends current law by limiting successive Board terms to two and provides for appointment of staggered four year terms.

SECTION 5. Allows the Board to remove a member for not attending board meetings.

SECTION 6. Requires a minimum of four board meetings per year.

SECTION 7. Amends current law by providing duties of the Board; presently no duties are specified in statute.

SECTION 8. Amends current law by exempting a person licensed under another chapter of this title from the requirements of this chapter.

SECTION 9. In response to audit findings, specifies the reasons to refuse licensure to an applicant. The wording found offensive was the reference to "morally...unfit".

SECTION 10. Amends current law by changing "endorsement" to "credentials" and by requiring podiatrists to be licensed as well.

SECTION 11. Provides that podiatrists, as well as physician assistants and osteopaths, can get temporary permits.

SECTION 12. Changes timeframe for license renewal from two to four years.

SECTION 13. Raises license and application fees, resulting in \$549,000 additional revenue which will more than pay for the

investigator position provided for in section 1. (See fiscal note.)

SECTION 14. Amends current law by specifying grounds for disciplinary action.

SECTION 15. Amends current law by providing for disciplinary sanctions.

SECTION 16. Provides that hospitals must report to the Board if they restrict or refuse hospital privileges of a physician. Again, this is a response to audit findings.

SECTION 17. Provides that a person practicing without a license or permit is guilty of a class A misdemeanor.

SECTION 18. Provides for a clearer definition of the practice of medicine and the practice of osteopathy.

SECTION 19. Repeals current law relating to substitution of members at board meetings, annual report to the Governor, the "good moral character" language discussed in the analysis of section 9, limits or conditions on license and discipline, grounds for revocation of license, and elimination of "unprofessional or dishonorable conduct" from the definition section.

SECTION 20. Provides for an immediate effective date.
