BOARD OF EDUCATION

STATE OF ALASKA

OFFICE OF THE GOVERNOR
Pouch A
Juneau, Alaska 99811

BOARDS AND COMMISSIONS RESUMÉ

INSTRUCTIONS

A separate application is required for each position for which you apply. Complete and specific answers will aid in rapid and accurate processing of your resumé. The initial determination of whether you qualify for the position specified will be based on this application.

Please type or print legibly in ink. Forward to the above address. Be sure your answers are true. A willfully false answer may result in your disqualification or removal from office if you are appointed.

Position for which I am applying:
STATE BOARD of EDUCATION

Please list any other Board or Commission on which you serve:
NORTHWEST ARCTIC School BOARD - Member

Name	Previous Name applied under
MARY J. SCHAEFFER	N/A
Mailing Address	**Residence Address**
P.O. Box 106	826 4th Ave. Kotzebue, Ak.
City, State and Zip Code	
KOTZEBUE, ALASKA 99752	
Home Telephone	**Business or Message Telephone**
(907) 442-3468	(907) 442-3580

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election:

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional)

Social Security Number (Optional) 574-12-7906

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating?
N/C

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?
☐ YES ☒ NO If "YES", explain.

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

01-012(2/81)

U P - D A T E

3/22/84

On her resume', Mrs. Schaffer states that she is currently employed as Legislative Information Officer in Kotzebue. That information is now out-of-date.

Actually Mrs. Schaeffer is employed at Maniilaq Corporation, a non-profit, native health service for the Kotzebue - Kotzebue Sound area.

R E S U M E'

R E S U M E

Name: Mary J. Schaeffer
Age: 42 (Born at Kotzebue 6-7-40)
Marital Status: Married 12-25-59; we have nine children (five own and four foster)

Education:
Completed High School: 4 years Mt. Edgecumbe High School, Sitka, Ak.

Language Skills:
Speaks fluent English and Eskimo (Inupiak)

Cultural Background:
I was raised in the Village of Noatak until I was 11 years of age. The main language spoken was the Eskimo language. It was not until we moved to Kotzebue that the English language was mandatory. Our means of traspertation was dogsled in the winter months and boats in the summer. We lived in tents from April until last August gathering food for the winter months.

Employment History:

1. Maumeluk Association: promoted as Vice-President for Management and Planning December, 1976 provides leadership, guidance and coordination in the planning, development, operation and evaluation of the delivery of services in the areas of Health, Education, Manpower and Planning; develops and demonstrates new methods and techniques for community participation in and management of their health programs; provides consultation and technical assistance in the evaluation, design, and implementation of health management and corporations delivery system; and coordinates health development activities within the Northwestern region directed to the improvement of the health of the people.

2. Hired as an "ONAP" Program Director to initiate efforts of increase the amount of self-determination afforded to the natives of Northwest Alaska with the passage of the Indian Self-Determination Act (P.L. 93-638). Maintain close contact with Bureau of Indian Affairs personnel in Juneau and Nome; act in liason role and close communciation with eleven (11) village Tribal Governing Bodies within the Region; attend Contract Managers Committee meetings within the State of Alaska as a representative of the NANA Region; travel to villages attending Tribal Governing Body Meetings in order to facilitate an exchange of information and ideas on program contracting; hold regional workshops with representatives from each Tribal Governing Bodies within the region; help develop contract proposals that reflect self-determination for the design and operation of Bureau of Indian Affairs programs that impact the NANA Region.

Bureau of Indian Affairs (Juneau, Alaska)

Was employed as an Employment Assistance Specialist: opened up a Sub-Agency office in Kotzebue; assisted in the development and carrying out of the program which included Adult Vocational Training; Direct employment and Pipeline hire of Natives within the NANA Region. Travelled to eleven (11) villages within the region and had contact with the village governing bodies.

CONSULTANT:

University of Alaska Biomedical Satellite Communications Program
University of Alaska BIA School Board Training Program

EMPLOYMENT HISTORY:

June 1977 to Present

President, Sam Kito, Jr. & Associates. I have provided services as a consultant/lobbyist to corporations and organizations providing expertise in cultural, social and economic development in the rural areas of the State. I have served as a consultant to the following companies: ALASCOM, Inc., Alaska 100 Insurance, Inc., Morrison-Knudsen Company, Inc., Doyon, Ltd., Goldbelt, Inc., Alaska Federation of Natives, Arctic Slope Regional Corporation, Alaska 1984, Cook Inlet Region, Inc., Sealaska, Inc.

June 16, 1975 to June, 1977:

President, Alaska Federation of Natives, Inc., Anchorage, Alaska. My duties were overall administrative responsibility for all employees of AFN, Inc. I had under my direction all departments of AFN, Inc., which included Land Claims, Human Resources, Technical Assistance, Alaska Student Higher Education Services, Health Careers, Bush Justice, Accounting and the Office of Minority Business Enterprises.

March 1973 to June 15, 1975

Executive Vice President of Doyon, Ltd.; Fairbanks, Alaska. My duties were overall administrative responsibility for all employees of Doyon, Limited. Under my direction were the departments of Land, Community Services, Finance, Legal, Administrative and Economic Development.

EMPLOYMENT HISTORY: (cont.)

February 1972 to March 1973

Executive Director of the Tanana Chiefs Conference, Fairbanks, Alaska. My duties were overall administrative responsibility for all employees in all programs contracted by the Tanana Chiefs Conference. There were 30 full-time employees under my direction. During this period, Doyon, Limited, contracted all implementation functions of the Alaska Native Claims Settlement Act to the Tanana Chiefs Conference.

June 1971 to February 1972

Executive Director of the Fairbanks Native Association, Fairbanks, Alaska. My duties were overall administrative responsibility for all programs administered by the FNA. These included a $193,000 Monel Urban Indian Center Grant, a $284,000 BIA general assistance contract, and a contract for the Boarding Home Program. I was responsible for implementing the programs as outlined by the Model Urban Indian Center grant. There were 18 full-time employees and 6 part-time employees under my direction.

August 1967 to June 1971

Operations Controller for RCA Service Company, Gilmore Creek, Fairbanks. Duties were the overall administative and technical responsibility for group activities. This included delegating work assignments, supervising activities and providing technical assistance when required. Technicians under my direction operated and maintained unique ground equipment for Nimbus weather satellites.

May 1966 to August 1967

Leader Test and Validation Activity, RCA Service Company, Kennedy Space Center Communications Project, Merritt Island, Florida. My duties were the overall administative and technical responsibility for group activities. This included delegating work assignments supervising activities, and providing technical assistance when required. Technicians under my direction were responsible for the operation and maintenance of all voice, data, and A2A video wide band circuits and equipment at the Kennedy Space Center.

August 1962 to May 1966

RCA Service Company, Anchorage, Alaska--White Alice Project. My duties were the operation and maintenance of REL-39 Tropospheric Scatter Transmitters and Receivers and associated carrier equipment and systems.

Prior to my employment in the White Alice Project, I attended school.

Juneau, Alaska 99803

GENERAL BACKGROUND

Sixteen years of experience in education in Alaska, including: five years secondary teaching experience, supervisory experience, curriculum development, and six years administrative experience at the State level. These have been with all ages and educational levels.

CURRENT POSITION

1980 - present: Education Administrator I with the Alaska Department of Education, Office of Adult and Vocational Education.

PAST EXPERIENCE

July 1978 - December 1979: Program Manager, Career and Vocational Education, Alaska Department of Education.

June 1974 - May 1978: Instructor (Lecturer): Juneau-Douglas Community College.

I developed and taught courses for the Juneau-Doulgas Community College including "Wild Game for the Table", "Food from the Sea", "Infant and Child Nutrition", and "Mexican Cooking".

December 1976 - February 1977: Consultant: University of Alaska.

I designed and developed a plan for a statewide training program for Title 20 Education Programs in Homemaker-Home Health Aide Training.

March 1975 - September 1976: Instructor: Homemaker-Home Health Aides Incorporated, Juneau.

I coordinated instruction and assisted with selecting applicants for the Homemaker-Home Health Aide positions.

August 1970 - June 1974: I was an Instructor and Department Chairperson for Juneau-Douglas Borough School District, Home Economics Department.

I taught secondary Home Economics courses designated as Family Living, Advanced Food Preparation, and Service Advanced Clothing Selection and Construction, Occupational Training for Waiter-Waitress and Food Service. I supervised another employee, completed curriculum development, department planning, and budget. I was responsible for designing and developing a new Home Economic facility and program for the Floyd Dryden Junior High School. In addition, I acted as advisor to Future Homemakers of America, a vocational student leadership organization.

ADDITIONAL INFORMATION

• ALASKA COUNCIL OF SCHOOL ADMINISTRATORS •
326 Fourth St., Suite #510 Juneau, Alaska 99801 586-9702

an organization of Alaskan School Administrators

April 9, 1984

The Honorable Mae Tischer
House of Representatives
State Capitol, Pouch V
Juneau, AK 99811

Dear Representative Tischer:

The Alaska Council of School Administrators would like to take this opportunity to support Mr. Spike Jorgensen for reappointment to the Professional Teachers Practice Commission. Mr. Jorgensen has been the representative from the Superintendents association and continues to have their support, not only on the commission, but as an officer of the the State Administrators Association. His professional integrity, as well as his knowledge of issues faced by the Commission, makes him a valuable asset to the Professional Teachers Practice Commission.

We urge legislators to support this nomination.

Sincerely,

Don MacKinnon
Executive Director

DM:clc

DIVISION OF FAMILY & YOUTH SERVICES INVESTIGATION

Box 188
Douglas, AK 99824
April 4, 1984

Member of the House and Senate
State Capitol
Pouch WF
Juneau, AK 99811

Dear Senators and Representatives:

A number of parents and foster parents across the state have complained to their legislators or to members of the house HESS committee concerning abuses and improper action at the hands of DFYS administrators and/or social workers. Many of these complaints concern the administration of recently passed child abuse laws and the unjustified removal of children from their families. Other complaints concern unjustified abuse charges brought against foster parents by DFYS. One Juneau foster parent had to pay $24,000 in attorney's fees to clear his name of DFYS's groundless abuse charges.

The members of Alaska Citizens for Families (ACF) were surprised on April 3, 1984, when the house HESS committee refused a request by it's chairperson to investigate the Division of Family and Youth Services and their treatment of parents and foster parents. The ACF considers it irresponsible by the legislature to pass new child abuse legislation that gives DFYS more power over parents and their children while ignoring parents and foster parents complaints. We consider this investigation so important that a moratorium on all HESS legislation is requested until this investigation has been accomplished.

Sincerely,

Jan C. Still

Jan C. Still for
Alaska Citizens for Families

to determine whether legislative action is necessary to resolve possible procedural or legal deficiencies in present practices and or to review, increase or decrease appropriations required to perform the tasks of the division.

Version 6

HOUSE HESS COMMITTEE
INQUIRY INTO THE DEPARTMENT OF HEALTH AND SOCIAL SERVICES, DIVISION OF FAMILY AND YOUTH SERVICES

Pursuant to Sections 795 and 798 of Mason's Manual of Legislative Procedure, the House Health, Education and Social Services Committee resolves to commence an inquiry into the the Department of Health and Social Services, Division of Family and Youth Services, in accordance with the following provisions.

PURPOSE

The purpose of the inquiry by the House HESS Committee will be to consider specific questions within the scope of the inquiry concerning the Department of Health and Social Services, Division of Family and Youth Services, in order to determine whether legislative action is necessary to resolve possible procedural or legal deficiencies in present practice; or to redirect, increase or decrease appropriations required to perform the responsibilities of the division.

SCOPE

The scope of the HESS Committee inquiry will include questions concerning practices of the Department of Health and Social Services, Division of Family and Youth Services, with respect to the case of Mr. Bernie Holland. Specifically, the HESS Committee will address the following question; subject to the time indication limitation

> Were the procedures used by the Department of Health and Social Services, Division of Family and Youth Services, in the revocation of Mr. Bernie Holland's license to operate a foster home in the state, such that a need for corrective legislation was demonstrated?

While the circumstances of this particular case are being examined, the purpose of the inquiry is to develop information which may lead to legislation. Determining the merits of this particular case is not within the scope of the inquiry.

PROCEDURE

Mason's Manual of Legislative Procedure, Part X (Pages 570 - 586), and Title 24 of the Alaska Statutes will govern all

investigative hearings by the Committee. Persons asked to testify before the Committee will be given at least 24-hours notice. The Committee will attempt to schedule no more than two persons to testify per investigative hearing, but may schedule more than two persons if necessary. Persons may be asked to appear before the Committee more than once. Testimony will be limited to those persons requested to testify by the Committee.

Actual hearing time by the HESS Committee relating to the inquiry will be limited to a period not to exceed eight hours.

During the period of the inquiry, the HESS Committee will continue to hear bills as necessary and in a manner consistent with previously announced Committee policy.

STAFF

The HESS Committee staff will be responsible for coordinating, scheduling, and providing appropriate staff support for the inquiry. The Committee will be advised on legal matters by the Legislative Affairs Agency, Division of Legal Services. No additional staff is anticipated at this time.

FUNDING

At this time, no requests for additional funding are anticipated.

MODIFICATIONS

All of the provisions of this inquiry are subject to modification by a majority vote of the members of the HESS Committee at any time.

MEMORANDUM

TO: Representative Bettisworth
Chairman, Legislative Budget and Audit Committee

FROM: Representative Barnes
House Majority Leader

DATE: March 19, 1984

I request that a Legislative Performance Audit be conducted of the Division of Family and Youth Services of the Department of Health and Social Services.

My particular concerns in this regard center on the handling of cases involving sex abuse of minors. I have had repeated constituent complaints alleging insensitive and unprofessional conduct on the part of DFYS staffers in handling these cases. Also, it has been alleged to me that one case involves a serious conflict of interest.

Inquiries by me and my staff into these matters indicate that there are adequate grounds for serious concern.

RB/rt

HOUSE OF REPRESENTATIVES

OFFICE OF THE MAJORITY LEADER

Room 216
STATE CAPITOL

CONFIDENTIAL CONFIDENTIAL CONFIDENTIAL

To: Ramona Barnes, Majority Leader

From: Jim Wood, PA

Date: March 22, 1984

Re: Allegations of Improprieties in the Division of Family and Youth Services.

These allegations pertain to the Anchorage Office of DFYS, Department of Health and Social Services and their handling of child sex abuse and foster care programs.

1) In the Wilson case (Mrs. Pat and daughter) Cheryl Mann, a DFYS social worker, was interviewing the victim, a female minor, in the presence of the child's mother. Ms. Mann inquired as to what the adult male perpetrator had done to her. The child, not knowing the sophisticated term masturbation, replied, "He made me jack him off."

At that time Ms. Mann burst into fits of laughter. Upon regaining her composure, Ms. Mann then reprimanded the child, noting that, "You don't use that kind of language when you're talking to professionals."

Complaints by the mother of insensitive and unprofessional conduct on the part of Ms. Mann were dismissed by both Dolly Coke and Sue Harris, the unit supervisor. She was told that her concerns should be centered on her daughter, rather than on the conduct or performance of the DFYS office.

Dolly Coke, in recent conversation with Representative Barnes' office, defended Cherly Mann's performance, and her departure from the office with a good recommendation.

Other statements bv Mrs. Wilson indicate that DFYS staffers, rather than explaining their procedures and the reasons why they were acting in accordance with the requirements of the law and in the best interest of the child, ~~DFYS staffers~~ relied on threats to obtain Mrs. Wilson's cooperation; repeatedly threatening to take her daughter away from her if she did not do as they said.

Mrs. Wilson requested assistance from Representative Barnes in correcting what she considers gross improprieties and unprofessional conduct on the part of DFYS personnel that was upheld by supervisors. She asked, also, for assistance in obtaining legal counsel to file a lawsuit against the state in case these abuses were not corrected forthwith.

PRIVILEGED AND RESTRICTED INFORMATION -- NOT TO BE RELEASED.

2) In the Parker case (Mr. and Mrs. Joe), Representative Barnes was asked for assistance/guidance in the case of the Sterns children. The children (one male, one female) of Lynn Stearns told the Parkers they were both being physically and sexually abused by Bruce Dittman, live-in companion of their mother. The Parkers reported the alleged abuse to police, who notified DFYS. DFYS took custody of the children.

Initial concerns of the Parkers were as follows:

Lynn Sterns is an employee of the DFYS. (She had told the Parkers she was a social worker, handling abused children. This heightened their concerns. DFYS officials told Representative Barnes' office, however, that she was a secretary). The Parkers' children are close friends of the Stearns children. The Stearns children visited the Parkers frequently; often spending the night. The Parkers stated they had gown to love the Stearns children, and felt that after the trauma these children had suffered as a result of being taken into custody, then to a DFYS facility, interviewed, questioned, etc.; that a visit from friends would be helpful and supportive. They were told they could not visit the children by Dolly Coke, the DFYS social worker assigned to the case. When they later appeared at the shelter and again asked if they could visit the Stearns children, they were allowed to do so. When Dolly Coke learned they had visited the children, she became highly incensed and irate. The Parkers feared the incident would jeopardize their chance to obtain custody of the Stearns children; which they had requested. At this point, they requested guidance from Representative Barnes' office.

Additional concerns surfaced subsequently, which aggravated the Parkers concerns that there would be built-in bias in favor of Lynn Stearns, due to her working relationship and association with the social worker handling the case. Ms. Coke admitted to Representative Barnes' office that, indeed, she had counseled Ms. Stearns for previous problems.

Discussion with the prosecutor in the Dittman case revealed that Ms. Coke had permitted Ms. Stearns to visit with the children prior to the grand jury proceeding where Mr. Dittman was indicted; and that Ms. Stearns had coached the children in how to respond to questioning; thus breaking her pledge that she would not attempt to tamper with witnesses in the proceeding. It would appear that this was a serious indiscretion that would call into question either Ms. Coke's objectivity or her judgment.

Ms. Stearns reportedly refused to believe that Mr. Dittman would harm her children; but lashed out at the children instead; calling them liars, thieves, delinquents, etc. and alleged that they were likely to have sex together if opportunity permitted. Based on her allegation, the Parkers assert, the Stearns children were split up. The Parkers feel that this action was improper in that it was taken on the basis of nothing more than a totally baseless allegation by Ms. Stearns arising out of an angry, resentful reaction to her boy friend's arrest and that it was only the relationship between Ms. Coke and Ms. Stearns that resulted in any credence being placed in such a transparent and totally predictable and false allegation.

The Stearns daughter has been placed in a foster home run by a good friend of Ms. Stearns. The Parkers see this as another example of favoritism to Ms. Stearns that is rooted in a conflict of interest situation. As Ms. Stearns has access to her daughter, and has not accepted the fact that her daughter has been abused, the Parkers fear that Ms. Stearns will attempt to coerce her daughter to retract her testimony regarding her abuse.

A serious concern of the Parkers as well as Representative Barnes is that Ms. Coke of DFYS resents the fact that the Parkers contacted Representative Barnes and Senator Rodey and requested guidance. Ms. Coke reportedly threatened the Parkers, saying that they were going to get into serious trouble for violating the privacy of the children. Representative Barnes and Senator Rodey both feel strongly that constituents have a right to contact their elected representatives any time and on any topic they choose. State agencies must understand and accept this right as fundamental in a democratic society. It appears very probable that Ms. Coke's resentment will prejudice the Parkers' opportunity to visit the Stearns children and receive fair consideration in their request for being awarded custody of them.

The Parkers stated they were also concerned that the Stearns children were not receiving needed care. To their knowledge, neither has received any counseling to help them overcome the trauma they have suffered, and both were in need of eye exams, glasses, etc. for extended periods of time.

Lastly, the Parkers stated that the Stearns daughter was extremely lonely, distraught, and miserably unhappy when they met her by chance; yet she is not permitted to visit her brother, the Parkers, or anyone except her mother, whom she both dislikes and distrusts.

PROMISSORY NOTE

$ 14,433.51 Juneau, Alaska

~~October~~ JANUARY 9, ~~1983~~ 1984

FOR VALUED RECEIVED, the undersigned promises to pay to the order of Faulkner, Banfield, Doogan & Holmes at 801 W. 10th Street, Suite 300, P. O. Box 1150, Juneau, AK 99802-1150, or at such other place as payee shall designate, the sum of Fourteen Thousand, Four Hundred Thirty-three Dollars and Eighty-one Cents (14,433.81), together with interest on the unpaid balance thereof at all times at the rate of eight percent (8%) per annum. Said sum and interest are due and payable in installments of $500 on the first day of each and every month commencing ~~November 1, 1983~~ FEBRUARY 15, 1984 and continuing until said note is fully paid.

If any of said installments of principal or interest is not paid within ten (10) days after the same become due and payable, the whole of the principal sum then remaining unpaid, together with interest that shall have accrued thereon, shall forthwith become due and payable at the election of the holder of this note; PROVIDED, HOWEVER, that the maker or guarantors of this note may pay any or all unpaid installments before their respective maturity dates and reduce the principal amount thereof accordingly.

Presentment for payments, notice of non-payment, protest and notice of protest for non-payment are hereby waived, and each and every person signing or endorsing this note binds himself hereon as a principal and not as a surety, and agrees that the time for payment of such note may be extended by payee without notice, and agrees that in case suit or action is brought to collect this note, or any portion thereof, to pay,

paid within ten (10) days after the same become due and payable, the whole of the principal sum then remaining unpaid, together with interest that shall have accrued thereon, shall forthwith become due and payable at the election of the holder of this note; PROVIDED, HOWEVER, that the maker or guarantors of this note may pay any or all unpaid installments before their respective maturity dates and reduce the principal amount thereof accordingly.

Presentment for payments, notice of non-payment, protest and notice of protest for non-payment are hereby waived, and each and every person signing or endorsing this note binds himself hereon as a principal and not as a surety, and agrees that the time for payment of such note may be extended by payee without notice, and agrees that in case suit or action is brought to collect this note, or any portion thereof, to pay, in addition to the costs of said suit or action, a reasonable sum as attorney's fees.

DIVISION OF FAMILY AND YOUTH SERVICES

In the matter of Bernie and Mary Holland, a Licensed Child Foster Home, Respondents.	)	NO. 4190

CHRONOLOGICAL SUMMARY

1972	Mary and Bernie Holland begin accepting foster children into their home in Juneau, Alaska
1972-1981	H&SS consistently evaluates Holland foster home as one of the best in Alaska.
October 1978	H&SS/DFYS adopts regulations governing foster child care
September 16, 1981	Artie J, a foster child placed by the State at the Holland's home, sexually molests the Holland's 8 year old son. Hollands request State remove AJ from their home and obtain psychological counseling for him.
Mid-October, 1981	Rumors circulate at DFYS that BG Holland will complain to Ombudsman about State's "mishandling" of AJ case. Rumors circulate at DFYS that Bernie Holland uses drugs, beats his wife, molests female employees.
October 31, 1981	AJ, placed in Gisel foster home, rapes and sodomizes young daughter of foster parents. State had obtained no psychological counseling for AJ. H&SS' worries escalate regarding possible complaint to Ombudsman by Mr. Holland.
October 23 - November 9, 1981	Dr. Lobo investigates Holland House, finds rumors unsubstantiated. H&SS Pugh telephones BG Holland and states: "You won't get a license for your group foster home; no money in the budget this year, or next year."

November 1, 1981	H&SS employee Danneker tells Father Lobo "If it wasn't for those goddam Hollands this would never have happened." (AJ's rape incident of 10/81 at Gisel home)
November 13, 1981	BG Holland makes formal complaint to Ombudsman re H&SS failures on AJ case.
November-December, 1981	Alaska Foster Parent Association tells BG Holland "If you file a complaint, DFYS will lay formal allegations against you. That's their standard operating procedure in Anchorage."
December, 1981	All foster children removed from BG Holland home. H&SS explains this as merely coincidental and "natural attrition."
June 4, 1982	Holland House group home provisional license signed by Kay Smith, H&SS (license # 235005)
June 4, 1982	Highly laudatory personnel evaluation for Father Lobo received.
June 8, 1982	Father Lobo attends H&SS meeting to discuss Holland group home application. Lobo speaks favorably of Hollands. All administrators opposed to granting Hollands a group home license.
June 10, 1982	H&SS, Mr. Pugh, calls meeting with BG Holland, Reece, Hansen, Monroe, & Walker to reject Holland group home application.
June, 1982	H&SS, Mrs. Borkowski hears Mr. Reece at Regional Office, call BG Holland ("that son of a bitch...".
July, 1982	H&SS, Mrs. Borkowski, hears Reece and Smith say about BG Holland "We'll shut him up and he'll never get his hearing..." (to appeal denial of group foster home license).
July 13 (or 16?), 1982	DFYS decides to suspend Father Lobo
July 14, 1982	Danny H. and Mickey H. accuse BG Holland of bad actions.
July 15, 1982	Evening meeting: H&SS Olson, BG Holland, Dr. Brandaman, Dr. Horchover, Mickey H. Mickey H.

admits allegations against BG Holland were lies by her and Danny H; only an attempt to show anger, frustration.

July 16, 1982 — H&SS, Mr. Reece, receives written and oral reports from Probation Officers Olson and Anderson clearing BG Holland. Reece orders Danneker to investigate and "get Holland, I've got my orders."

July 16, 1982 — DFYS orders highly unusual investigative procedure: Holland file removed from "Family" side of DFYS (Father Lobo) and permanently given over to "Youth Services" side of DFYS (Danneker, Reece and AJ's Probation Officer, Mr. Wild).

July 23, 1982 — H&SS. Danneker and Tuovinen arrive unannounced at BG Holland home, make allegations against BG Holland of child molestation; call BG Holland "asshole"; threaten to remove all foster children from Hollands. Danneker and Tuovinen present a formal written document accusing the Hollands of thirteen allegations, including child molesting/sexual abuse.

July 28, 1982 — Danneker receives phone call tipping him off that BG Holland is aware of Danneker's misbehavior in Wrangell (sleeping with foster mother, smoking marijuana in ~~State~~ vehicle while on duty; being caught smoking marijuana in ~~State~~ vehicle by child he was assigned to supervise as the child's probation officer).

August 5, 1982 — Laurie Vaughn conducts Standard by Standard evaluation of Holland House. Hollands cooperate fully.

August 6, 1982 — H&SS, Mr. Reece, asks Alaska State Troopers to investigate BG Holland to see if BG Holland had access to AJIS system. AST later reports Holland has no access to AJIS.

August 11, 1982 — Alaska State Troopers respond to H&SS Monroe's request for criminal history information on Mary and BG Holland. AST later reports no criminal history exists.

August 17, 1982	Investigator Danneker makes final report directly to Mr. Pugh. Report was approved by Reece and finds all allegations uncontradicted. Recommends license revocation.
August 20, 1982	Danny H files affidavit with H&SS stating all charges made 7/15/82 against BG Holland false
September 27, 1982	DFYS officially closes its "investigation" of Hollands. DFYS concludes "most allegations were uncontradicted." Notifies Hollands of conclusions.
November 11, 1982	BG Holland requests and receives meeting with Commissioner Beirne, H&SS to seek settlement. Botelho tells Holland "Danneker bungled the investigation." Botelho tells Holland "Reece doesn't think you have been punished enough."
December 1, 1982	H&SS, Mr. Reece, files formal accusation of BG Holland incorporating by reference thirteen allegations of 7/23/82.
December 2, 1982	H&SS, Mr. Reece, receives letter from Danny H. admitting falsity of charges against Hollands; DH explains reasons for making false charges.
December 3, 1982	BG Holland requests meeting with Mr. Reece to discuss settlement.
December 15, 1982	H&SS, Mr. Reece, receives letters from Mickey H. and Kathy S. admitting falsity of charges against BG Holland.

Dec 20, 1982. AST investigates BG Holland upon insistance of Lew Reece for interferring with an investigation and divulging confidential information to another foster parent.

Jan 19, 83 Botelho & Pugh ask Holland to meet with them.

This paper is a "Chrono" of events that have happened since September 1981

1. In September 1981 we put in an application for a group home license for teenagers.
2. On September 23, 1981 we had a fourteen year old child removed from our home as my wife caught him trying to molest our eight year old son.
3. Mid-October 1981--- Rumors began to spread around the Regional office about our over-reacting towards having that child removed from our home that was trying to molest our son. The P.O. Bob Wild wrote a report to Dr. Tony Mander and called us over-reactors for having the child removed when we did.
4. Further rumors were spreading in the community-- I beat my wife, drink excessively, use drugs, and molest my female [illegible].
5. Dr Alinio Lobo "informally checked" on these rumors from Oct 1981 through November 1981 and found no wrong doing, in fact just the oposite.
6. October 30, 1981---m there was a meeting in the Regional office that was called by Ms. Kay Smith. The meeting was about my proposed group home proposal. In attendance was Dr. Lobo, Ms Kay Smith, Mr. Lew Reece and Myself. During the meeting, my proposal was rejected for group home application and an improved version was asked for.
7. October 31, 1981---m The same 14 year old boy who we had removed from our home was arrested by the Alaska State Troopers for rape and sodomy on a 6 year old girl who was a member of the household the boy was placed in by his P.O. Wild.
8. November 12, 1981-- I recieved a telephone call from Mr. John Pugh the Director of Family & Youth Services while I was at work at the Alaskan Coin connection located at 723 West 10th Street. He called to tell me that no funds existed in the budjet to support my group home. I informed him that I have never asked the department for money and he stated that the department suffered a huge budjet cut and that funds would not be available for the next year for my group home. His conversation than got around to Art Johnson and the incident in our home and he said to me " We've had staff meetings concerning that incident and we've got our asses covered."
9. November 13, 1981-- I filed a written complaint with the State Ombudsman's office of Gross Negligence against the P.O. Bob Wild. I also stated in that same corresspondance that I was told about the no funds for the group home.
10. When Ms. Smith learned of my filing a complaint she stated to Helen Borkowski that " His name is shit in my book" And when Ms. Borkowski asked her who she was talking about she said "That Bernie Holland""He filed a complaint with the Ombudsman's office and now he can't be trusted, he'll probably go running to the Ombudsman every chance he gets".

12/81

10A.

→ Investigated by Lobo.

11. Between the dates of November 13, 1981 and December 15, 1981 all the children were removed from our home. Ms Smith testified under oath that this was due to "natral attrition".

12, December 11, 1981--- Mr. Lew Reece wrote a confidential memo to Mr Dave ARnold with a copy to Mr John Pugh telling him of my meeting with them on October 30, 1981 and my group home proposal.

13. January 13, 1982 --- Submitted my new group home proposal and when Ms Smith saw this she stated in from of Ms Helen Borkowski " The nerve--- he'll get his license ~~xxx~~ over my dead body.

14. In March 1982 the division began sending hard core cases to our home as they were then under investigation by the Ombudsman's office.

15. In May 1982 the Ombudsman sent a copy of his findings to Mr. John Pugh and on June 7, 1982 Mr Pugh acknowledged the Ombudsman's report with a letter dated June 7, 1982. By this acknowledgement he was aware of my group home plans.

16. June 4, 1982 Ms Kay Smith signed the license approval form and then went to Central Office and had a meeting with Ms Yvonne Walker concerning my group home license, and in fact gave her a copy of my Program Evaluation & Licensing Recommendation. A meeting was held in the C.O. and my license was denied that day. The same day as approval. Everyone denied this meeting except the secretary Ms Helen Borkowski who stated she recieved a telephone call from Ms Smith who stated she was in Walkers office.

17. June 8, 1982-- a meeting was held in Central Office with John Pugh, Yvonne Walker, Connie Hansen, Alinio Lobo and Pat Monroe. My License was discussed and denied at that meeting. Connie Hansen stated under oath that it was denied at this meeting and Dr Lobo left this meeting with the same feeling. At 11:30 am that same date I was in Dr Lobo's office when he recieved a phone call from Yvonne Walker telling him of the meeting and to bring the important docyments for this case. Dr Lobo had my file at that time as it was on his desk because he copied my Standard-By-Standard Evaluation, Program Evaluation & Licensing Recommendation as well as the CWS 80A for me. Pugh stated he read my file and program evaluation before that June 8, 1982 meeting and had questions for Dr Lobo and Connie Hansen. It's impossible because my file never left the Regional Office until the 9th of June 1982. Pat Monroe called me the afternoon of June 8th and wanted ameeting with me on the morning of the ninth to discuss my license. I set up a meeting for the 10th of June and during that meeting John Pugh denied my license three times. Pat Monroe stated she took my file home the night before to study it upon orders from John Pugh and found too

18. June 8, 1982-- at approx. 7:30 pm I saw Dr Lobo at the Juneau Airport and he stated to me that he thought my license was going to be denied from what went on at the meeting he was at earlier that day in C.O. He further stated my license was pulled from the clerks desk.
19. Dr Lobo testified he had possesion of my file untill 5:00 pm on June 8, 1982 because he put pertinant documents back into my file upon his return from C.O.
20. June 7, 1982 John Pugh wrote a letter to the Ombudsman acknowledging reciept of his report.
21. June 14, 1982--- I telephoned Ms. Pat Monroe in the C.O. and asked her for a written denial based upon her office's verbal denial on June 10,1982.
22. Written denial done by Pat Monroe on June 15, 1982--- Signed by Jo Walker.
23. Late June 1982--- The secretary Ms Helen Borkowski overheard [illegible], talk between Mr. Lew Reece and Ms Kay Smith, once it was learned I filed for a hearing concerning this denial of licensure,---- to thwart my hearing by counteracting made up allegations that would silence me once and for all.
24. July 14, 1982-- Danny Jo Harrison was sent back to jail for violation of his probation. He was contacted by Robert Danneker and then was helped to make allegations against us. w/ Danneker
25. July 15, 1982-- Mickey Horschover made complaints against us to her P.O. marlyn Olson--- A meeting was held that evening with her father Dr. Robert Horschover, her psychologist Dr Sonya Brandaman, myself and P.O. Olson. At that meeting she stated that the only reason she was complaining was because she was tired of being punished by the state. And that "Being at Bernie & Mary Holland's house was probably the best thing that ever happened to her because she would probably be dead from drugs or something else". Mr Olson stated he would write his report reflecting we were clear from any wrong doing.
26. During that week the probation department interviewed all residents in my home and on the 16th of July 1982 Mr. Norm Anderson and Mr Marlyn Olson's report to their superior Mr Lew Reece showed no wrong doing in my household and that collusion existed between Mr Danny Harrison and Ms Mickey Horschover. Mr Reece told his P.O.'s that these reports were bullshit and that he had his orders from upstairs and he was going to get that bastard meaning me.

27. I recived a telephone call from an individual telling me even tho I was cleared of any wrong doing, Reece had his orders to get me and that allegations, and this individual told me what they were, would be laided upon me within two weeks.

28. July 23, 1982--- Mr Robert Danneker and Ms Carolyn Touvenen came to my residence and served my wife and I with thirteen allegations. For 1 ½ hours they harrassed us into trying to answer them with thrates of removing the children and at one point Danneker said to me "Just answer the allegations asshole.

29. At 10;42 p m Robert Danneker (friday night) called my house to tell me they had completed part of there investigation and that he would be serving them on me the next morning at 9:00 am . That evening at 6:00 pm two of my foster children walked down to the office at 515 wlilloughby ave and Danneker told them they had new homes for them.

30/ On Junly 24, 1982 I wrote a letter to Mr Danneker telling him I would not answer his allegations.

31. On July 27, 1982 Mr. Danneker wrote me a letter telling me I was impeeding his investigation and thereby violated three statutes and that I had ten days to answer him in regards to these allegations..

AUG 7 letter

32. On September 27, 1982 the Division found that all these allegations except one was true. It was referred to the Attorney General's office.

33. On September 23, 1982 the Asst A G informed me that no evidence exists confirming these allegations and that he would take no action on my license when the regional office sent it to him and he called Fred Baxter to tell him of this.

34. I attended a meeting with the Commisioner Helen Beirne with the Asst A G and all she wanted me to do was answer the allegations. She stated that Pugh had really trying to get ahold of me. I refused to sit down with him as he lied at the Oct 4-7 hearing about not knowing about my license application and reading the files, on June 8, 1982.

35. On Oct 11, 1982 I filed purjury charges against Pugh and Monroe with the D A's office with documentation against Pugh.

MEMORANDUM State of Alaska

TO: Mr. Lew Reece
Regional Administrator
Southeast Region
Youth Services

DATE: July 16, 1982

FILE NO:

TELEPHONE NO:

FROM: N.L. Anderson
Probation Officer II
Youth Services
Juneau

SUBJECT: Abuse Allegations

On July 14, 1982, I received a phone call from Bernie Holland, foster parent, about Danny Harrison, one of my clients placed in the Holland home. Mr. Holland said he was about have Harrison removed. Harrison was: (1) lying; (2) failing to perform chores; (3) associating with people he had been restricted from; (4) ripping off other foster children in the house; (5) trying to "scam" Mr. Holland on an unemployment check ploy. I asked Mr. Holland to have Harrison report to me at 11:00 a.m.

Harrison called me at 9:30 a.m. to say he could not come at 11:00, that he had a State Office Skills test scheduled at that time. I instructed Harrison to report at 1:00 p.m. instead.

Upon returning to the office after lunch break, there was a note in my box that Harrison had come in at 12:25 p.m. to see me. At 1:15 p.m. Mr. Holland called to ask if I had seen Harrison. I told him of the test conflict and that Harrison was a no-show for the new time. Mr. Holland said Harrison was in his room playing his guitar.

I drove to the Holland residence to take Harrison for a urine sample, per court order. One of the people he had been associating with is a rather well known (to this office) cocaine user.

On the way to the testing center, Harrison denied allegations Mr. Holland had made earlier of violating the foster home rules and/or Conditions of Release. Upon arriving at the urine testing center, Harrison would not produce a urine sample, saying the timing was bad and he could not urinate. After 15 minutes, I took him to the Johnson Center. Upon threat of being detained, Harrison produced a more than ample urine sample within 5 minutes. Returning to the Holland residence Harrison continued to deny any wrong doing on his part. I decided to have a meeting with Mr. Holland, Harrison and myself to resolve the matter.

I explained to Mr. Holland that Harrison was denying any wrong doing. Mr. Holland, in Harrison's presence, outlined the problems he was having with Harrison. Harrison then admitted to most of the charges, but tried putting the blame on other foster children in the home or saying "I'm trying to be good, you can't expect me to change overnight". He continued to deny the unemployment check "scam". Mr. Holland then called Officer McCracken, JPD, to whom Harrison had boasted of the "scam". With the three of us listening, McCracken outlined the conversation he had with Harrison:

Harrison had gone to the Unemployment Office and changed his mailing address from Hollands' to General Delivery. Harrison's plan was to put two of the anticipated checks into his restitution savings fund and hold one back, telling Mr. Holland he had not received it. He planned on blowing the money from the third check.

After this conversation, Harrison admitted it was originally his plan to run the "scam", but since hadn't received the checks yet, and therefore, hadn't pulled of the scam, he hadn't done anything wrong.

Mr. Holland I spoke at length with Harrison about the wrongness of this "scam", whether he had pulled it off or not. Harrison maintained that he had done no wrong. At this point, Mr. Holland left the room. I spoke with Harrison for about 5 minutes and then I left. During that 5 minues, Harrison had completely changed his story and, in Mr. Holland's absence, was again denying any of his wrong acts. As I left, I saw Mr. Holland and asked him to call me the next day if he decided he no longer could work with Harrison. Mr. Holland asked me to remove him immediately, that he felt he could no longer work with Harrison.

Since the Juneau Receiving Home in the past has refused to accept Harrison and he has no relatives in Juneau, I transported him to the Johnson Center for detention. The staff at Johnson was busy with adult prisoners, so Harrison and I had to wait in the lobby for 30 minutes.

During this wait, Harrison became more and more agitated about being detained. He started by saying the only reason for detention was a "personality conflict" between he and Mr. Holland. Then he said that he "was going to blow the whistle on Bernie tomorrow in Court". He explained that Mr. Holland had physically abused him saying that Mr. Holland had hit him in the arm with a stick on several occasions. In the most recent, Harrison said he shoved Mr. Holland onto the kitchen table after Mr. Holland struck him, breaking the table. Mr. Holland then jumped up and challenged him to fight. The matter diffused with no further blows. Harrison said Merick Habon, another foster child with the Hollands, could verify this.

On July 15, I conducted a low key interview with Habon. Bob Dannecker, Foster Care Coordinator, was present. Habon said he was quite happy at the Holland home, that he had not been subject to any verbal or physical abuse. (This is significant, since Habon comes from a very abusive natural home and was fearful upon placement that the foster home would function the same way). He said he had never seen Mr. Holland hit Harrison, either with a stick or a fist. He did say the two have engaged in "friendly" wrestling matches and shadow box with one another.

Habon said the kitchen table was replaced with a more sturdy picnic-type table several days ago because the other table was starting to sag towards the middle. (I was in the Holland house 10-14 days ago for a reception for Lt. Governor Miller and can verify the old table was rather wobbly).

In conjunction with allegations Twiggy Horchover made about Mrs. Holland using foul or abusive language, Habon said this had never happened. That it was his experience she was rather quiet. He did say that Mr. Holland does use foul language in the house occassionally.

Habon volunteered that Harrison had been in trouble at the house recently for failing to do chores and for being caught in the girls living area.

At 2:30 p.m. on July 15, a detention hearing was held on Harrison. Following the hearing, I asked Harrison in his attorney's presence to give me a taped statement about the physical abuse. I explained to the attorney that I had an obligation towards the other children placed there if an abusive situation existed. Harrison immediately went into private counsel with the attorney. The attorney then advised me that Harrison's only complaint was of a "personality conflict" between Harrison and Mr. Holland. He explained the "conflict" as being Mr. Holland calling Harrison a "shitbag" and "worthless" in front of the other children.

I told the attorney Harrison had alleged he had been hit with a stick and physically roughed up by Mr. Holland. The attorney again conferred with Harrison and returned to report that Harrison said he had never been hit or otherwise assaulted. Further, Harrison declined to give any taped statement about the "personality conflict".

#12

Complaint registered to: Division of Family & Youth Services
515 Willoughby Avenue
Juneau, Alaska 99801

000239

Regarding: Bernie & Mary Holland Foster Home /X/ Licensed
(Name of Facility)
/ / Unlicensed

Address: P.O. Box 67, Juneau, AK

Phone: 586-1724

Date complaint received: July 15, 1982

The following complaints were received by the Division of Family and Youth Services regarding the above facility:

1. Allegation that Bernie and Mary Holland yell and direct vulgar and abusive language towards foster children. [7AAC 50.450,(2)]

2. Allegation that Bernie Holland frequently hits foster children with a stick, ruler, yardstick and his hands. [7AAC.50.450,(1)(5)]

3. Allegation that Bernie Holland squirted lemon juice into a resident's mouth, as punishment, and in the process of the resident resisting, used force to open the resident's mouth by holding the jaw and applying pressure. [7AAC 50.450,(1)]

4. Allegation that Bernie and Mary Holland are providing Day Care in their home for from 2-5 children. [7AAC 50.430(b)(d)]

5. Allegation that there is not sufficient space for each foster child to have specific place to keep his/her own personal possessions. [7AAC 50.540(c)]

6. Allegation that the Holland children have played with, destroyed, broken or lost the foster childrens personal possessions. [7AAC 50.420(e)]

7. Allegation that the Holland children are allowed to annoy and "bug" the foster children. When a conflict arises over this issue, that the foster children are verbally abused, and that "the foster children are always wrong, and the Holland children are always right". [7AAC 50.450,(2)(5)]

8. Allegation that adult boarders are living in the Holland foster home and that they are sharing sleeping quarters with foster children. [7AAC 50.420]

The following complaints were received by the Division of Family and Youth Services regarding the above facility:

9. Allegation that adult boarders participate in the family meetings and trials and are allowed to vote on foster childrens punishment [7AAC 50.410(a)]

10. Allegation that three foster children and one adult boarder sleep in a bedroom with no windows. [7AAC 50.560(e)(3)]

11. Allegation that family meetings are held late at night and often last from 11:00 p.m. to 2:00 a.m., and that foster children do not get enough sleep because of this and that one foster child fell asleep at a meeting and was punished for it. [7AAC 50.410]

12. Allegation that Bernie Holland has belittled and used cruel and derogatory remarks when describing a foster child to other foster children, and to other persons who have entered the foster home. [7AAC 50.450(2)]

13. Allegation that Bernie Holland patted a female resident on the bottom, grabbed a female resident around the waist and while "wrestling, grabbed her legs to get a cheap feel." [7AAC 50.410]

Bernie and Mary Holland
P.O. Box 67
Juneau, Alaska 99802

Dear Mr. and Mrs. Holland:

This is to inform you that the Division's investigation of complaints regarding your foster home has been concluded. You have responded to allegation #10 that foster children have been relocated from the basement to the upstairs bedroom. With that exception, no response or corrective action plan to the allegations which were delivered to you on July 23, 1982 has been received by the Division. You have continued to be unwilling to discuss the allegations, therefore the findings in this letter are based solely on the Division's investigation without any information provided by either of you.

INVESTIGATION FINDINGS

1. Allegation: Bernie and Mary Holland yell and direct vulgar and abuse language towards foster children.

   Findings: 75 percent of the foster children interviewed stated that verbal and vulgar language had been directed at them, or other foster children, in the home.

   Required: "..... in no event may any child in care be subjected to verbal abuse...." 7 AAC 50.450,(2).

   Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

2. Allegation: Bernie Holland frequently hits foster children with a stick, ruler, yard stick and his hands.

   Findings: 87 percent of foster children interviewed stated they had been hit by Mr. Bernie Holland with either a stick or his hand. A majority of foster children interviewed stated that they witnessed Mr. Holland hitting other foster children.

Required: ".....in no event may a child in care be disciplined by shaking or by delivering a forceful blow with hand or weapon..." 7 AAC 50.450,(5).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

3. Allegation: Mr. Bernie Holland squirted lemon juice into a resident's mouth as punishment, and in the process of the resident resisting, used force to open the resident's mouth by holding the jaw and applying pressure.

Findings: Although this allegation is an isolated incident with the alleged victim graphically describing what happened, there is no corroborating evidence to support the allegation.

Required: ".... in no event may a child in care be subjected to unusual, severe, cruel, capricious, humiliating, or unnecessary punishment;" 7 AAC 50.450,(1).

Conclusion: This allegation is found to be unsubstianted. This means that the violation could have occurred as alleged, but the evidence is not conclusive, or sufficient evidence is not available to make a determination.

4. Allegation: Mr. Bernie and Mrs. Mary Holland are providing day care in their home for 2-5 children.

Findings: 100 percent of the foster children interviewed stated that they observed day care being provided in the Holland home.

Required: Number of foster children permitted in home, ".... no more than eight children in all are permitted in any one home..." ".... no more than five children of any age who are unrelated to the foster parents are permitted." 7 AAC 50.430(b)(d).

Day care of children and commercial care for the aged, or maternity, or convalescent patients may not be combined with foster care of children without prior approval of the Division representative. 7 AAC 50.440(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows the standard was violated.

5. Allegation: There is not sufficient space for each foster child to have specific place to keep his/her own personal possessions.

Findings: This allegation deals specifically with the female residents who lived in the basement and shared a room with an alleged boarder. All female residents interviewed stated that they did not

have enough room for their possessions due to the alleged boarder using up most of the available space.

Required: "..... there must be a sufficient space and a specific place for each child to keep his own clothing and personal possessions." 7 AAC 50.450(c).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

6. Allegation: The Holland children have played with, destroyed, broken or lost the foster children's personal possessions.

Findings: 85 percent of the foster children interviewed stated that they had either had lost, or had destroyed or had broken personal possessions due to the Holland children. They also stated that even though they complained to the Holland's about the situation, it was never corrected.

Required: ".....foster parents must show evidence of being responsible, mature individuals of reputable character who exercise sound judgement and display the capacity to provide good care for children." 7 AAC 50.410(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows the standard was violated.

7. Allegation: The Holland children are allowed to annoy and "bug" the foster children. When a conflict arises over this issue, that the foster children are verbally abused, and the "foster children are always wrong, and the Holland children are always right."

Findings: 80 percent of the foster children interviewed stated that they felt "bugged" at times by the Holland children, and when the issue was confronted the foster children were yelled at for causing a disturbance.

Required: "..... in no event may a child in care be denied treatment equal to that of the foster parents' own children as a method of discipline;..." 7 AAC 50.450(7).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

8. Allegation: Adult boarders are living in the Holland foster home and they are sharing sleeping quarters with foster children.

Findings: That there are two additional adults living in the Holland foster home without proper knowledge of the Division.

Required: "Foster parents shall report to the Division representative any significant changes in the household....that would affect the ability to care for foster children." 7 AAC 50.420(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows the standard was violated.

9. Allegation: Adult boarders participate in the family meetings and trials and are allowed to vote on foster children's punishment.

Findings: A majority of foster children interviewed stated they had been subject to or observed alleged boarders participating in family meetings or trials.

Required: "Foster parents must show evidence of being responsible, mature individuals of reputable character who exercise sound judgement and display the capacity to provide good care for children." 7 AAC 50.410,(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

10. Allegation: Three foster children and one adult boarder sleep in a bedroom with no windows.

Findings: By personal observation from myself, Carolyn Touvinen, CCS II, and personnel admission from Mr. Holland, this was found to be true.

Required: ".....each foster home must have one or more windows which are large enough for emergency exit and rescue in each sleeping room."

Conclusion: This allegation was found to be valid upon inspection. However, Mr. Holland agreed to move the foster children to another room, which was accomplished within a 24-hour period. Therefore, at this date, the allegation is found to be invalid as long as that particular room is not used for foster children, or until the room is brought up to standards.

11. Allegation: Family meetings are held late at night and often last from 11:00 p.m. to 2:00 a.m., and that foster children do not get enough sleep because of this and that one foster child fell asleep at a meeting and was punished for it.

Findings: A majority of foster children interviewed stated that family meetings and trials could and would last until all hours of the night, and also stated punishment was dealt out for falling asleep.

Required: "Foster parents must show evidence of being responsible, mature individuals of reputable character who exercise sound judgement and display the capacity to provide good care for children." 7 AAC 50.410,(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

12. Allegation: Bernie Holland has belittled and used cruel and derogatory remarks when describing a foster child to other foster children, and to other persons who have entered the foster home.

Findings: All foster children interviewed in regard to the allegation stated they had been subject to or witnessed another foster child be subjected to belittlement or derogatory remarks.

Required: ".....in no event may a child in care be subjected to verbal abuse, derogatory remarks about himself or members of his family...." 7 AAC 40.450,(2).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows that the standard was violated.

13. Allegation: Bernie Holland patted a female resident on the bottom, grabbed a female resident around the waist and while "wrestling, grabbed her legs to get a cheap feel".

Findings: A female foster child made this complaint (patting on bottom) in writing. She stated that it happened and that she did not like it. The wrestling incident was observed by another foster child, who thought that Mr. Holland's behavior was inappropriate. This incident (wrestling) is also in a written statement.

Required: "The foster parents must show evidence of being responsible, mature individuals of reputable character who exercise sound judgement and display the capacity to provide good care for children." 7 AAC 50.410,(a).

Conclusion: This allegation is found to be valid. Valid means that the evidence shows the standard was violated.

In addition to the July 23, 1982 allegations, the Division became aware of additional non-compliance items when a standard-by-standard evaluation was conducted on your home from August 4, 1982 to August 6, 1982 for consideration of your application to operate a residential child care facility. The following areas would be in non-compliance under 7 AAC 50.310 to 7 AAC 50.620:

1. 7 AAC 50.410(1) - "An annual license may not be issued without written evidence that all members of the household 16 years of age or older are free from active tuberculosis;"

According to the standard-by-standard evaluation there was no record of written evidence that this requirement has been met. On September 21, 1982 tuberculin clearances dated September 16, 1982 were received for both of you. If there are any other adult, members of the household, additional tuberculin clearances are required.

2. 7 AAC 50.560(b) - "A 5-lb ABS dry chemical fire extinquisher or its equivalent must be charged at all times and strategically located; more than one is required for multi-level homes."

   The standard-by-standard states that there is only a 2 1/2 lb. ABC extinguisher in the basement area which has been previously used as living space for foster children. While the Division has interpreted and implemented the above requirement as meaning that there must be a 5lb. extinguisher on every level of a multi-level home, the Division concedes that your home has two acceptable extinguishers and therefore, meets the requirement for more than one for multi-level homes. Correction is advised, but not required.

3. 7 AAC 50.570(f) - "Firearms must be unloaded and stored in a place inaccessible to young children. Ammunition must be stored separately in a place inaccessible to children."

   It was reported in the standard-by-standard that one hand gun was accessible to children while loaded and that the gun was unloaded in front of the licensing worker. There is no issue with compliance at this time as the gun was unloaded. However, in the future all guns must remain unloaded and ammunition stored separately and inaccessible to children.

EVALUATION AND RECOMMENDATION

All of the above allegations are of a serious nature and all except #3 were found valid upon investigation. The three additional findings in the recent standard-by-standard evaluation are also serious. You have demonstrated a total lack of cooperation with the Division in dealing with the allegations. If corrections have occurred, you have failed to inform the Division. For example, at least six telephone calls to your attorney were necessary to obtain the tuberculin clearances.

Given the pattern of violations, and your refusal to respond or to formulate a corrective action plan, the Division is referring your case to the Department of Law for consideration of license modification, license suspension, or revocation. You will be informed of the Department of Law's recommendation to this Department.

Sincerely,

Lew Reece

Dear Mr. and Mrs. Holland

RE: Holland Foster Home

You are hereby notified that the enclosed Accusation has been filed with the Department of Health and Social Services, Division of Family and Youth Services. The Division of Family and Youth Services will conduct a hearing, if requested, to decide the issues presented in the Accusation.

Notice of Defense and Request for a Hearing

The enclosed accusation was prepared pursuant to AS 44.62.360 and sets forth the issues that will be decided by the Department of Health and Social Services, Division of Family and Youth Services. This letter constitutes notice as required by AS 44.62.380 that you may request a hearing on the issues set forth in the Accusation.

Unless a written request for a hearing signed by you or on your behalf is delivered or mailed to the Division of Family and Youth Services within 15 days after receipt of the enclosed Accusation, the Division of Family and Youth Services pursuant to AS 44.62.530 will decide in your absence the issues presented in the Accusation. The request for a hearing may be made by delivering or mailing the enclosed Notice of Defense to the Division of Family and Youth Services in the enclosed envelope, postage prepaid. Mailing of the Notice of Defense signed by you or on your behalf and returned to the Division of Family and Youth Services within 15 days in the enclosed addressed envelope, postage prepaid, acknowledges receipt of the enclosed Accusation and constitutes a notice of defense pursuant to AS 44.62.390.

Sincerely,

Lew Reece

In the matter of Bernie and Mary Holland, a Licensed Child Foster Home, Respondent.	Facility No. 4190

ACCUSATION
(AS 47.35.040, AS 44.62.360)

Petitioner Lew Reece, Regional Administrator, Division of Family and Youth Services, Alaska Department of Health and Social Services, alleges:

1. This is a proceeding authorized by AS 47.35.040(b) and AS 44.62.360 to condition child foster home license 4190, helu by Bernie and Mary Holland, hereinafter "respondents."

2. The respondents were issued License No. 4190 on May 23, 1982 authorizing them to operate a child foster home at 707 West 10th Street, Juneau, Alaska.

3. On or about July 15, 1982 the Division of Family and Youth Services received complaints from two youths who had been placed in the respondents' home. The allegations consisted for the most part of charges that respondents had been physically or verbally abusive, had taken inappropriate disciplinary measures, had failed to exercise restraint over their own children, had provided day care services, and had adult boarders in the home without division approval.

4. The division immediately initiated an investigation. The investigation included interviews with respondents and several youths who had been in respondent's care. Respondents refused to discuss most allegations with the division, claiming that the division had harrassed them and declaring:

> "In regard to your expectations of receiving a telephone call from me. . . to discuss those "allegations;" As I expressed during our meeting on July 23, 1982, these "allegations" will not be addressed by me . . ."

5. On July 27, 1982 the division again urged respondents to reply to the allegations. No reply was received.

6. In the succeeding weeks the division, through the Department of Law, attempted to conciliate with respondents, to no avail.

7. On September 27, 1982 the division finally closed its investigation and, because of the summary failure of respondents to address the complaints, concluded that most allegations were uncontradicted. Accordingly, the division referred the matter to the Department of Law for further action.) Lie! They recommended revocation.

8. The Department of Law again initiated steps to reconcile the differences between respondents and the division, including scheduling of a meeting with Helen Beirne, Commissioner of Health and Social Services.

9. Respondent Bernie Holland has consistently refused to formally respond to the allegations, making it difficult, if not impossible, for the development of on-going professional relationships between the division and the licensed home, a prerequisite to determinations of compliance with state law.

10. Respondents' failure to cooperate, as set forth above, is a basis for conditioning of respondents' license under AS 44.62.360.

160

ACCORDINGLY, Accuser requests that

1. Foster Home Care License No. 4190 be amended to include the following conditions:

a. licensees will notify the department of all non-related adults living in the home for more than 21 days;

b. licensees will seek department approval of all day care services provided in the home;

c. licensees will provide the department a written description of their behavior management and discipline techniques (including any planned use of corporal punishment or family trials) within 30 days of issuance of the license with conditions; and

d. licensees will cooperate with all department requests for information related to the operation of their child foster home, license 4190.

MEMORANDUM

TO: John B. Chenoweth, Ombudsman

THRU: Duncan C. Fowler, Ombudsman Regional Representative

FROM: Bruce Aronson, Ombudsman Assistant

SUBJ: Ombudsman Complaints J82-0689, J82-0728, J82-1136, and J82-1188

DATE: January 28, 1983

Four complaints, J82-0689, J82-0728, J82-1136, and J82-1188, direct the attention of the office to investigatory and licensing practices of the Southeast Regional Office of the Division of Family and Youth Services. Due to the interrelationship of the four, they were examined at the same time by this investigator.

Throughout this memorandum, the names of minors involved in these complaints have not been used, rather initials were substituted for their names.

A summary of my investigation of each complaint is provided below:

J82-0689

Bernie and Mary Holland filed a complaint with this office on July 26, 1982, alleging that the Division of Family and Youth Services (DFYS) is failing to conduct a proper investigation of their foster home license. and is harassing them. Investigation of their complaint has focussed on whether the agency had sufficient reason to initiate an investigation, and whether the investigation was properly conducted.

The Hollands are Juneau residents with a decade of experience in foster care involving Juneau youth. Their complaints were filed with the Juneau office after they were served a NOTIFICATION OF COMPLAINT by officials of the Division's Juneau regional office. The officials advised that the notification, containing 13 allegations, was served in conjunction with information received by division personnel during the preceding 10 day period. Investigation of the allegations was a prerequisite to a decision by division officials to modify or revoke the Hollands' foster home license.

A copy of the notification is attached to this memorandum.

Background:

On July 14, 1982, Norm Anderson, Probation Officer II, transported a minor, D.H., to the Johnson Human Services Center for detention purposes. In a memorandum from Mr. Anderson to Lew Reece, Regional Administrator, DFYS, dated July 16, 1982, Mr. Anderson states:

> During this wait, D.H. became more and more agitated about being detained. He started by saying the only reason for detention was a "personality conflict" between he and Mr. Holland. Then he said that he "was going to blow the whistle on Bernie tomorrow in court". He explained that Mr. Holland had physically abused him saying that Mr. Holland had hit him in the arm with a stick on several occasions. In the most recent, D.H. said he shoved Mr. Holland onto the kitchen table after Mr. Holland struck him, breaking the table. Mr. Holland then jumped up and challenged him to fight. The matter diffused with no further blows. D.H. said M.H. (male), another foster child with the Hollands, could verify this.

Mr. Anderson also reports in this memorandum that M.H. (male) said the kitchen table was replaced with another table, since the older table was sagging. Mr. Anderson confirms that "the old table was rather wobbly." M.H. described Mary Holland as a quiet person, and that she did not use "foul or abusive language." M.H. does indicate that Bernie Holland has used foul language. No written statement from M.H. was taken by DFYS. .

In a memorandum from Candace Canfield, YCIII, Johnson Human Services Center to Marlyn Olson, Probation Officer III, dated July 14, 1982, it was reported that D.H. told both Ms. Canfield and Margaret Pugh, Program Director, Johnson Human Services Center, that Bernie Holland hit him, and that Mr. Holland uses a stick to hit people, including D.H. Also, D.H. and Bernie Holland, on more than one occasion, stayed up late arguing. D.H. closed by saying that M.H. (female) was also hit with a stick, and would confirm this information. Ms. Pugh then called Marlyn Olson and requested Mr. Olson immediately visit the Johnson Human Services Center.

Mr. Olson indicates in his file notes of July 14, 1982, that when Mr. Olson met with D.H., D.H. had already contacted his attorney. Mr. Olson reported that D.H. said his attorney advised D.H. to remain silent. Mr. Olson wrote in his notes that, "He did elude [sic] however two serious problems..." Mr. Olson also indicates that D.H. felt that M.H. (male) and M.H. (female) could corroborate his statements.

In his July 16, 1982 memorandum, Mr. Anderson states:

> On July 15, I conducted a low-key interview with M.H. (male). Bob Danneker, Foster Care Coordinator, was present. M.H. said he was quite happy at the Holland home, that he had not been subject to any

> verbal or physical abuse. (This is significant, since M.H. comes from a very abusive natural home and was fearful upon placement that the foster home would function the same way). He said he had never seen Mr. Holland hit D.H., either with a stick or a fist. He did say that the two have engaged in "friendly" wrestling matches and shadow box with one another.

The last two paragraphs of Mr. Anderson's memorandum describe a meeting with Mr. Anderson, D.H. and D.H.'s attorney. The meeting took place at 2:30 p.m. on July 15, 1982. The attorney (after conferring with D.H.) advised that D.H. had only one complaint, regarding a "personality conflict" between D.H. and Bernie Holland. Anderson also wrote that the attorney said the conflict was that Bernie Holland called D.H. a "shitbag" and "worthless" while other children were present. When the attorney was asked about D.H.'s allegation that Bernie Holland had hit D.H. with a stick, the attorney stated (after conferring with D.H.), "that D.H. said he had never been hit or otherwise assaulted. Further, D.H. declined to give any taped statement about the 'personality conflict'."

Robert Danneker's notes of July 20, 1982, describe a meeting with D.H. At that time, D.H. agreed to give a written statement to Danneker by Thursday, July 22, 1982. A statement was provided by D.H. on July 22, 1982, which said Bernie Holland and D.H. got into a scuffle, and Bernie challenged D.H. to fight. D.H. also said:

> Bernie was sitting on the couch next to M.H. (female) and I was sitting at the table when Bernie and M.H. started wrestling sort of and Bernie was grabbing M.H. around the waste [sic] and her leg's [sic] and it looked more like Bernie was trying to get a cheap feel off her he does this all the time and he has this stick that is about two and a half feet long that he smack's [sic] us with and it hurt's [sic] several times' [sic] I asked him not to smack me but he still does.

D.H.'s assertion is deserving of independent verification. A psychological evaluation (a copy of which is in the DFYS files) prepared by Carol C. Greenough, Ph.D., and dated June 23 and June 25, 1982, cautions:

> . . .
>
> D.H. admits to being very good at lying and convincing himself as well as others of his lies.
>
> . . .
>
> D.H. is very manipulative, using people and situations to create gratification for himself.
>
> . . .

D.H.'s probation officer, Norm Anderson, told this office, on January 3, 1983, that D.H. thought Bernie Holland was mad at him, thus causing D.H. to be sent to the Johnson Human Services Center for detention purposes on July 14, 1982. D.H. became very upset at the prospect of detention, and that he was going to get back at Bernie Holland. On July 15, 1982, Anderson said, he believed that D.H. was lying.

Since D.H.'s credibility is called into question, corroboration of his statements by the two foster children he named, is important. There was no written statement by M.H. (male). However, Mr. Anderson's memorandum indicates that M.H. can only verify that Bernie Holland used foul language on occasion. Notes prepared by Marlyn Olson say that on July 14, 1982, M.H. (female) a foster child at the Holland home, volunteered information to Mr. Olson. A synopsis of Mr. Olson's notes includes the following incidents, as described by M.H. (female):

- Bernie Holland told her to get out of bed, using vulgar language,

- Mary Holland has called her names,

- M.H. was preparing guacamole, and to quiet J.H., M.H. squirted lemon juice into J.H.'s mouth. Mary Holland cursed at M.H. for this,

- Mary Holland cursed at M.H. for being late when called to the main floor of the house, from the basement, and

- Bernie Holland used coarse language upon M.H.'s return to the Holland home, after having run away from the Holland home.

Mr. Olson's notes for July 15, 1982, include the following:

> We [Sonja Brandman, Counselor, and Mr.Olson] discussed M.H.'s (female) behavior over the past three weeks, the fact that it has been very difficult for her having violated curfew, run, caught in several lies, and being on restriction much of the time. Sonja and I agreed that it was difficult to tell when M.H. is being truthful or not.

Shortly thereafter, M.H. (female) provided a handwritten statement of her allegations against the Hollands. M.H.'s statement includes descriptions of the following episodes:

- When M.H. was moving to another room, Mary Holland cursed at her,

- During a family meeting, Mary Holland described M.H.'s performance as a dishwasher, in vulgar terms,

- Mary Holland cursed at M.H. during an incident involving a television,

- Mary Holland, in vulgar terms, told M.H. to be quiet, when M.H. was slow in coming to the main floor of the house from her bedroom,

- When M.H. was making guacamole, one of the Holland children was irritating M.H., so M.H. squirted lemon juice into the child's mouth, and the child started screaming. Mary Holland then cursed at M.H.,

- When M.H. was slow in getting out of bed one morning, Bernie Holland cursed at her to get up,

- Bernie Holland hits D.H. with a stick during family trials and meetings, and

- "When I have my but [sic] up in the air reaching for something and I [have] been hit for no reason twice with [a] stick once with [a] hand and last night befor [sic] he hit me with his hand I caught him first a[nd] said don't hit me what's the reason. he [sic] said boy you [are] lucky I couldn't resist."

Mr. Olson said in his notes of July 15, 1982:

. . .

> I reviewed her statement and found that several of the things she told me yesterday were not addressed and that some of the incidents she wrote about that we talked about yesterday were or somewhat watered down. . . .
>
> Most of what she put in writing seemed to be directed towards conflicts that she was having with Mary instances in which she says Mary directed fould [sic] language towards her, telling her to shut up, calling her asshole, etc.

Mr. Olson also reported that M.H.'s (female) mother said M.H. seemed to be using vulgar language, and that the Holland home "...was the best placement for her."

The next day (July 15, 1982) a meeting was held with Mr. Olson, M.H. (female) and her father, Bernie Holland and Ms. Brandman. During this meeting, they reviewed the allegations M.H. had made regarding the Hollands. Mr. Olson noted that M.H. lied when discussing what she did one Sunday. Mr. Olson also wrote:

. . .

> We note that the conflicts she brought up involved she [M.H.] and Mary. I think we have to recognize the fact that there could be a great deal of transference going on here, meaning that a lot of the hostility, the anger, the hurt M.H. feels in her relationship with her mother are under difficult circumstances transferred to Mary, her foster mother.
>
> . . .

> Before we closed the meeting and while M.H. was still meeting with us we questioned her in several different ways about whether or not the problems she told us about at the Hollands were so serious that they couldn't be worked out, that perhaps this difficult time will soon pass and once again, things will level out for her. Her response was that things could probably be worked out.
>
> . . .

M.H. (female), during a deposition taken on December 30, 1982, told me that she felt that her problems with Mary and Bernie Holland were resolved during the above described meeting.

From records retained by DFYS, staff then gathered statements from the following people:

- D.H. gave a statement on July 22, 1982, and signed it on August 2. D.H. later retracted this statement, in a written statement dated December 1, 1982.

- M.H.(female) gave a statement on July 22, 1982, and signed it on July 29, 1982. An unsigned statement given on July 23, 1982, was also given by M.H.

- K.S. signed a statement on July 29, 1982, which was originally given on July 20, 1982.

- A.J. gave a statement on July 22, 1982, and signed it July, 29, 1982.

- A.M. gave a statement on July 22, 1982, which was later signed on July 29, 1982.

- M.F. gave a statement on July 23, 1982, which was not signed.

- Gil Lucero gave a signed statement on July 28, 1982.

Allegations against the Hollands:

Based upon the statements that division personnel had received as of July 23, 1982, DFYS prepared a NOTIFICATION OF COMPLAINT. The notification included a description of 13 allegations against the Hollands. Each of the 13 allegations was reviewed by me to determine if there was adequate factual basis for the allegation, and adequate basis to begin and continue investigation of the allegation.

Since an administrative hearing regarding modification of the Holland foster license is being scheduled in the near future, the truthfulness of the allegations is not a matter within the jurisdiction of this office.

Summarized, the allegations provide as follows:

1. This allegation was that the Hollands "yell and direct vulgar and abusive language towards foster children." DFYS officials cited 7 AAC50.450(2).

Information provided by some of the foster children as of July 23, 1982, indicates this allegation had an adequate factual basis and was properly the subject of investigation.

2. This allegation was "that Bernie Holland frequently hits foster children with a stick, ruler, yardstick and his hands," and was presented with a cite to 7 AAC 50.450(1) and 7 AAC 50.450(5).

Information provided by some of the foster children, as of July 23, 1982, indicates this allegation had an adequate factual basis and was properly the subject of an investigation.

3. It was alleged that "Bernie Holland squirted lemon juice into a resident's mouth, as punishment, and in the process of the resident resisting, used force to open the resident's mouth by holding the jaw and applying pressure." The notification referenced 7 AAC 50.450(1).

Information provided by one foster child, as of July 23, 1982, provided sufficient basis for the allegation, and the matter was properly the subject of an investigation.

4. "Allegation that Bernie and Mary Holland are providing Day Care in their home for from 2-5 children," accompanied by reference to 7 AAC 50.430(b) and 7 AAC 50.430(d). As of July 23, 1982, six different sources reported that day care services were being provided for as many as four children.

The two regulations cited by DFYS provide:

> 7 AAC 50.430. NUMBER OF FOSTER CHILDREN PERMITTED IN THE HOME.
>
> . . .
>
> (b) No more than eight children in all are permitted in any one home.
>
> . . .
>
> (d) No more than five children of any age who are unrelated to the foster parents are permitted.

Read together, these two regulations do not appear to have any direct relationship to the issue of day care services. Rather, the regulations seem to describe the maximum number of foster children and other unrelated children a foster home may have (five), and the total number of children, including foster and natural children that may live in a foster home (eight).

Since the allegation mentions day care as well as number of children, DFYS may have been relying on 7 AAC 50.440(a):

> (a) Day care of children and commercial care of the aged, or maternity, or convalescent patients may not be combined with foster care of children without prior approval of the division representative.

As of July 23, 1982, there was not sufficient basis for the allegation that the Hollands were providing day care services for up to and including five children. Pat Monroe, Licensing Coordinator, told me that DFYS always requires foster homes to secure a day care license, when day care services are going to be provided, in addition to divisional approval. Since it appears that a day care license is required only if day care services are provided in the home to more than four children, it does not appear that the Hollands would be required by law to secure a day care license. AS 47.35.020(2). In addition, providing day care services in a foster home, per se, does not appear to violate the foster care regulations cited by DFYS.

There is confusion concerning day care licensing obligations within a licensed foster home, and it is not at all clear that, in citing 7 AAC 50.430, the division made the point it had intended. Taking the cite provided as the basis of my review, it does not appear that the allegation has a sufficient basis. The Hollands might have admitted the truth of the allegation but it is far from certain that the admission or the finding will support revocation of the license.

5. The fifth allegation held that there was not sufficient space for foster childrens' personal possessions. As of July 23, 1982, there appeared to be sufficient basis for the allegation, and there appeared to be an adequate amount of information to warrant the investigation of the allegation.

6. Allegation 6 stated that "the Holland children have played with, destroyed, broken or lost the foster childrens[']' personal possessions." The notification in which the allegation was contained included a reference to 7 AAC 50.420(e), a provision which states:

> (e) The foster parents shall allow the child to bring personal possessions into the foster family home, and allow him to acquire possessions of his or her own, within reason with regard to space and comfort, and safety.

The above cited regulation only directs that personal possessions of foster children may be brought into the home, with certain limitations. That the regulation supports an investigation of the allegation is at best arguable.

7. It was alleged that children of Mr. and Mrs. Holland annoy the foster children, that, when a dispute arises, the foster children are always wrong and the natural children right, and that the foster children are verbally abused. The allegation referred to 7 AAC 50.450(2) and 7 AAC 50.450(5).

The "verbal abuse" portion of this allegation is identical to the one included in allegation number 1 above. The applicable regulation for it appears to be found in 7 AAC 50.450(2).

The other regulation, 7 AAC 50.450(5), states:

> 7 AAC 50.450. DISCIPLINE.
>
> (5) disciplined by shaking or by delivering a forceful blow with a hand or a weapon, however, controlled hand spankings of one to three slaps on the buttocks are allowed when appropriate;

Allegation 7 appears to be partially redundant with the first allegation. In addition, the second regulation cited, 7 AAC 50.450(5), bears no direct relationship to any part of allegation 7. Accordingly, it is not possible to conclude that the allegation is supported by any part of the regulations cited, and I question whether it ought to have been the basis for subsequent investigation and finding.

8. Citing 7 AAC 50.420, it was alleged that "adult boarders are living in the Holland foster home and that they are sharing sleeping quarters with foster children." The applicable portion of this regulation is part (a):

> 7 AAC 50.420 RESPONSIBILITIES OF FOSTER PARENTS
>
> (a) The foster parents shall report to the division representative any significant changes in the household such as employment, housing, or serious illness, that would affect the ability to care for foster children.

There was sufficient evidence from foster children that, in addition to Mary and Bernie Holland, other adults may have been living at the home. Although the allegation refers to these adults as "boarders," the regulations cited do not appear to prohibit boarders, and the use of the term is of no impact on the allegation.

The main point of the allegation is that the Hollands failed to notify the DFYS that additional adults were staying at their home. DFYS apparently believes that the addition of the residents is a significant change impairing the ability of the Hollands to properly care for foster children. As the regulation is written, it is not clear who is to determine, for purposes of reporting, what constitutes "a significant change." In this instance, DFYS should have identified the impairment resulting from the additional adults. The failure to provide this in the allegation suggests that the allegation is flawed, and should not have been investigated.

9. This allegation was that "adult boarders participate in the family meetings and trials and are allowed to vote on foster childrens [sic] punishment." 7 AAC 50.410(a) was cited.

Although there appears to be sufficient evidence for this allegation to be included and investigated, the cited regulation does not clearly indicate such activity is improper. The cited regulation, a provision that describes the qualities of a good foster parent, says:

> 7 AAC 50.410. QUALIFICATIONS OF FOSTER PARENTS AND OTHERS IN THE HOUSEHOLD.
>
> (a) The foster parents must show evidence of being responsible, mature individuals of reputable character who exercise sound judgement and display the capacity to provide good care for children.

If DFYS is concerned about discipline aspects in the Holland home, the applicable regulation seems to be 7 AAC 50.450, which describes standards for discipline.

10. It was alleged that "three foster children and one adult boarder sleep in a bedroom with no windows," citing 7 AAC 50.560(e)(3). This regulation states that each bedroom used by foster children must have a large window exit for emergency use. It does not mention boarders.

Based upon statements from two foster children, there appeared to be sufficient basis for the allegation that foster children were sleeping in a bedroom without a window large enough for emergency use. In addition, there appeared to be enough evidence to warrant investigation of this allegation. The allegation, as prepared by DFYS is poorly stated.

11. It was alleged that family meetings were conducted until late in the evening, and because of the late meetings, foster children were not able to get sufficient sleep, citing 7 AAC 50.410 as authority.

Statements from two foster children indicate there was sufficient basis for this allegation, and that it should have been investigated.

12. The next to the last allegation was that "Bernie Holland has belittled and used cruel and derogatory remarks when describing a foster child to other foster children, and to other persons who have entered the foster home." Reference followed in the notification to 7 AAC 50.450(2), which states:

> 7 AAC 50.450. DISCIPLINE.
>
> The foster parents must be able to show evidence of ability to work with children without recourse to physical punishment or psychological abuse and must be positive in their approach to discipline. Any discipline or control must be appropriate to the child's age and developmental level, but in no event may a child in care be:

> (2) subjected to verbal abuse, derogatory remarks about himself or members of his family, or threats to expel the child from the foster home;

Four foster children gave information which provided the basis for this allegation and the need to investigate it. One of these four foster children indicated the remarks by Mr. Holland were not intentional.

13. The last allegation was "that Bernie Holland patted a female resident on the bottom, grabbed a female resident around the waist and while 'wrestling, grabbed her legs to get a cheap feel.'" The allegation was supported in the notification by reference to 7 AAC 50.410. (Presumably, the agency meant to cite subsection 410(a) in support of this allegation.)

The applicable portion of D.H.'s July 22 written statement, on which this allegation is based, states:

> Bernie was sitting on the couch next to M.H.(female) and I was sitting at the table when Bernie and M.H. started wrestling sort of and Bernie was grabbing M.H. around the waste [sic] and her leg's [sic] and it looked more like Bernie was trying to get a cheap feel off her he does this all the time . . .

In the course of my investigation, Robert Danneker told me the quoted portion of this allegation came from D.H. He acknowledged, however, that he had provided the phrase regarding sexual contact to D.H. On July 22, 1982,. D.H. provided a second written statement, signed on August 2, 1982, which says in part:

> Danneker: Read a quote from written statement regarding Bernie wrestling with M.H.(female)
>
> D.H.: Said that Bernie grabs her from behind under the arms. Stated that he didn't think Bernie should do this. M.H. got up to go somewhere and was bending over to pull down her pants (said she wears tight pants and had to pull them down when she got up). This was when Bernie swatted her (hit her on the bottom).
>
> Danneker: Have you seen him do this with any other girl in the house?
>
> D.H.: No.
>
> Danneker: What was M.H.'s reaction?
>
> D.H.: Walked away. It appeared to be done in fun but....

In addition to the obvious inconsistencies in the two statements provided by D.H., the incorrect quotation provided by Mr. Danneker, and the phrase regarding sexual contact which had been provided by Mr. Danneker, there is the July 15, 1982 written statement of M.H. (female), which says in part:

When I have my but [sic] up in the air reaching for something and I have been hit for no reason twice with [a] stick once with [a] hand and last night before he hit me with his hand I caught him first a[nd] said don't hit me what's the reason. he [sic] said boy you are lucky I couldn't resist.

Read together, the three statements do not seem to accurately describe the same or similar incidents. In addition, M.H. (female) is reported to have had the following conversation with Robert Danneker on July 23, 1982:

Danneker: Have you ever wrestled with Bernie?

M.H.: He likes to tickle us and stuff like this.

Danneker: When he hugs you is it from behind or from the front?

M.H.: Front. It's mostly when I'm feeling down.

Danneker: Is he sexual towards you?

M.H.: No. He told us he'd never do anything like that. If he wanted to bad enough he has a wife.

When asked if the incident she described in her July 15, 1982 statement included any sexual connotation, M.H. (female) told me on December 30, 1982, "not even, Bernie's not that way." Marlyn Olson, told me on January 4, 1983, that when he took the first written statement from M.H. (female) that although there appeared to be physical contact between M.H. and Bernie Holland, it was probably not of a sexual nature. Finally, Robert Danneker told me on January 10, 1983, that, "There's no sexual connotation in there. I am just saying it's inappropriate behavior." Mr. Danneker also said this allegation did not concern any illegal activities.

From the information provided by D.H., M.H. (female), Marlyn Olson, and Robert Danneker, investigation of allegation 13 should have been terminated after preliminary inquiries by DFYS.

Presentation of the allegations to the Hollands:

The NOTIFICATION OF COMPLAINT was given to the Hollands on July 23, 1982, during a home visit by Robert Danneker, and Carolyn Tuovinen, a Community Care Licensing Supervisor. Both Bernie and Mary Holland have

stated to me that Mr. Danneker and Ms. Tuovinen were pushy and rude during the meeting. As an example of this, Mary Holland recalled that "they pushed themselves through the front door." Another example given by the Hollands, was that Mr. Danneker told Bernie Holland, "hey asshole, just answer the allegations." In addition, the Hollands stated that Mr. Danneker and Ms. Tuovinen threatened to remove the foster children if the Hollands refused to answer the allegations.

Both Mr. Danneker and Ms. Tuovinen denied; that they were pushy, that Mr. Danneker used the language described above, and that they threatened to remove the children if the allegations were not answered. However, Ms. Tuovinen did admit there may have been a discussion about removing foster children, but this was not a threat.

Before leaving the Holland home, Ms. Tuovinen and Mr. Danneker examined the sleeping quarters for the foster children. He told the Hollands that children could not sleep in the basement bedroom if it did not have had an adequate fire escape. As reported in DFYS notes, Ms. Tuovinen and Mr. Danneker also told the Hollands DFYS would be in touch. Ms. Tuovinen told me that DFYS hoped to be in touch the same day as the visit (July 23, 1982).

Later that night, at approximately 10:30 p.m. a call was placed by DFYS to the Hollands to tell them that DFYS would be in touch the next day (July 24, 1982) regarding the allegations, and to inquire if the foster children sleeping in the basement bedroom had been moved to an bedroom with an adequate fire escape. Bernie Holland believes this telephone call was a form of harassment, especially considering the time the call was placed.

The following morning (July 24, 1982), Mr. Danneker visited the Holland home to deliver a letter (detailing three of the thirteen allegations, and having the NOTIFICATION OF COMPLAINT and foster care administrative regulations attached) signed by Ms. Tuovinen and Mr. Danneker and dated July 23, 1982. Mr. Holland claims that Mr. Danneker told him, "I've got my ass covered, so I'm not sweating it." Danneker admitted to me on January 10, 1983, that during this visit of July 24, 1982, he did say that to Bernie Holland.

Refusal to respond to the allegations:

In a letter dated July 24, 1982, Mr. Holland advised Mr. Danneker that the foster children formerly in the basement bedroom, had been assigned to an upstairs bedroom. Mr. Holland refused to answer the allegations, and encouraged DFYS to investigate the allegations. Mr. Danneker responded to the above correspondence by stating in a letter dated July 27, 1982:

. . .

> By not responding you have interfered with the Division's authority to supervise and enforce standards allowed by Alaska Statutes 47.35.010, (1) (2) (3) in regard to facilities. Also, by not replying, the Division may be forced to make a

> determination of the allegations based soley [sic] on the information gathered by the Division without having your input. If this becomes necessary, it will be done.
>
> I am again requesting that a reply to the allegations be submitted. You and your wife, and/or your legal counsel, are requested to reply within ten (10) days of the date of this letter. I look forward to hearing from you.

A person violating any of the statutes or regulations regarding foster care "is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $200". AS 47.35.070. In light of the criminal penalty, the reluctance of the Hollands to further discuss the 13 allegations appears understandable. Although DFYS presented the 13 allegations as a licensing issue, any information gathered by DFYS through discussions with foster children and or the Hollands could nevertheless provide the basis for a criminal prosecution.

I briefly reviewed the legal basis for a person suspected of violating a licensing law, to refuse to answer questions during the investigation for fear of self-incrimination. A discussion of this issue is found in State of Alaska, Department of Revenue v. Oliver, 636 P.2d 1156(1981), and several other cases. This review leads me to believe there is no clear answer to the question of when a person may invoke the right against self-incrimination during an investigation, particularly when the investigation initially appears to be non-criminal in nature. As to DFYS saying that refusing to answer allegations is interference of an investigation -- such a belief does not appear to be well founded.

Investigation of allegations completed:

On August 17, 1982, Danneker completed his report on the investigation of the 13 allegations. Danneker found that allegations 1, 2, 4, 5, 6, 7, 8, 9, 11, 12, and 13, are valid. He also found that allegation 3 was not substantiated by the evidence and allegation 10 was valid upon inspection, but had since been resolved.

The report included three problems noted during a standard-by-standard inspection of the Holland home during August, 1982. In closing his report Danneker states:

> EVALUATION AND RECOMMENDATION
>
> All of the above allegations are of a serious nature. Since they were found valid through investigation of the available information, they require immediate correction for the foster home to remain in operation. A serious matter is the Holland's refusal to respond to the allegations. Refusal to respond, either from the Hollands or their legal counsel, has not only interfered with the Division's

> authority to supervise and enforce standards for foster care allowed by statute, but also has demonstrated a lack of responsibility on the part of the Hollands and placed those children entrusted to their care at an unacceptable risk level.
>
> The Hollands have repeatedly violated the foster home regulations and have made no attempt to correct some of the violations, or if they have corrected them have failed to inform the Division. Foster parents who are seriously concerned about the welfare of children would normally be willing to cooperate with the Division to resolve any problems of [sic] misunderstandings that may arise. The Hollands have demonstrated a total lack of co-operation with the Division in dealing with the allegations.
>
> It is therefore recommended that the foster home license for Bernie and Mary Holland be revoked.

Though the report determined that "The Hollands have repeatedly violated the foster home regulations...", identification or explanation of these previous violations was not given in the report.

In a letter dated September 27, 1982, Lew Reece, Regional Administrator, DFYS, told the Hollands that the investigation of the 13 allegations had been completed, and, with the exception to allegation 10, the Hollands had failed to respond to the allegations. The letter notes allegations 1, 2, 4, 5, 6, 7, 8, 9, 11, 12, and 13 are valid. Mr. Reece also said that allegation 3 was not supported by the evidence, and that allegation 10 although true at the time of inspection(July 23, 1982), is now not valid since the foster children have been moved. Mr. Reece closes the letter by telling the Hollands:

> Given the pattern of violations, and your refusal to respond or to formulate a corrective action plan, the Division is referring your case to the Department of Law for consideration of license modification, license suspension, or revocation. You will be informed of the Department of Law's recommendation to this Department.

Related incident:

Mr. Holland also alleges that the DFYS was harassing him by asking the Troopers to investigate an incident involving him and another foster parent. Mr. Holland believes he was the focus of this investigation, and that the investigation centered on Mr. Holland's alleged obstruction of an investigation conducted by DFYS. The relevant facts on this matter are that Mr. Reece, via a memorandum dated December 10, 1982 to 1st Sgt. John Murphy, requested the Troopers investigate how information (concerning another DFYS investigation) from Reece's office was transmitted to Bernie Holland. Mr. Reece was concerned that a state employee was illegally leaking confidential information.

On December 28, 1982, the Troopers concluded that, "...investigation indicated the information regarding the investigation was passed from #6, M.H. (female), to #4, Holland, who called C. and advised him he was being investigated."

M.H. (female) was the source of the information DFYS was investigating in the other matter. Therefore, one person not a state employee (M.H.) gave the information to another person who was not a state employee (Bernie Holland). Because of this, the final report indicates there was no "leak" from the offices of DFYS. Also, the focus of the investigation was not Holland, rather, it was to determine if there was a state employee leaking confidential information. This has been confirmed by 1st Sgt. Murphy.

FINDING:

As to the allegations that the Division of Family and Youth Services failed to conduct an investigation properly, and is harassing the Hollands, the following problems are noted:

1. The referenced regulations in allegation 4 (7 AAC 50.-430(b),(d)) do not appear to directly relate to the issue of providing day care services in a home licensed for foster care. Therefore this allegation lacks sufficient legal basis and should not have been investigated;

2. Allegation 6 indicates that 7 AAC 50.420 is the applicable regulation regarding destroyed, lost or broken personal possessions of foster children. However, the regulation only addresses the ability of the foster child to bring possessions into the home, not what happens to these possessions after arrival in the foster home. The allegation does not appear to have sufficient legal basis;

3. At best allegation 7 appears to restate the essence of allegation 1 and therefore is redundant, and the second regulation cited, 7 AAC 50.450(5) bears no known relationship to any portion of the allegation;

4. The Division used the word "boarders" in allegation 8, yet the cited regulation does not prevent boarders from living in a home that is licensed for foster care. Rather, the Division seems to be concerned that the Hollands failed to report "any significant changes in the household". The DFYS should have identified any impairment in the care of foster children resulting from additional adults at the Holland home. This allegation lacks sufficient specificity, and should not have been investigated;

5. Regulation 7 AAC 50.410(a), as cited in allegation 9 (that "adult boarders participate in the family meetings and trials and are allowed to vote on foster childrens [sic] punishment") is not directly related to the allegation. The regulation regarding discipline, 7 AAC

50.450, describes the applicable discipline standards, which should have been used to measure conduct against;

6. The Division used the word "boarder" in allegation 10, yet the regulation only talks about fire safety, and does not mention boarders. Therefore, one has to question the reason for using the word, and the allegation is poorly stated;

7. Based upon the information available to the Division as of July 23, 1982, investigation of allegation 13 should have been terminated after preliminary inquiries and the Hollands so notified in the letter given them on July 24, 1982;

8. Robert Danneker used vulgar language when transmitting a letter to Bernie Holland on July 24, 1982.

Of the above noted problems, numbers 1, 2, 3, 4, 5, and 7, appear to constitute harassment of the Hollands.

The secondary allegation, relating to the later investigation undertaken by the Alaska State Troopers initiated by Lew Reece is not supported.

J82-1136

Bernie Holland filed a complaint with this office on November 18, 1982, alleging that an official of the DFYS improperly ordered employees not to place children in the Holland home for foster care purposes. In a letter from Lew Reece, Regional Administrator, to Mr. Holland dated December 1, 1982, Reece said:

. . .

> On August 25, a certified letter of license non-compliance was sent to you and again you failed to contact us. On September 27, 1982, the investigation was concluded and a copy of the findings was sent to you and the Attorney General's office for further action.
>
> It was only after the investigation was concluded and you had been given approximately 2 months to respond to the Division that I instructed the Juneau District Office to suspend juvenile placements until the alleged licensing violations in your foster home had been resolved.
>
> I would be more than happy to meet with you at your convenience, with our licensing specialist, to assist you in developing a corrective action plan for your foster home. Without this meeting I cannot recind [sic] the instructions I have given the Juneau District Office not to place children in your foster home. [Emphasis added]

At the time of this letter, Holland held a valid foster care license which had not been suspended, modified, denied or revoked.

There is no known regulation which permits the state to "suspend juvenile placements" when "alleged licensing violations" in a foster home holding a valid foster license (which has not been suspended, modified, denied or revoked) have not been resolved to the satisfaction of the Division of Family and Youth Services. State law provides that a foster license may be revoked or modified "if it [the Division] determines that a facility is not in compliance with AS 47.35.010 - 47.35.080 or the regulations adopted under AS 47.35.010 - 47.35.080." AS 47.35.040(b).

On September 27, 1982, the Hollands were told in a letter from Mr. Reece that several of the allegations were found to be true, yet their license was not modified or revoked at that time. The agency determined the Hollands failed to meet several of the regulations found in 7 AAC 50.310 - 7 AAC 50.620, and because of this the Holland license should have been revoked at that time (see 7 AAC 50.390(a)).

> 7 AAC 50.390. DENIAL OR REVOCATION.
>
> (a) If the division finds that a foster home does not comply with the provisions of 7 AAC 50.310 - 7 AAC 50.620, or the specific terms of a license which has been issued, it shall deny or revoke the license. [Emphasis added]

In addition to 7 AAC 50.390(a), a statutory provision states the following:

> AS 47.35.040. LICENSING.
>
> (e) The department shall give written notice of revocation or modification under (b) of this section 30 days before the effective date of the action. However, if the health or well-being of children or dependent adults is in jeopardy, the revocation or modification action is effective immediately upon the issuance of written notice by the department.

This complaint presents the unusual situation in which the agency has determined the Hollands do not comply with the regulations for foster homes, then their foster home license should have been revoked (per 7 AAC 50.390(a)) and they should have been given 30 days notice of the effective date of the revocation of their license (per AS 47.35.040(e)). None of this was done. If the Holland's license had been revoked, the agency would not have been able to place children there (See AS 47.35.020).

On this subject, Mr. Reece in a letter to this office, dated January 10, 1983, notes the following regulation:

7 AAC 50.360. SCOPE OF LICENSING.

> The licensing of a foster home by the division does not create an obligation for the state or any child placement agency to support the foster home financially, nor obligate the state or any child placement agency to place or maintain any child in the home. The issuance of a license means only that the home, the family, the physical environment, and services have been evaluated and determined to meet required standards.

Mr. Reece said in the letter:

> Respondents, Bernie and Mary Holland, refused, on numerous ocassions [sic], to respond to the allegations against them, made it difficult, if not impossible, for the development of ongoing professional relationships between the Division and the licensed home, a prerequisite to determine compliance with State law.

FINDING:

Based upon the available evidence, the Division of Family and Youth Services acted without the benefit of clear legal authority when it suspended placement of foster children in the Holland home. For reasons discussed in the report of a later complaint, the agency apparently should have acted to revoke the Holland license, a procedure that would have prevented placement of foster children in the Holland home.

Still, the regulation cited above entails no obligation on the part of the Division to place foster children in an approved home. Placement is discretionary with division personnel. Though the division appears to have been in error in basing its decision on the events preceding Mr. Reece's September 27 letter, the decision to direct no further placements in the Holland home until licensing violations were corrected was one that the division could properly make.

J82-1188

A complaint was filed with this office on December 12, 1982, alleging that the Division of Family and Youth Services erred in either determining the Holland foster home was not safe, or in leaving foster children in their unsafe home. This complaint concerns the Hollands' foster home license.

Since the DFYS did not immediately revoke or modify the foster home license as provided by AS 47.35.040(e), when the health or well-being of the children is in jeopardy, division personnel apparently concluded that the violations found during its investigation were not serious. The notice to the Hollands that they were not in compliance was given on September 27, 1982. The Hollands had 14 days to correct the compliance problems (7 AAC 50.370(2)). If at the end of the period corrective

action had not been taken, any foster child would be removed from the foster home.

As of October 28, 1982, the Hollands had not corrected problems identified in the letter to them dated September 27, 1982. In the case at hand, K.S., a foster child, remained at the Holland home until October 28, 1982, which is approximately two weeks beyond the time allowed for either satisfactory corrective action(s), or removal from the home.

FINDING:

Based upon the available evidence, the Division of Family and Youth Services incorrectly left K.S. in the Holland foster home more than 14 days after the agency determined the home failed to meet the applicable standards.

J82-0728

Ombudsman Complaint J82-0728 was filed with this office on August 11, 1982. The complainant, Jan Still, alleged that DFYS wrongfully took a statement from his 14-year-old daughter concerning allegations involving the foster home where she was living. Mr. Still also alleged that his daughter was not able to have an attorney, nor her parents present, during the interview by the DFYS and that the agency refused to give a copy of the statement to him.

The child at the center of this complaint provided a statement during the later part of July, 1982, to the DFYS concerning the investigation of the Holland foster home license by the DFYS. At that time she was under the custody of the DFYS. The child admitted to this office the statement was given voluntarily to the DFYS, and that she was not coerced. She also said that at the time of the interview she did not request either her parents or an attorney be present. Since the subject of the interview was the foster home where she lived and not possible illegal activities on her part, there was no apparent reason for her to have an attorney or her parents present while being interviewed.

Based upon conversations with Linda Scoccia, Assistant Attorney General, Department of Law, and staff at the DFYS, it appears that the child was initially refused access to the written statement given to DFYS. Only after a subsequent consultation with Ms. Scoccia was the statement released. The child refused to give her parents access to the statement at the time she received it from DFYS. Ms. Scoccia also advised that the statement should not be released to Mr. Still because the statement is considered confidential in nature. When I asked Ms. Scoccia if the statement could be released at the time the parents regained full custody of the child, she said no.

The child in this complaint was considered a "child in need of aid" at the time of the request for the statement. The rights of the parents of a child in need of aid are stated under AS 47.10.084(c):

> When there has been a transfer of legal custody or appointment of a guardian and parental rights have not been terminated by court decree, the parents shall have residual rights and responsibilities. These residual rights and responsibilities of the parent include, but are not limited to, the right and responsibility of reasonable visitation, consent to adoption, consent to marriage, consent to military enlistment, consent to major medical treatment except in cases of emergency or cases falling under AS 09.65.100, and the responsibility for support, except if by court order any residual right and responsibility has been delegated to a guardian under (b) of this section.

From this statute, it seems the parents may not have had the legal right to examine statements provided by a child when the child is in state custody. I checked with Lt. Roger McCoy, Alaska State Troopers, and inquired as to their procedures in this type of case. Lt. McCoy told me that the Troopers will give a child a copy of a statement taken by the Troopers, as well as to the legal custodian of the child. Also, if the parents of a child do not have custody of the child, a copy of the statement will not be given the parents until they regain legal custody.

The anxiety of the father in not being able to examine the statement provided by his daughter is described in his letter to this office, dated October 4, 1982:

. . .

> On about August 10th (9-11) I questioned Mr. Danniker [sic] (social worker) who stated that he had obtained the statement from [Still's daughter] and that I could have a copy. I arrived at Mr. Dannikers [sic] office about 10 minutes after talking to him on the phone and was ushered into an office by Mr. Danniker [sic] and Mr. Reese [sic], his supervisor. Mr. Danniker [sic], who seemed excited, then informed me that he had signed statements from 6 children concerning mental, physical and sexual abuse and that he had told [Still's daughter] that she could move out of the Holland foster home anytime she wanted to. Mr. Danniker [sic] also mentioned an after hours meeting at H&SS with [Still's daughter]. He reported that she was visibly shaking as the result of questioning and pressure from Mr. Holland.

. . .

FINDING:

Based upon the available evidence, the Division of Family and Youth Services did not wrongfully take a statement from a child while investigating allegations of violations of foster home laws. The child in question did not request to have either an attorney or her parents present when giving the statement, and the investigation was not directed at any possible illegal activities of the child. The agency did refuse to give a copy of the statement to Jan Still, and apparently did so properly. (However, the agency could have handled the request in a more sensitive manner, and if the allegations were in fact serious, the child should have been removed from the foster home immediately, and or the license should have been revoked or modified. (See 7 AAC 50.370 and AS 47.35.040(e)). Also, based upon the procedures of the Troopers, the agency could have given a copy of the statement to Still when legal custody of the child was regained.)

RECOMMENDATIONS:

By way of immediate personal remedy to the complainants in J82-0689, I recommend:

Recommendation 1. The Division of Family and Youth Services should prepare and send a written apology to the Hollands concerning the harassment aspects to these complaints, and the foul language used by Mr. Danneker.

The following recommendations should be made to the Division of Family and Youth Services to prevent recurrence of the problems found during the investigation of these complaints:

Recommendation 2. The Division should state as clearly as possible any allegation regarding a foster home. The allegation should have sufficient basis to be stated, and be directly related to a standard established by statute and/or regulation.

Recommendation 3. The Division should refrain from demanding that a foster home secure a day care license unless and until it is clear that the law so requires.

Recommendation 4. The Division should notify the subject of an investigation, at the earliest opportunity, when investigation of an allegation has terminated because the allegation lacks sufficient legal basis or proof, or is shown to be false.

Recommendation 5. In its revision of its office manual, the Division should examine, with the Department of Law, the issue of self-incrimination by a licensee in the course of a licensing investigation, and prepare and include discussion of this issue in the policy and procedures manual.

Recommendation 6. The Division, with the assistance of the Department of Law, should revise the applicable portions of the policy manual and Alaska Administrative Code to guarantee to persons providing statements to the DFYS a copy of that statement upon request.

Recommendation 7. The Division, with the assistance of the Department of Law, ought to examine the legal basis for denying information retained in DFYS files to the parents and legal custodians of children receiving services from the DFYS. A definitive policy on this matter appears to be in order. The policy adopted ought to be included in the policy manual and Alaska Administrative Code.

Recommendation 8. Division personnel should strive to handle matters as identified in Ombudsman Complaint J82-0728 in a sensitive manner. The Division may wish to consider sending a letter of apology to Mr. Still.

Recommendation 9. The Division should review current policy regarding employee discipline and should; if warranted, consider appropriate disciplinary measures for the employee(s) involved with the harassment matters and the use of vulgar language by one employee.

STATE OF ALASKA

DEPARTMENT OF HEALTH AND SOCIAL SERVICES
DIVISION OF FAMILY AND YOUTH SERVICES

In the Matter of the Application for Licensure as a Residential Child Care Facility by B.G. HOLLAND, Respondent.	License No. 235005 (Denied)

RECOMMENDED DECISION

This proceeding involves the issue of whether the Department of Health and Social Services, Division of Family and Youth Services (DHSS) acted properly in denying respondent Bernie G. Holland's application for a license to operate a residential child care facility in Juneau. The proceeding was initiated by the filing of a statement of issues by DHSS on June 15, 1982. On June 25, 1982, respondent submitted his notice of defense, and on August 9, 1982, DHSS filed an amended statement of issues. The hearing briefs were filed and evidence was taken during a hearing held between October 4th and October 7, 1982. At the conclusion of the hearing, respondent presented an oral closing argument and DHSS, by its attorney, and with the approval of the hearing officer and respondent, submitted a written closing argument.

I. FACTS

While there is disagreement among the parties as to the inferences to be drawn from the facts, there appears to be little disagreement as to most of the primary facts. In September of 1981, Mr. Holland submitted an application for a license for a "foster family group home," to be known as "Holland House." Document 66. On November 19, 1981, respondent was notified by Alinio Lobo, licensing specialist at the Southeast Regional Office (SERO) in Juneau, that the office was looking forward to respondent's submission of an "improved final version of the proposal." Document 16.

On January 12, 1982, respondent submitted to the SERO Office of DHSS at least two copies of a document entitled "Family Group Home Proposal." Document 403. That document was intended by respondent to be the expanded program description requested by SERO in the letter of November 19, 1981. For some inadequately explained reason, SERO had numerous problems handling the document. The testimony indicated that some of the recipients of the document at SERO thought it was merely a proposal for a program being considered by respondent that was unrelated to the September 30, 1981 application for a license. Consequently, at least one of the copies of the proposal was passed on to the Central Office for informational purposes only. At least one other copy of the proposal was retained in respondent's license application file at SERO. At some time between its submission on January 12, 1982 and June 8, 1982, the proposal disappeared from respondent's application file. Testimony indicated that this disappearance was merely an accident in that the document fell out of respondent's file and into the back of a drawer in a desk at SERO.

In April of 1982, Alinio Lobo, the licensing specialist responsible for reviewing respondent's license application, began a series of on-site visits to the proposed facility. These visits were in furtherance of the completion of a standard by standard evaluation of the proposed facility, the satisfactory completion of which was necessary prior to issuance of a license by DHSS.

On May 20, 1982, new regulations for residential child care facilities in Alaska became effective. This was prior to completion of the standard by standard evaluation by Mr. Lobo. On June 4, 1982, Ms. Kay Smith, supervisor of the Southeast Regional Office, reviewed the Facility Information Summary (CWS 80) presented to her by Mr. Lobo. Document 22. That CWS 80 recommended that respondent be issued a provisional license for the facility applied for, with the license to run from June 15, 1982 to December 15, 1982. On the same date that she reviewed it, Ms. Smith signed off on the document. According to the language next to her signature block, her signature confirmed that she had reviewed the study and that she concurred that "the facility meets specified requirements." According to the testimony

of Ms. Smith and Ms. Connie Hansen of the SERO Office, Ms. Smith left town that same day and instructed Ms. Hansen to sign the program evaluation and licensing recommendation for her as soon as the document was typed. On June 8, 1982, Ms. Hansen in fact did sign the typed version of the program evaluation and licensing recommendation. Document 41. In that document, Mr. Lobo recommended that the application submitted by respondent in September of 1981 be approved and a license issued. By the signature of the Acting Regional Manager, Ms. Hansen, SERO concurred with Mr. Lobo's recommended approval. However, Ms. Smith testified that she actually never read any of the back-up documents supporting the licensing recommendation. Further, Ms. Hansen testified that she also did not read any of the back-up documentation and merely signed the document recommending licensure because Ms. Smith had instructed her to do so.

According to the testimony of Mr. Pugh, the licensing for Holland House came to his attention on June 8, 1982 when Ms. Yvonne Walker informed him that she had received a monthly report from Ms. Smith which indicated, among other things, that SERO was in the process of finalizing license. According to Mr. Pugh, because he wished to be involved in the licensing of any new facilities, he met on the afternoon of June 8th with Yvonne Walker, Pat Monroe, Alinio Lobo and Connie Hansen to discuss licensing of Holland House. Also according to Mr. Pugh, the licensing file and proposal of Mr. Holland were brought to him prior to that meeting at his request. (There appears to be some confusion as to when Mr. Holland's file actually was brought to Central Office for Ms. Hansen testified the file was brought to Central Office on June 9th.) On that same day, at Mr. Pugh's request, Ms. Monroe and Ms. Walker searched for and located the license which was about to be issued for Holland House, and that license was thereafter held in abeyance pending a complete review of the licensing file by Central Office.

At the June 8th meeting it was discovered that the file did not contain a completed standard by standard evaluation. Mr. Pugh therefore asked Ms. Monroe to review the file and determine whether the facility complied with

Law Offices
FINDLEY & BURNHAM
A Professional Corporation
320 Fourth Street, Suite B
Juneau, Alaska 99801
(907) 586-3001

the new regulations for residential child care facilities which became effective on May 20, 1982. Ms. Monroe completed her review and reported back to Mr. Pugh on June 9th. Her conclusion, concurred in by Mr. Pugh, was that the proposed facility was not in compliance with the new regulations and that the license should not be issued until the facility was brought into compliance.

Mr. Holland was called into the Central Office for a meeting on the morning of June 10th, at which time Mr. Pugh and Ms. Monroe informed Mr. Holland that they could not issue a license for Holland House at that point because it was not in compliance with the new regulations. That same day Ms. Monroe informed him that she would be willing to work with him and assist in bringing his facility and application into compliance with the regulations. After a meeting with Ms. Monroe at which she began to explain what Mr. Holland would have to do before DHSS could issue Holland House a license, Mr. Holland indicated he would have to think about it. A few days later he called Ms. Monroe and requested that DHSS grant or deny his application. Central Office complied with that request and the license application for Holland House was denied. By letter of June 15, 1982, Mr. Holland was informed of the denial and presented with a statement of issues setting forth the reasons for the denial.

At some time after Alinio Lobo's return to Juneau on June 14, 1982, there appeared a completed standard by standard evaluation for the Holland House facility. Testimony as to when this document had been completed was contradictory. It was the testimony of Ms. Monroe and Mr. Pugh that the document was not in the file as of June 9, 1982 and that the only standard by standard evaluation in the file at that time was far from complete. They also testified that Mr. [illegible]d stated on June 8th that he was still working on the standard by standard evaluation. Mr. Lobo, however, testified that he had completed the standard by standard evaluation and placed it in the file on or before June 8, 1982.

In August of 1982, Mr. Holland and Mr. Botelho met with me to discuss procedures to be followed in bringing this case to a hearing. At that time

Mr. Botelho indicated that it was the position of DHSS that no complete standard by standard evaluation assessing the facility's compliance with the new residential child care facility regulations had been done for the facility, and that that in itself was sufficient to justify denial of the license application. It having been my view that it made little sense to go through a long and costly hearing in this case only to reach the conclusion that the license could be denied because a standard by standard evaluation had not been done, I recommended to Mr. Holland that he allow DHSS to conduct a new standard by standard evaluation of his facility. Mr. Holland agreed. At Mr. Holland's request, Ms. Laurie Vaughn of the Fairbanks Regional Office of DHSS performed the standard by standard evaluation. Her conclusion was that the facility was not in compliance with the May 20, 1982 residential child care facility regulations and that the license should not be issued. Document 183.

At some time in August, the "proposal" submitted to SERO by Mr. Holland on January 12, 1982, which, inexplicably, had not found its way to Mr. Holland's licensing file, was brought to the attention of DHSS. According to the testimony of Ms. Hansen, she had seen the document sometime prior to May of 1982, but for some unknown reason, had not considered it part of Mr. Holland's application. She became aware sometime during the summer of 1982 that the document was not in Mr. Holland's licensing file, and she ultimately obtained a copy of it by driving out to Mr. Lobo's home. Evidently, the copy so obtained was an extra copy Mr. Lobo had for his personal use for he testified that there were two other copies which he had placed in Mr. Holland's licensing file. Mr. Lobo was certain that he had placed those two copies in the file, clipping one of them into the file and placing the other one loosely in the file. According to the testimony, a couple of days after obtaining the document from Mr. Lobo at his home, another copy was found in the back of a drawer in Ms. Hansen's desk at SERO. The explanation given by Ms. Smith for this occurrence was that Ms. Hansen has a very messy desk and that the document had plastic covers and must have slipped out of the file and into the back of Ms.

Hansen's desk drawer. According to Ms. Hansen, she had discussed this document with Ms. Smith sometime prior to May of 1982.

Upon discovery of the group home proposal of January 12, 1982, a copy of the document was sent to Ms. Vaughn for her assessment to determine whether the document changed the conclusion she had reached in her standard by standard evaluation. She then assessed the Holland House application in view of the new document. Her conclusion, however, remained that the Holland House did not satisfactorily meet the new residential child care facility regulations and that the license should be denied.

CONCLUSIONS OF LAW

Each of the parties argues that the other bears the burden of proof in this proceeding. Mr. Holland has cited no support for his assertion. The State has cited Fields v. Kodiak City Counsel, 628 P.2d 927 (Alaska 1981); Thornton v. Commissioner of Department of Labor and Industry, 621 P.2d 062 (Montana 1980), and Country Club Home, Inc. v. Harder, 620 P.2d 1140 (Kansas 1980). None of these cases is instructive on the point. In Fields, the court applied the standard rule that one seeking a variance to zoning requirements has the burden of proof, and the ordinance at issue specifically set forth what one seeking a variance was required to show to be successful. In Thornton and Country Club Home, Inc., the courts were reviewing a final order emanating from an administrative hearing, and in each case the court concluded that the order was presumed to be correct and the burden was on the one challenging the order. In the case at bar, we are not dealing with a final order of an agency following a hearing. Instead, we are trying to derive that order.

A case which Mr. Holland might have cited in support of his position is that of Alaska Alcoholic Beverage Control Board v. Malcolm, Inc., 391 P.2d 441 (Alaska 1964). There, the court concluded that since under the Administrative Procedure Act the party filing a statement of issues is the moving party and the party seeking the issuance or re-newal of a license is the respondent, the party filing the statement of issues bears the burden of

Law Offices

Juneau, Alaska 99801
(907) 586-3811

proof on the issues raised therein.

In my view, none of the above authorities are very helpful. It is my conclusion that in this case, DHSS has the burden of presenting a prima facie case in support of the claims set forth in the statement of issues. Once it has done so, the burden of proof falls upon Mr. Holland to prove by a proponderance of the evidence that the requested license should be issued. See Mezines, Stein & Gruff, 4 Administrative Law, § 24.02 (1982). This approach seems to me to give proper recognition to both the fact that DHSS cannot arbitrarily refuse to issue a license on the one hand, while on the other hand, given the importance of DHSS' licensing function in protecting society, a presumption of some magnitude in favor of the State's licensing decision should apply.

The arguments of Mr. Holland in support of his case appeared to be as follows. First, because of an incident at his home and his subsequent complaint to the Ombudsman, as well as a number of rumors at the SERO Office concerning occurences at Mr. Holland's facility, DHSS intended to deny Mr. Holland's application regardless of whether his proposed facility complied with applicable regulations. In support of this part of his argument, Ms. Borkowski testified that Ms. Smith had stated, upon reviewing the January 12, 1982 proposal, that Mr. Holland would be licensed over her dead body. Furthermore, Ms. Borkowski testified that Ms. Smith had indicated that she was dissatisfied because of Mr. Holland's complaint to the Ombudsman and that he was essentially a troublemaker.

With the foregoing premise established, Mr. Holland proceeded to argue that someone in DHSS had removed the completed standard by standard evaluation performed by Mr. Lobo and the January 12, 1982 Group Home Proposal from his licensing file for the purpose of assuring that the application would be denied. In response to the fact that DHSS' denial of the license was maintained even after review of those two documents, Mr. Holland argued that the deficiencies which remained in his application were rather minor, DHSS had the authority to waive adherence to those provisions with which Mr. Holland had not complied, and DHSS had exercised that

discretion in approving the applications of certain other facilities. In Mr. Holland's view, DHSS should have issued him a provisional license for his new facility allowing him a reasonable amount of time within which to bring his facility into compliance with those portions of the new residential child care facility regulations with which he had not yet complied.

The position of DHSS was that, notwithstanding all that occurred prior to August of 1982, once all of the proper documents were in Mr. Holland's file and a standard by standard evaluation was performed, his facility was found not to be in compliance with the new residential child care facility regulations, and therefore the denial of the license application was proper. While provisional licenses have been issued in the past, DHSS' position is that given recent amendments to AS 47.35.055, a provisional license is only appropriate for on-going facilities, not for new facilities, the difference being that denial of a license to an existing facility would cause great hardship for the residents of that facility because it would require closing the facility, while any delay in starting a new facility would not have such an affect. According to DHSS, a waiver of regulation requirements could only be given in certain cases, and then only if an applicant applied in writing for a waiver. In those cases in which field workers addressing other facilities exercised discretion and did not require that certain documents called for in the regulations be submitted with a facility's application, the field workers were not complying with the policies of DHSS. I find the argument of DHSS to be persuasive.

No person may operate a residential facility without first obtaining a license to do so from DHSS. AS 47.35.020; 7 AAC 50.003. To obtain a license for a new residential child care facility, an applicant must satisfy the requirements of 7 AAC 50.001 - 7 AAC 50.073. AS 47.35.040. A facility in operation at the time new regulations are passed may continue in operation despite not being in compliance with some of the new regulations if it submits an acceptable plan of correction for those items of the regulations with which it is not in compliance. A new facility may not begin operation until it has satisfied all of the applicable regulations. 7 AAC 50.05(a)(2).

DHSS is required to issue a provisional license to a new facility "if the facility submits to the Department an acceptable plan for operation that is in conformity with" applicable statutes and regulations. AS 47.35.055(a); 7 AAC 50.013. Under that statute and regulation, a new facility which does not meet all of the regulatory requirements is not entitled to a provisional license. While under 7 AAC 50.023 DHSS possesses the authority to waive certain of the regulatory requirements under certain conditions, an applicant desiring a waiver must make application therefor to DHSS in writing.

The facility for which Mr. Holland is seeking a license is a new facility, and he is therefore required to satisfy all of the regulations applicable to residential child care facilities. He is not entitled to a provisional license while he is bringing his facility into compliance with the regulations. He is also not entitled to a waiver of any of the regulations for he did not apply to DHSS in writing for any such waivers.

A number of witnessess testified that one reason for denying Mr. Holland's license application was that DHSS did not recognize a category of provider called a foster family group home. This reason for denial, however, was not included in the amended statement of issues in support of denial of the license. Furthermore, it appears that DHSS construed the application of Mr. Holland to be for a residential child care facility and evaluated the facility using residential child care facility regulations. For these reasons, this recommended decision will not address the question of whether the absence of a category of care provider specifically matching the title set forth in Mr. Holland's application would, in itself, justify denial of his application.

Turning to the reasons for denial set forth in the first amended statement of issues, DHSS has met its burden of making a prima facie showing that the inadequacies set forth therein did in fact exist. Mr. Holland put on no evidence to the contrary. He also failed to present evidence showing that a provisional license had been provided for any other new residential child care facility in Alaska which had failed to satisfy those regulations set forth in the first amended statement of issues. Furthermore,

LAW OFFICES
FINDLEY & BURNHAM
A PROFESSIONAL CORPORATION
326 FOURTH STREET, SUITE B
JUNEAU, ALASKA 99801
(907) 586-3811

he failed to put on any evidence tending to show that any other new residential child care facility in Alaska had obtained a waiver of any regulatory requirements without submitting a written waiver request. Consequently, Mr. Holland failed to prove that the denial of his license was arbitrary or capricious, or that he was treated differently than other applicants in a similar situation.

While Mr. Holland may consider some or all of the deficiencies in his application identified by DHSS to be of minor significance, I do not intend to pass judgment on either the wisdom or importance of the regulations he failed to satisfy. DHSS is clearly authorized by law to set forth by regulation standards with which care providers in this state must comply and Mr. Holland has not challenged that authority. Mr. Holland having failed to satisfy those standards, I recommend that the denial of his application be upheld. DHSS, at least as of June 10, 1982, appeared willing to assist Mr. Holland in bringing his facility into compliance with the regulations. Mr. Holland chose not to follow this route, and instead demanded that DHSS take action on his license, notwithstanding that it certainly should have been clear to Mr. Holland that the only action DHSS could take at the time was to deny his license.

Though I recommend that the license denial be upheld, something must be said of DHSS' very poor handling of Mr. Holland's application. Were the results not so costly to the State in time and money, and to Mr. Holland both in time and emotional distress, one could refer to the handling of his application as a comedy of errors. The application was submitted by Mr. Holland in September of 1981 and yet no decision was made on the license until June of 1982. Furthermore, the amended version of his group home proposal which SERO had specifically requested in November of 1981, upon receipt by SERO, was not even recognized as being related to his application, notwithstanding the fact that the document bore the exact same title and appearance as did the plan attached to his original application. SERO then evidently lost the document. When SERO finally got around to considering Mr. Holland's application, the Regional Director recommended

Law Offices
FINDLEY & BURNHAM
A Professional Corporation
120 Fourth Street, Suite B
Juneau, Alaska 99801
(907) 586-3011

that it be approved, without even reviewing any of the documentation in support of the license. The Acting Regional Director then signed the approval recommendation, also without reviewing any back-up documentation. As it turns out, the kind of facility for which Mr. Holland was applying,and for which SERO recommended licensure, did not even exist in DHSS regulations.

Mr. Holland assigns sinister purposes to all of these events and interprets them in some manner to be a conspiracy against issuance of his license. I do not agree with that conclusion. While Mr. Holland argued that SERO was dead set against issuing him a license, it was in fact SERO which recommended issuance of the license. It appears that all of the events to which Mr. Holland pointed as evidence of a sinister conspiracy were evidence of nothing more than a very poor performance by the employees at SERO. Had the license application been properly handled, it is doubtful this matter would have ever gone to a hearing, and a care provider who has provided high quality services for the State in the past would not be so disillusioned with continuing to serve the State in the future. It would seem to be most beneficial for the State to make every reasonable effort to assist quality care providers in continuing to provide services on behalf of the State. Sadly, no such effort appears to have been made in this case until it was too late.

DATED this 3rd day of December, 1982.

Richard M. Burnham

CHAPTER 75

INVESTIGATIONS BY LEGISLATIVE BODIES

Sec. 795. Right of a Legislative Body to Make Investigations

1. The right of a legislative body to make investigations in order to assist it in the preparation of wise and timely laws must exist as an indispensable incident and auxiliary to the proper exercise of legislative power. This has been recognized from the earliest times in the history of American legislation, both federal and state, and from even earlier epochs in the development of British jurisprudence.

2. The legislature has the power to investigate any subject regarding which it may desire information in connection with the proper discharge of its function to enact, amend or repeal statutes or to perform any other act delegated to it by the constitution.

Section 795—
Paragraph 1—
Marshall v. Gordon (1917), 243 U.S. 521, Ann. Cas. 1918B, 371 L. R. A. 1917F, 279, 61 L. Ed. 881, 37 Sup. Ct. Rep. 448; Burnham v. Morrissey (1859), 14 Gray (Mass.) 226, 74 Am. Dec. 676; Wilkens v. Willet (1878), 40 N. Y. (1 Keyes) 521, 4 Abb. Dec. 596; Briggs v. MacKellar (1855), 2 Abb. Pr. (N. Y.) 30; Robertson v. Peeples (1919), 120 N. C. 176, 118 S.E. 300; Anderson v. Dunn, 6 Whet. (U.S.) 204, 5 L. Ed. 242; Federal Trade Com. v. American Tobacco Co. (1924), 264 U. S. 298, 32 A. L. R. 786, 68 L. Ed. 696, 44 Sup. Ct. Rep. 336; Harriman v. Interstate Commerce Com. (1903), 211 U. S. 407, 53 L. Ed. 253, 29 Sup. Ct. Rep. 115; In re Chapman (1897), 166 U. S. 661, 41 L. Ed. 1154, 17 Sup. Ct. Rep. 677; Kilbourn v. Thompson (1880), 103 U. S. 168, 26 L. Ed. 377; In re Battelle (1929), 207 Cal. 227, 277 Pac. 725; Goldman v. Olson (Wis. 1968) 268 F. Supp. 35. Murphy v. Collins (1974), 20 Ill. App. 3d 181, 312 N. E. 2d 772.
Paragraph 2—
Ex parte McCarthy (1866), 29 Cal. 395; Greenfield v. Russel (1920), 292 Ill. 392, 129 N.E. 102; Attorney General v. Brissenden (1930), 271 Mass. 172, 171 N.E. 82; Briggs v. MacKellar (1855), 2 Abb. Pr. (N.Y.) 30; People v. Keeler (1885), 99 N.Y. 463, 2 N.E. 615; Simpson v. Hill (1927), 128 Okla. 269, 263 Pac. 635; Commonwealth v. Costello (1912), 21 Pa. Dist. 232; State v. Frear (1909), 138 Wis. 173, 119 N.W. 894.

3. The power and duty reposed in the legislature and in each and every member of both houses thereof is that of preparing and proceeding to enact wise and well-formed and needful laws, and in the preparation of such laws, the necessity of investigation of some sort must exist as an indispensable incident.

4. Legislatures in enacting laws, like courts in interpreting such laws when enacted, must have in mind the former law, if any, the wrong or defect requiring remedial action, and the nature and extent of the needed and appropriate remedy; and in the application of this principle, the power of these coordinate branches of government.

5. The inherent and auxiliary power reposed in legislative bodies to conduct investigations in aid of prospective legislation carries with it the power in proper cases to compel the attendance of witnesses and the production of books and papers by means of legal process, and to institute, and carry to the extent of punishment, contempt proceedings in order to compel the attendance of such witnesses and the production of such documentary evidence as may be legally called for in the course of such proceedings, whether conducted by the legislative body or a branch thereof, directly or through its properly constituted committees.

6. The legislature has power to investigate any subject where there is a legitimate use that the legislature can make of the information sought, and an ulterior purpose in the investigation or an improper use of the

information cannot be imputed.

7. The legislature or a committee cannot be enjoined from investigating a matter which is under litigation in the courts.

8. The ascertainment of pertinent facts as a basis for legislation is within the power of a legislative body.

9. A legislature in conducting whatever inquisitions the proper exercise of its proper functions require, must be as broad as the subject to which the inquiry properly entered upon has relation.

10. An investigation into the management of the various institutions of the state and the departments of the state government is at all times a legitimate function of the legislature.

11. The right to investigate any lawful matter is a right separate and distinct in each house and may be exercised through a committee.

12. A local legislative body has the power to make investigations having a relation to the performance of its functions the same as a state legislature. The investigation can be conducted by the body itself or through a committee.

State v. Milwaukee (1914), 157 Wis. 505, 147 N.W. 50; Hendricks v. Carter (1918), 21 Ga. App. 527, 94 S.E. 807.

13. Authority to obtain information for its determination concerning the exercise of power to make laws may be conferred on nonlegislative bodies.

14. In the exercise of its power to make investigations, a legislature may incur reasonable necessary expenses payable out of the public funds.

15. The legislature and each house thereof has the inherent and implied power to appoint investigation committees and conduct investigations to obtain information concerning proposed or future legislation and to report back its findings to the body that appointed it.

Sec. 796. Investigations Respecting Members

See also Sec. 564, Investigation of Charges Against Members.

1. The legislature or either house has power to investigate and institute an inquiry into the truth of an alleged bribery of any of its members or the members of a previous legislature connected with its legislative functions, and, in the exercise of such power, it must necessarily have the same power to compel the attendance of witnesses before it or before a committee and compel them to testify as in any other investigation.

2. A legislative body has the right in an election contest concerning one of its members to conduct an investigation, before the body or one of its committees and

Section 796—
Paragraph 1—
In re Falvey (1856), 7 Wis. 528; Briggs v. MacKellar (1855), 2 Abb. Pr. (N.Y.) 30.

to compel the attendance of witnesses and take testimony.

3. Knowledge or information acquired by a witness, though at the instance of and in connection with and under the direction of a prosecuting attorney to use in the trial of indictment against members of the legislature for bribery, is not privileged and furnishes a witness lawfully summoned no legal ground for refusing to respond to legitimate questions by a legislative committee appointed to investigate the matter.

4. When a house is investigating the conduct of its members upon a public charge that some of them whose names are not given have taken bribes and have called as witnesses the editor and reporter of the paper which published the charge, it is a contempt of the authority of the house for the witnesses to refuse to give the names of those from whom they have received information concerning the charge of bribery and of the nature of that information.

5. When a committee is charged with an inquiry, if a member prove to be involved, the committee cannot proceed against him, but must make a special report to the house; whereupon the member is heard in his place, or at the bar, or a special authority is given to the committee to inquire concerning him.

Sec. 797. Limitations on Right of a Legislative Body to Investigate

1. It is a general rule that the legislature has no power through itself or any committee or any agency to make

Paragraph 5—
Jefferson, Sec. XI.

inquiry into the private affairs of a citizen except to accomplish some authorized end.

2. The legislature has no right to conduct an investigation for the purpose of laying a foundation for the institution of criminal proceedings, for the aid and benefit of grand juries in planning indictments, or for the purpose of intentionally injuring such persons or for any ulterior purpose.

3. A state legislature in conducting any investigation must observe the constitutional provisions relating to the enjoyment of life, liberty and property.

4. An investigation instituted for political purposes and not connected with intended legislation or with any of the matters upon which a house should act, is not a proper legislative proceeding and is beyond the authority of the house, or legislature.

5. When a committee is appointed by resolution to make an investigation and the object of the investigation, as shown by the resolution, is not a proper legislative object but is to establish an extraordinary tribunal for the trial of judicial and other officers, the duties imposed on the commission being strictly judicial and not ancillary to legislation, the committee has no legal status.

Paragraph 5—
Commonwealth v. Costello (1912), 21 Pa. Dist. 232.

6. A governmental "fishing expedition" into the papers of a private corporation on the possibility that they may disclose evidence of crime is contrary to the first principles of justice and an intention to grant the power must be expressed in most explicit language.

7. The investigatory power of a legislative body is limited to obtaining information of matters which fall within its proper field of legislative action.

Sec. 798. Method of Investigation by a Legislative Body

1. The legislative arm of government is not to be restricted in the exercise of the power of inquiry by the fact that methods and processes, judicial or quasi-judicial in character, are employed in the course of the inquiry; and it is immaterial whether the power of inquiry is to be exercised by a state or a federal legislative body, or whether in the exercise of that power the legislative arm of the government is acting under or by virtue of granted or reserved authority, or what the particular constitutional limitations may be which separate legislative from judicial functions of government and which forbid the trespass of the one on the domain of the other.

2. Legislative bodies, by the mere employment of methods of procedure which resemble those employed or required in judicial proceedings, are not to be held to be engaged in the exercise of a judicial function and

to be thereby trenching upon the area exclusively assigned to the judicial department of the state government.

3. By uniform custom, more or less rigidly adhered to, every official inquisition has from the earliest times made use of procedural methods which resemble those obtaining in judicial tribunals. This is because, in the nature of things, as exemplified by human experience, such methods have been found to furnish the surest means of arriving at the truth of the particular matter involved in the inquiry. It does not follow, however, that legislative bodies or administrative agencies or municipal organizations or executive officials, by the mere employment of methods of procedure which resemble those employed or required in judicial tribunals, must be held to be engaged in the exercise of a judicial function.

4. Where the legislature has constitutional power to institute an investigation the manner of conducting such investigation rests on the sound discretion of the legislature.

5. Hearings of a board of trustees of a village are not circumscribed by the evidentiary rules against hearsay.

Sec. 799. Legislative Investigating Committees

See also Sec. 564, Investigation of Charges Against Members

1. In American legislatures, the investigation of public matters before committees, preliminary to legislation or with the view of advising the house which

Paragraph 5—
Dubato v. Board of Trustees of Incorporated Village of Bayville (1957), 166 N. Y. S. 2d 971.

appointed the committee, is a parliamentary usage as well established as it is in England, and the right of either house to compel witnesses to appear and testify before its committees and to punish for disobedience has been frequently enforced.

2. The legislature may proceed to make any investigations within its authority, by authorized committees of one or both houses. The houses can act jointly in appointing a committee or either house can act alone.

3. It is a common procedure for committees of local legislative bodies to be appointed to make investigations, take evidence, and report to the body concerning pending and contemplated legislation, and for other purposes relating to the functions of the body.

4. The legislative power of a state being vested in the two houses of the legislature, such bodies may create committees or even commissions by concurrent resolutions as well as by act and may confer upon them such power as they are not prohibited by express provision of the constitution from conferring.

5. Powers delegated by the legislature or either house to a committee by a simple resolution cease with the adjournment sine die of the legislature. But a legislature may invest its committees with power to function after the adjournment of the session; and where each house can act separately, the joint act of both houses is not required to set up a committee which can continue to function after adjournment.

6. A legislative investigating committee may not delegate its powers of investigation to one of its members without authority granted in the resolution appointing the committee.

7. Testimony before a committee should be taken down for the information of the house.

8. A legislator's service on an interim committee appointed pursuant to a statute duly passed for the purpose of investigating and reporting to the next legislature, would not be violative of a constitutional prohibition against occupation by legislators of any other office, trust or employment.

Sec. 800. Witnesses in Legislative Investigations

See also Sec. 797, Limitations on Right of a Legislative Body to Investigate.

1. By the common parliamentary law, a legislative body may compel the attendance of all persons as witnesses in regard to any subject on which it has power to act, and into which it has instituted an investigation.

2. The power of a state legislative body to compel witnesses to testify in aid of investigations is an attribute of the power to legislate and follows as an essential implication.

3. When witnesses are brought before either branch of the legislature, they may be compelled to testify by process of contempt, when without legal cause they refuse to do so.

4. Witnesses before a legislative body or its committee need not be sworn, unless there is some provision of law or of the constitution authorizing it, but give their testimony under the penalty of being adjudged guilty of contempt, and punished, if they testify falsely.

5. When any person is examined before a committee, or at the bar of the house, any member wishing to ask the person a question must address it to the presiding officer, who puts the question to the person. If the propriety of the question be objected to, the presiding officer should direct the witness, counsel, and parties to withdraw, for no question can be moved or put or debated while they are there. Sometimes the questions are previously settled in writing before the witness enters.

Paragraph 5—
Jefferson, Sec. XIII.

6. A member, in his place, may give information to the house of what he knows of any matter under hearing at the bar.

7. Either house may request, but not command, the attendance of a member of the other. In case a member refuses to attend or testify, the house desiring his testimony may make the request by message to the other house, expressing clearly the purpose of the attendance.

8. If either house have occasion for the presence of a person in custody of the other, they may ask the other house for the custody of the person.

Sec. 801. Compelling Witnesses to Attend and Testify. Power to Punish for Contempt

1. Each house of the legislature may punish breaches of its authority when they are committed in its presence, and may equally punish a witness for contempt of the house for his refusal to appear or testify before a properly empowered committee or to produce books and papers.

2. The power of a house of a state legislature to punish a person for contempt can only be exercised in strict conformity with the rules of procedure which the laws

of the state provide as a prerequisite to the validity of an adjudication of contempt.

3. A statute empowering either house to imprison a contumacious witness is not in excess of legislative power. Where a witness refuses to answer proper questions propounded by an investigating committee, it has been held to be criminal contempt.

4. Witnesses cannot be punished for contempt before a legislature unless the matters inquired into are within the jurisdiction of the legislature. A witness before a court or any other inquisitorial body who is otherwise orderly and respectful cannot be adjudged guilty of contempt committed in the presence of such tribunal for his failure or refusal to answer any question or to produce any record, book or paper, unless the order so adjudging him guilty of contempt contains an express recital of the facts affirmatively showing not only the precise question which he has declined to answer, or the precisely specified books or papers which he has refused to produce, but also affirmatively setting forth the facts which show the materiality and pertinency of each of these forms of evidence to the issue before the court or tribunal.

5. In order to authorize a conviction under a statute making it a misdemeanor for a witness in an investigation before a legislative committee to refuse to produce documents in his possession, it must appear that the documents demanded are material to the inquiry.

6. The right to compel a witness to produce books and papers before a legislative committee is determined by whether their production is necessary to the inquiry which it is conducting, and the production of papers material to an inquiry cannot be refused merely because they are private.

7. An examination of the history of the English Parliament and the decisions of the English courts show that the power of the House of Commons, under the law and customs of Parliament, to punish for contempt rests upon principles peculiar to it and not upon any general rule applicable to all legislative bodies.

8. No expressed power to punish for contempt was granted to the houses of Congress except the power to deal with contempt submitted by its own members (Const. Art. I, Sec. 5). The houses have implied power to deal directly with contempt so far as necessary to preserve and exercise legislative authority especially granted, it being, however, a power of self preservation. It is a power to prevent acts which inherently prevent or obstruct the discharge of legislative duty.

9. The powers of a local legislative body to punish for contempt must be expressed clearly by constitution or statute. Such powers cannot be implied or inferred.

10. A legislative house may refuse to a party, summoned before it as a witness, the aid of counsel when

charged with contempt in not answering questions.

Sec. 802. Summons, Subpoenas and Warrants

1. A legislative body or a committee, when acting within the scope of its authority to conduct an investigation, may summon and examine witnesses, require the production of and examine books, records and papers.

2. The law may make it a penal offense for a person to fail to appear before a legislative committee on process, regular on its face, issued by the chairman of the committee under general authority conferred upon him by the committee, either expressly or by parliamentary usage, either with or without specific authority in the particular case.

3. Where a committee is authorized to subpoena witnesses, the chairman of the committee in conjunction with its counsel may select the names and number of witnesses for attendance at each session, and the chairman may sign the summons for each witness. Subpoenas should not be issued in blank.

4. A summons by the committee ordering a witness to appear before a joint committee of the two houses, may be signed by the chairman of the committee.

5. A subpoena for attendance of a witness is not vitiated as to the necessity of the attendance of a witness

by the inclusion of illegal requirements for the production of documents.

6. When a subpoena duces tecum has been issued under statutory authority showing that the purpose of the examination was within the scope of the inquiry authorized, the court cannot cancel the subpoena nor enjoin the issuance of any further subpoena.

7. When a witness lawfully summoned refuses to appear, a warrant may be issued to compel his attendance.

8. No affidavit charging contempt need be filed before a house to authorize it to issue its warrant to arrest a contumacious person who refuses to testify before one of its committees. The written report of the committee is sufficient authority for the issuance of the warrant.

9. When a prisoner of the State of New York was taken by the sergeant-at-arms of the House of Representatives under a warrant issued by said house, it is not an escape and the state officer was not liable for his release.

10. A person disobeying a subpoena of a legislative committee may be apprehended and brought before the committee by a sheriff under a warrant issued to him, and either prosecuted for a misdemeanor under a statute for failure to obey the subpoena or punished for contempt by the legislature, but he cannot be punished

by the judiciary for contempt.

11. A writ of prohibition cannot be used to prevent an administrative or legislative body from proceeding with an investigation.

12. Service of a subpoena or the execution of a warrant requiring attendance before a legislative committee is not "an arrest" within statute exempting members of the legislature from arrest.

13. Warrants, subpoenas, etc., issued during recess of Congress are signed only by authority specially given. The speaker also certifies cases of contumacious witnesses for action by the court.

14. Witnesses summoned to appear before a city council are entitled to definite notice of the time and place of the meeting.

Sec. 803. Right of Investigating Committees to Sit Between Sessions.

See also Section 622, Committees Functioning During Recess or After Adjournment.

1. A legislative committee may be created by statute, authorized to sit during the interim between sessions for any proper purpose, empowered to take testimony, compel attendance of witnesses and punish for contempt and report its findings to the next session.

2. A committee for the purpose of obtaining information concerning proposed legislation and reporting back its findings, with the power to sit during a session or during a constitutional recess between parts of the session may be authorized by a single house resolution or by concurrent resolution.

3. Unless authorized by the constitution, neither house of the legislature can lawfully appoint by single house resolution a committee with power to sit after adjournment sine die.

4. A fact-finding committee which was appointed by a single house resolution during a regular session of the legislature, has no legal authority to sit after the adjournment of the legislature sine die.

5. A legislature cannot by concurrent resolution lawfully create a committee with power to sit after adjournment.

6. The fact that interim committees had been appointed by single house resolutions and had theretofor carried on without objection, was not determinative of whether the legislature by single house resolution might lawfully create an investigating fact-finding committee with power to function after adjournment sine die.

ISSUANCE AND FORM OF SUBPOENA.
TEXT (a) A subpoena requiring the attendance of a witness before either house of the legislature may be issued by the president or the speaker.

(b) A subpoena requiring the attendance of a witness before a standing or special committee of the legislature may be issued by the chairman of a committee when authorized to do so by a majority of the membership of the committee and with the concurrence of the president or the speaker, or with the concurrence of the house or the senate.

(c) A subpoena requiring the attendance of a witness before an interim committee established by either house of the legislature, or by both, may be issued by the chairman of a committee when authorized to do so by a majority of the membership of the committee and with the concurrence of the president or the speaker.

(d) The subpoena is sufficient if

(1) it states before whom the proceeding is held;

(2) it is addressed to the witness;

(3) it requires the attendance of the witness at a time and place certain;

(4) it is signed

(A) by the president or the speaker under (a) of this section, or

(B) by the committee chairman with the concurrence of the president or the speaker under (b) and (c) of this section.

(e) This section does not apply to the Legislative Council nor to the Legislative Budget and Audit Committee.

HOUSE OF REPRESENTATIVES

REPRESENTATIVE
CHARLIE BUSSELL
CHAIRMAN

Committee on Judiciary

27 March, 1984

Representative Mae Tischer
Chairman, HESS Committee
House of Representatives
118 Capitol
Juneau, Alaska 99811

Dear Representative Tischer:

At the recent House Judiciary Committee hearings on House Bill No. 588, you may recall that Mr. Bernie Holland appeared and presented a brief, capsulized testimony depicting wantonly unjust, callous, and irresponsive practices in the administrative proceedings within the Department of Health and Social Services.

Mr. Holland's testimony, as well as that of the other witnesses who appeared before the Committee on that occasion, would indicate that further investigations are certainly warranted to attempt to alleviate any malpractices in the proceedings of that department. I feel that it would be a grave disservice to Mr. Holland and the others not to pursue this matter further.

I would urge you to instigate these hearings in your committee as soon as is practicable. I am,

Sincerely yours,

Representative Charlie Bussell
Chairman, House Committee on Judiciary

Follow-Up Information
HESS Hearing March 19, 1984

This is to provide information regarding some issues which were raised in the hearing on the Division of Family & Youth Services on March 19, 1984, in Juneau. Chairperson Tischer indicated that she would call for a statewide investigation of the issues raised in the hearing. The Division of Family and Youth Services wants to assure the Committee members that we would welcome an opportunity to respond to such an investigation.

We wish to clarify that while the hearings in Anchorage, Soldotna and Fairbanks focussed on the topic of foster care, some of the witnesses at the March 19 hearing in Juneau were testifying to investigations of child abuse and neglect, including sexual abuse of children. We feel it is important to consider the issues of investigations of child abuse separately from the foster care issues.

In regards to the issue of investigations of child abuse and neglect, the Division has a mandated responsibility to carry out investigations as required under AS 47.17, whenever the Division receives a report of suspected child abuse or neglect. Removal of children from their homes is a last resort when the child's safety or welfare cannot be adequately safeguarded without removal. There are a number of safeguards against capricious action on the part of Division employees, including clear direction under Alaska statutes, Division policies and procedures, and, of course, judicial review of all actions taken to remove children from their homes. In addition, the Committee should be aware that when the alleged abuse is criminal in nature, as in the case of sexual abuse, the Division must involve law enforcement authorities to carry out their part of the investigation, and a coordinated investigation is usually the result. While one witness referred to the "wholesale destruction of families", we must point out that the issue of investigations of sexual abuse allegations is a very complex one which involves societal attitudes toward punishing sexual offenders, including required jail terms under AS 11.41.

We would also suggest that when witnesses are being so specific in their charges, it would be advisable to request that they sign releases of information to the Committee, so that we may provide additional facts demonstrating the total situation. As it is, we are unable to provide information which we feel would give the Committee a more balanced picture of what truly occurred. We recognize that to be involved in an investigation is a very painful, agonizing process. If the District Attorney decides to file criminal charges against a parent or parents we proceed from the assumption that parents are innocent until proven guilty; however, we must provide protection to a child until we can assure the child's safety in the home. Furthermore, in those situations in which criminal charges are not being filed, ensuring the child's safety is also paramount.

One witness testified to the inadequacy of foster care rates. He was aware that the Division is holding foster care rate hearings this week

across the State; but in conversation following the hearing, he stated he would not be in town on the date of the hearing. Therefore, he was requested to provide his information to the Division staff present and did so following the HESS hearing.

Two witnesses referred to a program being conducted in the schools in which their children felt they were being given the message that hugging is not acceptable. We are aware of the curriculum and know that the program makes a strong point that hugging between family members and children is fine. The program distinguishes between that and what is not acceptable, i.e., touching the child's private parts. However, since at least two witnesses referred to children having received the wrong impression, we will contact the School District and advise them of this problem.

We wish to clarify some facts regarding Mr. Holland's testimony about the complaint investigation of allegations of mistreatment of children in his foster home and subsequent hearing. He has asked for and the Committee is considering a special appropriation of $13,000 owing to Mr. Holland's attorney. Following is a summary of significant facts in the Holland case:

Two youths in the Holland home complained about mistreatment. The Division investigated the allegations by interviewing a number of other youths currently or previously in care. The allegations of those youths were then presented to the Hollands for response and discussion. As the hearing officer pointed out on page 9 of the decision, "I believe there was sufficient information to justify meeting with the Hollands to discuss the allegations...They were nothing more than complaints made against the Hollands to which DFYS felt Hollands, in their own interest, should be provided an opportunity to respond. The Department did not represent to the Hollands that DFYS agreed with the allegations." Usually an investigation is resolved at this point; however, this is the first case where a foster parent has refused to discuss allegations. Mr. Holland insisted that the Department prove the allegations.

Because the Hollands had operated a foster home that had demonstrated prior substantial success in dealing with difficult foster children, the Department attempted to negotiate a settlement with the Hollands rather than to take the matter to hearings. The settlement broke down when the State refused to honor Mr. Holland's request to change the personnel evaluation of a licensing worker, who was Mr. Holland's friend. Eventually the case was brought to a hearing for resolution.

At the hearing the State asked the hearing officer to rule on license issuance or revocation based on the evidence presented at the hearing. A three week hearing was held, one of the longest administrative hearings in State history. The proposed ruling of the hearing officer was adopted. The hearing officer ruled that none of the 13 allegations could be substantiated because the State had based its findings on the interviews, written statements, and memoranda submitted in the case

rather than having each child called as witness and being subjected to cross examination. In the hearing, Mr. Holland attempted to prove that the Department had a conspiracy against him. On page 7 of the decision, the hearing officer wrote, "Mr. Holland attempted to show that because of that complaint, and others to the Ombudsman, there was a conspiracy within DHSS to revoke his foster home license or to drive him out of the program. I was not persuaded by Mr. Holland's conspiracy theory in the prior proceeding, and I am no more impressed with it in this proceeding." And on page 9, "Mr. Holland's position at the hearing was that DFYS had intentionally prepared false allegations against him...There is no meaningful evidence to support this theory." The hearing officer also stated on page 13, "While it certainly would have been in Mr. Holland's best interest to have discussed the allegations in detail, and thereby possibly have disposed of all of them without the time and expense of a hearing, the regulations and statutes did not require that he do so." Finally, the hearing officer concluded that Department concerns could be remedied through 7 AAC 50.360 which states, ":'The licensing of a foster home by the Division does not...obligate the State or any child placement agency to place or maintain any child in the home.'" The time taken by the State to present its case was three days. The remainder of the three week period for the hearing was taken by Mr. Holland and his attorney. The Department believes that these facts are significant and should be considered by the Committee when considering a special appropriation for Mr. Holland.

At the Fairbanks foster care hearing Michael L. Price, Director of the Division of Family and Youth Services, provided Committee members with a copy of all relevant documents on the Holland hearing including the State's closing arguments, Holland's closing arguments, the hearing officer's recommended decision and the Department's decision and order. Additional copies of those documents are available upon request.

Mr. Holland also claimed that the Department had taken no actions regarding the manner in which complaint investigations against a licensed foster home are handled. The Department is currently in the process of reviewing complaint investigation procedures through reviewing procedures in states that have exemplary programs, through two task forces composed of Division representatives and foster parents, one on licensing procedures and one on foster home licensing, and through arrangements with the Alaska Foster Parents Association to examine the Utah approach. Pending the outcome of these efforts, no definitive change is being instituted in licensing investigation procedures. Staff training was accomplished last May utilizing an expert trainer from Texas and additional staff training is planned this year.

TELEPHONE DEPOSITION OF

DANNY JOE HARRISON

APPEARANCES:

GREG COOK, Attorney for respondents
BRUCE BOTELHO, Assistant Attorney General, State of Alaska

Date: May 3, 1983
Time: 1 p.m.

P R O C E E D I N G S

MR. COOK:

This is going to be the tape to be transcribed for a telephone conference call. Today is Tuesday, May 3; the time is 1 p.m. This call is being made pursuant to stipulation between Bruce Botelho, Assistant Attorney General, State of Alaska, and Greg Cook, counsel for Bernie Holland. We will be taking a statement from Danny Harrison, who will be calling from California. Mr. Botelho will participate via teleconference from Anchorage, and will have an opportunity to cross examine the witness. This is Greg Cook speaking, operator.

OPERATOR:

Okay, and Mr. Botelho? Mr. Botelho? Just a moment, sir. Mr. Harrison? Okay. Mr. Botelho?

MR. BOTELHO:

Yes.

OPERATOR:

Okay, and Mr. Harrison?

MR. HARRISON:

Hello.

OPERATOR:

Mr. Harrison, can you hear us?

MR. HARRISON:

Yes.

OPERATOR:

Okay, fine. Okay, go ahead, everyone's on.

MR. COOK:

Danny, I can only read you very faintly, so I'm going to need you to speak loudly, please, and the same goes for Bruce. I read both of you, but very, very faintly. What I would like to do here is to swear you in as a witness, Danny, and then ask you some questions; and then it will be Bruce Botelho's turn to ask you some questions. Is that all right?

MR. HARRISON:

Yeah.

MR. COOK:

Okay, Danny, first, could you state for the record your name and address?

MR. HARRISON:

My name's Danny Joe Harrison, and my address is unknown.

MR. COOK:

Could you spell your last name, please?

MR. HARRISON:

H-A-R-R-I-S-O-N.

MR. COOK:

Thank you. And, Danny, Mr. Harrison, do you swear that the testimony you are about to give is the truth, the whole

truth, and nothing but the truth, so help you God?

MR. HARRISON:

Yes.

MR. COOK:

All right, then, we will proceed. Bruce, do you think this meets with the procedural requirements that you will demand?

MR. BOTELHO:

Well, first of all, is this conversation being recorded?

MR. COOK:

Yes, it is. I have a tape recorder right next to the phone, and that's another reason why I am asking each of you to speak up; although, if you want to make an individual tape recording of the conversation, as we discussed earlier, then I would certainly have no objection to that.

MR. BOTELHO:

Let me also clarify: Is there a court reporter present?

MR. COOK:

There is not a court reporter present, but that is how we will have the tape transcribed, if you desire.

MR. BOTELHO:

And let me ask Mr. Harrison: He does not know his address?

MR. HARRISON:

Yeah, I don't know my address.

MR. BOTELHO:

Would you identify, essentially, what community you are located in right now?

MR. HARRISON:

Lake Isabella area.

MR. BOTELHO:

California?

MR. HARRISON:

Yes, sir.

MR. BOTELHO:

Okay.

MR. COOK:

Would you have any other questions, then, Bruce?

MR. BOTELHO:

Not at this point.

MR. COOK:

All right, then, fine. What I'd like to do, then, is proceed with a direct examination of Danny.

DIRECT EXAMINATION BY GREG COOK:

Q. Danny, were you ever a resident at the home of Bernie and Mary Holland?

A. Yes, I was.

Q. And could you describe for me whether you were a visitor in that home, or were you placed there by the State?

A. I was placed there by the State.

Q. Were you a foster child?

A. Yes, sir.

Q. And how long did you reside with the Hollands, Danny?

A. I think it was just about a year, I think. Maybe a little longer than that.

Q. All right. I'd like to ask you some specific questions about the time that you spent in the Hollands' household. Can you tell me, please, whether or not either Bernie or Mary Holland yelled at you?

A. The only time that they ever yelled at me was -- well, they never really yelled at me; it was more like -- there was never really any yelling going around in the house. It was mostly just, you know, like Bernie would say something, and, like, if I didn't do it, then he, you know, he might say it again, you know, a little bit more -- you know, with a little bit more seriousness in his voice. But he's never yelled at me.

Q. I see. Did he ever direct vulgar and abusive language towards you?

A. No, he didn't.

Q. Did you ever hear him direct vulgar or abusive language

to any of the other foster children in the home?

A. No, he didn't.

Q. How would you describe Mr. Holland's relations with the foster children who were placed at their home?

A. Well, I think -- my personal opinion is, is that Bernie was more of a father to me than, you know, my own own dad is, you know. Him and Mary, they treated me really super good, and they helped me out, really, quite a bit.

Q. Danny, did Bernie ever hit you with a stick, or a ruler, or a yardstick, or his hands?

A. No, he didn't.

Q. Did Mary Holland ever hit you with a stick of any kind, or with her hands?

A. No, she didn't.

Q. Danny, do you know if either Bernie or Mary hit any of the other foster children with a stick or with their hands?

A. No, he didn't.

Q. And does this apply to all of the time that you were present in the Hollands' home?

A. Yes, sir.

Q. Danny, there was a statement that you once made, I believe it was for Robert Danneker of the Division of

Family and Youth Service. And in that statement, it's alleged that Bernie did hit you and other children with a stick. Could you tell me a little bit about that statement that you made?

A. The reason I made that statement was because I had had myself thrown in jail, but I was unaware that I was the one that did it. I thought that Bernie had just put me back in jail for some other strange reason that I didn't know of. But I had broken some rules that the court had given me, and he had placed me back in jail. And I got mad at Bernie, so that was the reason for these statements that I had made, and they're all lies.

Q. Did you retract the written statement that you made, shortly after you made it?

A. Yes, sir. I made a verbal retraction. I said -- I went down to Bob Danneker, and I asked him, I said, I want to retract my statements, because they're all lies. And he said, no, you cannot do that. And so I went back later on and wrote one up myself and dropped it off there and had it signed by their secretary; and I have copies of it.

Q. Danny, did you also make out an affidavit for Fred Baxter that describes the original statement you made as being untrue?

A. Which statement's that?

Q. I have an affidavit here that's on stationery from Bernie's other attorney, a fellow by the name of Fred Baxter. And in that you also state, just as you've stated here this morning, that your original charges that Bernie hits kids were not true. Do you recall making that affidavit?

A. Yes, I did.

Q. And do you recall going to see this Fred Baxter?

A. Yes, I do.

Q. And what did you tell Mr. Baxter at that time, Danny?

A. I just told him the same thing that I'm telling you right now, that I revoked my statements, and that I was told that I cannot, so I went down and had it redone again; and I told them about me being put in jail, and that I made up a bunch of lies, a bunch of accusations against Bernie which are untrue. I just told him that.

Q. And could you tell me once again, please, what the reason was that you made those statements in the first place?

A. Well, it was because I had broken the law, according to some checks that I had -- they're checks that you get, unemployment checks. And I had -- I wasn't supposed to do any kind of -- on my release -- I was released from the juvenile jail out there, and when I was released,

the judge had my probation officer write up a whole bunch of - about ten - rules that I was to follow, completely; and I hadn't followed them. So I was placed back into the -- detention.

Q. Thank you, Danny. I'd like to ask another series of questions, please. While you were living at the Hollands' home, did you have what you felt to be enough space for your own personal belongings?

A. Completely.

Q. Could you provide me with a few facts that would help me understand why you say that?

A. Well, because we got the whole basement, the attic -- enough rooms in there. I had plenty of room inside that house.

Q. I see. Thank you, Danny. Is there any part of the house that was off limits to you?

A. Yes. The middle floor, which Bernie and his wife live on.

Q. Did you ever go into the Hollands' bedroom?

A. No, I didn't.

Q. Was that room accessible to you?

A. It was, but I never went in there, because it was a rule of the house.

Q. Was that room generally kept locked, Danny?

A. Quite a bit of the time, yes, it was.

Q. I see. Danny, were there some people living at the Hollands' home, while you were there, who were not foster children?

A. Yes, there was. There was one girl that was living there who was -- who, I guess, had before been a foster child, and she had been having problems, and so she asked Bernie for some help, and Bernie, you know, was helping her out.

Q. I see. Did this in any way interfere with Bernie or Mary's ability to look after you?

A. No, it did not.

Q. Do you know whether or not it interfered with Bernie or Mary Holland's ability to look after the other foster children in the home?

A. No, not at all.

Q. Danny, some of these people - I think Lilly Manignok (ph) was one and Gil Lucero was another who lived at the Hollands' home - did any of these people share sleeping quarters with you or the other foster kids?

A. Well, could -- like, what do you mean by sleeping quarters?

Q. Same bedroom.

A. At one point, yes, yeah.

Q. Do you feel that this interfered in any way with the

Hollands' ability to provide good care?

A. No, not at all.

Q. And did these people participate in any of the family meetings?

A. No, not really.

Q. Danny, did any of them participate in any of the trials while you were there?

A. That's kind of hard to remember. It was mostly -- the trials that we had and stuff were mostly for the kids that were foster parents [sic] there.

Q. I see. Could you tell me, please, in your own words, Danny, what are the trials?

A. You mean, what do they do?

Q. Yeah, that's right. What happens?

A. Well, like, if someone stays out after curfew, then, instead of Bernie, you know, picking out a particular punishment for them, like, say, you know, you're on restriction, he'd let the kids decide what kind of punishment they should have. And then, you know, we'd all just, you know, decide on what, you know, they should -- what should happen, like, should they be on restriction for a month? Should they be on restriction for a week? And we'd all take a vote, and then -- and that's what happened.

Q. I see. And who had the authority to make the final

decision, Danny?

A. Bernie did. Because sometimes it gets to the point where, like, a couple of people -- the sentence would be too light or be too strong, and then Bernie would have to say, you know, that's not right, because you guys -- you know, I mean, if someone stayed out, you know, twenty minutes past curfew and we gave them, you know, a year restriction, I mean, he'd have to say something about that.

Q. That makes good sense, Danny. What time did family meetings usually take place, please?

A. Between -- after dinner, which was around -- about seven-thirty, until about nine, at the most; and then sometimes we'd, stay up talking, you know, pretty late.

Q. One of the things the State has charged, Danny, is they have alleged that family meetings are held late at night, often lasting from eleven p.m. to two a.m. Could you tell me, please, whether in your experience, that is correct or not?

A. I can particularly remember that we've never had a meeting anywhere past nine o'clock, I'm almost sure of it. All the time that we -- we'd have a meeting, and then after the meeting's over, you know, maybe one or two people would go to bed because they have to get up

for work, and the rest of us'd just sit around and talk, you know, and talk about things that happened and everything, and joke around. And there was nobody that had to stay awake, and everybody knew that, too. So ... .

Q. Let me be sure that I understand you on this, Danny. Did you say that there were no meetings called after eleven o'clock?

A. No, no way.

Q. Did you ever call any family meetings late at night, once, or at any other time?

MR. BOTELHO: (Indisc.) elaborate on his testimony.

MR. COOK: Say it again, please, Bruce?

MR. BOTELHO: I understand that Mr. Harrison had not completed his testimony when you began to interrupt him with another question.

Q. I apologize. Go ahead, Danny, and start up again, at the beginning, please.

A. Of what -- of what you just asked me? Those (indisc. -- simultaneous speech) ...

MR. BOTELHO: (Simultaneous

speech with Mr. Harrison) Mr. Harrison, I understand that you're about ready to state -- to elaborate on this testimony about (indisc.).

A. ... at one time, there was a -- we did have a meeting, and that was because at the time -- well, that was me and one of the other kids, Mike Frawley (ph) that lived there, were late one night, and we came home and it was -- it wasn't a meeting, all it was was that we got up and Bernie sat down and said, I want to know why. Because everybody else was already awake. It was on a Friday night or a Saturday night, and everybody was already awake. And we all sat around and, you know, he said, you know, why did you guys stay out that late? And what happened was my car had broken down at the time.

Q. I see. Danny, this may sound foolish, but when you started out that sentence, Bruce and you were talking at the same time, so I'm afraid that will come out as a little garbled on the tape. Could you just start over with that story again, and tell it from the top, so that we've got a clean version of it for the tape, please?

A. Yeah. What happened was, me and Mike Frawley had stayed out late one night -- or not late, but you know, were out in the valley of Juneau. And when we were coming back, my car had broken down. And it was a Friday or Saturday night - I don't remember - but everybody was already awake, and when we got home, we were late, past curfew, and Bernie, you know, got us all to the table, since we were all already awake and everything; and he asked us why we had -- you know, we were late. And I told him that my car had broken down, and that was the whole thing. That was the only meeting that I can recall that was that late.

Q. I see. And Mike Frawley, was he another foster child living in the Hollands' house?

A. Yes, sir, he was.

Q. I see, thank you. Danny, I'd also like to ask you whether or not another charge is true. This charge that the State has made reads as follows: It says that Bernie Holland has belittled and used cruel and derogatory remarks when describing a foster child to other foster children, and to other persons who have entered the foster home. I'd like to ask you in particular, Danny, to your personal knowledge, has Mr. Holland or Mrs. Holland ever belittled you?

A. I don't really understand what you mean by that.

Q. Have they ever called you names or been verbally abusive with you?

A. Mary Holland's never called me any names at all. But me and Bernie, like, joke around and stuff, but none of it's serious.

Q. I see. Did you ever take offense at any of the things Bernie said to you?

A. No, I don't.

Q. Did he ever use cruel and derogatory remarks towards you?

A. The word, scam, which is just a joking word for me, I guess.

Q. Did Bernie Holland call you Dan the Scam?

A. Yeah, he did.

Q. And could you explain to me what that term means to you?

A. It just means that, like, I play games with people quite a bit, you know, and I'm always trying to, you know, scam things for myself and everything. It's just -- it's just a joking name for me.

Q. I see. And do you ever use that name when you refer to yourself; do you ever call yourself Dan the Scam?

A. Well, I have before, yes.

Q. I see. And do you think it's a cruel or derogatory

remark when you say it?

A. No, not at all.

Q. To your knowledge, did the other foster children think it was cruel to use the word, Scam, referring to you?

A. No, none of the other kids really used that. It was more of a -- like an inside, private joke between me and Bernie, basically.

MR. BOTELHO: Object to the form of the question.

MR. COOK: Could you elaborate on that, please, Bruce?

MR. BOTELHO: Calls for a hearsay answer.

Mr. COOK: Say again, please? You're coming through real faint.

MR. BOTELHO: It calls for a hearsay answer.

MR. COOK: Thank you.

Q. Danny, Bruce has objected to that question, in that it calls for a hearsay answer, and we have to note that objection. In administrative proceedings, of course, hearsay can be allowed by the hearing officer. So I'm going to ask you to answer the question anyway, and we'll let the hearing officer decide whether or not he

wants to allow your answer to go on the record. Can you tell me then, please, Danny, whether or not the other kids in the home felt or seemed to feel that Scam was cruel or derogatory?

A. Like what do you mean? Like, did I think that the -- did they think that it was a real bad word, or something? Or did they know what it mean, or what?

Q. That's right, Danny. Was it your impression that when the other kids heard Bernie use the word, Scam, with you, was it your impression that the other kids thought that was a bad name?

A. No, not really.

Q. Thank you, Danny. I'm going to ask you some other questions that have appeared in the State's pleadings, that may surprise you. And please don't take offense at my use of these words. Did Bernie or Mary ever call you a shitbag?

A. No, they didn't.

Q. Did they ever call you worthless?

A. No, not really.

Q. Did they ever say anything that was like that to you?

A. No.

Q. Did they ever call any of the other kids filthy names?

A. No, he didn't.

Q. Did Mary ever do that?

A. No. Me and Bernie were pretty close to each other, you know, and so, like, when you hear, like, that we'd say stuff like that to each other - it wasn't even like that - but, you know, say, (indisc.) joking around, (indisc.) knows, unless someone else might have picked it up as something bad, but to me and Bernie, we were just joking around with each other.

Q. Thank you, Danny. Danny, are you aware that there were firearms in the Hollands' home?

A. Not really. I know that Bernie had some when he had the gun shop, you know, and the coin collections and stuff, but other than that, no.

Q. I see. If I told you that Bernie had a gun in the closet of his bedroom, would you know whether that was a true statement or a false statement?

A. Could you repeat that again?

Q. Do you know, of your own personal knowledge, whether or not Bernie Holland had a gun in the closet of his bedroom, while you were a foster child in his home?

A. Did I know whether he had one?

Q. Yes.

A. I'm sure that he did, but I never really -- I don't know for a fact or nothing.

Q. I see. Thank you. So just to clarify this, then, you

don't have any personal knowledge of whether he had guns in his bedroom?

A. Right.

Q. Did you have access to the closet in Bernie's bedroom?

A. No, I did not.

Q. Okay. Thank you, Danny. I'd like to ask you some questions now about Twiggy, Mickey Horchover. There were some allegations made for a period of close to a year that Bernie had misbehaved towards Twiggy, and had grabbed her on the behind in order to get a cheap feel. Do you know what the events in question are that gave rise to that accusation?

A. It was mostly because when -- the way they got that story about that was because when I was speaking to Bob Danneker and I was really mad at Bernie, he'd say -- he'd say, well, has Bernie done any sexual things, you know, and he was placing -- basically, he was making suggestions into which I'd turn into -- like, he'd say -- he'd say, well, has Bernie ever done this and this? And I'd say, yeah, yeah, yeah, and I was agreeing to anything, you know. And that's the way you guys came up with that whole accusation, I guess.

Q. I see, Danny. So if I understand you correctly, then, did Mr. Danneker suggest that there was some sexual

misbehavior going on, or did you suggest that?

A. He suggested it.

Q. Say again, please?

A. He suggested it.

Q. Thank you. And are those suggestions true at all?

A. No, not at all.

Q. Did Bernie ever behave in a sexually aggressive manner towards any of the girls, including Mickey?

A. No.

Q. To the best of your knowledge, is there any truth to the allegation that Bernie grabbed Mickey in order to get a cheap feel?

A. Not at all. No way.

Q. Now, you stated earlier to me, Danny, that you thought Mr. Danneker was making these suggestions to you. Could you describe for me, please, why you said that?

A. Well, because -- okay, when we were sitting inside his office, like, I was telling him what was going on and everything in the house, right? Making up all these lies and everything, you know? And I was -- you've got to put yourself in the position that I was really super mad at Bernie because I was in jail, all right? And so I was on the point of where I'd say just about anything, all right? And Bob Danneker was sitting

there and he'd sit there and he'd say, well, you know, did Bernie ever touch Mickey? And I'd say, you know, oh, yeah, you know; but not -- I wasn't saying it in the way that he was touching her, the way he was suggesting it. Then he'd say, well, do you think he was trying to get a cheap feel? And you know, and at the time that I was mad, I was saying, yeah, yeah. But it was untrue, totally.

Q. So if I understand you correctly, these phrases were fed to you by Mr. Danneker? See 23

MR. BOTELHO: (Indiscernible - end of first side of tape).

(OFF RECORD)

(ON RECORD)

MR. COOK: Thank you, Bruce. I just had to switch tapes, so if you'd be kind enough to restate your objection, Bruce, and then we'll see about an answer. So, Bruce Botelho, could you restate your objection, please.

MR. BOTELHO: Are we on tape?

MR. COOK: Roger that.

MR. BOTELHO: One of the

problems I have here: I try to make objections and I can't tell whether anybody's hearing them or not. I have a hunch this conference phone situation is not picking them up. I have to repeat it five or six times. My objection at the time was that it's an unfair leading of the witness, and to the form of the question.

MR. COOK: So you've objected that it's an unfair leading of the witness, and that's your objection to the form of the question, Bruce?

MR. BOTELHO: Right.

DIRECT EXAMINATION BY MR. COOK (continued):

Q. Danny, I'll rephrase that question, then, and ask it in this manner, and see if it is acceptable to Bruce this time. The statements or any allegations, rather, that Bernie engaged in sexual misconduct with girls at the Holland home, were those statements that originated

with you?

A. You mean did they start with me?

Q. Yes.

A. No, they did not.

Q. Who suggested those statements, please, Danny?

A. Bob Danneker.

Q. And when did he suggest those to you, Danny?

A. At the time that he was taking down the other stuff that I was saying to him.

Q. Do you have any idea why he would make those suggestions, Danny?

A. Because at the time -- I have no -- I don't know if he's got -- I don't know anything about, you know, Bob Danneker or Bernie liking each other or anything - I don't know nothing about that. But as far as I know, that -- when I was making the statements, he was just -- he would say that stuff and then I'd -- you know, at the time I was mad, so I don't know if he knew it or what, but I would say just about anything, and I'd agree with anything. If someone told me that he shoots people, I probably would have said that, too.

Q. Okay, thank you, Danny. Just a few final questions here, then, to close up. Did you ever play a game called slaps with Bernie?

A. Slaps?

Q. Yeah. With your hands?

A. No, not that I remember.

Q. If you hold both hands in front of you, and then the other person tries to slap the hands, would that help jar your memory?

A. Let's see. I don't really recall doing that.

Q. Okay. That's fine, Danny.

MR. COOK: I have no further questions at this time. Bruce, if you'd like to ask your questions, I think I'll turn the witness over to you. And how does this sound for a procedure: Why don't you ask the question, and then before Danny answers, I will restate the question, using your words, so that we are certain that the tape recorder does pick it up.

MR. BOTELHO: No. Not acceptable.

MR. COOK: Okay, then go ahead on her, Bruce.

CROSS EXAMINATION BY MR. BOTELHO:

Q. Mr. Harrison, how old are you?

A. Eighteen years old.

Q. When's your birthday?

A. 8/23/64.

Q. You understand you're under oath?

A. Yes, sir, I do.

Q. And do you know what the crime is when you fail to tell the truth?

A. Yes, sir, I do.

Q. What is it?

A. It's that -- well, it's lying. It's like perjury, I guess.

Q. That's right. And you know that's a felony in Alaska?

A. What's that?

Q. You know that's a felony in Alaska?

A. Yes, sir, I do.

Q. Okay. Now, to start out with, you've indicated that you were so mad that you were willing to tell the State anything to get back at Bernie. Is that right?

A. Yes, sir, I was at the time.

Q. Do you want to tell us why we should believe you today?

A. What's that?

Q. You want to tell us why we should believe you today?

A. You'd have no reason to. You got -- you have a choice:

You either take my word for it or you don't. I'm not mad at Bernie now and I'd have no reason to make up lies about him like that, because I found out that I had gotten myself into trouble myself, and it wasn't Bernie after all.

Q. Where are you right now?

A. In California.

Q. Where specifically?

A. In Lake Isabella.

Q. And where in Lake Isabella?

A. I don't know my address down here.

MR. COOK: I'll object to the question as irrelevant there, please.

MR. BOTELHO: Your objection is not well taken. You can only object to the form of the question. All other objections are reserved.

Q. Where are you located?

A. In Lake Isabella.

Q. Where in Lake Isabella?

A. I don't know my address down here.

Q. Describe the building.

A. It's a two-story house.

Q. Are you a fugitive at the moment?

A. What's that?

Q. Are you a fugitive?

A. Not that I know of.

Q. Where can we reach you next week?

A. I'd have to call you guys.

Q. Why?

A. Because the phone here that I use, I'm not allowed to receive any phone calls on it.

Q. What's the telephone number?

A. I can't give that out.

Q. You're under an oath, and I'm asking right now: Give us the telephone number.

MR. COOK: I'll object to the form of the question, and Mr. Harrison has answered the question, so this is asked and answered. You can't compel the witness to answer a question, Bruce.

MR. BOTELHO: I'll suspend the deposition on my own at this point, and will protest its use in the hearing. I find it

unsatisfactory in any case, but if I'm not going to get the cooperation that I was assured I'd get, I'll conclude it at this point.

MR. COOK: Danny, if you want to answer that question, you may.

MR. HARRISON: What question is he referring to?

Q. What is the telephone number you are calling from?

A. Sir, I cannot give the phone number out.

Q. Because you can't see it?

A. It's not that I can't see it. I am told that I'm not supposed to give the phone number out.

Q. Why are you refusing to give it out?

A. It's not because of me; it's because of my parents. That's the same reason I didn't give Bernie the phone number, and I didn't give Greg Cook the phone number, either. You know, because they could have easily called me at one o'clock instead of me calling them at one o'clock. The same thing on Friday.

Q. Why are you being elusive?

A. What do you mean ...

MR. COOK: I'll object to the form of the question. I think you're badgering the witness. If you have anything to ask regarding the merits of the case, it would seem more productive to confine your questions to that, rather than his parents' orders regarding their private telephone line, Bruce.

MR. BOTELHO: I'm trying to find out, right now, the conditions -- why Mr. Harrison on the one hand refused to disclose where he's located -- I'm trying to get some idea, and I'm leading towards it, why he isn't available to testify in Juneau, Alaska, next week at the hearing.

MR. HARRISON: Mr. Cook?

MR. COOK: Yes, Danny?

MR. HARRISON: It's fine. He can go ahead and ask the

question.

Q. What is the answer?

A. There's no problem there. It's just I can only answer to a certain extent on each, you know, question.

Q. My question, again, to you: Why are you -- let me start off by this: Why can't you be in Juneau, Alaska, next week?

A. Next week?

Q. Yes.

A. Because I have a warrant for my arrest up there; I don't have the money to get up there; and I don't have the money to get back. And I have no place to stay.

Q. You have a warrant for your arrest. On what charge?

A. For -- I have a fine up there that I cannot pay ...

Q. For what?

A. ... because I didn't -- that I don't have the money to pay.

Q. What's the charge?

A. It was when I was a juvenile, I had done some breaking and entering up there; and I was released under the condition that I pay the fine back -- pay the ...

Q. Did you voluntarily leave the state?

A. What's that?

Q. Did you leave Alaska?

A. Yes, sir, I did.

Q. Knowing that a warrant was out for your arrest?

A. What's that?

Q. Knowing that there was a warrant out for your arrest?

A. I did not know at the time, but, see, when I was talking to my probation officer, he was telling me that they were going to put me back in jail unless I paid it; and at the time, I didn't even have a place to live or any food to eat, so I can't understand how I was supposed to pay a fine back that I -- that there was no way I could possibly pay back. I still have intentions of paying the fine back, but until I do, I can't go back there.

Q. Why were you in a foster -- why were you placed on probation in the first case?

A. Why was I placed on probation?

Q. Yeah. What ...

A. I broke the law.

Q. ... was the -- was this the same crime?

A. Yes, sir.

Q. Okay. And you indicated that you were in the Holland home for about a year. From when to when?

A. I'm not sure of the dates.

Q. Approximately.

A. They -- various -- from time to time. Sometimes I was

there, sometimes I wasn't.

Q. Okay, you didn't stay there steadily for a full year?

A. No. It was probably more than a year, but sometimes -- like I went to -- I went into the service after I had my -- after I got my GED, you know, and then after that, when I got back out, I was still under eighteen years old, so I was placed back under custody again.

Q. Do you recall meeting with Norm Anderson (ph) on or about July 14, 1982?

A. On what?

Q. Simply to meet you, to take you out for a urine analysis?

A. Yes, I do.

Q. And do you recall telling him that Holland physically abused you?

A. If I did, it was a lie.

Q. Well, do you recall whether you told him that, whether or not it was a lie?

A. No, I don't recall telling him that.

Q. If he were to testify that you did tell him that, would you have any basis to contradict it?

A. I couldn't hear you. What was that?

Q. I said: If he were to testify that you told him that you were being physically abused, would you have any

basis to indicate that he was lying under oath?

A. That Norm Anderson was lying?

Q. That's right.

A. Well, he'd have to show better proof than just his statement.

Q. Well, that's up to the court to decide. The question to you is: Do you have any basis, in fact, to deny the truth of his allegation, which is that you told him that Bernie Holland physically abused you?

A. Could you hold on for a second? Hold on for just a second.

MR. COOK: At this time, I'll interject an objection to the form of the question. You're calling for a hypothetical situation that doesn't really exist, and I think the witness has provided one answer to your question already.

MR. BOTELHO: I think -- pardon me, can we hold on for a moment.

A. Now, could you -- go ahead and repeat that again. What was that?

Q. Yeah. If Mr. Anderson were to testify that you told

him on July 14, 1982, that Bernie Holland physically abused you, would you deny that you told him that?

A. Of course.

Q. Why?

A. Because Bernie's never physically abused me.

Q. So that Norm Anderson would be lying, is that your testimony under oath right now? If he were to testify that you told him that Bernie Holland had hit you?

A. I guess he'd be lying. Well, he's probably going on what I said, and at the time, if I did say it, I lied to him.

Q. That's my question to you: Did you ever tell him -- I don't care whether it's the truth or not, that is, the truth of the statement itself - did you ever tell him that Bernie Holland physically abused you?

A. I do not recall doing that -- saying that.

Q. If he testified that you did, would you have a basis to contradict him?

MR. COOK: Asked and answered.

A. Well, if he -- if he ...

Q. Go ahead and answer the question.

A. If he says it -- if he went to court and said that, then it'd be up to him; but if I did say it, I lied, and if I didn't, you know, then he's lying.

Q. Do you recall ever telling Norm Anderson that Holland hit you in the arm with a stick on several occasions?

A. No, I don't.

Q. Do you recall you ever telling him about an incident involving your pushing Holland into a table after Holland struck you?

A. I don't remember.

Q. Could you have told him?

A. Could I have?

MR. COOK: Calls for speculation on the part of the witness.

Q. Go ahead and answer the question.

A. I don't really have no answer for that.

Q. Could you have told him?

A. Well, I guess it's possible I could have said anything. Any time I was -- at the time, I was considered by a shrink that I was some kind of a - I don't know what they call it, neurotic or something, liar. I was constantly lying about quite a bit of things.

Q. Do you still do that today?

A. Not really. See, any of these statements that I'm being asked right now, I'm not lying.

Q. Are you under any treatment right now?

A. No, I'm not.

Q. Are you on any drugs right now?

A. No, I'm not.

Q. Have you used any drugs in the last week?

A. I haven't used any drugs in about five weeks.

Q. Do you recall ever telling Norm Anderson that Holland called you a shitbag?

A. No, I don't recall ever saying that.

Q. Might you have said that?

MR. COOK: Objection. Calls for speculation.

Q. (Indisc.) answer.

A. As I said before, I could have said anything. I don't recall saying anything like that, at all. And right now -- and I'll tell you right now that Bernie has never said that to me.

Q. Do you recall meeting with Margaret Pugh at the Johnson Human Services Center on or about July 14, 1982?

A. Do I recall it?

Q. Yeah.

A. I'm not sure of the date, but I remember talking to her (indisc. - simultaneous speech).

Q. Do you remember telling her that Bernie popped you on the arm real hard?

A. Like I said, if I said that, it was a lie.

Q. So anything I would ask you right now about statements you made to other people, you would indicate was a lie?

A. Depending on the statement.

Q. Well, let's go through it, then. Do you recall telling Margaret Pugh that Bernie knocked you around some?

A. That's a lie, if I said it to her.

Q. Do you recall telling Candace Camfield (ph), that is, Candy Camfield, that Bernie hit other people in the foster home, too?

A. Like I said, at the time -- if you're talking about the people out at the Johnson Human Services Center, at the time, when I was in jail, when I was talking to them, and it's the same thing as asking me about what I said to Danneker. I was mad at the time, so anything that I said, in -- accusation-wise to Bernie - against Bernie - was all lies, because I was mad at him at the time.

Q. How long you mad?

A. For the length of time I was in jail.

Q. How long was that?

A. I don't recall.

Q. Say, approximately. Was it one day, two days?

A. I don't remember.

Q. Could it have been a month?

A. It could have been longer. I can't remember.

Q. What do you remember?

A. Just the things that I've said already. I don't remember dates of anything that happened. I don't remember any lengths of time that I was in jail, because, you know, I don't really ...

Q. Where were you when you gave Bob Danneker your written statement about being hit around?

A. I can't hear you that well.

Q. Where were you when you gave Bob Danneker your written statement?

A. I was in his office.

Q. Were you transported there from the Johnson Human Services Center, do you remember?

A. The Johnson Human Services Center? Is that what you said?

Q. Yes.

A. Yeah, that's -- I was transported from there.

Q. Okay. So you were still in custody, then?

A. Yes, I was.

Q. Okay.

A. Oh, hey, I remember when it happened. I was going to court -- it wasn't a court, I think it was a hearing or something like that. And then right after the hearing, Norm Anderson brought me down to his office to talk to him.

Q. Okay. Do you recall being interviewed by Bob Danneker and Carolyn Kubenin (ph)?

A. Yes, I do.

Q. Do you recall answering the following questions: ...

A. What's that?

Q. Do you recall any of the following questions - you were asked: Where did Bernie keep the stick? And you answered: On top of the couch. Do you remember making that statement?

A. Yes, I do.

Q. Did Bernie have a stick?

A. Yes, he did.

Q. Did Bernie ever use it?

A. No, he didn't.

Q. How did you know it a stick?

A. How did I know it was a stick?

Q. What's he use it for?

A. Well, it looked like a stick.

Q. What's he use it for?

A. Like, when -- when his son, Jason, starts yelling and pulling hair on people and stuff like that, he'll slam it against the couch to make a loud noise; and, you know, he'll say, stop that.

Q. Did he ever hit you in the hand with a stick?

A. No, he never has.

Q. Did he ever hit you with his own hand?

A. No.

Q. Do you recall making this statement: Question - did Bobby Hughes (ph) ever get hit with a stick? And your response is, yes. How much? Quite a bit. Why would Bobby get hit? Sometimes for joking. More than once? Yes. Twice? Yes. Three times? Yes, maybe five times. Where? The back of the legs. Did anyone else get hit that bad? Yeah, me. What did Bobby do? Tried to get out of the way. When did this happen? Sitting at meetings. You'd say something, and out of the blue, wham. I always got hit on my fingers. Do you recall making those statements?

A. I recall making the statements, but they're -- they're also lies, and I'd also like to say that I don't see how it'd be possible to get hit in the back of the legs sitting at that bench, when Bernie's sitting on one side of it, and me and Bobby were sitting on the other side. I don't see how he could possibly reach around it, completely all the way around that whole table, all the way around behind it, and slap us in the back of the legs; it's impossible, so, there's my proof it's a lie.

Q. Now, I would presume that anybody else -- you would

take the position -- that confirms your testimony here, would also be lying. Is that right?

A. Say that again?

Q. Anybody else who would testify to the same thing that you've indicated here would also be lying, is that right?

A. Anybody else that says that that was true?

Q. Yes.

A. Yes, they'd be lying.

Q. Now, you indicated that none of the trials convened after nine o'clock in the evening, is that right?

A. I couldn't hear you.

Q. None of the trials convened after nine o'clock in the evening?

A. No, they were not. I'm not sure exactly of the time. I can't say exactly nine o'clock, but they weren't as late as Mr. Cook was saying.

Q. Was there ever a trial that was held late-night?

A. Not that I recall.

Q. Well, you don't seem to recall a lot. Is it possible that one could have been held late at night?

A. Yes, but I doubt it.

Q. How often did these trials happen?

A. Whenever somebody had broken house rules.

Q. Well, would it happen once a month?

A. I couldn't really tell you, depending on the kids in the house. If they got in trouble, you know, at a certain time or something like that, then, you know, I mean, I can't really tell you how often everybody got in trouble.

Q. Well, could you tell me whether the meetings happened once every two months, on an average?

A. I don't know, they could have -- sometimes they'd get three in one day, sometimes we wouldn't get any for a couple of months.

Q. Okay. Well, why don't you describe one of these trials for me.

A. Describe one?

Q. Just describe one, yeah. How did they (indisc. -- simultaneous speech).

A. Okay.

Q. How did you hear about them?

A. Does it have to be a real one, or ...?

Q. Sure.

A. Okay, let's see. One time I didn't -- most of them -- most of them were on staying out late and stuff like that, and I was on trial for staying out late one night, and ...

Q. Who would bring the charge?

A. Bernie.

Q. And would this be written?

A. What's that?

Q. Would it be a written charge?

A. No, it'd be verbal.

Q. And would it be done at the dinner table, or where?

A. Yes. With everybody present.

Q. Okay. And would it be right after supper, is that what you were saying?

A. No, not necessarily. Most of the time, though.

Q. (Pause) Are you still there?

A. Yeah.

Q. Well, okay. Everybody would be told to show up for the trial. How did that work?

A. He'd just say -- tell the kids downstairs or wherever they were at that there was going to be a meeting, a trial.

Q. Okay. And then what happened?

A. Then we'd all sit at the table, and then Bernie would say, what happened? You know, say, Dan stayed out late and he broke the house curfew; and so, he'd give -- he'd say, let everybody ask me questions why and everything. And then after that, then, we'd all take a piece of paper and just, you know, find out whether I was guilty or not guilty. And if I was -- you know, if

I was guilty, then everybody just took a piece of paper and wrote down the punishment they think I should have had, and then gave them to Bernie and Bernie figured them all out, you know. Like, if one person said four days' restriction, another person said two, and another person said four, you know, he'd vary it out, you know.

Q. Would you get to write your own?

A. What's that?

Q. Would you participate, too? That is, could you write down on a slip of paper whether you were guilty or not?

A. No, because I was the person that was being charged.

Q. Okay. Did he always read off the verdict?

A. Oh, yeah. He'd tell everybody, you know.

Q. What if somebody said you were innocent?

A. Then we'd all sit around and argue the point.

Q. Okay. And would he read off the punishment, as well?

A. You asked if he read off the punishment?

Q. Yes. Say, you write down on a slip of paper that Joe Blow should be restricted for a week.

A. No, he didn't read out what the kids wrote to me. Like, say, Mickey wrote "three weeks" on there, right? He wouldn't take that piece of paper and actually say, oh, Mickey, you know, said three weeks. He wouldn't do that. He'd -- all of them would be kept, you know, to

where nobody else knew what was being read. No one else would be -- know what was being written down by each person, and so there was -- there'd be no way of, you know -- that way, I couldn't say, you know, hey, I can't believe you said that about me, or, you know, so on and so on. You know, that way there'd be no arguments, so nobody actually knew what was going on.

Q. What if anybody wised off (indisc.)?

A. What's that?

Q. What if somebody wised off at the meetings?

A. At Bernie?

Q. Yeah.

A. Most people in the house had more respect than just to wise off to him. Most of the time it was just joking, and Bernie would say, oh, you're pretty funny, or something. You know, he'd retract with something, you know, but it wouldn't be as bad as what Mr. Cook was saying.

MR. COOK: Excuse me, could I interrupt here briefly, please, Bruce? We need to change tapes.

MR. BOTELHO: Fine.

(OFF RECORD)

(ON RECORD)

MR. COOK: Okay, we're back on tape, here, now.

MR. HARRISON: Did you hear me?

MR. COOK: Negative. Say again, please.

MR. HARRISON: I was just wondering if Bernie was present for this?

MR. COOK: Yes, he is, Danny; he's sitting in the room with me at this time.

MR. HARRISON: Okay, I was just checking.

MR. BOTELHO: Was there a reason you wanted to know that?

MR. HARRISON: No, I was just curious.

CROSS EXAMINATION BY MR. BOTELHO (continued):

Q. Mr. Harrison, can you recall how long Gil Lucero was in the home?

A. I don't really remember at the time. He ...

Q. Was it a week?

A. As far as I recall, it was just a couple days, I think.

Q. Did he ever participate in any trial?

A. No, he didn't. He (indisc.--simultaneous speech).

Q. If he testifies that he did, would that be a lie?

A. What's that?

Q. If he testifies that he did, would that be a lie?

A. No, not necessarily, because maybe I wasn't there for one of the trials, or maybe I wasn't even there at all - at the house - because at the time I left, if I remember right, he was still there, I guess, at the time that I was sent somewhere, I don't remember where, though. So he might have been at one of those trials, but I probably wasn't there. But I don't recall him being -- I remember him sitting in one of the meetings -- or sitting in, I mean, just to listen, to hear how it goes and everything, but, other than that, he's never really participated.

Q. Do you recall Gil Lucero ever telling you that you shouldn't have to take all the abuse you get?

A. What's that?

Q. Do you recall Gil Lucero ever telling you that you shouldn't have to take all the abuse you take?

A. I don't remember him saying that.

Q. Would he have said that to you?

A. I don't remember him saying that.

Q. If he did?

A. If he did, then what?

Q. Is it possible that he could have told you and you just don't remember?

A. I guess so. I mean, I guess it's possible that he could have.

Q. You indicated that you knew that Bernie had firearms. How did you know that?

A. Well, I kind of assumed, because Bernie had a store that was right next to his house that -- in which he had firearms in there and coins which were for sale, and when he closed it, I -- you know, as far as I remember, that he hadn't sold all his weapons. So I'm sure that he didn't, you know, throw them away or anything like that. So, I assumed. I never actually seen any of the weapons inside the house at all.

Q. When was the last time you talked to Bernie?

A. Let's see, quite awhile ago, actually, other than Friday, but I really didn't talk to him because I was, you know, being talked to about the meeting here. But other -- I didn't really get to talk to him at all. I haven't talked to him in quite a while.

Q. When was the last time, besides Friday - about?

A. God, I don't remember; it was quite awhile ago, though.

Q. Would it have been two weeks ago?

A. I think it was longer than that.

Q. Maybe a month ago?

A. Yeah, maybe.

Q. How about Mr. Cook - when was the last time you spoke with him?

A. On Friday.

Q. And before that?

A. That was the first time I ever talked to him, I think.

Q. And what did you talk about?

A. What?

Q. What did you talk about?

A. Just that I was going to be recorded over the phone and that I'd have to swear to an oath, and that just to make sure that I call at one o'clock today.

Q. Have you talked with Bernie or with Mr. Cook about any of the allegations ...

A. No, we did not.

Q. ... we've discussed today?

A. It was mostly just about, you know, that the phone was going to be recorded and that I'd have to be called down from Anchorage and all these other places, and that I was going to be questioned about, you know, the accusations that I had made. But we never talked in any kind of detail at all.

Q. This is Friday you're talking about?

A. Um-hum.

Q. Okay, before Friday, did you discuss this case with Bernie Holland?

A. No, not really, 'cause I really don't understand what's going on all that well. I just know that, for some reason, everybody thinks that those accusations I made were true when they weren't.

Q. According to Bob Danneker, you said that Bob Danneker suggested that Bernie was involved in sexual misconduct. I want you to describe in detail why you say that Danneker suggested sexual misconduct.

A. You have to speak up, 'cause it's real hard to hear you.

Q. I'll repeat the question: You testified earlier that Bob Danneker suggested to you that Bernie Holland had acted improperly sexually with Mickey. What I'd like you to do is describe how he suggested the topic.

A. Oh. Well, like -- okay, I was sitting there telling Bob Danneker about, you know, all the stuff I was making up, like: Oh, Bernie hits me; oh, Bernie does this; and, oh, Bernie does that. Right? And during the time that I was making those accusations, you know, like, you know, saying, oh, you know, he hits Mickey,

he hits me, he hits Bobby, he hits everybody; that's -- you know, at the time that I was saying that? Well, see, at the time when I was doing that, he was saying: Well, does he ever, you know, grab Mickey? And I say: Yeah, he grabs Mickey like this. And he says: Well, do you think that he's trying to grab her for, you know, a cheap feel? And I say, yeah. But, see, when he said it -- see, he was just saying those things, and as soon as he'd say 'em, then I'd go, you know -- like, he'd say: Well, did he grab her? And I'd say: Yeah. You know. And then he'd say, you know: Well, do you think he was trying to get a cheap feel? And I'd go: Yeah, yeah, yeah. To anything he said. So he was basically -- see, otherwise, I wouldn't even have said that.

Q. Okay. Are you calling from your family home right now?

A. Yeah, I am.

Q. This is the one you don't know the address to?

A. Right.

Q. Okay.

MR. BOTELHO: I'm going to go off here for second. I may be about done with my questioning, Greg. But it's going to sound like I'm

cutting off for a moment. I want to go through my notes.

MR. COOK: Okay, then, I'm going to go off the record, here, briefly, and just tell me, please, when you're ready to go on. We'll all be standing by, waiting for you to come back on line, there, Bruce.

(OFF RECORD)

MR. COOK: We're back on the record, now, Bruce. Are you ready to go ahead?

MR. BOTELHO: I have no further questions.

MR. COOK: Okay, Danny, I just have a few cleanup questions, here, then.

REDIRECT EXAMINATION BY MR. COOK:

Q. When Bruce Botelho was asking you questions a few moments ago, he asked questions regarding your present testimony, which is under oath, and some statements you made earlier to Mr. Danneker and to Mr. Anderson. I'd

like to direct these questions to that subject. When you gave a statement to Mr. Danneker, were you under oath?

A. I don't remember.

Q. When you gave a statement to Mr. Anderson, do you know if you were under oath at that time?

A. Nah, he's never put me under oath.

Q. So your answer is, no, you were not under oath to Mr. Anderson?

A. No, I wasn't.

Q. Do you recall whether or not, when you were talking to Mr. Danneker, whether you raised your right hand and swore to tell the truth, the whole truth, and nothing but the truth, so help you God; do you recall doing that with Mr. Danneker?

A. I might have, but I don't remember doing it.

Q. Do you know whether or not Mr. Danneker is authorized by law to give oaths?

A. Not -- I don't know.

Q. Okay, thank you. Danny, I'd like to ask you, again, whether or not you're telling me the truth here today?

A. Everything I've said is the truth so far.

Q. And why are you making this call, Danny?

A. Just because -- because of the fact that I lied and I've brought a lot of bad things to happen onto Bernie,

which I'm really super sorry for, but I have, you know -- I can't do anything about it now, except for, you know, tell them that I've, you know -- I'm trying to tell the truth now. Because, you know, I started a pretty bad thing here, but ain't much I can do now, you know.

Q. Thank you, Danny. And could you describe, again, the reason that you made false statements to Danneker when you were in jail.

A. It was because I was mad at Bernie, because I had I thought Bernie had put me in jail when Bernie hadn't put me in jail; I'd put myself in jail. But I was under the impression that Bernie put me in jail, so I was trying to get back at him.

Q. I see. A couple other odd questions yet, Danny. Referring to the matter of the trials back at the house, did anybody ever get good-time off; for example, after a restriction, did they have some of their penalty lifted for good behavior?

A. Yeah.

Q. Thank you, Danny. Regarding Gil Lucero, did you know Gil very well?

A. Not really, kind of. Just, you know, I knew him, you know, as a friend of Bernie's.

Q. When you saw him at the house and around in Juneau, did you ever have the opportunity to observe Mr. Lucero when he was drinking alcohol?

A. No, I never did.

Q. Do you have any personal knowledge as to whether Mr. Lucero abused alcohol?

A. I know that he used to, but at the time, I was under the impression that he didn't drink or anything at the time.

Q. Do you have any knowledge of why Mr. Lucero was staying at the Holland's home?

A. I think it was because him and his wife were having problems and he was under quite a bit of pressure.

Q. I see. Do you know whether or not Mr. Lucero was paying room and board while he was there?

A. I have no idea.

Q. I see. And could you tell me once again, please, Danny, whether or not everything you have said today is the truth?

A. Everything I've said is the truth.

MR. COOK: I thank you very much, Dan. I appreciate you ...

MR. BOTELHO: I have a follow-up question based on some of

your redirect. Are you still there?

MR. COOK: Roger that. You're still on. Go ahead on her, Bruce.

RECROSS EXAMINATION BY MR. BOTELHO:

Q. Danny, is it possible that you might have lied under oath to Bob Danneker?

A. Say that again?

Q. Is is possible that you might have lied under oath to Bob Danneker?

A. You mean, when I was talking to him?

Q. Yes.

A. Yeah, like I said before, I've told you through this whole phone call that all I was doing was lying to him.

MR. BOTELHO: I have no further questions.

MR. COOK: Okay, then, Danny, that really concludes our little exercise here today. Thank you very much for calling in and we'll look forward to hearing from you again sometime when you get

the opportunity to call me or to call Bernie. Thank you very much. Bruce, is it correct that you have no further questions?

MR. BOTELHO: I just think it's important that, if you could perhaps request, Greg, that Mr. Harrison check in on a daily basis after the commencement of your case next week, your portion of the case. There may be occasion to have him examined directly by the hearing officer.

MR. COOK: That sounds fair, Bruce. I'm just a little curious as far as the actual mechanism that we'll use to make contact if I'm up at Rich Burnham's office. So, Danny, if you'd be kind enough, could you please call in to this office sometime Thursday morning this week and I'll try

and work out a telephone schedule for you. Is that possible?

MR. HARRISON: Yeah, no problem. Greg, before you all hang up and everything, I need to speak at you, just between me and you, if it's possible.

MR. BOTELHO: I will cut off the line right now.

MR. COOK: Okay, thank you very much, Bruce.

(END OF PROCEEDINGS)

(Signature waived)
DANNY JOE HARRISON

C E R T I F I C A T E

STATE OF ALASKA)
: SS.
FIRST JUDICIAL DISTRICT)

I, JUDITH R. JONES, a Notary Public duly commissioned and qualified in and for the State of Alaska, do hereby certify that the foregoing transcript of the telephone deposition of DANNY JOE HARRISON was recorded by a person or persons unknown to me and thereafter transcribed by me or someone under my direction.

I further certify that the transcript consisting of pages 1-59, both inclusive, is a full, true, and correct transcript of the proceedings, considering the quality of the tape and the information furnished to me.

I further certify that I am not a relative or employee of any of the attorneys or of any of the parties, nor financially interested in the action.

I further certify that the original of this transcript was given to Richard Burnham, hearing officer, pursuant to their instructions.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my notarial seal this 6th day of May 1983.

DIVISION OF
FAMILY &
YOUTH
SERVICES

MEMORANDUM State of Alaska

TO: Robert London Smith, Ph.D., Commissioner
Department of Health & Social Services

DATE: March 19, 1984

THRU: John R. Pugh 3/19/84
Deputy Commissioner

FILE NO:

TELEPHONE NO: 3170

FROM: Michael L. Price, Director
Division of Family & Youth Services

SUBJECT: Foster Care Activity Report

The February Activity report for the special subject foster care is in three sections: Statewide Progress, Social Services Regional Activity and Youth Services Regional Activity.

STATEWIDE PROGRESS

Governor Sheffield signed an Executive Proclamation in February proclaiming March 19-24, 1984 as Alaska Foster Care Week. (See Attachment I.)

February marked another month for significant progress in foster care. The officers of the Alaska Foster Parents Association traveled to Juneau to meet with legislators, the Central Office Task Force on Foster Care, Regional Managers and Administrators, and myself. The officers are: Louiese Rodoni, President; Barbara Nutt, Vice President; Dee Cromer, Secretary; Miriam Sumner, Treasurer; and Jeannie Cortez, Anchor Foster Parent Association President. In my view their trip was highly successful. They stated that a major goal was to initiate a new beginning with the Division: one of cooperation and increased quality communication. They were organized and professional, so that substantial progress was made. In turn, they were pleased with the progress of the Division in identifying 43 foster care issues to be resolved and with the Division's comprehensive long range approach to resolving these issues. There was agreement that fragmented corrective policies issued with short time lines have been a problem in the past. The Association representatives committed themselves to assisting on policy projects with draft work. They recognized that many foster care issues need to be coordinated through regulatory projects and asked to be kept informed of progress and to assist where appropriate. I was personally impressed with the professionalism they demonstrated.

On the morning of February 27, 1984 I met with the AFPA representatives with the following agenda:

Travel monies for foster parents attending Regional and Statewide Training Conferences.
Question - Contract Support Services (RFPs) for Nome and Bethel.
Meetings established for AFPA and the Regional Managers.
Quarterly meetings for AFPA and Mike Price.
Question-Intentions for AFPA Contract for FY 84/85.
Request for Direct Support Services for Foster Homes.

Discussion of Utah proposal.
Mandated Training.
Leveled Foster Care.
List of issues for resolution to be discussed with the Central Office Task Force.

Time limits prevented discussion of all items, but many items were covered at meetings in the next two days.

On the afternoon of February 27, 1984 the AFPA representatives met in House HESS with House and Senate finance sub-committee representatives to hear a budget proposal from the AFPA. The proposal was professionally presented and initially well received. I offered to have Division staff analyze the proposal and report back to the committee. See Attachment 2 for the proposal and a copy of your letter to Representative Mae Tischer transmitting the Divisions's findings upon reviewing the proposal.

On February 27, 1984 the AFPA representatives met with Nina Keeler and Pat O'Brien for four hours with the following agenda:

Confidentiality Draft
Placement Agreement Form
Evaluations
Reimbursement Problems
1. stipend
2. special needs procedure
3. funds for damages procedure
Emergency Placement Stipend
Clothing Allowances
Medical Authorization Cards
Criminal Records Clearance
Biennial Licensing
Provisional Licensing
Mandated Training - Regulation Changes
Question-Foster Care Rate Hearings
Question-DFYS Indian Child Welfare Act Interpretation
1983/84 Contract Payments
New Contract
Final Implementation of Foster Home Investigations
Final Implementation of Appeals Procedure
Detail Regional Managers' Meetings
Regular Meetings scheduled with Nina
Medicaid

All agenda items were addressed with information sharing and cooperative planning. The foster care issue outline was presented to the AFPA representatives at this meeting.

On February 29, 1984 the AFPA representatives attended the Regional Administrators'/Regional Managers' Meeting. The AFPA representatives presented an overview of the National, Regional, State, and Local organization of the Foster Parent Associations. Plans were made to secure travel funds for foster parents to attend upcoming conferences throughout the State. The AFPA representatives also presented their perception of regionally based differences in the following areas: emergency placement/payment, clothing allowances, special needs, and provisional and expired licenses.

Significant issue progress was achieved in February as a result of the above meetings and Division effort. Following are some examples:

Travel funds were identified and a mechanism was established to fund foster parents' travel for training at the statewide and local conferences.

The special Augmented Foster Care pilot project in Anchorage, which is being administered by the Youth Services Section, is proving successful. A plan was made to expedite payment. Approval of an augmentation must receive the approval of the Regional Administrator and the Youth Services Field Administrator. Upon receipt in Central Office, the augmentation is set up on the computer payment system to ensure timely payment upon receipt of the invoice from the foster parents. A change in the program was made the first of March which will allow the foster parents to continue receiving the initial augmentation rate after the first six months, even when the youth may have improved to the next level. It was felt that reducing the rate when the level of needed care improved was a disincentive in the program.

Research was completed by Pat O'Brien on criminal records searches. Research findings were forwarded to Regional Managers and Administrators along with a questionnaire to elicit regional response. A consistent statewide policy will be formulated based on the review of the responses. The AFPA was also asked to respond to the questionnaire. The licensing record clearance request was revised with the Departments of Law and Public Safety approval. The revised form allows arrest record reviews and is clearly marked "Confidential". The handwritten "Hit" will no longer be placed on any clearance request forms.

A computer work request was submitted asking that provisional licenses and biennial licenses be added to the computer summary report of expired licenses, currently being prepared by Jeannette Sanders and Margaret Levitt of Central Office.

Regional Managers and Administrators agreed on an emergency placement/payment policy to be placed in the staff manual and the Foster Parent Handbook.

AFPA representatives agreed to draft a form to be used for foster care special needs requests.

AFPA and Division representatives agreed that a placement agreement was properly a subject for regulations. The AFPA developed form will be a primary resource.

The Division assumed responsibility for conducting the annual foster care rate hearings required by AS 47.05. Hearings were set up for the week of March 19-23, 1984. In addition to notices being placed in major newspapers, individual letters of notice were sent to all foster parents, since one of the AFPA concerns about previous rate hearings was that inadequate notice had been given.

Issue identification and planning drafting is continuing. Draft issue papers will be circulated to managers, administrators, and the AFPA prior to finalization. New issues were identified in the recent meetings.

SOCIAL SERVICE REGIONAL ACTIVITY

Special foster care activities were reported from the following social service regions.

SOUTHCENTRAL REGIONAL OFFICE

The Anchorage foster care staff was actively involved in recruitment efforts during the Fur Rendezvous this month. The Anchor Foster Care Association and the Alaska Foster Parent Association jointly sponsored a booth at the Trade Fair between February 10th and 19th. The booth was staffed continuously during this time by a total of 36 foster parents, 18 DFYS workers and four Parent Training Center Foster Care component staff. In addition to raising $995 for the two associations by selling made-to-order buttons, the Trade Fair generated 30 prospective foster families for the Division. These applicants are scheduled to attend the March 13th Foster Parent Orientation meeting. Hundreds of other Southcentral residents visiting the Trade Fair took the brochures and talked informally with the people staffing the booth about the foster home program.

A foster parenting float was entered in the Fur Rendezvous parade February 18th. Four foster families and one Division staff person's family rode on the float, which won a fourth place prize in the noncommercial category. The float had the DFYS telephone number on it and many of the recent inquiries about foster care have mentioned our participation in the parade.

February was a full month for the Parent Training Center Foster Care Component. The two foster parent support groups met four times each during thi month. Workshops offered during February were: "Preparing a Child to Leave for Adoption", "Foster Parents as Advocates", "Teaching Independent Living Skills for Teens", "Don't Condemn Me Until You Know Me-Natural Parents", "Learning Disabilities in Children", "Ages & Stages-Child Development", "Burning Out in Foster Care" and "C.P.R. for Foster Parents".

The Division published two newspaper advertisements this month in the "Help Wanted" section to recruit homes for several difficult-to-place adolescents. Of the three serious responses to this, one family has chosen not to participate in the program and one family is currently receiving an emergency provisional license for one of the teens targeted for this special recruitment. Half-page ads were also placed once in the TV Guides in the two Anchorage newspapers to recruit for foster homes.

A day-time preservice preparation and evaluation group ended February 14th, graduating three families. This class was designed to accommodate applicants with evening work hours and North slope work schedules.

Another preservice began February 22nd with eleven new foster families participating in this series of classes.

Field staff conducted individual orientations with two staff members making special presentations as a part of their participation in other community programs. On February 1st, Flora Tutiakoff, Unalaska social worker, spoke regarding the need for foster homes during the Chemical People Task Force meeting. Barbara Smith, Social Service Associate of McGrath, participated in a Domestic Violence workshop on February 7th and 8th in Nikolai and on February 15th, she made a presentation before a meeting of Health Aides from McGrath and nearby villages. In both programs, she provided information about licensing and the need for additional foster homes in the area. Barbara also shared information about one of our foster children who has been in care approximately four years and now is a senior. This young man was inducted into the National Honor Society on February 14th and also won first place in the local ski meet. His successes reflect to a large degree quality of care and support he received from his foster parents.

One of the main goals for the Mat-Su area this winter was to offer and complete the foster parenting NOVA University Program as it was originally presented and suggested by the NOVA University Trainer. The program has been implemented, but they are still in the process of "fine tuning" it to meet the needs of that particular community.

Mat-Su foster parents and staff are in the planning stages and getting ready to start action on the Foster Care Booth at the State Fair in Palmer which begins in mid-August. They anticipate involvement from the Alaska Foster Parents Association and from other local groups.

NORTHERN REGIONAL OFFICE

A lot of energy was spent during February working with the new Foster Parent Association board members. Committees were formed and objectives solidified. The two most active were the conference and membership committees. The conference committee met weekly and the dates, location, theme and program design were decided and registration materials were developed. The membership committee started its membership drive March 1, 1984. There are plans for a mass mailing, radio and newspaper releases, posters, television and community appearances. Tied into the Association's membership drive will be an effort to recruit new foster homes with special emphasis on teenage and Native foster homes.

Both Social Services and Youth Services began to organize a delegation to attend the State conference in Anchorage. So far thirty foster parents from the Northern region have indicated an interest in attending.

The support contractor had two people complete its February training and had about twelve foster parents signed up to take the eight week intensive training starting in March. The contractor is beginning to provide more individualized in-home services centering around initial placements and specific placement problems.

February's Foster Parent Association meeting was attended by about thirty foster parents and foster teens. Steve Emmerson from the Fairbanks Native Association's Alcohol Program led a very lively discussion on just about everything you wanted to know about drugs and alcohol.

The Association is working with the Division and the Foster Grandparent Program to set up a pilot Foster Grandparent Program involving the grandparent with foster families as the new team member. The local Foster Grandparent Program will be doing a presentation at the March Foster Parent meeting.

Meetings with the respite care worker and the long term care worker from Fairbanks Rehabilitation Association were held this month. Training in regulations, forms and procedures was given in an effort to keep licenses current for homes caring for handicapped children and adults.

Fairbanks foster parents, Richmond and Shirley Lewis, were awarded "Roses in the Snow" by a local radio station for their work with handicapped foster children. The couple was nominated by a teacher to receive this honor for their "...willingness to help others in such a loving manner after raising their own children."

SOUTHEAST REGIONAL OFFICE

The first regional foster care conference in Alaska was held in February in Ketchikan. Regional Manager, Kathy Tibbles, stated that it was highly successful. Some foster parents from Wrangell and Petersburg were able to attend. Credit for the success should go to Grace Kinney, President of the Ketchikan Foster Parents Association; Close Encounters, the foster parents support contractor; Jackie O'Sullivan, Ketchikan foster parent; and other active foster parents in the Ketchikan area.

YOUTH SERVICES REGIONAL ACTIVITY

Special foster care activities were reported from the following youth service regions.

SOUTHCENTRAL REGIONAL OFFICE

Jack Hansen traveled to Kenai, Soldotna, Homer, and Seward to license and to provide training utilizing video tapes of Dr. Jane Krauss. Betsy Gerace went to Kodiak for an orientation for new foster parents. Three applications were given to Native couples. She also traveled to the Mat-Su Valley for licensing and support services.

Preparations are being made for upcoming Basic Foster Parent Training to be held in April and Augmented Rates' training to be held in May. The curriculum has been set for monthly foster care meetings and other training to be given by Sandy Jackson of Community Mental Health.

A newspaper article was published in the Kodiak Daily Mirror (see Attachment 3) regarding the need for foster homes. An award was given for "Big Shot" by the Advertising Federation of Alaska. (See Attachment 4.) Attachment 5 is the revised policy for the Augmented Foster Care Special Program.

In February there were eleven pending foster care applications, eight licensing studies in process, and 33 licensed homes available for Southcentral Youth Services. Eight homes were on hold. Thirty-two youth services children were in foster care placement.

NORTHERN REGIONAL OFFICE

During the month of February, 1984, the Northern Youth Services Office served twenty-nine children in foster homes.

SOUTHEASTERN REGIONAL OFFICE

The month of February included licensing trips to Sitka and Haines, as well as conducting numerous home studies in the Juneau area. One initial study was successfully completed in Haines and resulted in another resource for their community. The majority of the homes visited were satisfied with their relationship to the Division and comfortable in their role as foster parents. Overall things are moving well for this region as the licensing focus continues on renewing expired licenses.

In February there were thirty-seven foster homes available, one pending foster home application, and five children in foster care placement.

STATE OF ALASKA

Executive Proclamation

by

Bill Sheffield, Governor

In the State of Alaska, there are currently 1,038 children under foster care, and both public and private social agencies and dedicated foster families provide these children with a temporary or permanent home environment that will help them become responsible citizens.

The goal of the foster care program is to improve home conditions so that the child may be returned to his family or, if this is not possible, to make suitable permanent plans for the child.

The Alaska Foster Parent Association has undertaken the need to create greater public awareness of the needs of children in foster care and the role and responsibility of the foster families that serve them. The Alaska Foster Parent Association also is sponsoring an educational conference open to the public, agency personnel, and foster parents on March 22 - 24, 1984.

NOW, THEREFORE, I, Bill Sheffield, Governor of the State of Alaska, do hereby proclaim March 19 - 24, 1984, as

ALASKA FOSTER CARE WEEK

in Alaska, and urge all citizens of Alaska to give special attention to the needs of children in foster care and to recognize the important role of foster families in the delivery of service to our children in care.

Dated: February 6, 1984

Done by—

Bill Sheffield

Bill Sheffield, Governor who has also authorized the seal of the State of Alaska to be affixed to this proclamation.

ATTACHMENT 2

March 9, 1984

DOCUMENT NO. 84-79

The Honorable Mae Tischer
Representative
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

This is in follow up to the hearing on March 2, 1984, regarding foster care. Michael Price, Director of the Division of Family and Youth Services and his staff felt that the foster parents made an excellent presentation. We are pleased that we have improved our working relationship with them, and appreciate the efforts they have made to present their views. The Association members have also recognized that the Division of Family and Youth Services is committed to improving services to foster parents to ensure that children receive better care. Mr. Price had an opportunity to review the proposal submitted to you by the Alaska Foster Parents Association and is very supportive of the proposal.

The Alaska Foster Parent Association (AFPA) proposed support service contracts in the amount of $295,000. During FY 84 the Division awarded foster care support contracts totalling $294,989. We believe these contracts could be reduced to $95,000 and still provide adequate support services.

The AFPA recommended $100,000 for statewide foster parent orientation. We believe the continuation of Statewide Foster Parent Orientation is a very important part of the service needs in the Foster Program. In FY 84, $12,500 was awarded for this orientation from the 700 line in Foster Care as well as $8,000 utilized for the Southcentral area training and $13,400 from Staff Development monies. If the same level of funding could be earmarked for this training only $15,000 additional funds would be required to meet the $40,000 viewed as needed by the Alaska Foster Parent Association.

There is an additional $50,000 in the FY 84 budget which is being utilized for specialized training for the augmented foster care program. This money will continue to be available for training. Therefore, $98,000 will be available for foster parent orientation.

The Association requested $50,000 for reimbursement for loss or damages to property of foster parents. There is an existing program which allows for reimbursement to foster parents for certain loss and damage to property by children/youth in placement. Because of procedures and qualifications for such claims, expenditures during the first half of FY 84 have totaled only $4,235. The Department is willing to cooperate with the Alaska Foster Parents Association in order to clarify and simplify procedures for reimbursement. Pending this clarification, it is believed that these costs can be absorbed by the present budget.

The Association proposed $369,000 for foster care units. In discussion with them, the Association stated that support from Division staff is more critically needed than from outside contractors. The Association's proposal for foster care support staff is a need recognized by the Department but was not included in the budget submittal due to funding constraints. The staff needed would be 9 additional Social Worker III positions: 4 in Anchorage, 3 in Fairbanks, and 1 each in Juneau and Ketchikan, and clerical support in Anchorage for an estimated cost of $462,100. Of this figure $200,000 could be absorbed from the Governor's budget (i.e., from the foster parent support contracts) leaving a need of $262,100 additional funds.

The Alaska Foster Parents Association is an agency which represents an extension of the foster care services of the State. It is this Department's aim to continue to work in concert with this agency to improve services and public understanding of the Foster Care Program. However, while we are pleased to provide the above information, nothing herein should be interpreted as anything less than the Department's full support for the Governor's budget as submitted.

Sincerely,

Robert London Smith, Ph. D.
Commissioner

February 28, 1984

The Alaska Foster Parent Association is requesting the following be put in the Department of Health and Social Services budget for FY 85.

1. A grant to named recipient of $48.0 to the Alaska Foster Parent Association to provide information, education, statewide networki;ng, direct, and indeirect support services to foster families as outlined in the contract proposal.

2. We are further requesting an intent statement that directs the Division of Family and Youth Services to use $295.0 from the line item in their budget under "Other" for specific Foster Family Support Service Contracts for training, recruitment, respite, or on-going support.

3. We request another intent statement that directs Family and Youth Services to do the following:

a. Use 52.0 for statewide training and mandatory training programs to be administered by the Dept. of Health and Social Services. Funds for transportation of foster parents to training programs held locally and statewide and to provide the cost of babysitters, and other incidental expenses which are incurred to attend these meetings, will be provided by the Department.

b. Establish a fund for reimbursement for loss or damages to the property of foster families as the result of having destructive foster children in the home. $50.0

c. $250.0 to provide 2 social worker aide positions in Ketchikan, Anchorage, and Fairbanks regions, and one clerical support position in each one of those regions. The purpose is to establish Foster Care Units that provide agency support to recruit families, keeping foster families in the program, and other on-going foster family support services.

INTENT: $ 814,000.00

Direct support services to foster families for the purposes of recruitment and retention.

1. $ 295,000.00 — Specific foster family Support Service Contracts, i.e. training, recruitment, respite, or on going suport services.

2. 100,000.00 — Implimentation of Statewide programs for Foster Parent Orientation to foster care. Mandatory training programs and Grants. Transportation for foster parents to training programs - National, State, Local.

3. 50,000.00 — Funds for reimbursement for loss or damages to the property of foster families.

4. 369,000.00 — Foster Care Units, in appropriate areas, providing in agency support, recruitment and retention program development, and on going foster family support services. Staff and clerical staff.

Direct Support Services to Foster Care Families for the purposes of recruitment and retention of foster homes

$ 814,000.00.

Included is a Grant for Alaska Foster Parent Association to provide information, education, statwide networking and direct and indirect support services to foster families.

$ 48,000.00

COST BREAKDOWN

Institutional Care:

Average cost per child per day	$122.00	
Cost of care for one year (365 days) per child	$44,530.00	
Cost for 25 children in institutions for one year at current average		$1,113,250.00

Foster Care:

Average cost per child per day	$ 15.00	
Cost of care for one year (365 days) per child	$ 5,475.00	
Cost for 25 children in ~~institutions~~ Foster care for one year at current average		$ 136,875.00

Total savings of foster care over institutions: (there is currently not enough licensed, trained, and willing foster homes to care for these 25 children)	$ 976,875.00
Proposal Cost: (this would recruit, train and support the needed new foster homes)	$ 814,000.00
Total savings 1st year after implementation of proposal:	$ 162,375.00

SECOND YEAR:

Institutional care: 50 children x 45,643.00 (44,530 x 2.5% cost of care increase)	$2,282,150.00
Foster care: 50 children x 5,662.00 (5,475 x 2.5% cost of care increase)	$ 280,594.00
Total savings 2nd year of implementation	$2,562,744.00
Cost of proposal: 814,000 x 2.5% cost increase	$ 834,350.00
Total savings 2nd year of implementation	$1,728,394.00
Total savings in a two year period	$1,890,769.00

It will be possible to double the number of children in foster care because there will be support and recruitment to meet that need.

Alaska Foster Parents Association

P. O. BOX 3651 • ANCHORAGE, ALASKA 99508

TO WHOM IT MAY CONCERN:

Alaska Foster Parents Association is a non-profit organization whose objectives are to:

1) promote the health and welfare of foster children
2) provide educational opportunities in the field of foster care
3) be of assistance, as needed, to all foster parents
4) cooperate with public and private welfare agencies in their foster care programs

To meet these objective Alaska Foster Parent Association (AFPA) has developed several goals, such as:

1) Recruitment and and retension of foster homes
2) Regional and Statewide conferences
3) Development of local, chartered organization to meet locally identified needs of foster children and foster parents
4) Quarterly educational and informational newsletter
5) education of the community and agencies as to the realities of foster care and foster parenting
6) Development of programs to enhance foster care as a positive, therapeutic treatment for children unable to live in their biological parents home
7) Recognition for foster families contribution to society, agencies, families, and individual children.

All officers and board members of AFPA serve totally volunteer, with no salary, benefits, reimbursements for personal expenses (such as transportation, childcare, personal equipment usage).

No portion of the budget of AFPA goes toward staff salary, employee benefits, or administration. All expenditures apply to direct services to foster children, foster families, agencies, and the community.

Direct service volunteers of AFPA donate a minimum of 160 hours weekly. plus an additional 40 hours donated weekly by committee and board members.

AFPA is the only statewide organization working to enhance foster care and assist foster parents in their difficult role of parenting a child not their own on a temporary basis.

Budget projection for 1984-85	$57,910.
Income from other sources	$ 9,910.
GRANT REQUEST FOR 1984-85	$48,000.

total needs for the future	$42000. yearly

ALASKA FOSTER PARENT ASSOCIATION officers and board members serve totally volunteer. There are no salaries, benefits, or reimbursements for personal expenses such as transportation, childcare, or use of personal equipment.

Direct service volunteers donate a minimum of 160 hours weekly plus an additional 40 hours donated by committee and board members.

No portion of the Alaska Foster Parent Association budget goes toward staff salary or employee benefits; all expenditures apply to direct services to foster children, foster families, agencies, and the community.

ATTACHMENT 3

Meeting tonight

Area teens need foster homes

By MARLIN STUM
Staff Writer

Do you like teenagers? Do you remember some of the trouble you got into as a teen? Do you have the time and interest to help raise a young person who does not have caring parents or whose parents are living off the island?

Would you welcome a teenager in your home for a couple of weeks, a month, or even a year? Are you able to set limitations? Can you work with the criminal justice system? Are you afraid of the word "delinquent?"

These are some of the questions one might be asked when applying to become a foster parent.

"We need more foster parents in Kodiak," said Dwight Becker, district juvenile probation supervisor. "Right now we have four foster parents here and I'm supervising about 30 kids." Becker said he hears of an additional 15 juveniles in an average month who may be helped by foster parents.

Becker and Betsy Gerace, regional foster care coordinator from Anchorage, will be meeting with Kodiak foster parents tonight at 7 p.m. in the Kodiak Baptist Mission. The meeting will be held in the lounge area upstairs and anyone interested in the program is invited to attend. Showing up at this meeting does not in any way obligate a person, said Becker, but it provides a chance to meet foster parents and program coordinators and find out more about the program.

Briefly summarized, a foster parent provides a teenager with temporary care ranging from a couple weeks to several months. These teens have broken some law and need a firm but understanding guardian. Single parents are considered along with couples. Even fishermen traveling to Bristol Bay can be foster parents, said Becker.

The average age of a Kodiak area teen in need of a foster

Linda L Bockever

PRESIDENT

DEPARTMENT OF HEALTH & SOCIAL SERVICES
DIVISION OF FAMILY & YOUTH SERVICES
SCRO CHAPTER ADDITION (Revised 2/84)

SECTION: Youth Services
POLICY: Augmented Foster Care (Special Program)

46.0 PURPOSE:

Traditional foster care programs, qualifications, and care payment rates have a tendency to create catch-all foster care services provided by general duty foster parents. Some delinquent youths who are placed in group residential facilities could be cared for, supervised and treated in foster homes if their needs and problems are adequately assessed and they are placed with foster parents who possess the necessary skills, training and support to work successfully with more difficult youths or youths requiring special services.

This program establishes a method of performing individual Level of Difficulty assessments for delinquent youths having mental, emotional and behavioral problems who are in need of nonrelative out-of-home placement.

Those youths placed in foster care will be placed in licensed homes where an evaluation of the foster parents has shown their ability to provide care, supervision and treatment commensurate with the assessed needs of the youths. While providing foster care services for youths with special problems, foster parents will be compensated for the expenses of care by augmenting the standard foster care payment as provided by 7AAC50.730(4)(5) Augmented Rates. These sections provide for payment of augmented foster care rates as compensation for reoccurring damages to the household or the belongings of a foster parent caused by an extraordinary destructive child, and for any other related costs which may be incurred in caring for foster children who have special problems. The Level of Difficulty Assessment is used to identify those youths with special problems and to determine the severity of those problems.

PROCEDURE:

Level of Difficulty Assessment - The Level of Difficulty Assessment tool is designed to identify those youths who, because of delinquent offense records, behavioral problems in combination with medical, emotional, or learning problems require the foster home to provide special services, devote large amounts of time and energy, and deal with special risks to persons or property. The assessment tool measures a group of current and past behaviors, as well as emotional, medical, educational and supervision requirement issues. The assessment factors directly relate to the nature, quality, and quantity of placement services required for a youth and the degree to which care of the youth will result in additional costs incurred by the care provider.

Level I and II placements normally placed in residential care facilities are the primary target group of this program.

When a Probation Officer determines that an out-of-home placement is necessary for a delinquent youth, the referring officer completes a Placement Referral (Attachment A). In a staffing with the officer's Supervisor and a Foster Care Coordinator, the youth's behavior and needs are assessed using the Level of Difficulty Assessment form (Attachment B). Instructions for completing the assessment are contained in Attachment C. A Foster Care Coordinator then scores the form in accordance with a scoring key (Attachment D).

Those youths with a level of difficulty assessment score of 0 to 179 are defined as Level I and are not eligible for this program. Those with a score of 180-259 are Level II and those with a score of 260 and above are Level III. Based on field testing, it is anticipated that approximately 75% of youths in placement will fall into Level I, 20% into Level II and 5% into Level III.

If a youth assessed at Level of Difficulty II or III has been referred and accepted for foster care placement in the Augmented Foster Care Program the Probation Officer will prepare a Request for Augmented Rates and complete an Augmented Foster Care Placement Agreement and Plan at the time of placement.

Level of Difficulty Reassessment - All youths in augmented foster care assessed at Level II and III difficulty will be reassessed at six month intervals and Levels of Difficulty adjusted accordingly. Changes to a higher level must be reviewed by the Probation Supervisor and approved by the Regional Manager. All such reviews will take place in a joint staffing between the foster parent and the Probation Officer. The Foster Care Coordinator may be included.

At 90 day intervals, the Probation Officer will conduct a placement progress staffing and assessment review with the foster parents. The Foster Care Coordinator and biological parents may participate in this staffing. The purposes of the progress staffing and assessment review are to assure that the plan of foster care is addressing the services and behavior problems outlined in the Level of Difficulty Assessment, to review the youth's progress in care and to modify the placement plan if required.

Foster Parent Qualifications, Assessment, and Matching - Foster parents caring for youths in the Augmented Foster Care Program will be selected on the basis of their warmth; sensitivity; child care skills; prior training or experience; tolerance of troubled youth; ability to cooperate with the Division; and willingness to learn and participate in mandatory training, consultation and case staffings. All foster parents must have a current and valid child foster care license with a study and/or assessment completed by the SCRO Foster Care Unit.

In order to be compensated at an augmented rate for youths assessed at Level of Difficulty II, the foster parent(s) must:

1. Have completed basic Foster Parent Training and Orientation provided by the Division or the equivalent; and

2. Be willing and participate in frequent case staffings and attend monthly foster parent meetings for regular on-going training; and

3. Have at least six months experience fostering adolescents with behavior problems, or completed Advanced Foster Parent Training provided by the Division or the equivalent or elsewhere; and

4. Have an average skills assessment rating of 7 or higher.

Foster parents providing care and receiving an augmented rate for a youth assessed Level of Difficulty III, in addition to requirements 1 through 4, must:

5. Be a two-parent foster home with one parent not employed outside the home; and

6. Have provided at least one year of prior foster care for adolescents with behavior problems; and

7. Have completed Advanced Foster Parent Training provided by the Division or the equivalent elsewhere; and

8. Have an average skills assessment rating of 8 or higher.

Foster parent's qualifications and abilities to provide augmented foster care for Level of Difficulty II and III youths will be documented and assessed on a Foster Home Evaluation and Assessment form (Attachment E). The foster home will be assessed jointly by the Regional Foster Home Coordinator(s) and each Probation Officer who has supervised placements in the home. If there are significant differences between the ratings of the Foster Care Coordinator and Probation Officers, a second assessment will be made in a joint staffing between the coordinator and the Probation Officer convened by the Regional Manager.

Foster parents wishing to provide augmented foster care under this program, may complete a self assessment prior to the assessment completed by Division staff. Foster home self assessment will not used for the actual rating. Those assessments will help determine areas of additional training and experience needed by the foster parents.

A home capable of providing augmented foster care for Level of Difficulty II youth may also be used for youths assessed as Level I. A home capable of providing augmented care for Level III may also provide care for Levels II and I.

Expectations of Foster Parents - Foster parents providing care for Level of Difficulty II and III youth will serve as paraprofessional treatment team members. They will work in harmony with the placing Probation Officer and Foster Care Coordinator as well as the natural parents and school personnel.

The foster parents emphasis is on thoroughly understanding the youth, forming a meaningful relationship, working thorough trust problems, building self esteem, providing close supervision and effective discipline, and implementing the treatment plan. The foster parents will be expected to keep clear records of the youth's behavior in the foster home and aid natural parents in developing a supportive home environment so that the youth can eventually return home.

Foster parents providing care for a youth and receiving augmented rate payments under this program will not be eligible to request Special Needs reimbursement for damages or losses under $250 or for hobby or recreational supplies and equipment for the youth. Other special needs categories are not affected. The augmented rate is partially intended to cover the excluded special needs.

Foster Parent Training - All foster parents receiving augmented care rates under this program must have completed "basic foster parent training and orientation." That training shall consist of instruction and review of materials contained in the Foster Home Licensing Regulations and the Division Foster Parent Handbook.

Ongoing training and individual monthly support sessions will be provided by the Foster Care Unit. Group training and support sessions will be held at least quarterly with training topics applicable to foster parenting difficult youths presented at each session. Guest speakers will present information regarding adolescent behavior or foster parenting whenever possible.

The "basic training" requirement can be fulfilled by evidence of completing one of the Division's Foster Home Training and Orientation courses or similar foster parent training provided by another foster care placement agency.

Advanced foster parent training will be provided through the Regional Foster Care Unit. The training will consist of not less than 30 hours and cover topics such as: Treatment team approach, understanding the delinquent personality, crisis intervention, aggressive and assaultive behaviors, sexuality, education planning, runaway, discipline, use of professional resources, working with natural parents, behavior observation, record keeping, legal procedures and separation and loss. Yearly follow-up training workshops and self study materials will also be provided.

Attachment F is an example of an advanced foster parent training curriculum.

The requirement for advanced foster parent training can be waived by the Regional Manager for foster parents who have completed other comparable substitute training. Substitutions could include portions of training received from the Alask Foster Parent Association Annual Conference, Child Welfare League of Ameri . Conferences, National Foster Parent Association Conferences, Division of Mental Health Specialized Foster Parent Training, training by other social service and child placement agencies, and college level courses.

Placement Procedures - Foster home selection shall be based on the needs of the youth, including the Level of Difficulty Assessment and the abilities of the foster parent to meet the identified treatment and supervision needs of the youth.

Following completion of the Level of Difficulty Assessment on a youth referred for augmented foster care placement and selection of an appropriate foster home, a preplacement staffing will be conducted. This staffing will include the youth, the youth's Probation Officer, Foster Care Coordinator, and the prospective foster parents as a minimum. The Probation Supervisor may also participate as well as the youth's parents or guardian if feasible and desirable.

The purpose of this staffing is to formalize the referral to the particular foster home, share pertinent background information, develop the initial treatment plan, and complete the placement agreement. The Placement Agreement and Plan (Attachment G) is modeled after that required by 7AAC50.049 for Residential Care Placements. Preplacement visits may be initiated either before or after this staffing. Other placement procedures required by Youth Services or Regional policies will also be followed.

Limitation on Placements - Care of a Level of Difficulty II or III youth requires expenditure of considerable time and energy by the foster parent(s) and limits the foster parents capability to adequately care for other foster children.

Single foster parents and foster parent couples with both parents working outside the home may provide care and receive augmented payment rates under this program

for youths assessed at Level of Difficulty I and II only. Only foster parent couples with one non-working parent can care for a youth assessed at Level III.

Foster parents providing augmented foster care for Level II or III youths must agree to provide foster care for other youths only when such other placements have been approved by the Division's Regional Manager or designee responsible for placement of the Level II or III youth. The Regional Manager or designee will use the following guidelines to determine if consent for care of other youths should be granted:

- No more than one (1) Level II youth should be placed in a single foster parent home where the foster parent is employed outside the home.
- No more than two (3) Level II youth should be placed with a single foster parent not employed outside the home.
- When a single foster parent is caring for a Level II youth, they should care for no more than two total placements.
- No more than one (1) Level II youth and a total of three (3) youths should be placed in a couple's foster home with both parents working outside the home.
- No more than two (2) Level II or Level III youths and a total of three (3) youths should be placed in a couple's foster home where one parent works outside the home.
- No more than three (3) Level III youths and four (4) youths total should be placed in a home where both parents are available for full time supervision.
- A foster home providing care for Level II or III youths should not accept placements from other agencies or private parties, nor should they care for adult boarder or provide day care.

Rates of Care Payment and Method of Augmentation - Foster parents will be reimbursed for care expenses in accordance with 7AAC50.710 through 840. Augmented rate payments will be made only to qualifying foster parents caring for youth assessed Level of Difficulty II and III. A home providing care for more than one youth, therefore, might receive varying payment rates depending upon the Level of Difficulty for each youth in placement.

For a youth assessed at Level of Difficulty of II, and placed in a qualifying foster home, an augmented foster care payment rate will be made which will equal 200% of the standard foster care rate*($34.32/day-SCRO).

The foster care payment rate for a Level of Difficulty III youth placed in a qualifying foster home may be augmented to equal 300 percent of the standard foster care payment rate*($51.48/day-SCRO).

The foster care payment rate will be implemented through an Augmented Foster Care Rate Request initiated by the placing Probation Officer and approved by the Probation Supervisor, Regional Manager and Division Director or designee. The

Augmented Foster Care Rate Request (Attachment H) shall indicate that the youth has been assessed for Level of Difficulty in accordance with this program and shall have attached a copy of the Level of Difficulty Assessment and the Augmented Foster Care Placement Agreement and Plan. The narrative shall note that the foster home has been evaluated and that the foster parent(s) possess the requisite skills, training, and experience to care for the youth. The Augmented Rate Request with attached documents will be routed through supervisory channels for approval and issuance an Augmented Rate Authorization and Invoice (A&I).

An augmented rate authorization under this program will be approved for a period of six months. The Augmented Rate Request may be renewed at six month intervals upon approval of another Augmented Rate Request. Level of Difficulty reassessments and a review of the placement plan will be made before augmented rates are renewed.

Evaluation - The purpose of this augmented rate program is to provide placement and care for youths having special problems in foster home which are equipped to provide the special care they need and to decrease the utilization of more expensive residential care placements.

A data base of placement utilization by region has been established over the last two fiscal years. Rates of foster care utilization and residential care placement utilization will continue to be documented. Successful implementation of this program will be demonstrated by an increase in foster care placement and decrease in residential care placement during the time of implementation as compared to similar time periods in prior years.

Each week the Regional Administrator will provide a report to the Youth Services Administrator documenting the number of youths in foster care and the number of youths in residential care. At six month intervals the Regional Administrator shall compare those placement rates to prior years and submit a report to the Youth Services Administrator.

Richard Illias, Regional Manager - SCRO

DIRECTIONS FOR COMPLETING THE PLACEMENT LEVEL OF DIFFICULTY ASSESSMENT FORM

The Placement Level of Difficulty Assessment Form is designed to give us information concerning the special problems, treatment needs, and behavioral problems of a youth being placed in foster care. The supervision requirements, treatment needs, and behaviors provide a quantitative measure of how difficult the youth will be to care for in placement. It will serve as assessment documentation for any Augmented Rate Request submitted for the Augmented Foster Care Program. The initial assessment is to be completed by the youth's Probation Officer and the officer's supervisor at the time a referral for placement is made.

There are two pages to this assessment. Page 1 documents special problems, case plan services which the foster parent is expected to provide and the degree of supervision needed by the youth. All the information contained on Page 1 should be based on your evaluation of the youth at the time of assessment. Page 2, Manifest Rating Scale, is used to document significant behavioral history.

In the area on page 1 marked SPECIAL PROBLEMS, note any listed problems which apply at the time of assessment. For each item marked "yes", a comment must be made in the verified block noting the document and date. The case file must contain an adequate verifying document for each special problem. For example, EMOTIONAL DISTURBANCE must be documented by a recent psychological or psychiatric report, RETARDATION by psychological report or school records, LEARNING DISABILITY by an IEP, DELINQUENCY by an adjudication order, PREGNANCY by a medical report and MEDICAL DISABILITY by a medical report or history. Medical Disability means a chronic, life threatening condition such as epilepsy, diabetes, leukemia.

In the CASE PLAN SERVICES area, note in the appropriate column the frequency of effort by the care provider required for each listed item at the time of assessment.

The SUPERVISION LEVEL area has definitions on the assessment form. Circle the most appropriate.

The MANIFEST BEHAVIOR RATING SCALE on Page 2 is divided into two sections - Behavior Problems (A) and (B).

The behavior items in Section A are those which require special skills by the care giver and have been evident in the six months immediately proceeding the assessment.

The behaviors in Section B are those which subject the foster parent, other members of the family and the youth to serious risks of persons or property and are a part of the youth's total behavioral history. Caring for youths with those problems requires exceptional judgement, skill, and supervision by the care giver.

For each behavior type listed, place an X in the column which best describes the frequency of that behavior during the last six months for Section A and total history for Section B.

None (0) indicates that the youth has not exhibited or given any indication of exhibiting the behavior. Mild (1-3) indicates that the youth has not exhibited the behavior, but has given some indication, verbal or physical of exhibiting the behavior. Moderate (4- 6) indicates that the youth has exhibited the behavior at least once. Serious (7-9) is marked for a youth who has exhibited the behavior more than twice. Very Serious (10) indicates that the youth continuously exhibited the behavior.

The adjective "serious" next to several items in Section B refers to value of loss to the frequency of incidents.

DEPARTMENT OF HEALTH AND SOCIAL SERVICES
DIVISION OF FAMILY AND YOUTH SERVICES
AUGMENTED FOSTER CARE PLACEMENT AGREEMENT AND PLAN

Date:_____

Foster Home:_____ License No._____

Youth's Name:_____ Case No._____

We, the undersigned, agree that _____ will be placed in

the _____ foster home on _____198__. We understand that the youth has been initially assessed as requiring special care. We promise to do everything possible to help the youth and the youth's family to make this a successful experience. The foster parent(s) have read the findings of the youth's Level of Difficulty Assessment and agree to provide supervision and foster care services in conformance with Alaska Administrative Code Child Foster Home regulations 7AAC 50.310-.620 to meet the youth's identified needs and problems. The foster parents agree to participate in regular case review staffings with the placing worker, Foster Care Coordinator, youth and youth's parents to evaluate progress and review or modify the case plan. The foster parents also agree to attend regularly scheduled foster parent training meetings provided by the Division. This agreement and plan will be reviewed every three months to revise and/or evaluate progress on the plan.

The placing worker has provided the foster parents with all available and appropriate information on the background and needs of the youth necessary for effective care. The foster parents agree to respect that information about the youth, his/her family and keep it confidential except when disclosure is authorized by the Division. The foster parents agree to safeguard and maintain the youth's medical and school records and keep legible and accurate chronological log notes or journal entries concerning the youths behavior and progress while in foster care which will be shared with the placing worker.

The placing worker will immediately prepare and submit a Request for Augmented Care Rates. We understand that approval of an augmented rate of payment expires after six months but may be renewed. When an augmented rate is paid for a youth under the Augmented Foster Care Program for Youth With Special Behavior and Emotional Problems, the foster parents understand that they will not be eligible to claim Special Needs reimbursement for damages or loss under $250, or for hobby/recreational supplies and equipment for the foster child.

The foster parents agree not to provide foster care for other youth without specific consent of the Division of Family & Youth Services office which has made this placement.

The foster parents and the placing worker mutually agree to give each other at least five days notice if they believe that it is in the best interests of the youth or the foster parents for the youth to be discharged prior to the agreed-upon date.

The following are the agreed-upon initial placement plans:

MEMORANDUM State of Alaska

TO: Robert London Smith, Commissioner
Department of Health & Social Services

DATE: February 17, 1984

FILE NO:

THRU: John R. Pugh
Deputy Commissioner

TELEPHONE NO:

FROM: Michael H. Price, Director
Division of Family & Youth Services

SUBJECT: Foster Care Activity Report

The January Activity report for the special subject foster care is in three sections: Statewide Progress, Social Services Regional Activity and Youth Services Regional Activity.

STATEWIDE PROGRESS

Significant progress was made during January by the central office task force on foster care issues. In preparation for addressing foster care issues with the legislature and in carrying out the goals of improving foster care under the Commissioner's designation of foster care as a special subject, two sets of two volume notebooks were prepared. All key data currently available on foster care issues in Alaska was assembled. These notebooks will contain short and long range planning and progress. (See Table of Contents Attachment #1). During the preparation of the notebooks, the central office task force was requested to prepare an analysis of the most recent Alaska Foster Parent Association publication titled, "Problems and Recommendations". In reviewing the document, task force members recognized that there was repetition from other Alaska Foster Parent Association publications and the Legislative Audit on Foster Care. It was decided a total approach to resolving foster care issues was needed. As an interim measure, in order to respond to legislative questions, a one page fact sheet on foster care was prepared (Attachment #2). Forty-three foster care issues were then identified as being addressed or needing to be addressed by the Division. (Refer to the Issue Section of the Table of Contents, Attachment #1.) A format for clarifying issues and planning was designed (Attachment #3). Work on the 43 issue resolution plans was begun and will continue through the month of February. Issue resolution planning will involve designating specific staff to work on resolving each issue and to develop time lines. Regional Managers and Administrators will be asked to revise regional foster care plans to address identified foster care issues. A format for the monthly foster care activity report will be implemented which will require reporting progress on identified issues. It is anticipated that up to two years may be required to fully resolve all foster care issues. Given the magnitude of the foster care system and the time lines needed to effect long range change, a comprehensive approach is required and will be implemented.

SOCIAL SERVICE REGIONAL ACTIVITY

Special foster care activities were reported from the following social service regions.

SOUTHCENTRAL REGIONAL OFFICE

Anchorage Service Unit:

The January Foster Parent Orientation had nine family units (14 people) present. One evening preservice training was begun by Janell Fernadez with eleven family (16 people) units starting the training. Two family units, both single parents, have withdrawn to date. The begin date was 1/11/84.

Pam Montogmery began a day-time preservice training (a first) to accommodate shift and slope workers. This training group is meeting each Tuesday and Thursday for five sessions from 2-4 p.m. and five family units are enrolled. The begin date was 1/31/84.

Both foster care licensing workers have also been involved in committee meeting with foster parents on Fur Rendezvous and State conference planning. Brochures are being printed for the Fur Rondy Booth as recruitment effort, and social workers are volunteering off duty time to help staff the booth with foster parents and Parent Training Center (PTC) personnel.

Janell Fernnandez and Ann Sponholz, PTC, appeared on the "Good Morning Alaska" TV program in January to address recruitment for teen homes and support systems for foster parents.

Bettye Davis, Foster Care Coordinator, negotiated 26 placements during the month. Foster homes are being sought for 26 other adolescents who are presently residing in emergency shelter or residential care facilities. Bettye, Anchorage supervisors, and Frank Dalley, met weekly to discuss teenage placement needs. Advertisements were placed in the Anchorage Times and Anchorage Daily News for "Teen Foster Homes" on 1/22 and 1/28-30.

An issue that has taken much time in problem-solving is the ASU after hours on call system. Meetings with the Foster Parent Association and other concerned community leaders have been held to address the on call issue. Currently two workers have been assigned to cover the on call system with back-up by supervisors Anita Stevens and Dolly Coke. The system appears to be working at present and continuing efforts to improve the system are in effect. The foster parents concern for late afternoon parental visits has been addressed by the supervisor of the alternative care unit, Jan Ottenfeld. Foster parents have been assured that workers can and will flex their working hours to accommodate such visits, when arranged in advance and clearly appropriate to the case plan.

Dolly Coke, Anita Stevens and Frank Dalley met regularly with members of the Foster Parent Association to discuss mutual issues and solutions. Open communication with the Foster Parent Association has generated improvement in the relationship with ASU and foster parents; and there is a spirit of unity in the goals of service to children expressed by both groups. Gaps in agreement on certain issues such as foster parents sharing an equal role in the treatment of children and in the development of case plans will exist, but foster parents are being utilized in better roles than in the past and are routinely being asked to add their observations of children's behavior when case plans are being developed.

Mat-Su Activities:

NOVA training for new foster parents began January 12th and will end February 16th. The sessions which meet 7-9 on Thursday evenings have had three to seven people in attendance. Monday afternoons are used as planning sessions for NOVA parents with Helena Whitstine and Pat Carrier, Anchorage foster parents, participating.

Foster parents are pursuing ideas about the coming Alaska State Fair during late August. They are raising money for the deposit deadline in February.

Field Offices:

The field offices had a higher than normal level of licensing activity during this month with a total of 35 actions involving foster homes.

Craig Fitzgerald of Kenai, conducted a community School sponsored meeting on foster care which was attended by five individuals. Barbara Smith, Social Services Associate in McGrath, wrote a small article on the need for foster homes, which will run in the Kusko-Courier for three weeks. Field Supervisor Betty Davis distributed data on three adolescents, one from St. Paul Island, one from Cordova and one from Valdez, to the Anchorage and Mat-Su offices, as well as to other Field Offices, requesting consideration for foster home placements. The three require more structured settings than are available in the local communities, and all require treatment not available locally, as two are sexual abuse victims and the third requires access to ANMC medical/dental care. No responses were received.

NORTHERN REGIONAL OFFICE

January has been an active month for staff. The register to fill the recently approved (1/19/84) licensing position in Fairbanks has been called for and it is hoped that it will be filled in February. That will certainly ease the licensing load in the region - which currently is about enough for four staff and there are only two.

One issue which is impacting operations is the rising tide of interest in tribal sovereignity. The area of direct impact is ICWA. A suit was filed in federal court this month in behalf of the village of Stevens. The council, acting as a tribal government, removed a child from the care of the parents and placed the child in a foster home. The Division was asked to pick up the payments and refused. There are a substantial number of unresolved legal issues involved in this. Is Stevens a government? If so, what is it's relation to the State (especially to DFYS)? If not, what recourse do the affected parties have? Can they obligate state agencies for expenditures...and so on? The hearing has not been calendared. The A.G.'s office in Fairbanks will probably handle the case. The basics of State/tribal relations will need to be addressed by the administration, legislature and the Congress. The Fairbanks office is continuing to suggest that the non-profits, which usually act as the service arm to councils apply for funding from various sources. This was one of the regional priorities in the RFP for preventive service grants.

They had a foster child molested by a foster parent. It was an exceptional occurrence in that it is not common, but the response to the report went "by the book" and was handled very well.

The Brower application for a foster home license in Barrow was denied and no hearing was requested. Subsequent to the denial, Mr. Brower was indicted on several counts for sexually molesting youth in Barrow.

SOUTHEAST REGIONAL OFFICE

The community care specialist in the Ketchikan office is particulary overloaded. To allow more time for foster care, residential and day care center licensing, day care home licensing has been transferred to another worker.

Regarding the foster parent support contracts, the regional manager would like to see these services provided by Division workers rather than a contractor. At the time the Division entered into these contracts, it did not have adequate staff to supply necessary support to foster parents. It still does not, and the contractor in Ketchikan has done a good job. However, with an additional position in Juneau and one in Ketchikan, DFYS could provide those services without the conflicts/confusion that occasionally arise.

When the former director of Ketchikan Children's Home closed their intensive treatment unit (licensed to serve five emotionally disturbed children ages 8-13 at $156/day) the Ketchikan office worked with their former staff and a local church to open a foster home for such children at augmented foster care rates, to provide the same service at less cost to the state. The program seems to be working very well.

The Division is short on institutional and foster care funds and is only placing children where it is absolutely necessary.

Much January activity centered around getting ready for the Foster Parent conference on February 24th and 25th with Robert VanCleave as the keynote speaker.

YOUTH SERVICES REGIONAL ACTIVITY

Special foster care activities were reported from the following youth service regions.

SOUTHCENTRAL REGIONAL OFFICE

The foster care budget will have a balance, but not nearly as much as central office staff initially believed.

The Augmented Foster Care program is getting off the ground. At the end of the month, six youths were participating in the Augmented Foster Care program. Two youths terminated the project in January. Based in experience so far, the region has made a number of changes in the written procedures. These mostly involve changes in the level of difficulty, assessment and classification.

Jack Hansen and Betsy Gerace have agreed to co-lead a two hour training session at the Alaska Foster Parent Association conference in March. The training topic will be delinquency and discipline.

At the request of the Southeast region, Betsy Gerace spent three days in Juneau training the new youth services foster care coordinator and the social services foster home licenser in licensing procedures.

Foster parent recruitment has not been as productive as we had hoped so far this year. In addition to the public relations problems caused by negative press articles, the regional foster care unit has not been as aggressive at recruiting activities as hoped. Jack Hansen is currently on a one month annual leave and Betsy is overloaded work. We still have several foster parent training activities to plan and conduct, including a one week augmented foster care training session and a three day basic foster care training program.

NORTHERN REGIONAL OFFICE

During the month of January, 1984, they served thirty-three children in foster homes. Youth Services currently has twenty-six foster homes licensed and has licensed ten Family Focus homes. Nine foster homes licensed by Family Services were utilized during the month.

Youth Services handled eight payment complaints from Alternative Care providers. One new foster home license was issued with four foster home applications currently being processed.

A public service announcement was placed in the local newspapers addressing our need for teenage foster homes. This was through coordination with Family Services.

Youth Services was represented at the monthly Foster Parents Association meeting and was also involved in the planning of the upcoming Foster Parents Conference.

SOUTHEAST REGIONAL OFFICE

Foster Care continues to be a problem with only four foster homes in use for the region. A new foster home coordinator has been appointed, Greg Roth, and they will be addressing the recruitment and placement problems.

January was a full month for the new Regional Alternative Care Coordinator. Training included a full day with Pat O'Brien from Central Office, reviewing licensing regulations and forms. An additional three days field work, home study and organizational training was provided by Foster Care Coordinator, Betsy Gerace, from Anchorage. The remainder of the month focused on visiting foster homes and attempting to bring current as many licenses in the region as possible. Considerable work remains to be done in this area.

It should be noted that the training during the month considerably enhanced the speed and accuracy with which licenses could be issued or renewed. Licensing travel to Haines and Sitka is planned for the up-coming month of February.

Department of Health and Social Services
FOSTER CARE PROGRAM

LEGISLATIVE AUDIT RECOMMENDATIONS

- The Division should improve relations with foster parents.
- The Division should review policy and monitor field operations.
- Executive and Legislative support should be given to the Division in developing new levels of foster care.
- The Division should revise its management information system and improve case documentation by social workers.
- The Division should establish standards for determining parental support payments.

DEPARTMENT ACTION

- Commissioner Smith designated the foster care program as a "Special Subject" requiring monthly reports until significant problems are resolved.

MAJOR ACCOMPLISHMENTS

- Emergency procedures for early and rapid payment to foster parents.
- Anchorage twenty-four hour social workers on duty for emergencies.
- Foster Parent Handbook distributed.
- Support contracts which enhance relationships with foster parents, reduce turnover and prevent multiple child placements.
- Contract let to license Native foster homes in 7 communities.
- Training of all Division licensing staff in complaint investigations.
- Production of an improved automated payment system.
- Designation of central office staff to work with the Alaska Foster Parent Association in identifying needed policy improvements.
- Reorganization to give regional managers more authority and accountability for ensuring policy is followed.
- Initiation of a specialized foster care "pilot project" in Southcentral Alaska.
- Task force formulation of recommendations to improve regulations and complaint investigations.
- Orientation and training of foster parents.

ONGOING PLANS

- Regional Councils are being established in the Southcentral and Northern Regions of the Division to channel community and foster parent concerns.
- A central office monitoring team will be hired by January 30, 1984.
- A central office task force has designated forty foster care issues to be addressed in a systematic manner.

ASSESSMENT OF PROGRESS

- Department response to the audit was assessed by audit supervisor, Keith Busch, before LB&A in September as one of the best responses of his experience.
- Later, before House HESS, he informed committee members that reports of Division activity demonstrate considerable progress toward meeting the concerns of the audit, but it is too soon to fully evaluate progress.
- The Division will assess progress monthly on the forty identified issues.

FC ISSUE RESOLUTION PLAN

1) Issue Clarification

* Who i.d. it as an issue? Document?
* Perspective(s)

BOARD OF OPTOMETRY

Alaska State Legislature

REP. MAE TISCHER
CHAIRMAN

POUCH V
STATE CAPITAL
JUNEAU, ALASKA 99811
(907) 465-3777

House of Representatives
HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

April 18, 1984

The Honorable Joe Hayes
Speaker of the House of Representatives
Juneau, Alaska

Dear Mr. Speaker:

The House Standing Committee on Health, Education and Social Services has reviewed the qualifications of the following named individuals who have been nominated by the governor to serve on the Board of Examiners in Optometry:

John A. Demske, D.O., of Soldotna; and
Robert D. O'Connell, D.O., of Kenai.

Members of the HESS Committee have signed below indicating their individual recommendations to the House concerning these individuals' confirmations.

Members Recommending To Confirm:	Members With Other Recommendations:
Mae Tischer	
Rick Cole	
T. H. Moore	
Sam Kerttula	
Mike Davis

HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

STAFF REVIEW

The Board of Examiners in Optometry, created in 1949 and substantively restructured to its present form in 1980, is authorized by AS 08.72.010 and is therein given the responsibility "to regulate and control the practice of optometry and to protect and promote the public health, welfare, and safety."

The principle powers of the board are enumerated in AS 08.72.050: "The board shall adopt rules and regulations

(1) necessary for the proper performances of its duties;
(2) governing the applicants and applications for licensing;
(3) for the registration of optometrists;
(4) necessary to govern the practice of optometry;
(5) prescribing requirements which a person licensed under this chapter must meet to demonstrate continued professional competency."

The five members of the Board of Examiners in Optometry are appointed by the governor and serve staggered terms of four years each (AS 08.72.020). Members of the board may be removed from office by the governor for cause (AS 08.72.025). The board is composed of four licensed, practicing optometrists who have been residents for at least three years; and one public member (AS 08.72.040).

Members of the Committee have copies of the applicable statutes in their packets.

RESUME

I. HEALTH RELATED EXPERIENCE:

March 1978 - Present: Employed by the Yukon-Kuskokwim Health Corporation (YKHC) in Bethel, Alaska as department head of eye care program. Duties include: supervision of one associate optometrist and three assistants; providing full scope optometric care in the eye clinic of the Yukon-Kuskokwim Delta Regional Hospital; supervision of optical dispensory; organizing and providing field clinics to the 48 villages in the YKHC service area; and providing didactic and clinical training for the community health aides of the area. Emphasis is placed on primary care optometry in this rural practice. Preventative care is also practiced with Periodic Glaucoma and Pre-school screening clinics.

November 1977 - Feb. 1978: Part-time employment with the Optometric Center of Seattle, Washington. The Center provided vision care for the indigent population of Seattle. The short stay in Seattle was due to my anticipated move to Alaska.

January 1977 - June 1977: Volunteer work in Puerto Cabezas Nicaragua. Program was initiated by unified efforts of Lions Club International, Partners of Americas and the University of Wisconsin - Madison. Duties were to train paramedical personnel in the skills necessary to provide rudimentary eye care with the expectation that they would carry on after my departure. Included with the training was the organization of thousands of eye glasses donated by the Lions Club International. Once organized, field clinics were held in outlying communities. I returned in August of 1978 to learn that all personnel had departed and the clinic was closed, so our objective had failed.

November - December 1976: Organization and planning work in Nicaragua.

Feb. - June 1976: Employed by the Billings Area Indian Health Service on contract to the Wind River Reservation in Wyoming. The contract was to provide optometric care for the student population of the reservation. Clinics were held in all schools and in the Ft. Washakie Health Center for adult referrals.

Sept. 1973 - August 1975: Served as itinerant optometrist in the Commissioned Corporations of the U.S. Public Health Service for the Billings Area Indian Health Service. Provided optometric care for the Ft. Belknap, Ft. Peck and Rocky Boys Reservations in Montana and the Inter-mountain Indian School in Brigham City, Utah. Annual clinics were held in all schools and health centers at each reservation.

June - August 1972 - Part time employment as optician/optometric assistant at the Willamette Valley Migrant Clinic Stayton, Oregon.

Sept. - December 1970-71 - Part-time laboratory instructor for ophthalmic optics at Pacific University College of Optometry, Forest Grove, Oregon.

June - August 1970 - Employed as optician by Dr. Corliss Schanel, Madison, Wis.

Time intervals not included were dedicated to travel in the western United States, Mexico and Central America.

II. EDUCATION:

1973 - Present - Various post - graduate courses sponsored by Pacific University College of Optometry, the Native Health Service and the Alaska and Washington Optometric Associations.

Sept. 1969 - May 1973 - Pacific University College of Optometry, Forest Grove, Oregon. Emphasis on public health optometry. Elective clinics in cross - cultural settings.

Degrees received: Bachelor of Science in Psychology, Doctor of Optometry.

Sept. - May 1967-68, 1968-69 - Undergraduate - University of Wisconsin - Madison.

June - August 1968 - Part-time student at University of Wisconsin - Green Bay.

September - May 1966 - 67 - Under graduate - University of Wisconsin - River Falls.

September 1962 - June 1966 - DePere High School, DePere, Wisconsin.

III. LICENSES:

Optometrist, Alaska - 1978 - present. Optometrist, Washington 1973 - present.

IV. ASSOCIATIONS

Professional: Alaska Optometric Association

American Optometric Association

Service : Bethel Lions Club

Other : The Wilderness Society

V. HOBBIES, INTERESTS:

Cross-country Skiing, Boating, Backpacking, Out-door activities, Photography, Carpentry.

VI. PERSONAL INFORMATION:

My birthdate is August 3, 1948, I am married and have lived in Bethel for over three years. My wife, Guadalupe, and I have a daughter, Adinda, and we are expecting our second child any day now, we own our home in Bethel, are registered voters and we enjoy the lifestyle of rural Alaska.

Article 1. Board of Examiners in Optometry.

Section
10. Creation and purpose of board of examiners
20. Membership of board and terms of office
25. Removal of board members
30. Vacancies
40. Qualifications
50. Power of board to adopt regulations
60. Miscellaneous powers and duties of board
70–100. [Repealed]

Sec. 08.72.010. Creation and purpose of board of examiners. There is created the Board of Examiners in Optometry to regulate and control the practice of optome[illegible]d to protect and promote the public health, welfare, and safety. (§ 35-3-132 ACLA 1949; am § 2 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment added "to regulate and control the practice of optometry and to protect and promote the public health, welfare, and safety."

Sec. 08.72.020. Membership of board and terms of office. The board consists of five persons, appointed by the governor. Members serve staggered terms of four years. (§ 35-3-132 ACLA 1949; am § 22 ch 102 SLA 1976; am § 3 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "four" for "three" and deleted the former third sentence, which read: "The terms of the public members of the Board shall be set so that they do not expire at the same time."

Sec. 08.72.025. Removal of board members. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal. (§ 4 ch 75 SLA 1980)

Sec. 08.72.030. Vacancies. The governor shall fill vacancies on the board by appointment for the unexpired term. (§ 35-3-132 ACLA 1949)

Sec. 08.72.040. Qualifications. Four board members shall be licensed, practicing optometrists who have been residents for at least three years. One board member shall be a public member. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term that the person served. (§ 35-3-132 ACLA 1949; am § 23 ch 102 SLA 1976; am § 5 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "Four" for "Three," and the material beginning, "One board member" and ending "term that he served" for the former second sentence, which read: "Two shall be persons who have no direct financial interest in the health care industry."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.72.050. Power of board to adopt regulations. The board shall adopt rules and regulations

(1) necessary for the proper performances of its duties;

(2) governing the applicants and applications for licensing;

(3) for the registration of optometrists;

(4) necessary to govern the practice of optometry;

(5) prescribing requirements which a person licensed under this chapter must meet to demonstrate continued professional competency. (§ 35-3-133 ACLA 1949; am § 6 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment added paragraph (5).

Sec. 08.72.060. Miscellaneous powers and duties of board. (a) The board or a member designated by the board, may issue subpoenas, administer oaths and take testimony concerning any matter within its jurisdiction.

(b) The board may

(1) adopt a seal;

(2) define professional conduct and adopt rules of professional conduct.

(c) The board shall

(1) elect a president and secretary from among its members;

(2) order a licensee to submit to a reasonable physical examination if the licensee's physical capacity to practice safely is at issue.

(d) Repealed by § 3 ch 59 SLA 1966.

(e) Repealed by § 23 ch 75 SLA 1980.

(f) Repealed by § 3 ch 59 SLA 1966. (§§ 35-3-133, 35-3-140 ACLA 1949; am § 3 ch 59 SLA 1966; am §§ 7, 8, 23 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote subsections (b) and (c), and repealed subsection (e), which read: "The board may define professional conduct and adopt rules of professional conduct."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.72.070. Applicability of Administrative Procedure Act. Repealed by § 23 ch 75 SLA 1980.

Sec. 08.72.080. Compensation of board and secretary. Repealed by § 3 ch 59 SLA 1966.

RE : Executive Order No. 54

Enclosed please find a transmittal letter from the Governor showing statutory corrections to Executive Order No. 54.

"AS 24.30.130 (b) An executive order proposing a change in the executive branch and requiring the force of law under § 23, art. III, of the state constitution shall be submitted to the presiding officer of each house on the day the house organizes. The legislature has 60 days of a regular session, or a full session if of shorter duration to disapprove the order. Unless disapproved by a special concurrent resolution introduced in either house, concurred in by a majority of the members in joint session, the order becomes effective at a date thereafter to be designated by the governor. An order submitted to but not disapproved by the legislature shall be published in the bound session laws and any codification of state law. (§ 41 ch 157 SLA 159; am § 12 ch 47 SLA 1961)."

Thank you.

BILL SHEFFIELD
GOVERNOR

EO 54

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 17, 1983

The Honorable President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.30.130(b), I am transmitting an executive order which creates a Department of Corrections. The new department is being created from the division of corrections which is currently located in the Department of Health and Social Services. This is similar to Executive Order No. 39's 1977 creation of the Department of Transportation and Public Facilities out of the former Department of Highways and Department of Public Works.

This Order's sec. 28 creates the new department. Section 29 then states that the commissioner is the principal executive officer and sets out some basic duties and powers. Section 29's AS 44.28.020 is based on AS 44.29.020(9) (amended in sec. 30 of the Order) and AS 44.29.020(17) (repealed in sec. 31), pertaining to the Department of Health and Social Services. Similarly, the new AS 44.28.030 is based on AS 18.-05.040(15).

Art. I, sec. 12, of the Alaska Constitution mandates that penal administration be based on protection of the public and reformation of the offender. Given the unprecedented increases in the prison population in the state, I believe that elevating the division of corrections to departmental status is necessary to achieve these twin goals and is in the best interests of efficient administration.

The problem of increasing crime in Alaska and how best to deal with those who are convicted of violations of the criminal law was the focus of a recent inquiry by a corrections task force that I created. In its January 3, 1983 report, the task force recommended the immediate elevation of the division of corrections to departmental status. According to members of the task force, this recommendation is strongly supported by all segments of the criminal justice system.

The Order does not transfer the responsibility for juvenile corrections matters and for offenders who are found guilty but mentally ill or not guilty by reason of insanity under AS 12.47.

Also, some responsibilities of the commissioner of public safety, principally the transportation of prisoners, have not been addressed in this Order. The decision on whether or when to transfer these responsibilities to the new commissioner of corrections will depend on such factors as the level of increased training that must occur before the new department can effectively and safely assume these responsibilities.

The phrase "Repealed effective July 1, 1987," which appears in brackets and capital letters in the AS 33.32 (correctional industries) headings for the sections being amended in secs. 15, 17, 19, 20, and 24 of this Order, appears in this Order because it appears in those headings in The Michie Company's publication of the statutes. That language is not being deleted, and the amendments made by this Order do not affect that statutory termination date of the correctional industries program. See sec. 7, ch. 53, SLA 1982.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

STATE OF ALASKA

TASK FORCE ON CORRECTIONS

A Report On the Status of Corrections

for

Governor William Sheffield

December/January 1982-1983

The Honorable William J. Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

January 3, 1983

Dear Governor Sheffield:

It is my pleasure to present to you the following report of the Task Force on Corrections. We have evaluated the issues and problem areas of correctional administration and management in Alaska as directed in your charge.

It is our hope that you will find the report of this Task Force and its policy recommendations useful to the future administration of a sound correctional system. We believe that it is not only possible but also mandatory that the executive, legislative and judicial branches of state government work diligently and harmoniously to carry out the directive of the Constitution of the State of Alaska for protection of the public and reformation of the offender.

We hope that this report will provide you with, at least, one tool toward that end.

We are pleased that we have had the opportunity to assist you.

Sincerely yours,

Roger Endell
Chairman
Task Force on Corrections

INTRODUCTION

Governor's Charge

Governor William Sheffield's transition Task Force on Human Services identified the management and operation of the Alaska Division of Corrections as a "dominating problem" within the Alaska Department of Health and Social Services. The Task Force on Human Services recommended the appointment of a "Blue Ribbon Task Force on Corrections" to address the following issues and relevant policy and procedural concerns:

1. Prison overcrowding and examination of current capital improvement programs.
2. Rehabilitation and alternatives to institutionalization.
3. Administrative organization and staffing problems.
4. Communications and coordination among justice agencies.
5. Municipal assumption of pretrial detention responsibilities.
6. Institutional location of juvenile corrections in state government.
7. Institutional placement of Corrections in state government.

The Task Force on Corrections was directed to commence an investigation of these identified issues immediately and to prepare and submit a report and policy recommendations to the Governor in early January, 1983.

To carry out its mission, members of the Task Force used two principal investigative methods which provided sources of information. These methods included: 1) the review of a multitude of reports and planning documents written by both in-state and out-of-state correctional practitioners and consultants since 1976; and 2) a statewide and systematic series of interviews with persons from municipal and state governments and local communities who were both knowledgeable about correctional problems and issues, and who were capable of making sound recommendations which would address these problems and issues.

It was not the intent of this Task Force to accumulate all of the voluminous materials and information already existent on this subject and incorporate it into yet one more burdensome volume. We believe that the nearly one million dollars spent on a variety of correctional reports and plans over the past six years provides but one example of the crisis in correctional management. The division has been managed by four different directors in the past six-year period. The most recent director as well as the current director were both hired by the previous administration to move the Division of Correction toward a more stable management situation. Their task was made more difficult because of their lack of knowledge of the unique problems and potential advantages of Alaskan corrections.

Alaska need neither to continue to hire out-of-state leadership nor to contract with out of state consultants. We are not convinced that the other states have developed correctional systems superior to that of Alaska in spite of our current and temporary crisis. We <u>are</u> convinced that knowledgeable and capable leadership should be sought from within our population to manage corrections just as talented and capable Alaskans are found to direct and manage the other departments and divisions within the executive, judicial and legislative branches of state government.

It is clear that there is a crisis in corrections. It is also clear that with sound, long term, and professional management, most of the current problems can and will be resolved. The resolution of these problems will require full cooperation as well as coordination between and among all three branches of Alaska's government--executive, judicial and legislative.

SUMMARY OF RECOMMENDATIONS

The following represents an abbreviated listing of the major policy recommendations to be found in this report. These statements are not comprehensive and are extracted out of context as an aid to the discussion of issues contained in the charge to the Task Force on Corrections.

Prison Overcrowding

1. Except for the Anchorage Careage House, no correctional facilities should be closed until adequate new correctional space has been prepared. (p.9)

2. The Careage House should be utilized as corrections' Southcentral Alaska headquarters and as a correctional training center. (p.9)

3. The new Cook Inlet pre-trial facility should not be opened to inmate populations until the facility is ready for secure occupancy and the staff has been properly trained. (p.9)

4 &
5. The Third Avenue and 6th & C correctional centers in Anchorage should be utilized to hold short term offenders and those incarcerated for alcohol related offenses. (p.10)

6. The continued use of Ridgeview should be re-evaluated for potential correctional use in light of economic costs and public benefits. (p.11)

7. Hiland Mountain correctional center near Eagle River must be permitted to return to its original mission. (p.11)

8. Mentally disturbed offenders should continue to be housed temporarily at the Alaska Psychiatric Hospital. (p.12)

9. Sentenced adult female housing space at Meadow Creek (Eagle River) should be added as necessary with much less expensive architecture than past practice. (p.12)

10. The type and methods of contruction of the two institutions at Palmer should be copied elsewhere as needed in the state. (p.13)

11. The state should move immediately to evaluate and obtain additional available sites for expansion of correctional operations in the Kenai and Matanuska-Susitna Boroughs. (p.13)

12. Comprehensive correctional services regional centers should be constructed in both Nome and Bethel utilizing either "stick built" or prebuilt modular units or a combination of both. (p.14)

13. All new correctional construction proposals should be evaulated in relationship to the need for increased bed capacity statewide. (p.14)

14. The state should continue to maintain a number of dangerously violent Alaska offenders within the Federal Bureau of Prisons system. (p.15)

15. Either a Matanuska-Sustina or Kenai Borough site should be developed and utilized to provide maximum security prison space. (p.15)

16. Correctional construction should be recognized as a high priority among all units of state government. (p.16)

17. A maximum security institution is needed to securely house a portion of the Alaska offender population. (p.17)

Administrative Organization

18. The recently completed management plan for corrections should not be fully implemented. (p.19)

19. The revised classification system should be implemented in concert with correctional reorganization and development. (p.19)

20. Corrections should be managed on a decentralized regional basis. (p.20)

21. All jail contracts should be managed by the Department of Corrections. (p.21)

22. A well trained correctional staff is mandatory and critical to efficient management. (p.22)

Institutional Placement of Corrections in Government

23. The Division of Corrections should be moved quickly and decisively in toto by immediate executive order to Departmental status. (p.24)

24. A Commissioner of Corrections should be appointed by the Governor as soon as possible. (p.24)

Communication and Coordination Among Justice Agencies

25. A cabinet level body should be directed to coordinate policy and law implementation for the effective administration of justice. (p.26)

26. Management personnel of the agencies of justice (state and local) should coordinate the activities of these agencies at the local and regional level. (p.26)

27. The present partial settlement agreement efforts in the Cleary et al. case should be halted and reviewed immediately. (p.26)

Municipal Responsibilities

28. Municipalities should not be made responsible for the costs of pre-trial incarceration of offenders held on state criminal charges, but municipal-state coordination is essential. (p.28)

29. The state should move immediately to address the law, policies and procedures with regard to public drunkeness and drunk driving. (p.29)

30. The state Office of Alcohol and Drug Abuse should provide comprehensive program services to correctional populations in cooperation with local municipalities. (p.29)

Juvenile Corrections

31. All youth correctional functions should be organized as a separate division within the Department of Corrections when reorganization is completed and functional. (p.21)

Rehabilitation and Alternatives to Incarceration

32. The prisoner population of the State of Alaska should be put to work. (p.33)

33. Offender education and recreational programs should be made available to prison populations during the non-work hours of those prisoners. (p.34)

34. A systematic evaluation of approximately 150 parole eligible offenders should be conducted immediately. (p.35)

35. Corrections should provide the opportunity to every offender the resources of a halfway house program for those about to be released -- corrections must correct. (p.35)

PRISON OVERCROWDING

Class action suits, media accounts, and expert as well as lay opinion have confirmed beyond all doubt that Alaska's statewide system of correctional centers is overcrowded beyond any reasonable margin of safety and security. The Task Force is well aware that the Constitution of the State of Alaska mandates that the state's correctional system must reform offenders and protect the public. In our judgment, the current crisis in corrections only insures that the state cannot carry out its Constitutional mandate. The State of Alaska must move immediately and with diligence to resolve overcrowding in the correctional system.

The members of the Task Force on Corrections are cognizant that the public has demanded that state and local officials "get tough on crime," that the public's attitude is appropriate, but that it is also extremely costly. Therefore, we have developed a series of recommendations which will alleviate the overcrowded conditions in our correctional system at lower costs than proposed by the previous administration which will, at the same time, we believe, provide adequately for protecting the public and reforming offenders.

Recommendation 1:

With the exception of the Anchorage Careage House, no facilities currently holding incarcerated accused or sentenced offenders should be closed until and unless adequate new correctional space has been fully prepared and readied for occupancy.

Recommendation 2:

The Careage House in Anchorage should be utilized immediately as the Division of Corrections' headquarters. All Anchorage area central office, institutional, field services and training employees should be moved immediately from the Frontier Building in Anchorage to this new location for greater cost and operating efficiency. This facility is now owned by the state so that only the costs of utilities and minor necessary renovations need be incurred for the Division of Corrections to operate efficiently from this site.

Recommendation 3:

In spite of the tremendous pressure on the managers of the correctional system, the transfer of offenders into the new Cook Inlet Pretrial Facility in Anchorage should not take place until the institutional staff has been hired, fully trained, and the facility has been completed. To do otherwise will almost assuredly result in major management problems and raise the risks of difficulties within the offender population. When completed, this facility could

operate, as designed, to book and hold all Anchorage area pre-trial detainees, and could have, again as designed, full-time on site magistrate services. This latter procedure would save police man hours and the great expense of prisoner transportation and prevent the unnecessary incarceration of persons able to be released on their own recognizance or to make bail. Use of video equipment would appear to be practical in both Anchorage and Fairbanks at the present time.

Recommendation 4:

The Third Avenue Correctional Center should be utilized to hold short-term offenders, and especially those incarcerated for alcohol-related offenses. It is inappropriate to utilize the facility for booking of new arrestees, for long term offenders, or for the purposes of classification of offenders as was proposed to the Task Force during our discussion with the current director.

Recommendation 5:

The Correctional Center Annex at 6th and C in Anchorage recently received approximately $1.4 million of renovations in order to comply with a judgment of the court to make it constitutionally sound. It should continue to be fully utilized as a booking facility until the new Cook Inlet institution is operationally ready. Even after Cook Inlet comes on line, the Annex can and should continue to serve as an adequate facility to house short term offenders.

Recommendation 6:

The Ridgeview facility should also continue to be utilized until the Cook Inlet institution is ready. With the opening of Cook Inlet, use of the Ridgeview correctional center should be re-evaluated for potential correctional use in light of economic costs and public benefits. It is possible that Ridgeview could be converted for use as a regional halfway house/community services facility for offenders about to be released and for offenders whom the courts wish to sentence to short term and/or pretrial incarceration (usually followed by probationary supervision). There is a drastic need for this type of less costly facility in the Anchorage area and public opinion should support a "lower risk" use of this present site. Structural and design improvements may be borne by present Division of Corrections expertise and prison labor.

Recommendation 7:

The Hiland Mountain Correctional Center near Eagle River must be relieved as quickly as possible of the burden of too many inmates in the available space. This facility must return to its original mission as a rehabilitation center for first offenders and those of low security risk. This institution has, in the past, been recognized nationally and even internationally as the model correctional center in which offenders might be reformed. The state must insure that the institution performs its task

as it was intended to perform. Mentally disturbed offenders should not, under none but the most unusual of circumstances, be permitted to be housed at this institution.

Recommendation 8:

Mentally disturbed offenders should continue to be housed temporarily at the Alaska Psychiatric Hospital until a special unit can be designed to treat these offenders within appropriate security facilities to be determined by the Division of Mental Health. The Task Force is cognizant of the June 20, 1980 Task Force Report which specifically addresses these issues. We recommend that the report be carefully re-evaluated.

We believe that the Division of Mental Health must assume responsibility for the security and treatment of mentally disturbed offenders. We have found that the previous administration had gone "full circle" in periodic changes of policy with regard to those offenders. This lack of consistency in management decisions has contributed to the current confusion and jeopardizes offender, as well as public, safety.

Recommendation 9:

The Meadow Creek (Women's) Correctional Center near Eagle River and adjacent to the male facility is an example of architectural extravagance where simplicity and a more spartan environment would have sufficed. It now houses 28

adult women and has a capacity of 30. If expansion becomes necessary, less expensive units can be utilized to extend existing capacity.

Recommendation 10:

The two correctional institutions at Palmer (actually near Sutton) provide good examples of the appropriate mix of tax dollars and inmate labor. The original Palmer Camp (minimum security) was built from the ground up by inmate labor (capacity is now approximately 100 offenders). We recommend that this practice be encouraged and continued. The new, nearly $5 million medium security facility on the same grounds also houses approximately 100 male offenders. Both facilities are fully utilized but there is a clear need for a full range of prison work programs which would keep all offenders busy for at least 40 hours per week.

Recommendation 11:

The State of Alaska should move immediately to evaluate and to obtain available sites which could be utilized to house correctional operations. Site selection should insure provision for rapid availability of housing for up to 100 offenders. Capacities at these sites should have the potential to be increased. The Task Force recommends that one site be located within the Matanuska-Susitna Borough and the other in the Kenai Borough. Sites which have the advantage of existing grounds, utilities and buildings, and which could have security modules added at relative low cost

and high benefit, should be of priority concern. With rapid site acquisitions, this Task Force believes that overcrowding in the Division of Corrections could be addressed dramatically within nine months to one year.

Recommendation 12:

Institutions have previously been approved for construction at both Bethel and Nome. Apparently the availability of funds for the Nome institution are currently in doubt. The Bethel funds have deteriorated in value due to mismanagement of site selection and building design delays. We strongly recommend that either the new Palmer institutional model ("stick built") or prebuilt modular units or any combination be incorporated for sites at both Nome and Bethel as quickly as possible. These facilities should serve as comprehensive correctional services regional centers. They would meet the needs of the southwestern Bethel area and the needs of the Seward Peninsula and Western Alaska regions for short term offenders (up to one year), probation and parole services, community supervision, halfway house, and other correctional related services. These institutions would help to relieve the pressure on the existing state facilities, provide regional treatment and incarceration capabilities, and provide state correctional services where very little now exists.

Recommendation 13:

The Task Force is aware of expansion work at the

Fairbanks and Juneau Correctional Centers and of a new replacement facility in Ketchikan. Ironically, while these modifications are essential, they will not add substantially, if at all, to the overall correctional system bed capacity. With new facilities to be developed rapidly in the Matanuska-Susitna and Kenai Boroughs, these other state regional correctional centers can return to a more efficient operational posture. It may be necessary and advisable to add a pretrial capability to the Fairbanks institution but this should be re-evaluated in light of our other recommendations. We recommend that all new construction proposals be evaluated in relationship to the need for increased bed capacity statewide. The potential for utilizing prison labor should also be evaluated.

Recommendation 14:

The 188 Alaska prisoners currently being held within the Federal Bureau of Prisons need not all be returned to Alaska. This Task Force recommends that the out-of-state population of offenders be carefully screened so that those who might be ready to be returned to Alaska could be brought back in small numbers as new space is readied for them in both new and existing facilities. It should be possible to continue to maintain a number of dangerously violent Alaska offenders within the FBP system.

Recommendation 15:

Related to #14 immediately above, this Task Force

recommends that either the Matanuska-Susitna or Kenai Borough site, or both, should be utilized to provide maximum security space potential to house Alaska's more serious offenders through the use of maximum security units. Such facilities holding up to 300 offenders have been built in the outside states using modular units and are apparently functioning well at low cost relative to poured concrete and steel institutions and have ample security provisions. Only Butler buildings (or similar) need be added for industrial work and/or recreational space.

Recommendation 16:

The Task Force recommends that new site acquisitions, construction additions and building renovations be completed expeditiously as the highest priority through the channels of state government while minimizing both hindrances and costs. The Department of Transportation and Public Facilities should recognize prison construction as a high priority. Building supplies and prisoner labor should be utilized in building renovations and in the construction of non-secure buildings. Security buildings should be built expeditiously by contract labor from the private sector and full service warranties on all new construction should be mandatory. Corrections should have its own facility planners who can expedite construction and renovation work statewide. We recommend that a project evaluation be required upon completion of all major construction.

Recommendation 17:

Finally, in regard to the need for a maximum security facility in Alaska, the Task Force received clear and compelling testimony from state and local police representatives, the court system, knowledgeable citizens, and correctional professionals that Alaska now needs a maximum security institution. Our recommendation is that the Cook Inlet building design and/or modular security units be constructed in a Southcentral location.

ADMINISTRATIVE ORGANIZATION AND STAFFING PROBLEMS

A clear and consistent pattern of evidence and opinion has been presented to this Task Force that the Division of Corrections has suffered, and is suffering from, a lack of clear leadership from within the Division and from within the Department of Health and Social Services. We earlier identified the fact that the Division of Corrections has been headed by four directors over the past six-year period, and that the most recent past director and the current director were employed by the previous administration from positions they held in the lower contiguous states. They came to Alaska with the disadvantages of not knowing the "territory" and those within the system who were weak from those who had/have strong potential leadership and management ability.

We believe that strong, decisive and professional leadership and management is essential to successful correctional operations in this state. Further, a sense of history, of past failures and accomplishments, of goals and objectives peculiar to the unique strengths and weaknesses of Alaska and Alaskans is essential for state correctional managers.

The multitude of reports, plans and recommendations from experts and practitioners from within the state and beyond have repeatedly stated that we need not transfer and repeat the mistakes of correctional systems elsewhere. We have found, as one interviewee stated, that too often divisional and departmental management decisions have been based, not on merit, but on perceptions. Interrelationships and coordination of services within the Department of Social Services have proven to be complex and perhaps impossible under the current umbrella structure of the Department. We will address the institutional placement of corrections within state government in a separate section.

We make the following recommendations with regard to the elimination of organization and staffing problems within the current organization of corrections.

Recommendation 18:

The management plan recently completed at a cost of over $100,000 by the Touche-Ross management and accounting firm should not be implemented until it has been reviewed by the new Department of Corrections. Portions of the plan appear to be unrealistic and unworkable.

Recommendation 19:

While the division managers may be commended for their efforts to develop an improved classification system for the division, we believe that even a superlative classification system will be of little use when bed space alternatives are

not yet available to which offenders might be classified. In order for a correctional classification system to work effectively, there must exist a range of correctional institutional and community placement alternatives with available space in each, to which offenders may be directed. A range of facilities from maximum, medium, minimum, to and including, community halfway houses must first be available. While a sophisticated matrix classification system will be useful eventually, we feel it ironic that the basis for the management structure of the system can be found in a report to the Alaska Legislature written five years ago in 1978. We recommend that the revised classification system be implemented in concert with division reorganization and development.

Recommendation 20:

We have examined the potential reorganization of the organizational and management structure of the division along both functional and regional lines. This Task Force strongly recommends that the division be reorganized immediately upon a decentralized regional concept. It is our opinion, and the opinion of the majority of the interviewees within and outside of corrections, that a regionalized management structure would bring increased efficiency and accountability to correctional operations statewide. While a specific plan is inappropriate for this Task Force, our preliminary findings are that regional

directors should be appointed for each of the geographic regions - southeast, southcentral, and interior. A fourth regional director should be appointed to manage correctional services in rural Alaska - an area that has suffered from a policy of "benign neglect." Regional Directors should be partially-exempt positions. Each regional director should have full responsibility and authority for managing all correctional services in the region. These responsibilities should include but not be limited to the supervision of institutions, probation and parole, other field services and personnel and budget, and should include coordination with the presiding superior court judges, trooper detachment commanders, district attorneys, public defenders, local chiefs of police and peripheral service agencies. Each regional director should be encouraged to establish local citizen advisory groups to advise him or her on correctional programs in the area. Communications between the state's citizens and correctional managers will be enhanced via this mechanism.

Recommendation 21:

The members of this Task Force recommend that the agreement for administration of local jail contracts should transfer, under a new agreement, from the Department of Public Safety to a new Department of Corrections and that both governmental units should prepare their FY 84 budgets

acccrdingly. We believe that all correctional operations administered in part, or totally, by the State of Alaska should be housed in only one administrative unit.

Recommendation 22:

Professionalism in the ranks of the correctional system and in the management structure is of critical concern to this Task Force. Formal educational standards should be established, in addition to agency in-house training for all correctional and field service positions. A uniformed, neat and well-groomed correctional officer staff within the institutions with a well-trained, and professional demeanor would do much to enhance the morale and credibility of correctional staffs. The need for initial and periodic formal education and training is critical. Training can be physically conducted at the Careage House in Anchorage where board and room can be provided at low relative cost.

INSTITUTIONAL PLACEMENT OF CORRECTIONS IN STATE GOVERNMENT

As stated previously by the transition Task Force on Human Services, the management and operation of the Division of Corrections is a "dominating problem" within the Alaska Department of Health and Social Services and is of critical concern. Several factors were identified by that Task Force which contributed to that assessment. Our Task Force on Corrections, in re-examining those previous conclusions, and in conducting our own independent investigation has found agreement that it is essential to move Corrections to departmental status.

The three guiding factors of greatest relevance are: 1) that the Division has suffered from lack of continuously stable and professional management within the Division and within the Department of Health and Social Services; 2) the fiscal and management needs of the Division of Corrections has placed tremendous demands on the resources of the Department of Health and Social Services; and 3) the primary factor and mission of the Department of Health and Social Services has been oriented toward community health, public assistance, mental health and family services and is neither

efficiently organized nor properly prepared to address the problems of corrections within the criminal justice system. Therefore, the Task Force on Corrections recommends the following:

Recommendation 23:

The Division of Corrections should be moved quickly and decisively in toto by immediate executive order to departmental status. We have found unanimous agreement from virtually all persons interviewed, from all regions of the state, and from all segments of the criminal justice system - police, courts, corrections, law - and from the citizen sector that departmental status is not only justified but necessary. The Task Force has considered previous proposals which discussed a transitional phasing-in of the division toward a cabinet level position. We have concluded that a transitionary movement will cause undue delays and probably result in a less efficient and more burdensome administrative process. We recommend a "quick and clean" transfer by executive decree.

Recommendation 24:

A Commissioner of Corrections should be appointed by the Governor as soon as possible. deputy commissioner and four regional directors (the latter explained in a recommendation elsewhere in this report) should be appointed by the commissioner to manage the new Department of Corrections.

COMMUNICATION AND COORDINATION AMONG JUSTICE AGENCIES

This Task Force and the practitioners in the justice system from both the previous and present state administrations, and those from municipal law enforcement departments whom we interviewed, are clear in their request for statewide coordination of criminal justice policy and law. The activities of the Governor's Commission on the Administration of Justice under the direction of the previous administration were primarily oriented toward the dispersion of federal dollars which emanated from the Law Enforcement Assistance Administration (LEAA). With the demise of the federal program, the Governor's Commission (GCAJ) ceased to function.

New criminal laws and new policies and procedures emanating from one department or sector of the government can have a serious impact on the management and administration of other governmental units. For this reason alone, it is critical to insure that clear communication and sound coordination take place among the managers of the justice system statewide. We recommend the following:

Recommendation 25:

The Governor should empanel members of his administration who have justice administration responsibilities, invite representatives of appropriate related agencies, and appoint lay citizens to coordinate policy and law implementation for the effective administration of justice.

Recommendation 26:

Appropriate management level personnel of the agencies of justice should meet regularly for the purpose of coordinating the activities of the justice agencies at the local and regional level. These groups should be made up of the regional director of corrections, the presiding superior court judge, the local chief (or chiefs) of police, the local trooper detachment commander, the district attorney, the public defender, a municipal attorney and a lay citizen. We found at least one excellent example of this type of coordination and recommend that this management technique be emulated at least regionally across the state.

Recommendation 27:

We believe there are serious potential ramifications from the current effort at pre-settlement in the Cleary case. We strongly recommend that the present partial settlement agreement effort between the State of Alaska and Michael Cleary et al be halted and reviewed immediately and that the state proceed to trial, if necessary, in defense of the State.

MUNICIPAL RESPONSIBILITIES

The Task Force has examined the potential for municipal assumption of pre-trial detention responsibilities. This issue has been of concern because of the differences which exist between the larger urban population centers of the state and the smaller municipalities. That is, within the larger cities, no municipal facilities exist to hold prisoners while they await trial. The burden of pre-trial detention is assumed by the state. On the other hand, the small town police chief must be administratively responsible for housing the arrestee until trial or other disposition is reached. The state has therefore developed contractual arrangements with local municipalities to reimburse or otherwise pay for the maintenance of prisoners held on state charges.

It can cost approximately $50 per day to book and hold a minor criminal offender in a jail bed which may have cost up to $125,000 per bed to construct. It is clear that relatively minor offenders should be held in less costly prison or jail space.

There should be an incentive for local municipalities to increase their crime prevention and criminal diversion programs at least for minor offenders who potentially take

up expensive bed space needed for the serious criminal predator. It has been argued that if the municipalities were paying all costs of pre-trial incarceration related to crime at the local level, a substantial incentive (because of the high costs of incarceration) would exist for the cities to develop substantial prevention and diversion programs.

Recommendation 28:

The Task Force on Corrections recommends that municipalities not be made responsible for the costs of the pre-trial incarceration of offenders held on state criminal charges. The impact of such a requirement would be that very costly expenditures would be incurred immediately by every municipality statewide. We believe that the state can and should be responsible for the management and administration of criminal defendents being tried under state statutes. We do believe and strongly recommend however, that careful coordination between and among the criminal justice professionals in both state and local governments is essential to sound management of the system.

Corrections managers do not and cannot select their prison population. The gatekeepers at the front door of the state system of corrections are the local police, troopers, prosecution and court personnel. They should work cooperatively to insure that offenders are held in space appropriate to the level and nature of their offense.

Corrections has an obligation to insure that a variety of types and levels of security is available to the law enforcement commmunity.

Recommendation 29:

While we are reluctant to recommend that still other task forces be formed to investigate and resolve other issues, it is clear that there is a compelling need to address the law, policies and procedures with regard to public drunkeness and drunk driving. The issue has appropriately been identified by the public and in the media as one which demands specific attention. We therefore recommend immediate attention to this issue.

Recommendation 30:

We recognize the high statistical correlation between alcohol abuse and crime. We recommend that the State Office of Alcohol and Drug Abuse (SOADA) should provide alcohol and drug abuse program services in cooperation with local municipalities to correctional centers and community service offices statewide. There is a crucial need for a comprehensive approach to the problem of substance abuse, including "in-house", after care and follow-up program services to offenders.

JUVENILE CORRECTIONS

Following completion of the Correctional Master Plan for the State of Alaska in 1979, the previous Commissioner of the Department of Health and Social Services moved the juvenile corrections segment of the Division of Corrections to the Division of Family and Children's Services. The argument for this move was primarily that the juvenile side of the corrections organization always would receive secondary prioritization in relationship to the demands of adult confinement. The benefits were to be that greater attention to juvenile needs would be the result of the transfer of juvenile institutions and probation supervision services to the family services division.

We have heard ample and persuasive testimony that all persons who have been adjudicated as delinquent or criminal should be managed organizationally within the same governmental unit. We are convinced that the age of the offender separates juvenile crime from adult crime and that many of the most serious crimes are being committed by young offenders.

We have also found duplication of effort within the Department of Health and Social Services. Where previously

a probation officer in Nome, Barrow or Haines, for example, could supervise and direct both adults and juveniles, it now seems that these services may require both and adult and juvenile specialists.

It is also clear that serious juvenile offenders require strong and decisive management by both the courts and corrections. Violent juvenile offenders require secure supervision and incarceration.

Related to the preceding discussion, we make the following recommendations.

Recommendation 31:

The entire present organization of youth corrections should be moved as a Division of Juvenile Corrections, to the new Department of Corrections when reorganization is completed and functional. Management of this division should be decentralized to fit the regional organization of the Department. For example, the juvenile institution in Fairbanks and the juvenile probation and field services operations should be accountable to the regional director of corrections in Fairbanks. There is no apparent need to add additional staff to juvenile corrections as a result of this transfer, although there may be a need for additional juvenile staff for other reasons to be defined at a later date.

REHABILITATION AND ALTERNATIVES TO INCARCERATION

The public has a right to demand a positive return for its investment in corrections. While protection of the public from the offenders who are sent to jail or prison is reasonably assured, that protection exists primarily during the length of the prisoner's incarceration. Long term protection can only be brought about by the reformation of the offender as mandated by the Constitution of the State of Alaska. Prisoners can return to the state's population as better persons or more bitter as a result of their prison experiences.

Idleness in our prison system, mixed with overcrowding can and will produce chaos and perhaps result in violence to both property and persons. There is a dearth of meaningful work opportunities for the prison population. Make-work institutional maintenance is the routine alternative for even a minority of prisoners. Prison industries and public works projects should be implemented in all long term correctional centers. Restitution and community services opportunities for individual prisoners who are not security risks should be made available and taken into consideration by parole authorities for those prisoners who are eligible.

A system of relatively inexpensive community treatment halfway houses should be available within the Department of Corrections range of institutions. Offenders who fail or who are not yet ready for release should not be eligible for these lesser security facilities. However, all offenders nearing eventual release should be placed under the carefully coordinated and supervised system of halfway house resources. A full range of maximum to halfway house security level institutions is essential to the reformation of offenders and the efficient management of offender populations. We recommend the following:

Recommendation 32:

The prisoner population in the State of Alaska should be put to work. While the unemployment rate in Alaska is seasonally and regionally high, the citizens of the state can no longer endure an idle segment of otherwise able bodied prisoners. Prison industries and public works projects have been adequately addressed in the Correctional Master Plan. It is not our intent here to review those already voluminous plans. We intend to emphasize the need for a halt to planning and the commencement of activity. Corrections must be given the resources to provide meaningful work opportunities for the offender population. Cutting and clearing of land, stream rehabilitation, trail building, and parks maintenance and construction are but a few examples of public works projects which would benefit

the citizens of the state as well as the non-violent offender population. Eight hour a day work habits can be learned and law abiding skills can be developed. Adequate pay to prisoners can and should be permitted with the responsibility that the working offender repay the state and/or the victim for at least the partial cost of his crime. His or her family can be partially supported as a result of prison labor, board and room can be at least partially paid, and small amounts can be set aside in savings toward release. The non-working offender should not be entitled to the same privileges granted to the working population.

Recommendation 33:

We agree with current correctional policy that any offender who does not possess a high school diploma or its equivalent should be required to complete a G.E.D. program if feasible within the length of his or her incarceration.

We feel strongly however, that these offenders and those who already possess a high school diploma and who wish to take part in educational and recreational programs should do so in their non-working hours - the same as working citizens of the state outside of the prison system. Higher education courses, arts and crafts and other culturally oriented programs should be encouraged and funded. But prisoners pursuing college educations should seek out and apply for Alaska Student Loans the same as "freeworld"

students. The Department of Corrections should coordinate and contract with local school districts, the Department of Education, and the University of Alaska Statewide Systems for teaching resources.

Recommendation 34:

This Task Force has learned that there are approximately 150 parole eligible offenders within the corrections' institutional population. These offenders apparently meet all of the current qualifications for eligibility for parole consideration but have not applied. In relationship to the very high cost of prison bed space and the current crisis in overcrowding, we strongly recommend that a systematic evaluation of these offender eligibles be conducted immediately.

Recommendation 35:

The Department of Corrections should provide the opportunity to every offender the resources of a halfway house program for those about to be released. Offenders should be encouraged to be self-sufficient, apply for jobs, seek out community treatment resources and renew the ties with the law abiding community including family and friends. Close coordination and carefully organized transitions should be mandatory as the offender moves from secure institutions to halfway houses and finally to the community. Probation and parole field staffs should develop community resources and a system of community volunteers to assist

offenders in making the transition. Community service halfway houses should also be available to probationers, parolees, and ex-offenders who are in need of assistance. The use of university and community college interns should be encouraged in these facilities. Finally, the Department of Corrections should assure that alcohol, mental health and vocational rehabilitation services provided through other departments and divisions of state and local governments are heavily utilized. These offenders should not receive treatment not otherwise available to "ordinary" citizens. However, corrections must correct.

February 9, 1984

Senator Vic Fischer
Pouch V
Juneau, Alaska 99811

Dear Vic:

Although I have been a critic of Alaska's State Office in Tokyo, I found it very useful to me when I was in Tokyo both on State and personal business. My criticism has focused upon our Tokyo Office's preoccupation with Japan, and its failure to develop business with the world's fastest growing regional market: Southeast Asia.

Now it has been suggested we open similar offices in Seoul and Taiwan. I share your skepticism about the cost-effectiveness of this idea, but I do endorse the idea we should expand our Asian market development efforts.

Japan is our primary trade competitor in the entire Asian market, as well as our biggest customer. If we want to expand into the Chinese market, and largely through the overseas Chinese community, we will then expand naturally into the Southeast Asian market where we will be able to sell oil, gas, ore, and some steam coal. Rather than open an office in Taiwan, which will risk some regional political compromise and associated trade difficulties, we should consider Hong Kong, the center of the entire Asian market. Business can be done in Hong Kong without injuring other national or factional sensibilities in Asia. Several other States and larger muncipalities, and the Seattle Port Authority, maintain Hong Kong offices. I do not look for the character of Hong Kong to change appreciably after 1991. In any event, Hong Kong will continue to be the world center of trade with Peoples Republic of China.

If the State's Asian market development were to someday justify a third office, rather than in Seoul, which can be effectively covered from Tokyo, I would open an office in Jakarta, Indonesia, headquarters of the Association of Southeast Asian Nations, and work within the ASEAN organization to develop a Southeast Asian market for Alaska. (The members of ASEAN are Indonesia, Malaysia, Thailand, Singapore, the Philippines, and Brunei.)

I don't mean to downgrade Korea's importance as both a

customer as well as a competitor. But Korea must be seen in its proximity to Japan, and her relationship with Japan which has become her door into the mainland Chinese market.

I view the political likelihood of opening more State offices in Asia to be remote. We can cover all of Asia from Tokyo if we outreach to other Asian market places like Seoul, Taiwan, Hong Kong and Singapore. Such an outreach program will cost more money, but would constitute an expansion far more justifiable than opening more state offices in Asia at this time.

Thanks for your interest.

Sincerely yours,

Thelma

EO 56

Department of Education, would perform this responsibility. Under a reimbursable services agreement, that division has been doing this since 1979 anyway. Considering the nature of its other duties, that division is the most logical place for this state function to be performed.

Sincerely,

/s/
Bill Sheffield
Governor

EO 56 was referred to the State Affairs, Health, Education & Social Services, and Finance Committees.

EO 57

The following letter dated Janua v 9, 1984, accompanied EXECUTIVE ORDER NO. 57. (EO 57 is available from Documents.)

A zero fiscal note accomp ed EO 57.

Dear Representative Hayes:

Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.30.13)(b), I am transmitting an executive order that transfers the Alaska State Office from the Governor's Office to the Department of Commerce and Economic Development and renames it the Alaska Foreign Office.

Under current statutes (AS 44.19.074 -- 44.19.082), the Alaska State Office is in the Office of the Governor. Because the functions of the Alaska State Office are in the area of economic development, resource, and trade information, and contact between government and private industry, the appropriate administrative location for the office is the Department of Commerce and Economic Development. With a very slight re-wording, this Order just relocates the current statutes to that department's chapter from the Governor's Office chapter. No substantive changes are being made. State employees in the Tokyo office remain in the exempt service by virtue of AS 39.25.110(17).

Renaming the office as the Alaska Foreign Office gives it an obviously more appropriate name.

EO 56

Department of Education, would perform this responsibility. Under a reimbursable services agreement, that division has been doing this since 1979 anyway. Considering the nature of its other duties, that division is the most logical place for this state function to be performed.

Sincerely,

EO 56 was referred to the State Affairs, Health, Education & Social Services, and Finance Committees.

EO 57

The following letter dated January 9, 1984, accompanied EXECUTIVE ORDER NO. 57. (EO 57 is available from Documents.)

A zero fiscal note accompanied EO 57.

Dear Representative Hayes:

Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.30.130(b), I am transmitting an executive order that transfers the Alaska State Office from the Governor's Office to the Department of Commerce and Economic Development and renames it the Alaska Foreign Office.

Under current statutes (AS 44.19.074 -- 44.19.082), the Alaska State Office is in the Office of the Governor. Because the functions of the Alaska State Office are in the area of economic development, resource, and trade information, and contact between government and private industry, the appropriate administrative location for the office is the Department of Commerce and Economic Development. With a very slight re-wording, this Order just relocates the current statutes to that department's chapter from the Governor's Office chapter. No substantive changes are being made. State employees in the Tokyo office remain in the exempt service by virtue of AS 39.25.110(17).

Renaming the office as the Alaska Foreign Office gives it an obviously more appropriate name.

EO 57

I believe that this transfer will improve the efficiency of state government.

Sincerely,

/s/
Bill Sheffield
Governor

EO 57 was referred to the State Affairs and Labor & Commerce Committees.

EO 58

The following letter dated January 9, 1984, accompanied EXECUTIVE ORDER NO. 58. (EO 58 is available from Documents.)

Three fiscal notes which accompanied EO 58 appear in House and Senate Journal Supplement No. 13.

Dear Representative Hayes:

Under the authority of art. III, sec. 25, of the Alaska Constitution, I am transmitting an executive order that transfers two veterans' programs from the Department of Commerce and Economic Development to the Department of Military Affairs and renames that department as the Department of Military and Veterans' Affairs.

The veterans' services program (AS 26.10.010 -- 26.10.050) and the veterans' burial allowance program (AS 26.10.080) are both currently assigned to the division of investments within the Department of Commerce and Economic Development. This executive order would transfer these two programs to the renamed Department of Military and Veterans' Affairs.

The transfer places these programs where they logically belong and the departmental name change corresponds more nearly with the name of Title 26 of the Alaska Statutes, "Military Affairs and Veterans." Most of that title already relates to the Department of Military Affairs. After transfer of these two programs, AS 26.15, concerning the veterans' loan program in the Department of Commerce and Economic Development, will be the only part of AS 26 that relates to another agency. The amendment of AS 26.-15.030(c)(1) in sec. 13 recognizes that change by slightly modifying one of the duties of the Department of Commerce and Economic Development. The language being added to AS 44.35.020 in sec. 21 of the order, listing duties of the Department of Military and Veterans' Affairs, is a consolidation of current AS 26.15.030(c)(1) and (3) (the latter of which is being repealed in sec. 25 of the order).

POSITION PAPER/Department of Health & Social Services

Position Paper

on

Sponsor Substitute for House Bill 19

"For an Act repealing the certificate of need program; and providing for an effective date."

Sponsor Substitute for House Bill 19 repeals those portions of AS 18.07.021 which provide the statutory authority for the Department to administer a certificate of need program and repeals references to certificate of need in other sections of the Statute as well.

The Administration supports Sponsor Substitute for House Bill 19 as it is currently written.

The Department recommends that the Committee review statutory provisions which relate to health facility development including the following:

Medicaid Programs

The state's participation in the Medicaid program (State dollars fund approximately 52 percent of total program costs) has grown from $1 million in 1972 to nearly $38 million in FY 82 and total costs including federal participation have grown from $2 million to nearly $74 million in this same period. Ninety-two percent of patients in Alaska's long term care facilities are supported by the Medicaid program which means that the state (and federal) government has nearly the full burden of all operational costs for the facility. These Medicaid costs increase when additional beds are added, new equipment is purchased or new services (including new types of manpower) are offered. The Division of Public Assistance must effect a provider agreement with any qualified provider who seeks this agreement.

Capital Budget

Alaska has provided substantial financial assistance in the development of health care facilities. The 12th Legislature provided more than $36.6 million by line item appropriation to expand one hospital, replace two others and provide planning assistance for two rural hospitals. The number of requests for state funding has steadily increased.

Revenue Sharing

Alaska has a revenue sharing program (AS 29.90.010) which provides 25 percent plus interest of hospital construction costs to all non-profit hospitals. This program, administered by the Department of Community and Regional Affairs, provides further support for hospital construction projects in addition to any front-end capital funds provided by the state. This additional health facility construction resource underscores the importance of determining the actual need

POSITION PAPER/Department of Health & Social Services

for construction, before the State is committed to pay for a major portion of such construction.

Non-profit hospitals each receive a quarter of a million dollars in operating assistance each year through the state's revenue sharing program (AS 29.89.030). Nursing homes and other health facilities also receive assistance based on the number of beds they have. There are no specific requirements as to how such funds are to be expended. Not only are existing health facilities assured of these funds in addition to other state support, but new facilities are encouraged by the availability of these funds.

CERTIFICATE OF NEED
HB 19

STAFF REPORT

TO

HOUSE HESS COMMITTEE

FEBRUARY 10, 1983

CONTENTS

- Memo from House HESS staff: Dave Palmer
- Memo from Senate HESS staff: Nancy Dietrich
- Itemization of funds subject to sanctions
- Itemization of FY82 payments from municipal revenue sharing
- Activity summary-DHSS CON review
- Letter from Department of Health and Human Services Public Health Service regarding repeal of CON
- Memo summarizing the Arthur D. Little report

To: House HESS Committee
From: Dave Palmer
Date: February 10, 1983
Subject: HB 19, An act to repeal the Certificate of Need Program

The certificate of need program was established in 1974 by federal law (PL 93 641). It is intended to serve as a cost control aid and a planning review process. Through review of major capital expenditures, it is intended to serve as a check to a frivolous or misdirected projects. It directs capital construction investment to be compatible with statewide health planning goals. The certificate of need was designed to prevent unnecessary duplication which results in underutilization and inflated costs in a cost based reimbursement system for medical payments.

While discussion of the Certificate of Need (CON) process can lead to esoteric analysis of health care, government, and social issues, I have identified four topics that I believe will be discussed by the committee and those testifying on either side of this issue:

1. Federal mandates
2. Effect on State revenue sharing programs
3. Effect on State medicaid programs
4. The private enterprise vs government regulation issue.

Federal Mandates

The CON process is required by Federal law. Failure to comply with the law carried a sanction that provided that the Federal government would withhold "any allotment, grant, loan and loan guarantee made to and each contract entered into with an individual or entity in such State... under this Act (Public Health Service Act), the Community Mental Health Centers Act, the Comprehensive Alcohol Abuse and Alcoholism Prevention Treatment and Rehabilitation Act of 1970, and the Drug Abuse Office and Treatment Act of 1972."

The sanctions were to begin at a withholding of 25% of the entitlement and increase by 25% increments annually.

These sanctions have been lifted, temporarily at least, by a continuing resolution of Congress, which expires on September 30th of this year. Attached at the end of this paper is a letter itemizing those funds and programs that would be affected by the imposition of sanctions.

The Alaska Legislative Information Office in Washington, D.C. answered by inquiry about sanctions this way:

Question: What are the chances that the sanctions may be again suspended beyond September, 1983?

Answer: This is going to depend on what the 98th Congress chooses to do. The continuing resolution will stand unless Congress takes some action before the end of the fiscal year. If Congress does not act before June 30th of FY 84,the Dept. of Health and Human Services is powerless to impose the sanctions mandated by law and is waiting for some direction from Congress.

In response to a question about the reaction by the Department of Health and Human Services to Alaska's repeal of the CON program, the unofficial reply is: Alaska will still have to comply with some sort of federal regulations to receive health care funds and that starting from scratch (after repeal) might be much more difficult than trying to amend the existing program on CON. For instance, the Block Grant proposals from the 97th Congress included a CON requirement. The compromise bill by Senators Quayle and Kennedy (which was not accepted by the administration) included CON requirements. The Reagan administration favors repeal of CON, the Congress favors retention.

Regardless of the status of the sanctions, repeal of CON would probably mean loss of some federal health planning funds.

Effect on State Revenue Sharing Program

State aid through Title 29 revenue sharing funds for hospital entitlement grants, hospital capital construction, public roads, and volunteer fire departments outside the organized borough may be affected by repeal of the CON program. The reasoning is like this: If repeal of the CON removes a control on public health facility construction, other things being equal, one could expect an increase in construction. An increase in construction could mean more demand on the hospital entitlement and capital construction fund. Because all funds for the Title 29 topics listed above are allocated on a pro rata basis within the available appropriation, increasing the demand on one area decreases the funds available to all those entitled to funds.

Proponents for repeal explain that because the capital construction reimbursements are paid after financing and construction, the program is of little use to any but a few revenue producing facilities. I have attached the most current itemization of revenue sharing payments for health facilities and hospital construction aid.

Effect of State Medicaid

If the CON program does help contain health care costs by avoiding duplication and misdirected investments, it follows that repeal would have the opposite effect on health care costs. Because medicaid is a retrospective program, that is, payments are made after costs are incurred, an increase in health care cost will increase medicaid payments. Those arguing for retention of CON also point out that repeal could lead to overbuilding of facilities, and revenue for unused facilities must be generated from those services generating revenue. In short, costs subject to medicaid payments could increase.

There is a proposal by the Alaska State Hospital Association to develop a prospective rate structure for medicaid payments. This would allow for the establishment of approved rates by an independent commission. Discussion of the latitude of the commission for inclusion of economic depreciation, rate of return, and other costs associated with unused facilities would be relevant.

Private enterprise vs Government regulation

It is generally agreed that most health care facilities (especially in Alaska) do not fit within the free enterprise category. A free enterprise system operates when certain elements are present:

1. There exists a large number of buyers and sellers.
2. Consumers must bear the consequences of their decisions.
3. The seller must be able to leave or enter the marketplace freely.

With the exception of Anchorage, there are no Alaskan communities with more than one hospital. Choices for health care are limited.

Third party payments remove the consumer's responsibility for the financial consequences of their actions. There is little incentive to restrict demands on the system if someone else pays the bill. In 1981, only 32.1% of the health care users paid for their own treatment.

Health care is not a free entry marketplace. The CON review is only one of the restrictions to entry. There exists licensing standards, public funding processes, and licensing requirements for personnel...the physicians, nurses, and technicians. Because of the complexity of health care questions, consumers rely heavily on physicians. 70% of health care expenditures are influenced by physicians.

The question of private enterprise vs regulation is one that can be discussed over and over, but repeal or retention of the CON program will not address that issue.

CONCLUSIONS:

The certificate of need statute in Alaska is out of date. The limits are low, lower than those set by Federal law. Amendments could be proposed to address particular problems relating to the requirement for the replacement of existing equipment, replacement of like equipment, time limits for review and the like.

The purposes for which the CON procedures were enacted probably do not have much application in Alaska. Because of the large involvement by the State in the funding of hospitals, both for capital construction and operating facets, it can be argued that there exists sufficient programatic review. However, capital budget review and a detailed justification by a hospital administration in a CON process are completely different in scope and detail.

Several states, like Alaska, are currently out of compliance with the Federal requirements. Sanctions have never been imposed against a state, however, no state has repealed its CON program.

Repeal of the program will not reduce health care costs to the recipient of such care.

Repeal of the program may encourage expansion of existing facilities,

Repeal of the program will remove a state level review of health care facility development.

Repeal of the program will make health planning assistance for the Federal government difficult to obtain.

Repeal of the program will not remove Federal health planning requirements.

The current statutory requirements of the Alaskan CON program are obsolete.

SENATE HESS COMMITTEE

CERTIFICATE OF NEED PROGRAM

The Certificate of Need program was instituted by the Federal government, along with health planning concepts as a tool to stem the rapid growth rate of the health care industry(currently consuming nearly 10% of the GNP).

Certificate of Need is a review process conducted by the state health planning agency, including local input and public hearings, to determine the need for new health facility construction and equipment acquisition. The review process takes into consideration other facilities in the geographic area, or other facilities serving the same patient population.

Certificate of Need carries sanctions from the Federal government tied to other monies received by the state in Public Health areas, mainly related to block grants. No state has ever had funding denied on the basis of non-compliance with the program, nor has any other state attempted to repeal this program.

The current administration in Washington has contemplated the elimination of the program for over two years, intending to replace it with a form of marketplace competition to control growth. However, since the health care industry has never behaved as other business enterprises do (the growth rate in health care always exceeds the inflation rate common in any other industry, and is currently between 15 and 17% yearly and on the rise), the Reagan policy makers have been unable to conceive of a plan to replace Certificate of Need.

Much discussion has revolved around the value of the program, since the major attribute appears to be the discouragement of frivolous ventures which could not be justified to the review process. This program is the only control mechanism available to the state at this time to control duplication and unnecessary facilities and services.

The current threshold levels for review are artifically low in comparison to costs in the industry, as an attempt to raise the levels to federally approved standards by the 1982 Senate HESS Committee did not pass the legislative process. (approved levels are now $400,000 for equipment and $600,000 for construction plus a yearly inflationary factor).

A health planning bill passed the House in Congress in December of 1982 but was stymied in the Senate by the addition of a gasoline tax. Efforts are currently evident in Washington to retain the program and raise the threshold to one million dollars for all levels, although it is difficult to second guess what may happen. Sanctions against non-compliance have been suspended through September 30, 1983 by a continuing resolution, but even in this light many other states have opted to raise threshold levels for review process (Colorado has raised levels the highest, to $750,000).

Arguments for the repeal of the program mostly relate to the costliness of the review process, and that marketplace economics will control growth. In order to consider these arguments, one has to look at the questions asked in the review process:

The relationship of the proposed project to the applicable local and State Health Plans as well as any long-range plans (if any) for the health facility;

The need that the population to be served has for the proposed project;

The availability of less costly or more effective alternatives;

The immediate and long-term financial feasibility of the proposal, as well as the probable impact of the proposal on the costs of and charges for providing health care services;

The relationship of the purposes proposed to be provided to the existing health care system;

The availibility of resources (including health manpower, management personnel, and funds for capital and operating needs) for the provision of the services proposed;

The relationship, including the organizational relationship, of the health services proposed to be provided to ancillary or support services; and

The costs and methods of the proposed construction, including the costs and methods of energy provision.

These eight standards would, presumably have to be justified anyway in any attempt to receive financing through an institution, and would appear to be good planning policy. The most expensive plan ever submitted to the state of Alaska reportedly cost $25,000, although consultants and planners need not be hired. Most hospitals in the state have done C.O.N. applications internally or have borrowed planners from other facilities (Soldotna, Kenai and Valdez use resources of the Fairbanks Memorial Hospital). Many hospitals have also used their proposals for bid applications for construction. C.O.N. also includes public input locally through a hearing process which may not be available otherwise.

Marketplace competition does not work in the health care industry, and would be particularly ineffective in Alaska since all locations except Anchorage have no alternative institutions. The basic premise of market place economics assumes a willing , competent and knowledgeable buyer who is offered a reasonable opportunity to make a choice for competitive pricing to occur. Since physicians have relationships to one particular hospital where they have priviledges, and refer their patients there for treatment, this line of thinking will not support such a statement. Small hospitals in this state are moving in the direction of more regional care through expansion to more specialized services within the community. Planning for the inter-relationship of these services with large facilites may not be accomplished without a unified state planning function (It should be noted here that the state health planning agency has been defunded in the FY 84 Executive budget)

Current expansion plans in Anchorage support the fact that marketplace economics is not a viable solution. Even though the Municipal Health Commission in Anchorage has projected that Anchorage will need only 456 to 514 beds in 1990, plans by Humana and Providence, if allowed to procede unheeded would add 178 to 236 unnecessary beds to the community. Competition in this case seems to apply to construction and not to fair pricing.

The two Certificate of Need applications currently being considered for the Anchorage area are:

Humana - 93 beds - $20 million ($56 million with interest) 65% occupancy
Providence - 150 beds - $80 million ($185.6 million with interest) 90% occupancy.
(These do not include any reference to the approved Certificate of Need for the Lake Otis Hospital - 125 beds)

What effect do these proposals have on state revenues, and what would be the further effect if the Certificate of Need program were repealed allowing facilities to build at will?

Revenue Sharing for Hospitals AS 29.90 provides a yearly amount of $250,000 or $1,000 per bed to hospitals for operating expenses.

C & RA Hospital Construction Assistance provides for repayment of a quarter of the construction costs(including interest) within the first five years, with no repayment clause for situations like the sale of the Teamster Hospital to Humana.

How will insurance premiums be affected by repeal?

The Medicaid Program(52% state funds) and the General Relief Medical Program(100% state funds) will also be affected by any construction, since the Medicare guidelines allow a percentage of construction costs related to applicable patient caseload to be added to reimburseable costs. The state's Medicaid program alone has risen from $4 million in 1972 to almost $70 million in 1984 (projected, but due to an additional increase through added caseload of up to 2,000 from withdrawal of Indian Health Service non-native dependents).

When visiting Providence Hospital last year with the Senate HESS Committee, we were told that the percentage of Medicaid clients was 13, even considering a 10% client caseload, this will add over $18 million to the Medicaid budget for Providence proposed construction alone. If the Federal "CAP" on Medicaid goes into effect, these costs will simply be shifted to other third party payors and not absorbed by the hospitals, whether or not the beds remain unused.

The health insurance industry and the Municipal Health Planning Commission of Anchorage are opposed to the repeal of Certificate of Need, and the Legislature must ask itself if we can afford to give up the only control on health expenditures available to the state.

DEHFD

A. CERTIFICATE OF NEED REVIEWS COMPLETED

1. Lake Otis Clinic, Anchorage -- "Grandfathered CON" for 125 general acute care hospital; (issued 7/27/77)

2. Sitka Community Hospital, Sitka -- Review status of "Grandfathered CON" for new facilty; (six-month extension issued 12/31/78)

3. Lake Otis Clinic, Anchorage -- Review of status of "Grandfathered CON" for new facility; (six-month extension issued 12/31/78)

4. Fairbanks Memorial Hospital, Fairbanks -- Purchase and installation of laboratory information system; (information in archives)

5. Fairbanks Memorial Hospital, Fairbanks -- Application to Medical Facility Authority for bond sale; (information in archives)

6. Alaska Hospital and Medical Center, Anchorage -- Provide 21 bed chemcial dependency unit; (information in archives)

7. Juneau Regional Rehabilitation Facility, Juneau -- Construction of a 16 bed drug abuse/detoxification and rehabilitation facility; $654,000. (issued 6/7/79)

8. Providence Hospital, Anchorage -- Purchase and instalation of a simulator for radiation therapy; $195,365. (issued 9/4/79)

9. Providence Hospital, Anchorage -- Purchase and installation of a G.E. flouricon system; $285,000. (issued 2/14/80)

10. Lake Otis Clinic, Anchorage -- Review to determine status of "Grandfathered C/N"; (Bonified certificate status continued 3/10/80)

11. Fairbanks Memorial Hospital, Fairbanks -- Remodel of labor, delivery, and nursery areas; $540,000. (issued 2/26/80)

12. Central Peninsula Hospital, Soldotna -- expansion and improvement of facility (phase one); $6,762,646. (issued 4/2/80)

13. Providence Hospital , Anchorage -- Purchase and installation of a linear accelerator; $1,785,000. (issued 5/15/80)

14. Valdez Community Hospital, Valdez -- Purchase and installation of replacement radiology room; $150,000. (issued 5/15/80)

15. Seward General Hospital, Seward -- several energy saving construction projects; $286,113. (issued 10/6/80)

16. Valley Hospital, Palmer -- Minimal expansion and remodeling of facility; $2,000,000. (issued 6/9/80)

17. South Peninsula Hospital, Homer -- expansion and improvement of facility; $6,472,300. (issued 10/28/80)

18. Faith Hospital, Glennallen -- Expansion of outpatient areas of facility; $700,000. (issued 11/3/80)

19. Providence Hospital, Anchorage -- "Grandfathered C/N" for 250 bed acute care facility; (issued 5/1/81)

20. Alaska Hospital and Medical Center, Anchorage -- "Grandfathered C/N" for 199 bed acute care facility; (issued 12/4/81)

21. Sitka Community Hospital, Sitka -- 1122 review of diagnostic ultrasound services; $79,320. (five year lease with option to purchase) (issued 11/5/80)

22. Providence Hospital, Anchorage -- Replacement of radiology room; $236,000. (issued 12/26/80)

23. Juneau Regional Rehabilitation Facility, Juneau -- Remodel facility to meet hospital standards; $250,000. (issued 2/21/81)

24. Central Peninsula Hospital, Soldotna -- Purchase and installation of radiographic and fluorscopic imaging system; $305,899. (issued 5/21/81)

25. Wrangell General Hospital, Wrangell -- Renovation and Expansion of facility; $6,870,000. (issued 7/13/81)

26. Providence Hospital, Anchorage -- Purchase of replacement radiology room; $230,000. (issued 7/20/81)

27. Providence Hospital, Anchorage -- Construction of hostel for outpatients and family of inpatients; $900,000. (issued 7/29/81)

28. Petersburg General Hospital, Petersburg -- Renovation and expansion of facility; $7,150,000. (issued 8/11/81)

29. Alaska Hospital and Medical Center, Anchorage -- Purchase adjacent professional office building for expansion of chemical dependancy unit and other hospital areas; $15,236,000. (issued 9/24/81)

30. Central Peninsula Hospital, Soldotna -- Expansion of surgery and other areas of facility (phase two); $5,849,000. (issued 11/10/81)

31. Family Centered Birth, Juneau -- Construction of a birthing center; Review terminated following a Department of Law Opinion regarding applicability of C/N statute to birthing centers; (review terminated 12/22/81)

32. Alaska Treatment Center, Anchorage -- Construction of a new free-standing inpatient rehabilitation facility; $11,400,000. (denied, 1/22/82)

33. Valley Hospital, Palmer -- Construction of a new hospital adjacent to existing facility; $10,570,000. (issued 2/19/82)

34. Cordova Hospital, Cordova -- Construction of a new hospital at a new site; $15,075,000. (issued 4/13/32)

35. Providence Hospital, Anchorage -- Purchase and installation of a laboratory computer; $440,000. (issued 4/23/82)

36. Petersburg General Hospital, Petersburg -- Modification of previously issued CON, increase in space and expenditure; $2,005,000. (issued 5/18/82)

37. Fairbanks Memorial Hospital, Fairbanks -- Construction of new 5 floor patient tower, increase in acute care beds; $26,200,000. (issued 6/2/82)

38. Humana Hospital, Anchorage - Application for temporary certificate for expansion of chemical dependency unit; $1,000,000. (denied 6/28/82)

39. Providence Hospital, Anchorage -- Purchase and install replacement hospital incinerator; $200,000. (issued 7/20/82)

40. Humana Hospital Alaska, Anchorage -- Purchase and install CT full body scanner to replace CT head scanner; $848,000. (issued 10/1/82)

41. Advanced Health Systems, Anchorage -- Construct new free-standing Raleigh Hills alcoholism treatment hospital; $3,700,000. (issued 11/16/82)

42. Charter Medical Corporation -- Construct new free-standing psychiatric and substance abuse hospital; $12,248,000. (issued 11/16/82)

43. Providence Hospital, Anchorage -- Purchase and install replacement CT full body scanner; $832,000. (issued 11/16/82)

44. Providence Hospital, Anchorage -- Purchase and install new digital fluorography system; $256,000. (issued 11/30/82)

B. CERTIFICATE OF NEED APPLICATIONS RECEIVED AND IN PROCESS OF REVIEW

1. Providence Hospital, Anchorage -- Purchase and install new hospital information system; $2,698,000.

2. Providence Hospital, Anchorage -- Construct new 160 bed patient tower, increase acute care beds, add inpatient rehabilitation program, expand ancillary departments; $79,754,000.

3. Surgery Center, Inc., Anchorage -- Construct new free-standing ambulatory surgery center to replace current facility; $2,698,000.

4. Humana Hospital Alaska, Anchorage -- Renovation and expansion of emergency department; $1,012,200.

5. Humana Hospital Alaska, Anchorage -- Construction of new patient tower adjacent to existing hospital, 73 bed increase in acute care beds, addition of 20 bed inpatient rehabilitation program; $20,000,000.

6. Lake Otis Hospital, Anchorage -- Hearing to determine whether CON should be revoked; cost of project not identified. Decision - pending.

C. ADDITIONAL LETTERS OF INTENT RECEIVED BUT NOT REVIEWED AS APPLICATIONS

1. Valley Hospital, Palmer -- Termination of skilled nursing services. No further action by VH. (LOI dated 12/13/79)

2. Metlakatla Indian Community, Metlakatla -- construction of long term care facility. $200,000. No further action by MIC. (LOI dated 12/26/79)

3. Lake Otis Clinic, Anchorage -- Construction of 265 bed acute care/chemical deependancy hospital. $7,000,000.+ No further action by LOC. (LOI dated 2/14/80)

4. Providence Hospital, Anchorage -- Construction of 132 bed addition and expansion of services. $25,400,000. No further action by Providence. (LOI dated 3/31/80)

5. Health Care Services - Alaska, Anchorage -- Sale of Nakoyia Health Care Center. $14,200,000. No further action by HCS. (LOI dated 6/6/80)

6. Alaska Kidney Foundation, Anchorage -- Construction of a new facility for Alaska Kidney Center. Capitalized five year lease = $200,000. No further action by AKC. (LOI dated 6/23/80)

7. Norton Sound Regional Hospital, Nome -- Provision of family services unit. No further action by NSRH. (LOI dated 9/25/80)

8. Kodiak Island Hospital, Kodiak -- Offering of diagnostic ultrasound services. Decision - diagnostic radiology is a part of radiology department and not a new service; therefore, is not subject to CON review. (LOI dated 10/14/80)

9. Alaska Hospital and Medical Center, Anchorage -- Addition of 21 beds to chemical dependancy unit. No further action by AHMC. (LOI dated 10/21/80)

10. Alaska Hospital and Medical Center, Anchorage -- Purchase of professional office building for facility expansion; $10,000,000. (LOI dated 12/28/80)

11. Ketchikan Genceral Hospital, Ketchikan -- Replacement of computer system. $103,000. Decision - not subject to CON review. (LOI datded 2/11/81)

12. Ketchikan General Hospital, Ketchikan -- provision of recompression chamber. $55,000. Decision - not subject to CON review. (LOI dated 7/21/81)

13. Akeela House, Anchorage -- new building for residential drug abuse therapy program. $460,000. Decision - not subject to CON review. (LOI dated 8/4/81)

14. Ketchikan General Hospital, Ketchikan -- Offering of diagnostic ultrasound services. $70,000. Decision - not subject to CON review. (LOI dated 8/19/81)

15. Providence Hospital, Anchorage -- Predevelopment application for large construction project; $4,000,000. (withdrawn 10/8/81)

16. Humana, Anchorage -- Purchase of Alaska Hospital and Medical Center by Humana. $65,000,000. Decision - not subject to CON review. (LOI dated 11/13/81)

17. Comprehensive Care Corporation, Anchorage - Establishment of a 50 bed alcoholism and chemical dependency hospital in Anchorage. Letter of intent still valid through 2/16/83, however letter received from applicant indicates that application was not expected to be submitted. (LOI dated 2/17/82)

18. Providence Hospital, Anchorage -- Offering of home health services; cost uncertain. Decision - subject to CON review. (LOI dated 1/19/92)

19. Kodiak Island Hospital, Kodiak - Purchase of gamma camera, $90,000. Decision - not subject to CON review. (LOI dated 2/10/82)

20. Humana Hospital, Anchorage - Relocation and expansion of chemical dependency unit, increase CDU from 21 beds to 36 beds; $1,000,000. Letter of intent withdrawn. (LOI dated 5/10/82)

21. Anchorage Community Mental Health, Anchorage - Establishment of residential transitional facility. Decision - not subject to CON review. (LOI dated 6/14/82)

22. Humana Hospital, Anchorage, Purchase of hospital data processing services; Decision - not subject to CON review. (LOI dated 10/11/82)

23. Penninsula Addiction Center, Inc., Soldotna - Establishment of new freestanding 12 to 24 bed substance abuse treatment facility; cost undetermined. Application anticipated. (LOI dated 5/14/82)

24. Bartlett Hospital, Juneau -- Construction of new patient tower, increase in acute care beds; $20,000,000. Application anticipated. (LOI dated 7/21/82)

25. Providence Hospital, Anchorage -- Purchase of new cardio-vascular imaging system; $820,000. Application anticipated. (LOI dated 10/1/82)

26. Providence Hospital, Anchorage - construction of employee child care center; $1,400,000. Decision - not subject to CON review. (LOI dated 10/14/82)

27. Sisters of Providence, Inc. Seattle - Purchase of Nakoyia Health. Care Center Applicability of certificiate of need requirement under review by Department of Law. (LOI dated 12/10/82)

David R. Palmer
Alaska State Legislature
House of Representatives
Pouch V
State Capital
Juneau, Alaska 99811

Dear Mr. Palmer:

Although our Regional Office has not yet received a copy of House Bill 19 proposing to repeal the Alaska (AS18.07) Certificate of Need law, our recent telephone conversation provided sufficient information to reply to your January 28, 1983, letter to Mr. John D. Whitney.

Several issues are involved and although interrelated, for clarity sake ought to be considered separately, at least at first.

Section 1536 of P.L. 93-641 as amended does not, as suggested in your letter, deal with exemption of Certificate of Need requirements. In essence, it allows local Health Systems Agencies to be dropped, as a requirement of P.L. 641, and transfers their functions to the State. This includes HSA CON functions usually performed under section 122.310. Therefore, the effect of the 1536 request if granted to Alaska would be to close out Health Systems Agencies, while necessitating a State plan to accomplish the required local planning functions now accomplished by these planning bodies.

The National Health Planning and Resources Development Act of 1974, P.L. 93-641 as amended by P.L. 96-79 and P.L. 96-538, requires a State Certificate of Need program and specifies minimal requirements for this activity. These requirements are not currently being met by Alaska's CON program. Current law could be changed to gain compliance. The absence of CON enabling legislation, however, would clearly remove the possibility of compliance and prevent Full designation of the Alaska State Health Planning and Development Agency (SHPDA).

Without Full designation within specified time limits, P.L. 93-641 as amended, calls for termination of Federal support to the SHPDA and imposes certain sanctions on other Public Health Service dollars going into Alaska. The language of the Continuing Resolution passed in December 1982, however, specifically prohibits imposition of such penalties during FY 1983. Therefore, revocation of Alaska's AS 18.07 would have little impact for the remainder of FY 1983. Beyond FY 1983, the impact could be minor or drastic, depending on Congressional action and the continuance of a Federal planning act.

Potentially negative impact issue from revoking Alaska CON Statute might come from budget reductions in the upcoming SHPDA's grant application. Since approximately 30% of the SHPDA's activities have been allocated to CON, the proposed budget would probably be reduced proportionately if CON activities were no longer authorized.

During the telephone conversation you mentioned that you heard many States were considering termination of their CON program. I believe such information is not valid. Last week Mr. Whitney and I attended a week long meeting in Washington, D.C., with nine other Regional Offices and Headquarters staff. During this period, in addition to informal information exchange, each of the ten Regions reported on Planning and CON activities in the States on the basis of intelligence recently collected.

You may find several of our observations relevant to your current task:

1) Many States are---as is usual---revising their planning statute and rules to better meet their own environment and to make the State Planning less dependent on Federal support, or in anticipation of future block grant funding for Planning.

2) Several States that had requested and received 1536 designation, such as Alabama and Texas, apparently wish to regain their former planning status and reconstitute their Health Systems Agencies and local planning. (While a final program decision has not been made on this issue, the current perception is that once done, it probably cannot be undone under existing rules.)

3) Because the free-market elements do not yet exist in order to allow competition to be the major controlling factor for health care costs, most States intend to strengthen their CON and health facility rate review regulation mechanisms to cover the next few years. Highly populous States, such as New York, as can be noted by the recent report of the Health Care Capital Policy Advisory Committee" which is attached, see CON and rate review as critically important tools of planning and cost management. Other States, such as Washington, while having one of the nation's most effective programs, perceive CON and rate review as an essential but perhaps intermediate range solution to health costs management over the next few years.

On the telephone I mentioned a new and very thorough study by Arthur D. Little, Inc., that suggests CON and capital expenditure reviews are definitely cost-effective. I am including an October 1982 transition briefing memo that includes a summary of the findings of this report and some other facts you may find useful.

I hope you find this information responsive to your needs and I encourage you to call or write if we can be of further assistance.

Sincerely,

Edgar LeRoy Ross

Transition Briefing Memo 21

October 28, 1982

1. CERTIFICATE OF NEED IS STILL PLANNING'S "CENTER RING" ACTIVITY

Despite the fact that 15 states have written "sunset" provisions to end Certificate of Need in the next two years, review of proposed capital investments is still the number one priority of many State Agencies and HSAs.

In the West and across the nation, the number of applications and the dollar value of hospital proposals have been rising dramatically. Last year, California experienced a 50 percent increase in the number of CON applications. The proposed capital cost of all proposals in California climbed nearly 100 percent from 1980, totalling $696 million in 1981. Add to that $309 million for replacement projects, which were exempt under the California CON statute, and the total is more than $1 billion in health facility capital investment in California 1981.

In Denver, five hospitals completed to build a new facility in the South Denver metro area. The proposals were denied after the Governor and the employers' coalition testified in opposition. In Contra Costa County, a bedroom surburb of the San Francisco Bay Area, the Alameda-Contra Costa HSA has received seven letters of intent for applications whose capital cost may exceed $100 Million. Many agencies similarly report a surge of CON applications in the past 18 months.

Given limited staff resources and volunteer energy, some agencies are questioning how much priority they should give to Certificate of Need and capital expenditure review.

A new study by Arthur D. Little, Inc., suggests that CON and capital expenditure review are definitely cost-effective. In a study prepared for the Office of the

Western Center for Health Planning
703 MARKET STREET – SUITE 535 · SAN FRANCISCO, CALIFORNIA 94102 · (415) 546-7601

Sponsored by the Western Consortium for Continuing Education for the Health Professions, Inc.: Schools of Public Health and University Extensions, University of California at Berkeley, University of California at Los Angeles, University of Hawaii, Affiliate Graduate Program in Health Services Administration, University of Southern California

Assistant Secretary for Health*, the consultants made the following findings:

- CON has been an effective inhibitor of rising capital expenditures in a study of five states (Colorado, Florida, Maryland, Massachusetts and Oregon), in the period 1974-78;
- CON/capital expenditures review programs were successful in averting 13 percent of hospital projects and saving 16 percent of the proposed capital investments;
- The CON process is not dominated by teaching hospitals or facilities with higher rates;
- CON programs have a dampening effect on the amount of capital investment in the state;
- New capital investments increase costs--over a 10-year period $1 of new capital is estimated to generate $1.84 of additional operating costs, in constant dollars;
- Increases in operating costs due to new capital investment was highest in proprietary hospitals ($0.33), compared with government ($0.20) and community hospitals ($0.16);
- Capital investments in equipment generate a larger increase in annual operating costs; and
- If every hospital annually reinvested 5 percent of its operating budget in new capital stock (beds, equipment, other), the operating costs would be increased by 10 percent each decade even without inflation.

The consultants concluded that if competitive approaches to controlling health care costs are to succeed, it may be necessary to continue capital expenditure review programs and controls until cost-reducing competitive systems are functioning. They predict the immediate effect of deregulating

---

*Development of an Evaluation Methodology for Use in Assessing Data Available to the Certificate of Need (CON) and Health Planning Programs", Final Report, Arthur D. Little, Inc., Cambridge, MA, April, 1982.

hospital investment in the name of competition will be a surge in hospital operating expenditures. Health Planning has the potential to significantly lower hospital costs, an important policy finding in light of the Administration's proposed elimination of both planning and Certificate of Need.

2. ROCHESTER'S "MINICAP" PROJECT reported a 10 percent increase in hospital costs in 1982, barely half the national rate of 18.7 percent. Nine Rochester (New York) hospitals are participating in the second year of a five-year experiment in voluntarily living within a community-wide revenue cap.

The Rochester program was profiled in the Western Center's recent conference "Hospital Rate Regulation: Lessons for California from Mandated and Private Approaches". Hospitals improved their fiscal position this year with all nine in the black despite declining admissions and a difficult economy. The experimental reimbursement program provides predictable income, greatly enhancing liquidity and cash position. New York hospitals are under great financial pressure now with nine out of ten voluntary hospitals operating in the red for at least two of the five years from 1974-78. The Rochester experience is demonstrating that implementing a voluntary financial discipline -- with appropriate mechanisms -- can be beneficial both to the hospitals and the community. The program, with cooperation of the local Health Systems Agency and State agency has allowed service improvements and capital investments in the hospitals. A contingency fund helps hospitals adjust to changes in patient volume during the year, and subsidizes operating revenues for approved Certificate of Need projects.

A copy of the report, "Affordable Health Care: Rochester Area Hospitals Strategies for the 80's," is available from the Western Center's Reference Service. For more information about the program, contact James A. Block, M.D., President, Rochester Area Hospitals' Corporatopn, 220 Alexander Street, Suite 608, Rochester, New York 14607.

Dave I would ask for this

3. SPECIAL PLANS AND PROJECTS

Congressional extension of funding for health planning suggests that the emphasis upon "transition" may be shifting back to planning. A number of agencies have developed special plans, or intend to do so in the coming year. These "special plans" are often the outcome of studies or implementation efforts. The special plans are usually problem-specific, or focus on the special health needs of a particular population group or region within the Health Service Area. Outside

funding or "co-production" with a cooperating agency has made a number of these special plans possible.

Western Center staff have developed a list of possible "special plans" which HSAs and State agencies might develop, including:

- "Year 2000" Health Plan
- Regional Capital Investment Plan
- Community Health Promotion Plan
- Regional "Quality of Life" Assessment
- Medicaid Plan
- Health Plan for the Aged
- Community Services Cutback Plan
- Block Grant Plan
- County Health Plan (City or other local region)
- "Boomtown" Plan
- Categorical Disease Plan, e.g., Regional Cardiac Care Plan
- Rural Health Plan
- Facility-Specific Plan, e.g., Free-standing Emergency Rooms Plan

The Center is conducting a survey in November of all HSA special plans. The result will be a published compendium of all of the plans, with a short description, funding, outside resources and responsible staff. The special plans will be abstracted for computerization as part of a national project by all three Centers to develop a "Plan Document File" for computerized search of all plans developed by Health Systems Agencies and State planning agencies. Copies of the special plans will be available through the Western Center's Reference Service. For information, contact Rus Coile, Western Center staff, telephone: (415)546-7601.

This project has been funded with Federal Funds from the Health Resources Administration, Department of Health and Human Services, under contract HRA 232-79-0037. The contents of this publication do not necessarily reflect the view or policies of the Department of Health and Human Services, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

The Honorable Mae Tischer
Alaska State House of Representatives
State Capitol
Pouch V
Juneau, Alaska 99811

Position Paper on HB 19 and a companion bill being submitted to the Senate -- pertaining to an "Act repealing the certificate of need program."

Dear Representative Tischer:

Providence Hospital joins the rest of the hospitals in this state in requesting the repeal of the certificate of need law and endorsing House Bill 19 (Fritz and Hayes) and the companion bill about to be submitted to the Senate. The process which this law sets in place is cumbersome and wasteful and totally inappropriate for Alaska.

The major impetus for the law was to control excess hospital beds in many large cities and to help control rising health care costs. The belief was that by controlling the number of beds, capital expenditures and new services, costs would be contained. The results have been much less than desirable throughout the country, and, in Alaska, have been needless, wasteful, cumbersome and costly.

The lack of success in Alaska is better termed overkill. Designed for areas of heavy population, excess hospital beds and competition, the law does not work and is inappropriate for our small state for several reasons:

- The law only covers private facilities, and does not cover public health, military or state owned institutions.
- Alaska has only one city with more than one hospital, and there are only three hospitals in the whole state (eligible for review) of over 100 beds.
- The law is reactive to existing decision making processes. Hospitals in Alaska already have local public review and approval designed in their own budget review processes. Many hospitals are owned by

municipalities, and all have governing boards or advisory boards of local citizens. These citizens and municipalities should have control of the expansion and budgetary decisions of their own institutions. Several other layers of bureaucracy and review are cumbersome, costly and inefficient. For our Certificate of Need, the following is an actual review cycle showing the different bureaucratic levels we had to go through just to have a decision made on one project.

Letter of intent to file certificate of need

Pre-application conference (HSA, Municipal Health Commission, State)

Public Hearing on Certificate of Need Application (State)

Joint Project Review (HSA and Municipal Health Commission)

Concurrent Review (HSA and Municipal Health Commission)

Board Review (Municipal Health Commission)

Board Review (HSA and Southcentral Health Planning & Development Agency)

Commissioner's Review (State)

From the time of holding the application conference to the ultimate decision by the Commissioner, the process has taken over a year.

- The law places a costly burden on all institutions who have to prepare and submit Certificates of Need. The documents which need to be prepared are massive, require hundreds of hours of preparation and at least 35 each need to be produced for the review boards and other parties. The 110 day minimum time period for a review is unrealistic, and often times, the institutional cost of delaying implementation means an eventual increase in price of the piece of equipment or construction project due to inflation.

- The law also passes on a cost to the public in that state, regional and local staff are needed to coordinate the program, prepare staff analyses and hold public meetings. We are estimating that the cost of state, regional and local staffs have increased the cost of health care by at least $8,000,000 in he last six years.

- The dollar limit for what must be reviewed is absurdly low. In 1982 alone, Providence spent hundreds of man hours and other monies preparing six CON applications for such things as a $167,000 replacement incinerator (the old one being 25 years old was required to be replaced by both State and EPA codes!); a CT scanner and Cath lab replacement; and a $250,000 computer enhancement for an x-ray machine. Believe it or not, the STATE did not give approval on the incinerator until the 90th and final day for a decision to be made.

The Alaska State Hospital Association is unanimous in endorsing the repeal of the CON law. We have also received indications from several legislators and the Alaska Medical Association that repeal of the CON law would be best for a growing state such as Alaska.

We are supportive of local planning for Alaska's health care needs. The process, however, should be positive and proactive -- encouraging institutions to respond to needs in the community -- not negative, reactive and cumbersome.

Your support in repealing the certificate of need law in Alaska would be appreciated. With an early response and passage of HB 19 or the companion bill in the Senate, a tremendous and costly burden will be lifted from Alaska's hospitals.

Thank you for your consideration.

Sincerely,

Al M. Camosso
Administrator

John D. Whitney
Department of Health Resources Development
Public Health Service
1321 Second Ave.
Seattle, Wa. 98101

Dear Mr. Whitney:

I am the staff person assigned to develop background material for the House Committee for Health and Social Services in the Alaskan Legislature.

I am writing to solicit your comments on the attached House bill 19 that proposes to repeal the certificate of need process in Alaska. If this is done in conjunction with an application for exemption under §1536 of PL 93 641, would the effect be different, assuming the exemption is granted?

I know that this is not a new issue, just the names and faces have changed. This bill will be scheduled for a hearing soon. I will appreciate any help you can provide.

Sincerely,

David R. Palmer

Historical Note

References in Text. Subchapter XIV of this chapter, referred to in subsec. (b)(13), is classified to section 300o et seq. of this title.

1979 Amendment. Subsec. (b)(5). Pub.L. 96–79, § 122(b), inserted "and contain provisions to assure compliance with requests for information made by health systems agencies in accordance with section 300l–2(h) of this title" following "section 300n–1 of this title".

Subsec. (b)(6). Pub.L. 96–79, § 111(c), inserted in cl. (A), provision exempting from the public meeting requirement any part of a meeting in which it is likely that information respecting the performance or remuneration of an agency employee will be disclosed and such disclosure would constitute a clearly unwarranted invasion of privacy or that information relating to the agency's participation in a judicial proceeding will be disclosed, and in cl. (C), provision exempting from the public records requirement any records or data respecting the performance or remuneration of an employee the disclosure of which would constitute a clearly unwarranted invasion of privacy or records or data of the agency relating to its participation in a judicial proceeding.

Subsec. (b)(7)(A). Pub.L. 96–79, § 120(b), inserted "and for the coordination by the State Agency in the conduct of its activities with any entity of the State which reviews the rates or budgets of health care facilities in the State" following "health and health care".

Subsec. (b)(7)(C). Pub.L. 96–79, § 115(b)(3), added cl. (C).

Subsec. (b)(10). Pub.L. 96–79, § 101(b)(2), inserted provision requiring the State Agency to assemble and report to the Secretary data, other than data regularly collected by any entity of the Department of Health, Education, and Welfare, required by the Secretary to carry out his responsibilities under section 300k–1(e) of this title, including data on personnel, facilities, and other resources needed to meet State health plan goals.

Subsec. (b)(13). Pub.L. 96–79, §§ 117(b)(4), 123(c)(1)(A), substituted in provision preceding subpar. (A), "paragraph (4), (5), or (6)" for "paragraph (3), (4), (5), or (6)" and "or (g)" for "(g), or (h)", inserted in subpar. (A), "in a timely manner" following "be reviewed" and ", or, if there is no such State law" following "administrative agencies", and in cl. (B), "under subparagraph (A)" following "reviewing agency".

Subsec. (c). Pub.L. 96–79, § 123(e)(1), substituted "once every three years" for "once every year".

Change of Name. "Department of Health and Human Services" was substituted for "Department of Health, Education, and Welfare" in subsec. (b)(10) pursuant to section 509(b) of Pub.L. 96–88 which is classified to section 3508(b) of Title 20, Education.

Effective Date of 1979 Amendment. Amendment of subsec. (b)(13) by section 117(b)(4) of Pub.L. 96–79 effective on Oct. 4, 1979, except that if the Secretary of Health and Human Services determines that any amendment made by such section will require a State to change its laws before the State health planning and development agency designated for such State may perform its functions under section 300m–2(a)(4)(B) of this title, such amendment shall take effect in such State, if the State legislature is in a regular session on Dec. 17, 1980, and the legislature will be in session for at least 12 months from Dec. 17, 1980, 12 months from Dec. 17, 1980, or if the State legislature is in session on Dec. 17, 1980, but 12 months do not remain in such session after Dec. 17, 1980, or if the State legislature is not in session on Dec. 17, 1980, 12 months after the beginning of the first regular session of the legislature beginning after Dec. 17, 1980, see section 129(b)(2) of Pub.L. 96–79, set out as an Effective Date note under section 300m–6 of this title.

Amendment of subsec. (b)(5) and (7) by Pub.L. 96–79 effective one year after Oct. 4, 1979, see section 129(a) of Pub.L. 96–79, set out as an Effective Date of 1979 Amendment note under section 300l of this title.

Transfer of Functions. All functions vested by statute in the United States Civil Service Commission were transferred to the Director of the Office Personnel Management (except as otherwise specified) by Reorg Plan No. 2 of 1978, § 102, 43 F.R. 36037, 92 Stat. 3783, set out under section 1101 of Title 5, Government Organization and Employees, effective Jan. 1, 1979, as provided by section 1-102 of Ex.Ord.No.12107, Dec. 28, 1978, 44 F.R. 1055, set out under section 1101 of Title 5.

Health Systems Agencies, State Health Planning and Development Agencies, and Statewide Health Coordinating Councils; Organizational and Related Changes; Changes in Functions. Effective on or after Oct. 4, 1979, health systems agencies, State health planning and development agencies, and Statewide Health Coordinating Councils may make the organizational and related changes required by the amendments to this section by Pub.L. 96–79 and may act in accordance with the changes in their functions made by the amendments to this section by Pub.L. 96–79, see section 129(a)(2) and (3) of Pub.L. 96–79, set out as an Effective Date of 1979 Amendment [illegible] title.

Legislative History. For legislative and purpose of Pub.L. 93–641, see 1974 U.S. Code Cong. and Adm.News, p. 7842. See, also, Pub.L. 96–79, 1979 U.S.Code Cong. and Adm.News, p. 1306.

C.J.S. States § 24.

Notes of Decisions

1. Exhaustion of administrative remedies

Health systems agency's petition for judicial review of the state board of health's recommendation to the secretary that defendant hospital be reimbursed with federal funds for certain expenses related to a proposed expenditure was properly dismissed for petitioner's failure to exhaust its administrative remedies, since the review mechanism of this subchapter requires that health systems agency whose recommendation has been rejected by a state agency request a review by an agency of the state, since petitioner did not even allege that it made any request for such a review, and since it was entitled to a review, it was not shown that a request for review would have been futile. Southern Indiana Health Systems Agency, Inc. v. State Bd. of Health, Ind.App.1979, 391 N.E.2d 845.

§ 300m–2. State health planning and development functions

Performance by State agency of State designated under section 300m(b)(3) of this title

(a) Each State Agency of a State designated under section 300m(b)(3) of this title shall, except as authorized under subsection (b) of this section, perform within the State the following functions:

(1)(A) Conduct the health planning activities of the State and implement those parts of the State health plan (except as provided under section 300m–3(c)(2)(E) of this title) and the plans of the health systems agencies within the State which relate to the government of the State, and (B) determine the statewide health needs of the State, including the need for mental health services in the State, after providing reasonable opportunity for the submission of written recommendations respecting such needs by the State health authority, the State mental health authority, and other agencies of the State government, designated by the Governor for the purpose of making such recommendations, and after consulting with the Statewide Health Coordinating Council.

(2) Prepare and, review at least triennially, and revise as necessary a preliminary State health plan which shall be made up of the HSP's of the health systems agencies within the State. In carrying out its functions under this paragraph, the State Agency shall refer the HSP's to the State health authority, the State mental health authority, and other agencies of the State government (designated by the Governor to make the review prescribed by this sentence) to review the goals and related resource requirements of the HSP's and to make written recommendations to the State Agency respecting such goals and requirements. Such preliminary plan may, as found necessary by the State Agency,

contain such revisions of such HSP's to achieve their appropriate coordination or to deal more effectively with statewide health needs determined under paragraph (1)(B). Such preliminary plan shall be submitted to the Statewide Health Coordinating Council of the State for approval or disapproval and for use in developing the State health plan referred to in section 300m–3(c) of this title.

(3) Assist the Statewide Health Coordinating Council of the State in the performance of its functions generally.

(4)(A) Serve as the designated planning agency of the State for the purposes of section 1320a–1 of this title if the State has made an agreement pursuant to such section, and (B) administer a State certificate of need program which applies to the obligation of capital expenditures within the State and the offering within the State of new institutional health services and the acquisition of major medical equipment and which is consistent with standards established by the Secretary by regulation. A certificate of need program shall provide for procedures and penalties to enforce the requirements of the program. In performing its functions under this paragraph the State Agency shall consider recommendations made by health systems agencies under section 300*l*–2(f) of this title.

(5) After consideration of recommendations submitted by health systems agencies under section 300*l*–2(f) of this title respecting new institutional health services proposed to be offered within the State, make findings as to the need for such services.

(6) Review on a periodic basis (but not less often than every five years) at least those institutional and home health services which are offered in the State and with respect to which goals have been established in the State health plan and, after consideration of recommendations submitted by health systems agencies under section 300*l*–2(g) of this title respecting the appropriateness of such services, make public its findings. In making the appropriateness review required by this paragraph of a health service, the State Agency shall at least consider the need for the service, its accessibility and availability, financial viability, cost effectiveness, and the quality of service provided.

(7) Prepare an inventory of the health care facilities (other than Federal health care facilities) located in the State and evaluate on an ongoing basis the physical condition of such facilities. Such inventory and evaluations shall be reported to the health systems agencies designated for health service areas located (in whole or in part) in the State for purposes of the functions of the agency under section 300*l*–2(b) of this title.

(8) Provide technical assistance to individuals and public and private entities in obtaining and filling out the necessary forms for the development of projects and programs.

If in determining the statewide health needs under paragraph (1)(B) or in preparing or revising a preliminary State health plan under paragraph (2) the State Agency does not take an action proposed in a recommendation

submitted under the applicable paragraph, the State Agency shall when publishing such needs or health plan make available to the public a written statement of its reasons for not taking such action.

Performance by other State agencies

(b)(1) Any function described in subsection (a) of this section may be performed by another agency of the State government upon request of the Governor under an agreement with the State Agency satisfactory to the Secretary.

(2) The requirement of paragraph (4)(B) of subsection (a) of this section shall not apply to a State Agency of a State until the expiration of the first regular session of the legislature of such State which begins after January 4, 1975.

(3) A State Agency shall complete its findings with respect to the appropriateness of any existing institutional health service within one year after the date a health systems agency has made its recommendation under section 300*l*–2(g) of this title with respect to the appropriateness of the service.

Statement

(c) If a State Agency makes a decision in carrying out a function described in paragraph (4), (5), or (6) of subsection (a) of this section which is not consistent with the goals of the applicable HSP or the priorities of the applicable AIP, the State Agency shall submit to the appropriate health systems agency a detailed statement of the reasons for the inconsistency.

(July 1, 1944, c. 373, Title XV, § 1523, as added Jan. 4, 1975, Pub.L. 93–641, § 3, 88 Stat. 2246, and amended Aug. 1, 1977, Pub.L. 95–83, Title I, § 106(n), 91 Stat. 385; Oct. 4, 1979, Pub.L. 96–79, Title I, §§ 115(c)(1)(A)–(C), (i)(2), 117(b)(1), (2), 118(a)(2), (b)(2), 123(c)(2), (3), (e)(2), (g)(1), 93 Stat. 607, 608, 610, 618, 619, 621, 625–627; Oct. 7, 1980, Pub.L. 96–398, Title III, § 303, 94 Stat. 1588; Aug. 13, 1981, Pub.L. 97–35, Title IX, § 902(e)(1), 95 Stat. 560.)

Historical Note

1980 Amendment. Subsec. (a)(1)(B). Pub.L. 96–398 added provisions respecting applicability to the need for mental health services in the State.

1979 Amendment. Subsec. (a). Pub.L. 96–79, § 115(c)(1)(C), inserted following par. (8), provision requiring that if the State Agency, in determining the statewide health needs or in preparing or revising a preliminary State health plan, does not take an action proposed in a recommendation, the State Agency make available to the public a written statement of its reasons for not taking such action when publishing such needs or health plan.

Subsec. (a)(1). Pub.L. 96–79, § 115(c)(1)(A), redesignated existing provision as subpar. (A), and in subpar. (A) as so redesignated, substituted "except as provided under section 300m–3(c)(2)(E) of this title" for "under section 300m–3(c)(2) of this title", and added subpar. (B).

Subsec. (a)(2). Pub.L. 96–79, § 115(c)(1)(B), (i)(2), substituted "review at least triennially, and revise as necessary" for "review and revise as necessary (but at least annually)" and "statewide health needs determined under paragraph (1)(B)" for "statewide health needs" and inserted provision requiring the State Agency to refer the health systems plan to the State health authority, the State mental health authority, and other agencies of the State government to review the goals and related resource requirements and to make written recommendations to the State Agency respecting such goals and requirements.

Subsec. (a)(3). Pub.L. 96–79, § 123(c)(2) struck out "review of the State medical facilities plan required under section 300o–2 of this title, and in the" following "State in the".

KIM..I FOUND THAT I SENT THE SECOND PAGE TWICE. I AM LEARNING THIS SPACE AGE STUFF SLOWLY. I WILL SEND THE FIRST PAGE NOW.

I AM TRYING TO GATHER INFORMATION CONCERNING THE CERTIFICATE OF NEED PROCESS THAT FINDS ITS ROOTS IN PL 93-641. THERE IS A BILL IN OUR COMMITTEE THAT PROPOSES TO REPEAL REFERENCE TO SEC. 1521 (B)(3) AND SEC. 1523 OF PL 93-641...THE CERTIFICATE OF NEED PROCESS. I AM TRYING TO DETERMINE THE IMPACT ON ALASKA IF THAT BILL IS PASSED.

SANCTIONS AGAINST STATES THAT DO NOT CONFORM TO THE FEDERAL LAW INCLUDE REDUCTION OF PUBLIC HEALTH SERVICE GRANTS AND CONTRACTS TO ANY ENTITY IN THE STATE BY 25% THE FIRST YEAR, THEN 50%,75%, AND 100% OVER THE NEXT THREE YEARS.

MY UNDERSTANDING IS THAT ALASKA HAS ALREADY BEEN PLACED ON "CONDITIONAL" STATUS DUE TO NON COMPLIANCE WITH PORTIONS OF THE CERTIFICATE OF NEED PROGRAM (PIONEER HOMES ARE NOT INCLUDED). I HAVE ASKED JOHN WHITNEY OF REGION X IN SEATTLE FOR HIS AGENCY'S REACTION TO A REPEAL OF THE CERTIFICATE OF NEED. IN PRACTICE, IT APPEARS THAT THE FEDERAL GOV'T HAS NOT INSTITUTED SANCTIONS, EVEN THOUGH STATES LIKE CALIFORNIA HAVE...CONT NEXT PAGE

MEMORANDUM

TO: Representative Mike Beirne

FROM: Leslie Longenbaugh, Research Staff

RE: Health Care Planning Agencies
Research Request Number 82-32

Jens Zehbe of your staff asked that we provide information on moving to a "§1536 designation" in Alaska to replace the State's health systems agencies. Mr. Zehbe also asked that we provide a copy of the Ohio legislation that dissolved that state's health systems agencies in favor of the §1536 designation.

The §1536 designation derives from Section 1536 of PL 93-641, the National Health Planning and Resources Development Act of 1974. The Act required that governors designate health systems agencies in local health care service areas; these agencies assess the health care needs of their local populations and make recommendations regarding certificates of need, which must be obtained by providers who plan to make capital improvements costing more than $600,000 or purchase equipment at a cost of more than $400,000.[1] The State Health Planning and Development Agency (SHPDA) and Statewide Health Coordinating Council (SHCC), also required and partially funded under the Act, use the health systems agencies' recommendations in issuing certificates of need to health care providers.

The federal government provides funding for each health systems agency according to the size of the population served; states of small population, such as Alaska, receive a minimum level of funding for their health systems agencies. The states share in the cost of the PL 93-641 agencies.

Section 1536 exempts certain political bodies, such as Guam and Puerto Rico, from the requirement that they establish local health systems agencies in conjunction with their State Health Planning and Development Agencies and their Statewide Health Coordinating Councils. Also made exempt by §1536 were those states that had no health planning agencies at all prior to 1975.

---

[1]These figures, $400,000 and $600,000, are the result of 1981 amendments; the original Act of 1974 specified that all improvements or purchases costing more than $150,000 required a certificate of need.

An amendment to the Omnibus Budget Reconciliation Act of 1981 allows states to apply to the Secretary of Health and Human Services for a §1536 designation (an exemption from the requirement that they provide health systems agencies) under two conditions: 1) any state could apply for an exemption, showing good cause, before November 1, 1981; and 2) a state with a population of less than 600,000 may apply for an exemption at any time. Alaska, with a population of just over 400,000, would be eligible to apply for the §1536 designation under the second of these conditions. States that move to a §1536 designation are eligible to receive for use in health care planning some of the federal funds that would have been allocated to the health systems agencies if the state were not exempt.

In the last year, the governors of Rhode Island and Hawaii have applied for and received exemptions on the grounds that their populations are under 600,000. The governors of five additional states with larger populations applied to Secretary Schweiker for §1536 designation before the November 1, 1981 deadline. The Secretary granted all five requests; Ohio, Nebraska, Missouri, Louisianna, and Alabama have taken the §1536 designation and are now dismantling their health systems agencies.

Ohio was the first state to apply for a §1536 designation under the conditions of the Omnibus Health Care Reconciliation Act of 1981. We spoke with Frankie Williamson of the Health Planning and Development Agency in Ohio's Department of Health,[2] who reported that in applying for the exemption, the governor of Ohio was responding to a political battle that had been raging for some time. Because they refused to issue a number of certificates of need to potential builders of hospitals, the state's ten health systems agencies were seen by some legislators and others as standing in the way of a source of employment. Ms. Williamson noted that the Ohio health systems agencies were somewhat more aggressive in the pursuit of their advisory function than their counterparts in most other states have been. When the state Department of Health issued certificates of need over their objections, the health systems agencies sometimes took the state to court, charging that the state health planning and development agency had been "arbitrary and capricious" in overriding the agencies' recommendations. For its part, the State of Ohio accused the health systems agencies of being "politically motivated" in their recommendations.

---

[2]Frankie Williamson, Ohio Department of Health, Columbus; telephone: (614) 466-3543.

Because the National Health Planning and Resources Development Act gave responsibility for applying for and administering health care agency funds to governors rather than to legislatures, it was the executive branch in Ohio that moved to change that state's designation. The only legislation that was introduced concerning the move was enacted after the change in designation, to "clean up" the state statutes by deleting all mention of the official duties and privileges of the dissolved health systems agencies. This legislation was important in Ohio, because there was some question over whether the §1536 designation would actually dissolve the agencies if they were still included in the statutes. The legislation finally was enacted, after much debate, in late 1981. Because the bill did not actually enact the change to a §1536 designation but instead only deleted the health systems agencies from the statutes, and did not contain any language that would be instructive to you, we did not obtain a copy of the legislation.

In addition to amending the conditions of eligibility for the §1536 designation, Congress, at the request of President Reagan, in 1981 reduced substantially the level of federal funding for the state health care planning agencies that are required under PL 93-641. The President has been said to feel that health care costs can best be reduced through free market competition, achieved through deregulation of the industry. This philosophy was reflected in Ohio, according to Ms. Williamson, where the governor and legislature chose limited deregulation of health care over continued local planning. According to staff at the State Health Planning and Development Agency[3], the federal funding for Alaska's three health systems agencies has been reduced by almost 40%, to approximately $165,000 per agency; the Legislature has allocated $100,000 to each of the health systems agencies for the present fiscal year.

If we can be of further assistance to you, please call on us.

LL/bf

ments. Sole community providers would be eligible for exceptions or adjustments at the Secretary's discretion. Psychiatric, long term care, tuberculosis, and pediatric facilities would continue to receive cost-plus reimbursement while HHS works on separate payment plans for each group. The payment system would be phased in according to each hospital's fiscal year. HHS hopes to have the plan implemented for fiscal 1984, which begins on Oct. 1, 1983.

Despite Schweiker's enthusiasm for the DRG model, Congress is expected to take a careful look at the details of the plan. Madigan has not warmed to the concept and may prove to be a difficult problem for HHS. Waxman is expected to maneuver to gain some jurisdiction over such a bill even though it is a Medicare Part A proposal and therefore under the Ways & Means Committee's province. Reliable Capitol Hill sources say they believe Congress will spend the next year talking about prospective payment but do nothing until 1984 in time for the fiscal 1985 budget. Congress can rely on the cost controls instituted under TEFRA to continue to contain costs while this debate goes on.

STATUS REPORT

Health Planning Odyssey Continues

With the failure of the 97th Congress to pass a new health planning bill (HLeg. 12-22-82), the fate of that program remains in limbo. However, it is clear that despite Reagan Administration opposition, the planning program continues to have strong bipartisan Congressional support. New attempts by the Administration to eliminate or cripple the program are almost sure to fail. In fact, if anything at all happens in 1983, Congress is likely to pass a strengthening measure.

During the past two years, the Administration has made several legislative and regulatory attacks on the planning system. Health and Human Services Secretary Richard Schweiker and Office of Management and Budget director David Stockman brought with them to the Administration a dislike for the regulatory aspects of planning. Strong hospital industry influence on HHS and White House officials fueled the anti-planning fire.

In his first budget, President Reagan proposed a three-year phase-out of the planning program. Funding was to be cut in half in fiscal 1982 and more or less eliminated after fiscal 1983. At the same time, the Administration sought changes in planning's certificate of need laws and a diminution of the power of health systems agencies -- the local planning component.

Congress resisted the call for a phase-out but did agree to make substantive changes in the planning law. Certificate of need thresholds were increased to the following new levels: capital expenditures $600,000, major medical equipment $400,000, and new institutional health services $250,000. Congress also agreed to establish a new flexibility for states whereby a governor could ask HHS to allow that state to eliminate all HSAs and perform planning activities on a statewide basis. This power became known as the "1536 option" named for the section of the new bill pertaining to the flexibility. In the time since that bill became law, 11 states have taken the 1536 option. HHS is encouraging other states to join them.

The Administration was not satisfied with those changes and, in its fiscal 1983 budget proposal, provided only $2 million for planning activities. These funds were to be used to close offices of remaining planning agencies. Reagan officials hoped that they would have more luck with this proposal since the planning authority expired on Sept. 30, 1982. However, despite several attempts, Congress never agreed to a planning bill but continued to fund the program into fiscal 1983 through a continuing appropriations resolution.

The Administration might have had its way if not for the opposition of key House Republican health leader Rep. Edward Madigan (R-Ill.). Madigan, who holds the ranking Republican spot on the House Commerce Health Subcommittee, decided early in 1982 that some planning function is necessary in the multi-billion hospital industry. He began work with the National Council of Community Hospitals to develop an alternative planning program. The plan that Madigan arrived at would have repealed the current program but created a new planning block grant. CON thresholds would rise to $5 million for capital expenditures while leaving the other thresholds at their current levels. It would have allowed states the option of continuing local planning but provide no federal funding for it.

Madigan put forward a draft version of his bill for comment in the hospital and planning community and by fellow health policy makers in Congress. It received a cool welcome from all concerned but was not dismissed by any. Rep. Henry Waxman (D-Calif.), chairman of the Commerce Health Subcommittee, had introduced his own planning bill and was not immediately open to compromise with his Republican counterpart. Later, this lack of trust between the two men proved to be a key factor in the long delay that eventually led to the rejection of any planning bill.

With Waxman holding steady on the left, Madigan moved to the right to court conservative colleagues on the Health Subcommittee. In order to gain support from conservative Democrats Richard Shelby (D-Ala.) and Phil Gramm (D-Tex.), Madigan agreed to change his draft bill to significantly increase the CON thresholds. Now, he proposed a $10 million threshold for capital expenditures and $1 million for each of the remaining two categories.

By making these moves, Madigan picked up enough support to pass his bill in the Health Subcommittee. Waxman moved to stymie Madigan in the full committee but could not gain enough support to pass his own bill. When Madigan seemed almost sure to have the votes to get his bill approved in committee, Waxman agreed to compromise. The two men, along with Shelby, Gramm, Rep. John Dingell (D-Mich.), and James Broyhill (R-N.C.) fashioned a compromise that would have set CON thresholds at $5 million for capital expenditures, and $1 million each for medical equipment and health services. That bill later passed the House by a wide margin.

Meanwhile, in the Senate Human Resources Committee planning debate took many turns. Democrats on the panel backed an extension of planning while committee chairman Orrin Hatch (R-Utah) opposed the program. However, Republican moderate Lowell Weicker (Conn.) supported planning and developed a proposal that he offered as an amendment to a biomedical research bill. Weicker seemed to have the support of two Republican colleagues on the panel, Dan Quayle (R-Ind.) and Paula Hawkins (R-Fla.). Those two deserted Weicker at the last minute and his amendment was defeated. Quayle, under pressure from his Republican governor, pressed Hatch and Hawkins to develop some kind of planning proposal. The

three later introduced S.2720, a bill that would have extended planning for one year with no CON thresholds and no local planning. The skeleton bill was introduced but never considered by the Senate.

While Congress debated the merits of health planning legislation, the Administration continued its attempts to weaken the existing program. It placed sharp restrictions on the minimum staffing levels for HSAs. While the staffing requirements were on the federal books, they had been developed during a time when planning was a growing program. With the changes enacted by Congress in 1981, the staffing requirements were obsolete. Several HSAs were sent termination notices before Congress stepped in once again.

Behind the leadership of Senate Appropriations Labor-HHS Subcommittee chairman Harrison Schmitt (R-N.Mex.), Congress approved a restriction on HSA closing for understaffing. The language was added to a supplemental appropriations bill.

The final round of fighting over health planning came during the recently completed lame-duck session of the 97th Congress. Madigan, Waxman, Hatch, and others saw that the session was the last chance they would have to put together a compromise bipartisan planning measure. Working quietly behind the scenes, the three men agreed to a bill that would continue the program for two-and-one-half years, raise the CON thresholds to $1 million for capital expenditures and $500,000 for other costs, and provide for the repeal of the program on March 31, 1985. That bill cleared the House as part of a package including alcohol and drug abuse funding and was sent to the Senate for what was expected to be quick approval.

It was here that HHS Secretary Schweiker stepped in and gummed up the works (HLeg. 12-22-82). Schweiker insisted that Congressional Republicans would do better in the 98th Congress in obtaining repeal of the program. This argument seemed to fly in the face of common political belief that the GOP would have difficulty passing much of anything in the coming year because of Democratic gains in the House. Madigan argued that he felt Waxman would be able to steamroll him in committee and gain House passage of a liberal planning bill. Madigan added that Waxman is clever enough to attach such a bill to a popular legislative vehicle that would be difficult to block in the Senate. Schweiker, citing his 20 years of experience in Congress, stuck to his guns and blocked Senate approval of the bill.

Schweiker's actions seemed even more peculiar in light of the action taken by Congress on the continuing appropriations resolution. Congress not only funded planning at $64 million, but added language that blocks HHS from terminating HSAs for understaffing or because they have been on conditional status for more than 12 months. It also places a one-year restriction on the imposition of penalties on states without CON laws.

The results for planning agencies are almost all positive. Funding will continue at the same level as 1982. CON thresholds will remain at $600,000 for capital expenditures, $400,000 for major medical equipment, and $250,000 for institutional health services. HHS may well be unable to terminate any HSA durthe coming year. And Waxman and his fellow planning supporters will have a stronger hand in seeking a planning bill in 1983.

ABSTRACT

STATES APPEAR TO BE THE MOST APPROPORIATE LEVEL AT WHICH RISING HEALTH COSTS CAN BE CONTROLLED, SINCE STATES OFFER THE OPPORTUNITY FOR EXPERIMENTATION ON VARIOUS APPROACHES TO HEALTH CARE COST CONTROL. HOSPITAL COST CONTAINMENT PROGRAMS HAVE BEEN ENACTED IN 18 STATES, WITH PROGRMS REGULATING RATES AND CHARGES APPEARING TO BE SUCCESSFUL IN CONTROLLING HOSPITAL COST INCREASES. SEVERAL STATES HAVE ENACTED ALTERNATIVES TO INSTITUTIONAL CARE PROGRAMS DESIGNED TO PROVIDE NURSING-HOME LEVEL CARE TO PERSONS IN THEIR OWN HOME. OTHER STATES HAVE MOVED TO REDUCE THE OVERSUPPLY OF HOSPITAL BEDS AND PROVIDE EFFICIENT UTILIZATION OF AVAILABLE SERVICES.

ABSTRACT

IN 1978, THE MI LEGISLATURE ENACTED A LAW DESIGNED TO HELP SLOW THE STATE'S ESCALATING HEALTH CARE COSTS BY ESTABLISHING A PLANNING METHODOLOGY TO IDENTIFY AND REDUCE THE STATE'S EXCESS HOSPITAL CAPACITY. WHILE THE LEGISLATION, THE CONSTITUENCY THAT DEVELOPED IT AND THE PROCESS USED TO ACHIEVE IT ARE UNIQUE TO MI, THE LAW IS AN EXAMPLE OF ACTIONS THAT INDIVIDUAL STATES CAN INITIATE TO CONTROL RISING HEALTH CARE COSTS. IN THIS ARTICLE, A FORMER HEALTH CONSULTANT TO THE MI LEGISLATURE DESCRIBES THE COALITION THAT DEVELOPED THE LEGISLATION, THE KEY POINTS OF DEBATE IN ENACTING THE BILL, THE STEPS INVOLVED IN IMPLEMENTING THE ACT, AND FUTURE HURDLES TO THE PROGRAM'S SUCCESS.

ABSTRACT

THIS ARTICLE SUMMARIZES RECENT TRENDS IN STATE LEGISLATION IN THE AREA OF HEALTH. AMONG THE LEGISLATION DISCUSSED IN THIS ISSUE ARE NEW CERTIFICATE OF NEED LAWS IN ID AND IN, STATE REGULATION OF HEALTH INSURANCE, LAWS IN KS AND PA TO REDUCE THE NUMBER OF INSPECTIONS OF MEDICAL CARE FACILITITES REQUIRED FOR LICENSING THESE FACILITIES, LAWS REGARDING THE LICENSING OF MEDICAL PERSONNEL AND CHANGES IN LAWS RELATING TO NURSING HOMES. IT ALSO DISCUSSES A RECENT FE COURT DECISION THAT RULED THAT PERSONS OVER 65, NO MATTER HOW WEALTHY, COULD TRANSFER THEIR ASSETS TO SOMEONE ELSE AND BECOME IMMEDIATELY ELIGIBLE FOR MEDICAID.

ABSTRACT

LEGISLATION NOW AWAITING PRESIDENT CARTER'S SIGNATURE GIVES STATES A ONE-YEAR DEADLINE EXTENSION FOR COMPLIANCE WITH THE CERTIFICATE OF NEED (CON) REQUIREMENTS MANDATED BY THE HEALTH PLANNING AMENDMENTS OF 1979. THE EXTENSION, LONG SOUGHT BY NCSL, WAS INCLUDED IN THE CONFERENCE REPORT ON THE HEALTH SCIENCES PROMOTION ACT OF 1980. APPROVAL OF THE DEADLINE CHANGE PRECLUDES THE STATES' LOSS OF SUBSTANTIAL FE HEALTH FUNDS FOR NON-COMPLIANCE WITH FE CON LEGISLATION. NCSL CONTACT: KATHY BRENNAN WIGGINS, 202/624-5441.

ABSTRACT

CURRENT GOVERNMENT POLICY REGARDING HOSPITALS IS FOUNDED ON THE THEORY THAT THE NATION HAS ENOUGH RESOURCES. THE NEW GOAL IS TO ACHIEVE MORE EQUITABLE DISTRIBUTION AND USE OF THESE RESOURCES THROUGH A MORE RATIONALE SYSTEM OF MEDICAL SERVICES ALLOCATION. BUT AN EXCESS SUPPLY OF HOSPITAL BEDS, INSTEAD OF CAUSING RATES TO FALL, LEADS TO A SMALLER PERCENTAGE OF OCCUPIED BEDS AMONG WHICH TO SPREAD THE HOSPITAL'S FIXED COSTS. THIS RESULTS IN HIGHER COSTS PER UNIT. INCLUDED IS A DICUSSION OF DEFICIENCIES WITH STATEWIDE HEALTH PLANNING AND PROBLEMS WITH CERTIFICATE OF NEED, HOSPITAL COST CONTAINMENT, MEDI-CAL COST CONTROL, AND GOVERNMENT REGULATION OF HOSPITALS.

Representative Bette Cato
Alaska State Legislature
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Bette:

From our point of view at Seward General Hospital, prompt passage of House Bill No. 19 repealing the State Certificate of Need program is needed immediately.

This hospital wants to and needs to offer long term care to the patients of this community under the "Swing-Bed Program" passed by Congress. To do so we must go through the Certificate of Need process because the Department of Health and Social Services has not issued a blanket Certificate of Need for this level of care. The Certificate of Need process takes 90 to 120 days to complete and the expense runs as much as $4,500.00.

I submit to you that those dollars could be better spent in patient care rather than paper work to justify a program that all agree needs to be implemented without further delay.

Thank you for your attention to this matter.

Yours truly,

C. Keith Campbell, Administrator

February 03, 1983

The Honorable Bette Cato
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Cato:

The Board of Directors of the Northern Alaska Health Resources Association has discussed the issue of repeal of the Certificate-of-Need (CON) law as currently proposed in HB 19. We reached agreement that a modified CON process is preferable to repeal. Although we recognize that there are problems with the current process, we believe that they can be solved by making major revisions in the regulations rather than by repealing the law. There is little disagreement that the threshold limits that trigger CON review are too low or that review of many non-clinical expenditures is a nuisance. Moreover, the process should be tightened up so that reviews are completed in a timely and efficient manner.

There are several reasons why we believe the CON process should be retained; however, the most important reason has to do with citizen participation in deciding what health care services and facilities are most appropriate and affordable for a specific community or region of the state. The issue has not been whether a CON should be approved or denied but rather that a discussion or negotiation has taken place between the community and health-care facility regarding local, regional and statewide needs. The Certificate-of-Need process has been a forum for these discussions and has served to guide the appropriate development of health care services and facilities throughout the state.

A recent trend has been to appropriate increasing amounts of public funds for construction or expansion of health care facilities in Alaska (i.e., $31,500,000, FY 81-82). Moreover, we are seeing the cost of health care increasing at a rate which has been consistently higher than the general rate of inflation. It has been demonstrated that capital investment contributes significantly to the growth of total hospital expenditures. Although it is true that general inflation, sophisticated technology, and increasing staff requirements also contribute to rising costs of hospital care, hospital capital investments add to the operating costs by an amount in excess of the value of the investment. In April, 1982, Arthur D. Little, Inc., a health economics consulting firm under contract with the National Center for Health Services Research, estimated that the present value of additional operating expenditures in the next ten years is $1.84 for every dollar invested in capital improvements, exclusive of depreciation and debt service. Uncontrolled

529 5th avenue, suite 8 fairbanks, alaska 99701 telephone (907) 456-2553

capital expenditures for more or bigger health care facilities can only serve to drive up operating costs at an accelerated rate. These increased costs are ultimately passed on to the patient or community. We believe that people must continue to have the opportunity and responsibility through the CON process to determine what level of health services they are willing to pay for. Competition in the health care field essentially does not exist, especially in Alaska where most communities cannot afford more than one health care facility; therefore, the only way that we can keep a lid on overbuilding is through a capital expenditures review program similar to the current Certificate-of-Need program.

Several states have already revised their CON process (among them Colorado and New Mexico) with full support of their respective state hospital associations. Revision of Alaska's CON process must occur if we expect to see the process work as it was designed to do. The following revisions are offered for consideration:

1. Increase the threshold level which triggers a CON review from $150,000 to <u>at least</u>:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

In summary, there is little disagreement that there are problems with the current CON process; however, the forum that the CON process provides for community discussion about the relative merits of a proposed project far outweigh what we perceive to be correctable problems. We recommend revision of the CON process rather than repeal.

Sincerely,

J. B. Carnahan
President

POLICY STATEMENT

Blue Cross of Washington and Alaska supports the retention of Certificate of Need. That process should, however, be modified as follows:

1. The dollar threshold should be increased to $1,000,000 per application.

2. Modifications which are necessary to reduce health and safety hazards should be exempted.

3. The State Health Planning and Development Agency should become the sole health planning body for the State and should be charged with health planning for all Alaskans. A provision should be included allowing municipalities to establish local health councils to the State Health Planning and Development Agency, who may make recommendations on planning matters.

Certificate of Need

In spite of Administration efforts to withdraw federal support for health planning and regulation, many States are moving ahead to bring their certificate of need (CON) statutes into conformity with 1979 amendments to the National Health Planning and Resources Development Act (PL 93-641). Most States have until the end of 1981 in which to comply with the CON requirements of the 1979 Amendments. Federal law stipulates that if a State CON program is found out of compliance with the federal requirements, the State will face a sizeable reduction in the amount of federal health funds it receives.

During 1980, thirteen states took action to bring their CON statutes into compliance, despite the fact that federal regulations implementing the 1979 Amendments were not issued until late in the year.

In 1981 eleven other States (**ARKANSAS, MISSISSIPPI, NEW HAMPSHIRE, NEW MEXICO, NORTH DAKOTA, SOUTH DAKOTA, TEXAS, UTAH, TENNESSEE, WEST VIRGINIA** and **WYOMING**) adopted comprehensive CON legislation. All of these laws, however, must await a determination by the Secretary of HHS to assure they meet federal specifications. So far only one state--**HAWAII**--has been judged to be in full compliance with the 1979 Amendments.

Further CON action is possible in fourteen other States where legislation has been introduced but no final action taken as of yet. A total of twelve States, however, have either refused to act or are unlikely to take action this year, thereby bringing themselves into direct conflict with federal law.

Of the States which enacted CON legislation in 1981, several referenced the federal requirements as the catalyst for their action. **ARKANSAS** and **ALABAMA**, however, have both adopted language which effectively repeals their state CON statutes in the event the Health Planning Act (PL 93-641) is not reauthorized or is repealed. The **ALABAMA** law (H 826) sets the effective date for repeal on the last day of the regular session of the legislature following the repeal of PL 93-641; the **ARKANSAS** statute makes the repeal coincidental with the repeal of the federal law. **TEXAS** amended its earlier law making CON review applicable only to those facilities and services required as a minimum by federal law.

In adopting some amendments to its CON legislation, **UTAH** reaffirmed its previous policy in support of competition. **UTAH's** law--known as the Pro-Competitive Certificate of Need Act--states that one primary objective is to increase competition and improve market conditions. The law directs that among the criteria the agencies must consider for conducting CON reviews is "the relationship of the proposed project to the existing health care system of the area in which the project is proposed to be provided, including the effect of the proposed facility or service on the maintenance of competitive conditions in the local market." The law further directs the administering agencies to consider the effectiveness of competition and consumer choice in protecting the public interest.

In other CON actions, **VIRGINIA** (HB 1452) adopted a one-year moratorium on the issuance of any certificates of need for the construction of any new nursing

homes or an increase in the bed capacity of any existing nursing homes. **MISSISSIPPI** (HB 427) extended its existing moratorium on certificates of need for nursing homes for one additional year. **WISCONSIN** is considering (AB 66) a two-year moratorium on granting certificates for both hospitals and nursing homes.

FLORIDA amended (SB 459) its CON statute giving the department extended authority to enforce statements of intent expressed by applicants which the department relied on in making a decision to issue the certificate of need.

Health Planning

On the health planning front, a few initiatives are unfolding at the state level in response to the proposed withdrawal of federal support. Bills (A 6962, S 4876) in the NEW YORK legislature would provide an additional $400,000 in state funds to health systems agencies to continue to perform state-mandated health planning functions. A resolution (HCR 5026) adopted by the **KANSAS** legislature directs the SHCC to study the future of health planning activities in the State, emphasizing the need to find ways to maintain planning activities in relevant areas and to protect the interests of local communities.

A new **FLORIDA** law (SB 459) mandates the creation of a special task force drawing from the SHCC and the Hospital Cost Containment Board to make recommendations to the legislature on important state health policy concerns. Among its specific charges, the task force is to make recommendations on alternative organizational models and funding sources for any necessary health planning or regulation programs in the State in the absence of federal requirements.

A recent telephone survey by iHPP of various state officials revealed very little optimism for the survival of local health systems agencies in the event federal financial support is withdrawn. With the exception of a few places where local business and labor coalitions or Blue Cross-Blue Shield associations have indicated a willingness to support local health planning, most state officials contacted felt that neither public nor private support would be forthcoming for their continuation. Significantly, many of the same officials expressed the view that, even if the Federal Health Planning law is repealed, their state would probably retain some degree of certificate-of-need authority, as well as some health planning functions at the state level.

In other health planning action, a new **UTAH** law (SB 15) creates a public benefit corporation to serve as the single State Health Systems Agency. In addition to its planning and development functions, the corporation is charged with fostering competition and encouraging innovations in the financing and delivery systems for health services in order to promote economic behavior by consumers and providers.

A **WEST VIRGINIA** bill (HB 1787) would authorize the SHPDA to develop and implement a plan in cooperation with participating health facilities for the merger and sharing of services for which competition will not appropriately allocate supply. The bill also would provide antitrust immunity to those facilities complying with the SHPDA's plan. A **CALIFORNIA** bill (AB 1263) would require the SHPDA to develop a plan for the regionalization of certain tertiary health care services.

Health Planning and Antitrust

In a major decision affecting health planning, the U.S. Supreme Court ruled that actions taken by providers under the general authority of the Health Planning Act are not necessarily immune from federal antitrust laws. In a specific case, the Court refused to extend immunity from antitrust to Blue Cross of Kansas City for its refusal to enter into a reimbursement contract with a hospital because the hospital failed to obtain approval from the local HSA before beginning construction (National Gerimedical Hospital and Gerontology Center v. Blue Cross of Kansas City). Blue Cross contended that its action was pursuant to the local HSA plan and was furthering the purposes of the National Health Planning Act. The Court, however, rejected the argument that the Health Planning Act immunizes all private conduct undertaken in response to the health planning process. The decision suggests that immunity from antitrust should be granted only in cases where Congress has explicitly indicated its preference. And, in the Court's opinion, "There is no reason to believe that Congress specifically contemplated 'enforcement' of advisory decisions of an HSA

by private insurance providers, let alone relied on such action to put 'teeth' into the noncompulsory local planning process."

Emergency Medical Services

Emergency medical services has been the focus of considerable legislative attention in the states this year. Both **UTAH** and **VERMONT** enacted comprehensive EMS statutes, covering a range of issues such as licensure and training of personnel, maximum rates for services, minimum standards for equipment and data collection. A comprehensive EMS bill (SB 159) is under consideration in the **MICHIGAN** legislature.

A **MINNESOTA** bill (SF 1428) emphasizes the creation of regional emergency medical service districts as the best strategy for maintaining a coordinated emergency medical services system in the State.

HAWAII is considering amending its EMS statute to increase the physician composition of the EMS Advisory Council from four to five and to require that at least two of the five physicians be engaged in the full-time practice of emergency medicine and be board eligible or board certified by the American Board of Emergency Medicine. **ARIZONA** amended its law transferring administrative authority for EMS from the Department of Public Safety to the Department of Health Services, while **VIRGINIA** amended its statute to establish a statewide air medical evacuation system.

Several States have concentrated their legislative efforts on assuring proper training programs for EMS personnel and setting standards for the provision of emergency services. **HAWAII's** amended statute (HB 733) requires that basic life support and advanced life support training programs be based on a medical model.

A recently adopted **TEXAS** bill (SB 874) and a **LOUISIANA** proposal (SB 617) would require ambulances to be staffed by two persons, thus bringing these states into compliance with federal basic life support requirements.

NEVADA's new law (SB 147) permits the activities of intermediate emergency medical technicians. Intermediate technicians are authorized to perform certain procedures and administer certain drugs so long as they are under the direct supervision of a physician or a registered nurse supervised by a physician or are in direct communication with a physician or a registered nurse supervised by a physician.

A **PENNSYLVANIA** bill (HB 1139) would provide for the recertification of emergency medical technicians every three years, while another measure (SB 603) would set out licensure requirements to operate an ambulance service and minimum standards for personnel and equipment required on ambulances. The Senate bill, for example, would require that three years after the effective date of the act all ambulances be staffed by at least two persons, one of whom must be an emergency medical technician. The bill also would direct the Department of Health to provide tuition-free emergency medical technician courses to train adequate numbers of such personnel.

Three different bills dealing with immunity from civil damages for persons providing emergency medical services (commonly referred to as Good Samaritan laws) were introduced in **LOUISIANA**. Two relate to emergency medical technicians (HB 938 and SB 695); the other covers firemen and policemen as well as certified members of ambulance or rescue squads (HB 1302).

A **WISCONSIN** bill would extend the reach of the state's Good Samaritan law by allowing ambulance drivers to assist licensed EMS personnel without being licensed themselves. This protects them from civil liability under the Good Samaritan act when they handle sick, injured or disabled persons (SB 282). **VERMONT's** new EMS statute (SB 61) limits the civil liability of volunteer personnel.

Two states, **HAWAII** and **ALASKA**, are debating legislation which would assure emergency medical services for indigents. Under SB 1275, **HAWAII** would earmark all payments for services collected by the department to finance emergency care for indigents. HB 1130 in **LOUISIANA** would require any hospital offering emergency room services and receiving financial assistance (direct or indirect) from the State to provide emergency medical services free from discrimination or without regard to ability to pay.

Finally, a **NEW YORK** bill (S 4043) would mandate group health insurance policies which cover physician services to include coverage for emergency medical services provided in physicians' offices.

Health Insurance

Public Employees—A **FLORIDA** bill (SB 327) would require that at least two group health plan options be offered to public employees. Each option must provide financial incentives to participants not to overutilize benefits. Specifically, one option would allow participants who did not file a claim in a calendar year to receive reduced premium rates in the following year. A second option would permit participants to accumulate those portions of a policy deductible not used in a calendar year and be awarded the accumulated amount upon termination from the group. A **NEVADA** law (AB 301) gives public employees the option upon retirement to cancel or continue their group insurance or medical and hospital service coverage. If a retiree elects to continue coverage, he or she must assume the portion of the premium costs for the coverage continued which the governing body does not pay on behalf of retired employees.

Cost Containment—A **WEST VIRGINIA** bill (HB 1518) would require a demonstrated "good faith effort" to control costs on the part of all accident and health insurers before the insurer could increase its rates or lessen its benefits or coverage. The bill defines a good faith effort as a vigorous attempt by the insurer through a combination of education, persuasion, and financial incentives and disincentives to control costs and to encourage health care providers to also control costs by 1) eliminating duplicative or unnecessary services or facilities; 2) promoting alternative forms of care; 3) engaging in such experiments as incentive reimbursement and utilization review; 4) encouraging consumer involvement; and 5) promoting sound management practices by health care providers. A **NEW YORK** bill (A 4154) would require health insurance plans filing for rate changes to submit an economic impact statement indicating the effect of such increased rate on the elderly, the handicapped, the unemployed and on persons living on marginal fixed incomes.

Conversion—A new **GEORGIA** law (HB 124) provides conversion privileges under private health insurance for insured surviving or former spouses. The law prohibits individual policies which provide coverage to the spouse of the insured from terminating the coverage of the spouse solely as a result of a break in the marriage, except by reason of death or divorce. All policies must contain provisions to permit the spouse, upon the death of the insured or a divorce, to obtain a nongroup policy similar to the coverage contained in the earlier policy. Similarly, an **OREGON** bill (SB 484) would permit divorced or widowed spouses to obtain nongroup health insurance coverage when previously covered under the former spouse's group policy.

Medicaid Survey

IHPP recently completed a fifty state survey of current Medicaid cost containment strategies. The survey identifies all legislative and executive proposals affecting services, eligibility and reimbursement, as well as strategies for improving the administration and management of the program. A brief summary of the survey indicates that over one half of the States have proposed some degree of benefit reduction, from limits on the number of covered hospital days to the elimination of some or all optional services. Twenty-one States have proposed either increases in current copayments on some optional services or new copayment requirements on optional services. Almost half of the States are considering significant changes in provider reimbursement, from decreasing or freezing physician payment levels to restructuring nursing home reimbursement methodologies. Most significant, 14 States are proposing significant changes in their eligibility standards. Such proposals range from more restrictive criteria for the medically needy to eliminating 18 to 21 year old students to eliminating coverage altogether for the medically needy and the AFDC-U populations.

The IHPP survey is current through mid-May 1981. Copies can be obtained by sending $3.00 to IHPP.

Publications and Reports

• A publication entitled, Role of State and Local Governments in Relation to Personal Health Services, is now available from the American Public Health Association for $4.00 a copy. The volume, a collection of presentations made at a symposium in 1980, examines the involvement of state and local governments in the financing, organizing and delivery of health care services.

•The final report of the Primary Care Task Force in **NEW YORK** has been released. The Task Force was commissioned by Governor Carey to make recommendations on how the State's primary health care policy can be improved. Among the Task Force's major recommendations are: the establishment of a Primary Care Development Program to promote new primary and ambulatory care service delivery locations and to support placement of primary care personnel in medically underserved areas; changes in state aid for medical training and establishment of reimbursement incentives to stimulate primary care training; and a "fast track" review of new types of certificate-of-need applications designed to provide primary care services in shortage areas.

• The **CALIFORNIA** Department of Health Services recently released a report entitled, "Benefits and Costs of the Family Planning Program." The report suggests that by using formal family planning services, a woman of childbearing age reduces her annual probability of pregnancy by 21 percent. Findings indicate that for Family Planning Program clients in California, the State saves an average of $5.10 for each dollar spent on family planning services; for Medi-Cal beneficiaries the State saves an average of $77.00 for each dollar spent.

• The Office of Research, Demonstrations and Statistics, HCFA, HHS, recently released a briefing paper entitled, "HMO's: Issues and Alternatives for Medicare and Medicaid." The paper provides a comprehensive overview of the major issues and alternatives which need to be addressed if public payer involvement with HMOs is to expand. The report focuses on current legislative barriers to HMO enrollment, reimbursement problems, benefits and liabilities, marketing strategies, and quality assurance. To order, request HCFA Pub. No. 03107.

• A recent report by the General Accounting Office (GAO) supports greater state legislative involvement in the federal grant process. The report, entitled "Federal Assistance System Should Be Changed To Permit Greater Involvement By State Legislatures," reviews some of the more important ways the federal grant process has discouraged legislative participation. The report concludes with a recommendation that Congress should ensure that "grant provisions assigning responsibilities to state executive officials not be construed as limiting or negating the powers of state legislatures under state law to appropriate federal funds, to designate state agencies, and to review state plans and grant applications."

• A GAO report concluded that, while the maximum allowable cost (MAC) resulted in savings under state operated Medicaid outpatient drug programs, the savings could have been even more substantial if (1) the states had implemented the limits in a more timely manner; (2) HHS had systematically updated the limits; and (3) HHS had encouraged states to implement or expand their own MAC programs.

State Health Highlights

• **NEBRASKA** has adopted legislation (LB 379) which significantly expands the scope of nursing practice. The new law addresses the state's problem of geographic maldistribution of health care services by encouraging and enabling registered professional nurses to perform in expanded roles in nursing, such as, nurse-practitioner and nurse-anesthetist.

• The **NEW YORK** Department of Health has released an information kit which explains in detail the rights and responsibilities of employers and employees under the State's new "Right to Know" law. The "Right to Know" law requires employers to notify employees what information is available concerning the toxic effects of chemical substances; to provide all requested information; and to provide education and training to employees in the safe and proper handling of such substances.

• A **MONTANA** law (Chapter 432, 1981) waives the state licensure inspection requirement for hospitals that are accredited by the Joint Commission on Accreditation of Hospitals and for clinical laboratories that are accredited by the College of American Pathologists.

• A new agreement between the **PENNSYLVANIA** Departments of Health and Insurance and Pennsylvania Blue Shield would establish a new selection process to guarantee greater consumer representation on the Blue Shield Board of Directors. The new agreement, said to be a national trend setter for nonprofit health care insurance organizations, seeks to balance the Board's structure between providers and consumers.

• The **CONNECTICUT** Department of Health Services unveiled a plan for a proposed new rating system designed to rank individual nursing homes according to certain quality-of-care standards.

• The **NEW YORK** legislature adopted legislation (S 5672, A 7137) expanding the State's Insurance law to require insurance carriers to furnish information on coverage of Medicaid recipients to the Department of Social Services, or to the local districts, upon their request.

• State health agencies spent nearly $1.2 billion in FY 80 for maternal and child health programs, according to National Public Health Program Reporting System (NPHPRS) data. Such expenditures represented the largest portion of personal health expenditures by state health agencies in FY 80.

• SB 413 in **PENNSYLVANIA**, if enacted, would preclude the implementation of any proposed closing of any state hospital or any substantial reduction in staff or patients without the approval of certain legislative committees within the General Assembly. Both the Senate Public Health and Welfare Committee and the House Health and Welfare Committee must approve the closing or staff and patient reductions before the Department could take action.

• A **FLORIDA** statute (SB 459) charges the SHCC, in consultation with the SHPDA and the local HSAs, with submitting recommendations to the legislature by October 1, 1981, regarding how federal health block grant monies should be allocated.

• A U.S. District Court ruled that **ALABAMA** is not obligated to pay all coinsurance, deductibles and other cost-sharing charges for dual eligibles under the buy-in agreement on those Medicare Part B benefits which are not covered under Medicaid. (For example, speech therapy, podiatry services, chiropractic services). Moreover, the Court declared that if the State opts to provide less than the full amount of Medicare Part B cost-sharing charges, the State is not required to file an amended state plan. The State is, however, obligated to assure that the portion of the cost-sharing charges it meets must be reasonably related to the recipient's income and resources.

• The Supreme Court of **MONTANA** has recently upheld the constitutionality of its state Medical Malpractice Panel Act. The 1977 statute had been challenged on the grounds that Montana's Medical Malpractice Panels violates an individual's right to a jury trial, access to the courts, and due process (Linder vs. Smith, Murray, and the Montana Medical Association, June 10, 1981).

• A new **GEORGIA** law directs the Department of Human Resources to establish minimum standards for certifying family violence shelters. These facilities would serve as temporary receiving shelters for the admission of any persons who were subjected to family violence (HB 203).

The Honorable Milo Fritz
The Honorable Mae Tischer
Co-Chairman
Health, Education and Social Services Committee
State Capitol
Juneau, Alaska 99811

Dear Representatives Fritz and Tischer:

It is my understanding that your committee will be considering H.B. 19, An Act Repealing the Certificate of Need Program, at a hearing to be held on Friday, February 18, 1983. While it is not possible for me to attend in person, I would appreciate your reviewing the enclosed statement in opposition to this bill and entering it into the hearing record.

On behalf of the Ætna Life Insurance Company, I thank you for considering our comments.

Sincerely,

JEB/jem

Enclosure

STATEMENT OF

ÆTNA LIFE INSURANCE COMPANY

IN OPPOSITION TO

H.B. 19

As a major writer of commercial health insurance, the Ætna Life Insurance Company has for years been deeply concerned about health care cost increases and has consistently supported viable health planning programs. We strongly oppose H.B. 19, An Act Repealing the Certificate of Need Program. We believe that enactment of this legislation would represent a large step backward in Alaska's effort to realize an efficient and effective health care delivery system.

Health planning is one of the elements in the armamentarium of programs that are necessary to help in the reduction of the escalation of health costs and to ensure that the health care delivery system of the future is one that has been rationally and systematically planned.

We feel that it is most important that there be a mechanism in place for participation in the planning and development of health programs to improve the distribution of health services, ensuring that services are available to those citizens who need them, while restricting the investment in unnecessary facilities and services.

An important portion of a viable health planning program is state certificate of need legislation. We find it is essential to have such legislation in order that the necessity of capital expenditures can be determined, because of the two-pronged effect on the growth of health care costs. In the short run, the purchase, installation, and financing of expenditures increases annual health care expenditures. In the long run, operation and maintenance of capital expenditures continue to add to health care costs, to increased use of highly skilled labor (for maintenance and operation) and non-labor inputs (i.e., energy, supplies, etc.).

It has been estimated that every dollar of capital investment adds an additional 50¢ to annual operating cost. An important element in today's economy, which has had a dramatic effect on health care costs related to capital expenditures, is the interest rate now being charged on the finance debt. Efforts must be made to ensure that all capital expenditures made today are necessary and consistent with the goals of Alaska's Health Systems Plan and necessity for such expenditures.

Alaska's Certificate of Need Program is an important tool for implementation of the area health plan. We urge that this program be continued.

1) WHAT ARE THE CHANCES THAT THE SANCTIONS MAY BE AGAIN SUSPENED BEYOND SEPT. 1983?

THIS QUESTION IS GOING TO DEPEND ON WHAT THE 98TH CONGRESS CHOOSES TO DO. THE CONTINUING RESOLUTION WILL STAND UNLESS CONGRESS TAKES SOME ACTION BEFORE THE END OF THE FISCAL YEAR. IF CONGRESS DOES NOT ACT BEFORE JUNE 30TH, THE DEPARTMENT WILL HAVE TO AT LEAST FUND STATES THROUGH THE FIRST QUARTER OF FY84. H.H.S. IS POWERLESS TO IMPOSE THE SANCTIONS MANDATED BY LAW AND IS WAITING FOR SOME DIRECTION FROM CONGRESS.

2) WHAT RESPONSE WOULD THE DEPARTMENT OF HEALTH & HUMAN SERVICES HAVE TO A REPEAL OF THE CERTIFICATE OF NEED HERE?

OFFICIALLY I AM TOLD THAT THE DEPARTMENT CANNOT FORMULATE A RESPONSE UNTIL A REPEAL BILL IS ACTUALLY PASSED. UNOFFICIALLY, I WAS TOLD BY ONE PERSON THAT ALASKA WILL STILL HAVE TO COMPLY WITH SOME SORT OF FEDERAL REGS TO RECEIVE HEALTH CARE FUNDS AND THAT STARTING FROM SCRATCH (AFTER A REPEAL) MIGHT BE MUCH MORE DIFFICULT THAT TRYING TO AMEND THE EXISTING PROGRAM ON CERTIFICATE OF NEED. FOR INSTANCE, THE BLOCK GRANT PROPOSALS FROM THE 97TH CONGRESS ALL HAD CERTIFICATE OF NEED REQUIREMENTS. THE COMPROMISE BILL BY SENATORS QUAYLE, & KENNEDY (WHICH THE ADMINISTRATION WAS NOT WILLING TO ACCEPT IN THE 97TH CONGRESS) HAD CERTIFICATE OF NEED PROGRAM REQUIREMENTS ALSO.

3) WOULD A 1536 EXEMPTION DO THE SAME THING AS A REPEAL OF THE C.O.N.?

IT WOULD NOT. THERE IS NO CONNECTION. THE 1536 SECTION IS AN ORGANIZATIONAL OPTION WHICH THE GOVERNOR HAS TO CONTINUE OR NOT TO CONTINUE THE (3) STATE SYSTEM AGENCIES. IF ALASKA WANTS THE 1536 EXEMPTION, THE GOVERNOR WOULD HAVE TO APPLY FOR IT. THE CERTIFICATE OF NEED IS A STATUTORY PROVISION WHICH HAS PENALTIES FOR NON-COMPLIANCE ALTHOUGH THEY ARE NOT BEING EXERCISED.

4) IF THE CERTIFICATE OF NEED PROCESS IS REPEALED, HOW MUCH $ WOULD AK. LOSE?

NONE AT THE MOMENT. THE DEPARTMENT DOES NOT HAVE ANY ALTERNATIVE OTHER THAN TO CONTINUE AS THINGS ARE NOW UNTIL CONGRESS CLARIFIES THE ISSUE.

CON REPEAL STUMBLES

On Monday, April 18, the House Finance Committee reported out a committee substitute for House Bill 19, formerly the certificate of need repeal. At the first hearing on March 25, Chairman Al Adams, (D) Kotzebue, referred HB 19 to a subcommittee of Terry Martin, (R) Anchorage, John Lindauer, (R) Anchorage, and Jim Duncan, (D) Juneau. The subcommittee, on the votes of Martin and Duncan, reported back a proposal which would sunset certificate of need and aid to construction revenue sharing on July 1, 1986, increase the threshold on new equipment and some construction to $1 million, retain CON review on any new beds or new services, caps operational revenue sharing at its current level and creates a prospective payment system for Medicaid and General Relief Medical.

Representative Bob Bettisworth, (R) College, twice offered Association sponsored amendments which would have repealed certificate of need. Both times the amendments failed. Voting with the Association for repeal were Representatives Bettisworth, Lindauer, Joe Flood, (R) Anchorage, and Jerry Ward, (R) Anchorage. Voting against the Association were Reprsentatives Adams, Martin, Duncan, Ben Grussendorf, (D) Sitka, Sam Pestinger, (R) Anchorage, and Fred Zharoff, (D) Kodiak.

A floor fight looms on the horizon over the certificate of need issue. The Association will seek to have the Bettisworth amendments added to the Finance Committee Substitute for House Bill 19 or failing that defeat House Bill 19 on the floor of the House. Without the immediate repeal of certificate of need, there is no obligation to maintain a commitment to the other parts of the bill. According to Association President Dennis DeWitt, "Legislative compromises are supposed to contain quid pro quo's to achieve some satisfaction for all participants. Currently, the Finance Committee Substitute for House Bill 19 has all the quids but the Finance Committee took away the pro quo for the Association. We, unfortunately, have no option but to carry on a floor fight to insert an amendment to repeal certificate of need and be prepared to defeat the bill entirely if we fail to amend it."

CAPITAL BUDGET BLEAK

In early April Governor Sheffield released his revised capital budget which failed to receive rave reviews. For health facilities the picture was extremely bleak. While Fairbanks Memorial Hospital received $3.4 million and Valley Hospital in Palmer received $1 million in the supplemental appropriation bill which emerged from the legislature to complete their projects, there was little in the way of commitment to new projects. In the revised budget Cordova Hospital was listed for a $2 million grant towards its $15 million project but Wrangell's $9 million project received no mention. The Association will continue to work with legislative leadership in an attempt to augment the appropriations to hospitals.

FEDS PASS PROSPECTIVE PAYMENT

On March 24 Congress passed and sent to the President a massive overhaul of the Social Security System, including a new payment process for the Medicare system. In doing so, Congress accomplished in six weeks what would have taken the better part of two years under normal circumstances.

The new Medicare Prospective Payment system will be based on Diagnostic Related Groupings (DRG) which were developed at Yale University to create an effective framework to monitor the quality of care and perform as a utilization review tool in hospitals. In 1976 the state of New Jersey began a prospective payment system based on DRG's which now has effectively been spread nation wide for hospital inpatient services under Medicare. It does not include outpatient, psychiatric, or skilled nursing services.

The measure passed by Congress (HR 1900) creates a three year phase-in period moving from the current system based on 223 limitations through a phase of nine regional urban and rural rates to national urban and rural rates. During the three year phase-in period payments will be a blend of hospital specific average Medicare costs per discharge and a combination of national and regional payment rates based on DRG's. In the fourth year payments will be based totally on national urban and rural DRG based rates.

Capital costs are passed through until October 1, 1986. In the interim, Congress must determine how to pay capital costs and if it wishes to differentiate between capital costs incurred before and after March 1, 1983. If Congress fails to act on the capital cost question by October 1, 1986 states will be mandated to perform a review of all capital expenditures over $600,000 under Section 1122. The return on equity is reduced one third and appears to be eliminated on October 1, 1986.

Sole community providers will be subject to a blended rate which is 75% hospital specific, 25% combination of regional and national DRG based payments with a further adjustment by the secretary of HHS to fully pay the costs involved if the hospital's Medicare volume changes more than 5% one year to the next. This cost adjustment would be in effect for only three years. The fourth year sole community providers would be paid as other providers under the DRG system.

The measure included language which provides a special cost of living adjustment for both Alaska and Hawaii. Also of significance to Alaska is a one year suspension of the TEFRA provision which requires a single rate for hospital based and free-standing nursing homes.

JAMBOREE WRAP-UP

Long term care facilities in Alaska reported approximately $11,000.00 in contributions to the Alaska chapters of the Diabetes and Heart Associations as a result of Rock N' Roll Jamborees sponsored by nusing homes around the state. This money raised by nursing home residents, staff and volunteers will go to benefit public education, research and community service projects of these worthwhile charities, both in local areas and on the national level.

The marathon fundraiser traditionally features individuals rocking in rocking chairs and rolling in wheelchairs for donations pledged to them by members of the community. Each nursing home in Alaska, through their resident councils, elected to add to or "dress-up" the original idea of rocking and rolling. 1983 Jamboree activities in our state included a raffle for roundtrip airfare Outside, bake sales, quessing contests, costumes, and the election of Jamboree royalty. Entertainment for the rock n' rollers ranged from belly dancing and bagpipes to a dog sled demonstration. Residents sold (and ate) chili dinners, homemade pies and sweetbreads and the ever-popular Big Mac. We recieved one report of a long term care resident who swam to benefit charity.

The Jamboree was organized by the American Health Care Association in 1977 and has become one of the most popular events in the history of nursing homes.

NATIONAL NURSING HOME WEEK

Governor Bill Sheffield has set aside May 8 - 14, 1983 as the special week this year to honor nursing homes and their residents. The theme "Memories Were Made To Be Shared" emphasizes the fact that nursing home residents have contributed much to the history of our state and have many personal memories to share about the early life of Alaska. Many of our convalescing aged and chronically ill friends and relatives need contact with the community. Members of the Alaska State Hospital Association are sponsoring many activities during the week of May 8 - 14 to ensure that this important contact is reinforced. The primary focal point is the nursing home resident and National Nursing Home Week is a good time to visit the facility in your community and share with a friend.

NORTON SOUND HOSPITAL AWARDED RURAL GRANT

A proposal entitled "Audiology Measures for Reduction of Student and Employee Absenteeism", submitted by Jane Sabes, administrator of the Norton Sound Regional Hospital, was selected as one of the winners of the Association of Western Hopitals' Rural Health Care/Business Alliance Grant Award Program. The Nome hospital will receive $24,500.00 for audiometry testing equipment to provide screening for early detection of hearing problems. Sabes cites ear infections among workers and school-aged children as a major health problem experienced in the Arctic enviroment.

Funding for the project is provided through a grant to AWH from the W.K. Kellogg Foundation. The overall goal of the Rural Health Care/Business Alliance Program is to build a supportive relationship between rural health care providers and local business leaders for the mutual benefit of the community. David Jeppson, president of AWH, noted that "competition was keen and we believe the top proposals represent important contributions to the field of rural health care".

NATIONAL HOSPITAL WEEK MAY 8 - 14

May 8 - 14 has been designated by President Reagan as National Hospital Week. The theme for the week, "We Treat You Like Family" reminds us that hospitals in Alaska are like family to the communities they serve. A caring attitude characterizes our hospitals, often situated in isolated areas where indeed, they provide a primary health care resource. The Alaska State Hospital Association urges members and friends to participate in local activities planned to increase community awareness of the services provided by dedicated and skilled professionals who offer compassionate help in the hospital.

WESTERN NETWORK INST. FOR NURSE EXECUTIVES

The Western Network for Education in Health Administration has announced the second annual Western Network Institute for Nurse Executives to be held at the University of California, Berkeley, from July 23 - 30, 1983.

This is an intensive residential program designed for nurses who hold managment positions in hospitals and long term care facilities. Its core curriculum includes the Art of Nurse Management, Strategic Planning and Marketing, Financial Management and Advanced Managerial Strategies and Tactics.

According to the Institute's news release, "the curriculum will be presented in a problem-oriented format focusing on the application of theory to pratice."

A fee of $2,150 covers tuition, course materials, housing and meals. A 10% reduction of the fee will be granted when participants submit a completed application by May 1. For applications or further information, contact Catherine Robinson, Western Network for Education in Health Administration, School of Public Health, Warren Hall, University of California, Berkeley, CA 94720 (415) 642-1627.

EXAMS FOR CLINICAL LAB TECHS

The Health & Human Services' (HHS) Proficiency Examination for Clinical Laboratory Technologists will be held October 7, 1983 in Fairbanks and Anchorage. The exact locations have not yet been determined. Applications for the exam may be obtained from the Division of State Health Planning & Development, Health Facilities Certification & Licensing in the Frontier Building, 36th and C Streets, Anchorage, Room 508 or by writing the same at 3601 C Street, Pouch 6333, Anchorage, 99502-0333, phone: (907) 561-4350. A $35. fee must accompany the application.

The examination will be conducted by Professional Examination Services, 475 Riverside Drive, New York, New York 10115 and the applications must be submitted to them before June 30, 1983.

FELLOWSHIP SITE AT BRISTOL BAY HOSPITAL

The Bristol Bay Area Hospital at Dillingham has been selected by the Association of Western Hospitals as one of two sites for the 1983 Kellogg Rural Post-Graduate Fellowship Program. The other site selected is Delta County Memorial Hospital in Delta, Colorado.

The fellowship program provides rural hospitals an opportunity to obtain management assistance from a well-trained individual who has expressed interest in rural health and who is evaluating alternatives for placement in the field. John Dumbolton, administrator of the Bristol Bay hospital, will participate with AWH in the selection of an exceptional hospital/health graduate to assume a staff management position in the Dillingham hospital for one year beginning September, 1983. Dumbolton and the Kellogg Fellow will develop specific objectives and one or more special projects achievable within the year period of the fellowship.

Funding for the project is provided through a Kellogg Foundation grant, the AWH Educational & Research Foundation and the participating hospital. AWH advises they received 13 excellent site applications from throughout the western states. "We feel that both facilities ultimately selected offer a unique and valuable fellowship experience focusing on rural health concerns," the announcement stated.

AWH: 53RD ANNUAL CONVENTION

Industry professionals from hospitals, hospital associations, and other health care organizations from throughout the West will be meeting at the 1983 Association of Western Hospitals annual convention in Anaheim, California, April 24-27.

"Essentials for Excellence: New Directions in Health Care" is the theme of the 52rd annual convention and participants will be able to explore new directions in health care through a wide variety of educational programs. The 74 Western Instructional Conferences (WICs) offer an opportunity for in-depth examination of a broad range of health care issues including financial management, education and training, fund development, marketing, information systems, reimbursement, organizational models, planning and ambulatory care.

The $25. general registration fee admits participants to the opening and closing general assemblies and two special sessions, as well as the exhibit floor. Additional fees of $45., $65. and $100. cover the cost of attending WICs. Convention registration catalogs and additional information may be obtained by contacting the Association of Western Hospitals, 850 Market Street, CA 94102, (415) 421-8810.

THIS N' THAT

Humana Hospital Alaska has elected its medical staff officers. They are Richard Curtis, president; Robert Bosveld, president-elect; Leo Morresey, vice president; David Anderson, secretary-treasurer; Thomas J. Harrison, member-at-large; and John D. Frost, immediate past president.

Jane Sabes, administrator of Norton Sound Regional Hospital, has been recommended to the Board of Governors of the American College of Hospital Administration as a 1983 Nominee.

A sale of attic treasures was held mid-March to benefit the Wrangell Hospital Auxiliary. Proceeds from the sale will go toward the purchase of Resusic-Annes, used in teaching cardio-pulmonary resuscitation (CPR).

Three members of the Providence Hospital Auxiliary were nominated to receive the Volunteer of the Year Award according to Shirley Shaggs, volunteer manager for Providence. Nominated were Cleo Schoen, Billie Church, and Irene Durrant. The award will be presented at the annual awards luncheon on May 3rd.

The new intensive care unit at Central Peninsula General Hospital in Soldotna, opened on March 14. According to administrator Mike Lockwood, this is the first area of the $5.7 million construction project to be opened. The four-room intensive care unit will have complete monitoring capabilities including three telemetry monitoring units which will double the present hospital capabilities for the critically ill. The ICU will be manned 24 hours a day by specially trained nurses.

Dear Jack:

HOUSE BILL 19 - CERTIFICATE OF NEED

OPINION-

ADVANTAGES TO CON

There are distinct advantages to the CON process if those working within the division are truly dedicated to their objective of supplying adequate health care for the area.

(1) The state dept of health planning can gather and supply data relevant for planning to hospitals lacking time and expertise for such essential information prior to a proposed building or equipment acquisition.

(2) In the review process, CON requires and assists hospitals in the formidable steps so necessary but not infrequently overlooked or ignored - public input, avoiding duplicity of services....

DISADVANTAGES TO CON

(1) Public Health Service (federal) hospitals are exempt. ALL health care facilities should be required to participate - or none.

(2) Current lengthy process.

(3) Planning should be for the sake of planning - not tied to funding levels. If improper planning and building (or equipment acquisition) the institution will eventually find the funding not meeting expense.

While the battle wages between the State Hospital Assn and Blue Cross, between Humana and Providence Hospitals of Anchorage I must still maintain that the CON advantages outweigh the disadvantages WITH the following modifications:

(1) Demand the state health planning office to streamline the CON review process-currently lengthy and costly. The entire process should be fashioned after an employee grievance system-three steps, brief periods of time in which to respond back to the employee.

(2) Begin to accept the fact that in this day of Medicare, Medicaid, IHS and even private philanthropic dollar reductions responsible health care providers would be fiscally foolish to act in any other than a judicious way - not adding one additional service, bed, staff, or squre foot that would be "unprofitable" - even to a non-profit establishment. This is where I agree with the President that free enterprise will rule if allowed.

(3) The state health planning agency should establish a long range goal to develop expertise and assistance "in the field" in health planning - assuming more an advocate or assistant rather than an adversary role.

(4) Require ALL hospitals - federal, state, private, etc - to participate in the CON process.

There are my opinions in a nutshell. My prayers are with you that heaven will assist you in this and all your deliberations to cut through subjective opinions and see only what would be best for the people, the state, the country.

Cordially,

Jane Sabes
NORTON SOUND REGIONAL HOSPITAL

Proposed Amendment to SSHB 19

By Dem. H

Section 4 AS 29.90.010 - 29.90.030 is Repealed

Section 5. Those hospitals or health facilities which are currently receiving funds pursuant to ~~sections~~ AS 29.90.010-29.90.030 shall continue To receive construction AID as Though AS 29.90 were not repealed until its entitlement is satisfied. No new applications shall be received a processed after the effective date of this legislation

Mike Maher
Corrections
Mary Hess

The proposal to ~~establish~~ change the division of corrections within DHSS to ~~a~~ departmental status is one that is supported by the governor's office, correctional professionals and the Health Education and Social Services Committee.

Dealing with the correctional crisis is one of the governor's ~~prime~~ primary objectives for this session, and as responsible legislators, it should be ours too. Knowledge of the crisis — the overcrowding, the mismanagement, the poor conditions, the lack of rehabilitation and the rest ~~are all too well~~ is common. The Clearycase, as you know too well, brings the problem to rest in the laps of both the legislature and the executive departments.

As pointed out by the Governor's task force on Corrections, cooperation between the three branches of government is necessary to solve the problem.

Fortunately, the problem can be solved with proper administration, budgeting, and organization. Correction of the problems identified by the ~~previous~~ task force, begins with proper management. The ~~best~~ solution is to develop a Department of Corrections and establish a Commissioner in charge of that Department who can build a management team dedicated to the solution of Alaska's

FEB 23 1983

February 17, 1983

The Honorable Bill Sheffield
Governor, State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

We were dismayed to discover that funding for Alaska'a three Health Systems Agencies (HSAs) was not included in your FY84 budget.

During your campaign, you responded very positively to our "Health Issues Questionnaire." We were greatly encouraged to learn that you strongly supported a formal mechanism for citizen participation in State health program decisionmaking and that you felt that HSAs were an appropriate avenue for that involvement. You answered the questionnaire by saying that you support raising State funding for each HSA "to at least $300,000 to maintain citizen involvement in health care decisions at the local level."

Because of recent Congressional action, each HSA in Alaska will receive $100,000 from the U.S. Department of Health and Human Services in FY84. This is a 63% decrease from FY82. Therefore it is critical that HSAs receive $200,000 in State support to prevent their demise.

I would suggest to you that HSAs have provided the only real means for public involvement in health care decisionmaking at the State, regional, and local levels. HSAs enable effective citizen participation in grant and Certificate of Need reviews, in planning, and in resource ddvelopment. Because of this input, the State has been able to direct its resources to areas of greatest need in efficient and effective ways. Also, the State has been able to avoid unnecessary duplication and to prevent unneeded service expansion, resulting in savings of several million dollars in the last six years. In addition, HSAs provide technical assistance to communities and organizations in ways that improve service effectiveness and continuity of care and promote development of new, needed services and facilities.

The publication I have enclosed, "Public Involvement in Health Care Decisions" summarizes the activities of the three Alaska HSAs. It also describes the important services which would be lost to the public if HSAs do not receive adequate State support. I hope you will take the time to familiarize yourself with the many significant accomplishments

Coalition Members

J. B. Carnahan, Fairbanks; Joseph Cladouhos, Juneau;

Public Involvement in Health Care Decisions

At Risk

Alaska's three Health Systems Agencies, funded by State and Federal dollars since 1976, will cease to exist unless funds are restored to the State budget or appropriated by the Legislature this session.

WITHOUT HEALTH SYSTEMS AGENCIES AT THE REGIONAL LEVEL THERE WILL BE:

* NO opportunity for public discussion at the regional level of the impact of health care programming and funding decisions.
* NO public participation in deciding the future of local health care services. (Decisions will be made in Juneau.)
* NO technical assistance for agencies, organizations, and communities from a non-aligned organization with experienced staff.
* NO regional efforts to promote health.
* NO regional coordination to focus on health-related issues of mutual concern.
* NO independent assessments in the public interest of issues related to health care cost containment.
* NO regional source of information related to health status measurement, health service utilization, health-care quality issues, and health care costs.

THERE WILL BE DUPLICATION OF DATA COLLECTION AND ANALYSIS, RESEARCH, SYSTEMS MANAGEMENT ACTIVITIES, AND PROGRAM DEVELOPMENT.

THERE WILL BE UNNECESSARY EXPANSION OF SERVICES AT EXCESSIVE COSTS TO THE TAXPAYER.

Our Past and Present

Three Health Systems Agencies (HSAs) serve the State of Alaska.

The **Northern Alaska Health Resources Association** serves the North Slope and Fairbanks North Star Boroughs and the areas encompassed by the Arctic Slope, Doyon, and NANA Native regional corporations.

South Central Health Planning and Development serves the Municipality of Anchorage and the areas covered by the Bering Straits, Calista, Bristol Bay, Aleutians, Kodiak, Copper River, North Pacific Rim, and Cook Inlet Native regional corporations.

The **Southeast Alaska Health Systems Agency** serves the Southeastern panhandle.

These HSAs were established by Public Law 93-641 in 1974 to plan for the rational development of health care resources within their regions by providing staff to governing boards composed of a representative cross-section of providers and consumers of health care services. As was the case in other states, the State of Alaska provided funds to supplement the federal grant awards and, consequently, has enjoyed an efficient and mutually beneficial relationship between State officials and planners and their local constituents.

The legal responsibilities of the HSAs are as follows:

A. To improve the health of residents of the health service areas.
B. To increase the accessibility (including overcoming geographic, architectural, and transportation barriers), acceptability, continuity, and quality of health services.
C. To restrain increases in the cost of providing health care.
D. To prevent unnecessary duplication of health care resources.
E. To preserve and improve advantageous competition in the health service area.

These responsibilities are carried out through the development of a long-range health plan and a short-range action plan; reviews of various federal and State grant applications; community assistance with needs assessments, evaluations and plan implementation; and technical assistance to agencies and organizations. These functions are closely coordinated with the respective State agencies which build and expand on our local and regional activities to construct appropriate State-level plans, studies, and policies.

While all this is accomplished on a regular basis by each of the three HSAs, each agency has also recognized the need to tailor its particular work program to the unique requirements and circumstances of its individual health service area.

These activities have helped to:

- **Improve the health status of Alaskans.**
- **Contain the costs of health care.**
- **Improve access to needed health services.**
- **Involve the public in decision-making about the current and future health care delivery system for their communities.**
- **Tailor health service and facility development to the unique needs of each community.**

Our Future

Decreasing support at the Federal level has given Alaska's HSAs a chance to reassess our activities and to discard irrelevant federal requirements. We now have more opportunity to meld our activities to the health systems needs of the regions and communities of Alaska.

The three HSAs have formed the Alaska Health Coalition to encourage responsible participation by the State in health planning and decisionmaking and to support those activities which are vital to the health of Alaska's citizens. The essential program areas are:

COMMUNITY ASSISTANCE

Regional health resources organizations should be available to assist communities and citizen groups in defining health problems in their communities and in identifying solutions to those problems, through:

A. Organizing key individuals for action.
B. Gathering ideas and opinions on identified issues.
C. Analyzing problems and assisting in the development of local strategies for their amelioration.
D. Assisting communities in the implementation of identified strategies.
E. Providing assistance to individuals and organizations in the preparation of funding applications, program development, and evaluation.

HEALTH PROMOTION

Because many of the health problems in the state are related to lifestyle and individual behavior, the resource organizations will seek to improve the health status of Alaskans, by:

A. Determining the prevention and health promotion needs of the regions.
B. Assisting existing programs to improve their effectiveness through coordination and cooperation with other programs.
C. Providing a forum for prevention and health promotion interests.
D. Developing new prevention and health promotion programs to meet the special health needs of Alaskans.

REGIONAL ADVOCACY

To allocate limited resources in a rational and equitable manner, it is necessary to examine individual community needs in relation to the needs of the region and the state as a whole. A framework for providing and communicating this perspective will be accomplished by:

A. Maintaining a regional and local capability to provide current, accurate, health-related data for planning and program development
B. Providing a forum for local grant applications and proposals for new institutional health services and facilities.
C. Providing the Legislature and the Department of Health and Social Services with regional perspectives on health-related issues.
D. Assisting State, local and regional organizations and the Government by conducting research on health-related issues.

HSAs are the forum through which citizens influence the development of health-related services for Alaska. As arenas for participatory democracy, HSAs assist communities, agencies, and individuals to define needs and achieve goals for health resource development. As regional advocates, HSAs bring the concerns of local residents to the attention of the Alaska Legislature and State government. As agents for improving the health of the people, HSAs direct their energies to health promotion and disease prevention, aiming toward increases in the overall health status of the population. **These activities are essential to the continuation of community self-determination in the area of health service development.**

Some of Our Recent Activities

COMMUNITY ASSISTANCE

- SCHPD* assisted the Kenaitze Tribe to establish a clinic.
- NAHRA** helped to establish a patient hostel in Fairbanks.
- SCHPD supported the development of Hospice in Anchorage and Home Health Care, Inc., of Anchorage.
- NAHRA supported development of the Arctic Alliance for People, an association of human service providers in the Interior.
- SCHPD administered a contract for safety week fairs in Sand Point and King Cove.
- NAHRA analyzed the effectiveness and efficiency of Fairbanks Rehabilitation Association's respite care programs.
- SCHPD explored the issues surrounding provision of health care to non-Natives in Bethel.
- SEAHSA*** developed information and assessed the impact of government funding cuts in Ketchikan.
- SEAHSA assessed alternatives for program design and funding sources in Ketchikan.
- NAHRA, SCHPD, and SEAHSA conducted numerous service-specific needs assessments.
- SCHPD trained the Yukon-Kuskokwim Health Corporation Board and staff on health planning, assessment, and management issues.
- NAHRA, SCHPD, and SEAHSA conducted a survey of primary care clinics in rural areas on behalf of DHSS.
- SEAHSA and SCHPD assisted Kake and the Mat-Su Borough to develop community health plans.
- SCHPD provided technical assistance to the Whittier Health Committee.
- NAHRA assessed alcoholism treatment services in Fairbanks and alcohol counselor training in the northern region.

HEALTH PROMOTION

- NAHRA and SEAHSA funded six community-based health education programs.
- SEAHSA developed a boating safety curriculum for grades 7-12.
- SCHPD sponsored a "Health Promotion at the Workplace" conference, with 120 participants.
- SCHPD established a Tel-Med service in Anchorage, with plans to expand to other parts of Alaska.
- NAHRA implemented Alcohol Awareness Week in the Greater Fairbanks area.
- SCHPD developed a resource guide for community health fairs.
- NAHRA published a Health Promotion Resource Directory.
- NAHRA, SCHPD, and SEAHSA wrote a manual for communities to use in establishing health education in their schools.
- NAHRA, SCHPD, and SEAHSA assisted with numerous community health fairs.
- SCHPD established an ongoing Health Promotion at the Workplace working group.
- NAHRA and SCHPD organized child passenger safety groups in Fairbanks and Anchorage.
- NAHRA, SCHPD, and SEAHSA provided information and assistance to various school districts on health education curricula development.
- SCHPD participated in the organization, planning, and leadership of workshops at the Alaska Native Health Board Health Conference.
- NAHRA and SCHPD developed health education legislation.

REGIONAL ADVOCACY

- NAHRA, SCHPD, and SEAHSA developed documents, through public involvement, which identify health problems and health service delivery concerns and propose solutions.
- NAHRA, SCHPD, and SEAHSA provided regional data and evaluation comments for use in the State Health Plan and the Maternal and Child Health Plan.
- NAHRA, SCHPD, and SEAHSA reviewed and commented on proposals for State and federal funding for programs such as mental health, alcohol, and drug abuse (on request of the funding authority).
- NAHRA, SCHPD, and SEAHSA reviewed major capital expenditures by facilities under the Alaska Certificate of Need program, including:
  - Free-standing birthing center in Juneau.
  - Changes in Petersburg Hospital.
  - Re-financing of Alaska Hospital.
  - Expansion of Central Peninsula General Hospital.
  - Replacement of Valley Hospital, Palmer.
  - Replacement and improvement of computer tomography equipment at Alaska Hospital.
  - Free-standing inpatient rehabilitation facility by Alaska Treatment Center.
  - Replacement of Cordova Hospital.
  - Mini-computer system for clinical

lab at Providence Hospital, Anchorage.

- Digital fluoroscopy at Providence Hospital, Anchorage.
- Development of an 80-bed substance abuse/psychiatric facility by Charter Medical Corporation.
- Development of a substance abuse facility by Advanced Health Systems.
- Replacement and expansion of an ambulatory surgery center in Anchorage.
- Expansion of Humana Hospital emergency department.
- Installation of a hospital information system at Providence Hospital, Anchorage.
- Expansion of Fairbanks Memorial Hospital.

* SCHPD — South Central Health Planning and Development, Anchorage
** NAHRA — Northern Alaska Health Resources Association, Fairbanks
*** SEAHSA — Southeast Alaska Health Systems Agency, Ketchikan

HESS —7

What is South Central Health Planning and Development, Inc.(SCHPD)? South Central Health Planning and Development, Inc., like the other two Health Systems Agencies in Alaska, is a non-profit corporation run by a volunteer board of directors established for the purpose of improving the health of residents, increasing the accessibility, acceptability, continuity and quality of health services provided to the population, restraining increases in the cost of providing health services, and preventing unnecessary duplication of health services.

SCHPD serves the 270,000 residents of south central and western Alaska. The service area encompases eight of the twelve Native regional corporation areas: Norton Sound, Yukon-Kuskokwim, Kodiak, Bristol Bay, Copper River, Cook Inlet, North Pacific Rim, Aleutian/Pribilof Islands. The Municipality of Anchorage is designated as a ninth subarea in the total service area.

While all the residents of the area are affected by the decisions of the agency, SCHPD works most closely with: 1) health care providers, including physicians, nurses, representatives from the 16 hospitals in our area, staff from the 8 non-profit health corporations in the area, directors of mental health and alcohol/drug abuse programs, Indian Health Service representatives (on health care cost and health promotion at the workplace issues), community residents who desire technical assistance for the development of proposals for new health services, Boards of health programs who desire training on effective functioning, and others.

The volunteer Board members of SCHPD with help from the staff they hire, provide a process for public involvement in the decisions as to how public money is to be spent in health care. With an ever increasing portion of public (State and Federal) dollars being spent on health services through Medicare, Medicaid, revenue-sharing, mental health and alcoholism programs, risk reduction grants, direct appropriations for capital expenditures (to name a few) public input into the form and organization of those services becomes even more critical.

The public involvement process as implemented by SCHPD has meant:

- -continual coordination with providers and consumers on health care delivery issues in the development of planning documents, on committees and task forces, public meetings;
- -publication, at least annually, of short-range plans listing high priority areas of concern in south central and western Alaska;
- -publication and distribution of periodically updated long-range plan that analyzes health problems and establishes a framework for development of health services by size of community;
- -public review of any Certificate of Need proposals (the only opportunity for the public to review and comment on any analysis of proposals submitted);
- -provision of data to communities, elected officials, health care providers to justify and/or evaluate health care expenditures;
- -public meetings in communities, technical assistance to communities;
- -other involvement in health issues, such as sponsorship and organization of a Health Promotion at the Worksite conference attended by over 200 participants.

February 16, 1983

FEB 18 1983

Mae Tischer
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

The Executive Committee of South Central Health Planning and Development, Inc., met on February 14 to consider our future as a regional health planning agency. In order to continue our activities beyond May 31, 1983, the end of our grant year, we need to have some assurance of funding from the State. We are asking that an amount of $200,000 for each of the three Health Systems Agencies be reinstated in the budget.

As we understand it, your subcommittee is now in the process of reviewing the DHSS budget. Alaskan Health Systems Agencies, established in 1976, have received Federal and State grants each year of our operation. Commissioner Beirne told us HSAs were not included in the proposed budget this year for two reasons. First, the Division of Corrections was consuming an increasing portion of the Department's resources. Since then, the new administration has proposed changes in the organization with respect to Corrections services. Second, at the time the budget was drafted, there was no indication Federal money was going to be available. However, Congress has since passed a continuing resolution providing for funding of HSAs at last year's levels.

Continuation of Federal funding at last year's levels means a basic grant of $100,000 plus $15,000 in match (at 30¢ on the dollar for the $50,000 State grant). The chart on the next page shows grant amounts received for the last six years. In addition to the $200,977 in Federal and State money received this last fiscal year, we had approximately $40,000 in carry-over. Therefore, a $200,000 grant from the State would mean a reduction in funding from FY 1980, 1981, 1982 levels. It would mean a slight increase from the latest year. During the past year all staff (except one) are working on a half-time basis due to the budget cuts.

Amount	Federal	State	Total
FY 1983	150,977	50,000	200,977
FY 1982	298,377	100,000	398,377
FY 1981	353,310	100,000	453,310
FY 1980	234,902	125,000	359,902
FY 1979	175,000	125,000	300,000
FY 1978	175,000	125,000	300,000

We urge you to rectify the error made by the Department in excluding funding for the three organizations that provide a forum for public involvement in health care decisions. (See attached page for brief summary of our responsibilities.)

If you have any questions about our organization do not hesitate to call me or the President of the Board, Lillie McGarvey.

Sincerely,

Margaret M. Wilson

STATE HEALTH NOTES

Number 32
January 1983

Intergovernmental Health Policy Project, George Washington University, Washington, DC 20037

Governors' Health Messages

The governors' state of the state and inaugural messages not surprisingly concentrated on the state of their separate economies. Controlling state budgets is clearly the dominant priority among the states' chief executives. Among the states, deficits for the remainder of their fiscal years are estimated at $1.6 billion in **CALIFORNIA**, $530 million in **NEW YORK**, $260 million in **WISCONSIN**, $164 million in **PENNSYLVANIA**, $150 million in **NEW JERSEY**, and the list continues. Governor Nigh of **OKLAHOMA** reported that a revenue shortfall has occurred for the first time in the state's history.

A recent survey by the National Conference of State Legislatures shows that 19 states are incurring deficits for the current fiscal year and another 13 are operating on very slim margins between revenues and expenditures.

Interestingly, very few governors singled out their Medicaid programs for major reductions or constraints in order to help bring their budgets into balance. Most apparently are reasonably satisfied with the initiatives their states have taken over the past year or two to control the rates of growth in their Medicaid budgets.

GEORGIA'S new Governor Harris specifically pointed to the need for new efforts in Medicaid fraud and abuse control, improved claims review and recovery of overpayments, and a careful study of various alternative reimbursement structures under Medicaid. **NEW YORK** Governor Cuomo intends to recommend a Medicaid Reform Program, which will include major financial and programmatic restructuring. The plan, according to the governor, will enable the state to institute appropriate cost controls, improve access to health care, and strengthen the state's oversight capability through audits and utilization review.

Two governors—Rockefeller of **WEST VIRGINIA** and Lamm of **COLORADO**—made specific references to the need for the regulation of hospital costs. Governor Rockefeller singled out a tripling in state expenditures for public employee health insurance benefits since 1976 as a key reason for his support for a hospital rate setting commission. Governor Lamm referred to the unemployment rate plus increased federal cost containment efforts as reasons for expanding state cost containment measures. In addition to rate regulation, the governor urged the legislature to consider competitive bidding by providers for Medicaid contracts and insurance reform packages.

Acknowledging that hospital costs in **NEVADA** are the highest in the nation—41 percent higher than the national average —Governor Bryan called for several cost containment strategies, e.g., performing day surgery where appropriate and shortening hospital stays. The governor also intends to submit legislation to require understandable billing procedures to reduce the chances of patients being billed for services not received.

Governors Lamm, Anaya (**NEW MEXICO**) and Garrahy (**RHODE ISLAND**) used their inaugural addresses to reconfirm their support for strong certificate of need (CON) legislation. Governor Lamm declared that the state's CON program had saved almost $38 million in health costs over a three-year period, while Governor Garrahy pointed to $42 million in savings to his state over the past decade. Governor Lamm also urged the legislature to consider a limitation on the total yearly amount of capital expenditures made by hospitals.

see next pg., too

Governor Cuomo took the opportunity to announce he was ordering a one-year moratorium on the issuance of any new certificates of need. During the one-year moratorium, the Department of Health, in cooperation with other state agencies, is directed to design a new capital budgeting process for hospitals, nursing homes and clinics. The new process is designed to provide the state with the ability to analyze relative need among projects, as well as specific elements in the proposals.

The governors made very little mention of moving away from regulatory strategies and in the direction of containing costs through greater competition. **ARIZONA's** Governor Babbitt was a major exception, however. The governor mentioned the state's repeal of certificate of need legislation in 1982 and deregulation of nursing homes as examples of the state's contribution to removing artificial subsidies in the health care delivery industry. The governor identified three new initiatives he will support on behalf of furthering competition: 1) requiring health care institutions to participate in a uniform billing and discharge data reporting program; 2) prohibiting tax exempt bond issuing bodies from providing tax exempt financing for health care institutions which maintain overall occupancy rates below 85 percent; and 3) creating programs which encourage state employees to be more sensitive about costs in choosing between health care options.

With regard to the state's employee health insurance program, the governor will seek legislative action to establish an employee rebate program for employees selecting lower cost health care insurance plans and to require contracting indemnity insurers to offer plans with varied copayment levels.

Prevention ranked high on the priority list of the governors of **ALASKA, ARIZONA, NEW MEXICO** and **RHODE ISLAND.** Governor Garrahy identified the need to reassess health insurance coverage with a goal of emphasizing coverage for less costly preventive care. Governor Babbitt will seek legislative action to develop health promotion and education programs for state employees and to require contracting indemnity insurers to allow payments for preventive health measures.

The need for expanded alcoholism services received a fair amount of attention. Governor Cuomo will support legislation mandating private health insurance coverage for alcohol treatment. Governor Rockefeller called for an increase in the state tax on alcoholic beverages and a dedication of the revenues to alcohol treatment programs. And Governor Anaya identified alcoholism prevention and services among the top priorities of his administration.

Improving mental health services was a key priority of the governors of **INDIANA, NEW HAMPSHIRE, NEW YORK** and **NORTH DAKOTA.**

A commitment to expanding home and community-based services for the elderly was mentioned by the governors in **NEW MEXICO, MARYLAND, NEW JERSEY,** and **NEW YORK.**

Governor Rockefeller and **MINNESOTA** Governor Perpich spoke of the need to restore medical benefits that had recently been cut. Rockefeller requested a revision in the state's corporate income tax to provide additional revenues for restoring some cuts and financing the federal match to receive federal funds under the primary care health block grant.

Governor Matheson of **UTAH** called for state assumption of the county medically indigent program.

The FY 1984 Health Budget

President Reagan's Fiscal Year 1984 budget proposes a number of far reaching reforms in the financing of health care. Most of the reforms concentrate on the Medicare program, with very little attention given to Medicaid. The major ingredients of the President's Health Care Incentives Reform plan are: 1) extending Medicare coverage for catastrophic illness; 2) restructuring beneficiary cost-sharing under Medicare; 3) establishing a prospective rate structure for hospitals under Medicare; 4) limiting the current tax subsidy of higher cost private health insurance plans; and 5) establishing a voluntary voucher program to permit Medicare beneficiaries to enroll in private health plans.

To underscore the need for substantial reforms in health care financing, the Administration points to some alarming statistics. In 1982, health care costs went up almost three times the national inflation rate. The cost of health insurance rose 15.9 percent in 1982, the biggest increase ever. Over the last five years, Medicare

costs have increased at an average annual rate of 19 percent. And in 1983, Medicare and Medicaid will spend as much *every month* as they did during the entire year of 1966, their first full year of operation.

According to the Administration's restructuring initiative, Medicare beneficiaries will continue to pay a deductible equal to one day of hospital care, but a copayment equal to 8 percent of the deductible will be required for each day of hospital care from the 2nd through the 15th day. From the 16th through the 60th day the copayment will be reduced to 5 percent of the deductible (currently, no cost-sharing is required from the 2nd through the 60th day). After the 60th day, beneficiaries would face no further financial obligation for hospital costs for the remainder of the year.

With respect to reimbursement reform, the budget assumes the implementation of a prospective payment system on a per-case basis, adjusted by diagnosis and patient characteristics. The diagnosis-related group (DRG) classification system would serve as the basis for the case adjustments.

Under the Administration's proposed Voluntary Voucher program, beneficiaries will enjoy the option of receiving services through a private health benefits plan, rather than through the Medicare system. If a beneficiary selects alternative coverage, the government would pay an amount equal to 95 percent of the per person costs under the Medicare program.

At the heart of the Administration's Incentives Reform plan is a proposal to limit the current tax subsidy of higher priced health insurance plans. If the plan is adopted, tax-free treatment of employer contributions to employee benefits would be limited to $175 a month for family coverage or $70 a month for individual coverage. According to the Administration's estimates, about 30 percent of those with employment-based health coverage currently receive employer contributions above those limits. An additional $2.3 billion in tax revenue is anticipated in FY 84 as a result of this initiative.

The Administration projects that, if Congress accepts its reform proposals, Medicare payments will reach $63 billion in 1984—13.2 percent higher than the current estimate for 1983. The Administration claims, however, that the rate of increase would be 16.3 percent absent its legislative proposals.

Other significant initiatives in the FY 84 budget affecting Medicare include: freezing physician reimbursement for one year; modifying the rate of increase in Part B premiums; indexing the Part B deductible to the Medicare Economic Index; eliminating mandatory utilization review by hospitals and skilled nursing facilities; and authorizing DHHS to employ competitive purchasing procedures for the procurement of laboratory services, durable medical equipment and other medical supplies for beneficiaries.

The FY 84 budget is marked by the absence of any significant new reform proposals for the Medicaid program. The budget recommends an extension of the reductions in federal payments to states for Medicaid (as originally provided in the 1981 Reconciliation Act) by 3 percent beginning in 1985 and continuing indefinitely. A state could, however, offset the reductions if it managed to contain its expenditures below specified limits. The budget also includes a recommendation to require states to impose nominal copayments on the categorically and medically needy for physician, clinic, and hospital inpatient and outpatient service. Finally, the budget contains a provision which would require applicants, as a condition of eligibility, to assign their health insurance rights to the state Medicaid agency.

Once again, the Administration's budget contains no request for health planning activities, which is in keeping with its policy to eliminate federal involvement in health planning at state and local levels.

The FY 84 budget contains a request for $1.357 billion to fund the four health block grants (Preventive Health at $85 million; Alcohol, Drug Abuse and Mental Health at $439 million; Primary Care at $460 million; and Maternal and Child Health at $373 million). The Administration intends to submit legislation to include three additional programs in the Primary Care block grant: Migrant Health Services, Black Lung Clinics, and Family Planning. The budget further proposes to consolidate the administration of the block grants within the Office of the Assistant Secretary for Health.

Reports and Publications

A new study commissioned for the Federal Trade Commission details the trends in the evolution of three separate kinds of health care services: retail dentistry, freestanding emergency care centers, and freestanding surgery centers. The study provides a descriptive overview of the three types of services and identifies various factors impeding their growth. It provides some answers to four broad questions: 1) How does the growth of entrepreneurial medical/dental services vary across states because of differences in licensing requirements? 2) How do reimbursement practices of commercial insurers and of medical and dental service plans impact on the growth of these entities? 3) How are these services being marketed and to what types of consumers? 4) Is there any evidence of competitive responses by traditional health care providers? Copies of the report, entitled *Entrepreneurial Trends in Health Care Delivery: The Development of Retail Dentistry and Freestanding Ambulatory Services*, are available free on a limited basis. Request document number IH-83 from Michael Pollard, Room 272, FTC, Washington, DC 20580.

The Institute for Health Planning recently published several monographs which should be of interest to health policymakers. The publications include: *State Health Care Cost Containment: A Review of Strategies* ($9.00); *Health Care Vouchering and Competition* ($8.00); *A New Era for State Health Planning* ($8.00); *Issues in Health Block Grant Funding* ($7.00); *Bidding for Long Term Care Patients* ($8.00); and *Altering Incentives in Health Care Delivery* ($6.00). To order copies write to: IHP, 702 North Blackhawk Avenue, Madison, WI 53705.

State Health Highlights

• A **NEW YORK** bill (S 737, A 817) would amend the state's Medicaid law to require programs to provide recipients with the means to make a fully informed and independent choice from among licensed health and mental health providers.

• A **COLORADO** bill (HB 1184) would prohibit hospitals from denying or limiting staff privileges or the use of hospital facilities to any health care provider licensed to perform surgery, or from discriminating against such providers on any basis other than training, experience, or demonstrated competence in their field of practice.

• A **NEW MEXICO** bill (HB 20) would require any health care practitioner advertising services to the public to state in the advertisement his name, address, telephone number, and the designation of the profession in which he is licensed to practice.

• **NORTH CAROLINA** recently decided to replace Blue Cross-Blue Shield coverage for state employees with a self-insurance plan. The new plan provides for a $100 deductible with 5 percent employee coinsurance up to $2,000, and full coverage thereafter. The plan also removes limits from hospital and physician reimbursement, which had been frozen for over a year.

• **CALIFORNIA** enacted legislation (AB 2346, Chapter 1304) permitting physician assistants to form professional corporations and to render professional services in the name of a corporation. The law also allows registered nurses to be shareholders in a physician assistants' corporation, and physician assistants to be shareholders in a nursing corporation.

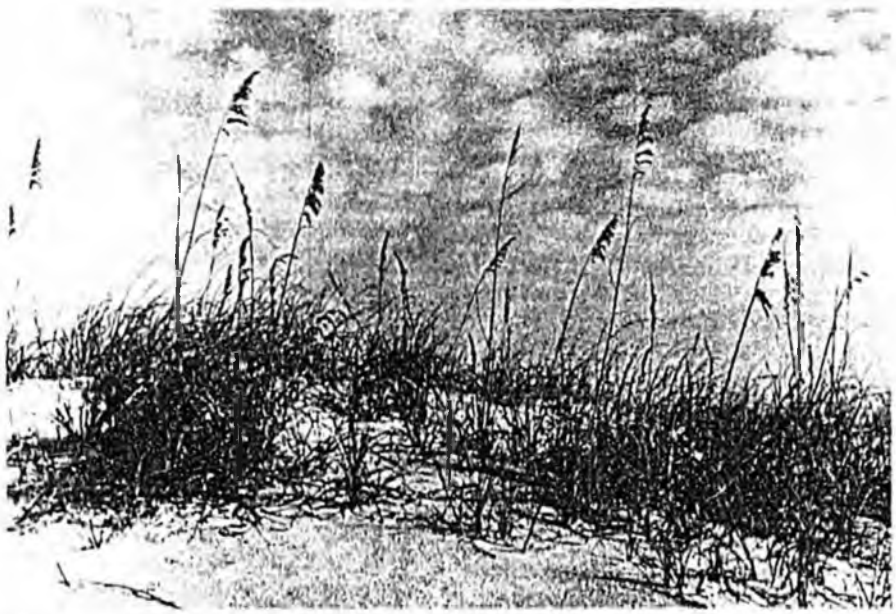
innovations

Southern Innovations Selected

Innovative programs from Florida, Louisiana and Mississippi have been selected for further study by a committee of the Southern Legislative Conference (SLC) of The Council of State Governments.



Selected were: Florida's Inmate Tutorial Program to reduce illiteracy among inmates; Louisiana's Computer Information System to provide senators information quickly and conveniently; and Mississippi's Variable Compensation Plan to eliminate automatic cost-of-living increases and place the emphasis on productivity.

The innovations panel met during the SLC annual meeting August 29-Sept. 2 in New Orleans. Members included: Michael Baer, secretary of the Louisiana Senate; Betty Button, executive director of the Texas Senate Committee on Human Resources; Rep. Charles Capps, chairman of the Mississippi House Constitution Committee; Rep. John Paul Capps, Arkansas house speaker designee; Sen. Riley Darnell, chairman of Tennessee Senate Fiscal Review Committee; David Iannucci, supervisor of legislative drafting in Maryland; George Oliver, director of research for South Carolina Joint Appropriations Legislative Review Committee; David Poynter, clerk of Louisiana House; Rep. Bill Presnal, chairman of Texas House Appropriations Committee; and Delegate Larry Schifano, chairman of West Virginia House Health and Welfare Committee.

Among state programs not selected for further study are the following:

Florida's Coastal Construction Control Line Program—The goal of this program is to preserve Florida's beaches and dune areas. It regulates coastal construction seaward of a control line that was established after lengthy public hearings throughout the impacted sandy beach areas. The program is designed to save beaches and beachfront property by allowing only building designs that will stand the test of wind and wave and that will help preserve the dune system.

Contact: Elton J. Gissendanner, Dept. of Natural Resources, Tallahassee (904) 488-1555.

Florida is protecting its beaches and sand dunes.

Local Health Planning Councils—A new law passed by the Florida legislature preserves local input into the health planning and the Certificate of Need process by establishing "local health councils" financed by Certificate of Need applications. Councils will: develop district plans for use in the Certificate of Need process, assist in the allocation of health care resources, and aid in developing competitive alternatives. Board members are appointed by local units of government. Consumers and major purchasers of health care are required to form a majority of the members; providers make up the balance. The official review time for a Certificate of Need has been cut in half, from 90 to 45 days. The new law also creates a 17-member task force to explore health care costs and competition; it will report its findings and recommendations to the governor and the legislature over a two-year period.

Contact: Tom Konrad, Dept. of HRS, Tallahassee (904) 488-8673.

The Florida Pre-Release Employment Program—A joint venture between the Departments of Corrections and of Labor and Employment Security assists youthful offenders in their transition from inmate to citizen. Male youthful offenders at Indian River and Brevard Correctional Institutions are trained to look for jobs, to fill out employment applications, to interview, to arrange for housing and transportation, and to prepare for the world of work and community

1) If CERTIFICATE of NEED is REPEALED and HSA funding is cut, ~~what~~ how will STATEwide health planning be implemented.

2) What CONTROL ON health CARE COSTS EXISTS if CON is REPEALED?

3) If prospective RATE setting is proposed, why should it not be included in AN omnibus bill that links CON REPEAL with PRP?

4) ~~Hospital ASSOCIATIONS and STATES~~
NATIONwide trend is toward STRENGTHENING CON REVIEWS - Hospital ASSN's generally support it.

5) What benefit to public by repeal? Loose public INPUT at local level. Loose STATEwide planning perspective at STATE level. Loose Federal health planning $ and MAY loose up to 5 million IN FEDERAL $ for programs. What's the benefit to weigh against that?

What benefits accrue to the public if CON is repealed? The HSA's recommendation will have no authority to support it, the statewide planning perspective will be lost. Alaska may loose up to 5 million dollares in Federal funds and will loose 30% of the Federal Health Planning funds. What is the benefit to public? Health care costs reduced?

2. Will Hospital Assn support an omnibus package that includes repeal of CON with prospective rate program, repeal of 25% Capital reimbursement, in short, a comprehensive health care cost containment package?

3. If CON is unworkable as it is, why not amend it, or work out problems instead of throwing the whole program out?

Health, Education and Social Services Committee
State Capitol
Juneau, Alaska 99811

Dear Senator Josephson:

It is my understanding that your committee will be considering S. B. 85, An Act Repealing the Certificate of Need Program, at a hearing to be held on Wednesday, February 16, 1983. While it is not possible for me to attend in person, I would appreciate your reviewing the enclosed statement in opposition to this bill and entering it into the hearing record.

On behalf of the Ætna Life Insurance Company, I thank you for considering our comments.

Sincerely,

JEB/jem

Enclosure

RECEIVED
FEB 17 1983
Josephson

STATEMENT OF

ÆTNA LIFE INSURANCE COMPANY

IN OPPOSITION TO

S.B. 85

As a major writer of commercial health insurance, the Ætna Life Insurance Company has for years been deeply concerned about health care cost increases and has consistently supported viable health planning programs. We strongly oppose S.B. 85, An Act Repealing the Certificate of Need Program. We believe that enactment of this legislation would represent a large step backward in Alaska's effort to realize an efficient and effective health care delivery system.

Health planning is one of the elements in the armamentarium of programs that are necessary to help in the reduction of the escalation of health costs and to ensure that the health care delivery system of the future is one that has been rationally and systematically planned.

We feel that it is most important that there be a mechanism in place for participation in the planning and development of health programs to improve the distribution of health services, ensuring that services are available to those citizens who need them, while restricting the investment in unnecessary facilities and services.

An important portion of a viable health planning program is state certificate of need legislation. We find it is essential to have such legislation in order that the necessity of capital expenditures can be determined, because of the two-pronged effect on the growth of health care costs. In the short run, the purchase, installation, and financing of expenditures increases annual health care expenditures. In the long run, operation and maintenance of capital expenditures continue to add to health care costs, to increased use of highly skilled labor (for maintenance and operation) and non-labor inputs (i.e., energy, supplies, etc.).

It has been estimated that every dollar of capital investment adds an additional 50¢ to annual operating cost. An important element in today's economy, which has had a dramatic effect on health care costs related to capital expenditures, is the interest rate now being charged on the finance debt. Efforts must be made to ensure that all capital expenditures made today are necessary and consistent with the goals of Alaska's Health Systems Plan and necessity for such expenditures.

Alaska's Certificate of Need Program is an important tool for implementation of the area health plan. We urge that this program be continued.

Governor Matheson of **UTAH** called for state assumption of the county medically indigent program.

The FY 1984 Health Budget

President Reagan's Fiscal Year 1984 budget proposes a number of far reaching reforms in the financing of health care. Most of the reforms concentrate on the Medicare program, with very little attention given to Medicaid. The major ingredients of the President's Health Care Incentives Reform plan are: 1) extending Medicare coverage for catastrophic illness; 2) restructuring beneficiary cost-sharing under Medicare; 3) establishing a prospective rate structure for hospitals under Medicare; 4) limiting the current tax subsidy of higher cost private health insurance plans; and 5) establishing a voluntary voucher program to permit Medicare beneficiaries to enroll in private health plans.

To underscore the need for substantial reforms in health care financing, the Administration points to some alarming statistics. In 1982, health care costs went up almost three times the national inflation rate. The cost of health insurance rose 15.9 percent in 1982, the biggest increase ever. Over the last five years, Medicare

costs have increased at an average annual rate of 19 percent. And in 1983, Medicare and Medicaid will spend as much *every month* as they did during the entire year of 1966, their first full year of operation.

According to the Administration's restructuring initiative, Medicare beneficiaries will continue to pay a deductible equal to one day of hospital care, but a copayment equal to 8 percent of the deductible will be required for each day of hospital care from the 2nd through the 15th day. From the 16th through the 60th day the copayment will be reduced to 5 percent of the deductible (currently, no cost-sharing is required from the 2nd through the 60th day). After the 60th day, beneficiaries would face no further financial obligation for hospital costs for the remainder of the year.

With respect to reimbursement reform, the budget assumes the implementation of a prospective payment system on a per-case basis, adjusted by diagnosis and patient characteristics. The diagnosis-related group (DRG) classification system would serve as the basis for the case adjustments.

Under the Administration's proposed Voluntary Voucher program, beneficiaries will enjoy the option of receiving services through a private health benefits plan, rather than through the Medicare system. If a beneficiary selects alternative coverage, the government would pay an amount equal to 95 percent of the per person costs under the Medicare program.

At the heart of the Administration's Incentives Reform plan is a proposal to limit the current tax subsidy of higher priced health insurance plans. If the plan is adopted, tax-free treatment of employer contributions to employee benefits would be limited to $175 a month for family coverage or $70 a month for individual coverage. According to the Administration's estimates, about 30 percent of those with employment-based health coverage currently receive employer contributions above those limits. An additional $2.3 billion in tax revenue is anticipated in FY 84 as a result of this initiative.

The Administration projects that, if Congress accepts its reform proposals, Medicare payments will reach $63 billion in 1984—13.2 percent higher than the current estimate for 1983. The Administration claims, however, that the rate of increase would be 16.3 percent absent its legislative proposals.

Other significant initiatives in the FY 84 budget affecting Medicare include: freezing physician reimbursement for one year; modifying the rate of increase in Part B premiums; indexing the Part B deductible to the Medicare Economic Index; eliminating mandatory utilization review by hospitals and skilled nursing facilities; and authorizing DHHS to employ competitive purchasing procedures for the procurement of laboratory services, durable medical equipment and other medical supplies for beneficiaries.

The FY 84 budget is marked by the absence of any significant new reform proposals for the Medicaid program. The budget recommends an extension of the reductions in federal payments to states for Medicaid (as originally provided in the 1981 Reconciliation Act) by 3 percent beginning in 1985 and continuing indefinitely. A state could, however, offset the reductions if it managed to contain its expenditures below specified limits. The budget also includes a recommendation to require states to impose nominal copayments on the categorically and medically needy for physician, clinic, and hospital inpatient and outpatient service. Finally, the budget contains a provision which would require applicants, as a condition of eligibility, to assign their health insurance rights to the state Medicaid agency.

Once again, the Administration's budget contains no request for health planning activities, which is in keeping with its policy to eliminate federal involvement in health planning at state and local levels.

The FY 84 budget contains a request for $1.357 billion to fund the four health block grants (Preventive Health at $85 million; Alcohol, Drug Abuse and Mental Health at $439 million; Primary Care at $460 million; and Maternal and Child Health at $373 million). The Administration intends to submit legislation to include three additional programs in the Primary Care block grant: Migrant Health Services, Black Lung Clinics, and Family Planning. The budget further proposes to consolidate the administration of the block grants within the Office of the Assistant Secretary for Health.

Reports and Publications

A new study commissioned for the Federal Trade Commission details the trends in the evolution of three separate kinds of health care services: retail dentistry, freestanding emergency care centers, and freestanding surgery centers. The study provides a descriptive overview of the three types of services and identifies various factors impeding their growth. It provides some answers to four broad questions: 1) How does the growth of entrepreneurial medical/dental services vary across states because of differences in licensing requirements? 2) How do reimbursement practices of commercial insurers and of medical and dental service plans impact on the growth of these entities? 3) How are these services being marketed and to what types of consumers? 4) Is there any evidence of competitive responses by traditional health care providers? Copies of the report, entitled *Entrepreneurial Trends in Health Care Delivery: The Development of Retail Dentistry and Freestanding Ambulatory Services,* are available free on a limited basis. Request document number IH-83 from Michael Pollard, Room 272, FTC, Washington, DC 20580.

The Institute for Health Planning recently published several monographs which should be of interest to health policymakers. The publications include: *State Health Care Cost Containment: A Review of Strategies* ($9.00); *Health Care Vouchering and Competition* ($8.00); *A New Era for State Health Planning* ($8.00); *Issues in Health Block Grant Funding* ($7.00); *Bidding for Long Term Care Patients* ($8.00); and *Altering Incentives in Health Cure Delivery* ($6.00). To order copies write to: IHP, 702 North Blackhawk Avenue, Madison, WI 53705.

State Health Highlights

• A **NEW YORK** bill (S 737, A 817) would amend the state's Medicaid law to require programs to provide recipients with the means to make a fully informed and independent choice from among licensed health and mental health providers.

• A **COLORADO** bill (HB 1184) would prohibit hospitals from denying or limiting staff privileges or the use of hospital facilities to any health care provider licensed to perform surgery, or from discriminating against such providers on any basis other than training, experience, or demonstrated competence in their field of practice.

• A **NEW MEXICO** bill (HB 20) would require any health care practitioner advertising services to the public to state in the advertisement his name, address, telephone number, and the designation of the profession in which he is licensed to practice.

• **NORTH CAROLINA** recently decided to replace Blue Cross-Blue Shield coverage for state employees with a self-insurance plan. The new plan provides for a $100 deductible with 5 percent employee coinsurance up to $2,000, and full coverage thereafter. The plan also removes limits from hospital and physician reimbursement, which had been frozen for over a year.

• **CALIFORNIA** enacted legislation (AB 2346, Chapter 1304) permitting physician assistants to form professional corporations and to render professional services in the name of a corporation. The law also allows registered nurses to be shareholders in a physician assistants' corporation, and physician assistants to be shareholders in a nursing corporation.

HOSPITAL GROUP WANTS PATIENT FEES IN MEDICARE PAY PLAN

While determined to see Congress pass a prospective payments system, the American Hospital Assn. wants Congress to make some significant changes in HHS' proposed plan. The group's major concern is to have the plan allow hospitals to charge Medicare patients a fee above what Medicare will pay for hospitalization. AHA Vice President Jack Owen urged members at the group's annual meeting to press Congress to give the go-ahead to such payments by Medicare beneficiaries.

The group also will lobby Congress to base the pay plan on each hospital's cost per diagnosis group, rather than use national average costs as proposed by HHS. The association claims this will not raise total costs for Medicare, merely allocate funds more accurately.

AHA also hopes legislators will exempt some small and rural hospitals from the plan. Another area of worry is that the HHS secretary will be the one to decide the actual dollar figure on which payment for each diagnosis will be based (WHCL, Jan. 7, page 1). The non-profit hospital group wants an independent panel of economists to decide this. Owen also urged AHA members to lobby for health planning programs that are locally-run, rather than federally controlled.

CAPITAL COSTS CURBED BY HEALTH PLANNING PROGRAMS

Proponents of the highly criticized health planning program will note with satisfaction a study for the Health Resources Administration which found that certificate-of-need programs have succeeded in curbing increased capital costs. The program in particular averted capital expenditures for acute care services and facilities, said the study(*) prepared by Arthur D. Little, Inc. Health planning programs were studied in six states: N.J., Iowa, Colo., Va., S.C., Wash.

Projects were blocked because they did not meet objectives set forth in state and health systems plans. Review of programs before applications were submitted meant that some programs were stopped early on. Iowa's program of a presubmission conference between the applicant and local health planning staff on the need for a project eliminated the expense of preparation and review for projects which were immediately rejected.

Decisions on certificate-of-need were made on the basis of specific objectives, standards for programs and need estimates. The latter included the volume and utilization of existing and proposed health services. The issue of financial feasibility came into most decisions, particularly at the state level. The effect of new capital spending on operating costs and patient charges was evaluated.

More than two-thirds of the acute care capital expenditures approved were for renovation/replacement and/or conversion of existing capacity. This may be related to the fact that while standards exist for adding acute care capacity, there are no guidelines for renovation and replacement of such services. Many of the new or additional services approved were equipment. Nearly half of N.J.'s new/additional capacity was equipment.

Certificate-of-need programs are especially effective when integrated with state cost containment plans such as rate setting, the study said. It also recommended better standards for long-term care and renovation of acute care facilities.

POSITION PAPER/Department of Health & Social Services

Position Paper

on

Senate Bill 85

"For an Act repealing the certificate of need program; and providing for an effective date."

Senate Bill 85 repeals those portions of AS 18.07.021 which provide the statutory authority for the Department to administer a certificate of need program and repeals references to certificate of need in other sections of the Statute as well.

The Administration supports Senate Bill 85 as it is currently written.

The Department recommends that the Committee review statutory provisions which relate to health facility development including the following:

Medicaid Programs

The state's participation in the Medicaid program (State dollars fund approximately 52 percent of total program costs) has grown from $1 million in 1972 to nearly $38 million in FY 82 and total costs including federal participation have grown from $2 million to nearly $74 million in this same period. Ninety-two percent of patients in Alaska's long term care facilities are supported by the Medicaid program which means that the state (and federal) government has nearly the full burden of all operational costs for the facility. These Medicaid costs increase when additional beds are added, new equipment is purchased or new services (including new types of manpower) are offered. The Division of Public Assistance must effect a provider agreement with any qualified provider who seeks this agreement.

Capital Budget

Alaska has provided substantial financial assistance in the development of health care facilities. The 12th Legislature provided more than $36.6 million by line item appropriation to expand one hospital; replace two others and provide planning assistance for two rural hospitals. The number of requests for state funding has steadily increased.

Revenue Sharing

Alaska has a revenue sharing program (AS 29.90.010) which provides 25 percent plus interest of hospital construction costs to all non-profit hospitals. This program, administered by the Department of Community and Regional Affairs, provides further support for hospital construction projects in addition to any front-end capital funds provided by the state. This additional health facility construction resource underscores the importance of determining the actual need

for construction, before the State is committed to pay for a major portion of such construction.

Non-profit hospitals each receive a quarter of a million dollars in operating assistance each year through the state's revenue sharing program (AS 29.89.030). Nursing homes and other health facilities also receive assistance based on the number of beds they have. There are no specific requirements as to how such funds are to be expended. Not only are existing health facilities assured of these funds in addition to other state support, but new facilities are encouraged by the availability of these funds.

February 14, 1983

The Honorable Mae Tischer
Alaska State House of Representatives
State Capitol
Pouch V
Juneau. Alaska 99811

FEB 18 1983

Subject: House Bill #19

Dear Representative Tischer:

Central Peninsula General Hospital, along with the other hospitals of the Alaska State Hospital Association, would encourage the earliest possible passage of Senate Bill #85.

It is a premise of this organization that the Certificate of Need process is both cumbersome and ineffective in a state such as Alaska. The original purpose was developed to help contain health care costs by discouraging over-building of hospital beds. The State's major health care problem is not over-bedding, but the continuing lack of accessibility to health care programs and facilities due to the rural nature of our state.

I would encourage our legislators to promote the health care agencies in the planning and providing for better health care, and not tying up their time with the fruitless Certificate of Need process.

Please find attached a copy of a letter from the Central Peninsula General Hospital Service Area Board to the Kenai Peninsula Borough Assembly in support of the repeal of the Certificate of Need process.

Again, passage of this legislation at the earliest time is available.

Thank you for your consideration.

Sincerely yours,

Michael J. Lockwood,
Administrator

February 11, 1983

Kenai Peninsula Borough Assembly

At its regular meeting on February 10, 1983, the Service Area Board of the Central Peninsula General Hospital unanimously endorsed Resolution 83-13 "Urging the Alaska Congressional Delegation to work for Repeal of 42 USC 300 M (D) and Urging the State to subsequently repeal AS18.07 03L-111 which provides for a Certificate of Need program for the Construction, Alteration of Bed Capacity, or Addition or Elimination of a Category of Health Services of a Health Care Facility.

To this end the Service Area Board also endorses House Bill 19 and Senate Bill 85, 2 bills that have been introduced in the 1983 Alaska State Legislature.

Copies of this endorsement have been sent to Senators Stevens, Murkowski and to Congressman Young as well as the Alaska State Legislators.

Position Paper

Certificate of Need Repeal

The Certificate of Need program in Alaska (AS.07) should be repealed. It is both inequitable and unnecessary. Its basic presumption is that the Department of Health and Social Services can make better decisions for hospitals and nursing homes than can the facilities themselves.

Basic Issues

1. Equity

- While controlling non-state construction of skilled nursing facilities (SNF's) and intermediate care facilities (ICF's), the prgram exempts these beds constructed in Pioneers' Homes. Thus any determination of need based on the current program is flawed because forces external to the program can and have - in Anchorage, Juneau, and Ketchikan - altered the factual situation.

- Alaska Native Health Service and the Armed Forces facilities are also exempt from coverage. Their activities have a direct bearing on many other facilities in terms of both service area and referrals.

- Physician office construction and equipment purchase are also exempt.

The inequities are clearly illustrated in the Anchorage area: Providence Hospital, Humana Hospital, Nakoyia Health Care Center, Hope Cottages and the Alaska Treatment Center are included in the CON program while the Alaska Native Health Service Hospital, Elmendorf AFB Hospital, the Anchorage Pioneers's Home and the Diamond Emergency Center are not included. All of these facilities share the same basic service area.

2. Unnecessary

Market place economics and competition should be the determinant of capital expansion for health facilities. In Anchorage, the Municipal Health Commission as well as open board meetings provide the public input into a facility's planning process. In smaller communities the city council or borough assembly who own the facility provide the public input opportunity.

Alaska is a developing state of many isolated regions without any appeal for duplication of services or need to limit access to health care, which is the basic intent of the CON program.

3. Conformity

42 USC 300 m-(d) requires that states conform to the federal program or face a reduction of specified public health service funds.

- Conformity is not achievable without the inclusion of the Pioneers' Homes.

- There are 30 states, including New York and California as well as Alaska, which are not in conformity.

- The penalties have been deferred every year since passage. In December of 1982 they were deferred until October 1, 1983.

- The Reagan Administration is not supportive of continuing this program. Congress is working to create a state optional program without penalties. Thus the likelihood of imposition of penalties is remote at best and the across the board elimination of CON would not change Alaska's current status.

4. Other States

- Louisiana does not have a certificate of need law.

- According to the American Hospital Association, 30 states currently do not conform.

- At least seven states have termination clauses or specific sunset provisions.

5. Attachments

- Alaska State Hospital Association Policy Paper on Repeal of Certificate of Need

- Providence letter to Mayor Knowles explaining opposition to CON.

- U.S. Department of Health and Human Services letter to Denni[illegible]t discussing Alaska's non-conformity.

POLICY STATEMENT

CERTIFICATE OF NEED

Position: The Alaska State Hospital Association advocates the repeal of the certificate of need (CON) law, AS 18.07.

Rationale: The CON process has proven costly, wasteful, and unnecessary. The program has become excessively bureaucratic to the point that it undermines economic incentives throughout the decision-making process and so increases the cost of capital projects it takes valuable dollars from patient care. The certificate of need process also removes community control from local jurisdictions in respect to municipally-owned facilities and local advisory boards in respect to corporate ownership.

An alternative approach to state control would permit marketplace economics to control expansion and would rely on local decision-makers to make decisions for their own communities. We see a value in state government continuing its planning function with input from regional and local groups.

Note: This does not contemplate repeal of construction or licensure standards.

3200 PROVIDENCE DRIVE - POUCH 6604
ANCHORAGE, ALASKA 99502
PHONE: (907) 276-4511

SISTERS OF
PROVIDENCE

SERVING IN THE WEST SINCE 1856

December 27, 1982

Mayor Tony Knowles
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Knowles:

Thank you for the opportunity on December 13 to share Providence's plans and some of our concerns with you.

One point came up during our discussion regarding Certificate of Need (CON). I would like to elaborate for you in more detail why the health care providers in Alaska oppose CON and have so strongly supported its repeal.

As you know, the CON law was passed in this and most other states as a requisite to receive Federal funds. The major impetus for the law were:

1. Excess hospital beds in many large cities, and
2. rising health care costs.

The belief was that by controlling the number of beds, capital expenditures and new services, costs would be contained. The results have been much less than desired throughout the country. The law is cumbersome, wasteful and, in fact, costly.

The lack of "success" is especially true in Alaska for some basic reasons:

1. The process which the law sets in place is cumbersome and wasteful. The institution must:
   - submit a letter of intent at least 60 days prior to an application (for no apparent reason);
   - submit an elaborate, repetitive application (most are well over 100 pages). There are 12 separate "criteria" which must be addressed in any application;
   - wait to be declared complete (minimum 20 days; several of our applications were delayed months);
   - then go through a 90-day review process--with three or four public meetings.

2. The costs of CON to the institution are enormous to prepare this cumbersome document (at least 35 copies) and submit to the minimum 110-day process. There are also the institutional costs of delaying implementation and watching the price of a piece of equipment or construction project increase several percent points with inflation.

   The cost to the public is also great in the state, regional and local staff needed to coordinate the program, prepare staff analyses and hold public meetings.

3. The dollar limit for what must be reviewed has been ridiculously low--$150,000. The federal law has allowed that limit to be raised to $400,000 and $600,000 although the Alaska legislature failed in its last session to raise the limits. Some states have raised the limit to $1 million or more. To have a limit of $150,000 or even $600,000 when the hospital's annual operating budget is $75,000,000 (such as Providence's) is overkill.

   In just 1982 alone, Providence has prepared 6 CON applications, including two equipment replacements (for a CT Scanner and a Cath Lab), a $250,000 computer enhancement for an x-ray machine and most absurd, a $167,000 replacement incinerator (25 years old, replacement required by State and EPA codes!). The State did not give final approval on the incinerator until the 90th day.

4. The law itself is overkill in Alaska. Designed for areas of heavy population, excess hospital beds and competition, the law does not work for Alaska for several reasons:

   - The law only covers private facilities--not public health, nor state owned (API or Pioneer Homes), nor military.

   - Alaska has only one city with more than one hospital and only three private ("eligible") hospitals of over 100 beds.

5. The law is reactive to existing decision making processes. Most hospitals in the State already have local public review and approval designed in their own budget review processes. Many hospitals are owned by municipalities, and all have governing or advisory boards of local citizens. These citizens should have control of the expansion and budgetary decisions of their own institutions. Several other layers are unnecessary. Hospitals and their boards are capable of making sound financial and program decisions.

As the attached Policy Statement of the Alaska State Hospital Association (ASHA) notes, we are supportive of state and local planning for the health care needs. The process should be positive and proactive-- encouraging institutions to respond to needs in the community rather than reactive, cumbersome and negative.

We encourage the city to support the ASHA position on repealing the state CON law. Your own Municipal Health Commission is a strong local planning body which helps identify health needs and encourages solutions. It also serves to review public expenditures in health. Those roles are appropriate. It should be freed from the cumbersome CON review.

Thank you for giving me the opportunity to share our concerns with you.

Best wishes for a prosperous 1983.

Sincerely,

Al M. Camosso
Administrator

Re: 10P 550016
Alaska SHPDA

Dennis L. DeWitt
President
Alaska State Hospital Association
319 Seward Street
Juneau, Alaska 99801

Dear Mr. DeWitt:

Your letter dated June 11, 1982, requested information about Region X's intentions as a result of the failure of the Alaska Legislature to pass amendments proposed to bring the State Certificate of Need program into compliance with the Federal planning law, as amended. Our course of action is quite clear. We will continue to fullfill our mandated responsibilities guided by actions and time frames specified in the law.

Under the existing provisions of Title XV of the Public Health Service Act, as amended, current law requires (in order to be fully designated) that a SHPDA must meet all requirements for full designation, including that of having a complying Certificate of Need program.

If a SHPDA is not eligible for full designation by a certain date (which for Alaska is January 19, 1983) the Department must invoke the statutory penalty of reducing most Public Health Service grants and contracts to any entity in the State by 25% the first year, 50%, 75%, and 100% over the next three years. Amendments contained in PL 97-35 extended the date by which a State must have a fully designated SHPDA to avoid imposition of the penalty. However, PL 97-35 also amended Section 1521(b)(2)(B) by specifying that a conditional designation agreement could not extend beyond a State's penalty date.

Fully designated SHPDAs (such as Alaska) which do not have complying CON programs but continue to meet other requirements, will be returned to conditional designation. As noted above, PL 97-35 prohibits the conditional designation of any SHPDA from extending beyond its penalty date. Any SHPDA which remains conditionally designated on its penalty date must be terminated. Therefore, we will send a termination notice to any conditionally designated SHPDA 90-days prior to its penalty date, if it still has not demonstrated that it has a complying CON program.

The enclosed copy of a letter to Commissioner Beirne, from the Regional Health Administrator, further emphasizes the critical nature of having a complying CON program in Alaska.

Also the enclosed copy of a 1981 letter addressed to Mr. Ivan Lawner, Esq. concerning Pioneer Homes Certificate of Need review issues, reflects our unchanged position.

I hope the facts in this letter provide the detail of information required to understand the situation. Please call or write, should you need further assistance.

Sincerely,

John D. Whitney
Director
Department of Health
Resources Development
Region X

Enclosures (2)

DEPARTMENT OF HEALTH. EDUCATION. AND WELFARE

JUN 21 1982

Re: IOP 550016
Alaska SHPDA

Helen D. Beirne, Ph.D.
Commissioner
Department of Health and
Social Services
Pouch H 01
Juneau, Alaska 99811

Dear Dr. Beirne:

The State of Alaska's Department of Health and Social Services full designation agreement with the Department of Health and Human Services is being extended for three months, until September 30, 1982. As you know, because Alaska's Certificate of Need Program does not comply with Federal requirements, it is necessary that the SHPDA be returned to conditional designation. As required by statute, this 90-day extension of your current designation is being given to allow you to request and prepare for a hearing, if you should want one. Letters from the Bureau of Health Planning to you and to the Governor will further explain this process.

The following conditions are to be considered a part of the extended full designation agreement:

1. If the Agency is unable to retain full designation after September 30, 1982, it will be returned to conditional designation for the period October 1, 1982 to June 30, 1983.

2. The designation of the Agency will automatically terminate when the Agency reaches its penalty date, if the Agency still has not achieved full designation.

You may at any time prior to your penalty date (1-19-83, per PPM 82-12) submit documentation which you believe contains evidence that the State's CON program complies with the minimum Federal requirements, or a certification by the State's Attorney General, attesting to the program's complian

Re: 10P 550007-05

Mr. Ivan Lawner, Esq.
Hellen & Partnow
524 G Street
Suite 710
Anchorage, Alaska 99501

Dear Mr. Lawner:

This is to respond to your recent letter concerning Certificate-of-Need review of a skilled nursing facility addition to the Pioneer Home in Anchorage. In that correspondence you raised two issues: the need for clarification of our 1978 letter to Howard Gabriel regarding C/N coverage of Pioneer Homes, and the compliance of the Alaska C/N program with federal standards. These matters will be addressed separately.

1. In our September 11, 1978 letter to Howard Gabriel, Director of the Southeast Alaska HSA, we were assuming that Pioneer Homes were only residential or domiciliary care facilities; there was no understanding that inpatient skilled nursing care was provided in these institutions. Given this understanding of the nature and services of Pioneer Homes at that time we were correct in concluding that they would not be included in the federal definition of "health care facilities" which would require coverage under Certificate-of-Need programs. If indeed skilled nursing services are provided in these institutions, they would be considered "health care facilities" as defined by our C/N regulations. The 1978 letter did not consider a Pioneer Home to be such a facility.

2. We have reviewed the Alaska C/N statute and implementing regulations to determine whether Pioneer Homes would be included in the definition of a health care facility. We found that:

   a. The Alaska C/N statute defines a "health care facility" as:

      A private, municipal. . . hospital, psychiatric hospital, turberculosis hospital, skilled nursing facility. . . . (Sec. 18.07.111(7)).

   b. The Alaska C/N regulations, in turn, define "health care facility" as:

      Any of those listed in AS 18.07.111, as defined, where appropriate, in 42 CFR 123.401 (adopted 1/21/77). (7AAC07.130)

c. The State's C/N statute and regulations, taken together and including the cross reference to 42 CFR 123.401, would provide coverage of a distinct part of an institution and would, therefore, meet the federal definition of a skilled nursing facilities, i.e., an institution or a distinct part of an institution which is primarily engaged in providing inpatient skilled nursing care and related services for patients who require medical or nursing care . . . . (42 CFR 123.401)

From the above points, it would appear that the Alaska C/N program adequately defines "heath care facility" and "skilled nursing facility." It is the responsibility of the state to follow its own C/N statute and regulations. If there is an on-going and sustained pattern of not following their statute and regulations, we would certainly assess the state's overall C/N program and then take appropriate action.

Please call us should you have further questions.

Sincerely yours,

John D. Whitney, Director
Division of Health Resources
Development PHS, Region X

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF ADMINISTRATION

OFFICE OF THE COMMISSIONER

POUCH C
JUNEAU, ALASKA 99811

465-2200

May 29, 1981

Honorable Donald E. Clocksin
Chairman, Health, Education and
Social Services
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Clocksin:

This is in response to your request to put in writing my verbal testimony before your committee on CSSB 225. I will try and confine my remarks to the major issues.

Administration's position is that the Legislature has always implicitly exempted Pioneers' Homes from the certificate of need program. The Senate has concurred with this position as evidenced by CSSB 225. We are asking that the House members be afforded the same opportunity to express their will as the Senate.

There appears to be some confusion existing with the recent State Supreme Court decision of South Central Health Planning and Development, Inc. vs the Department of Administration, on certificate of need. At issue was whether or not the Legislature exempted Pioneers' Homes from certificate of need. The court found that there is no language in State statutes which can reasonably be read as exempting skilled nursing facilities from the certificate of need process when they are contained in Pioneers' Homes. Consequently, whether or not the Legislature intended to exempt Pioneers' Homes now becomes moot. The Legislature's intent can now be established only through the legislative process of amending existing law to allow this exemption.

There has been a substantial amount of discussion centering around the need for proper planning so that health facilities in Alaska are not overbuilt. This is an admirable and worthy objective, and I can assure you that this Department supports health facility planning. However, the existing system under the certificate of need program is fraught with inequities and frustrations; further, it does not represent a comprehensive planning effort.

2-89LH

There are three providers of health facilities; the federal government, the State government, and the "private sector." However, the federal health facilities don't come under the certificate of need program, and in most states this wouldn't pose any problem. The military contingent in California, for instance, would represent a small portion of the state's total population and as such would not greatly impact the planning process for certificate of need. In Alaska, the opposite is true. The federal government is a major provider of health care and facilities. Roughly one-fourth of the state's population are eligible to use federal health facilities (military base, Public Health, Indian Health, etc.). This has a devasting effect on trying to logically plan for state and "private sector" health facilities when a critical component is missing.

In addition, if we look closely at the "private sector" we see that it is not truly private. A substantial portion of the revenues of private nursing homes and health facilities originate through state and federal programs. State and federal rules, regulations, requirements, and laws, guide and govern, in minute detail, the construction and operation of private health facilities. This includes the proper ratios of professional staff to patients, the type of equipment allowed, size of hallways, reporting procedures, and many others. In effect, the "private sector" is part of the "public sector." Consequently, the charge that the State, through the establishment of Pioneers' Homes, is unfairly competing with the private sector is a fallacious argument.

There has also been considerable discussion on the impact of granting Pioneers' Homes an exemption from certificate of need as it relates to federal programs. Mr. Vern Perry, Director of the Division of Pioneers' Benefits spoke with Mr. Jim Egan, Regional Project Officer of the Office of Health Planning, Region X, U. S. Department of Health, Education and Welfare, on Wednesday May 27, regarding the certificate of need program.

QUESTION: What effect would there be on the State of Alaska if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: It would have no effect on medicare, medicaid, AFDC or Indian Health Service. It could only affect categorical programs such as alcoholism, EMS, Neighborhood Health Clinics, Mental Health Clinics, Day Care, etc.

QUESTION: Would the federal government actually discontinue such programs as alcoholism and mental health if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: No! Absolutely not. In his opinion, under the new administration, there would be no federal sanctions whatsoever in health care programs, especially since the responsibility for this is being turned over to the states.

Further, discussions were held with the States of California and Washington regarding their certificate of need programs. In California, Mr. Ken Umbach (916/323-6955) of the Office of Statewide Health Planning and Development was contacted. He stated that California has been out of conformance with the federal certificate of need program since 1969. Their latest date for coming into conformance is October. He stated that if they did not meet the deadline that the feds would probably extend it. Mr. Jim Bettridge of Washington Health Care Facilities Authority (206/753-6185) indicated that the feds were withdrawing total support from the certificate of need program by 1983.

These conversations indicate that:

i. The federal government is not inclined to impose sanctions on a State for nonconformance with the certificate of need program;

ii. There are states which are nonconforming, and have been nonconforming for a number of years, on which federal sanctions have not been imposed; and

iii. The federal government is withdrawing total support for the certificate of need program by 1983. If the state wants to continue a planning process for health facility development it will have to provide for the process by using General Funds monies. Based on the aforementioned problems, now would be the appropriate time to revise this planning process to make it more meaningful.

Finally, a compromise position has been mentioned in which the new nursing wing at the Anchorage Pioneers' Home and the new Pioneers' Home in Ketchikan would be totally grandfathered into law and not made subject to certificate of need. This compromise does not address a truly complex problem.

The Fairbanks Pioneers' Home presently is serving twelve skilled nursing beds in unlicensed beds. Unless a certificate of need is issued which allows licensing of these beds, these twelve pioneers would have to be discharged.

The Fairbanks and Palmer Pioneers' Homes are full to capacity with skilled nursing patients at the present time. If we are to accommodate anticipated need in the near future, additional skilled nursing facilities will have to be constructed within the next few years. This expansion would be impossible unless a certificate of need is issued.

The Department of Health and Social Services, in recent licensing inspections, has advised a significant number of residents in the ambulatory sections of all the Pioneers' Homes should be designated intermediate care patients. Intermediate care requires both a certificate of need and a significant increase in staffing, installation of call buttons or other signalling devices, and closer attention to patients when taking medications, etc. The number of patients which might be considered in need of intermediate care are: thirty at Sitka, twenty at Fairbanks, twenty at Palmer and forty at Anchorage (in the new wing).

Funding to provide intermediate care was not included in the FY 82 operating budget. Although a dollar figure is not available at the present time, a significant increase will be necessary if we must comply with the certificate of need program. Passage of SB 225 would eliminate this situation.

In summary:

1. Administration believes the Legislature had always intended to exclude Pioneers' Homes from certificate of need;

2. The certificate of need process is not appropriate for Alaska;

3. There needs to be planning for health care facilities and a more responsive process needs to be developed;

4. Grandfathering the nursing wing at Anchorage and the new Pioneers' Home at Ketchikan will not solve the complex problems existing at the Fairbanks, Palmer, and Sitka Pioneers' Home; and,

5. Passage of CSSB 225 will eliminate the potential for pain and suffering by allowing Pioneers' Homes residents to remain in their home.

If I can be of any further assistance to you or your committee, please give me a call.

Sincerely,

Frederick B. Muller

accordance with subsection (b)(2), or (b)(3) of this section (as the Secretary determines appropriate), enter into another agreement with the Governor for the designation of a State Agency.

Failure to designate State Agency within specified period; reduction in allotment, grant, loan, loan guarantee, or contract

(d)(1) If an agreement under subsection (b)(3) of this section for the designation of a State Agency for a State is not in effect upon the expiration of—

(A) the fourth fiscal year which begins after 1975; or

(B)(i) if the legislature of the State is in a regular session on December 17, 1980 and the legislature will be in session for at least twelve months from such date, twenty-four months from such date, or

(ii) if the legislature of the State is in session on December 17, 1980, but twelve months do not remain in such session after such date or if the legislature of the State is not in session on such date, twenty-four months after the beginning of the first regular session of the legislature beginning after such date,

whichever occurs later, the Secretary shall take the action prescribed by paragraph (2).

(2) If upon the expiration of the period applicable under paragraph (1) an agreement is not in effect for the designation of a State Agency for a State, the Secretary shall until such an agreement is in effect take the following action:

(A) During the first twelve months after the date of the expiration of the applicable period, the Secretary shall reduce by 25 percent the amount of each allotment, grant, loan, and loan guarantee made to and each contract entered into with an individual or entity in such State during such period under this chapter or the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

(B) During the second twelve months after such expiration date, the Secretary shall reduce by 50 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(C) During the third twelve months after such expiration date, the Secretary shall reduce by 75 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(D) After the expiration of thirty-six months after such expiration date, the Secretary may not make or enter into any such allotment, grant, loan, loan guarantee, or contract.

May 10, 1982

The Honorable Mike Beirne
Chairman
House HESS Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Rep..sentative Beirne:

I am enclosing a Program Policy Notice we recently received from the Bureau of Health Planning in the U. S. Department of Health and Human Services. This Notice emphasizes that states which do not have State Health Planning and Development Agencies which fully comply with federal requirements will lose federal support for health planning efforts and will also lose most federal Public Health Service dollars. Alaska currently receives some $5 million annually in such federal funds. Our lack of compliance would result in one quarter of these funds being withheld for four years until certain federal public health service funds are no longer available to Alaska.

We appreciate the hearing you conducted on House Bill 195. We believe this bill, with the amendments we offered, would bring our State Health Planning and Development Agency into full compliance with federal requirements. Your assistance in helping to move this legislation would be very much appreciated.

We appreciate your assistance and support in this matter.

Sincerely,

Helen D. Beirne

November 4, 1982

The Honorable Ted Stevens
United States Senate
Washington, D.C. 20510

Similar letter sent to:
Senator Murkowski and
Congressman Young

Dear Senator Stevens:

As you are well aware the State of Alaska is not in conformity with the National Health Planning and Development Act and without federal action in 1982 faces penalties in grant monies under the Public Health Service Act and the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970. To avoid this penalty it is imperative that Congress repeal 42 U.S.C. 300m-(d) (copy attached).

This Association as well as the Alaska State Medical Association (resolutions attached) are opposed to the continuation of the state Certificate of Need law. Both are committed to its repeal in 1983. Repeal of 42 U.S.C. 300m-(d) will greatly assist our efforts.

We have communicated our support for various measures considered by this Congress to restructure the federal law. It appears however, that a full reform may be a consideration which must be left to the next Congress. If that is so, it is imperative that you secure repeal of 42 U.S.C. 300m-(d) before the current Congress adjourns in December.

All of those concerned with this issue including Congressman Waxman, the National Governors Conference, the American Hospital Association, etc., agree on removing sanctions against states which do not conform to the federal program. The notion of further delay of the sanctions does not assist anyone, it simply prevents states such as Alaska from dealing with its own law on anything beyond a temporary basis.

For these reasons we urge you to secure the repeal of 42 U.S.C. 300m-(d). This will permit the legislature of the State of Alaska to deal with its law in whatever manner it deems appropriate. Further, we urge that this repeal be secured prior to the adjournment of the 97th Congress.

Sincerely,

Dennis L. DeWitt

POLICY STATEMENT

Blue Cross of Washington and Alaska supports the retention of Certificate of Need. That process should, however, be modified as follows:

1. The dollar threshold should be increased to $1,000,000 per application.

2. Modifications which are necessary to reduce health and safety hazards should be exempted.

3. The State Health Planning and Development Agency should become the sole health planning body for the State and should be charged with health planning for all Alaskans. A provision should be included allowing municipalities to establish local health councils to the State Health Planning and Development Agency, who may make recommendations on planning matters.

FEB 9 1983

February 03, 1983

The Honorable Mae Tischer
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Tischer:

The Board of Directors of the Northern Alaska Health Resources Association has discussed the issue of repeal of the Certificate-of-Need (CON) law as currently proposed in HB 19. We reached agreement that a modified CON process is preferable to repeal. Although we recognize that there are problems with the current process, we believe that they can be solved by making major revisions in the regulations rather than by repealing the law. There is little disagreement that the threshold limits that trigger CON review are too low or that review of many non-clinical expenditures is a nuisance. Moreover, the process should be tightened up so that reviews are completed in a timely and efficient manner.

There are several reasons why we believe the CON process should be retained; however, the most important reason has to do with citizen participation in deciding what health care services and facilities are most appropriate and affordable for a specific community or region of the state. The issue has not been whether a CON should be approved or denied but rather that a discussion or negotiation has taken place between the community and health-care facility regarding local, regional and statewide needs. The Certificate-of-Need process has been a forum for these discussions and has served to guide the appropriate development of health care services and facilities throughout the state.

A recent trend has been to appropriate increasing amounts of public funds for construction or expansion of health care facilities in Alaska (i.e., $31,500,000, FY 81-82). Moreover, we are seeing the cost of health care increasing at a rate which has been consistently higher than the general rate of inflation. It has been demonstrated that capital investment contributes significantly to the growth of total hospital expenditures. Although it is true that general inflation, sophisticated technology, and increasing staff requirements also contribute to rising costs of hospital care, hospital capital investments add to the operating costs by an amount in excess of the value of the investment. In April, 1982, Arthur D. Little, Inc., a health economics consulting firm under contract with the National Center for Health Services Research, estimated that the present value of additional operating expenditures in the next ten years is $1.84 for every dollar invested in capital improvements, exclusive of depreciation and debt service. Uncontrolled

529 5th avenue, suite 8 fairbanks, alaska 99701 telephone (907) 456-2553

capital expenditures for more or bigger health care facilities can only serve to drive up operating costs at an accelerated rate. These increased costs are ultimately passed on to the patient or community. We believe that people must continue to have the opportunity and responsibility through the CON process to determine what level of health services they are willing to pay for. Competition in the health care field essentially does not exist, especially in Alaska where most communities cannot afford more than one health care facility; therefore, the only way that we can keep a lid on overbuilding is through a capital expenditures review program similar to the current Certificate-of-Need program.

Several states have already revised their CON process (among them Colorado and New Mexico) with full support of their respective state hospital associations. Revision of Alaska's CON process must occur if we expect to see the process work as it was designed to do. The following revisions are offered for consideration:

1. Increase the threshold level which triggers a CON review from $150,000 to at least:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

In summary, there is little disagreement that there are problems with the current CON process; however, the forum that the CON process provides for community discussion about the relative merits of a proposed project far outweigh what we perceive to be correctable problems. We recommend revision of the CON process rather than repeal.

Sincerely,

J. B. Carnahan

February 11, 1983

TO: Members of the Alaska Legislature

Proposed legislation (HB 19 and SB 85) would repeal Alaska Statute 18.07.031-18.07.111, better known as the Alaska Certificate of Need (CON) law. These bills reflect the position of the Alaska Hospital Association, whose member institutions are subject to the provisions of the CON process. The attached paper, developed by the Alaska Health Coalition, was written to provide legislators and the public with a series of alternatives to consider during discussion of these important bills. The paper summarizes the provisions of the CON law, discusses several of the problems which have been identified with the current process, and reviews the effectiveness of the CON program, both nationally and within Alaska. In addition, a list of recommendations is provided for consideration in revising the current CON law.

The Alaska Health Coalition is a group of interested citizens with memberships from the three Alaska Health Systems Agencies and the Statewide Health Coordinating Council. The primary purposes of the Coalition are to review the need for health planning, development, and promotion activities and to develop goals, describe functions, and recommend structures to achieve optimal health for the citizens of the state. Therefore, we believe that the subject of public review of capital expenditures as currently provided for in the Certificate of Need law is an important issue which deserves a reasonable, objective discussion. We present this paper for the purpose of initiating this discussion.

For additional information, please contact any of the following organizations: Northern Alaska Health Resources Association, Fairbanks (456-2553); South Central Health Planning and Development, Anchorage (278-3631); or, Southeast Alaska Health Systems Agency, Ketchikan (225-9681).

National Health Planning and Development Act of 1974..... 14

EXECUTIVE SUMMARY

Alaska's Certificate of Need (CON) Law was enacted by the State Legislature in 1976, following passage of Public Law 93-641, the National Health Planning and Resource Development Act of 1974. Provisions in the CON law require that non-federal health care institutions apply for and receive a Certificate of Need from the State of Alaska before proceeding with major capital investments which will result in new construction, alterations or renovations, and/or new services. The Thirteenth Alaska Legislature currently has before it companion bills, HB 19 and SB 85, which provide for repeal of the CON law. The purpose of this paper is to review the data available on the effectiveness of the CON process, both nationally and within the State of Alaska, and to present alternatives for consideration by the Legislature regarding public review of capital expenditures for health care facilities.

Evidence is presented that the CON program has had an effect on limiting the amount of capital expenditures. Furthermore, current economic research has demonstrated that, for every dollar of capital investment made in a health care facility, an accompanying increase in operating costs can be expected amounting to 184% of the original investment in ten years.

Evidence gathered on Alaska's experience with the Certificate of Need program indicated that it has been effective in deterring and/or guiding capital investment within the health care industry and has stimulated improved planning within the health-care institutions themselves. Examples are presented which illustrate how the process created this impact.

Several issues are discussed relating to recognized concerns within the current CON process. These issues include: 1) costs attendant to developing a CON application; 2) delays in the review process; 3) loss of community control; 4) marketplace economics; and, 5) the dollar-threshold limits which require a CON.

The conclusion drawn from this review was that, although there are problems with the current CON process, revision of the law is preferable to outright repeal. Recommendations for revision of the law are provided and include:

1. Raising threshold levels.
2. Exempting non-clinical capital expenditures.
3. Expediting reviews of equipment replacement.
4. Specifying time limits on reviews.
5. Providing legislators with information on the outcome of reviews in their districts.
6. Providing for a sunset review of the process.

CERTIFICATE OF NEED PROGRAM

PURPOSE

The most controversial aspect of the health planning effort, in Alaska and nationwide, has been the Certificate of Need (CON) program. Borrowed from public utility regulations, the earliest CON program was enacted by New York in 1964. Twenty-six other states instituted CON programs in the next ten years, and, with the passage of Public Law 93-641, CON was mandated for all states. Alaska's Certificate of Need statute (18.07.031-.111) was enacted by the State Legislature in 1976 and amended in 1981.

As originally designed, the CON program was implemented to curb rapidly escalating costs of health care by stemming uncontrolled capital investments in new health-care facilities, services, and high-technology equipment. To accomplish this goal, the CON program had several primary objectives: 1) to prevent unnecessary duplication of services and facilities; 2) to reduce the number of available hospital beds or at least not allow the growth of hospital beds to exceed guidelines established in the State Health Plan; 3) to promote an equitable and efficient allocation of resources; and 4) to determine if less costly alternatives to expensive capital expenditures were available to accomplish the same purpose.

WHO MUST APPLY

The State of Alaska requires approval of capital expenditures for projects which meet or exceed certain thresholds:

1. Capital expenditures in excess of $150,000 toward building, improving, or purchasing a health care facility, including lease or purchase of equipment, costs of any study surveys, designs, and site acquisitions and preparations.

2. Any change within a two-year period in the licensed bed capacity of a health care facility amounting to 10 beds or 10 percent, whichever is the lesser, which increases or decreases the number of beds or redistributes beds among different categories of service.

3. Any addition or elimination of a major type of service offered in or through the health care facility.

A project meeting or exceeding these thresholds is required to obtain a Certificate of Need from the State of Alaska prior to implementation.

THE PROCESS

An applicant enters the CON review process by submitting a "Letter of Intent" to the Department of Health and Social Services (DHSS) and to the appropriate health systems agency describing briefly the scope of the proposed activity. If the DHSS determines that the project is subject to CON review, the applicant develops a formal application and submits it to the State agency and the regional health systems agency. In most cases, a pre-application conference is scheduled with the applicant to minimize any potential misunderstandings and to achieve an agreement on what would represent a successful application. Once the State agency certifies that the application is "complete" -- that it contains sufficient information necessary to conduct an objective review -- the agency has 90 days to review the application and to submit an analysis to the Commissioner of DHSS for final action. Within the 90-day review period, the regional health planning agency has 60 days to review and seek public comments on the appropriateness of the proposed application. The HSA submits its findings and recommendations to the Commissioner. Once the Commissioner has considered the information that has been submitted, he decides whether or not to issue a Certificate of Need to the applicant. The Commissioner notifies the applicant in writing of the decision. Copies of the decision are sent to the Health Systems Agency and are published in regional newspapers.

EFFECTIVENESS

Nationwide

Nationally, credible information is just beginning to emerge regarding the effect of capital expenditures review. Although this topic has been of interest for many years, much of the early literature is of little value because of a basic lack of understanding about the process and outcome of capital expenditure review programs.[1] Two recently completed studies in the State of Massachusetts have reported CON impacts.[2,3] The first analyzed hospital capital investment among short-term general voluntary hospitals between 1967-1976. The results were that, by 1976 and beyond, CON review reduced all dimensions of project scale and cost by as much as two-thirds of that originally proposed. The second study found that the formal and informal actions of the CON agency from 1972-1976 resulted in small, but statistically significant, reductions in the rate of hospital investment.

Two studies conducted in 1982 by Arthur D. Little, Inc., shed additional light on the potential impact of capital expenditures review.[4,5] The first study analyzed the effect of capital expenditures review decisions in five states: Colorado, Florida, Maryland, Massachusetts, and Oregon (chosen for their geographical and regulatory differences). Based on their analysis, CON programs appeared to be effective in limiting the amount of capital expenditures undertaken. Furthermore, they discovered that, for every dollar of capital investment, there was a definite increase in operating costs. They projected that, over a ten-year period, a dollar of capital investment generates additional operating costs with a present value of $1.84 (exclusive of

depreciation and debt service). They concluded from these results that CON programs have the potential to play an important role in curbing hospital cost inflation.[4]

A second report by Arthur D. Little, Inc., involved an analysis of information from a six-state study.[5] For the states of Virginia, South Carolina, Washington, New Jersey, Iowa and Colorado, Arthur D. Little undertook a review of Certificate of Need programs for the twelve-month period beginning July 1, 1979 to June 30, 1980. Three significant findings were reported: 1) certain capital costs were not incurred as a result of the CON review program; 2) the objectives contained in individual state plans and health systems plans tended to deter capital expenditure projects; and, 3) pre-application conferences -- health planners and providers working together to avoid project denial -- were effective means of reducing the "administrative costs" of the review process as well as excessive capital expenditures.[6]

Alaska

Currently (February 1983) there are five projects under review by the Department of Health and Social Services that total $106,000,000. Two additional applications are anticipated, totalling $20,820,000. These seven applications ($126.8 million) provide an interesting contrast with the more than 30 projects which were approved for $149,000,000 in the previous five years (1977-1982).

Two projects with a combined total of $12,400,000 have been denied during the past five years. In addition, several other Letters of Intent have been received by the Department for which applications were never received. It is impossible to estimate how many applications or letters of intent were never submitted because of the presence of the CON law.

The Alaska CON Program has been effective in accomplishing three things. First, it seems reasonable to expect that CON has deterred misdirected projects that could not withstand the test of public scrutiny. It has, therefore, acted to uphold existing plan standards. Secondly, it has guided institutional actions into areas which are compatible with the goals and objectives of the State as reflected in State and regional health plans. Thirdly, the presence of the CON program has promoted better planning on the part of the health care institutions throughout the State.

Deterrent Effects

Although the deterrent effect of Certificate of Need is admittedly difficult to demonstrate, there is evidence from the number of "Letters of Intent" which never resulted in an application that CON is a deterrent. A specific example of this phenomenon was observed during a recent effort by four different applicants to provide inpatient alcoholism treatment services in and around Anchorage. The Department of

Health and Social Services and the local health systems agency identified a need for 40-80 alcohol-treatment beds in the area. Due to pre-application planning, only two of the four applications were completed for final consideration. Both were subsequently approved.

Improved Institutional Planning

Situations in which the CON process provides expert guidance and stimulates better institutional planning do not always result in smaller, less-expensive projects. For example, Valley Hospital in Palmer submitted an application to complete a minimal and temporary renovation of their 30-year old facility at a cost of $2,000,000. Part of the renovation included additional insulation to prevent heat loss through the roof. At the suggestion of the Department, a structural engineer was asked to study the ability of the roof to withstand the increased load of snow which would not be melted because of the insulation. The Department also requested a life-cycle cost analysis which would determine the cost of a temporary renovation as opposed to costs of major renovation. The results of these inquiries demonstrated that the roof was not designed to withstand the extra load of snow and that, when total operating expenses and capital costs were considered for a 25-year period, it would be less expensive to forgo the minimal renovation and proceed with a major renovation. The result of this review was an approval for a major renovation project -- at a long-term cost savings.

Petersburg General Hospital filed a letter of intent for $3,400,000 to renovate an existing acute care facility. Following an architectural assessment of the facility and a life-cycle cost analysis requested by the State, it was determined that the cost of new construction would be preferable to renovation. Subsequently, a CON was approved for $7,150,000. Obviously, the CON process is not punitive, but rather seeks to use health care resources to gain the maximum benefit for the community.

Hospitals in Homer and Fairbanks submitted proposals for review which contained "shelled-in" space for which no use was intended for the immediate future. In Homer, the Department requested further assessment of the situation to identify a solution to future use of the shelled-in space. As a result the plans were redrawn for the renovation and expansion and included the proposed use of the shelled-in space.

Better Conformance with Identified Community Needs

In Fairbanks, the CON process stimulated a community discussion of the need for inpatient psychiatric services and a concern for approving the construction of two shelled-in floors that did not have an identified use. Because of discussions at the local level during the review by the health systems agency, the hospital agreed to specify the intended use of the shelled-in space and, furthermore, to enter into a planning process with the community during the following year to determine the most appropriate configuration for the proposed services.

Summary

Although it is difficult to place a dollar figure on the impact of the Certificate of Need program over the past six years, it appears that Alaska's program has effectively deterred and guided capital investment within the health care industry and has stimulated improved planning within the institutions themselves. Because of the CON program, Alaskans have saved millions of dollars in operating costs which would have resulted from unneeded expansion of facilities and services. Moreover, the State Legislature and the Administration should feel some measure of assurance that, because of the CON process, the millions of dollars in public funds that have flowed from the State to health care facilities for construction and operation are being used for projects which meet an identified need, do not duplicate existing services, and are financially feasible.

PROBLEMS WITH THE CON PROCESS AND RECOMMENDATIONS FOR IMPROVEMENT

INTRODUCTION

Proponents and opponents of the Certificate of Need program agree that the current CON process requires substantial changes. Opponents cite several reasons for their decision to push for repeal of the current law. Among the reasons are: 1) significant costs are involved in developing a CON application and proceeding through the review; 2) delays in implementation are caused by an extended review period; 3) the CON process removes community control; 4) market-place economics should control capital investment; and 5) threshold limits which trigger a CON review are too low.

COSTS

No one denies that there are costs attendant to developing a CON application. The majority of those costs, which have been estimated to run as high as $40,000 for the more complex projects, can be attributed to personnel costs. Most of these costs would continue in the absence of CON if a facility did a credible job of planning for future services. In order to gain public support, justify the financial feasibility of a construction project, and obtain adequate architectural designs, planning still must occur. The costs of institutional planning will not disappear in the absence of CON.

DELAYS

Extended review schedules have in some cases resulted in delays in construction start-up time which have been not only frustrating but also costly. It seems reasonable that the cause for these delays can be identified and corrected by revising the regulations regarding CON review. For example, provisions could be made to expedite review of capital equipment replacement and to set a time limit for a decision by the Commissioner subsequent to a recommendation by a regional health planning agency. Also, by raising the threshold limits which require a CON, there will be approximately 25% fewer reviews to do. This should improve the efficiency of the review process.

COMMUNITY CONTROL

Concern has been expressed that the CON process removes community control from local jurisdictions in the case of municipally-owned facilities and local advisory boards with respect to corporately-owned facilities. However, local governments and advisory boards do not necessarily maintain a regional or statewide perspective when it comes to considering new services and facilities. In other words, persons who

serve on local hospital advisory boards are chosen for their expertise and dedication in local issues; often, however, a project will have regional or statewide implications that cannot be properly addressed at the local level. The CON process, at the very least, offers local, regional and statewide perspectives on the need and appropriateness of a proposed project. Instead of removing community control, the CON process bestows some control on the community at large.

In addition, a trend is evident that an increasing amount of public funds are being appropriated by the legislature for construction and renovation. It seems reasonable that in a time of decreasing state revenues, citizens should have an opportunity to influence the distribution of these funds so that they meet state and regional needs instead of local demand. The CON process ensures public participation in these decisions.

MARKETPLACE ECONOMICS: COMPETITION vs. "REGULATION"

In recent years, there has been a popular theory that the problems in U.S. health services can be blamed on excessive government intervention and regulations. It has been argued that high costs and related problems could be solved by a "return to the free market and competition."[6] Two recent articles argue to the contrary.[7,8]

Roemer and Roemer, well-known health-economics experts, examined the past and present operations of free trade and competition in the health care system and found that not one of at least five conditions necessary for competition existed.[7] In addition, they found that the free market created a geographic maldistribution of health manpower, causing serious problems for rural populations. Furthermore, they discussed the paradoxical problem which has been demonstrated for every component of the health care industry of "supply creating demand" rather than the reverse, which is true in an effectively operating market. Supply creates demand in the health care industry fundamentally because the seller (doctor) rather than the buyer (patient) makes most of the decisions on what health services are to be obtained.[7]

Needlemen, another health economist, expressed a similar opinion.[8]

> An effective market is one in which there is competition on the basis of both price and quality, and in which those who sell services are limited in their ability to influence the volume of services they sell and are constrained in the prices they set by competitive pressures. By this definition, an effective market for health care services does not exist in most communities. Competition exists but it is rarely price competition; indeed the nature of current competition based on scope of services, amenities, and convenience is to encourage price increasing behavior. (Emphasis added).[8]

Arthur D. Little, Inc., summarized the policy implication of the debate surrounding competition and regulation. They reported that, in the absence of Certificate of Need regulations, hospitals will compete more vigorously by offering improved facilities to recruit physicians and patients. The resulting "building boom" will drive up operating expenditures over the next ten years by $1.84 for every dollar invested, exclusive of depreciation and debt service.

THRESHOLD LIMITS

Alaska regulations specify that a CON is required for any capital expenditure in excess of $150,000. There is general agreement that this threshold is far too low. Federal regulations have already changed to accomodate a significant increase in CON thresholds. The threshold levels which trigger a CON review should be increased from $150,000 to at least $600,000 for capital expenditures; $400,000 for major medical equipment; and $250,000 for operating expenses associated with new services.

CONCLUSIONS

Recent evidence nationally and available information from the Certificate of Need Program in Alaska indicate that the program has been effective in deterring unjustified projects, guiding capital investment projects, and stimulating improved institutional planning. Together these effects have served to meet the health care needs of the public, prevent duplication of costly services, and restrain the increasing costs of health care. Acute problems with the CON process are correctable by amending the law.

Options available to the Legislature can be placed into three categories: 1) keep the law as it is and maintain the status quo; 2) repeal the law in its entirety; or, 3) revise the law to correct recognized problems.

MAINTAIN CURRENT CON PROCESS

The State would continue to operate the program in its current form. This option assumes the CON process is working efficiently and requires only minor changes.

Because of recognized problems, this option appears to have little merit. Threshold levels are too low, most non-clinical expenditure reviews are a nuisance for applicants and reviewers, and delays in the review process are unacceptable.

REPEAL THE CON LAW

This option assumes that the Certificate of Need process has been entirely ineffective and that marketplace incentives will arise to control capital investments and health care costs.

It also assumes that public review of health care capital expenditures are unimportant and that health care consumers should not have a voice in determining the appropriateness of services in their community.

A competitive pricing market does not exist within the health care services industry of any community in Alaska. In addition, the State of Alaska did not renew its Section 1122 agreement with the federal government in 1981 because the Certificate of Need law was in place. (Section 1122 of PL 92-603 required that health care facilities, which received federal monies under Titles XVIII and XIX, be subject to review to ensure consistency with state health plans.) Repeal of the CON law would leave the State entirely without a capital expenditure review process for health care facilities; therefore, the State would have to rely principally on either the competitive market or incentives established under some kind of a prospective reimbursement system to control costs and allocate resources. (Hospitals are currently reimbursed by the federal government under Medicare and Medicaid on a retrospective basis; that is, after the costs have already occurred. Under this

reimbursement mechanism, there is no real incentive for containing costs. Prospective reimbursement, on the other hand, would require that hospitals negotiate the rate or cost of a service a year in advance. The government and other third-party insurers would reimburse the hospital only at the negotiated rate; therefore, costs exceeding the rate would be borne by the hospital, and, conversely, the hospital would make money if costs were kept below the negotiated rate.)

Because a competitive pricing market does not exist anywhere in Alaska, eliminating the CON program will likely lead to new, unneeded services and facilities which will result in increased operating costs. These costs are passed directly on to the buyers (patients and taxpayers).

Prospective reimbursement, on the other hand, comes in various forms and generally has been found to be more difficult to enact and implement than Certificate of Need. Generally speaking, prospective reimbursement is likely to be successful only where there has been political support for Certificate of Need.[3]

Finally, repeal of CON serves the interests of the health services establishment only. Those who control health-care costs would also be controlling capital investments. Consumers could not have a voice in determining the most appropriate and affordable level of service for their community or region.

MODIFY THE CON PROCESS

This option assumes that the CON program has been effective and can be modified to make it more efficient. The scope of the CON program could be scaled back by raising threshold levels and exempting certain non-clinical capital expenditures. Under this option, the CON program could be reduced further if a market capable of insuring an appropriate allocation of services emerged or to complement a prospective reimbursement system.

RECOMMENDATIONS

The Alaska Health Coalition recommends that negotiations take place among members of the Alaska State Hospital Association, the Legislature, and the Administration to work out revised CON regulations.

[redacted]

1. [redacted] to at least:

[redacted]

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. [redacted]

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. [redacted] the CON process.

APPENDIX

NATIONAL HEALTH PLANNING AND DEVELOPMENT ACT OF 1974

INTRODUCTION

Public Law 93-641, (National Health Planning and Resource Development Act), passed by the U.S. Congress in 1974, established a national health planning program which was implemented in each state and several American territories. The intent of Congress was to integrate previously sponsored programs (Hill-Burton, Regional Medical Program, Comprehensive Health Planning), retain the best features of each, and address major national, state, and local concerns about the current planning, development, and operation of the nation's health care system. To address these concerns, the Act authorized the designation and funding of state and regional health planning agencies and set forth several functions these agencies had to perform in order to further the "achievement of equal access to quality health care at a reasonable cost."

HEALTH SYSTEMS AGENCIES

Health Systems Agencies (HSAs) were designated as local or regional bodies with the responsibility for preparing and implementing plans designed to improve the health of the residents of its health service area; to increase the acceptability, accessibility, continuity and quality of health services of the area; to restrain increases in the cost of providing health services; and, to prevent unnecessary duplication of health resources. These functions were carried out by interested consumers and providers working together to identify community and regional problems and to develop strategies and recommendations to help alleviate those problems.

HSAs were established as either private, non-profit corporations or public entities governed by boards that had to have a consumer majorities. Operational funds have been awarded through both Federal (PHS) and State (DHSS) sources. In Alaska, the Governor designated three health service areas which were each to be served by an HSA. Alaska's three HSAs are: Northern Alaska Health Resources Association, Inc. (Fairbanks), serving northern Alaska; South Central Health Planning and Development, Inc. (Anchorage), serving south central Alaska, including the Aleutian chain; and Southeast Alaska Health Systems Agency (Ketchikan), serving Alaska's panhandle.

STATE HEALTH PLANNING AND DEVELOPMENT AGENCY

The Governor designated a State Health Planning and Development Agency (SHPDA) as a unit of State government. The SHPDA has the responsibility to conduct the health planning activities of the State, including preparation and implementation of the State Health Plan, and to provide coordination of the HSAs. The SHPDA also supports the function of the Statewide Health Coordinating Council and is responsible for administration of the Certificate of Need program. In Alaska, the SHPDA resides within the Department of Health and Social Services. It currently occupies division-level status.

STATEWIDE HEALTH COORDINATING COUNCIL

The Alaska Statewide Health Coordinating Council (SHCC) is the third entity involved in the State health planning network. The SHCC is a group of citizens appointed by the Governor who oversee the health planning activities within the State. Specifically, they have responsibility for preparation of the State Health Plan. The State Health Plan forms the basis upon which Certificate of Need applications are reviewed. Both the SHPDA and SHCC are supported with a mix of Federal and State funds.

STATEMENT OF

ÆTNA LIFE INSURANCE COMPANY

IN OPPOSITION TO

H.B. 19

As a major writer of commercial health insurance, the Ætna Life Insurance Company has for years been deeply concerned about health care cost increases and has consistently supported viable health planning programs. We strongly oppose H.B. 19, An Act Repealing the Certificate of Need Program. We believe that enactment of this legislation would represent a large step backward in Alaska's effort to realize an efficient and effective health care delivery system.

Health planning is one of the elements in the armamentarium of programs that are necessary to help in the reduction of the escalation of health costs and to ensure that the health care delivery system of the future is one that has been rationally and systematically planned.

We feel that it is most important that there be a mechanism in place for participation in the planning and development of health programs to improve the distribution of health services, ensuring that services are available to those citizens who need them, while restricting the investment in unnecessary facilities and services.

An important portion of a viable health planning program is state certificate of need legislation. We find it is essential to have such legislation in order that the necessity of capital expenditures can be determined, because of the two-pronged effect on the growth of health care costs. In the short run, the purchase, installation, and financing of expenditures increases annual health care expenditures. In the long run, operation and maintenance of capital expenditures continue to add to health care costs, to increased use of highly skilled labor (for maintenance and operation) and non-labor inputs (i.e., energy, supplies, etc.).

It has been estimated that every dollar of capital investment adds an additional 50¢ to annual operating cost. An important element in today's economy, which has had a dramatic effect on health care costs related to capital expenditures, is the interest rate now being charged on the finance debt. Efforts must be made to ensure that all capital expenditures made today are necessary and consistent with the goals of Alaska's Health Systems Plan and necessity for such expenditures.

Alaska's Certificate of Need Program is an important tool for implementation of the area health plan. We urge that this program be continued.

February 11, 1983

FEB 15 [illegible]

TO: Members of the Alaska Legislature

Proposed legislation (HB 19 and SB 85) would repeal Alaska Statute 18.07.031-18.07.111, better known as the Alaska Certificate of Need (CON) law. These bills reflect the position of the Alaska Hospital Association, whose member institutions are subject to the provisions of the CON process. The attached paper, developed by the Alaska Health Coalition, was written to provide legislators and the public with a series of alternatives to consider during discussion of these important bills. The paper summarizes the provisions of the CON law, discusses several of the problems which have been identified with the current process, and reviews the effectiveness of the CON program, both nationally and within Alaska. In addition, a list of recommendations is provided for consideration in revising the current CON law.

The Alaska Health Coalition is a group of interested citizens with memberships from the three Alaska Health Systems Agencies and the Statewide Health Coordinating Council. The primary purposes of the Coalition are to review the need for health planning, development, and promotion activities and to develop goals, describe functions, and recommend structures to achieve optimal health for the citizens of the state. Therefore, we believe that the subject of public review of capital expenditures as currently provided for in the Certificate of Need law is an important issue which deserves a reasonable, objective discussion. We present this paper for the purpose of initiating this discussion.

For additional information, please contact any of the following organizations: Northern Alaska Health Resources Association, Fairbanks (456-2553); South Central Health Planning and Development, Anchorage (278-3631); or, Southeast Alaska Health Systems Agency, Ketchikan (225-9681).

EXECUTIVE SUMMARY

Alaska's Certificate of Need (CON) Law was enacted by the State Legislature in 1976, following passage of Public Law 93-641, the National Health Planning and Resource Development Act of 1974. Provisions in the CON law require that non-federal health care institutions apply for and receive a Certificate of Need from the State of Alaska before proceeding with major capital investments which will result in new construction, alterations or renovations, and/or new services. The Thirteenth Alaska Legislature currently has before it companion bills, HB 19 and SB 85, which provide for repeal of the CON law. The purpose of this paper is to review the data available on the effectiveness of the CON process, both nationally and within the State of Alaska, and to present alternatives for consideration by the Legislature regarding public review of capital expenditures for health care facilities.

Evidence is presented that the CON program has had an effect on limiting the amount of capital expenditures. Furthermore, current economic research has demonstrated that, for every dollar of capital investment made in a health care facility, an accompanying increase in operating costs can be expected amounting to 184% of the original investment in ten years.

Evidence gathered on Alaska's experience with the Certificate of Need program indicated that it has been effective in deterring and/or guiding capital investment within the health-care industry and has stimulated improved planning within the health-care institutions themselves. Examples are presented which illustrate how the process created this impact.

Several issues are discussed relating to recognized concerns within the current CON process. These issues include: 1) costs attendant to developing a CON application; 2) delays in the review process; 3) loss of community control; 4) marketplace economics; and, 5) the dollar-threshold limits which require a CON.

The conclusion drawn from this review was that, although there are problems with the current CON process, revision of the law is preferable to outright repeal. Recommendations for revision of the law are provided and include:

1. Raising threshold levels.
2. Exempting non-clinical capital expenditures.
3. Expediting reviews of equipment replacement.
4. Specifying time limits on reviews.
5. Providing legislators with information on the outcome of reviews in their districts.
6. Providing for a sunset review of the process.

CERTIFICATE OF NEED PROGRAM

PURPOSE

The most controversial aspect of the health planning effort, in Alaska and nationwide, has been the Certificate of Need (CON) program. Borrowed from public utility regulations, the earliest CON program was enacted by New York in 1964. Twenty-six other states instituted CON programs in the next ten years, and, with the passage of Public Law 93-641, CON was mandated for all states. Alaska's Certificate of Need statute (18.07.031-.111) was enacted by the State Legislature in 1976 and amended in 1981.

As originally designed, the CON program was implemented to curb rapidly escalating costs of health care by stemming uncontrolled capital investments in new health-care facilities, services, and high-technology equipment. To accomplish this goal, the CON program had several primary objectives: 1) to prevent unnecessary duplication of services and facilities; 2) to reduce the number of available hospital beds or at least not allow the growth of hospital beds to exceed guidelines established in the State Health Plan; 3) to promote an equitable and efficient allocation of resources; and 4) to determine if less costly alternatives to expensive capital expenditures were available to accomplish the same purpose.

WHO MUST APPLY

The State of Alaska requires approval of capital expenditures for projects which meet or exceed certain thresholds:

1. Capital expenditures in excess of $150,000 toward building, improving, or purchasing a health care facility, including lease or purchase of equipment, costs of any study surveys, designs, and site acquisitions and preparations.

2. Any change within a two-year period in the licensed bed capacity of a health care facility amounting to 10 beds or 10 percent, whichever is the lesser, which increases or decreases the number of beds or redistributes beds among different categories of service.

3. Any addition or elimination of a major type of service offered in or through the health care facility.

A project meeting or exceeding these thresholds is required to obtain a Certificate of Need from the State of Alaska prior to implementation.

THE PROCESS

An applicant enters the CON review process by submitting a "Letter of Intent" to the Department of Health and Social Services (DHSS) and to the appropriate health systems agency describing briefly the scope of the proposed activity. If the DHSS determines that the project is subject to CON review, the applicant develops a formal application and submits it to the State agency and the regional health systems agency. In most cases, a pre-application conference is scheduled with the applicant to minimize any potential misunderstandings and to achieve an agreement on what would represent a successful application. Once the State agency certifies that the application is "complete" -- that it contains sufficient information necessary to conduct an objective review -- the agency has 90 days to review the application and to submit an analysis to the Commissioner of DHSS for final action. Within the 90-day review period, the regional health planning agency has 60 days to review and seek public comments on the appropriateness of the proposed application. The HSA submits its findings and recommendations to the Commissioner. Once the Commissioner has considered the information that has been submitted, he decides whether or not to issue a Certificate of Need to the applicant. The Commissioner notifies the applicant in writing of the decision. Copies of the decision are sent to the Health Systems Agency and are published in regional newspapers.

EFFECTIVENESS

Nationwide

Nationally, credible information is just beginning to emerge regarding the effect of capital expenditures review. Although this topic has been of interest for many years, much of the early literature is of little value because of a basic lack of understanding about the process and outcome of capital expenditure review programs.[1] Two recently completed studies in the State of Massachusetts have reported CON impacts.[2,3] The first analyzed hospital capital investment among short-term general voluntary hospitals between 1967-1976. The results were that, by 1976 and beyond, CON review reduced all dimensions of project scale and cost by as much as two-thirds of that originally proposed. The second study found that the formal and informal actions of the CON agency from 1972-1976 resulted in small, but statistically significant, reductions in the rate of hospital investment.

Two studies conducted in 1982 by Arthur D. Little, Inc., shed additional light on the potential impact of capital expenditures review.[4,5] The first study analyzed the effect of capital expenditures review decisions in five states: Colorado, Florida, Maryland, Massachusetts, and Oregon (chosen for their geographical and regulatory differences). Based on their analysis, CON programs appeared to be effective in limiting the amount of capital expenditures undertaken. Furthermore, they discovered that, for every dollar of capital investment, there was a definite increase in operating costs. They projected that, over a ten-year period, a dollar of capital investment generates additional operating costs with a present value of $1.84 (exclusive of

depreciation and debt service). They concluded from these results that CON programs have the potential to play an important role in curbing hospital cost inflation.[4]

A second report by Arthur D. Little, Inc., involved an analysis of information from a six-state study.[5] For the states of Virginia, South Carolina, Washington, New Jersey, Iowa and Colorado, Arthur D. Little undertook a review of Certificate of Need programs for the twelve-month period beginning July 1, 1979 to June 30, 1980. Three significant findings were reported: 1) certain capital costs were not incurred as a result of the CON review program; 2) the objectives contained in individual state plans and health systems plans tended to deter capital expenditure projects; and, 3) pre-application conferences -- health planners and providers working together to avoid project denial -- were effective means of reducing the "administrative costs" of the review process as well as excessive capital expenditures.[5]

Alaska

Currently (February 1983) there are five projects under review by the Department of Health and Social Services that total $106,000,000. Two additional applications are anticipated, totalling $20,820,000. These seven applications ($126.8 million) provide an interesting contrast with the more than 30 projects which were approved for $149,000,000 in the previous five years (1977-1982).

Two projects with a combined total of $12,400,000 have been denied during the past five years. In addition, several other Letters of Intent have been received by the Department for which applications were never received. It is impossible to estimate how many applications or letters of intent were never submitted because of the presence of the CON law.

The Alaska CON Program has been effective in accomplishing three things. First, it seems reasonable to expect that CON has deterred misdirected projects that could not withstand the test of public scrutiny. It has, therefore, acted to uphold existing plan standards. Secondly, it has guided institutional actions into areas which are compatible with the goals and objectives of the State as reflected in State and regional health plans. Thirdly, the presence of the CON program has promoted better planning on the part of the health care institutions throughout the State.

Deterrent Effects

Although the deterrent effect of Certificate of Need is admittedly difficult to demonstrate, there is evidence from the number of "Letters of Intent" which never resulted in an application that CON is a deterrent. A specific example of this phenomenon was observed during a recent effort by four different applicants to provide inpatient alcoholism treatment services in and around Anchorage. The Department of

Health and Social Services and the local health systems agency identified a need for 40-80 alcohol-treatment beds in the area. Due to pre-application planning, only two of the four applications were completed for final consideration. Both were subsequently approved.

Improved Institutional Planning

Situations in which the CON process provides expert guidance and stimulates better institutional planning do not always result in smaller, less-expensive projects. For example, Valley Hospital in Palmer submitted an application to complete a minimal and temporary renovation of their 30-year old facility at a cost of $2,000,000. Part of the renovation included additional insulation to prevent heat loss through the roof. At the suggestion of the Department, a structural engineer was asked to study the ability of the roof to withstand the increased load of snow which would not be melted because of the insulation. The Department also requested a life-cycle cost analysis which would determine the cost of a temporary renovation as opposed to costs of major renovation. The results of these inquiries demonstrated that the roof was not designed to withstand the extra load of snow and that, when total operating expenses and capital costs were considered for a 25-year period, it would be less expensive to forgo the minimal renovation and proceed with a major renovation. The result of this review was an approval for a major renovation project -- at a long-term cost savings.

Petersburg General Hospital filed a letter of intent for $3,400,000 to renovate an existing acute care facility. Following an architectural assessment of the facility and a life-cycle cost analysis requested by the State, it was determined that the cost of new construction would be preferable to renovation. Subsequently, a CON was approved for $7,150,000. Obviously, the CON process is not punitive, but rather seeks to use health care resources to gain the maximum benefit for the community.

Hospitals in Homer and Fairbanks submitted proposals for review which contained "shelled-in" space for which no use was intended for the immediate future. In Homer, the Department requested further assessment of the situation to identify a solution to future use of the shelled-in space. As a result the plans were redrawn for the renovation and expansion and included the proposed use of the shelled-in space.

Better Conformance with Identified Community Needs

In Fairbanks, the CON process stimulated a community discussion of the need for inpatient psychiatric services and a concern for approving the construction of two shelled-in floors that did not have an identified use. Because of discussions at the local level during the review by the health systems agency, the hospital agreed to specify the intended use of the shelled-in space and, furthermore, to enter into a planning process with the community during the following year to determine the most appropriate configuration for the proposed services.

Summary

Although it is difficult to place a dollar figure on the impact of the Certificate of Need program over the past six years, it appears that Alaska's program has effectively deterred and guided capital investment within the health care industry and has stimulated improved planning within the institutions themselves. Because of the CON program, Alaskans have saved millions of dollars in operating costs which would have resulted from unneeded expansion of facilities and services. Moreover, the State Legislature and the Administration should feel some measure of assurance that, because of the CON process, the millions of dollars in public funds that have flowed from the State to health care facilities for construction and operation are being used for projects which meet an identified need, do not duplicate existing services, and are financially feasible.

PROBLEMS WITH THE CON PROCESS AND RECOMMENDATIONS FOR IMPROVEMENT

INTRODUCTION

Proponents and opponents of the Certificate of Need program agree that the current CON process requires substantial changes. Opponents cite several reasons for their decision to push for repeal of the current law. Among the reasons are: 1) significant costs are involved in developing a CON application and proceeding through the review; 2) delays in implementation are caused by an extended review period; 3) the CON process removes community control; 4) market-place economics should control capital investment; and 5) threshold limits which trigger a CON review are too low.

COSTS

No one denies that there are costs attendant to developing a CON application. The majority of those costs, which have been estimated to run as high as $40,000 for the more complex projects, can be attributed to personnel costs. Most of these costs would continue in the absence of CON if a facility did a credible job of planning for future services. In order to gain public support, justify the financial feasibility of a construction project, and obtain adequate architectural designs, planning still must occur. The costs of institutional planning will not disappear in the absence of CON.

DELAYS

Extended review schedules have in some cases resulted in delays in construction start-up time which have been not only frustrating but also costly. It seems reasonable that the cause for these delays can be identified and corrected by revising the regulations regarding CON review. For example, provisions could be made to expedite review of capital equipment replacement and to set a time limit for a decision by the Commissioner subsequent to a recommendation by a regional health planning agency. Also, by raising the threshold limits which require a CON, there will be approximately 25% fewer reviews to do. This should improve the efficiency of the review process.

COMMUNITY CONTROL

Concern has been expressed that the CON process removes community control from local jurisdictions in the case of municipally-owned facilities and local advisory boards with respect to corporately-owned facilities. However, local governments and advisory boards do not necessarily maintain a regional or statewide perspective when it comes to considering new services and facilities. In other words, persons who

serve on local hospital advisory boards are chosen for their expertise and dedication in local issues; often, however, a project will have regional or statewide implications that cannot be properly addressed at the local level. The CON process, at the very least, offers local, regional and statewide perspectives on the need and appropriateness of a proposed project. Instead of removing community control, the CON process bestows some control on the community at large.

In addition, a trend is evident that an increasing amount of public funds are being appropriated by the legislature for construction and renovation. It seems reasonable that in a time of decreasing state revenues, citizens should have an opportunity to influence the distribution of these funds so that they meet state and regional needs instead of local demand. The CON process ensures public participation in these decisions.

MARKETPLACE ECONOMICS: COMPETITION vs. "REGULATION"

In recent years, there has been a popular theory that the problems in U.S. health services can be blamed on excessive government intervention and regulations. It has been argued that high costs and related problems could be solved by a "return to the free market and competition."[6] Two recent articles argue to the contrary.[7,8]

Roemer and Roemer, well-known health-economics experts, examined the past and present operations of free trade and competition in the health care system and found that not one of at least five conditions necessary for competition existed.[7] In addition, they found that the free market created a geographic maldistribution of health manpower, causing serious problems for rural populations. Furthermore, they discussed the paradoxical problem which has been demonstrated for every component of the health care industry of "supply creating demand" rather than the reverse, which is true in an effectively operating market. Supply creates demand in the health care industry fundamentally because the seller (doctor) rather than the buyer (patient) makes most of the decisions on what health services are to be obtained.[7]

Needlemen, another health economist, expressed a similar opinion.[8]

> An effective market is one in which there is competition on the basis of both price and quality, and in which those who sell services are limited in their ability to influence the volume of services they sell and are constrained in the prices they set by competitive pressures. By this definition, an effective market for health care services does not exist in most communities. Competition exists but it is rarely price competition; indeed the nature of current competition based on scope of services, amenities, and convenience is to encourage price increasing behavior. (Emphasis added).[8]

Arthur D. Little, Inc., summarized the policy implication of the debate surrounding competition and regulation. They reported that, in the absence of Certificate of Need regulations, hospitals will compete more vigorously by offering improved facilities to recruit physicians and patients. The resulting "building boom" will drive up operating expenditures over the next ten years by $1.84 for every dollar invested, exclusive of depreciation and debt service.

THRESHOLD LIMITS

Alaska regulations specify that a CON is required for any capital expenditure in excess of $150,000. There is general agreement that this threshold is far too low. Federal regulations have already changed to accomodate a significant increase in CON thresholds. The threshold levels which trigger a CON review should be increased from $150,000 to at least $600,000 for capital expenditures; $400,000 for major medical equipment; and $250,000 for operating expenses associated with new services.

CONCLUSIONS

Recent evidence nationally and available information from the Certificate of Need Program in Alaska indicate that the program has been effective in deterring unjustified projects, guiding capital investment projects, and stimulating improved institutional planning. Together these effects have served to meet the health care needs of the public, prevent duplication of costly services, and restrain the increasing costs of health care. Acute problems with the CON process are correctable by amending the law.

Options available to the Legislature can be placed into three categories: 1) keep the law as it is and maintain the status quo; 2) repeal the law in its entirety; or, 3) revise the law to correct recognized problems.

MAINTAIN CURRENT CON PROCESS

The State would continue to operate the program in its current form. This option assumes the CON process is working efficiently and requires only minor changes.

Because of recognized problems, this option appears to have little merit. Threshold levels are too low, most non-clinical expenditure reviews are a nuisance for applicants and reviewers, and delays in the review process are unacceptable.

REPEAL THE CON LAW

This option assumes that the Certificate of Need process has been entirely ineffective and that marketplace incentives will arise to control capital investments and health care costs.

It also assumes that public review of health care capital expenditures are unimportant and that health care consumers should not have a voice in determining the appropriateness of services in their community.

A competitive pricing market does not exist within the health care services industry of any community in Alaska. In addition, the State of Alaska did not renew its Section 1122 agreement with the federal government in 1981 because the Certificate of Need law was in place.[9] (Section 1122 of PL 92-603 required that health care facilities, which received federal monies under Titles XVIII and XIX, be subject to review to ensure consistency with state health plans.) Repeal of the CON law would leave the State entirely without a capital expenditure review process for health care facilities; therefore, the State would have to rely principally on either the competitive market or incentives established under some kind of a prospective reimbursement system to control costs and allocate resources. (Hospitals are currently reimbursed by the federal government under Medicare and Medicaid on a retrospective basis; that is, after the costs have already occurred. Under this

reimbursement mechanism, there is no real incentive for containing costs. Prospective reimbursement, on the other hand, would require that hospitals negotiate the rate or cost of a service a year in advance. The government and other third-party insurers would reimburse the hospital only at the negotiated rate; therefore, costs exceeding the rate would be borne by the hospital, and, conversely, the hospital would make money if costs were kept below the negotiated rate.)

Because a competitive pricing market does not exist anywhere in Alaska, eliminating the CON program will likely lead to new, unneeded services and facilities which will result in increased operating costs. These costs are passed directly on to the buyers (patients and taxpayers).

Prospective reimbursement, on the other hand, comes in various forms and generally has been found to be more difficult to enact and implement than Certificate of Need. Generally speaking, prospective reimbursement is likely to be successful only where there has been political support for Certificate of Need.[8]

Finally, repeal of CON serves the interests of the health services establishment only. Those who control health-care costs would also be controlling capital investments. Consumers could not have a voice in determining the most appropriate and affordable level of service for their community or region.

MODIFY THE CON PROCESS

This option assumes that the CON program has been effective and can be modified to make it more efficient. The scope of the CON program could be scaled back by raising threshold levels and exempting certain non-clinical capital expenditures. Under this option, the CON program could be reduced further if a market capable of insuring an appropriate allocation of services emerged or to complement a prospective reimbursement system.

RECOMMENDATIONS

The Alaska Health Coalition recommends that negotiations take place among members of the Alaska State Hospital Association, the Legislature, and the Administration to work out revised CON regulations.

The Coalition further recommends that the following revisions be considered as a starting point for the negotiations.

1. Increase the threshold level which triggers a CON review from $150,000 to at least:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

APPENDIX

NATIONAL HEALTH PLANNING AND DEVELOPMENT ACT OF 1974

INTRODUCTION

Public Law 93-641, (National Health Planning and Resource Development Act), passed by the U.S. Congress in 1974, established a national health planning program which was implemented in each state and several American territories. The intent of Congress was to integrate previously sponsored programs (Hill-Burton, Regional Medical Program, Comprehensive Health Planning), retain the best features of each, and address major national, state, and local concerns about the current planning, development, and operation of the nation's health care system. To address these concerns, the Act authorized the designation and funding of state and regional health planning agencies and set forth several functions these agencies had to perform in order to further the "achievement of equal access to quality health care at a reasonable cost."

HEALTH SYSTEMS AGENCIES

Health Systems Agencies (HSAs) were designated as local or regional bodies with the responsibility for preparing and implementing plans designed to improve the health of the residents of its health service area; to increase the acceptability, accessibility, continuity and quality of health services of the area; to restrain increases in the cost of providing health services; and, to prevent unnecessary duplication of health resources. These functions were carried out by interested consumers and providers working together to identify community and regional problems and to develop strategies and recommendations to help alleviate those problems.

HSAs were established as either private, non-profit corporations or public entities governed by boards that had to have a consumer majorities. Operational funds have been awarded through both Federal (PHS) and State (DHSS) sources. In Alaska, the Governor designated three health service areas which were each to be served by an HSA. Alaska's three HSAs are: Northern Alaska Health Resources Association, Inc. (Fairbanks), serving northern Alaska; South Central Health Planning and Development, Inc. (Anchorage), serving south central Alaska, including the Aleutian chain; and Southeast Alaska Health Systems Agency (Ketchikan), serving Alaska's panhandle.

STATE HEALTH PLANNING AND DEVELOPMENT AGENCY

The Governor designated a State Health Planning and Development Agency (SHPDA) as a unit of State government. The SHPDA has the responsibility to conduct the health planning activities of the State, including preparation and implementation of the State Health Plan, and to provide coordination of the HSAs. The SHPDA also supports the function of the Statewide Health Coordinating Council and is responsible for administration of the Certificate of Need program. In Alaska, the SHPDA resides within the Department of Health and Social Services. It currently occupies division-level status.

STATEWIDE HEALTH COORDINATING COUNCIL

The Alaska Statewide Health Coordinating Council (SHCC) is the third entity involved in the State health planning network. The SHCC is a group of citizens appointed by the Governor who oversee the health planning activities within the State. Specifically, they have responsibility for preparation of the State Health Plan. The State Health Plan forms the basis upon which Certificate of Need applications are reviewed. Both the SHPDA and SHCC are supported with a mix of Federal and State funds.

Repeal will have effects on 4 major four topics:

4 issues appear prominently when considering Repeal of Certificate of Need:

1. ~~Effect~~ Demand on State Revenue Sharing funds
2. Effect on State Medicaid payments
3. Free Enterprise vs. Regulation
4. Federal mandates and potential loss of funds.

Tierney, et al

The Certificate of Need Program was established in 1974 by federal law (PL 93-641). It is intended to serve as a cost control aid and planning review process. It acts as a check to frivolous or misdirected projects. It directs capital (construction) investment to be compatible with the goals and policies of the reviewing agency. The certificate of need was designed to avoid unnecessary duplication which results in underutilization and inflated costs in a cost based reimbursement system.

- Sanctions "Any allotment, grant, loan and loan guarantee made to and each contract entered into with an individual or entity in such State ... under this Act (Public Health Service Act), the Community Mental Health centers Act, the Comprehensive Alcohol Abuse and Alcoholism Prevention Treatment and Rehabilitation Act of 1970 and the Drug Abuse Office and Treatment Act of 1972."

  Sanctions begin at 25% and continue annually in 25% increments.

Federal Mandates

The 1974 law, 93-641 established the requirement for states to develop the certificate of need review. The law was amended by 96-79 in 1979. The sanctions imposed against states for non compliance with the CON (certificate of need) process have been temporarily lifted by P.L. 97-377, which expires September 30, 1983. So, until Sept 30, 1983, a repeal of CON would impose no threat of loss of federal funds. Federal funds that are subject to sanction action IF the sanctions are allowed total just over 5 million dollars. See letter of Rebecca Dyer attached.

Attach $ letter

The most recent word from the Legislative information office in Wash D.C. is that the continuing resolution (that suspends sanctions) will stand unless congress takes action before the end of the fiscal year. If congress does not act before June 30th, the Dept. will have to fund at least the first quarter of FY84. The Dept of H.H.S. is waiting for congressional direction. Repeal of CON would probably result in loss of some planning review regardless of sanctions.

Attach 1 & 2 from Omnicom

Alaska, and several other states are out of compliance now and have been placed on "conditional" status by D.H.H.S. Should sanctions be imposed, the state is given notice that funds may be withheld.

Public Health Service in Seattle for his AGENCY's Retention to a Repeal of the certificate of NEED. IN PRACTICE, it APPEARS that the Federal government has not instituted SANCTIONS - EVEN though STATES (like CALIFORNIA) have been out of compliance for YEARS. IN FACT, SANCTIONS WERE SUSPENDED by PL 97-377. A continuing RESOLUTION suspends SANCTIONS Through September 1983.

My QUESTIONS for you - GENERAL ONES which you MAY not be able to address EASILY and then SPECIFIC ONES:

1) What ARE the CHANCES that the SANCTIONS MAY AGAIN BE SUSPENDED AS in 97-377? - MOOD of CONGRESS?

2) CAN you find out what ~~the~~ response the Health and Human Services Dept would have to a Repeal of certificate of need process here?

3) Would AN EXEMPTION (§1536 of PL 93-641) for ALASKA to the ~~the~~ HEALTH SYSTEMS ~~AGENCY~~ AGENCY REQUIREMENT do the SAME thing AS Repeal of C/N PROCESS? (FOUND IN AN AMENDMENT to the Omnibus Budget RECONCILIATION Act of 1981).

4) If C/N were REPEALED and SANCTIONS WERE INVOKED, how much Federal money would ALASKA loose.

FY 1981 MUNICIPAL REVENUE SHARING ENTITLEMENTS (#2) april 27, 1981

SUMMARY OF MAJOR CHANGES IN

THE NATIONAL HEALTH PLANNING AND RESOURCES DEVELOPMENT PROGRAM

FROM ENACTMENT OF THE HEALTH PLANNING AND RESOURCES DEVELOPMENT AMENDMENTS

OF 1979 (Public Law 96-79) ON OCTOBER 4, 1979

The Health Planning and Resources Development Amendments of 1979 amend Titles XV and XVI of the Public Health Service Act and extend for 3 years the health planning program begun by P.L. 93-641 enacted on January 4, 1975. The amendments authorize appropriations of $267 million in fiscal 1980, $354 million in 1981 and $416 million in 1982, a total of $1.04 billion.

Title XV (National Health Planning and Development) is administered by the Bureau of Health Planning, Health Resources Administration, and Title XVI (Health Resources Development) by the Bureau of Health Facilities, HRA. The Administration is one of the six agencies of the Public Health Service of the U.S. Department of Health, Education, and Welfare. The two bureaus are located at 3700 East-West Highway, Hyattsville, Maryland 20782.

Contacts:

Title XV, Bureau of Health Planning, Frances Dearman (301) 436-6110
Title XVI, Bureau of Health Facilities, Dorothy Bailey, (301) 436-8988

October 11, 1979

TITLE XV NATIONAL HEALTH PLANNING AND DEVELOPMENT

ADMINISTERED BY BUREAU OF HEALTH PLANNING

National Guidelines for Health Planning (Section 1501)

The Department of Health, Education, and Welfare (HEW) must annually review the goals and standards of the National Guidelines for Health Planning as well as the plans of the Health Systems Agencies (HSA) and State Health Planning and Development Agencies (SHPDA) and on the basis of the findings, revise the National Guidelines. The HSAs, SHPDAs and Statewide Health Coordinating Councils (SHCC) must be consulted at least 45 days prior to their issuance or revision. Relying on data HSAs and SHPDAs must supply, HEW may collect and make public data on whether the health care delivery systems are changing to meet the standards and goals in the Guidelines and the resources required to meet the goals.

The standards promulgated as part of the National Guidelines must reflect the unique circumstances and needs of medically underserved populations including isolated rural communities.

National Health Priorities, National Council (Section 1502)

The list of National Health Priorities is lengthened from 11 to 17, more emphasis is placed on cost containment and a new section is added on the role of competition in the allocation of health services. New priorities concern:

--identification and discontinuance of unneeded or duplicate services and facilities;

--cost containment through technology, more appropriate use of resources and increased efficiency;

--deinstitutionalization of improperly placed mental patients and improved care for the institutionalized;

--emphasis on outpatient mental health care;

--promotion of health prevention and treatment including emotional and psychological components of care; and

--development and use of cost-saving technology.

Also added as a priotity is strengthening of competition where it can appropriately advance quality assurance, cost effectiveness and access to care.

Council: The National Council on Health Planning and Development is expanded from 15 to 20 members. The number of nonprovider members is increased from 5 to 8 and the representation of urban and rural medically underserved populations is required. At least one hospital representative is required. The Assistant Secretary of Agriculture for Rural Development is added as a nonvoting, ex-officio member.

Health Service Areas (Section 1511)

Procedures for review and revision of health service area boundaries are changed. A review can be initiated by HEW, a Governor or HSA. The boundaries may be revised if HEW finds they no longer meet the requirements of the law or that the proposed boundaries meet them more appropriately. Within one year of enactment of the amendments, HEW must publish regulations listing criteria for revisions.

The Commonwealth of Puerto Rico is added to the jurisdictions where the State agency, under Section 1536, may perform the functions of the HSA.

Health Systems Agency Governing Body (Section 1512)

The amendments provide that the governing board of a public HSA must appoint the members of its governing body for health planning. Under the amendments the governing board of a public HSA rather than the separate governing body for health planning is responsible for personnel policies and budget unless it specifically delegates the responsibility.

Consumer members of an HSA governing board no longer are required to have been consumers for 12 months prior to appointment. The language requiring them to be "broadly representative" of the composition of the area's population has been deleted. The new language requires consumers to be "broadly representative of the health service area" and to include representatives of the principal social, economic, linguistic, handicapped and racial populations and of geographic areas of the health service area.

Providers can now serve on HSA governing bodies where they live or where they work. The proportion of direct providers among the provider minority is increased from one-third to one-half and at least one direct provider must be engaged in the administration of a hospital.

Governmental representatives other than elected officials must be appointees of units of general purpose local government.

The proportion of nonmetropolitan representation must be "at least equal to the nonmetropolitan proportion of the population of the area." Persons knowledgeable about mental health must be included on the governing body.

A consumer majority is required for all subcommittees or advisory bodies appointed by an HSA governing board or executive committee.

A new section requires broad participation in governing body selection by residents of the area served. The process developed by each agency must prohibit selection of more than one-half of the members by the governing body itself. The same requirements apply to subarea council selection if the subarea council selects one or more members of the governing body.

If a governing body has more than 30 members, the required size of its executive committee is changed from "not more than 25" to "not less than 10 nor more than 30."

A new section requires each HSA to have a program of technical support of governing body members, executive committee members and members of entities appointed by these groups. At least one staff person is to be responsible for providing information and technical assistance to governing body members particularly consumers. Minimum areas of staff expertise are expanded to include financial and economic analysis, prevention of disease and other health matters, and development and use of health and mental health resources.

A new subsection deals with conflict of interest for members of governing bodies, executive committees or other HSA entities. They are prohibited from voting on matters involving any individual or entity with which a member has had "any substantial ownership, employment, medical staff, fiduciary, contractual, creditor or consultative relationship" currently or in the preceding 12 months. Written disclosure and public announcement of conflicts are required at meetings during which actions are taken.

Revised language absolves an HSA from liability for damage when a governing body member or employee acts within the scope of his duty with reasonable care and without malice.

Provisions are changed to allow closed meetings and records when the board determines that discussions about an employee's performance or salary would constitute an unwarranted invasion of personal privacy. Meetings also may be closed when information relating to a judicial proceeding involving the agency might be disclosed.

HSA governing body membership must now include individuals who are knowledgeable about mental health services (including substance abuse).

Health Systems Plan, Annual Implementation Plan, PUFF, (Section 1513)

Lobbying: New language prohibits an HSA from hiring a lobbyist.

Health Systems Plan and Annual Implementation Plan: The review and revision of the Health Systems Plan are changed from an annual to a triennial process, allowing more time for implementation. An HSA must establish the Health Systems Plan in a format determined by the SHCC in consultation with the State agency and HSAs. The description of a "healthful environment" is to be "primarily with regard to health care equipment and to health services provided by health care institutions, health care facilities and other providers of health care and other health resources."

The Health Systems Plan must include goals for the delivery of mental health services.

The goals of the Health Systems Plan are to be responsive to statewide needs but no longer are required to be consistent with the National Guidelines. The plan must describe the institutional health services needed to provide for the well-being of persons in the area and must also describe the number and type of resources needed to meet the plan goals plus the extent to which new facilities need to be constructed or existing ones need modernization, discontinuance or conversion.

The procedural requirements for the Health Systems Plan also apply to the establishment, review and amendment of the Annual Implementation Plan.

Coordination: Examples of other regional planning bodies with which an HSA must coordinate activities are agencies concerned with aging, alcohol abuse, drug abuse and mental health. Coordination is required with rate review bodies.

New language describes coordination among HSAs within a Standard Metropolitan Statistical Area and requires HEW to issue regulations for sharing of HSA data with Indian Tribes.

Proposed Uses of Federal Funds: A number of changes are made in the review of Proposed Uses of Federal Funds (PUFF). Direct funding of entities other than State government is usually subject to HSA review while direct funding to State government is reviewed only if its impact on health resources occurs solely in the Agency's health service area. Federal funds made available by a State to a third party are now reviewable not only under the allotment programs but also under grants or contracts to State government.

An attempt is made to clarify HSA review of research and training funding. Training funds would be reviewed only if they made a significant change in health services available in the health service area. Research funds would be reviewable only if they would change significantly the delivery of health services or the distribution of available health resources in the area.

In the case of Federal funds made available by a State to a third party, a Governor must allow 60 days for HSA review. If the Governor decides to make funds available despite a negative HSA finding, the HSA and SHPDA must be provided with a detailed statement of the reasons.

Appropriateness: The requirement for review of appropriateness of "all institutional health services" is narrowed to "at least" those institutional and home health services for which goals have been set in the State Health Plan. In an appropriateness review, the minimum considerations are "accessibility and availability, financial viability, cost effectiveness, and quality of service provided."

Hospital Charges: To aid consumers in making informed choices, a new provision requires each HSA to collect annually on forms developed with the State the charges for the State's 25 most frequently used hospital services. The charges must include average rates for private and semiprivate rooms. The information must be made available in easily understandable form for public inspection and copying.

Designation of Health Systems Agencies (Section 1515)

The maximum duration of a full designation agreement is extended from 12 months to 36 months. HEW may terminate the agreement with a nonperforming HSA but must first consult with the Governor and the SHCC; give notice of intent to terminate, listing steps that could be taken to comply; provide an opportunity for a hearing; and consult with the National Council.

HEW may return a nonperforming HSA to conditionally designated status for not more than 12 months if the agency is given notice and an opportunity for a hearing. Before renewing a full designation agreement, HEW must provide the State agency with an opportunity to comment on the HSA's performance and to recommend whether or not the HSA should be renewed as well as stating any conditions the State agency believes should be attached to the renewal.

In terminating an HSA, HEW may choose to continue its operation until a new designation agreement is in effect. It must provide the terminating agency an opportunity to settle its affairs.

HSA Planning Grants (Section 1516)

The amendments provide for carryover of grant funds for one more year beyond that in which they are made available. The funding formula is changed in several respects. The maximum base grant is the lesser of $0.60 per capita or $3,750,000. The minimum base grant is a sliding scale of $225,000 for fiscal 1980; $245,000 for fiscal 1981; and $260,000 for a succeeding year.

HEW is authorized to retain an amount not to exceed 5 percent of the appropriation to supplement grants to meet extraordinary expenses, such as those related to bi-State status, large underserved populations and large geographic areas or to assist an agency in improving its performance as a result of the development and implementation of innovative planning mechanisms. The grant amount may be reduced if not needed by the Agency.

Non-Federal funds may be matched by: (1) an amount equal to the non-Federal funds (2) $200,000 or (3) $0.25 per capita, whichever is less.

State Agency Designation (Section 1521)

The period of conditional designation may be extended beyond 36 months if HEW finds the State agency is making "a good faith effort" to comply with its required functions.

The penalties for a State failing to have its agency qualify for full designation have been extensively revised and the effective dates changed. During the first year of noncompliance, HEW will withhold 25 percent of Federal funds. The percentage rises to 50 percent in the second year, and 75 percent in the third with a complete cutoff in the fourth year.

September 30, 1980, is the earliest date for compliance but the deadline will be later for many States depending on when their legislatures meet.

The period of a full designation agreement is extended from 12 to 36 months. If HEW decides to terminate a State agency agreement, the Department must consult with the SHCC; notify the agency, explaining the decision and listing corrective actions required; provide an opportunity for a hearing; and consult with the National Council.

Before renewing a State agency designation agreement, HEW must provide each HSA and the SHCC with an opportunity to comment and recommend renewal or nonrenewal. If it is not performing satisfactorily, a State agency may be returned to conditionally designated status for up to 12 months.

State Health Planning and Development Functions (Section 1523)

A new function, the determination of statewide health needs, is given to the State agency. In developing these needs, the agency is to consult with the SHCC and to solicit written recommendations from the State health authority, the State mental health authority and other agencies designated by the Governor.

The development of the preliminary State Health Plan and review of the Health Systems Plan is changed from an annual to a triennial process. In reviewing Health Systems Plans, the State agency is required to make them available to

the State health authority, the State mental health authority and other State agencies specified by the Governor. It also is to solicit written recommendations concerning the goals and resource requirements in Health Systems Plans.

As another new function, the State agency must prepare an inventory of health care facilities, evaluate their physical condition and report the results to HSAs for their use. The requirement for a separate State Medical Facilities Plan is deleted.

Statewide Health Coordinating Council (Section 1524)

HSA representation required on the SHCC will vary with the number of HSAs in the State. If there are ten or fewer HSAs, each is entitled to two representatives. If there are more than ten, each is entitled to one representative. Each HSA is to submit to the Governor a list of at least twice as many representatives as it is entitled to. In the case of bi-State HSAs, representation on the SHCC will be based on the proportion that the population of the bi-State area living in the State bears to the population of the largest health service area in the State, with a minimum of one representative assured.

Not less than one-half the providers on the SHCC must be direct providers. If there are rural and urban medically underserved populations in a State, they must be represented on the SHCC. The Governor is given the option of selecting, with legislative advice and consent, the chairman of the SHCC from among its members. If the Governor does not act, the SHCC can select its own chairman.

The SHCC is given responsibility for establishing in consultation with the HSAs and the State agency, a uniform format for the Health Systems Plan. It also reviews and coordinates the Health Systems Plans triennially and the Annual Implementation Plans annually. The State Health Plan also is prepared triennially. It must include a description of the institutional health services needed in the State, describe the number and type of resources available and those in need of modernization, closure and conversion.

New language seeks to integrate mental health, alcohol and drug abuse into the State health planning process and requires the health plans in these areas to be consistent with the State Health Plan.

As approved by the SHCC, the State Health Plan does not become effective until it is approved by the Governor. The Governor can disapprove the plan only if he determines it does not effectively meet the statement of health needs as developed by the State agency.

In a change in the review of uses of Federal funds function, the SHCC is given authority to review and recommend approval or disapproval of applications for certain Federal health funds submitted by the State government which is carried out in more than one health service area. If the SHCC recommends disapproval of a plan or application, HEW, after finding that the proposed use is not in conformity with the State Health Plan, may not make funds available. The Governor must be allowed 30 days to submit a revised plan or application that conforms with the State Health Plan.

The SHCC is extended the same immunity from damages as the HSA board and placed under the same conflict of interest requirements.

Grants for State Health Planning and Development (Section 1525)

Amendments permit one year carryover of grant funds.

Grants for Rate Regulation (Section 1526)

New language removes the limitation on the number of rate regulation demonstration grants to States, allows entities of State government other than the State agency to administer the rate regulation program, and allows rate regulation grant funds to remain available for one fiscal year after that in which they are awarded.

Certificate of Need (Section 1527)

A new section broadens and further defines certificate of need programs. Certificate of need decisions must be consistent with the State Health Plan except for emergency situations. In reviewing applications, a SHPDA must make its determination before major equipment is purchased, institutional health services are offered or capital expenditures obligated.

The amendments limit the type of conditions that can be placed on awarding a certificate of need. States are prohibited from attaching any condition not related to criteria in the law or in State or Federal regulations in force before the amendments took effect.

A State agency is authorized to withdraw a certificate of need if the applicant is not adhering to its timetable or making a good faith effort.

Each certificate must specify the maximum amount of money that can be spent on an approved project.

HMOs: Health maintenance organizations (as defined in this section or as qualified under Section 1310 of the Public Health Service Act) are exempt from certificate of need requirements under specified conditions. The State may not require a certificate of need for the offering of an inpatient health service, the acquisition of major equipment, or obligation of capital expenditures by health maintenance organizations if:

--the HMO meets the definition under this law;

--the HMO (or a combination of HMOs) has an enrollment of at least 50,000 individuals;

--the facility in which the service will be provided is reasonably accessible to members; and

--at least 75 percent of the patients who can be reasonably expected to receive the service will be individuals enrolled with the HMO (or combination of HMOs).

Certificate of need applications from other health maintenance organizations must be approved if the State agency finds that approval is required to meet the needs of enrollees and the health maintenance organization cannot obtain these services or facilities within the area in a manner consistent with the health maintenance organization concept.

The establishment of and the outpatient facilities and services of an health maintenance organization are exempt from certificate of need review in any case.

Safety Hazards, Licensure, Accreditation: Automatic approval is required of any certificate of need application to comply with building and safety codes, State licensure standards or Medicare/Medicaid certification unless the SHPDA finds the facilities or services are unneeded or inconsistent with the State Health Plan.

Simple Acquisitions: Special treatment also is provided for simple acquisitions of health facilities or major medical equipment for noninstitutional uses. In both cases, a notice stating intent to acquire and expected uses must be filed with the SHPDA 30 days before contracts are signed. These acquisitions are exempt from certificate of need coverage unless notice is not given or the State agency finds that the acquisition will provide inappropriate bed capacity or services.

Definitions of "capital expenditure" and "major medical equipment" are added. "Major medical equipment" excludes the equipment of independent clinical labs. Congress wanted to make clear that this provision is a minimum requirement of an acceptable certificate of need program, and that a State is permitted to cover medical equipment acquired for use in other than inpatient settings, which costs less than $150,000, or which is acquired by a clinical laboratory. Although States would be prohibited from changing their law to go beyond the minimum requirements after September 30, 1982, no State which had imposed additional requirements before that date would be required to alter those requirements.

Definitions (Section 1531)

"Indirect provider" is no longer a separate category but included under "direct providers." This term is broadened to include persons who: have a fiduciary interest in health care delivery, research, health manpower instruction and drug production; receive directly or through their spouse more than 20 percent of their gross income from health care; or are members of the immediate families of persons in these categories. An individual will not be considered a provider solely because of membership on the governing board of a health care institution or drug or equipment producer.

The definition of "institutional health services" is altered to include services which are provided through designated facilities and those to be defined in HEW regulations and which entail an annual operating cost of at least $75,000. The $75,000 figure may be adjusted upward after 12 months at the discretion of a State to reflect inflation.

Criteria and Procedures for Reviews (Section 1532)

Extensive statutory requirements relating to review procedures are added. They include requirements for administrative and judicial reviews, timely notification and those related to failure to complete review in a timely manner.

"Batched review" of all similar certificate of need applications is required at both the State agency and HSA level at least twice a year. Batching enables planning agencies to review simultaneously applications proposing similar services and to evaluate them on the basis of relative need.

Factors to be considered in the development of criteria for review are expanded to include: the effects of the service on the needs for clinical training in the area; the access that health profession schools will have to services for teaching; and the accessibility of the services to all residents of the service area. Other factors include the efficiency and appropriateness of the use of existing services and facilities, and quality of care provided by the applicant in the past.

TITLE XVI HEALTH RESOURCES DEVELOPMENT

ADMINISTERED BY THE BUREAU OF HEALTH FACILITIES

State Allotments and State Medical Facilities Plans

In amending Title XVI, Congress targeted resources to meet special needs ranging from excess inpatient hospital capacity to the unmet primary care needs of the urban and rural poor. These needs are defined by conditions, not by State or other geographic boundary lines. Thus, Congress repealed the allotment grants to States which originally existed in Title XVI to aid facilities construction. Congress also repealed the requirement for a separate, HEW-approved State Medical Facilities Plan. Previously, the State Medical Facilities Plan existed as a framework which had to be approved before allotments could be made for facility construction and aid. In the amendments, Congress intends to integrate facilities planning as part of the State Health Plan produced by each State's SHCC.

Loan and Loan Guarantee Program (Sections 1601-2)

Congress centralized the loan and loan guarantee program by requiring that all applications under this program be submitted directly to HEW for approval. Direct loans, previously limited to public facilities, have been expanded to nonprofit private facilities. Loan guarantees, limited before to nonprofit private facilities, may now go to public entities as well.

Authority for loans and loan guarantees had been limited to projects for: (1) modernization; (2) construction of new outpatient medical facilities; (3) construction of new inpatient medical facilities in areas where population growth has been recent and substantial; and (4) conversion projects. Now loan and loan guarantees are also authorized for: (1) projects which will discontinue unneeded hospital services or facilities, and (2) modernization projects which before had been eligible only for special project grant money to correct safety hazards and avoid noncompliance with licensure or accreditation standards.

Interest Subsidy: HEW may now pay up to one-half the net effective interest rate on guaranteed loans for projects located in poverty areas. Formerly this subsidy was limited to three percent and was not targeted to any special need areas.

Default Authority: Under the previous law, HEW did not have authority to act on behalf of loan or loan guarantee projects which were in danger of default. Default funds were limited to actual default procedures. The amended law permits HEW to spend money on technical and consultative assistance to prevent such defaults. In addition to taking title to assets used to secure loans HEW may now take "any other actions needed" to protect the government's interests.

Project Grants For Construction Modernization (Section 1610)

The amended law allows facilities to apply for loan and loan guarantees for construction to correct safety hazards or to avoid licensure or accreditation noncompliance. The law also now allows private nonprofit facilities to apply for grant aid. Formerly only public facilities were eligible. To be eligible, however, the private nonprofits must serve the same patient population as would public facilities (i.e., the same proportion of patients unable to pay for services) and, further, must show that without a grant there would be a disruption of health care services to low income individuals.

New Project Grants: Congress addressed the special needs of medically underserved areas by establishing a new grant program. The grants would be available to public or private nonprofit facilities for construction of outpatient facilities or conversion of inpatient to outpatient or long-term care facilities in underserved areas.

Funds for this program are authorized starting in fiscal 1981.

Discontinuance and Conversion (Sections 1641-2)

A new program of grants for voluntary discontinuance and conversion of unneeded hospital services is authorized effective April 1, 1980. Congress intended it to be a demonstration program to help combat the escalating cost of inpatient hospital care. It also is intended to strengthen health care delivery through conversion of hospital capacity to less expensive and more appropriate services.

Grants may be awarded for liquidation of debt in case of closure; planning, development and delivery of another service in case of conversion; termination pay and retraining and re-employment costs for displaced hospital personnel.

Applications for grants must be reviewed by the local HSA, which recommends approval or disapproval, and forwarded to the State agency which reviews and makes its recommendation to HEW. The HSAs and SHPDAs are to determine the need for discontinuance or conversion of a service or facility and give special attention to needs and access patterns of poverty populations. HEW may not override a State agency recommendation for disapproval but may disapprove a recommendation for discontinuance or conversion if it determines the project would not reduce health care costs.

The Department of Labor must review applications and certify that any proposed project protects the rights and vested interests of affected employees of the hospital.

Grants also are authorized to SHPDAs to assist in the reduction of excess hospital capacity. Funds are authorized to assist State agencies in: identifying excess hospital capacity; developing programs to reduce excess capacity to lower health care costs; developing means to overcome barriers to reduction of excess capacity; and carrying out programs to decertify nonappropriate facilities serving densely populated areas and for poverty area outpatient services.

Enforcement of Assurances: The amendments reinforce the intent of Congress that facilities adhere to the uncompensated care and community service parts of the law. Facilities which received Federal aid under either Title VI (Hill-Burton) or XVI were required to give assurances that they would provide a certain amount of uncompensated care to those unable to pay and to provide care without discrimination to community residents. The obligations apply to more than 5,000 hospitals, nursing homes and other medical facilities.

Periodic reports by facilities of compliance with the law are required under the amendments.

Russ Hereford

Controlling Health Care Costs: Strategies from the States

With Congress divided over how—and whether—to address the rising cost of health care, states have taken the lead in fashioning solutions.

The defeat of President Carter's hospital cost containment legislation in the House of Representatives underscores the difficult task facing those who seek to curb the high rate of inflation in health care. It also reemphasizes the key role which states must continue to play in the nation's health cost crisis. The role is not a new one for the states; in fact, they have taken the lead in developing solutions to the problem.

Although the health care cost problem has not disappeared (during the 12 months ending last March, the nation's health expenditures rose 13.3 percent to 198.6 billion dollars), actions undertaken in some states appear to have had a major impact on health expenditures. For example, in the eight states that would have been exempted from federal controls under the Administration's bill—because they were already operating mandatory hospital cost containment programs—1978 hospital expenses per admission increased at a rate less than three-fourths that of the other 42 states.

Why States?

States appear to be the most appropriate level at which rising health costs can be controlled. State legislators and state government are affected by rising health costs in a variety of ways. As purchasers of health care for the needy through Medicaid, states (and, in nine states, local government) contributed over $8 billion to this joint federal-state program in 1978. States spent another $1 billion for the poor who are not eligible for Medicaid and for benefits not covered by federal matching funds. In addition, state governments are major employers who contribute to the cost of health insurance premiums for their employees. The growing burden placed on constituents to finance the increased cost of health programs leaves legislators with the unpleasant dilemma of either raising taxes to cover increased costs or reducing services to keep health costs within budget.

Having responsibility for the state's economic environment, legislators face demands from both industry and labor. Businesses express concern over their ability to remain competitive and still generate sufficient profits for future capital investment in the face of the growing costs of health benefits for their workers. At the same time, workers are increasingly frustrated as they forego real increases in their standard of living, or improvements in health benefit coverage, merely to maintain their current level of benefits.

State level control of health care costs should be encouraged for a number of reasons. The protection of

public health has traditionally been within the recognized police powers of the states. (It is interesting to note that the U.S. Department of Health, Education and Welfare was not established until 1953.) As financiers and regulators of health care, and through the delivery of public health services, state government has a long history of involvement in health activities.

"States have responded to the problem with a number of innovative programs. Some particularly interesting ones are in the fields of hospital cost containment, alternatives to institutional care, and health planning."

States are in the best position to view the operation of health programs within the context of statewide priorities and resources. The ability to consider the unique features of a particular state, especially its health care delivery system, when designing a cost containment program best assures that the legitimate concerns of all interested parties will be addressed.

It is at the state level that many health-related programs are regulated. The complementary nature of these activities can give extra clout to cost containment efforts: Certificate of need programs are operated by the states; states administer the Medicaid program; health care providers, such as physicians, nurses, and hospitals, are licensed by state government; the insurance industry is regulated at the state level. Through coordination of these and other regulatory programs, a comprehensive, system-wide cost containment approach can be implemented.

At the same time, states offer the opportunity for experimentation on various approaches to health care cost control. Cost containment is a new art, not an established science. States have the opportunity to develop and implement innovative approaches to health care cost containment which may later be adopted by other states or the federal government.

(Reprinted with permission)

Finally, given their major financial stake as a health care financing agency, states have a vested interest in seeing that cost containment programs work.

State Responses

States have responded to the problem of rapidly rising health care costs with a number of innovative programs. Some particularly interesting approaches are in the fields of hospital cost containment, alternatives to institutional care, and health planning.

Hospital Cost Containment Programs: Eighteen states have enacted some type of legislation designed to control hospital costs. These programs vary widely in scope, structure and procedure, from simple disclosure statutes to programs requiring state review and approval of hospital rates and charges.

The programs regulating rates and charges appear to have been quite successful in controlling hospital cost increases. For example, the effectiveness of the mandatory state programs was recognized by the Carter Administration when it chose to exempt them from federal controls under the Administration's proposed cost containment bill.

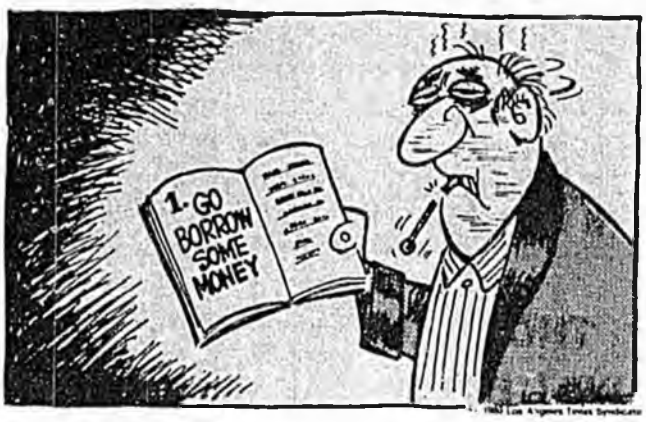
State rate review programs have one major feature in common. They revise one of the inflationary incentives built into the hospital payment system: retrospective reimbursement. Under the Medicare and Medicaid programs in most states, and under many Blue Cross plans, hospitals are paid after the fact on the basis of costs incurred in treating a patient. This retrospective, cost-plus system contains no incentives to hospitals for cost control. In reality, the incentive is to increase costs, since higher costs will result in increased hospital revenue. Even unnecessary services will lead to additional income.

To counter this inflationary incentive, state rate-setting programs determine ahead of time the rates which hospitals may charge. Under such a prospective reimbursement system, hospitals know in advance the amount of money they will receive for treating patients. In effect this requires hospitals to hold their costs within a predetermined budget, and instills an element of financial management into hospital operations.

Maryland established one such program in 1971. After an initial developmental period, the Maryland Health Services Cost Review Commission began setting rates in 1974. In 1977, HEW's Health Care Financing Administration, on an experimental basis, agreed to permit the Maryland Commission to set rates for the Medicare program—an agreement that made Maryland the first state agency in the country to set rates for all payers. More recently, Medicare waivers have also been granted for experimental programs in Washington, New Jersey and western Pennsylvania. Senate Majority Leader Rosalie Abrams played a key role in the enactment of the legislation and continues to be pleased with the law. According to Senator Abrams, "The commission has demonstrated its effectiveness in containing the rise in hospital costs in Maryland, where the rate of

increase is certainly more rational than in the rest of the country. It is not state rate review alone, however, that is achieving this effect. One essential ingredient of the legislation was a requirement that a uniform accounting system be adopted. This has forced hospitals to examine their own budgets and has made them more cost conscious."

While a state body sets rates in Maryland, Wisconsin has vested rate review authority in a 20 member committee composed of representatives of the State, the Wisconsin Hospital Association, and Blue Cross of Wisconsin. The



(Reprinted with permission)

methodology for rate setting was developed by the Department of Health and Social Services, but actual analysis is performed by Blue Cross. Representative Joseph Czerwinski, Chairman of the Assembly Health and Services Committee reports that, "The rate review process appears to be working well, although we are still only in the developmental stage." Representative Czerwinski agrees with Senator Abrams that hospitals have become more cost conscious since the program began. "We do have to be satisfied that any one making a decision on hospital costs —a hospital administrator talking to a dietary expert or to a physician who wants a CAT scanner—is thinking about the fact that he will have to go before a rate review committee, and justify that position in public," Czerwinski says. "That exercise makes hospital administrators much more conscious of the cost implications of their decisions."

Alternatives to Institutional Care: While much attention nationally has been focused on controlling hospital costs, an even more serious problem for the states is long-term care. This segment now takes the largest portion of the average state's Medicaid budget—39 percent, or over $7 billion nationally.

It appears that long-term care will continue to be a major financial burden on state governments. The size of the nation's elderly population will continue to grow. It is estimated that by the year 2015, almost 40 million people will be over 65 versus 24 million in 1978. And it appears that relief will not be forthcoming should a national health insurance plan be enacted: No national health insurance proposal now under consideration in Congress would reduce the states' role in financing long-term care. A number of the proposals would place additional funding responsibilities on state government.

One cannot consider alternatives to institutional care as a purely fiscal issue. Few people disagree that patients are happier when they are able to remain at home with family or friends rather than be placed in a nursing home. Unfortunately, the long-term care funding programs—primarily Medicaid—are heavily biased towards expensive insitutions rather than at-home care. At the same time, community-based delivery systems are lacking or woefully inadequate in many places. Several states, however, have initiated actions to rectify this situation.

One such effort has recently been undertaken in New York through the enactment of the "Nursing Home without Walls" program in 1977. The author of the legislation establishing the program, Senate Health Committee Chairman Tarky Lombardi, Jr., explains, "This program is designed to provide nursing-home level care to persons in their own home. We expect it to have several benefits: We should find happier patients recovering more rapidly under a managed, coordinated program of care provided at home. This program will also obviate the need for construction of more long term care facilities. It should free acute hospital beds for sicker patients, or permit the closing of excess hospital beds that had been filled with patients who need nursing home—not acute hospital—care. We have found that almost 4,000 Medicaid beneficiaries are in our hospitals awaiting long term care placement at an average monthly cost in excess of $6,000. We have been able to serve patients under the Nursing Home without Walls program for an average of $785 per month." Senator Lombardi is also quick to emphasize that the program has an important quality of life aspect. "As just one example, one of the persons served under this program is a 93-year-old woman with a heart condition who is able to stay home and supervise her 72-year-old mentally retarded daughter."

Health Planning: An oversupply of hospital beds and inefficient utilization of available services have also been major contributors to health inflation. The problem is not a small one. The Department of Health, Education and Welfare has estimated that approximately 130,000 hospital beds could be eliminated without affecting quality of care. An analysis of health costs in Michigan determined that over 16 percent of the state's bed supply was surplus.

Excessive supply contributes to high costs in at least two major ways. First, empty beds are expensive to maintain. Although the exact cost has never been determined, estimates place it between 50 and 75 percent of the cost of a full bed. Second, given the expense of maintaining an empty bed, physicians and hospitals are encouraged to fill empty beds in order to generate revenue. This can result in unnecessary admissions and excessive stays in the hospital.

"Obviously, the interest of state legislators in health care issues extends beyond cost containment. Other unmet needs are readily apparent . . . Resolution of these problems, however, is intimately related to cost containment. Few public officials will look favorably at efforts to expand government's financial stake in the health care delivery system until they rest assured that the high rate of inflation in that system is under control."

To deal with the problem of oversupply of beds and services, and to prevent future unnecessary construction, New York enacted legislation in 1964 to establish the nation's first certificate of need program. Certificate of need is a mechanism to require prior state approval of hospital capital expenditures and construction; the primary determining factor in the approval process is the need for a proposed new service or facility. By the early 1970's, more than half of the state legislatures had enacted laws establishing a certificate of need program. Ten years after New York's action, the federal government adopted the concept in the National Health Planning and Resources Development Act, requiring that states must have an approved certificate of need program in order to be eligible for federal funds under such programs as the Public Health Service Act.

Some states, however, have gone beyond a simple certificate of need program. In 1978, Michigan enacted legislation establishing a mechanism for reducing that state's surplus of hospital beds. The legislation, which grew out of a joint public/private cost containment coalition, identifies health service areas with surplus beds. The local Health Systems Agency is responsible for developing a hospital specific plan for closing the excess beds. After the state has approved the HSA's bed reduction plan, the State Department of Public Health is prohibited from issuing a certificate of need inconsistent with the bed reduction plan, or to a facility out of conformity with the plan. Michigan hopes to eliminate 3,800 excess beds during the first five years of the law.

In addition to controlling the supply of hospitals and institutions, certificate of need provides a mechanism for assuring that expensive new technologies, such as kidney dialysis or open heart surgery, are distributed according to need. An example of a high cost technology that has recently been introduuced is computerized axial tomography, or CAT scanning. This process represents a tremendous advance in medical diagnostic capability; it is so significant that its inventors were awarded the 1979 Nobel Prize for Medicine. While virtually every hospital might like its own CAT scanner, and every patient might like to have one in the the local hospital, the machine costs between one-half and three-quarters of a million dollars. In addition a CAT scan is not administered to most hospital patients. The high price of such a technology and its relatively restricted use dictate that if it is to operate in a cost effective manner, the supply should be limited and distributed on the basis of the public need for the service. Accordingly, a certificate of need program might require that the equipment perform at least 2,000 CAT scans annually in order to be approved.

Wisconsin has gone even further. As Representative Czerwinski said, "Certificate of need is reactive only to new development. In Wisconsin, we thought it important to look at existing services and institutions available to our citizens. So along with certificate of need, Wisconsin has the ability to decertify existing services which do not meet minimum usage criteria in such areas as heart catheterization, radiation therapy, chemo-dialysis, renal transplants, high risk maternal and neonatal care, and computer tomography." In order to permit the effective and planned reduction of services without placing an institution in extreme financial hardship, the Wisconsin Rate Review Committee "has the ability to negotiate with the hospital to increase its daily rate to amortize the costs of deleting that service. While this may raise short run costs, in the long run it should prove cost effective."

Obviously, the health interests of state legislators extend beyond cost containment. Even in the relatively narrow field of health financing other unmet needs are readily apparent: expanded access to care for rural residents; protection against the catastrophic costs of a major illness; and funding health services for the poor not covered under existing programs are among the other urgent concerns. Resolution of these problems, however, is intricately related to cost containment. Few public officials will favorably view efforts to further expand government's financial stake in the health care delivery system until they rest assured that the high rate of inflation in that system is under control. Accordingly, it appears that cost containment will retain its place at the top of the nation's health agenda.

Russ Hereford is director of the Health Care Cost Containment project of the National Conference of State Legislators.

Chapter 88. Municipal Tax Resource Equalization.

Section

10. State equalization of tax resources for local government services
15. Determination of population
20. Determination of millage rate equivalent
25. Reports
30. Limitation on computation and use of payments
35. Tax equalization account
40. Administration
45. Definitions

Effective date of chapter. — Section 17, ch. 155, SLA 1980, provides that §§ 1 — 12 of the act take effect on the first day of the fiscal year for which $33,400,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of §§ 1 — 12 of this act or on July 1, 1983, whichever is earlier. A total of $33,500,000 was appropriated for the programs for the fiscal year beginning July 1, 1980. The appropriations were made in §§ 51 and 52, ch. 120, SLA 1980, and § 6, ch. 165, SLA 1980.

Editor's note. — Section 1, ch. 155, SLA 1980, effective on the same day as this chapter, provides: "It is the purpose of sec. 2 of this act [this chapter] to (1) improve the revenue raising and distribution system for the benefit of residents of home rule and general law municipalities by providing for more equitable allocation of financial resources among municipalities to improve their fiscal capacities; and (2) assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state."

Section 12, ch. 155, SLA 1980, effective on the same day as this chapter, provides: "(a) Notwithstanding other provisions of secs. 1 — 11 of this act, (1) a municipality may not receive less than $25,000 plus an area cost-of-living differential during the first fiscal year in which this act is effective; and (2) a municipality which would receive under AS 29.88, added by sec. 2 of this act, less than 125 percent of the amount which it received for the last fiscal year under AS 43.18.010 — 43.18.045, repealed by sec. 11 of this act, is, for each of the first five fiscal years during which secs. 1 — 10 of this act are effective, entitled to receive an amount equal to 125 percent of the amount which it received for the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045 in accordance with those provisions. (b) For the first five fiscal years during which secs. 1 — 10 of this act are effective, in order to pay the amounts required by (a) of this section, the allocations made by the Department of Community and Regional Affairs to the accounts established in AS 29.88.035, AS 29.89.080, and AS 29.90.020 shall be prorated by an amount which reduces the allocation to each account in equal proportion, and the prorated amounts shall be allocated to these accounts. (c) For the first five fiscal years during which secs. 1 — 10 of this act are effective, payment of an entitlement to a borough under AS 29.88 may be made to a borough only if the borough assembly agrees to allocate to each borough service area in the borough at least the amount of money that the service area received during the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045, in accordance with those provisions."

Sec. 29.88.010. State equalization of tax resources for local government services. (a) During each fiscal year the department shall compute an equalization entitlement for local government services provided by a taxing unit.

(b) The equalization entitlement computed for a taxing unit is based on the population, relative ability to generate revenue, and local tax burden of the taxing unit and is determined by the application of the

formula

Entitlement = P x R

where P = population, and

R = millage rate equivalent, determined by dividing the sum of the locally generated revenue of the taxing unit by one-tenth of one percent (0.1) of the full and true value of assessed property of the taxing unit determined under AS 29.88.020(d); however, the property value used under this subsection may not be less than 15 percent of the statewide average per capita full and true assessed property value.

(c) For purposes of this section, locally generated revenue

(1) includes

(A) the actual revenue derived from the levy and collection of local taxes in the taxing unit for local government services during the preceding fiscal year of the taxing unit;

(B) motor vehicle payments received by the municipality during the preceding fiscal year under AS 28.10.431;

(C) revenue from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the municipality for a function or service over which it has control, including revenues derived from parks and recreation services, mass transit, offstreet parking, and garbage and solid waste disposal services;

(D) special assessments received during the preceding fiscal year; and

(E) payments received by a municipality from a utility which are in place of taxes levied and collected by the municipality;

(2) excludes

(A) revenue derived from the levy and collection of municipal taxes and appropriated for the operating expenses and debt service of utilities;

(B) revenue from interest earned on investments and from the sale and lease of land or equipment; and

(C) all other revenue from whatever service derived. (§ 2 ch 155 SLA 1980)

Sec. 29.88.015. Determination of population. (a) For purposes of this chapter, the population of a taxing unit shall be determined annually by the latest figures of the United States Bureau of the Census or other population data which, in the judgment of the department, is reliable.

(b) The population of the taxing unit includes the population of any military reservation which is a part of the taxing unit. (§ 2 ch 155 SLA 1980)

Sec. 29.88.020. Determination of millage rate equivalent. (a) The department may require a municipality to return a certification, signed by the municipal treasurer or manager and the mayor, which provides an estimate of the locally generated revenue received by the municipality during the preceding fiscal year.

(b) By October 15 of each year, the department shall make an initial determination of the millage rate equivalent of each taxing unit to be used for computing and distributing equalization entitlements for the current fiscal year under this chapter. The department shall base the initial determination on the estimates in the certification returned by a municipality under (a) of this section.

(c) As early as possible, but not later than December 15 of each year, the department shall make a final determination of the millage rate equivalent of each taxing unit to use to compute and distribute equalization entitlements under this chapter. The department shall base the determination on audits, financial statements and other financial reports prepared and submitted by a municipality. The department shall adjust the locally generated revenue reported by a municipality to exclude the municipal revenue claimed by the municipality which does not qualify for inclusion in or recognition as locally generated revenue for local government purposes under AS 29.88.010(c)(1). The adjustment shall be made by deducting from total revenue claimed by the municipality the amount of the department's estimate of revenue which is not recognized for local government purposes.

(d) The full and true assessed property value shall be determined by the department in the manner provided for the computation of state aid to education under AS 14.17.140. When the determination of locally generated revenue includes revenue of a utility received under AS 29.88.010(c)(1)(E), the full and true assessed property value shall include the computed assessed value of the utility, determined by dividing the amount of the payment in place of taxes made by the utility by the millage rate which would apply to the utility if the utility were subject to levy and collection of taxes under AS 29.53.

(e) In addition to the computation for municipalities which levy and collect a property tax, the department shall determine an estimated full and true assessed property value under (d) of this section for

(1) each municipality which is a school district and which does not levy and collect a property tax;

(2) each second class city with a population of 750 or more persons; however, a computation is not required under this paragraph more often than once during a period of three successive calendar years; and

(3) all other second class cities, by determining the average per capita full and true assessed property value of all cities having a population of less than 750 persons in which an assessment has been completed by a municipality or for which a determination is not made under (1) or (2) of this subsection.

(f) The department shall annually compute a statewide average per capita full and true assessed property value. (§ 2 ch 155 SLA 1980)

Sec. 29.88.025. Reports. A payment of an equalization entitlement may not be made to a municipality under this chapter until the municipality has submitted its certificate of estimated revenue and its financial report to the department for the fiscal year preceding the year for which the equalization entitlement is sought, together with a budget for the municipality's current fiscal year. The financial report shall include a listing of general revenue collected from taxes levied and assessed by the municipality and any other revenue which, in the opinion of the municipal officials, is eligible for inclusion in computations of the locally generated revenue of the taxing unit. (§ 2 ch 155 SLA 1980)

Sec. 29.88.030. Limitation on computation and use of payments. (a) An equalization entitlement generated by the general tax levy of a taxing unit may be used only for authorized expenditures of that taxing unit, but up to 15 percent of the payment of an equalization entitlement generated by areawide revenue of a municipality may be used by the municipality for areawide or nonareawide purposes at the discretion of its assembly or council.

(b) An equalization entitlement determined with reference to revenue other than revenue obtained from the levy and collection of taxes may be used for areawide or nonareawide purposes, at the discretion of the assembly or council. (§ 2 ch 155 SLA 1980)

Sec. 29.88.035. Tax equalization account. The tax equalization account is established. Money to carry out the provisions of this chapter shall be allocated by the department to the account. The amount allocated to the account shall be fully distributed by the department as payments to municipalities to fulfill each municipality's share authorized under AS 29.88.010. The amount allocated to the account shall be distributed by the department pro rata among eligible municipalities. (§ 2 ch 155 SLA 1980)

Sec. 29.88.040. Administration. (a) The department may adopt regulations necessary to implement this chapter. The regulations shall include, among other provisions,

(1) procedures and filing dates for submitting certification and financial reports;

(2) procedures for obtaining information required to compute and determine the municipality's millage rate equivalent; and

(3) procedures by which the department shall notify a municipality in writing of the reasons for a proposed disallowance or adjustment of any factor bearing upon the determination of the municipality's entitlement and by which the municipality will be provided reasonable time in which to respond or to challenge the department's determination.

(b) The department shall make reasonable efforts to advise and assist municipalities in collecting information and completing reports necessary for the determination of entitlements under this chapter.

(c) The department shall, by regulation, classify for inclusion or exclusion as a component of a municipality's millage rate equivalent under AS 29.88.010 any tax revenue appropriated for a utility not included in the definition set out in AS 29.88.045(4). (§ 2 ch 155 SLA 1980)

Sec. 29.88.045. Definitions. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "municipality" means a city, borough or unified municipality incorporated under the laws of the state;

(3) "taxing unit" means a municipality and

(A) in a borough or unified municipality, a service area or the entire area outside cities;

(B) in a city, a differential tax zone;

(4) "utilities" means electricity, water, sewer, gas, heat, or telephone services, and refuse and garbage collection services. (§ 2 ch 155 SLA 1980)

Chapter 89. State Aid for Miscellaneous Municipal Purposes.

Section

10. Revenue sharing payable
20. State aid to municipalities for roads
30. State aid to municipalities and other eligible recipients for health facilities and hospitals
40. State aid to volunteer fire departments in the unorganized borough
50. State aid to Native village governments
60. Population determination
70. Area cost-of-living differential
80. Miscellaneous services account
90. Regulations
100. Definitions

Effective date of chapter. — Section 17, ch. 155, SLA 1980 provides that §§ 1 — 12 of the act take effect on the first day of the fiscal year for which $33,400,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of §§ 1 — 12 of this act or on July 1, 1983, whichever is earlier. A total of $33,500,000 was appropriated for the programs for the fiscal year beginning July 1, 1980. The appropriations were made in §§ 51 and 52, ch. 120, SLA 1980, and § 6, ch. 165, SLA 1980.

Editor's note. — Section 12, ch. 155, SLA 1980, effective on the same day as this chapter, provides: "(a) Notwithstanding other provisions of secs. 1 — 11 of this act, (1) a municipality may not receive less than $25,000 plus an area cost-of-living differential during the first fiscal year in which this act is effective; and (2) a municipality which would receive under AS 29.88, added by sec. 2 of this act, less than 125 percent of the amount which it received for the last fiscal year under AS 43.18.010 — 43.18.045, repealed by sec. 11 of this act, is, for each of the first five fiscal years during which secs. 1 — 10 of this act are effective, entitled to receive an amount equal to 125 percent of the amount which it received for the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045 in accordance with those provisions. (b) For the first five fiscal years during which secs. 1 — 10 of this act are effective, in order to pay the amounts required by (a) of this section, the allocations made by the Department of Community and Regional Affairs to the accounts established in AS 29.88.035, AS 29.89.080, and AS 29.90.020 shall be prorated by an amount which reduces the allocation to each account in equal proportion, and the prorated amounts shall be allocated to these accounts. (c) For the first five fiscal years during which secs. 1 — 10 of this act are effective, payment of an entitlement to a borough under AS 29.88 may be made to a borough only if the borough assembly agrees to allocate to each borough service area in the borough at least the amount of money that the service area received during the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045, in accordance with those provisions."

Sec. 29.89.010. Revenue sharing payable. In addition to the equalization entitlements paid under AS 29.88, during each fiscal year the department shall pay aid

(1) to a municipality or other eligible recipient which has the power to provide the services described in AS 29.89.020 — 29.89.040 and exercises the power in the manner required by this chapter;

(2) to a Native village government under AS 29.89.050. (§ 3 ch 155 SLA 1980)

Sec. 29.89.020. State aid to municipalities for roads. (a) The department shall pay to a municipality which has power to provide for road maintenance and exercises that power, $2,500 a mile for each mile of road, street or highway maintained by the local government, excluding (1) the official state highway system, (2) roads, streets or highways not dedicated to public use, (3) roads, streets or highways maintained under the local service road program (AS 19.30.111 —

19.30.251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. A payment may not be made under this subsection for maintenance of a road which is not used by automotive equipment.

(b) A frozen waterway and a connection from an inhabited area to a waterway which may be safely used for public transportation by automotive equipment and is so used during a portion of a year is eligible for a payment of $1,500 per mile if the waterway and connection are maintained during the period of use by a municipality or combination of municipalities. The department, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipalities shall receive the payments under this subsection, unless the municipalities involved have agreed in writing to a particular distribution. (§ 3 ch 155 SLA 1980)

Sec. 29.89.030. State aid to municipalities and other eligible recipients for health facilities and hospitals. (a) The department shall pay

(1) to a municipality which has the power to provide hospital facilities and services and which exercises that power, $1,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the hospital, or $250,000 a hospital for those hospitals with 10 or more beds, or $50,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; money received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(2) on the basis set out in (1) of this subsection to a municipality for a nonprofit hospital not operated by a municipality if the municipality first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals which have been adopted by the municipality; money may not be paid on behalf of a nonprofit hospital without this certification; payments to the municipality shall be transferred to the nonprofit hospital in accordance with the basis by which the payment was generated by the hospital, and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(3) to a municipality in which a health facility is operated, $2,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $8,000 per health facility as the municipality determines.

(b) A hospital may not receive payment under both (a)(1) and (a)(2) of this section.

(c) Money received by a municipality under (a)(3) of this section shall be used for expenses of health services or operation and maintenance of health facilities as the municipality determines.

(d) Before money may be distributed under this section, the commissioner of health and social services shall certify to the commissioner of community and regional affairs that any accumulation of assets by nonprofit corporations or other recipients under this section is dedicated irrevocably to a public purpose. (§ 3 ch 155 SLA 1980; am §§ 1, 2 ch 103 SLA 1981)

Cross reference. — As to state aid for hospital construction, see AS 29.90.

Editor's note. — As to reports by Department of Health and Social Services and Department of Community and Regional Affairs and commissioner of health and social services, see § 14, ch. 155, SLA 1980, effective July 1, 1980, in the 1980 Temporary and Special Acts and Resolves.

Sec. 29.89.040. State aid to volunteer fire departments in the unorganized borough. (a) The department shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized borough or city a sum for protection purposes equal to $10 per capita for the population served by the department, as determined by the state fire marshal.

(b) A grant shall be made under (a) of this section to facilitate the organization of a volunteer fire department in an area not in an organized borough or city, upon application of the proposed fire protection group to the state fire marshal and upon approval of applications according to standards of organization and service prescribed by regulations adopted by the state fire marshal. (§ 3 ch 155 SLA 1980)

Sec. 29.89.050. State aid to Native village governments. The state shall pay $25,000 to a Native village government for a village which is not incorporated as a city under this title. In this section, "Native village government" means

(1) a local governing body organized by authority of the Act of Congress of June 18, 1934 (25 U.S.C. § 476); or

(2) a traditional village council or, if there is no traditional village council, the paramount chief or other governing body of a Native village which meets the requirements of the Alaska Native Claims Settlement Act (43 U.S.C. §§ 1601 — 1628). (§ 3 ch 155 SLA 1980)

Sec. 29.89.060. Population determination. For purposes of this chapter, population shall be determined by the latest figures of the United States Bureau of the Census or other reliable population data, including but not limited to public school enrollment figures, public utility connection, registered voters or certified employment payrolls. (§ 3 ch 155 SLA 1980)

Sec. 29.89.070. Area cost-of-living differential. (a) Payments to a municipality or other eligible recipient under AS 29.89.020 — 29.89.030 shall reflect area cost-of-living differentials. Payments shall be based upon the sum of per capita, per mile and per bed or facility grants due each municipality or other recipient multiplied by the appropriate area cost-of-living differential. The area cost-of-living differential for each recipient shall be determined annually by election district under the provisions of AS 39.27.030. Application of the area cost-of-living differential may not result in distribution of an amount less than the amount of the payment determined without application of this section.

(b) The election districts used to establish area cost-of-living differentials under (a) of this section are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965. (§ 3 ch 155 SLA 1980)

Sec. 29.89.080. Miscellaneous services account. The miscellaneous services account is established. Money to carry out the provisions of this chapter shall be allocated by the department to the account in accordance with AS 29.95.010. If amounts in the account are insufficient to pay each municipality's or other recipient's share authorized under this chapter, the amounts which are available shall be distributed pro rata among eligible municipalities and other recipients. (§ 3 ch 155 SLA 1980)

Sec. 29.89.090. Regulations. The department shall adopt regulations necessary to carry out the purposes of this chapter. The regulations shall include minimum standards required to qualify a municipality or other recipient for payments for each service. The department may require a municipality or other recipient to submit a performance report adequate to demonstrate to the department that a service for which payment is requested under this chapter was performed by the municipality or other recipient and meets minimum standards of service prescribed by regulation. (§ 3 ch 155 SLA 1980)

Sec. 29.89.100. Definitions. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "health facility"

(A) means a facility which is licensed, when required, by the state under AS 18.20.010 — 18.20.130 and which is owned or operated or both by a municipality or by a nonprofit corporation or other nonprofit sponsor;

(B) includes a public health center, maternity home, community mental health center, facility for the mentally or physically handicapped, nursing home or convalescent center;

(C) excludes a facility operated or wholly supported by the state or the federal government;

(3) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes a facility operated or wholly supported by the state or the federal government. (§ 3 ch 155 SLA 1980)

Chapter 90. State Aid for Hospital Construction.

Section

10. State aid for hospital construction
20. Hospital construction assistance account
30. Definitions

Cross reference. — As to state aid to municipalities and other eligible recipients for health facilities and hospitals, see AS 29.89.030.

Effective date of chapter. — Section 17, ch. 155, SLA 1980, provides that §§ 1 — 12 of the act take effect on the first day of the fiscal year for which $33,400,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of §§ 1 — 12 of this act or on July 1, 1983, whichever is earlier. A total of $33,500,000 was appropriated for the programs for the fiscal year beginning July 1, 1980. The appropriations were made in §§ 51 and 52, ch. 120, SLA 1980, and § 6, ch. 165, SLA 1980.

Editor's note. — Section 12, ch. 155, SLA 1980, effective on the same day as this chapter, provides: "(a) Notwithstanding other provisions of secs. 1 — 11 of this act, (1) a municipality may not receive less than $25,000 plus an area cost-of-living differential during the first fiscal year in which this act is effective; and (2) a municipality which would receive under AS 29.88, added by sec. 2 of this act, less than 125 percent of the amount which it received for the last fiscal year under AS 43.18.010 — 43.18.045, repealed by sec. 11 of this act, is, for each of the first five fiscal years during which secs. 1 — 10 of this act are effective, entitled to receive an amount equal to 125 percent of the amount which it received for the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045 in accordance with those provisions. (b) For the first five fiscal years during which secs. 1 — 10 of this act are effective, in order to pay the amounts required by (a) of this section, the allocations made by the Department of Community and Regional Affairs to the accounts established in AS 29.88.035, AS 29.89.080, and AS 29.90.020 shall be prorated by an amount which reduces the allocation to each account in equal proportion, and the prorated amounts shall be allocated to these accounts. (c) For the first five fiscal years during which secs. 1 — 10 of this act are effective, payment of an entitlement to a borough under AS 29.88 may be made to a borough only if the borough assembly agrees to allocate to each borough service area in the borough at least the amount of money that the service area received during the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045, in accordance with those provisions."

As to reports by Department of Health and Social Services and Department of Community and Regional Affairs and commissioner of health and social services, see § 14, ch. 155, SLA 1980, in the 1980 Temporary and Special Acts and Resolves.

Sec. 29.90.010. State aid for hospital and health facility construction. If construction of a hospital began after January 1, 1968, or if construction of a health facility began after January 1, and before July 1, 1980, and state matching aid for construction approved for payment to the municipality or other hospital or health facility sponsor constitutes less than 25 percent of the total project cost, the department shall pay to the municipality or other hospital or health facility sponsor each fiscal year $2,500 a bed for the maximum number of beds provided for in the construction design of the hospital or health facility or five percent of the total project cost, whichever is greater. State aid provided for in this section shall continue until the municipality or other hospital or health facility sponsor has received an amount which, combined with state matching money for construction of the hospital or health facility, equals 25 percent of the total project cost. Money received for construction may not be used for any other purpose. (§ 4 ch 155 SLA 1980; am § 3 ch 103 SLA 1981)

Sec. 29.90.020. Hospital and health facility construction assistance account. The hospital and health facility construction assistance account is established. Money to carry out the provisions of this chapter shall be allocated by the department to the account in accordance with AS 29.95.010. If amounts in the account are insufficient to pay each recipient's share authorized under this chapter, the amounts which are available shall be distributed pro rata among eligible recipients. (§ 4 ch 155 SLA 1980; am § 4 ch 103 SLA 1981)

Sec. 29.90.030. Definitions. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes a facility operated or wholly supported by the state or the federal government;

(3) "total project cost" means

(A) costs directly related to the project; and

(B) the total of all costs of financing and carrying out the project, including but not limited to,

(i) the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property, and the acquisition of machinery and equipment as may be necessary in connection with the project;

(ii) an allocable portion of the administrative and operating expenses of the municipality or other hospital sponsor;

(iii) the cost of financing the project, including interest on bonds issued to finance the project; and

(iv) the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

(4) "health facility"

(A) means a facility that is licensed, when required, by the state under AS 18.20.010 - 18.20.130 and that is owned or operated or both by a municipality or by a nonprofit corporation or other nonprofit sponsor;

(B) includes a public health center, maternity home, community mental health center, facility for the mentally or physically handicapped, nursing home, or convalescent center;

(C) excludes a facility operated or wholly supported by the state or the federal government.

(§ 4 ch 155 SLA 1980; am § 5 ch 103 SLA 1981)

Chapter 95. Administration of Municipal Financial Assistance Programs.

Section

10. Allocation and distribution
20. Qualification for minimum payment
30. Proration of payments

Effective date of chapter. — Section 17, ch. 155, SLA 1980, provides that §§ 1 — 12 of the act take effect on the first day of the fiscal year for which $33,400,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of §§ 1 — 12 of this act or on July 1, 1983, whichever is earlier. A total of $33,500,000 was appropriated for the programs for the fiscal year beginning July 1, 1980. The appropriations were made in §§ 51 and 52, ch. 120, SLA 1980, and § 6, ch. 165, SLA 1980.

Editor's note. — Section 12, ch. 155, SLA 1980, effective on the same day as this chapter, provides: "(a) Notwithstanding other provisions of secs. 1 — 11 of this act, (1) a municipality may not receive less than $25,000 plus an area cost-of-living differential during the first fiscal year in which this act is effective; and (2) a municipality which would receive under AS 29.88, added by sec. 2 of this act, less than 125 percent of the amount which it received for the last fiscal year under AS 43.18.010 — 43.18.045, repealed by sec. 11 of this act, is, for each of the first five fiscal years during which secs. 1 — 10 of this act are effective, entitled to receive an amount equal to 125 percent of the amount which it received for the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045 in accordance with those provisions. (b) For the first five fiscal years during which secs. 1 — 10 of this act are effective, in order to pay the amounts required by (a) of this section, the allocations made by the Department of Community and Regional Affairs to the accounts established in AS 29.88.035, AS 29.89.080, and AS 29.90.020 shall be prorated by an amount which reduces the allocation to each account in equal proportion, and the prorated amounts shall be allocated to these accounts. (c) For the first five fiscal years during which secs. 1 — 10 of this act are effective, payment of an entitlement to a borough under AS 29.88 may be made to a borough only if the borough assembly agrees to allocate to each borough service area in the borough at least the amount of money that the service area received during the last fiscal year under the former provisions of AS 43.18.010 — 43.18.045, in accordance with those provisions."

Sec. 29.95.010. Allocation and distribution. (a) Each year, the Department of Community and Regional Affairs shall allocate money appropriated to the accounts established in AS 29.88, AS 29.89, and AS 29.90 in the amounts determined by the legislature.

(b) Money in the miscellaneous services account established in AS 29.89.080 which exceeds the amount required to fully fund distributions authorized by AS 29.89 shall be reallocated to the tax equalization account established in AS 29.88.035 and distributed according to the provisions of AS 29.88.

(c) Money in the hospital construction assistance account established in AS 29.90.020 which exceeds the amount required to fully

fund distributions authorized by AS 29.90 shall be reallocated to the tax equalization account established in AS 29.88.035 and distributed according to the provisions of AS 29.88. (§ 5 ch 155 SLA 1980)

Sec. 29.95.020. Qualification for minimum payment. (a) A municipality qualifying for an entitlement under AS 29.88 or AS 29.89 shall receive a minimum payment of $25,000 plus an area cost-of-living differential for each fiscal year if:

(1) the municipality has conducted a regular election under AS 29.28.010 — 29.28.050 during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and has reported the results of the election to the commissioner of the Department of Community and Regional Affairs;

(2) regular council meetings are held in the municipality in accordance with the requirements of AS 29.23.210 during the fiscal year preceding the year for which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and a record of the proceedings is maintained;

(3) a municipal budget has been adopted for the fiscal year during which payment of an entitlement is authorized by AS 29.88 or AS 29.89 and an audit or financial statement for the preceding fiscal year has been prepared and furnished to the Department of Community and Regional Affairs in accordance with AS 29.23.560(a); and

(4) local ordinances adopted by the governing body of the municipality have been codified in accordance with AS 29.48.180.

(b) The area cost-of-living differential payable to each municipality under this section shall be determined annually by election district under the provisions of AS 39.27.030. Except as provided in AS 29.95.030, application of the area cost-of-living differential may not result in a payment which is less than the minimum payment determined under (a) of this section. For purposes of this subsection, the election districts used are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

(c) The Department of Community and Regional Affairs shall pay to each municipality eligible to receive a minimum payment under this section an amount equal to the difference between the minimum payment determined under (a) and (b) of this section and the sum of the amounts payable for the same fiscal year under AS 29.88 and AS 29.89.

(d) A payment under this section may be prorated and reduced under AS 29.95.030.

(e) Payments under this section shall be made from the money allocated to the tax equalization account established in AS 29.88.035. (§ 5 ch 155 SLA 1980)

Sec. 29.95.030. Proration of payments. (a) Payments under AS 29.95.020 and AS 29.88 shall equal the amount allocated to the tax equalization account (AS 29.88.035), adjusted in accordance with AS 29.95.010.

(b) Adjustments of payments shall be determined by prorating amounts payable under AS 29.95.020 and amounts payable under AS 29.88 by a factor which, when applied, reduces all payments in equal proportion so that payments under AS 29.95.020 and payments under AS 29.88 equal the amount allocated to the tax equalization account established in AS 29.88.035. (§ 5 ch 155 SLA 1980)

LEGISLATIVE CHANGES AFFECTING STATE CERTIFICATE OF NEED PROGRAMS

This list summarizes the changes made by the National Health Planning and Resources Development Amendments of 1979 to the requirements for acceptable State Certificate of Need programs. The amendments are grouped according to changes in procedures, in coverage, in criteria, and in definitions. Following the summary of each change are citations for the conference report, the Health Planning Act, and the page in the conference report on which the complete text of the change may be found.

Prepared by Division of Regulatory Activities
Bureau of Health Planning

October 1979

CHANGE IN PROCEDURES

Applications must be submitted according to a timetable established by the reviewing agency. Reviews must be undertaken in a timely fashion, and similar types of applications must be considered in relation to each other, but no less often than twice a year. (Section 116(e) amends 1532(b)(13)(A), see page 24.)

Written notification of the beginning of a review and notification of review status must be made in a "timely" manner. Agencies are required to maintain a mailing list of persons requesting to be notified of reviews. (Section 116(d)(1)(A)&(B) amends 1532(b)(1)&(7), page 22.)

If an agency requests additional information the applicant must be given 15 days to provide the information. (Section 116(d)(2) amends 1532(b)(2), page 22.)

Agencies must establish procedures to assure that only necessary information is requested in an application, and that all "essential" information is accessible to the general public. (Section 116(i)(1)&(2) amends 1532(b), page 25.)

The State Agency must specify a time period for approving or disapproving an application, and for granting an exemption. If additional information is requested of an applicant, the applicant may request that the review period be extended by 15 days. (Section 116(d)(3) amends 1532(b)(12)(C), page 23.)

The following requirements apply to hearings held before the State Agency and before an HSA to which the State Agency has delegated the authority to hold a hearing: Any person may be represented by counsel and may submit arguments and evidence. Any person directly affected may question persons who make factual allegations. A record of the hearing must be maintained. (Section 116(d)(3) amends 1532(b)(12)(A), page 22.)

A State's decision to approve, disapprove, or withdraw a certificate of need must be based solely on a review by the State conducted in accordance with adopted procedures and criteria, and on the record of administrative proceedings. A State's decision to approve or disapprove an exemption is based solely on the record established in administrative proceedings. (Section 116(d)(3) amends 1532(b)(12)(B), page 23.)

An HSA which includes a portion of a single standard metropolitan statistical area will review criteria used for project reviews and certificate of need decisions which affect the area. (Section 121(b) amends 1513(d), page 35.)

Upon the request of any person directly affected, a decision to approve, disapprove, or withdraw a certificate of need must be <u>administratively</u> reviewed under an appeals mechanism consistent with State law governing the practices and procedures of administrative agencies. (Section 116(d)(3) amends 1532(b)(12)(D), page 23.)

After an administrative review, any person adversely affected by a decision may seek judicial review. The Court must affirm the State's decision unless it is found to be "arbitrary, capricious, or not made in compliance with applicable law." (Section 116(d)(3) amends 1532(b)(12)(E), page 23.)

An HSA must be permitted a "timely" appeal. The decision of the reviewing agency must be considered the decision of the State Agency. (Section 117(b)(4) amends 1522(b)(13), page 31.)

A notice of intent is required before any person arranges to acquire an existing health care facility, or arranges to acquire major medical equipment which will not be owned by or located in a health care facility. (Section 117(a) adds 1527(d)(2) and (e)(2), page 29.)

Once a hearing has commenced, ex parte contacts are prohibited between applicants or opponents and any person in the State Agency who exercises responsibility in granting, denying, or withdrawing certificates of need. (Section 116(d)(3) amends 1532(b)(12)(F), page 24.)

If no decision is made within the required time, the applicant may bring an action in the appropriate State Court to require the State Agency to make a decision. (Section 116(d)(3) amends 1532(b)(12)(C)(ii), page 23.)

A governing body member is prohibited from voting on any application in which the member has a conflict of interests. (Section 113(a) amends 1512(b)(3)(F), page 17.)

The State Agency must consider the recommendation of the HSA to approve, disapprove, or withdraw a certificate of need. (Section 117(a) adds 1527(g), page 30.)

The State Agency must monitor the progress of the holder of a certificate in meeting the timetable specified in the application. The State Agency may withdraw a certificate of need if it determines that the holder is not making a good faith effort to meet the timetable. (Section 117(a) adds 1527(a)(3), page 26.)

A certificate of need may only be issued by the State Agency, and must, except in emergency circumstances which pose a threat to public health, be consistent with the State health plan. (Section 117(a) adds 1527(a)(5), page 26.)

When a State issues a certificate of need it must specify a maximum capital expenditure which may be obligated under the certificate. The State program will prescribe the nature of further review if the capital expenditure maximum is exceeded. (Section 117(a) adds 1527(a)(4), page 26.)

HSAs and State Agencies must coordinate the development of procedures and criteria. (Section 116(c) amends 1532(a), page 22.)

Any criterion used to review an application or any condition attached to a certificate of need must be directly related to criteria at section 1532(c), criteria in Federal regulation prior to the date of enactment, or criteria in State regulation. The Secretary may not require the inclusion of criteria other than those at section 1532(c) or those in regulation prior to the date of enactment. (Section 117(a) adds 1527(a)(2), page 25.)

A certificate of need program must provide procedures and penalties to enforce the requirements of the program. (Section 117(b)(2) amends 1523(a)(4), page 30.)

CHANGES IN COVERAGE

A certificate of need program must provide for the review and determination of need for capital expenditures, major medical equipment, and institutional health services. (Section 117(a) adds 1527(a)(1), page 25.)

A certificate of need may not be required for 1) the offering of an inpatient institutional health service 2) the acquisition of major medical equipment for the provision of an inpatient institutional health service or 3) the obligation of a capital expenditure for the provision of an institutional health service by 1) an HMO, 2) combinations of HMOs, 3) health care facilities controlled directly or indirectly by HMOs, or 4) facilities leased by HMOs, if exemption requirements are met. (Section 117(a) adds 1527(b)(1), page 26.)

An HMO or health care facility which meets the requirements must apply for and receive an exemption from coverage. (Section 117(a) adds 1527(b)(2), page 26.)

A certificate of need is required when any major medical equipment or facilities acquired under an exemption are sold, unless the purchaser is an exempted organization. (Section 117(a) adds 1527(b)(3), page 27.)

HMOs and HMO health care facilities may be subject to certificate of need review only to the extent that they are not exempt under the conditions at section 1527(b)(1), and then only for the offering of inpatient institutional health services, the acquisition of major medical equipment, and the obligation of capital expenditures. (Section 117(a) adds section 1527(b)(4), page 28.)

A State Agency must approve an application from an HMO or HMO facility if the Agency finds that the approval is required to meet the needs of enrolled members and new members reasonably expected to enroll, and is required to offer health services in a reasonable and cost effective manner. (Section 117(a) adds 1527(b)(5), page 28.)

A certificate of need must be approved for capital expenditures required to eliminate safety hazards, to comply with State licensure standards, or to comply with accreditation standards required to receive certain reimbursements or payments, unless the State Agency finds that the facility is not needed or the expenditure is not consistent with the State health plan. (Section 117(a) adds 1527(c), page 28.)

A certificate of need is required for the acquisition of a health care facility by any person if a notice of intent is not submitted or if the State Agency finds within 30 days that the acquisition will result in a change of service or bed capacity. (Section 117(a) adds 1527(d)(1), page 29.)

A certificate of need is required for the acquisition of major medical equipment by any person if a notice of intent is not submitted or if the State Agency finds within 30 days that the equipment will be used to provide service to inpatients. A State may require additional coverage of major medical equipment; however, after September 30, 1982, a State may not change its program to include additional requirements. (Section 117(a) adds 1527(e)(1)(A), page 29.)

CHANGES IN COVERAGE

Donations, leases and transfers for less than fair market value (if the fair market value is greater than the capital expenditure threshold) of major medical equipment are subject to review if the acquisition would be subject to review under 1527(e)(1)(A). (Section 117(a) adds 1527(e)(3), page 30.)

Applications from osteopathic and allopathic facilities must be considered on the basis of the needs of osteopathic and allopathic physicians and patients. (Section 117(a) adds 1527(f), page 30.)

CHANGES IN CRITERIA

The State Health plan is added to those plans which must be considered. (Section 116(b)(3) amends 1532(c)(1), page 22.)

Additional criteria concerning the availability of resources and funds, the effect on health professional training programs, alternative uses of the resources involved, and accessibility of the proposed service. (Section 116(f)(3) amends 1532(c)(6), page 24.)

Additional criteria concerning the effects of construction projects on costs and charges, the efficiency and appropriateness of existing services, and the quality of existing services. (Sections 116(g)(1) & (2) amend 1532(c)(6) and add 1532(c)(13) & (14), page 25.)

Adds a consideration of the factors which affect the effect of competition on the supply of the proposed service, and a consideration of improvements or innovations in the financing and delivery of services which foster competition and promote quality and cost effectiveness. (Section 103(c) adds 1532(c)(11) & (12), page 5.)

The criterion on the special needs and circumstances of HMOs is amended to include all HMOs. (Section 117(b)(5) amends 1532(c)(8), page 32.)

DEFINITIONS

"Capital expenditure" is defined as an expenditure which exceeds the minimum, substantially changes the bed capacity, or substantially changes the services of a health care facility. States may adjust the capital expenditure threshold to reflect changes in an index maintained or developed by the Department of Commerce and designated by the Secretary by regulation for purposes of making such adjustments. (Section 117(b)(3) adds 1531(6), page 30.)

"Major medical equipment" means equipment which provides medical and other health services, and which costs in excess of $150,000. (Section 117(b)(3) adds 1531(7), page 31.)

"HMO" is defined as a qualified HMO under section 1310(d), or an organization which satisfies the requirements in existing regulations. (Section 117(b)(3) adds 1531(8), page 31.)

"Institutional health service" is defined as a health service which is provided through the specified facilities, and which entails an annual operating cost of $75,000 (or a figure adjusted as specified by the Secretary by regulation.) (Section 126(a)(1) adds 1531(5), page 40.)

MEMORANDUM

TO: Interested Legislators and Staff

FROM: Kay Miller, NCSL Health Planning Project Director

SUBJECT: 1979 Congressional Health Planning Amendments (P.L. 96-79): Implications for State Certificate of Need Programs

DATE: December 27, 1979

NCSL Health Planning Project

The National Conference of State Legislatures, through a contract with HEW's Bureau of Health Planning, has a Health Planning Project designed to collect information on state certificate of need (CON) legislation. As part of the project, NCSL is providing interested legislators and staff with information on federal developments which have ramifications for their state certificate of need programs.

NCSL has completed a series of four regional seminars for legislators and their staff which focused in part on the recent amendments to the Health Planning Act and the impact those amendments have on certificates of need. The materials included in this packet are intended to supplement the information provided at the seminars and to give those who did not attend the basic information necessary to understand the implications of the recent amendments.

Finally, the NCSL project can make available necessary technical assistance to state legislatures attempting to develop certificate of need legislation to reflect new changes. Questions regarding the project or requests for technical assistance should be directed to: Kay Miller, Project Director, Health Planning Project, NCSL, Denver, CO 80202 (303) 623-6600.

1979 Amendments to the Health Planning Law

The National Health Planning and Resources Development Act of 1974, P.L. 93-641, established a new nationwide network of health planning agencies. It also mandated that each state establish and administer a certificate of need (CON) program. Certificate of need is basically a method to prevent the construction and other development of unnecessary and inappropriate health care facilities and services. These programs were regarded by many as the regulatory mechanism necessary to give teeth to the planning process.

The Congressional amendments, signed into law October 4, 1979, to the 1974 Act have certain implications for state certificate of need programs. Depending on the latitude which a state's statute permits the state health planning agency in developing a certificate of need program, a legislature may be required to amend (or enact, in a few cases) its CON statute to reflect the significant changes in the federal legislation.

Several examples of the changes in the recent Congressional amendments which may require changes in the state laws are:

I. Health maintenance organizations (HMOs) meeting certain specified criteria outlined in federal law (Section 117 (a), page 26 of the Conference Report, adds 1527 (6)) may not be required to obtain a certificate of need for: 1) the offering of an in-patient institutional health service 2) the acquisition of major medical equipment for the provision of an inpatient institutional health service or 3) the obligation of a capital expenditure for the provision of an institutional health service.

II. A certificate of need is required for the acquisition of major medical equipment by any person if a notice of intent is not submitted or if the state agency finds within 30 days that the equipment will be used to provide service to inpatients. A state may require additional coverage of major medical equipment; however, after September 30, 1982, a state may not change its program to include additional requirements (Section 117 (a) of the Conference Report adds 1527 (e) (1) (A) on page 29.)

There are numerous other changes which may require state statutory changes if state law does not grant liberal rulemaking authority to the state agency. Each state will need to review its legislation in light of the new amendments to determine what legislative action will be necessary to comply. The NCSL Health Planning Project can assist in making this determination and reviewing proposed amendments for compliance.

Timetable for Compliance

Section 123 of the Conference Report, page 38, amends subsection (d) of section 1521 to establish the dates when a state agency must have a final designation agreement is a satisfactory CON program which may require legislation to implement, the dates are tied to legislative sessions. Basically, the amendments state: 1) if the legislature of the state was in session on the date of enactment of the 1979 health planning amendments (October 4, 1979) and will continue to be in session 12 months, the state agency must be fully designated 12 months from that date; 2) if the legislature of a state was in session on the date of enactment but 12 months do not remain in that session, or if the legislature was not in session on the date of enactment, the state agency of that state must be fully designated 12 months after the beginning of the first regular session of the legislature beginning after that date.

NCSL has provided the HEW's Bureau of Health Planning with 1979 adjournment information and 1980 session information on all 50 states. Legislators and staff with questions regarding when their state must have a fully designated State Health Planning & Development Agency should contact their regional office of HEW. If the Regional Office is unable to give a definite answer, contact NCSL, which will obtain a judgment from the Bureau of Health Planning.

Penalties for Failure to have a Fully Designated State Agency

The 1979 amendments also make changes in the penalties that will be imposed on states which do not have final designation agreements in effect on the dates outlined above. These penalties also appear in Section 123 of the Conference Report, page 38, in the amendments to subsection 1521 (d) (2). Basically, the sanctions that HEW must impose

on any state failing to have a fully designated state agency by the required date would involve any "allotment, grant, loan and loan guarantee made to and each contract entered into with an individual or entity in such State ... under this Act (Public Health Service Act), the Community Mental Health Centers Act, the Comprehensive Alcohol Abuse & Alcoholism Prevention Treatment and Rehabilitation Act of 1970 and the Drug Abuse Office & Treatment Act of 1972."

If a final designation agreement is not in effect during the first year after the applicable expiration date, the Secretary of HEW must reduce the above mentioned funds by 25 percent; in the third year by 75 percent; and all funds under these acts are to be withheld after three years have elapsed.

The penalties in the new amendments are more stringent and comprehensive than those contained in the original Health Planning Act, P.L. 93-641, Section 1521 (d). The new amendments add funds under the Drug Abuse Office & Treatment Act of 1972 to the list of sanctions. More importantly, the amendments include all funds under the stated acts, not just those for "the development, expansion and support of health resources" as stated in the original act.

NCSL requested the Bureau of Health Planning to compute for each state the total dollars involved if the penalties were imposed. They have done this based on FY 1978 figures. States should be able to obtain these dollar figures through their regional HEW office of by contacting NCSL directly.

Federal Regulations Pursuant to the New Amendments

Federal law requires HEW to promulgate rules and regulations to implement the new amendments within six months of enactment. The Bureau of Health Planning intends to publish a Notice of Proposed Rulemaking (NPRM) in the Federal Register in mid-January, 1980. The NPRM will outline the issues on which further regulatory guidance is necessary. Interested parties will be given a period of time, probably sixty days, to review and comment on these issues before the final regulations are published in April, 1980.

NCSL will insure that everyone receiving this mailing will also receive the January NPRM. Legislative response to the proposed rules can be addressed directly to DHEW or channeled through NCSL. The Human Resources Committee of NCSL's State Federal Assembly will be actively involved in the review of the regulations and would appreciate receiving at least copies of the comments or concerns of state legislators and their staffs.

SFA Resolution Supporting a Timetable Extention for States

During the NCSL seminars on the health planning amendments, it became apparent that the timetable for compliance with the new amendments presents a hardship on those states which will have to amend CON statutes in the 1980 legislative sessions. Many states have to enact legislation even before the final federal regulations are published in April.

In response to this problem, the State-Federal Assembly of NCSL, the body which gives policy guidance to the organization in areas of state-federal relations, adopted the enclosed policy resolution at its December 7, 1979 meeting. The resolution urges

passage of an amendment to the recent Congressional amendments (P.L. 96-79) which would give states until the close of the first regular session after the promulgation of the HEW regulations to enact complying CON legislation.

Because Congress was near recess at the time of passage of the SFA resolution, it was impossible to find a Congressional sponsor for such an amendment before the holiday recess. However, efforts will continue to find a sponsor as soon as Congress reconvenes in January.

For additional information regarding the status of this amendment, contact: Dick Merritt, Human Resources Staff Director, NCSL Washington, (202) 624=5413.

Certificate-of-Need—No Panacea but Not without Merit

JOHN T. TIERNEY, WILLIAM J. WATERS, and WILLIAM H. ROSENBERG

WITH the current Administration in Washington promoting competition, the certificate-of-need (CON) program is experiencing critical scrutiny. The National Health Planning and Resources Development Act of 1974, Public Law 93–641, required all states to establish certificate-of-need programs to control major hospital and nursing home construction, renovation, and development proposals. However, many states had certificate-of-need programs long before Public Law 93–641 was enacted, and many are likely to maintain certificate-of-need programs for many years to come.

An extensive literature has developed over the past few years regarding the effectiveness of certificate-of-need (1). While the empirical evidence is mixed, the current academic perspective appears to be largely negative on certificate-of-need. Evidently, certificate-of-need has enjoyed some success in restraining the number of hospital beds, but many researchers indicate that certificate-of-need has not been greatly successful in controlling health care costs. Apparently, in those areas where beds have been controlled, hospitals have shifted investment to service-intensifying expenditures. Many analyses point out the fact that a high percentage of all certificate-of-need applications are approved. However, most certificate-of-need analyses give little attention to three of its most important features: *deterrence*, *guidance*, and *institutional planning*.

The very existence of certificate-of-need acts as a deterrent to frivolous or obviously misdirected projects. Few institutions are likely to expend the time, energy, and money to traverse the complex certificate-of-need process for a project that cannot withstand the test of public scrutiny. This is a powerful deterrent to unnecessary and inappropriate development in the health care industry.

The deterrent effect appears to be working in Rhode Island where the physician supply has been expanding more rapidly than the acute hospital bed supply. In the absence of certificate-of-need, one would have expected the hospital bed supply to expand in accordance with an expanding supply of practicing physicians. From 1956 to 1971, the number of licensed physicians in Rhode Island increased by 49%, and the number of community hospital beds during the period 1958 to 1973 (assuming a two-year lag period) increased by 31%. That is, for every new physician, .63 beds were added. After certificate-of-need was operational in Rhode Island, that is, from 1971 to 1980, the number of licensed physicians in Rhode Island increased by 13%, but during the period 1973 to 1980, the community hospital bed supply actually decreased by 2.3%. Had the trend of the previous fifteen years continued after certificate-of-need, Rhode Island would have 300 more hospital beds today (see Table 1).

TABLE 1

Hospital Bed[1] and Physician Supply[2] in Rhode Island, 1956–1980

Resource	*1956*	*1958*	*1971*[3]	*1973*	*1980*
PHYSICIAN SUPPLY					
Number	1264		1889		2100
Rate per 100,000 population	152		197		226
HOSPITAL BED SUPPLY					
Number		2707		3550	3420
Rate per 1,000 population		3.2		3.7	3.6
Beds per physician[4]		2.1		1.9	1.5

[2] Licensed physicians. Source: Division of Professional Regulation, RIDH.
[3] Rhode Island certificate-of-need program was instituted in 1968 but did not become fully operational until around 1971.
[4] Beds in year X ÷ physicians in year X–2. For 1978, the number of licensed physicians was 2238.

Further, one cannot minimize the potential of certificate-of-need in terms of guiding institutional actions. While certificate-of-need may not have had the effect of reducing overall hospital investment, it may very well have had a positive impact on the types of investments which hospitals have been making. Certainly, the desire on the part of hospitals for success-

ful certificate-of-need applications would tend to guide them into areas which are compatible with the goals and policy positions of certificate-of-need bodies and agencies. For example, the certificate-of-need program in Rhode Island has promoted a number of important policies: the utilization of tax-exempt bonds where appropriate, the pursuit of community fund drives as a source of financing capital expenditures, the employment of debt/equity ratio limitations to moderate community debt burden, the use of insolvency insurance as a substitute for large capital reserves for developing health maintenance organizations (HMOs), and the gradual and thoughtful introduction of CAT scanners. The appropriate funneling of provider activity is an obviously critical but largely unevaluated area of certificate-of-need impact.

Thirdly, certificate-of-need tends to promote better institutional planning. This is especially true in states where hospitals are required to submit annual long- and short-range plans as part of the certificate-of-need process. This is the case in Rhode Island. In Rhode Island, institutional plans serve as the notices-of-intent for certificate-of-need purposes. That is, no certificate-of-need proposals will be accepted unless they have previously appeared in the institution's documented plan for the future. Informal reports seem to indicate that hospitals themselves agree that certificate-of-need requirements have encouraged them to upgrade their institutional planning processes. In addition, the Rhode Island experience indicates that the certificate-of-need process can promote greater inter-institutional planning. In fact, over the last ten years the certificate-of-need process in Rhode Island has encouraged or required significant increases in inter-institutional planning affecting nine hospitals, almost half the hospitals in the nation's smallest state.

Thus existing empirical evaluations of certificate-of-need do not tell the whole story. There may be certain beneficial aspects of certificate-of-need which are difficult to measure. In fact, effective institutional/system planning encouraged by a credible certificate-of-need process should result in very few certificate-of-need denials. In this context, happiness in certificate-of-need is saying yes. That is, effective, upfront planning and dialogue between the institutional and systemwide levels should minimize the number of certificate-of-need denials. In any event, controlling total health expenditures is not the only policy objective of certificate-of-need. In fact, certificate-of-need by itself is not well suited to controlling total health expenditures. Nevertheless, certificate-of-need can be an effective mechanism for restraining health care costs, affecting the supply of health care resources,

and guiding health policy and planning at both the institutional and system levels. Therefore, certificate-of-need programs should not be abandoned without careful consideration of all the foreclosed opportunities which abandonment implies.

Finally, certificate-of-need would be a more effective cost-control device if there were a capital expenditure limit associated with the certificate-of-need process. As things stand now, there are no financial boundaries conditioning the number of certificate-of-need proposals which can be approved in a given time-frame. This is unrealistic and cripples the cost-control potential of the certificate-of-need process. No industry can afford to operate forever without some form of capital budget. Certificate-of-need capital limits would not only serve to restrain costs, they would also induce a healthy priority-setting process within certificate-of-need. Perhaps we should direct our energies toward improving the certificate-of-need process rather than dismantling it.

In conclusion, certificate-of-need was designed to avoid unnecessary duplication which results in underutilization and inflated costs in a largely cost-based reimbursement system. From this perspective, certificate-of-need has been successful in Rhode Island and elsewhere. Rhode Island's high overall community hospital occupancy rate (85.6%) and the absence of patently wasteful developments attest to this. At the same time, it is recognized in Rhode Island and elsewhere that effective overall cost control also requires use of a combination of other mechanisms such as prospective reimbursement, utilization review, consumer choice, and health maintenance organization (HMO) development.

THE SOCIAL CONSEQUENCES OF FREE TRADE IN HEALTH CARE: A PUBLIC HEALTH RESPONSE TO ORTHODOX ECONOMICS

Milton I. Roemer and John E. Roemer

In recent years, difficulties in U.S. health services have been ascribed to excessive government intervention and regulation; high costs and other problems would be solved, it is argued, by "return to the free market and competition." Examination of the past operations of free trade and competition in health care, however, shows that in this market not one of at least five conditions necessary for effective competition exists. Numerous adjustments made by society reflect strikingly the problems caused by these market deficiencies (such as seriously inadequate information or the presence of major social "externalities"). Furthermore, even these adjustments—such as medical ethics or health insurance—have generated serious secondary problems. Many types of waste and social inequity also persist, in spite of all the attempts to compensate for market failure. In effect, the so-called free market in health care has survived only because of the extensive regulations and other actions taken to patch it up. Abandoning these adjustments would further aggravate current problems. Only replacement of free trade by systematic social planning could hope to achieve a health care system that allocates resources and distributes services both efficiently and equitably.

In recent years it has become increasingly fashionable to attribute the many serious problems of the American health care system to "excessive government regulation." It is argued that a deliberate return to the classical entrepreneurial model of free trade and competition would solve or greatly reduce our problems of spiraling health care costs and inaccessibility of needed services. From this viewpoint, there follow many political actions to minimize the entire role of government—with respect to both regulation and planning—and to enhance the private sector in health care (1). Under the Reagan Administration, such strategies have become explicitly dominant.

INTRODUCTION: THE BASIC ISSUE

The question of whether free trade with competition, or social planning with regulation, is the most effective mechanism for governance of the health care system, has very complex ramifications. Comprehensive analysis of these issues would require a lengthy book. In this paper, we shall offer only an introductory statement of our

This paper is based on an address on "Competition in the Health Care System" presented by Dr. Milton I. Roemer to the Third Annual Michigan Statewide Health Planning Conference, held in Detroit on May 21, 1980.

International Journal of Health Services, Volume 12, Number 1, 1982

argument that a policy of greater free trade and lesser public regulation of health services would not reduce but would increase the problems of the U.S. health care system.

We contend that the current health care systems in the United States and other capitalist nations have survived to the present day only because they have been continuously modified by planning and regulation. Without those modifications, the effects of free market dynamics in the health care sector would have been so disastrous, so unacceptable politically, that these systems would have collapsed long ago, and been replaced by completely planned and regulated health care systems. In order to solve the still persistent health care problems—involving costs, accessibility, quality, and other features—America requires not greater free trade and competition, but rather much more planning and regulation.

The virtues of free trade and competition have long been acclaimed in the modern, parliamentary, and capitalist world. From early childhood, we become so deeply convinced of the wisdom of free competition as the best incentive for diligence—in the classroom, on the athletic field, everywhere—that in later life it becomes naturally accepted as the obvious path to sound social policy.

As well summarized by Anne Somers (2, p. 468), in the wind-up of a 1977 national conference of economists on Competition in the Health Care Sector:

> Competition is generally the most desirable method of quality control, price-setting, and resource allocation. In theory, at least, the consumer has the final say, while producers or providers compete for his favor in terms of quality as well as price, thus maximizing the incentive to efficiency.

Continuing with her statement of this ideal, Professor Somers states further:

> Interference by Government or any other third party in the consumer-provider relationship is non-existent or minimal. . . . Even in the health care economy, with all its idiosyncrasies, my philosophical bias is in the same direction.

Most Americans probably share this notion of the virtues of free trade and competition in all sectors of society, including the health field; the basic trouble, many think, is that the concept has not really been fairly tested. Some regard "government interference" as the major obstruction. While most would acknowledge problems caused by monopolistic producers (i.e. health care providers) and by the non-sophistication of consumers (i.e. patients), these characteristics of the health care industry are viewed as only minor disturbances that do not nullify the basic soundness of a free market policy—perhaps modified in small ways.

Examining the actual dynamics and experience of free trade and competition in the health care systems of the United States and other countries, however, one becomes increasingly skeptical of the whole idea. With respect to a goal of social justice, one finds not only the inadequacy of the free competition model for governing the complex processes of a modern health economy, but even its ultimate perversity. In countless ways, free trade and competition have operated and still operate to thwart the attainment of social justice in the health sector. Regulation, controls, and numerous other instruments of public policy have been necessary to overcome or neutralize the harmful social consequences of unbridled competition. These "interventions" have been gradually replacing free competition with a strategy that may be epitomized in the phrase "systematic social planning."

It is relevant to recall the origins of the concept of free trade and the theoretical rationale of competition as its regulatory mechanism. After this, some of the major consequences of this mechanism in the health sector can be better understood.

ORIGINS OF FREE TRADE AND COMPETITION

Theoretical formulation of the principles of free enterprise—with competition, its regulator—as the best path to a just and efficient social order, we all know, came from a Scottish economist, Adam Smith. His classic *Inquiry Into the Nature and Causes of the Wealth of Nations* was published in 1776, the same year, interestingly, that another kind of freedom was formulated by American revolutionaries in their *Declaration of Independence*. In light of the restrictions of free trade and various other vestiges of feudalism, one can well appreciate how principles of *laissez-faire* economics and unfettered competition were a great step forward at the time.

In spite of his eloquent call for a free market, Adam Smith recognized the need, even in the 18th century, for a certain amount of government regulation. He saw this as necessary to prevent monopolies, and he accepted tariffs (trade barriers) as justified to protect young industries in a nation. This was *before* the Industrial Revolution was far along, with its urban slums, sweat shops, 12-14 hour workdays, and child labor. As against monarchistic and feudal despotism, economic and political freedom seemed a far preferable general policy.

Adam Smith's 1776 model was also formulated before the great flowering of science in the 19th century. The monarchy and the church were being rejected as the guides to truth and justice, but science had not yet acquired the stature to replace them. Electricity, bacteriology, and other instruments to achieve control over nature for the sake of human welfare were to come later. Likewise, rational or scientific social planning, by which societies could be effectively controlled for the sake of human welfare, were also to come later. Labor laws, public health legislation, and social security were products of the 19th century (3).

Thus, the notion of letting each individual be free to pursue his own self-interest seemed a sounder path to social justice than royal or religious dogma. Unreasonable or improper outcomes of this freedom would be averted, or at least minimized, by the "invisible hand" of competition in a free market. The scientific method had not yet won recognition as a better strategy. It has been the development of science, and its application both to nature and to society, that makes possible the replacement of competition by systematic social planning, particularly to meet essential needs such as health care.

Before reporting some of the health consequences of free enterprise and competition in the last two centuries or so, the relationship between free trade (*laissez-faire*) and competitive market dynamics should be clarified. These considerations are, of course, not limited to the health sector.

FREE TRADE MARKET STRUCTURES

Free trade is the umbrella concept encompassing many types of market mechanisms which may arise as each individual pursues his own self-interest, unrestrained by regulation from any source, such as the state. A competitive market is one structure

which, under certain circumstances, may emerge in a *laissez-faire* environment. Other economic structures may also emerge, as often occurs in the health sector.

Thus, as schematized in Figure 1, at least four market structures may evolve under free trade capitalism. *Monopoly* or oligopoly can result if one or a few of the competing producers beat out the others in the competitive struggle. As noted later, this often occurs in the health sector when technology can yield huge economies of scale, so that many atomized producers cannot remain viable. A second possible outcome is long-term *contractual arrangements*, as when producers and consumers decide to handle their transactions through a "health maintenance organization." The third and fourth outcomes in Figure 1 require elaboration.

The process of competition under free trade may also yield a more complex dynamics. Before reaching an outcome of competitive equilibrium, the market typically passes through a stage we describe as *turbulent competitive disequilibrium*. In this stage, consumers are shopping around (usually with very limited information) and providers are offering diverse sorts and qualities of product at various prices. The idealized description of the free market assumes this period of disequilibrium to be transient, leading rapidly to *competitive equilibrium*, in which the faulty products are eliminated from the market. Due, however, to the nature of the doctor-patient relationship, seriously inadequate consumer information, and other features of the health sector discussed below, the period of turbulent competitive disequilibrium is typically protracted. Competitive equilibrium is probably the rarest outcome of free trade dynamics in the health sector. But even if such an equilibrium is attained, it may be inefficient, as well as inequitable, in the allocation of health resources (hence the representation in Figure 1 of two types of competitive equilibrium).

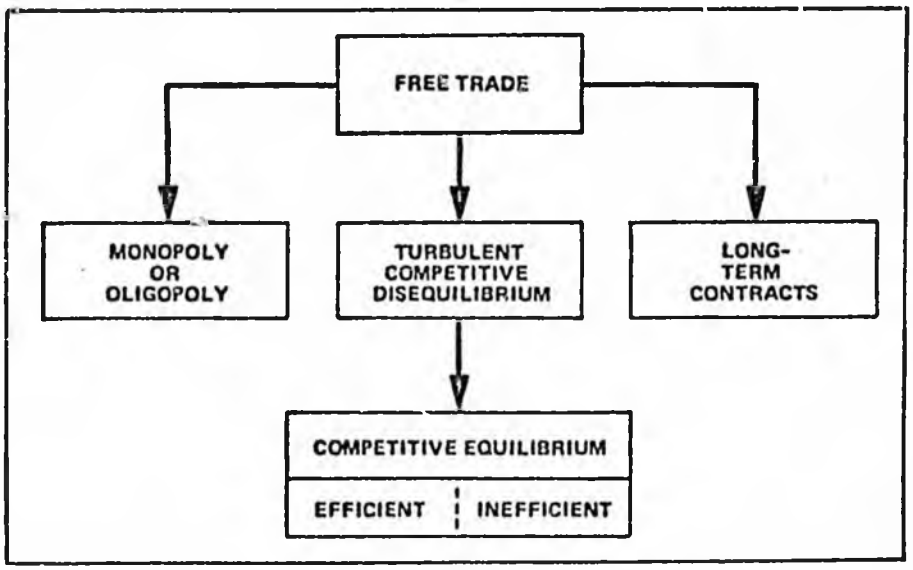

Figure 1. Free trade dynamics: some alternative outcomes.

The frequent outcomes of monopoly/oligopoly or turbulent competitive disequilibrium, unless averted by regulation, may be very deleterious to consumers. Occasionally the outcome of a free market is a long-term contract, which can be beneficial for consumers (although, as we shall see, even such contracts may require substantial regulation to protect consumers). In a sense, systematic social planning aims to extend this contracting phenomenon to a universal one, under specified conditions.

To understand why the invisible hand of Adam Smith's free trade seldom leads to a balanced market structure, with its famous property for efficient allocation of resources, one may identify at least five necessary conditions for achievement of that outcome (4):

1. *Many buyers and sellers freely interacting.* If there are few sellers, as often characterizes the health sector, competition can barely operate.
2. *No substantial economies of scale.* If such economies are possible, a competitive solution is not efficient. It is often more efficient to have one large producer (a "natural monopoly") than many small ones. Price and quality, however, must then be regulated to protect consumers, in place of competition.
3. *Low transaction costs.* If arranging the purchase of a commodity or service is, itself, a complex transaction, then the use of the market can be very costly and inefficient. The commonest solution in industry is the firm, which avoids these costs by internal planning and authority. The hospital is an obvious analogue.
4. *Adequate information.* If buyers are to exercise reasonable choices in a market of competing sellers, they must have knowledge about the product being sold. Advertising is intended theoretically to enlighten consumers on the merits of various competing products (although it has been found necessary to regulate to reduce biased or misleading information). Without clear and reliable information, how can "consumer sovereignty" be exercised to lead to selections of the "best" product?
5. *Absence of externalities.* A transaction entails "externalities" if people beyond the buyer and seller are directly affected by it. (With significant externalities, even pure competitive markets are seldom efficient.) Immunization is an obvious example; if one person is not immunized, many others may be harmed. Even if all the other conditions necessary for a competitive equilibrium hold, with significant externalities it will not be efficient.

These five conditions are not the only ones necessary for static efficiency of a competitive market, but they are sufficient to show the inapplicability of the concept to the health sector. On the other hand, free competition is often heralded for its *dynamic* efficiency, in leading to technological innovation. Adam Smith's invisible hand, some argue, is more important in this dynamic sense—that is, competition as the mother of invention, the stimulus to technological innovations and advances. However valid this may have been in the past, how true is it today? By far, the lion's share of scientific research is funded by government and philanthropy, not by competing entrepreneurs. In 1978, private industry supported 28 percent of the cost of health-related research, compared to 72 percent from government and philanthropy (5). The contribution to *basic* scientific knowledge from entrepreneurial research is doubtless smaller than 28 percent.

Before proceeding to empirical facts on free competition in the health sector, another word is necessary on the process schematized in Figure 1. By what mechanism does laissez-faire dynamics lead to competitive market equilibrium? In theory, with many buyers and sellers, those with a poor product or too high a price lose out and disappear. Competition supposedly weeds out the inferior sellers, until only those with an optimal combination of price and quality (for the consumer) remain. No one claims any harmonious efficiency during this period of disequilibrium, but it is commonly assumed to lead rapidly to efficient competitive equilibrium.

We have noted five conditions necessary for that outcome; if any one of these is absent, an efficient market equilibrium will not be reached. Instead, the injurious instability will persist, monopoly will emerge, a long-term contract may result, or an inefficient equilibrium may occur which misallocates health resources (each with its own persistent problems, as discussed below). Even if an efficient competitive equilibrium is attained, social equity still cannot be assured.

What, in fact, are the workings of free trade and competition in the medical market? To what extent do the operations of the market result either in the long run or the short run, in "quality control, price-setting, and resource allocation" that is "desirable" or optimal for achieving the best results for the individual and for society? What is the empirical evidence on the consequences of the free trade and competition model in the health sector?

The harmful effects of a social or socioeconomic idea can be reflected in two ways: first, by identification of actions taken by society to reduce those effects, and second, by recognition of problems that persist and have not yet been fully corrected. Below we offer evidence of the first type: adjustments found necessary to compensate for the ill effects of the free market over the past century.

ADJUSTMENTS FOR THE ILL EFFECTS OF FREE TRADE AND COMPETITION

One might offer scores of examples of social programs launched to intervene in the free market, insofar as its normal operations have yielded significant social problems. Many of these problems are perceived as failures to achieve social justice, or more specifically equitable response to the personal health needs of people. Some of the problems, as we will see, relate to economic waste; still others involve explicit harm to people.

Exposition of these social adjustments may be offered in accordance with the five conditions necessary for the effective operation of a free competitive market, as explained earlier.

The Need for Many Buyers and Sellers Freely Interacting

The ordinary medical care process is hardly conducive to comparative shopping by patients among many sellers of medical care. An essential requirement for effective doctor-patient relationships is long-term continuity in the linkage of the patient with a particular doctor; the very act of consulting another physician jeopardizes this relationship. Yet the initial choice of a doctor is often based on happenstances such as geographic location or a chance recommendation.

Little has been done deliberately to assure free interaction of many buyers and sellers of primary health care. An unplanned or spontaneous social adjustment, however, has been the great expansion of hospital "emergency" services, in response to the difficulties of patient access to ordinary primary care (6). In effect, the spiraling utilization of hospital emergency departments for non-urgent primary care has been an adjustment to the lack of adequate numbers of primary care doctors in American communities.

Perhaps a more deliberate adjustment to the sparsity of sellers of primary medical care has been the U.S. movement of the 1960s and 1970s to train substitutes for the general practitioner, in the form of physician assistants and nurse practitioners. It is noteworthy that other affluent nations with adequate supplies of generalists have not employed such a strategy (7). Many types of federally subsidized community health centers in poverty areas have been another American adjustment.

With respect to secondary care, specifically surgical operations, intervention to permit comparisons between sellers has been deliberate. Health insurance plans have introduced procedures for "second surgical opinions"—not to determine the lowest price bid, but to permit the patient to decide whether the surgery is truly necessary in the first place (8). Yet even this process has been opposed by medical societies as "interference in the doctor-patient relationship."

No Substantial Economies of Scale

The social adjustments induced by the clear existence of economies of scale and the associated "natural monopolies" have been numerous.

After discovery of the Salk vaccine against poliomyelitis, the restricted licensing of a few large pharmaceutical firms to produce the vaccine was done in obvious recognition of the economies, as well as quality controls, in such restriction of competition. The same policy is pursued with respect to production of all vaccines in many capitalist countries, not to mention the socialist countries.

In organized health care settings, the irrationality of the competitive free market model has long been evident. Hospitals, for example, continue to make exclusive contracts with radiologists and pathologists, even though this bars competition in these specialties (9). Without such contracts, hospital care would be less efficient and even more expensive than it is. The same basic concept of structured "closed staff" hospitals has been found to promote efficiency and quality for *all* specialty services in general hospitals throughout most of the industrialized world (capitalist and socialist) (10).

In normal comprehensive health planning, the implementation of "certificate of need" legislation to authorize new hospital construction is an obvious recognition of the value of restricting competition due to the benefits of natural monopoly (11). Quite aside from the wastefulness of superfluous hospital beds generating unjustified utilization (see below), multiple small facilities in a community are more costly and less effective than a larger integrated facility. Similar policies govern the authorization of new pharmacies in an area, even in an entrepreneurial nation like Belgium (12).

Low Transaction Costs

The bewildering complexities of the medical care system have induced all sorts of adjustments to the high costs of the whole transaction process.

Group medical practice is one such adjustment (13). Over the last 40 years it has grown rapidly, as an adjustment to the complexities caused for the patient by specialization in medicine, and in spite of its reduction of competition. Thus, a reduced choice of specialists is traded off for the benefits of professional teamwork and greater convenience for the patient. The elaborate integrated mechanism of the general hospital is also, of course, an adjustment to the economic and logistical monstrosity that would result if each of the hospital's hundreds of services were to be sold as a separate market transaction.

The operations of virtually all programs of organized health care delivery are further demonstrations of the high cost and inefficiencies of multiple separate transactions. This may be illustrated by governmental health programs from the magnitude of the Veterans Administration 175-hospital network down to a Health Department prenatal clinic in one small town.

Consider the transaction costs involved in the rehabilitation of a patient with a serious disability. His needs for physician services, drugs, hospitalization, physical and occupational therapy, perhaps prosthetic appliances, occupational retraining, job placement, and much more are bewildering. The process is so complex that highly directive vocational rehabilitation programs have had to be organized in all states, under which "vocational rehabilitation counsellors" cut through the complexities and make decisions for the patient, rejecting the competitive process with its high transaction costs.

Adequate Information

The deficiencies of information available to the consumer are perhaps the most widespread obstacles to the efficient operation of a free health care market. A catalog of all the social adjustments stimulated to cope with this problem would be very lengthy, indeed, and only a few can be cited.

Free competition gave rise to countless numbers and types of unqualified practitioners, particularly with the growth of cities in 19th-century Europe and America. How could the average consumer be expected to distinguish the knowledgeable physician from the imposter? Licensure in medicine (and later other professions) was the solution adopted throughout the world, even though it clearly reduced competition (14). Such restriction of the free market was preferable to the tragic consequences of treatment by charlatans.

But even licensure has been an imperfect solution in the United States, as state legislatures, clinging to free market concepts, have licensed chiropractors in almost every state; this is not merely to treat vertebral disorders (for which there may be limited justification), but to handle every type of disease (15). Moreover, medical licensure laws have been widely misused, to protect the "competitive position" of existing practitioners rather than to safeguard consumers. Yet no state has been willing to risk the disasters that might follow from revoking licensure legislation. Instead, licensure boards are being reconstituted to include consumers as spokesmen for the public interest (16).

Some have looked upon professional licensure and similar forms of regulation as a strategy for prohibiting innovation that might be sound. They point to the long history of opposition to new ideas by orthodox medicine—opposition to smallpox

vaccination, to the infectious cause of "childbed fever," and even to the pasteurization of milk (17). The negative American attitudes today about the use of trained midwives for normal obstetrical deliveries or of New Zealand-type "dental nurses" for the care of children are put in the same class. But the latter types of health personnel are, in fact, productively used in dozens of countries. Their non-acceptance in the United States is not caused by regulation but by the political effectiveness of the medical and dental professions in suppressing competition. When and if public pressures are mounted to change the licensure laws, these reasonable types of health personnel will be licensed in the United States, as they are elsewhere.

The countless tragedies from misinformation—often deliberately false claims—about drugs make a long and distressing saga. In the United States at the end of the 19th century, the unfettered free market was particularly adventurist; among other things, drugs were manufactured, labelled, and sold with complete abandon. The result was enormous deception of people by grossly false claims on packaged medications, with resultant waste of millions of dollars and doubtless thousands of lives. In response, the U.S. Congress passed the first Food and Drug Control Act in 1906, greatly restricting the free market in drug production and sales. It took additional tragedies in 1939 (scores of infant deaths from a lethal "elixir" of sulfanilamide) and in 1962 (hundreds of limbless babies born to mothers taking "thalidomide") to bring further tightening of drug control legislation against the abuses of competitive free enterprise in the U.S. pharmaceutical industry (18).

The workings of hospitals have long been far too complex to be evaluated by the average patient, even by the average community physician. Many facilities lacked proper laboratories, surgical equipment, or nursing staffs, but how was the outsider to know? In response, non-governmental action was taken first in 1919; this evolved into the Joint Commission on Accreditation of Hospitals in 1952 (19). Thus, information about hospitals is provided to potential users (or buyers of hospital service) through an emblem of approval, in spite of this indirect interference with free competition for the patient's patronage. Even so, an emblem of quality may not protect the consumer, since the hospital is ordinarily chosen not by him but by the doctor—who may (and often does) have his own reasons for selecting a non-accredited facility.

Absence of Externalities

In the health sector, externalities abound with particular force. Each person's health status affects the health and welfare of everyone else. As a practical matter, therefore, nations at all stages of capitalist development have taken actions to assure the distribution of health care quite outside the mechanism of a free competitive market. One may not always appreciate the abandonment of *laissez-faire* dynamics that these actions constitute.

The rise of insurance for health care—first voluntary, later mandatory—was an early response to recognition of the societal importance of assured medical care at times of need. In the 19th century, as medical care became a market commodity (available only from charitable sources for the very poor and destitute), mutual insurance societies grew up in Europe to pay doctor bills for low-wage workers. Eventually in the 1880s, Germany enacted a law mandating "sickness insurance" for low-wage workers, and launching the concept of social security. Both the private and public forms of health

care insurance spread to many other countries (20). Not until 1965 did the United States enact any social insurance for general medical care, limiting it to the aged. Mandatory or social insurance constitutes a major adjustment to the problems of the free market ideology (21). To a lesser extent, the same is true of voluntary health insurance. By spreading sickness risks over many people and over periods of time, the constraints of price on individual demand, when sickness strikes, are greatly reduced; the degree, of course, depends on the nature of copayments, deductibles, and other "cost-sharing" requirements that may be imposed (22). Prevention of insurance "abuse" by either patient or doctor—the so-called "moral hazard" of insurance—engenders all sorts of surveillance and policing in any insurance program. With all their weaknesses and faults, which are many, both voluntary health insurance and Medicare for the aged mollify the worst effects of the classical market mechanism in the distribution of medical care (albeit through introduction of another market for insurance).

To provide medical care for the poor—for those without even the low but stable incomes adequate for insurance—other adjustments have long been made. General revenue support of the U.S. Medicaid program is only the latest in a long saga of social measures to finance needed medical care that poor people were unable to purchase in the free market (23). Parliamentary governments could ignore the brutalities of a market price for all care of the sick only at the risk of deaths in the street, mass rebellion, and social revolution. Compromising the free medical market, with tax-supported health care for the poor, was a much more prudent solution taken throughout the world, if only to maintain social order. The introduction of social security under Bismarck was not designed to extend democratic rights and liberties, but rather to weaken the rising socialist movement among European workers (24).

The entire field of preventive medicine and public health has developed out of recognition of the crucial "externality" that each person's health care affects the well-being of all others. This has long been obvious for immunizations and other measures of communicable disease control; compulsory vaccinations, isolation, and quarantine have been implemented for centuries. Although less obvious, the same principle applies to health education on behavior to reduce the risk of chronic noncommunicable disease. We need not fall into the trap of blaming the victim for his "life style" in recognizing the importance of social measures (e.g. bans on cigarette advertising) to discourage harmful habits (25). Such social measures must operate not only outside the arena of free trade, but even as a frontal assault upon it.

These specific adjustments to the ill effects of a free market in the health sector may constitute enough empirical evidence of its grave inadequacies as a means for reasonable allocation of resources in society. All five of the conditions necessary for the market to serve as an efficient distributive mechanism are seriously lacking.

But the ill effects of free trade and competition in the health sector are shown in other ways. Returning to the process modeled in Figure 1, one must recognize the development of monopoly/oligopoly on the one hand, and semi-market contractual arrangements on the other—channels of development that do not even lead theoretically to competitive market equilibrium.

OTHER OUTCOMES OF FREE TRADE IN HEALTH CARE

The obstructive and anti-social rise of monopoly in the health sector has occurred again and again. Actions taken in response to this problem have led, in turn, to injurious secondary effects.

The U.S. pharmaceutical industry has engaged repeatedly in collusive price-fixing in restraint of trade. Convictions, such as that achieved for pegging the price of antibiotics to yield superprofits to several major firms after World War II, were widely publicized (26). But such exposure of monopolistic practices is probably only the iceberg seen above the water. Is it not significant that the U.S. pharmaceutical industry has long had the highest rate of profit of any type of enterprise (27)—higher than the steel industry or the manufacture of computers?

Medical societies have long used "ethics" as a constraint against development of innovative patterns of medical care delivery. Their strategy has been essentially monopolistic. Agreements among producers to stifle innovation sabotaged the ability of competition to regulate the whole free enterprise system.

There were other more subtle ways, however, that private physicans could block the development of competitive new patterns of health care delivery, designed to give consumers a better deal. Consumer cooperatives getting their medical care through group practice clinics constituted one such pattern; doctors in these clinics could be barred from admitting their patients to community hospitals, dominated by private solo practitioners. Exactly such a tactic was used by the Medical Society of the District of Columbia, along with the American Medical Association, in an attempt to destroy the Group Health Association of Washington, D.C., in the 1930s. It took legal action in the courts to stop this assault on competition from new health care ideas, resulting in the 1943 conviction of the AMA for "criminal conspiracy in restraint of trade." (28) In spite of this watershed decision, medical societies continue to apply social ostracism and other subtle strategies against physicians who would deviate from the status quo of private fee-for-service medical practice.

The development of long-term contractual arrangements under free trade in the health sector has taken several forms. While constituting partial departures from conventional market arrangements, each of these mechanisms has generated secondary problems, which in turn require regulatory controls.

Recognition of broadly accessible health care as sound social policy led to the rise of health insurance—first voluntary and then mandatory—as discussed earlier. Insurance overcame the obstacles to accessibility erected by market prices for medical care; but, in the absence of regulation, it generated much unnecessary service to enhance the earnings of doctors and hospitals.

In reaction to this abuse—that is, a serious flaw in the very mechanism (health insurance) designed to adjust for the inequities caused by the free market—numerous corrective adjustments have become necessary. In most countries official fee-schedules for medical services have been established, freezing price competition, and in the U.S. Medicare program various constraints have been put on the determination of "reasonable, customary, and prevailing" doctor fees. Under 1972 law, PSROs (professional standards review organizations) were set up throughout the nation to monitor the propriety of all services in hospitals financed by both Medicare and Medicaid (29).

It has also been found necessary to establish a federal Office of Fraud and Abuse, to cope with professional misconduct. Thus, socially planned insurance, organized to assure accessibility to health care, generates secondary problems, unless the economic freedom of vendors is regulated.

Health maintenance organizations (HMOs) are the most recent striking expression of a diversion to long-term contractual arrangements, in response to free market problems. The HMO is basically a strategy for complete removal from the orbit of the market of a population of patients and health care providers. Buyers and sellers make an agreement, a fixed-price contract, for future delivery (usually for one year) of needed medical care. This mechanism has been found to be so effective in controlling the cost escalations of the free medical market, that in 1973 federal legislation was enacted to promote it (30). The growth of HMOs has been slower than some had hoped; the reasons are many, but a major one is doubtless the opposition of private medical entrepreneurs precisely because the HMO constitutes such a departure from free market dynamics. It greatly modifies the profit incentives to maximize sales. Moreover, the HMO is regarded as an incursion on physician freedom and a first step in a broader assault on the medical market.

At the same time, HMOs have not been an unmixed blessing; they have given rise to new forms of abuse. In the early 1970s, to reduce medical care expenditures for the poor, California and certain other states actively encouraged the establishment of HMOs for Medicaid-eligibles. But these "prepaid health plans" (PHPs) were allowed to operate without any official standards; as a result dozens of unscrupulous organizations were formed, giving seriously deficient services (31). With fixed monthly payments from the state government assured, the PHPs gave grossly inadequate ambulatory as well as hospital care; an indigent patient would have to be at death's door before he was admitted to a hospital. It took widely publicized evidence of scandalous medical neglect or fiscal abuses to lead to new state regulation of these Medicaid HMOs. Only after this corrective action were the corrupt HMOs eliminated (32).

Others have spoken glowingly of the HMO as the crucial strategy for achieving the benefits of free competition in the U.S. health care system (33). The fundamental merit of the HMO concept is, in fact, its modification of the usual profit motive of maximizing the sale of medical services, toward an opposite motive of minimizing services—presumably through "maintenance of health." But the dynamic is far more complicated than this, and the potential for abuse is enormous, as shown in the California experience.

The allegedly effective competition among several HMOs in one midwest metropolitan area has been widely acclaimed (34). Its replication elsewhere or, indeed, its continued integrity in Minneapolis may be reasonably expected only if cautious state regulation and painstaking consumer education prevent the abuses experienced in California in the 1970s. (It is relevant that Minnesota's current statutory regulation of HMOs is especially rigorous.) Regulatory safeguards would be needed against still other potential abuses in "selection of risks" or "preferential pricing," which have long caused inequities in the commercial insurance industry (35). Whether the burden of public regulation necessary to assure equity and efficiency—under a system of HMOs competing with each other and also with other health insurance programs—would be less than under a wholly planned health care system, is very doubtful.

UNSOLVED PROBLEMS OF THE FREE MARKET

Beyond all the evidence of free market failure, reflected by the many adjustments stimulated in response, there are a host of persistent problems on which little action has been taken or the attempted corrections have been ineffective. Only some of the most prominent of these unsolved problems need be briefly noted:

High and endlessly rising costs of medical care are probably the most prominent unsolved problem in the whole contemporary health sector (36). Several of the adjustments just reviewed have been directed to cost controls, but expenditures continue to mount. Some traditional economists argue that the regulatory constraints on competition are the *cause* of cost escalations–as though the many inherent obstacles to a free competitive market in health services, reviewed above, did not exist. The numerous imperfections of the competitive process in the health sector have not been sufficiently corrected by regulation, on the one hand, nor replaced by systematic planning, on the other. Prospective global budgeting of hospital operation, for example (not to be confused with prospective *per diem* reimbursement), is not implementable in the current pluralistic American health economy. It is these realities of halfway regulation, combined with halfway competition, that yield inflation of health care costs.

While professional licensure has eliminated the worst chicanery from the medical care market, it has not gone far enough. Disciplinary actions taken against even grossly incompetent doctors are notoriously weak. The beginnings of mandatory continuing education, enforced by requirements for periodic relicensure of pharmacists, physicians, nurses, and others in a few states, point up the need for great extension of such policies (37).

Excessive medical, and particularly surgical, specialization in America has led to many difficulties, most prominently a serious shortage of primary care doctors. Under the Health Professions Educational Assistance Act of 1976, training grants have been designed to favor residencies in primary fields of medicine. Much more is needed, however, to assure the appropriate access of everyone to a continuing and reliable source of primary health care (38).

Geographic maldistribution of physicians and other health personnel–causing serious handicaps for rural populations–is a problem plaguing the health care system of every capitalist nation. While many factors account for this problem, the operation of the free market is important among them; most rural people are relatively poor and lack the purchasing power for proper medical care. Many countries have coped with this by scrapping market mechanisms, and requiring a period of rural service from all new medical graduates. Norway has its highly developed "district doctor" system, and the United States has its modest "National Health Service Corps." (39) Far more powerful measures are needed, if this major inequity of the free medical market is to be corrected.

Permeating the American free market in health services is the paradoxical problem of "supply creating demand"–fundamentally because the seller (doctor) rather than the buyer (patient) makes most of the decisions on the health services to be obtained and paid for (40). The problem has been most conspicuous with respect to hospitalization and its spiraling costs, and yet one wonders why it took until the late 1950s to recognize the dynamics.

As the rise of U.S. hospital costs accelerated in the 1950s, attention became focused on possible "overutilization." It was charged that, because insurance had eliminated the constraints of price, patients were "abusing" it and consuming more hospital days than needed. One would have thought patients could check into a hospital, as into a hotel. Studies at Cornell's Institute of Hospital Administration, however, showed that—with almost any ratio of hospital beds in a community, high or low—doctors managed to keep those beds filled at about the same occupancy level (41). As a result, New York State enacted in 1964 the first "certificate of need" law to control hospital bed supply. Soon many other states did the same, and federal law in 1974 made such regulation virtually nationwide (11). What a strange commentary on the operations of the free market model of supply, demand, competition, and price! Excess supply did not bring down the price, but caused greater overall expenditures.

Indeed, excess hospital beds have resulted not only in higher rates of patient-day utilization, but even higher costs per day, as competing hospitals acquire superfluous technology in order to attract doctors. How can more CT (computerized tomography) scanners be justified in Los Angeles County (some 65 units for a population of 7,000,000) than in all of Great Britain (population of 55,000,000) where the machine was invented? (42). The low point in hospital enticements to doctors may have been reached in May 1980, when evidence was disclosed that a supposedly prestigious institution, with low bed occupancy, was operating a "call girl service" for doctors, to induce them to admit patients (43). Legal prosecution, of course, was necessary. With respect to CT scanners or excess hospital beds, planning agency decisions—hardly distinguishable from regulation—are necessary to control the extravagances of the free market in hospital care. Not many states, however, have been as forthright as Michigan, in passing legislation to deliberately reduce excess hospital capacity (44).

Evidence that supply creates demand has now accumulated for every component of the health care industry, not only for the use of hospital beds (45). Surgeons create "demand" for surgical operations, the benefits of which are far from established (46). In Canada, the in-migration of foreign medical graduates was stopped a few years ago when it was learned that each new physician meant an expenditure of some $300,000 —about 40 percent for his own gross income and 60 percent for the hospital and other secondary services that he generated. Similarly, a steady increase in the U.S. doctor-population ratio has led not to any decline in prices, but to a rise in aggregate expenditures.

Partial or half-way planning leaves many problems unsolved. Thus collectivized financing along with entrepreneurial delivery of service creates enormous problems in surveillance of quality and expenditures. For reasons explored earlier, insurance, taxation, and other third-party sources of finance have been mobilized everywhere to help achieve health care equity. At the same time, everyone agrees that third-party payment inevitably dulls or eliminates both the doctor's and the patient's sensitivity to price. Such social financing, nevertheless, is quite properly designed to facilitate the seeking of health service in the first place. Thus, for the lion's share of total health care costs now supported by third parties, the free market has already been largely abandoned (47). Yet, monitoring medical care fee claims under third-party financing programs is enormously difficult and seldom effective.

Within the field of health insurance, insofar as competition operates among carriers,

its effects have promoted inequity. The commercial insurance practice of "experience-rating"–decreasing premiums for the young and healthy, and increasing them for the aged and disabled–has forced the non-profit insurance plans to follow suit or lose their enrollment (48). The only solution to this perverse dynamics would be a system of universal social financing, within a framework of either enormously regulated competition or systematic social planning.

Zealous devotion to concepts of the free market and competition has led to the rejection of "ethical" bans on medical advertising (49). The importance of consumer accessibility to complete objective information is one thing; freedom of advertising is another. Even with the utmost scientific effort, evaluation of either the "process" or "outcome" of health services is extremely difficult to carry out, let alone to report lucidly. Take note of the limited impact of the U.S. Federal Trade Commission on the advertising of so-called "ethical drugs"–as revealed each month in the highly authoritative *Medical Letter on Drugs and Therapeutics*–in spite of the relatively broad powers vested in government by the Food, Drug, and Cosmetic Act. Objective information should be broadcast by government or some neutral body, not by parties obviously trying to sell their own particular products. Are we to welcome to the health care industry the skillful distortions with which advertising has glamorized cigarette smoking, liquor consumption, and other garden paths to disease and death?

Inadequate consumer information persists in plaguing a free market health care model, despite the most earnest efforts to ameliorate it through education. To the extent that a patient may have an impact on the doctor's decisions, he must be inordinately knowledgeable. Even if he or she is, it is rare for the patient to prevail over the judgment of the doctor. Not many patients are as sophisticated as Norman Cousins who, aided by a physician of exceptional humility, cured himself of an incurable disease (50). For every Mr. Cousins, there are thousands of other patients whose non-compliance with their doctor's prescription of anti-hypertensive drugs, for example, leads to fatal strokes.

The problems arising from the complexity of medical information, beyond the understanding of the vast majority of consumers, can be tragic. The choice of a faulty product (e.g. an incompetent doctor) may be prolonged disability or death. Rapid technological change creates new information requirements almost daily. If new drugs could freely enter the market each week, there could be endless human tragedy and waste as consumers tested each product. (Regulation, of course, has been necessary to bar this.) Even after a product has been purchased and consumed, how can the consumer judge its value? Health outcomes depend on many environmental, genetic, and other factors outside of medical care.

Market mechanisms may achieve reasonable distribution of some luxury goods and services, such as fancy clothing or night-club entertainment, but they cannot be expected to work soundly for health care. Regarding services accounting for 80-90 percent of health care costs, decisions in the last analysis are made by the doctor, not the patient. How can one expect *consumer* preferences to govern the flow of products in the medical market (51)?

Finally, one need only take note of the magnitude of "unfinished business" faced by the nation's 212 local health planning agencies, to recognize the enormity of health deficiencies remaining in the free market of health care. It has not been excessive regulation, but the consequences of the free market that led to establishment of Health Systems Agencies as mechanisms to cope with excess general hospital beds,

health care cost-containment, emergency medical services, environmental health protection, perinatal intensive care, and rehabilitation services—to name only some of the problems recently identified in the planning of one local HSA (52).

Health planning (national and local) constitutes, after all, a series of interventions in the free market of health care, designed to correct its many failures.

IN CONCLUSION—SYSTEMATIC SOCIAL PLANNING OF THE HEALTH SECTOR

We trust this is enough of a recitation of the failures, distortions, wastages, and human inequities of the free market in health care to clarify our reasons for rejecting it, and preferring a strategy of *systematic social planning.* The failures of a free market in health care to achieve effective allocation of resources for meeting the needs of populations have been gigantic. Some entrepreneurial voices even reject as "naive" the very concept of *needs*, and wish only to consider "effective demand" in a market. Yet, the market has not been completely abandoned in capitalist nations, only because countless corrective measures have kept patching it up.

Entitlement to health care, unlike most other goods and services, has come to be recognized throughout the world as a "universal human right." (53) The rationale is both humane and pragmatic. To implement its distribution, one cannot be satisfied with a free market mechanism that treats health care fundamentally as a commodity to be produced for profit and sold. A pig trough philosophy of access has been rejected. The incompatibilities between these two concepts of health care—as a commodity for sale versus a basic right—are overwhelming.

In broad terms, an agenda for a systematically planned health care system is not difficult to summarize: (a) universal population coverage; (b) comprehensive services, based solely on need; (c) emphasis on prevention through integration with treatment; (d) health personnel trained at public expense to serve in coordinated teams; (e) health facilities public and regionalized; (f) quality regulated through built-in organizational structure (rather than external surveillance); and (g) fully collectivized financing (54). In a word, a planned social system would replace the vagaries of the competitive medical market. Consumer choice would not disappear (e.g. for Doctor A rather than Doctor B), but it would be constrained by conditions under which one person's choice does not thwart reasonable response to another person's need.

The way of science, which matured only after the days of Adam Smith, has far more effective strategies to offer, both along the biological and the social dimensions of health care. Health services can be effectively distributed not by the tools of price or non-price competition, not on the basis of personal affluence, geographical location, social position, educational sophistication, or any other of the features on which free market dynamics depend. The production and distribution of health services can be based on their scientifically demonstrated value and on the differential needs of each human being (55).

The strategies required to construct a soundly planned health care system are not simple, nor free from the possibilities of error. Each of the above seven attributes of such a system requires vast information and sophisticated judgment in the arena of

both economics and politics. If one prefers an option of modifying the free market, however, the requirements for regulatory intervention are no less—if efficiency and social justice are to be attained. Programs of this sort, formulated by Alain Enthoven (33) and others, would require elaborate administration and constant regulation. These complex issues and options must be discussed, but the issue before us is the past and present medical markets. We believe it can be demonstrated that deliberate and systematic social planning of the health services can be more effective, less subject to the evils of corruption and inequity, than the most judiciously regulated model of the free competitive market. The lessons of history on the perverse social consequences of the pursuit of individual self-interest in the health sector are abundant. The human and social benefits of rational scientific health planning are demonstrable throughout the modern world.

In this paper, we have addressed the ascending wave of opinion in the United States that current difficulties in the health sector arise from "too much" regulation, and that the path to efficiency and justice lies in uninhibited competition and free trade. An objective assessment of past experience, we believe, points to a path in exactly the opposite direction.

Dear Mr. Palmer:

Enclosed, per your request, are several publications on the topic of certificate of need. These include:

- A Study of Intermediate Outcomes of the CON Review Process - a final report by the Arthud D. Little Co.
- "Certificate-of-Need - No Panacea but Not Without Merit" by William H. Rosenberg
- "The Social Consequences of Free Trade in Health Care: A Public Response to Orthodox Economics" by Milton I. Roemer and John E. Roemer
- Regulating Hospital Capital Investment: The Experience in Massachusetts - an NCHSR publication

Our library and files contain many other materials and reports which you are welcome to review at your convenience.

When I receive a final copy of the "Briefing Paper on Certificate of Need" which is being prepared by the ALPHA Center, I will be happy to send you a copy.

Please let me know if we can be of further assistance.

Sincerely,

Phoebe A Lindsey

National Center for Health Services Research
Research Summary Series

The *Research Summary Series* is published by the National Center for Health Services Research (NCHSR) to provide rapid access to significant results of NCHSR-supported research projects. The series presents executive summaries prepared by the investigators at the completion of projects. Specific findings are highlighted in a more concise form than in the final report. The *Research Summary Series* is intended for health services administrators, planners, and other research users who require recent findings relevant to immediate problems in health services.

Abstract

This study examines hospital capital investment among Massachusetts short-term general voluntary hospitals between 1967 and 1976, and assesses the impact of Certificate of Need (CON) regulation. A profile of capital expenditures for fiscal years 1967-1976 was developed from Massachusetts Rate Setting Commission data for 26 sample hospitals, stratified by teaching status and Boston versus non-Boston location. Case studies were conducted in nine sample hospitals to explore the determinants and consequences of major capital projects undertaken by the institution. Enormous capital expansion took place from 1967-76. Hospitals in areas of rapid population growth significantly increased their bed size; other hospitals replaced or modernized inpatient facilities, and expanded ambulatory care capacity. All hospitals significantly expanded their ancillary service capacity. With respect to the impact of CON regulation, the evidence revealed that by 1976 and beyond, CON review had reduced all dimensions of project scale and cost by as much as two-thirds of [illegible] proposed

This *NCHSR Research Summary* was written by Julianne R. Howell, Ph.D., Assistant Professor, Department of Community Medicine, University of California, San Diego, School of Medicine, La Jolla, California. The project was supported by the National Center for Health Services Research through grant HS 02862. The full report is for sale to the public by the National Technical Information Service, Springfield, VA 22161 (703/487-4650), order number PB 81-136551. This report is also available from University Microfilm, 300 North Zeet Road, Ann Arbor, MI 48106, order number 80-23791.

NCHSR publications are available on request from NCHSR Publications and Information Branch, Room 7-44, 3700 East-West Highway, Hyattsville, MD 20782 (301/436-8970). Current NCHSR publications are listed in the back of this publication.

The views expressed in this publication are those of the author, and no official endorsement by the National Center for Health Services Research is intended or should be inferred.

Broadly speaking, certificate of need laws are grounded on the assumption that a primary reason for spiralling health care costs lies in the existence of duplicative and inappropriate facilities and services. To avoid perpetuating this problem, it is necessary to curtail the construction of new facilities and the provision of new services unless they can be shown to be needed. The rationale for certificate of need is compelling. However, there are many who doubt that the substitution of a regulatory mechanism for an admittedly imperfect market mechanism will improve the situation. On the other hand, it is the failure of the market system, embodied in the so-called "Roemer effect" which posits that the existence of hospital beds creates a demand for them, that certificate of need programs are designed to correct. How well these programs work is still an open question.

This report presents a summary of Ph.D. dissertation research supported by the National Center for Health Services Research. The study examines in detail hospital capital investment undertaken by Massachusetts short term general hospitals between 1967 and 1976. Patterns of capital expansion are compared for teaching versus nonteaching, and for Boston versus nonBoston hospitals, and special emphasis is placed upon assessing the impact of certificate of need legislation. It is hoped that this report will contribute to our understanding of the regulatory process and the reactions of those who are involved.

During the past decade the rapid and continuing increase in the costs of medical care has emerged as a major health policy issue at all levels of government. Leading the health care cost spiral has been the acute care hospital sector; expenditures for hospital services constitute the largest portion of total health care spending, 40 percent in recent years, account for more than half of the government share, and since the enactment of Medicare and Medicaid in 1965 have risen almost twice as fast as outlays for other categories of medical care.[1] Most efforts to curb the increase in health care costs have therefore been focused on acute care hospitals.

Analyses by several different investigators have now established that approximately half of the total increase in hospital costs since 1960 has been attributable simply to inflation – that is, to the increase in the wages and prices in the hospital sector that would have been required simply to produce the same level of service over time. The remainder of the increase, however, stems from the inexorable growth in the sophistication of labor and non-labor inputs required to produce the ever more complex services that now comprise a hospital admission or "patient day".[2,3] Capital expansion – the construction of new facilities, the addition of new beds and services, and the investment in new "equipment-embodied technology" – has long been recognized as one of the major vehicles through which the intensity of hospital care is increased. As a result, the creation of mechanisms to limit capital investment by hospitals, and particularly the enactment of Certificate of Need (CON) regulation, have received early and continuing prominence in state and federal government strategies to contain rising health care costs.[4]

Despite the importance of hospital capital expansion and of Certificate of Need, neither the factors influencing hospital capital investment nor the impacts of CON upon them have been examined in detail. Not even the actual composition and patterns of hospital capital expenditures over time have been de-

termined because the sources of readily available data are too aggregated to reveal any but the most obvious changes in total beds and total investment. Yet an understanding of the nature and determinants of hospital capital expansion is essential to the evaluation of the impacts of current regulatory mechanisms and to the design of more effective strategies to shape future investment.

This study was conducted to fill some of the gaps in current knowledge about hospital investment behavior and its response to regulation. Previous investigations either examined hospital capital expansion or attempted to evaluate the process and outcome of Certificate of Need. By contrast, this study employed a design that combined an in-depth analysis of the amount and composition of capital investment across the whole voluntary hospital industry in one state, both before and after the introduction of CON regulation, with an examination of the implementation of the CON program itself and of the changes in the nature of hospital investment resulting from the presence of CON. Study findings, therefore, offer insights into the dynamics of hospital capital expansion and the impacts of CON that previous work could not provide.

The study focused on short-term general non-government nonprofit (i.e. voluntary) hospitals in Massachusetts over the period Fiscal Years 1967-76, five years prior to the enactment of CON regulation in the Commonwealth on November 15, 1971, and five years following CON implementation, and addressed the following major sets of questions:

- Is there a basic pattern of investment followed by all hospitals or by certain categories of hospitals, such as teaching versus nonteaching institutions? In particular, how frequently does investment in beds occur and is there a relationship between investment in beds and investment in ancillary services?

- What are the incentives, opportunities, and constraints that have governed a hospital's choice of investment projects? Have these determinants varied by type of hospital and/or time period?

- How much of hospital capital expenditure falls under the aegis of CON review and what, therefore, is the potential of this mechanism to limit future capital expenditure?

- What is the lag between the introduction of CON regulation and the time that capital expenditures reviewed by CON first appear in a hospital's asset base? When, therefore, can CON impacts be appropriately examined using "ultimate" outcome

measures focused on the amount and composition of hospital investment? What measures of more "intermediate" outcomes can be used to evaluate CON performance in the interim?

- How have the Certificate of Need program, the prospective reimbursement programs of the Rate Setting Commission, and the broader planning efforts under P.L. 93-641 affected hospital investment behavior in Massachusetts? What changes in current regulatory policies and procedures might establish more binding constraints on hospital capital expansion?

[1] Standard deviation of Certificate-of-Need approved capital expenditures 1972-76 as estimated from Massachusetts Determination of Need Program Information System

Optimal Allocation Formula (with equal cost of sampling for each stratum):

$$n_h = \frac{n N_h s_h}{\sum_{l=1}^{L} N_h s_h}$$

n = total sample size
n_h = sample size in the hth stratum
N_h = population in the hth stratum
s_h = standard deviation in the hth stratum

From public information available in the files of the Commonwealth of Massachusetts Rate Setting Commission, data were collected on the annual capital expenditures over the period FY 1967-76 made by each sample hospital in total and in the following categories: land, "plant" (including building, building improvements, and fixed equipment), and major movable equipment (MME). Data on asset values at historical cost and accumulated depreciation were also collected for Fiscal Years 1966, 1971 and 1976.

For all "projects" that involved total expenditures of $100 thousand or more (current dollars), the introduction of a major new ancillary service, or the addition of 4 or more beds, information was then obtained on the specific changes in hospital facilities and services that resulted from these investments: number and types of beds added or renovated, number of square feet added or renovated, ancillary service changes, etc. Data from the Rate Setting Commission, the Massachusetts Department of Public Health, the Massachusetts Determination of Need Program (as Certificate of Need is officially known in Massachusetts), and the sample hospital itself were combined to provide the necessary

Methodology

This study was designed to combine a statistically valid quantitative examination of capital investment among Massachusetts voluntary hospitals with a more qualitative case-study investigation of the factors that shaped the amount and composition of this investment. The design was developed because the combination of quantitative and qualitative analyses could yield complementary insights into hospital capital investment and the impact of Certificate of Need upon it that neither approach alone could provide. The quantitative analyses could offer a basic profile on the amount and composition of capital expenditure over time and on variations in the pattern of investment among hospitals of different teaching status and geographic location. Against this background, case-study analysis of selected institutions and specific investment projects could then offer information on the motivations underlying a hospital's capital program, the decision-making process surrounding capital expansion, and the consequences resulting from it. The conduct of case studies could also provide an opportunity to explore perceptions of CON and its effects held by individuals involved with hospitals in a variety of different capacities.

Development of the capital expenditure profile

The 95 short-term general voluntary hospitals in Massachusetts were stratified by Boston versus non-Boston location (with "Boston" defined by the boundaries of Health Services Area 4) and by teaching status: major teaching, lesser teaching, limited teaching, and nonteaching. Nonteaching hospitals were further stratified by bed size into those with 100 or fewer beds, 101 to 200 beds, and more than 200 beds. All teaching hospitals had at least 200 beds and therefore did not have to be further classified according to total bed complement. A random sample of 26 hospitals was then selected, using the technique of optimal allocation to determine the number of institutions to be drawn from each cell (Table 1).

detail. For projects approved by the Determination of Need Program, information was also obtained on changes in design, scope, and estimated cost that resulted from the process of CON review.

Data on the amount of capital expenditures, in total and for "plant" and MME considered separately, were used to examine general differences in capital investment by teaching status, geographic location, and time period. Because hospital accounting conventions recognize a capital expenditure only at the time the asset is first put into service, a hospital's capital expenditure profile is quite "lumpy" if examined on an annual basis. Therefore, total and average annual expenditures over the "pre-CON" period of 1967-71 versus the "post-CON" period 1972-76 were analyzed instead. In order to eliminate the effects of the considerable inflation in capital costs that occurred during the study period, all expenditures were converted to constant 1967 dollars using deflators derived from two indices employed by the Rate Setting Commission (RSC) to determine price-level depreciation: the Marshall and Stevens Class B Eastern Index for plant and an index for major movable equipment developed specifically for Massachusetts hospitals by American Appraisal Company at the request of the RSC.

Within the basic "picture" of hospital capital investment established by the expenditure data, "project" data were then used to determine more specifically the nature and composition of investment. Eight project categories were defined, and particular attention was focused on exploring variations across time and hospital type for "major bed projects" (i.e. new buildings or wings constructed by hospitals that included at least 20 inpatient beds), projects devoted to ancillary services and/or ambulatory care, and projects devoted to research. These project categories proved most important in institutional development strategy over the study period for all types of hospitals examined.

Conduct of case studies

Case studies were designed to elicit information on the course of institutional development among different types of Massachusetts voluntary hospitals by using a specific capital project or group of projects completed by an institution to focus discussion. This approach was chosen to assure that the same set of decisions and outcomes would be discussed with different "actors" in a hospital and to allow interviews to probe concrete details surrounding an actual capital investment as well as more general issues of

institutional development. All but 3 of the 26 sample institutions had either completed major capital projects during the study period or had submitted applications for such projects for CON review during this time and, therefore, were considered candidates for case-study. Ultimately, 9 institutions were selected representing the range of teaching status both in Boston and the rest of Massachusetts. In each case-study hospital, extensive interviews were conducted with the director or associate director, the chief financial officer or one of his principal assistants, a senior member of the board of trustees, the current or past president of the medical staff, and either the Chief of Radiology or Chief of Pathology. Selected other members of a hospital's administration, board, and medical staff who had played particularly important roles in the institution's development and who were identified during the course of discussion with the hospital director were interviewed as well. In order to gain some insight into the development of the three sample institutions that had made only limited capital investments during the study period, the director or associate director of two of these hospitals was interviewed as well.

Extensive interviews were also conducted with various members of the staff of the Massachusetts Department of Public Health to obtain information on the structure, function, and evolution over time of the Determination of Need Program and with staff of the Rate Setting Commission to clarify details of the prospective reimbursement system the Commission is developing for Massachusetts hospitals.

Findings

Both the capital expenditure analyses and case study findings revealed that Massachusetts voluntary hospitals experienced dramatic changes in the scale and scope of their operations during the period under study. Further, an appreciation of these changes and the forces underlying them proved essential to correctly interpreting the effects of Certificate of Need regulation upon hospital expansion. Therefore, the basic patterns of investment that have been characteristic of different types of Massachusetts hospitals are first summarized before the presentation of findings on the potential and actual impacts of CON.

Capital investment among Massachusetts voluntary hospitals

The period 1967-76 was one of enormous capital expansion among voluntary hospitals in Massachusetts. Net total capital asset values per bed of total complement at least doubled for all categories of institutions. Yet, average total bed complements increased by no more than 20 percent among any type of hospital (except nonteaching institutions with less than 100 beds) and actually declined slightly among nonBoston major teaching hospitals and among limited teaching hospitals. Major teaching hospitals in Boston led all other types of institutions in total capital investment, spending on average $23 million per hospital (constant 1967 dollars), $60 thousand per bed of total complement. Lesser teaching hospitals, both in Boston and elsewhere in the Commonwealth, showed the greatest change in asset values over the study period, increasing their net total capital assets almost 400 percent through average capital expenditures per hospital of $14 million (constant 1967 dollars), $44 thousand per bed. Nonteaching hospitals, on average, spent $4 million per institution, $25 thousand per bed.

Despite this universal expansionary behavior, the pattern of capital expenditures during the "pre-Certificate of Need" period 1967-71 versus the "post-CON" period 1972-76 proved distinctly

different as a function of hospital teaching status and bed size (Table 2). Among major, lesser, and limited teaching hospitals and hospitals with greater than 200 beds in general, total capital expenditures during 1972-76 in constant 1967 dollars were, on average, almost twice those during 1967-71; among nonteaching institutions, particularly those with fewer than 200 beds located outside of Boston, these patterns were reversed and expenditures "pre-CON" exceeded those "post-CON" by at least two-fold. When expenditures for physical plant versus major movable equipment were examined separately, those for plant exhibited the same patterns across time found for total expenditures. By contrast, expenditures for major movable equipment, the category most readily identified with hospital investment in "technology", were essentially constant across time, except among lesser teaching hospitals which showed a two-fold increase during 1972-76.

These patterns in total and plant expenditures, apparently associated with the presence of CON regulation, proved instead to be a function primarily of the completion dates of "major bed projects" and the synchrony in the construction of such facilities among similar hospitals (Table 3). Thus, the higher expenditures in 1972-76 among various categories of teaching hospitals largely resulted from the fact that these hospitals completed their major bed projects in 1972 or later. The higher expenditures in the "pre-CON" era among nonteaching hospitals arose because most of these institutions completed their major bed projects during 1967-71.

Differences in the completion dates of major bed projects reflected during the study period were found to have been present throughout the years since the conclusion of World War II. On average, Massachusetts voluntary hospitals constructed new inpatient facilities once every 14 years during this time. In general, construction peaked at different times for different types of institutions, largely as a function of particular environmental influences such as the ready availability of Hill-Burton funding to community hospitals during the early 1950's and the impact on teaching hospitals of the Medicare regulations requiring the replacement of ward care with semi-private accommodations.

Among virtually all types of Massachusetts hospitals, almost half of total capital expenditures during the entire study period was devoted to major bed projects, and case studies revealed that the 25 such projects completed by sample institutions played the pivotal roles in hospital development strategy and response to

changing market conditions. For all categories of voluntary hospitals, both before and after the introduction of CON, these projects provided the opportunity to greatly expand ancillary service "capacity" necessitated by rapid technological change and growing numbers of physicians entering practice with specialty and subspecialty training. Among nonteaching hospitals, in particular, the increase in the sophistication of the institution's product that resulted from the ancillary service expansion accompanying major bed project completion in the late 1960's represented a significant change in the hospital's capability to diagnose and manage complicated medical problems. Such projects provided the opportunity to introduce intensive care units, to inaugurate high-technology ancillary services, such as radiation therapy, and to greatly expand the scope of basic ancillary services such as radiology and laboratory. As a result, the necessity for community hospitals to transfer difficult cases to teaching centers was considerably diminished and a marked change in the structure of the hospital services market occurred.

With the decrease in referrals from community hospitals, teaching centers had to turn increasingly to their surrounding neighborhoods as a source of patients and redefined their mission to include provision of the full range of medical services as well as tertiary care. The major bed projects completed by major and lesser teaching hospitals were, therefore, largely motivated by the necessity to create the commanding institutional presence and to expand the primary care services considered essential to competing successfully for patients. The implementation of Medicare and Medicaid contributed greatly to the success of these efforts by providing third-party coverage to potential patient populations that previously had lacked the financial means to seek care in the private sector. While teaching hospitals also used such projects to marginally increase total bed complement, only non-

teaching hospitals in areas of rapid population growth significantly increased their bed size during the study period. The 25 major bed projects completed by sample hospitals resulted in the construction of more than 2200 new beds, but almost two-thirds of these beds replaced existing old ones. Hence, total bed complement increased by less than 800 beds.

Because most hospitals experienced only minimal increases in their total bed complements but greatly expanded the size and value of their physical plant, their resource "intensity" per bed increased considerably. The increased intensity, however, was found both prior to and following the introduction of Certificate of Need and simply reflected that fact that by the late 1960's and beyond, the provision of "state of the art" ancillary services and ambulatory care had become as necessary a part of a hospital's basic "capacity" as the hospital bed itself. A hospital lacking such services could not fill its beds because it could attract neither the necessary medical staff nor the requisite patient population.

During the study period, all types of voluntary hospitals constructed new inpatient facilities. Major and lesser teaching hospitals in addition significantly expanded their facilities devoted exclusively to ancillary services and research as these institutions enlarged their teaching and research commitments in response to greatly increased medical school enrollments and federal support for medical education and research.

While much of hospital capital investment during the study period was motivated by the desire of hospital decisionmakers to be responsive to the increased technological sophistication of current and potential staff physicians, decisions on the timing and scope of major investments were still primarily the province of hospital administrators and trustees. Except in teaching hospitals where major chiefs of service, such as the Chief of Medicine, played particularly influential roles in shaping institutional development, staff physicians were not the primary influences determining the amount or composition of a hospital's capital investment.

During the late 1960's and early 1970's, because third-party reimbursement assumed most of both the capital and operating costs associated with such investment, hospitals were largely unconstrained in their ability to expand. Some limited constraint on the overall scale and cost of major construction, however, was imposed for most hospitals by concerns over maintaining per-diem rates roughly comparable to those of other institutions in their market. Hospitals, therefore, had to exercise some caution

in the amount of debt they assumed. By the mid-1970's, the presence of the Determination of Need Program and charge control policies of the Rate Setting Commission, coupled with more restrictive reimbursement policies introduced by Medicare, began to introduce some further constraints, though not before most hospitals in Massachusetts had at least inaugurated if not completed capital expansion on a truly massive scale.

The extent of Certificate of Need coverage

During the period 1967 - 76, on average three-fourths or more of a hospital's total capital expenditures either were or would have been subject to CON review (Table 4). Of the expenditures devoted specifically to an institution's inpatient facilities, 80 percent or more would have or did require CON approval; by contrast, only 37 percent of hospital expenditures for major movable equipment either did or would have come under the aegis of CON.

Basically, all construction of new facilities and all projects involving the introduction or modernization of high-technology

( ) = standard deviation

specialized ancillary services fell under the authority of CON. Thus, all of the investments that have served as key elements in a hospital's strategy to make major changes in institutional image and/or product are subject to regulatory control, and Certificate of Need, therefore, has at least the theoretical potential to have a considerable influence on the direction of a hospital's future development. The minor renovations to existing facilities and purchase of major movable equipment associated with hospital investment in basic ancillary services, however, for the most part fall outside of the boundaries of CON authority, and whenever possible, at least in recent years, many hospitals have "packaged" even those few investments that should have been submitted for review in ways that avoided the CON ceiling. Thus, CON regulation has not been an effective mechanism for controlling this component of hospital capital investment and other approaches have more potential for limiting the amount of routine "technological investment".

The accomplishments and limitations of Certificate of Need regulation in Massachusetts

Previous investigators have commonly used "ultimate" outcome measures, such as the change in total hospital capital investment or investment per bed, to evaluate the effects of CON.[5,6,7] The patterns of hospital investment revealed by this study suggest, however, that such measures are not appropriate at least for several years following the introduction of regulation. The majority of hospital capital expenditures are attributable to infrequent large-scale "major bed projects" that have been built in different periods by hospitals of similar size and teaching status. At least in Massachusetts, the introduction of Certificate of Need regulation coincided with the conclusion of the peak of construction among small nonteaching hospitals and the beginning of the construction peak among teaching hospitals and large hospitals in general. Hence, differences in total capital expenditures across time display a spurious association with the introduction of CON that, in fact, was not related to the presence of regulation. Further, because all projects actually under construction when CON regulation began were exempt from review and because the construction of a major new facility takes several years, less than one-[illegible] of the expenditures actually made by sample hospitals during the "post-CON" period had in fact been reviewed by the program (Table 5). During the first two years "post-CON", virtually

*Fraction of Expenditures that according to CON Regulations would be subject to review, including both expenditures that actually were reviewed and those that would have been if they had not been initiated prior to enactment of the CON statute in November, 1971.
( ) = Standard deviation

none of the capital expenditures made by hospitals had been subjected to review. By 1974 and beyond, almost all expenditures that fell under the aegis of CON had in fact been reviewed and approved by the program. Nonetheless, during the 1974 - 76 period, the great majority of the expenditures that had been reviewed were attributable to projects approved during the first year of CON operation when the program lacked the rigorous review procedures and standards that characterized the function of the "mature" Certificate of Need process in 1976 and beyond (Table 6).

For these reasons, an ultimate outcome assessment was concluded to be inappropriate during the 1972 - 76 interval for which relevant data were available. Instead, this study evaluated CON effects using two measures of "intermediate" outcome: first, changes in project scope and design that resulted from the process of review, differentiating those achieved during the Program's "early" phase 1972 - 74 versus its "mature" period post-

TABLE 6: Amount and fraction of CON-approved expenditures in millions (current dollars) made during 1974-76 attributable to projects approved during 1972, by hospital teaching status

1975, and second, changes in internal hospital investment strategy and interhospital relationships attributable to the presence of Certificate of Need.

Over the period 1972 to 76, only 9 percent of projects submitted to CON review by sample hospitals were denied certificates of need, and even many of these projects were eventually approved in modified form. However, as other investigators have also noted, a program's denial rate merely reflects the degree to which the review process permits negotiation over project details before a final decision is rendered.[8] The CON process in Massachusetts involves considerable interaction between program staff and applicant hospitals in the course of project evaluation. Consequently, despite the low project denial rate, one fourth of all projects ultimately approved by the CON program were either significantly modified as a result of CON review or were approved only with attached conditions that required some change in existing hospital operations. The projects of all types of hospitals, including those of the major teaching institutions in Boston, experienced such modifications.

Throughout its existence, the CON program devoted its most careful analysis to projects involving acute care beds. During the early years of regulation, CON review concentrated on reducing the increase in a hospital's total bed complement that would result from the construction of a major bed project. The final CON-approved form of a project virtually always either included fewer new beds than an applicant had proposed or required that existing underutilized inpatient services, such as obstetrics or pediatrics, be closed as a condition of approval for the proposed project. During this phase of CON program operation, however, projects were usually approved at the total cost proposed by the applicant hospital, and the final costs of many completed facili-

ties often exceeded even these generous budgets by several million dollars before the Rate Setting Commission in 1975 became aware of the problem and helped to institute more rigorous financial analysis and control in the CON review process.

By late 1975, the scope of CON review had been expanded beyond a consideration of the number of beds proposed to include a critical analysis of every aspect of a project. Over the next three years, the CON Program began to develop the detailed standards and criteria required to evaluate "need" for various ancillary services and ambulatory care components as well as for acute care beds and established a basis for examining many dimensions of a project's scale and cost. During this mature phase of CON analysis, the final approved form of some projects was reduced by as much as two-thirds of that originally proposed, and in several instances the process of CON review and approval was able to eliminate several million dollars in proposed expenditures. Case-study interviews revealed that hospitals had not specifically "padded" proposed projects in order to provide opportunities for cuts by the CON Program, and these reductions therefore represent true savings attributable to the presence of regulation. No group of hospitals has been immune to such careful scrutiny, and even cherished projects of influential teaching hospitals were considerably diminished in scope and cost.

During both its early and mature stages, the Certificate of Need Program in Massachusetts also achieved considerable success in preventing the duplication of high-technology specialized ancillary services. In particular, for several years CON severely restricted the diffusion of CT scanners by approving only one scanner per HSA region outside of Boston until criteria for the appropriate use of CT scanning had been established and the technological development of the necessary equipment sufficiently stabilized to limit the high cost of rapid obsolescence. The CON Program was also able to reduce already existing redundancy in services such as radiation therapy by denying applications for new equipment submitted by hospitals lacking sufficient utilization to justify continuation and modernization of the service. In its mature form, the Massachusetts Determination of Need Program has also markedly changed the whole hospital investment "environment", in the view of all hospital decisionmakers. The construction of new facilities and the introduction or modernization of specialized ancillary services that have played so prominent a role in institutional development strategy are no longer the sole province of the individual hospital. Instead, the details of such projects must now be carefully negotiated with

1975, and second, changes in internal hospital investment strategy and interhospital relationships attributable to the presence of Certificate of Need.

Over the period 1972 to 76, only 9 percent of projects submitted to CON review by sample hospitals were denied certificates of need, and even many of these projects were eventually approved in modified form. However, as other investigators have also noted, a program's denial rate merely reflects the degree to which the review process permits negotiation over project details before a final decision is rendered.[6] The CON process in Massachusetts involves considerable interaction between program staff and applicant hospitals in the course of project evaluation. Consequently despite the low project denial rate, one fourth of all projects ultimately approved by the CON program were either significantly modified as a result of CON review or were approved only with attached conditions that required some change in existing hospital operations. The projects of all types of hospitals, including those of the major teaching institutions in Boston, experienced such modifications.

Throughout its existence, the CON program devoted its most careful analysis to projects involving acute care beds. During the early years of regulation, CON review concentrated on reducing the increase in a hospital's total bed complement that would result from the construction of a major bed project. The final CON-approved form of a project virtually always either included fewer new beds than an applicant had proposed or required that existing underutilized inpatient services, such as obstetrics or pediatrics, be closed as a condition of approval for the proposed project. During this phase of CON program operation, however, projects were usually approved at the total cost proposed by the applicant hospital, and the final costs of many completed facili-

ties often exceeded even these generous budgets by several million dollars before the Rate Setting Commission in 1975 became aware of the problem and helped to institute more rigorous financial analysis and control in the CON review process.

By late 1975, the scope of CON review had been expanded beyond a consideration of the number of beds proposed to include a critical analysis of every aspect of a project. Over the next three years, the CON Program began to develop the detailed standards and criteria required to evaluate "need" for various ancillary services and ambulatory care components as well as for acute care beds and established a basis for examining many dimensions of a project's scale and cost. During this mature phase of CON analysis, the final approved form of some projects was reduced by as much as two-thirds of that originally proposed, and in several instances the process of CON review and approval was able to eliminate several million dollars in proposed expenditures. Case-study interviews revealed that hospitals had not specifically "padded" proposed projects in order to provide opportunities for cuts by the CON Program, and these reductions therefore represent true savings attributable to the presence of regulation. No group of hospitals has been immune to such careful scrutiny, and even cherished projects of influential teaching hospitals were considerably diminished in scope and cost.

During both its early and mature stages, the Certificate of Need Program in Massachusetts also achieved considerable success in preventing the duplication of high-technology specialized ancillary services. In particular, for several years CON severely restricted the diffusion of CT scanners by approving only one scanner per HSA region outside of Boston until criteria for the appropriate use of CT scanning had been established and the technological development of the necessary equipment sufficiently stabilized to limit the high cost of rapid obsolescence. The CON Program was also able to reduce already existing redundancy in services such as radiation therapy by denying applications for new equipment submitted by hospitals lacking sufficient utilization to justify continuation and modernization of the service. In its mature form, the Massachusetts Determination of Need Program has also markedly changed the whole hospital investment "environment", in the view of all hospital decisionmakers. The construction of new facilities and the introduction or modernization of specialized ancillary services that have played so prominent a role in institutional development strategy are no longer the sole province of the individual hospital. Instead, the details of such projects must now be carefully negotiated with

other institutions in the hospital's market area and with the Health Systems Agency and the CON staff. As a result, internally hospitals have been forced to evaluate their appropriate roles and mission much more carefully and to develop more systematic and precise plans for capital expansion and replacement. Externally, interactions and interrelationships among hospitals have been greatly increased; hospital councils in many areas of Massachusetts have now become the arenas in which hospitals are attempting to develop the cooperative relationships that will diminish some of the pressures for product competition by allowing one institution to become the center for renal dialysis, another for obstetrics, a third for CT scanning, and so forth. These are negotiations of considerable delicacy because each hospital views its services as highly interdependent. Therefore, only the presence of external constraints imposed by CON, planning in general, and the emerging prospective reimbursement systems of the Rate Setting Commission has forced hospitals to alter the natural tendencies to maintain or acquire specialized services and facilities evidenced by hospital investment during the early years of the study period.

Nonetheless, Certificate of Need has not established a binding constraint on hospital capital expenditure. The CON process achieves only limited control over the acquisition of major movable equipment because the majority of such expenditures fall below CON review limits and hospitals have been successful in "unbundling" even some projects that should have been reviewed to circumvent the CON process. While CON reduced the scale of new construction, it has not prevented the addition of new physical capacity because the program now has no overall basis upon which to evaluate "need" for new replacement construction. Further, while CON has developed standards for acute-care beds that now permit precise calculation of the number of beds a hospital requires, the guidelines for the ancillary services and ambulatory care that now comprise such a major component of hospital capital expansion are much less specific. Finally, even mature CON analysis is based upon standards that define optimal efficient hospital practice on a service-by-service basis. Certificate of Need regulation provides no means of establishing an overall limit to the amount of resources an individual hospital or hospitals in general "should" commit to capital investment. Even the presence of a mature CON program, therefore, does not force an institution to choose among "necessary" projects for which expenditures can be justified on the basis of current or projected demand.

Implications and recommendations

These findings have significant implications for the conduct of future evaluations of regulatory impacts, for the ongoing operation of the Massachusetts Determination of Need Program and the prospective reimbursement system of the Rate Setting Commission, and for the use of "competitive" versus regulatory strategies in the effort to contain rising medical care costs.

Implications for the design of future evaluations of regulation

From the perspective of future evaluations of regulatory impacts, three particularly important lessons emerge from this study. First, regulation is imposed upon already existing patterns of behavior that in a realm such as capital investment with its long lags in planning and implementation are not likely to show an instantaneous response to a changed environment. Unless an effort is first made to understand these underlying patterns, one risks serious misinterpretation of the results generated by evaluation. Second, the implementation of regulation is an extremely complex process. The mobilization of requisite staff and the development of defensible procedures necessary to establish a rigorous and effective program take *years*, not months, even in the presence of strong political commitment to the importance of the effort. Therefore, it is simply unrealistic to expect that the effects of program action will begin to appear immediately after its enactment, especially if measures of ultimate outcome are used to determine these effects. Essential as it is to evaluate the impacts of the numerous government interventions that have been introduced in recent years, it is also important to be realistic in establishing a time frame within which results can be expected. Otherwise, one risks concluding that a program has been ineffective or worse, has been counterproductive when, in fact, it is simply too early to determine what its actual effects have been. Finally, much as measures of ultimate impact are eventually the ones that provide the true test of regulatory accomplishments, it is important to develop and use more intermediate measures of program

performance until final outcomes do begin to appear. Intermediate outcome measures are currently held in lower esteem than measures of ultimate outcome and usually require more detailed and costly data collection. Nonetheless, measures of intermediate outcome, such as those employed in this study, are the only ones that can provide the kind of interim assessment of program strengths and weaknesses necessary to improve regulatory performance.

Proposed modifications in current regulatory procedures

As judged on these intermediate outcome measures, the Determination of Need Program in Massachusetts has clearly been successful in creating an external mechanism that can assure the "necessity" of the investments being pursued by hospitals and limit the wasteful duplication of some facilities and services that previously accompanied each hospital's pursuit of its own individual interests. At present, however, the CON process in Massachusetts (and elsewhere in the country as well) is based on standards of absolute need and does not provide a means for allocating limited resources. Under present procedures, tradeoffs are not required, either among the worthy projects of a single institution or among those of the various hospitals serving a particular population. Hence, Certificate of Need does not now constrain capital investment in total and can therefore make only a limited contribution to the ultimate objective of restraining further increases in the consumption of real resources by the hospital sector.

The principal strategy now being advocated to impose a binding constraint on hospital capital expenditure is the introduction of a total expenditure "cap", either at the national level as Title II of President Carter's 1977 Hospital Cost Containment legislation proposed or in selected states, as New York for example, has considered. The crucial issues of how a fixed expenditure ceiling should be allocated across health services areas and how criteria could be developed to permit the approval of specific hospital capital projects within this "budget", however, have not been addressed in any detail. Given the difficult and time-consuming process that the development of defensible standards even for the review of individual projects proved to be in Massachusetts, it is hard to imagine how the necessary criteria for allocation of a fixed budget could be generated.

The patterns of hospital investment revealed by this study suggest, however, that a less comprehensive and therefore potential-

ly more feasible approach directed at the level of the individual hospital might be taken to more effectively constrain hospital capital expenditure in total. Such an approach would combine the development of a specific capital budget for each hospital to limit routine annual investment in major movable equipment and minor plant renovation with the establishment of more stringent criteria to guide evaluation for less frequent capacity and service expansion projects. The following specific modifications in current Certificate of Need and rate setting procedures are proposed as the first steps toward establishing more stringent limits on the amount of capital expenditure by Massachusetts hospitals:

- An annual budget for major movable equipment should be developed for each hospital on the basis of size, teaching status, and other relevant characteristics and not tied simply to the institution's own current MME asset value. The budget should be established through the Rate Setting Commission's prospective reimbursement system and once full payer participation in this system is secured, hospitals should be permitted to spend their budgets as they wish, submitting only projects involving high-technology ancillary services or new construction for CON review. Such a change would free the CON staff from reviewing projects that rarely have been modified significantly by the CON process, eliminate current incentives for hospitals to try to subvert CON review for these types of expenditures, and provide more time for the analysis of the types of projects that are the major vehicles used by hospitals to achieve significant changes in product and image.

- As part of the development of Health Systems Plans and the State Health Plan, criteria should be formulated to specify the grounds justifying replacement of existing facilities. In addition, more precise guidelines must be developed regarding expansion of facilities for ancillary services and ambulatory care. Such criteria and guidelines are essential to support more rigorous review of proposals for future major construction and hopefully would better enable Certificate of Need to counteract the environmental factors that stimulated and facilitated the enormous expansion in hospital physical plant since the mid-1960's.

- The Rate Setting Commission should reinstate its efforts to replace the current provision of historical cost depreciation with a "capital allowance" for each hospital that would include the costs of principal on current indebtedness and provide funding for future capital replacement and, if necessary, expansion. The de-

velopment of such an allowance was initially intended to be one important component of the prospective reimbursement system being established for Massachusetts hospitals. Recently, the Commission has retrenched from this position, feeling that it lacks sufficient information on capital formation to make a compelling argument for changing current reimbursement policies. The vital role that this and earlier studies have shown such policies to play in contributing to hospital capital expansion suggests that a capital allowance is an important component of an effective prospective reimbursement system and should be developed as initially planned.

The role of "competition" versus regulation in limiting increasing medical costs.

In recent years, numerous voices have been raised against the failings of "command and control" regulation, and more "market-oriented" solutions have been advocated as a better means of overcoming the problems to which regulation has been addressed.[9] In the health care sector, the development of health maintenance organizations (HMO's) is the most prominent of the "competitive" strategies now being promoted.[10] Because the financial viability of an HMO depends upon careful control of the costs of hospital care rendered its enrollees, HMO's are sensitive to the price of hospital services in a way that individuals with comprehensive insurance coverage are not. Hence, if HMO's gain wide acceptance, hospitals may be forced to compete on the basis of price as well as product.

Nonetheless, it must be appreciated that at present HMO's still cover a small fraction of the population, that most physicians still are in fee-for-service private practice, and that the number of physicians is still increasing. It is widely recognized that physician utilization of hospital services is a major contributor to the total level of hospital costs and that the increasing number of physicians therefore has ominous implications for future increases in the cost of hospital care and indeed of medical care in general. The findings of this study have demonstrated, however, that while hospitals have expanded service and facility "capacity" in response to the "needs" of current and potential medical staff, the major decisions involving the timing and scale of expansion reside with hospital administrators and trustees. Therefore, capital expenditure and rate regulation designed to constrain the future options of hospital decisionmakers has the potential to exert considerable influence on physician behavior as well. Hence, the

continuation and indeed strengthening of existing hospital regulation offers an important instrument for limiting the future cost impacts of the growth in the supply of physicians.

Given the nature of the health services "market", therefore, the fostering of "competition" and the further refinement of regulation should be viewed not as alternative strategies but rather as complementary mechanisms to introduce some economic discipline into a sector that has largely operated without it.

Current NCHSR Publications

National Center for Health Services Research publications of interest to the health community are available on request to NCHSR, Publications and Information Branch, 3700 East-West Highway, Room 7-44, Hyattsville, MD 20782 (telephone: 301/436-8970). Mail requests will be facilitated by enclosure of a self-addressed, adhesive-backed mailing label. These publications also are available for sale through the National Technical Information Service (NTIS), Springfield, VA 22161 (telephone: 703/487-4650). PB and HRP numbers in parentheses are NTIS order numbers. Publications which are out of stock in NCHSR are indicated as available only from NTIS. Prices may be obtained from the NTIS order desk on request.

Research Digests

The *Research Digest Series* provides overviews of significant research supported by NCHSR. The series describes either ongoing or completed projects directed toward high priority health services problems. Issues are prepared by the principal investigators performing the research, in collaboration with NCHSR staff. Digests are intended for an interdisciplinary audience of health services planners, administrators, legislators, and others who make decisions on research applications.

Research Management

The *Research Management Series* describes programmatic rather than technical aspects of the NCHSR research effort. Information is presented on the NCHSR goals, research objectives, and priorities; in addition, this series contains lists of grants and contracts, and administrative information on funding. Publications in this series are intended to bring basic information on NCHSR and its programs to research planners, administrators, and others who are involved with the allocation of research resources.

16. Abstracts

This study examines hospital capital investment among Massachusetts short-term general voluntary hospitals between 1967 and 1976, and assesses the impact of Certificate of Need (CON) regulation. A profile of capital expenditures for fiscal years 1967 - 1976 was developed from Massachusetts Rate Setting Commission data for 26 sample hospitals, stratified by teaching status and Boston versus non-Boston location. Case studies were conducted in nine sample hospitals to explore the determinants and consequences of major capital projects undertaken by the institution. Enormous capital expansion took place from 1967-76. Hospitals in areas of rapid population growth significantly increased their bed size; other hospitals replaced or modernized inpatient facilities, and expanded ambulatory care capacity. All hospitals significantly expanded their ancillary service capacity. With respect to the impact of CON regulation, the evidence revealed that by 1976 and beyond, CON review had reduced all dimensions of project scale and cost by as much as two-thirds of that originally proposed.

DEPARTMENT OF HEALTH AND SOCIAL SERVICES
DIVISION OF PUBLIC ASSISTANCE
FY84 BRIEFING PAPER

I. GENERAL INTRODUCTION

The Division of Public Assistance (DPA) is responsible for administration of ten programs:

- Aid to Families With Dependent Children (AFDC)
- Old Age Assistance (OAA)
- Aid to the Disabled (APD)
- Aid to the Blind (ABL)
- Food Stamps
- General Relief
- General Relief Medical
- Catastrophic Illness
- Medicaid
- Energy Assistance

Several of these programs are funded wholly or in part with federal funds. These programs include AFDC (50% Federal), Food Stamps (95% Federal), Medicaid (48% Federal) and Energy Assistance (100% Federal). Food Stamp funding is not contained in the State budget. The remaining programs are funded entirely from state general funds. Along with the presence of federal money in these four programs comes a complete set of federal rules and procedures governing conditions of eligibility for benefits as well as rules for overall program operation.

The Division conducts business through a mixture of private vendor contracts and state staffed facilities. Most activities still administered by state staff are prohibited by federal law from transfer to the private sector. At present the Division has state staffed client service offices in (21) locations:

SOUTHEAST	SOUTHCENTRAL	NORTHERN	SOUTHWEST
Juneau	Anchorage	Fairbanks	Nome
Sitka	Valdez	Galena	Unalakleet
Ketchikan	Dillingham	Ft. Yukon	Bethel
Wrangell	Kodiak	Kotzebue	Aniak
Petersburg	Kenai		
	Wasilla		
	Palmer		
	Homer		

The Division also contracts for application-taking assistance in Barrow with the North Slope Borough and in Kotzebue through a similar arrangement with Maniilaq Association. Total Division staff authorized for FY83 is 299 positions.

In addition to these state and contractor operated client service offices, the Division has paid agents in approximately 165 additional communities around the State, bringing the total number of communities having local Division representation to approximately 185 locations.

The Division will serve approximately 25,000 families monthly during FY84. Since a large number of these families will access more than one of the Division's programs, the above numbers do not represent an unduplicated count of families to be served. A conservative estimate would place the unduplicated count of families who will receive aid during FY83 at 20,000 families consisting of approximately 45,000 persons, or roughly 11% of the State's population. One out of ten Alaskans will, by these estimates, seek some type of cash, food, medical, or energy assistance from the Division in FY84.

II. ADVISORY COMMITTEES

The Division also does business with four advisory committees. These include the Medical Care Advisory Committee, the Catastrophic Illness Committee, the Corrective Action Committee, and the Energy Assistance Committee.

1. The Medical Care Advisory Committee: Comprised of persons appointed by the Commissioner who provide policy and program guidance for the administration of the Medicaid and General Relief Medical programs.

2. The Catastrophic Illness Committee: A three member body appointed by the Governor who provide the Commissioner with policy guidance in the operation of the Catastrophic Illness Program, which is a sub-program of General Relief Medical.

3. The Corrective Action Committee: Comprised entirely of Division employees and is chaired by the Division Director. The Corrective Action Committee meets to review error data compiled by the Quality Control Section as well as from other surveillance sources, and develops appropriate corrective action to reduce the occurrence of these errors.

4. The Energy Assistance Committee: Appointed by the Commissioner to evaluate the Division's energy assistance plan.

III. DIVISION BUDGET OVERVIEW

The Division's FY84 total budget request is $164.6 million plus $24.0 million in Food Stamps benefits for a total of $188.7 million ($89.9 million SGF).$15.2 million or 8% finances the administrative activities of the Division. The remaining $173.0 million flows directly to needy Alaskans as cash ($60.9 million), food stamps ($24.0 million), medical care ($81.7 million), or energy assistance ($6.7 million). A comparison of Division administrative and program budgets between FY83 and FY84 is as follows:

Budget Category	FY83	FY84 Request
Human Services N.W.	$ 179.3	$ 179.3
Administration	14173.5	15183.1
Cash Assistance	56384.8	60851.5
Food Stamps	26500.0	24000.0
Medical Assistance	74355.9	81720.0
Energy Assistance	7208.6	6747.5
PFD Hold Harmless	12866.5	-0-
TOTALS	$191668.6	$188681.4

IV. QUALIFYING LEVELS FOR ALASKA'S PUBLIC ASSISTANCE PROGRAMS

The following table displays the FY83 income qualifying limits for the Division's programs compared to the poverty level. AFDC and APA benefits for FY84 will be approximately 6% higher.

Programs	1 Person	2 Persons	3 Persons	4 Persons	Based On Gross Or Net Income
FOODSTAMPS	636	844	1052	1260	Gross
AFDC	-	546	614	682	Net
AGED, BLIND AND DISABLED	546	802			Net
GENERAL RELIEF	300	400	500	600	Gross
ENERGY PROGRAM	851	1113	1375	1637	Gross
OMB POVERTY LEVEL	489	649	809	969	Gross

V. DIVISION PROGRESS REPORT

The Division was faced with serious problems from a number of quarters. These included:

- The AFDC payment error rate was at 30%.
- Decision timeframes for new applicants exceeded the federal standard of 30 days routinely, and in some offices reached 60 days or longer.
- The computer system which supported the client service offices and authorized monthly benefits was developed in 1968 and was near collapse.
- The state run medical payment system was taking up to 6 months to pay medical providers for medical services received by public assistance recipients.
- Recipient failure to report information to the agency was contributing to a mushrooming overpayment problem with inadequate field staff to impose tighter surveillance of recipients' financial circumstances.

The Division set out in 1979 to remedy these problems. The goals were:

- to reduce the level of overpayments to recipients and concurrently the high error rates,
- to place the agency on a solid legal footing through introduction of regulations and statute revisions,
- to upgrade the data processing capabilities supporting client service offices,
- to reimburse the medical community in a more timely and cost efficient manner by transferring the medical payment system to the private sector, and
- to accomplish this with as little harm to truly needy Alaskans as possible.

The Division accomplished these goals as evidenced by the following milestones:

- The Division successfully transferred the processing of medical claims to the private sector. Complete transfer was completed in August 1982. The present five year contract provides for processing of medical claims through 1987. The contract calls for a 20 day processing standard at one third the cost of the previous Department operated system.

- The Division is nearing implementation of its new data processing support for client service offices. This new eligibility system will integrate all ten of the Division's programs into a single data base. The system will permit on-line eligibility determination and benefit issuance from the central computer from any Division office by late 1983 and further improve client service.

- State regulations and policy manuals for each program have been adopted.

- Decision timeframes on new applications of 30 days or less have been maintained in all programs.

- AFDC, Medicaid and Foodstamp error rates are much improved.

- Major program reforms were implemented in AFDC and Food Stamps during 1982. Monthly reporting of financial circumstances, introduction of prior month budgeting, and requiring home visits have reduced error rates and caseloads.

VI. DIVISION CONCERNS FOR 1983

1. Error Rates

Improved quality in AFDC, Medicaid and Foodstamp eligibility determinations remains a top priority of the Division. To date federal expectations in each of these programs have been met or corrective action plans (CAP) been negotiated to achieve reductions. The Division entered a new penalty period in October 1982 that brings with it the following payment error rate expectations for the next 12 months:

Program	Current Error Rate	Required Error Rate
AFDC	11%	4%
Food Stamps	23%	21%
Medicaid	1%	5%

An important factor in the error rate calculation is that all client caused errors, such as failure to report information, are counted against the State when assessing its error rate.

2. AMPS Performance Improvement

The new Alaska Medical Payments System (AMPS) must continue to be improved to foster a better relationship between the medical community and low income Alaskans needing medical care.

3. Eligibility Information System (EIS)

The detailed design of this new automated eligibility system has been completed. This new system will reduce much of the risk of agency caused error in the eligibility determination process, and greatly improve service timeframes to Alaskans around the State.

4. Food Stamp Mail Issuance Losses

A new federal rule has been established setting a mail loss limit of .5%.

Under federal rules Alaska has the option of sending households an Authorization To Purchase (ATP) card which can be exchanged for food stamps at a client-service office or U.S. Post Office, or the State can mail households their food stamps directly.

The Division currently mails food stamps directly to all recipients monthly except those residing in Anchorage. Anchorage residents are issued an ATP which is exchanged for food stamps at the Post Office. Alaska has periodically experienced a high loss level with the direct mailing of food stamps. Fairbanks residents were removed from direct mail for a period of time for this reason but are now back on direct mail. Because of the rural nature of many addresses, mail losses have at times exceeded 1%. This loss rate must be watched routinely to avoid State repayment of any loss amounts that exceed .5%. Backup delivery methods have been designed in the event that direct mail creates losses above the .5% level. These backup measures should be deployed if needed.

5. Food Stamp Rural Allotment

Alaska must push for implementation of a rural Food Stamp allotment. Since 1973 the State has been lobbying the U.S. Department of Agriculture (USDA) and the U.S. Congress for a higher food stamp allotment for rural Alaska. The State has demonstrated repeatedly that rural food costs exceed urban costs by 40% or better. Congress gave USDA the authority to create the 2nd standard in Alaska in 1981. USDA has failed to implement this law thus far even though the State defined the geographic areas to be affected.

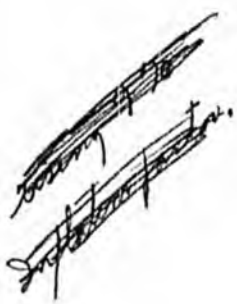
6. HB174 Implementation

During the 1982 Session the Legislature passed HB174 which provided for an increase of approximately $50 monthly to most AFDC families but no funds were appropriated. This increase was to be in addition to the 7.4% annual cost-of-living increase also given AFDC families on July 1. The purpose of HB174 was to close the gap between the payment levels for two adults receiving APA and two individuals on AFDC. In view of this, Governor Hammond advised the legislative leadership that HB174 would be implemented within available funds. The Division has concluded that funds are available to implement HB174 safely effective January 1, 1983. The Division has published regulations proposing to do this. In excess of $2 million has been included in the FY84 AFDC request in anticipation of this increase in AFDC grant levels. A final decision is pending whether to effect this increase in FY83, or to wait until FY84, or to forego the increase altogether if funds for FY84 are determined not available in view of the constitutional spending limit.

7. Medical Budget Projections

The Department has perpetually had problems predicting spending levels in this category. While projection models for administrative and cash assistance budgets generally were reliable, prediction of medical costs were not. Most states have a problem similar to Alaska's. Several changes will improve the Division's ability to predict the medical costs for a fiscal year and to remain solvent in times of trouble:

(A) Shift Medicaid and GR Medical expenditure accrual from "month of service" to "month of billing". Under the present system a fiscal year is nearly over before the Division can safely predict its outcome.



(B) Consider adoption of uniform cost reporting and prospective reimbursement for hospitals and nursing homes. Hospital and nursing home expenditures comprise 54% of the medical budget.

(C) Consider new Medicaid regulation requiring all non-emergency hospital admissions be reported to the Department in advance. In its simplest form this requirement would generate needed information to permit total program liabilities to be more closely watched.

8. Strategy to Contain Escalating Medical Costs

In any period, total spending is always a function of the number of recipients, the volume of services used, and the unit price of service. With an automatic cost-of-living increase that expands Alaska's eligible population, coupled with no unit price control or volume limits, Alaska currently has no ability to effectively control growth in medical costs.

According to a recent study by THE URBAN INSTITUTE, Medicaid payments rose at an annual rate of 15.5 percent from FY73 to FY79 nationally. Alaska had the highest annual rate of increase at 41.8 percent during this same period. Since, FY79 costs have increased in excess of 20% annually in Alaska.

This situation will be further complicated in FY84 and later years in light of Congress' actions to reduce Medicaid funding to all States (TEFRA changes). Alaska is facing a 4 to 5 million dollar shortfall in FY84 because of these federal changes. Absent additional funding to replace these lost federal/State revenues, critical decisions need to be made to bring program spending in line with available federal/State resources.

This decision process must arrive at an equitable balance between persons eligible, covered services and unit price for services received, particularly hospitals and nursing homes. All of these choices are largely controlled by the Alaska Legislature. This decision process will also cause the State to more precisely define its health care policy for all areas of Alaska, particularly in rural areas where the delivery of health care cannot be accomplished as competitively in large urban areas with more than one hospital.

9. General Relief Program Review

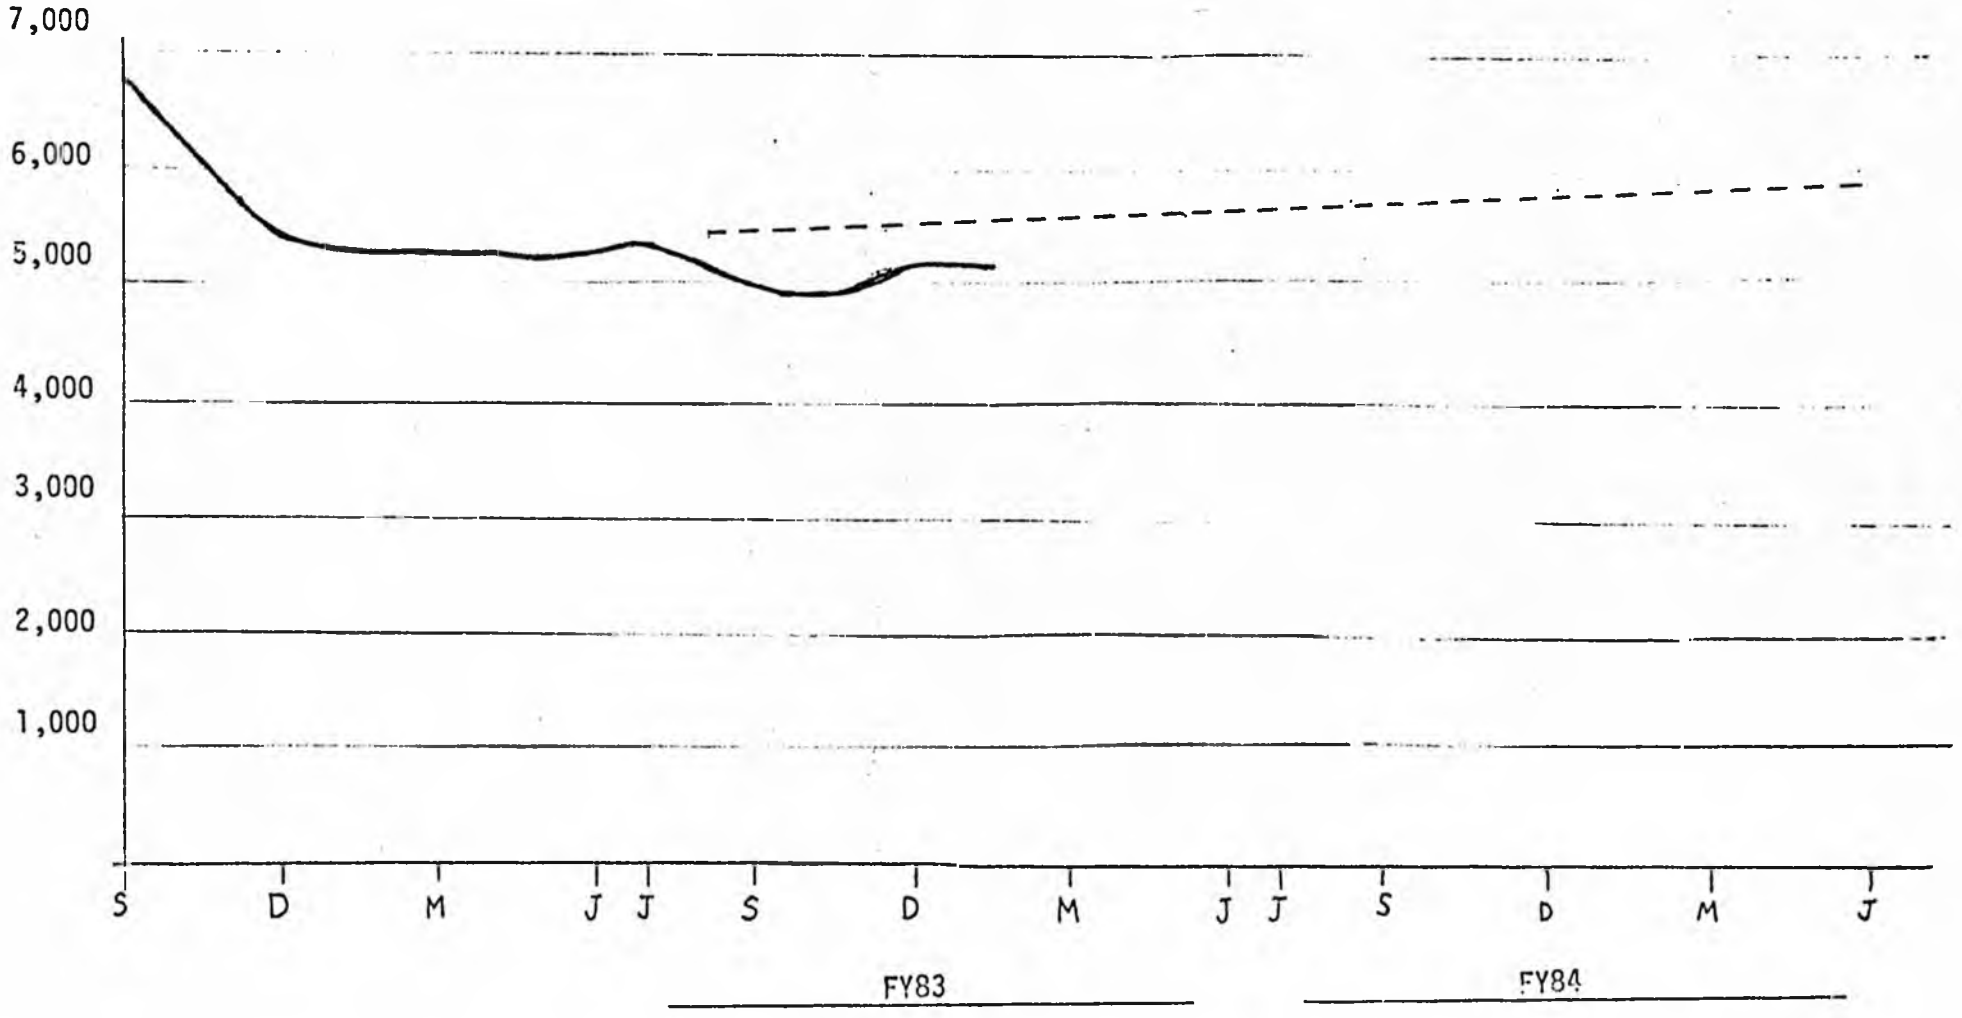
This state funded program is not meeting the emergency subsistence needs of employable Alaskans. Strict income requirements and a demonstrated need (such as an eviction notice) must be met. If eligible, a maximum monthly payment of $80 per person is allowed by state statute. The Division makes these payments to landlords and utility companies to ensure only critical subsistence needs are met. Participation in this program has declined, even though the BIA General Assistance program was terminated. An analysis of this program is critically needed to determine if changes in qualifying conditions and benefit levels are appropriate. No changes have been made in the qualifying limits since 1978, and the $80 payment limit since 1957.

10. Catastrophic Illness Program

This program was funded at $2.1 million for FY83 but has requests totalling $8-10 million. Any individual with unpaid medical bills of $1000 may apply. The Catastrophic Illness Committee determines the eligibility formula and may adjust it as frequently as necessary to stay within available funding. Under the current formula, the FY83 program is already out of funds. A complete review of this program is also in order.

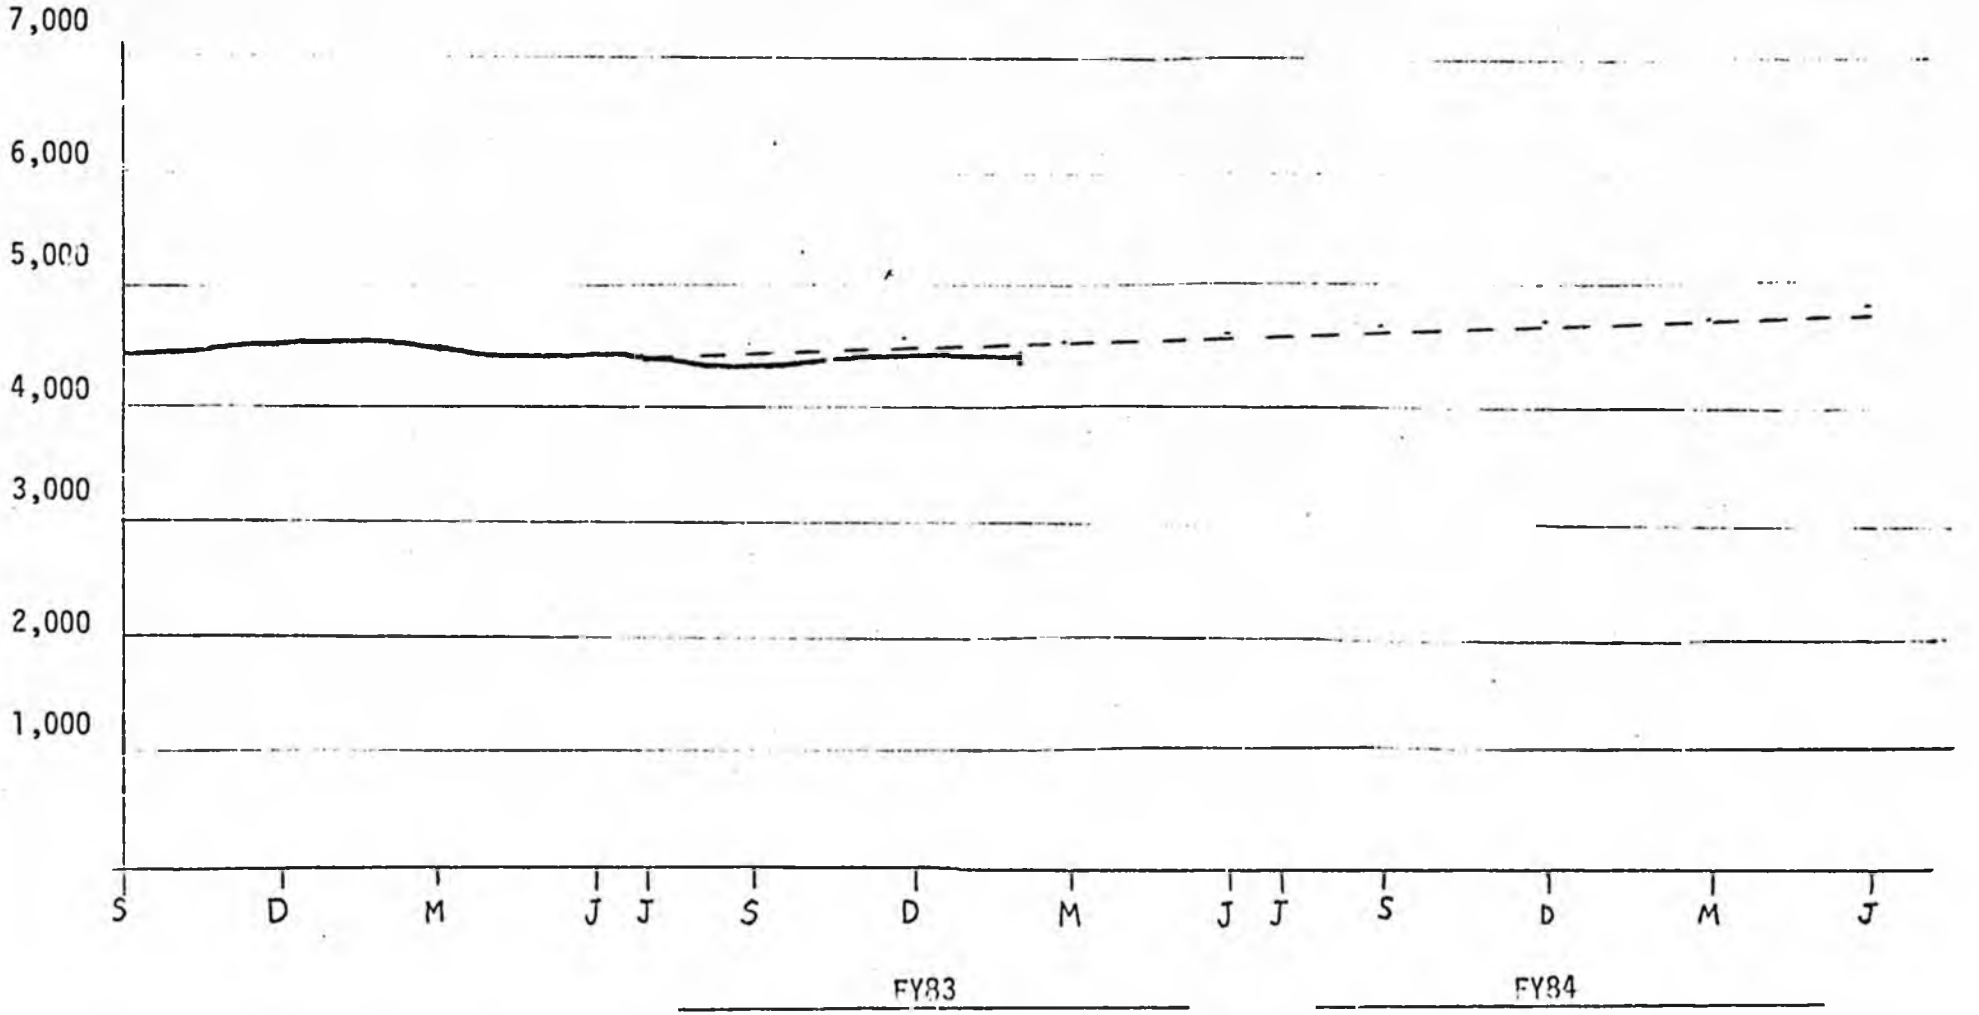
11. Work Programs

Considerable debate continues as to the type of work programs that should be imposed on Alaska public assistance recipients, if any. Options range from merely registering for employment to requiring every able-bodied recipient to perform some type of public service employment. Because of Alaska's conservative set of public assistance programs, and the lack of two parent, unemployed households on assistance in this State, the Division has recommended that a mandatory public service program not be adopted in Alaska. Rather, the Division has recommended an emphasis towards job search and job training with built-in program disincentives for recipients who refuse to cooperate. The following elements are essential to a meaningful program in Alaska within an acceptable administrative cost:



(a) Focus on high availability jobs
(b) Constructive not punitive in nature (Rules out CWEP)
(c) Establish client motivation through AFDC program disincentives for those who do not cooperate
(d) Prepare client to compete with non-welfare job applicants
    - Resume preparation
    - Effective job search skills
    - Develop a marketable skill through training or education
        ** typing
        ** key punching
        ** general clerical
        ** day care
    - Effective job interview skills
    - Agency follow-up on unsuccessful interviews to determine why
    - Client preparation to leave AFDC/Medicaid once employed
(e) Coordination with State and private job placement agencies
(f) Contracts for OJT leading to permanent position with private agencies

(g) Minimal surveillance burdens on agency - low state staff needs
(h) Coordination with day care agencies/homes for school age kids
(i) Recipient workshops - allow successful recipients to enlighten and encourage others
(j) Fair good cause system for clients who do not cooperate
(k) Pilot project experience



12. APA Federalization

The State is in a position to consider federal administration of its aged, blind and disabled programs. Although these three programs were federalized in 1974, Alaska and a number of other states continued to operate their programs because the uniform national payment was below that previously received by recipients in these states. As a result, there is a great deal of duplicate administrative effort, conflicting information and other problems which could be avoided if the State part of the program were federalized as well. The Division commissioned an analysis of this issue. The final report will be available by March 1, 1983 at which time the Department will consider the merits of complete federalization from both an administrative and program perspective and then make a recommendation to the Governor.

Comments

Estimated costs of medical care for FY83 if SB 817 had not been passed by the 1982 Alaska Legislature. SB 817 moved all low-income children into the Medicaid Program out of GR Medical, among other changes.

Revised FY83 estimate taking SB 817 into account. Several key assumptions made:
1. $1.5 million would be later added to $7.9 million GRM from Federal Budget Impact Fund.
2. Prescription drugs would be paid out of Medicaid, not GRM.
3. SB 817 would be implemented on 7/1/82 for 12 month cost savings.
4. Adult medical care would be provided under GRM for persons not eligible for AFDC, OAA, ABL or EPD. If funding fell short, services would be reduced.

Latest FY83 estimate showing full costs of Medicaid and GRM. Assumptions include:
1. $1.5 Federal impact money assumed part of $10.3 GRN base.
2. Drugs moved back into GRM ($1 million).
3. SB 817 implemented 10/1/82 not 7/1/82.
Based on these assumptions the total FY83 medical cost expected exceed authorized State funding by $906.3 if the federal impact funds are not made available.

Factors vary by type of medical service in Medicaid and GRM. These factors are a composite for Medicaid and GRM.

Estimate of medical costs for FY84 with following assumptions:
1. Medical care costs will increase at 9%.
2. Caseloads and therefore persons covered will increase at 6%.
3. No limits will be applied to rate of increase in hospital or long term care rates.

The Department seriously questions the forecast of a 9% increase in medical costs for FY84. Preliminary information from the hospital association indicates their facilities are expecting increases in costs ranging from 12% to 16%.

GAO STUDY - competitive strategy

CON - Restricts competition

MEDICAL MARKETPLACE

with KEY ELEMENTS. MARKET PLACE will OPERATE EFFECTIVELY. KEY ELEMENTS ARE:

1. A LARGE NUMBER of buyers AND sellers
2. CONSUMERS must bear CONSEQUENCES of bad DECISIONS
3. SELLER MUST be able to LEAVE OR ENTER the MARKET FREELY

Differences from ECONOMIC model in MEDICAL MARKETPLACE

1) THIRD PARTY PAYMENTS REMOVE CONSUMER'S RESPONSIBILITY for FISCAL effect of their ACTIONS. IN 1981 only 32.1% of HEALTH CARE USERS paid for their own treatment
2) BECAUSE of COMPLEXITY of HEALTH CARE, CONSUMERS are NOT AWARE of CONSEQUENCES OR OPTIONS re: HEALTH CARE. 70% of HEALTH CARE EXPENDITURES are INFLUENCED by PHYSICIANS.
3) # of PROVIDERS is SMALL in SOME MARKETPLACES i.e. RURAL AREAS - ALASKA IN GENERAL
4) RESTRICTIONS to entry into MKTPLCE - licensing of NURSES; PHYSICIANS, FACILITIES VIA CON, possibly by STATE FUNDING.

TABLE 1 - good on competition.

The Honorable Bette Cato
Alaska State House of Representatives
State Capitol
Pouch V
Juneau, Alaska 99811

Position Paper on HB 19 and a companion bill being submitted to the Senate -- pertaining to an "Act repealing the certificate of need program."

Dear Representative Cato:

Providence Hospital joins the rest of the hospitals in this state in requesting the repeal of the certificate of need law and endorsing House Bill 19 (Fritz and Hayes) and the companion bill about to be submitted to the Senate. The process which this law sets in place is cumbersome and wasteful and totally inappropriate for Alaska.

The major impetus for the law was to control excess hospital beds in many large cities and to help control rising health care costs. The belief was that by controlling the number of beds, capital expenditures and new services, costs would be contained. The results have been much less than desirable throughout the country, and, in Alaska, have been needless, wasteful, cumbersome and costly.

The lack of success in Alaska is better termed overkill. Designed for areas of heavy population, excess hospital beds and competition, the law does not work and is inappropriate for our small state for several reasons:

- The law only covers private facilities, and does not cover public health, military or state owned institutions.

- Alaska has only one city with more than one hospital, and there are only three hospitals in the whole state (eligible for review) of over 100 beds.

- The law is reactive to existing decision making processes. Hospitals in Alaska already have local public review and approval designed in their own budget review processes. Many hospitals are owned by

municipalities, and all have governing boards or advisory boards of local citizens. These citizens and municipalities should have control of the expansion and budgetary decisions of their own institutions. Several other layers of bureaucracy and review are cumbersome, costly and inefficient. For our Certificate of Need, the following is an actual review cycle showing the different bureaucratic levels we had to go through just to have a decision made on one project.

Letter of intent to file certificate of need

Pre-application conference (HSA, Municipal Health Commission, State)

Public Hearing on Certificate of Need Application (State)

Joint Project Review (HSA and Municipal Health Commission)

Concurrent Review (HSA and Municipal Health Commission)

Board Review (Municipal Health Commission)

Board Review (HSA and Southcentral Health Planning & Development Agency)

Commissioner's Review (State)

From the time of holding the application conference to the ultimate decision by the Commissioner, the process has taken over a year.

- The law places a costly burden on all institutions who have to prepare and submit Certificates of Need. The documents which need to be prepared are massive, require hundreds of hours of preparation and at least 35 each need to be produced for the review boards and other parties. The 110 day minimum time period for a review is unrealistic, and often times, the institutional cost of delaying implementation means an eventual increase in price of the piece of equipment or construction project due to inflation.

- The law also passes on a cost to the public in that state, regional and local staff are needed to coordinate the program, prepare staff analyses and hold public meetings. We are estimating that the cost of state, regional and local staffs have increased the cost of health care by at least $8,000,000 in the last six years.

- The dollar limit for what must be reviewed is absurdly low. In 1982 alone, Providence spent hundreds of man hours and other monies preparing six CON applications for such things as a $167,000 replacement incinerator (the old one being 25 years old was required to be replaced by both State and EPA codes!); a CT scanner and Cath lab replacement; and a $250,000 computer enhancement for an x-ray machine. Believe it or not, the STATE did not give approval on the incinerator until the 90th and final day for a decision to be made.

The Alaska State Hospital Association is unanimous in endorsing the repeal of the CON law. We have also received indications from several legislators and the Alaska Medical Association that repeal of the CON law would be best for a growing state such as Alaska.

We are supportive of local planning for Alaska's health care needs. The process, however, should be positive and proactive -- encouraging institutions to respond to needs in the community -- not negative, reactive and cumbersome.

Your support in repealing the certificate of need law in Alaska would be appreciated. With an early response and passage of HB 19 or the companion bill in the Senate, a tremendous and costly burden will be lifted from Alaska's hospitals.

Thank you for your consideration.

Sincerely,

Al M. Camosso
Administrator

NOT REPEALED - DAVE

MINNESOTA CERTIFICATE OF NEED ACT

145.832 PURPOSE; CITATION.

Subdivision 1. The legislature finds that the unnecessary construction or modification of health care facilities increases the cost of care and threatens the financial ability of the public to obtain necessary medical services. The purposes of sections 145.832 to 145.845 are to promote comprehensive health planning; to assist in providing the highest quality of health care at the lowest possible cost; to avoid unnecessary duplication by ensuring that only those health care facilities and services which are needed will be developed; and to provide an orderly method of resolving questions concerning the necessity of construction or modification of health care facilities.

It is the policy of sections 145.832 to 145.845 that decisions regarding the construction or modification of health care facilities should be based on the maximum possible participation on the local level by consumers of health care and elected officials, as well as the providers directly concerned.

Subd. 2. Sections 145.832 to 145.845 may be cited as "The Minnesota Certificate of Need Act."

History: *1979 c 323 s 1*

NOTE: This section is repealed by Laws 1982, Chapter 614, Section 12 effective March 15, 1984. See Laws 1982, Chapter 614, Section 13.

145.833 DEFINITIONS.

Subdivision 1. As used in sections 145.832 to 145.845, unless the context otherwise requires, the terms defined in this section have the meaning ascribed to them.

Subd. 2. "Health care facility" means any facility licensed under sections 144.50 to 144.56, or any nursing home licensed under sections 144A.02 to 144A.11; but does not include any facility licensed under sections 245.781 to 245.813 or 252.28, unless the facility is a vendor of medical care under section 256B.02, subdivision 7, and is certified as any type of intermediate care facility or skilled nursing facility or is operated by the commissioner of public welfare as a state hospital. "Health care facility" also includes any facility in which services are provided primarily for the treatment of kidney diseases.

Subd. 3. "Health services" means all clinically related services, diagnostic, treatment or rehabilitative, that are cost centers utilized by a health care facility for its accounting purposes. The cost center shall conform to definitions of cost centers recognized by generally accepted accounting principles and shall conform to the cost center definitions utilized in reports of the facility, or organization to any other state agency or program. The cost centers include alcohol, drug abuse and mental health services.

Subd. 4. "Predevelopment activity" means any activity by or on behalf of a health care facility or any person which occurs in preparation for the offering or development of a new institutional health service if the predevelopment activity would require an expenditure in excess of $150,000 or if the predevelopment activity involves any arrangement or commitment for financing the offering or development of a new institutional health service.

Subd. 5. "Construction or modification" means:

(a) Any erection, building, alteration, reconstruction, modernization, improvement, extension, lease or other acquisition, or any purchase, lease or other

February 11, 1983

FEB 16 1983

TO: Members of the Alaska Legislature

Proposed legislation (HB 19 and SB 85) would repeal Alaska Statute 18.07.031-18.07.111, better known as the Alaska Certificate of Need (CON) law. These bills reflect the position of the Alaska Hospital Association, whose member institutions are subject to the provisions of the CON process. The attached paper, developed by the Alaska Health Coalition, was written to provide legislators and the public with a series of alternatives to consider during discussion of these important bills. The paper summarizes the provisions of the CON law, discusses several of the problems which have been identified with the current process, and reviews the effectiveness of the CON program, both nationally and within Alaska. In addition, a list of recommendations is provided for consideration in revising the current CON law.

The Alaska Health Coalition is a group of interested citizens with memberships from the three Alaska Health Systems Agencies and the Statewide Health Coordinating Council. The primary purposes of the Coalition are to review the need for health planning, development, and promotion activities and to develop goals, describe functions, and recommend structures to achieve optimal health for the citizens of the state. Therefore, we believe that the subject of public review of capital expenditures as currently provided for in the Certificate of Need law is an important issue which deserves a reasonable, objective discussion. We present this paper for the purpose of initiating this discussion.

For additional information, please contact any of the following organizations: Northern Alaska Health Resources Association, Fairbanks (456-2553); South Central Health Planning and Development, Anchorage (278-3631); or, Southeast Alaska Health Systems Agency, Ketchikan (225-9681).

EXECUTIVE SUMMARY

Alaska's Certificate of Need (CON) Law was enacted by the State Legislature in 1976, following passage of Public Law 93-641, the National Health Planning and Resource Development Act of 1974. Provisions in the CON law require that non-federal health care institutions apply for and receive a Certificate of Need from the State of Alaska before proceeding with major capital investments which will result in new construction, alterations or renovations, and/or new services. The Thirteenth Alaska Legislature currently has before it companion bills, HB 19 and SB 85, which provide for repeal of the CON law. The purpose of this paper is to review the data available on the effectiveness of the CON process, both nationally and within the State of Alaska, and to present alternatives for consideration by the Legislature regarding public review of capital expenditures for health care facilities.

Evidence is presented that the CON program has had an effect on limiting the amount of capital expenditures. Furthermore, current economic research has demonstrated that, for every dollar of capital investment made in a health care facility, an accompanying increase in operating costs can be expected amounting to 184% of the original investment in ten years.

Evidence gathered on Alaska's experience with the Certificate of Need program indicated that it has been effective in deterring and/or guiding capital investment within the health-care industry and has stimulated improved planning within the health-care institutions themselves. Examples are presented which illustrate how the process created this impact.

Several issues are discussed relating to recognized concerns within the current CON process. These issues include: 1) costs attendant to developing a CON application; 2) delays in the review process; 3) loss of community control; 4) marketplace economics; and, 5) the dollar-threshold limits which require a CON.

The conclusion drawn from this review was that, although there are problems with the current CON process, revision of the law is preferable to outright repeal. Recommendations for revision of the law are provided and include:

1. Raising threshold levels.
2. Exempting non-clinical capital expenditures.
3. Expediting reviews of equipment replacement.
4. Specifying time limits on reviews.
5. Providing legislators with information on the outcome of reviews in their districts.
6. Providing for a sunset review of the process.

CERTIFICATE OF NEED PROGRAM

PURPOSE

The most controversial aspect of the health planning effort, in Alaska and nationwide, has been the Certificate of Need (CON) program. Borrowed from public utility regulations, the earliest CON program was enacted by New York in 1964. Twenty-six other states instituted CON programs in the next ten years, and, with the passage of Public Law 93-641, CON was mandated for all states. Alaska's Certificate of Need statute (18.07.031-.111) was enacted by the State Legislature in 1976 and amended in 1981.

As originally designed, the CON program was implemented to curb rapidly escalating costs of health care by stemming uncontrolled capital investments in new health-care facilities, services, and high-technology equipment. To accomplish this goal, the CON program had several primary objectives: 1) to prevent unnecessary duplication of services and facilities; 2) to reduce the number of available hospital beds or at least not allow the growth of hospital beds to exceed guidelines established in the State Health Plan; 3) to promote an equitable and efficient allocation of resources; and 4) to determine if less costly alternatives to expensive capital expenditures were available to accomplish the same purpose.

WHO MUST APPLY

The State of Alaska requires approval of capital expenditures for projects which meet or exceed certain thresholds:

1. Capital expenditures in excess of $150,000 toward building, improving, or purchasing a health care facility, including lease or purchase of equipment, costs of any study surveys, designs, and site acquisitions and preparations.

2. Any change within a two-year period in the licensed bed capacity of a health care facility amounting to 10 beds or 10 percent, whichever is the lesser, which increases or decreases the number of beds or redistributes beds among different categories of service.

3. Any addition or elimination of a major type of service offered in or through the health care facility.

A project meeting or exceeding these thresholds is required to obtain a Certificate of Need from the State of Alaska prior to implementation.

THE PROCESS

An applicant enters the CON review process by submitting a "Letter of Intent" to the Department of Health and Social Services (DHSS) and to the appropriate health systems agency describing briefly the scope of the proposed activity. If the DHSS determines that the project is subject to CON review, the applicant develops a formal application and submits it to the State agency and the regional health systems agency. In most cases, a pre-application conference is scheduled with the applicant to minimize any potential misunderstandings and to achieve an agreement on what would represent a successful application. Once the State agency certifies that the application is "complete" -- that it contains sufficient information necessary to conduct an objective review -- the agency has 90 days to review the application and to submit an analysis to the Commissioner of DHSS for final action. Within the 90-day review period, the regional health planning agency has 60 days to review and seek public comments on the appropriateness of the proposed application. The HSA submits its findings and recommendations to the Commissioner. Once the Commissioner has considered the information that has been submitted, he decides whether or not to issue a Certificate of Need to the applicant. The Commissioner notifies the applicant in writing of the decision. Copies of the decision are sent to the Health Systems Agency and are published in regional newspapers.

EFFECTIVENESS

Nationwide

Nationally, credible information is just beginning to emerge regarding the effect of capital expenditures review. Although this topic has been of interest for many years, much of the early literature is of little value because of a basic lack of understanding about the process and outcome of capital expenditure review programs.[1] Two recently completed studies in the State of Massachusetts have reported CON impacts.[2,3] The first analyzed hospital capital investment among short-term general voluntary hospitals between 1967-1976. The results were that, by 1976 and beyond, CON review reduced all dimensions of project scale and cost by as much as two-thirds of that originally proposed. The second study found that the formal and informal actions of the CON agency from 1972-1976 resulted in small, but statistically significant, reductions in the rate of hospital investment.

Two studies conducted in 1982 by Arthur D. Little, Inc., shed additional light on the potential impact of capital expenditures review.[4,5] The first study analyzed the effect of capital expenditures review decisions in five states: Colorado, Florida, Maryland, Massachusetts, and Oregon (chosen for their geographical and regulatory differences). Based on their analysis, CON programs appeared to be effective in limiting the amount of capital expenditures undertaken. Furthermore, they discovered that, for every dollar of capital investment, there was a definite increase in operating costs. They projected that, over a ten-year period, a dollar of capital investment generates additional operating costs with a present value of $1.84 (exclusive of

depreciation and debt service). They concluded from these results that CON programs have the potential to play an important role in curbing hospital cost inflation.[4]

A second report by Arthur D. Little, Inc., involved an analysis of information from a six-state study.[5] For the states of Virginia, South Carolina, Washington, New Jersey, Iowa and Colorado, Arthur D. Little undertook a review of Certificate of Need programs for the twelve-month period beginning July 1, 1979 to June 30, 1980. Three significant findings were reported: 1) certain capital costs were not incurred as a result of the CON review program; 2) the objectives contained in individual state plans and health systems plans tended to deter capital expenditure projects; and, 3) pre-application conferences -- health planners and providers working together to avoid project denial -- were effective means of reducing the "administrative costs" of the review process as well as excessive capital expenditures.[5]

Alaska

Currently (February 1983) there are five projects under review by the Department of Health and Social Services that total $106,000,000. Two additional applications are anticipated, totalling $20,820,000. These seven applications ($126.8 million) provide an interesting contrast with the more than 30 projects which were approved for $149,000,000 in the previous five years (1977-1982).

Two projects with a combined total of $12,400,000 have been denied during the past five years. In addition, several other Letters of Intent have been received by the Department for which applications were never received. It is impossible to estimate how many applications or letters of intent were never submitted because of the presence of the CON law.

The Alaska CON Program has been effective in accomplishing three things. First, it seems reasonable to expect that CON has deterred misdirected projects that could not withstand the test of public scrutiny. It has, therefore, acted to uphold existing plan standards. Secondly, it has guided institutional actions into areas which are compatible with the goals and objectives of the State as reflected in State and regional health plans. Thirdly, the presence of the CON program has promoted better planning on the part of the health care institutions throughout the State.

Deterrent Effects

Although the deterrent effect of Certificate of Need is admittedly difficult to demonstrate, there is evidence from the number of "Letters of Intent" which never resulted in an application that CON is a deterrent. A specific example of this phenomenon was observed during a recent effort by four different applicants to provide inpatient alcoholism treatment services in and around Anchorage. The Department of

Health and Social Services and the local health systems agency identified a need for 40-80 alcohol-treatment beds in the area. Due to pre-application planning, only two of the four applications were completed for final consideration. Both were subsequently approved.

Improved Institutional Planning

Situations in which the CON process provides expert guidance and stimulates better institutional planning do not always result in smaller, less-expensive projects. For example, Valley Hospital in Palmer submitted an application to complete a minimal and temporary renovation of their 30-year old facility at a cost of $2,000,000. Part of the renovation included additional insulation to prevent heat loss through the roof. At the suggestion of the Department, a structural engineer was asked to study the ability of the roof to withstand the increased load of snow which would not be melted because of the insulation. The Department also requested a life-cycle cost analysis which would determine the cost of a temporary renovation as opposed to costs of major renovation. The results of these inquiries demonstrated that the roof was not designed to withstand the extra load of snow and that, when total operating expenses and capital costs were considered for a 25-year period, it would be less expensive to forgo the minimal renovation and proceed with a major renovation. The result of this review was an approval for a major renovation project -- at a long-term cost savings.

Petersburg General Hospital filed a letter of intent for $3,400,000 to renovate an existing acute care facility. Following an architectural assessment of the facility and a life-cycle cost analysis requested by the State, it was determined that the cost of new construction would be preferable to renovation. Subsequently, a CON was approved for $7,150,000. Obviously, the CON process is not punitive, but rather seeks to use health care resources to gain the maximum benefit for the community.

Hospitals in Homer and Fairbanks submitted proposals for review which contained "shelled-in" space for which no use was intended for the immediate future. In Homer, the Department requested further assessment of the situation to identify a solution to future use of the shelled-in space. As a result the plans were redrawn for the renovation and expansion and included the proposed use of the shelled-in space.

Better Conformance with Identified Community Needs

In Fairbanks, the CON process stimulated a community discussion of the need for inpatient psychiatric services and a concern for approving the construction of two shelled-in floors that did not have an identified use. Because of discussions at the local level during the review by the health systems agency, the hospital agreed to specify the intended use of the shelled-in space and, furthermore, to enter into a planning process with the community during the following year to determine the most appropriate configuration for the proposed services.

Summary

Although it is difficult to place a dollar figure on the impact of the Certificate of Need program over the past six years, it appears that Alaska's program has effectively deterred and guided capital investment within the health care industry and has stimulated improved planning within the institutions themselves. Because of the CON program, Alaskans have saved millions of dollars in operating costs which would have resulted from unneeded expansion of facilities and services. Moreover, the State Legislature and the Administration should feel some measure of assurance that, because of the CON process, the millions of dollars in public funds that have flowed from the State to health care facilities for construction and operation are being used for projects which meet an identified need, do not duplicate existing services, and are financially feasible.

PROBLEMS WITH THE CON PROCESS AND RECOMMENDATIONS FOR IMPROVEMENT

INTRODUCTION

Proponents and opponents of the Certificate of Need program agree that the current CON process requires substantial changes. Opponents cite several reasons for their decision to push for repeal of the current law. Among the reasons are: 1) significant costs are involved in developing a CON application and proceeding through the review; 2) delays in implementation are caused by an extended review period; 3) the CON process removes community control; 4) market-place economics should control capital investment; and 5) threshold limits which trigger a CON review are too low.

COSTS

No one denies that there are costs attendant to developing a CON application. The majority of those costs, which have been estimated to run as high as $40,000 for the more complex projects, can be attributed to personnel costs. Most of these costs would continue in the absence of CON if a facility did a credible job of planning for future services. In order to gain public support, justify the financial feasibility of a construction project, and obtain adequate architectural designs, planning still must occur. The costs of institutional planning will not disappear in the absence of CON.

DELAYS

Extended review schedules have in some cases resulted in delays in construction start-up time which have been not only frustrating but also costly. It seems reasonable that the cause for these delays can be identified and corrected by revising the regulations regarding CON review. For example, provisions could be made to expedite review of capital equipment replacement and to set a time limit for a decision by the Commissioner subsequent to a recommendation by a regional health planning agency. Also, by raising the threshold limits which require a CON, there will be approximately 25% fewer reviews to do. This should improve the efficiency of the review process.

COMMUNITY CONTROL

Concern has been expressed that the CON process removes community control from local jurisdictions in the case of municipally-owned facilities and local advisory boards with respect to corporately-owned facilities. However, local governments and advisory boards do not necessarily maintain a regional or statewide perspective when it comes to considering new services and facilities. In other words, persons who

serve on local hospital advisory boards are chosen for their expertise and dedication in local issues; often, however, a project will have regional or statewide implications that cannot be properly addressed at the local level. The CON process, at the very least, offers local, regional and statewide perspectives on the need and appropriateness of a proposed project. Instead of removing community control, the CON process bestows some control on the community at large.

In addition, a trend is evident that an increasing amount of public funds are being appropriated by the legislature for construction and renovation. It seems reasonable that in a time of decreasing state revenues, citizens should have an opportunity to influence the distribution of these funds so that they meet state and regional needs instead of local demand. The CON process ensures public participation in these decisions.

MARKETPLACE ECONOMICS: COMPETITION vs. "REGULATION"

In recent years, there has been a popular theory that the problems in U.S. health services can be blamed on excessive government intervention and regulations. It has been argued that high costs and related problems could be solved by a "return to the free market and competition."[6] Two recent articles argue to the contrary.[7,8]

Roemer and Roemer, well-known health-economics experts, examined the past and present operations of free trade and competition in the health care system and found that not one of at least five conditions necessary for competition existed.[7] In addition, they found that the free market created a geographic maldistribution of health manpower, causing serious problems for rural populations. Furthermore, they discussed the paradoxical problem which has been demonstrated for every component of the health care industry of "supply creating demand" rather than the reverse, which is true in an effectively operating market. Supply creates demand in the health care industry fundamentally because the seller (doctor) rather than the buyer (patient) makes most of the decisions on what health services are to be obtained.[7]

Needlemen, another health economist, expressed a similar opinion.[8]

> An effective market is one in which there is competition on the basis of both price and quality, and in which those who sell services are limited in their ability to influence the volume of services they sell and are constrained in the prices they set by competitive pressures. By this definition, an effective market for health care services does not exist in most communities. Competition exists but it is rarely price competition; indeed the nature of current competition based on scope of services, amenities, and convenience is to encourage price increasing behavior. (Emphasis added).[8]

Arthur D. Little, Inc., summarized the policy implication of the debate surrounding competition and regulation. They reported that, in the absence of Certificate of Need regulations, hospitals will compete more vigorously by offering improved facilities to recruit physicians and patients. The resulting "building boom" will drive up operating expenditures over the next ten years by $1.84 for every dollar invested, exclusive of depreciation and debt service.

THRESHOLD LIMITS

Alaska regulations specify that a CON is required for any capital expenditure in excess of $150,000. There is general agreement that this threshold is far too low. Federal regulations have already changed to accomodate a significant increase in CON thresholds. The threshold levels which trigger a CON review should be increased from $150,000 to at least $600,000 for capital expenditures; $400,000 for major medical equipment; and $250,000 for operating expenses associated with new services.

CONCLUSIONS

Recent evidence nationally and available information from the Certificate of Need Program in Alaska indicate that the program has been effective in deterring unjustified projects, guiding capital investment projects, and stimulating improved institutional planning. Together these effects have served to meet the health care needs of the public, prevent duplication of costly services, and restrain the increasing costs of health care. Acute problems with the CON process are correctable by amending the law.

Options available to the Legislature can be placed into three categories: 1) keep the law as it is and maintain the status quo; 2) repeal the law in its entirety; or, 3) revise the law to correct recognized problems.

MAINTAIN CURRENT CON PROCESS

The State would continue to operate the program in its current form. This option assumes the CON process is working efficiently and requires only minor changes.

Because of recognized problems, this option appears to have little merit. Threshold levels are too low, most non-clinical expenditure reviews are a nuisance for applicants and reviewers, and delays in the review process are unacceptable.

REPEAL THE CON LAW

This option assumes that the Certificate of Need process has been entirely ineffective and that marketplace incentives will arise to control capital investments and health care costs.

It also assumes that public review of health care capital expenditures are unimportant and that health care consumers should not have a voice in determining the appropriateness of services in their community.

A competitive pricing market does not exist within the health care services industry of any community in Alaska. In addition, the State of Alaska did not renew its Section 1122 agreement with the federal government in 1981 because the Certificate of Need law was in place.[9] (Section 1122 of PL 92-603 required that health care facilities, which received federal monies under Titles XVIII and XIX, be subject to review to ensure consistency with state health plans.) Repeal of the CON law would leave the State entirely without a capital expenditure review process for health care facilities; therefore, the State would have to rely principally on either the competitive market or incentives established under some kind of a prospective reimbursement system to control costs and allocate resources. (Hospitals are currently reimbursed by the federal government under Medicare and Medicaid on a retrospective basis; that is, after the costs have already occurred. Under this

reimbursement mechanism, there is no real incentive for containing costs. Prospective reimbursement, on the other hand, would require that hospitals negotiate the rate or cost of a service a year in advance. The government and other third-party insurers would reimburse the hospital only at the negotiated rate; therefore, costs exceeding the rate would be borne by the hospital, and, conversely, the hospital would make money if costs were kept below the negotiated rate.)

Because a competitive pricing market does not exist anywhere in Alaska, eliminating the CON program will likely lead to new, unneeded services and facilities which will result in increased operating costs. These costs are passed directly on to the buyers (patients and taxpayers).

Prospective reimbursement, on the other hand, comes in various forms and generally has been found to be more difficult to enact and implement than Certificate of Need. Generally speaking, prospective reimbursement is likely to be successful only where there has been political support for Certificate of Need.[8]

Finally, repeal of CON serves the interests of the health services establishment only. Those who control health-care costs would also be controlling capital investments. Consumers could not have a voice in determining the most appropriate and affordable level of service for their community or region.

MODIFY THE CON PROCESS

This option assumes that the CON program has been effective and can be modified to make it more efficient. The scope of the CON program could be scaled back by raising threshold levels and exempting certain non-clinical capital expenditures. Under this option, the CON program could be reduced further if a market capable of insuring an appropriate allocation of services emerged or to complement a prospective reimbursement system.

RECOMMENDATIONS

The Alaska Health Coalition recommends that negotiations take place among members of the Alaska State Hospital Association, the Legislature, and the Administration to work out revised CON regulations.

The Coalition further recommends that the following revisions be considered as a starting point for the negotiations.

1. Increase the threshold level which triggers a CON review from $150,000 to at least:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

APPENDIX

NATIONAL HEALTH PLANNING AND DEVELOPMENT ACT OF 1974

INTRODUCTION

Public Law 93-641, (National Health Planning and Resource Development Act), passed by the U.S. Congress in 1974, established a national health planning program which was implemented in each state and several American territories. The intent of Congress was to integrate previously sponsored programs (Hill-Burton, Regional Medical Program, Comprehensive Health Planning), retain the best features of each, and address major national, state, and local concerns about the current planning, development, and operation of the nation's health care system. To address these concerns, the Act authorized the designation and funding of state and regional health planning agencies and set forth several functions these agencies had to perform in order to further the "achievement of equal access to quality health care at a reasonable cost."

HEALTH SYSTEMS AGENCIES

Health Systems Agencies (HSAs) were designated as local or regional bodies with the responsibility for preparing and implementing plans designed to improve the health of the residents of its health service area; to increase the acceptability, accessibility, continuity and quality of health services of the area; to restrain increases in the cost of providing health services; and, to prevent unnecessary duplication of health resources. These functions were carried out by interested consumers and providers working together to identify community and regional problems and to develop strategies and recommendations to help alleviate those problems.

HSAs were established as either private, non-profit corporations or public entities governed by boards that had to have a consumer majorities. Operational funds have been awarded through both Federal (PHS) and State (DHSS) sources. In Alaska, the Governor designated three health service areas which were each to be served by an HSA. Alaska's three HSAs are: Northern Alaska Health Resources Association, Inc. (Fairbanks), serving northern Alaska; South Central Health Planning and Development, Inc. (Anchorage), serving south central Alaska, including the Aleutian chain; and Southeast Alaska Health Systems Agency (Ketchikan), serving Alaska's panhandle.

STATE HEALTH PLANNING AND DEVELOPMENT AGENCY

The Governor designated a State Health Planning and Development Agency (SHPDA) as a unit of State government. The SHPDA has the responsibility to conduct the health planning activities of the State, including preparation and implementation of the State Health Plan, and to provide coordination of the HSAs. The SHPDA also supports the function of the Statewide Health Coordinating Council and is responsible for administration of the Certificate of Need program. In Alaska, the SHPDA resides within the Department of Health and Social Services. It currently occupies division-level status.

STATEWIDE HEALTH COORDINATING COUNCIL

The Alaska Statewide Health Coordinating Council (SHCC) is the third entity involved in the State health planning network. The SHCC is a group of citizens appointed by the Governor who oversee the health planning activities within the State. Specifically, they have responsibility for preparation of the State Health Plan. The State Health Plan forms the basis upon which Certificate of Need applications are reviewed. Both the SHPDA and SHCC are supported with a mix of Federal and State funds.

POSITION PAPER/Department of Health & Social Services

Tischer

Position Paper

on

Senate Bill 85 & HB 19

"For an Act repealing the certificate of need program; and providing for an effective date."

Senate Bill 85 repeals those portions of AS 18.07.021 which provide the statutory authority for the Department to administer a certificate of need program and repeals references to certificate of need in other sections of the Statute as well.

The Administration supports Senate Bill 85 as it is currently written.

The Department recommends that the Committee review statutory provisions which relate to health facility development including the following:

Medicaid Programs

The state's participation in the Medicaid program (State dollars fund approximately 52 percent of total program costs) has grown from $1 million in 1972 to nearly $38 million in FY 82 and total costs including federal participation have grown from $2 million to nearly $74 million in this same period. Ninety-two percent of patients in Alaska's long term care facilities are supported by the Medicaid program which means that the state (and federal) government has nearly the full burden of all operational costs for the facility. These Medicaid costs increase when additional beds are added, new equipment is purchased or new services (including new types of manpower) are offered. The Division of Public Assistance must effect a provider agreement with any qualified provider who seeks this agreement.

Capital Budget

Alaska has provided substantial financial assistance in the development of health care facilities. The 12th Legislature provided more than $36.6 million by line item appropriation to expand one hospital; replace two others and provide planning assistance for two rural hospitals. The number of requests for state funding has steadily increased.

Revenue Sharing

Alaska has a revenue sharing program (AS 29.90.010) which provides 25 percent plus interest of hospital construction costs to all non-profit hospitals. This program, administered by the Department of Community and Regional Affairs, provides further support for hospital construction projects in addition to any front-end capital funds provided by the state. This additional health facility construction resource underscores the importance of determining the actual need

for construction, before the State is committed to pay for a major portion of such construction.

Non-profit hospitals each receive a quarter of a million dollars in operating assistance each year through the state's revenue sharing program (AS 29.89.030). Nursing homes and other health facilities also receive assistance based on the number of beds they have. There are no specific requirements as to how such funds are to be expended. Not only are existing health facilities assured of these funds in addition to other state support, but new facilities are encouraged by the availability of these funds.

FEB 18 1983

Subject: House Bill #19

Dear Representative Tischer:

Central Peninsula General Hospital, along with the other hospitals of the Alaska State Hospital Association, would encourage the earliest possible passage of Senate Bill #85.

It is a premise of this organization that the Certificate of Need process is both cumbersome and ineffective in a state such as Alaska. The original purpose was developed to help contain health care costs by discouraging over-building of hospital beds. The State's major health care problem is not over-bedding, but the continuing lack of accessibility to health care programs and facilities due to the rural nature of our state.

I would encourage our legislators to promote the health care agencies in the planning and providing for better health care, and not tying up their time with the fruitless Certificate of Need process.

Please find attached a copy of a letter from the Central Peninsula General Hospital Service Area Board to the Kenai Peninsula Borough Assembly in support of the repeal of the Certificate of Need process.

Again, passage of this legislation at the earliest time is available.

Thank you for your consideration.

Sincerely yours,

Michael J. Lockwood,
Administrator

MJL/pt

enc. (1) Resolution of the Central Peninsula General Hospital Service Area Board for Repeal of the C.O.N.

Central Peninsula General Hospital

February 11, 1983

Kenai Peninsula Borough Assembly

At its regular meeting on February 10, 1983, the Service Area Board of the Central Peninsula General Hospital unanimously endorsed Resolution 83-13 "Urging the Alaska Congressional Delegation to work for Repeal of 42 USC 300 M (D) and Urging the State to subsequently repeal AS18.07 03L-111 which provides for a Certificate of Need program for the Construction, Alteration of Bed Capacity, or Addition or Elimination of a Category of Health Services of a Health Care Facility.

To this end the Service Area Board also endorses House Bill 19 and Senate Bill 85, 2 bills that have been introduced in the 1983 Alaska State Legislature.

Copies of this endorsement have been sent to Senators Stevens, Murkowski and to Congressman Young as well as the Alaska State Legislators.

Position Paper

Certificate of Need Repeal

The Certificate of Need program in Alaska (AS.07) should be repealed. It is both inequitable and unnecessary. Its basic presumption is that the Department of Health and Social Services can make better decisions for hospitals and nursing homes than can the facilities themselves.

Basic Issues

1. Equity

- While controlling non-state construction of skilled nursing facilities (SNF's) and intermediate care facilities (ICF's), the prgram exempts these beds constructed in Pioneers' Homes. Thus any determination of need based on the current program is flawed because forces external to the program can and have - in Anchorage, Juneau, and Ketchikan - altered the factual situation.

- Alaska Native Health Service and the Armed Forces facilities are also exempt from coverage. Their activities have a direct bearing on many other facilities in terms of both service area and referrals.

- Physician office construction and equipment purchase are also exempt.

The inequities are clearly illustrated in the Anchorage area: Providence Hospital, Humana Hospital, Nakoyia Health Care Center, Hope Cottages and the Alaska Treatment Center are included in the CON program while the Alaska Native Health Service Hospital, Elmendorf AFB Hospital, the Anchorage Pioneers's Home and the Diamond Emergency Center are not included. All of these facilities share the same basic service area.

2. Unnecessary

Market place economics and competition should be the determinant of capital expansion for health facilities. In Anchorage, the Municipal Health Commission as well as open board meetings provide the public input into a facility's planning process. In smaller communities the city council or borough assembly who own the facility provide the public input opportunity.

Alaska is a developing state of many isolated regions without any appeal for duplication of services or need to limit access to health care, which is the basic intent of the CON program.

3. Conformity

42 USC 300 m-(d) requires that states conform to the federal program or face a reduction of specified public health service funds.

- Conformity is not achievable without the inclusion of the Pioneers' Homes.

- There are 30 states, including New York and California as well as Alaska, which are not in conformity.

- The penalties have been deferred every year since passage. In December of 1982 they were deferred until October 1, 1983.

- The Reagan Administration is not supportive of continuing this program. Congress is working to create a state optional program without penalties. Thus the likelihood of imposition of penalties is remote at best and the across the board elimination of CON would not change Alaska's current status.

4. Other States

- Louisiana does not have a certificate of need law.

- According to the American Hospital Association, 30 states currently do not conform.

- At least seven states have termination clauses or specific sunset provisions.

5. Attachments

POLICY STATEMENT

CERTIFICATE OF NEED

Position: The Alaska State Hospital Association advocates the repeal of the certificate of need (CON) law, AS 18.07.

Rationale: The CON process has proven costly, wasteful, and unnecessary. The program has become excessively bureaucratic to the point that it undermines economic incentives throughout the decision-making process and so increases the cost of capital projects it takes valuable dollars from patient care. The certificate of need process also removes community control from local jurisdictions in respect to municipally-owned facilities and local advisory boards in respect to corporate ownership.

An alternative approach to state control would permit marketplace economics to control expansion and would rely on local decision-makers to make decisions for their own communities. We see a value in state government continuing its planning function with input from regional and local groups.

Note: This does not contemplate repeal of construction or licensure standards.

DEC Zoning Meeting

PROVIDENCE HOSPITAL

SISTERS OF PROVIDENCE

SERVING IN THE WEST SINCE 1856

3200 PROVIDENCE DRIVE - POUCH 6604
ANCHORAGE, ALASKA 99502
PHONE: (907) 276-4511

December 27, 1982

Mayor Tony Knowles
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Knowles:

Thank you for the opportunity on December 13 to share Providence's plans and some of our concerns with you.

One point came up during our discussion regarding Certificate of Need (CON). I would like to elaborate for you in more detail why the health care providers in Alaska oppose CON and have so strongly supported its repeal.

As you know, the CON law was passed in this and most other states as a requisite to receive Federal funds. The major impetus for the law were:

1. Excess hospital beds in many large cities, and
2. rising health care costs.

The belief was that by controlling the number of beds, capital expenditures and new services, costs would be contained. The results have been much less than desired throughout the country. The law is cumbersome, wasteful and, in fact, costly.

The lack of "success" is especially true in Alaska for some basic reasons:

1. The process which the law sets in place is cumbersome and wasteful. The institution must:
   - submit a letter of intent at least 60 days prior to an application (for no apparent reason);
   - submit an elaborate, repetitive application (most are well over 100 pages). There are 12 separate "criteria" which must be addressed in any application;
   - wait to be declared complete (minimum 20 days; several of our applications were delayed months);
   - then go through a 90-day review process--with three or four public meetings.

2. The costs of CON to the institution are enormous to prepare this cumbersome document (at least 35 copies) and submit to the minimum 110-day process. There are also the institutional costs of delaying implementation and watching the price of a piece of equipment or construction project increase several percent points with inflation.

   The cost to the public is also great in the state, regional and local staff needed to coordinate the program, prepare staff analyses and hold public meetings.

3. The dollar limit for what must be reviewed has been ridiculously low--$150,000. The federal law has allowed that limit to be raised to $400,000 and $600,000 although the Alaska legislature failed in its last session to raise the limits. Some states have raised the limit to $1 million or more. To have a limit of $150,000 or even $600,000 when the hospital's annual operating budget is $75,000,000 (such as Providence's) is overkill.

   In just 1982 alone, Providence has prepared 6 CON applications, including two equipment replacements (for a CT Scanner and a Cath Lab), a $250,000 computer enhancement for an x-ray machine and most absurd, a $167,000 replacement incinerator (25 years old, replacement required by State and EPA codes!). The State did not give final approval on the incinerator until the 90th day.

4. The law itself is overkill in Alaska. Designed for areas of heavy population, excess hospital beds and competition, the law does not work for Alaska for several reasons:

   - The law only covers private facilities--not public health, nor state owned (API or Pioneer Homes), nor military.

   - Alaska has only one city with more than one hospital and only three private ("eligible") hospitals of over 100 beds.

5. The law is reactive to existing decision making processes. Most hospitals in the State already have local public review and approval designed in their own budget review processes. Many hospitals are owned by municipalities, and all have governing or advisory boards of local citizens. These citizens should have control of the expansion and budgetary decisions of their own institutions. Several other layers are unnecessary. Hospitals and their boards are capable of making sound financial and program decisions.

As the attached Policy Statement of the Alaska State Hospital Association (ASHA) notes, we are supportive of state and local planning for the health care needs. The process should be positive and proactive-- encouraging institutions to respond to needs in the community rather than reactive, cumbersome and negative.

We encourage the city to support the ASHA position on repealing the state CON law. Your own Municipal Health Commission is a strong local planning body which helps identify health needs and encourages solutions. It also serves to review public expenditures in health. Those roles are appropriate. It should be freed from the cumbersome CON review.

Thank you for giving me the opportunity to share our concerns with you.

Best wishes for a prosperous 1983.

Sincerely,

Al M. Camosso
Administrator

Re: 10P 550016
Alaska SHPDA

Dennis L. DeWitt
President
Alaska State Hospital Association
319 Seward Street
Juneau, Alaska 99801

Dear Mr. DeWitt:

Your letter dated June 11, 1982, requested information about Region X's intentions as a result of the failure of the Alaska Legislature to pass amendments proposed to bring the State Certificate of Need program into compliance with the Federal planning law, as amended. Our course of action is quite clear. We will continue to fullfill our mandated responsibilities guided by actions and time frames specified in the law.

Under the existing provisions of Title XV of the Public Health Service Act, as amended, current law requires (in order to be fully designated) that a SHPDA must meet all requirements for full designation, including that of having a complying Certificate of Need program.

If a SHPDA is not eligible for full designation by a certain date (which for Alaska is January 19, 1983) the Department must invoke the statutory penalty of reducing most Public Health Service grants and contracts to any entity in the State by 25% the first year, 50%, 75%, and 100% over the next three years. Amendments contained in PL 97-35 extended the date by which a State must have a fully designated SHPDA to avoid imposition of the penalty. However, PL 97-35 also amended Section 1521(b)(2)(B) by specifying that a conditional designation agreement could not extend beyond a State's penalty date.

Fully designated SHPDAs (such as Alaska) which do not have complying CON programs but continue to meet other requirements, will be returned to conditional designation. As noted above, PL 97-35 prohibits the conditional designation of any SHPDA from extending beyond its penalty date. Any SHPDA which remains conditionally designated on its penalty date must be terminated. Therefore, we will send a termination notice to any conditionally designated SHPDA 90-days prior to its penalty date, if it still has not demonstrated that it has a complying CON program.

The enclosed copy of a letter to Commissioner Beirne, from the Regional Health Administrator, further emphasizes the critical nature of having a complying CON program in Alaska.

Also the enclosed copy of a 1981 letter addressed to Mr. Ivan Lawner, Esq. concerning Pioneer Homes Certificate of Need review issues, reflects our unchanged position.

I hope the facts in this letter provide the detail of information required to understand the situation. Please call or write, should you need further assistance.

Sincerely,

John D. Whitney
Director

Re: IOP 550016
Alaska SHPDA

Helen D. Beirne, Ph.D.
Commissioner
Department of Health and
Social Services
Pouch H 01
Juneau, Alaska 99811

Dear Dr. Beirne:

The State of Alaska's Department of Health and Social Services full designation agreement with the Department of Health and Human Services is being extended for three months, until September 30, 1982. As you know, because Alaska's Certificate of Need Program does not comply with Federal requirements, it is necessary that the SHPDA be returned to conditional designation. As required by statute, this 90-day extension of your current designation is being given to allow you to request and prepare for a hearing, if you should want one. Letters from the Bureau of Health Planning to you and to the Governor will further explain this process.

The following conditions are to be considered a part of the extended full designation agreement:

1. If the Agency is unable to retain full designation after September 30, 1982, it will be returned to conditional designation for the period October 1, 1982 to June 30, 1983.

2. The designation of the Agency will automatically terminate when the Agency reaches its penalty date, if the Agency still has not achieved full designation.

You may at any time prior to your penalty date (1-19-83, per PPM 82-12) submit documentation which you believe contains evidence that the State's CON program complies with the minimum Federal requirements, or a certification by the State's Attorney General, attesting to the program's complian

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Please sign both copies of this letter, indicating your acceptance of this extension with conditions. Return one copy to this office. As soon as we receive the signed copy, we will issue a Notice of Grant Award for the extended designation period.

Sincerely,

Dorothy H. Mann, M.P.H.
Regional Health Administrator

Re: IOP 550007-05

Mr. Ivan Lawner, Esq.
Hellen & Partnow
524 G Street
Suite 710
Anchorage, Alaska 99501

Dear Mr. Lawner:

This is to respond to your recent letter concerning Certificate-of-Need review of a skilled nursing facility addition to the Pioneer Home in Anchorage. In that correspondence you raised two issues: the need for clarification of our 1978 letter to Howard Gabriel regarding C/N coverage of Pioneer Homes, and the compliance of the Alaska C/N program with federal standards. These matters will be addressed separately.

1. In our September 11, 1978 letter to Howard Gabriel, Director of the Southeast Alaska HSA, we were assuming that Pioneer Homes were only residential or domiciliary care facilities; there was no understanding that inpatient skilled nursing care was provided in these institutions. Given this understanding of the nature and services of Pioneer Homes at that time we were correct in concluding that they would not be included in the federal definition of "health care facilities" which would require coverage under Certificate-of-Need programs. If indeed skilled nursing services are provided in these institutions, they would be considered "health care facilities" as defined by our C/N regulations. The 1978 letter did not consider a Pioneer Home to be such a facility.

2. We have reviewed the Alaska C/N statute and implementing regulations to determine whether Pioneer Homes would be included in the definition of a health care facility. We found that:

   a. The Alaska C/N statute defines a "health care facility" as:

      A private, municipal. . . hospital, psychiatric hospital, turberculosis hospital, skilled nursing facility. . . . (Sec. 18.07.111(7)).

   b. The Alaska C/N regulations, in turn, define "health care facility" as:

      Any of those listed in AS 18.07.111, as defined, where appropriate, in 42 CFR 123.401 (adopted 1/21/77). (7AAC07.130)

c. The State's C/N statute and regulations, taken together and including the cross reference to 42 CFR 123.401, would provide coverage of a distinct part of an institution and would, therefore, meet the federal definition of a skilled nursing facilities, i.e., an institution or a distinct part of an institution which is primarily engaged in providing inpatient skilled nursing care and related services for patients who require medical or nursing care . . . . (42 CFR 123.401)

From the above points, it would appear that the Alaska C/N program adequately defines "heath care facility" and "skilled nursing facility." It is the responsibility of the state to follow its own C/N statute and regulations. If there is an on-going and sustained pattern of not following their statute and regulations, we would certainly assess the state's overall C/N program and then take appropriate action.

Please call us should you have further questions.

Sincerely yours,

John D. Whitney, Director
Division of Health Resources
Development PHS, Region X

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF ADMINISTRATION

OFFICE OF THE COMMISSIONER

POUCH C
JUNEAU, ALASKA 99811

465-2200

May 29, 1981

Honorable Donald E. Clocksin
Chairman, Health, Education and
Social Services
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Clocksin:

This is in response to your request to put in writing my verbal testimony before your committee on CSSB 225. I will try and confine my remarks to the major issues.

Administration's position is that the Legislature has always implicitly exempted Pioneers' Homes from the certificate of need program. The Senate has concurred with this position as evidenced by CSSB 225. We are asking that the House members be afforded the same opportunity to express their will as the Senate.

There appears to be some confusion existing with the recent State Supreme Court decision of South Central Health Planning and Development, Inc. vs the Department of Administration, on certificate of need. At issue was whether or not the Legislature exempted Pioneers' Homes from certificate of need. The court found that there is no language in State statutes which can reasonably be read as exempting skilled nursing facilities from the certificate of need process when they are contained in Pioneers' Homes. Consequently, whether or not the Legislature intended to exempt Pioneers' Homes now becomes moot. The Legislature's intent can now be established only through the legislative process of amending existing law to allow this exemption.

There has been a substantial amount of discussion centering around the need for proper planning so that health facilities in Alaska are not overbuilt. This is an admirable and worthy objective, and I can assure you that this Department supports health facility planning. However, the existing system under the certificate of need program is fraught with inequities and frustrations; further, it does not represent a comprehensive planning effort.

C-89LH

There are three providers of health facilities; the federal government, the State government, and the "private sector." However, the federal health facilities don't come under the certificate of need program, and in most states this wouldn't pose any problem. The military contingent in California, for instance, would represent a small portion of the state's total population and as such would not greatly impact the planning process for certificate of need. In Alaska, the opposite is true. The federal government is a major provider of health care and facilities. Roughly one-fourth of the state's population are eligible to use federal health facilities (military base, Public Health, Indian Health, etc.). This has a devasting effect on trying to logically plan for state and "private sector" health facilities when a critical component is missing.

In addition, if we look closely at the "private sector" we see that it is not truly private. A substantial portion of the revenues of private nursing homes and health facilities originate through state and federal programs. State and federal rules, regulations, requirements, and laws, guide and govern, in minute detail, the construction and operation of private health facilities. This includes the proper ratios of professional staff to patients, the type of equipment allowed, size of hallways, reporting procedures, and many others. In effect, the "private sector" is part of the "public sector." Consequently, the charge that the State, through the establishment of Pioneers' Homes, is unfairly competing with the private sector is a fallacious argument.

There has also been considerable discussion on the impact of granting Pioneers' Homes an exemption from certificate of need as it relates to federal programs. Mr. Vern Perry, Director of the Division of Pioneers' Benefits spoke with Mr. Jim Egan, Regional Project Officer of the Office of Health Planning, Region X, U. S. Department of Health, Education and Welfare, on Wednesday May 27, regarding the certificate of need program.

QUESTION: What effect would there be on the State of Alaska if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: It would have no effect on medicare, medicaid, AFDC or Indian Health Service. It could only affect categorical programs such as alcoholism, EMS, Neighborhood Health Clinics, Mental Health Clinics, Day Care, etc.

QUESTION: Would the federal government actually discontinue such programs as alcoholism and mental health if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: No! Absolutely not. In his opinion, under the new administration, there would be no federal sanctions whatsoever in health care programs, especially since the responsibility for this is being turned over to the states.

Further, discussions were held with the States of California and Washington regarding their certificate of need programs. In California, Mr. Ken Umbach (916/323-6955) of the Office of Statewide Health Planning and Development was contacted. He stated that California has been out of conformance with the federal certificate of need program since 1969. Their latest date for coming into conformance is October. He stated that if they did not meet the deadline that the feds would probably extend it. Mr. Jim Bettridge of Washington Health Care Facilities Authority (206/753-6185) indicated that the feds were withdrawing total support from the certificate of need program by 1983.

These conversations indicate that:

i. The federal government is not inclined to impose sanctions on a State for nonconformance with the certificate of need program;

ii. There are states which are nonconforming, and have been nonconforming for a number of years, on which federal sanctions have not been imposed; and

iii. The federal government is withdrawing total support for the certificate of need program by 1983. If the state wants to continue a planning process for health facility development it will have to provide for the process by using General Funds monies. Based on the aforementioned problems, now would be the appropriate time to revise this planning process to make it more meaningful.

Finally, a compromise position has been mentioned in which the new nursing wing at the Anchorage Pioneers' Home and the new Pioneers' Home in Ketchikan would be totally grandfathered into law and not made subject to certificate of need. This compromise does not address a truly complex problem.

The Fairbanks Pioneers' Home presently is serving twelve skilled nursing beds in unlicensed beds. Unless a certificate of need is issued which allows licensing of these beds, these twelve pioneers would have to be discharged.

The Fairbanks and Palmer Pioneers' Homes are full to capacity with skilled nursing patients at the present time. If we are to accommodate anticipated need in the near future, additional skilled nursing facilities will have to be constructed within the next few years. This expansion would be impossible unless a certificate of need is issued.

The Department of Health and Social Services, in recent licensing inspections, has advised a significant number of residents in the ambulatory sections of all the Pioneers' Homes should be designated intermediate care patients. Intermediate care requires both a certificate of need and a significant increase in staffing, installation of call buttons or other signalling devices, and closer attention to patients when taking medications, etc. The number of patients which might be considered in need of intermediate care are: thirty at Sitka, twenty at Fairbanks, twenty at Palmer and forty at Anchorage (in the new wing).

Funding to provide intermediate care was not included in the FY 82 operating budget. Although a dollar figure is not available at the present time, a significant increase will be necessary if we must comply with the certificate of need program. Passage of SB 225 would eliminate this situation.

In summary:

1. Administration believes the Legislature had always intended to exclude Pioneers' Homes from certificate of need;

2. The certificate of need process is not appropriate for Alaska;

3. There needs to be planning for health care facilities and a more responsive process needs to be developed;

4. Grandfathering the nursing wing at Anchorage and the new Pioneers' Home at Ketchikan will not solve the complex problems existing at the Fairbanks, Palmer, and Sitka Pioneers' Home; and,

5. Passage of CSSB 225 will eliminate the potential for pain and suffering by allowing Pioneers' Homes residents to remain in their home.

If I can be of any further assistance to you or your committee, please give me a call.

Sincerely,

Frederick B. Muller

accordance with subsection (b)(2), or (b)(3) of this section (as the Secretary determines appropriate), enter into another agreement with the Governor for the designation of a State Agency.

Failure to designate State Agency within specified period; reduction in allotment, grant, loan, loan guarantee, or contract

(d)(1) If an agreement under subsection (b)(3) of this section for the designation of a State Agency for a State is not in effect upon the expiration of—

(A) the fourth fiscal year which begins after 1975; or

(B)(i) if the legislature of the State is in a regular session on December 17, 1980 and the legislature will be in session for at least twelve months from such date, twenty-four months from such date, or

(ii) if the legislature of the State is in session on December 17, 1980, but twelve months do not remain in such session after such date or if the legislature of the State is not in session on such date, twenty-four months after the beginning of the first regular session of the legislature beginning after such date,

whichever occurs later, the Secretary shall take the action prescribed by paragraph (2).

(2) If upon the expiration of the period applicable under paragraph (1) an agreement is not in effect for the designation of a State Agency for a State, the Secretary shall until such an agreement is in effect take the following action:

(A) During the first twelve months after the date of the expiration of the applicable period, the Secretary shall reduce by 25 percent the amount of each allotment, grant, loan, and loan guarantee made to and each contract entered into with an individual or entity in such State during such period under this chapter or the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

(B) During the second twelve months after such expiration date, the Secretary shall reduce by 50 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(C) During the third twelve months after such expiration date, the Secretary shall reduce by 75 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(D) After the expiration of thirty-six months after such expiration date, the Secretary may not make or enter into any such allotment, grant, loan, loan guarantee, or contract.

The Honorable Mike Beirne
Chairman
House HESS Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Rep. .sentative Beirne:

I am enclosing a Program Policy Notice we recently received from the Bureau of Health Planning in the U. S. Department of Health and Human Services. This Notice emphasizes that states which do not have State Health Planning and Development Agencies which fully comply with federal requirements will lose federal support for health planning efforts and will also lose most federal Public Health Service dollars. Alaska currently receives some $5 million annually in such federal funds. Our lack of compliance would result in one quarter of these funds being withheld for four years until certain federal public health service funds are no longer available to Alaska.

We appreciate the hearing you conducted on House Bill 195. We believe this bill, with the amendments we offered, would bring our State Health Planning and Development Agency into full compliance with federal requirements. Your assistance in helping to move this legislation would be very much appreciated.

We appreciate your assistance and support in this matter.

Sincerely,

Helen D. Beirne

November 4, 1982

The Honorable Ted Stevens
United States Senate
Washington, D.C. 20510

Similar letter sent to:
Senator Murkowski and
Congressman Young

Dear Senator Stevens:

As you are well aware the State of Alaska is not in conformity with the National Health Planning and Development Act and without federal action in 1982 faces penalties in grant monies under the Public Health Service Act and the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970. To avoid this penalty it is imperative that Congress repeal 42 U.S.C. 300m-(d) (copy attached).

This Association as well as the Alaska State Medical Association (resolutions attached) are opposed to the continuation of the state Certificate of Need law. Both are committed to its repeal in 1983. Repeal of 42 U.S.C. 300m-(d) will greatly assist our efforts.

We have communicated our support for various measures considered by this Congress to restructure the federal law. It appears however, that a full reform may be a consideration which must be left to the next Congress. If that is so, it is imperative that you secure repeal of 42 U.S.C. 300m-(d) before the current Congress adjourns in December.

All of those concerned with this issue including Congressman Waxman, the National Governors Conference, the American Hospital Association, etc., agree on removing sanctions against states which do not conform to the federal program. The notion of further delay of the sanctions does not assist anyone, it simply prevents states such as Alaska from dealing with its own law on anything beyond a temporary basis.

For these reasons we urge you to secure the repeal of 42 U.S.C. 300m-(d). This will permit the legislature of the State of Alaska to deal with its law in whatever manner it deems appropriate. Further, we urge that this repeal be secured prior to the adjournment of the 97th Congress.

Sincerely,

Dennis L. DeWitt

POLICY STATEMENT

Blue Cross of Washington and Alaska supports the retention of Certificate of Need. That process should, however, be modified as follows:

1. The dollar threshold should be increased to $1,000,000 per application.

2. Modifications which are necessary to reduce health and safety hazards should be exempted.

3. The State Health Planning and Development Agency should become the sole health planning body for the State and should be charged with health planning for all Alaskans. A provision should be included allowing municipalities to establish local health councils to the State Health Planning and Development Agency, who may make recommendations on planning matters.

FEB 9 1983

February 03, 1983

The Honorable Mae Tischer
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Tischer:

The Board of Directors of the Northern Alaska Health Resources Association has discussed the issue of repeal of the Certificate-of-Need (CON) law as currently proposed in HB 19. We reached agreement that a modified CON process is preferable to repeal. Although we recognize that there are problems with the current process, we believe that they can be solved by making major revisions in the regulations rather than by repealing the law. There is little disagreement that the threshold limits that trigger CON review are too low or that review of many non-clinical expenditures is a nuisance. Moreover, the process should be tightened up so that reviews are completed in a timely and efficient manner.

There are several reasons why we believe the CON process should be retained; however, the most important reason has to do with citizen participation in deciding what health care services and facilities are most appropriate and affordable for a specific community or region of the state. The issue has not been whether a CON should be approved or denied but rather that a discussion or negotiation has taken place between the community and health-care facility regarding local, regional and statewide needs. The Certificate-of-Need process has been a forum for these discussions and has served to guide the appropriate development of health care services and facilities throughout the state.

A recent trend has been to appropriate increasing amounts of public funds for construction or expansion of health care facilities in Alaska (i.e., $31,500,000, FY 81-82). Moreover, we are seeing the cost of health care increasing at a rate which has been consistently higher than the general rate of inflation. It has been demonstrated that capital investment contributes significantly to the growth of total hospital expenditures. Although it is true that general inflation, sophisticated technology, and increasing staff requirements also contribute to rising costs of hospital care, hospital capital investments add to the operating costs by an amount in excess of the value of the investment. In April, 1982, Arthur D. Little, Inc., a health economics consulting firm under contract with the National Center for Health Services Research, estimated that the present value of additional operating expenditures in the next ten years is $1.84 for every dollar invested in capital improvements, exclusive of depreciation and debt service. Uncontrolled

529 5th avenue, suite 8 fairbanks, alaska 99701 telephone (907) 456-2553

capital expenditures for more or bigger health care facilities can only serve to drive up operating costs at an accelerated rate. These increased costs are ultimately passed on to the patient or community. We believe that people must continue to have the opportunity and responsibility through the CON process to determine what level of health services they are willing to pay for. Competition in the health care field essentially does not exist, especially in Alaska where most communities cannot afford more than one health care facility; therefore, the only way that we can keep a lid on overbuilding is through a capital expenditures review program similar to the current Certificate-of-Need program.

Several states have already revised their CON process (among them Colorado and New Mexico) with full support of their respective state hospital associations. Revision of Alaska's CON process must occur if we expect to see the process work as it was designed to do. The following revisions are offered for consideration:

1. Increase the threshold level which triggers a CON review from $150,000 to <u>at least</u>:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

In summary, there is little disagreement that there are problems with the current CON process; however, the forum that the CON process provides for community discussion about the relative merits of a proposed project far outweigh what we perceive to be correctable problems. We recommend revision of the CON process rather than repeal.

Sincerely,

J. B. Carnahan

February 15, 1983

Dear Alaska Legislator:

The Executive Committee of South Central Health Planning and Development, Inc., yesterday met to discuss the proposed Certificate of Need repeal bill. The Committee asked me to convey to you our support for the attached position paper developed by the Alaska Health Coalition.

[redacted]

If you have questions on this issue, you might contact Executive Director, Peggy Wilson.

Sincerely,

Margaret McClure Wilson

February 11, 1983

TO: Members of the Alaska Legislature

Proposed legislation (HB 19 and SB 85) would repeal Alaska Statute 18.07.031-18.07.111, better known as the Alaska Certificate of Need (CON) law. These bills reflect the position of the Alaska Hospital Association, whose member institutions are subject to the provisions of the CON process. The attached paper, developed by the Alaska Health Coalition, was written to provide legislators and the public with a series of alternatives to consider during discussion of these important bills. The paper summarizes the provisions of the CON law, discusses several of the problems which have been identified with the current process, and reviews the effectiveness of the CON program, both nationally and within Alaska. In addition, a list of recommendations is provided for consideration in revising the current CON law.

The Alaska Health Coalition is a group of interested citizens with memberships from the three Alaska Health Systems Agencies and the Statewide Health Coordinating Council. The primary purposes of the Coalition are to review the need for health planning, development, and promotion activities and to develop goals, describe functions, and recommend structures to achieve optimal health for the citizens of the state. Therefore, we believe that the subject of public review of capital expenditures as currently provided for in the Certificate of Need law is an important issue which deserves a reasonable, objective discussion. We present this paper for the purpose of initiating this discussion.

For additional information, please contact any of the following organizations: Northern Alaska Health Resources Association, Fairbanks (456-2553); South Central Health Planning and Development, Anchorage (278-3631); or, Southeast Alaska Health Systems Agency, Ketchikan (225-9681).

Best regards,

EXECUTIVE SUMMARY

Alaska's Certificate of Need (CON) Law was enacted by the State Legislature in 1976, following passage of Public Law 93-641, the National Health Planning and Resource Development Act of 1974. Provisions in the CON law require that non-federal health care institutions apply for and receive a Certificate of Need from the State of Alaska before proceeding with major capital investments which will result in new construction, alterations or renovations, and/or new services. The Thirteenth Alaska Legislature currently has before it companion bills, HB 19 and SB 85, which provide for repeal of the CON law. The purpose of this paper is to review the data available on the effectiveness of the CON process, both nationally and within the State of Alaska, and to present alternatives for consideration by the Legislature regarding public review of capital expenditures for health care facilities.

Evidence is presented that the CON program has had an effect on limiting the amount of capital expenditures. Furthermore, current economic research has demonstrated that, for every dollar of capital investment made in a health care facility, an accompanying increase in operating costs can be expected amounting to 184% of the original investment in ten years.

Evidence gathered on Alaska's experience with the Certificate of Need program indicated that it has been effective in deterring and/or guiding capital investment within the health-care industry and has stimulated improved planning within the health-care institutions themselves. Examples are presented which illustrate how the process created this impact.

Several issues are discussed relating to recognized concerns within the current CON process. These issues include: 1) costs attendant to developing a CON application; 2) delays in the review process; 3) loss of community control; 4) marketplace economics; and, 5) the dollar-threshold limits which require a CON.

The conclusion drawn from this review was that, although there are problems with the current CON process, revision of the law is preferable to outright repeal. Recommendations for revision of the law are provided and include:

1. Raising threshold levels.
2. Exempting non-clinical capital expenditures.
3. Expediting reviews of equipment replacement.
4. Specifying time limits on reviews.
5. Providing legislators with information on the outcome of reviews in their districts.
6. Providing for a sunset review of the process.

CERTIFICATE OF NEED PROGRAM

PURPOSE

The most controversial aspect of the health planning effort, in Alaska and nationwide, has been the Certificate of Need (CON) program. Borrowed from public utility regulations, the earliest CON program was enacted by New York in 1964. Twenty-six other states instituted CON programs in the next ten years, and, with the passage of Public Law 93-641, CON was mandated for all states. Alaska's Certificate of Need statute (18.07.031-.111) was enacted by the State Legislature in 1976 and amended in 1981.

As originally designed, the CON program was implemented to curb rapidly escalating costs of health care by stemming uncontrolled capital investments in new health-care facilities, services, and high-technology equipment. To accomplish this goal, the CON program had several primary objectives: 1) to prevent unnecessary duplication of services and facilities; 2) to reduce the number of available hospital beds or at least not allow the growth of hospital beds to exceed guidelines established in the State Health Plan; 3) to promote an equitable and efficient allocation of resources; and 4) to determine if less costly alternatives to expensive capital expenditures were available to accomplish the same purpose.

WHO MUST APPLY

The State of Alaska requires approval of capital expenditures for projects which meet or exceed certain thresholds:

1. Capital expenditures in excess of $150,000 toward building, improving, or purchasing a health care facility, including lease or purchase of equipment, costs of any study surveys, designs, and site acquisitions and preparations.

2. Any change within a two-year period in the licensed bed capacity of a health care facility amounting to 10 beds or 10 percent, whichever is the lesser, which increases or decreases the number of beds or redistributes beds among different categories of service.

3. Any addition or elimination of a major type of service offered in or through the health care facility.

A project meeting or exceeding these thresholds is required to obtain a Certificate of Need from the State of Alaska prior to implementation.

THE PROCESS

An applicant enters the CON review process by submitting a "Letter of Intent" to the Department of Health and Social Services (DHSS) and to the appropriate health systems agency describing briefly the scope of the proposed activity. If the DHSS determines that the project is subject to CON review, the applicant develops a formal application and submits it to the State agency and the regional health systems agency. In most cases, a pre-application conference is scheduled with the applicant to minimize any potential misunderstandings and to achieve an agreement on what would represent a successful application. Once the State agency certifies that the application is "complete" -- that it contains sufficient information necessary to conduct an objective review -- the agency has 90 days to review the application and to submit an analysis to the Commissioner of DHSS for final action. Within the 90-day review period, the regional health planning agency has 60 days to review and seek public comments on the appropriateness of the proposed application. The HSA submits its findings and recommendations to the Commissioner. Once the Commissioner has considered the information that has been submitted, he decides whether or not to issue a Certificate of Need to the applicant. The Commissioner notifies the applicant in writing of the decision. Copies of the decision are sent to the Health Systems Agency and are published in regional newspapers.

EFFECTIVENESS

Nationwide

Nationally, credible information is just beginning to emerge regarding the effect of capital expenditures review. Although this topic has been of interest for many years, much of the early literature is of little value because of a basic lack of understanding about the process and outcome of capital expenditure review programs.[1] Two recently completed studies in the State of Massachusetts have reported CON impacts.[2,3] The first analyzed hospital capital investment among short-term general voluntary hospitals between 1967-1976. The results were that, by 1976 and beyond, CON review reduced all dimensions of project scale and cost by as much as two-thirds of that originally proposed. The second study found that the formal and informal actions of the CON agency from 1972-1976 resulted in small, but statistically significant, reductions in the rate of hospital investment.

Two studies conducted in 1982 by Arthur D. Little, Inc., shed additional light on the potential impact of capital expenditures review.[4,5] The first study analyzed the effect of capital expenditures review decisions in five states: Colorado, Florida, Maryland, Massachusetts, and Oregon (chosen for their geographical and regulatory differences). Based on their analysis, CON programs appeared to be effective in limiting the amount of capital expenditures undertaken. Furthermore, they discovered that, for every dollar of capital investment, there was a definite increase in operating costs. They projected that, over a ten-year period, a dollar of capital investment generates additional operating costs with a present value of $1.84 (exclusive of

depreciation and debt service). They concluded from these results that CON programs have the potential to play an important role in curbing hospital cost inflation.[4]

A second report by Arthur D. Little, Inc., involved an analysis of information from a six-state study.[5] For the states of Virginia, South Carolina, Washington, New Jersey, Iowa and Colorado, Arthur D. Little undertook a review of Certificate of Need programs for the twelve-month period beginning July 1, 1979 to June 30, 1980. Three significant findings were reported: 1) certain capital costs were not incurred as a result of the CON review program; 2) the objectives contained in individual state plans and health systems plans tended to deter capital expenditure projects; and, 3) pre-application conferences -- health planners and providers working together to avoid project denial -- were effective means of reducing the "administrative costs" of the review process as well as excessive capital expenditures.[6]

Alaska

Currently (February 1983) there are five projects under review by the Department of Health and Social Services that total $106,000,000. Two additional applications are anticipated, totalling $20,820,000. These seven applications ($126.8 million) provide an interesting contrast with the more than 30 projects which were approved for $149,000,000 in the previous five years (1977-1982).

Two projects with a combined total of $12,400,000 have been denied during the past five years. In addition, several other Letters of Intent have been received by the Department for which applications were never received. It is impossible to estimate how many applications or letters of intent were never submitted because of the presence of the CON law.

The Alaska CON Program has been effective in accomplishing three things. First, it seems reasonable to expect that CON has deterred misdirected projects that could not withstand the test of public scrutiny. It has, therefore, acted to uphold existing plan standards. Secondly, it has guided institutional actions into areas which are compatible with the goals and objectives of the State as reflected in State and regional health plans. Thirdly, the presence of the CON program has promoted better planning on the part of the health care institutions throughout the State.

Deterrent Effects

Although the deterrent effect of Certificate of Need is admittedly difficult to demonstrate, there is evidence from the number of "Letters of Intent" which never resulted in an application that CON is a deterrent. A specific example of this phenomenon was observed during a recent effort by four different applicants to provide inpatient alcoholism treatment services in and around Anchorage. The Department of

Health and Social Services and the local health systems agency identified a need for 40-80 alcohol-treatment beds in the area. Due to pre-application planning, only two of the four applications were completed for final consideration. Both were subsequently approved.

Improved Institutional Planning

Situations in which the CON process provides expert guidance and stimulates better institutional planning do not always result in smaller, less-expensive projects. For example, Valley Hospital in Palmer submitted an application to complete a minimal and temporary renovation of their 30-year old facility at a cost of $2,000,000. Part of the renovation included additional insulation to prevent heat loss through the roof. At the suggestion of the Department, a structural engineer was asked to study the ability of the roof to withstand the increased load of snow which would not be melted because of the insulation. The Department also requested a life-cycle cost analysis which would determine the cost of a temporary renovation as opposed to costs of major renovation. The results of these inquiries demonstrated that the roof was not designed to withstand the extra load of snow and that, when total operating expenses and capital costs were considered for a 25-year period, it would be less expensive to forgo the minimal renovation and proceed with a major renovation. The result of this review was an approval for a major renovation project -- at a long-term cost savings.

Petersburg General Hospital filed a letter of intent for $3,400,000 to renovate an existing acute care facility. Following an architectural assessment of the facility and a life-cycle cost analysis requested by the State, it was determined that the cost of new construction would be preferable to renovation. Subsequently, a CON was approved for $7,150,000. Obviously, the CON process is not punitive, but rather seeks to use health care resources to gain the maximum benefit for the community.

Hospitals in Homer and Fairbanks submitted proposals for review which contained "shelled-in" space for which no use was intended for the immediate future. In Homer, the Department requested further assessment of the situation to identify a solution to future use of the shelled-in space. As a result the plans were redrawn for the renovation and expansion and included the proposed use of the shelled-in space.

Better Conformance with Identified Community Needs

In Fairbanks, the CON process stimulated a community discussion of the need for inpatient psychiatric services and a concern for approving the construction of two shelled-in floors that did not have an identified use. Because of discussions at the local level during the review by the health systems agency, the hospital agreed to specify the intended use of the shelled-in space and, furthermore, to enter into a planning process with the community during the following year to determine the most appropriate configuration for the proposed services.

Summary

Although it is difficult to place a dollar figure on the impact of the Certificate of Need program over the past six years, it appears that Alaska's program has effectively deterred and guided capital investment within the health care industry and has stimulated improved planning within the institutions themselves. Because of the CON program, Alaskans have saved millions of dollars in operating costs which would have resulted from unneeded expansion of facilities and services. Moreover, the State Legislature and the Administration should feel some measure of assurance that, because of the CON process, the millions of dollars in public funds that have flowed from the State to health care facilities for construction and operation are being used for projects which meet an identified need, do not duplicate existing services, and are financially feasible.

PROBLEMS WITH THE CON PROCESS AND RECOMMENDATIONS FOR IMPROVEMENT

INTRODUCTION

Proponents and opponents of the Certificate of Need program agree that the current CON process requires substantial changes. Opponents cite several reasons for their decision to push for repeal of the current law. Among the reasons are: 1) significant costs are involved in developing a CON application and proceeding through the review; 2) delays in implementation are caused by an extended review period; 3) the CON process removes community control; 4) market-place economics should control capital investment; and 5) threshold limits which trigger a CON review are too low.

COSTS

No one denies that there are costs attendant to developing a CON application. The majority of those costs, which have been estimated to run as high as $40,000 for the more complex projects, can be attributed to personnel costs. Most of these costs would continue in the absence of CON if a facility did a credible job of planning for future services. In order to gain public support, justify the financial feasibility of a construction project, and obtain adequate architectural designs, planning still must occur. The costs of institutional planning will not disappear in the absence of CON.

DELAYS

Extended review schedules have in some cases resulted in delays in construction start-up time which have been not only frustrating but also costly. It seems reasonable that the cause for these delays can be identified and corrected by revising the regulations regarding CON review. For example, provisions could be made to expedite review of capital equipment replacement and to set a time limit for a decision by the Commissioner subsequent to a recommendation by a regional health planning agency. Also, by raising the threshold limits which require a CON, there will be approximately 25% fewer reviews to do. This should improve the efficiency of the review process.

COMMUNITY CONTROL

Concern has been expressed that the CON process removes community control from local jurisdictions in the case of municipally-owned facilities and local advisory boards with respect to corporately-owned facilities. However, local governments and advisory boards do not necessarily maintain a regional or statewide perspective when it comes to considering new services and facilities. In other words, persons who

serve on local hospital advisory boards are chosen for their expertise and dedication in local issues; often, however, a project will have regional or statewide implications that cannot be properly addressed at the local level. The CON process, at the very least, offers local, regional and statewide perspectives on the need and appropriateness of a proposed project. Instead of removing community control, the CON process bestows some control on the community at large.

In addition, a trend is evident that an increasing amount of public funds are being appropriated by the legislature for construction and renovation. It seems reasonable that in a time of decreasing state revenues, citizens should have an opportunity to influence the distribution of these funds so that they meet state and regional needs instead of local demand. The CON process ensures public participation in these decisions.

MARKETPLACE ECONOMICS: COMPETITION vs. "REGULATION"

In recent years, there has been a popular theory that the problems in U.S. health services can be blamed on excessive government intervention and regulations. It has been argued that high costs and related problems could be solved by a "return to the free market and competition."[6] Two recent articles argue to the contrary.[7,8]

Roemer and Roemer, well-known health-economics experts, examined the past and present operations of free trade and competition in the health care system and found that not one of at least five conditions necessary for competition existed.[7] In addition, they found that the free market created a geographic maldistribution of health manpower, causing serious problems for rural populations. Furthermore, they discussed the paradoxical problem which has been demonstrated for every component of the health care industry of "supply creating demand" rather than the reverse, which is true in an effectively operating market. Supply creates demand in the health care industry fundamentally because the seller (doctor) rather than the buyer (patient) makes most of the decisions on what health services are to be obtained.[7]

Needlemen, another health economist, expressed a similar opinion.[8]

> An effective market is one in which there is competition on the basis of both price and quality, and in which those who sell services are limited in their ability to influence the volume of services they sell and are constrained in the prices they set by competitive pressures. By this definition, an effective market for health care services does not exist in most communities. Competition exists but it is rarely price competition; indeed the nature of current competition based on scope of services, amenities, and convenience is to encourage price increasing behavior. (Emphasis added).[8]

Arthur D. Little, Inc., summarized the policy implication of the debate surrounding competition and regulation. They reported that, in the absence of Certificate of Need regulations, hospitals will compete more vigorously by offering improved facilities to recruit physicians and patients. The resulting "building boom" will drive up operating expenditures over the next ten years by $1.84 for every dollar invested, exclusive of depreciation and debt service.

THRESHOLD LIMITS

Alaska regulations specify that a CON is required for any capital expenditure in excess of $150,000. There is general agreement that this threshold is far too low. Federal regulations have already changed to accomodate a significant increase in CON thresholds. The threshold levels which trigger a CON review should be increased from $150,000 to at least $600,000 for capital expenditures; $400,000 for major medical equipment; and $250,000 for operating expenses associated with new services.

CONCLUSIONS

Recent evidence nationally and available information from the Certificate of Need Program in Alaska indicate that the program has been effective in deterring unjustified projects, guiding capital investment projects, and stimulating improved institutional planning. Together these effects have served to meet the health care needs of the public, prevent duplication of costly services, and restrain the increasing costs of health care. Acute problems with the CON process are correctable by amending the law.

Options available to the Legislature can be placed into three categories: 1) keep the law as it is and maintain the status quo; 2) repeal the law in its entirety; or, 3) revise the law to correct recognized problems.

MAINTAIN CURRENT CON PROCESS

The State would continue to operate the program in its current form. This option assumes the CON process is working efficiently and requires only minor changes.

Because of recognized problems, this option appears to have little merit. Threshold levels are too low, most non-clinical expenditure reviews are a nuisance for applicants and reviewers, and delays in the review process are unacceptable.

REPEAL THE CON LAW

This option assumes that the Certificate of Need process has been entirely ineffective and that marketplace incentives will arise to control capital investments and health care costs.

It also assumes that public review of health care capital expenditures are unimportant and that health care consumers should not have a voice in determining the appropriateness of services in their community.

A competitive pricing market does not exist within the health care services industry of any community in Alaska. In addition, the State of Alaska did not renew its Section 1122 agreement with the federal government in 1981 because the Certificate of Need law was in place.[9] (Section 1122 of PL 92-603 required that health care facilities, which received federal monies under Titles XVIII and XIX, be subject to review to ensure consistency with state health plans.) Repeal of the CON law would leave the State entirely without a capital expenditure review process for health care facilities; therefore, the State would have to rely principally on either the competitive market or incentives established under some kind of a prospective reimbursement system to control costs and allocate resources. (Hospitals are currently reimbursed by the federal government under Medicare and Medicaid on a retrospective basis; that is, after the costs have already occurred. Under this

reimbursement mechanism, there is no real incentive for containing costs. Prospective reimbursement, on the other hand, would require that hospitals negotiate the rate or cost of a service a year in advance. The government and other third-party insurers would reimburse the hospital only at the negotiated rate; therefore, costs exceeding the rate would be borne by the hospital, and, conversely, the hospital would make money if costs were kept below the negotiated rate.)

Because a competitive pricing market does not exist anywhere in Alaska, eliminating the CON program will likely lead to new, unneeded services and facilities which will result in increased operating costs. These costs are passed directly on to the buyers (patients and taxpayers).

Prospective reimbursement, on the other hand, comes in various forms and generally has been found to be more difficult to enact and implement than Certificate of Need. Generally speaking, prospective reimbursement is likely to be successful only where there has been political support for Certificate of Need.[8]

Finally, repeal of CON serves the interests of the health services establishment only. Those who control health-care costs would also be controlling capital investments. Consumers could not have a voice in determining the most appropriate and affordable level of service for their community or region.

MODIFY THE CON PROCESS

This option assumes that the CON program has been effective and can be modified to make it more efficient. The scope of the CON program could be scaled back by raising threshold levels and exempting certain non-clinical capital expenditures. Under this option, the CON program could be reduced further if a market capable of insuring an appropriate allocation of services emerged or to complement a prospective reimbursement system.

RECOMMENDATIONS

The Alaska Health Coalition recommends that negotiations take place among members of the Alaska State Hospital Association, the Legislature, and the Administration to work out revised CON regulations.

[redacted]

1. [redacted]

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. [redacted]

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. [redacted]

APPENDIX

NATIONAL HEALTH PLANNING AND DEVELOPMENT ACT OF 1974

INTRODUCTION

Public Law 93-641, (National Health Planning and Resource Development Act), passed by the U.S. Congress in 1974, established a national health planning program which was implemented in each state and several American territories. The intent of Congress was to integrate previously sponsored programs (Hill-Burton, Regional Medical Program, Comprehensive Health Planning), retain the best features of each, and address major national, state, and local concerns about the current planning, development, and operation of the nation's health care system. To address these concerns, the Act authorized the designation and funding of state and regional health planning agencies and set forth several functions these agencies had to perform in order to further the "achievement of equal access to quality health care at a reasonable cost."

HEALTH SYSTEMS AGENCIES

Health Systems Agencies (HSAs) were designated as local or regional bodies with the responsibility for preparing and implementing plans designed to improve the health of the residents of its health service area; to increase the acceptability, accessibility, continuity and quality of health services of the area; to restrain increases in the cost of providing health services; and, to prevent unnecessary duplication of health resources. These functions were carried out by interested consumers and providers working together to identify community and regional problems and to develop strategies and recommendations to help alleviate those problems.

HSAs were established as either private, non-profit corporations or public entities governed by boards that had to have a consumer majorities. Operational funds have been awarded through both Federal (PHS) and State (DHSS) sources. In Alaska, the Governor designated three health service areas which were each to be served by an HSA. Alaska's three HSAs are: Northern Alaska Health Resources Association, Inc. (Fairbanks), serving northern Alaska; South Central Health Planning and Development, Inc. (Anchorage), serving south central Alaska, including the Aleutian chain; and Southeast Alaska Health Systems Agency (Ketchikan), serving Alaska's panhandle.

STATE HEALTH PLANNING AND DEVELOPMENT AGENCY

The Governor designated a State Health Planning and Development Agency (SHPDA) as a unit of State government. The SHPDA has the responsibility to conduct the health planning activities of the State, including preparation and implementation of the State Health Plan, and to provide coordination of the HSAs. The SHPDA also supports the function of the Statewide Health Coordinating Council and is responsible for administration of the Certificate of Need program. In Alaska, the SHPDA resides within the Department of Health and Social Services. It currently occupies division-level status.

STATEWIDE HEALTH COORDINATING COUNCIL

The Alaska Statewide Health Coordinating Council (SHCC) is the third entity involved in the State health planning network. The SHCC is a group of citizens appointed by the Governor who oversee the health planning activities within the State. Specifically, they have responsibility for preparation of the State Health Plan. The State Health Plan forms the basis upon which Certificate of Need applications are reviewed. Both the SHPDA and SHCC are supported with a mix of Federal and State funds.

STATEMENT OF

ÆTNA LIFE INSURANCE COMPANY

IN OPPOSITION TO

H.B. 19

As a major writer of commercial health insurance, the Ætna Life Insurance Company has for years been deeply concerned about health care cost increases and has consistently supported viable health planning programs. We strongly oppose H.B. 19, An Act Repealing the Certificate of Need Program. We believe that enactment of this legislation would represent a large step backward in Alaska's effort to realize an efficient and effective health care delivery system.

Health planning is one of the elements in the armamentarium of programs that are necessary to help in the reduction of the escalation of health costs and to ensure that the health care delivery system of the future is one that has been rationally and systematically planned.

We feel that it is most important that there be a mechanism in place for participation in the planning and development of health programs to improve the distribution of health services, ensuring that services are available to those citizens who need them, while restricting the investment in unnecessary facilities and services.

An important portion of a viable health planning program is state certificate of need legislation. We find it is essential to have such legislation in order that the necessity of capital expenditures can be determined, because of the two-pronged effect on the growth of health care costs. In the short run, the purchase, installation, and financing of expenditures increases annual health care expenditures. In the long run, operation and maintenance of capital expenditures continue to add to health care costs, to increased use of highly skilled labor (for maintenance and operation) and non-labor inputs (i.e., energy, supplies, etc.).

It has been estimated that every dollar of capital investment adds an additional 50¢ to annual operating cost. An important element in today's economy, which has had a dramatic effect on health care costs related to capital expenditures, is the interest rate now being charged on the finance debt. Efforts must be made to ensure that all capital expenditures made today are necessary and consistent with the goals of Alaska's Health Systems Plan and necessity for such expenditures.

Alaska's Certificate of Need Program is an important tool for implementation of the area health plan. We urge that this program be continued.

February 11, 1983

FEB 16 1983

TO: Members of the Alaska Legislature

Proposed legislation (HB 19 and SB 85) would repeal Alaska Statute 18.07.031-18.07.111, better known as the Alaska Certificate of Need (CON) law. These bills reflect the position of the Alaska Hospital Association, whose member institutions are subject to the provisions of the CON process. The attached paper, developed by the Alaska Health Coalition, was written to provide legislators and the public with a series of alternatives to consider during discussion of these important bills. The paper summarizes the provisions of the CON law, discusses several of the problems which have been identified with the current process, and reviews the effectiveness of the CON program, both nationally and within Alaska. In addition, a list of recommendations is provided for consideration in revising the current CON law.

The Alaska Health Coalition is a group of interested citizens with memberships from the three Alaska Health Systems Agencies and the Statewide Health Coordinating Council. The primary purposes of the Coalition are to review the need for health planning, development, and promotion activities and to develop goals, describe functions, and recommend structures to achieve optimal health for the citizens of the state. Therefore, we believe that the subject of public review of capital expenditures as currently provided for in the Certificate of Need law is an important issue which deserves a reasonable, objective discussion. We present this paper for the purpose of initiating this discussion.

For additional information, please contact any of the following organizations: Northern Alaska Health Resources Association, Fairbanks (456-2553); South Central Health Planning and Development, Anchorage (278-3631); or, Southeast Alaska Health Systems Agency, Ketchikan (225-9681).

February 03, 1983

The Honorable Mae Tischer
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Tischer:

The Board of Directors of the Northern Alaska Health Resources Association has discussed the issue of repeal of the Certificate-of-Need (CON) law as currently proposed in HB 19. We reached agreement that a modified CON process is preferable to repeal. Although we recognize that there are problems with the current process, we believe that they can be solved by making major revisions in the regulations rather than by repealing the law. There is little disagreement that the threshold limits that trigger CON review are too low or that review of many non-clinical expenditures is a nuisance. Moreover, the process should be tightened up so that reviews are completed in a timely and efficient manner.

There are several reasons why we believe the CON process should be retained; however, the most important reason has to do with citizen participation in deciding what health care services and facilities are most appropriate and affordable for a specific community or region of the state. The issue has not been whether a CON should be approved or denied but rather that a discussion or negotiation has taken place between the community and health-care facility regarding local, regional and statewide needs. The Certificate-of-Need process has been a forum for these discussions and has served to guide the appropriate development of health care services and facilities throughout the state.

A recent trend has been to appropriate increasing amounts of public funds for construction or expansion of health care facilities in Alaska (i.e., $31,500,000, FY 81-82). Moreover, we are seeing the cost of health care increasing at a rate which has been consistently higher than the general rate of inflation. It has been demonstrated that capital investment contributes significantly to the growth of total hospital expenditures. Although it is true that general inflation, sophisticated technology, and increasing staff requirements also contribute to rising costs of hospital care, hospital capital investments add to the operating costs by an amount in excess of the value of the investment. In April, 1982, Arthur D. Little, Inc., a health economics consulting firm under contract with the National Center for Health Services Research, estimated that the present value of additional operating expenditures in the next ten years is $1.84 for every dollar invested in capital improvements, exclusive of depreciation and debt service. Uncontrolled

529 5th avenue, suite 8 fairbanks, alaska 99701 telephone (907) 456-2553

capital expenditures for more or bigger health care facilities can only serve to drive up operating costs at an accelerated rate. These increased costs are ultimately passed on to the patient or community. We believe that people must continue to have the opportunity and responsibility through the CON process to determine what level of health services they are willing to pay for. Competition in the health care field essentially does not exist, especially in Alaska where most communities cannot afford more than one health care facility; therefore, the only way that we can keep a lid on overbuilding is through a capital expenditures review program similar to the current Certificate-of-Need program.

Several states have already revised their CON process (among them Colorado and New Mexico) with full support of their respective state hospital associations. Revision of Alaska's CON process must occur if we expect to see the process work as it was designed to do. The following revisions are offered for consideration:

1. Increase the threshold level which triggers a CON review from $150,000 to <u>at least</u>:
   a. $600,000 for capital expenditures
   b. $400,000 for major medical equipment
   c. $250,000 for operating expenses associated with new services.

2. Exempt all non-clinical capital expenditures. The bill should indicate that non-clinical services which are not subject to review include, but are not limited to: parking, telephone systems, day care, mailrooms, heating and air conditioning, blood bank, dietary/cafeteria, laundry and linen, medical records, business office, housekeeping, central supply, library, reception, and data processing. This exemption would apply only if one of these non-clinical projects was the main purpose of the application. For example, a project proposing a new facility could still include review and consideration of the non-clinical activity if it were part of a larger project.

3. Expedite review of capital equipment replacement.

4. Specify a time limit for a decision by the Commissioner subsequent to a recommendation by the regional health planning agency.

5. Provide that each legislator be informed of all projects in his/her district, especially regarding the outcome of the review.

6. Consider a sunset provision of four or more years to review effectiveness of the CON process.

In summary, there is little disagreement that there are problems with the current CON process; however, the forum that the CON process provides for community discussion about the relative merits of a proposed project far outweigh what we perceive to be correctable problems. We recommend revision of the CON process rather than repeal.

Sincerely,

J. B. Carnahan

February 2, 1983

Pierre Howard, Chairman
Senate Human Resources Committee
The State Senate
Atlanta, Georgia 30334

Dear Senator Howard:

Thank you for your letter concerning the consideration of Certificate of Need legislation by the Georgia Senate.

I can appreciate your interest in CON legislation. It is clear that without a strong health planning program, hospital and nursing home expansion will wildly inflate State and private, as well as Federal, health care payments. I suspect that Georgia, and Georgia's employers and employees, can ill afford to waste their resources on unnecessary or over-priced health services.

I am pleased to report to you that there is a firm Federal commitment to support a health planning system throughout the nation. A bill to extend Federal assistance to State and local health planning agencies was passed by the House of Representatives last year by a vote of 302 to 14. Although it was not possible to work out an agreement with the Senate in this regard at the end of the 97th Congress, the program was extended through FY 1983 by the Continuing Resolution.

As the 98th congress begins its work, I am sure that health planning legislation will again be on the agenda. While it is not possible to predict what the exact result of the legislative process will be, I think it is reasonable to assume:

1. The Federal government will continue to provide substantial funds to the States and local agencies to support health planning activities; and

2. In order to be elgible to receive such funds, States and local agencies will have to meet certain standards of organization and operation necessary to ensure their effectiveness.

3. States will be required to conduct a certificate of need program which covers hospital and nursing homes and otherwise complies with Federal law.

In this context, I would suggest that the prudent course for Georgia, or any other State, at this time is to maintain the current program without any major change. This will insure that both State and local agencies remain eligible for Federal support this year under the FY 1983 Continuing Resolution. It will also mean that, once all of the details of the Federal legislation are settled, Georgia can, in a single step, make changes in its CON program with a clear understanding of what its effect on eligibility for Federal support may be. If Georgia revises its CON program this year, further revisions, even contradictory changes, may be necessary next year or the year after.

With specific regard to the provisions of SB 121, I can report that they are not consistent with the current requirements of the Federal statute. I cannot guess whether these provisions will or will not be consistent with that legislation that will be developed this year. I can point out, by way of example, that the legislation endorsed by the House last year did include detailed requirements for State CON programs and that the provisions of SB 121 are not consistent with all of the provisions of that bill.

Again, I appreciate your interest in the future of the health planning program. As a Federal-State partnership, planning can only be successful with the understanding and support of State officials throughout the nation.

My best regards to you and your colleagues in the Georgia Senate.

Sincerely,

HENRY A. WAXMAN
Chairman, Subcommittee on
Health and the Environment

Dear Representative Tischer:

I appreciated having the opportunity to discuss with you the legislative proposals which you are addressing in this session and which are of concern to Blue Cross of Washington and Alaska. Martin Tirador will be keeping in close contact with you on these and other issues.

We are continuing to develop information which supports our position for the modification of the certificate of need law. Other organizations such as the Health Insurance Association of America and the American Health Planning Association have also researched the subject and have documented the necessity to retain CON if costs are to be contained in the health delivery system. Much of this information will be presented to the Health Education and Social Services Committee in the hearing on HB 19.

I particularly appreciated the chance to visit with you. I would hope that you will call on either Martin Tirador or me if you feel we can provide you with information on any issue you are considering in the legislative process.

Sincerely,

Joan Gaumer

Re: In the Matter of the Revocation of the Certificate of Need for Lake Otis Hospital

Dear Commissioner Smith:

Thank you for your letter of January 31, 1983 regarding the status of the above-referenced administrative proceeding. We am writing to you today on behalf of our client, Lake Otis Clinic, Inc., because of recent developments we believe should be brought to your attention. Counsel for petitioner, South Central Health Planning and Development, Inc. ("South Central") has been provided with a copy of this letter and its attachments so he may respond to the letter if he wishes.

As you are no doubt well aware, the principal issues in this case are whether there are grounds for revoking Lake Otis Clinic's certificate of need, and if so, whether the certificate should or should not be revoked. The revocation proceeding was filed and prosecuted by South Central, the regional health systems agency which acts in an advisory capacity to DHSS. Since 1977, South Central has opposed the certificate of need issued to Lake Otis Clinic by DHSS essentially on the grounds (1) that the certificate was never submitted to South Central's review and recommendations and (2) that there is no need for the 125 acute care hospital beds Lake Otis Hospital would put into operation in Anchorage. The Anchorage Municipal Health Commission ("MHC") has taken a similar position. It filed a lawsuit challenging Lake Otis' certificate of need in 1979 which was dismissed late that year. South Central filed the instant administrative action in 1980. Lake Otis has consistently taken the position that it is

CB 2/24/83

not required to submit its hospital proposal to review by South Central and MHC since its certificate was "grandfathered" and that there was or would be need for the additional 125 acute care beds when they are constructed.

Disturbing recent developments indicate that South Central and MHC may be radically altering their position on bed need in Anchorage, after having effectively embroiled Lake Otis' certificate of need in litigation since mid-1979. Providence Hospital has filed an application for a certificate of need authorizing it to undertake a $97 million construction project to increase its bed capacity from 250 to 410 beds. Humana Alaska Hospital also has filed an application for a certificate of need authorizing it to spend $21.5 million to add 93 beds to its 199 bed hospital. The two proposals together would add 243 new hospital beds in Anchorage, slightly less than twice as many beds authorized under the Lake Otis Clinic certificate of need.

Based on the firm position taken by South Central and MHC in opposition to the Lake Otis certificate of need over the last several years and those agencies' current bed-need projections for Anchorage, an impartial observer could reasonably anticipate rejection of the Providence and Humana applications on lack-of-need grounds. For example, in September, 1977 the Municipal Health Commission formally came out in opposition to the Lake Otis certificate of need under a resolution which states:

> The Municipal Health Commission recommends to the regional health systems agency, Mayor Sullivan, and the Municipal Assembly that there be a moritorium on the construcion of civilian non-native acute care hospital beds within the Municipality of Anchorage for a five-year period or until civilian population reaches 270,000, whichever is sooner.

Exhibits R-55 and R-68, Lake Otis Revocation Proceedings (copy attached). Shortly thereafter, South Central's board of directors adopted a similar resolution finding "need for no additional civilian non-native accute care beds for the Municipality of Anchorage," and opposing the Lake Otis certificate of need. Exhibit R-56, id. (copy attached). Based upon these and other exhibits and testimony in the Lake Otis

revocation proceedings, Hearing Officer Joan Katz concluded that neither agency would have found any need for Lake Otis' 125 hospital beds had the project been submitted for review. Hearing Officer Katz expressly found:

> Beirne's refusal to submit to agency review was predicated on a realistic assessment that the agencies would not find bed need sufficient to support LOC's respective applications. (Emphasis added.)

Proposed Decision of Joan M. Katz, Ultimate Findings of Fact at page 32 (June 25, 1982). Beirne, of course, is Dr. Michael F. Beirne, president of Lake Otis Clinic, Inc.

South Central and MHC have both adopted health systems plans, as required by their enabling statutes, which are consistent with their position that there is essentially no need for additional hospital beds in Anchorage. The Municipality of Anchorage Health Systems Plan (1982-84), attached hereto as Exhibit B, projects total acute care bed-need at 480 in 1985 and 511 in 1990 as against the 449 beds currently licensed and in operation. The addition of Lake Otis' 125 beds would, according to that plan, exceed projected bed need until 1995. Similarly, the South Central bed need projection for Anchorage, Exhibit C (copy attached), projects "high" bed needs of 481 and 513 in 1985 and 1990 respectively. Although we understand that one or both of these health plans have been revised upwards slightly this year, neither revision projects additional bed needs beyond the 125 beds authorized for Lake Otis Clinic.

In these circumstances, it is anomalous that the joint South Central/MHC project review committee assigned to review the Providence and Humana expansion applications has recommended approval of not one, but both hospital applications! The February 13, 1983 Anchorage Times article attached hereto as Exhibit A describes the action taken by the project review committee. The committee apparently has abandoned the MHC moritorium on construction of additional hospital beds "until civilian population [of Anchorage] reaches 270,000." It also has abandoned the health systems plans which - even disregarding Lake Otis' 125 beds - show no need for the number of beds proposed by Providence and Humana Hospitals until some time between 1995 and the year 2000, or later. According to the newspaper article, which our client believes

accurately reflects the actions taken by the committee, justification for approval of both applications is predicated on projections of bed need in 1995, some twelve years in the future, and the committee's "instinctive" or "gut" feeling that the 1995 projections are too low. If these recommendations are adopted by MHC and South Central in their February 23 and March 5, 1983 hearings, the agencies will have taken a position completely inconsistent with their long-running opposition to construction of the Lake Otis Hospital.

These developments have a direct impact on the case pending before you. Lake Otis Clinic believes that it has demonstrated good cause for not having completed its hospital project. Even assuming for the sake of argument that good cause were not shown, revocation of its certificate is permissive, not mandatory, under AS 18.07.081(d). Whether revocation is justified depends upon a careful weighing of equitable considerations such as Lake Otis' investment in and desire to complete its project and the public's interest in containing hospital cost escalations through prevention of unnecessary construction and equipment acquisitions. We believe it would be fundamentally unfair for the Department to revoke Lake Otis' certificate of need in the present circumstances. If South Central adopts the project review committee's recommendations, it will have effectively swung one hundred and eighty degrees from a position that there is no need for Lake Otis' 125 acute care beds to a position supporting the construction of 243 beds. The irony of South Central's revocation petition is that if it is granted by DHSS, Lake Otis's 125-bed certificate would be eliminated at precisely the same time the two major Anchorage hospitals are aggressively moving ahead with their own expansion plans which will have a substantially greater impact on bed availability than Lake Otis' project. In fairness, South Central cannot have it both ways: either there is no need for additional beds in Anchorage and all expansion applications should be resisted or there is need and Lake Otis should be permitted a reasonable time free of debilitating litigation against its certificate of need to complete construction of its hospital. The inequities inherent in these recent developments are clear.

We respectfully request that you consider the recent and pending actions by South Central and MHC in connection with the

Providence and Humana applications in rendering your final decision regarding the Lake Otis Clinic certificate of need. Thank you.

Very truly yours,

DAVIS, WRIGHT, TODD, RIESE & JONES

ALASKA'S LARGEST NEWSPAPER

SUNDAY FINAL

The Anchorage Times

SUNDAY, FEBRUARY 28, 1988

Committee approves hospital plans

by Cary Virtue
Times Writer

A "hesitant" health committee voted 12 times — and did some flip-flopping — but decided Saturday that both Providence and Humana Alaska hospitals should be allowed to expand.

It will now be up to other review commissions, and ultimately the state health commissioner, to make the tough decision on which gets to expand, and by how much, by April 4.

The 13-member joint subcommittee of the state Health Systems Agency and the Anchorage Municipal Health Commission met for 10 hours at the Municipal Assembly Building before making the final decision. The vote was 8-5 in favor of the two hospitals' expansion requests.

But immediately after the favorable vote, the committee debated whether to overturn that decision. After three more votes, and almost two hours of discussion, the committee decided to stick with its original expansion approval.

The committee's next review hearing, which was to be held Saturday, has been canceled.

Committee chairman Pete Gallagher said the committee was "hesitant" about making up its mind. And, commissioner Don Bantz said the committee was "shirking its responsibility" by approving both proposals.

But a majority of the committee members disagreed, basing their approval vote on three major assumptions:

- An "instinctive" and "gut" feeling that adopted city and state tables showing a total need of 616 beds for 1995 was too low. It took three votes to decide that Anchorage may need 630 beds, with an error of plus or minus 100 beds.
- Dr. Mike Bierne's proposed 125-bed Lake Otis hospital expansion project, which already has a certificate of need to expand, won't be built. Bierne's project has been tied up in a lawsuit involving Lake Otis and Providence Hospital since 1977.
- That neither Providence or Humana would open new beds or hire additional staff and equipment for either expansion projects unless the need developed.

Humana wants to spend $21.5 million to create 93 new beds (for a total of 292) by building a 71,345 square-foot, five-story hopsital tower by 1995.

Providence proposes spending $97 million to increase its bed capacity from 250 licensed beds to 410 beds. The project involves remodeling about 84,000 square feet, and building a five-story, 186,000-square-foot hospital tower by 1996.

Voting in favor of both expansions were commissioners Margia-

See Hospitals, page A-4

Exhibit A

Calhoun, and Larry Korn.

"We recognize the need for two strong hospitals in the community and the need for additional beds," Wolfe said. She said she did not believe the two hospital would staff the new expansion unless there was a need.

Also, Wolfe said she suggested

thought the committee's approval of both projects was "fine."

"But I'm not going to hold my breath because we ave three more hurdles," Pavelias said.

Other hearings are scheduled for:

- **Feb. 23:** Both hospital expansions will be presented before the full Municipal Health Commission starting at 5:30 p.m., at the sixth floor conference room of the HIll Building, 632 W. Sixth Ave.
- **March 5:** Recommendation by full board of Health Systems Agency following a 9 a.m. hearing at the Municipal Assembly Chambers, 3500 E. Tudor Road.

D. Summary Statistics as Compared to National Guidelines for General Acute Care Beds

In response to the rising costs of hospital care, the Federal government adopted a set of resource standards in 1978 called "National Guidelines for Health Planning", most of which relate to inpatient acute care facilities.

Exhibit C

Municipality of Anchorage

MEMORANDUM

DATE: September 15, 1977

TO: South Central Health Planning and Development, Inc.

FROM: Municipal Health Commission

SUBJECT: Revised Acute Care Hospital Bed Need Projections

The Municipality of Anchorage is currently experiencing what is termed as an "overbedding" situation for acute care. This situation arose from the following:

(a) Simultaneous completion of two construction projects for new hospital beds;

(b) Exceeding of approved number of beds (according to the State facilities plan) in construction of one new facility;

(c) Impacts of peer review which is keeping down the average length of inpatient stays;

(d) Availability of beds in outlying areas which draws away potential patients from Anchorage.

At present, neither civilian non-native hospital is operating with all beds opened and staffed. Both facilities are experiencing major difficulties in recruiting and hiring nursing personnel. After one year of overbedding, the bed need situation has stabilized as follows:

Utilization Rate = 600 inpatient days/1,000 population
Average Length of Stay = 4.8 days

Bed need projections for the civilian non-native population for 1977 through 1985 are as follows:

	Total Available Beds	Licensed Beds	Open Beds	Occupancy Rates (Open Beds)
Alaska Hospital	202	154	132	73%
Providence Hospital	250 (268)	250	232	74%
	452 (470)	404	354	73.8%

Exhibit R-55

M 9-29-77

Bed Need Projections:

Year	Civilian Non-Native Population	Occupancy Rate	Number of Beds
1977	156,825	85%	303
1982	208,728	85%	403
1985	255,524	85%	494
1989	298,116	85%	577

Additionally, with 577 beds in 1978, the following would occur at 600 inpatient days per 1,000 population.

Year	Civilian Non-Native Population	Occupancy Rate	Number of of Beds
1978	170,893	48%	577

By 1982, unless the utilization dramatically increases or the average length of stay increases, we will achieve less than 75% occupancy with existing beds, using 452 beds as baseline (with 470, occupancy would be at 72%). The consequences of not reaching 85% occupancy for "overbedding" are as follows:

(a) high room rates to offset costs of plant maintenance;

(b) incentive for non-necessary hospitalization and increased length of stay;

(c) higher tax support for subsidized patients;

(d) dis-incentive for use of low cost and outpatient alternatives to hospital care (i.e., outpatient surgery).

The addition of 125 acute beds to an already "overbedded" market will serve to exaggerate the present cost increases and inappropriate use of inpatient beds. The Municipal Health Commission, and its predecessor, the Anchorage Health Planning Council, has gone on record as opposing additional acute bed construction for reasons of cost effectiveness. This position is supported by the South Central Health Systems Agency which has endorsed a policy of non-approval of beds exceeding four per 1,000 total population. Present statistics (including Elmendorf and A.N.S. hospitals) shows 4.6 beds per 1,000 population in 1977 existing in Anchorage. The number of acceptable beds per 1,000 population will decrease to three per 1,000 population by 1985, according to the areawide health systems plan.

There is some cross utilization of civilian non-native facilities by the native and military population.

The total native population in Anchorage is stabilized at 4%. At that figure (6,273 in 1977), utilizing the Alaska Native Medical Center utilization rate (1,400 inpatient/1,000), total anticipated native inpatient days in 1977 would equal 8,680. ANMC has 170 beds with a potential number of inpatient days of 62,050.

The military hospital has 200 beds with a total number of potential inpatient days of 73,000. There are 27,242 military and dependents. Using the Elmendorf utilization rate of 1,100/1,000 population, the total number of inpatient days which would be generated by our local military and dependent population is 29,920.

There is some utilization of Anchorage civilian non-native hospitals by non-Anchorage residents. The primary use appears to be in the categories of sophisticated tertiary care, not available in smaller communities. The construction of additional small facilities in outlying regions will decrease the use of Anchorage facilities for other levels of care not requiring high levels of technology. Patient origin studies which are available, combined with new construction and utilization trends, indicate a probable use of a maximum of 5% of the available inpatient beds by non-Anchorage residents.

Finally, there is still significant use of facilities outside Alaska by Anchorage residents for certain types of specialized care. While this utilization may be more related to tradition than need, it is a factor which serves to reduce utilization of Anchorage facilities.

The following motion was carried unanimously by the Municipal Health Commission at a special meeting held September 14, 1977:

THE MUNICIPAL HEALTH COMMISSION RECOMMENDS TO THE REGIONAL HEALTH SYSTEMS AGENCY, MAYOR SULLIVAN, AND THE MUNICIPAL ASSEMBLY THAT THERE BE A MORATORIUM ON THE CONSTRUCTION OF CIVILIAN NON-NATIVE ACUTE CARE HOSPITAL BEDS WITHIN THE MUNICIPALITY OF ANCHORAGE FOR A 5 YEAR PERIOD OR UNTIL CIVILIAN POPULATION REACHES 270,000, WHICHEVER IS SOONER.

Subject: Information Update #19

Date: September 23, 1977

I. The major conference planned for Unalaska in early November is beginning to take shape. The first day will deal mostly with fisheries related issues and other economic and resource problems. The second day will address the social, health, education and physical needs of the Aleutian/Pribilof region (water, police, fire, etc.) It is anticipated that about 100 people will attend the conference, about 45 of whom will be State and Federal officials. The lack of hotel facilities in Unalaska will allow participants to "discover" Alaska via the good offices of the high school gymnasium and their own sleeping bags. Coordinator for the conference is Hillary Hilscher, at the Aleutian/Pribilof Island Association. South Central Health Planning and Development, Inc. has been given responsibility for conducting the health portion of the second day's proceedings.

II. Update welcomes Dr. Tom Neiswander back to Alaska after several years outside. Dr.Neiswander was the first Alaska Coordinator for the National Heal ervice Corporation; he was instrumental in establishing the clinic op tions at Yakutat, Galena, and Unalaska. He is currently in charge of outpatient services at Alaska Native Medical Center, in Anchorage.

III...Speaking of which, Cook Inlet Association has unveiled plans to assume responsibility for a large portion of the outpatient services at ANMC. They came into a $600,000 windfall, and seem to have struck an accord with the IHS on the matter.

IV...Speaking of which, Update congratulates Mr. Jake Lestenkoff on his new job with Cook Inlet Native Association as Executive Assistant. Jake is a Pribilof Islander, recently involved with APIA in planning the Unalaska Conference. Jake reports that he will continue to have some involvement with that effort, while he assumes his new duties.

V...Speaking of which, Update congratulates Mr. Dan Hertsgaard on his

Exhibit R-56

new job with Aleutian/Pribilof Island Association as their Health Department Director.

VI. Update welcomes Mr. Bob Ogden back as Administrator of Valley Hospital in Palmer. Bob tried Utah for a while, but couldn't stay away from Alaska.

VII. Robert Clark, Director of Bristol Bay Area Health Corporation and a member of the SCHPD, Inc. Board, reports he still has need for workers in the Dillingham area. He needs a controller, a planner, and a village coordinator.

VIII. The Bristol Bay Area Health Corporation Board of Directors at their recent meeting passed several resolutions:

....for more housing in the area, the lack of which is hindering recruitment of qualified health and regional corporation personnel.

....opposing RCA Alaska's proposed 87% rate hike.

....asking the legislature and the Governor to provide funds for EMS services at least to the level provided in FY 1976 as a minimum.

....asking Rural Cap to reassign an Alcoholism counselor to 32 villages of Bristol Bay.

....asking IHS cooperation in providing needed data in the development of Tribal-Specific Plans that are now required.

....supporting Representative Anderson's bill which would increase Community Health Aide salaries.

....supporting a bill that would widen, lengthen and improve the lights on airplane landing strips, in the interest of impoving EMS capabilities of rural Alaskan airports.

IX. South Central Health Planning and Development, Inc. held it's regular meeting September 16 and 17 in Anchorage, with the following major results:

The Board approved the Health Systems Plan (HSP) as amended, including most of the 151 separate suggestions for changes and additions. The Plan now goes to the State Health Planning and Development Agency (SHPDA) for their review.

Dr. Dave Johnson, Regional Health Officer for DHEW, Region X, spoke at some length with Board members regarding the regulatory role of HSAs.

The Annual Report of SCHPD, Inc. was discussed in it's draft format, and the Executive Committee will approve the final report in about two weeks, allowing for further input by Board members.

Two persons from Yukon-Kuskokwim subarea have been voted to fill vacancies on the SCHPD, Inc. Board. They are: Pat Shea, a provider from Bethel, and Peter Black, a consumer from Alakanuk.

Three persons from the Anchorage subarea have been elected to fill vacancies on the SCHPD, Inc. Board. They are: Gari Andreini, a provider, and Jerry Ward and Elizabeth Jacks, both Consumers.

The SCHPD, Inc. Board voted to approve meetings between the SCHPD Nominating Committee and the Anchorage Subarea Advisory Councils, Operations Committee for purposes of discussing common goals and problems.

Diddy Hitchins, of the SCHPD, Inc. Board, has been named Coordinator of Social Services Planning to the Capitol Site Planning Commission.

The following motion was approved by the SCHPD, Inc. Board of Directors: "Based upon statistical demonstration of the lack of clear and evident need as supported by the SCHPD, Inc. Health Systems Plan, the Health Systems Agency shall publicize it's Plan contents with emphasis on the need for no additional civilian non-Native acute care beds for the Municipality of Anchorage. The Health Systems Agency shall oppose the irresponsible and possibly illegal Certificate of Need for Lake Otis Hospital and publicize these two efforts to Blue Cross, the State and others who have funding authority".

X. Mr. Jerry Madden has been retained by the Department of Policy Development and Planning in the Office of the Governor, to complete a study of housing in Alaska. The emphasis will be upon rural areas and will include concerns for environmental health. The first draft of goals and objectives will be available in mid November.

XI. On the 4th, 5th, and 6th of October, the 25th Annual Convention of the Alaska State Hospital Association, Inc. and the 5th Annual meeting of the Alaska Hospital Research and Education Foundation, Inc. will be held in Wrangell, Alaska. The theme will be: THE SECRET TO SUCCESS IS CONSISTENCY OF PURPOSE.

XII. Mr. Roy Haney, President of the Idaho HSA, will be visiting SCHPD, Inc., September 28th, to study our ways of doing business.

XIII. Public Information and Education Council of the Municipal Health Commission has been studying the Adolescent Sexuality Conference held in May, and is presently involved in reviewing the health curriculum of the Anchorage School District.

XIII. The Anchorage Health Service Plan is in it's final completion stages and will go to public hearing in October and November.

XV. The Behavioral Health Advisory Council of the Municipal Health Commission, in studying the Governor's Legislative Alcoholism Package, has been meeting with members of the Legislature. Most recently they met with Senator Colletta and discussed the philosophy of the Interim Alcoholism Committee in their review of the Governor's bills. In an effort to understand how extra revenue would be utilized the Council has also invited Mr. Robert Cole, Director of the State Office on Alcoholism.

XVI. The Human Resources Planning Division of the Municipal Planning Department has recently completed the Human Resources Study.

The study includes the results of a community needs assessment of a random sample of 500 Anchorage residents, reflecting attitudes and participation rates in relation to leisure, health and social services.

XVII. An Annual meeting of all HSAs, SHPDAs and SHCCs in Region X will be held October 19, 20, 21. The exact agenda is not known yet.

XVIII. A Rural health Seminar for staffs and board members of regional health entities is being hosted by Norton Sound Health Corporation in Nome, October 11, 12, 13.

XVIIII. Hearings on National Health Insurance will be held in Anchorage October 12 and 13.

XX. There will be a meeting of the Alaska Public Health Association September 28, 7:30 p.m. on the 5th floor in the Conference Room of the old Community Hospital building at 825 L. Street, Anchorage.

XXI. The next SCHPD, Inc. Annual Board of Directors Meeting will be in Anchorage on December 2 and 3. The location will be announced at a later date.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN, MAYOR

MUNICIPAL HEALTH COMMISSION

December 15, 1977

Dr. Helen Beirne
Commissioner
Dept. of Health and Social Services
Pouch H-01
Juneau, Ak 99811

Subject: Hospital Bed Construction in Anchorage

Dear Commissioner Beirne:

The Anchorage Municipal Health Commission was created by Municipal Ordinance AO 255-76 in February, 1977. The Commission is the designated subarea council for Anchorage to the regional health systems agency, South Central Health Planning and Development, Inc. The duties and function of the Commission in This capacity are to advise the HSA concerning local subarea health resource allocation, improvement in availability, accessibility, acceptability of health services, to contain costs and to promote the quality and continuity of health care.

Recently the Municipal Health Commission unanimously passed the following motion: "THAT THE MUNICIPAL HEALTH COMMISSION RECOMMEND TO THE REGIONAL HEALTH SYSTEMS AGENCY, MAYOR SULLIVAN AND THE MUNICIPAL ASSEMBLY THAT THERE BE A MORATORIUM ON THE CONSTRUCTION OF CIVILIAN, NON-NATIVE, ACUTE CARE HOSPITAL BEDS WITHIN THE MUNICIPALITY OF ANCHORAGE FOR A FIVE YEAR PERIOD, OR UNTIL THE CIVILIAN POPULATION REACHES 270,000, WHICHEVER IS SOONER".

This request was forwarded to the regional health systems agency and the Commission bed need projections were reviewed by their Board of Directors. The result of their review was approval of the following motion:

"BASED UPON STATISTICAL DEMONSTRATION OF LACK OF CLEAR AND EVIDENT NEED AS SUPPORTED BY THE SCHPD HEALTH SYSTEMS PLAN, THE HEALTH SYSTEMS AGENCY SHALL PUBLICIZE ITS PLAN CONTENTS WITH EMPHASIS ON THE NEED FOR NO ADDITIONAL CIVILIAN, NON-NATIVE ACUTE CARE BEDS FOR THE MUNICIPALITY OF ANCHORAGE. THE HEALTH SYSTEMS AGENCY SHALL OPPOSE THE IRRESPONSIBLE AND POSSIBLY ILLEGAL CERTIFICATE OF NEED FOR LAKE OTIS HOSPITAL AND PUBLICIZE THESE EFFORTS TO BLUE CROSS, THE STATE, AND OTHERS WHO HAVE FUNDING AUTHORITY."

Enclosed is a copy of the draft Anchorage Health Services Plan, and excerpts from the South Central Health Planning and Development, Inc. Health Systems Plan, in which bed need projections are contained, and upon which these motions were based.

Exhibit R-68

Blue Cross of Washington and Alaska, a major health insurance provider in Alaska, has stated that they support the health systems agency and Commission's position concerning a moratorium on construction of hospital beds. A copy of their letter is also enclosed.

At this time I respectfully request that the State of Alaska accept the recommendations of the Anchorage subarea council and regional health systems agency on this matter and incorporate these conclusions into the State Facilities Plan as soon as possible.

If you have any questions, please contact Noreen Pedrick, Manager, Human Resources Planning Division, telephone number 264-4261.

Sincerely,

Bonnie L. McGee

Dear Representative Tischer:

Thank you for taking the time to meet with us on our recent visit to Juneau. I know how pressing your time is, with constituent requests, keeping pace with legislation and going to committee meetings. The time you gave us was appreciated.

We hope the information we discussed regarding the certificate of need repeal was informative for you, and that with an amendment, also repealing the construction revenue sharing monies (Title 29.90.010-030), and consideration for passing HB 112 or a like bill in the Senate, that the concerns you may have had are now answered. Should you have any further questions, please feel free to contact us at any time.

Al Camosso, administrator, and I want to assure you that should you need any resource material regarding health care information, we will do everything we can to provide it for you.

Sincerely,

Christopher Beardsley
Director of Public Relations
& Governmental Affairs

P.S. Notice you passed bills out of committee with a "do pass." Great!

Dear Dr. Rhyneer,

Thank you for your March 16, 1983 letter regarding the Certificate of Need law. I too support the repeal of the Certificate of Need process.

House Bill 39, which repeals the Certificate of Need law, was passed out of the Health, Education and Social Services Committee, which I co-chair, with my affirmative vote. The bill now rests in Finance Committee.

Sincerely,

Mae Tischer

March 16, 1983

Representative Mae Tischer
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

I am writing this letter to encourage you to repeal the present "Certificate of Need law" which requires multilayered local and Department of Health and Social Service review of all health facilities which anticipate expansions costing more than $150,000 and the development of new services costing any amount.

This law was joisted upon Alaska and many other states under the guise of "cost saving" and "planning." There were financial inducements for states to develop these laws.

The Certificate of Need law requires that applications for new services and expenditures for expansion of health facilities be reviewed by quasigovernmental boards made up of consumers and "providers" organized into health systems agencies. The State of Alaska has three health systems agencies. I sit as a board member on the South Central Alaska HSA (South Central Health Planning and Development, Inc.).

After participating in this review process, I have observed that the Certificate of Need law requirements are neither planning nor cost saving. A sizeable fraction of my fellow board members agree.

In support of the Certificate of Need law, some national health planners and federal government agencies claim that the Certificate of Need legislation has prevented unnecessary duplication of services in some parts of the country. This may or may not be true in New York City, Los Angeles and Philadelphia; but the law certainly prevented the early distribution of CAT scanners in many communities, thus dooming some of its citizens in those areas to unnecessary operations, dangerous alternative tests and misery, possibly death. Thus, is the history and potential of this law.

As to cost savings - evidence for this is difficult to find elsewhere, and cannot be demonstrated in Alaska at all. In fact, we have been trying to improve services and availability of medical care in Alaska, only to have a law eat into our limited financial resources by requiring publication of expensive application documents, many which have cost thousands of dollars - dollars which small communities like Glennallen, Palmer, Kodiak, Valdez and Cordova do not spend foolishly. Even the larger communities must put up with unnecessary expenses and maddening delays due to the review process.

Finally, the law has nothing to do with health planning at all; in fact, it is the antithesis of planning. If you check with the health workers in your community, you will find that it is the local professionals who have done the planning. When a community has required new or improved facilities, it has been a community need, recognized by all, and planned by the appropriate hospital service boards with community business and leader support that has generated the plan for community health. After these professionals have spent hundreds or thousands of hours and thousands of dollars planning, applications are reviewed by amateurs for several hours at most.

Talk with your own physician, hospital administrator, community hospital board member or civic leaders. Please work to eliminate this harmful law by supporting House Bill 19.

Sincerely,

George S. Rhyneer, M.D.

Position Paper

Certificate of Need Repeal

The Certificate of Need program in Alaska (AS.07) should be repealed. It is both inequitable and unnecessary. Its basic presumption is that the Department of Health and Social Services can make better decisions for hospitals and nursing homes than can the facilities themselves.

Basic Issues

1. Equity

- While controlling non-state construction of skilled nursing facilities (SNF's) and intermediate care facilities (ICF's), the prgram exempts these beds constructed in Pioneers' Homes. Thus any determination of need based on the current program is flawed because forces external to the program can and have - in Anchorage, Juneau, and Ketchikan - altered the factual situation.

- Alaska Native Health Service and the Armed Forces facilities are also exempt from coverage. Their activities have a direct bearing on many other facilities in terms of both service area and referrals.

- Physician office construction and equipment purchase are also exempt.

The inequities are clearly illustrated in the Anchorage area: Providence Hospital, Humana Hospital, Nakoyia Health Care Center, Hope Cottages and the Alaska Treatment Center are included in the CON program while the Alaska Native Health Service Hospital, Elmendorf AFB Hospital, the Anchorage Pioneers's Home and the Diamond Emergency Center are not included. All of these facilities share the same basic service area.

2. Unnecessary

Market place economics and competition should be the determinant of capital expansion for health facilities. In Anchorage, the Municipal Health Commission as well as open board meetings provide the public input into a facility's planning process. In smaller communities the city council or borough assembly who own the facility provide the public input opportunity.

Alaska is a developing state of many isolated regions without any appeal for duplication of services or need to limit access to health care, which is the basic intent of the CON program.

3. Conformity

42 USC 300 m-(d) requires that states conform to the federal program or face a reduction of specified public health service funds.

- Conformity is not achievable without the inclusion of the Pioneers' Homes.

- There are 30 states, including New York and California as well as Alaska, which are not in conformity.

- The penalties have been deferred every year since passage. In December of 1982 they were deferred until October 1, 1983.

- The Reagan Administration is not supportive of continuing this program. Congress is working to create a state optional program without penalties. Thus the likelihood of imposition of penalties is remote at best and the across the board elimination of CON would not change Alaska's current status.

4. Other States

- Louisiana does not have a certificate of need law.

- According to the American Hospital Association, 30 states currently do not conform.

- At least seven states have termination clauses or specific sunset provisions.

5. Attachments

POLICY STATEMENT

CERTIFICATE OF NEED

Position: The Alaska State Hospital Association advocates the repeal of the certificate of need (CON) law, AS 18.07.

Rationale: The CON process has proven costly, wasteful, and unnecessary. The program has become excessively bureaucratic to the point that it undermines economic incentives throughout the decision-making process and so increases the cost of capital projects it takes valuable dollars from patient care. The certificate of need process also removes community control from local jurisdictions in respect to municipally-owned facilities and local advisory boards in respect to corporate ownership.

An alternative approach to state control would permit marketplace economics to control expansion and would rely on local decision-makers to make decisions for their own communities. We see a value in state government continuing its planning function with input from regional and local groups.

Note: This does not contemplate repeal of construction or licensure standards.

SERVING IN THE WEST SINCE 1856

December 27, 1982

Mayor Tony Knowles
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Knowles:

Thank you for the opportunity on December 13 to share Providence's plans and some of our concerns with you.

One point came up during our discussion regarding Certificate of Need (CON). I would like to elaborate for you in more detail why the health care providers in Alaska oppose CON and have so strongly supported its repeal.

As you know, the CON law was passed in this and most other states as a requisite to receive Federal funds. The major impetus for the law were:

1. Excess hospital beds in many large cities, and
2. rising health care costs.

The belief was that by controlling the number of beds, capital expenditures and new services, costs would be contained. The results have been much less than desired throughout the country. The law is cumbersome, wasteful and, in fact, costly.

The lack of "success" is especially true in Alaska for some basic reasons:

1. The process which the law sets in place is cumbersome and wasteful. The institution must:
   - submit a letter of intent at least 60 days prior to an application (for no apparent reason);
   - submit an elaborate, repetitive application (most are well over 100 pages). There are 12 separate "criteria" which must be addressed in any application;
   - wait to be declared complete (minimum 20 days; several of our applications were delayed months);
   - then go through a 90-day review process--with three or four public meetings.

MEMBERS OF THE SISTERS OF PROVIDENCE CORPORATION—ALASKA: PROVIDENCE HOSPITAL, ANCHORAGE—WASHINGTON: PROVIDENCE MEDICAL CENTER, SEATTLE—THE DePAUL RETIREMENT RESIDENCE AND MOUNT ST. VINCENT NURSING CENTER, SEATTLE—PROVIDENCE HOSPITAL, EVERETT—ST. PETER HOSPITAL, OLYMPIA—ST. ELIZABETH HOSPITAL, YAKIMA—OREGON: PROVIDENCE HOSPITAL, MEDFORD—PROVIDENCE MEDICAL CENTER, PORTLAND—PROVIDENCE CHILD CENTER, PORTLAND—ST. VINCENT HOSPITAL AND MEDICAL CENTER, PORTLAND—CALIFORNIA: PROVIDENCE HOSPITAL, OAKLAND—PROVIDENCE HIGH SCHOOL, BURBANK—SAINT JOSEPH MEDICAL CENTER, BURBANK

2. The costs of CON to the institution are enormous to prepare this cumbersome document (at least 35 copies) and submit to the minimum 110-day process. There are also the institutional costs of delaying implementation and watching the price of a piece of equipment or construction project increase several percent points with inflation.

   The cost to the public is also great in the state, regional and local staff needed to coordinate the program, prepare staff analyses and hold public meetings.

3. The dollar limit for what must be reviewed has been ridiculously low--$150,000. The federal law has allowed that limit to be raised to $400,000 and $600,000 although the Alaska legislature failed in its last session to raise the limits. Some states have raised the limit to $1 million or more. To have a limit of $150,000 or even $600,000 when the hospital's annual operating budget is $75,000,000 (such as Providence's) is overkill.

   In just 1982 alone, Providence has prepared 6 CON applications, including two equipment replacements (for a CT Scanner and a Cath Lab), a $250,000 computer enhancement for an x-ray machine and most absurd, a $167,000 replacement incinerator (25 years old, replacement required by State and EPA codes!). The State did not give final approval on the incinerator until the 90th day.

4. The law itself is overkill in Alaska. Designed for areas of heavy population, excess hospital beds and competition, the law does not work for Alaska for several reasons:

   - The law only covers private facilities--not public health, nor state owned (API or Pioneer Homes), nor military.

   - Alaska has only one city with more than one hospital and only three private ("eligible") hospitals of over 100 beds.

5. The law is reactive to existing decision making processes. Most hospitals in the State already have local public review and approval designed in their own budget review processes. Many hospitals are owned by municipalities, and all have governing or advisory boards of local citizens. These citizens should have control of the expansion and budgetary decisions of their own institutions. Several other layers are unnecessary. Hospitals and their boards are capable of making sound financial and program decisions.

As the attached Policy Statement of the Alaska State Hospital Association (ASHA) notes, we are supportive of state and local planning for the health care needs. The process should be positive and proactive-- encouraging institutions to respond to needs in the community rather than reactive, cumbersome and negative.

We encourage the city to support the ASHA position on repealing the state CON law. Your own Municipal Health Commission is a strong local planning body which helps identify health needs and encourages solutions. It also serves to review public expenditures in health. Those roles are appropriate. It should be freed from the cumbersome CON review.

Thank you for giving me the opportunity to share our concerns with you.

Best wishes for a prosperous 1983.

Sincerely,

Al M. Camosso
Administrator

Re: 10P 550016
Alaska SHPDA

Dennis L. DeWitt
President
Alaska State Hospital Association
319 Seward Street
Juneau, Alaska 99801

Dear Mr. DeWitt:

Your letter dated June 11, 1982, requested information about Region X's intentions as a result of the failure of the Alaska Legislature to pass amendments proposed to bring the State Certificate of Need program into compliance with the Federal planning law, as amended. Our course of action is quite clear. We will continue to fullfill our mandated responsibilities guided by actions and time frames specified in the law.

Under the existing provisions of Title XV of the Public Health Service Act, as amended, current law requires (in order to be fully designated) that a SHPDA must meet all requirements for full designation, including that of having a complying Certificate of Need program.

If a SHPDA is not eligible for full designation by a certain date (which for Alaska is January 19, 1983) the Department must invoke the statutory penalty of reducing most Public Health Service grants and contracts to any entity in the State by 25% the first year, 50%, 75%, and 100% over the next three years. Amendments contained in PL 97-35 extended the date by which a State must have a fully designated SHPDA to avoid imposition of the penalty. However, PL 97-35 also amended Section 1521(b)(2)(B) by specifying that a conditional designation agreement could not extend beyond a State's penalty date.

Fully designated SHPDAs (such as Alaska) which do not have complying CON programs but continue to meet other requirements, will be returned to conditional designation. As noted above, P 97-35 prohibits the conditional designation of any SHPDA from extending beyond its penalty date. Any SHPDA which remains conditionally designated on its penalty date must be terminated. Therefore, we will send a termination notice to any conditionally designated SHPDA 90-days prior to its penalty date, if it still has not demonstrated that it has a complying CON program.

The enclosed copy of a letter to Commissioner Beirne, from the Regional Health Administrator, further emphasizes the critical nature of having a complying CON program in Alaska.

Also the enclosed copy of a 1981 letter addressed to Mr. Ivan Lawner, Esq. concerning Pioneer Homes Certificate of Need review issues, reflects our unchanged position.

I hope the facts in this letter provide the detail of information required to understand the situation. Please call or write, should you need further assistance.

Sincerely,

John D. Whitney

Re: IOP 550016
Alaska SHPDA

Helen D. Beirne, Ph.D.
Commissioner
Department of Health and
Social Services
Pouch H 01
Juneau, Alaska 99811

Dear Dr. Beirne:

The State of Alaska's Department of Health and Social Services full designation agreement with the Department of Health and Human Services is being extended for three months, until September 30, 1982. As you know, because Alaska's Certificate of Need Program does not comply with Federal requirements, it is necessary that the SHPDA be returned to conditional designation. As required by statute, this 90-day extension of your current designation is being given to allow you to request and prepare for a hearing, if you should want one. Letters from the Bureau of Health Planning to you and to the Governor will further explain this process.

The following conditions are to be considered a part of the extended full designation agreement:

1. If the Agency is unable to retain full designation after September 30, 1982, it will be returned to conditional designation for the period October 1, 1982 to June 30, 1983.

2. The designation of the Agency will automatically terminate when the Agency reaches its penalty date, if the Agency still has not achieved full designation.

You may at any time prior to your penalty date (1-19-83, per PPM 82-12) submit documentation which you believe contains evidence that the State's CON program complies with the minimum Federal requirements, or a certification by the State's Attorney General, attesting to the program's compliance

Please sign both copies of this letter, indicating your acceptance of this extension with conditions. Return one copy to this office. As soon as we receive the signed copy, we will issue a Notice of Grant Award for the extended designation period.

Sincerely,

Dorothy H. Mann, M.P.H.
Regional Health Administrator

Re: 10P 550007-05

Mr. Ivan Lawner, Esq.
Hellen & Partnow
524 G Street
Suite 710
Anchorage, Alaska 99501

Dear Mr. Lawner:

This is to respond to your recent letter concerning Certificate-of-Need review of a skilled nursing facility addition to the Pioneer Home in Anchorage. In that correspondence you raised two issues: the need for clarification of our 1978 letter to Howard Gabriel regarding C/N coverage of Pioneer Homes, and the compliance of the Alaska C/N program with federal standards. These matters will be addressed separately.

1. In our September 11, 1978 letter to Howard Gabriel, Director of the Southeast Alaska HSA, we were assuming that Pioneer Homes were only residential or domiciliary care facilities; there was no understanding that inpatient skilled nursing care was provided in these institutions. Given this understanding of the nature and services of Pioneer Homes at that time we were correct in concluding that they would not be included in the federal definition of "health care facilities" which would require coverage under Certificate-of-Need programs. If indeed skilled nursing services are provided in these institutions, they would be considered "health care facilities" as defined by our C/N regulations. The 1978 letter did not consider a Pioneer Home to be such a facility.

2. We have reviewed the Alaska C/N statute and implementing regulations to determine whether Pioneer Homes would be included in the definition of a health care facility. We found that:

   a. The Alaska C/N statute defines a "health care facility" as:

      A private, municipal. . . hospital, psychiatric hospital, turberculosis hospital, skilled nursing facility. . . . (Sec. 18.07.111(7)).

   b. The Alaska C/N regulations, in turn, define "health care facility" as:

      Any of those listed in AS 18.07.111, as defined, where appropriate, in 42 CFR 123.401 (adopted 1/21/77). (7AAC07.130)

c. The State's C/N statute and regulations, taken together and including the cross reference to 42 CFR 123.401, would provide coverage of a distinct part of an institution and would, therefore, meet the federal definition of a skilled nursing facilities, i.e., an institution or a distinct part of an institution which is primarily engaged in providing inpatient skilled nursing care and related services for patients who require medical or nursing care . . . . (42 CFR 123.401)

From the above points, it would appear that the Alaska C/N program adequately defines "heath care facility" and "skilled nursing facility." It is the responsibility of the state to follow its own C/N statute and regulations. If there is an on-going and sustained pattern of not following their statute and regulations, we would certainly assess the state's overall C/N program and then take appropriate action.

Please call us should you have further questions.

Sincerely yours,

John D. Whitney, Director
Division of Health Resources
Development PHS, Region X

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF ADMINISTRATION

OFFICE OF THE COMMISSIONER

POUCH C
JUNEAU, ALASKA 99811

465-2200

May 29, 1981

Honorable Donald E. Clocksin
Chairman, Health, Education and
Social Services
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Clocksin:

This is in response to your request to put in writing my verbal testimony before your committee on CSSB 225. I will try and confine my remarks to the major issues.

Administration's position is that the Legislature has always implicitly exempted Pioneers' Homes from the certificate of need program. The Senate has concurred with this position as evidenced by CSSB 225. We are asking that the House members be afforded the same opportunity to express their will as the Senate.

There appears to be some confusion existing with the recent State Supreme Court decision of South Central Health Planning and Development, Inc. vs the Department of Administration, on certificate of need. At issue was whether or not the Legislature exempted Pioneers' Homes from certificate of need. The court found that there is no language in State statutes which can reasonably be read as exempting skilled nursing facilities from the certificate of need process when they are contained in Pioneers' Homes. Consequently, whether or not the Legislature intended to exempt Pioneers' Homes now becomes moot. The Legislature's intent can now be established only through the legislative process of amending existing law to allow this exemption.

There has been a substantial amount of discussion centering around the need for proper planning so that health facilities in Alaska are not overbuilt. This is an admirable and worthy objective, and I can assure you that this Department supports health facility planning. However, the existing system under the certificate of need program is fraught with inequities and frustrations; further, it does not represent a comprehensive planning effort.

2-89LH

There are three providers of health facilities; the federal government, the State government, and the "private sector." However, the federal health facilities don't come under the certificate of need program, and in most states this wouldn't pose any problem. The military contingent in California, for instance, would represent a small portion of the state's total population and as such would not greatly impact the planning process for certificate of need. In Alaska, the opposite is true. The federal government is a major provider of health care and facilities. Roughly one-fourth of the state's population are eligible to use federal health facilities (military base, Public Health, Indian Health, etc.). This has a devasting effect on trying to logically plan for state and "private sector" health facilities when a critical component is missing.

In addition, if we look closely at the "private sector" we see that it is not truly private. A substantial portion of the revenues of private nursing homes and health facilities originate through state and federal programs. State and federal rules, regulations, requirements, and laws, guide and govern, in minute detail, the construction and operation of private health facilities. This includes the proper ratios of professional staff to patients, the type of equipment allowed, size of hallways, reporting procedures, and many others. In effect, the "private sector" is part of the "public sector." Consequently, the charge that the State, through the establishment of Pioneers' Homes, is unfairly competing with the private sector is a fallacious argument.

There has also been considerable discussion on the impact of granting Pioneers' Homes an exemption from certificate of need as it relates to federal programs. Mr. Vern Perry, Director of the Division of Pioneers' Benefits spoke with Mr. Jim Egan, Regional Project Officer of the Office of Health Planning, Region X, U. S. Department of Health, Education and Welfare, on Wednesday May 27, regarding the certificate of need program.

QUESTION: What effect would there be on the State of Alaska if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: It would have no effect on medicare, medicaid, AFDC or Indian Health Service. It could only affect categorical programs such as alcoholism, EMS, Neighborhood Health Clinics, Mental Health Clinics, Day Care, etc.

QUESTION: Would the federal government actually discontinue such programs as alcoholism and mental health if Pioneers' Homes were exempted from the certificate of need program?

ANSWER: No! Absolutely not. In his opinion, under the new administration, there would be no federal sanctions whatsoever in health care programs, especially since the responsibility for this is being turned over to the states.

Further, discussions were held with the States of California and Washington regarding their certificate of need programs. In California, Mr. Ken Umbach (916/323-6955) of the Office of Statewide Health Planning and Development was contacted. He stated that California has been out of conformance with the federal certificate of need program since 1969. Their latest date for coming into conformance is October. He stated that if they did not meet the deadline that the feds would probably extend it. Mr. Jim Bettridge of Washington Health Care Facilities Authority (206/753-6185) indicated that the feds were withdrawing total support from the certificate of need program by 1983.

These conversations indicate that:

i. The federal government is not inclined to impose sanctions on a State for nonconformance with the certificate of need program;

ii. There are states which are nonconforming, and have been nonconforming for a number of years, on which federal sanctions have not been imposed; and

iii. The federal government is withdrawing total support for the certificate of need program by 1983. If the state wants to continue a planning process for health facility development it will have to provide for the process by using General Funds monies. Based on the aforementioned problems, now would be the appropriate time to revise this planning process to make it more meaningful.

Finally, a compromise position has been mentioned in which the new nursing wing at the Anchorage Pioneers' Home and the new Pioneers' Home in Ketchikan would be totally grandfathered into law and not made subject to certificate of need. This compromise does not address a truly complex problem.

The Fairbanks Pioneers' Home presently is serving twelve skilled nursing beds in unlicensed beds. Unless a certificate of need is issued which allows licensing of these beds, these twelve pioneers would have to be discharged.

The Fairbanks and Palmer Pioneers' Homes are full to capacity with skilled nursing patients at the present time. If we are to accommodate anticipated need in the near future, additional skilled nursing facilities will have to be constructed within the next few years. This expansion would be impossible unless a certificate of need is issued.

The Department of Health and Social Services, in recent licensing inspections, has advised a significant number of residents in the ambulatory sections of all the Pioneers' Homes should be designated intermediate care patients. Intermediate care requires both a certificate of need and a significant increase in staffing, installation of call buttons or other signalling devices, and closer attention to patients when taking medications, etc. The number of patients which might be considered in need of intermediate care are: thirty at Sitka, twenty at Fairbanks, twenty at Palmer and forty at Anchorage (in the new wing).

Funding to provide intermediate care was not included in the FY 82 operating budget. Although a dollar figure is not available at the present time, a significant increase will be necessary if we must comply with the certificate of need program. Passage of SB 225 would eliminate this situation.

In summary:

1. Administration believes the Legislature had always intended to exclude Pioneers' Homes from certificate of need;

2. The certificate of need process is not appropriate for Alaska;

3. There needs to be planning for health care facilities and a more responsive process needs to be developed;

4. Grandfathering the nursing wing at Anchorage and the new Pioneers' Home at Ketchikan will not solve the complex problems existing at the Fairbanks, Palmer, and Sitka Pioneers' Home; and,

5. Passage of CSSB 225 will eliminate the potential for pain and suffering by allowing Pioneers' Homes residents to remain in their home.

If I can be of any further assistance to you or your committee, please give me a call.

Sincerely,

Frederick B. Muller

accordance with subsection (b)(2), or (b)(3) of this section (as the Secretary determines appropriate), enter into another agreement with the Governor for the designation of a State Agency.

Failure to designate State Agency within specified period; reduction in allotment, grant, loan, loan guarantee, or contract

(d)(1) If an agreement under subsection (b)(3) of this section for the designation of a State Agency for a State is not in effect upon the expiration of—

(A) the fourth fiscal year which begins after 1975; or

(B)(i) if the legislature of the State is in a regular session on December 17, 1980 and the legislature will be in session for at least twelve months from such date, twenty-four months from such date, or

(ii) if the legislature of the State is in session on December 17, 1980, but twelve months do not remain in such session after such date or if the legislature of the State is not in session on such date, twenty-four months after the beginning of the first regular session of the legislature beginning after such date,

whichever occurs later, the Secretary shall take the action prescribed by paragraph (2).

(2) If upon the expiration of the period applicable under paragraph (1) an agreement is not in effect for the designation of a State Agency for a State, the Secretary shall until such an agreement is in effect take the following action:

(A) During the first twelve months after the date of the expiration of the applicable period, the Secretary shall reduce by 25 percent the amount of each allotment, grant, loan, and loan guarantee made to and each contract entered into with an individual or entity in such State during such period under this chapter or the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

(B) During the second twelve months after such expiration date, the Secretary shall reduce by 50 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(C) During the third twelve months after such expiration date, the Secretary shall reduce by 75 percent the amount of each such allotment, grant, loan, loan guarantee, and contract.

(D) After the expiration of thirty-six months after such expiration date, the Secretary may not make or enter into any such allotment, grant, loan, loan guarantee, or contract.

The Honorable Mike Beirne
Chairman
House HESS Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Beirne:

I am enclosing a Program Policy Notice we recently received from the Bureau of Health Planning in the U. S. Department of Health and Human Services. This Notice emphasizes that states which do not have State Health Planning and Development Agencies which fully comply with federal requirements will lose federal support for health planning efforts and will also lose most federal Public Health Service dollars. Alaska currently receives some $5 million annually in such federal funds. Our lack of compliance would result in one quarter of these funds being withheld for four years until certain federal public health service funds are no longer available to Alaska.

We appreciate the hearing you conducted on House Bill 195. We believe this bill, with the amendments we offered, would bring our State Health Planning and Development Agency into full compliance with federal requirements. Your assistance in helping to move this legislation would be very much appreciated.

We appreciate your assistance and support in this matter.

Sincerely,

Helen D. Beirne

November 4, 1982

The Honorable Ted Stevens
United States Senate
Washington, D.C. 20510

Similar letter sent to:
Senator Murkowski and
Congressman Young

Dear Senator Stevens:

As you are well aware the State of Alaska is not in conformity with the National Health Planning and Development Act and without federal action in 1982 faces penalties in grant monies under the Public Health Service Act and the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970. To avoid this penalty it is imperative that Congress repeal 42 U.S.C. 300m-(d) (copy attached).

This Association as well as the Alaska State Medical Association (resolutions attached) are opposed to the continuation of the state Certificate of Need law. Both are committed to its repeal in 1983. Repeal of 42 U.S.C. 300m-(d) will greatly assist our efforts.

We have communicated our support for various measures considered by this Congress to restructure the federal law. It appears however, that a full reform may be a consideration which must be left to the next Congress. If that is so, it is imperative that you secure repeal of 42 U.S.C. 300m-(d) before the current Congress adjourns in December.

All of those concerned with this issue including Congressman Waxman, the National Governors Conference, the American Hospital Association, etc., agree on removing sanctions against states which do not conform to the federal program. The notion of further delay of the sanctions does not assist anyone, it simply prevents states such as Alaska from dealing with its own law on anything beyond a temporary basis.

For these reasons we urge you to secure the repeal of 42 U.S.C. 300m-(d). This will permit the legislature of the State of Alaska to deal with its law in whatever manner it deems appropriate. Further, we urge that this repeal be secured prior to the adjournment of the 97th Congress.

Sincerely,

Dennis L. DeWitt

January 31, 1984

The Honorable Mae Tischer
Alaska State Legislature
Pouch V (MS 3100)
Juneau, AK 99811

Dear Representative Tischer:

Thank you very much for having permitted me to testify before the Health, Education and Social Services Committee last Friday with respect to CS for House Bill #32 and House Bills #466 and #467. The help which you and other representatives receiving copies of this letter give to the University of Alaska is deeply appreciated.

With respect to CS for House Bill #32, I was asked during the committee meeting how many students could be accommodated with the funding proposed in it for student housing in Anchorage. As I remember, I estimated about 275 students but said that I would report back on this matter, and that is one of the purposes of this letter. Related information is shown in the page immediately below.

I understand from discussions at the committee meeting last Friday that legislators intend for the student housing to be constructed in Anchorage to accommodate students from both UAA and ACC, and that is also the university's intent. I also understand that legislators want the housing to accommodate as many students as possible for the money, considering such things as the need for suitable construction which will not result in undue maintenance costs. The university administration will do the best it can to take care of these matters. Because of the special interest which Representative Walt Furnace has in student housing in Anchorage, I shall send a copy of this letter to him.

I shall work with Elmer Lindstrom to attempt to get suitable wording in House Bill #466 to place reasonable restrictions on how general fund money might be invested by the University of Alaska, to accommodate the concern which Representative Goll voiced during the committee meeting last week. To take care of this matter, I suggest a wording change along the line shown on

the second page attached. Such a change would be meaningful, establish reasonable constraint, and would not inhibit efficient investment practices. As Representative Koponen pointed out during the committee discussions, the great need for liquidity in these specific, temporary investments of cash also helps preclude the possibility of many types of speculative investments.

Sincerely,

Sherman Carter

JAN 3 1 REC'D

University of Alaska
Facilities Planning & Construction

January 31, 1984

TO: Sherman Carter
Executive Vice President

FROM: Fred King
University Architect

SUBJECT: Anchorage Student Housing

You asked Chris how many more students could be accommodated in the Anchorage Housing project if the budget was increased from the Eleven Million Eight Hundred Thousand Dollars ($11,800,000.00) requested to Fifteen Million Dollars ($15,000,000.00). If we use the unit costs that were used to develop the budget we will be able to build 16 more apartments, housing an additional 64 students, raising the total student accommodations from 220 to 284.

Sherman, the budget was established anticipating a more traditional method of construction. Using the bidder design process, we now believe that we can accommodate about 250 students for the Eleven Million Eight Hundred Thousand Dollars ($11,800,000.00) requested. An increase in the funding to Fifteen Million Dollars ($15,000,000.00) would probably result in an increase in the capacity of the project to 324 students. Our consultant, William J. King and Associates, has not yet completed his first cost estimates for the project to confirm these expectations so we have not shared them with anyone.

IN THE HOUSE BY MARTIN

HOUSE BILL NO. 466

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to appropriations to and fiscal procedures of the University of Alaska; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.250 is amended to read:

Sec. 14.40.250. REGENTS TO ACT AS TRUSTEES AND ADMINISTER MONEY OR PROPERTY [FROM SOURCES OTHER THAN LEGISLATURE OR FEDERAL APPROPRIATION]. The Board of Regents may receive, manage, and invest money or other real, personal or mixed property ~~in any manner~~ received from any source [SOURCES OTHER THAN THE STATE LEGISLATURE OR FEDERAL APPROPRIATION] for the purpose of the University of Alaska, its improvement or adornment, or the aid or advantage of students or faculty, and in general, may act as trustee on behalf of the University of Alaska for any of these purposes. ~~However~~, The regents shall make a written report to the legislature, in accordance with AS 14.40.190, as to the administration and disposition of funds received [UNDER THIS SECTION].

* Sec. 2. AS 14.40.296(a) is amended to read:

(a) There is established in the treasury of the University of Alaska the University of Alaska working capital reserve fund. The fund consists of interest income from investments made by the Board of Regents under AS 14.40.250 and money appropriated by the legislature for the purpose of providing nonlapsing current working capital for the University of Alaska and is not available for appropriation by the Board of Regents.

Investment of general fund monies shall be made in federal securities or shall be insured or collateralized.

Announcements

Adjournment

MAR 2 0 1983

University of Alaska, Anchorage

Proposed Student Housing

Walsh/Rosenell Development

February, 1983

A. Project Assumptions

1. The proposed development concept is to build a turnkey 100 unit apartment styled dormitory housing 400 students.
2. Each dormitory unit consists of a seperate entry deck, 4 bedrooms, one bath, complete kitchen and dining area, a living room, storage areas and outdoor deck, and all room appliances and furnishings. The Floor plan totals 1080 SF.
3. The property required for the project is 3.5 acres including landscaping and walkways. The proposal calls for the project to be developed on University owned land with a dollar per year nominal lease for thirty years.
4. The project also includes common facilities of a 4000 SF student lounge, a 400 SF laundry facility and a dormitory office.

5. Construction is a three-story walk-up; type V-1hr wood frame building.
6. Utilities are common, with students paying as part of their monthly rent, one fee for heat, lights, water, sewer, garbage and janitorial. Students will be responsible for cleaning their individual units.
7. The developers are proposing a turnkey project in which they will design, build, and manage the project. University approval will be required on design specifications.
8. The University will be financially responsible for site selection, road improvement to site, offstreet parking if required, and utilities to curbside. The developers will assume all costs beyond curbside. (The developers will serve as construction manager on the University improvements if requested by the University).

B. Project Financing

1. Cost estimates for the project are as follows:

a. Dwelling Units and Furnishings 100 units @ 1080SF @$47.00/SF	$5,076,000
b. Student Center Amenities 4600SF @ $80.00/SF	368,000
c. Site Development $100,000/acre @ 3.5 acres	350,000
d. Architectural-Engineering	300,000
e. Interim Financing	300,000

f. AIDA Loan Fees	$250,000
g. Overhead and Administration	400,000
Total Estimated Development (not including land)	$7,044,000

Cost per SF : $63.00

Cost per Unit : $70,440

Cost per Student : $17,610

2. Total monthly rents for students are suggested to be set at $170 per month with a CPI increase of 8% annually.

3. Proposed finance method is for the developers to assume 100% of the financing obligation and for the University to guarantee the lease of the facility.

4. Responsibilities of the Developers/Managers include:
   a. Maintaining the facility to University standards
   b. Managing the facility, including all janitorial requirements within the facility, all facility maintenance, utility, insurance, and office payments, bookeeping, and protecting the general condition of the facility.
   c. Maintaining a replacement reserve to keep all facility furnishings and appliances in approved condition.

5. Responsibilities of the University include:
   a. Maintaining the University grounds surrounding the dormitory facility

b. Collecting rent payments with the term tuition payments.

c. Inspecting/approving facility to insure proper specifications are met.

6. Having reviewed several methods of financing the developers propose the following:

   a. The requirements of offering inexpensive student rent prohibits obtaining the required rate of return to normally interest a private developer;

   b. By making a financial arrangement whereby the University guarantees to lease 100% of the facility, and contributes a site for development, then the University in effect brings the project to the minimally accepted break-even requirement.

   c. In response to the University contributions, the developers will then allocate to the University 100% of the excess rental income over the developers costs, management and operational costs, and replacement reserve. This should amount to several hundred thousand dollars per year to the University.

   d. Details of the cash flow of the project are following in this proposal.

7. The developers have based their financial assumptions on receiving an AIDA loan or conventional at 11.6% with 90% financing over 30 years.

8. The University assumes ownership of the facility after 30 years for one dollar. All obligations of the developer/manager end at that time.

C. Project Timetable

1. Proposed plan can be 100% completed in approximately 7 months construction. The following schedule is achievable:

a. Design and engineering	1 1/2 months
b. Completion of 200 units	4 1/2 months
c. Completion of 400 units	3 months

2. In order to have the facility prepared for the next school year (september '83) the following schedule is required:

a. Project approval	March 15
b. Design and Engineering	May 1
c. Groundbreaking	May 1
d. Completion of 200 units	Sept. 15
e. Completion of 400 units	Dec. 15

D. Options

1. The developers have some flexibility to reconfigure the project if minor changes would more fully meet the needs of the University. These options include phasing the project with different size units, or a different number of units, or discussing other financing relationships that would not alter the minimally acceptable requirements of the developers.

E. Contractor History

1. Tom Walsh Construction Co. has nearly 20 years experience in the low cost and multiple unit construction field, completing over

1. (cont.) 3000 multiple units.
2. Walsh Construction has recently completed 4 major University housing projects valued at over 16 million dollars. These projects include two dormitories at the University of Washington and two dorms at Washington State University.
3. Walsh Construction has built many turnkey projects throughout the northwest and in climates similar to Anchorage's, such as the W.S.U. Dormitories at Pullman.

F. Cash Flow Analysis

1. The following analysis has been run for 15 years for the sake of brevity; the same format continues for years 16-30.

G. Mailing Address

The Rosenell Group
215 Second Avenue
Suite 215
Anchorage, Alaska 99501

Att: Michael C. Mitchell

Phone: 279-1037

Note: This proposal is to serve as a general guideline to gain conditional University approval. The developer understands that the final acceptance of the project by the University will require approvals of the actual project plans and specifications. The project timetable is also subject to the municipality all other permitting agencies.

TONY KNOWLES, MAYOR

DEPARTMENT OF HEALTH AND ENVIRONMENTAL PROTECTION

November 30, 1982

Representative Terry Martin
1024 West Sixth Avenue
Anchorage, AK 99501

SUBJECT: Dormitories for the University of Alaska, Anchorage Campus

Dear Representative Martin:

I am pleased to provide the following information to support the construction of dormitories for the University of Alaska, Anchorage.

As the manager of the Division of Environmental Health, I supervise the Air Quality Program for the Municipality of Anchorage. I also represent the director of the Municipal Department of Health and Environmental Protection on the Southcentral Clean Air Authority and on the AMATS Technical Advisory Committee.

The Federal Clean Air Act contains provisions requiring compliance with mandatory federal standards. Anchorage is a "non-attainment" area under the standards, and as such must come into compliance with the standards by July 1, 1985. To do so, the Municipality must implement severe and immediate measures to control carbon monoxide. These measures will include mandatory inspection and maintenance of automotive vehicles, increases in the use of public transportation, carpooling and other measures. However, even with the full implementation of these measures, the analysis shows that Anchorage will not be able to comply with the standards. We must therefore look at every available possibility to reduce carbon monoxide concentrations.

Almost all of the carbon monoxide problem comes from the exhaust of gasoline-powered vehicles. A reduction in the use of automotive vehicles will help in reaching the attainment standards of the Clean Air Act.

This department therefore endorses the construction of dormitories at the the University campus in Anchorage. At the present time, students who attend the University must live off campus, and this will necessitate the use of a car to attend school. Once a student has purchased a car, there is no reason not to use it for other purposes such as shopping, visiting friends, etc.

If the same student lived on campus, however, the prime motivation for owning a car would be eliminated. The student would then use public transportation for shopping and other purposes.

I don't want to understate the importance of achieving the carbon monoxide standards in Anchorage. The impact on the health of those persons in the community susceptible to respiratory diseases has been well-documented, and a serious health hazard may result if levels are not brought down to acceptable values.

I hope this information is of assistance to you in your deliberations.

Sincerely yours,

Stan Brust

Stan Brust, Director
Division of Environmental Health

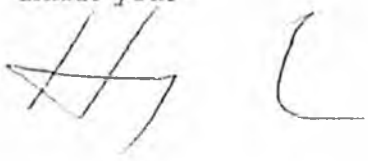
REPRESENTATIVE HUGH MALONE

M E M O R A N D U M

To: Representative Mae Tischer
Co-chair, House HESS Committee

From: Representative Hugh Malone

Subject: House Bill 36 (An Act relating to the longevity bonus program; and providing for an effective date)



Date: March 11, 1983

I respectfully request that my bill (HB 36) be scheduled for committee consideration.

I hope that we can, this year, resolve any/all constitutional problems surrounding this program.

I would appreciate a written reply as to when this bill will be scheduled.

Thank you.

ALASKA STATUTES

TITLE 47. WELFARE, SOCIAL SERVICES AND INSTITUTIONS

Chapter 45. Alaska Longevity Bonus

Sec. 47.45.010. PERSONS WHO MAY QUALIFY FOR LONGEVITY BONUS. (a) A person who is 65 years of age or over, who was domiciled in the territory on or before January 3, 1959 and who has maintained a continuous domicile in the territory or state for 25 years may apply to the commissioner of administration for qualification to receive a monthly bonus of $250. (§ 1 ch 205 SLA 1972; am § 1 ch 33 SLA 1976; am § 1 ch 89 SLA 1978; am § 1 ch 147 SLA 1980; am § 1 ch 13 SLA 1981)

(b) When the commissioner of administration determines that an applicant qualifies under this chapter he shall immediately begin payment of the bonus.

(c) A person who otherwise qualifies to receive a bonus provided for in this chapter may continue to do so only as long as he continuously retains a domicile in the state.

Sec. 47.45.020. CONTINUOUS ELIGIBILITY PROCEDURES. After qualification, monthly applications for bonuses may be made in person to any office of the Department of Administration. Mailed monthly applications shall also be considered by the Department of Administration. In-person or mailed applications shall be made on forms provided by the Department of Administration and shall conform to the conditions as provided by regulation. The commissioner may make exceptions to those residents who are isolated in rural areas and cannot mail a monthly application; however, they shall mail an application at least once every six months.

Sec. 47.45.030. ABSENCE FROM THE STATE. A recipient shall notify the commissioner of administration when he expects to be absent from the state if the absence is for a continuous period that exceeds 30 days. After such notification, the recipient shall no longer receive bonuses from the Department of Administration

after his last regularly approved monthly application. Upon his return to the state he may again make application for a bonus. Whenever the absence is for a continuous period that exceeds 180 days the recipient shall be disqualified from receiving bonuses for the next 12 calendar months after his return to the state. However, when the commissioner of administration determines a period of absence is beyond the control of the recipient, he may not be disqualified, if he still otherwise qualifies upon his return to the state. Continual absences from the state, even though reported, and failure to notify the commissioner of an expected absence may be grounds for disqualification.

Sec. 47.45.040. DISQUALIFICATION. Disqualification under this chapter shall rest solely with the commissioner of administration and shall be outlined in the regulations promulgated under sec. 100(1) of this chapter.

Sec. 47.45.050. DEPARTMENT HEARING. The Department of Administration may hold a departmental hearing upon the request of any applicant or recipient who has been disqualified. Previous to this hearing the department shall by certified mail notify an applicant or recipient in plain and comprehensive language the exact reason for his disqualification. Form letters using only referral to state statutes or department regulations, or otherwise vague in detail, shall not be considered compliance by the department with this section.

Sec. 47.45.060. LEGAL REMEDY. Legal remedy from disqualification may be sought by an applicant or recipient in any court of competent jurisdication in the state. The burden of proof shall rest solely upon the applicant or recipient and any costs related to a disqualification verdict determined against the applicant or recipient may be recoverable by the attorney general from that person, or from any agency representing that person supported in whole, or in part, with state appropriations.

Sec. 47.45.070. UNQUALIFIED PERSONS. An unqualified person is one who

(1) does not meet the age or residence requirements as provided for under this chapter;

(2) meets the age and residence requirements of this chapter but is confined in a state or federal mental health institution or facility and is certified by the state as unable to manage his own affairs; however, if such a person was at the time of his commitment the principal support of a spouse, the commissioner of administration may determine to pay the confined person's bonus to his spouse until the spouse is qualified for a bonus;

(3) is otherwise qualified but confined in a penal or correctional institution or facility; upon completion of sentence or upon the conferral of a pardon, parole or probation, the person may make application; confinement outside the state shall be considered as residence in the state if a person was convicted and sentenced from a court in Alaska; revocation of parole or probation shall be cause for immediate disqualification until release from confinement is again effected;

(4) leaves the state of his own volition and remains absent from the state for a continuous period of more than 180 days.

Sec. 47.45.080. ACCRUAL OF BONUSES. No recipient may, for any reason, receive an accrual of bonuses in excess of two monthly payments. No interest may be paid on accrued bonuses. Upon the death of a recipient the commissioner of administration shall pay to the beneficiary of the recipient any accrued bonuses not to exceed two monthly payments.

Sec. 47.45.090. ALASKA LONGEVITY BONUS FUND. (a) There is the Alaska longevity bonus fund created for the purpose of paying the monthly bonuses provided for in this chapter. The fund consists of all money made available by appropriations of the state legislature, and from other appropriated funds, all contributions from whatever source, and income and interest derived from the investment of money.

(b) The commissioner of administration is the administrator of the fund.

Sec. 47.45.100. POWERS AND DUTIES OF THE ADMINISTRATOR. The commissioner of administration shall

(1) promulgate regulations necessary to carry out the provisions of this chapter;

(2) make expenditures from the fund necessary to administer this chapter;

(3) establish and maintain an adequate system of accounts for the fund;

(4) publish annually a report showing the financial condition of the fund.

Sec. 47.45.110. CUSTODY OF FUNDS. The commissioner of revenue is the treasurer of the system and has powers and duties for this purpose including but not limited to the following:

(1) to act as official custodian of the cash and securities belonging to the fund;

(2) to receive all items of cash belonging to the fund.

Sec. 47.45.120. EXEMPTION FROM TAXATION AND PROCESS. Bonuses received under this chapter are exempt from all state and political subdivision taxes except sales and use taxes and are not subject to execution, attachment, garnishment or other process. No bonus received under this chapter may be exempt from a federal tax requirement.

Sec. 47.45.130. DEATH OR CESSATION OF RESIDENCY. The commissioner of administration shall establish procedures to stop a bonus when a recipient under this chapter no longer qualifies. When a recipient dies or discontinues his residency in the state his qualification for a bonus shall stop at the time of his last approved monthly application.

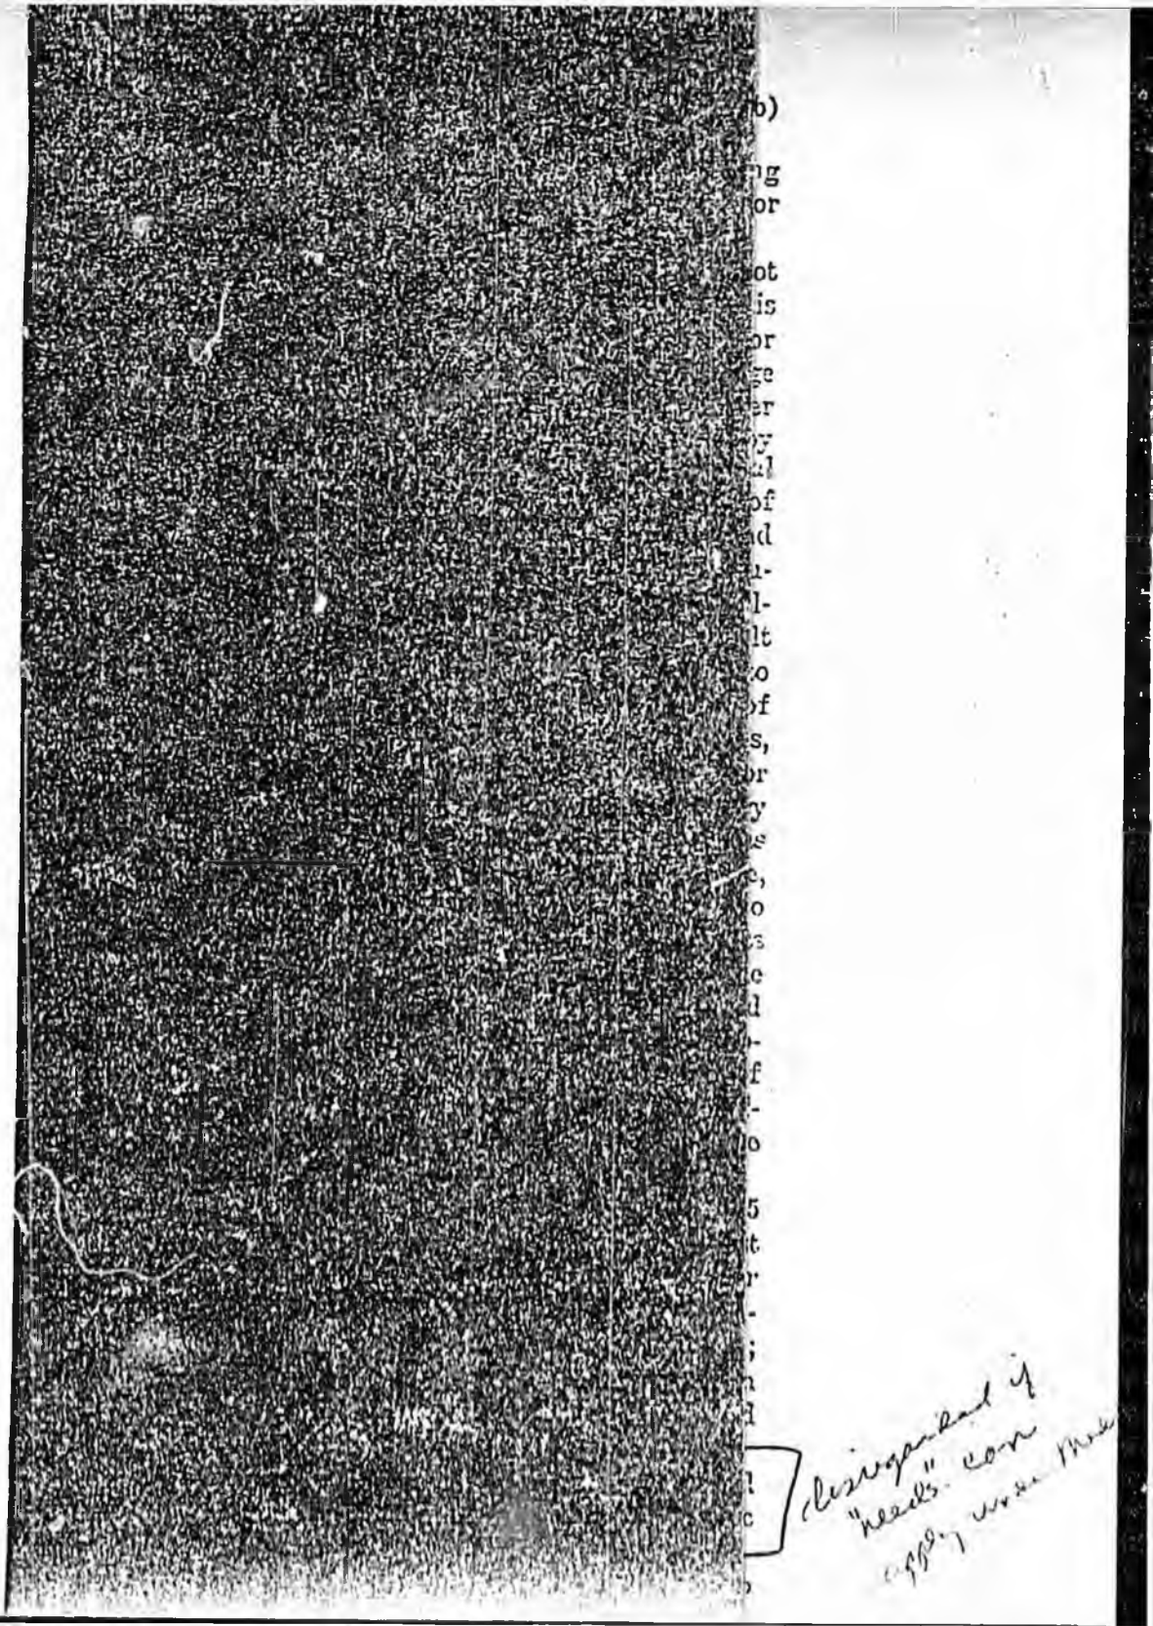
Sec. 47.45.140. PENALTY FOR FALSE STATEMENTS. A person who wilfully or knowingly makes a false statement, or falsifies or permits to be falsified any record required by this chapter, is guilty of a misdemeanor and, upon conviction, is punishable by a fine of not more than $500, or by imprisonment

for not more than six months, or by both, forfeits all rights under this chapter, and shall make adequate restitution for any bonuses illegally received.

Sec. 47.45.150. DEFINITIONS. In this chapter

(1) "bonus" means a monthly Alaska longevity bonus payment made to a person or his beneficiary who qualifies under this chapter;

(2) "domicile" means the place with which a person has a settled connection for determination of his civil status or other legal purposes because it is actually or legally his permanent and principal home.



Sec. 47.45.160. APPLICABILITY OF ADMINISTRATIVE PROCEDURE ACT. The Administrative Procedure Act (AS 44.62) does not apply to this chapter.

Sec. 47.45.170. PURPOSE. The sole purpose of this chapter is to offer and provide all law-abiding Alaskans capable of managing their own affairs who have maintained a domicile in the state for at least 25 years and have reached a retirement age of 65, an incentive to continue uninterrupted residency in the state. Under no circumstances shall this chapter be considered a form, type, or manner, of public relief. Bonuses made under this chapter are not predicated on need even though they may appear to provide supplemental income to some qualified persons who would otherwise be forced to become responsiblities of the state. The legislature further finds and states that this legislation recognizes the economic hardships suffered by many elderly Alaskans, Alaskans who through their tenacity and perseverance molded Alaska as we know it through skillful application of their talents. These pioneers are the same Alaskans, who in the prime of their life were in effect treated as second-class citizens by the federal government who paid much of their hard-earned income to a government in which they did not have the right to participate through power of the ballot. The legislature also is aware of the fact that many of these pioneers have been forced to live out their retirement years in areas far away from the land they loved and nurtured and thereby also suffering in many cases, the loss of familial relationship with

their own kin, an experience that is sad and frustrating to them as well as depriving new generations of Alaskans the benefit of their wisdom and experience. This legislation hopefully will provide our pioneers with the economic means to remain in and continue to serve their state and to enjoy the opportunity of aiding the new Alaskan in making this state truly "The Great Land."

* Sec. 2. AS 01.10.030 does not apply to this Act. If any provision of this Act, or the application of a provision of this Act to any person or circumstances is held invalid, this entire Act shall be considered invalid.

* Sec. 3. This Act takes effect January 1, 1973.

[43 FR 45204, Sept. 29, 1978, as amended at 44 FR 17937, Mar. 23, 1979]

Subpart G—General Financial Eligibility Requirements and Options

§ 435.600 Scope.

This subpart prescribes general financial requirements and options for determining the eligibility of both categorically and medically needy individuals specified in Subparts B, C, and D of this part. Subparts H and I prescribe additional financial requirements.

(Secs. 1102, 1902(a)(25), 1903(d)(2), 1903(o), 1903(p), and 1912 of the Social Security Act (42 U.S.C. 1302, 1396(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396k))

[43 FR 45204, Sept. 29, 1978, as amended at 45 FR 8986, Feb. 11, 1980]

§ 435.602 Limitation on the financial responsibility of relatives.

(a) Except for a spouse of an individual or a parent for a child who is under age 21 or blind or disabled, the agency must not—

(1) Consider income and resources of any relative available to an individual; nor

(2) Collect reimbursement from any relative for amounts paid by the agency for services provided to an individual.

(b) The income and resources of spouses and parents must be considered in determining financial eligibility as provided for the categorically needy in Subpart H and the medically needy in Subpart I of this part.

[45 FR 82250, Dec. 15, 1980]

§ 435.603 Applications for other benefits.

(a) As a condition of eligibility, the agency must require applicants and recipients to take all necessary steps to obtain any annuities, pensions, retirement, and disability benefits to which they are entitled, unless they can show good cause for not doing so.

(b) Annuities, pensions, retirement and disability benefits include, but are not limited to, veterans' compensation and pensions, OASDI benefits, railroad retirement benefits, and unemployment compensation.

§ 435.604 Assignment of rights to [illegible]

(a) As a condition of eligibility, in addition to other requirements of this part, the agency may require [illegible] able applicants and recipients to assign rights to medical support or other third party payments and to cooperate with the agency in obtaining medical support or payments. See [illegible] 433, Subpart D, for specific requirements.

(b) If an agency requires assignment of rights, it must do so uniformly for all groups covered under the plan.

(Secs. 1102, 1902(a)(25), 1903(d)(2), 1903(o), 1903(p), and 1912 of the Social Security Act (42 U.S.C. 1302, 1396(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396k))

[45 FR 8986, Feb. 11, 1980]

Subpart H—Financial Requirements for the Categorically Needy

§ 435.700 Scope.

This subpart prescribes financial requirements for determining the eligibility of categorically needy individuals under Subparts B and C of this part. The requirements apply only to individuals who are not receiving AFDC, SSI, or an optional State supplement. The financial eligibility requirements of AFDC, SSI, or the State supplement apply to individuals receiving those payments. This subpart also prescribes requirements for applying an institutionalized recipient's income to cost of care.

Financial Requirements Applicable to Optional Groups: Families and Children

§ 435.711 General requirements.

In determining eligibility for families and children, a Medicaid agency must apply the financial eligibility requirements of the State's AFDC plan.

§ 435.712 Financial responsibility of spouses and parents.

(a) For families and children, the agency must consider income and resources of spouses or parents as available to the individual whether or not they are actually contributed, if they live in the same household. For this purpose, "parent" includes a stepparent if he is equally liable with the natural parent for the support of children under State law of general applicability.

(b) If the spouse or parent does not live with the individual, the agency must consider only income and resources that are actually contributed to the individual from a parent or spouse as available to him.

(c) Even if State law confers adult status below age 21, the agency must consider parental income and resources as available to a child, if he is living with the parent, until he becomes 21.

Financial Eligibility Requirements Applicable to Optional Groups: The Aged, Blind, and Disabled in States Covering Individuals Receiving SSI

§[illegible]721 General requirements.

(a) This section applies when an agency provides Medicaid to—

(1) All SSI recipients or to all SSI recipients and to State supplement recipients; and

(2) One or more of the optional coverage groups specified in §§ 435.210 (eligible for but not receiving cash), 435.211 and 435.231 (institutionalized individuals).

(b) If the agency, under § 435.120, provides Medicaid to SSI recipients but not to optional State supplement recipients, it must use the SSI financial eligibility requirements to determine Medicaid eligibility of aged, blind, and disabled individuals under the optional provisions of §§ 435.210, 435.211, and 435.231. However, under § 435.231, it may use a higher income standard than SSI to determine eligibility for institutionalized individuals.

(c) If the agency provides Medicaid to SSI recipients and, under § 435.230, to individuals who are not receiving SSI but are receiving optional State supplements, the agency must use the following criteria to determine Medicaid eligibility under the optional provisions of §§ 435.210, 435.211, and 435.231 for aged, blind, and disabled individuals:

(1) The agency must use the SSI financial eligibility requirements for individuals who would be eligible for SSI but would not be eligible for an optional State supplement.

(2) The agency must use the supplement program's financial eligibility requirements for individuals who would be eligible for an optional State supplement. However, the agency may use a higher income standard than SSI or the State supplement program to determine eligibility of institutionalized individuals under § 435.231.

(d) In determining eligibility under paragraph (b) or (c) of this section, the agency must use the SSI deductions from income and resources and budgeting methods set forth in 20 CFR Part 416, unless greater deductions from income and higher income standards are used in an optional State supplement program that meets the requirements of § 435.230.

§ 435.722 Individuals in institutions who are eligible under a special income level.

(a) If an agency, under § 435.231, provides Medicaid to individuals in medical institutions and intermediate care facilities who would not be eligible for SSI or State supplements if they were not institutionalized, the agency must use income standards based on the greater need for financial assistance that the individuals would have if they were not in the institution. The standards may vary by the level of institutional care needed by the individual (hospital, skilled nursing, or intermediate level care), or by other factors related to individual needs. (See § 435.1005 for FFP limits on income standards established under this section.)

(b) In determining the eligibility of individuals under the income standards established under this section, the agency must not take into account income that would be disregarded in determining eligibility for SSI or for an optional State supplement.

(c) The agency must apply the income standards established under this section effective with the first full month of institutionalization.

HOUSE HESS
COMMITTEE MEETING
AGENDA

DATE: March 30, 1983

TIME: 1:00 p.m.

I. Call Meeting to Order

A. Note Committee Members Present

B. Welcome Those Observing

C. Remind those wishing to testify to sign up, and those giving testimony to speak up and state their names.

II. Announce Legislation Under Consideration:

CSHB 56	An act relating to scholarship loans.
HB 36	An act relating to the longevity bonus program; and providing for an effective date.

Other notes or reminders:

NO MEETING SCHEDULED ON FRIDAY, APRIL 1, 1983

HB 36 Longevity Bonus

1. Malone

How much does it cost now annually? 30,000,000 35.5 37.7 40.9

(3803 additional ppl) + Fiscal Note 12,037,500.

Rainy Day - Send against the State.

253,000,000 Capit Proj & into dept.

2. Redd - Bill's substitute w/ Fiscal Note

10 yr payout

Rep Malone bill Year 1981: $70,000,000

3. Palmquist - retain a resource in the State

Jan 1973 - first Bonus Che - 5400

now doubled.

no retroactive - she opposes retroactive

Mr. Bell: public Assistance / Bonus just transfer funds + responsibility

don't translate Bonus into public assistance

gives greater security

suggests volunteer public service to earn Bonus. Measurable.

1. Appeal to Residency

2. Offset proposed.

3.

(Senate)

Jon Tillinghast – Ad Hoc Committee on Residency.

Kay, Bertulla Dockett – members

Zigler Halford – advisors

25% of P. F. earnings into annuity would be savings acct.

by year 2000: will have secure fund

$1.7 Bill. savings acct

FY 1984 – 13,672 3.9% to 3.2%

85

yr 2000 – 25,158 people

EQUAL RETIREMENT BENEFITS

SECTION 1

Establishes the Longevity Bonus Account as a separate account within the Alaska permanent fund and also takes 12.5 percent of the income of the permanent fund earned during a fiscal year that is available for distribution and transfers it to the Longevity Bonus Account. Section 1 also states that the money shall be reinvested, and that the Commissioner of Revenue transfers money in the Longevity Bonus Account to the Alaska Longevity Bonus Fund to pay monthly longevity bonuses.

SECTION 2

Changes percentage of Permanent Fund Earnings distributed to 37.5 percent (To coincide with Section 1).

SECTION 3

Establishes a 1 year residency and over 65 years of age as the qualifications for the Longevity Bonus.

SECTION 4

Establishes a $250 a month payment plus a 3 percent annual increase.

SECTION 5

Changes the "He" and "His" to "the recipient".

SECTION 6

Changes the language so that the Alaska Longevity Bonus Fund can receive funds from the Alaska permanent fund.

SECTION 7

Adds new language so that as requested by the Commissioner of Administration, the Commissioner of Revenue shall transfer amounts from the Longevity Bonus Account to the Longevity Bonus Fund to pay the monthly bonuses.

SECTION 8

Definition of resident.

SECTION 9

Finding and purposes.

SECTION 10
Repeals definition of bonus and domicile in Alaska statues.

SECTION 11

Effective date.

THE LONGEVITY BONUS PROGRAM:
OPTIONS UNDER THE VEST SETTLEMENT

I. INTRODUCTION

On June 14, 1982, the United States Supreme Court ruled that the cumulative residency requirements of Alaska's permanent fund dividend distribution program violated the Equal Protection Clause of the United States Constitution.[1] Shortly thereafter, Alaska's Longevity Bonus ("ALB") Program was challenged on equal protection grounds.[2] On August 9, 1982, the Department of Law, with the approval of the Alaska Legislative Council, entered into a stipulation in the Vest case which stayed all proceedings pending adjournment of this legislative session, in order to afford the legislature an opportunity to address the constitutional problems with the existing program.

The purpose of this report is to analyze some 10 options available to the legislature in amending the Alaska Longevity Bonus Program. This report is a first step in a process which must be completed by the end of this session. As subparts (C) and (D) of this section discuss, the likely consequence of failing to enact remedial legislation this session is that the ALB program will be judicially terminated.

A. Description Of The Longevity Bonus Program

Predecessors of the existing ALB program can be traced to 1915. In that year, the Territorial Legislature authorized a monthly allowance of $12.50 for needy elderly Alaskans of 10 years

---

[1]Zobel v. Williams, 72 L. Ed. 2nd 672 (1982)

[2]Vest v. Shafer, 1 JU-82-1103 Civ. (1st Jud. Dist., 1982)

residency who chose not to enter the newly-created Pioneers' Homes.[3] The current program was enacted in 1972[4] as a result of legislation introduced by Senators Butrovich and Ray.[5] Quite unlike the "need-based" focus of its predecessors, the 1972 legislation was to:

> "... provide all law-abiding Alaskans capable of managing their own affairs who have maintained a domicile in the state for at least 25 years and have reached a retirement age of 65, an incentive to continue uninterrupted residency in the state. Under no circumstances shall this chapter be considered a form, type, or manner, of public relief. The bonuses made under this chapter are not predicated on need even though they may appear to provide supplemental income to some qualified persons who would otherwise be forced to become responsibilities of the state. The Legislature further finds and states that this legislation recognizes the economic hardships suffered by many elderly Alaskans, Alaskans who through their tenacity and perseverance molded Alaska as we know it through skillful application of their talents. These pioneers are the same Alaskans who, in the prime of their life, were in effect treated as second class citizens by the federal government and who paid much of their hard earned income to a government in which they did not have the right to participate through the power of the ballot. The legislature also is aware of the fact that many of these pioneers have been forced to live out their retirement years in areas far away from the land they loved and nurtured and thereby also suffering, in many cases, the loss of familial relationship with their own kin, an experience that is sad and frustrating to them as well as depriving new generations of Alaskans the benefit of their wisdom and experience. This legislation hopefully will provide our pioneers with the economic means to remain in and continue to serve their state and to enjoy the opportunity of aiding

[4]Chapter 205, SLA 1972; AS 47.45.010 et. seq.

[5]SB 211, 7th Leg., 2nd Sess.

the new Alaskan in making the state truly "The Great Land." §1, Ch. 205, SLA 1972.

The ALB program, then, has several purposes:

1. providing an incentive for a particular class of senior citizens to remain in the state;

2. compensating for the hardships faced by retirement in Alaska;

3. rewarding the past contributions of Alaska's elderly;

4. compensating for past hardships suffered by Alaska's pioneers; and

5. retaining the wisdom and experience of Alaska's pioneers.

Originally, the bonus was $100 per month. Over the years, the amount has gradually increased to its current $250 per month.[6] A person is eligible for a bonus if he or she:

1. is 65 years of age or older;
2. was "domiciled in the territory" on or before January 3, 1959; and
3. has been continuously domiciled in the state for 25 years.[7]

Additionally, if a person is absent from the state for more than 30 days, he will not receive another bonus until he returns. AS 47.45.030. If the person is absent for a continuous period in excess of 180 days, he is ineligible for a bonus for the next 12 calendar months following his return. Id.

---

[6]Chapter 13, SLA 1981

[7]AS 47.45.010

Exceptions are made if the absence "is beyond the control of the recipient." Id.

The longevity bonus is taxable under the Internal Revenue Code. However, it is almost universally excluded in calculating income eligibility for state and federal assistance programs.[8]

B. The Individuals Covered By The Alaska Longevity Bonus Program.

There are currently some 9,425 Alaskans receiving some $28.4 million in longevity bonus payments. Sketching an accurate portrait of the state's ALB recipients is difficult, because the ALB application form requires little personal information. In 1976, the Alaska Department of Health and Social Services conducted a random survey of ALB recipients,[9] and, in conjunction with the Vest

---

[8]Under 42 U.S.C. §1382(a)(b)(2)(B), which governs eligibility for federal Supplemental Security Income, and by reference also controls other federal programs such as Medicaid and energy assistance, the following is excluded from the definition of income:

> "monthly (or other periodic) payments received by any individual under a program established prior to July 1, 1973, if such payments are made by the State of which the individual receiving such payments is a resident, and if eligibility of any individual for such payments is not based on need and is based solely on attainment of age 65 and duration of residence is such state by such individual."

[9]"Alaska Longevity Bonus Impact Survey," Alaska Department of Health and Social Services (1976) (hereinafter "ALB Survey)

settlement, the Department of Law conducted a non-random survey of some 1,896 participants.

From those surveys, it is apparent that a large percentage of ALB recipients are Alaska Natives living in rural areas of the state.[10] Moreover, and in large part because of the ineligibility of many rural residents for social security, the longevity bonus is often the primary source of income for rural residents. For example, 41% of the elderly in Southwest Alaska, and 66% in Northwest Alaska, rely on the longevity bonus as their primary source of income.[11]

Available evidence suggests that a large percentage of ALB recipients have incomes only marginally above the current state welfare assistance level of $546 per month. The Department of Law's 1982 survey -- which was skewed toward the more needy recipients of the ALB -- found that 81.4% of the 1,896 recipients sampled had monthly incomes of $750 or less. The 1976 ALB survey found that half of the ALB recipients had a monthly income, "including that of their spouse," of under $500 per month.[12] Another

---

[10]In 1976, 41% of the ALB recipients lived in rural areas of the state and 24.1% were Alaska Natives. ALB Survey at 14-15.

[11]"An Assessment of the Status and Needs of Alaska's Elderly," Department of Sociology, College of Arts & Sciences, University of Alaska (1981) (hereinafter "Assessment.")

[12]ALB Survey, op. cit. n. 9 at 18-19.

44% had incomes of less than $1,000 per month. A 1981 University of Alaska survey indicated that roughly half of Alaska's elderly had monthly incomes of less than $800.00.[13]

The 1976 ALB survey suggests that, in light of the high percentage of bonus recipients in the 65-70 age group, the bonus has had a material effect in allowing older citizens to remain in the state after retirement.[14] The report also indicates that the ALB program has allowed a significant percentage of the elderly to remain off various public assistance programs -- including food stamps and state Old Age Assistance.[15]

One significant characteristic of Alaska's elderly in general warrants note -- one that will become quite significant in our analysis of alternatives. Only 10% of Alaska's elderly have resided in the state for 10 years or less.[16]

C. The Effects of Zobel And Vest On The ALB Program.

In reviewing the 1972 legislation creating the Longevity Bonus Program, the Department of Law concluded that "... the classification predicated upon being domiciled in the territory on or before January 3, 1959, bears little, if any, rational relationship to any legitimate legislative purpose which this bill is conceivably designed to serve and thus is in

all probability unconstitutional."[17]

Nonetheless, the ALB program remained unchallenged until 1982, following the U.S. Supreme Court's decision in Zobel v. Williams (hereafter "Zobel III").[18]

The law in issue in Zobel III (AS 43.23.010 et. seq.) provided for the distribution of a permanent fund dividend of $50.00 for each year of accumulated Alaska residency. The Court ruled, 8-1, that the cumulative residency requirement of the program was not rationally related to the goals of the statute -- a ruling which is discussed in more detail in section II(A), post.

The permanent dividend fund distribution program, in part, was intended to reward Alaskans for prior contributions to the state, a goal which: (1) three justices believed was constitutionally impermissible;[19] and (2) five justices believed was a permissible goal, but was not rationally furthered by a scheme

---

[17]Memorandum, Havelock to Egan, Re: FCCS HCS CSSB 211 at 17 (June 29, 1972).

[18]In Williams v. Zobel, 619 P.2d 422 (Alaska 1980) ("Zobel I"), the Alaska Supreme Court invalidated the state's graduated personal income tax repeal. In Williams v. Zobel, 619 P.2d 448 (Alaska 1980) ("Zobel II"), the court upheld the cumulative residency requirement of Alaska's permanent fund dividend distribution plan -- a ruling reversed by the U.S. Supreme Court in Zobel III.

[19]Opinion of the Court, 72 L. Ed. 2nd at 679.

which awarded dividends solely on the basis of residency.[20]

Beyond the ruling of the case, the various opinions -- particularly those of the concurring justices -- are rich in foreboding language suggesting that any durational residency requirement may receive "intensified scrutiny" by the Court, and will be justified only in "rare" circumstances.[21]

As is more fully discussed in Part II(A), post, the impact of the Zobel decision upon the ALB program was apparent. Two major goals of the existing ALB program are to reward elderly Alaskans for their prior contributions, and to compensate for past hardships and suffering -- ends which are implemented by a durational residency requirement more severe than that at issue in Zobel. A challenge to the ALB program was not long in coming. On July 6, 1982, one Rodney G. Vest challenged the ALB program in Superior Court in Juneau.[22] Mr. Vest is an elderly Alaskan whose residency in the state commenced three months after statehood. His complaint sought declaratory and injunctive relief striking the durational and statehood residency requirements of the act.

The State's response was colored by §2 of the legislation, which provided, inter alia, that:

---

[20]See Brennan conc., 72 L. Ed.2nd at 684: O'Connor conc., 72 L. Ed. 2nd at 685.

[21]Brennan conc., 72 L. Ed. 2nd at 681, 684.

[22]See n. 2, ante.

> "if any provision of this act, or the application of a provision of this act to any person or circumstance is held invalid, this entire act shall be considered invalid."

As the Department of Law explained in reviewing the 1972 law:

> "It is clear that the intent of the Legislature expressed in Section 2 of the bill is to forestall the possibility that a partial declaration of unconstitutionality would result in broadening the coverage of the bill to included additional clauses. This would be the case, for example, if either the 25 year waiting period requirement or the January 3, 1959 cutoff date were declared invalid, and the bill was expressly or impliedly severable."[23]

Thus, invalidation of the Longevity Bonus Program would result not in expanding the number of ALB recipients, but rather in the abrupt termination of the entire program.

Facing that grim probability, the State, with the approval of the Alaska Legislative Council, entered into an agreement with Vest, a copy of which is attached as Appendix A. The essence of the agreement is as follows:

> 1. Proceedings in the Vest case are stayed through the conclusion of this legislative session. Because that case has been subsequently certified as a class action,[24] existing ALB recipients are not in jeopardy at least through adjournment of this session;
>
> 2. The Alaska Legislative Council promised to use its "best efforts" to secure the enactment of legislation which treated equally "all persons 65 years or older as of July 1, 1982, who have been bona fide Alaska residents for at least one year prior to that date";

---

[23] Op. cit. n. 17 at 5.

[24] Order Certifying Class and Directing Notice to Class Members, Oct. 1, 1982.

3. If legislation of this sort were enacted this session, the suit would be dismissed; and

4. Recognizing that the Council could not bind the legislature, if legislation is not enacted, Mr. Vest may pursue his case, with the probable result that the program will be terminated.

There are three aspects of the settlement which warrant note. First, obviously, are the severe time constraints under which the legislature is operating. Second, there is the settlement's intentionally broad litmus test of acceptable legislation. All the legislature need do is treat all elderly, one-year Alaskan residents "equally." The standard could be met by any number of options, including repeal of the program. Third, there is the inescapable financial impact of the settlement itself. In order to treat all elderly Alaskans who were one-year residents as of July 1, 1982 equally, it will be necessary to fund retroactive longevity bonus payments under the existing program to the some 3,800 elderly Alaskans who would have qualified. The necessary retroactive appropriation is approximately $11.4 million.

Of course, the legislature itself is not "bound" to pass any particular kind of legislation, or any legislation or appropriation at all. While a "best efforts" clause is enforceable, that obligation runs only to the Alaska Legislative Council, which has already demonstrated both good faith and diligence in attempting to meet the obligations of the order and settlement.

D. Scope And Intent Of This Report.

The purpose of this report is not to recommend particular amendments to the Alaska Longevity Bonus Program. As Section II, post makes plain, any "recommendation" is a function of the goals which the legislature seeks to achieve through this exercise.

Rather, the goal of this report is to assemble a comprehensive list of alternatives proposed by various interested parties, and to analyze the alternatives in light of:

1. constitutional constraints;
2. fiscal impacts;
3. practicability; and
4. the effect of any changes on the elderly's eligibility for other programs.[25]

In developing a list of alternatives, this report has included five options examined by the Sheffield Administration, and five alternatives developed by the authors of this report. The information presented with respect to each option is intended to be sufficient for a threshold determination of feasibility. The report attempts to anticipate the major problems and issues surrounding each option; however, it is not intended to exhaust the details of every proposal.

Rather, the report should be used as a basis for the Senate Judiciary Committee's preliminary indication of

---

[25]See Section II.(C) post.

preference. We are recommending that the committee choose two or three primary options. We will then prepare implementing legislation and a detailed analysis of the primary options. Under this approach, the committee will not be required, at this early point, to make an "all or nothing" choice. It will also afford the committee flexibility in the event that, for some presently unforeseeable reason, one option becomes impracticable.

Draft implementing legislation and a detailed analysis of the committee's choices can be transmitted within two to three weeks, depending on the options chosen.

E. Alternatives Included In This Report.

The options included in this report, which are analyzed in turn in Section III, are:

1. expand the Alaska Longevity Bonus Program to include all elderly Alaskans with one-year's residency;

2. phase out the Alaska Longevity Bonus Program by gradually reducing benefits;

3. phase out the Alaska Longevity Bonus Program by gradually reducing benefits, while contemporaneously raising the eligibility limits for general state assistance;

4. providing a minimal base payment under the Alaska Longevity Bonus Program based solely on one-year's residency, with supplemental payments made on the basis of need;

5. phase out the Alaska Longevity Bonus Program by increasing the age eligibility each year;

6. create an annuity plan, with the annuity corpus consisting of permanent fund distributions. This option would necessitate a transition program for those persons 40 years and older;

7. fund the Alaska Longevity Bonus Program through a "pay as you go" social security system, funded by approximately 25% of the existing permanent fund dividend distributions;

8. replacing the Alaska Longevity Bonus Program with a comprehensive health insurance program for elderly Alaskans;

9. condition eligibility for a longevity bonus upon a demonstration of hardship which would be suffered by being unable to continue Alaska residency; and

10. open the Alaska Longevity Bonus Program to all one-year residents, and terminate the program -- giving FY 1984 recipients a grandfather right to continued bonuses.

II. CONSTRAINTS ON THE CHOICE OF OPTIONS

There are four basic considerations in choosing a package of amendments to the Alaska Longevity Bonus Program. The purpose of this section is to provide an overview of the constraints and policy choices which should play a role in this committee's decision.

A. Constitutional Constraints.

The obvious and primary constraint on any set of amendments to the Alaska Longevity Bonus Program lies in the equal protection clauses of the United States (Amendment 14) and Alaska (Art. 1, §1) constitutions. The existing Alaska Longevity Bonus Program discriminates between Alaska residents based on their duration of residency; moreover, all of the alternatives considered by this report involve some durational residency requirement.

Under both the federal and Alaska constitutions, a durational residency requirement which conditions or denies either a "fundamental right" or a "basic necessity of life" is valid only if the discrimination is necessary to further a compelling state interest. Zobel II, 619 P.2d at 448; Memorial Hospital v. Maricopa County, 415 U.S. 250, 259 (1974). "Fundamental rights" involve such things as voting,[26] while "basic necessities of life" include basic medical care[27] and welfare.[28]

The so called "right to travel" -- which any durational residency requirement arguable affects -- is not a fundamental right automatically triggering the compelling state interest test. Zobel II, 619 P.2d at 425-426, Zobel III, 72 L.Ed. 2nd at 677-678.[29]

We are confident in concluding that longevity bonus is not a "basic necessity of life." The program is not welfare -- it is not based on need. Basic indigent assistance -- including both income supplements and Medicaid -- are available to the

---

[26]Dunn v. Blumstein, 405 U.S. 330 (1972).

[27]Memorial Hospital v. Maricopa County, 415 U.S. 450 (1974).

[28]Shapiro v. Thompson, 394 U.S. 618 (1969).

[29]One of the oddities of Justice Brennan's concurrence in Zobel III was his view that the "right to travel" is a "fundamental" right (id. at 682) -- although impairment of that right by a durational residency requirement should be tested under the deferential "rationally related" standard (see text, post) or at worst "intensified ... scrutiny." Id. at 681.

needy in this state.[30] The longevity bonus program seems more akin to the permanent fund dividend, which the Alaska Supreme Court held in Zobel II was not a "basic necessity of life." 619 P.2d at 445. As the Court of Appeals for the Ninth Circuit has observed:

> "Deprivations which are only uncomfortable are not enough, such as conditioning lower tuition at state institutions of higher education upon a one-year residency requirement." Fisher v. Reiser, 610 F.2d 629, 639 n. 5 (1979), cert. denied 447 US 930.

Under the federal constitution, then, any durational residency requirement imposed by amendments to the ALB program need only be "rationally related" to a legitimate governmental purpose. Zobel III, 72 L.Ed. 2nd at 678. As this section will discuss, however, that standard is occasionally more deferential in its terms than in its application.

Conversely, under the Alaska Constitution, a durational residency requirement will withstand scrutiny only if it is "fairly and substantially related" to a legitimate governmental purpose. Zobel I, 619 P.2d at 427. The more the balance tips in favor of the individual, the more necessary the discrimination must be in order to further the law's purpose. Id.

From these standards, the following ground rules can be extracted from applicable case law:

---

[30] See Memorial Hospital v. Maricopa County, 415 U.S. at 261

1. Unquestionably, the "length of residence may be used to test the bona fides of citizenship." Zobel III, 72 L.Ed. 2d at 684 (Brennan conc.). In other words, the state may, by a durational residency requirement, "make virtually certain (that the recipients of the program are) bona fide residents of the state ..." Vlandis v. Kline, 412 U.S. 441, 453-454 (1973).

As a general rule, attorneys have assumed that in cases not involving the "compelling state interest" standard, a one-year durational residency requirement is permissible as a presumption of domiciliary. See, Starns v. Malkerson, F. Supp. 326, 234 (Minn. 1970), affd. mem. 401 U.S. 985 (1971). Moreover, the State of Alaska has taken the position that in cases involving either particularly attractive benefits, or particularly transient populations, a durational residency requirement in excess of one year is constitutionally permissible. See Motion For Summary Judgment, September 8, 1982, Andress v. Baxter, et al., No. A82-307 Civil, U.S. District Court, (D. Alaska 1982).

For the purposes of the Longevity Bonus Program, there are three reasons why it makes little sense to attempt a multi-year durational residency requirement as a presumption of domiciliary. First, the attempt would lack substantial

precedential support. Second, it would be contrary to the August 9, 1982 settlement in the Vest case. Finally, and as noted previously, a durational residency requirement would not begin to exclude significant numbers of elderly Alaskans unless it was in excess of 10 years.

2. . Durational residency requirements may be permissible for reasons other than presuming domiciliary, although at least four justices of the United States Supreme Court believe that those situations are "rare." Zobel III, 72 L.Ed. 2nd at 684.[31]

At the outset, a state cannot use a lengthly durational residency requirement to reward long time residents for their prior contributions to the state. To a majority of the court, while the purpose itself is permissible, a durational residency requirement is irrationally tailored to that goal -- a point bluntly made by Justice O'Connor in her concurrence:

> "A multitude of native Alaskans -- including children and paupers -- may have failed to contribute to the state in the past. Yet the state does not dock paupers for their prior failures to contribute, and it awards every person over the age of 18 dividends equal to the number of years that person has lived in the state." 72 L.Ed.2d at 689.

The flip side of rewarding a person for prior contributions is compensating a person for prior hardships. That, as noted previously, is a second major goal of the

---

[31]One "rare" example cited by the four concurring justices was qualification of public office. Id.

existing ALB program. If it is irrational to assume that all long time residents "contributed" to the state, it may be equally irrational to assume that all long time residents suffered substantial past hardship.

There is one universal hardship which equates with territorial residency -- the lack of franchise. It is conceivable that a Longevity Bonus Program intended to compensate for that lack of representation would be constitutionally permissible. However, that rationale would only justify the January 3, 1959 residency requirement -- not the 25-year continuous residency provision of the act.

A much closer question is posed by the program's goal of allowing elderly Alaskans to remain in the state who would suffer particularly severe hardship if they were financially required to relocate. Justices Dimond and Matthews of the Alaska Supreme Court believe this may be a constitutionally permissible goal substantially furthered by a durational residency requirement:

> "... a state Longevity Bonus ... require(s) lengthy residency. Both those programs, however, are apparently designed to help those individuals who would like to retire in the state but cannot afford to do so because of the high cost of living. The state might well want to limit the benefits to those that would suffer the most hardship by being forced to leave, and it seems reasonable to suppose that a long period of residency would be some indicia of close ties to Alaska and the disruption that leaving might cause." Zobel II, 619 P.2d at 469 n. 13 (Dimond dissenting).

The Department of Law, in fact, has concluded that the Pioneers' Home may be constitutionally defensible as a reasonable means of accomplishing precisely this goal.[32] Indeed, one option considered in this report would award longevity bonuses on the basis of hardship caused by relocation -- which in turn would be measured in part by length of residence. By making length of residency "some indicia" (619 P.2d at 469) of the hardship of relocation, the option would avoid the indictment of overbreadth which was fatal to the permanent dividend fund distribution program in Zobel III.

Finally, as to the ALB program's goal of providing an incentive for a specific subclass of Alaska's elderly to remain in the state, the courts in all likelihood would view that purpose as merely discrimination for its own sake. See Zobel III, 72 L.Ed. 2nd at 678-679. Presuming that only long-time residents have the requisite "wisdom and experience" to warrant subsidization is hardly likely to impress the U.S. Supreme Court.

B. Varying Goals of Several Longevity Bonus Options.

There is a substantial difference of opinion as to what an amended ALB program should accomplish. As noted previously, the legislature may wish to retain one of the major goals of the existing program -- allowing those elderly with the closest ties to Alaska to continue to live here.

---

[32] 1982 Op. Atty. Gen. ____(November 26, 1982) at 25.

Alternatively, the fiscal consequences of the various alternatives may be the primary consideration. As previously discussed, if legislation in conformity with the Vest settlement is enacted, an additional $11 million must be appropriated as retroactive bonus payments to July 1, 1982. Several of the options which propose to phase out the program, or which propose a conversion to permanent fund earnings, are partially or primarily directed at this end.

The primary goal of the legislation may also be to protect those currently most dependent upon the bonus. The current Old Age Assistance income level is $546.00 per month and there are approximately 2,300 elderly Alaskans receiving state assistance. Since the longevity bonus is not included in the calculation of income for state assistance, the practical consequence of a phase out or termination of the program would be to materially reduce the available income of the poorest elderly Alaskans. Moreover, as noted in Section I(B), ante, there are a large number of elderly Alaskans who are currently only marginally above the existing state poverty level.

There are two options particularly sensitive to this goal -- the phase out of the ALB program in conjunction with a correlative rise in state assistance levels, and the option of compensating those who would suffer the most hardship by relocation.

With respect to this goal, however, it should be stressed that the existing ALB program has been purposefully sturctured so as to not be a "welfare program." Precisely for that reason, the program is administered by the Department of Administration, rather than the Department of Health and Social Services, and any conversion to a "need-based" program will undoubtedly offend the dignity of many elderly Alaskans.

Finally, there is the possible goal of providing a long term, stable bonus program which frees the general fund from increasing commitments. The annuity and state social security options are primarily directed at this goal.

C. Consequential Effects of Any Amendment To The Longevity Bonus Program.

Any change to the Longevity Bonus Program may have two consequences which must be considered: (1) the continued eligibility of ALB recipients for other state or federal assistance programs; and (2) tax consequences on participants.

As noted in Section I(A), ante, under federal law the ALB is excluded from the definition of "income" for many federal assistance purposes.[33] As long as any amendments to the ALB program continue to base eligibility "solely on attainment of age 65 and duration of residency," and remain sufficiently similar to the existing program so as to be fairly called "a program established prior to July 1, 1973," the exemption would be retained.

---

[33]See n. 8, ante.

Obviously, any material changes in eligibility requirements or structure of the program raise the risk that the new benefit will be included as "income," and many elderly Alaskans will be terminated from the applicable federal program. The Department of Health and Social Services has estimated the impacts from a loss of the longevity bonus exclusion. Those estimates appear at Appendix B of this report.

Anticipating the same problem with permanent fund dividends, the legislature, in the 1982 Special Session, provided that the state would substitute lost benefits for a period of four months.[34] Obviously, and to the extent possible, any amendments to the ALB program should either be tailored to the existing exception, or fall within another separate statutory income exclusion such as a "need based" payment.[35]

The tax consequences of amendments to the existing ALB program become particularly important with respect to this report's annuity option -- which is treated in detail in Section III (F), post. At the outset, it is sufficient to note that:

> 1. The existing longevity bonus program is taxed under the Internal Revenue Code;
>
> 2. Any ALB program which is based on need, or could be characterized as a "social benefit program for the promotion of the general welfare," would in all likelihood not be taxed by the IRS; and[36]

---

[34]AS 43.23.075.

[35]See 42 U.S.C. §1382(a)(b)(6).

[36]See IRS Revenue Rulings, 63-136, 1963-2 C.B. 19; 68-38, 1968-1 C.B. 446; 72-340, 1972-2 C.B. 31; 78-170, 1978-1 C.B. 24.

3. On February 27, 1981, the Internal Revenue Service ruled that dividends distributed under the state's prior permanent dividend fund legislation -- the statute invalidated in Zobel III -- were taxable under the Internal Revenue Code.[37] While the IRS has yet to rule on the existing dividend program, it is likely that taxation of the permanent fund dividend could be deferred if it is used to fund the annuity or social security options discussed in this report.

III. DISCUSSION OF ALTERNATIVES

A. Expanding The Class Of Alaska Longevity Bonus Recipients To Include All Elderly With One-year's Residency.

There are currently some 9,425 Alaskans who receive bonuses totally $28.28 million. This proposal would require additional appropriations for (1) bonuses for an additional 3,803 people; and (2) additional clerical support in the Department of Administration. The additional costs would total $12 million in FY 1984, increasing to $13.7 million in FY 1988.[38]

These appropriations are in addition to the $11.4 million retroactive award required under the Vest settlement.

The advantages of this option are two-fold. First, it is one of the constitutionally "safest" options. Second, since eligibility would remain dependent on "duration of residence" -- albeit only one-year -- in all likelihood it would fall within the existing ALB exclusion to federal assistance programs.

---

[37] IRS Index Nos. 0061.40-00; 0451.20.00; 0102.00-00.

[38] Department of Administration draft fiscal note, January 11, 1983.

Additionally, while theoretically any "one-year" elderly Alaskan could take advantage of this program, the demographics of Alaska's elderly (see Section 1(B), ante) are such that the primary beneficiaries of this option would be those who have lived in the state from 10 to 25 years. Whether such a program would encourage in-migration is problematical.

In addition to obvious fiscal disadvantages, this alternative would dilute the dignity and recognition attendant the current bonus to the point of non-recognition.

B. Phase Out The Existing Longevity Bonus Program.

One of the options analyzed by the Sheffield administration would phase out the ALB Program by reducing benefits by $50.00 each year beginning with FY 1984. By paying $200.00 a month to 13,228 recipients rather than $250.00 to 9,425, the net increase to the program in FY 1984 would be $2.1 million. In fiscal year 1985, however, when the bonus is reduced to $150.00, there will be a net decrease of $8.7 million in program costs.

This option has been unfavorably viewed by the administration, and apparently was prepared only as a point of comparison. Despite its fiscal benefits, the proposal protects no one. The poorest of Alaska's elderly would suffer the most. Since, as discussed previously, Alaska longevity bonuses are not counted in existing state and federal assistance income limits, the needly elderly person in Alaska receives, currently, a

subsidized monthly income of $546 for Old Age Assistance, plus $250 from the ALB program. This option would thus materially reduce state assistance levels.

C. Phase Out The Existing Longevity Bonus Program With A Contemporaneous Increase In State Assistance Levels.

The apparent "preferred" option of many with the Sheffield administration is to gradually increase state Old Age Assistance levels while at the same time gradually decreasing the amount of the longevity bonus. The program would function in the following manner:

CHART 1.

YEAR	OLD AGE ASSISTANCE LEVEL	ALASKA LONGEVITY BONUS
FY 1983	$546	$250
FY 1984	$596	$200
FY 1985	$646	$150
FY 1986	$696	$100
FY 1987	$746	$ 50
FY 1988	$796	$ 0

In analyzing the fiscal impacts of this alternative, assumptions must be made about how many elderly Alaskans will become eligible for Old Age Assistance as the OAA income level increases, and how many of the newly eligible will be inclined to seek assistance as their longevity bonus gradually diminishes.

Regardless of which assumptions are used, the impacts upon the longevity bonus program, are, of course, identical to the 'phase out" option. Those impacts would be as follows:

CHART 2.

ADDITIONAL COST (SAVINGS) TO THE ALB PROGRAM (in millions)

FY 1984	2.1
FY 1985	(8.7)
FY 1986	(19.2)
FY 1987	(30.9)
FY 1988	(44.1)

The fiscal impact upon the Department of Health and Social Services' OAA program is far more difficult to determine. The Department of Administration has used two alternative assumptions -- (1) that of the 13,228 elderly in Alaska, 5% will become eligible and apply for public assistance as the income level is increased to $796 in FY 1988; or (2) that 25% of the elderly will become eligible and apply for assistance during that period.

We believe that the 25% possibility may be closer to the truth. Approximately 30% of Alaska's elderly have monthly incomes marginally above existing assistance levels -- from $500-$800 per month.[39] If those figures are accurate, as many as 3,968 will become eligible for public assistance -- in addition to the 2,300 currently on the OAA program.

The second variable involves the size of the benefits which the new clientele will receive. The Department of Health and Social Services has assumed that each new recepient will receive the mean benefit currently given or projected for

---

[39]Assessment, op. cit. n. 11 at 31.

existing receipients -- $295 in FY 1984.

In computing the fiscal impacts for this option, we have used the following three assumptions:

(1) Of the 3,968 elderly whom current data suggest could be eligible for the increased OAA program, 2500 will in fact apply. This figure arbitrarily discounts both those who will decline to apply for psychological reasons, and those who will not apply because the minimal benefits to them are simply not worth the bother;

(2) Because we have discounted those who will receive minimal benefits, we have retained the "mean benefit" assumption employed by the Department of Health and Social Services; and

(3) The new recipients will be evenly distributed over each of the five years -- so that in each year an additional 500 recipients will be added to the OAA program.

Additionally, persons who become eligible for Old Age Assistance will also become eligible for Medicaid. The State's Medicaid budget for FY 1983 is $65 million dollars. 48% of that figure -- or $31.2 million -- is paid by the State. Some 23% of that budget -- or $7.17 million dollars -- is attributable to those currently on Old Age Assistance. If the OAA population doubles over the next five years -- as our assumptions presume that it will -- there will be an additional cost of $7.17 million (not adjusted for inflation) to this option, chargeable in equal portions to each of the next five fiscal years.

With these assumptions, the following chart illustrates the possible net fiscal impact of this option:

CHART 3

Year	# Add. on OAA	Mean Benefit	--------IN MILLIONS-------- Added Medicaid Costs	Added ALB Costs (Savings)	Net
FY 1984	500	$295.02	1.4	2.1	5.27
FY 1985	1000	345.02	2.8	(8.7)	(1.76)
FY 1986	1500	395.02	4.2	(19.2)	(5.90)
FY 1987	2000	445.02	5.6	(30.9)	(14.60)
FY 1988	2500	495.02	7.0	(44.1)	(29.30)

Thus, even with fairly liberal assumptions regarding the number of additional OAA clients and Medicaid costs, this option will begin saving money in FY 1985.

Moreover, for those elderly in the $500 - 800 per month income range who pay some federal taxes, the option would have advantages, since increased need based assistance, unlike the longevity bonus, should not be taxed under the Internal Revenue Code.

One obvious disadvantage of this option is that it transforms the longevity bonus program into a welfare scheme. Persons who currently receive $796 or less per month -- including the bonus -- will indeed be "held harmless" under the option, but only at the expense of applying for assistance to the Department of Health and Social Services.

Moreover, those current elderly bonus recipients whose monthly incomes (excluding the bonus) exceed $796 per month will receive no protection under this option.

Finally, because welfare payments are generally viewed by the courts as involving "basic necessities of life" (see §II(A), ante), the durational residency requirement for increased old age assistance must be dropped from one year to 30 days.[40] The minimum national old age assistance level under the federal Supplemental Security Income system -- which OAA supplements -- is $284.30/mo.. A person with $600 a month income in a "minimum benefit" state is presumably ineligible for old age assistance (including Medicaid) in that state, but could become eligible under the Alaska system upon 30 days residency. While the mere prospect of an additional $196 per month (in FY 1988) is unlikely to induce people to retire in Alaska, the concommitant provision of Medicaid services -- including full nursing home coverage -- may have that effect. If a person can obtain free nursing home coverage -- valued at between $40 - $60,000 per year -- simply by spending the month of August in Anchorage, the State may face a rather remarkable in-migration problem indeed.

D. Retaining A Modest Longevity Bonus, While Providing A "Need Based" Supplement.

This option is largely a variant of option C, and has been discussed by the Sheffield Administration as a means of

---

[40] Shapiro v. Thompson, 394 U.S. 618 (1969).

retaining some longevity bonus payment which could not be considered "welfare."

Under this option, the longevity bonus, as with Option C, would be gradually reduced to, say, $100.00 per month. As the fiscal information for alternatives B and C suggest, this alternative would result in a savings to the longevity bonus program of $19.2 million by FY 1986.

To compensate for the loss of $150.00/mo. to the needy, either State OAA limits could be increased by $150, or a separate "need based bonus supplement" could be established by the Department of Administration.

The advantage of the latter option is that although based on "need," applicants will not be dealing with the Department of Health and Social Services, and may view the supplement less as a form of welfare. Additionally, since the supplement will be provided under a program other than State OAA, its recipients would not be entitled to Medicaid (including nursing home coverage) unless they are otherwise eligible for OAA under existing limits.

Additionally, the "need" is not necessarily limited to financial need. As this report's discussion of Option I indicates, longevity bonuses may be apportioned according to the hardship which the elderly would face by being forced to retire outside Alaska.

The disadvantage of a separate "need based" program in the Department of Administration is, of course, the necessary creation of a parallel bureaucracy in state government.

The fiscal costs of this option have not been developed by the administration or this report because of the variables involved -- the size of the remaining "basic" longevity bonus, and the question of administration. Costs of administration aside, the net savings to the State should be substantially similar to the FY 1986 figures for Option C -- in which the declining longevity bonus payment would be $100.00 per month. The projected net savings of $5.9 million would certainly exceed the costs of even a parallel bureaucracy within the Department of Administration.

E. Gradual Increase In The Age Of Eligibility.

Another option explored by the Administration would reduce the durational residency requirement for a bonus to one year, but raise the eligibility age each fiscal year. For FY 1984, the age would be raised to 66; to 67 in FY 1985; and so on.

This option would have a substantial fiscal impact until fiscal year 1988, at which time mortality would have reduced the class of beneficiaries below existing levels. For FY 1984, the option would cost an additional $9.5 million dollars beyond existing funding levels, according to the Department of Administration.

This option has been quite unfavorably received. It has been facetiously but not unfairly referred to as the "newcomer's bonus program." A recent migrant born prior to June 30, 1918 would receive a longevity bonus for life, while a long-time Alaskan born subsequent to that date would receive nothing.

F. Self-Sustaining Annuities.

The prior five options were developed by members of the administration, although the administration has not formally "sponsored" any particular approach. Moreover, several of the options -- particularly the "graduated age" and "phase out" options -- were developed more as comparative conversation pieces than as actual proposals.

The following five options -- commencing with the self-sustaining annuity -- were prepared by the authors of this report.

Under the self-sustaining annuity option, individuals would no longer receive a permanent fund dividend under AS 43.23. Rather, those dividends would form the corpus of a self-sustaining annuity account from which the individual would receive an annuity commencing at the age of 65.

According to Department of Revenue projections, the permanent fund dividend payment for FY 1984 will be $365.00, rising gradually throughout the remainder of this century to $952 in the year 2000.

Given this level of contribution to the corpus, a self-sustaining annuity account will produce an annuity roughly equivalent to the existing longevity bonus (with a 3 percent annual cost of living adjustment) for those who are currently 40 years or younger, and who will be residents of Alaska each of the next 20 years. For various age groups, the annuity entitlements at age 65 as a percentage of the "target" annuity ($3000/yr. plus 3% per annum) would be roughly as follows:

Current age	Annuity as a % of target annuity
25	358%
35	161%
40	100%
45	66
55	21

Obviously, some transition measure is necessary for those who are simply incapable of accruing a sufficient corpus by the age of 65 to be entitled to the "target annuity". The general fund, simply put, will be required to make up the difference, although, over time, that "differential" will decrease as annuity accounts assume some significance.

Many of the options explored in this report could suffice as a 20-25 year shrinking general fund obligation. One option particularly tailored to the annuity approach would be to allow those who are at or near the age of 65 to continue to receive their permanent fund dividends in cash, with the PrD being subtracted from the longevity bonus amount. For those in

the 40-60 year age group, the general fund would simply fund the difference between their annuity and the "target" figure.

Under this "transitional measure", the general fund "residual" payment would be based on the amount necessary to supplement the annuity corpus assuming that an individual received a permanent fund dividend every year. There would seem, in this regard, no obligation on the part of the state to give a larger general fund supplement to someone with two PFD credits than to someone with 15.

Thus, in fiscal year 1994, when current 55-year olds first receive their annuity, they would receive a state supplemental of 79 percent of the target annuity -- regardless of the actual PFD credit any individual has accrued.

The remaining question, obviously, is what to do about the person who is currently 65. If that individual's supplement is the same in 1994 as a new annuitant -- 79% -- he will in fact receive less than the new annuitant since he will have only his permanent dividend, rather than a 21% annuity, to make up the difference. Conversely, if the grandfathered PFD recipient received a full target annuity in 1994, he would be at a substantial advantage over the new annuitant. The reason is this: while the new annuitant has earned a substantial portion of his target annuity by foregoing his cash dividend each year, the "grandfathered" recipient has both enjoyed the dividend, and its earning power, over that same period of time.

The question is largely one of equity for the legislature. Either approach is defensible. While the latter scenario would seem to discriminate in favor of the existing elderly, the Alaska Supreme Court has recognized the legitimacy of creating preferential grandfather rights for those who have come to depend upon an existing state program.[41]

In either case, the difficulty with this "transition" option is that the longevity bonus program continues to be a substantial drain on the general fund for 20-25 years to come. Under the transition option described above, the FY 1984 budget for the ALB program would be increased by $6 million dollars over existing funding levels.[42]

Through Aetna Insurance Co., we investigated the alternative of simply purchasing a lifetime annuity for all those currently 65 or older. Unfortunately, the cost of a lifetime annuity for all Alaskans 65 or older would be prohibitive -- in the neighborhood of $300 to $400 million.

Finally, the Legislature should consider using the administration's options C and/or D as a transition measure. The short term fiscal impacts of those options are superior to those of a simple general fund supplement.

---

[41] Commercial Fisheries Entry Commission v. Apokedak, 606 P.2d at 1259-61.

[42] Assuming that the ALB of the "grandfathered class" is reduced by the $365 permanent fund dividend, each of 13,228 persons will receive a payment of $2,635 this year -- totaling $34 million dollars.

For all of the short term problems of an annuity program, the long term advantages should receive equal time. First, in a period of 20-25 years, the general fund will no longer be encumbered with the longevity bonus program. Second, the eventual size of one's annuity payments would be a function of the number of permanent fund dividend contributions that have been credited to the annuitant's account. We seriously doubt that a successful durational residency claim could be made to this aspect of the program. An annuitant with three years contributions could no more claim that he is due an annuity based on 20 years contribution than could a 1996 resident claim not merely the $787 cash dividend available that year, but rather some $6,000 which his predecessors had amassed by being residents of Alaska since 1984.[43]

We believe that there is a strong case for distributing annuities only to persons who are residents of Alaska at the

---

[43]Because future annuities are a direct function of actual past payments to the program, the program does not "reward" presumed contributions but simply returns actual investments. cf. Zobel I, 619 P.2d at 435 (Rabinowitz conc.) Nor is the option akin to a situation where prior tax contributors are excused from funding the present needs of government, as with the tax repeal scheme at issue in Zobel I. At any point in time, each Alaskan is treated quite equally -- being entitled to an annuity credit if he or she resided in the state for six months during the pertinent year.

time. Partially for reasons discussed below, no individual will have a "vested right" to an annuity in the future. A purpose of the annuity program will be to alleviate the particular financial hardships caused by retirement in Alaska -- a purpose which we believe is constitutional. This goal would be served only by confining actual annuity payments to Alaska residents. Second, and particularly if the program is properly viewed as conferring an economic benefit not upon the crediting of an annuity account, but rather upon annuity distribution, the state certainly possesses the right to prefer its own residents in the disposition of its resources.[44]

There are, of course, other issues surrounding the annuity option. Many Alaskans will undoubtedly wish to retain the existing cash benefits of the permanent fund distribution. Alaskans will not be, however, totally without recompense. An annuity account for younger Alaskans in particular -- at least for those planning to stay in the state -- will one day lead to substantial benefits.

Of course, the prospect of a lucrative retirement account is a product of the legislature's continued willingness and ability to devote 25% of permanent fund earnings to the

---

[44] Reeves, Inc. v. State, 65 L.Ed. 2nd 244, (1980); see also White v. Massachusetts Council of Construction Employees, ___ U.S. ___, No. 81-1003 (U.S.S.Ct., Feb. 28, 1983)(distinguishing Hicklin v. Orbeck, 437 U.S. 518 (1978).

annuity program. Unquestionably, at some point in time, a material percentage of the permanent fund's earnings will be necessary for general government expenses. The point at which that will require access to more than 75% of the fund's earnings is problematical.

The tax consequences of an annuity program warrant detailed discussion. As noted previously, the Internal Revenue Service may well rule that permanent fund cash distributions are taxable. Conversely, if credits to an annuity account equal to the permanent fund dividend are not tax exempt, the real economic value and perceived political worth of an annuity option is substantially lessened.

The annuity program envisioned by this report is not employer/employee related, and therefore would not qualify as an exempt plan under the Internal Revenue Code.[45] Nor was serious consideration given to qualifying this annuity option as an Individual Retirement Account -- because (1) the state is not a qualified financial institution to administer such an account; (2) the required terms of an IRA were not compatible with the option considered; and (3) any "state required" IRA -- even if possible -- would severly impinge on the tax planning flexibility of individual Alaskans.[46]

Nonetheless, it is our opinion that the annuity option should result in the deferral of both the permanent fund

---

[45]cf. 26 U.S.C. §401-404

[46]See 26 U.S.C. §408.

dividend contributions and accrued interest under the Internal Revenue Code. The courts and the IRS have generally ruled that contributions to an unqualified "annuity," "retirement" or "deferred compensation" plan are nonetheless tax deferred if the individual is not in "constructive receipt" of the annuity contributions, and the contributions do not represent a present "economic benefit."[47]

Combining the standards of that doctrine with the attributes of the proposed annuity program, the program should be taxed deferred for the following reasons:

1. If the State were to purchase individual annuities with each permanent fund dividend, with each resident being the beneficiary, the resident would have a vested and secured interest in the contribution, and would thus have received a current "economic benefit." If, however, the State were to merely give the annuitant an unsecured promise of payment, purchasing an annuity account with itself as the beneficiary in order to provide a funding source for that promise, there would be no "current economic benefit" and taxation would be deferred.[48] This is one customary means by which employers obtain tax deferral of an unqualified plan;

2. A person is in "constructive receipt" of an annuity contribution if he has current access to the

---

[47] U.S. v. Goldsmith, 586 F.2d 810 (Ct.Cl. 1978).

[48] Id.

contributions without substantial terms and limitations.[49] Under this report's option, under no circumstances would an annuitant be entitled to withdraw anything until annuities are actually distributed;

3. To underscore the contingent nature of the annuity -- such that the IRS could not reasonably conclude that it represents a "current economic benefit" -- the annuity will only be received if the person is an Alaska resident at the time of the pertinent distribution.

Our only hesitancy in this regard is the February 27, 1981 ruling of the IRS that even if an individual chooses to defer receipt of his permanent fund dividend, it is taxable in the year that it could have been received. The ruling, however, "may not be used or cited as precedent," and, even if of precedential value, is distinguishable from this situation. The ruling is consistent with the proposition that the individual cannot have unfettered discretion in choosing the year in which income will be taxed. While an individual does have unbridled choice in determining when to take a permanent fund dividend, he will have no choice as to the time of receipt of his annuities. Moreover, where a person would have an absolute right to a deferred dividend, he will have no right to annuity distribution unless he is an Alaska resident at the time.

For tax reasons, then, the annuity option must be carefully structured. The former permanent fund dividend must

---

[49] Id.

be used by the State to purchase an annuity for its own account, with itself as the beneficiary. The annuity income received by the State will then be used as the funding source for the annuity payments -- although technically and necessarily the annuity income could be used for any fiscal purpose.

A far closer question arises with respect to the effect of this option on other public assistance programs. Generally, annuity income is included in the calculation of income for various assistance programs.[50] If, however, this option can be characterized as a continuation of the longevity bonus program, then the existing longevity bonus income exclusion[51] may persist. If -- consistent with tax considerations -- the only "annuity" is the one purchased by the State as a funding source, then the existing longevity bonus program can be retained in both name and substance, with the amount of the bonus still dependent upon residency history. After all, under the option, (1) a person must be a six month resident in order to obtain a single PFD, and must be eligible for the annuity at the time of distribution;[52] (2) the amount of annuity is dependent upon the number of PFD's credited to the individual's account; and (3) the "grandfathered" class of existing elderly would presumably be required to meet a one-year durational residency requirement.

---

[50] See, 42 U.S.C. §1382(a)(a)(2)(B).

[51] See 42 U.S.C. §1382(a)(b)(2)(B).

[52] See n. 8, ante.

The above, of course, is an argument -- it is not necessarily the law, which in final measure will be largely determined by the federal officials involved. The exposure to existing assistance programs -- at least for those not within the grandfathered transition class -- must be considered a risk of this option.

Even if, however, annuity distributions are considered "income" to various assistance programs, the corpus of the annuity account will not be. A person may be disqualified from a federal assistance program not only if his income exceeds a certain level, but as well if he has alternative available resources which he can upon from at any time. However, in this instance, a true "annuity corpus" does not exist -- since the only annuity runs for the benefit of the State. Moreover, even if federal officials were to view the "corpus" as belonging to the individual, it cannot be withdrawn prior to actual distribution.

G. State Social Security System.

In large part because of the need for a lengthy transition period with a self-sustaining annuity plan, this report also considered the possibility of a state social security system funded by a portion of the permanent fund dividends distributed under AS 43.23.

Under this system, a sufficient portion of each resident's permanent fund dividend would be withheld each year

to fund a retirement program designed to pay each Alaska resident of 65 years or older with one-year's residency $250 per month, with a moderate cost of living adjustment each year.

In assessing the feasibility of this option, the most important variable was the projected growth in Alaska's elderly population. The difficulties facing the federal social security system are due in part to an increasingly large percentage of elderly in the population.

For fiscal year 1983, the Alaska Department of Labor projects that there will be some 13,672 elderly in Alaska -- approximately 3% of Alaska's population.[53] The Department has projected that that population, as a percentage of all Alaskans, will remain relatively static through the year 2000, when, out of a population of 831,000 people, there will be 25,158 elderly.[54]

We believe that those projections are overly conservative, and do not take into account the significant nationwide trend of increased elderly population. Nor do those projections include the retirement years of the post World War II "baby boom" generation -- which will begin about the year 2010.

Accordingly, in projecting the long term impact of this option on permanent dividend distribution, we have used the

---

[53]Alaska Population Overview, Alaska Department of Labor, 1981

[54]Id.

national growth patterns projected by the federal Social Security Administration, which are as follows:

YEAR	% OF ELDERLY POPULATION
1950	8.1
2000	13.1
2025	19.5
2050	21.8

Using those assumptions, Travelers' Insurance Co., on our behalf, calculated the percentage of permanent fund dividends which would be required to fund a "pay as you go" system.

For fiscal year 1983, the calculations are relatively straight-forward. Given an aggregate distribution of some $169 million in permanent fund dividends this year, approximately 25% would be needed to fund a "pay as you go system."

However, even assuming a 3% cost of living adjustment in the payment each year, the percentage needed to fund the program decreases. This is because permanent fund earnings will increase at a rate substantially higher than inflation. From the year 1983 to 2000, the average funding required would be 15 to 19 percent of the distributions, while, in the years 2000 to 2025 (and assuming continued growth in permanent fund earnings) the funding amount would be 10-12 percent.

Thus, if the withholding remains static at 25% over the course of several years, the resultant excess would begin to build a savings account of substantial magnitude, which at some

point in the future would make the program partially, or perhaps totally self-sustaining.

One obvious advantage of this option is that it frees the general fund from ALB obligations immediately. Conversely, by materially reducing the annual permanent fund dividend, it obviously raises some political difficulties.

Additionally, the social security option could likewise be tied to contribution history -- although not in the precise manner of the annuity option. The federal social security system currently fully covers any individual who had "not less than one quarter of coverage ... for each calender elapsing after 1950 ... except that in no case shall an individual be a fully insured individual unless he has at least 6 quarters of coverage."[55] Because, in the future, some portion of the benefits will be paid by the "savings account" resulting from the static 25% contribution, we believe that a similar contribution history requirement could be established in the legislation.

Even more so than the annuity option, there would be no "current economic benefit" from the program. By reducing the permanent fund distribution by 25%, and funding a retirement program from which the individual may or may not ultimately benefit, we believe it extremely unlikely that the IRS would conclude that the reduced sum is in some manner taxable.

---

[55] 42 U.S.C. §414(a)(1)

Morever, we believe there is a substantial likelihood that the existing ALB exemption in federal law could be retained. Indeed, stripped to its essense this option does little more than alter the funding source of the ALB program.

The primary risk of the program is all the more apparent in light of the current difficulties with the federal social security system. While option F would be funded by a currently purchased annuity, younger Alaskans would be contributing to this option on the mere hope that the requisite amount of permanent fund earnings would remain available for the program well into the 21st century. The "savings account" created by the static 25% withholding is intended to alleviate that problem; however, regardless of the rate of growth of that account, there is plainly some risk in this option.[56]

---

[56]For example, under our population projections, there will be 30,747 elderly in Alaska in the year 2000. The permanent fund distributions for that year under AS 43.23 are estimated by the Department of Revenue to be $792 million, of which, under our static 25% withholding, $198 million would be placed in the social security fund. In that year, with a 3% COLA, the maximum monthly bonus will be approximately $390. Even if every elderly Alaskan is eligible for full benefits under the law's contribution requirements, the maximum payments would be $120 million -- with a savings account deposit being made in that year alone of $70 million. Of course, many of these elderly may not be fully eligible, and some who are eligible may not be residing in Alaska during that year.

Finally, there is some advantage to the existing elderly in this system over the annuity option. The existing elderly would have a net loss of only .25% of their permanent fund dividend, rather than the entirety of the benefit under the annuity approach.

H. Health Insurance For The Elderly.

The state of health insurance for the elderly, and indeed for all Alaskans, has already been the subject of considerable study,[57] and legislative activity.[58] Because of the obvious critical importance of adequate health care coverage for Alaska's elderly, the option of providing comprehensive health insurance for Alaska's older citizens in lieu of the longevity bonus was included in this report as an option.

While the Department of Law report found that health expenses were a major use of the longevity bonus for only 5.5% of its sample, the 1976 longevity bonus study found that 29% of the bonus recipients used at least a portion of the ALB for medical care, while 11% used a portion of the bonus for "insurance of all kinds."[59]

---

[57]Alaska Comprehensive Health Care Financing Study, Batelle Human Affair Research Center (1981)

[58]HB 641, 12th Leg. 1st Sess. (1981)

[59]ALB Survey, op. cit. n. 9 at 22

In fact, almost all of Alaska's elderly receive some kind of public or private health coverage assistance -- either through Medicare, Medicaid, public and private retirement programs, Veteran's benefits or the Indian Health Service/Public Health Service.

When assessing the health insurance option, the two obvious questions are: (1) how severe are the gaps in existing coverage; and (2) how much would it cost to fill those gaps?.

The major source of health insurance coverage for the elderly in Alaska is obviously Medicare -- a federal insurance plan which provides hospitalization for those eligible for social security[60] and medical insurance for an additional fee of $12.20 per month.

Both the hospital and medical insurance contain substantial deductibles, i.e. the first $304 of the hospital bill -- and co-payment requirements (20% in the case of medical insurance.)

Nursing home coverage under Medicare is severely limited -- confined to post-hospital care in a "skilled nursing facility" for short periods of time.

It is difficult to determine how many resident Alaskan elderly are on Medicare -- available statistics are bloated by Medicare claims submitted by tourists. There are some 9,323

---

[60] 42 U.S.C.§§ 426,1395(c). A person ineligible for Social Security may obtain Medicare hospitalization insurance for $113 per month

retired persons in Alaska receiving social security -- and hence eligible for Medicare.[61]

The largest group of elderly Alaskans ineligible for Medicare are rural residents, primarily Natives, who do not have a sufficient wage earning history to qualify for social security. All Alaska Indians, Aleuts and Eskimos are eligible for IHS -- which provides a broad range of services depending upon available facilities. IHS is, however, primarily a direct provider of facilities -- it does not make cash payments for services such a custodial care in a nursing home. Moreover, it is currently facing severe cutbacks in areas such as reimbursement for health-related travel expenses[62].

The most comprehensive health coverage in Alaska is, of course, Medicaid. To be eligible for Medicaid, one must meet the State public assistance income limitations. As noted previously, there are currently some 2300 elderly Alaska citizens on Medicaid. Medicaid does cover virtually unlimited nursing home residency.

The most glaring deficiency in Alaska health care for the elderly is the lack of coverage for institutionalization in custodial environments such as nursing homes. Nursing home

---

[61]Interview, Ms. P. Eubanks, Field Rep. Social Security Admin. (Feb. 24, 1983)

[62]Interview, Ms. P. Roberts IHS, (Feb. 23, 1983)

rates in Alaska run from $90 to $172 per day[63]. The costs are simply prohibitive for anyone not on Medicaid -- indeed, of the 467 elderly Alaskans currently residing in State nursing homes (other than the Pioneers Homes), all but 31 are there under Medicaid, or Alaska's General Relief Medical Assistance.

Conversely, nursing home rates in Washington, for example, have been estimated by the Department of Health & Social Services to vary from $50-$60 per day. It is not known how many elderly Alaskans are institutionalized in lower forty-eight custodial care facilities; however, it is apparent that unless one is eligible for Pioneer Home placement, a nursing home can be afforded if, at all, only by relocating to the lower forty-eight.

Three private organizations were asked to estimate the premium amount required to supplement Medicare and other coverage for Alaska's elderly to provide health insurance equivalent to the existing Public Employees' Retirement System's retiree coverage, and to include comprehensive nursing home coverage. Neither Travelers Insurance, nor Aetna Insurance felt capable of providing an estimate.

However, insurance consultants frequently used by the state for matters such as the public employees Supplemental Benefits System estimated that to provide supplemental coverage

---

63Alaska Nursing Home Census, Alaska Department of Health & Social Service, 12/31/82

for Medicare, insurance could be provided at a premium of approximately $70 per individual per month. This would include comprehensive nursing home coverage.

Medicare is currently a primary insurer -- that is, the State could provide for Supplemental coverage without endangering basic Medicare eligibility. Moreover, and in all likelihood, supplemental State coverage could properly provide otherwise uninsured Alaska Natives with those costs not covered by the Indian Health Service.

The major difficulty is Medicaid. Medicaid eligibility is very much contingent upon the unavailability of "resources".[64] Currently, the State only pays 48% of a Medicaid's patient bills. If a State health insurance policy was considered a "resource" the State could find itself footing the entirety of a Medicaid patient's bill.

Of course, the State would hardly need to "supplement" any Medicaid coverage -- Medicaid coverage itself being essentially inclusive. The statute, could simply exempt Medicaid recipients from the coverage of the policy. The issue posed by such an enactment is whether the State would be frustrating the Congressional goals behind Medicaid -- which is to provide a health coverage means of last resort -- thereby running afoul of the Supremecy Clause.[65]

---

[64] 42 U.S.C. §1382(a)(1)(B)

[65] Florida Lime & Avocado Growers v. Paul, 373 U.S. 132 (1963)

Assuming that the State could continue to merely supplement Medicare, IHS facilities and existing private and retiree coverages, and that the consultants' figures are accurate, there remain two difficulties with the health insurance option. First, it is of no benefit to Alaska's needy elderly -- who will merely continue with Medicaid coverage at the price of their longevity bonus.

Secondly, there is the potentially severe problem of in-migration. If a year's residency in Alaska[66] were all that were required for free and unlimited nursing home coverage, the potential of in-migration may be severe. There are two potentially justifable components of the program which could mitigate this potential:

1. If a purpose of the health insurance option is to allow Alaska residents to continue to reside in the state even if nursing home coverage is required, nursing home coverage could be limited to Alaska institutions, just as many states

---

[66]It is possible, although we believe unlikely, that a court would rule that supplemental health insurance coverage would constitute a "basis necessity of life" -- dropping the maximum possible durational residency requirement to 30 days. The program would be supplemental to a host of existing assistance insurance programs, and would not be based on need. See Memorial Hospital v. Maricopa County, 415 U.S. at 261.

limit resident tuition discounts to in-state universities.[67] The difficulty, obviously, is that existing Alaskan nursing home capacity is limited. Whether unlimited nursing home coverage for all Alaskans would result in the expansion of existing facilities is debatable;

2. For the reasons cited with respect to the annuity and social security options, eligibility for health insurance coverage might properly be based upon contribution history if (a) a portion of the individual's permanent fund dividend is used to help fund the insurance program; and (b) the funding is in excess of current needs, in order to amass the same type of "savings account" envisioned with respect to the social security option.

I. LONGEVITY BONUS PREMISED ON INDIVIDUALIZED RELOCATION HARDSHIP.

As noted in Section II(A), ante, there is some judicial support for the view that it is permissible for Alaska to establish a program intended to benefit those who would suffer the most hardship by financially-coerced relocation from the state, and to measure that hardship in part by duration of residence.

This option relies upon that support, and involves three steps:

---

[67]Starns v. Malkerson, 326 F.Supp. 234 (D. Minn. 1970), affa mem. 401 U.S. 985 (1971)

1. cataloging those criteria which would differentiate those Alaska elderly who would suffer relatively more hardship by being forced to retire outside the state, and who need financial assistance in order to remain in-state;

2. translation of those subjective criteria to a point system similar to that used by the Alaska Commercial Fisheries Entry Commission; and[68]

3. structuring of that point system such that (a) administrative costs are minimized; and (b) successful applicants are confined to a pool roughly equivalent in number to existing bonus recipients.

Indeed, the structure of this option is similar to the Alaska Limited Entry Act -- which translates certain very subjective criteria -- such as "economic dependence on the fishery" -- into an objective point system. It does so, of course, at a bureaucratic price -- approximately $2.5 million a year for a pool of applicants originally roughly equivalent to those which this option would affect. It also does so at other costs, which will be discussed below.

It is not difficult to catalog the criteria which would set our "relocation hardship" pool aside. Duration and continuity of residence would be one criteria, as would, perhaps:

1. income;

2. location of family;

---

[68]See AS 16.43

3. location of property; and

4. ethnic, religious, and cultural ties.

Although income and duration of residency would play a role in determing eligibility, no one factor alone would be dispositive.

It would not be difficult to translate these factors into a point system; nor would it be particularly difficult to structure that point system to limit the class of successful applicants. The proposal, however, does suffer from the following disadvantages:

1. Since most Alaskan elderly have lived here more than 10 years most Alaska elderly will suffer some demonsterable hardship from relocating elsewhere -- although a certain percentage obviously do not require a longevity bonus to remain;

2. The alternative also involves the establishment and funding of a new bureacracy -- an intrisically unworthwhile undertaking, but one which nonetheless would cost far less than simply opening the class to all elderly Alaskans;

3. Perhaps the most obvious disadvantage is the burden that it would place upon elderly Alaskans themselves. There would presumably be a lengthy application form, together with evidentiary requirements, and in some cases, adjudicatory hearings. The Limited Entry Commission is currently involved in some 120 judicial appeals -- a number which is either at or below historic levels. According to the Commission's FY1984

budget presentation, there is a current backload of some 325 administrative adjudications.

Attorneys will be required -- regardless of what efforts are undertaken to make the process simple and informal. The difficulties facing the elderly applicant are thus rather apparent.

J. GRANDFATHERING

This report closes with one of the simpler alternatives -- opening the class of longevity bonus recipients to all elderly Alaskans with one year's residency, and terminating the program for the future. Persons eligible, or becoming eligible this year will be "grandfathered" and will receive a longevity bonus for life. The fiscal impacts of this alternative are, for FY1984, identical to option A, and will obviously decline in the future due to mortality and relocation.

The obvious advantage of this program is that it protects those currently on the longevity bonus program. Equally, it deprives those approaching the age of 65 with any expectation of receiving a bonus.

We believe that this option is constitutionally permissible. The Alaska Supreme Court shares the general view of the constitutionality of grandfathering laws -- as long as the grandfathered class itself is constitutionally defined.[69] Plainly, the state legislatures

---

[69]Commercial Fisheries Entry Commission v. Apokedak, 606 P.2d at 1259-61.

have the right to terminate social programs while protecting those who have come to rely on their benefits.

4. CONCLUSION

As noted at the outset, the purpose of this report is merely to provide a threshhold feasibility review of various options for amending the longevity bonus program. Through discussions with administration officials, legislative staff members, consultants and private industry, we have attempted to highlight the major issues surrounding each alternative, and provide at least rough information on each question raised. If, after the Judiciary Committee has identified two or three relatively attractive options, the effort expended over the past three weeks on 10 proposals can be condensed into the pursuit of three, proposed legislation and a more intricate analysis of the preferred options can be promptly transmitted.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

FIRST JUDICIAL DISTRICT

CONFIDENTIAL

RODNEY G. VEST,

Plaintiff,

v.

MARIAN SCHAFER and STATE OF ALASKA,

Defendants.

Case No. 1JU-82-1103 Civ.

AGREEMENT AND ORDER OF SETTLEMENT

WHEREAS, in 1972 the Alaska Legislature enacted the Alaska Longevity Bonus Program (AS 47.45.010 et. seq.) which currently provides, inter alia, for the payment of $250 for each month of continued residency by bona fide Alaska residents over the age of 65 who were domiciled in Alaska on or before January 3, 1959 and who have maintained a continuous domicile in Alaska for 25 years;

WHEREAS, the purpose of the Alaska Longevity Bonus Program is among other things, to reward elderly Alaskans for their past contributions to the state and territory, and for past hardships suffered during territorial and early statehood days. AS 47.45.170;

WHEREAS, since 1972, the State of Alaska in good faith has administered the Longevity Bonus Program in the belief that

the rewarding of prior residency was a constitutionally permissible purpose;

WHEREAS, in upholding the State's prior Permanent Fund Dividend distribution program, the Alaska Supreme Court ruled that "reward[ing] those Alaska residents who have chosen to stay" is a constitutionally permissible purpose. Williams v. Zobel, 619 P.2d 448, 460 (Alaska 1980);

WHEREAS, Justices Dimond and Matthews, in dissenting in Williams v. Zobel, believed that the Longevity Bonus Program would withstand constitutional scrutiny (619 P.2d at 469, n.13);

WHEREAS, on June 14, 1982, the United States Supreme Court, in invalidating Alaska's prior Permanent Fund Distribution Program, ruled that a statutory purpose of rewarding prior residency was constitutionally impermissible. Zobel v. Williams, ____ U.S. _____, 80-1146;

WHEREAS, because of the U.S. Supreme Court's decision in Zobel v. Williams, it appears the Longevity Program may not be deemed constitutional;

WHEREAS, a serious and good faith disagreement has developed and the Alaska Legislative Council questions whether the appropriate remedy is to expand the class of recipients of monthly longevity bonuses, or alternatively, to invalidate the entire program and cease payment of monthly bonuses to any person;

WHEREAS, this uncertainty regarding the appropriate remedy derives from § 2, Ch. 205, SLA 1972, which provides, with respect to the Longevity Bonus Program:

> If any provision of this Act, or the application of a provision of this Act to any person or circumstances is held invalid, this entire act shall be considered invalid.

WHEREAS, unless and until the question of appropriate remedy is resolved by this court, or a settlement of this controversy is achieved, it is reasonable and prudent that the State of Alaska continue to administer the Longevity Bonus Program in the manner provided by statute;

WHEREAS, on July 6, 1982, Plaintiff Rodney Vest filed the above-captioned action, seeking as relief his inclusion in the Longevity Bonus Program of "any . . . bona fide Alaska resident who is 65 years or older....". Complaint, Prayer for Relief, para. 2;

WHEREAS, ON July 23, 1982, Plaintiff Vest filed an amended complaint seeking to have this case certified as a class action under Alaska Rule of Civil Procedure 23 on behalf of all bona fide Alaskans of the age of 65 or older, and further seeking as alternative relief the invalidation of the Longevity Bonus Program, or the payment of retroactive bonuses "in amount equal to what they would have been entitled to obtain under the program had the unconstitutional criteria never been in place or

enforced." First Amended Complaint, Prayer for Relief, paras. 4-6.

WHEREAS, there are currently 9,124 recipients of monthly longevity bonuses, and many of these recipients are of modest means, and depend upon the monthly bonus for sustenance, and the termination of the longevity bonus payments to these individuals could cause great and irreparable harm;

WHEREAS, because of the uncertainty with respect to the appropriate remedy, the parties are desirous of settling this litigation in a manner which affords meaningful relief to Plaintiff Vest and others similarly situated, but which also ensures the continuation of monthly bonus payments to existing recipients;

WHEREAS, the parties are further desirous of achieving a settlement which will finalize and constitute a full and final accord of the rights and liabilities of the parties hereto;

WHEREAS, there may be as many as 4,000 persons who are similarly situated with Plaintiff Vest -- to wit, bona fide Alaskans of the age of 65 or over -- who are not currently receiving longevity bonus payments because of the residency requirements of the statute;

WHEREAS, the parties agree that, because of the nature of the rights of recipients involved in this litigation, a one-year residency requirement is reasonable, necessary and appropriate in order to demonstrate bona fide Alaskan residency;

WHEREAS, a full and final settlement of the parties' rights and liabilities hereto cannot be achieved until all persons similarly situated with Plaintiff Vest are certified as a class under Alaska Rule of Civil Procedure 23(c);

WHEREAS, the settlement envisioned by the parties includes the retroactive payment of longevity bonuses to plaintiff class commencing and including July 1, 1982;

WHEREAS, the payment of such retroactive bonuses to an expanded class of recipients would require the appropriation of sums above the amount currently appropriated for the longevity bonus program for fiscal year 1982-83. Moreover, and because of the Alaska Legislative Council's view of the non-severability clause, quoted above (effecting the expansion of the class of longevity bonus recipients), such payments may require the enactment of curative legislation;

WHEREAS, it is therefore necessary, in order to effectuate this settlement, for appropriate legislation to be enacted;

WHEREAS, the Alaska Legislature is a coordinate branch of government of the State of Alaska, and is represented in this action by the Attorney General;

WHEREAS, notwithstanding the above, the Attorney General cannot in any manner bind or compel the Alaska Legislature in the exercise of its legislative powers;

WHEREAS, on July 16, 1982, the Alaska Legislative Council moved to participate in the above-captioned action as amicus curiae, it is agreed that the Alaska Legislative Council may participate in all negotiations of any settlement, the filing of briefs and may participate in oral arguments; however, the Alaska Legislative Council agrees that it will not be involved in discovery proceedings in the event the case is ultimately litigated and will not become otherwise involved in accordance with the terms of this settlement agreement;

WHEREAS, and while the Alaska Legislative Council cannot bind the Alaska Legislature in the exercise of its legislative powers, the Alaska Legislative Council can and is willing to commit its best efforts to the enactment of appropriate legislation during the first regular session of the 13th Alaska Legislature;

WHEREAS, and subject to (1) the certification of plaintiff class, (2) the Superior Court's approval of a settlement proposal herein, and (3) the commitment of the Alaska Legislative Council to use its best efforts in the enactment of appropriate legislation, plaintiff class is agreed that such action will provide full and adequate consideration for the promise and agreement of plaintiff class not to seek relief in any form with respect to the Longevity Bonus Program through and including the adjournment of the first regular session of the

13th Alaska Legislature or June 30, 1983, whichever ever event comes first in time;

WHEREAS, nothing herein is to be construed as an admission by the State of Alaska as to the unconstitutionality of the Longevity Bonus Program;

WHEREAS, except with respect to the good faith of the State and its agents, nothing herein is to be construed as an admission by either party in the event the settlement agreed to here is not consummated;

NOW THEREFORE THE PARTIES STIPULATE AND AGREE AS FOLLOWS:

1. All actions and proceedings in the above-captioned case, other than:

(a) the certification of plaintiffs class

(b) the approval by the Superior Court for the State of Alaska, First Judicial District of this proposed settlement agreement, and

(c) any further approval by the court necessary to consummate the settlement agreement after the certification of plaintiffs class,

are stayed through and including the date of adjournment of the first regular session of the 13th Alaska Legislature or June 30th, 1983, whichever event occurs first in time. Procedures for class certification shall be submitted to the Court for review no later than September 10, 1982, and the parties will request the

Court to render its order with respect to the notice procedures forthe said class no later than September 24th, 1982. Notice to the class shall be transmitted, along with the proposed settlement and the conditions necessary to affectuate the settlement, on or before October 11th, 1982. The State of Alaska will undertake reasonable efforts to assist Plaintiff to locate those persons 65 years or older as of July 1, 1982, who have been bona fide Alaska residents in the state of Alaska for one year immediately prior to that date. In the event this settlement agreement is not consummated for whatever reason, but the class certification has been certified by the court as set forth above, the Plaintiff shall not be precluded from seeking an enlargement of the class and a certification thereof so as to include other persons having a shorter residential duration within the State and may also seek a greater retroactive recovery.

2. The Alaska Legislative Council shall utilize its best efforts to secure the enactment, during the first regular session of the 13th Alaska Legislature, of the following legislation;

(a) Legislation which treats equally all bona fide Alaska residents of the age of 65 or older with respect to their residential qualifications to receive any "longevity bonus payments" or any substitute benefits from July 1, 1982 and thereafter for as long as the legislature may determine to continue such a program. Bona fide Alaska residents are those

who continuously resided in the state for one year immediately prior to the date of eligibility; and

(b) Any appropriation which might be required to fund the legislation described in paragraph (a), including the retroactive payment of bonuses.

3. If the Alaska Legislature passes legislation described in 2(a)-(b) above at any time during the first regular session of the 13th Alaska Legislature and the Governor signs the said legislation or otherwise allows 2(a)-(b) to become law so that 2(a)-(b) will be effective no later than Ninety days after enacted, the above action shall be dismissed with prejudice, subject only to the determination of attorney fees by the Court.

4. If the above-captioned action is dismissed under paragraph 3 above, all claims or rights of any class member (except those class members who exercise their right to opt out under Rule 23 of the Alaska Rules of Civil Procedure), with respect to the Longevity Bonus Program, shall be merged into the judgment of dismissal and extinguished;

5. If the Legislation described in 2(a)-(b) above is not enacted during the first regular session of the 13th Alaska Legislature or in any event no later than June 30, 1983, then this agreement shall be null and void, except that the Plaintiff and the class certified, together with any additional members, if there is an enlargement of the class, may prosecute this case as

if this agreement had not been entered into, it being the intent of the parties that certification of the plaintiff class, or the enlargement thereof, shall not be affected if this agreement becomes null and void;

6. The obligation of the Alaska Legislative Council under 2 herein is contingent upon certification of plaintiff class under Alaska Rule of Civil Procedure 23(c), which class shall include each and every individual of the age of 65 or older who, as of July 1, 1982, had continuously resided one year immediately preceding that date within the State of Alaska, and in the event that a class is certified which is less inclusive than as above described, the State of Alaska has reserved the right to waive the protections of this paragraph in whole or in part. Nothing in this paragraph is intended to modify or affect the certification of the class or the right of the Plaintiff to enlarge the class if this agreement becomes null and void.

IV. ANALYSIS. This bill changes the eligibility requirements for recipients of Alaska's Longevity Bonus and would phase the program out entirely ~~in ten~~ ~~years~~ over a ten year period.

ASSUMPTIONS

1. Residency would be changed from 25 years to 12 consecutive months.

Residence on or before Jan. 3, 1959 would be

2. ~~State residency eligibility~~ eliminated from eligibility requirements.

3. Beginning ~~Jan. 1, 1984,~~ July 1, 1983, the monthly bonus would be reduced $25 each year.

4. All persons now receiving the bonus would continue as long as they ~~remain~~ domiciled in Alaska.

5. Retroactive bonus payments may be paid to persons who ~~were eligible under the new statutes~~ would have been eligible as of July 1, 1982, had the new statutes then been in effect.

6. The $25 per month reduction in Longevity Bonus funds would be offset by a like increase in Old Age Assistance payments made under AS 47.25.430 Longevity Bonus

7. The program would be phased out and cease on ~~January 1, 1995.~~ July 1, 1992.

Clerk V PFT (1 position) $26,730
Clerk II PPT (3 positions 31,680
$58,410 Personal Services (FY84)

As a result of the Zobel case, state benefits which are based on length of residency have come under scrutiny. In order to meet the constitutional requirement for treating all residents equally, the Alaska Longevity Bonus Program should be modified to allow benefits to all qualifying Alaskan residents. This means elimination of the existing 25 year residency requirement and for establishing Alaskan domicile on or before January 3, 1959.

Assuming that a one year Alaskan residence would be constitutionally acceptable, many people would immediately become eligible for the Bonus who do not now qualify. Also, it is believed that some people from the lower 48 over age 65 may move to Alaska in order to receive the Bonus when their one-year residence is completed.

The actual number of additional people who would receive the Bonus is not known. However, estimates by the Department of Administration indicate that approximately 13,228 persons aged 65 and older presently live in Alaska, and it is assumed that a majority of these people have lived in Alaska for at least one year.

The Longevity Bonus program has been growing under existing regulations at the rate of approximately 60 persons each month. After the increase of 3,803 applications expected by the liberalization of residency requirements, the program is expected to grow at the net rate of 89 persons per month as a growing number of Alaskans reach age 65 and remain in the state for retirement.

An increase in the Longevity Bonus staff will be needed to handle the initial flood of applications, and continuing increased staff will be necessary to process the greater workload of the expanded program.

This fiscal note offers an option which would gradually decrease the drain on the State treasury, while allowing Longevity Bonus recipients the opportunity to plan for future decreased income from State sources. The plan is basically to reduce the amount of the Longevity Bonus monthly payments by $25 each year, until the program is phased out entirely ~~at the beginning of fiscal year 1993.~~ ~~on July 1, 1993.~~ on July 1, 1992.

The Longevity Bonus was originally designed to be phased cut by making only those who were Alaskan residents on or before January 3, 1959 eligible. The new plan presented here escalates that phase-out process, while meeting all the legal and constitutional tests, and at the same time will affect the existing Longevity Bonus recipients in a minimal way. A loss of only $25 per month could be accommodated by oldsters with insufficient monthly income by applying for assistance from ~~other sources such as~~ the Old Age Assistance program of the Department of Health and Social Services. Increasing the income floor of this program ~~would~~ provides a humanitarian level of support for less affluent oldsters. This increase is dealt with in a separate fiscal note submitted by the Department of Health and Social Services.

may receive payments

Included in the above estimate of additional cost is $11,409,000 which will be needed in FY84 to pay retroactive benefits to ~~[redacted]~~ as many as 3,803 Alaskans who ~~[redacted]~~ will under the clause which would allow payments back to July 1, 1982, ~~for~~ those who would have been eligible had the new law then been in effect.

The plan would result in monthly Longevity Bonus payments as follows:

FY 84 - $225 per month
FY 85 - $200 per month
FY 86 - $175 per month
FY 87 - $150 per month
FY 88 - $125 per month
FY 89 - $100 per month
FY 90 - $ 75 per month
FY 91 - $ 50 per month
FY 92 - $ 25 per month
FY 93 - Phased Out

Grants Budget
if L.B. program is unchanged

Fy 93	Program phased out.				

SUMMARY: HB 36 "An Act relating to the longevity bonus program; and providing for an effective date."

The legislation would change the residency requirements of the Alaska Longevity Bonus Program (47.45), in keeping with the recent Supreme Court decision on the Permanent Fund. Currently the ALB Program gives $250 monthly bonus to persons 65 years of age or over who were living in the Territory of Alaska on or before January 3, 1959 and who have maintained a continuous domicile in the Territory or State for 25 years.

This bill would change those requirements, providing a person who is 65 years of age or over, who is a state resident and who has been a resident for not less than one year immediately preceding the date of application may apply to the Commissioner of Administration for qualification to receive the monthly $250 bonus.

Section 3 of the bill defines "resident" with new language. The replaced language of this section defined "domicile" as(the place with which a person has a settled connection for determination of his civil status or other legal purposes because it is actually or legally his permanent and principal home.")

The bill also provides a retroactive clause to July 1, 1982, and states that a person who was eligible to receive the bonus as of that date is entitled to receive accrued retroactive bonuses from 7/1/82, and a person reaching the age of 65 after 7/1/82 is entitled to receive the bonus payments beginning on the date of eligibility.

Immediate effective date clause.

There are currently three bills introduced in regard to the Longevity Bonus Program:

1) HB 36 by Malone - House HESS Committee - changes residency from 25 years to one year.

2) SB 200 by Rodey - AD Hoc Committee on Residency- repeals ALB for all but those who are 65 or over and who have lived continuously in Alaska for one year before the effective date of the bill.

3) SB 215 by Ray - Senate Judiciary - Sets up an "Equal Retirement Benefit Program". Establishes a separate account within the Ak. Perm. Fund. and also takes 12.5% of the income of the perm. fund earned during a fiscal year that is available for distribution and transfers that money to the Longevity Bonus Account. Establishes one year residency.

(Senate Judiciary staff and Mr. Jon Tillinghast will be in attendance to explain this legislation and other proposals under review by the Senate.)

MEMORANDUM

TO: Representative Milo Fritz

FROM: Leslie Longenbaugh, Research Staff

RE: Residency Requirement for Longevity Bonus Program
Research Request Number 83-51

Linda Otey asked that we research the rationale behind Governor Sheffield's consideration of a one-year residency requirement for recipients of State longevity bonuses. I have listed the major components of the administration's reasoning below.

- A residency requirement of much more than one year might not be found constitutional in court, where the State's intent would be subject to some scrutiny. A longer residency requirement could imply that the intent is to discriminate between elderly Alaskans of many years' residency and those who have arrived more recently. The U. S. Supreme Court decision in Zobel makes it clear that such a distinction is constitutionally impermissible.

- Constitutionally, the State can require that recipients of the bonuses be "bona fide residents," meaning that they are currently residents who intend to stay. For the elderly, for whom moving is often a greater ordeal than it is for the general population, courts would probably view one year's residency as an adequate demonstration of the intent to stay. A residency requirement of very much less than one year (e.g., thirty days) could be insufficient to establish bona fide residency.

- A one-year residency requirement was part of the accord reached by the State and Rodney Vest last summer when Mr. Vest agreed to wait for a legislative change in the longevity bonus statute that might obviate the necessity for his suit.

I spoke with Rebecca Burch in the Department of Administration[1], who noted that the Governor is considering several options for legislation

---

[1]Rebecca Burch, Special Assistant to the Commissioner, Department of Administration, Juneau; telephone: 465-2200.

to amend the longevity bonus program. Each of the options includes a residency requirement of one year.

The U. S. Supreme Court in July 1982 struck down a distribution scheme for the Alaska Permanent Fund dividends that was based on a schedule of larger payments for the length of past residency in the state. The Court declared the distribution unconstitutional when it found that favoring residents of longer residency over relative newcomers did not pass the test of "rationally furthering a legitimate state interest," and so violated the equal protection clause of the Fourteenth Amendment.[2]

The Court's opinion in Zobel clearly limits the State's ability to require longevity bonus recipients to have been resident in the state not only for the preceding twenty-five years but before Statehood (AS 47.45.010):

> Alaska's reasoning could open the door to state apportionment of other rights, benefits and services according to length of residency. It would permit the states to divide citizens into expanding numbers of permanent classes. Such a result would be clearly impermissible.
>
> .....
>
> The Court today reaffirms the important principle that, at least with respect to durational-residency discrimination, a State's desire to "reward citizens for past contributions" is "clearly not a legitimate state purpose." (Emphasis added; footnotes omitted.)[3]

Since June 1982, when the U. S. Supreme Court handed down the Zobel decision, the State Attorney General's office, both on its own and at the instigation of civil suits, has examined the residency requirements of several State programs. Assistant Attorney General Debra Vogt[4] emphasized that the courts would consider each such program differently. The maximum allowable durational residency requirement would vary depending upon the participants in the program and the intended result of the legislation, among other considerations.

In 1982, Rodney Vest filed suit against the State, alleging that his constitutional rights had been violated by the residency requirement

---

[2]Zobel v. Williams, ____ U. S. ____, 72 L.Ed.2d 672 (1982).

[3]Ibid.

[4]Debra Vogt, Assistant Attorney General, Juneau; telephone: 465-3600.

fixed by statute for the longevity bonus program. Having moved to the state shortly after Statehood, Mr. Vest was ineligible for benefits under the requirement that recipients date their residency in the state from on or before January 3, 1959. The Department of Law, certain that the challenged residency requirement would not hold up in court, persuaded Mr. Vest to suspend his suit until the 1983 legislative session could amend the residency requirement.

In studying the constitutionality of durational residency requirements, the Attorney General's office has used criteria that derive from the Supreme Court's decision in Zobel and from other State and federal case law. In an opinion of July 14, 1982, Assistant Attorney General Ken Vassar traced the evolution of the tests used by the U. S. Supreme Court in determining the constitutionality of durational residency requirements.[5]

> ...it appears that the [U. S. Supreme] Court had arrived at a three-step analysis: (1) durational residency requirements necessarily involve classifications which call into issue the equal protection clause; (2) a durational residency requirement which penalizes the exercise of the right to travel requires strict scrutiny under the compelling state interest test; and (3) a penalty can be found either through infringement of a fundamental right (in addition to the right to travel), such as voting, or through denial of a basic necessity of life, such as welfare or medical services. (Emphasis in original.)

If a durational residency requirement is found to infringe upon or deny a basic necessity of life or a fundamental right, the burden of justifying the continued existence of the requirement falls on the State. The State must show not only that the infringement furthers some legitimate state interest, but that it furthers that interest directly and expediently.[6]

---

[5]1982 Alaska Opinion Attorney General Number 7, July 14, 1982.

[6]The federal Court in Zobel found that the Permanent Fund dividend distribution plan favored long-time residents in a manner that was not connected to the stated intent of the legislation, i.e., keeping residents in the state and encouraging their active interest in the well-being of the Permanent Fund. Because it found that the means did not pass the first test of being rationally related to the stated purposes, the Court did not go on to address the question of whether the ends (the legislative purposes) were compelling enough to permit a distinction among residents on the basis of the length of their residency.

Assistant Attorney General Debra Vogt has participated in the administration's discussions about the future of the longevity bonus program. She and others have concluded informally that a one-year residency requirement for the longevity bonus program would almost certainly pass the federal tests described above. According to their analysis, a delay of one year before receiving longevity bonuses does not infringe a fundamental right. Moreover, she feels that the longevity bonus of $250 per month, which is not based on need, would not be found by a court to be a "basic necessity of life."[7]

Ms. Vogt stated that the courts would be most likely to uphold a State statute requiring one year's residency if the legislative intent were to ensure that only "bona fide" residents participate in the program. The elderly tend to be less mobile than other population groups; for this reason, a court would probably consider a requirement of one year's residency, rather than two years' or longer, to be adequate assurance of their bona fide status. Ms. Vogt emphasized the importance of a statute's intended result when a court scrutinizes any legislation.

For your information, the following are a few of the Sheffield administration's many ideas regarding the future of the longevity bonus program, as described by Ms. Vogt:

1) phasing out the program altogether, over several months or years;

2) gradually discontinuing the longevity bonus program and strengthening the Old Age Assistance program, which is based on need;

3) opening the program to all Alaskans over 65 years old;

4) devising a two-part program, one portion to provide longevity bonuses (much smaller than the present payments) to all Alaskans over 65 years old, and the other part, with larger payments, to be based on need; and

5) providing medical care or insurance for the elderly in order to mitigate one of the most expensive components of remaining in Alaska.

* * *

If you have questions or additional needs for research, please call on us.

---

[7]Ms. Vogt noted that transferring State funds to persons over 65 is considered by courts to be clearly constitutional because of the diminished capacity for earning, the increased health costs, and other liabilities that are endemic among the elderly.

House of Representatives

Committee on

Health, Education & Social Services

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

MEMORANDUM February 8, 1983

To: Rep. Milo Fritz, Co-Chair
House HESS Committee

From: Linda Otey, Committee Assistant
House HESS Committee

The following is an update with regard to the status of Alaska's Longevity Bonus program and its constitutionality.

As you know, the State is under court order, through the case of VEST vs. SCHAFFER & STATE OF ALASKA, to secure the enactment of legislation that treats equally all persons of the age of 65 or older, who have been residents of the State of Alaska for one year or longer with respect to their residential qualifications to receive any longevity bonus payments or substitute benefits from July 1, 1982.

Since this case was filed during the Legislative Interim, the Legislative Council was specifically ordered to see that the inequitable situation is remedied.

To date, there is only one bill in the House, HB 36 by Malone, dealing with this issue. The legislation simply deletes the "25-year residency requirement" and inserts a "one-year residency requirement". The effects of HB 36, if enacted, would be an expanded extension of benefits from the current number of approximately 9000 recipients to an additional 4000 recipients. This idea appears to be unpopular (especially in the Senate) for two reasons:

1. The State cannot afford fiscal impact.

   a. Current law - $250 x 12 mo. = $3,000 x 9000 recipients
   = $27 mill annually ± 4000
   = recipients = 39 mill.
   annually

2. The State would prefer not to promote "transient residency" for purposes of collecting Alaska Longevity Bonus (ALB).

Therefore, the basis question is: Can a program be enacted which does not extend benefits to all persons 65 or over who are and have been residents for a period of not less than one year?

Another major question is: What effect does receipt of the Bonus have on an individual's receipt of social security and other old age benefits, state and federal?

In speaking to the later question, a briefing was held today with the Division of Public Assistance personnel. Explanations of various programs were presented. A few important facts disclosed were:

1) If the ALB program were to be repealed and re-enacted, rather than amended from its current form, a social security income exemption on the federal level that applies only to Alaska's Longevity Bonus program, will no longer be in effect, allowing for the Bonus to become taxable. (P.L. 94602) Copies available.

2) A possible change in the program with the criteria for eligibility being based on need rather than residency:

a. programs of the "need" status are also exempt from SSI
b. the definition of the "need" could be specific and not necessarily tied to other statute definitions
c. need status is less likely to effect other adult public assistance programs

3) Grandfathering clause for present recipients by showing a reliance on the State in relation to an applicant's current living standard.

4) Criteria perhaps utilized when looking at other program receipts being utilized by applicant.

5) Strong feelings for continuing ALB under the Department of Administration. It was noted that is is politically unpopular to place the elderly benefitting from the bonus program under a "welfare system" as in those categories under the Division of Public Assistance.

There was a request for a complete list of "needs" programs obtainable on both State and Federal levels. Once received, a more in-depth review of their effects on ALB recipients will be available.

As a bottom line, the Legislative Council has set a March 1 completion date by which to choose a workable route and introduce legislation accordingly. Various methods (listed above) are in the reviewing process as alternatives to the constitutionality problem in regards to the Alaska Longevity Bonus program.

The Durational Residency Requirement, which is in need of resolve, is cited in 54 sections of Alaska's statutes. Four other citations with potential for controversy are also included under Special Old Age Programs and exist because of the length of the residency requirement. Consequently, the following programs must also be resolved:

1. Alaska Longevity Bonus - 25-year requirement
2. Pioneer's Home Program - 15-year requirement
3. Senior Citizens Special Assessment Exemption - 12-month reqmt.
4. Senior Citizens Exemption from Fishing License Requirement - 30-year requirement

The Department assumes that the services delineated in this Bill would be utilized mostly by unmarried women. Using this pool as the target group, the Department would further assume that the more youthful unmarried women (ages 13-24) would be more more likely to utilize maternity and foster home care; whereas the older group (ages 25-45) would utilize the community services, such as counseling and adoption assistance.

The younger age group consists of 1,163 women. The Department estimates that approximately 190 of this group would avail themselves of the services of a maternity home or foster home (30 maternity and 160 foster), and a total of 300 would utilize available counseling and adoption assistance.

The Department recommends that the entire range of services be contracted out to local community providers. This would reduce the amount of administrative costs. However, it is recommended that an Associate Coordinator (Range 18) be established to initiate the program on a statewide basis. This individual would be responsible for planning, program development, preparation of requests for proposals and contracts, and contract monitoring and program evaluation for the initial two years only, and would then be phased out with duties being assumed by the regional offices of the Division.

Estimated costs are as follows (700 Benefits to Individuals):

Foster Home Care			
160 persons x $502/mo x 6/mos		=	$ 481,920
Maternity Home Care			
30 persons x $146/day x 6/mos		=	$ 788,400
Counseling/Adoption Assistance			
300 persons x $75/hr x 15/hrs		=	$ 337,500
Transportation to and From Placement			
150 persons x $600/average trip		=	$ 90,000
		Subtotal	$1,697,820
Associate Coordinator (Range 18):			
100	Personal Services	$35,037	
200	Travel	1,200	
300	Contractual	2,600	
400	Commodities	400	
			$ 39,237
		TOTAL	$1,737,057

The costs for the Associate Coordinator position includes: Travel - two trips of three days each to perform program reviews; Contractual - telephone rental and long distance of $678, postage of $300, copier usage of $120, printing and advertising of $500, and office space rent of $1,002; and Commodities - $400 for general office supplies.

A 6% inflation rate has been added to future years' estimated costs. Medical costs will be borne by the Division of Public Assistance.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 39

For a Bill entitled: "An Act relating to services for pregnant women; and providing for an effective date."

This Bill provides for expansion of pregnancy related health and social services and authorizes State funding of the cost of non-medical service for pregnant women experiencing social and economic difficulties during the prenatal and postpartum periods. These services are to include adoption assistance, counseling, transportation, care received in maternity and foster homes and training in parenting skills, as well as birthing centers, midwife services, and postnatal care.

Although the Department offers a wide range of public services, many women experience difficulties and hardships in obtaining timely and adequate pregnancy care. These difficulties are associated with economic barriers to private care and unavailability of many services in rural communities. These gaps in pregnancy related services may be summarized as follows:

1. financial inability of many low income and adolescent women to pay for travel outside of their communities for medically necessary care;

2. fragmentation of the pregnancy care delivery system, that inhibits provision of education, counseling, referral, medical, and follow-up services required by many women;

3. unavailability of many pregnancy-related services in rural communities;

4. lack of appropriate housing near major medical centers, where women from rural communities may stay while obtaining out-patient maternal care services; and

5. insufficient adoption counseling and placement services.

This Bill will expand the types of services available to maternal clients who are experiencing social and economic difficulties associated with childbearing. Medical care services included in this Bill include birthing centers, midwife services, and postnatal care. Since pregnancy related medical services for low income women are already covered by the Division of Public Assistance, the Department assumes the intent of this Bill is to provide the social services related to pregnancy. Therefore, the cost of this program is anticipated to be in the area of social services which come under the Division of Family and Youth Services.

Social services offered will include counseling, placement in a maternity home or foster home, transportation between the client's home and the foster or maternity home, training in parenting skills, and adoption assistance. The Department anticipates that the social services would be contracted out to local community providers, thereby reducing the costs within the Department.

This Bill offers transportation, counseling, adoption assistance, and maternity or foster home care to women experiencing economic and social difficulties associated with childbearing. The Bill at the present time does not include specific definitions of "economic and social difficulties associated with childbearing," but allows the Department to adopt regulations to define those terms. As part of the adoption of regulations process, the Department would plan to conduct public hearings to assist in formulating appropriate standards on which to determine eligibility for services. At this point, it is perceived that draft regulations would define economic need to be up to 200% of the Federal Community Services Administration's Alaska Non-Farm Poverty Guideline (attached), and social needs to include those individuals who are having psychological, emotional, and family problems associated with the pregnancy.

RECOMMENDATION

It is the Department's interpretation that the intent of this Bill is to provide non-medical pregnancy related services to women experiencing social and economic difficulties. Since medical care is available to beneficiaries of the Aid to Families With Dependent Children (AFDC) Program, the Department recommends that reference to medical services (birthing centers, midwife, and postnatal care) be deleted. If the legislative intent is to provide additional medical services beyond the scope of current Public Assistance programs, then the Department recommends that reference to other than medical services be deleted.

If this Bill is not adequately funded, the complete services as described in Section 2 cannot be provided to all of those who need and qualify for these services. With reduced fiscal support, the Department recommends that only counseling services be included in Section 2 until a time when sufficient funds are available.

POSITION PAPER/Department of Health & Social Services

POSITION

The Department recognizes the value of the needed pregnancy-related services that will become available to certain women. We endorse the health promotion concepts of this Bill and feel that it will contribute to the comprehensiveness of pregnancy-related services throughout Alaska, if fully funded.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF PUBLIC HEALTH

POUCH H-DS
JUNEAU, ALASKA 99811-9976

PHONE:

February 25, 1983

DOCUMENT NO. 83-98

The Honorable Milo Fritz, M.D.
Co-Chairman
House HESS Committee
Pouch V
Juneau, Alaska 98911

Dear Dr. Fritz:

I would like this opportunity to respond to the Health Education and Social Services Committee request for additional information concerning House Bill No. 39, "An Act relating to services to pregnant women." At the February 16, 1983 hearing, the committee requested clarification concerning the following items:

1) The committee requested a budgetary estimate for providing pregnancy related medical care to women addressed by this bill.

Assuming that the intent of this service would be to provide medical care to women who do not have access to other resources, (i.e., Medicaid, General Relief Medical, private pay, Public Health Service or other insurance) an estimated cost would be $1,176,000 for FY 84. This estimate is based upon utilization experience by a similar service provided through a pilot project at the Fairbanks Health Center. During 1981-1982, the project provided medical care financial assistance to approximately 7 percent of the total births in the North Star Borough. Assuming that the total number of births in FY 84 will be approximately 12,000, it is estimated that 840 women would qualify for this service at an average cost of $1,400 per client. Additional state staff would not be required if the Division of Public Assistance would perform the bill paying, and the Division of Public Health would provide client intake and eligibility certification.

2) The committee requested information concerning the state expenditures for abortions, the number provided and the criteria for those receiving state assistance.

The number of abortions provided by the General Relief Medical program during calendar year 1982 is estimated to be 276, with an approximate total expenditure of $269,354. The criteria for General Relief Medical assistance is $300 monthly income for one adult, plus $100 for each additional in adult only households; and $350 for parent plus 1 child with $50 for each additional child in parent/child households.

3) The committee requested identification of possible budget reductions in the social services fiscal note to be investigated.

Based upon conversations with staff for Representative Miller and Representative Martin, comments of the Booth Memorial Home staff, and Division of Family and Youth Services, the fiscal note could be reduced by a total $587,700 in FY 84. The suggested modifications are as follows:

Line 700 - Benefits for Individuals	Original	Reduction	Total
Foster Home Care 160 persons x $520/mo x 6 mos.	$481,920	<0>	$481,920
Maternity Home Care 30 persons - $73/day x 6 mos. (50% reduction of daily cost)	788,400	<394,200>	394,200
Counseling/Adoption Assistance 300 persons x $75/hr. x 8 hr. (7 hr. reduction of counseling)	377,500	<157,500>	180,000
Transportation to and from Placement 150 persons x $360/average trip ($240 per trip reduction)	90,000	<36,000>	54,000
Subtotal	1,697,820	<587,700>	1,110,120
Associate Coordinator, Range 18			
Line 100 Personal Services	35,037	<0>	35,037
Line 200 Travel	1,200	<0>	1,200
Line 300 Contractual	2,600	<0>	2,600
Line 400 Commodities	400	<0>	400
Subtotal			39,237
Total	$1,737,057	<587,000>	$1,149,357

I hope this information will be of assistance. Please advise us if you have additional concerns on this matter.

Sincerely,

E.S. Rabeau, M.D.

DOCUMENT NO. 83-61

February 18, 1983

David Palmer, Legislative Aide
Representative Mae Tischer's
Office
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Palmer:

Per your questions of February 18, 1983 pertaining to State-funded abortions, I have obtained the following information from the Division of Public Assistance. Between January 1, 1982 and June 30, 1982, one hundred and fifteen (115) abortions were paid for through the State funded General Relief Medical program for a total cost of $112,231. In annualizing these figures, the Division of Public Assistance projected 276 State funded abortions in calendar year 1982 for a total estimated cost of $269,354.

lune, 1982, the Division of Public Assistance converted from a r ual to an automated payment system. Because of time lags in processing payments through the new system, Public Assistance felt it would be more accurate to make projections based on the five month period than to use information from the new system which may contain distortions attendant to system start-up.

Please contact me should you have additional questions.

Sincerely,

Michael L. Price

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 39
PAGE 1

For a Bill entitled: "An Act relating to services for pregnant women; and providing for an effective date."

This Bill provides for expansion of pregnancy related health and social services and authorizes State funding of the cost of non-medical service for pregnant women experiencing social and economic difficulties during the prenatal and postpartum periods. These services are to include adoption assistance, counseling, transportation, care received in maternity and foster homes, and training in parenting skills, as well as birthing centers, midwife services, and postnatal care.

Although the Department offers a wide range of public services, many women experience difficulties and hardships in obtaining timely and adequate pregnancy care. These difficulties are associated with economic barriers to private care and unavailability of many services in rural communities. These gaps in pregnancy related services may be summarized as follows:

1. financial inability of many low income and adolescent women to pay for travel outside of their communities for medically necessary care;

2. fragmentation of the pregnancy care delivery system, that inhibits provision of education, counseling, referral, medical, and follow-up services required by many women;

3. unavailability of many pregnancy-related services in rural communities;

4. lack of appropriate housing near major medical centers, where women from rural communities may stay while obtaining out-patient maternal care services; and

5. insufficient adoption counseling and placement services.

This Bill will expand the types of services available to maternal clients who are experiencing social and economic difficulties associated with childbearing. Medical care services included in this Bill include birthing centers, midwife services, and postnatal care. Since pregnancy related medical services for low income women are already covered by the Division of Public Assistance, the Department assumes the intent of this Bill is to provide the social services related to pregnancy. Therefore, the cost of this program is anticipated to be in the area of social services which come under the Division of Family and Youth Services.

Social services offered will include counseling, placement in a maternity home or foster home, transportation between the client's home and the foster or maternity home, training in parenting skills, and adoption assistance. The Department anticipates that the social services would be contracted out to local community providers, thereby reducing the costs within the Department.

This Bill offers transportation, counseling, adoption assistance, and maternity or foster home care to women experiencing economic and social difficulties associated with childbearing. The Bill at the present time does not include specific definitions of "economic and social difficulties associated with childbearing," but allows the Department to adopt regulations to define those terms. As part of the adoption of regulations process, the Department would plan to conduct public hearings to assist in formulating appropriate standards on which to determine eligibility for services. At this point, it is perceived that draft regulations would define economic need to be up to 200% of the Federal Community Services Administration's Alaska Non-Farm Poverty Guideline (attached), and social needs to include those individuals who are having psychological, emotional, and family problems associated with the pregnancy.

RECOMMENDATION

It is the Department's interpretation that the intent of this Bill is to provide non-medical pregnancy related services to women experiencing social and economic difficulties. Since medical care is available to beneficiaries of the Aid to Families With Dependent Children (AFDC) Program, the Department recommends that reference to medical services (birthing centers, midwife, and postnatal care) be deleted. If the legislative intent is to provide additional medical services beyond the scope of current Public Assistance programs, then the Department recommends that reference to other than medical services be deleted.

If this Bill is not adequately funded, the complete services as described in Section 2 cannot be provided to all of those who need and qualify for these services. With reduced fiscal support, the Department recommends that only counseling services be included in Section 2 until a time when sufficient funds are available.

POSITION PAPER/Department of Health & Social Services

POSITION

The Department recognizes the value of the needed pregnancy-related services that will become available to certain women. We endorse the health promotion concepts of this Bill and feel that it will contribute to the comprehensiveness of pregnancy-related services throughout Alaska, if fully funded.

IN THE HOUSE

BY M.M.MILLER,MARTIN,ZHAROFF KOPONEN AND FRITZ

HOUSE BILL NO. 39

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to services for pregnant women; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE FINDINGS AND PURPOSE. The legislature finds that there are insufficient maternal and infant care services available to women experiencing social and economic difficulties associated with child-bearing. As a result of these inadequate services, some children may develop health conditions that require state-supported services throughout their lives. In order to promote healthier generations of Alaskans, the legislature wishes to invest in the state's future by providing prenatal care and social services to pregnant women.

* Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 42. PURCHASE OF SERVICES FOR PREGNANT WOMEN.

Sec. 47.42.010. PURCHASE OF SERVICES FOR PREGNANT WOMEN. The Department of Health and Social Services shall pay the cost of prenatal services other and than medical services for a pregnant woman experiencing social and economic difficulties, including the costs of birthing centers, midwife services, and transportation to and from a maternity home or a foster home, counseling, adoption assistance, maternity home and foster home care, postnatal care, and parenting skills.

Sec. 47.42.020. LICENSING AND SUPERVISION. A person provid-ing services purchased by the Department of Health and Social Services under this chapter shall, if required to be licensed under AS 47.35,

be licensed and supervised in the same manner as foster homes, boarding homes, maternity homes, and other agencies and institutions under AS 47.35.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

Responsibility for the identification of funding is that of the author of the Bill.

3. Assumptions:

This Bill provides for expansion of pregnancy related health and social services and authorizes State funding of the cost of non-medical service for pregnant women experiencing social and economic difficulties during the prenatal and postpartum periods.

In 1981 there were 10,081 births to Alaskan residents. 1,642, or 16%, were births to unmarried women.

1981 Births to Unmarried Women

Age of Mother	Number of Births
13 - 19	542
20 - 24	621
25 - 29	335
30 - 34	106
35 - 39	30
40 - 45	8
	1,642

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It does not represent the policy of the Sheffield Administration or the final estimate of fiscal impact.

FISCAL NOTE Revised 1/27/83

I. REQUEST
Bill/Resolution No. HB-43
Title An Act...
Requested by House HESS Date 1/27/83

II. FISCAL DETAIL
Agency Affected Education
Program Category Affected Elementary & Secondary Education
BRU, Program, Or Subprogram(s) Affected Debt Retirement Local
(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86	FY 87	FY 88
100 PERSONAL SERVICES						
200 TRAVEL						
300 CONTRACTUAL						
400 COMMODITIES						
500 EQUIPMENT						
600 LAND & STRUCTURES						
700 GRANTS,CLAIMS,ETC.						
TOTAL		5,044.1	5,336.0	5,845.5		

FUNDING (Thousands of Dollars)

GENERAL FUND		5,044.1	5,336.0	5,845.5		
FEDERAL FUNDS						
OTHER (Specify Source)						

POSITIONS N/A

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Assumptions: Any decreases in pre-1981, bond payments will be offset by increases in cash payments and post-1981 bond payments. FY-84 appropriations for cigarette tax will be at the executive budget request level.

IN THE HOUSE BY LACHER

HOUSE BILL NO. 43

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to state aid to municipalities for school construction; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.18.100(a) is repealed and reenacted to read:

(a) During each fiscal year, the state shall allocate to a municipality that is a school district the following sums:

(1) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes, or other indebtedness incurred before July 1, 1977, to pay costs of school construction;

(2) 90% payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes, or other indebtedness incurred after June 30, 1977, and before July 1, 1978, to pay costs of school construction projects approved under AS 14.07.020(11);

(3) 90% of cash payments made after June 30, 1978, and before July 1, 1982, by the municipality during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11);

(4) subject to (h) and (i) of this section,

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes, or other indebtedness incurred after

December 31, 1981, to pay costs of school construction, additions to schools, and major rehabilitation projects exceeding $25,000 and approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982, by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects exceeding $25,000 and approved under AS 14.07.020(11).

* Sec. 2. This Act takes effect July 1, 1983.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to scholarship loans; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.43.120(f) is amended to read:

(f) Interest on a loan made [GIVEN] under AS 14.43.090 - 14.43.-160 is at the rate of eight [FIVE] percent a year.

* Sec. 2. AS 14.43.120(k)(2) is amended to read:

(2) serving a first enlistment period of up to four years on active duty as a member of the armed forces of the United States;

* Sec. 3. AS 14.43.125 is repealed and reenacted to read:

Sec. 14.43.125. ELIGIBILITY OF STUDENTS. A person may apply for and obtain a scholarship loan if the person

(1) is

(A) enrolled as a full-time student in a career education, or associate, or baccalaureate, or graduate degree program; or

(B) a graduate of a high school, or the equivalent, or scheduled for graduation from a high school within six months, with sufficient credits to be admitted to a career education program or to an accredited college or university;

(2) is not delinquent or in default on a previously awarded scholarship loan; and

(3) is a resident of the state at the time of application for the loan. For purposes of this section, a person qualifies as a

resident of the state if at the time of application for the loan the person

(A) has been physically present in the state for at least two years;

(B) is dependent on a parent or guardian for care, and the parent or guardian has been present in the state for at least two years; or

(C) has been physically present in the state for at least two years immediately before being absent from the state and the absence is due solely to

(i) military service;

(ii) volunteer service under the Peace Corps Act;

(iii) volunteer service under the Domestic Volunteer Service Act of 1973;

(iv) attending a school as a full-time student;

(v) full-time employment by the state or its congressional delegation; or

(vi) required medical care for the applicant or the applicant's immediate family.

* Sec. 4. AS 14.43.130 is repealed and reenacted to read:

Sec. 14.43.130. SELECTION CRITERIA. (a) The selection committee shall grant loans based on total point accumulations under this section with priority going to those applicants with the highest point accumulations, except as provided in (b) of this section. Points shall be awarded according to the following schedule:

(1) Alaska high school graduates and continuing undergraduate and graduate students with existing Alaska scholarship loans .....4 points

(2) continuing undergraduate and graduate students without existing Alaska scholarship loans .....3 points

(3) first year undergraduate students .....2 points

(4) new graduate students without existing Alaska scholarship loans .....1 point

(5) students attending Alaska colleges or universities .....1 point

(b) The selection committee shall award loans to applicants based upon the earliest date of completed applications if the applicant has filed a completed application not later than May 15 of the year for which the loan is requested.

* Sec. 5. AS 14.43 is amended by adding a new section to read:

Sec. 14.43.132. FEDERALLY INSURED LOANS ENCOURAGED. Whenever possible scholarship loans made under AS 14.43.090 - 14.43.160 shall be federally insured.

* Sec. 6. AS 14.43.160 is amended by adding a new paragraph to read:

(9) "committee" means the student financial aid committee of the Alaska Commission on Postsecondary Education.

* Sec. 7. If the two-year residency requirement for scholarship loans provided by AS 14.43.125 is declared unconstitutional or otherwise invalid by a court of competent jurisdiction, the Commission on Postsecondary Education shall adopt regulations to impose the most stringent residency requirement allowable under the Constitution of the State of Alaska and the United States Constitution on scholarship loan applicants.

* Sec. 8. This Act takes effect July 1, 1984.

HB 174 is in SB 209

1) Jan 1 deadline date -
2) 8%
3) forgiveness?
4) point system - selection - not in 209

Summer - on 82-83 app's

Voc Tech after July 1

1) tentative award - will be awarded @ same time

RE: House Bill #56: "An Act relating to scholarship loans."

The committee amendments, reported to me by my aide who was in attendance at the March 25th House HESS meeting, are excellent. They protect the ability of the students to get sufficient funds while going a long way towards making the loans into legitimate income-earning state investments instead of remaining just another expensive give away program.

Specifically, I agree:

Section 3 → 1. That the interest rate become 8%;
Section 1 & 2 → 2. That the loan maximums stay at the current $6000 and $7000;
Section 4 → 3. That repayment begin at 120 days;
Section 5 → 4. That 20% be forgiven if student return to the state;
Section 2 → 5. That the graduate school limit be left at $7000 with higher levels if needed to cover tuition and fees.

Section 1 → The only further addition which would seem appropriate and consistent would be to allow undergraduates to get more than the current $6000 if needed to cover their tuition, fees and room. Since undergraduates traditionally can work in the school cafeterias for their food, this would insure that every student can afford to go to school and, more importantly, let the maximum size of the loans increase enough to cover the most basic costs in the years ahead if there is another inflation. The inflation-proofing feature is important as its absence would eventually put pressure on the future legislatures to increase the top dollar amounts and, depending on who is in control, possibly increase them beyond the basic minimum costs again. This way we can both remove the need to periodically rewrite the legislation as well as insure that the loans will only be granted as needed to cover the basic minimum expenses.

3/7 Summarize Issues Outlined by the Committee
& incorporate into Memo for review & draft

SUMMARY: SSHB 56 "AN Act relating to scholarship loans."
(Lindauer)

Section 1.	14.43.110	UNDERGRADUATE LOANS repealed and reenacted. New language has the effect of raising the undergraduate loan award maximum above $6,000 under certain circumstances to be approved by the financial aid committee. Current law mandates the maximum loan award is $6,000 with no provisions for raising the limit.
Secion 2.	14.43.115	GRADUATE LOANS repealed and reenacted with provisions of section 1 included. Removes loan maximum with the approval of the financial aid committee.
Section 3.	14.43.120	CONDITIONS OF LOAN amended to include "other necessary student expenses as determined by committee." Current statutes provide for loan awards to be used only for books & supplies, tuition, required fees, room & board.
Section 4.	14.43.120	CONDITIONS OF LOAN (f) amended by raising interest rates from 5% to 7%. (see fiscal note for impact).
Section 5.	14.43.120	CONDITIONS OF LOAN (g) amended by requiring repayment of loan to begin one year after studies are terminated. Removes the [no later than] provision.
Section 6.	14.43.132	New Section added to encourage the use of the Guaranteed Student Loan program. (Federal student loan program)
Section 7.	14.43.160	New definition added to clarify the review of loan applications by the student financial aid committee, cited in 14.43.095.

Fiscal Note Information: The fiscal note is calculated in throusands, for example under 'Assumptions" (a), the FY 86 figure is $62,300.00.

The amounts calculated by the Commission on Postsecondary Education would be an additional expense to the fiscal requests for FY 84. The FY 84 funding level through the Governor's budget is 65million.

Revisor's notes. — This article derived from AS 14.40.751 — 14.40.806 and was renumbered by the revisor of statutes under AS 01.05.031.

Collateral references. — 15A Am.Jur.2d Colleges and Universities, §§ 19, 20.

14 C.J.S. Colleges and Universities, §§ 27, 28.

Absence from, or inability to attend, school or college as affecting liability for, or right to recover back payments on account of, tuition or board. 69 ALR 714.

Validity and application of provisions governing determination of residency for purposes of fixing fee differential for out-of-state students in public college. 56 ALR3d 641.

Increase in tuition as actionable in suit by student against college or university. 99 ALR3d 885.

Absence from, or inability to attend, school or college as affecting liability for, or right to recover back payments on account of, tuition or board. 69 ALR 714.

Sec. 14.43.090. Scholarship revolving loan fund. (a) There is created a scholarship revolving loan fund. The fund shall be used to make scholarship loans to students selected under AS 14.43.090 — 14.43.160. All repayments of principal and interest on scholarship loans shall be paid into the scholarship revolving fund shall be used to make new scholarship loans. If estimated funds available from scholarship loan repayments are inadequate to fully fund estimated scholarship loans for any fiscal year, additional funding from the general fund may be requested and appropriated for that year.

(b) Repealed by § 31 ch 59 SLA 1982.

(c) Repealed by § 31 ch 59 SLA 1982. (§ 1 ch 98 SLA 1971; am § 1 ch 156 SLA 1972; am §§ 1, 2 ch 136 SLA 1974; am § 1 ch 136 SLA 1975; am § 31 ch 59 SLA 1982; AS 14.40.751)

Revisor's notes. — In subsection (a), AS 14.43.090 — 14.43.160 was substituted for a reference to AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1982 amendment repealed subsection (b), which provided for a tuition grant fund, and subsection (c), which provided for the transfer of unobligated funds in the tuition grant fund to the scholarship revolving loan fund.

Legislative history reports. — For report on ch. 98, SLA 1971 (CSHB 415 [Finance] am S), see 1971 House Journal, p. 935.

Sec. 14.43.095. Financial aid committee. (a) The student financial aid committee is composed of the members of the Alaska Commission on Postsecondary Education. The commission may delegate its functions under AS 14.43.090 — 14.43.160 to a committee of its members, with augmented membership as the commission considers appropriate. The executive officer of the commission is the executive secretary of the committee. The Alaska Commission on Postsecondary Education shall administer the program established by AS 14.43.090 — 14.43.160.

(b) Members of the committee serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions.

(c) The committee shall make an annual report reviewing the work of the committee to the governor, the legislature and the private colleges and universities where students receiving tuition grants are enrolled.

(d) The committee shall meet at least once a year. The meetings shall be held at the call of the chairman or upon petition by two members. (§ 1 ch 98 SLA 1971; am § 2 ch 156 SLA 1972; am § 5 ch 78 SLA 1974; am § 3 ch 136 SLA 1974; AS 14.40.753)

Revisor's notes. — The amendments of AS 14.43.095(a) by § 5, ch. 78, SLA 1974 and § 3, ch. 136, SLA 1974, are in conflict, the first act rewriting the subsection to provide that the Alaska Commission on Postsecondary Education will act as the financial aid committee, the second act changing the name and term of members of the existing financial aid selection committee. It is considered, on the basis of the legislative history, apparent legislative intent, and later effective date of the first act, that the re-enactment by ch. 78, SLA 1974 should prevail.

The last part of subsection (c) of this section is obsolete since the tuition grant program was repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

In subsection (a), AS 14.43.090 — 14.43.160 was substituted for a reference to AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Sec. 14.43.100. Applications. (a) Applications shall be submitted to the executive secretary of the committee.

(b) A person whose loan or grant application is not recommended or presented to the committee by the executive secretary may appeal to the committee through the chairman of the committee and the committee shall consider the application. (§ 1 ch 98 SLA 1971; am § 3 ch 156 SLA 1972; am § 4 ch 136 SLA 1974; AS 14.40.755)

Revisor's notes. — The reference to "grant application" in subsection (b) of this section is obsolete in light of the repeal of the tuition grant program by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Sec. 14.43.105. Administration of program. The executive secretary shall administer the programs subject to review by the committee and in accordance with the regulations prescribed by the committee. The promulgation of these regulations is subject to the Administrative Procedure Act (AS 44.62), and a summary of the regulations shall be distributed to each applicant. (§ 1 ch 98 SLA 1971; am § 5 ch 136 SLA 1974; AS 14.40.757)

Sec. 14.43.110. Undergraduate loans. The committee may make a loan, not to exceed $6,000 in any one school year, to an undergraduate student eligible under AS 14.43.125. (§ 1 ch 98 SLA 1971; am § 6 ch 136 SLA 1974; am § 1 ch 153 SLA 1978; am § 1 ch 89 SLA 1981; AS 14.40.759)

Revisor's notes. — AS 14.43.125 was substitued for AS 14.40.765 to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1978 amendment increased the maximum amount of the loan from $2,500.00 to $3,000.00.

The 1981 amendment substituted "$6,000" for "$3,000" following "not to exceed."

Sec. 14.43.115. Graduate loans. The committee may make a loan, not to exceed $7,000 in any one school year, to a graduate student who is eligible under AS 14.43.125 and is pursuing an advanced degree. (§ 1 ch 98 SLA 1971; am § 7 ch 136 SLA 1974; am § 2 ch 89 SLA 1981; AS 14.40.761)

Revisor's notes. — AS 14.43.125 was substituted for AS 14.40.765 to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1981 amendment substituted "$7,000" for "$5,000" following "not to exceed."

Sec. 14.43.120. Conditions of loans. (a) Proceeds from scholarship loans may only be used for books, tuition and required fees, and for room and board.

(b) The loans may only be used to attend a career education program or a college or university approved by the commission, and, if the loans are federally insured, by the United States Commissioner of Education.

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing in a career education program, college or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

(d) Scholarship loans may not be made to a student

(1) for more than five years of undergraduate study;

(2) for more than five years of graduate study;

(3) for more than a total of eight years of undergraduate and graduate study.

(e) Loans are interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section; however, a student is entitled to have a portion of the interest paid in accordance with (1) of this section.

(f) Interest on a loan given under AS 14.43.090 — 14.43.160 is at the rate of five per cent a year.

(g) Repayment of the principal and interest on the loan begins no later than one year after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection.

(h) Security may not be required for the loans; however, provision shall be made for payment of attorney fees and costs of court if either or both are incurred in collection of the amount owed on the loan.

(i) If a loan is in default, the commission shall notify the borrower that repayment of the remaining balance is accelerated and due by sending the borrower a notice by registered or certified mail.

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 50 percent of the total loan:

(1) two — three years residence in the state, 10 percent;

(2) three — four years residence in the state, an additional 10 percent;

(3) four — five years residence in the state, an additional 10 percent;

(4) five — six years residence in the state, an additional 10 percent;

(5) over six years residence in the state, an additional 10 percent.

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the student is eligible for interest payment benefits under (1) of this section during any of the following:

(1) return to student status as provided in (c) of this section;

(2) serving on active duty as a member of the armed forces of the United States;

(3) serving, for up to three years, as a full-time volunteer under the Peace Corps Act;

(4) serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

(5) for a one-time period up to 12 months in which the borrower is seeking and unable to find employment in the United States; or

(6) if the borrower becomes 50 percent or more disabled as certified by competent medical authority.

(l) The state will pay the interest on that portion of a loan that is not federally insured during

(1) the period before the beginning of the repayment period of the loan; and

(2) deferments under (k) of this section.

(m) In case of hardship, the committee may extend repayment of a loan for an additional period of up to five years in increments no longer than 12 months each.

(n) Repealed by § 11 ch 89 SLA 1981.

(o) The provisions of (j) of this section do not apply to a loan to a borrower named in a complaint as a defendant in an action by the state or by the commission to secure payment of the unpaid balance of a loan made under AS 14.43.110 or 14.43.115.

(p) For purposes of this section, a person qualifies as a resident if the person is physically present in the state with the intent to remain permanently in the state or, if not physically present in the state, the person intends to return to the state and is absent due to military service. (§ 1 ch 98 SLA 1971; am § 4 ch 156 SLA 1972; am § 6 ch 78 SLA 1974; am § 8 ch 136 SLA 1974; am §§ 1—4 ch 99 SLA 1977; am §§ 3 — 8 ch 87 SLA 1979; am §§ 3 — 9, 11 ch 89 SLA 1981; AS 14.40.763)

Revisor's notes. — In ch. 98, SLA 1971, AS 14.43.120(j)(2) read "four — five years ...." This was a typographical error occurring for the first time in the enrolled version of the bill (CSHB 415 [Finance am S] and has been corrected here.

Effect of amendments. — The 1979 amendment deleted "approved by the commission" following "career education program" and substituted the language

beginning "approved by the commission" for "accredited by the accreditation association for the region in which the college or university is located" in subsection (b), substituted "interest" for "non-interest" in subsection (e), added the language beginning "however, a student shall be entitled" to the end of subsection (e), rewrote subsection (g) and in subsection (j), substituted "paid on behalf of the borrower by the state" for "considered a grant," "borrower" for "grantee," and "three years" for "two years" in the first sentence, substituted "paid by the state" for "regarded as a grant" and "interest for up to a total of 40 percent" for "accrued interest" in the introductory language of the second sentence, and substituted "an additional 10 percent" for "20 percent" in paragraph (2), for "30 percent" in paragraph (3), and for "40 percent" in paragraph (4). The amendment also rewrote subsection (k) and added subsections (*l*), (m), and (n).

The 1981 amendment, added the second sentence of subsection (c). In subsection (d), the amendment added paragraphs (1) and (2) and in paragraph (3), substituted "a total of eight" for "six" preceding "years" and added "of undergraduate and graduate study" following "years." In subsection (i), the amendment substituted "shall" for "may" and "borrower" for "student." In subsection (m), the amendment substituted "12" for "six" preceding "months" and deleted "within the 15-year requirement of (g) of this section" following "months each." The amendment also rewrote subsections (g) and (j), added subsections (o) and (p) and repealed subsection (n) which read "Each year spent attending a college or university in Alaska qualifies as a year of employment and residency under (j) of this section, if the borrower resides no less than three years in Alaska after completion of the course for which the loan was granted, and has a total Alaskan residency of ten years time."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.-5.031(c) and § 4, Chapter 58, SLA 1982.

Section 8, ch. 99, SLA 1977 provides: "The change in the repayment period of student loans set out in AS 14.40.763(g) [now 14.43.120(g)] as amended by sec. 3 of this Act and the additional basis for granting a deferment of repayment of a student loan set out in AS 14.40.763(k) [now 14.43.120(k)] as enacted by sec. 4 of this Act shall, upon request of the loan recipient, be applied retroactively to the outstanding balance of principal of and accrued interest on loans made under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] as they read before the effective date of this Act."

Section 12 of ch. 89, SLA 1981, provides: "The reenactment of AS 14.40.763(j) [now 14.43.120(j)] in sec. 7 of this Act applies to any student who has obtained a scholarship loan under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] since July 1, 1971."

Legislative history reports. — For a report of legislative intent concerning the loan forgiveness provisions of ch. 89, SLA 1981 (FCCSSB 120), see 1981 Senate Journal p. 1560, 1580; 1981 House Journal p. 2289.

Sec. 14.43.125. Eligibility of students. (a) A person may apply for and obtain a scholarship loan if the person

(1) is a resident of the state at the time of application for a scholarship loan;

(2) meets the requirements of (b) of this section; and

(3) is

(A) enrolled as a full-time student in a career education or associate or baccalaureate or graduate degree program; or

(B) a graduate of a high school, or scheduled for graduation from a high school within six months, with sufficient credits to be admitted to a career education program or to an accredited college or university.

(b) In addition to the requirements of (a) of this section, to obtain a scholarship loan a person must have been a resident of the state for at least two years at the time of application for the loan. For purposes of

this subsection, a person qualifies as a resident of the state if at the time of application for the loan the person

(1) has been present in the state for at least two years unless an absence from the state during any part of the two years was due to military service; or

(2) is a person who is dependent on a parent or guardian for care, and the parent or guardian has been present in the state for at least two years. (§ 1 ch 98 SLA 1971; am § 10 ch 89 SLA 1981; AS 14.40.765)

Effect of amendments. — The 1981 amendment rewrote this section.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.43.130. Selection criteria. (a) The selection committee shall grant loans based on total point accumulations under the subsection with priority going to those applicants with the highest point accumulations, except as provided in (b) of this section for loan applications completed before May 15 of each year. Points shall be awarded to applicants based upon student status and continuous Alaskan residency, according to the following schedule:

(1) student status:

(A) continuing undergraduate and graduate students with existing Alaska scholarship loans . . . . . 4 points

(B) continuing undergraduate and graduate students without existing Alaska scholarship loans . . . . . 3 points

(C) freshmen . . . . . 2 points

(D) new graduate students without existing Alaska scholarship loans . . . . . 1 point

(2) continuous Alaskan residency:

(A) students with continuous Alaskan residency of 10 years or more . . . . . 3 points

(B) students with continuous Alaskan residency of at least 5 years and less than 10 years . . . . . 2 points

(C) students with continuous Alaskan residency of more than 2 years and less than 5 years . . . . . 1 point

(3) students attending Alaska colleges or universities . . 1 point

(b) In awarding loans the selection committee shall award loans to applicants based upon the earliest date of completed applications if

(1) the applicant has accumulated at least 5 points under (a) of this section; and

(2) the applicant has filed a completed application not later than May 15 of the year for which the loan is requested. (§ 1 ch 98 SLA 1971; am § 2 ch 87 SLA 1979; AS 14.40.767)

Effect of amendments. — The 1979 amendment rewrote this section.

Editor's notes. — Section 1, ch. 87, SLA 1979 provides: "The legislature determines that

"(1) there are no incentives in the

student loan program for residents of Alaska to attend colleges and universities in Alaska as compared with colleges and universities outside Alaska;

"(2) the result of this lack of incentives is that 64.9 per cent of all undergraduate student loans and 92.9 percent of graduate student loans go to students attending colleges and universities outside Alaska;

"(3) the amount of the average loan to undergraduate students attending colleges and universities in Alaska is lower than the average of similar loans in all but one of the 10 western states and the amount of the average loan for graduate students is the lowest in the West;

"(4) the funds spent on education in Alaskan colleges and universities go further than when the funds are spent out of state; and

"(5) it would be an aid to the Alaskan economy if the funds in the student loan program were spent for education in Alaskan colleges and universities."

Sec. 14.43.135. Discrimination prohibited. The student loan program shall be carried out without regard to the race, creed, sex, color, ancestry, national origin, or membership in fraternal or political organizations of the student applying for the loan. (§ 1 ch 98 SLA 1971; AS 14.40.769)

Sec. 14.43.140. Enforceability of certain contracts with minors. A written obligation entered into by a minor at least 16 years of age, evidencing a loan or other assistance received by the minor from any person for the purpose of furthering the minor's education in a career education program or an institution of higher learning, is enforceable against the minor with the same effect as if the minor were, at the time of its execution, 19 years of age, if the person making the loan has before making the loan a certification from the institution that the minor is enrolled in the institution or has been accepted for enrollment. (§ 1 ch 98 SLA 1971; AS 14.40.771)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.43.160. Definitions. In AS 14.43.090 — 14.43.160

(1) "career education" means a course or program in vocational-technical training or education approved by the commission;

(2) "full-time student" means an undergraduate or career education student who is enrolled and is in regular attendance at classes for at least 12 semester hours of credit or the equivalent during the semester or a graduate student who is enrolled and is in regular attendance at classes for at least nine semester hours of credit or the equivalent; any combination of semester hours of credit, or the equivalent, aggregating to the requisite number of semester hours and undertaken during a semester at two or more public or private institutions of higher education operating under a consortium constitutes full-time student status;

(3) "part-time student" means a student who is enrolled and is in regular attendance at classes for at least three but less than the semester hours of credit required for full-time student status under (2) of this section during the semester;

(4) Repealed by § 11 ch 89 SLA 1981.

(5) "school year" means the period from September 1 of one year through August 31 of the following year;

"commission" means the Alaska Commission on Postsecondary Education;

(7) Repealed by § 7 ch 246 SLA 1976.

(8) "federally insured" means a loan covered by the provisions of the Guaranteed Student Loan Program of Title IV, Part B, of the Higher Education Act of 1965 (P.L. 89-329), as amended. (§ 5 ch 156 SLA 1972; am § 8 ch 78 SLA 1974; am §§ 18 — 20 ch 136 SLA 1974; am § 5 ch 136 SLA 1975; am § 7 ch 246 SLA 1976; am §§ 5 — 7 ch 99 SLA 1977; am § 9 ch 87 SLA 1979; am § 11 ch 89 SLA 1981; AS 14.40.806)

Revisor's notes. — Part-time student is defined in paragraph (3) above but is not used in the statutes.

AS 14.43.090 — 14.43.160 was substituted for AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1979 amendment added paragraph (8).

The 1981 amendment repealed paragraph (4) which defined "resident."

Editor's notes. — Title IV, Part B of the Higher Education Act of 1965, referred to in paragraph (8), may be found in 20 U.S.C. §§ 1071 et seq.

20 AAC 15.010 PURPOSE OF SCHOLARSHIP LOAN PROGRAM The scholarship loan program provides low cost educational loans to Alaskan students enrolled in undergraduate, graduate, or career degree programs. (Eff. 2/3/77, Reg. 61)

Authority: AS 14.40.757

20 AAC 15.015. ADMINISTRATION. The executive secretary of the student financial aid committee shall appoint, subject to approval of the committee, a director of student financial aid. The director reviews all applications for scholarship loans and determines an applicant's eligibility and amount of award, subject to review by the executive secretary and the committee. (Eff. 2/3/77, Reg. 61)

Authority: AS 14.40.757

Editor's Note: Applications for scholarship loans are available from the Alaska Commission on Postsecondary Education, Director of Student Financial Aid, Pouch F, Juneau, Alaska 99811.

20 AAC 15.020. FILING DATES. (a) The application deadline for loan applications is May 15 preceding the school year for which the loan is requested.

(b) An application will be considered timely filed only if it is postmarked on or before the applicable deadline, contains all information required to make a determination of the applicant's eligibility and the amount of the loan award, and is accompanied by four signed verification forms.

(c) An incomplete application will be returned to the applicant with a request for further information. No further action will be taken on an incomplete application until it is resubmitted.

(d) Repealed 12/7/80.

(e) Except for good cause shown, as determined by the director, an application will not be accepted from a person who has attended more than two weeks of the school term for which the loan is requested. (Eff. 2/3/77, Reg. 61; am 12/7/80, Reg. 76; am 7/9/82, Reg. 83)

Authority: AS 14.40.757

20 AAC 15.025. PRIORITY RANKING OF APPLICANTS. (a) Upon receipt of a completed application, an applicant will be assigned priority points based upon the schedule set out in AS 14.40.767(a).

(b) Those completed applications received by the deadline set out in 20 AAC 15.020 which have a priority point accumulation of at least five points, as determined under (a) of this section, will be processed based upon the earliest date of completed application.

(c) Completed applications, other than those covered by (b) of this section, will be grouped according to those received by May 15th and then monthly thereafter and will be processed in that monthly grouping according to priority point accumulation. Those applicants receiving the highest priority point accumulation within a grouping will be processed first and those receiving the lowest priority point accumulation within a grouping will be processed last. In the case of equal point accumulation within a group, priority will be based upon the earliest date of a completed application. (Eff. 2/3/77, Reg. 61; am 12/7/80, Reg. 76)

Authority: AS 14.40.757
AS 14.40.767

20 AAC 15.030. COMPUTATION OF AUTHORIZED LOAN AWARDS. (a) Repealed 7/9/82.

(b) The maximum authorized loan for an applicant enrolled for less than a full school year, as defined by the enrolling institution and as approved by the director, is determined by prorating the maximum authorized loan award based upon the actual period of attendance, unless the period of attendance encompasses the entire program of study, in which case the award will be based upon computation of financial need.

(c) Subject to the limitations of (b) of this section, an applicant's authorized loan award will be based on the director's computation of the applicant's financial need. Financial need will be computed as the diference between the required fees, tuition, room, board, books and supplies, as appl ble, charged by the institution for the course of study for which the applicant has been accepted or is enrolled in full-time status and the amount of funds available to the applicant from other sources to meet those expenses. The amount of the authorized loan award will be the next lower multiple of $50 below the computed financial need.

(d) Married students applying for separate loans may apportion those expenses listed on their applications which are for common use or commonly held property as they see fit. However, the total of commonly shared expenses listed on both applications may not exceed 100 percent of the actual expense.

(e) An applicant who elects to live off campus when room or board is available from the institution may list as an expense only the cost of the room or board available from the institution, unless it can be demonstrated that any additional expense for living off campus is reasonable and necessary.

(f) The director may require an applicant to furnish copies of financial records and other relevant information to verify statements on his application.

(g) An applicant who has been awarded a loan based on his admission to a particular institution must notify the director immediately if he elects to attend a different institution. The applicant must then resubmit a loan application based on his admission at the new institution. The applicant will not lose his priority category status, as determined under 20 AAC 15.020(a), but must give 60 days' notice of the change in institutions to insure the timely receipt of funds. (Eff. 2/3/77, Reg. 61; am 7/9/82, Reg. 83)

Authority: AS 14.40.757
AS 14.40.759
AS 14.40.761

20 AAC 15.035. LIMITATIONS ON GRANTING AUTHORIZED LOAN AWARDS. Repealed 12/7/80.

20 AAC 15.040. CONDITIONS OF LOANS. (a) The recipient of a scholarship loan shall report to the director any changes which affect the conditions of his loan or his repayment schedule, including any change of address, withdrawal or dismissal from his full-time course of study, change in schools, or state residency status, or change in financial status.

(b) Money received for scholarship loan may be used only for books and supplies, tuition, required fees, room and board.

(c) A promissory note in full amount of the loan award must be signed by the recipient, or by the recipient's parent or legal guardian if the recipient is under 16 years of age. However, liability for the loan is limited to the actual amount of the loan funds disbursed to the recipient, plus interest and collection fees as necessary.

(d) The provisions of this chapter will be incorporated by reference into each promissory note.

(e) Loans will not be granted for more than five full undergraduate school years, or more than five full graduate years, or more than a total of eight full school years of combined undergraduate and graduate study.

(f) The costs incurred in the collection of a defaulted loan, including attorney fees and court costs, shall be borne by the recipient.

(g) Interest on a loan begins to accrue on the date of intitial loan disbursement. However,

interest will be paid for a student during the period before the repayment period of the loan begins and during a period of deferment provided under 20 AAC 15.055.

(h) Interest shall be computed at the annual rate of five percent of the outstanding balance of the loan.

(i) At the time the promissory note is mailed to the recipient, the director will provide him with an anticipated repayment schedule for the total amount of the current loan and any loans received in prior consecutive years. The repayment schedule will be computed from the date the recipient anticipates the completion of his full-time course of study. The schedule will include: a 12-month optional deferment period, the number and amount of payments, including interest, over the 10 succeeding years, and the annual percentage rate of interest.

(j) For non-collegiate postsecondary programs, the commission applies the standard of good standing used by the institution of attendance. For collegiate programs the commission applies the cumulative grade point average (G.P.A.) based upon the following minimums, computed annually:

Student Level	Minimum Requirement
Undergraduate	2.00 cumulative G.P.A.
Graduate	3.00 cumulative G.P.A.

(k) In addition to the requirements established in (j) of this section, a borrower in a collegiate program must complete all course work in which he is enrolled up to the required full-time enrollment in each term of enrollment and must maintain a grade point average of at least 1.50 for each term. If a borrower fails to meet good-standing requirements the borrower is ineligible to receive further loans or loan disbursements until he or she successfully completes a term of full-time study and meets the minimum grade-point average.

(l) A borrower whose cumulative grade point average falls below the requirements established in (j) and (k) of this section may request a waiver of the requirements in writing from the director. The request for waiver must set forth good cause, as determined by the director, and the director may require documentation. In his discretion, the director shall grant or deny the request for waiver. (Eff. 2/3/77, Reg. 61; am 5/10/78, Reg. 66; am 12/7/80, Reg. 76; am 7/9/82, Reg. 83)

Authority: AS 14.40.757
AS 14.40.763
AS 14.40.771

20 AAC 15.045. DISBURSEMENT OF LOAN AWARDS. (a) The loan will be disbursed in equal or proportionate installments, with each installment issued before the school term which the recipient has indicated he will attend.

(b) A warrant for the appropriate amount of the loan disbursement and a record of disbursement and receipt form will be mailed to the recipient in care of the financial aid officer of the institution which the recipient is attending.

(c) Before delivering the warrant to the borrower, the financial aid officer shall certify, on a form to be provided by the commission, that the borrower is a full-time student in good standing at the institution.

(d) At the time the warrant is delivered to him, the recipient must certify its receipt on the record of disbursement and receipt form.

(e) The recipient is responsible for the return of the record of disbursement receipt form to the director. Failure to return a completed form will result in no futher warrants being issued to the recipient. (Eff. 2/3/77, Reg. 61; am 12/7/80, Reg. 76; am 7/9/82, Reg. 83)

Authority: AS 14.40.757

20 AAC 15.050. REPAYMENT OF LOANS. (a) The repayment period of a loan begins 12 months after the date the loan recipient ends full-time student status. The first payment becomes due on the first day of the 13th month after the date the recipient ends full-time student status.

(b) At the time the recipient first ends his full-time student status, he must contact the director and establish a repayment schedule satisfactory to the director.

(c) Payments for all loans granted to a recipient may be consolidated into single monthly payments.

(d) Subject to the deferment provisions of 20 AAC 15.055 and the hardship provisions of (e) and (f) of this section, a loan must be fully repaid within 10 years from the date first payment is due.

(e) In cases of hardship and based on such factors as the seriousness of the hardship, its anticipated duration and the expectation of increased earnings in later years, the director may, in his discretion, alter the repayment schedule by extending the period of repayment, subject to the deferment provisions of 20 AAC 15.055, to a maximum term of 11 years, or weight the regular payments to ease payment in the first years and require larger payments in later years, or both.

(f) A recipient whose repayment schedule has been modified as a result of hardship must certify annually to the director the continued existence of the conditions under which the hardship determination was made. At the time the conditions no longer exist, the recipient must notify the director and renegotiate his payment schedule, based on the loan's outstanding balance and accrued interest, over a term acceptable to the director.

(g) If a recipient chooses to make a payment in an amount larger than that required by the repayment schedule, the difference will be applied to the remaining principal of the loan unless otherwise specified by the recipient. (Eff. 2/3/77, Reg. 61; am 5/10/78, Reg. 66; am 12/7/80, Reg. 76)

Authority: AS 14.40.757
AS 14.40.763

20 AAC 15.055. DEFERMENT OF PAYMENTS. (a) Periodic installments of principal will be deferred, but interest accrues and must be paid unless the loan recipient is eligible for interest payment benefits under 20 AAC 15.040(g) during any of the following:

(1) return to full-time student status;

(2) active duty as a member of the armed forces of the United States;

(3) service for up to three years as a full-time volunteer under the Peace Corps Act;

(4) service for up to three years as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

(5) for a one-time period of up to 12 months in which the loan recipient is seeking and unable to find employment in the United States;

(6) a period of disability of the loan recipient if the loan recipient is at least 50 percent disabled as certified by competent medical authority; or

(7) an internship or residency which is required as part of the program of study if the internship or residency does not exceed 24 months.

(b) A recipient who desires a deferment of payments under this section must inform the director of his request to be considered for a deferment. Upon receipt of this notification, the director will send the recipient a form by certified mail, return receipt requested, which must be completed by the recipient describing the conditions under which he requests the deferment. A failure to return the form within 30 days of the date it is received without good cause will result in the continuation of interest accrual and required payments, if applicable.

(c) Repealed 12/7/80.

(d) A recipient who has received a payment deferment must notify the director immediately when the conditions under which the deferment was granted no longer exist. When the director receives this notification, he will redetermine the recipient's payment schedule and notify the recipient of the number and amount of the payments required to retire the loan. (Eff. 2/3/77, Reg. 61; am 5/10/78, Reg. 66; am 12/7/80, Reg. 76)

Authority: AS 14.40.757
AS 14.40.763

20 AAC 15.060. GRANTS. (a) Under AS 14.40.763(j), a borrower is eligible to have up to 50 percent of his total loans and accrued interest paid by the state if he continues his Alaskan residency after the successful completion of his course of sudy, is awarded an appropriate degree, diploma or certificate, and he remains, except for brief periods, in the state during the period for which he claims the state forgiveness.

(b) In order to qualify for state forgiveness payments under AS 14.40.763(j), a borrower must, within one year after the last day of the school year in which the borrower completed full-time sutdy or an extension of that period by deferment under AS 14.40.763(k), return to Alaska to live.

(c) Repealed 7/9/82.

(d) State forgiveness payments under AS 14.40.763(j) will be provided to the borrower in the form of annual refunds as eligibility is established and confirmed; however, no refund will exceed the amount received by the commission in actual loan payments for the 12 months before state forgiveness payment eligibility. If the eligible state forgiveness payment exceeds the amount received in loan payments for that 12-month period, a refund equalling the school loan payments during the 12-month period will be issued and the remaining state forgiveness payment balance will be applied to the outstanding loan balance.

(e) In order to receive a grant, the recipient must notify the director of his eligibility and complete a form available from the director certifying that the recipient has satisfied the appropriate residency and employment requirements.

(f) A recipient who ceases to be a resident of Alaska during the period he is eligible for a grant loses his eligibility for any further grants under this section.

(g) A recipient whose loan is completely repaid before becoming entitled to the maximum grant available to him may notify the director of his eligibility for a grant in the manner provided in (e) of this section each time he qualifies for a recomputation of his grant. Upon verification of the recipient's eligibility, the director will issue a warrant payable to the recipient in the amount to which he is entitled. (Eff. 2/3/77, Reg. 61; am 12/7/80, Reg. 76; am 7/9/82, Reg. 83)

Authority: AS 14.40.757
AS 14.40.763

20 AAC 15.065. DEFAULT. (a) A recipient's loan will be considered in default if he fails to make three consecutive monthly payments or two consecutive quarterly payments, fails to comply with the reporting requirements of 20 AAC 15.040(a), or is determined by the director to have falsified any document required by this chapter.

(b) When a loan is found to be in default by the director, the recipient will be notified of that fact by certified mail, return receipt requested. The recipient has 30 days from the receipt of the notification to cure the default or otherwise respond in writing to the director's finding. Failure to cure the default or otherwise respond to the default notification within this time period will result in the director forwarding the recipient's file to the executive secretary for appropriate action. (Eff. 2/3/77, Reg. 61)

Authority: AS 14.40.757
AS 14.40.763(i)

20 AAC 15.070. APPEALS TO THE EXECUTIVE SECRETARY. (a) A decision or other determination of the director under this chapter may be appealed in writing to the executive secretary of the committee, Alaska Commission on Postsecondary Education, Pouch F, Juneau, 99811. The appeal must be postmarked within 30 days of the date the decision or determination being appealed was mailed, must clearly state the objections to that decision or determination, and must set out justification for any alternative action sought.

(b) The executive secretary shall acknowledge receipt of an appeal by certified mail, return receipt requested, within 30 days. The executive secretary shall render his decision, in writing, as expeditiously as possible after receipt of the appeal and send it to the appellant by certified mail, return receipt requested.

(c) At the appellant's request, the executive secretary shall afford the appellant or his designated representative the opportunity to present his appeal in person. (Eff. 2/3/77, Reg. 61).

Authority: AS 14.40.757

20 AAC 15.075. APPEALS TO THE COMMITTEE. (a) A decision of the executive secretary may be appealed to the chairman of the committee. The appeal must be made within 30 days of the receipt of the executive secretary's decision, must clearly state the objections to that decision, and must set out justification for any alternative action sought.

(b) The chairman of the committee will place an appeal on the agenda for the committee's next meeting and notify the appellant of the time and location of the meeting and that he or his designated representative may present his appeal in person to the committee at that time.

COMPARISON OF PROPOSED STUDENT LOAN LEGISLATION

	CSHB 56 HESS	SB 197 Josephson	SB 185 Fischer	SB 118 Sackett	SB 209 Governor	SB 210 Governor
Residency:	2 years	selection criteria pt.system residency	2 years	1 year	1 year	Sets up guaranteed student loan financing in line with AK Industrial Develop. Authority; addresses financing structure rather than requirements and specifics of SB 209. Implementation of guaranteed student loan program thru Higher Education Act of 1965 PL 89 - 329 to federally insure loans for bonding purposes.

IN THE HOUSE

BY THE HEALTH, EDUCATION, AND SOCIAL SERVICES COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 56 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to scholarship loans."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.43.110 is repealed and reenacted to read:

Sec. 14.43.110. UNDERGRADUATE LOANS. The committee may make a loan for a school year to an undergraduate student eligible under AS 14.43.125. A loan under this section may not exceed $6,000 except when necessary to cover the actual cost of tuition, room and board and required fees.

* Sec. 2. AS 14.43.115 is repealed and reenacted to read:

Sec. 14.43.115. GRADUATE LOANS. The committee may make a loan for a school year to a graduate student eligible under AS 14.43.125. A loan under this section may not exceed $7,000 except when necessary to cover the actual cost of tuition, room and board and required fees.

* Sec. 3. AS 14.43.120(f) is amended to read:

(f) Interest on a loan <u>made</u> [GIVEN] under AS 14.43.090 - 14.43.-160 is at the rate of <u>eight</u> [FIVE] percent a year.

* Sec. 4. AS 14.43.120(g) is amended to read:

(g) Repayment of the principal and interest on the loan begins no later than <u>120 days</u> [ONE YEAR] after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than

required by this subsection.

* Sec. 5. AS 14.43.120(j) is amended to read:

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 20 [50] percent of the total loan:

(1) two - three years residence in the state, 10 percent;

(2) over three [- FOUR] years residence in the state, an additional 10 percent [;

(3) FOUR - FIVE YEARS RESIDENCE IN THE STATE, AN ADDITIONAL 10 PERCENT;

(4) FIVE - SIX YEARS RESIDENCE IN THE STATE, AN ADDITIONAL 10 PERCENT;

(5) OVER SIX YEARS RESIDENCE IN THE STATE, AN ADDITIONAL 10 PERCENT].

* Sec. 6. AS 14.43 is amended by adding a new section to read:

Sec. 14.43.132. FEDERALLY INSURED LOANS ENCOURAGED. Whenever possible scholarship loans made under AS 14.43.090 - 14.43.160 shall be federally insured.

* Sec. 7. AS 14.43.160 is amended by adding a new paragraph to read:

(9) "committee" means the student financial aid committee of the Alaska Commission on Postsecondary Education.

RE: House Bill #56: "An Act relating to scholarship loans."

The committee amendments, reported to me by my aide who was in attendance at the March 25th House HESS meeting, are excellent. They protect the ability of the students to get sufficient funds while going a long way towards making the loans into legitimate income-earning state investments instead of remaining just another expensive give away program.

Specifically, I agree:

Section 3 → 1. That the interest rate become 8%;
Section 1 & 2 → 2. That the loan maximums stay at the current $6000 and $7000;
Section 4 → 3. That repayment begin at 120 days;
Section 5 → 4. That 20% be forgiven if student return to the state;
Section 2 → 5. That the graduate school limit be left at $7000 with higher levels if needed to cover tuition and fees.

Section 1 → The only further addition which would seem appropriate and consistent would be to allow undergraduates to get more than the current $6000 if needed to cover their tuition, fees and room. Since undergraduates traditionally can work in the school cafeterias for their food, this would insure that every student can afford to go to school and, more importantly, let the maximum size of the loans increase enough to cover the most basic costs in the years ahead if there is another inflation. The inflation-proofing feature is important as its absence would eventually put pressure on the future legislatures to increase the top dollar amounts and, depending on who is in control, possibly increase them beyond the basic minimum costs again. This way we can both remove the need to periodically rewrite the legislation as well as insure that the loans will only be granted as needed to cover the basic minimum expenses.

Loan Repayments

The student loan program is based upon a revolving fund with the students' loan repayments being re-utilized for future student loans. Since 1971-72 (actually 1974-75, since there were no repayments received the first few years), Alaskans have repaid over $11 million on their educational loans. The volume of these revolving funds now contribute a significant portion of the loan account, and as can be seen in Figure 6, these repayments are rapidly increasing each year.

Also presented in Figure 6 is a representation of the partial cancellation (forgiveness) history of the student loan program. Students who reside in Alaska after completion of their course of study are eligible to have up to 50 percent of their loans cancelled. Beginning with the first such partial cancellation in 1974-75, the total amount of loan funds (including interest) which the State of Alaska has cancelled has generally shown large annual increases, with the exception of 1979-80 when partial cancellations temporarily leveled. Increases are projected to continue over the next few years as larger numbers of students complete their educational programs.

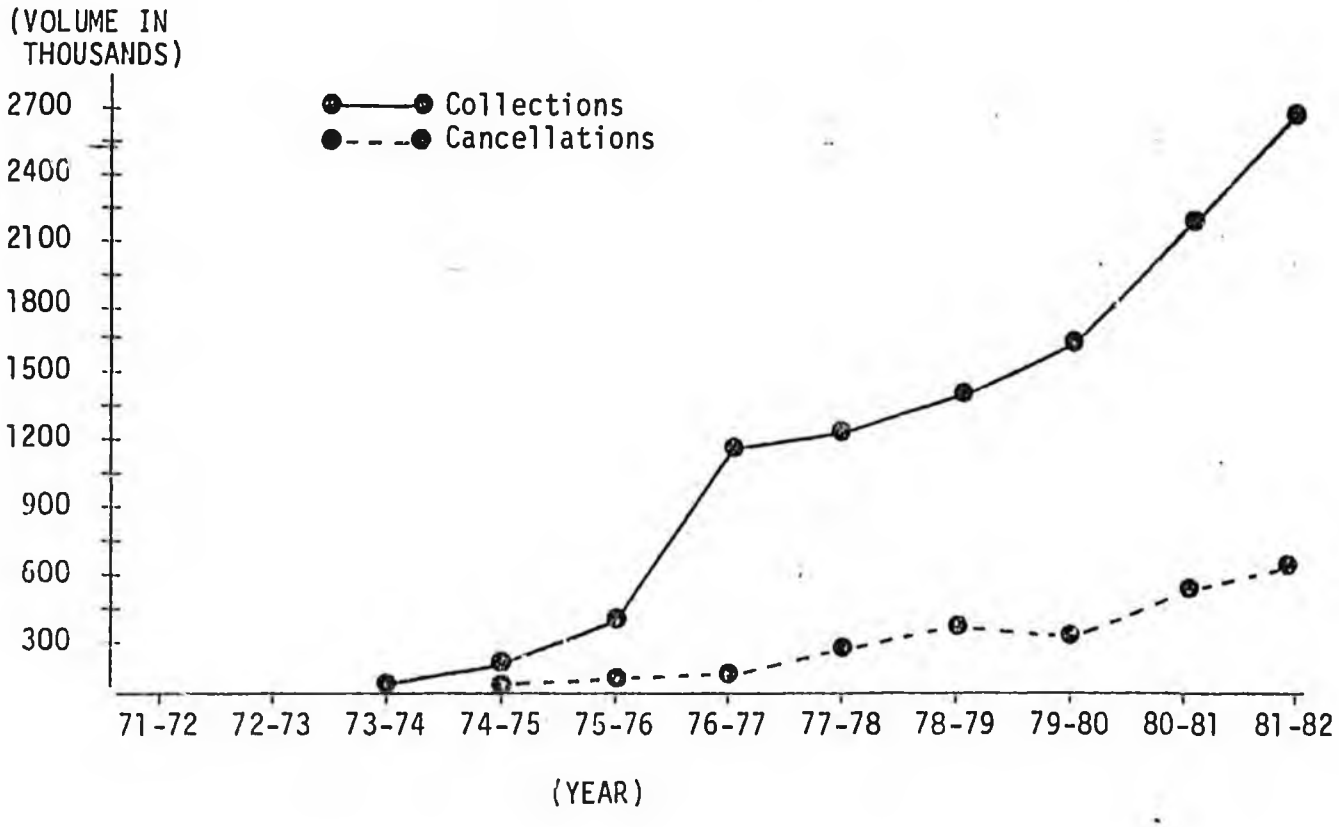

FIGURE 6
STUDENT LOAN COLLECTIONS
AND CANCELLATIONS

Default

Nationally, student loans have a notoriously high default rate, and, unfortunately, Alaska's program also has experienced problems with loan collections. Although the Alaska program is now doing considerably better than the federal loan programs, the default rate still remains at an unacceptable level. As can be seen in Table 4, the default rate has been steadily decreasing since the concerted effort began in 1975-76 to pursue these bad debts. During the 1981-82 loan year, the State of Alaska filed court action against 93 persons involving student loan default. To date, all judgments have been in the favor of the State.

TABLE 4
ANNUAL DEFAULT RATES OF
ALASKA STATE STUDENT LOANS
1971-72 through 1981-82

LOAN YEAR	DEFAULT RATE* (June 30)
1971-72	N.A.

1973-74	N.A.
1974-75	80.0%
1975-76	44.6%
1976-77	24.9%
1977-78	22.3%
1978-79	19.3%
1979-80	14.5%
1980-81	11.5%
1981-82	9.2%

*Default is 120+ days past due.

Statistical Data

In Appendix A are Tables 9-13 containing data on the Alaska Student Loan Program from 1971-72 through 1981-82. Information on the number and amounts of loans made annually to undergraduate and graduate students attending in-state and out-of-state is presented in Tables 9-12. Table 13 contains summaries of the average size loan awarded each year.

IN THE HOUSE

BY THE HEALTH, EDUCATION, AND SOCIAL SERVICES COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 56 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to scholarship loans."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.43.115 is repealed and reenacted to read:

Sec. 14.43.115. GRADUATE LOANS. The committee may make a loan for a school year to a graduate student eligible under AS 14.43.125. A loan under this section may not exceed $7,000 except when necessary to cover the actual cost of tuition and required fees.

* Sec. 2. AS 14.43.120(a) is amended to read:

(a) Proceeds from scholarship loans may only be used for books, tuition and required fees, ~~[AND FOR]~~ room and board, and other necessary student expenses as determined by the committee.

* Sec. 3. AS 14.43.120(f) is amended to read:

(f) Interest on a loan made [GIVEN] under AS 14.43.090 - 14.43.-160 is at the rate of eight [FIVE] percent a year.

* Sec. 4. AS 14.43.120(g) is amended to read:

(g) Repayment of the principal and interest on the loan begins [NO LATER THAN] one year after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection.

* Sec. 5. AS 14.43.120(j) is amended to read:

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 30 [50] percent of the total loan:

(1) two - three years residence in the state, 10 percent;

(2) three - four years residence in the state, an additional 10 percent,

(3) over four [- FIVE] years residence in the state, an additional 10 percent [;

(4) FIVE - SIX YEARS RESIDENCE IN THE STATE, AN ADDITIONAL 10 PERCENT;

(5) OVER SIX YEARS RESIDENCE IN THE STATE, AN ADDITIONAL 10 PERCENT].

* Sec. 6. AS 14.43 is amended by adding a new section to read:

Sec. 14.43.132. FEDERALLY INSURED LOANS ENCOURAGED. Whenever possible scholarship loans made under AS 14.43.090 - 14.43.160 shall be federally insured.

* Sec. 7. AS 14.43.160 is amended by adding a new paragraph to read:

(9) "committee" means the student financial aid committee of the Alaska Commission on Postsecondary Education.

20 AAC 15.080. COMPLAINT FILE. (a) A written complaint regarding the administration of the scholarship loan program must be answered within 30 days of its receipt.

(b) The director shall maintain a separate complaint file.

(c) At the committee's first meeting of the calendar year the director shall provide the committee with a synopsis of all written complaints received during the prior 12 months and a description of the action taken on each complaint. (Eff. 2/3/77, Reg. 61)

Authority: AS 14.40.757

20 AAC 15.085. DEFINITIONS. In this chapter and AS 14.40.751 – 14.40.771, unless the context requires otherwise

(1) "accredited school" means an institution which

(A) is accredited by a national accreditation association, or the regional accreditation association for the area in which the school is located; or

(B) offers a career education degree approved by the commission;

(2) "career education degree program" means a full-time course of study in a recognized occupation leading to a degree, diploma or comparable certificate of completion;

(3) "commission" means the Alaska Commission on Postsecondary Education;

(4) "committee" means the student financial aid committee of the commission;

(5) "director" means the director of student financial aid;

(6) repealed 7/9/82;

(7) repealed 7/9/82;

(8) "full-time course of study" means

(A) a course of study which consists of the completion of a minimum of 24 semester or 36 quarter hours within one school year by an undergraduate student or, when enrollment commences after the first term, the completion of that portion of the hourly requirements which equals the portion remaining of the school year;

(B) a course of study which consists of the completion of a minimum of 18 semester or 27 quarter hours within one school year by a graduate student or, when enrollment commences after the first term, the completion of that portion of the hourly requirements which equals the portion remaining of the school year;

(C) a course of study by a career education student which

(i) consists of the completion of a minimum of 1,080 clock hours, as clock hours is defined in subparagraph (9)(c) of this section, within one school year;

(ii) consists of the completion of that portion of the hourly requirements of (i) of this subparagraph which equals the portion remaining of the school year when enrollment commences after the first term of the school year; or

(iii) consists of the completion of that portion of the hourly requirements of (i) of this subparagraph which equals the portion of the school year represented by the length of the career education program when the career education program does not last for the entire school year.

(9) "full-time student" means

(A) an undergraduate student, not on academic or other probation, who is enrolled in any combination of courses, work experience, research, or special studies which the school requires of the student to consider him as being engaged in full-time study and which amount to the equivalent of 12 semester or 12 quarter hour systems;

(B) a graduate student, not on academic or other probation, who is enrolled in any combination of courses, work experience, research, or special studies which the school requires of the student to consider him as being engaged in full-time study and which amount to the equivalent of nine semester or nine quarter hours per academic term for institutions utilizing trimester, semester, or quarter hour system; or

(C) a student enrolled in a career education program for at least 30 clock hours per week, a clock hour being a period of time which is equivalent of

(i) a 50- to 60- minute class, lecture, or recitation;

(ii) two hours of laboratory, shop training or internship requiring outside preparation;

(iii) two hours of outside preparation related to the activities specified in (i) and (ii) of this subparagraph; or

(iv) three hours of laboratory, shop training, or internship not requiring outside preparation;

(10) "graduate degree program" means an educational program for which a master's degree, doctorate, or other degree requiring study beyond that necessary for a bachelor's degree is awarded;

(11) "hardship" means being unable to meet the obligation to repay a scholarship loan over the term or in the amount determined by the director;

(12) "prospective graduate" means a high school student who will graduate within six months of the submission date of his application for a scholarship loan;

(13) repealed 7/9/82;

(14) "total loan" means the total amount of all loans received by a recipient;

(15) "undergraduate degree program" means

(A) an educational program for which a bachelor's degree is awarded; or

(B) an educational program for which an associate degree, or comparable certificate is awarded, and which is acceptable, upon transfer, for full credit towards a bachelor's degree;

(16) "good cause shown" means duress, major medical disability, death in the immediate family, or administrative error. (Eff. 2/3/77, Reg. 61; am 12/7/80, Reg. 76; am 7/9/82, Reg. 83)

MEMORANDUM

TO: House HESS Committee DATE: March 21, 1983

FROM: Linda Otey, HESS Staff

RE: Student Loans/HB 56/For Your Review

At the 3/7/83 HESS meeting regarding SSHB 56, staff was directed to summarize the issues under debate regarding the student loan program. A list of those issues follows:

1. Amount of loan awards - line 16, page 1, subsection (4) removes the lid on loan awards.

   a. Previous testimony pointed out that this change, cited in sections 1,2 & 3, would increase the cost of the program to approximately 73 million dollars in the first year.

2. Interest rate - current law sets the rate at 5% - SSHB 56 proposes an increase to 7%.

   a. The Postsecondary Commission recommends raising the rate to 9% (see attached comparisons).

   b. Rep. Lacher's recommendation sets the rate at 8%.

   c. The Federal Student Loan Program is presently set at 9% and will probably drop to 8% this year. In this event, the State may not retain higher rates than the federal program if it wishes to comply with federal requirements for participation in the GSLA.

   d. Floating rates were also recommended. Apparently, this was previously avoided because of the administrative difficulties it would involve.

   e. Another suggestion was to retain current interest rates while elimating forgiveness. Figures reflecting this type of change were requested from the Postseconcary Commission.

3. Forgiveness - current law sets the forgiveness rate at 50%, a 10% increase from the 40% level in 1981 - SSHB 56 retains current 50% forgiveness statutes without changes.

   a. One recommendation would set forgiveness at 30% which would total a 1986 savings of $143,000 increasing to 1 million in 1989.

   b. The Postsecondary Commission recommends deleting the forgiveness clause (see attachment based on 9% interest and no forgiveness).

4. Residency - residency requirement is 2 years under current law - SSHB 56 does not address this issue.

   a. Deborah Vogt, Assistant Attorney General, testified in regards to decreasing the requirement to 1 year. The Attorney General's Office believes that the 2-year statute is defensible and recommends retaining this requirement. A case contesting the 2-year residency requirement is currently before the court but is not scheduled for oral arguement.

   b. Consider the possible ramifications if the 2-year residency requirement is not upheld in court.

   c. Dr. Romesburg encourages leaving the current statutes unchanged because the change to 1 year would financially burden the program. Fiscal note estimate forthcoming.

5. Eligibility - current statute requirement for eligibility is 14.43.120 Conditions of Loan - "full-time" student is defined by regulation AAC 15.085 Definitions and requires 12 credit hours - SSHB 56 does not address this issue.

   a. An amendment was offered by the Alaska Statewide Student Assoc. to include part-time students in good standing in more than one institution for a total number of credits equivalent to a full-time student 14.43.120(c) amendment (see attachment).

   b. The "needs basis" for eligibility is suggested in Section 6 of SSHB 56. In order to comply with the GSLA and receive federal insurance, the State must comply with the federal needs test which is currently at a level far below the average Alaskan income. Because the federal needs test is based on a "Lower 48" average, Alaska has been unable to comply with or meet the federal standards. Consequently, it appears unnecessary to retain Section 6 in SSHB 56.

   c. Another factor in the Alaska Student Loan Program which does not comply with the federal program is the State requirement for "full-time" status. The federal program requires half-time status. However, this regulatory change on the part of the State has financially benefited the program by approximately 10 million dollars since its inclusion into the structure of the loan program.

6. Regulatory changes - not addressed in SSHB 56.

   a. It was suggested that the Postsecondary Commission submit recommendations concerning regulation changes instead of statutory changes to tighten the program and reduce costs.

   b. The deadline for filing applications for the preceeding school year is currently May 15. It was suggested that moving this date to January would give the legislature a more accurate account of necessary funds to accomodate applicants in the budget process.

Revised 3/1/83

Alaska Statewide Student Association
P.O. BOX 548
DOUGLAS, ALASKA 99824
REPRESENTING STUDENTS OF THE UNIVERSITY OF ALASKA STATEWIDE SYSTEM

ASSA requests that the following section be added to SPONSOR SUBSTITUTE FOR HOUSE BILL 56:

AS 14.43.120(c) is amended to read:

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing or as a part-time student in good standing in more than one institution for a total number of credits equivalent to a full-time student in a career education program, college, or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

At present, students enrolled at both UAF and TVCC, UAA and ACC, or Sitka CC and Sheldon Jackson may not receive scholarship loans unless they have a total of twelve credit hours at one or the other institution. This amendment would allow these perfectly legitimate, full-time students to be eligible for the loans.

Thank you.

Co-Chairman, House HESS

FROM: Kerry D. Romesburg, Executive Director
Alaska Commission on Postsecondary Education

DATE: March 10, 1983

At the recent HESS Committee hearing on HB 56, you requested information on administration costs of student loans. Listed below are the actual costs for FY82 and the budgeted costs for FY83.

	FY82-Actual	FY83 Budgeted
100	$ 835,400	$1,467,900
200	11,800	7,800
300	438,500	667,200
400	17,100	19,800
500	80,800	153,000
TOTAL	$1,383,600	$2,315,700

In FY82 we made 9,898 finalized loans, and in FY83 we estimate 12,500. At mid-year FY82 we had 8,718 loan accounts in repayment, and at mid-year FY83, we had 14,128 accounts in repayment. Therefore, in FY82 we handled (either in awards or repayment and collections) 18,616 loan accounts, and in FY83, we handled 26,628 loan accounts. Dividing this into the administrative expense, one finds a straight administrative cost in FY82 of $74.32 per loan account handled, and $86.96 per loan account handled in FY83.

Pro-rating our administrative expenses between loan awards and loan collections, we can get a better estimate of costs to make loans and costs to collect loans. This break-out includes a lot of estimates and assumptions, but at least it can serve as a guide.

	Awards-82	Repayment-82	Awards-83	Repayment-83
100	$389,389	$446,011	$ 667,842	$ 800,058
200	5,497	6,303	3,548	4,252
300	244,170	194,330	303,552	363,648
400	7,971	9,129	9,008	10,792
500	37,662	43,138	69,609	83,391
TOTAL	$684,689	$698,911	$1,053,559	$1,262,141

05-[illegible]4LH

Again, simply dividing by the number of accounts handled, one gets an administrative cost in FY82 of $69.17 per loan award finalized and $80.17 per loan account in repayment, and $84.28 per loan award finalized and $89.34 per loan account in repayment in FY83.

A third way of looking at administrative cost is to compare it as a percentage of loan volume. Using this approach, in FY82 we find that award administration cost 1.69% of loan award volume, and repayment administration cost 15.31% of loan funds collected and/or forgiven. In FY83, award administration costs 1.87% of loan award volume, and repayment administration cost 17.60% of loan funds collected and/or forgiven. (It should be noted that these percentages already have default totals factored out.)

I am not certain that this is exactly what you were asking for in terms of administrative costs per loan. If not, please let me know and I will re-work the figures.

cc: Representative Terry Martin
Representative Rick Uehling
Representative Walt Furnace

HOUSE HESS
COMMITTEE MEETING
AGENDA

DATE: March 7, 1983

TIME: 1:00 p.m.

I. Call Meeting to Order

A. Note Committee Members Present

B. Welcome Those Observing

C. Remind those wishing to testify to sign up, and those giving testimony to speak up and state their names.

II. Announce Legislation Under Consideration:

SSHB 56 An act relating to scholarship loans.

Dr. Romesberg is scheduled to speak in the first part of the meeting, and a work session is planned for the rest of the afternoon.

Other notes or reminders:

Wednesday, March 9

HB 125 An act relating to emergency closure days in response to a threat to the health or safety of students.

HB 196 An act relating to provision of adequate housing for public school teachers in rural areas.

Terry - Appeal Forgiveness
9% up interest to 9%
Mark 2yr residency

Kerry Romesburg: 9%
fed. - ~~State~~ Job related

Debra Voigt -

Robert Jensen - Jen Moss RSVP

Fritz - Period after 6 + 7 on 8 Line 12 & 21

Kopperson - Death Clause insurance
Change Regs. instead of laws
Closed loan applies. Dec or Jan.
Tighten down Postsec Commun — & local inquiry

Mike Miller - Forgiveness

Bell - Raise 90 interest, Rep for question
Retain 90 .. + remove forgive
Send $ only to Schools.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

ALASKA COMMISSION ON POSTSECONDARY EDUCATION

POUCH FP
JUNEAU, ALASKA 99811
PHONE: (907) 465-2854

STATEMENT ON ALASKA STUDENT LOANS

The State of Alaska can make no better commitment of resources than investing in the education of its citizens. Direct support of Alaska's public elementary, secondary, and postsecondary school systems is vital to the state's continued growth and development. It is in the best interest of the state to provide access to these educational resources for the citizens of Alaska.

The best method of assuring access and opportunity is through the direct provision of educational services, but this is not always practical or possible, particularly at the postsecondary level. Therefore, the most effective and efficient method of attaining these goals of access and opportunity is through a system of low interest loans which allow the students to choose the educational setting most appropriate for their particular needs.

The Commission endorses and recommends the continuation and full-funding of the Alaska State Student Loan Program. Amendments which restrict access by denying loans to groups of Alaskans, either by design or by default, are vigorously opposed. However, the fiscal climate of the state, as well as increasing costs because of increased demand require that some modifications be made in the present program. Therefore, the Commission recommends:

1. interest rates be increased to 9%, and
2. forgiveness provisions be eliminated.

Additionally, the Commission will, by regulation, eliminate the practice of providing refunds for forgiveness benefits and will revert to the method of crediting the account.

M E M O R A N D U M February 24, 1983

TO: Representative Mae Tischer

FROM: Representative Barbara Lacher

SUBJECT: Student Loan Program

HESS Staff

I am writing you in support of the following proposed changes in the student loan program:

1. Retaining existing loan maximums ($6000 undergraduate, $7000 graduate).

2. Retaining the existing good standing requirements.

3. Changing forgiveness from 50% to 30%.

4. Raising interest rates from 5% to 8%.

5. Maintain the existing loan period.

6. Reduce residency requirement from 2 years to 1 year.

Sincerely,

Barbara Lacher

TO: Representative Mae Tischer

FROM: Representative John Lindauer JL/ba

RE: House Bill #56: "An Act relating to scholarship loans."

The committee amendments, reported to me by my aide who was in attendance at the March 25th House HESS meeting, are excellent. They protect the ability of the students to get sufficient funds while going a long way towards making the loans into legitimate income-earning state investments instead of remaining just another expensive give away program.

Specifically, I agree:

Sec 3 — 1. That the interest rate become 8%;
Sec 1 & 2 — 2. That the loan maximums stay at the current $6000 and $7000;
Sec 4 — 3. That repayment begin at 120 days;
Sec 5 — 4. That 20% be forgiven if student return to the state;
Sect 2 — 5. That the graduate school limit be left at $7000 with higher levels if needed to cover tuition and fees.

The only further addition which would seem appropriate and consistent would be to allow undergraduates to get more than the current $6000 if needed to cover their tuition, fees and room. Since undergraduates traditionally can work in the school cafeterias for their food, this would insure that every student can afford to go to school and, more importantly, let the maximum size of the loans increase enough to cover the most basic costs in the years ahead if there is another inflation. The inflation-proofing feature is important as its absence would eventually put pressure on the future legislatures to increase the top dollar amounts and, depending on who is in control, possibly increase them beyond the basic minimum costs again. This way we can both remove the need to periodically rewrite the legislation as well as insure that the loans will only be granted as needed to cover the basic minimum expenses.

Social Services, House Special
Committee on State Loans and Finance

IN THE HOUSE BY LINDAUER

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 56

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to scholarship loans."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.43.110 is repealed and reenacted to read:

Sec. 14.43.110. UNDERGRADUATE LOANS. The committee may make a loan for a school year to an undergraduate student eligible under AS 14.43.125. A loan made under this section may not exceed $6,000, except when necessary to cover the actual cost of

(1) books;

(2) tuition and required fees;

(3) room and board; and

(4) other necessary student expenses as determined by the committee.

* Sec. 2. AS 14.43.115 is repealed and reenacted to read:

Sec. 14.43.115. GRADUATE LOANS. The committee may make a loan for a school year to a graduate student eligible under AS 14.43.125. A loan under this section may not exceed $7,000, except when necessary to cover the actual cost of

(1) books;

(2) tuition and required fees;

(3) room and board; and

(4) other necessary student expenses as determined by the committee.

* Sec. 3. AS 14.43.120(a) is amended to read:

(a) Proceeds from scholarship loans may only be used for books,

tuition and required fees, [AND FOR] room and board, and other necessary student expenses as determined by the committee.

* Sec. 4. AS 14.43.120(f) is amended to read:

(f) Interest on a loan given under AS 14.43.090 - 14.43.160 is at the rate of seven ~~[FIVE]~~ percent a year.

* Sec. 5. AS 14.43.120(g) is amended to read:

(g) Repayment of the principal and interest on the loan begins [NO LATER THAN] one year after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection.

* Sec. 6. AS 14.43 is amended by adding a new section to read:

Sec. 14.43.132. FEDERALLY INSURED LOANS ENCOURAGED. Whenever possible scholarship loans made under AS 14.43.090 - 14.43.160 shall be federally insured.

* Sec. 7. AS 14.43.160 is amended by adding a new paragraph to read:

(9) "committee" means the student financial aid committee of the Alaska Commission on Postsecondary Education.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: SSHB 56 Date on Bill: 2/25/83
Title: An Act relating to scholarship loans
Sponsor: Lindauer
Requestor: House HESS

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86	FY 87	FY 88
Capital				34,195.3	40,656.2	43,845.6	46,943.7	49,273.5
Operating								
Total			N.A.					

b. Revenues:

Revenue			N.A.	0	0	62.3	248.3	1,041.8

2. Source of funds to offset fiscal impact of bill:

3. Assumptions:

a. Raising interest to 7%:

FY 84	$ 0	FY 87	$ 248.3
FY 85	0	FY 88	$1,041.8
FY 86	$62.3	FY 89	$2,140.1

b. Removing loan maximum:

FY 84	$34,195	FY 87	$46,943
FY 85	$40,656	FY 88	$49,273
FY 86	$43,845	FY 89	$51,949

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

Loan Repayments

The student loan program is based upon a revolving fund with the students' loan repayments being re-utilized for future student loans. Since 1971-72 (actually 1974-75, since there were no repayments received the first few years), Alaskans have repaid over $11 million on their educational loans. The volume of these revolving funds now contribute a significant portion of the loan account, and as can be seen in Figure 6, these repayments are rapidly increasing each year.

Also presented in Figure 6 is a representation of the partial cancellation (forgiveness) history of the student loan program. Students who reside in Alaska after completion of their course of study are eligible to have up to 50 percent of their loans cancelled. Beginning with the first such partial cancellation in 1974-75, the total amount of loan funds (including interest) which the State of Alaska has cancelled has generally shown large annual increases, with the exception of 1979-80 when partial cancellations temporarily leveled. Increases are projected to continue over the next few years as larger numbers of students complete their educational programs.

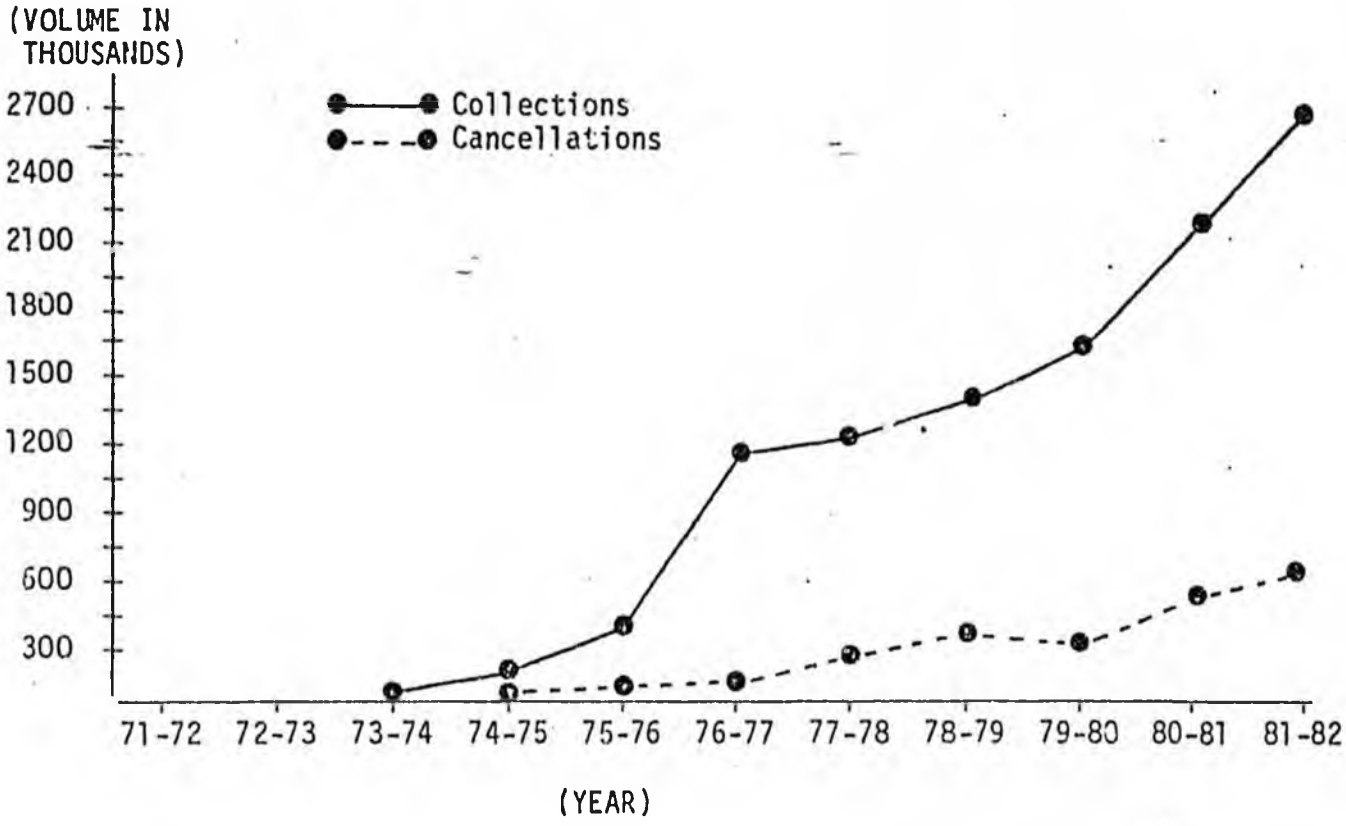

FIGURE 6
STUDENT LOAN COLLECTIONS
AND CANCELLATIONS

Default

Nationally, student loans have a notoriously high default rate, and, unfortunately, Alaska's program also has experienced problems with loan collections. Although the Alaska program is now doing considerably better than the federal loan programs, the default rate still remains at an unacceptable level. As can be seen in Table 4, the default rate has been steadily decreasing since the concerted effort began in 1975-76 to pursue these bad debts. During the 1981-82 loan year, the State of Alaska filed court action against 93 persons involving student loan default. To date, all judgments have been in the favor of the State.

TABLE 4
ANNUAL DEFAULT RATES OF
ALASKA STATE STUDENT LOANS
1971-72 through 1981-82

LOAN YEAR	DEFAULT RATE* (June 30)

1975-76	44.6%
1976-77	24.9%
1977-78	22.3%
1978-79	19.3%
1979-80	14.5%
1980-81	11.5%
1981-82	9.2%

*Default is 120+ days past due.

Statistical Data

In Appendix A are Tables 9-13 containing data on the Alaska Student Loan Program from 1971-72 through 1981-82. Information on the number and amounts of loans made annually to undergraduate and graduate students attending in-state and out-of-state is presented in Tables 9-12. Table 13 contains summaries of the average size loan awarded each year.

CHAIRMAN

H 60

Mr Speaker,

I want to express my concern with increasing the funding proposal which passed out of my Committee with unanimous approval. The investigations the HESS committee accomplished ~~a board~~ ~~the~~ substantiated the claims for funding of School Districts, that there had been unanticipated enrollment increases, that the BIA schools which were absorbed by existing districts did impact those districts, that there was need to correct a $2 million deficiency to the School Foundation. The committee addressed these unanticipated expenditures and funded accordingly.

It should be noted here, Mr Speaker that other claims for funds

in the budget process. Highly paid
+ skilled lobbyist, offensive, administrative travel,
funded positions which are intentionally
left unfilled, are only a few of
the problems we found Mr Speaker.

Mr Speaker in a recent article
in the Anchorage Times, Common Sense
of Alaska, a watch dog organization
which monitors fiscal policies in
Alaska, reported on 12 of our largest
cities + boroughs about municipal
spending + debt, population statistics,
+ school budgets. Common Sense
member Millet Keller said in that article.
I + I
quote "School Boards can hire
lobbyists, paid out of budget moneys,
but lobbyist don't have printing Presses."

were specifically not recognized as appropriate requests, such as implementing new programs, + school district reorganizing + administrative changes designed primarily to enhance the school districts revenue picture for budgetary purposes for Fy 84

Mr Speaker, the trusting public expects from the Legislature, and rightfully so, fiscal responsibility. They expect decent roads, safe neighborhoods, and the best education for themselves + their children.

Little does the trusting public know that there are vultures at the educational trough, as we discovered. And Mr Speaker that money for the classroom is not all that is included

I submit to you that this body Mr Speaker also does not have printing presses to crank out money either.

Mr. Speaker the die will be cast today with this major bill as we deliberate. The spending habits of the past must come to a halt. I support Education. but

Mr Speaker this State can no longer be pressured into succombing to unjustified expeditures.

Today Mr. Speaker I speak against the politics of the moment. I regret that I will cast my affirmative vote in protest.

The additional 3. 2 mil is a message to the School administrators that they may conduct business as usual + that they can expect to do so in the future. The money no matter which pocket it comes from, is still money.

GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 3, 1983

Honorable Albert P. Adams
Chairman
House Finance Committee
House of Representatives
Juneau, AK 99801

Dear Representative Adams:

To help the education supplement, the amount of $7,901.6 million can be used from the Federal Budget Impact Funds to help alleviate the education shortfall.

I am very pleased to extend our cooperation and am hopeful that this will help to clear the way for the Legislature to advance the supplemental funding to the school districts in a timely fashion.

Sincerely,

Bill Sheffield

Date: January 19, 1983

To: Representative Sam Pestinger
Chairman, Education Subcommittee

From: Alison Elgee, Fiscal Analyst
Division of Legislative Finance

Subject: Supplemental Appropriation for FY 83 School Foundation Program

---

The Department of Education has estimated a fiscal year 1983 shortfall in foundation support to the districts of $33,746,700. Title 14 of the Alaskan statutes governing Public Education provides that when a shortfall exists in the foundation funding, it is the commissioner of Education's responsibility to notify the Governor of the shortfall and to prorate the available funding to the districts. In considering funding of a FY 83 supplemental, the following needs to be addressed:

1) The 1982 Legislature was aware that the federal government was going to begin a phased transfer of the BIA schools in Alaska to the state. However, at the time the Education budget was under consideration the number of schools to be transferred to the state was unknown. Therefore, the legislature included the following intent statement in the 1983 general appropriations act: "This appropriation does not provide for student adm support for BIA schools which may transfer to school districts or new schools or programs which may be established during FY 83. It is the intent of the legislature that the Department of Education fund any such transfers or additions out of this appropriation and present to the legislature a request for a supplemental appropriation to accommodate the costs of any BIA transfers or establishment of new schools or programs, no later than the 15th day of the 1983 legislative session." Essentially, consideration of a supplemental for this need was promised. As one legislature cannot bind another legislature, consideration was all that could be promised. The BIA school transfer affects only a few districts. The cost of the school transfer is borne by all districts because any shortfall in funding is prorated statewide. Further increases for BIA school transfers should be anticipated in the Governor's FY 84 foundation request.

2) The existing foundation statutes provides districts the ability to separately count junior high school students for purposes of generating instructional units whether or not those students were housed in a separate facility. The Department of Education was aware of the potential fiscal impact of this "loophole" in the law and proposed corrective legislation during the 1982 legislative session. The legislation was amended during the course of the

session to become a substitute for the foundation formula while the entire formula was reviewed through a major financing study. The bill failed in the House during the final days of the session, so the Department is continuing to operate under the existing statutes. Again the impact of the organizational changes which generate the additional instructional units to some districts is felt by all because of proration. While it benefits a district which was not previously counting junior highs separately because of added instructional units (even if the extra dollars generated are reduced somewhat by the proration affect), it tends to hurt those districts without the flexibility to make "paper changes" in their reporting practices. Under the existing statutes, there is no way for the Department to choose not to recognize or not to fund the additional entitlements within the dollar limitations. In discussions with both House and Senate Finance Committees, the Department of Education emphasized the problems in anticipating and budgeting for this type of change. It was hoped at that time that an interim solution would be handled through the legislation then under consideration suspending the foundation formula. Until some determination is made as to the future of the existing foundation formula, this unanticipated increase in entitlements due to organizational changes will continue to be a problem in budgeting.

3) Districts must anticipate enrollments for budget consideration a full year in advance of the start of the school year. Alaskan school districts have been experiencing increases in enrollment over the past several years. However, the growth has been slow and projections have been fairly accurate. It became apparent during the spring of 1982 that enrollment projections for FY 83 had been underestimated by the districts when revised reports began coming into the Department for the 1981-82 school year. The Department and the State Board of Education chose at that time to make no attempt to acquire any additional funding for FY 83 based upon increasing enrollments. Therefore, the 1982 legislature made their decision to underfund the foundation formula without the knowledge that a potential underfunding situation already existed, due to an increase in projected enrollments.

4) The 1982 legislature chose to reduce the appropriation request for the foundation formula by $14,431,800. This reduction was made as part of an overall effort to reduce the size of the state's general fund operating budget. It was the feeling of the legislature that the school districts should have to bear a portion of the reduction that was to be felt by all of state government. The school districts were informed in a letter from Representative Montgomery and Senator Terry Stimson in March, 1982, not to anticipate full funding of the foundation request, so they would have sufficient lead time to revise their FY 83 operating budgets at the district level. While the reduction was significant, two important factors need to be kept in mind to keep the reduction in perspective:

   a) A 10% increase in the dollar value of the instructional unit became effective in FY 83 generating additional funds to the school districts for the same number of students and ongoing operations. In addition, the 1981 legislature revised the statutes relating to computation of instructional units for special education, almost doubling the amount of funds available to districts in the special education component in FY 83.

b) The Governor and the Division of Budget and Management prepared an amended budget and presented it for consideration to the Senate Finance Committee. The Governor's amended recommendation for the school foundation formula was $8,000,000 less than the figure finally appropriated for FY 83.

The school districts should have had sufficient time to build their budgets around a reduced level of funding from their original request. Even with the reduction the district budgets were increased almost 7% over FY 82 plus any additional funds generated by the special education component change. Districts did not experience a real reduction in FY 83, but an increase in dollars available for operations.

The foundation formula was not changed between FY 83 and FY 84. Because there was no change in the dollar value of the instructional unit, all things being the same, the dollars available to the districts in FY 84 will be the same as FY 83 (were FY 83 fully funded). The districts will have to absorb within those dollars any inflationary increases they are experiencing. Should the legislature choose to fully fund FY 83 and then find there are not enough dollars available, given the constraints of the spending limitation and other state needs, to fully fund FY 84, the school districts will be in a position of having to absorb not only inflationary increases but an actual reduction in total dollars available for FY 84 operations. Should the legislature decide not to fund a FY 83 supplemental, or to fund only a portion of the supplemental, and then fully fund FY 84, there will be some increase in dollars available to the school districts.

It is my opinion that the worst possible thing that could happen would be for the legislature to fully fund FY 83 through a supplemental and then find that it is not possible to fully fund the FY 84 request. For that reason, I would urge that the two budgets (FY 83 supplemental and FY 84 request) not be considered as independent from each other but one decision. The school districts are already being asked to absorb inflationary increases in FY 84. This alone will cause them difficulties. To raise expectations, to provide districts with new funds to begin new programs, add additional personnel, etcetera, and then to take away the dollars necessary to make those things ongoing would create a great deal more hardship to the districts than if they never had the dollars and the associated expectations in the first place.

MEMORANDUM

TO: All School Superintendents
All School Board Presidents

FROM: Representative Albert P. Adams, Chairman
House Finance Committee

Representative Joe Montgomery, ~~Vice-Chairman~~
House Finance Committee

Senator Terry Stimson, Chairman
Senate Finance Subcommittee on Education

SUBJECT: FY 83 Education Budget

As the Legislature continues to work on an FY 83 operating budget, the projection for the state's revenues continues to fall. As a result, close scrutiny is required on all appropriations -- including education.

As we're sure all of you recall, SB 23 authorized an increase in the base instructional unit from $38,590 in FY 82 to $42,450 in FY 83. Any increase, of course, is contingent upon approval of sufficient funding which in turn, is dependent upon available revenues.

The Legislature is faced with difficult decisions and we wanted to take this opportunity to share our dilemma with you. The "fiscal fact of life" is that we are looking at over 50% less in revenues for next year than what we have for this current fiscal year. Because of this bleak picture, it is possible that funding for instructional units may be at a lower level than that authorized in SB 23. Every attempt is being made to preclude this action. However, we felt it important that you be advised of this possibility at the earliest possible date.

No decisions have yet been reached. It's tough being the ones who have to tighten the belt a few more notches but the state's financial picture dictates such. We would welcome each of your comments and suggestions on how we might accomplish this task.

MEMORANDUM NUMBER 82-37

TO: All Local School Boards & School Dist. Superintendents

FROM: Marshall L. Lind, Commissioner

SUBJECT: FY 83 Public School Foundation Program Appropriations

---

The Public School Foundation Program appropriation for the 1982-83 school year is well below the estimated level of district entitlements. It is the purpose of this memorandum to explain how the Department plans to implement the pro rata distribution of State aid as required by AS 14.17.225(b).

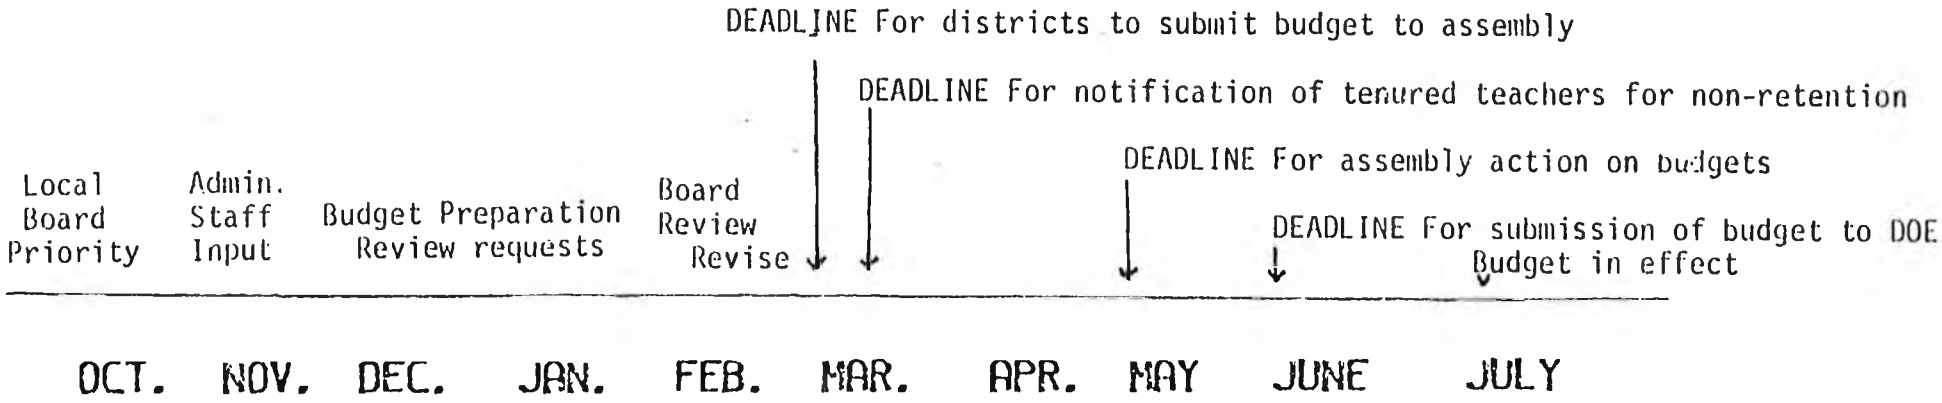
The appropriation for FY 83 is $389,668,600. Current school district estimates of entitlements, less BIA school transfers, total $418,539,500. The estimated State aid required for BIA schools is $7,297,700. The shortfall in appropriation, not including BIA schools, is $28,870,900. The shortfall, BIA schools included, is $36,168,600.

Due to the size of the shortfall, we will pro rate entitlements beginning July 1, 1982 by reducing monthly payments for the first 7 months of FY 83 by 4%. Based on the revised foundations reports due at the end of the first nine weeks of school (AS 14.17.170), we will recompute entitlements, and the amount of pro rata reduction required for payments from February 1 through June 30, 1983.

We believe this plan best meets the following conditions affecting school districts:

1) Eliminates the extreme impacts of a total pro rata reduction during the last five months of the fiscal year.

2) Reduces the adverse impacts on cash flow to districts by limiting the percentage of initial reductions.



3) Permits districts time to make operating budget decisions which accommodate a lower amount of revenues, including the 35% requirement.

4) Provides for a more accurate determination of the shortfall and pro rata amount when actual ADM and instructional unit counts become available in November.

Senate Bill 649, which proposed to change the system of State aid to an amount per pupil base, did not pass. Title 14, Chapter 17 of the statute continues in effect as now written; changes in instructional units, and supplemental equalization aid will occur when your revised foundation reports are received in November. As required by AS 14.17.170, the Governor will be advised of the additional appropriation necessary to fully fund the foundation program in FY 1983. Monthly payments will be adjusted as of February 1, 1983, to reflect the revised reports and recomputation of the percent of shortfall in appropriation which must be pro rated.

BIA schools will be included in payments made to the school districts affected. The legislative appropriation requires this by intent language, and stipulates that this amount be submitted for supplemental appropriation.

It is important districts recognize that this plan for pro rata reduction of State aid in FY 1983 can still result in a percentage reduction in the last five months of the year even more severe than the four percent initially applied. It is critical that early budget adjustments be made by districts to control expenditures from the start of the year. You should consider that the decrease in State aid revenues could be at least 8.5% over the full year, if a supplemental is not forthcoming.

BUDGET CYCLE

There are several steps in the budget cycle for school districts, with some variations between city and borough and Regional Education Attendance Area (REAA) districts. These are:

1. October. Determination of local board priorities for the ensuing fiscal year.

2. Late October. Budget instructions provided to administrative staff.

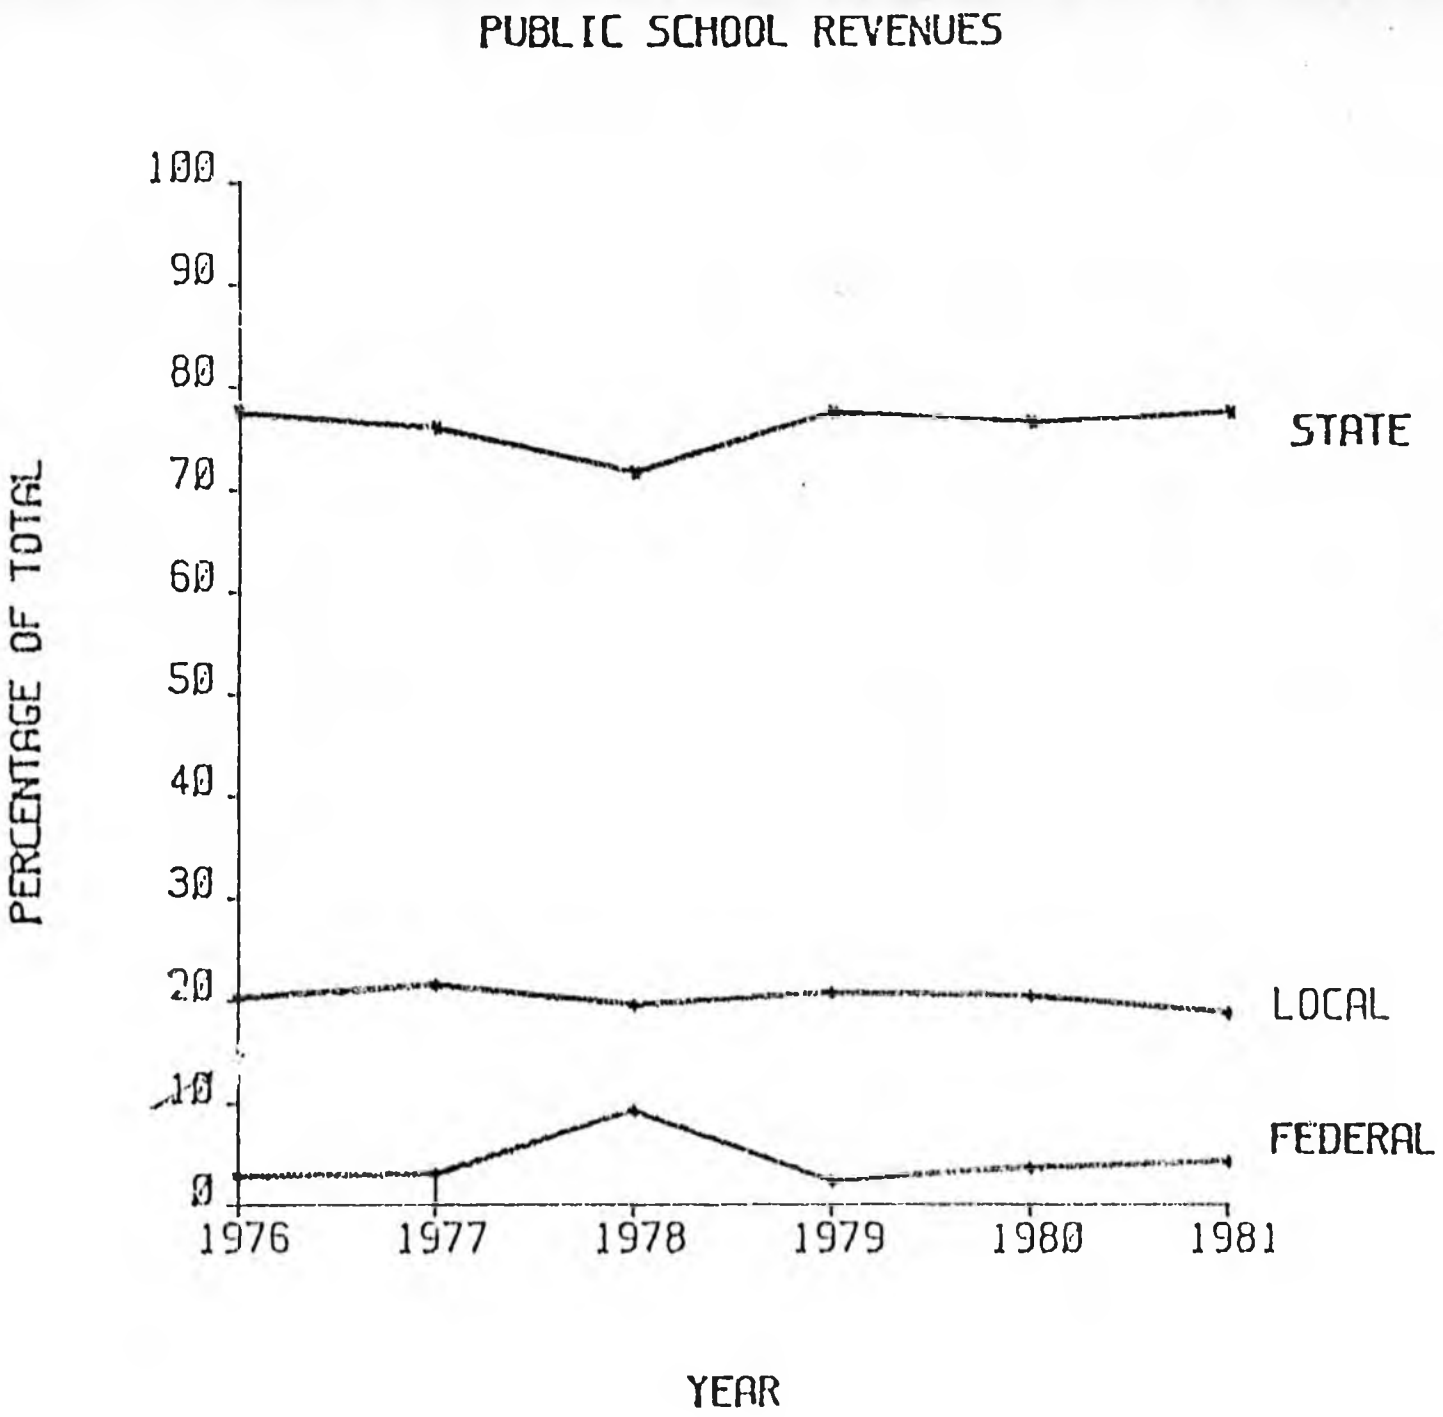
3. November - December 15. Budget preparation by administrative units.

4. December 15-January 15. Review of administrative unit requests.

5. February 1. Preliminary budget completed. and board review.

6. Late February. Budget revision and board approval.

7. March 1. Deadline for city and borough districts to submit budgets to city council or borough assembly, as per AS 14.14.060 (c).

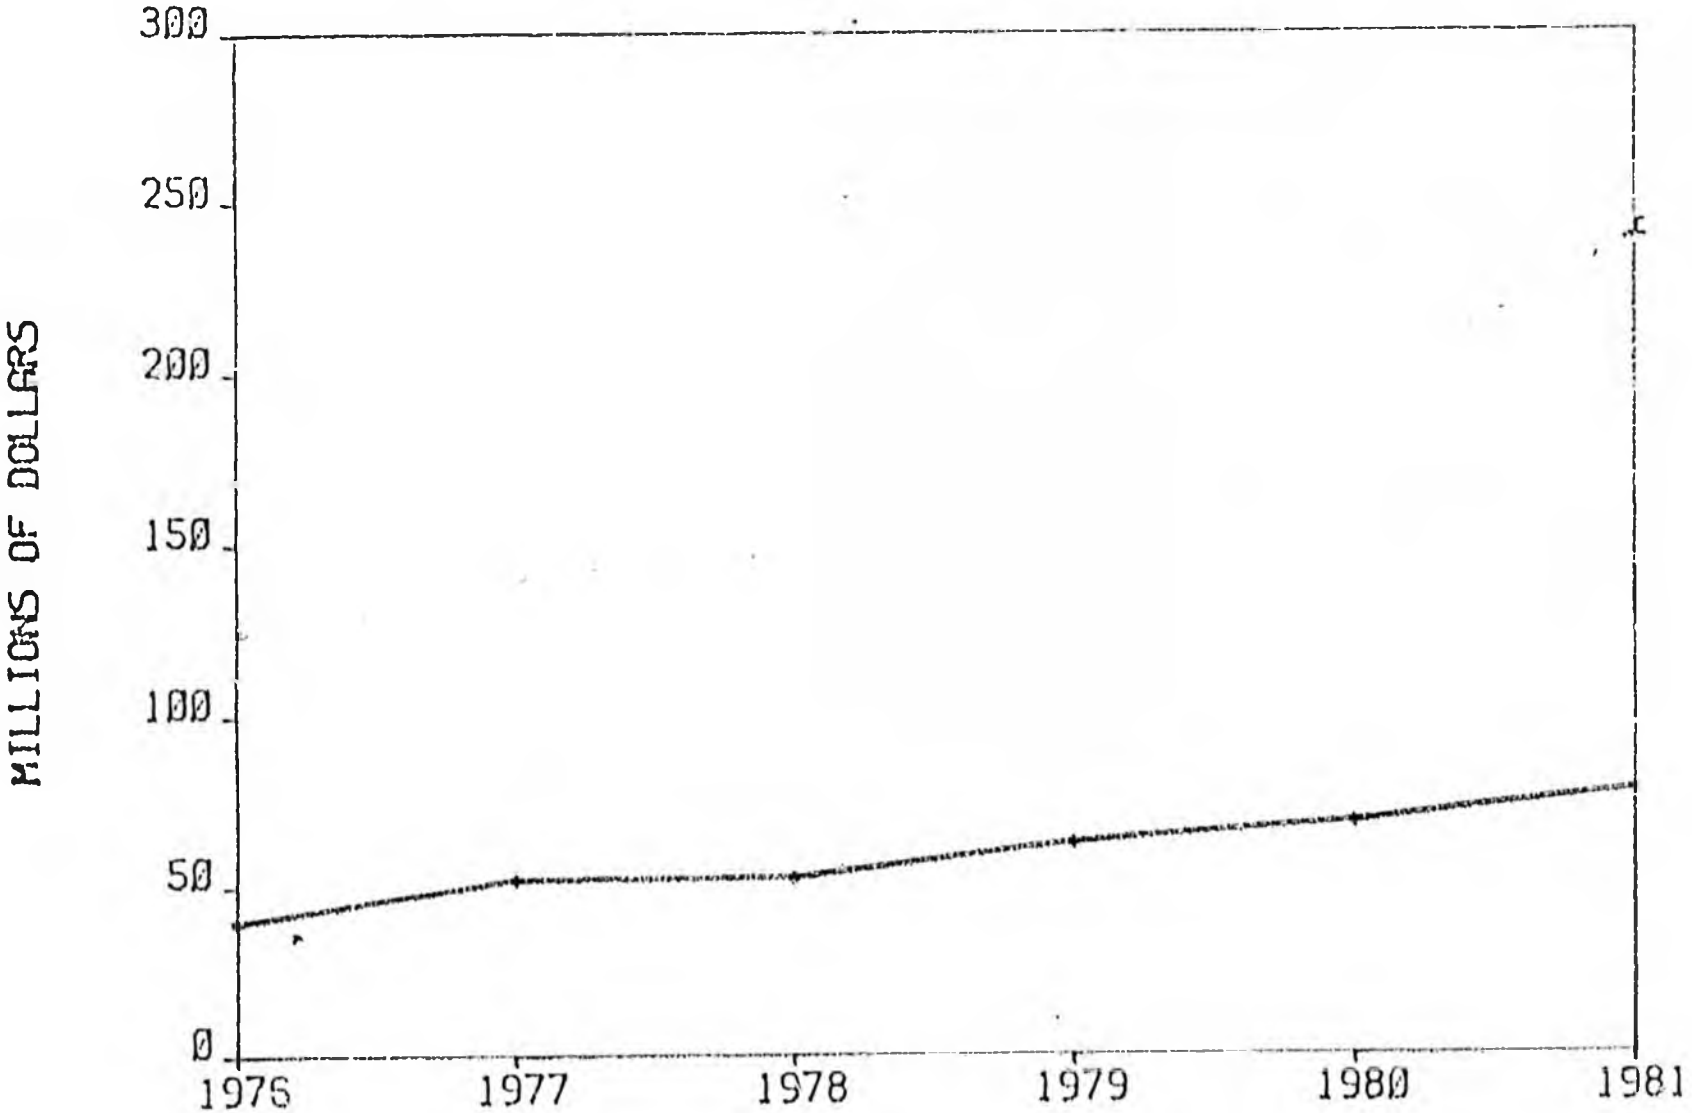


8. March 16. Deadline for notification of tenured teachers of nonretention. As per AS 14.20.175, tenured teachers may be nonretained only in cases of incompetency; immorality; substantial noncompliance with school laws, regulations, district bylaws or written rules of the superintendent; or a reduction in staff occasioned by a decrease in school attendance.

   Nontenured teachers must be notified of nonretention on or before the last school day of the contract year, which varies by district from early May to early June.

9. May 1. Deadline for assembly or council action on budgets of city or borough districts.

10. May 31. Deadline for submission of district budgets to the Department of Education.



11. July 1. Effective date of budget.

Mac.

Steve Hole, coming with a message from the Governor.

He (the Governor) wanted you to know that at 12:00 today he will make an announcement concerning the supplemental appropriation.

22.6 million will be the figure.

He also left the briefing material for you

Anne

SB 649 - AS

suspend the law

In its place a funding pattern, in its place an ADM formula put in its place.

which will give full entitlement for the student.

~~admin - if you only get them what the dep. found~~

then start changing the formulas to better reflect the problem/solution.

Amendment to CS HB 73

The School Foundation funding formula program is suspended until February 15, 1984. Funding for school districts during this period will be based on 95% of the ADM of the most recent existing quarterly report of the school district upon the enactment of this section. This provision well remain in effect for not less than one year and no more than two years from February 15, 1983, during which time the Legislature is mandated to enact a new funding system for school districts.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502-0650
(907) 264-4431

TONY KNOWLES,
MAYOR

OFFICE OF THE MAYOR

February 1, 1983

Commissioner Mark Lewis
State of Alaska
Department of Community and Regional Affairs
Pouch B
Juneau, AK 99811

Dear Commissioner Lewis:

As requested in your letter of January 13, which was received on January 25, I am submitting Anchorage's 1983 state capital grant funding requests for your department's review. I wholeheartedly concur with the Governor's request for Municipalities to present their capital priorities to the administration so that they may be rationally integrated with State departmental projects.

The projects I am presenting represent my philosophy of "back to basics" and will, if accomplished, stimulate our economy, guide desired growth as well as insure a uniquely superior quality of life. They also represent a balanced approach to meeting the overall, critical needs of Anchorage.

The attached package contains a prioritized list of Anchorage's capital projects with brief project descriptions. It is followed by detailed descriptions of each project which specifically answer the criteria requested in your letter. To facilitate the coordination and review of these projects, we have simultaneously provided to various State departments copies of the 1983 State capital grant funding requests which align most closely with their program area responsibilities. This distribution is indicated on the right-hand margin of the priority list.

We have two areas of concern which are not addressed in the priority list. The first area involves four projects which have been included by Governor Sheffield in the State's capital package:

1. Accelerated Road Improvement Program, representing a massive three-year upgrade of Anchorage's surface transportation;

2. Two-year funding of the Eklutna Water Project;

3. A supplemental for DEC water and wastewater grants; and

4. Mandatory vehicle inspection and maintenance for Anchorage and Fairbanks.

All four projects are critically important to Anchorage. In fact, the Accelerated Road Improvement Program, which includes State and local roads, is our highest overall priority for state funding in 1983. It does not overstate the situation to say that our transportation concerns go beyond matters of convenience and economics. Deteriorating road conditions have become an issue of public safety, and underscore the importance of the Accelerated Road Improvement Program to the general welfare of our citizens.

The second area of concern not addressed in the prioritized list is capital funding requests for non-profit corporations. Because of delayed receipt of your January 13 letter, there has not been adequate time for non-profit corporations to submit their requests through the Municipality. But more importantly, our prioritized capital projects have been through an extensive 9-month development, review, and public input process. It would be unreasonable within a one-week period to review non-profit requests and to adequately integrate them in the ranking. To meet non-profit needs as well as insure an integrated community plan, we urge you to use a block grant approach to funding non-profit capital requirements. This approach would allow time to develop an orderly process for soliciting, evaluating and awarding capital grants to non-profits which fit in with the Governor's criteria of economic development as well as community priorities.

We look forward to working with you. If we can be of further assistance, we urge you to contact the Executive Manager responsible for each project or the Municipal staff contact listed on the detailed project description forms.

Sincerely,

Barbara Stechil

for Tony Knowles,
Mayor

MUNICIPALITY OF ANCHORAGE

STATE 1983 CAPITAL APPROPRIATIONS REQUEST

There are four items of crucial importance involving capital grants to State departments included in the Governor's Capital Budget which the Municipality fully supports. They are as follows:

1. Accelerated Road Improvement Plan will provide for construction and improvement of arterials and collectors within the Anchorage Bowl, Eagle River-Eklutna and Turnagain Arm. The Plan is being finalized by the Municipality and the State Department of Transportation and will be available shortly.* — * TBD

2. Elkutna Water Supply Project - Phase III of 6-year project which will eventually provide 70 million gallons per day of treated water to Eklutna, Chugiak, Eagle River, and the Anchorage Bowl. — $35,000,000

3. Department of Environmental Conservation Supplemental Appropriation for numerous water and wastewater capital projects applications currently filed with DEC. — $28,000,000

4. Mandatory Vehicle Inspection and Maintenance for Anchorage and Fairbanks. — $ 4,000,000

Projects for which the Municipality is requesting funding from the legislature cover immediate, basic community needs.

1. Traffic Improvements throughout Anchorage include: — $ 1,538,000 — DOTPF

   a. Signal system coordination and upgrade - repair computer controlled system of approximately 100 intersections and add approximately 40 signalized intersections.

   b. Signalization/channelization.

   c. Traffic circulation improvements.

2. Ship Creek Water Treatment Plant Expansion will double the capacity to 24M gallons per day and provide additional water necessary to support growth in the Anchorage Bowl until the Eklutna Water Project is complete in 1983. — $ 6,000,000 — DEC

3.	Dimond Fire Station constructs and equips a two company fire station, improving the response time in this rapidly developing area.	$ 1,703,000	DPS
4.	Road and Drainage Improvements is comprised of the following projects:	$ 9,716,000	DOTPF
	a. Street illumination - arterials/ collectors.		
	b. Miscellaneous utility relocations.		
	c. Denali Street, 36th to 40th, road improvement.		
	d. Lake Otis Parkway, Abbott Road to O'Malley road improvement.		
	e. Arctic Boulevard, 53rd to Raspberry road improvement.		
5.	Pt. Woronzof Wastewater Treatment Plant Expansion Phase II will provide design and partial construction of this project. The expected project completion in 1986 will double plant capacity just as the current plant reaches maximum capacity.	$ 3,300,000	DEC
6.	Police Headquarters Facility constructs and equips centrally located facility.	$10,000,000	DPS
7.	Transit providing local match for a federal UMTA grant to construct a $19 million Transit Maintenance and Storage facility to accommodate a 100-bus fleet.	$ 2,000,000	DOTPF
8.	ARDSA Road Construction to supplement the construction revolving funds for prefinancing the construction of special assessment district streets within the Anchorage Road Service Area.	$ 3,000,000	DOTPF
9.	Road Service Areas Outside ARDSA funds construction improvements to collector roads in South Anchorage and Eagle River following formation of service areas.	$ 2,250,000	DOTPF
10.	New Mears Jr. High School to construct a 1,008 student capacity facility in the South Anchorage area.	$37,314,000	DOE

11.	Roads and Drainage Improvements is comprised of the following additional projects:	$ 4,710,000	DOTPF
	a. Industrial Park, International to 36th, storm drainage improvement.		
	b. West Dimond Trunk drainage improvements.		
	c. Bragaw, Tudor to 48th road improvement.		
	d. Road and drainage repair and rehabilitation.		
12.	Replacement Medic Units/Pumpers provides for programmed replacement of two older medic units presently in service and replacement of two older pumpers in the Anchorage and Chugiak Fire Service Areas.	$ 436,000	DPS
13.	Eagle River/Chugiak Water continues implementation of a Municipal water system in the Eagle River/Chugiak area which will provide the same quality water service that exists in the Anchorage Bowl.	$ 1,850,000	DEC
14.	Road and Drainage Improvements is comprised of the following projects:	$ 5,611,000	DOTPF
	a. Third Avenue, Elmendorf to Post Road road improvement.		
	b. Subdivision reconstruction - roads.		
	c. Eagle River Drainage Study.		
	d. 76th, Old Seward Highway to King Street, road improvement.		
	e. Miscellaneous street improvements.		
	f. Water Quality Control, Chester/Campbell Creeks.		
	g. Northern Lights Beautification, Muldoon to Earthquake Park.		
	h. Little Rabbit Creek/Potter Valley Storm Drainage Study.		

15. Park and Trail Development is comprised of the following community-wide park and trail development projects: $ 4,930,000 DNR

a. Completion of current development projects:

Mulcahy
Chester Creek Sports Complex Parking
Ben Boeke Ice Arena
Wolverine Park

b. On-going programs:

Handicapped Adaptations
Tree Planting
Park Upgrading
Landscape Improvements

c. Community Parks Development:

Storck Park
Sitka Street Park

d. Oceanview Bluff Community Park Development.

e. Special Facilities:

Playfield Development
Beach and Dock Improvements

f. Neighborhood Park Development:

Valley Street Park
Miller Memorial Park
Shady Birch Park

g. Completion of current trail projects.

h. Stubs, Curb Cuts and Striping.

i. Purchase Trail R.O.W.

j. Footpaths Construction.

k. Baxter Road Bike Trail.

l. Chugiak/Eagle River Old Glenn (Mile 19) Park Development.

16.	Heavy Equipment Purchase required for start up of the new Klatt Road Satellite street maintenance stations serving South Anchorage.	$ 515,000	DOTPF
17.	Parking Garage results in construction of a parking facility on the block bounded by 6th and 7th Avenues and "G" and "H" Streets.	$ 7,000,000	DOTPF
18.	Street Lighting to install residential lighting in areas where it is deficient.	$ 1,500,000	DOTPF
19.	Pedestrian Safety provides an undercrossing of Lake Otis Parkway between Abbott Road and O'Malley Road.	$ 750,000	DOTPF
20.	Street Maintenance Facilities is for acquisition and construction of the following facility:	$ 1,200,000	DOTPF
	a. Two Sand Storage Buildings.		
21.	Port Expansion to meet the immediate and continued need of ocean carriers for additional cargo staging property. Three projects are included:		
	a. Construction of Lot 12-B.		
	b. Engineering for Transit Area D.		
	c. Engineering for Development of Leased U.S. Government Property.	$ 5,800,000	DOTPF
22.	Road Service Areas Outside ARDSA funds construction improvements to collector roads in South Anchorage and Eagle River following formation of service areas.	$ 2,000,000	DOTPF
23.	Park and Trail Development is comprised of the following additional community-wide park and trail development projects:	$ 2,205,000	DNR
	a. Neighborhood Park Development:		
	Nadine Park Pleasant Drive Park University Park Oceanview Park		

23.	Park and Trail Development (continued)		
	b. Oceanview Bluff Community Park Development		
	c. Hillside Ski-Hike Trail.		
	d. O'Malley Equestrian Trail.		
	e. Seward Highway Bike Trail.		
	f. Campbell Creek Greenbelt Development near Tudor Lake.		
24.	Book Purchases to begin acquisition of library materials for the new Headquarters Library.	$ 1,000,000	DOE
25.	Street Maintenance Facilities is for acquisition and construction of the following facilities:	$ 2,310,000	DOTPF
	a. Sign Shop Facilities.		
	b. Snow Disposal Site Acquisition.		
	c. Railroad Crossing Reconstruction.		
26.	Areawide Communications installs the final phase in the areawide communications network and purchases a mobile communications repair van.	$ 215,000	DOTPF
27.	Heavy Equipment Purchase to replace existing old road maintenance equipment.	$ 565,000	DOTPF
28.	Solid Waste Resource Recovery investigates alternatives to existing solid waste operations which would establish recycling facilities and an alternate energy source as well as a potential land savings of up to 650+ acres in the next 20 years.	$ 2,000,000	DEC
29.	Roads and Drainage Improvements is comprised of the following additional projects:	$ 4,162,000	DOTPF
	a. Miscellaneous Alley Improvements.		
	b. 34th Avenue, Wisconsin to Tanglewood, road improvements.		
	c. Water Quality Storm Drainage Project-design and construction.		
	d. Miscellaneous Street Improvements.		
	e. Artillary Road, Glenn Highway to Sewage Plant.		

30.	Debt Retirement to offset increasing debt requirement which burdens the community property owners.	$15,000,000	C&RA
31.	Land Trust Fund establishes a fund to assure acquisition and continued public ownership of community-interest land.	$ 5,000,000	C&RA
32.	Capital Reserve Funds to offset unanticipated shortfalls in our current capital program so that projects can be completed in a timely manner and put into service to the community.	$ 5,000,000	C&RA
33.	Ship Creek Water Treatment Plant Expansion will double the capacity to 24M gallons per day and provide additional water necessary to support growth in the Anchorage Bowl until the Eklutna Water Project is complete in 1988. This is an additional funding requirement if the Department of Environmental Conservation does not receive funding from supplemental appropriation for grant projects currently filed with them.	$ 6,000,000	DEC
34.	Pt. Woronzof Wastewater Treatment Plant Expansion Phase II will provide design and partial construction of this project. The expected project completion in 1986 will double plant capacity just as the current plant reaches maximum capacity. This is an additional funding requirement if the Department of Environmental Conservation does not receive funding from supplemental appropriation for grant projects currently filed with them.	$ 3,300,000	DEC
35.	Eagle River/Chugiak Water continues implementation of a Municipal water system in the Eagle River/Chugiak area which will provide the same quality water service that exists in the Anchorage Bowl. This is an additional funding requirement if the Department of Environmental Conservation does not receive funding from supplemental appropriation for grant projects currently filed with them.	$ 1,850,000	DEC

Part of Dept Educ fiscal note

Revised 1/24/83

Analysis of FY-83 Foundation Supplemental

FY-83 Request (estimate)	406,089.5
FY-83 Appropriation	391,753.3
FY-83 Shortfall	(14,431.8)

FY-83 Revised Reports Increases by Categories:

1. Enrollment Increases (estimate)	6,407.7
2. New Secondary Programs	1,808.4
3. BIA School Transfers	7,901.5
4. New Tanana City School District	855.4
5. Special Education Program Increases	2,558.5
Total Increases	19,531.6
Add Original Shortfall	14,431.8
Total Shortfall	33,964.4*

+ 1,106.2
2000 - short funded
19,531.6
23,637.8

Out of seven Department supplemental requests transmitted to the Governor, the State Board of Education has prioritized the $19,531.6 request first, and the $14,431.8 portion of this supplemental sixth.

*For the record, a January 7, 1983, hearing officer's recommended decision on the way the Department calculates supplemental equalization aid under AS 14.17.023 has resulted in an additional shortfall of of $1,106.2. We have been advised by the Attorney General to accept the hearing officer's recommended decision.

Wish list tops $800 million

Juneau Empire 2/1/83
Og #1

By BRUCE SCANDLING
Empire Staff Reporter

With a wish list topping $800 million and still growing, Gov. Bill Sheffield is laying plans to decide which capital projects sought by communities around the state should be funded.

At a Cabinet meeting this morning, Community and Regional Affairs Commissioner Mark Lewis told the governor more than 480 capital project requests from about 60 communities have already been submitted.

More are on the way, he said.

Under Sheffield's plan to screen wish lists from around Alaska, communities were asked to submit all requests for capital projects by today.

Construction, repair or renovation projects are typically part of the annual capital budget.

Sheffield's plan has been criticized by some legislators, who charge the governor is taking away the chance for lawmakers to endorse and obtain funds for local projects.

Before the capital budget is finished this year, lawmakers have vowed, they'll have their say.

Still, to decide which requests the governor's office should fund, a priority committee will be appointed by Sheffield, Chief of Staff Larry Crawford told Cabinet members. That group will include various commissioners and Sheffield aides, he said.

"We'll need to be able to tell the governor why these projects are on the list, and I'm sure he'll want to ask us why some aren't on the list," Crawford said.

The screening committee, he said, will ask two questions in reviewing every project requested: Is it an appropriate use of state funds, and is the project feasible?

"If the answer is 'no' to either of these, it doesn't go any further," Crawford said.

Sheffield's 1984 capital spending plan, described by staffers as a "working budget" so far, includes $1.2 billion for capital projects next year. But Crawford said the governor's office is expecting between $5 billion and $10 billion in community requests.

Paring those requests will hopefully be an "equitable and fair" process, he said, with projects OK'd for all areas of the state.

In Juneau, the city-borough assembly has submitted a wish list topping $50 million.

On other budget matters, Sheffield said he will appoint Crawford, Attorney General Norm Gorsuch, Budget Director

Petersburg says no thanks to hydro project

News Miner 2/29/83 Pg 5

PETERSBURG (AP)—Faced with the prospect that electricity from the Tyee Lake hydroelectric project will cost twice as much as what residents pay now, Petersburg is telling the Alaska Power Authority thanks, but no thanks.

The project is scheduled to begin generating electricity to Petersburg and Wrangell in early 1984. A recent rough draft by APA of a contract to sell wholesale power to municipal utilities in both communities pegged the price at 17.5 cents per kilowatt hour.

That's what the utilities would have to pay the state. The utilities then would have to raise the price to cover the costs of distribution, maintenance and management.

Petersburg City Manager Richard Underkofler said that would bring the cost of electricity to more than 26 cents per kwh. Residents now pay about 12.5 cents per kwh.

"It's simple economics," said Underkofler. "At the prices they offered us it will be cheaper to burn diesel for the next decade or so. We're not buying at that rate."

Eric Yould, director of APA, said the city's response to the draft document was premature. He also said the city could reduce its administrative costs by 2-3 cents per kwh once Tyee is on line.

"I think the Legislature will make a conscientious effort to make sure Wrangell and Petersburg don't pay significantly more than they're paying now," said Yould.

The cost to residents of the two cities would shrink if the state picks up more of the construction cost, now estimated at $112 million. In 1979, the projected cost of the project was $40 million.

The state has appropriated about $82 million for the facility, about 40 miles southeast of Wrangell. The difference will have to be made up by ratepayers unless more money is appropriated.

End the Federal Reserve

Jan. 25, 1983
1421 Mary Ann
Fairbanks, AK 99701

To the Editor:

The best kept secret of this century, is, who is the Federal Reserve, who owns it and why hasn't it ever had an audit? I think the main answer is finally out in the open—it's owned by approximately 300 people who hold stock or shares. This international cartel controls "wealth beyond comprehension." It's mostly the big banking families from around the world. Here are the main ones according to the "Spotlight" newspaper: Rothchild Banks of London and Berlin; Lazard Bros. of Paris; Israel Moses Seif Banks of Italy; Warburg Bank of Amsterdam and Hamburg; Lehman Bros. of N.Y.; Kuhn, Loeb Bank of N.Y.; Goldman, Sacks of N.Y.; David Rockefeller's Chase Manhattan of N.Y.

Here's the opinion of several well-known Americans about the Federal Reserve President James A. Garfield, and I quote "whoever controls the volume of money, in any country, is absolute master of all industry and commerce."

The following opinion by Congressman Louis T. McFadden states "The Federal Reserve (banks) are one of the most corrupt institutions the world has ever seen."

Thomas A. Edison, Horace Greely mention its usury (interest rates). Thomas Jefferson said it all, when he said "If the American people ever allow private banks to control the issue of their money, first by inflation and then deflation, the banks and corporations that will grow up around the banks, will deprive the people of their property until their children will wake up homeless on the continent their fathers conquered."

Let's give a thought to the national debt. Just the interest on that debt, will be a giant burden on our kids and grand kids. International bankers are bleeding this whole world dry! They caused great hardship in the last depression—foreclosed on vast amounts of land, farms and businesses. It wasn't long ago interest rates were 22 percent. Talk about usery! And our spineless elected officials could stop the giant ripoff but don't!

No wonder there's been no audit since 1913. What a field day for crooks! Bankers produce no usable product of any "wealth" yet their quasi-legal robbery, tripled their net assets (wealth) in only 20 years. This should be called a "debt system"—Jefferson was right! Congress alone should have the right to mint money—not print money—if $50,000 is borrowed, $263,941 must be paid back at 17½ percent for 30 years—outrageous! End the Federal Reserve.

T.M. Carson

It is the intent of the House HESS Committee to provide for, with this supplemental appropriation, only those unanticipated contingencies occassioned by unanticipated enrollment increases, the BIA transfer of schools to Alaska school districts and unforseen complications of the legislative mandate to scale down education spending because of reduced state revenues.

It is not the intent of the HESS Committee to provide additional funds to enhance program expansion, school district reorganizing and other programs or procedures designed primarily to enhance the school district revenue picture.

Catagories included in the fiscal note to the Committee Substitute to HB 73:

1.	Enrollment Increases (estimate)	6,407.7
2.	BIA School Transfers	7,901.6
3.	New Tanana City School District	855.4
4.	Shortfall (reduction in FY 83 budget)	7,215.9
	Total Request for CSHB 73.....	22,380.6

Catagories deleted from the fiscal note attached to the original HB 73 include an appropriation for 'New Secondary Programs' $1,808.4, and 'Special Education Program Increases' $2,558.5. Also deleted from the original request of $33,964.4 was half of the amount requested to cover the reduction appearing in the final FY 83 budget.

Title An Act...SUpplemental Appropriation to the Dept. of Education

MEMORANDUM State of Alaska

TO: Ron Lehr, Director
Division of Budget & Management
Office of the Governor

DATE: December 20, 1982

FILE NO:

TELEPHONE NO: 465-2875

FROM: Marshall L. Lind
Commissioner
Department of Education

SUBJECT: Request for Restoration of Budget Request

The Department of Education requests consideration be given by the Governor to support full funding of the $406,185.1 FY 83 departmental budget request for Financial Support BRU by restoring the $14,431.8 reduction appearing in the final FY 83 budget. Distribution by component of the restored appropriation is as follows:

Component	Amount
Student ADM Support	$7,779.1
Special Education Adjustment	2,650.8
Vocational Ed. Adjustment	1,297.6
Correspondence Study - DOE	96.6
Correspondence Study - Local	299.8
Bilingual Program Adjustment	604.7
Supplemental Equalization Aid	1,703.2
TOTAL	$14,431.8

$14,431.8 × 50% = 7,215.9

February 2, 1983

Mae -

The subcommittee on HB 73 (Flood, Duncan, Adams) will meet again in Adam's office at 4 p.m. today.

Adams briefed committee on progress so far. They are attempting to reach a compromise now so the bill will not have to go through a conference committee.

Tentatively:

enrollment	6,407.7
BIA schools	7,901.6
Tanana	855.4
separate Jr. High count	1,808.4
special education	2558.5
adjustment for 97.25%	6,010.7
	25,542.3

Will send letter of intent to governor advising that only $17,640.7 should come out of general fund; $7,901.6 will come out of federal budget impact funds.

New State Board of Ed

Rec'd from Steve Hole 10:50 a.m. 8/24/83

YEAS	NAYS
Sam Kito	
William Eubank	
Don Gray	
Mary Schaeffer	
Barney Gottstein	
Sue Hull	
Ernestine Griffin	

MOTION CARRIED 7-0.

The audioconference was scheduled for Monday, January 10, 1983, at 6:30 p.m. Anchorage time, and the Board directed the department to advise the members of the Screening Committee regarding the time and place in their individual communities to enable members of the State Board to seek further information regarding the selection process.

Don Gray moved and Sue Hull seconded the motion to list the Commissioner Selection Process as an action item for the next regular meeting.

MOTION CARRIED UNANIMOUSLY.

83-89 REVIEW OF FOUNDATION PROGRAM SUPPLEMENTAL REQUEST

Commissioner Lind addressed the Board regarding the Supplemental Request for Foundation Support for FY-83 to cover the shortfall resulting from the decision of the Legislature to not fund full entitlement for the school districts, and asked Steve Hole to explain 83-89.1, Debt Retirement Supplemental Request for pre December 31, 1981, Indebtedness; 83-89.2, post December 31, 1981, Indebtedness; and 83-89.3, Miscellaneous FY-83 Supplemental Appropriation Requests.

The Board recessed for lunch at 12:05 p.m. and returned at 1:35 p.m. with the exception of Mr. Kito, who was delayed and arrived at 1:45 p.m.

President Griffin called for continuance of the explanation and discussion of the foundation program, and the Board listed the items in order of priority.

Sue Hull moved and Don Gray seconded the motion to list the supplemental requests by priority as follows:

(1) Foundation support in the sum of $19,314.9;

(2) Prior year claims in the amount of $7.0;

(3) Health insurance costs in the amount of $253.7;

(4) School Activities Association for student travel in the amount of $300.0;

(5) Dept retirement in the amounts of $5,522.0 and $7,577.7

(6) 4% Foundation support in the sum of $14,431.8;

(7) Capital project fund balance transfer of $253.6.

Roll call vote was taken:

YEAS	NAYS
Sam Kito	
Mary Schaeffer	
Ernestine Griffin	
Barney Gottstein	
Don Gray	
William Eubank	
Sue Hull	

MOTION CARRIED 7-0.

83-88 COMMISSIONER SELECTION PROCESS

Diane LeResche explained the operation of the audioconference equipment to the Board in preparation for its conference with members of the Commissioner Selection Screening Committee on Monday, January 10, 1983.

83-90 REVIEW OF EDUCATION FINANCE STUDY

Laraine Glenn, Project Director for the Finance Study, reviewed the process for the study used thus far in the school finance study. This study was put on hold by request of Governor Sheffield pending the appointment of a new State Board of Education.

Dr. Van Slyke explained that policy issues will need to be addressed that will impact school finance, and suggested some options available to the Board. He stated that it is important for the Board to consider the composition of the policy group and the department would have some additional recommendations at a subsequent meeting.

Following discussion by the Board, it was suggested that the department develop internally an alternative plan that could replace the current study.

Don Gray moved and Sue Hull seconded the motion to place the Finance Study on the agenda as an action item at the next meeting.

MOTION CARRIED UNANIMOUSLY.

MEMORANDUM State of Alaska

File HESS

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Foundation Support

3892 - Steve Lewis

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all school district foundation entitlements.

ISSUE

The legislature appropriated $391,753.3 for FY 83 foundation support; recent final review of district entitlements indicate the total amount needed to fully fund the foundation program will be approximately $425,500.0, leaving a projected shortfall of $33,746.7. Much of the shortfall is a result of the legislature's decision to make the rescission through the budget process rather than through substantive legislation reducing the instructional unit value. In other words, if the legislature had reduced the Instructional Unit value by 3.6%, then the entitlements would be lower. As it is, however, the entitlements are in excess of the money appropriated to pay them.

BACKGROUND AND/OR PERTINENT INFORMATION

The last legislature appropriated funds for foundation support in an amount less than our request. The intent behind the reduction was 1) to appropriate less than the law required, and 2) for the department to request a supplemental appropriation to cover the BIA school transfer impact and new program and new school costs, so that districts would not be required to absorb those demands as well. When the 33 million dollar difference between the appropriation and entitlements is analyzed, it can be explained as follows:

1.	Deliberate underappropriation: Our request minus appropriation	=	14,431.8
2.	BIA Transfer Schools (estimated)	=	7,300.0
3.	Enrollment Increases (estimated)	=	6,700.0
4.	New programs, organizational changes, corrections to the initial report upon which our FY 83 request was based.	=	5,314.9
	TOTAL	=	33,746.7

We have notified the Governor's office of the scope of the shortfall, and requested him to introduce a supplemental appropriation for $19,314.9, and further, to consider a supplemental appropriation for the $14,431.8 the legislature chose not to appropriate.

I have asked legal services to prepare a CS for HB 73. This normally takes 2 days which implies that it will be ready by Friday if need be.

L.

Catagories included in the fiscal note to the Committee Substitute to HB 73:

1.	Enrollment Increases (estimate)	6,407.7
2.	BIA School Transfers	7,901.6
3.	New Tanana City School District	855.4
4.	Shortfall (reduction in FY 83 budget)	7,215.9
Total Request for CSHB 73.....		22,380.6

Catagories deleted are:

1. The 'deliberate underappropriation' of FY 82 at 14,431.8 was cut in half to 7,215.9.

2. New programs, organizational changes, corrections to the initial report upon which the FY 83 request was based was deleted in full, at 5,314.9.

FOR IMMEDIATE RELEASE
JANUARY 28, 1983

Contact: Linda Otey
465-3777

Representative Mae Tischer today criticized members of the House Minority for trying to force a bill from the Health, Education and Social Services Committee which she co-chairs. The bill relates to the proposed $33 million supplemental appropriation for school districts.

Tischer said, "The amount requested in the original bill is more than I believe is required. The committee substitute to be proposed reduces the amount to $22,380,600. This will provide for unanticipated enrollment increases, transfer of BIA schools from the federal government to the state and the unforesenn complications of the legislative mandate to scale down education spending because of reduced state revenues. It will not, however, provide additional funding to enhance program expansion."

Tischer noted that during the January 10th meeting of the State Board of Education, Commissioner Marshall Lind recommended that the Board ask for $19.3 million for a foundation program supplemental.

Tischer added, "I was sent to Juneau to do a job based on a philosophy of fiscal responsibility and reducing government growth. We cannot afford to rubber stamp requests for millions of dollars without completely examining the need for the money. I intend to conduct a thorough study of every bill that comes to my committee despite actions by other House members who do not feel this is necessary. Such study is the only way to ensure passage of sound legislation. I support aid for the school districts, but this study has shown that a smaller amount of aid than originally requested is needed to maintain our school districts' viability."

RE: optional funding of supplemental appropriation monies in HB 73 (33.6 million)

In contacting another attorney for another opinion regarding the supplemental mentioned above: the following options appear to be appropriate as different methods of funding the shortfalls:

1). Under the title of the bill before the committee today (HB 73) there would be a problem in earmarking the funds to specific districts who prove shortfalls. Any money that is appropriate to the foundation fund must be pro-rated (paid to to all districts accross the board).

If the committee chooses to simply cut the amount requested and still pro-rate the funds, the existing title of the bill is sufficient to do this and a committee substitute would suffice.

2). If the committee wishes to catagorize funds and supplementally appropriate to specific districts, a new bill, introduced by the HESS Committee should be re-writte with funds being designated to individual districts for specific purposes.

Mr. Bob Greene was correct in stating that funds must be provided for on a pro-rata basis only if the foundation fund is the account earmarked for the appropriation, consequently, there is a way of writing the legislation to get around that across-the-board mechanism.

More "Buy" for Your School Bucks

By Claire Safran

School-budget cuts are forcing administrators, parents and local businesses to find creative ways to make better scholars with fewer dollars

In Rocky Ford, Colo., new shadows lengthen in school hallways. Light bulbs have been removed from every other fixture to cut electricity costs. With fewer and fewer dollars for school budgets, every penny has to count.

▶ In the hills of Kanawha County, West Virginia, students in shop classes are building some of the portable classrooms that the district needs but cannot afford to buy. Among the people teaching them to use hammer and saw are retired craftsmen, hired at minimum wage to stretch the teaching staff.

▶ A sharp-eyed visitor to Portland, Ore., schools may spot paper scraps and chalk dust on classroom floors. By reducing custodial services—cleaning the classrooms only every other day, for one thing—city schools will save more than a million dollars this year.

The "new math" that America's public schools are struggling with these days is mostly subtraction. Federal education budget cuts have taken effect this fall; most states and many local school districts are providing less money. At every level, this financial crunch is becoming as familiar as the screech of chalk on a blackboard.

In a tight-money situation the most tempting cut may be the "frills"—music, art, physical education, math and English electives, a choice of foreign languages, driver education. But one child's "frill" may be another child's "basic."

Worried that their children may be shortchanged on learning, mothers and fathers are poring over school budgets, doing their homework, searching for better answers. And better answers do exist. A survey of schools around the country revealed many new and

imaginative strategies for making dollars stretch further and work harder for good education.

When money is the problem, people may be the solution. In Montgomery County, Maryland, the third-grade reading tutor is a volunteer, recruited from a nearby home for the aged. A bilingual factory worker helps with the English-as-a-Second-Language adult-education program. In vocational classes, construction engineers and real-estate agents give their time to supervise students as they build a home and then sell it—for $200,000. The profits cover supplies for new projects.

More than 12,000 citizens of Montgomery County devote an average of 2½ hours a week to the schools. They don't replace teachers, but they do support and supplement them, and if a dollar value were attached to their services it would equal more than $4 million a year.

Around the nation, the story is repeated with local variations. "Our money never sleeps," says George N. Smith, superintendent of the Mesa, Ariz., public schools. Instead, his dollars are wide-awake, clicking off the highest interest he can find. Every school dollar—bond proceeds, tax money, operating funds, payrolls, adult-education tuitions, rentals of school facilities, student-activity fees and club dues—goes into certificates of deposit or Treasury bills until needed. Last year, with this

simple strategy, Smith turned a neat profit of more than $5 million for his taxpayers.

Mesa's administrative costs are 36-percent less than the state average. An energy-conservation program and a computerized bus schedule save money on heating and transportation. Like a number of other districts, Mesa has a self-insurance program. The premiums paid by teachers and other employees are placed in an insurance trust fund, a fund that fattens in high-interest Treasury bills. With self-insurance savings, Mesa schools have been able to add benefits, such as a dental plan, without increasing premiums.

"A large public-school system is like a large public corporation, with the citizens as stockholders," says Smith. His stockholders seem happy. In a national Gallup poll, only 36 percent of those asked said they would give their schools a grade of A or B. In a poll of Mesa citizens, the percentage soared to 72 percent.

Some schools are finding help by going into partnership with big business. In Oakland, Calif., through the Adopt-a-School program, many high schools and junior highs have been taken under a corporate wing. On the theory that a well-educated work force is good for business, the Kaiser Aluminum & Chemical Corp. "adopted" Oakland High. Kaiser Aluminum executives surveyed school needs and found that one-fourth of the students were reading below grade level. They provided dollars and

people for a reading lab and for Success on the Move, a work-study program designed to place students in paying jobs.

As the community reaches into the school, schools are beginning to reach out. In West Dunbar, W.Va., for instance, a road was badly needed. The vocational schools made it their project. The students' labor and the schools' heavy equipment made the difference between the gravel road that federal money would have paid for and the paved road that was put in.

Typically four of every five dollars in a school budget go to pay salaries—mostly teachers' salaries—but budget slashers tread carefully in the classroom. Fewer teachers can be a false economy; it can cheapen education. Still, even here, there are ways to save.

A number of schools are proposing cash bonuses for older teachers who decide to retire early. These schools then save the annual difference between the top-step salary an older teacher earns and the first-step salary at which a new young teacher can be hired. Recognizing that senior teachers often have priceless experience, schools in San Francisco and in Jacksonville, Ill., are offering those who do retire a chance to continue to earn money as part-time school consultants.

Syosset, N.Y., has come up with an alternative to expensive substitute teachers. When a teacher is absent for a day or two, students can attend sessions of an enrichment program—which can offer anything from a guest lecture by a visiting writer, artist or politician to a demonstration of the Moog Synthesizer.

Many school systems, forced by budget cuts to lay off teachers, have provided special training programs for the teachers who are left. Such training can pay big dividends. School officials in Coventry, R.I., went to their local bank and asked for a $5000 grant for a teacher-

training program called Mastery Learning. Math and English scores climbed so high at the Coventry junior high and other schools using this program that a national magazine identified them as "The Schools Where Everyone Gets A's."

Desperate over the rising costs of heating, electricity and transportation, a dozen rural Colorado school districts put their schools on a four-day week of approximately 7½-hour days. On average, the districts cut bus maintenance and gasoline costs by 20 percent and utilities costs by 7 to 25 percent. What's more, longer class periods meant less "getting organized" time and more teaching time. The result: higher student-achievement scores. Attendance improved too. At the end of the first year, the program was providing so many bonuses that ten new districts also decided

to try it; six additional districts have been approved for the 1982-83 school year.

In San Antonio, Texas, a School Watch program was set up to help curb theft and vandalism. Ten thousand cards telling how to spot suspicious goings-on and where to call for help were distributed to people who live near schools. The program paid for itself in the first week, when two burglaries were stopped by timely phone calls.

"Does every school have to have a computer program or an advanced-placement program?" asks John Green. "Or can they make better use of space, personnel and money by sharing?"

Green is executive director of the Education Collaborative for Greater Boston (EDCO), a cooperative agency helping Boston and 14 neighboring school districts to save money by sharing programs rather than duplicating them. Within EDCO, if one school has empty spaces in, say, a class for the hearing-impaired, another district can send its students there. The district pays tuition for its exchange students, but that costs far less than setting up a separate program.

In a number of states, small school districts are joining hands when they go shopping, to take advantage of the discounts that come with large, joint purchases. Schools in Holyoke, Colo., found they could provide enrichment programs for gifted youngsters for less money by contracting with a nearby community college.

Americans have always thought of public schools as free schools, and the idea of giving money to them takes some getting used to. Still, more and more public schools are turning to fund-raising techniques that have worked well for private schools and colleges. California's Acalanes Union High School District appeals to its alumni for donations, just as universities have always done. In Phoenix, Ariz., state school superintendent Carolyn Warner is urging public schools to borrow a college idea and ask alumni and local businesses to endow a chair (provide the funds for a teaching position) in math, science, industrial arts or English.

WHICH IDEAS will work for your child's school? Less money for education seems to be the writing on the blackboard, and some schools have read it sooner than others. Parents and school administrators cannot erase the hard economic facts, but they can work together to find creative ways out of the school daze.

DRINK CHAMPAGNE for defeats as well as for victories. It tastes the same, and you need it more. —Edmund Ward, *The Main Chance* (Coward, McCann & Geoghegan)

GRAND CAMP Alaska Native Brotherhood Organized 1912
INCORPORATED

JAN 28 1983

TESTIMONY BEFORE THE HEALTH & SOCIAL SERVICES COMMITTEE

Madam Chairperson and members of this committee.
I appreciate this opportunity to speak before this committee.

My name is Ron Williams, President of the Grand Camp of the Alaska Native Brotherhood. The Alaska Native Brotherhood has local camps in all of the communities in Southeast Alaska. The local ANB camps are very concerned about the financial status of the schools in their communities.

It is our understanding that some of these schools have already cut back on their programs and staff due to lack of funds for their school year. We also understand that even with these cut backs, there still are not enough funds to maintain the level of programs and for the balance of this school year. Should additional funds not be obtained, these schools would end up with only classroom instructions and all additional programs would have to be eliminated. This would be very sad, as you would have to wonder in the future if you did the right thing by not allowing the schools to have additional funds.

The lower "48" schools have various educational opportunities available to them. The school boards and teachers have available to them right in their backyards cultural activities, all sports activities and depending on their own imagination, the teachers

can design their classroom instructional material so that their students can see for themselves why it is education is important. Not so with the schools in Southeast Alaska, because of their isolation. At best, these students' exposure to education is their teachers, textbooks and extra curricular activities. Should any of these be eliminated, the quality of exposure declines to the point where these students cannot compete in the real world.

Since its inception 71 years ago, the Alaska Native Brotherhood has always been concerned about education in Alaska. We feel that education is the only investment that cannot be lost. We urge this committee to recommend passage of HB-73.

Thank you.

Mac –

question: must supplemental approp. be pro-rated (across the board) or is it possible to fund at district level (ear-marked funding)?

– Title 14 – statutory guidelines attached.

– I asked Dick Bradley of legal services this question (he was the only atty. available to assist briefly in interpreting statutes) – his reply:

The legislature may ~~supplementally approp.~~ funds to any district they choose – it is possible to (write legislation) in this manner – however politically unpopular! Supp. Approp, of course, are "one time laws" and do not remain in statutes. This allows for the ~~reduced~~ sections regarding the basic aid & population funding formulas to be unchanged.

One attorney's opinion!

I will run this question by the legal services atty assigned to educ. in the a.m. (not avail at this time)

– Suggestion – the committee may take 'public testimony' at tomorrow's meeting ~~today~~ on HB 73/35:3 – hold the bill over for a "mark up" session at the next committee meeting at which time we can have a CS before the

committee for possible approval. (After you've spoken w/ them individually.

CS options

1) 22 million - as you proposed

2) Draft for mark up session after obtaining individual district needs — with approp. earmarked specifically.

dinner

NOTES TO DECISIONS

Legislative decides what types of education are to be publicly supported. — In Alaska the power of deciding what types of education are to be publicly supported, either under the School Foundation Act or by tax exemption, is vested with the legislature. McKee v. Evans, Sup. Ct. Op. No. 740 (File No. 1382), 490 P.2d 1226 (1971).

Sec. 14.17.020. State aid.

Repealed by § 1 ch 238 SLA 1970.

Editor's notes. — The repealed section derived from § 1.03, ch. 164, SLA 1962.

Sec. 14.17.021. Basic state aid. (a) The amount of basic state aid for which each district is eligible is calculated by multiplying the instructional unit allotment of the district as established under AS 14.17.051 by the number of allowable instructional units in the district as established under AS 14.17.041.

(b) If permitted under § 5(d)(2) of P.L. 81-874, as amended, (20 U.S.C. 240(d)) and the regulations adopted under it (45 C.F.R. 115.60 — 115.66), the amount of basic state aid to a district may be reduced by up to 80 percent of the entitlement of the district to federal financial assistance under P.L. 81-874, as amended, (20 U.S.C. 236 — 244), for the prior fiscal year. (§ 4 ch 238 SLA 1970; am §§ 1, 2 ch 81 SLA 1975; am §§ 1, 2 ch 173 SLA 1976; am §§ 2, 3 ch 90 SLA 1977; am §§ 3, 4 ch 26 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

NOTES TO DECISIONS

That the legislature has seen fit to delegate certain educational functions to local boards in order that Alaska schools might be adapted to meet the varying conditions of different localities does not diminish constitutionally mandated state control over education under Alaska Const., art. VII, § 1. Macauley v. Hildebrand, Sup. Ct. Op. No. 741 (File No. 1550), 491 P.2d 120 (1971).

Sec. 14.17.022. Funds for centralized correspondence study. Funds for providing centralized correspondence study programs for students not enrolled in an approved school district correspondence study program shall include an appropriation from the public school foundation account in an amount calculated by multiplying the base instructional unit by the total number of instructional units as determined by applying the number of correspondence students to AS 14.17.041(a). (§ 3 ch 190 SLA 1975)

Legislative history reports. — ort on ch. 190, SLA 1975 (HCS C ; see 1975 House Journal, p. 12

Sec. 14.17.023. Supplem basic state aid under AS supplemental equalization ai section.

(b) The amount of supplem calculated by mutiplying the prior fiscal year under AS 14 lated in (c) of this section. Thi of the average local tax contr bership for school operating c or in the fiscal year ending J

(c) The amount per ADM c lated as the amount equal t pupil in average daily membe and borough school districts

(d) The amount of supple determined in (b) of this se instructional unit allotment SLA 1980)

Sec. 14.17.030. Require

Repealed by § 11 ch 95 S

Editor's notes. — The repealed derived from § 1.07, ch. 164, SLA 1 amended by § 1, ch. 70, SLA 1963.

Sec. 14.17.031. Instruct instructional units within e

(1) the number of units f units for secondary schools a or (d);

(2) the number of units fo 14.17.041(e) as approved by

(3) the number of units f 14.17.041(f) as approved by

(4) if the district has five an approved district corre units for correspondence pu correspondence pupils to A

(5) the number of units f 14.17.041(g) as approved b

(b) A school district s allowable instructional un schools except as provided

Legislative history reports. — For report on ch. 190, SLA 1975 (HCS CSSB 98), see 1975 House Journal, p. 1277.

Sec. 14.17.023. Supplemental equalization aid. (a) In addition to basic state aid under AS 14.17.021, each district is entitled to supplemental equalization aid, as determined in (b), (c) and (d) of this section.

(b) The amount of supplemental equalization aid for a district is calculated by mutiplying the ADM of the district as reported for the prior fiscal year under AS 14.17.180 by the amount per ADM calculated in (c) of this section. This amount shall be reduced by the amount of the average local tax contributions per pupil in average daily membership for school operating costs in that district in the prior fiscal year or in the fiscal year ending June 30, 1979, whichever is higher.

(c) The amount per ADM of supplemental equalization aid is calculated as the amount equal to the average local tax contributions per pupil in average daily membership for school operating costs in the city and borough school districts in the prior fiscal year.

(d) The amount of supplemental equalization aid for each district determined in (b) of this section shall be adjusted by the district's instructional unit allotment established in AS 14.17.051. (§ 5 ch 26 SLA 1980)

Sec. 14.17.030. Required local effort.

Repealed by § 11 ch 95 SLA 1969.

Editor's notes. — The repealed section derived from § 1.07, ch. 164, SLA 1962, as amended by § 1, ch. 70, SLA 1963.

Sec. 14.17.031. Instructional units. (a) The total number of instructional units within each school district is the sum of

(1) the number of units for elementary schools and the number of units for secondary schools as determined from AS 14.17.041(a), (b), (c), or (d);

(2) the number of units for vocational education determined from AS 14.17.041(e) as approved by the department;

(3) the number of units from special education determined from AS 14.17.041(f) as approved by the department;

(4) if the district has five or more correspondence pupils enrolled in an approved district correspondence study program, the number of units for correspondence pupils determined by applying the number of correspondence pupils to AS 14.17.041(a); and

(5) the number of units for bilingual education determined from AS 14.17.041(g) as approved by the department.

(b) A school district shall compute separately the number of allowable instructional units for each of its elementary and secondary schools except as provided in (c) of this section.

Sec. 14.17.075. Supplemental allocation.

Repealed by § 1 ch 238 SLA 1970.

Editor's notes. — The repealed section derived from § 2, ch. 125, SLA 1968, and § 11, ch. 95, SLA 1969.

75 C.J.S. Schools and School Districts, §§ 83, 90; 79 C.J.S. Schools and School Districts, §§ 325-331.

Sec. 14.17.080. Computation by district. By October 30 of the pre-fiscal year each district shall submit to the commissioner a preliminary report of computations for the following fiscal year of the district's basic need as defined in AS 14.17.021; the amount which it expects to match under the provisions of AS 14.17.071; and the amount for supplemental programs which has been approved for funding consideration by the commissioner. Each district shall make the computations in the manner prescribed by AS 14.17.080 — 14.17.150. The computations are the basis for requesting legislative appropriations and for making preliminary payments under the public school foundation program. (§ 2.01 ch 164 SLA 1962; am § 5 ch 238 SLA 1970)

Revisor's notes. — As a result of the amendments in Chapter 26, SLA 1980, "basic need" is no longer defined in AS 14.17.021. Rather, that section defines "basic state aid." AS 14.17.071 mentioned in this section was repealed by SLA 1980, ch. 26, § 21.

Sec. 14.17.081. Minimum expenditure for instruction. (a) Each district shall budget for and spend a minimum of 55 percent of its school operating expenditures in each fiscal year on the instructional component of the district budget.

(b) The commissioner shall reject a district budget which does not comply with (a) of this section and, unless a waiver has been granted by the board under (d) of this section, shall withhold payments of state aid from that district, beginning with the payment for the second full

month after rejection and continuing until the school board of the district revises the district budget to comply with (a) of this section.

(c) The commissioner shall review the annual audit of each district for compliance with the expenditure requirements of (a) of this section. If the commissioner determines that a district does not meet those requirements, the commissioner shall advise the district of the determination and calculate the percentage of deficiency in required expenditure and deduct that percentage from state aid paid to the district for the current fiscal year, beginning with the payment for the second full month after the determination, unless a waiver has been granted by the board under (d) of this section.

(d) A district which has been determined by the commissioner to be out of compliance with the requirements of this section may, within 20 days of the commissioner's determination, request a waiver by the board of the imposition by the commissioner of any reduction in state aid payments under (b) or (c) of this section. The request must be submitted to the Legislative Budget and Audit Committee and must be in writing and include an analysis of the reasons and causes for the district's inability to comply with the requirements of this section. The Legislative Budget and Audit Committee shall review the district's request and forward it, along with the committee's recommendations on it, to the board which shall either grant or deny the waiver.

(e) The commissioner shall submit an annual report on actions taken by the commissioner or the board under this section to the Legislative Budget and Audit Committee by April 15 of each year. (§ 15 ch 26 SLA 1980)

Revisor's notes. — Throughout the section, the word, "board" was substituted for "state board of education" by the revisor of statutes under the authority of AS 01.05.031 and to conform to AS 14.60.010.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.17.082. Fund balance changes in school operating fund. (a) Each district having at least 400 instructional units under AS 14.17.031(a) may accumulate a fund balance in the school operating fund of seven percent of its expenditures. Each district having less than 400 instructional units may accumulate a fund balance of 10 percent of its expenditures.

(b) The commissioner shall review the annual audit of each district to ascertain changes in the year-end operating fund balance of the districts, and notify districts and the board, through a written report, of any fund balance accumulation greater than that permitted under (a) of this section.

(c) The board shall review the reports submitted to it under (b) of this section and submit a report making recommendations with respect to the legislative treatment of the fund balances of those districts to the

Legislative Budget and Audit Commi

Article 3. Procedure for Payment of Public School Foundation Funds to Districts.

Section

160. Allocation of funds on preliminary computations
170. Payment under adjusted computations
180. Payment under final computation
190. Restrictions governing receipt and expenditure of money from public school foundation account

---

Collateral references. — 79 C.J.S Schools and School Districts, §§ 423-427.

Right of school district to maintain action based on misapportionment of school money. 105 ALR 1273.

Determination of school attendance, enrollment, or pupil population for purpose of apportionment of funds. 80 ALR2d 953.

Sec. 14.17.160. **Allocation of funds on preliminary computations.** The commissioner shall determine the state aid for each school district on the basis of the pre-fiscal year computations. Beginning July 15 of the fiscal year and on the 15th day of each month, for seven successive months, one-twelfth of each district's state aid shall be distributed. (§ 3.01 ch 164 SLA 1962; am § 3 ch 95 SLA 1969; am § 8 ch 238 SLA 1970)

Sec. 14.17.170. **Payment under adjusted computations.** Each district shall make a report at the end of the first nine weeks of school, which contains a new estimate of its average daily membership for the fiscal year and other information which will aid the commissioner in making a more accurate determination of each district's state aid. This new estimate and information of average daily membership shall be the basis for the computation and distribution of each district's state aid for the balance of the fiscal year. The commissioner shall, on the basis of this new estimate and information, make a recomputation of each district's state aid. Before December 2, the commissioner shall notify each district of changes made in its state aid. The commissioner shall also determine whether the money in the public school foundation account is sufficient to meet each district's state aid for the fiscal year, and, if the money is not sufficient, the commissioner shall immediately inform the governor of the amount of additional appropriation the commissioner estimates will be necessary to carry out the public school foundation program for the rest of the fiscal year. Beginning February 15 and on the 15th of each subsequent month, one-fifth of the

recomputed balance of each district's state aid shall be distributed. However, one-half of the June payment shall be withheld pending a final determination of the district's state aid. (§ 3.02 ch 164 SLA 1962; am § 1 ch 169 SLA 1968; am § 4 ch 95 SLA 1969; am § 9 ch 238 SLA 1970; am § 1 ch 135 SLA 1975)

Editor's notes. — In the fifth sentence, the words "the commissioner" were substituted for "he" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.17.180. Payment under final computation. Before June 16 each district shall transmit to the commissioner a final computation of the district's state aid. The commissioner shall process each district's computation in the manner provided by AS 14.17.150(a). However, in no event may the entitlement of a school district to state aid under AS 14.17.021 be less than that computed under this section for the preceding year, except as otherwise provided in AS 14.17.031, or under AS 14.17.170, whichever is greater. Additional state aid shall be obligated by the commissioner before June 30. If the district received more state aid money than it was entitled to under this chapter, it shall immediately, after notice from the commissioner of the overpayment, remit the amount of overpayment to the commissioner to be returned to the public school foundation account. (§ 3.03 ch 164 SLA 1962; am § 5 ch 95 SLA 1969; am § 10 ch 238 SLA 1970; am § 2 ch 135 SLA 1975; am § 16 ch 26 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the third sentence.

Sec. 14.17.190. Restrictions governing receipt and expenditure of money from public school foundation account. (a) The public school foundation money distributed to a district during a year shall be received, held, and expended by the district subject to the provisions of law and regulations promulgated by the department.

(b) Each district shall maintain financial records of the receipt and disbursement of public school foundation money and money acquired from local effort. The records must be in the form required by the commissioner and are subject to audit by the commissioner or the board at any time. (§ 3.04 ch 164 SLA 1962; am § 5 ch 98 SLA 1966; am § 6 ch 95 SLA 1969)

Revisor's notes. — The reference in subsection (b) to "local effort" is apparently obsolete in light of the repeal of AS 14.17.030 and AS 14.17.071.

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)
LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

School District	FINANCIAL: Total Budget	FINANCIAL: Total Shortfall	IMPACT OF SHORTFALL: Number of staff that were not hired or cutback during the school year. Staff Certif.	Staff Classif.	Comments	How many students in your district would be affected by the reduction or delay of these programs? No.	Comments
Adak	$5,591,923	$323,147	0	0	If supplemental fails: cut 2 certif. cut 3 classif., cut spec.ed.& voc.ed. and capital outlay, travel and student activity program.	150	Offset 150 spec.ed., voc.ed. and enrichment.
Anchorage	$166,389,832	$11,200,000	28.5	22.5	The staff reduction has adversely affected the instructional program offerings and class sizes. It has also reduced the custodial and maintenance programs in the school buildings. Included in the more than 100 reductions were the ff: the elem. general music program was eliminated; school activities were significantly reduced; needed replacement equipment was not purchased; and 23 sched. major maintenance projects were eliminated.	39,325	Reductions were necessary on a districtwide basis and therefore included a broad spectrum of programs and services directly related to the instruction of every student in the District.
Annette Island (Metlakatla)	$2,546,542	$194,286	2	1	$113,610 of budget for FY83 put on hold. Teaching supplies equipment, travel, support services, and activity funds have either been cut or put on hold. Remainder of shortfall would have to be taken from FY82 carryover which in FY84 would seriously cut programs.	338	Considering current budgeting our FY84 programs are in serious jeopardy. We will have less than 2% carryover if the shortfall is not corrected.
Chatham	$2,113,598	$81,504	0	0	We have continued as is - largely based on the fact that we anticipate additional funding and we have had a fund balance to bail us out.	0	
Copper River REAA #17	$4,763,539	$603,063	1	2	The lack of a viable working capital reserve will also seriously impact interest income that is counted as local revenue.	569	The "real" impact will be in FY84 since we had a much needed area differential increase last year that we accrued and are spending this year to minimize the negative impacts of these shortfalls.
Delta/Greely	$6,100,057	$319,142	2	1	One reading teacher and one elem. teacher were not hired as planned in the preliminary budget.	All	Our first cutback would be in the area of custodial service and then in clerical service. Lunch programs might go also!
Dillingham	$3,900,000	$275,000	0	0	None.	0	None.
Fairbanks	$55,434,070	$2,934,167	8	13	On June 22, the Fairbanks North Star Borough S.D. cut 1.5 million from its approved operating budget. Cuts included: reduction of secretarial help at Central Office, 2) elimination of 2 admin. positions (director of program, planning & evaluation and internal auditor), reduction of temporary salaries, secondary gifted/talented program reduction (2), reduction in boiler operators, elimination of a bus-aide program (10), and the elimination of various reserve accounts. In addition to those cuts all necessary personnel have not been hired as a result of increased enrollment and consequently classrooms are more crowded than usual (5). These steps were taken in order to absorb the impact of the initial 4% reduction in foundation funding and to control ongoing costs in view of further potential reductions.		Impact of the shortfall is not readily definable. 12,000 district students are going to be affected to some degree or other. To address the problem, a freeze has been placed on the purchase of new equipment and the implementation of budgeted maintenance projects which do not affect health and life-safety of district students and personnel. Contingency plans are being developed and the Board of Education will meet in a work session on Tuesday, Jan. 25, to consider specific plans to cover the approximately $1.7-M problem which exists as a result of the foundation reduction.

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)

LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

	FINANCIAL		IMPACT OF SHORTFALL				
			Number of staff that were not hired or cutback during the school year.			How many students in your district would be affected by the reduction or delay of these programs?	
School District	Total Budget	Total Shortfall	Staff Certif.	Staff Classif.	Comments	No.	Comments
Galena	$1,675,177	$152,513	0	0	There were no programs reduced because of the shortfall either before the start of school nor during school. However, if there is not a supplemental bill passed for the 33.7-M, we will have to reduce current year spending. The deadline for this decision will be January 28, 1983. No programs delayed until 1983-84 school year. We will have to cut back both certif. and classif. for 1983-84. Since we will have to use other district funds for the remainder of the current year, if supplemental funding is not forthcoming.	57	Since we have a 3-yr teacher agreement and there are 2 yrs to go if the shortfall and forward funding are not handled all 140 of our students will be affected by the Board's inability to provide a quality education opportunity to its students.
Haines	(See attached)		.5	0	We had an October resignation. We did not fill the vacancy and will not until we see the financial picture.	-	None.
Iditarod Area	$5,055,018	$454,922	1	0	One top admin. position has been left vacant. Several teacher aides would have been terminated but we were able to pick them up under a new Title VII grant.	All (327)	Reduced itinerant teacher travel. Reduction or elimination of educ. field trips. Reduction in after schc student and community use of school facilities.
Juneau	$19,725,688	$1,263,312	10	6	None	4400	All are affected one way or another.
Kenai Penin.	$36,079,553	$2,407,151	0	0	Programs reduced prior to start of school as a result of reduced foundation funding $954,697. Further cuts required if supplemental is not forthcoming $715,533 (including 33.5 teacher aides).	7,000	All are affected including communities as a whole. We have attempted to make our reductions in areas that would least affect the basic education of the student. However, the magnitude of the reduction has forced us to make some reductions affecting the basics.
Ketchikan	$11,846,667	$915,222	1	7	We have not revised the budget to fully reflect the shortfall. We are considering much more staff reduction.	2476	All students are affected.
Lake & Penn	$5,609,989	$537,890 (based on 10%)		8	Voc. ed. reduced prior to start of year. Programs reduced during school year: Voc. ed, purch, cont. svs of spc st fld exper & st act fund.	All (360 ADM)	None.
Mat-Su *revised as of 11/30/82.	$27,455,691*	$1,707,424	18.5	7.5	(See attached)	2,800 of 5,600.	Probably at least 1/2 of our students were/are being adversely affected in one way or another.
Nenana	$2,137,630	$398,725	0	0		0	We are using our reserves to carry through this year. Next year will be the problem, unless we receive more money.
North Slope	$23,500,000	$1,200,000	10	10-25 total support positions.	Curr. center - Maintenance	1,250	Indirectly
Northwest Arctic	$15,115,250	$1,116,838	0	0	Shortfall antic during budget prep. Spec. ed., voc. ed. & bilingual moved up to offset shortfall.	None	No adverse this year - but could next year.
Pelican City	$632,673	$60,000	0	0	This is very difficult to do as we only hire 1 custodian & 1 bookkeeper/ secretary. We do not plan to cut contracted teachers, but will cut 1.5 positions next year if this continues.	55	We have cut back on library purchases, student travel (ie. educ. field trips and athletic), teaching supplies & bldg. maint.
Pribilof	$2,400,000	5% or whatever % becomes.	1	1	None.	165	All students

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)

LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

School District	FINANCIAL: Total Budget	FINANCIAL: Total Shortfall	IMPACT OF SHORTFALL: Number of staff that were not hired or cutback during the school year. Staff Certif.	Staff Classif.	Comments	How many students in your district would be affected by the reduction or delay of these programs? No.	Comments
Railbelt	$3,786,770	$257,997	0	0	No program reduced prior to start of this year, nor during year. No program delayed. Basically we will be able to use all of our carryover monies to do so.	-	None this year, however, all will be affected.
Southeast Isl.	$4,623,020	$154,225	2	4.5(FTE)	The negative effects of the shortfall (actual & potential) have included the ff: 1. Little or less than anticipated improvement in programs or curric. areas we consider to be below standard for a district such as this one, including devel. of school libraries, improv. of our voc. ed. and computer educ. programs, & ability to provide necessary inservice programs to our teachers. In Maintenance/Operations we have been forced to postpone some basic improvements to our bldgs. and shelve plans to replace some teacher housing badly in need of same. If the shortfall is much greater than the 4%, we would n only lose our ability to provide and maintain teacher housing in logging communities as well as to prevent high teacher turnover), but would also lose our ability to move state-owned sch bldgs when a logging camp moves (as we do once or twice per year at great cost). The above represent some examples, as there would be prog/staff cuts in other areas in the event of a 5-10% shortfall.		All students in the district would be affected by further cuts.
Southwest Region					On the short-term basis, the Southwest Region School Board has approved postponement of physical plant improvement projects, curtailed preventative maintenance, and eliminated scheduled improvement in teacher housing.		
Valdez	$8,100,000	$361,002			Reprioritizing of programs. If a supplemental appropriation is not forthcoming in FY 83 our effective schooling program will be delayed for 2 years.	-	None
Wrangell	$2,637,777	$85,000			At this time no programs or staff have been reduced. However, if supplemental is not available then programs such as activities, classroom aides, art etc. will be reduced or deleted.	350 approx.	No comment.
Yukon Flats	$4,559,682	$182,387	3	1	Did not hire 1 f t - voc ed no P.E. & counselor position 1 non-cert village counselor. Cut back std act & staff travel. Freeze bal yr all purchases except emergency.	All 331 125 HS incl.	High scl w/lack of counselors.
Yukon Koyukuk	$8,576,637	$834,745	5*	4.5 FTE	Anticipating a 4% reduction, the above positions were cut prior to the start of school. If reduction is 11%, additional positions or hours will have to be cut.	556	11% of the total district budget has been placed on hold as of this point. This essentially placed a stop to the following areas: 1. supplies, 2. equipment, 3. textbooks, 4. student activities, 5. student travel, 6. staff inservice, 7. staff travel. Basically we are heating heating and meeting emergency repairs, teaching classes and paying employees.

[redacted] - Every reason to believe that Gov's is coming in w/a new fiscal note of approx. 19 mil based on the fact that the 14 mil deliberately deducted from last years budget will not be supplementally refunded.

Office of Budget & Mgt cannot release policy yet.

Considering a ½ of 1% contingency allowed on a budget of 425 mill to cover additional enrollment increases that will undoubtedly occur from Nov to June that are not yet even counted - an additional 2 mil. could be added to the basic need of 19 million.

STATE OF ALASKA
DEPARTMENT OF EDUCATION
OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH F
STATE OFFICE BUILDING
JUNEAU, ALASKA 99811
PHONE:

December 23, 1982

Rob Lehr, Director
Division of Budget & Management
Office of the Governor
Pouch AM
Juneau, Alaska 99811

Dear Mr. Lehr:

The Department of Education requests a $19,314.9 FY 83 general fund supplemental appropriation for Financial Support BRU. This supplemental will be used to fund Foundation Program requirements that exceed the FY 83 continuation level funding requested by the department.

FY 83 Foundation Program Requirements	$425,500.0
FY 83 Department Budget Request	406,185.1
This Supplemental Request	$ 19,314.9

Distribution by component of this supplemental appropriation is as follows:

Component	Amount
Student ADM Support	17,196.5
Special Education Adjustment	4,044.0
Vocational Ed. Adjustment	(2,609.4)
Correspondence Study - DOE	(143.7)
Correspondence Study - Local	830.3
Bilingual Program Adjustment	322.4
Supplemental Equalization Aid	(325.2)
TOTAL	19,314.9

Sincerely,

Marshall L. Lind
Commissioner

1/27/83, JUNE, ANC LIO, MSG 4342

TO: REPRESENTATIVES ABOOD AND [redacted]

FROM: JIM GRAHM, 4411 WORONZOFF, ANCHORAGE, AK 99503
(H) 248-4411 (W) 243-3226

I STRONGLY ENCOURAGE YOUR INFLUENTIAL SUPPORT FOR HB73 ANDRELEASE OF THOSE FUNDS TO MAINTAIN CURRENT BUDGETED EDUCATIONAL PROGRAMS.

/S/ PRINCIPAL OF TURNAGAIN ELEMENTARY SCHOOL
JIM GRAHM

28 Feb, '83

Rep. Mae Tischer,

I applaud what you are doing with the supplemental appropriation. Hold firm, our prayers are with you today!

Respectfully,

Gerri Biborski

CONTACT: Linda Otey

January 28, 1983

465-3777

The hottest issue in the House of Representatives this week is HB 73, a bill which would make a supplemental appropriation of $33,746,700 to the Public School Foundation Program. The bill was heard in the Health, Education and Social Services Committee on Monday and held for further review.

According to Rep. Mae Tischer, co-chair of the HESS committe, the amount designated in the original bill is more than required. The committee substitute (which appropriates $22,380,600) would provide for contingencies due to unanticipated enrollment increases, the BIA transfer of schools to Alaskan school districts and unforeseen complications of the legislative mandate to scale down education spending because of reduced state revenues. It will not, however, provide additonal funding to enhance program expansion.

The move to hold HB 73 in committee for additional hearings prompted strong opposition from several members of the House. Rep. Tischer responded to this saying, "I was sent to Juneau to do a job based on a philosophy of fiscal responsibility and reducing government growth; if that means being on the hot seat, then I'll just have to take it."

Tischer pointed out that those members who wanted to pass the bill out of committee Monday would have done so before the Committee had the opportunity to adequately examine the fiscal information and back-up material provided by the Department of Education.

More "Buy" for Your School Bucks

By Claire Safran

School-budget cuts are forcing administrators, parents and local businesses to find creative ways to make better scholars with fewer dollars

In Rocky Ford, Colo., new shadows lengthen in school hallways. Light bulbs have been removed from every other fixture to cut electricity costs. With fewer and fewer dollars for school budgets, every penny has to count.

▶ In the hills of Kanawha County, West Virginia, students in shop classes are building some of the portable classrooms that the district needs but cannot afford to buy. Among the people teaching them to use hammer and saw are retired craftsmen, hired at minimum wage to stretch the teaching staff.

▶ A sharp-eyed visitor to Portland, Ore., schools may spot paper scraps and chalk dust on classroom floors. By reducing custodial services—cleaning the classrooms only every other day, for one thing—city schools will save more than a million dollars this year.

The "new math" that America's public schools are struggling with these days is mostly subtraction. Federal education budget cuts have taken effect this fall; most states and many local school districts are providing less money. At every level, this financial crunch is becoming as familiar as the screech of chalk on a blackboard.

In a tight-money situation the most tempting cut may be the "frills"—music, art, physical education, math and English electives, a choice of foreign languages, driver education. But one child's "frill" may be another child's "basic."

Worried that their children may be shortchanged on learning, mothers and fathers are poring over school budgets, doing their homework, searching for better answers. And better answers do exist. A survey of schools around the country revealed many new and

imaginative strategies for making dollars stretch further and work harder for good education.

When money is the problem, people may be the solution. In Montgomery County, Maryland, the third-grade reading tutor is a volunteer, recruited from a nearby home for the aged. A bilingual factory worker helps with the English-as-a-Second-Language adult-education program. In vocational classes, construction engineers and real-estate agents give their time to supervise students as they build a home and then sell it—for $200,000. The profits cover supplies for new projects.

More than 12,000 citizens of Montgomery County devote an average of 2½ hours a week to the schools. They don't replace teachers, but they do support and supplement them, and if a dollar value were attached to their services it would equal more than $4 million a year.

Around the nation, the story is repeated with local variations. "Our money never sleeps," says George N. Smith, superintendent of the Mesa, Ariz., public schools. Instead, his dollars are wide-awake, clicking off the highest interest he can find. Every school dollar—bond proceeds, tax money, operating funds, payrolls, adult-education tuitions, rentals of school facilities, student-activity fees and club dues—goes into certificates of deposit or Treasury bills until needed. Last year, with this

simple strategy, Smith turned a neat profit of more than $5 million for his taxpayers.

Mesa's administrative costs are 36-percent less than the state average. An energy-conservation program and a computerized bus schedule save money on heating and transportation. Like a number of other districts, Mesa has a self-insurance program. The premiums paid by teachers and other employees are placed in an insurance trust fund, a fund that fattens in high-interest Treasury bills. With self-insurance savings, Mesa schools have been able to add benefits, such as a dental plan, without increasing premiums.

"A large public-school system is like a large public corporation, with the citizens as stockholders," says Smith. His stockholders seem happy. In a national Gallup poll, only 36 percent of those asked said they would give their schools a grade of A or B. In a poll of Mesa citizens, the percentage soared to 72 percent.

Some schools are finding help by going into partnership with big business. In Oakland, Calif., through the Adopt-a-School program, many high schools and junior highs have been taken under a corporate wing. On the theory that a well-educated work force is good for business, the Kaiser Aluminum & Chemical Corp. "adopted" Oakland High. Kaiser Aluminum executives surveyed school needs and found that one-fourth of the students were reading below grade level. They provided dollars and

people for a reading lab and for Success on the Move, a work-study program designed to place students in paying jobs.

As the community reaches into the school, schools are beginning to reach out. In West Dunbar, W.Va., for instance, a road was badly needed. The vocational schools made it their project. The students' labor and the schools' heavy equipment made the difference between the gravel road that federal money would have paid for and the paved road that was put in.

Typically four of every five dollars in a school budget go to pay salaries—mostly teachers' salaries—but budget slashers tread carefully in the classroom. Fewer teachers can be a false economy; it can cheapen education. Still, even here, there are ways to save.

A number of schools are proposing cash bonuses for older teachers who decide to retire early. These schools then save the annual difference between the top-step salary an older teacher earns and the first-step salary at which a new young teacher can be hired. Recognizing that senior teachers often have priceless experience, schools in San Francisco and in Jacksonville, Ill., are offering those who do retire a chance to continue to earn money as part-time school consultants.

Syosset, N.Y., has come up with an alternative to expensive substitute teachers. When a teacher is absent for a day or two, students can attend sessions of an enrichment program—which can offer anything from a guest lecture by a visiting writer, artist or politician to a demonstration of the Moog Synthesizer.

Many school systems, forced by budget cuts to lay off teachers, have provided special training programs for the teachers who are left. Such training can pay big dividends. School officials in Coventry, R.I., went to their local bank and asked for a $5000 grant for a teacher-

training program called Mastery Learning. Math and English scores climbed so high at the Coventry junior high and other schools using this program that a national magazine identified them as "The Schools Where Everyone Gets A's."

Desperate over the rising costs of heating, electricity and transportation, a dozen rural Colorado school districts put their schools on a four-day week of approximately 7½-hour days. On average, the districts cut bus maintenance and gasoline costs by 20 percent and utilities costs by 7 to 25 percent. What's more, longer class periods meant less "getting organized" time and more teaching time. The result: higher student-achievement scores. Attendance improved too. At the end of the first year, the program was providing so many bonuses that ten new districts also decided

to try it; six additional districts have been approved for the 1982-83 school year.

In San Antonio, Texas, a School Watch program was set up to help curb theft and vandalism. Ten thousand cards telling how to spot suspicious goings-on and where to call for help were distributed to people who live near schools. The program paid for itself in the first week, when two burglaries were stopped by timely phone calls.

"Does every school have to have a computer program or an advanced-placement program?" asks John Green. "Or can they make better use of space; personnel and money by sharing?"

Green is executive director of the Education Collaborative for Greater Boston (EDCO), a cooperative agency helping Boston and 14 neighboring school districts to save money by sharing programs rather than duplicating them. Within EDCO, if one school has empty spaces in, say, a class for the hearing-impaired, another district can send its students there. The district pays tuition for its exchange students, but that costs far less than setting up a separate program.

In a number of states, small school districts are joining hands when they go shopping, to take advantage of the discounts that come with large, joint purchases. Schools in Holyoke, Colo., found they could provide enrichment programs for gifted youngsters for less money by contracting with a nearby community college.

Americans have always thought of public schools as free schools, and the idea of giving money to them takes some getting used to. Still, more and more public schools are turning to fund-raising techniques that have worked well for private schools and colleges. California's Acalanes Union High School District appeals to its alumni for donations, just as universities have always done. In Phoenix, Ariz., state school superintendent Carolyn Warner is urging public schools to borrow a college idea and ask alumni and local businesses to endow a chair (provide the funds for a teaching position) in math, science, industrial arts or English.

WHICH IDEAS will work for your child's school? Less money for education seems to be the writing on the blackboard, and some schools have read it sooner than others. Parents and school administrators cannot erase the hard economic facts, but they can work together to find creative ways out of the school daze.

DRINK CHAMPAGNE for defeats as well as for victories. It tastes the same, and you need it more. —Edmund Ward, *The Main Chance* (Coward, McCann & Geoghegan)

ANCHORAGE SCHOOL DISTRICT
ANCHORAGE, ALASKA

ASD MEMORANDUM #236 (82-83) REVISED December 20, 1982

TO: SCHOOL BOARD

FROM: OFFICE OF THE SUPERINTENDENT

SUBJECT: PLANNED COST REDUCTIONS TO OFFSET STATE REVENUE REDUCTIONS

PERTINENT FACTS:

There is a revenue shortfall in the State Public School Foundation Program. Based upon the District's full entitlement for the projected 1982-83 enrollment the full shortfall was first estimated to be up to $13,000,000 but now appears to be approximately $11,700,000.

At the time the budget was developed the shortfall was thought to be about $5,225,000. At that time it was considered appropriate to provide the expected level of services without seriously impacting local taxes by using almost all of the fund balance, and eliminating most of the reserve incorporated into the original state and other revenue projections. The first revenue reduction of $5,225,000 was therefore provided for in the Adopted Version of the 1982-83 budget.

Because of a student enrollment in excess of that originally planned, the School Board on September 20, 1982 approved a reallocation of up to $1,782,000 from several accounts, including the general music program, to provide for the necessary teachers.

On November 22, 1982, the Board received for discussion purposes further reductions which at that time totaled $4,379,879 to cover an anticipated shortfall from State revenues. The Board also requested an additional million dollars be located to ensure an appropriate fund balance.

Based on current revenue information available from the State and using actual enrollment from the first quarter Foundation Program report, the shortfall from full entitlement is estimated to be approximately $11,700,000. Since there still remains a significant degree of uncertainty, there has been an effort at every level of the District to identify potential cost reductions which could be implemented. Each division has had cost reduction meetings and a total of $7,013,079 of cost reductions have now been identified. The following schedule summarizes these cost reductions.

Division/Units	General Fund Total Budget	Identified Reductions	% Reduction	Number of Positions
Superintendent/School Board	$ 612,831	$ 113,000	18.44%	-0-
Business Management	5,958,295	286,100	4.80	.5
Auxiliary Services	22,024,738	1,520,300	6.90	36
School Management	128,582,975	1,798,000	1.40	28.5
Planning and Development	5,308,940	349,779	6.59	1
Communications	2,759,485	74,800	2.71	1
Labor Relations	130,002	-0-	-0-	-0-
Personnel Services	857,118	20,100	2.35	-0-
Vocational Education	155,448	8,000	5.15	-0-
	$ 166,389,832	4,170,079	2.50	65.0
Other District-Wide Reductions		2,843,000	1.71	-0-
Total Reductions		$ 7,013,079	4.21%	69.0

The effect of these reductions is to cover the revenue shortfall and to leave additional funds of approximately $921,000 available to provide for any further financial contingency. The following schedule summarizes this.

Projected revenue (shortfall)			$ (11,700,000)
Revenue revisions in ASD Adopted Budget			5,225,000
Cost reductions - See prioritized attachment			
	Original	Revised	
1. September 20, 1982	1,782,000	1,717,000	
2. November 22, 1982	4,379,879	4,253,779	
3. December 20, 1982	-0-	1,042,300	
	6,161,879	7,013,079	7,013,079
			538,079
Fund Balance - Beginning of year			383,256
Additional funds projected to be available			$ 921,335

The attached schedules describe in further detail the cost reductions identified, as well as the anticipated impact of the significant cost reductions of $2,000 or more. These cost reductions have been prioritized in five categories A, B, C, D, and E. Category A items are those which would be reinstated first should funds become available. Category B and C items are of intermediate reinstatement priority and category D items would be reinstated last. Category E items would not be reinstated.

RECOMMENDATION:

It it recommended that the School Board authorize the Administration to take the necessary operational steps to effect immediately the cost reductions totaling $7,013,079 which are described in further detail in the attachment to this memorandum.

District-Wide
Proposed Budget Reductions
1982-83

Description	Amount	RP	Impact
First Reduction - September 1982			
Certificated Retirement (TRS)	$ 375,000	E	Rate reduced after budget was approved
Classified Retirement (PERS)	205,000	E	Rate reduced after budget was approved
Pending Negotiations	98,000	E	Contract negotiations complete after budget was approved
	678,000		
Second Reduction - November 1982			
Medical insurance - negotiated lower cost per employee	540,000	E	Rate reduced after budget was approved
Expected savings from normal District-wide employee turnover and unit cost controls	500,000	E	Limited impact - close cost control and review by managers will be necessary
Delayed certificated staff hiring	160,000	E	Increased PTR and class sizes. Reduced educational effectiveness
Restricted hiring practices - initiated 10/26/82	300,000	D	General reduction in level of District delivered services due to vacant positions
Electricity - controlled reduction	135,000	E	Limited impact - some rescheduling of custodial hours, reductions in lighting levels
Heat - controlled reduction	110,000	E	Limited impact - closer thermostat control and lower "off hour" heat levels
	1,745,000		

RP - Reinstatement Priority

District-Wide
Proposed Budget Reductions
1982-83

Description	Amount	RP	Impact
Third Reduction - December 1982			
* Electricity - close schools at least 2 hours earlier in evening	145,000	A	Reduced community and after school use of schools
* Electricity - turn off hockey rink lights at 5:00 p.m.	185,000	A	Elimination of evening use of hockey rinks thereby reducing community use
* Electricity - turn off school outside lighting at 5:00 p.m.	50,000	A	Potentially reduced safety and increased vandalism
Travel Out-of-District - further limit travel	40,000	A	Significant reduction in travel resulting in reduced administrative in-service
	420,000		
Total Reductions	$ 2,843,000		

* Community Organizations Affected by Early Closure

Municipality/Community Schools	Boys Club
Anchorage Community College	Junior Achievement
University of Alaska	Private athletic groups
Municipality/Parks & Recreation	Various Non-profit service organizations i.e., Special Olympics, Crisis Resolution Center, Anchorage Hockey Association, Campfire, etc.
Concerts - benefit and commercial	
Community Council meetings	

District Programs Affected

Dances and social functions	Staff Development
P.T.A. meetings	Evening High School
Music Department programs	Athletic competition

Other Information

There are currently 18 Municipality of Anchorage Community Schools, each with a coordinator and assistant coordinator, using District facilities. These changes would represent a significant cutback in Community Education programs.

All 61 gymnasiums are in use through 10:00 or 11:00 p.m., full time, Monday through Saturday. An early building closure would significantly reduce available gym time for public use.

IV. DATE January 25, 1983 PREPARED BY House HESS

AGENCY Legislature

PHONE 465-3777

Original: Legislative Finance

cc: Budget and Management

Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/80)

Catagories included in the fiscal note to the Committee Substitute to HB 73:

1.	Enrollment Increases (estimate)	6,407.7
2.	BIA School Transfers	7,901.6
3.	New Tanana City School District	855.4
4.	Shortfall (reduction in FY 83 budget)	7,215.9
Total Request for CSHB 73.....		22,380.6

Catagories deleted from the fiscal note attached to the original HB 73 include an appropriation for 'New Secondary Programs' $1,808.4, and 'Special Education Program Increases' $2,558.5. Also deleted from the original request of $33,964.4 was half of the amount requested to cover the reduction appearing in the final FY 83 budget.

Analysis of FY-83 Foundation Supplemental
Revised through CSHB 73

Fiscal Analysis

	Funded through CSHB 73	HB 73
1. Enrollment Increases (estimate)	6,407.7	same..... $6,407.7
See Attachment A & A-1 Comparison figures of 1st qtr '82 and '83, enrollment vs. ADM .		
2. New Secondary Programs...	.00	..... [$1,808,364]
See Attachment B This item has been deleted as per the letter of intent regarding the new fiscal note attached to CSHB 73.		
3. BIA School Transfers.....	7,901.6	same.....7,901.6
See Attachment C & C-1 (C) is catagorized into the effected REAA's and C-1 is a list of the individual schools in transfer.		
4. New Tanana City School District..	855.4	same..... 855.4
See Attachment D New District funded @65,797 per instructional unit (13).		
5. Speical Education Program Increases.....	.00	.....[$2,558,5]
See Attachment E & E-1 Amount included in BIA transfer impacting 4 districts (deleted in CS)		
6. Funding of reduction of FY 83 shortfall with respect to Legislative Intent at 50% level.....	7,215.9	.....[14,431.8]
See Attachment F $14,431.8 cut by 50%		
Total for CSHB 73	$22,380.6	Total,HB 73 $33,746.700

Fiscal note total = $33,963.4 (DOE)

MEMORANDUM State of Alaska

TO: Ron Lehr, Director
Division of Budget & Management
Office of the Governor

DATE: December 20, 1982

FILE NO:

TELEPHONE NO: 465-2875

FROM: Marshall L. Lind
Commissioner
Department of Education

SUBJECT: Request for Restoration of Budget Request

The Department of Education requests consideration be given by the Governor to support full funding of the $406,185.1 FY 83 departmental budget request for Financial Support BRU by restoring the $14,431.8 reduction appearing in the final FY 83 budget. Distribution by component of the restored appropriation is as follows:

Component	Amount
Student ADM Support	$7,779.1
Special Education Adjustment	2,650.8
Vocational Ed. Adjustment	1,297.6
Correspondence Study - DOE	96.6
Correspondence Study - Local	299.8
Bilingual Program Adjustment	604.7
Supplemental Equalization Aid	1,703.2
TOTAL	$14,431.8 x 50% = 7,215.9

MEMORANDUM

To: All House Members

From: Mae Tischer, Co-Chairperson, House HESS MT

RE: CS for HB 73, Supplemental Appropriations to D.O.E.

The new fiscal note of CS HB 73 reduces the amount of the original bill by approximately 11.4 million dollars. The attached documents are for your reference.

A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supplemental in the amount of 33.7 million. Comparing D.O.E.'s fiscal note and breakdown with the 22.3 million requested in CSHB 73:

1. Last session, there was a deliberate shortfall from the requested full funding entitlement which totaled 14.4 million. The intent of this deliberate action taken by the Finance Committee and the Department was to send an urgent message to all school districts, asking them, as in all other state operated categories, to take necessary steps in cutting back costs due to a drastic reduction in State revenues.

2. As predicted, a 38.5% decrease in State revenues occured from Dec. 81 to Dec. 82. Comparing revenues for the first six months of the current fiscal year with the revenues of the first six months of the previous year, the impact on the State has been a decrease of 21.17% thus far.

3. Consequently, the underfunding of last year's request was necessary. CS HB 73 protects the integrity of the '82 legislation.

4. The major validation for the supplemental request is to cover unforeseen costs, such as those earmarked specifically for enrollment increases.

5. Once again, the HESS Committee did not intend to provide additional funds for school district reorganization, as in the 1.8 million dollar category for new junior high schools (attachment B) or to enhance program expansion as in the special education program increases of 2.5 million dollars (attachment E and E-1).

6. These two categories were excluded from the CS for HB 73 because the revised figures produced by the school districts as mandated in AS 14.17.170 by November 1982 showed expanded adjustments and increases.

7. In review, the formula funding levels on which the school district budgets are based can be increased or decreased by various categories. For example, in the case of the 1.8 million category, a secondary (junior high) student allotment is higher than an elementary student allotment, thereby enhancing a district's revenue picture.

8. In regards to the newly created junior high levels cited in attachment B, there is little justification for the revised figures as no new secondary education buildings have been constructed to justify the new junior high levels requested in the FY 83 supplemental.

9. There is great concern over the deletion of special education in the appropriation and its impact on across the board cuts. There is no cause for concern. As testified to by a D.O.E. fiscal analyst, funding will continue at 96% of the full entitlement formula with th 22 million dollar supplemental, as has been the case since the beginning of FY 83, continuing the 4% decrease mandated by last year's Legislature and Finance Committee.

10. As with secondary students, special education students receive a greater allotment than general students. Revisions in this area can also increase a school district's revenue picture and entitlement. Attachment E-1 shows that revised figures impacted special education by 12 units.

11. An average cost of educating a child in the REAA areas (transferred from the BIA) is $65,000. Therefore, 2.5 million is included in the BIA transfer request of 7.9 million dollars.

In responding to the school districts of our respective areas, these concerns can be laid to rest with the help of this explanation. It is certainly not the intent of the committee to force school districts to lay-off teachers or deny our children their rights to public education, nor will this be necessary under present funding formulas. For our childrens' future, we must be fiscally responsible immediately, and not pass the burden of cumulative debt to future generations.

This CS is an attempt to do just that, fill an immediate need based on increased enrollments and separate category and reorganization increases on their own merits.

SECOND READING OF HOUSE BILLS

HB 73 "An Act making a supplemental appropriation to the Department of Education for payments to school districts under the public school foundation program (AS 14.17); and providing for an effective date."
-HESS report w/CSHB 73(HESS) (same title), p. 145
-Zero fiscal note
-Finance report w/CSHB 73(Fin) (same title), w/letter of intent, attached to calendar

LETTER OF INTENT
FOR
CSHB 73 (FINANCE)

It is the intent of the House Finance Committee that in addition to the $17,640,700 appropriated in CSHB 73 (Finance) in general funds for payments to school districts under the public school fundation program (AS 14.17), that $7,901,600 be allocated from the Federal Budget Impact Fund established in Chapter 127, SLA 1982, to cover the cost of transfer of Alaskan B.I.A. day schools from the federal government to the state government. Both amounts shall be for payments to school districts under the public school foundation program (AS 14.17).

Respectfully submitted,

_____
Albert P. Adams, Chairman
House Finance Committee

17 640,700
7,901 600

50. Repealed
51. Instructional unit allotment
56. Base instructional unit
60. Repealed
61. Supplemental programs
70. Repealed
71. Repealed
75. Repealed

Sec. 14.17.010. Public school foundation account. (a) The public school foundation account is established. The account consists of appropriations for distribution to districts or for centralized correspondence study programs under this chapter.

(b) The money of the account may be used only in aid of public schools or for centralized correspondence study programs as provided by this chapter. (Sec. 1.08 ch 164 SLA 1962; Sec. (c) repealed Sec. 11 ch 95 SLA 1969; am Sec. 2 ch 190 SLA 1975)

Sec. 14.17.020. Repealed. (Sec. 1 ch 238 SLA 1970)

Sec. 14.17.021. Basic state aid. (a) The amount of basic state aid for which each district is eligible is calculated by multiplying the instructional unit allotment of the district as established under AS 14.17.051 by the number of allowable instructional units in the district as established under AS 14.17.041.

(b) If permitted under section 5(d)(2) of PL 81-874, as amended, (20 USC 240(d) and the regulations adopted under it (45 CFR 115.60—115.66), the amount of basic state aid to a district may be reduced by up to 80 percent of the entitlement of the district to federal financial assistance under PL 81-874, as amended, (20 USC 236-244), for the prior fiscal year. (Repealed and re-enacted by Sec. 4 ch 26 SLA 1980)

Sec. 14.17.022. Funds for centralized correspondence study. Funds for providing centralized correspondence study programs for students not enrolled in an approved school district correspondence study program shall include an appropriation from the public school foundation account in an amount calculated by multiplying the base instructional unit by the total number of instructional units as determined by applying the number of correspondence students to section 41(a) of this chapter. (Sec. 3 ch 190 SLA 1975)

Sec. 14.17.023. Supplemental equalization aid. (a) In addition to basic state aid under AS 14.17.021, each district is entitled to supplemental equalization aid, as determined in (b), (c) and (d) of this section.

(b) The amount of supplemental equalization aid for a district is calculated by multiplying the ADM of the district as reported for the prior fiscal year under AS 14.17.180 by the amount per ADM calculated in (c) of this section. This amount shall be reduced by the amount of the average local tax contributions per pupil in average daily membership for school operating costs in that district in the prior fiscal year or in the fiscal year ending June 30, 1979, whichever is higher.

(c) The amount per ADM of supplemental equalization aid is calculated as the amount equal to the average local tax contributions per pupil in average daily membership for school operating costs in the city and borough school districts in the prior fiscal year.

(d) The amount of supplemental equalization aid for each district determined in (b) of this section shall be adjusted by the district's instructional unit allotment established in AS 14.17.051. (Added by Sec. 5 ch 26 SLA 1980)

Sec. 14.17.030. Repealed. (Sec. 11 ch 95 SLA 1969)

Sec. 14.17.031. Instructional units. (a) The total number of instructional units within each school district is the sum of

(1) the number of units for elementary schools and the number of units for secondary schools as determined from sec. 41(a), (b), (c), or (d) of this chapter;

(2) the number of units for vocational education determined from section 41(e) of this chapter as approved by the department;

(3) the number of units from special education determined from section 41(f) of this chapter as approved by the department; and

(4) if the district has five or more correspondence pupils enrolled in an approved district correspondence study program, the number of units for correspondence pupils determined by applying the number of correspondence pupils to section 41(a) of this chapter.

(5) the number of units for bilingual education determined from sec. 41(g) of this chapter as approved by the department. (am Sec. 1 ch 115 SLA 1978)

(b) A school district shall compute separately the number of allowable instructional units for each of its elementary and secondary schools except as provided in (c) of this section. (Sec. 6 FCCS SB 199 4/18/80)

(c) The commissioner shall authorize any school in a remote location to establish an associated secondary school when the sum of the average daily membership in grades five through eight is greater than 20. Notwithstanding section 41 of this chapter, any school or school district operating a remote elementary school with 20 or fewer total average daily membership in grades five through eight may conduct a secondary program subject to approval of the commissioner and use the following table to calculate the number of allowable instructional units for the combined elementary and secondary program of the remote school:

ADM	No. Instructional Units
under 12	3
12—20	4
21—32	5

(Sec. 4 ch 238 SLA 1970; am Sec. 3 ch 81 SLA 1975; am Sec. 4 ch 190 SLA 1975; repealed and re-enacted Sec. 5 ch 90 SLA 1977)

(d) If the instructional units which a school district is entitled to under (a) of this section decrease by 10 percent or more from one year to the next, the school district may use the last year before the reduction as a base year and offset its reduction according to the following schedule: (1) for the first year after the base year, the school district is entitled to the instructional units determined under (a)(1) of this section plus 75 percent of the difference in instructional units between the base year and the first year; (2) for the second year after the base year, the school district is entitled to the instructional units determined under (a)(1) of this section plus 50 percent of the difference in instructional units between the base year and the second year; (3) for the third year after the base year, the school district is entitled to the instructional units determined under (a)(1) of this section plus 25 percent of the difference in instructional units between the base year and the third year. The schedule established in this subsection is available to a school district for the three years following the base year only so long as the entitlement to instructional units under (a)(1) of this section for each year is less than the entitlement in the base year. This subsection does not apply to a decrease in instructional units resulting from a loss of enrollment which occurs as a result of a boundary change under AS 29. (Sec. 7 FCCS SB 199 4/18/80)

(e) The commissioner may authorize a school district operating a school in a remote area to calculate the number of instructional units to which the remote school would be entitled if that school were a separate school district and to include that number of instructional units in the total number of instructional units for the district. (Sec. 8 FCCS SB 199 4/18/80)

Sec. 14.17.040. Repealed. (Sec. 1 ch 238 SLA 1970)

Sec. 14.17.041. Table of allowable instructional units. (a) Elementary Schools:

ADM	No. Instructional Units
under 32	3
32--46	4
47—62	5
63—80	6
81 & over	6 plus 1 for each 18 pupils in ADM or fraction of 18

(Sec. 9 FCCS SB 199 4/18/80)

(b) Repealed. (Sec. 20 FCCS SB 199 4/18/80)

(c) Secondary schools:

ADM	No. Instructional Units
under 30	4
30—59	6
60—89	8
90 & over	10 plus 1 for each 18 pupils or fraction of 18

(Sec. 10 FCCS SB 199 4/18/80; am Sec. 11 ch 26 SLA 1980)

(d) Repealed. (Sec. 20 FCCS SB 199 4/18/80)

(e) Vocational education schedule:

ADM Full-Time Equivalent	No. Instructional Units
5—10	1
11--25	2
26—40	3
41 & over	3 plus 1 for each 20 pupils or fraction of 20 pupils in Full-Time Equivalent ADM

(f) Special education schedule:

(1) in districts with ADM of less than 3,000, one instructional unit for each 15 special education pupils or fraction of 15 pupils in ADM;

(2) in districts with ADM of 3,000 or more, one instructional unit for each 11 special education pupils or fraction of 14 pupils in ADM. (repealed and reenacted Sec. 1 ch 119 SLA 1981)

The amendment to AS 14.17.041(f) made by this Act may not be applied to reduce the number of allowable instructional units for special education below the number of units allowed during the school term ending in the calendar year in which this Act takes effect. (Sec. 3 ch 119 SLA 1981)

Notwithstanding section 1 of this Act, in computing the state aid for special education under AS 14.17 for the fiscal year beginning July 1, 1981, a school district or a regional educational attendance area has the same number of allowable instructional units for special education that it had during the fiscal year beginning July 1, 1980. (Sec. 4 ch 119 SLA 1981)

(g) Bilingual education schedule:

Weighted ADM	No. Instructional Units
1—12	1
13—18	2
19—42	3
43 and over	3 plus 1 for each 24 weighted ADM or fraction fo 24 weighted ADM

(am Sec. 2 ch 115 SLA 1978)

(Sec. 4 ch 238 SLA 1970; am Sec. 1 ch 137 SLA 1972; am Sec. 4 ch 81 SLA 1975; am Sec. 7 ch 90 SLA 1977)

Sec. 14.17.050. Repealed. (Sec. 1 ch 238 SLA 1970)

Sec. 14.17.051. Instructional unit allotment. The instructional unit allotment for each school district or regional educational attendance area is as follows:

(1) for Gateway Borough School District, City and Borough of Juneau School District, and Anchorage School District, the district is entitled to receive the base instructional unit allotment;

(2) for Annette Island School District, Petersburg City School District, Wrangell City School District, Sitka Borough School District, and Matanuska-Susitna Borough School District, the district or area is entitled to receive 104 percent of the base instructional unit allotment; (am Sec 3 ch 115 SLA 1978)

(3) for Craig City School District, Hydaburg City School District, Klawock City School District, Kake City School District, Chatham School District, Skagway City School District, Southeast Island School District, and Kenai Peninsula Borough School District, the district or area is entitled to receive 108 percent of the base instructional unit allotment; (am Sec. 4 ch 115 SLA 1978)

(4) for Pelican City School District, Hoonah City School District, and North Star Borough School District, the district or area is entitled to receive 112 percent of the base instructional unit allotment; (am Sec. 5 ch 115 SLA 1978)

(5) for Copper River School District Cordova City School District, Valdez City School district, and Haines Borough School District, the district or area is entitled to receive 115 percent of the base instructional unit allotment;

(6) for Nenana City School District, Delta School District, Alaska Gateway School District, Upper Railbelt Regional School District, Yakutat City School District, Chugach School District, and Copper River School District, the district or area is entitled to receive 120 percent of the base instructional unit allotment; (am Sec. 6 ch 119 SLA 1981)

(7) for Adak Regional School District the area is entitled to receive 140 percent of the base instructional unit allotment;

(8) for Pribilof Islands School District, Aleutian Chain School District, King Cove City School District, Sand Point City School District, and Unalaska City School District, the district or area is entitled to receive 150 percent of the base instructional unit allotment; (am Sec. 12 ch 26 SLA 1980)

(9) for Yukon Flats School District, Dillingham City School District, Bristol Bay Borough School District, Southwest Regional School District, Lake Peninsula School District, Lower Kuskokwim School District, Galena City School District, Kuspuk School District, Yukon-Koyukuk School District, Northwest Arctic School District, Selawik City School District, Nome City School District, Bering Straits School District, Iditarod Area School District, North Slope Borough School District, Lower Yukon School District, and St. Marys City School District, the district or area is entitled to receive 155 percent of the base instructional unit allotment.

(10) for Kodiak Island School District, the district is entitled to receive 116 percent of the base instructional unit allotment. (am Sec. 6 ch 115 SLA 1978)

(am Sec. 8 ch 90 SLA 1977)

Notwithstanding the provisions of AS 14.17.051, as re-enacted by section 8 of this Act, the value of the instructional unit allotment for any school district or regional educational attendance area is not less than it would have been for the fiscal year beginning July 1, 1977 if section 8 of this Act had not been enacted. (Sec. 9 ch 90 SLA 1977)

Sec. 14.17.056. Base instructional unit value. The base instructional unit value for fiscal years beginning on or after July 1, 1981 is $38,590. The base instructional unit value for fiscal years beginning on or after July 1, 1982 is $42,450. (Repealed and reenacted Sec. 7 ch 115 SLA 1978; am Sec. 13, 14 ch 26 SLA 1980; am Sec. 6 ch 119 SLA 1981)

Sec. 14.17.060. Repealed. (Sec. 1 ch 238 SLA 1970)

Sec. 14.17.061. Supplemental programs. (a) In addition to the amounts authorized to be paid to school districts under this chapter, funding of supplemental programs on the same basis as determined in the computation of state aid for the applicable districts, may be recommended by the commissioner.

(b) Applications for supplemental program funds shall be submitted by each school district to the commissioner by September 30 of the pre-fiscal year in the form prescribed by the commissioner.

(c) Federal funds available for aid to local school districts will be included with the state's share in applying the matching ratio. (Sec. 4 ch 238 SLA 1970)

Sec. 14.17.071. Repealed. (Sec. 21 ch 26 SLA 1980)

Sec. 14.17.075. Repealed. (Sec. 1 ch 238 SLA 1970)

Article 2. Preparation of Public School Foundation Budget

Section
80. Computation by district
81. Minimum expenditure for instruction
82. Fund Balance changes in school operating fund
90. Estimated average daily membership
140. Determination of full and true value by Department of Community and Regional Affairs
150. Duty of commissioner to examine and tabulate computations

Sec. 14.17.080. Computation by district. By October 30 of the prefiscal year each district shall submit to the commissioner a preliminary report of computations for the following fiscal year of the district's basic need as defined in sec. 21 of this chapter; the amount which it expects to match under the provision of sec. 71 of this chapter; and the amount for supplemental programs which has been approved for funding consideration by the commissioner. Each district shall make the computations in the manner prescribed by secs. 80—150 of this chapter. The computations are the basis for requesting legislative appropriations and for making preliminary payments under the public school foundation program. (Sec. 2.01 ch 164 SLA 1962; am Sec. 5 ch 238 SLA 1970)

Sec. 14.17.081. Minimum expenditure for instruction. (a) Each district shall budget for and spend a minimum of 55 percent of its school operating expenditures in each fiscal year on the instructional component of the district budget.

(b) The commissioner shall reject a district budget which does not comply with (a) of this section and, unless a waiver has been granted by the state Board of Education under (d) of this section, shall withhold payments of state aid from that district, beginning with the payment for the second full month after rejection and continuing until the school board of the district revises the district budget to comply with (a) of this section.

(c) The commissioner shall review the annual audit of each district for compliance with the expenditure requirements of (a) of this section. If he determines that a district does not meet those requirements, the commissioner shall advise the district of this determination and calculate the percentage of deficiency in required expenditure and deduct that percentage from state aid paid to the district for the current fiscal year, beginning with the payment for the second full month after his determination, unless a waiver has been granted by the state Board of Education under (d) of this section.
