The Commission on International Education of the American Council on Education has recently published a report entitled "What We Don't Know Can Hurt Us: The Shortfall in International Competence," that points out the critical importance of international competence and awareness to the United States. It also points out that the economic, political, and intellectual well-being of the United States is increasingly related to our ability to interact intelligently, effectively and incisively with the rest of the world. The Council of Graduate Schools in the U.S. passed a resolution urging increased federal, state, and private support for international educational programs in order to enhance the international competence of the people of the United States.

While there is a need for general education and understanding of the Pacific Asian region, it is suggested that the best academic results may be achieved if this educational program is packaged and delivered in functional and professional terms. In recent years the American Assembly of Collegiate Schools of Business (ASCSB) has conducted in-depth studies on the curriculum content of international business including subject matter courses, research needs, and academic competencies for instructional staff. This has resulted in a new emphasis on "the internationalizing" of business education in institutions of higher learning.* Guidelines are being issued as to how this may be achieved.

---

* See Lee C. Nehrt, Business and International Education, A Report Submitted by the Task Force on Business and International Education to the Government/Academic Interface Committee, International Education Project, American Council on Education (Washington, D.C.: International Education Project, American Council on Education, 1977).

It is recognized that U. S. business success increasingly must occur in a growing, interdependent world. American businessmen in larger numbers must become cosmopolitan in both attitude and perspective.

The program of the proposed center will have the following components: academic instruction, including professional training and development, research, and public service. It must be treated as a constituent component within the UAA system. While based in the School of Business and Public Affairs of UAA, its academic staff must be drawn from the entire university faculty--with all of the important disciplines incorporated into the endeavor. A model drawn from the referenced report on business and international education will be used to organize the discussion on the proposed UAA program (See Figure 1).

Mission

The Center is to facilitate the development of sound business and economic relations between Alaska and Pacific-Asian nations, circumpolar regions, and other nations.

Objectives:

1. To foster a better understanding of business and economic relationships between Alaska and Pacific-Asian nations and others.

2. To provide members of business and government, through training and instruction, the specific skills and techniques needed for doing business with nations in Pacific-Asia and other regions of the world.

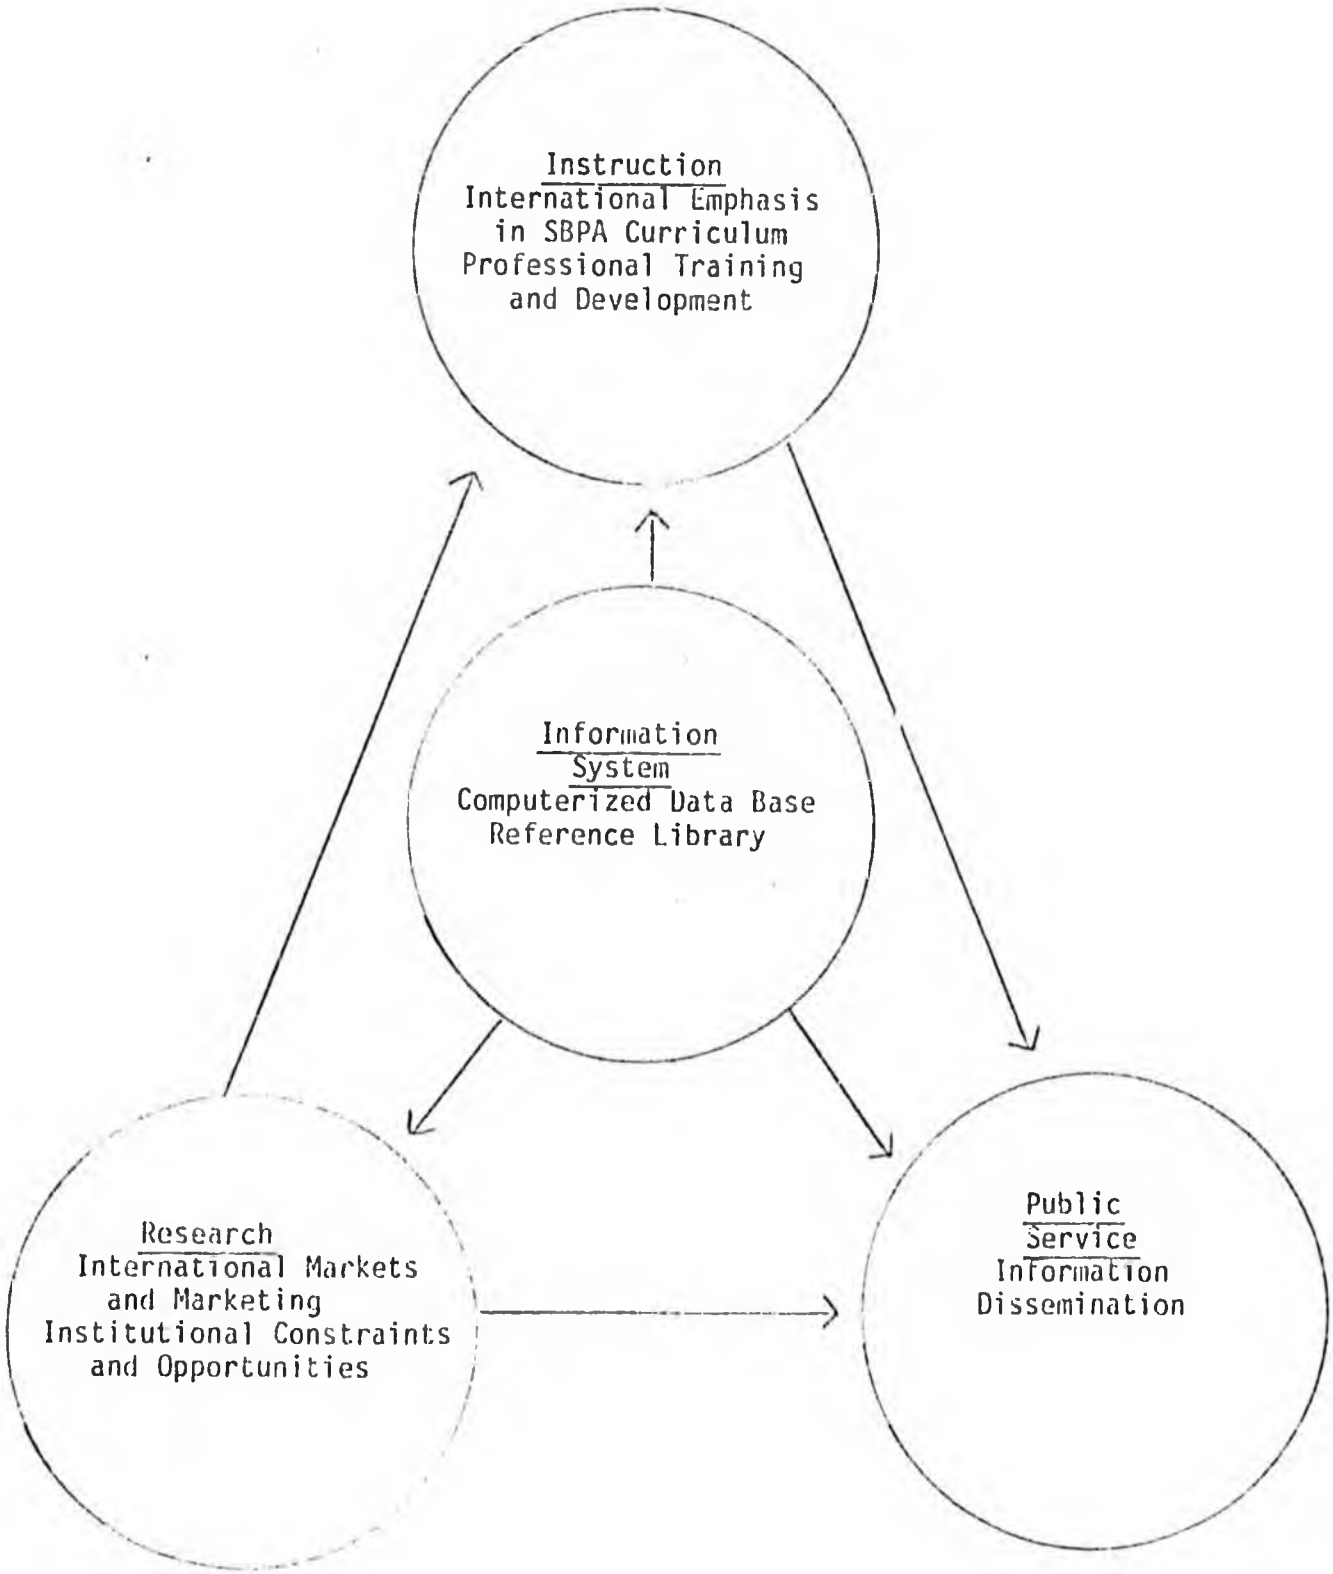
3. To analyze the opportunities for, and constraints on business and economic relations in both the private and public sectors.

4. To carry out research on international markets and marketing designed to facilitate the development of Alaska resources and the establishment of markets for these resources.

5. To establish a central point for the acquisition, analysis, and dissemination of information specifically related to international markets and Alaska resources and economic conditions.

Strategies

Three strategies are designed to accomplish these objectives: instructions including professional training and development, research, and public service.



I. Instruction

A. Academic Instruction (curriculum)

Following the recent guidelines of AACSB, it is proposed that the current curriculum of the School of Business and Public Affairs be internationalized by infusing various aspects of international business into present courses (internationalization of SBPA curriculum). The existing courses which are germaine to the proposed center program are:

FIGURE 1

INTERDEPENDENCIES BETWEEN MAJOR COMPONENTS OF THE CENTER

BA 325	Financial Management
BA 331	Business Law
BA 335	Management Principles and Practices
BA 343	Principles of Marketing
BA 426	Financial Markets and Institutions
BA 488	Social Issues in Business
ECON 423	Comparative Economic Systems
ECON 435	Economics of Resources
ECON 463	International Economics
PA 634	Resource Policy Administration
BA 652	International Comparison of Business Practices

In addition, new upper division courses such as International Accounting, International Business (with Pacific-Alaska emphasis), International Marketing (with Pacific-Asia emphasis), and International Management should be introduced, as well as two graduate level seminars on International Business and International Marketing. To provide academic strength for these courses, students would be encouraged to take appropriate courses in international relations, Asian history, foreign languages, education, computer science, engineering, psychology, anthropology of developing countries and Alaska resources, including marine policy and management.

B. Professional Training and Development

A wide range of programs and activities will be undertaken to provide Alaskan people (government officials, business and industry leaders, resource developers and foreign traders, and students) training and instruction in "how to do business with the Pacific nations", and to train the Pacific-Asian people in "how to do business with Alaska". For the immediate future, special seminars, workshops, short-courses and conferences would constitute the primary activity of the center. These would be packaged essentially for special clienteles. The central theme throughout the conduct of these special educational activities should be the enhancement of business diplomacy skills, i.e. "How to do business". The center will work on these projects in cooperation with the UAA Office of Conferences and Continuing Education.

The following topics will be offered through seminars, workshops, short-courses, and conferences;

1. Language: intensive, short language courses to introduce cultural values and business etiquette (e.g. Japanese, Korean, Mandarin for businessmen)
2. Business customs, ethics and culture in comparison.
3. Negotiation techniques.
4. Business law: Legal framework of international business (U.S., Alaska and Pacific nations).
5. International marketing: products, demand, supply and consumption in Pacific-Asia and Alaska.
6. Governmental, economic and social structures of Pacific nations.
7. Transportation for international trade
8. International finance.
9. Export and Import potential in Pacific-Asia nations.
10. Cross-cultural Management.
11. Government and Business Relationships: regulation, planning and attitudes toward government and business.

II. Research

The major focus of the center's research activities will be on Alaskan issues and problems related to international business, marketing, trade, resources development, and political, legal, institutional, financial and economic opportunities and constraints. These research activities would be conducted through organized research and development. Faculties from SBPA, sociology, computer science, foreign languages, political science, engineering, anthropology, education, and psychology, etc. of UAA, the Center's visiting and exchange professors, and other noted experts would be invited to jointly conduct research and development activities.

The needs for research are substantial. It is believed that extramural funding can be secured, especially in those areas vital to Alaska's business future. A problem exists, which is not necessarily unique, in securing start-up funds to prepare research proposals. We anticipate that this can be accomplished with present UAA funding to enlarge research activities.

III. Public Service

The center will establish a computerized, comprehensive information and data base on Alaska, Pacific-Asian nations and other related countries which will be accessible to interested individuals and organizations.

The information acquisition, analysis and dissemination activities will be accomplished through close cooperation with the library. The research information will be specifically disseminated for the business community and government through various forms of publications and direct inquiry.

Specific Program Detail

The following pages provide extensive detail on projected Center activities. The material is organized by "key result area." Each key result area identifies one or more "indicators", which in turn are keyed to specific program objectives. A summary of key result areas and associated indicators and objectives is followed by detailed statements.

SUMMARY: THE ALASKA CENTER FOR INTERNATIONAL BUSINESS

KEY RESULTS AREAS	INDICATORS	OBJECTIVES
(1) Formal Academic Instruction	(1)-(1) Faculty Positions Approved	(1)-(1)-(1)--To get approval for 1/2 Director and five faculty positions from the Board of Regents, Governor and Legislature beginning FY '85 through FY '87.
	(1)-(2) Quality of Faculty Recruited	(1)-(2)-(1)--To recruit 5 nationally and internationally known full-time faculty members in the fields of international business, marketing, resource economics, and international policy analysis beginning July 1, 1984 through 1987.
	(1)-(3) Courses Offered and Productivity	(1)-(3)-(1)--In order to internationalize business education, instructional courses are regularly offered for undergraduate, graduate students, industry and business leaders, and public officials in the areas of international business, marketing accounting, cultures, languages, and other related areas beginning Sept. 1984.
(2) Professional Development and Training	(2)-(1) Program Plan	(2)-(1)-(1)--To successfully and effectively deliver 8 to 10 professional development and training programs annually to targeted groups for the enhancement of skills and techniques, and information and knowledge about doing business between Alaska and nations in Pacific-Asia beginning Sept. 1984.
	(2)-(2) Programs delivered for People of Alaska	(2)-(2)-(1)--To effectively train people in business, industry and government in the specific skills and techniques necessary for doing business with nations in Pacific-Asia beginning Sept. 1984.
	(2)-(3) Programs delivered for business industry leaders of the Pacific-Asia nations	(2)-(3)-(1)--To deliver four programs annually to leaders of business and industry for Pacific-Asia nations, with the specific focus of "how to do business in Alaska" beginning November, 1984.

SUMMARY: THE ALASKA CENTER FOR INTERNATIONAL BUSINESS

KEY RESULTS AREAS	INDICATORS	OBJECTIVES
(3) Research and Development	(3)-(1) Research Associate and Support Positions Approved	(3)-(1)-(1)--To get approval for 6 research associate positions and a secretary from the Board of Regents, Governor and Legislature beginning FY '85 through FY '87.
	(3)-(2) Quality of Research Associates	(3)-(2)-(1)--To successfully recruit 6 competent research associates, four of whom will be either bilingual or multilingual to make significant contributions to international research activities beginning Aug. 30, 1984.
	(3)-(3) Amounts of Research Contracts	(3)-(3)-(1)--To obtain approximately $200,000 in research grants per year beginning Jan. 1, 1987 and increase the research grants to $400,000 per year beginning July 1, 1989.
	(3)-(4) Quality of Research	(3)-(4)-(1)--To effectively acquire, analyze and disseminate information, specifically related to Alaska resources, international business, and marketing through the publication of reports, information materials, and direct inquiry beginning July 1, 1985.
(4) Public Service	(4)-(1) Information System	(4)-(1)-(1)--To establish a comprehensive information system.
	(4)-(2) Information Dissemination	(4)-(2)-(1)--To establish systematic processes for dissemination of center information and research analyses.
(5) Visiting Diplomats and Scholars in Residence	(5)-(1) Instruction, Research, Public Services Provided	(5)-(1)-(1)--To utilize the talents and skills of visiting diplomats and scholars in residence in conducting research, instruction and public service.
(6) Fund Raising	(6)-(1) Permanent Endowment Fund	(6)-(1)-(1)--To receive $3 million in endowment funds from the governments of Pacific-Asia and the State of Alaska, industry and other business organizations by July 1, 1988.
	(6)-(2) Amount of Funds generated by contributions and other grants	(6)-(2)-(1)--To receive $30,000 contributions and non-contract grants per year beginning Jan. 1, 1986.

KEY RESULT AREA (1) Formal Instruction

INDICATOR (1)- (1) Faculty Positions Approved

OBJECTIVE (1)-(1)-(1)

To get approval for 1/2 Director and five faculty positions from the Board of Regents, Governor and Legislature beginning FY '85 through FY '87.

ACTIVITIES	TARGET DATE
FY '85	
1. To get approval for the center Director (1/2)	July 1, 1984
2. To get approval for one full-time faculty in International Business	
FY '86	
1. To get approval for 2 full-time faculty; in International Marketing and Resource Economics	July 1, 1985
FY '87	
1. To get approval for 2 full-time faculty; in International Marketing and Policy Analysis	July 1, 1986

COMMENTS

Two full-time faculty positions will be directly supported by the Center's extramural funds beginning July 1, 1989.

KEY RESULT AREA (1) Formal Academic Instruction

INDICATOR (1)-(2) Quality of Faculty Recruited

OBJECTIVE (1)-(2)-(1)

To recruit 5 nationally and internationally-known full-time faculty members in the fields of international business, marketing, resource economics, and international policy analysis beginning July 1, 1984 through 1987.

ACTIVITIES	TARGET DATE
1. Announce an international business faculty position	July 1, 1984
2. Hire adjunct faculty until a full-time faculty is recruited	August 1, 1984
3. Recruit a full-time international business faculty member	May 31, 1985
4. Recruit two faculty members in international marketing and Alaska resources economics	May 31, 1986
5. Recruit two faculty members in international business and marketing, and policy analysis	May 31, 1987

COMMENTS

(1) Each faculty member will be engaged in formal instruction, professional training and development, and organized research activities.

KEY RESULT AREA (1) Formal Academic Instruction

INDICATOR (1)-(3) Courses Offered and Productivity

OBJECTIVE (1)-(3)-(1)

In order to internationalize business education, formal instructional courses are regularly offered for undergraduate, graduate students, industry and business leaders, and public officials ir the areas of international business, marketing accounting, cultures, languages, and other related areas beginning Sept. 1984

ACTIVITIES	TARGET DATE
1. Develop curriculum in cooperation with faculties in related disciplines	March, 1985
2. Schedule courses for the next 3 years	March, 1985
3. Develop student recruitment program plan	March, 1985

COMMENTS

(1) Besides the formal courses, a number of short-courses, seminars and workshops on specific topics will be packaged and delivered through the center each year (see professional training and development).

KEY RESULT AREA (2) Professional Development and Training

INDICATOR (2)-(1) Program Plan

OBJECTIVE (2)-(1)-(1)

To successfully and effectively deliver 8 to 10 professional development and training programs annually to targeted groups for the enhancement of skills and techniques, and information and knowledge about doing business between Alaska and nations in Pacific-Asia beginning September 1984.

ACTIVITIES	TARGET DATE
(1) Develop Five-Year Program Plan (September 1, 1984 through June 30, 1989) under the following block systems: 1. Principle block: Languages, governmental social, cultural, and economic structures of Alaska and Pacific-Asian nations; Business ethics, customs, culture in comparison; and government and business relationships. 2. Technical block: International business law (U.S. Alaska, Pacific-Asian Nations, etc.); negotiation skills and techniques; and labor-management relations. 3. Natural resources demand block: Timber; fish; minerals; coal; oil; gas; agricultural products; and tourism demands in the Pacific-rim nations. 4. International marketing block: Product demand supply and consumption in Pacific-Asia and Alaska; transportation; international finance; export and import potential in the Pacific-Asia; and cross-cultural management and business environment.	Sept., 1984

COMMENTS

Nationally and internationally noted experts will be often invited to conduct seminars and workshops, and instruct short-courses.

KEY RESULT AREA (2) Professional Training and Development

INDICATOR (2)-(2) Programs delivered for people of Alaska

OBJECTIVE (2)-(2)-(1)

To effectively train people in business, industry, and government in the specific skills and techniques necessary for doing business with nations in Pacific-Asia beginning in September, 1984.

ACTIVITIES	TARGET DATE
1. Short Courses Focusing on Pacific-Asia Nations (1) History and culture of Pacific-Rim people (2) Governmental, economic and social structures of Pacific-Asia nations (3) Government and Business Relations; planning and attitudes toward business and government (4) Labor Management Relations (5) International Relations (6) Languages (Japanese, Chinese, and Korean for businessmen). 2. Workshops: (1) Legal framework of international business: U.S., Alaska and Pacific Nations (2) Negotiation styles and techniques (3) Comparative business practices and cultures: Business environments, decision-making patterns, cross-cultural management, and business customs and ethics.	Period of Sept., 1984 - Dec., 1985

COMMENTS

Fees will be charged to participants in each short course, seminar or workshop, therefore, it is anticipated that professional training and development activities will be self-supported.

KEY RESULT AREA (2) Professional Training and Development

INDICATOR (2)-(2) Programs delivered for the people of Alaska (continued)

OBJECTIVE (2)-(2)-(1) continued

ACTIVITIES - Continued-	TARGET DATE
3. Seminars:	
(1) Export and import potential of Pacific-Rim nations	
(2) International finance	
(3) International marketing: products, demands, supply, consumption and consumer behavior in the Region.	
(4) Transportation in international trade	
(5) Natural resources demands for the Pacific Region: present and future	

COMMENTS

KEY RESULT AREA (2) Professional Training and Development

INDICATOR (2)-(3) Programs delivered for business industry leaders of the Pacific-Asia nations

OBJECTIVE (2)-(3)-(1)

To deliver four programs annually to leaders of business and industry for Pacific-Asia nations, with the specific focus of "how to do business in Alaska" beginning in November, 1984.

ACTIVITIES	TARGET DATE
1. Short courses:	Nov., 1984 - May, 1985
(1) History and culture of Alaska	
(2) Governmental, economic, social and cultural structures of Alaska.	
(3) Government and Business Relations in Alaska	
(4) Labor-management relations in Alaska	
(5) Learning English for businessmen	
2. Workshops	
(1) Business Law in U.S. and Alaska	
(2) Comparative Business practices and cultures: Business environments decision-making, cross-cultural management, and business customs and ethics	
(3) Negotiation styles and techniques	
3. Seminars:	
(1) Export and import potential in Alaska	
(2) Financial situation in Alaska	
(3) Marketing in Pacific Region and Alaska	
(4) Transportation: delivery systems	
(5) Natural resources and development policies in Alaska	

COMMENTS

Forty to fifty leaders from industry, government and higher educational institutions of each Pacific-Asia nation will be invited to participate in the Center's short-courses, seminars and workshops, with expenses to be paid by participants.

KEY RESULT AREA (3) Research and Development

INDICATOR (3)-(1) Research Associate and Support Positions Approved.

OBJECTIVE (3)-(1)-(1)

(1) Get approval for 6 research associate positions and a secretary from the Board of Regents, Governor and Legislature beginning FY '85 through FY '87.

ACTIVITIES	TARGET DATE
FY '85	
1. Get approval for a full-time research associate position.	July 1, 1984
FY '86	
1. Get approval for three full-time research associate positions.	July 1, 1985
2. Get approval for a secretary position.	July 1, 1985
FY '87	
1. Get approval for two full-time research associate positions.	July 1, 1986

COMMENTS
(1) Four of 6 research associates will be either bilingual or multi-lingual.
(2) Two full-time research associate positions will be directly funded by the center's extramural funds beginning July 1, 1989.

KEY RESULT AREA (3) Research and Development

INDICATOR (3)-(2) Quality of Research Associates

OBJECTIVE (3)-(2)-(1)

(1) Successfully recruit 6 competent research associates, four of whom will be either bilingual or multi-lingual to make significant contributions to international research activities; beginning Aug. 30, 1984.

ACTIVITIES	TARGET DATE
1. Recruit one full-time research associate in international marketing.	Nov. 30, 1984
2. Recruit three full-time research associates in international business, policy analysis, and resource economics.	Nov. 30, 1985
3. Recruit two full-time research associates in international business and marketing.	Nov. 30, 1986

COMMENTS

Research associates will also participate in seminars, workshops, and short-courses.

KEY RESULT AREA (3) Research and Development

INDICATOR (3)-(3) Amounts of Research Contracts

OBJECTIVE (3)-(3)-(1)

(1) Obtain approximately $200,000 in research grants per year beginning Jan. 1, 1987 and increase the research grants to $400,000 per year beginning July 1, 1989.

ACTIVITIES	TARGET DATE
1. Complete a data inventory for research grant sources.	Dec. 1, 1984
2. Select most appropriate and compatible research grant sources.	Dec. 31, 1984
3. Write and submit five to 10 proposals between Sept. 1984 and June 30, 1986.	June 1986
4. Receive $200,000 in research grants by Jan. 1, 1987, and continue to receive the same amounts through July 1, 1989.	Jan. 1, 1987
5. Receive $400,000 in grants and contracts by July 1, 1989 and continue to receive the same amounts in subsequent years.	July 1, 1989

COMMENTS

The research and development activities should be conducted through organized research by bringing the center faculty, research associates, faculty from other disciplines, visiting and exchange professors, and other noted experts together.

KEY RESULT AREA (3) Research and Development

INDICATOR (3)-(4) Quality of Research

OBJECTIVE (3)-(4)-(1)

(1) Effectively acquire, analyze and disseminate information, specifically related to Alaska resources, international business, and marketing through the publication of reports, information materials, and direct inquiry beginning July 1, 1985.

ACTIVITIES	TARGET DATE
1. Receive sufficient funds for start-up costs for research formulation, setting up of data center for Pacific-rim markets and library collection.	July 1, 1984
2. Publish reports (various forms) on political, legal, institutional, cultural, financial and economic opportunities and constraints in international trade between Alaska and the Pacific-Asia region and other regions of the world; consumer behavior, quarterly analysis of Pacific-rim markets and international business beginning July 1, 1985.	July 1, 1985
3. Have operational a computerized comprehensive information and data center on Alaska, Pacific-Asian nations, and other related countries which can be readily accessible to interested individuals, leaders of governments and business firms and organizations engaged in international trade.	July 1, 1986
4. Publish a quarterly journal on Alaska Resources and international business.	Dec. 1, 1987

COMMENTS

There will be fees charged for reports and journals.

KEY RESULT AREA (4) Public Service

INDICATOR (4)-(1) Information System

OBJECTIVE (4)-(1)-(1)

Establish a comprehensive information system.

ACTIVITIES	TARGET DATE
1. Identify major information requirements and information sources and availability	Jan., 1985
2. Design computer based data bank and initiate collection of data relating to Pacific-Asian nation markets and economic conditions, and Alaska resources and markets.	May, 1985
3. Identify and begin acquisition of non-computerized information sources to serve as the basis of the special library collection.	May, 1985

COMMENTS

KEY RESULT AREA (4) Public Service

INDICATOR (4)-(2) Information System

OBJECTIVE (4)-(2)-(1)

(1) Establish systematic processes for dissemination of center information and research analyses.

ACTIVITIES	TARGET DATE
1. Identify key recipients of center information and develop distribution system.	Dec., 1984
2. Publish results of center research and information activities through appropriate media as beginning July, 1985	July, 1985
3. Publish a quarterly journal on Alaska resources and international business beginning December 1987.	Dec., 1987

COMMENTS

Publication and distribution costs to be supported by fees and extramural funding. User fees to be charged for access to computer data base services.

KEY RESULT AREA (5) Visiting Diplomats, Executives and Scholars in Residence

INDICATOR (5)-(1) Instruction, Research, and Public Services Provided

OBJECTIVE (5)-(1)-(1)

(1) Utilize the talents and skills of visiting diplomats, executive and scholars in residence in conducting research, instruction and public service.

ACTIVITIES	TARGET DATE
1. Invite "Diplomat in Residence" participation from Korea, Japan, and U.S.	Nov., 1984
2. Develop Mechanisms and seek candidates for visiting scholars in residence	Nov., 1984
3. Develop system to ensure continuing flow of visiting diplomats and scholars in residence	Nov., 1984
4. Have first diplomat in residence at center	Sept. 1985
5. Have first visiting scholar in residence at center	Sept. 1986

COMMENTS

(1) Expenses of visiting diplomats to be met by country of residence.
(2) Visiting scholars to be sought on exchange or sabbatical leave basis. Center cost limited to space and support services.

KEY RESULT AREA (6) Fund Raising

INDICATOR (6)-(1) Permanent Endowment Fund

OBJECTIVE (6)-(1)-(1)

(1) Receive $3 million in endowment funds from the governments of Pacific-Asia and the State of Alaska, industry and other business organizations by July 1, 1988

ACTIVITIES	TARGET DATE
1. Complete a list of leaders of governments and business and industrial organizations.	Oct. 31, 1984
2. Complete preliminary preparations for seeking endowment.	Oct. 31, 1984
3. Complete travel arrangements for meeting leaders of governments and industry.	Dec. 1, 1984
4. Secure sufficient funds for travelling.	April 30, 1985
5. Receive $500,000 from the Korean Government.	July, 1986
6. Receive $500,000 from the Japanese Government.	July, 1986
7. Receive $250,000 from the Taiwanese Government	July, 1987
8. Receive $250,000 from the Singapore Government.	July, 1987
9. Receive $500,000 from the State of Alaska.	July, 1987
10. Receive $250,000 from industry and business organizations in Alaska.	July, 1988
11. Receive $250,000 from Japanese business corps and organizations.	July, 1988
12. Receive $250,000 from Korean business corps. and organizations.	July, 1988
13. Receive $250,000 from the Peoples' Republic of China by 1988.	July, 1988

COMMENTS

(1) Each fund may be endowed <u>at one time</u> or <u>yearly</u> by the target date.

KEY RESULT AREA (6) Fund-Raising

INDICATOR (6)-(2) Amount of funds generated by contributions and other grants

OBJECTIVE (6)-(2)-(1)

(1) Receive $30,000 contributions and non-contract grants per year beginning Jan. 1, 1986.

ACTIVITIES	TARGET DATE
1. Complete the list of individuals, associations and firms which may contribute the fund for the center.	Oct. 1, 1984
2. Begin to seek contributions and grants from individuals, associations and firms.	Nov. 1, 1984

COMMENTS

Funds to be used for direct operating expenses and program support.

February 3, 1984

The Honorable Mae Tischer
Member, Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Tischer:

We are writing to urge your support of House Bill 520, as introduced by House Speaker Joe L. Hayes.

This legislation would enact a computer crime statute in the state of Alaska and create an offense for the criminal use of a computer. We support this legislation because it would protect consumers from unauthorized access to and manipulation of sensitive computer-based information contained in the data base of a consumer credit reporting agency.

TRW's Information Services Division operates one of the country's largest consumer credit reporting agencies. We maintain credit information on more than 90 million consumers. And we service these consumers through 21 offices and 80 independent credit bureaus, including Credit Bureau of Alaska, Inc.

Unfortunately, our data base has been illegally accessed, and we have been frustrated with the inadequacy of current federal and state laws to properly prosecute these occurences. We have, therefore, successfully sponsored related legislation in California and New York, and we hope to see similar statutes enacted in other states, including Alaska.

I have attached additional information on this issue and a brief description of our consumer credit reporting services.

Once again, we respectfully encourage your support of House Bill 520. Thank you.

Sincerely,

Maureen S. Frisch, Regional Manager
TRW Inc. Government Relations

Attachment: as stated.

THE NEED FOR COMPUTER CRIME LEGISLATION

INTRODUCTION

Several issues related to the information services industry have led to the need for computer crime legislation.

The computer industry has created a consumer market that has put machines in the hands of hobbyists, and controls in the data processing industry have been reduced thru time-sharing options and other productional facets. While we see individuals invading systems in the news and entertainment mediums, the point is being raised that it will not be long before true criminals are involved in other areas. Unfortunately, this has become a reality. Little publicity is given to these cases of computer crime because they are not always turned over to law enforcement agencies. This is because computer crime statutes, for the most part, are either not in place or insufficient to result in prosecution. With little chance of achieving successful prosectution, or even getting to court, it is not surprising that many companies do not report computer crime.

Because of growing problems and concerns about unauthorized access to and manipulation of computer-based information, it is necessary to enact legislation. After unsuccessful attempts at the national level, it has become necessary to have progressive state legislatures implement legislation on a state-by-state basis.

UNAUTHORIZED ACCESS TO CREDIT INFORMATION

The credit industry has evidenced criminal behavior thru unauthorized access in three basic scenarios:

1. Consumer victimization via stolen access codes.

2. File manipulation.

3. Investigation and collection agency activity using stolen access codes.

Each of these scenarios is elaborated on separately to illustrate the impact of this activity and the need for up-to-date legislation.

Consumer Victimization

Attachment A, "For Sale: Credit Ratings," describes a process of victimization. The act of a consumer obtaining a good credit rating was facilitated by stealing subscriber access codes. The individuals that were selling these packages telephoned legitimate credit grantors subscribing to the credit agency. These individuals represented themselves as calling from the credit agency, usually using the pretext of clearing up a billing problem, or being from the security department. During the conversation the access code is requested and usually provided. This access code enables access to the credit data base to facilitate the process. The buyer of the good credit history uses the good accounts and requests other credit cards. The buyer runs up bills with no intent of paying. The good consumer is left with the issue of clearing up his or her credit history once it has been discovered that someone has used the individual's history.

File Manipulation

Attachment B illustrates the issue of file manipulation. File manipulation is achieved by bribing someone to modify the information contained in files within the bureau or subscriber's premises and the submission of false credit information.

Unfortunately, not all bureaus have controls to prevent this access and many incidents of information modification occur. Once the bad credit history is deleted or modified, the individual applies for new credit accounts. (Controls exist within the TRW system to prevent and/or isolate attempts of this type.)

Even if consumer victimization and file manipulation efforts are successful, most law enforcement agencies will not pursue the case until there has been a loss to a credit grantor.

Investigation and Collection Agency Activity (Attachment C)

Private investigators, lawyers, and repossession agents may, in isolated cases, have a legitimate purpose to access a credit data base; however, most of the major credit agencies do not allow these individuals to subscribe due to the control features required to monitor permissible access. Unfortunately, there have been many cases where individuals wanting this information have either stolen access codes or derived the access code from credit profiles sent to them by other subscribers with the access code on them.

Some collection agencies have acquired access codes in a similar manner. Although collection agencies have legitimate reasons to access a credit bureau, and they are subscribers, some do not use their own access code. The stolen access code is often utilized to reduce costs and increase commissions and agency profits.

A GROWING PROBLEM

According to recent statistics (Modern Office Procedures - March 1983, "Defending Your Computer Room Against Disaster") the average bank robbery is less than $3,000. The average "white collar" embezzlement nets less than $30,000. But the average computer crime is estimated to exceed $600,000, with little chance of detection, prosecution or conviction.

Education has become a key element in the fight against this area of criminal activity, and the United States Department of Justice has opened a specialized four week computer fraud school for F.B.I. agents. The Department of Justice, Sacramento, California, operates a two week course specializing in the same subject. Other municipalities as well as private organizations are currently holding seminars to combat problem areas of detection.

The challenge is to actively prosecute computer crime suspects. A challenge in the sense that the current laws regulating computer access are extremely lacking. Following, are three examples of TRW incidents that illustrate the need for computer crime legislation:

Example #1

An organized ring of credit criminals was established in a large metropolitan area. Although this example was taken from the Western Region, there is an indication that an identical ring is operating in the Eastern Region. One member of the ring provided computer password information to another who used it to gain access to our system. The suspect then retrieved hundreds of credit reports. Through a relocation and file merge system, the suspect was able to alter negative credit information into what appeared to be a positive profile.

The fee charged for this service varied, however, it averaged about $600 per report. This particular case is being actively prosecuted at the writing of this report. The section selected for prosecution was 502 P.C. (California).

Example #2

A collection agency/private investigative firm gained access to computer password information on several Information Services Division subscribers. As such, unauthorized access was made into our system and a total of $65,000 worth of credits were applied for from various east coast subscribers. While working the investigation of this matter, several New York agencies were contacted and each declined investigative jurisdiction. Most felt that it was a civil or federal problem, in that no computer crime bill existed.

Subsequently, the F.B.I. was contacted and consented to continue the investigation. A suspect was identified and prosecution is being actively pursued.

Example #3

A coast-to-coast organized crime ring obtained several thousand blank credit cards. Later, they obtained illegal access into credit systems and retrieved thousands of credit profiles of potential victims. By viewing the reports, account number information was obtained and later embossed on the stolen cards. The total amount stolen from creditors is unknown at this time, but it is believed to exceed $1,000,000. Investigation is continuing.

Crimes by these individuals were made possible through the illegal access to computer files. In each case the criminal simply called a TRW operator and relinquished certain password information which then caused the computer to be accessed.

It is acutely apparent that much has been done in the area of detection, but legislation is now needed for active prosecution.

CALIFORNIA'S COMPUTER CRIME LEGISLATION

SB 648 (California Penal Code 502) was introduced in the California Legislature in March of 1981. This bill modified the penal code to make it a crime to intentionally access or cause to be accessed any computer system or network for the purpose of damaging the credit rating of any person. The bill was sponsored by an individual in the San Diego District Attorney's office, Fraud Division, in response to a situation in San Diego in which an individual's credit file was sold for the purposes of obtaining credit under fraudulent circumstances. (Similar legislation has been enacted in New York.)

Legislative justification for the bill goes on to say:

> "The credit granting sector of private industry is being deluged with false and fraudulent applications for credit. It is not uncommon for individuals and organized groups to systematically apply for multiple credit cards, loans, etc. utilizing fictitious and false names, biographical information, and credit histories. These fraudulent applications are carefully created to fit within the credit grantors' criteria for issuance of credit - such policies which are well known to the applicants. Sophisticated wrinkles are added such as the use of telephone answering services, which have been provided a prepared script to read in case of inquiry by the credit granting agencies. The answering service tells the inquiring party 'that the applicant has been employed at a high salary for five years; that the applicant has successfully paid off a loan on a expensive automobile, etc.'
>
> Under existing law, the credit grantor must suffer a loss before this activity can be filed as a felony. This ridiculous posture does nothing to prevent repeated attempts to obtain credit by fraudulent means. It is likewise discouraging to the credit grantors, who having discovered these activities, bring them to the attention of law enforcement and discover that this conduct is at most a misdemeanor. (Section 532a, California Penal Code)"

ONE STEP TOWARD A SOLUTION

Because of the tremendous growth in computer-based information services and an alarming increase in the unauthorized access to and abuse of various data bases throughout the country, it has become necessary for states to update existing penal codes to include computer fraud. California and New York have passed legislation in this area. And it is hoped that similar legislation can be enacted in other states to facilitate criminal prosecution and standardize penalites.

11/1983

auditors commended Sandia's corrective actions and stated that it appeared that the problems had been solved. However, it would not pay those responsible for the laboratory to become complacent. Without continual policing, the problem will return. The auditors recommended periodic random sampling of computer files to check on unauthorized use of the system. #

For Sale: Credit Ratings

While evidence is still not clear, it seems possible that a data theft gang has been operating in southern California. It appears that the ring has allowed those with poor credit ratings to use someone else's good rating as the basis for opening charge accounts and obtaining loans.

The crime apparently involved unauthorized access to a credit bureau data base to obtain financial information about individuals with a clean credit history. Good credit ratings are sold to people who have problems obtaining credit. The bad credit risk purchases information that will allow him to assume for credit purposes the identity of someone who has the same name but a better financial record. Information supplied includes such things as social security number, bank account number, and driver's license number.

This suspected crime came to light when an individual with a good credit rating became aware that his identity was being used by another. He contacted a number of different law enforcement agencies and informed them about the alleged crime. To date, investigative efforts have been hampered by the fact that, although everyone acknowledges that a crime has indeed taken place, no one has been able to figure out who has jurisdiction. Meanwhile, a number of questions remain unanswered:

- How was the data obtained from the supposedly secure files of the credit bureau?
- Who obtained the data?
- Is it an inside job?

These questions will remain unanswered until jurisdiction problems can be ironed out and further information developed. #

Student Cracks School District's Computer System

A high school senior in Tucson, Arizona was successful in breaking into the school district's computer system. However, he is beginning to have regrets about his actions. Since his successful intrusion, security measures have been tightened, and his access to the computer has been reduced.

The student, Joel Snyder, first realized that he could break the system's security code when he was accessing the computer through a remote job entry terminal at his high school. He was quoted as saying that anyone with a knowledge of assembly language could easily circumvent the system's security features. The passwords protecting student grades and other information were unimaginative.

His attempt to gain access to another user's password was successful. As a result, Snyder felt he should inform the authorities about the security risks involved. However, officials tended to doubt that Joel Snyder had actually cracked the system. They were willing to acknowledge that he had obtained access to passwords, but they were never sure how he had done it.

In his attempt to publicize the security weakness, Joel appeared at a school board meeting and brought the matter to the attention of the board. This action had some results. System security was soon tightened. Students are now allowed to access the system only from RJE stations (not by dialing up from a modem), only during certain hours, and only while a teacher is present.

While he has proven that he has more than a passing knowledge of computers and their security features, Snyder does not plan a career in data processing. His first college choice is Stanford University, where he plans to major in liberal arts.

Although Joel Snyder's reasons for breaking security were not malicious, his action shows the ease with which intelligent students can circumvent security features in today's systems. Obviously, there are basic weaknesses in most security provisions. #

U.S. Charges Six Fixed Reports On Credit-Risk Buyers For Fee, Fed False Data Into Computers

Authorities Believe Plot May Have Led To Millions Of Dollars In Unpaid Bills

LOS ANGELES (AP) —With the aid of a file clerk, six men sought out persons with poor credit records and for fees of up to $1,500 improved their credit reports in the computer banks of the country's largest consumer credit bureau, a federal indictment charges.

The credit records were kept in the computers of TRW Credit Data in Anaheim, Calif. The company maintains credit files on about 50 million Americans living in 20 cities.

The files are used by banks, credit card companies, and other businesses seeking information concerning the credit worthiness of customers.

Authorities said the alleged scheme may have produced millions of dollars in unpaid bills and caused untold legal problems for firms that rely on credit information.

The six men are charged with conspiracy in the indictment returned Thursday by a grand jury. All six also are charged with at least one count of making false loan-application statements.

A TRW Credit Data file clerk, Kathleen Bennett, was named as an unindicted co-conspirator. Federal authorities said she is to be a government witness.

According to the indictment, Miss Bennett was paid $50 each time she improved the computerized credit records of people solicited by the ring.

Some Information Deleted

This allegedly was done by deleting bad payment records, information about bankruptcies, and other unfavorable material. In some cases, material indicating a good credit history was inserted, authorities said.

The indictment listed 26 persons who paid between $300 and $1,500 to have their credit records altered, but authorities said as many as 150 persons may have paid for such falsifications between August, 1974, and March, 1975.

With their improved credit records, these people obtained banks loans, credit cards, and credit at retail stores, authorities said, and many of them subsequently defaulted on payments.

FBI agents uncovered the plot and broke up the ring 18 months ago, authorities said. It took the FBI, a Justice Department Organized Crime Strike Force, and the U.S. Attorney's office nearly two years to obtain the evidence needed to present the case to a grand jury.

Seven Counts In Indictment

Charged in the seven-count indictment were Philip Kostoff, 31, the alleged ringleader; his brother, Paul Kostoff, 35; Ronald C. Rossi, 41; John R. Dubbs, 41; Kenneth L. Stevenson, 39, and Sean Shanahan, 45. All live in Orange County, where Anaheim is located.

The indictment alleged that Philip Kostoff hired the other defendants to locate persons who wanted their credit ratings improved and also recruited Miss Bennett.

Authorities said TRW Data Credit, a division of Cleveland-based TRW, Inc., cooperated in the investigation and is lightening its security.

Authorities seize stolen computer reports

ORANGE — Detectives, armed with search warrants, last week seized several thousand credit reports that were allegedly stolen from TRW computers in Orange.

The records were seized by police during raids at three Los Angeles area companies — H.E.L.P. Locksmiths of Van Nuys, Searchers Investigations and Searchers Security Co., Los Angeles.

Police said entry into TRW's computer bank was made via telephone and teleprinters, using that company's codes.

No charges were filed against the officers of the three companies.

The search warrants served Thursday and Friday culminated a three-month investigation into what police said is "to the best of our knowledge, the first known reported crime of this particular type in California and the country."

Gil Hamblet, TRW's vice president of industry and public affairs, said the company first noticed the illegal access to their computer records six months ago.

He said the material relates to the pay habits of Southern California residents and does not include any other personal information, except their names, addresses and previous addresses.

The Van Nuys firm is an automobile repossession company and the two Los Angeles companies are private investigators who work for attorneys and corporations.

"Such records are used to obtain credit information on individuals," Detective John Carson said. "The records are also used in skip tracing."

Carson said the material is now being inventoried, and it will probably be a week before the police and the district attorney will be ready to file charges.

3 Firms Probed in Theft of TRW Computer Data

Two Los Angeles private detective agencies and a Van Nuys vehicle repossession firm have been accused of massive electronic theft of credit information from a computer at TRW, Orange County authorities said Tuesday.

Police said the three firms gained access to the nationwide credit reporting agency's computer by obtaining codes issued to TRW subscribers. No dollar value had been set on the alleged theft.

Investigators said Tuesday that H.E.L.P. Locksmiths, the repossession company, had been using the code for six months. Searchers and Searchers Investigations, the detective agencies, had been using them since 1972, police said.

Orange police Detective Roger Braham said no charges have been filed, but investigators are examining thousands of records—mostly computer printouts—seized from the three firms in raids last week.

Gil Hamblet, vice president of public affairs for TRW's Information Services Division in Orange, said the firm's own security surveillance system first spotted the illegal information request entries in January.

Officials of the three companies that allegedly obtained the information illegally could not be reached for comment Tuesday.

Computer-Fraud Coverage Grows As Insurers Solve Policy Problems

By Joanne Lipman
Staff Reporter of The Wall Street Journal

An oil company paid millions of dollars to gather highly confidential geophysical information and then fed the data into a computer. Now it wants insurance against electronic theft of the data by competitors or damage to its storage system by teen-age computer hackers. Is such coverage available?

The answer is yes, some insurers say. But the kinds of coverage available vary widely, and most insurance companies are still at work developing their policies. A few insurers cover theft of trade secrets and such items as customer lists. Others cover only the cost of reproducing erased or damaged information. All agree there are problems to overcome: Losses are hard to calculate and potentially staggering, for example, and premiums can be very high. But everyone also agrees that once the problems are solved, business will be hot.

Computer-fraud coverage "is the most sought-after insurance in the crime area these days," says Christopher Barr, vice president of National Union Fire Insurance Co. "The computer is the fad of the 1980s—and computer insurance is the fad topic of the insurance world."

So far, only about $20 million of electronic-crime policies have been sold and most of them cover transfers of money and securities, according to Dean P. Felton, a vice president of Marsh & McLennan Cos. But he figures that amount will increase geometrically, reaching $100 million in the next three years.

Demand is already rising. Shand, Morahan & Co., a subsidiary of Alexander & Alexander Securities Inc., says inquiries about its policy have doubled in the past six months, to 75 a week. Applications for the coverage have risen 20% to 30%, says Grant R. Hubbard, a Shand Morahan vice president. St. Paul Fire & Marine Co., Fireman's Fund Insurance Cos., Chubb & Sons Inc. and others report a similar increase in interest.

A New Twist In Coverage

Insuring computer data against theft and damage is a new twist in electronic-crime coverage. One of the first computer-crime policies, introduced by Lloyd's of London in 1981 and quickly copied by several American insurers, applied only to financial institutions and covered only money and securities transferred by electronic means.

That kind of policy was inspired by the exploits of Stanley Mark Rifkin, who was charged with swindling Security Pacific Bank of Los Angeles out of $10.2 million in 1978. According to prosecutors, he posed as an international bank officer, got the computer codes required to transfer money to a Swiss bank, and then bought 19 pounds of Russian diamonds with the proceeds. Back then, the case was hailed as the ultimate electronic scam.

But a new type of computer crime is drawing attention now, and its immediate target is information rather than money. Insurers can reel off tales of computer treachery. There's a company, for example, whose client file was pilfered electronically by a competitor. In another case, a prankster gained access to computerized motor-vehicle records, wiping out penalties given poor drivers. Recently, the Federal Bureau of Investigation has arrested teen-agers who allegedly broke into computers belonging to the Defense Department, a New York City hospital and an electronic-mail service.

Crimes like these make companies very nervous. Chubb, for instance, says it has sold computer-fraud policies to an aerospace company worried about piracy of its designs and a book publisher concerned that an outsider could steal unpublished books. Shand Morahan says travel agencies, county governments, department stores and stockbrokers have shown interest in its policy.

Insuring computer data against theft and damage is "a new area, and there are no hard and fast decisions on who is liable for what," says a State Farm executive.

Computer-data coverage varies from insurer to insurer. St. Paul Fire & Marine covers the cost of reproducing erased or damaged information, including footwork or research. That means that if a client list is erased, the insurer will pay for the extra time and work required to recreate it. But "snooping" isn't covered. As a result, if a competitor steals the client list electronically without damaging the data, no payment is made.

Chubb's policy does cover snooping. If information is stolen and used by someone, the policy covers the full amount spent to develop the data. Thus, if a new automobile design is stolen from a manufacturer's computer and the new car becomes uncompetitive as a result, Chubb will cover such costs as research and promotion. If the car is still marketable but sales are hurt because the design is no longer exclusive, a smaller payment will be negotiated.

Shand Morahan may offer the most ambitious policy. It promises to cover all computer-fraud-related costs, up to $30 million for a single incident. It will even cover the cost of inventory stolen by electronic means. Such cases have occurred in the past. In the early 1970s, Jerome Schneider was convicted of procuring more than $200,000 of telephone equipment from Pacific Telephone & Telegraph Co. in Los Angeles.

But many insurers are still trying to devise formulas for insuring computerized data. "It's a new area, and there are no hard and fast decisions on who is liable for what," says Wesley Doms, assistant vice president of State Farm Mutual Insurance Co., which doesn't offer any computer-fraud coverage.

One problem is that insurers like to stick with quantifiable losses. That makes them reluctant to cover less-concrete costs, like loss of confidentiality and confidence among customers.

There are other problems. While no claims have been made yet, they may be devastating when they come. "We don't expect them to be numerous," says Ralph W. Wheeler Jr., an executive at Aetna Casualty & Surety Co., "but we expect a catastrophe when it happens." Mr. Hubbard of Shand Morahan believes losses among his company's customers will "always be in excess of seven figures."

With the potential for losses like these, premiums can be enormous. They tend to run between $25,000 and $100,000 a year, depending on the size of the business and how secure its computer system is. But coverage can cost a large bank as much as $4 million over three years, according to Mr. Wheeler of Aetna. If the company has a backup computer or other alternate system, insurance costs are usually lower.

Giving Hackers Ideas

Most companies are reluctant to talk about their computer-crime coverage for fear of giving hackers and competitors ideas. "Nobody's going to admit carrying this coverage," says Mr. Hubbard, of Shand Morahan. "It's the same thing as kidnap coverage."

But law firms, which computerize data about cases, and airlines, which computerize everything from accounts receivable to reservations, are among the kinds of companies looking into coverage. "Anyone who uses information-systems technology is going to have to look at this type of insurance," says Don Karmazin, vice president of computer and communications services at United Airlines.

United is self-insured, but it plans to study coverage carefully as it becomes more readily available. "It has been talked about in the industry," Mr. Karmazin says, "especially with all the notoriety that these teen-age computer whiz kids have been getting."

McGraw-Hill Inc. has computer-crime coverage, but it says all its risks still aren't covered. Its policy covers the cost of recreating damaged information, but if an electronic trespasser reads—but doesn't damage—an unpublished stock appraisal from McGraw-Hill's Standard & Poor's Index or an unreleased article from its BusinessWeek magazine, no payment is made.

"We hit the stumbling block," says John J. Bott, corporate risk manager. "It's a gray area. We're going round and round on this at least once a month."

Criminal Use Of Computers Seen Growing

By Robert E. Taylor
Staff Reporter of The Wall Street Journal

WASHINGTON — Richard Shanklin has found another use for the versatile home computer: credit-card fraud.

From his parents' home in Fairfax, Va., the 30-year-old Mr. Shanklin used his computer to get into the files of Credit Bureau Inc. in Atlanta. Authorities say he used information about other people's credit-card accounts to order about $50,000 worth of computer and electronic gear from mail-order businesses.

A grand jury indicted Mr. Shanklin on 15 charges. After plea bargaining, the prosecutors dropped all but one charge of credit-card fraud. Mr. Shanklin pleaded guilty, and he faces a jail term.

The ease with which he gained access to the files is alarming to Assistant U.S. Attorney Loren Hershey, who prosecuted the case. He calls the home computer "the burglary tool of the electronic age." Several computer experts consider that an exaggeration, saying they haven't heard of another case like Mr. Shanklin's. But while computer pranks gain far more attention, experts expect the use of home computers in fraud and similar criminal activity to grow.

"The rip-offs are likely to be more frequent and larger," says Arthur Gillis, a computer-security specialist who is president of Computer Based Solutions Inc. of Atlanta. "The numbers are against us," he says, because people are learning about computers faster than adequate security precautions are being developed.

Danger From Insiders

The most serious threats of misuse, most experts say, come not from outsiders, but from insiders. Most computer thefts are embezzlements. In one case, a consultant, Stanley Mark Rifkin, used computer codes to transfer $10.2 million from the Security Pacific Bank of Los Angeles to his account in Switzerland. He served three years in jail.

Computer buffs have shown that they can use their wits, their terminals and their telephone lines to gain unauthorized access to private data banks. The most dramatic examples have been carried out by a group of youths in Milwaukee who call themselves the 414s, after the city's telephone area code.

They have penetrated dozens of computer systems, including a data base at the U.S. nuclear weapons research laboratory in Los Alamos, N.M., and the radiation-therapy records at Memorial Sloan-Kettering Cancer Center in New York.

While computer intrusions are generally ascribed to sport rather than greed, the case of Mr. Shanklin shows the possibilities of financial gain.

Computers' Weak Point

Mr. Shanklin apparently broke into the computer data bank by exploiting a weak point common to most systems: human carelessness. Federal authorities believe he posed as a Credit Bureau employee to obtain from a J.C. Penney clerk the codes used to enter the computer's credit files.

Dan P. Miller, a vice president at the Credit Bureau's Maryland subsidiary, says anyone who gets inside the computer's data base can read the company's files on about 90 million people from 24 states—including their credit account numbers, credit histories and unused balances.

Authorities say Mr. Shanklin, in ordering electronic gear by telephone, used credit accounts of people who had recently died. Investigators also say he obtained credit histories of Hollywood personalities, including actress Linda Blair. The grand jury charged that Mr. Shanklin obtained credit reports on at least 80 individuals.

When federal investigators went to Mr. Shanklin's home, they say they found seven antennas on the roof. The amount of computer and electronic gear packed into his bedroom was reminiscent, Mr. Hershey says, of the movie-set bedroom of the youth in "WarGames," a movie that raises the specter of a home-computer penetration of the U.S. missile defense system.

Deliveryman Grows Suspicious

According to the government, Mr. Shanklin picked up some of the goods he ordered at a freight depot, but he had other purchases shipped to his home. A United Parcel Service deliveryman grew suspicious, according to the prosecutor, after taking packages for several individuals to the home in a few days and seeing Mr. Shanklin sign for all of them.

Thomas Maloy, the Credit Bureau's director of public relations, says the company has "taken the appropriate steps" to prevent a similar unauthorized foray into its records, but, citing security concerns, he won't explain what they are.

Mr. Gillis, the computer-security expert, says security can be provided in several ways. Software can require a user to give a series of codes before getting access to data. It also can limit the amount of computerized information that is open to each authorized user. The central computer can be linked only to private telephone lines or programmed to give access to only specific computer terminals.

The most sophisticated safeguards identify authorized users by scanning their fingerprints, voiceprints or even the blood vessels in the retinas of their eyes, says Jim Schweitzer, Xerox Corp.'s manager of system security technology.

But such safeguards may be too expensive or cumbersome for some users. A private phone line to a computer is likely to cost at least $1,000 a month, Mr. Gillis says, so it isn't practical for most low-volume users.

In the absence of the more sophisticated security measures, Mr. Gillis says, "it doesn't take a genius" to break in to a data bank. All it takes, he says, is an understanding of how computers work. Computer users can beat the simpler safeguards by trying random variations of codes and passwords until they find the right ones.

But even the best security is vulnerable to human frailty. A common problem, says Mr. Schweitzer, is that authorized users don't safeguard their passwords and access codes. Theode C. Langevin, working in a New York brokerage house, used the password assigned to a former colleague at the Federal Reserve Bank to tap into the Fed's secret money-supply files. Mr. Langevin has pleaded guilty and faces a sentence of up to five years and a $1,000 fine.

Many crimes that rely on computers, though, could have been committed with old-fashioned tactics. Mr. Schweitzer contends, for instance, that Mr. Shanklin could have found enough information in a credit-bureau or department-store trash bin to charge his purchases to someone else's credit card

Crime on a chip

Beware the logic bombs, data diddlers and hackers

BY MURIEL DOBBIN
© 1983, Baltimore Sun

LOS ANGELES — Logic bombs, data diddling, obscene messages and illegal access to defense secrets are just the tip of a computer crime iceberg that federal and California officials are working full time to control.

Already established in the annals of computer crime are the Phantom, who cost a San Francisco corporation $250,000 by feeding obscene messages into its machines, a teen-ager who acquired computer access to secret Defense Department information, and Cap'n Crunch, one of the original "phone phreaks" from whom today's electronic pirates are descended.

"The magnitude of the problem of computer vulnerability is only now being realized. What we are seeing is the tip of a nasty iceberg," said Clifton Garrott, an assistant district attorney who heads the electronics crime division in Los Angeles.

The U.S. Justice Department has commissioned a team of electronics experts at Stanford Research International, a California foundation, to carry out a study of computer crime in 18 states.

Rep. Ronald Wyden, D-Ore., introduced this month a computer crime prevention bill, said to be the first of its kind, as an initial step to combating the problem.

The Wyden bill would set up a task force to assess the dimensions of computer crime nationally. It also would create a clearing house to provide guidelines and aid for small businesses that are especially sensitive to computer criminals.

Charles Wood, management systems consultant at Stanford Research International, pointed to the timeliness of the movie *WarGames*, in which a teen-ager accidentally keys into a Pentagon computer and puts the world on nuclear alert.

"It is conceivable," he said. "The question is whether it is reasonably possible."

Garrott, who in three years of heading California computer crime-fighters has seen such offenses rise sharply, recalled that it was a teen-age boy who was reported recently to have used a computer at the University of Southern California to gain access to a Defense Department system. The extent of the youth's success, said Garrott, had not been established because nobody at the Pentagon would talk about it.

"What we must remember," said Garrott, "is that a computer is no more than an electronic filing system, which will do what anyone tells it to do."

A so-called intelligent computer, which could draw on its own experience when dealing with different sets of facts, is still at least seven years away, according to Garrott.

Meanwhile, he said, not only corporations but people have to learn to cope with the growing threat of computer abuse.

"Our credit ratings, our taxes, our bank accounts, our telephone bills are all to be found on computers, and there is evidence that increasing access is being gained to credit bureau machines where ratings are listed. New personalities can be built over existing ones, but it is the real person who gets the bill," he said.

He classified hackers, as computer criminals are called, as the successors of phone phreaks such as Cap'n Crunch, who used to use a device called the "blue box" to make long-distance calls without paying for them.

Hackers, he said, are "brilliant in a very limited way. They are not sociable. They flunk out of school and they can communicate only through the world of electronics," he said.

They are people like Lewis DePayne, whose computer name was "Roscoe" or "the Phantom." He led a criminal computer gang in Los Angeles that included two teen-age boys and a woman known as "Susan Thunder."

"Susan Thunder loved computers so much that she would prostitute herself to get money to buy computer equipment," said Garrott.

DePayne eventually spent five months in jail for computer fraud after he had planted obscenities in the computers of a California company.

An even darker side of computer abuse was uncovered at a hospital, where it was found that hackers had gained access to the computerized records of patients in intensive care and had doubled the dosage of their medications.

"If a nurse had not noticed the difference, we could have been dealing with a case of mass murder," Garrott said.

What worries the computer crime fighters is that such offenses often are discovered by accident.

"It's too often a fluke that it's found out at all," Garrott said.

He told of the bank employee who decided use a computer to triple the withholding for state and federal taxes on the bank staff and apply for the refund to be paid to himself. He was unsuccessful only because an auditor wondered if the withholding was too high and investigated.

There was also the case of Sarah the bank teller who programmed the bank computer to pay her unearned overtime and was successful for months until it occurred to a bank official that an enormous amount of overtime was being paid to a low-level employee.

What was significant about the case of Sarah was that after she had made restitution of the money, she was not fired. She was given a better job at a higher salary on the condition that she told nobody how she had diddled the data.

"That attitude on the part of corporations is passing," said Garrott, who explained that it originally stemmed from reluctance on the part of many firms to admit their own management inefficiency. "It does point up the need for new and tougher computer safeguards," he emphasized.

But until computer precautions are improved, he said, there will continue to be cases where data is changed or "diddled," and corporations risk financial disaster as a result of the planting of "logic bombs" which result in a computer erasing all the information in its records on a given time and date.

"The trouble is that people think computer crime is funny when it can be both disastrous and tragic," Garrott said.

Yet even the official admitted computer crime can be funny. As in the classic case of the cookie monster in the computer. That took place in San Francisco, where interference by hackers led to repeated interruption of a firm's programming with the word "cookie" appearing on the screen.

It would wind up with "gimme cookie." And it turned out that the only way to appease the electronic monster was to "feed" it by typing in the word it wanted, which was "cookie."

TRW NEWS

INFORMATION SERVICES DIVISION OF TRW INC. • 505 CITY PARKWAY WEST • ORANGE, CALIFORNIA 92668

FOR RELEASE: CONTACT:

TRW Information Services Division

Credit Data

A CAPSULE DESCRIPTION

TRW Information Services operates and markets one of the nation's largest, computerized consumer credit reporting services called Credit Data. TRW has credit information on more than 86 million consumers, and serves 24,000 subscribers at 35,000 locations.

TRW collects and stores factual credit information on consumers and provides that information to credit grantors that subscribe to the service including banks, retailers and finance companies. The TRW Updated Credit Profile contains credit account information provided by subscribers including positive and negative information about retail credit card accounts, bank charge card accounts, lines of credit, secured loans and finance company accounts. The Profile also includes selected public record information limited to tax liens, judgments and bankruptcies. TRW does not collect information on checking and savings accounts, race, religion, sex, salary, personal lifestyle or criminal records.

Open current credit accounts remain on the Profile indefinitely. Closed or paid accounts are removed within seven years. Adverse credit information remains on file for a maximum of seven years, with the exception of bankruptcies, which remain for a maximum of 10 years.

HISTORY

The development of consumer credit reporting agencies was a direct result of the rapid growth in the use of credit and need for consumer credit repayment information. As more and more businesses began extending credit to consumers, there was an increasing need for information on how those consumers repaid their credit obligations with other creditors. To meet this need, individual businesses began to collect their customer repayment information and exchange it within branches of their own company or within their industry. This credit information was kept in paper files in a central location. As the volume of credit information grew, the job became too large for individual businesses.

Credit bureaus soon developed, meeting businesses' need for a central repository of credit repayment information that provided credit grantors with a more complete picture of consumers' repayment habits. The Michigan Merchants Credit Assn. in Detroit was one such bureau, which was founded in 1932 by Norman Jordan, and taken over by his son, Harry ("Bud") Jordan, in 1956. The company was incorporated in Michigan in August of 1960 as the Credit Data Corp. and used file cabinets and 3" x 5" cards to store consumer credit information. In 1965 Credit Data initiated and installed the first computerized, on-line credit reporting system. It was acquired by TRW Inc. in November 1969 and became TRW Credit Data.

HOW CREDIT GRANTORS USE CREDIT REPORTS

TRW provides credit information to bona fide credit grantors who have a legitimate business need for the information. When consumers apply for

credit, they generally authorize a credit grantor to obtain information on their credit history. Credit grantors use TRW's service when considering applications for credit, or when reviewing their current accounts. Credit grantors apply their own evaluation criteria to the information TRW supplies in determining whether to grant or deny credit. In addition to the information on a Credit Profile, credit grantors also take into consideration information not supplied by TRW, such as the consumer's employment, income, other assets and outstanding debts. TRW does not make the decision to grant or deny credit.

HOW AUTOMATED CREDIT REPORTING WORKS

TRW provides credit information to credit grantors that assist them in the credit granting decision. In turn, they provide TRW with a record of their past and present credit account information. This is usually done on a monthly basis. Since the majority of TRW subscribers have their accounting function computerized, they typically provide the information via magnetic tape, copied directly from their billing records used to notify their customers. These tapes are sent to TRW's data center in Anaheim, Calif., where they are entered into the TRW computer system. This regular receipt of credit information provides TRW with an automatic updating of the credit account information in the files. Public record information is gathered directly from court records, converted to a computerized format and entered into the computer system in the same manner as credit information from credit grantors.

THE CREDIT PROFILE

The TRW Credit Profile contains up-to-date credit information on consumers' credit accounts, items of public record, inquiries, and a consumer's identifying information. [redacted]

[redacted]

--Identifying Information: the consumer identifying information is limited to the consumer's full name (including generation, such as "Junior" or "Senior"), address, social security number, age or year of birth, and spouse's initial. The consumer's place of employment, as indicated by the consumer on a credit application, may also be contained in the Profile.

--Credit Account Information: includes the name of the company reporting the account, the date the information was reported, the date the account was opened, the type of account, terms, the original balance or credit limit, current account balance, amount past due and the status of the account, such as "current account" or "30 days past due."

--Inquiries: whenever a request is made for a copy of the Profile, that request, or "inquiry," is automatically recorded on the Profile and is retained for a period of one year. Inquiries include the name of the inquiring company and the month, day and year of the inquiry.

--Public Record Information: includes the name and location of the court from which the data was obtained, a description of the item, such as "judgment" or "state tax lien," the docket number and/or page number where it was located, date and the status of the item, such as "judgment satisfied."

--Designations: each item of credit or public record information is assigned a general designation of "positive," "negative" or "non-evaluated," depending on the status of the account or public record item. A paid satisfactory account, for example, would be designated as a positive item. These designations -- selected through the consensus of credit grantors that use TRW's service -- are provided as a service to credit grantors. TRW does not provide a general credit rating -- such as "A-1" or "Triple-A Credit" -- on an individual.

--Payment Profile: is another service to credit grantors that provides them with an immediate comprehensive picture of the consumer's payment history for the last 12 months. An account that has been current for the last 12 months, for example, would be indicated in the Payment Profile as a series of "C's," representing "current." A 30-day, or one month past due, would show on the Payment Profile as a "1" in the column for that month.

--Consumer Statement: if the consumer so chooses, a consumer statement of 100 words or less regarding any item that TRW has reinvestigated and with which the consumer is still dissatisfied may also be included on his or her Profile.

(A more extensive explanation of status comments, association codes, types of accounts, and items of public record is included on the back of the sample Credit Profile).

DISCLOSURE TO CONSUMERS

Consumers may obtain a copy of their Credit Profile anytime by writing to TRW directly. Approximately 500,000 consumers a year request a copy

of their Credit Profile from TRW, through TRW's 21 Consumer Relations offices across the country. They should include the following information in their request:

: Full name (including generation, i.e., Jr., Sr., III, etc.)
: Addresses for 5 years
: Social Security Number
: Year of birth
: Signature

If the consumer has been denied credit within the past 30 days, there is no charge for the Profile. Consumers should indicate the company that declined them credit or include a copy of the declination letter with their request. If they have not been denied credit within the past 30 days, there is a $8 fee. ($5 in Maryland). The request should be mailed to the TRW Consumer Relations office closest to their home (See list of TRW locations). Eighty-six percent of the consumers who request their Credit Profile from TRW do so by mail.

Consumers may also make a personal visit to TRW offices during business hours to receive a copy of their Credit Profile and speak to a trained representative, who will explain its contents. To make an appointment for a personal visit, consumers should call the TRW Consumer Relations office closest to their home. Fourteen percent of the consumers who contact TRW make a personal visit to TRW's Consumer Relations offices.

TRW reinvestigates any item on a consumer's Credit Profile that the consumer disputes. This is done by contacting the source of the information to verify its accuracy. If there is any item on the Credit Profile that

the consumer disputes, the nature of the dispute should be indicated in the column provided on the Credit Profile and returned to TRW. TRW will reinvestigate the disputed item with the source of information. If the item cannot be verified, it will be deleted from the record. TRW notifies the consumer of the result of that reinvestigation by sending the consumer an updated copy of the Credit Profile. Of the approximately 500,000 consumers a year who request copies of their Credit Profile from TRW, less than one-third dispute information on the Profile.

Consumers may add a consumer statement to their Credit Profile regarding any item which TRW has reinvestigated and with which they are still dissatisfied. This statement will tell the consumer's side of the story in his or her own words, and will be included with all inquiries to the consumer's Credit Profile. TRW will work with consumers to formulate the statement, which should be limited to 100 words or less and should not include libelous comments.

SAFEGUARDS

TRW's contract with subscribers specifies the Credit Profiles be used only in accordance with the permissible purposes outlined in the Federal Fair Credit Reporting Act. TRW has extensive security procedures, including safeguards for protecting the computer equipment, computer center, information files, systems programming and access to the TRW system.

CREDIT AND FEDERAL LAW

There are a number of federal laws that pertain to credit. The Fair Credit Reporting Act, Equal Credit Opportunity Act, and Fair Credit

Billing Act, summarized below, are the three most important laws for consumers to be aware of.

FEDERAL FAIR CR DIT REPORTING ACT

Gives you the right...

...to know what credit information is held that pertains to you, without charge if you've been denied credit within 30 days

...to know who has received a report on you in the past six months

...to have information pertaining to you, which you dispute, reinvestigated and corrected or removed if inaccurate or unverifiable

...to place a statement in the credit reporting company's records if you continue to dispute the accuracy of an item after reinvestigation

...to have an updated report sent to those credit grantors who have received a report pertaining to you in the last 6 months

...not to have adverse information pertaining to you over 7 years, or 10 years for bankruptcies, kept or reported

EQUAL CREDIT OPPORTUNITY ACT

Gives you the right...

...to be judged on an equal basis with all other credit applicants

...to have joint accounts reported for both spouses separately after June 1977

...to have your income considered without regard to sex or marital status

...to have child support and alimony payments regularly received counted as income, if requested

...not to be asked questions about birth control or child bearing plans

...to obtain a credit card in your own name if you are a married woman

...to know the reasons you have been denied credit

FAIR CREDIT BILLING ACT

Gives you the right...

...to file a written complaint with the credit grantor within 60 days after the bill you question was mailed to you

...to receive an acknowledgement from that credit grantor within 30 days after that, and a settlement within 90 days

...to forestall collection of the account until the dispute is resolved and

...to prohibit that credit grantor from reporting negative information regarding the disputed amount to credit reporting agencies until the dispute process is completed

OTHER CREDIT REPORTING AGENCIES AND INDEPENDENT BUREAUS

TRW is one of the largest of five major, U.S. computerized credit reporting agencies. The others are TransUnion (Chicago); Credit Bureau Inc., a division of Equifax (Atlanta); Chilton (Dallas); and Pinger (Houston).

There are many more smaller, independently owned credit bureaus nationwide that provide an important service to their communities. TRW has contractual agreements with 28 such bureaus to provide them with the latest data handling technology and enhancements, while at the same time allowing them to retain independent control of their operations, as well as access TRW's data.

522

February 13, 1984

Honorable Mae Tischer
Chairman, Health, Education and
Social Services Committee
Pouch V
Juneau, AK 99811

Dear Mrs. Tischer:

This letter is in regards to Bill 522.

I agree that kindergarten should be required in Alaska. However, the age (6 years) should not be changed. The year of growth between 5 and 6 will give the child a greater capacity to learn. He will be able to cope with social situations and pressures with better understanding than before.

I feel strongly that June should be the cut off date for entering school. With this requirement there should be no doubt whether a child may or may not enter school.

Thank you for your time.

Sincerely,

Sheilah D. Eral

Pouch V
Juneau, Alaska 99811

Dear Mrs. Tischer:

As a first grade teacher for the past twelve years, I have become convinced that most children who do not master the skills necessary to go on to second grade simply need time for maturation. I urge you to move the entry date from November 1st to June 1st. (Many parents whose children I have had said they wished they'd given them a chance to develop both mentally, physically, and emotionally before entering their child in school. Help prevent parent failure.)

Sincerely,

Marilyn D. Hahn

Honorable Mae Tischer
Chairman, Health, Education and
Social Services Committee
Pouch V
Juneau, Alaska 99811

Dear Mrs. Tischer:

As a first grade teacher and a parent of two boys ages four and five I urge you to look at changing the school entry date.

Many children often start school in September having just turned five or at four years of age turning five by November. These children are sometimes academically ready for school but not physically or emotionally. They are often immature, have coordination problems and are really not ready for the routine of the daily classroom.

In my 14 years experience as a primary teacher I have found tnat the children who end up in modified primary or retained in 1st grade are children with summer birthdays and early fall birthdays.

My own sons are examples: Sean turned five on June 2. He is a very capable child but I felt he was too immature to start school. I have seen a great change in him and I am confident he will do well and be able to handle everyday pressures and demands better.

One more thought on this change in entry date. Think about the outside and peer pressures a child needs to cope with once in Junior High or Senior High. If a child has experienced frustration as the youngest in a class in elementary school it gets worse in Junior High or Senior High. Why not give the children a chance to be at the top of the class instead of the bottom? A chance to have a little more maturity to cope with the influence of drugs and alcohol.

I know this isn't the answer to all school failures, but it is a step in the right direction.

If you have any questions please write or call me at any time.

Sincerely,

Linda A Landers

ANALYSIS

A. Assumptions:

Based on FY 1982 Juvenile arrest data and the Department of Law's estimate that 45-50 juveniles will be waived into Adult Court, it is estimated that 72.75 additional beds will be needed by the Adult Corrections Agency,. A detail of this estimate is given in Attachment 1.

B. Program Summary:

1. In FY85, funds would be required to begin planning and design for construction of medium security beds. Because of the serious nature of the offenses, however, it is assumed that a significant number of the offenders would spend some time in a maximum security setting. Capital costs for medium security beds are estimated to be $146,000 per bed.

   72.75 beds @ $146,000 = $10,621,500

2. Full operating costs would not occur until FY87. It is estimated that twenty-nine (29) positions will be required to provide security and support for these beds: One (1) Correctional Officer III, twenty-six (26) Correctional Officers II and two (2) Probation Officers II. Costs for these positions will occur in FY87, the anticipated opening date for the new beds. Estimated costs are as follows:

100	Personal Services	$1,520,100
200	Travel	7,100
300	Contractual Services	218,800
400	Commodities	223,400
500	Equipment	6,400
700	Inmate Gratuities	36,000
	Total	$2,011,800

Operating cost for FY85 and FY86 are for inmate cost of food, clothing, medical, etc., for the estimated persons coming into existing facilities before the new beds can be completed.

Inflation of 6% for all expenditure object groups was assumed for subsequent fiscal years.

Attachment 1

Estimated Annual Frequency of Convictions	Presumptive Sentence	Estimated Average Sentence for 16 and 17 Year Olds Convicted as Adults	Actual Time to Serve With Credit for Good Time
*Unclassified felony (automatic waiver)			
2 murder I	20 years	15 years	11.25 x 2 = 22.5 years
1 murder II	5 years	4 years	3.0 x 1 = 3 years
1 sexual assault 1st (with firearm)	10 years	7 years	5.25 x 1 = 5.25 years
5 sexual assault 1st (without firearm)	8 years	5 years	3.75 x 3 = 11.25 2 probation
3 Class A felonies (with firearm)	7 years	6 years	4.5 x 2 = 9 years 1 probation
5 Class A felonies (without firearm)	5 years	4 years	3 x 4 = 12 years 1 probation
	Non-presumptive Range		
6 Class B felonies	0-10 years	3 years	2.25 x 4 = 9 2 probation
2 Class C felonies	0-5 years	1 year	.75 x 1 = .75 years 1 probation
			TOTAL: 72.75 person-years

CHAIRMAN

CITY OF ALEKNAGIK
P.O. Box 33
Aleknagik, AK 99555

March 8, 1984

Representative Adelheid Herrmann
House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Herrmann:

On behalf of the City of Aleknagik, the residents of South Shore, and the Aleknagik City Council, I would like to request that the Alaska State Legislature include in the Fiscal Year 1984 Legislative appropriations, funding for a new South Shore Community Health Aide Clinic facility. At the present time, the South Shore Community Health Aide, is providing medical care for the ill in her home, and has been, for the past two years.

The residents of Aleknagik consist mainly of elderly people who do not always have access to boat transportation, or vehicle transportation, because they don't know how to operate them. The only other option is air transportation, for medical care and immediate emergencies. Moreover, the elderly people don't use English as their first language and usually prefer a person who can speak their language, which is Yupik Eskimo, to tell the Community Health Aide of their medical problems.

The employment situation is also another problem that causes the income to be below average in many homes, and not all of the South Shore Aleknagik residents have access to vehicle transportation. Therefore, the people in the community reply on their Community Health Aide for medical problems, because air transportation is high. For one person to fly to Dillingham, it costs $ 40.00 one way, and that adds up, especially if the Native community mainly relies on subsistence livelihood to help meet their basic needs, such as high food costs, which are practically doubled the cost of Anchorage food prices.

The approval of a new South Shore Clinic would improve the sanitation and health/safety requirements of the Indian Health Service, by providing adequate water, sewer, heat for

the protection of the patient's medical care. Recently, during a "cold spell," the South Shore Community Health Aide's medicine froze and had to be disposed of, when at all times, she should have an adequate supply of medication on hand for basic emergency care.

Currently, the South Shore Community Health Aide has one (1) four-drawer steel file cabinet, that she keeps her medicine, in one of the drawers, medical utilities, such as thermometers, otoscopes, in another drawer, and records and other basic medical supplies in another drawer. The South Shore Community Health Aide, personally, is also keeping medication that has to be kept refrigerated, in her refrigerator, along with her food, and she doesn't approve of the idea of "mixing" food and "medication" in one mini-refrigerator. Those are the only two (2) pieces of "medical" equipment that she is equipped with, along with a telephone to take care of medical emergencies--right at home!

The South Shore Clinic would also be a benefit to the South Shore Community Health Aide's well-being. She would be more confident, knowing that adequate medical equipment, and supplies were locked up in the South Shore Clinic, and would fit the true role of a Community Health Aide in her new setting and environment.

Bob Appel, Director of Community Services, for the Bristol Bay Area Health Corporation, is proposing to submit to include South Shore Health Clinic Lease space to the Indian Health Service, for Fiscal Year 1984 Budget. If funding to build a new South Shore Clinic, and funding for clinic equipment is approved, the City of Aleknagik would like to begin construction of the South Shore Clinic facility in the Fall of 1984. It is currently estimated that the construction time span for the clinic would be approximately two (2) months. The City plans to use local people to build the clinic, and for the building materials, we are using estimate by a local supplier, Choggiung Lumber & Supply, so we wouldn't have to worry about freight expenses for the building materials. The only freight expenses would be for the new clinic equipment from American Hospital Supply, of Redmond, Washington, and from Anchorage, for office desk, chair, garbage can, and 4 waiting chairs.

Therefore, for the benefit of the local elderly's health care, and the South Shore residents of Lake Aleknagik, I again propose that the Alaska State Legislature provide funding for a new South Shore Community Health Aide Clinic Facility, and Clinic Equipment for our community. Thank you for your time and consideration.

Sincerely,

CITY OF ALEKNAGIK

FROM: Helen W. Chythlook, City Administrator

RE: South Shore Health Clinic Equipment Estimates
(Equipment Needed by South Shore Health Clinic)

Per Telephone Conversation with Barbara Knutsen,
CHAP Director, Bristol Bay Area Health Corporation

DATE: 2 March 1984

Barbara Knutsen, CHAP Director, Bristol Bay Area Health Corporation said that Equipment Needed for the South Shore Health Clinic are as follows. These are rough estimates for now.

EQUIPMENT	COST ESTIMATE (WITHOUT FREIGHT)
Exam Table (Catalog-American Hospital Supply) (Redmond, Washington)	$ 1,300.00 (no freight)
Treatment Cabinet with Drawers (Catalog-American Hospital Supply) (Redmond, Washington)	$ 100.00 (no freight)
Storage Cabinet(Double Door that Locks) (Barrett Office Supply)/156 pounds.	$ 241.00 (without Freight)
Goose Neck Lamp (American Hospital Supply) (Redmond, Washington)	$ 54.00 (no freight)
Double Pedestial Desk (Barrett Office Supply)/135 pounds.	$ 300.00 (no freight)
Desk Chair/with Arms (Barrett Office Supply)/45 pounds (approx.)	$ 86.00 (no freight)
Swivel Desk Chair (Barrett Office Supply/43 Pounds)	$ 146.00 (no freight)
Folding Chairs (14.50 each) (Barrett Office Supply (46 pounds/4 chairs)	$ 58.00 (4 Chairs/Carton)
Refrigerator (10.4 Cubic foot) (Sears/ 154 pounds)	$ 400.00 (no freight)

EQUIPMENT	COST ESTIMATE (WITHOUT FREIGHT)
(2) Two Garbage Cans (Barr[illegible]t Office Supply)	$ 38.00 Each (no freight) ($ 76.00) FOR TWO GARBAGE CANS
Mayo Instrument Stand (American Hospital Supply)	$179.00 (no freight)
Cool-Mist Vaporizer (Sears)/ 4 pounds, 12 oz.	$ 20.00 (no freight)
Adult Scale (American Hospital Supply) (Redmond, Washington)	$265.00 (no freight)
Stainless Steel Utility Table (American Hospital Supply) (Redmond, Washington)	$400.00 (no freight)
Stainless Steel Worktable (American Hospital Supply) (Redmond, Washington)	$325.00 (no freight)
ESTIMATE TOTAL COST EQUIPMENT (FREIGHT COSTS NEED TO BE INCLUDED):	$5,350.00 (COST WITHOUT FREIGHT)

Barbara said she had other Hospital Equipment catalogs, if we would like to sit down with her sometime, at the Bristol Bay Area Hospital and go over clinic equipment catalogues with her. Barbara is "holding" an infant scale for the South Shore Clinic. The hospital potentially will be able to provide the South Shore Clinic with a short-wave radio. We will need to provide (2) two fire extinguishers.

Dear Ms. Chythlook

Enclosed is is an itemized materials list I have estimated for the proposed South Shore Health Aide Clinic as per your letter dated 3/5/84. The price includes all materials necessary to bring the building to an operational condition. I have also included an estimation of materials and a schematic drawing for the electrical which should be installed during construction.

We certainly appreciate the opportunity to bid this project, and look foward working with our friends in Aleknagik. If I may be of further service or answer any questions concerning the enclosed estimate please contact me at Chog Lumber 842-1200.

Sincerely,

CHOG LUMBER

Dillingham, AK 99576

Dear Mr. Sorensen:

Enclosed is a list of building materials that the City of Aleknagik would like price estimates on for the proposed South Shore Health Aide Clinic. The minimum dimensions are: 20 foot by 24 foot.

I would like to present the enclosed figures to Representative Herrmann by Thursday of this week (March 8th). The Council would like to delete the furnace room. Therefore, there are 4 rooms:

A. Exam Room, Dimensions have to be 12 foot by 12 foot, according to the Public Health Service Requirements.

B. Waiting Room/Office - suggested dimensions are also 12 foot by 12 foot, or 12 foot by 10 foot.

C. Bathroom--for now, we are not anticipating installing water and sewage system, but we would like to reserve space for that in the near future.

D. Storage Room-This must have some shelving, and a counter with a counter top.

See attached list, and enclosures for further details.

Sincerely,

CITY OF ALEKNAGIK
Helen M. Chythlook

A REPORT TO THE ALASKA STATE SENATE
AND HOUSE HESS COMMITTEE
13th ALASKA STATE LEGISLATURE, 1984
PROPOSED SOUTH SHORE HEALTH CLINIC
CITY OF ALEKNAGIK- FY84

INTRODUCTION

In the December 17, 1974, Memorandum of Agreement signed by Emery A. Johnson, M.D. Assistant Surgeon General, Indian Health Service, James S. Dwight, Jr., Administrator, Social and Rehabilitation Services, and Peter F. Holmes, Director, Office for Civil Rights, there is a provision of Medical Services to Indians and other Native Americans, that state in the policy: "Indians and other Native Americans are entitled under the fifth and fourteenth amendments to the Constitution of the United States, and Title IV of the Civil Rights Act of 1964, 42 U.S.C. 200-d et, seq., to equal access to State, Local, and Federal programs to which other citizens are entitled." It also mentions that "The United States Indian Health Service is a residual rather than primary health service resource." Moreover, the Indian Health Service Policy outlines, under the provision of its approved medical assistance plan or other public assistance plans, the state agency is responsible for meeting the cost of the services provided therein for all individuals, regardless of race, who apply and are found eligible.[1]

EXISTING MEDICAL CARE (SECONDARY)

The central medical facility, is the Bristol Bay Hospital, in which the management recently was transferred to the local Bristol Bay Area Health Corporation, by the Indian Health Service. The hospital provides secondary medical service to approximately 32 villages. For major medical emergencies that cannot be treated at the Bristol Bay Hospital, they transport patients to the Alaska Native Medical Center in Anchorage.

The medical providers at the Bristol Bay Hospital communicate with the immediate health needs of each village, by the Community Health Aide Program (CHAP), which is funded by the Bristol Bay Area Health Corporation. Each day at an assigned time, the hospital doctor on duty, has "traffic hour," with the 32 villages and hears medical reports, prognosis, seen and monitored by the Community Health Aide, by VHF Radio Communications.

Thank goodness to the inventor (Alexander Graham Bell) of telephones, there are now "bush phones" in some of the villages, and the Community Health Aides can call the hospital if immediate, medical care is needed for patients. After hearing the Community Health Aides prognosis on the patient, the doctor recommends the appropriate medication treatment, and a follow-up visit to be done by the Community Health Aide. If the patient is still ill, and prescribed medical treatment isn't working, then the medical doctor will recommend that the patient be sent via airplane to the hospital for further medical treatment.

PROBLEM STATEMENT AND FACTS

If it weren't for the Community Health Aides Program in the villages, a lot of older adults and infants, who are mostly affected by illness, the death mortality rate would be higher than what it is today. Plus, it would be costing the elderly persons' and Alaska Natives, a fortune, to get to their final destination for immediate, medical attention, since most transportation is by air in the winter, and by boat in the summer. Although there is a 23 mile "dirt" road between Aleknagik and Dillingham, where the hospital is located, most elders do not drive, and they are the ones most affected by sudden illnesses and need immediate medical attention.

Therefore, I propose to the 1984 Alaska State Legislature, that a Community Health Aide Clinic be built on the South Shore of Lake Aleknagik, so that the elderly can have a closer access to quality health care. The elderly also do not operate outboard motors, and it is rather

difficult for most of them to "get around," and they mostly need "escorts" to help them get medical care, because they do not speak English, as their first language. If the New South Shore Clinic was built, this would benefit the elderly's well being, mentally, physically, and emotionally. Because, the South Shore Health Clinic would be on the same side of the lake they they live on, and they would call the Community Health Aide for immediate medical aide. She/he in turn, would contact the hospital if it was a serious emergency, and be able to drive the elder person, or infant, to the hospital, since the road is accessible on the South Shore vicinity. This medical care routine would affect persons of all ages, who need immediate medical care. For those persons who are too ill, disabled to go to the clinic, the Community Health Aide would make home visits, and follow-up visits, until the person's illness has subsided; or the person has been referred for further medical treatment at the Bristol Bay Hospital.

The approval of the South Shore Clinic, by the Alaska State Legislature would also be an improvement in the existing Community Health Aide facility, which is at the home of the South Shore Health Aide, who does not have built-in water and sewer in her home. When the weather is real cold, the existing oil heater doesn't provide adequate heat, and the medicine and supplies have frozen solid, thus having to dispose of medicine that should be locked up in an adequate medicine cabinet, and be well supplied in advance, for unexpected emergencies. The current "home clinic" equipment consists of one, four-drawer steel file cabinet, in which the Shore Shore Community Health Aide keeps her medical records in one drawer, medicine that doesn't need refrigeration in another, medical utensils, such as thermometers, stethoscope and related equipment in one drawer. The home is a small, two room, plywood built construction. The other equipment is the South Shore Community Health Aide's personal mini-refrigerator, in which she keeps her food and medicine that needs to be refrigerated.

Personally, I don't think I would like to be treating the medically ill in my home. It takes a special person with some dedication and sympathy, for the well being of others, first, to be treating the ill in his/her home.

CONCLUSION

Therefore, for the previous reasons mentioned, that for the physical, mental, and emotional well-being of the elderly, and ill, and those who need immediate medical attention, as well as for the betterment of the existing health care delivery and Community Health Aide's well being, I propose that the 13th Alaska State Legislature take all that has been said into consideration, and approve the funding of a new health clinic facility, in the South Shore vicinity of Aleknagik. Thank you for your time and consideration.

Dear Respresentative Tischer:

Re: HB 548 Relating to Community Health Aide Training and Support

The full Board of South Central Health Planning and Development, Inc., met on February 25, 1984. The proposed bill to provide funding for Community Health Aide training was discussed fully. A motion to support the concepts of HB 548 was passed unanimously.

The Community Health Aide program continues to be the most effective, least costly, and best accepted health care service in rural Alaska. I urge you to act expediently to support this Bill.

Sincerely,

Steve Lesko
President

DEPARTMENT OF HEALTH & HUMAN SERVICES
PUBLIC HEALTH SERVICE

March 2, 1984

ALASKA AREA NATIVE HEALTH SERVICE
BOX 7-741
ANCHORAGE, ALASKA 99510

Refer to: A-D (A-CHAP)

The Honorable Mae Tischer
Alaska House of Representatives
Chairman of H. E. S. S.
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Ms. Tischer:

I have just reviewed HB 548, "An act relating to state assistance for Community Health Aide Programs; and providing for an effective date." I would like to go on record as supporting this significant legislation in terms of the Community Health Aide Program (CHAP).

As Director of the Alaska Area Native Health Service, I have come to know and appreciate the importance of the CHAP in helping to make possible an improved health status of Alaskan Natives. Community Health Aides (CHAs) are located in 171 isolated communities, from Point Hope to Kasaan. They provide year round primary health care coverage. Not only does this coverage consist of emergency and acute care, it also embraces a wide range of health surveillance and other preventive activities. Drugs may be administered by a CHA under a physician's direction. The CHA, then, represents the front line in the delivery of health care, the link between village residents and the appropriate health care backup system.

The foundation of the CHAP is formed by a consistent training program, which includes a published curriculum and skills list. Using established guidelines and tested approaches to training, health care professionals, whether in the training centers or the field, are better able to relate to training needs of the CHAs. CHA certification is offered to those CHAs who are able to acquire the skills and successfully meet other training requirements. Certification is a milestone for a CHA in the acquisition of specified competencies, and it indicates that a CHA may practice safely with an high level of independence. The term "practitioner" is often used when referring to CHAs who have reached the certificate level.

The difficulty of making appropriate health care accessible and cost-effective to sparsely populated and widely scattered villages remains an acute problem in many countries. The achievements of the CHAP in helping to reduce this health care service gap in rural Alaska has repeatedly been recognized and acknowledged by health care professionals. The CHAP has been regarded by the World Health Organization as as a model program because of its success in utilizing the village resident in improving his own health status.

With the passage of HB 548, significant resources will be made available. From the viewpoint of AANHS, the strong funding assistance proposed in the bill is welcomed and encouraged. This bill will allow not only for program maintenance but also for continued growth and improvement. Passage of this bill will also see the State of Alaska making a much-appreciated budget commitment to the overall program. It is apparent that if the configuration of well-trained CHAs providing primary health care services from small rural clinics is to be maintained and enhanced, the combined resources of the State of Alaska, the Regional Health Corporations, and AANHS will be required.

Sincerely,

G. H. Ivey
Director
Alaska Area Native Health Service

MEMORANDUM

TO: Rep. Mae Tischer Chairperson
House Health, Education
and Social Services Committee

FROM: Rep. Jack Fuller

DATE: February 24, 1984

SUBJECT: House Bill 548 - An Act relating to
State Assistance for Community
Health Aide Programs

Attached for your review and files is a letter from the Mayor of Kotlik, Joseph P. Mike, with regard to House Bill 548.

JOSEPH P. MIKE/MAYOR
Kotlik, City Council
Kotlik, Alaska 99620

February 14, 1884

JACK FULLER/REPRESENTATIVE
Pouch V
Juneau, Alaska 99811

Dear Mr. Fuller

Just recently I have received a copy of House Bill No. 548 which is introduced by Herman, Hulbert, M.W. Miller, Shultz, Fritz, BettiWorth, Gall, Zharoff and McBride.

I am in support of House Bill No. 548 which concerns about the Primary Health Aide which relates to State Assistance for Community Health Aide Programs.

Our Primary Health Aides within the A.V.C.P. Region have the lowest salary even though they have the same qualification as the other Health Corporation.

As you may not be aware our Health Aides are on call 24 hrs daily. I know the Health Aides work longer hrs in the villages because we do not have a PHS Hospital near our village.

The people in the villages depend on our Health Aides to help them with their sickness, and they do a real good job.

The Health Aides leave their families when they are asked to attend trainings in Bethel for about (2-3) weeks to improve their Health skill.

Also their are beginning to be more High School graduates who are interested in Health Fields.

They are benefiting from the training programs, and they should continue their job they can become Physician Assistant in the Health Corporation or the training will encourage them what their goals are for the future.

Since you are representing our District I once Again ask you to strive real hard to get the House Bill no. 548 to go thru legislation, this is something that is badly needed by our Health Aides

Thank you for taking your time to read the letter.

Have a nice day and do a good job.

If there should be any question do not hesitate to write to the above address or give us a call at (907) 899-4313.

Once again Thank You.

Sincerely,

Joseph P. Mike

JPM/lro

municipality under this section shall be on a form furnished by the Department of Administration and shall be executed within 60 days after the effective date of the appropriation or allocation.

(b) An appropriation or allocation for a grant to a municipality for construction of a public facility lapses if substantial, ongoing work on the project has not begun within five years after the effective date of the appropriation or allocation.

(c) In accepting a grant of money for construction of a public facility, a municipality covenants with the state that it will operate and maintain the facility for the practical life of the facility and that the municipality will not look to the state to operate or maintain the facility or pay for its operation or maintenance. This requirement does not apply to a grant of money for repair or improvement of an existing facility operated or maintained by the state at the time the grant is accepted if the repair or improvement for which the grant is made will not substantially increase the operating or maintenance costs to the state.

(d) Not less than 20 percent of a grant shall be paid to a municipality within 10 days of the effective date of the agreement under (a) of this section. The remainder of the grant shall be paid either in monthly installments equal to the amount of grant money the municipality expended in the previous month or in a lump sum as determined by the Department of Administration. (§ 1 ch 156 SLA 1980; am § 1 ch 4 SLA 1982)

Effect of amendments. — The 1982 amendment in subsection (a), substituted "amount is appropriated or allocated" for "appropriation is made" in the first sentence, inserted "or allocation" in items (1) and (3) in the second sentence, and added "and shall be executed within 60 days after the effective date of the appropriation or allocation" to the end of the third sentence; redesignated the former fourth and fifth sentences of subsection (a) as subsection (d); inserted "or allocation" in two places in subsection (b); substituted "a" for "each" preceding "municipality covenants" and "the practical life of the facility and that the municipality" for "its practical life and that it" in subsection (c); added the second sentence of subsection (c); deleted the provisions of former subsections (d), (f), and (g), which may now be found in AS 37.05.316, 37.05.317, and 37.05.318, respectively; and in present subsection (d), added "under (a) of this section" to the end of the first sentence. The substance of the provisions of former subsection (e) may now be found at the end of the third sentence of subsection (a).

Sec. 37.05.316. Grants to named recipients. When an amount is appropriated or allocated to a department as a grant for a named recipient which is not a municipality, the department to which the appropriation or allocation is made shall promptly notify the named recipient of the availability of the grant and request the named recipient to submit a proposal to provide the goods or services specified in the appropriation act, or both, for which the appropriation or allocation is made. At the same time, the department may issue a request for proposals from other qualified persons to provide the same goods or services, or both, in the same area. The department shall contract with

the named recipient unless the Office of the Governor, with due regard for any local expertise or experience among those making proposals, determines that an award of the contract to a different party would better serve the public interest. If the contract is awarded to another party than that named by the legislature, the basis of that action shall be stated in writing at the time the grant is issued and a copy of the written statement shall be sent to the Legislative Budget and Audit Committee. A contract shall be executed within 60 days after the effective date of the appropriation or allocation. The purchase of the goods or services, or both, shall be in accordance with AS 37.05.230(1)(C). (§ 2 ch 4 SLA 1982)

Sec. 37.05.317. Grants to unincorporated communities. When an amount is appropriated or allocated as a grant under this section to an unincorporated community, it shall be disbursed as follows:

(1) Within 45 days after the effective date of the appropriation or allocation, the Department of Community and Regional Affairs shall notify the governing body of the unincorporated community, if any, that a grant is available.

(2) The Department of Community and Regional Affairs shall determine if there is a qualified incorporated entity in the community area that will agree to receive the grant and administer it, subject to terms generally applicable to private grantees. If there is more than one such entity, the Department of Community and Regional Affairs shall select the most qualified and the grant shall be awarded to that incorporated entity for the purposes specified in the appropriation act. However, the Department of Community and Regional Affairs shall give preference to a nonprofit corporation organized by a community for receipt of the grant.

(3) If there is no incorporated entity qualified to receive the grant, the Department of Community and Regional Affairs shall administer the program as specified in the appropriation act directly or through agents or contractors with whom it may contract in the community area. (§ 2 ch 4 SLA 1982)

Sec. 37.05.318. Further regulations prohibited. Notwithstanding the Administrative Procedure Act (AS 44.62), the Fiscal Procedures Act (AS 37.05), and the Executive Budget Act (AS 37.07), a state agency may not adopt regulations or impose additional requirements or procedures to implement, interpret, make specific, or otherwise carry out the provisions of AS 37.05.315 — 37.05.317 unless required by the federal government for participation in federal programs. (§ 2 ch 4 SLA 1982)

Sec. 37.05.325. Definitions for AS 37.05.315 — 37.05.317. In AS 37.05.315 — 37.05.317, "allocation" and "appropriation" have the meanings given in AS 37.07.120(2) and (3). (§ 2 ch 4 SLA 1982)

Juneau, Alaska 99811

Dear Ms. Tischer:

Re: HB 548 Regarding Community Health Aides

The delivery of primary health care in rural Alaska has long been dependent on the Community Health Aide (CHA). The development of health skills of indigenous providers has worked remarkably well for Native people in 200 sites throughout the State, and has become a model worldwide.

With the State's unprecedented population growth in the last 10 years and increasing numbers of non-natives moving to rural villages, demands on these essential health providers have also grown. The demands are constant but frequently show seasonal increases. With the growth has also come increased public expectations for new types of services from CHAs including health education, sanitation and hygiene, crisis intervention for behavioral health problems, and increasing levels of EMS interventions.

Concerns which have been brought to the attention of SCHPD during our needs assessments and plan development include high turnover and "burnout" of the primary aides; problems with recruitment, retention and adequate training of alternates; adequate continuing education for all aides; and adequate supervisory consultation for the aides. House Bill 548 addresses many of the concerns which we have emphasized. The Bill's provision for future support of aide services is essential to assure the stability of the program and the vital role CHAs play in health care in rural areas.

South Central Health Planning and Development, Inc. enthusiastically supports this bill and its intent.

Sincerely,

Barbara Berger
Program Manager

MEMORANDUM

TO: Interested Parties

FROM: Adelheid Herrmann,
Representative/District 26

DATE: February 15, 1984

SUBJECT: Background on HB 548 on Health Aides

The Health Aide Bill, HB 548, is aimed at training and supervising health aides that service communities throughout the State. The bill establishes a funding formula to ensure that funding is provided to each region on an equitable basis. The formula for funding is based on the number of health aides employed in each region during the previous fiscal year.

Each of the 12 Regional Health Corporations would receive:

- $30,000 to fund a COMMUNITY HEALTH AIDE PROGRAM, and
- $8,000 which covers TRAINING AND SUPERVISING for each current community health aide, and SALARIES for alternate community health aides.

The bill would only commit an additional $1 million of State funds over the total amount allocated last year for the same programs.

On the next page, I have outlined the costs that are covered and the total amount that would be awarded to each region.

Community health aides perform important services, and their support is especially important in areas where doctors, nurses and other professionally trained medical staff are scarcely available.

FY 85 PROJECTED EXPENSES FOR EACH REGION

Region	No. of Health Aides	$ for Aides	$ for Program	Total Grant
APIA	7	56,000	30,000	86,000
Bristol Bay	37	296,000	30,000	326,000
Cook Inlet	1	8,000	30,000	38,000
Copper River	6	48,000	30,000	78,000
Kodiak	7	56,000	30,000	86,000
Maunaluk	15	120,000	30,000	150,000
North Pacific Rim	4	32,000	30,000	62,000
North Slope	12	96,000	30,000	126,000
Norton Sound	21	168,000	30,000	198,000
Southeast	15	120,000	30,000	150,000
Tanana Chief Conf.	29	232,000	30,000	262,000
Y/k	73	548,000	30,000	614,000
TOTAL:	227	1,780,000	360,000	2,176,000

FY 84 ACTUAL EXPENSES

Bristol Bay	163,000
Kodiak	60,000
Maunaluk	170,000
Norton Sound	103,300
Tanana Chiefs	348,000 (including 100,000 for leases)
Yukon Kuskokwim	142,000
Kuskokwim Community College	146,000
TOTAL:	1,132,300

The total grants awarded last year for health aide and related programs was approximately $1.2 million, but not all the regions listed above were recipients. The total projected amount granted under this bill represents about a $1 million increase over last year's funding.

COMMUNITY HEALTH AIDE PROGRAM (CHAP)

RESOLUTION # 83-10-04

AVCP RESOLUTION IN SUPPORT OF PROPOSED LEGISLATION TO PROVIDE FUNDS FOR SALARY INCREASE AND TRAINING OF COMMUNITY HEALTH AIDES IN THE STATE OF ALASKA.....

WHEREAS, the Community Health Aide Program (CHAP) is the mainstay and the key element to an effectively functioning health system in Rural Alaska and particularly in the Yukon-Kuskokwim Delta;

WHEREAS, the Yukon Kuskokwim Health Corporation Community Health Aide Program is the largest program in the entire State of Alaska, comprised of about 130 health aides and 12 administrative/supervisory employees, serving the primary health care needs of around 13,000 inhabitants in 48 villages in the Yukon-Kuskokwim Delta, excluding Bethel;

WHEREAS, for the past fifteen years of its formal existence, the Community Health Aide Program in the Yukon-Kuskokwim Delta had distinguished itself in accomplishing the original goals and objectives aside from its being constantly aware of its original mandate and mission;

WHEREAS, the individual health aide in each Yukon-Kuskokwim village had contributed immensely and is committed to the delivery of quality primary health care to each and every villager now and in the future;

WHEREAS, the winds of change that affect us all place increasing demands on the entire health system including the Community Health Aide Program which makes it necessary to provide more stability in the administration and supervision of health aides and more training to our health aides in order to meet newer and more sophisticated demands from, wants and needs of the villagers;

WHEREAS, to accomplish the above, there is a crying need for all types of support from all of us living here in the Yukon-Kuskokwim Delta and from other sectors outside of the Delta;

WHEREAS, moral and human services support for each individual health aide are essential and are within the capabilities of each one of us:

WHEREAS, it is well documented that our health aides in the Yukon-Kuskokwim Delta are the <u>lowest</u> paid health care providers

COMMUNITY HEALTH AIDE PROGRAM (CHAP)

RESOLUTION # 83-10-04

in the entire State of Alaska and the lowest paid health aides among the 12 native health corporation Community Health Aide Programs;

WHEREAS, The Regional Health Directors of the 12 native health corporations are in the process of developing a bill through the State legislature to address these inequities in the Community Health Aide salary structures and the Community Health Aide Training needs on a Statewide basis;

NOW THEREFORE BE IT RESOLVED that AVCP fully support the intent, the thrust and the content of the above-named legislative proposal;

AND BE IT FURTHER RESOLVED that AVCP fully support and encourages any and all individual and/or collective efforts to provide needed human services, moral, financial and other forms of support for our health aides which would surely redound to the benefit of each and every inhabitant in the Yukon-Kuskokwim Delta Region.

Passed and approved this 14 day of October, 1983

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

COMMITTEE SUBSTITUTE FOR HOUSE BILL No. 548 (HESS)

For "An act relating to State assistance for community health aide programs; and providing for an effective date."

This bill provides for expansion of financial assistance to non-profit health organizations for training and supervision of community health aides (CHA) or equivalently trained individuals. Funding will be provided through a two phased formula that allocates: 1) a $30,000 base for each regional corporation serving more than 4,000 square miles, plus $8,000 for each primary CHA or similar individual who averages at least 20 hours of service a week; 2) for local corporations providing services to less than 4,000 square miles, funding provided through this formula would be limited to $8,000 per CHA or similar individual.

BACKGROUND

Community Health Aide

Community health aides provide primary health care to approximately 37,000 to 40,000 people in bush communities. A CHA is a community based medical paraprofessional who provides limited diagnostic and treatment services through standing orders or in radio/telephone consultation with IHS or health corporation physicians. Health care training of a CHA is based on a standarized curriculum consisting of three basic sessions that are oriented towards utilizing the Guidelines for Primary Health Care In Rural Alaska, adopted by Alaska Area Native Health Service. Qualifications for being a primary CHA require completion of first session with certification depending upon completion of all three sessions. In addition to the requirements for basic sessions, a CHA must complete a preceptorship with a supervising physician at a medical centers and attend continuing education session that range from 1-2 days, to 1-2 weeks once a year. In addition, CHA's have periodic contact with supervisor/ instructors (S/I) employed by the corporations. The S/I are generally mid-level practitioners or registered nurses, who conduct site visits 1-3 times a year for continuing education, skills evaluation and administration. In addition, the state public health nurses provide education and support during their itinerant visits.

The number of CHAs per village varies with population size ranging from a half-time equivalent to a maximum of two. In addition to the primary community health aides, alternates are also assigned to provide relief support and coverage during absence of the primaries. Training for alternate aides varies widely with the minimum standards that range from emergency trauma technician skills to completion of the first basic session.

Historically the CHA program has been sponsored and funded by the Federal Indian Health Service (IHS). This program was formulated in 1967 although the concept and practices have a longer history. Until recent years financial support for this program rested solely with the Federal Government which contracted with regional or local corporations. Starting in FY 82, selected health corporations received designated state grants through direct legislative appropriation for

This trend has continued through the current fiscal year budget approaching $1,100.0 being allocated towards support of programs in the areas of the Bristol Bay Health Corporation, Yukon-Kuskokwim Health Corporation, Norton Sound Health Corporation, Maniilaq Association and Tanana Chiefs Conference. The FY 85 Governor's Budget maintains these services and expands assistance for training and supervision programs into the areas of Aleutian Pribilof Island Association and Southeast Regional Health Corporation. The need for State support of the CHA programs has been recognized as a means of addressing problems associated with provision of health care in rural communities. While the Federal budget supports a basic level of service there are insufficient funds to meet the demands for adequate field supervision by supervisor/instructors, training of the aides in all three basic three sessions, and salary support for alternates. In addition to an insufficient Federal budgetary base, State involvement is also based upon the issues of responsibility for rural health services. While CHAs are theoretically responsible for provision of care to IHS beneficiaries, by virtue of being the only community based primary medical provider, aides care for non-beneficiaries also.

Similarly Trained Individuals

This bill (Sec. 18.28.010 (b)) provides for support of individuals with training similar to that of a CHA as defined by the Department of Health and Social Services. It should be noted that a crucial aspect of the CHA program is its interaction with the Indian Health Services (IHS) which assures medical supervision, patient referral and quality control that are necessary elements of health care. A functional definition of a similar program must incorporate a supervisory and referral system. Duplication of the IHS system is not feasible in terms of cost and legal constraints for all parties involved. The only program that is conceptually comparable is a pilot project currently being developed by the Southeast Alaska Regional Health Corporation under a grant from this Department. While this project is not a replication of CHA services it does offer a degree of similarity in that it is a means of providing limited primary care in isolated rural communities.

RECOMMENDATIONS

Given that a similar training program and the necessary infracture do not exist, the Department anticipates to define "similar" in terms of the Health Observer Project currently being piloted by the Southeast Alaska Regional Health Corporation. Grants provided through this bill would be directed to Regional Emergency Medical Services Council or Regional Health Corporations and not directly with the individual communities. This would be necessary in order to assure cost effective utilization of the funds through economy of scale and assure continuity of service.

POSITION PAPER/Department of Health & Social Services

POSITION

The Department of Health and Social Services recognizes the value of community health aide and similar programs in providing primary medical care in rural communities and strongly supports the enhancement of supervision and training as provided by this bill.

Fiscal Analysis
CSHB 548 (HESS)

"Assistance for community health aide program."

State assistance for provision of CSHB 548 (HESS) would require a total appropriation in FY 85 of $2,280.0. This calculation is based upon the following consideration.

(1) $30.0 to used for expenses of conducting a community health aide program x 12 Regional Health Corps.		360.0
(2) $ 8.0 per each primary community health aide x 230		1,840.0
(3) $80.0 Health Observer Program for 10 communities		80.0
	TOTAL	$2,280.0

The additional General Funds required to meet the obligations as proposed in CSHB 548 (HESS) in FY 85 would be $1,148.0. This projected expenditures is based upon the off set from the FY 85 Governor's budget for this program. This funding FY 85 request is as follows:

Department of Health and Social Services

Health grants BRU. Community Health Grants:	$551.4
State Health Services BRU. Public Health Administration:	263.0
	$814.4
Maniilaq BRU. Health Services	$170.0

University of Alaska

Community Colleges Kuskokwim Community College	$ 147.6
Total FY 85 Governor's Budget	$1,132.0
Total HB 548 Required	$2,280.0
<Governor's Requested>	<1,132.0>
	1,148.0

FY 86 thru FY 89 budget estimates include the Governor's FY 84 off-set, incorporates a 5% annual inflationary adjustment and an incremental growth for the Health Observer Program from $80.0 in FY 85, to $168.0 in FY 86 and $264.0 in FY 87. The proposed budget for the Health Observer Program is based upon the assumption that:

(a) approximately 30 communities would qualify for this program; and,

(b) due to the pilot nature of this project, a maximum of 10 communities would be served during FY 85 assuming demonstrated feasibility an additional 10 would be incorporated in FY 86 and with maximum community involvement not occurring until FY 87.

portunities for Indians, and state asserted no specific, legitimate regulatory interest to justify the imposition of its gross receipts tax. Ramah Navajo School Bd., Inc. v. Bureau of Revenue of New Mexico, N.M.1982, 102 S.Ct. 3394.

2. Duty of Secretary

Failure of Secretary of Interior, through Bureau of Indian Affairs subordinates, to recognize and give serious consideration in written decisions rejecting plaintiffs' lease bids on six Indian reservation grazing units to stated economic interest of Indian landowners who recommended that plaintiffs be granted lease continuances for one year to give plaintiffs time to comply with brucellosis retesting program constituted serious breach of Secretary's fiduciary duties to Indian tribes and their members and violated Congressional policy of Indian self-determination. Coomes v. Adkinson, D.C.S.D.1976, 414 F.Supp. 975.

§ 450a. Congressional declaration of policy

(a) The Congress hereby recognizes the obligation of the United States to respond to the strong expression of the Indian people for self-determination by assuring maximum Indian participation in the direction of educational as well as other Federal services to Indian communities so as to render such services more responsive to the needs and desires of those communities.

(b) The Congress declares its commitment to the maintenance of the Federal Government's unique and continuing relationship with and responsibility to the Indian people through the establishment of a meaningful Indian self-determination policy which will permit an orderly transition from Federal domination of programs for and services to Indians to effective and meaningful participation by the Indian people in the planning, conduct, and administration of those programs and services.

(c) The Congress declares that a major national goal of the United States is to provide the quantity and quality of educational services and opportunities which will permit Indian children to compete and excel in the life areas of their choice, and to achieve the measure of self-determination essential to their social and economic well-being.

Legislative History. For legislative history and purpose of Pub.L. 93-638, see 1974 U.S. Code Cong. and Adm.News, p. 7775.

§ 450b. Definitions

For the purposes of this Act, the term—

(a) "Indian" means a person who is a member of an Indian tribe;

(b) "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act [43 U.S.C.A. § 1601 et seq.] which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians;

(c) "Tribal organization" means the recognized governing body of any Indian tribe; any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities: *Provided*, That in any case where a contract is let or grant made to an organization to perform services benefitting more than one Indian tribe, the approval of each such Indian tribe shall be a prerequisite to the letting or making of such contract or grant;

(d) "Secretary", unless otherwise designated, means the Secretary of the Interior;

(f) [1] "State education agency" means the State board of education or other agency or officer primarily responsible for supervision by the State of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(Pub.L. 93-638, § 4, Jan. 4, 1975, 88 Stat. 2204.)

[1] So in original. Section was enacted without a par. (e).

SUBJECT: Community Health Aide Programs (HB 548)

TO: The House HESS Committee

FROM: Tamara Brandt Cook
Deputy Director
Division of Legal Services

Here is the sectional analysis that you requested for HB 548.

Section 1 adds a new chapter to the statutes creating a program of state assistance for community health aide programs.

Sec. 18.28.010 A qualified health corporation may receive a grant each fiscal year of $30,000 plus $8,000 for each primary community health aide works a minimum number of hours each week. The grant is to be used for training of community health aides, supervision of community health aides, and salaries for alternate community health aides.

Sec. 18.28.020 To qualify for a grant a health corporation must be engaged in conducting a community health aide program, provide services of community health aides on a nondiscriminatory basis, apply for the grant, and supply information requested by the Department of Health and Social Services.

Sec. 18.28.030 A community health aide grant account is established in the Department of Health and Social Services. Money to carry out the program of state assistance appropriated to the account shall be distributed as grants by the department. Each fiscal year the department shall determine the amount of money needed to fund all grants for the next year and shall request an appropriation of that amount from the legislature.

Sec. 18.28.040 The department is authorized to adopt regulations to carry out the program of state assistance for community health aides.

Sec. 18.28.050 Definitions of department, health corporation, and primary health aide are provided. Under this bill only the Native regional health corporations qualify for grants.

Section 2 The Act takes effect at the beginning of the next fiscal year.

SUBJECT: Community health aides
(CSHB 548 (HESS))

TO: Representative Mae Tischer
Chairman, House HESS Committee

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

You have asked whether the state could be held liable as a result of use made of money obtained from the state as a community health aide grant. Although the state has generally relinquished sovereign immunity for tortious acts under AS 09.50.250, a clearly expressed intention to retain immunity for the state in a particular situation is controlling over AS 09.50.250. CSHB 548 (HESS) contains in section 18.28.040 a provision precluding the state from liability for any injury resulting from use of money awarded as a community health aide grant. In view of that section, the state is protected from liability.

You have also asked whether the CSHB 548 (HESS) poses any discrimination problems. The bill provides for state assistance to certain health organizations to be used in community health aide programs. Sec. 18.28.020(2) requires that a health organization provide the services of community health aides on a nondiscriminatory basis for the benefit of the public if it is to qualify for a grant of state money. There is no question of state money being used to benefit one group of people to the exclusion of others. Any health organization with a qualifying program can receive a grant under AS 18.28.010(b). Only regional health organizations qualify for a grant under AS 18.28.010(a), and it is my understanding that only regional Native health corporations actually qualify for grants under that provision now. However, if a non-Native regional health organization were ever established, it too could qualify for a grant under this section. The only requirement imposed for receipt of

the grant, other than the general qualification for all recipients contained in section 18.28.020, is that the regional health organization be a nonprofit corporation that provides health services in a rural area of at least 4,000 square miles. The bill does not appear to discriminate in any way under either the state or federal constitutions.

POSITION PAPER/Department of Health & Social Service

POSITION PAPER

HOUSE BILL No. 548

For an act "An act relating to State assistance for community health aide programs; and providing for an effective date."

This bill provides for expansion of financial assistance to the regional health corporations for community health aide (CHA) programs by subsidizing supervision and training and alternate community health aide salaries. Funding will be provided to the health corporations through a formula that allocates $30.0 base for each corporation and $8.0 for each primary community health aide who averages at least 20 hours of services a week.

BACKGROUND

Community health aides provide primary health care to approximately 37,000 to 40,000 people in bush communities. A CHA is a community based medical paraprofessional who provides limited diagnostic and treatment services under standing orders or in radio/telephone consultation with IHS or health corporation physicians. Health care training of a CHA is based on a standarized curriculum consisting of a ten week core course taught in three sessions, a preceptorship and on-the-job skills acquisition. Training is based on the Guidelines for Primary Health Care In Rural Alaska, adopted by the Alaska Area Native Health Service. An individual may begin to function as a primary CHA before completion of the entire training program, but certification is not awarded until all training requirements are met. Most corporations attempt to provide at least one continuing education or refresher course each year. CHAs have periodic contact with supervisor/instructors (S/I) employed by the corporations. The S/Is are generally mid-level practitioners or registered nurses who attempt to visit each CHA 1-3 times a year for continuing education, skills evaluation and administration. In addition, the state public health nurses provide educational and program support during their itinerant visits.

The number of CHAs per village varies with population size ranging from a half-time equivalent to a maximum of two. In addition to the primary community health aides, CHA alternates are also assigned to provide relief support and coverage during absence of the primaries. Training for alternate aides varies widely with minimum standards that range from emergency trauma technician skills to completion of the first basic session.

Historically the CHA program has been sponsored and funded by the Federal Indian Health Service (IHS). This program was formulated in 1967 although concept and practices have a longer history. Until recent years financial support for this program rested solely with the Federal Government through contracts with the regional health corporations. Starting in FY 82, selected health corporations received designated State grants through direct legislative appropriation for support of community health aide supervision and training.

This trend has continued through the current fiscal year with approximately $1,100.0 being allocated towards support of programs sponsored by the Bristol Bay Health Corporation, Yukon-Kuskokwim Health Corporation, Norton Sound Health Health Corporation, Maniilaq Association and the Tanana Chiefs Conference. The FY 85 Governor's Budget request maintains these grants and provides for expansion of training and supervision programs for organizations such as the Aleutian Pribilof Island Association and Southeast Regional Health Corporation.

The need for State support of the CHA programs has been recognized as a means of addressing problems associated with provision of health care in rural communities. While the Federal budget supports a basic level of service, there are insufficient funds to meet the demands for adequate field supervision by supervisor/instructors, training of the aides to the certification level, and salary support for alternates. State assistance to the CHA program is also based upon the fact that Federal appropriations for the program are intended to provide health care only for the Native population while, in fact, CHAs, by virtue of being the only health care providers in many bush communities, must provide primary care services to the entire population, both Native and non-Native.

RECOMMENDATIONS

While State support of this program will greatly enhance opportunities for CHAs to complete the entire training program, obtain closer supervision and increase stability through salaries for the alternates, there are several inherent problems with increasing State involvement. With the probability of increasing federal funding constraints, there is potential that as the State increases its involvement, IHS will correspondingly decrease its financial commitment for this program. In addition, there is potential for legal and ethical state responsibility for medical malpractice liability of the community health aides and alternates. Currently medical malpractice is covered through the Federal Tort Claims Act for IHS beneficiaries. The issue of liability for non-beneficiaries within the Federal structure and legal consequences of the State paying for salaries has yet to be resolved. At this time, the Department of Health and Social Services recommends the State continue its role in supervision and training, but refrain from direct involvement in salaries by deleting in Sec. 18.28.010 (a)(2) (c). It is also recommended that formula funding in (a) (1) be modified from $8.0 per primary health aide to $6.0 per aide to reflect only the costs of training and supervision.

POSITION

The Department of Health and Social Services recognizes the value of community health aide program in providing primary medical care in bush communities and supports the enhancement of supervision and training. It is in the best interest of the State that the image and status of CHAs be enhanced, but the department strongly recommends direct involvement in salaries not be pursued until the State obtains further experience with this program and the malpractice issues are clarified.

SUMMARY

OTHER AGENCIES AFFECTED BY BILL	CONSTITUENT GROUP(S) AFFECTED BY BILL
University of Alaska Alaska Area Native Health Assoc.	Regional Health Corporations (12)
ORGANIZATIONAL SUPPORT FOR BILL	**ORGANIZATIONAL OPPOSITION TO BILL**
Regional Health Corporations (12) Alaska Native Health Board	

FISCAL IMPACT: ☐ NONE ☒ FISCAL NOTE ATTACHED

BACKGROUND/LEGISLATIVE INTENT

Community Health Aides (CHA) provide primary health care to approximately 37,000 to 40,000 people in bush communities. Historically the program has been sponsored by the Federal Indian Health Service with the State gradually becoming involved in selected geographic areas. HB 548 expands the State participation in training, supervision and salary support to all 12 of the Regional Health Corporations on a formula basis.

ANALYSIS OF BILL/PROGRAM EFFECTS

The bill as proposed would increase State funding of the CHA program from the FY 85 Governor's budget of $1,132.0 to $2,176.0. The provision of the bill expands state participation beyond training and supervision into salary support for community health aide alternates. These individuals provide back-up to the primary CHAs and are often inadequately trained. While the Department recognizes the need for expanded training and supervision, there are questions concerning legal liability for malpractice. In light of this consideration, the Department recommends amending the bill to limit support for training and supervision.

AMENDMENT(S) PROPOSED

Deletion of Sec. 18.28.010 and (2) (a) "salaries for alternate community health aides; and aides."

Modification of Sec. 18.28.010 (2) from "$8,000 for each ... for" to "$6,000 for each primary community health aide." This is intended to leave funds for training only and to keep State out of salary issue.

PLEASE ATTACH A SEPARATE SHEET FOR ADDITIONAL COMMENTS OR ANALYSIS.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

Fiscal Analysis
HB 548

"Assistance for community health aide program."

State assistance for community health aide as proposed in Sec. 18.28.010 (a) would require a total appropriation in FY 85 of $2,176.0. This calculation is based upon the following consideration.

(1) $30.0 to used for expenses of conducting a community health aide program x 12 Regional Health Corps.		360.0
(2) $ 8.0 per each primary community health aide x 227		1,816.0
	TOTAL	$2,176.0

The additional General Funds required to meet the obligations as proposed in HB 548 in FY 85 would be $1,044.0. This projected expenditures is based upon the off set from the FY 85 Governor's budget for this program. This funding request is as follows:

Department of Health and Social Services	
Health grants BRU. Community Health Grants:	$551.4
State Health Services BRU. Public Health Administration:	263.0
	$814.4
Maniilaq BRU. Health Services	$170.0
University of Alaska	
Community Colleges Kuskokwim Community College	$ 147.6
Total FY 85 Governor's Budget	$1,132.0
Total HB 548 Required	$2,176.0
<Governor's Requested>	<1,132.0>
	1,044.0

Estimate expenditure increase FY 86 thru FY 89 is based upon an 5% annual inflation adjustment.

If the Department recommendations concerning elimination of salary supports are adopted, the total program cost in FY 85 would be $1,722.0 Additional general fund allocations necessary in FY 85 would be $590.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 550

"An Act relating to premarital blood tests; and providing for an effective date."

This Bill amends AS 25.05.101 by adding a new subsection stating that a blood test for syphilis is not required for the issuance of a premarital certificate.

In calendar year 1983, a total of 51 cases of syphilis in all stages was reported. Of these 32 were in the infectious stage. The rate for all cases of syphilis for 1982 was about 12.2 and 10.4 for 1983. Since 1973, Alaska's syphilis rate has been consistently lower than the rate for the U.S. as a whole. The 1980 U.S. rate was 30.38.

Premarital testing is no longer an effective case finding tool. Between 1975 and 1980, a total of about 60,000 premarital specimens were tested with a yield of only two cases of previously unknown infectious syphilis. In 1982, one case was found in a total of about 12,000 premarital tests. In recent years, about 65% of new cases of syphilis in Alaska have occurred in the homosexual population, a group not ordinarily reached through a premarital testing program. Most cases are detected through self-referral of symptomatic persons or through epidemiologic investigation of sexual contacts of detected cases.

Historically, the major puprose of premarital testing was the prevention of congenital syphilis. The existing Alaska statute became effective in 1949 when syphilis was much more common with over 100 cases per year.

Passage of this Bill would have no effect on VD control efforts in the State. Prenatal testing will continue as a preventive measure for congenital syphilis. Syphilis testing will still be available to private health care providers and to the sexually transmitted disease clinics. Efforts will continue to be directed at high risk groups and known associates and contacts of person with the disease in an infectious stage.

Passage of this legislation is supported by the Alaska Public Health Association, the Alaska State Medical Association, the Alaska State Hospital Association and the Alaska Native Board of Health. Opposition has been voiced by the Faith Hospital in Glenallen.

The intent of this Bill is similar to that of SB 343. The Department of Health and Social Services prefers SB 343 because it deletes all references to the need for premarital health certificates as a condition for

POSITION PAPER/Department of Health & Social Services

the issuance of a marriage license while HB 550 leaves intact such references in AS 25. 05.091, AS 25.05.101, AS 25.05.105, AS 25.05.131, AS 25.05.141, AS 25.05. 151, AS 25.05.181, AS 25.05.201, AS 25.05.221 and AS 25.05.341.

Subj: Making vital statistics available to municipal health officers

Dear Representative Fritz:

Vital statistics are the basis for intelligent public health activity, yet municipal health officers are not clearly entitled to vital statistics records under AS 18.50.310.

Under the Anchorage Municipal Code (AMC 3.20.085, 15.05.020, etc.) I am responsible for the health and well being of the residents in Anchorage. It makes sense, therefore, for me to have ready access to birth certificates, death certificates, and the like. I have been unable to get copies of certificates of death and certificates of birth in Anchorage from the State.

Vital statistics collection and collation is minimal in Alaska. DHSS does produce an annual report of vital statistics, but it comes out about 2 years after the year studied. It is therefore more of historical interest than current utility. I understand that funds for this function have recently been reduced even further.

Attached is suggested language amending the statute to make it perfectly clear that a municipal health officer may have January 5, 1984 access to vital statistics documents.

Sincerely,

Rodman Wilson

Rodman Wilson, M.D.

Attachment

House Bill No. 549

"An Act relating to vital statistics records"

Under the Vital Statistics Act inspection of records is limited to agents of the state or federal government, acting in the performance of official duties. Amending AS 18.50.310 by adding a new section (f) would permit inspection of the records of human vital events of a particular municipality by the principal health officer or a designee.

An agreement would be required from each health officer that the information from any vital record will be used only for research and health planning, that the records remain confidential and that after use, the information is destroyed.

The Department of Health and Social Services Supports passage of HB 549.

HB

565

INTENT OF LEGISLATION

HB 565 - "An Act relating to hearsay evidence in prosecutions for sexual abuse of a minor; and amending Rules 803 and 804, Alaska Rules of Evidence."

This legislation will allow hearsay evidence of statements made by children under the age of 10 relating to sexual abuse of that child if:

1) The court determines that the circumstances indicate the statement would be reliable, and

2) The child either testifies in person or, if the child is unavailable as a witness, there is additional evidence to corroborate the statement.

We have been advised by troopers that they have videotapes of children 2½ or 3 years old where the sexual abuse is articulated clearly. However, they are unable to proceed with the grand jury indictment because these very young children often block out the experience before they are questioned in court. The sworn statement of the professional who interviewed the child, along with the videotapes, would be admissable under this act.

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER

HB 565

"An Act relating to hearsay evidence in prosecutions for sexual abuse of a minor and amending Rules 803 and 804, Alaska Rules of Evidence."

The Council on Domestic Violence and Sexual Assault supports the admission of hearsay evidence in child sexual assault trials. Many victims of child sexual assault are too young to withstand the rigors of a trial or to be effective witnesses. Yet their disclosure of sexual assault to police officers and other professionals in less threatening circumstances should be available to juries for consideration.

Children often block out their very negative experiences and cannot remember specifics of the experience, particularly under the pressures of a trial. These children deserve the protection of the criminal justice system as much as older, more articulate individuals.

Although the admittance of hearsay evidence is not traditional in court, there are many exceptions to the rule. This circumstance, child sexual assault, warrants another exception.

Robert Q. Sundberg
Commissioner

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 565

ALASKA NETWORK ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

110 SEWARD #13 JUNEAU ALASKA 99801

(907)586-3650

POSITION PAPER

HB 565: An Act relating to hearsay evidence in prosecutions for sexual abuse of a minor; and amending Rules 803 and 804, Alaska Rules of Evidence

The Alaska Network on Domestic Violence and Sexual Assault, a non-profit corporation representing 20 programs statewide that provide services to victims of domestic violence and sexual assault, supports HB565, which would facilitate the prosecution of cases of child sexual assault.

As you may be aware, the Network several years ago supported legislation that permitted the videotaping of testimony of young victims (aged 10 and under) of sexual assault in order to spare them the added trauma of testifying in open court. Since its passage, that legislation has worked successfully in cases of sexual assault involving children ages 5 and over, but has had little impact on the successful prosecution of sexual assault involving very young children.

Because there has been a dramatic increase in the number of cases of child sexual assault reported to the Division of Family and Youth Services, there is a real need to address the issue of prosecution of these crimes.

A very young victim of sexual assault will often tell the non-offending parent or day care worker about the assault, but they most often will not repeatedly relate the details of the incident. Consequently, it is the parent or day care worker who reports the crime to the Division of Family and Youth Services, a sexual assault program, or a law enforcement agency.

However, because prosecutors generally do not feel that a very young child is a reliable witness and because there is rarely a witness to the crime, the testimony of the adult person to whom the child disclosed the incident is the most reliable testimony available. Since that testimony is considered hearsay evidence and is not admissable in court, these cases are not being prosecuted but are, in fact, being dropped.

Washington State has enacted legislation similar to the bill that has been introduced. It is the Network's position that an exception to the hearsay rule is more than justified in order to facilitate prosecution of these cases.

In order to protect child victims from further harm, the Network urges your support for and passage of this bill.

IS THE CHILD VICTIM OF SEXUAL ABUSE TELLING THE TRUTH?

by

Kathleen Coulborn Faller, M.S.W.
Lecturer in Social Work, Co-Director
Interdisciplinary Project on Child Abuse and Neglect,
University of Michigan
Ann Arbor, Michigan

I. INTRODUCTION

A question asked of child welfare workers and mental health experts in cases of child sexual abuse is whether or not a child's statement that he/she has been sexually mistreated can be taken at face value or believed. The implications for action if the child's story is trusted are far reaching for both the child and the family. Likewise, if professionals decide not to believe the child (and the allegation is true) the effect on the child will almost surely be devastating. Because of these implications, mental health professionals need guidance in assessing allegations of sexual mistreatment. For the most part, this article will focus on sexual abuse with female victims and male perpetrators and will pay special attention to the problem of substantiating allegations by young children.

II. THE PROFESSIONAL'S PROPENSITY TO DISBELIEVE

When a child reports he/she has been physically abused or neglected by a parent, (or by someone else), professionals spend little time querying whether the child is telling the truth. Not so in a case of sexual abuse. With sexual abuse reports, professionals may agonize for a very long time over whether the allegation is true or not. While the lack of physical evidence may contribute to this caution, the major obstacle for professionals and lay people alike is difficulty in coping with the fact that some adults have sexual involvement with children. For many people human sexuality in general, is an anxiety producing topic, and sexual encounters with children invoke even more psychological stress.

However, it is not sufficient for professionals who work with sexual abuse to understand these dynamics and take them into account in evaluating their own responses to a case. They still must persuade others, be they lawyers, police, judges, or treatment personnel of the veracity of the child's story.

III. WHO HAS THE MOST TO LOSE?

It is useful to frame an understanding of an allegation of sexual abuse in terms of various parties vested interest in the story being true or not true.

For the victim, she (and most reported cases are of female victims) may suffer significant losses as a result of telling. She may be rejected and ostracized by the perpetrator and also by her family. She may be "punished" by placement in foster care or an institution. The family may be torn apart and the victim may see herself as responsible for its demise. She will have to tell the intimate details of her story to many people. She frequently must tell it in the court room, to strangers and with the perpetrator facing her, and she may be subjected to harsh crossexamination by the perpetrator's attorney. Often the perpetrator will warn the victim of these consequences and tell her not to to tell. In such a situation the child feels helpless in the face of a powerful adult. Because of the anticipated consequences, victims may keep the secret for months and sometimes years.

Therefore a delay in the report of sexual abuse, particularly when there is a close personal relationship between the victim and the perpetrator, is to be expected rather than seen as a reason to question the veracity of the allegation. Similarly, it is quite common for a child to reveal that she was molested and later retract her story as she experiences the negative effects on herself and her family of telling.

In contrast, the perpetrator has everything to lose if the child's story is believed and thus in most cases will deny the allegations. The perpetrator may be rejected and extruded from the family because of the abuse. In father-daughter incest cases, divorce may ensue. The extended family may ostracize him. In some cases, his employment may be in jeopardy. He has reason to fear the Juvenile Court who may deprive him of his child, impose treatment, and intrude in other ways into the family. He has even more cause to fear the Criminal Court where he may be tried for Criminal Sexual Conduct, sent to prison, or at least placed on probation.

Because a substantial percentage of sexual abusers are to some extent character disordered, they may lie and lie convincingly, and they may lie persistently over a period of months and even years. It is not uncommon for them to continually call the caseworker insisting upon their innocence and to enlist the help of others, family and friends, in this endeavor.

Mothers, in father-daughter incest cases as well as in other types of in-household sexual abuse, may also have a lot to lose if the child's allegation is believed. Incest often develops when the sexual relationship between the perpetrator and spouse is not good, and this may happen because the mother does not wish a sexual relationship with the perpetrator. The child victim relieves the mother of that sexual responsibility, and therefore there may be costs for the mother if the incest relationship ends.

More concrete and practical problems may arise for the mother. She may be financially dependent upon the perpetrator. Therefore, if she has to expell him or he goes to prison, she must seek other means of support. This may mean going on ADC or seeking employment when she has never worked or has not worked for years.

Finally she loses the emotional support of her spouse when he leaves or is incarcerated. While he may not seem to the outsider as very supportive, frequently he is all the mother has, and she cannot imagine life without him. Often mothers of incest victims are very dependent upon their spouses, suffer from low self-esteem, and may choose their spouses over their children when they must take one side or the other.

Therefore, it is not uncommon for mothers to disbelieve their daughters allegations, to ignore them when they are made, or to try to deal with the problem without bringing in outside help. Alternatively, mothers may initially side with the child, but as they experience the practical consequences of the spouse's anger and/or loss of the spouse, may switch their loyalties and side with the perpetrator.

IV. EXAMINING THE CHILD'S STORY

We know for the reasons stated already that children do not make up stories asserting they have been sexually molested. It is not in their interests to do so. The only cases where that possibility should be considered is where an adolescent who is making an allegation appears character disordered. An angry acting-out adolescent who does not invest in people might possibly make up such a story in order to gain some immediate goal (getting back at the perpetrator, getting out of the house). However, even such cases as these reports should be taken very seriously because difficult adolescence is the frequent outcome of an experience of sexual abuse. Thus the victim in adolescence may be belligerent and aggressive, may truant from school and violate curfew, and may be sexually provocative and promiscuous.

For a long time some mental health professionals attributed children's allegations of sexual molestation to oedipal fantasies. It is easier to believe that these assertions are fantasies rather that the truth. If the report is to fit the oedipal fantasy conceptualization, it should be placed in time when the child would be four or five, and we expect the memory to be shadowy or repressed. However, today many professionals question whether there is such a phenomenon as an oedipal fantasy, and query whether we are not dealing with instances of molestation even in cases which fit the description above.

Reports of sexual abuse can usually be differentiated from fantasy by the victim's ability to report specific details (if they are willing to discuss the incident(s)). The best way to get information in cases where the child is verbal is to ask about the last time it happened. Usually considerable detail can be elicited about surrounding events so that the idiosyncratic nature of the incident is quite clear. (E.G., "It was raining and I thought my daddy was asleep so I was playing in my brother's room where I'm not supposed to play. My dad came in and I thought he would be mad at me, but he said he wouldn't be mad if I laid on the bed with him".) The child may be much more reticent about giving the detail of the sexual abuse, and may get embarrassed or agitated in answering questions about the abuse, than in giving specific events surrounding the incident.

It is important to get this specific detail if possible. Sometimes this can be effected by asking question "did he do this", "did he do that", or by relating what you think happened and asking the child to respond "yes" or "no" to each statement.* It is preferable however, to get a spontaneous statement if this is possible.

A young child may become somewhat confused about the exact sequence of events, or may forget certain parts of the story at certain times, but this should not call into question the veracity of the story. Further, children, depending upon their age, may not be able to afix dates or exact times but will be able to locate incidents of molestation in relation to significant events (E.G., birthday, the day it rained, about supper time).

Another important finding may be that he child has knowledge about sexual matters which go well beyond what can be expected of the child's age or indicates sexual information for which the family cannot explain the source (E.G., a child of four may know a penis gets big and white juice comes out of it). While it is possible that the child gained this knowledge from observation of sexual acts, it is not likely. If the observation is the source of the victim's information, there is cause to be concerned about children being exposed to sexual activity.

It is important to go beyond eliciting information about the most recent incident of sexual abuse and query whether it happened before and how often. Does the victim know whether the perpetrator ever did this kind of thing with anyone else? Thus the goal of the interview is to elicit specific detail but also to get a broader picture of the perpetrator's sexual activity.

* Note: The suggestion of the author to ask the child whether certain things have happened is <u>not</u> endorsed. There are many problems with this technique of gathering information. Generally, specific, narrow questions tend to mislead the respondent into believing you only want to hear about the things you ask about, so the respondent will not add other information. More specific to sexual abuse of young children, there are two risks. First, one important way of establishing the likelihood that abuse occurred is by showing that the child described sexual events that childrens of his or her age seldom know about unless they have been victimized. If you describe the event, the child's credibility may later be attacked by someone alleging that you planted the idea. Secondly, if the child has not experienced the activity you describe, you are further adding to whatever experiences he or she has had. This information can be very frightening to the child, even when dealt with matter-of-factly.

V. STRATEGIES FOR CORROBORATING DIRECT STATEMENTS BY THE CHILD TO THE INTERVIEWER

A. The Child's Statement to Significant Others

As a rule a case of sexual abuse comes to professional attention because the child has made a statement to someone (other than the evaluator) about the molestation. The interviewer should talk directly with those persons to get all the information they have and to assess the reliability of these reports. Often a child will be candid with a parent or relative but will be quite reticent with a professional.

Having those persons whom the child has told tape record the child's statements can be useful. If the child has not been forthcoming during the evaluation but later talks about the incidents sometimes a parent or relative can call the evaluator on the phone and get the child to make statements over the phone. Therefore at the end of the interview, the professional should tell the caretaker to call if the child says or does anything related to the abuse after the interview.

B. Indirect Methods of Assessment

There are certain child behaviors indicative of molestation which can be used to substantiate a report of sexual abuse. One type are indirect indicators which can be elicited in doll play, drawing, story telling, and other projective techniques. Such indirect methods are much less threatening to the child, and with children who are reticent, may be the only data which can be elicited from the child in a formal evaluation. The interviewer must be patient and willing spend a fair amount of time and sometimes several sessions gathering information.

What one looks for are sexual themes in play, pictures, or stories. The interviewer allows the child to use these media in whatever way he/she wants to for a period of time, but may later structure the interaction so it focuses on the context in which the interviewer thinks the molestation took place.

For example, if a doll house and doll play are used, the interviewer will begin by allowing the child to play with the dolls in the doll house. Sometimes sexual concerns may immediately emerge. For instance, the child undresses all the dolls and looks between their legs. The worker may nevertheless want the structure the situation by focussing on the daddy doll and the little girl doll and asking "what do daddies and little girls do together?" or "what does the daddy doll do with the little girl doll?" If sexual content is elicited, for example the child puts the two dolls in the bed with the daddy doll on top of the little girl doll, it is important to then ask what the child does with her own daddy. A potential disadvantage of indirect methods of

assessment is that the evaluator may get sexual themes in play but may not be able to tie what occurs in play to the allegations. By moving gradually in play closer to the actual allegation, it is possible to make the link between the general sexual content and the reported sexual abuse. Similar strategies can be employed with picture drawing, and story telling.

We must also understand why certain children are not forthcoming about the molestation. First, most interviewers are relatively unknown to the child and usually less wellknown than the perpetrator. The child may admit the abuse to someone he/she trusts, the mother, an aunt, or friend of the family, but be much less willing to make the revelation to a stranger. A related point is that in many cases even though the child has been molested by the perpetrator, the child may be attached to him and will not want to cause him trouble. Alternatively as noted earlier, the child may fear negative consequences for the family or retribution by the perpetrator if she reveals the sexual abuse.

C. Sexual Behavior

Another source of corroborative data is sexual behavior by the child. This is somewhat different from information elicited in a structured interaction with the interviewer. It is more spontaneous and may occur in the context of the interview or in other settings. These sexual behaviors will vary with the age of the child.

Excessive masturbation is one kind of behavior to look for in young children. While all children masturbate, molested children may do so to a marked degree. Thus, they may masturbate when they are upset or when they are questioned about the sexual abuse. They do so even though an adult requests they not masturbate in public or they may injure their genitals in the course of repeated masturbation.

Young children who have been sexually molested may also initiate sexual encounters with others. In a day care or hospital setting, they may sexually accost other children. In such a context, they may take on the role of the aggressor and victimize other children, or they may persist in their victim role. They may also attempt to elicit sexual responses from adults for whom they have some affection, assuming that is the way adults and children who like one another interact. Thus, a little girl may rub a male worker's penis or wriggle her bottom on his lap. A boy who has been a victim of a female perpetrator may attempt to squeeze a nurse's breast.

Latency aged victims are often described as seductive and extremely concerned with their physical appearance. They may appear unusually feminine and coy. As they grow older and reach early adolescence, they are likely to be sexually quite active and to be described as promiscuous. The sexual encounters may be with peers or with older men. In later years victims may develop lesbian relationships. Because their heterosexual experiences have been exploitative, they look for more nurturing relationships with other women.

D. Other Behavioral Indicators

Additional supportive evidence which can complete the picture may be behaviors which indicate the child anxiety or mental state arising from the sexual abuse.

With young children regression is frequently seen as a result of the onset of sexual abuse. A child who previously was toilet trained may begin to wet the bed or may become fearful of the dark and refuse to go to bed without a trusted adult in the room when previously bedtime was not problematic. Nightmaring and night waking may also occur.

A child's fear of the perpetrator may generalize to all men (assuming the perpetrator is a man). Sometimes this fear is more apparent with other men than with the perpetrator. Often observers note a personality change in the victim, which seems to coincide with the onset of the abuse. Alternatively the symptoms occur around the incident, then diminish, and recur when another incident occurs. Thus, one victim's mother stated her daughter used to be "a motor mouth" before the molestation began but now appears shy and worried. Children may appear depressed and become withdrawn. Victims who previously did well in school sometimes present with school problems.

Adolescents may present with acting out or self-destructive behavior. Thus, the adolescent victim may run away, be aggressive toward others, be incorrigible, hating both parents, but often mother more than father, steal and shoplift, and in general appear out of control. In general, the intensity of the adolescent victim's acting out is greater than the typical adolescent rebelliousness. Professionals often suggest institutional treatment for these victims because their deviance is so severe, (frequently without comprehending the underlying cause). Self destructive patterns found in adolescent are alcoholism, drug use and addiction, self mutilation, and attempts to suicide (or success).

CONCLUSION:

If the professional takes together a child's statements which may have been made to others but not to the professional or were made at one point and later retracted and buttresses these with other information a clear picture will evolve. Supplementary data may be sexual themes in play, in picture drawing or story telling elicited in an interview, sexual behavior by the child, or non-sexual behavioral indicators that the child is under stress. Obviously, the more information from the range of areas described the evaluator has, the more convinced the evaluator will be and the more persuasive the report will be to others. However, the only information which should not be taken by itself as a sign there has been sexual abuse is the non-sexual behavioral indicators. These indicators can also be a result of problems other than sexual ones.

Rule 803. Hearsay Exceptions — Availability of Declarant Immaterial.

The following are not excluded by the hearsay rule, even though the declarant is available as a witness:

(1) **Present Sense Impression.** A statement describing or explaining an event or condition made while the declarant was perceiving the event or condition, or immediately thereafter.

(2) **Excited Utterance.** A statement relating to a startling event or condition made while the declarant was under the stress of excitement caused by the event or condition.

(3) **Then Existing Mental, Emotional, or Physical Condition.** A statement of the declarant's then existing state of mind, emotion, sensation, or physical condition (such as intent, plan, motive, design, mental feeling, pain, and bodily health) offered to prove his present condition or future action, but not including a statement of memory or belief to prove the fact remembered or believed unless it relates to the execution, revocation, identification, or terms of declarant's will.

(4) **Statements for Purposes of Medical Diagnosis or Treatment.** Statements made for purposes of medical diagnosis or treatment and describing medical history, or past or present symptoms, pain, or sensations, or the inception or general character of the cause or external source thereof insofar as reasonably pertinent to diagnosis or treatment.

(5) **Recorded Recollection.** A memorandum or record concerning a matter about which a witness once had knowledge but now has insufficient recollection to enable him to testify fully and accurately, shown to have been made or adopted by the witness when the matter was fresh in his memory and to reflect that knowledge correctly. If admitted, the memorandum or record may be read into evidence but may not itself be received as an exhibit unless offered by an adverse party.

(6) **Business Records.** A memorandum, report, record, or data compilation, in any form, of acts, events, conditions, opinions, or diagnosis, made at or near the time by, or from

information transmitted by, a person with knowledge acquired of a regularly conducted business activity, and if it was the regular practice of that business activity to make and keep the memorandum, report, record, or data compilation, all as shown by the testimony of the custodian or other qualified witness, unless the source of information or the method or circumstances of preparation indicate lack of trustworthiness. The term "business" as used in this paragraph includes business, institution, association, profession, occupation, and calling of every kind, whether or not conducted for profit.

(7) **Absence of Record.** Evidence that a matter is not included in the memoranda, reports, records, or data compilations, in any form, kept in accordance with the provisions of subdivision (6), to prove the nonoccurrence or nonexistence of the matter, if the matter was of a kind which a memorandum, report, record, or data compilation was regularly made and preserved, unless the sources of information or other circumstances indicate lack of trustworthiness.

(8) **Public Records and Reports.** (a) To the extent not otherwise provided in (b) of this subdivision, records, reports, statements, or data compilations in any form of a public office or agency setting forth its regularly conducted and regularly recorded activities, or matters observed pursuant to duty imposed by law and as to which there was a duty to report, or factual findings resulting from an investigation made pursuant to authority granted by law.

(b) The following are not within this exception to the hearsay rule: (i) investigative reports by police and other law enforcement personnel; (ii) investigative reports prepared by or for a government, a public office or an agency when offered by it in a case in which it is a party; (iii) factual findings offered by the state in criminal cases; (iv) factual findings resulting from special investigation of a particular complaint, case, or incident; (v) any matter as to which the sources of information or other circumstances indicate lack of trustworthiness. Any writing admissible under this subdivision shall be received only if the party offering such writing has delivered a copy of it or so much thereof as may relate to the controversy, to each adverse party a reasonable time before

the trial, unless the court finds that such adverse party has not been unfairly surprised by the failure to deliver such copy.

(9) **Records of Vital Statistics.** Records or data compilations, in any form, of birth, fetal deaths, deaths, or marriages, if the report thereof was made to a public office pursuant to requirements of law.

(10) **Absence of Public Record or Entry.** To prove the absence of a record, report, statement, or data compilation, in any form, or the nonoccurrence or nonexistence of a matter of which a record, report, statement, or data compilation, in any form, was regularly made and preserved by a public office or agency, evidence in the form of a certification in accordance with Rule 902, or testimony, that diligent search failed to disclose the record, report, statement, or data compilation, or entry.

(11) **Records of Religious Organizations.** Statements of births, marriages, divorces, deaths, legitimacy, ancestry, relationship by blood or marriage, or other similar facts of personal or family history, contained in a regularly kept record of a religious organization.

(12) **Marriage, Baptismal, and Similar Certificates.** Statements of facts contained in a certificate that the maker performed a marriage or other ceremony or administered a sacrament, made by a clergyman, public official, or other person authorized by the rules or practices of a religious organization or by law to perform the act certified, and purporting to have been issued at the time of the act or within a reasonable time thereafter.

(13) **Family Records.** Statements of fact concerning personal or family history contained in family bibles, genealogies, charts, engravings on rings, inscriptions on family portraits, engravings and urns, crypts, or tombstones, or the like.

(14) **Records of Documents Affecting an Interest in Property.** The record of a document purporting to establish or affect an interest in property, as proof of the content of the original recorded document and its execution and delivery by each person by whom it purports to have been executed, if the record is a record of a public office and an applicable

statute authorizes the recording of documents of that kind in that office.

(15) **Statements in Documents Affecting an Interest in Property.** A statement contained in a document purporting to establish or affect an interest in property if the matter stated was relevant to the purpose of the document, unless dealings with the property since the document was made have been inconsistent with the truth of the statement or the purport of the document.

(16) **Statements in Ancient Documents.** Statements in a document in existence twenty years or more the authenticity of which is established.

(17) **Market Reports, Commercial Publications.** Market quotations, tabulations, lists, directories, codes, standards, or other published compilations, generally used and relied upon by the public or by persons in particular occupations.

(18) **Learned Treatises.** To the extent called to the attention of an expert witness upon cross-examination or relied upon by him in direct examination, statements contained in published treatises, periodicals, or pamphlets on a subject of history, medicine, or other science or art, established as a reliable authority by the testimony or admission of the witness or by other expert testimony or by judicial notice. If admitted, the statements may be read into evidence but may not be received as exhibits.

(19) **Reputation Concerning Personal or Family History.** Reputation among members of his family by blood, adoption, or marriage, or among his associates, or in the community, concerning a person's birth, adoption, marriage, divorce, death, legitimacy, relationship by blood, adoption, or marriage, ancestry, or other similar fact of his personal or family history.

(20) **Reputation Concerning Boundaries or General History.** Reputation in a community, arising before controversy, as to boundaries of or customs affecting lands in the community, and reputation as to events of general history important to the community or state or nation in which located.

(21) **Reputation as to Character.** Reputation of a person's character among his associates or in the community.

(22) **Judgment as to Personal, Family, or General History, or Boundaries.** A judgment as proof of a matter of personal, family or general history, or boundaries, essential to the judgment, if the same would be provable by evidence of reputation.

(23) **Other Exceptions.** A statement not specifically covered by any of the foregoing exceptions but having equivalent circumstantial guarantees of trustworthiness, if the court determines that (a) the statement is offered as evidence of a material fact; (b) the statement is more probative on the point for which it is offered than any other evidence which the proponent can procure through reasonable efforts; and (c) the general purposes of these rules and the interest of justice will best be served by admission of the statement into evidence. However, a statement may not be admitted under this exception unless the proponent of it makes known to the adverse party sufficiently in advance of the trial or hearing to provide the adverse party with a fair opportunity to prepare to meet it, his intention to offer the statement and the particulars of it, including the name and address of the declarant. (Added by Supreme Court Order 364 effective August 1, 1979)

Rule 804. Hearsay Exceptions — Declarant Unavailable.

(a) **Definition of Unavailability.** Unavailability as a witness includes situations in which the declarant

(1) is exempted by ruling of the court on the ground of privilege from testifying concerning the subject matter of his statement; or

(2) persists in refusing to testify concerning the subject matter of his statement despite an order of the court to do so; or

(3) establishes a lack of memory of the subject matter of his statement; or

(4) is unable to be present or to testify at the hearing because of death or then existing physical or mental illness or infirmity; or

(5) is absent from the hearing and the proponent of his statement has been unable to procure his attendance (or in the case of a hearsay exception under subdivision (b) (2), (3), (4), or (5), of this rule, his attendance or testimony) by reasonable means including process.

A declarant is not unavailable as a witness if his exemption, refusal, claim of lack of memory, inability, or absence is due to the procurement or wrongdoing of the proponent of his statement for the purpose of preventing the witness from attending or testifying.

(b) **Hearsay Exceptions.** The following are not excluded by the hearsay rule if the declarant is unavailable as a witness:

(1) *Former Testimony.* Testimony given as a witness at another hearing of the same or a different proceeding, or in a deposition taken in compliance with law in the course of another proceeding, if the party against whom the testimony is now offered, or, in a civil action or proceeding, a predecessor in interest, had an opportunity and similar motive to develop the testimony by direct, cross, or redirect examination.

(2) *Statement Under Belief of Impending Death.* A statement made by a declarant while believing that his death was

imminent, concerning the cause or circumstances of what he believed to be his impending death.

(3) *Statement Against Interest.* A statement which was at the time of its making so far contrary to the declarant's pecuniary or proprietary interest, or so far tended to subject him to civil or criminal liability, or to render invalid a claim by him against another, that a reasonable man in his position would not have made the statement unless he believed it to be true. A statement tending to expose the declarant to criminal liability and offered to exculpate the accused is not admissible unless corroborating circumstances clearly indicate the trustworthiness of the statement.

(4) *Statement of Personal or Family History.* (A) A statement concerning the declarant's own birth, adoption, marriage, ancestry, or other similar fact of personal or family history, even though declarant had no means of acquiring personal knowledge of the matter stated; or (B) a statment concerning the foregoing matters, and death also, of another person, if the declarant was related to the other by blood, adoption, or marriage or was so intimately associated with the other's family as to be likely to have accurate information concerning the matter declared.

(5) *Other Exceptions.* A statement not specifically covered by any of the foregoing exceptions but having equivalent circumstantial guarantees of trustworthiness, if the court determines that (A) the statement is offered as evidence of a material fact; (B) the statement is more probative on the point for which it is offered than any other evidence which the proponent can procure through reasonable efforts; and (C) the general purposes of these rules and the interests of justice will best be served by admission of the statement into evidence. However, a statement may not be admitted under this exception unless the proponent of it makes known to the adverse party sufficiently in advance of the trial or hearing to provide the adverse party with a fair opportunity to prepare to meet it, his intention to offer the statement and the particulars of it, including the name and address of the declarant. (Added by Supreme Court Order 364 effective August 1, 1979)

Changes made - CS HB565

1) Change in title from "prosecution for sexual abuse of minors" to "prosecution for certain sexual offenses."

2) Line 12 from "prosecution for the crime of sexual abuse of a minor in any degree" to "prosecution for an offense under AS 11.41.410-11.41.440 or 11.41.455."

3) Line 14 from "a child under the age of 10 describing an act of sexual contact with the child" to "a child under the age of 10 who is the alleged victim of the offense describing the conduct establishing the offense."

4) Line 24 inserts (3) "the prosecutor informs the defendant of the intention to offer the statement and the contents of the statement sufficiently before the proceedings to give the defendant a fair opportunity to respond to the statement."

5) Line 28 - defines "unavailable" and "statement"

HOUSE BILL NO. 566

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to training of teachers and principals on the subject of sexual abuse of minors."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.03.030 is amended by adding a new subsection to read:

(b) The school term in each school district shall include two days of in-service training of teachers and principals on the subject of child abuse and sexual abuse of minors.

INTENT OF LEGISLATION

HB 566 - "An Act relating to training of teachers and principals on the subject of sexual abuse of minors."

This legislation will do much to fill the educational gap which now exists within our school districts on the topic of sexual abuse of minors. It will require teachers and principals to attend two days of mandatory in-service training each school term on the subject of sexual abuse of minors. They must be familiar with the sexual assault laws of Alaska, and be aware of their statutory responsibility to report any suspected cases of abuse.

School personnel are the most likely group of people to see physical and behavioral indicators in children which signal sexual abuse has occured. Because of the many hours children spend in the classroom, teachers are in a key position to know their students and to build relationships which would allow them to assist a child in a crisis situation.

ALASKA SEXUAL ABUSE PREVENTION

1

INTRODUCTION

Overview of the Sexual Abuse Problem

Sexual abuse is not an easy thing to talk about. It has long been a topic filled with fear, secrecy and taboos. Yet it must be discussed. According to recorded cases, one out of every four girls and one out of every eight boys will be a victim of sexual abuse by their eighteenth birthday. Children have a right and a need to know the facts about preventing sexual abuse and what to do if it occurs.

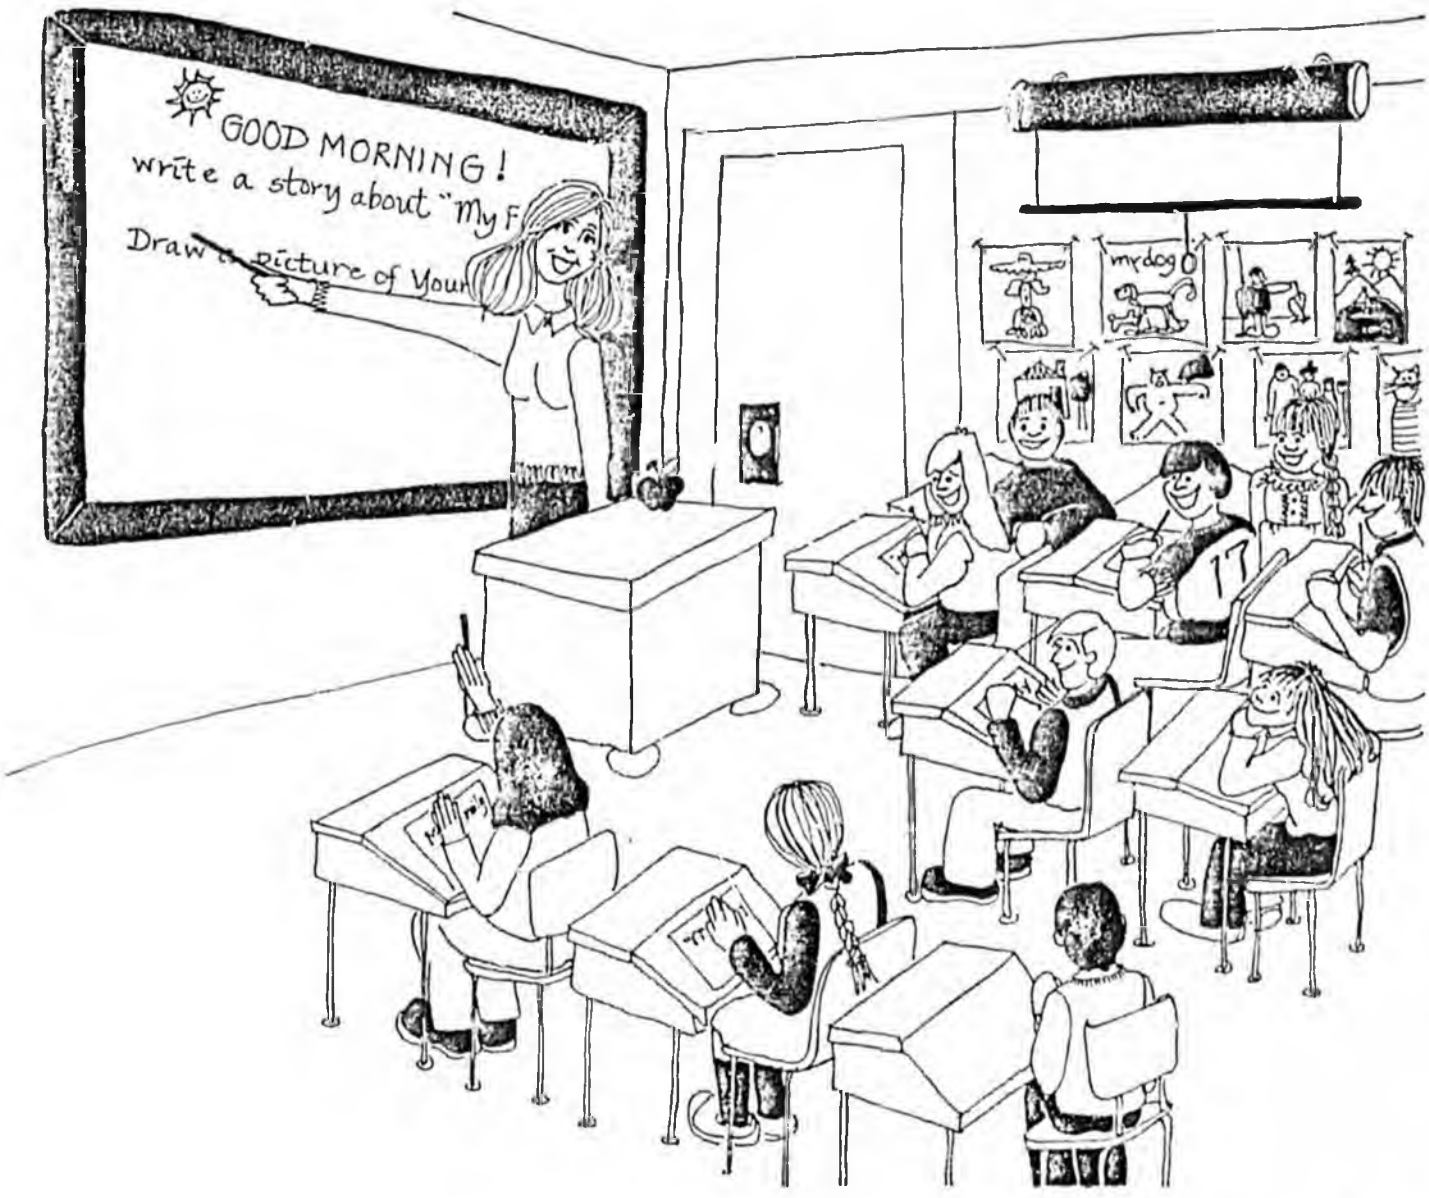
School personnel are the most likely group of people to see physical and behavioral indicators in children which signal sexual abuse has occurred. The average child spends 18,000 hours in the classroom from kindergarten through high school. Teachers and school personnel are in a key position to know their students, observe them, build trusting relationships and assist them if a crisis emerges in their lives. Even if a troubled child is spotted, it is typically the manifestation of the problem (i.e., learning problems) rather than the origin, that becomes the focus of attention and effort.

The term sexual abuse includes any kind of sexual contact or behavior between an adult and child, such as fondling, indecent exposure and rape. All children are vulnerable to sexual abuse due to their lack of experience, awareness and information. Young people are victimized regardless of race, age, neighborhood, village, social class or family income. Most children are given basic safety tips such as "don't talk to strangers" and "avoid taking candy and gifts from people you don't know." Unfortunately, the information usually stops here. It is unfortunate because strangers only commit 10-20% of all sexual molestations. Most are committed by a person the child knows—a relative, a neighbor, a friend of the family. It is often a person who has power and control over the child. Therefore, "basic safety" tips leave the child much more vulnerable than he or she needs to be.

The Alaska Sexual Abuse Prevention program was created to fill this educational gap. It provides teachers throughout Alaska with a uniform, comprehensive program designed to give students accurate information about sexual abuse while addressing needs unique to this state. **The primary focus is on the child's skill development. Children will be taught to recognize potentially dangerous situations, to understand they have rights and that it is OK to say "NO," to identify good and bad touching, and to know who to tell about a touching problem. The offender will be viewed as the person at fault and in need of help. The child is not to blame nor made to feel guilty.**

ALASKA SEXUAL ABUSE PREVENTION

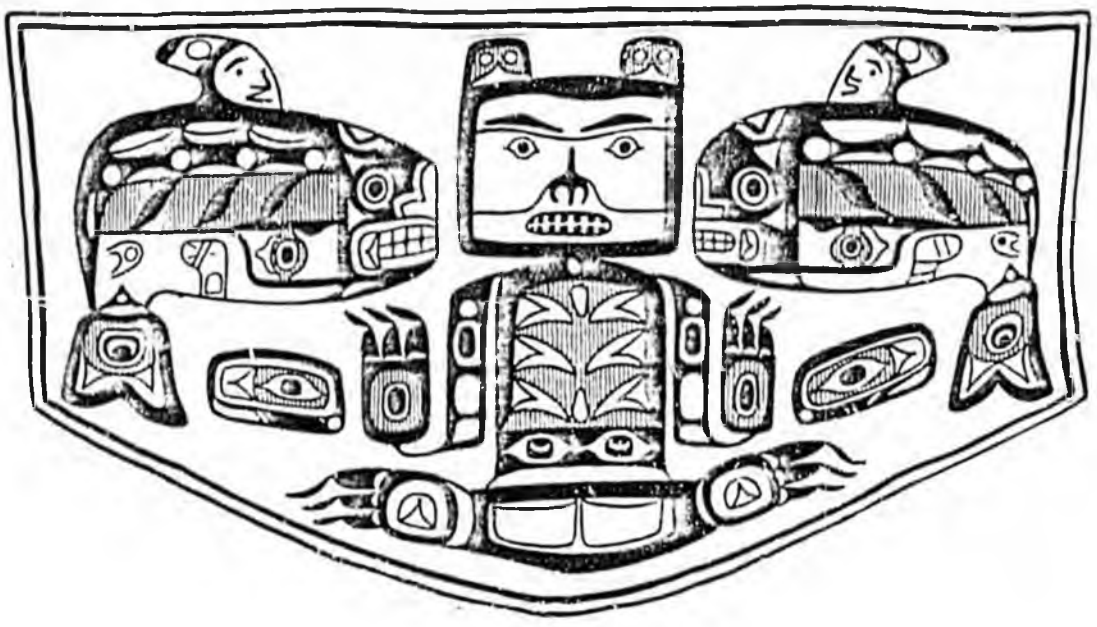
The program is to be presented in a low key, matter-of-fact fashion. There are no frightening or harsh scare tactics. Fear only tends to incapacitate children, leaving them unable to think clearly and calmly in a situation. The subject is treated seriously yet balanced with entertaining video tapes, class projects and activities all designed to make the program interesting for the student. Since this program is intended for both boys and girls, children will examine how they are socialized and how the different sex roles affect behavior. Since a high percentage of sexual abuse cases involve alcohol, its impact on decision-making will also be introduced. Alcohol use is depicted in some of the video scenes. It is not to be viewed as an excuse for committing abuse, but rather something that may affect judgment.



Dana was 8 years old. On Tuesdays she went to her club meeting after school. This Tuesday she stayed after the meeting because Mr. Johnson asked her to help clean up. Mr. Johnson, the club leader, was such a nice man according to all the girls in the group. Dana felt that way too and loved to sit on his lap. After they were done cleaning up, Mr. Johnson called to her to come over to him. As she was sitting on his lap, he unzipped his pants and asked her to touch him. Dana felt sort of weird and funny. She knew that that was a "private" part of the body. She got up, moved away from him, said, "NO," and went straight home. She told her mother about what had happened. Her mother hugged her, said she was glad she had told her and called the police.

Phil was 10 years old and really liked softball. One day he was walking home after a game when Joe Winston, the man who runs the store, came by on his 3-wheeler and offered to give Phil a ride. Phil didn't like Mr. Winston. He was always looking at Phil and sometimes touched him in a way that made Phil uneasy. He just didn't want to be close to Mr. Winston. So he assertively said, "No, thank you," and continued walking. Mr. Winston drove off. When Phil got home, he told his Dad about how Mr. Winston makes him feel uncomfortable. His Dad said he did the right thing by not accepting the ride and that he was glad Phil had told him.

Why were Dana and Phil successful? They were successful because they removed themselves from potentially dangerous situations. They had received enough information at school so they were prepared and not confused. They knew what to do and that their mother, father, teacher, or other adult, would want to know about the incident. Most importantly, they knew they were not at fault and that they would be believed. . .



Directions on Using Teacher Guide

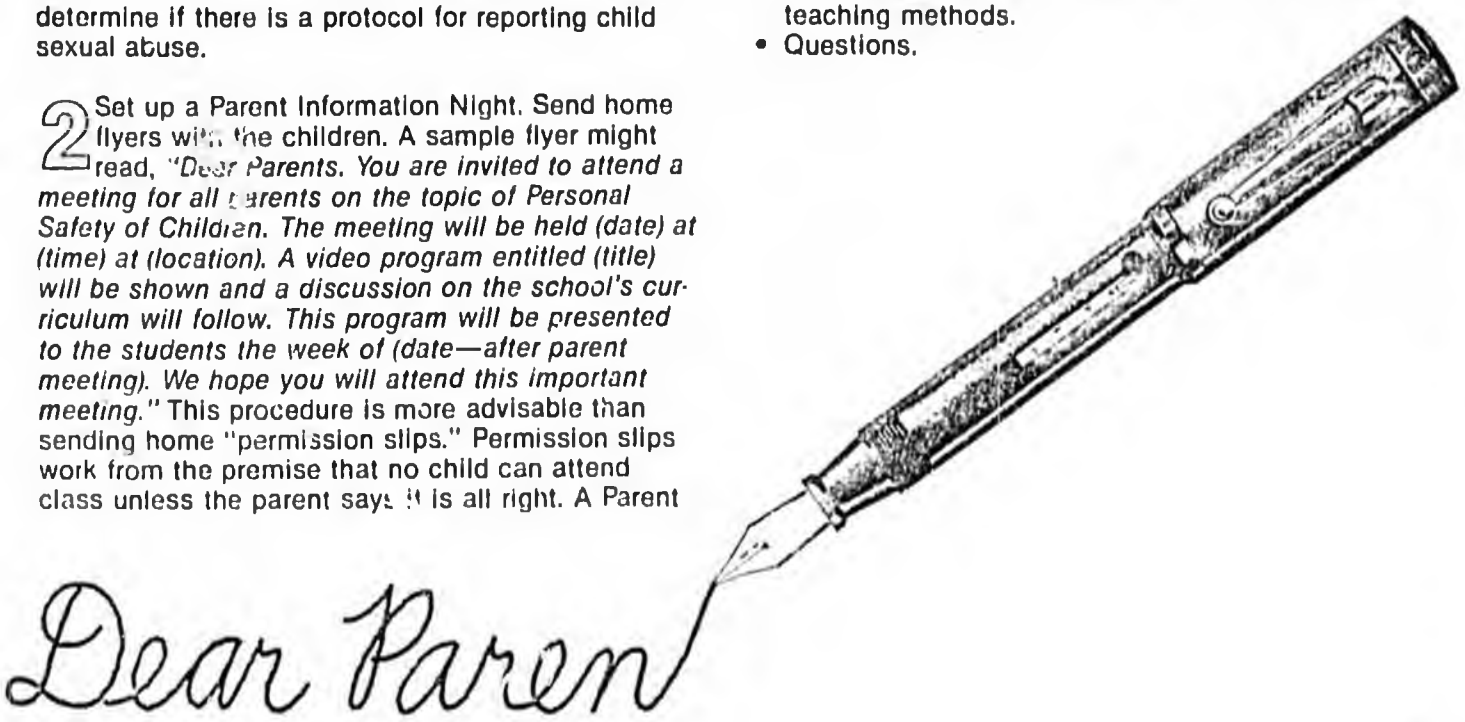
This guide is a compilation of suggestions and ideas from many sources: parents, teachers, and professionals in the field. It offers a variety of lesson plans and classroom activities. By reading the guide, you will get a comprehensive picture of what the Alaska Sexual Abuse Prevention program is trying to accomplish. You can then go back and assess your classroom's maturity level and needs and select the appropriate sections to use. You are also encouraged to create additional classroom assignments and visuals (i.e., bulletin boards, displays). You do not have to be an expert on the topic of sexual abuse prevention—you can work with others in presenting the material, team teach and use community resources.

GOOD MORNING!
write a story about "My F
Draw a picture of Your
mr dog
17

The first three chapters are designed to give you background information on sexual abuse—when, where, how and why it happens. You will then be ready to begin developing one of the most important skills—the use of correct terminology as it relates to sexual abuse and body parts. Learning is less of a mystery for children when they are told correct names when they are young. Definitions are covered in Chapter 4. Chapters 5 and 6 are lesson plans, divided into two groups for grades K-6 and 7-12. The lesson plans and student activities have been reviewed and tested for content and grade level appropriateness in Anchorage, Aklachak, and Ketchikan, Alaska. You may find that the student activities listed in the K-6 Chapter are excellent for your 5th graders, but not for your 2nd graders or vice versa. You be the judge. The grade level groupings are to be used as a guideline. *However, it is important not to eliminate a section due to your own personal anxiety about the topic. Children need and have a right to obtain complete information. Practice going over the difficult sections and it will probably be easier than you think.*

Chapter 8 is a resource list of assistance agencies in Alaska. Besides responding when an abuse is reported, several organizations also offer classroom speakers. A bibliography of books as well as audio visual materials is listed. The books allow you to more thoroughly examine the issues raised in this guide and are good resource materials for students. You are encouraged to do further reading, as it will enhance your classroom activities and prepare you for questions asked by students and parents. This chapter also lists places to contact for teacher aids such as anatomically correct dolls, doll patterns and pamphlets.

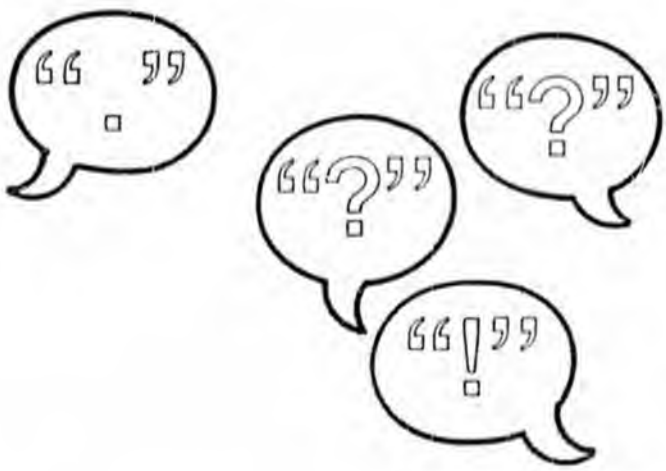
BREAKING SILENCE 2



How to Set Up a Personal Safety Program

1 Meet with the Principal, School Administrator, or school board to gain their support and to discuss the curriculum. It is important to stress that sexual abuse is a personal safety issue—not an issue of sex education or sexuality. You may want to incorporate this topic into the safety/health curriculum which includes water safety, cold weather survival, fire prevention, etc. At this time, you may also want to check with the school administration to determine if there is a protocol for reporting child sexual abuse.

2 Set up a Parent Information Night. Send home flyers with the children. A sample flyer might read, *"Dear Parents. You are invited to attend a meeting for all parents on the topic of Personal Safety of Children. The meeting will be held (date) at (time) at (location). A video program entitled (title) will be shown and a discussion on the school's curriculum will follow. This program will be presented to the students the week of (date—after parent meeting). We hope you will attend this important meeting."* This procedure is more advisable than sending home "permission slips." Permission slips work from the premise that no child can attend class unless the parent says it is all right. A Parent Information Night takes a more positive approach. Parents are able to see first hand what information their children will receive and then, if they object, their children will be excused. Otherwise, all children attend the class.



3 The Parent Information Night may be presented by the teacher or a team of teachers who will be instructing the unit. The Principal should also be present to show his/her support. The following items may be covered.

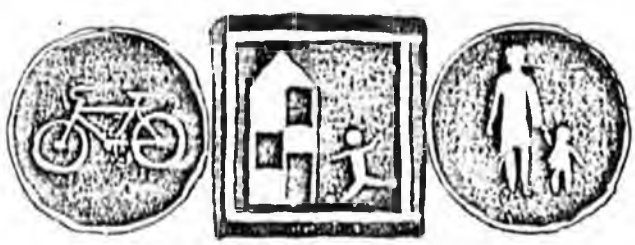
- The problem of sexual abuse of children.
- How curriculum and education can help prevent sexual abuse.
- Show video program.
- Discuss how this video is to be used and other teaching methods.
- Questions.

Parent Responses

In teaching this program, the majority of parents and school officials will be supportive of your efforts. Most are relieved that something is finally being done. But it is important to anticipate some negative reactions and statements. After studying the information outlined in this guide, you will be more prepared to respond to these comments. Know the facts about sexual abuse and how the classroom sessions are going to be conducted. Be confident yet sensitive in your answers to parents' concerns. Some possible responses are listed below.

- *"I don't want my children to be frightened."*
  (I don't either, that is why it will be presented in a positive, helpful manner.)
- *"I am a careful parent. It won't happen to my child."*
  (Unfortunately, we can't always be with our children—we can never be sure—state statistics.)
- *"I don't want to confuse her with information she is too young to understand."*
  (The program has been tested and information carefully chosen which is appropriate to your child's age.)
- *"If it's going to happen, it will."*
  (Children are less likely to be victimized the more safety information they have.)
- *"I don't believe in sex education at school."*
  (Sexual abuse prevention is a safety issue just like fire safety, water safety, crossing streets or poison prevention.)
- *"My son doesn't need to know about this."*
  (State facts about boys being victims or friends of victims.)
- *"Give children these crazy ideas and first thing you know, they won't even let us touch them at home."*
  (We discuss both nurturing and exploitive touching by both men and women. We don't discourage all touching.)
- *"Talking about sexual abuse will cause my child to form warped ideas about sex."*
  (We put all the information into perspective, emphasizing that sexual abuse is not the norm.)
- *"This just gives kids ideas—then they'll probably go out and rape someone."*
  (We teach children that sexual abuse is wrong, against the law, and it is not fun or exciting.)
- *"This is a personal subject that should be discussed at home."*
  (I wish more homes did the job. We do involve parents in an information night and encourage discussion at home to reinforce the ideas. It is also suggested to practice what you would do if someone had a problem—a Family Safety Plan.)

Role of the School Professional



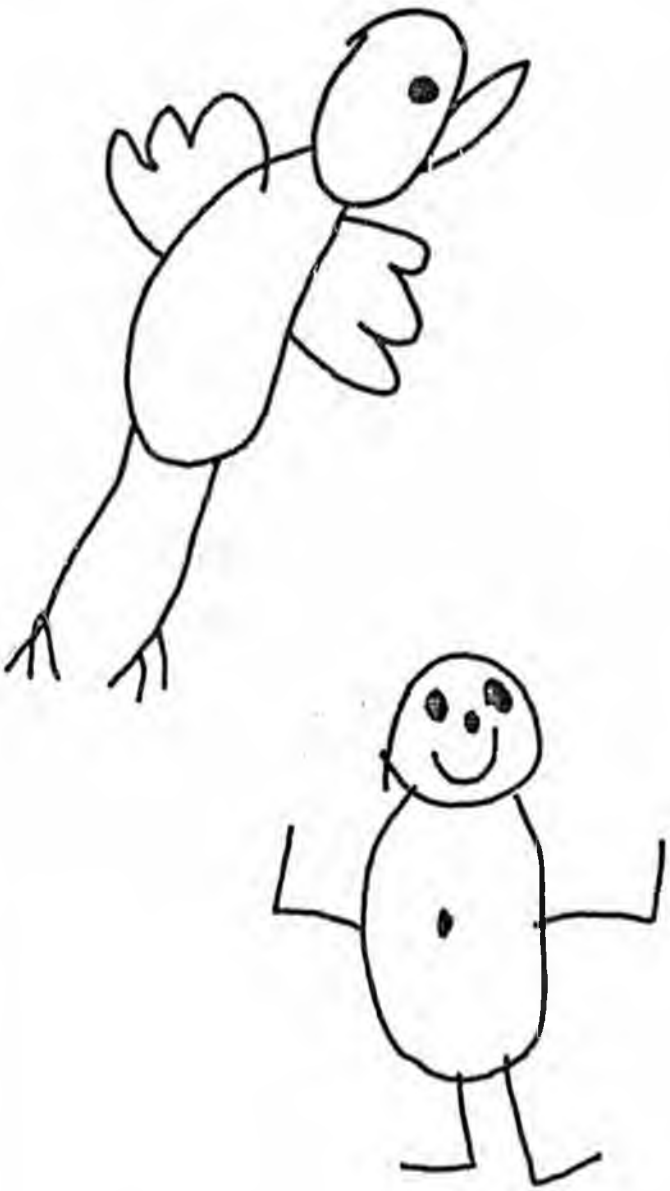
The school professional has two main responsibilities in regard to sexual abuse prevention: teaching and reporting.

TEACHING The role **you** play as a teacher is very important. With no other subject will **you** have the potential of impacting so many lives. **You** can help the students avoid dangerous and possibly psychologically damaging situations. **You** can help them develop coping and social skills that they can use throughout their lives. **You** can provide information so a student can be alert and aware, not afraid. Chances are, **you** will be an important source for students receiving accurate information about sexual abuse. Teaching this unit makes a positive step towards children overcoming their sense of helplessness as well as stopping their criminal victimization.

REPORTING Identifying physical and behavioral symptoms of sexual abuse, as covered in this chapter, is of primary concern to the educator. Because you see children daily, you are able to compare ("Is this normal for this age?") and see changes ("Her grades sure dropped suddenly."). You may be the only person to recognize that the child is in an abusive situation. Your alertness and involvement could affect a child for life both physically and mentally. When you are done reading this guide, you will know how and when to intervene.

The problems related to sexual abuse do not end with reporting. This is particularly disorienting for the child who tends to view the report as the end of the problem. Adults, whom the child perceives as having unquestionable power, are expected to take immediate and effective action. If this does not happen, the child's trust in adults is seriously diminished. Once an incident is reported, the child's protection and expectations must be considered.

In the State of Alaska, the Division of Family and Youth Services (DFYS) within the State Department of Health and Social Services is the agency where suspected child abuse is reported and investigated. DFYS works in conjunction with local law enforcement for removal and temporary placement of the child (if needed) and interrogation and arrest of the offender. They may also work with counseling agencies to assist families where abuse has occurred.



The policy regarding investigation, prosecution, and treatment of child sexual abuse cases varies from one part of the state to another, so it is a good idea for educators to become familiar with the people and processes in their own communities. It is also important to have a school protocol or established set of procedures to follow if a child is abused.

Remember, it is not your responsibility to prove or investigate sexual abuse, only to report your suspicions (See Mandatory Reporting Law, Chapter 4).

Teaching Tips

1 Determine your own personal comfort level with the topic and the materials. Sexual abuse is a sensitive issue and for some people may be difficult to discuss. In some cases, another teacher or resource speaker should be brought in.

2 Be prepared for the students' discomfort with the topic. Humor is a tension release but trivializes the subject. If students make "rape jokes," ignore them. If they persist, ask them why they feel embarrassed or uncomfortable. Generally, this is because people are just not used to discussing the topic openly. If you also joke about sexual abuse or let it persist, it may communicate to the class an uncaring feeling on your part. Statistically, in a class of 25 students, there may be 4-5 who have been sexually abused.

3 Hold class in an appropriate location. Although your regular classroom may be a good setting, some schools have special rooms which are private and more comfortable. Informal seating arrangements, such as moving chairs in a circle or having kids sit on the floor, may help facilitate discussion.

4 Limit the size of the class. If it is necessary to combine two or more classes, they should be approximately the same age level. Fifty students is a maximum with 10-25 being ideal.

5 Mixed classes of boys and girls is preferred. If classes are separated, the topic becomes different from other safety issues. Sexual abuse is not just a girls' problem.

6 Clearly introduce the topic to the class. By stating that this is a safety issue, children will see it as such. By being open and honest, the students will be less confused. For example: "Today we are going to be talking about an important topic—your safety. You all know how to cross the street safely, or what to do in case of fire, right? The type of safety we're going to talk about is what to do if someone touches you too much. We'll talk about both good kinds of touching and bad kinds of touching and how you can tell the difference."

For older students: "Today we're going to start a week long safety unit. It will specifically focus on the problem of sexual abuse or forced sexual intercourse. Just like any safety issue, you'll learn how to recognize potentially dangerous situations and how to respond."

7 Determine the students' awareness level. Do not assume students understand all the terms used. If there is any doubt, ask the students to define the word. This gives you a sense of the class' level of knowledge. It may also be an opportunity to explain what is a myth and what is valid information.

8 All questions deserve an answer. State your response as clearly and simply as possible.

9 Put information in perspective. Balance all negative examples with positive examples. "Not all adults you meet are bad," "Some touching can be good, caring, nurturing, and some touching can be bad, negative, scarey, exploitive."

10 Keep students on the topic. Children, especially K-6 grades, love to tell stories. They often confuse sexual abuse with robbery, kidnapping, theft, murder and other ideas from television and movies. Sharing short stories or examples may be useful if they can be tied into a lesson.

Why Do Victims Take So Long to Tell?

Most incidents of child sexual abuse have gone on for some time. So why does it take so long for a child to come forward and tell someone about what has occurred? In many cases, children think that they have told, either directly or indirectly. The child may have done or said something to indicate that something is wrong. Yet due to the anxiety, denial or cultural bias on the part of the observer, the "telling" is unnoticed.

Generally children will not directly tell anyone what happened to them for one or more reasons:

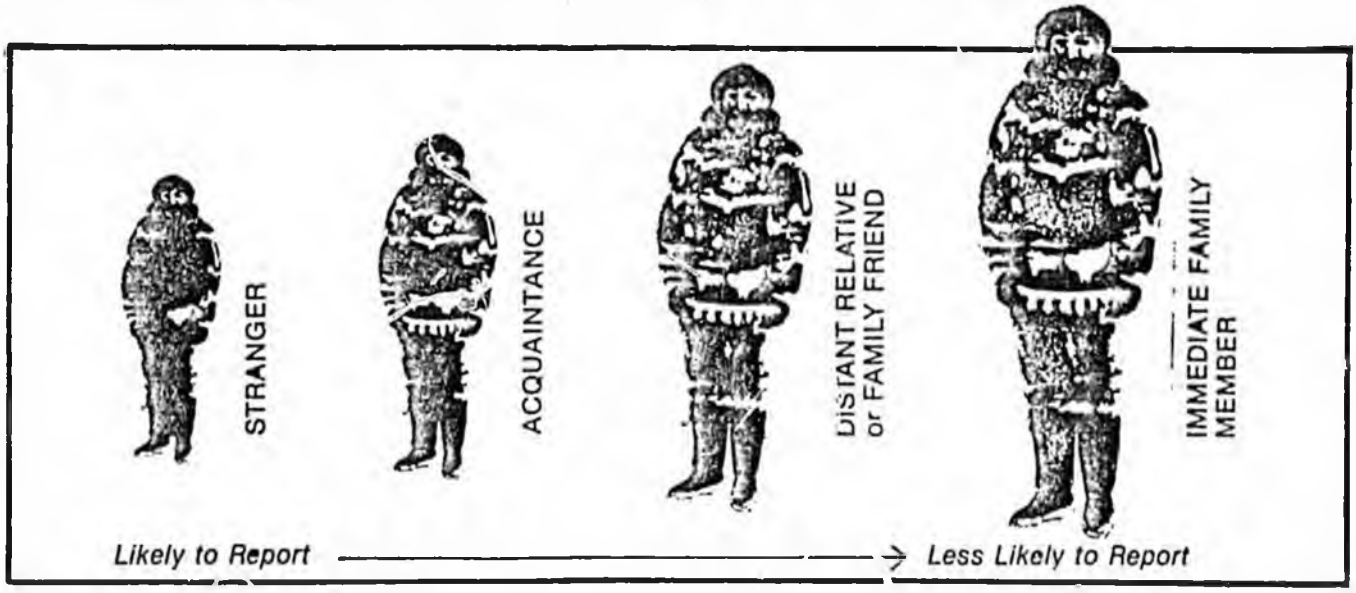
1. Children are afraid no one will believe them. (Children generally do not lie about abuse.)

2. Children are afraid they will get into trouble with the person they tell. They may have been doing something illegal or "wrong" at the time and feel guilty. For example: "How many times have I told you not to play in the woods alone?" or, "I don't want to hear you use words like that ever again."

3. The burden of responsibility is placed on the child, or the child fears loss of personal security. For example: Threats made by the offender to the victim, "If you tell anyone, I'll come back to [illegible] you." Disruption of the family, "If you tell, I'll go to jail, Mom will go on welfare, and you'll be taken away."

4. Children fear discontinuation of affection by the offender, "This is our secret so if anyone finds out, I won't tell you any stories or hold you on my lap anymore. I won't be your friend."

5. Children may not know 'how' to tell because they do not know the words to describe what happened. They may speak in vague terms. For example: "I don't like Uncle John anymore." "Our neighbor Mr. Thorsen wears funny looking underwear."



Additionally, a teenager might not tell for these reasons:

6. Teenagers fear peer pressure, reactions of friends, of being singled out, laughed at or losing popularity.

7. Teenagers fear discussing intimate details with authorities (police, teachers) about the sexual act. They are often self-conscious about the development of his/her own body.

8. (Generally male victims) A teenager may fear that his friends will think he is homosexual if he is abused by another male. Also concern that others would laugh that he was not "man enough" to take care of himself. If a female abuses a boy, people might minimize its seriousness, in fact, implying that it is desirable. There is an additional fear of lack of sensitivity.

VICTIM AND OFFENDER RELATIONSHIPS: HOW IT AFFECTS REPORTING

Why do children finally tell? There are 5 main reasons:

1. The child receives some sex education or sexual abuse prevention information and realizes that what has gone on is not normal, is wrong, and should be reported.

2. If the offender has told the child to keep the sexual abuse a secret, sometimes the child may brag or want to share the secret with a best friend.

3. The victim's younger brother or sister is now at the age when the victim first was sexually abused, and he or she does not want them to be abused as well.

4. The molestation escalates in frequency or type of behavior and alarms the child.

5. The child reaches adolescence and fears pregnancy, resents the offender's efforts to control her/his life, dating, etc.

Identifying Symptoms of Sexual Abuse

Often children will not verbalize what is wrong, but will convey the message by a change in behavior. The following indicators are helpful in identifying, but may not be isolated to, sexual abuse. Any of these signs could indicate the child is troubled in some way, so be alert, respond and seek the appropriate assistance.

PHYSICAL INDICATORS

- Genital or anal injury (swollen, bleeding, tearing)
- Venereal disease
- Genital pain and itching
- Change in neatness or appearance (torn, stained clothing)

- Gaining weight (wearing large, loose fitting clothes so as not to draw attention to their body)
- Compulsive masturbation
- Loss of appetite or sudden increase in appetite
- Altered sleep patterns (bedwetting, restlessness, nightmares, fear of sleeping alone, needing a nightlight, sleepy in class)
- Newly acquired bodily complaints, especially stomach aches

BEHAVIOR AND ATTITUDE INDICATORS

In the Classroom

- Extreme shifts in emotions/mood swings
- Fears and phobias (especially aimed at one person or location)
- Suddenly turning against one parent
- Hyperactive and restless
- Acting adultlike (i.e., appearance of overwhelming responsibilities, especially in incest cases)

- Acting childlike (clinging to an adult, sucking thumb, etc.)
- Frequent absences from school, especially if physical abuse is connected
- Overly compulsive behavior
- Learning problems (drop in grades, daydreaming)
- Irritable, short-tempered
- May ask questions or know terminology inappropriate for child's age
- Expresses affection to adults in inappropriate ways (French kissing, fondling genitals)
- Aversion towards going home at the end of the day. May arrive at school early and leave late.
- Will not undress for P.E.
- Is frustrated and confused with feelings of anger, fear, dependence and hatred
- Hostile and aggressive towards adults or overly trying to please adults
- Afraid to be alone with adult, especially a male
- Isolation (avoids eye contact, sinks down in chair, withdrawn)
- Shies away from being touched

With Other Classmates

- Low self-esteem and self-image
- Excessive curiosity about sexual matters (with people and animals)
- Precocious sexual play
- Few friends
- Not allowed to stay overnight at a friend's house

Additionally for Teenagers

- Running away from home for no specific reason

or desire to return (approximately 50% of runaways have been sexually abused)

- Delinquent behavior, especially prostitution
- May have boyfriends at school, but not allowed to date
- Rebellious acts
- Excessive sexual behavior
- Drug and alcohol abuse
- Feelings of anxiety, denial, guilt often times verbalized

Parents of children who have been sexually abused at home may also exhibit specific behavior to indicate something is wrong. In parent-teacher conferences, note any uneasiness when discussing their child. For instance, when you say, "Susie doesn't like to undress for PE", or "This past month Susie has been awfully quiet", the mother may make statements that indicate she views her daughter as a rival. The father may be overly protective and view himself as a young boyfriend. Overall, there seems to be a blurring of generational boundaries.

Procedures to Follow If a Child Has Been Abused

As soon as you begin to suspect a child may have been sexually abused, or the indicators listed previously are present, respond immediately! It is possible that when you talk to the student, this will be the first time he or she has ever mentioned the incident to anyone. In any case, your response is critical in determining the origin of the problem as well as for the child's physical and mental well-being. When the child discloses the abuse, the listening adult's reaction may either make the child open up and talk or cause a silent response. Therefore, think about your discussion strategy and practice asking questions in a sensitive way. You are not expected to be a police officer, but rather to gather some basic information.

The following guidelines will assist you in handling a suspected child sexual abuse case. Also check to see if your school has a written policy or protocol.

1. Talk to the child immediately. Occasionally a child may disclose during a class presentation that he or she is being abused. If this does occur, acknowledge what the child has said and that you appreciate him/her sharing that information: "I'm glad you told me, Bill. We'll talk about it privately after class." Use a private room where other children cannot see. Believe the child. Be calm, caring, sympathetic and matter-of-fact. A child can sense discomfort or disbelief. Listen and be supportive. Continually reinforce the child that he or she has not done anything wrong. Show understanding that this may be difficult for the child to talk about, but they are doing the right thing. Do not use leading questions, ("Did someone put his hands down your pants?"), but leave them open ended ("I noticed you've been quiet in class lately. Let's talk about it; what seems to be the matter?"). Go slowly, keeping the child's emotional and physical well being in mind. Ask age-appropriate questions using the child's terminology. Let the child know that you will help protect him/her from future abuse. If the child does not open up and discuss the matter, but you still suspect something is wrong, proceed to step two. Document the conversation with the child and the reasons you are suspicious.

2. Talk to the Principal or appropriate school official. This should be done immediately

to inform him or her in writing or in person of the situation and the fact that the police/Division of Family and Youth Services needs to be called. This step should be documented (times, dates) and a copy made of the memo written to the principal regarding this matter. If writing a memo is not appropriate, you might want to take along a fellow teacher as a witness to the session with the principal.

3. Call the police or DFYS immediately. The child's welfare and safety is everyone's primary concern. That is why by law you must report even suspected child abuse. Professionals, including teachers, can be prosecuted if it is shown that they knew about a situation but did not report it. Likewise, a teacher who reports in good faith is protected from prosecution. Assist the authorities any way you can, including testifying if the case goes to trial. Allow the child time off from school to go to the needed follow up medical exams, interviews and court appearances.

4. Respect the child's privacy. Although it is best not to discuss the child's situation with other people (i.e., in the teacher's lounge, with other students or their parents, etc.), it may be an opportune time to discuss sexual abuse prevention with other students. This is especially true if the offender is not in jail and may be an imminent threat to the safety of the other children.

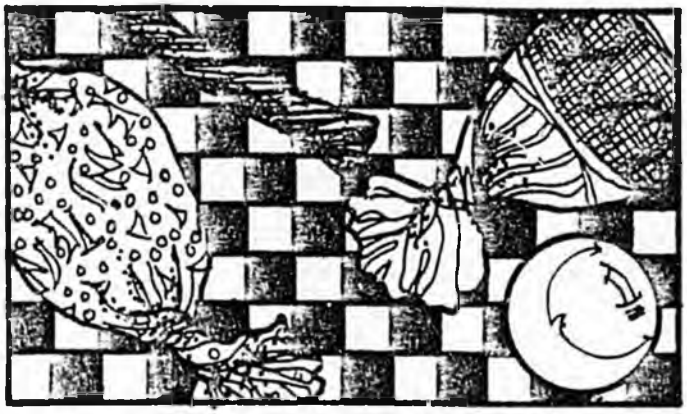
5. Afterwards in the classroom. Let the student know you are open and available to talk about the situation if he or she so desires. The victim needs to know it is OK to vent feelings and that you are a friend. Do not dwell on the subject of the abuse nor pretend it never happened. Just be approachable. Expect the same classroom assignments and responsibilities from the victim as with any other student. The victim needs that stability and consistency. Treat the victim normally and not as a "freak." Be sensitive to the child's feelings and needs while maintaining the regular school routine.

3

WHAT IS SEXUAL ABUSE?

Myths and Facts About Sexual Crimes

Everyone is impressionable. We get information and images about sexual abuse from television, newspapers, movies, friends on the playground—but how do we know it is accurate? Chances are, most of what we see and hear is sensationalized, fear oriented, or only referring to a minority of the actual cases. Much of our knowledge about sexual abuse is derived from sources that are one extreme or the other: either sexual abuse is never discussed (a child's imagination can run wild with minimal facts) or it is blown out of any rational proportion. As educators, potential victims, family members of victims, and jurors, we need to evaluate and assess our knowledge and see how it affects our lifestyle, behavior, and decision-making. Our attitudes are directly transmitted onto our students.



The following is a summary of the most common myths and misconceptions about the sexual abuse of children and young adults.

SEXUAL ABUSE OF CHILDREN

#1 Myth:
Strangers pose the biggest threat to children.

FACT:
Most children are told, "Don't take candy from strangers," and that is the extent of their safety instruction. The fact is, in 80-90% of the cases, children are molested by someone they know or to whom they are related. Although teaching children to avoid gifts from strangers may be sound advice, it is only addressing 10-20% of the problem. Furthermore, children often do not understand the reason

for the warning and may believe that the candy is poisoned.

#2 Myth:
The child victim initiates the sexual abuse either by seducing the offender or exaggerating the facts.

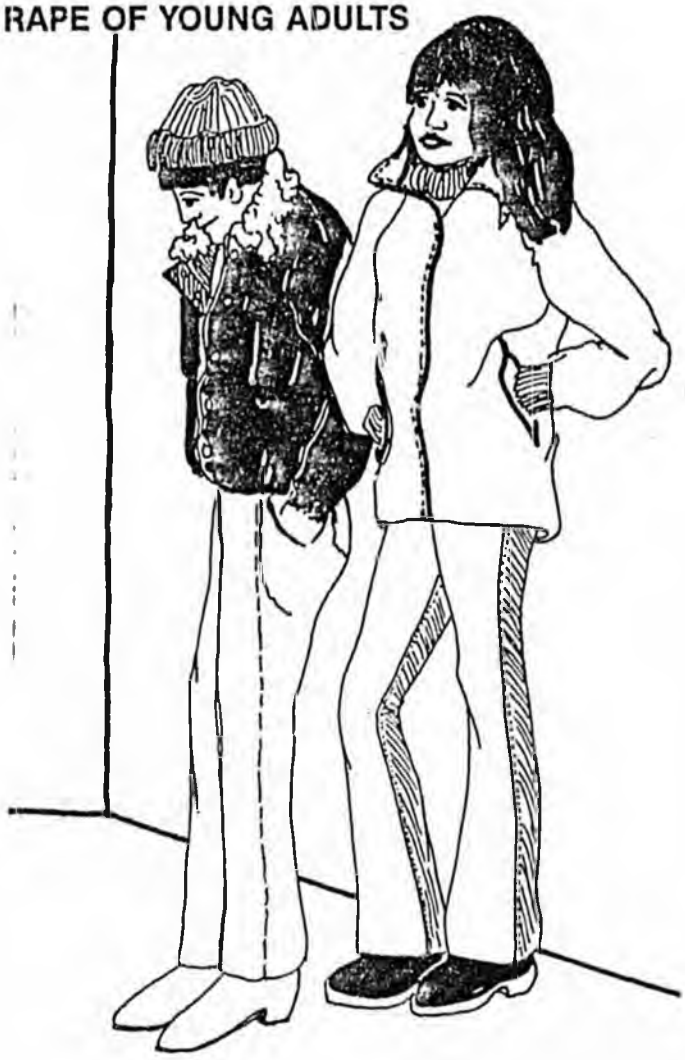
FACT:
The responsibility for sexual encounters always lies with the adult, not the child. In rare cases, a child may be "seductive" to the offender, but he or she has been taught that this is the only way to get attention and affection (basic survival needs) and special favors. The child's behavior is sometimes used as rationale for the offender's actions. For instance, if the case goes to trial, it is not unusual for the offender to try and use the defense, "but, your honor, she came on to ME." No matter what the sequence of events, the adult is the responsible party and must bear the consequences. The legal age of consent for sexual intercourse in the state of Alaska is 16 years old.

#3 Myth:
Most child molestations are violent.

FACT:
An estimated 3-4% of all child sexual abuse cases involve physical violence. Most offenders gain access to children by manipulation, coercion or trickery. The offender may state things such as "This is our little secret," "No one would believe you if you told," "I'm only doing this because I care about you," "You're my special friend," "You'll get in trouble if you tell," or "Your friends will think you're bad and dirty." Rarely is a child beaten or drug into a car as is often portrayed by the media.

#4 Myth:
Non-violent sexual abuse is not emotionally traumatic.

FACT:
Generally, the opposite is true. Statistically, violent sexual abuse is more likely to be committed by a stranger and non-violent sexual abuse by a family member or someone known to the child. There is not the emotional attachment to the stranger like there is with a relative or friend. These children have often trusted and obeyed the adult offender only to be tricked and misused psychologically and physically. Because of this, they may have more difficulty relating to people as they grow up; they might question their own self-worth and judgment as well as be laden with an intense feeling of guilt and hatred. Generally, the closer the association with the offender, the more emotionally traumatic it will be. Likewise, the closer the association, the less likely the young victim is to report.



#5 Myth:
Children often fabricate these stories.

FACT:
Rarely do children lie about rape and sexual activities, so each suspicion that abuse has occurred should be treated seriously. Because sexual abuse of children is so horrifying to think about, many adults when confronted with a child's story, will rationalize it away by believing it to be just a child's "vivid imagination."

#6 Myth:
Sexual abuse only happens in low socio-economic families.

FACT:
Children from all walks of life, as well as from all parts of Alaska (rural and urban) are vulnerable to sexual abuse.

RAPE OF YOUNG ADULTS

#7 Myth:
Sometimes young women ask to be raped.

FACT:
No one "asks" to be forced or threatened into the most intimate, personal act of sexual intercourse with someone they do not know or with whom they do not wish this type of relationship. A person always has the right to say "no" and not be raped, no matter what they are wearing or where they are. A study at Atascadero prison in California showed that most rapists were not motivated to commit their crime because of the victim's clothing, but rather by the victim being alone—a crime of opportunity, not passion. The Federal Commission on Crimes of Violence reported that only 4% of reported rapes involved provocative behavior on the part of the woman (provocation being defined as gesture or way of dressing). Granted, anyone is taking a "risk" to hitchhike or walk alone at night, but they are not "asking to be raped" anymore than if they were at home reading. A man with a wallet in his back pocket is not "asking to be mugged," so why is rape looked at so differently? The blame is wrongfully shifted from the rapist to the victim.

#8 Myth:
Rape is an impulsive and spontaneous act of sexual gratification.

FACT:
Many rapists are married, have girlfriends or sexual partners. Sexual deprivation is not generally what motivates a rapist, but rather a need to humiliate, overpower and control. Many offenders have low self esteem and self-respect as well as minimal social and coping skills. To him, the victim may represent all women/men, a particular person (i.e., wife, mother) or just an object for venting his hostility. In the dating situation, some sexual offenses stem from unclear communication between the couple, mixed messages, peer pressure, selfishness and lack of respect for the other person. A rapist could be a date, a stranger, an employer, fellow student, teacher, or relative—it could be anyone who has these characteristics and acts them out.

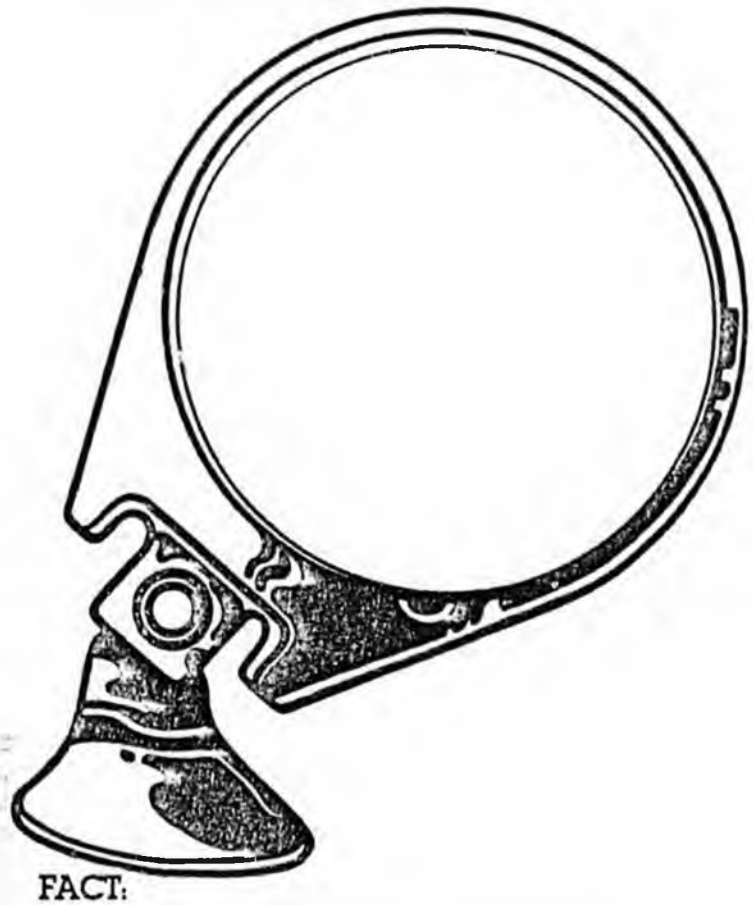
#9 Myth:
Many rapists kill their victims.

FACT:
Although the threat and fear of death or severe bodily injury is almost always present, rarely does a rapist kill his victim. Nationally, between 4-6% rapes end in murder. Today's movies, music, and television shows often perpetuate this myth with themes that are a mixture of sex and homicidal violence. The fear generated from this information often makes it difficult for victims to think calmly and rationally when confronted by a rapist.

#10 Myth:
Women want to be raped.

FACT:
Rape is, by definition, an act committed against the will of the victim. It is not seduction. There is no tenderness in rape, no concern for the feelings of the victim. The thought that a woman could enjoy being exposed to the threat of injury or death, venereal disease and pregnancy, that she could enjoy the humiliation and fear a rapist imposes is not true.

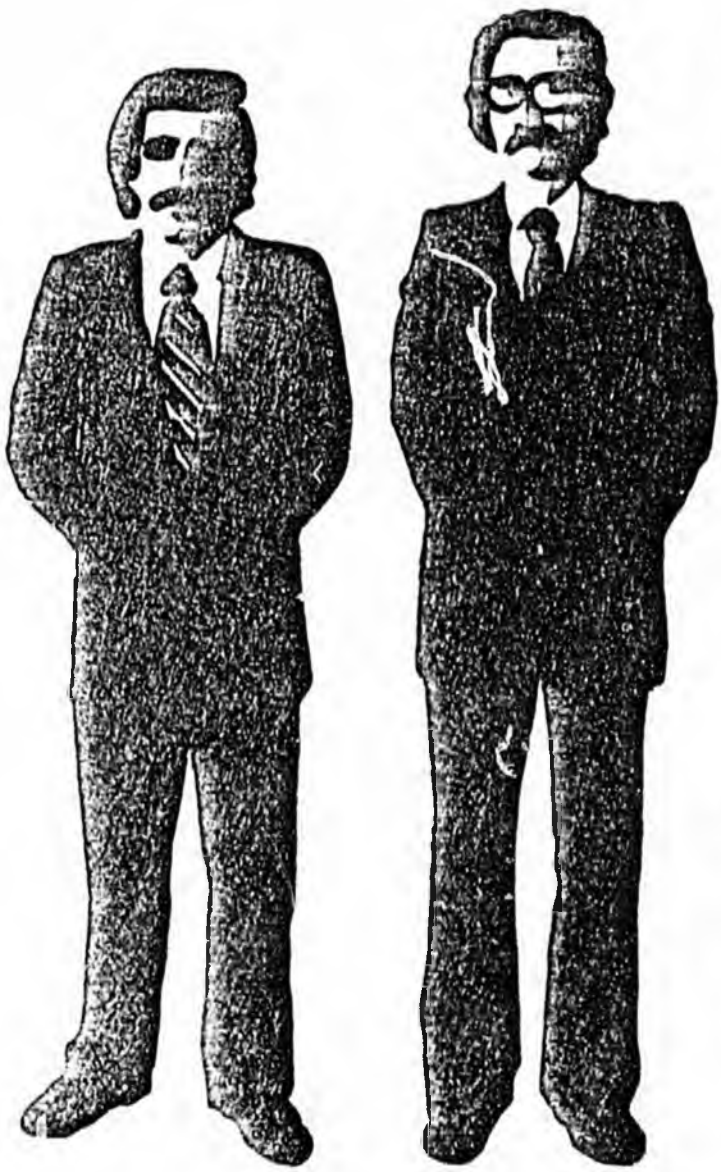
#11 Myth:
No person can be raped unless he/she wants to be.



FACT:
Because of a lack of understanding of how and why rape occurs, many believe that a normal, healthy person simply cannot be raped. Often the ardent believers of this myth are women themselves, and their judgmental attitudes continue to victimize every woman who is sexually abused. Cliches such as "a woman can run faster with her skirt up than a man can with his pants down," only reflects the speaker's lack of knowledge and insensitivity to the topic. The victim's fear of being killed or injured is somehow forgotten. The decision to aggressively resist a rapist or submit with the hope of not being injured should lie solely with the victim.

#12 Myth:
Most rapes aren't "real." It's just a revengeful female trying to get back at some poor guy.

FACT:
It would be unrealistic to say that people have never falsely reported a rape to the police. However, only about 2% of the total cases reported are considered unfounded. This percentage is consistent with the number of false reports in other major crime categories. Although new laws protect the victim from embarrassing and unnecessary questions in court, it is still a difficult crime to report and discuss. Rarely does a victim lie about such a serious matter. Each incident should be called to the attention of the authorities. A teacher's legal responsibility is to report every suspected incident so that those who are trained in determining the facts can do so. If it is proven to be untrue, the victim could be charged with initiating a false report. This, however, is a rare occurrence.



#13 Myth:
All sex offenders are drunk.

FACT:
A high percentage of sex offenses do involve alcohol; however, it is not the cause or the reason for the offense. Too often alcohol and drugs are used as an excuse for not accepting responsibility for one's behavior. Furthermore, not all people under the influence of alcohol choose to sexually abuse others. Simply treating the alcohol or drug problem will not necessarily change the violent and/or sexual problem.

#14 Myth
Rape is a woman's problem.

FACT:
Rape is a societal problem involving both men and women. Although women are more often the victims of sexual crimes, men are victimized too. Statistics show that 1 in every 8 males will be the victim of sexual abuse before they are 16 years old. Furthermore, as a husband, brother, boyfriend or father of a female, men need to understand the fears, anxieties and difficulties she may encounter if victimized. This is essential in order to be supportive and to help her adjust during a difficult and frightening time. The fear of how family and friends might react is one of the biggest concerns a victim faces following an abuse. Both men and women are also potential jury members and may someday have to make a judgment of "guilty" or "not guilty" in a sexual abuse trial. If citizens have never taken the time or had the opportunity to learn anything about rape, their knowledge will no doubt be based on myths and handed-down prejudices. Interviews with convicted rapists have shown that many felt their behavior was condoned by other men. This was reinforced by "rape jokes," and a cavalier attitude on the part of some to the seriousness of the crime. It was evident that women were doing the complaining, setting up the hotlines, crisis centers and lectures, and to the rapists, that did not mean much. The rapists still felt they had the support and power on their side. Rape and sexual abuse is truly a problem for everyone on many levels. Education must be conducted with both boys and girls at a young age in order to impact and stop this cycle of abuse. We are all potential victims, offenders and jury members. Unless women and men band together to make a statement that both sexes are against rape, people will continue to contribute unknowingly to the perpetuation of sexual abuse.

Who Are the Victims?

Most of us want to believe that sexual abuse will never happen to us, a family member or to anyone in our classroom. We want to believe that it only occurs to people in a different socio-economic bracket, another part of the state or those who obviously did something "wrong" to let it happen in the first place. We try to justify the act in our minds by looking for characteristics that separate us from the victim, offender or setting. *"I would never have let my kids stay home by themselves!"* But haven't babysitters also committed sexual abuse? *"The mother's boyfriend abused her daughter? Those type of problems happen to unstable, low-income families."* But haven't even natural fathers raped their daughters at every level of the income strata? Sexual abuse can happen to anyone.

The statistics are shocking and they only begin to convey the magnitude of the problem. As educators, it is important to first acknowledge that the problem exists. **Statistically you probably have a victim in your classroom right now. If not, several of your students may be victims before they are 18. You have the opportunity to provide information to your students that you know will be valuable.** But first let's examine the statistics:

NATIONAL

- 1 out of 4 females and 1 out of 8 males will be victims of sexual abuse by age 18
  (National Center for Child Abuse and Neglect)
- 1 in every 6 elementary students has been sexually molested by grade 6
  (Minneapolis, Minnesota Study)
- 90% female victims, 10% male victims
  (Seattle study)
- Average victim age is 8 years old at the time of first sexual abuse
  (Santa Clara, California study)
- 81% of victims were 12 years or younger, 19% over 12 years
  (Seattle study)
- Estimated 50-75% of all sexual abuse cases are reported to police
  (FBI)
- 200% increases in sexual molestations of children nationally since 1976
  (National Humane Society)
- 80-90% of all child victims are sexually abused by someone they know or to whom they are related
  (Seattle study)
- One-third of all forcible rapes happen to females under the age of 15 years
  ("Sexual Abuse on Women and Girls," *Psychology Today*, March 1980)
- 75% of all juvenile prostitutes had their first sexual experience at home with a relative
  (Minneapolis study, 1970's)
- In 1 in 20 homes incest has occurred
  (National Center for Child Abuse and Neglect)
- Average duration of a sexual abuse: 13% one time incident
  20% several incidents over period of 0-6 months

67% several incidents over a period of 1-4 years (Seattle study)

- With adolescents, dating and other social interaction may lead to what is called, "acquaintance rape." In this instance, the victim is pressured or physically coerced by his/her date into sexual intercourse. Because the experience happens in a social context, neither may view it as rape. The victim may be traumatized, yet legally it may or may not be sexual assault. Estimates are that this is one of the most common abuse situations that goes unreported involving young adults.

The impact of the sexual abuse on the child will depend on the following things:

- Age of child
- Sex of the child
- Pre-existing personality
- Nature and duration of abuse
- Family structure, support system
- Reaction of family and outsiders
- Child's relationship with the offender
- Conditions surrounding disclosure (how it came to light)
- Mode of intervention (how interview was handled. Did it relieve anxiety and tension or increase anxiety and guilt?)

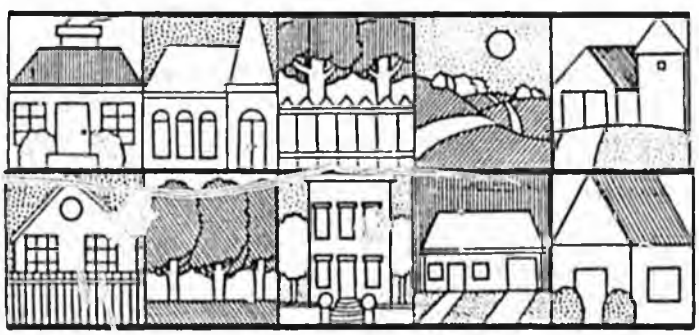
If there is no professional intervention, victims may have some permanent behavior changes. They may exhibit some or all of the following traits:

- Lack of trust and respect for people
- Feelings of low self-worth and self-esteem
- Feelings of isolation in peer relationships
- Lack of concentration
- Inability to feel comfortable in intimate relationships
- Sexual dysfunction
- Internalized feelings (of anger, depression, which could lead to suicide)
- Child feels powerless and helpless

Who are the Offenders?

Ever since we have read comic books or watched cartoons on Saturday morning, we have had an image of the child molester. A bad person is easy to spot. He (we believe it is always a man) wears certain clothes to give himself away: trench coat or black cape, a dark hat that shades his eyes, dirty and disheveled. He is over 60 years old (the "dirty old man") and has a shaggy beard or mustache. We still see this image on TV, and it is vivid in every child's mind.

One of the biggest hurdles to overcome in educating children is the fact that a child abuser or rapist has no "look." He or she can be a family friend, a stranger, a club leader, a relative, a child care provider, a date or a casual acquaintance. Even community leaders and people with strong moral and religious beliefs can be offenders. Although the majority of sexual offenders are around 18-30 years old, a growing number of teenagers are also committing sex crimes. Consequently, we must learn to recognize behavioral traits and verbal clues that alert us to the fact that this person could be sexually abusive to children.



Statistically, sex offenders will continue to repeat their behavior unless they are stopped. Most will not stop voluntarily but need legal pressure. Criminal justice system involvement makes it clear that their behavior is not socially acceptable and that they will have to pay the consequences. When confronted about their actions, most offenders will deny or rationalize it. After further questioning, they may state the following:

- *"It didn't hurt the child"*
- *"It was the child's fault"*
- *"She was teasing me/she seduced me"*
- *"It's my family, I can do what I want" (incest)*
- *"He/she made up the story to get attention"*
- *"I would have stopped if she/he would have asked me to"*
- *"It's no big deal; no reason to get upset"*
- *"I was drunk/on drugs. It won't happen again"*

Why does someone want to sexually abuse a child? Unfortunately, there are no easy answers. Perhaps offenders pick children because they are naïve, vulnerable and the crime is more likely to be kept a secret. Some are immature sexually and cannot form effective social/sexual relationships with adults. The following statistics give an overview of common characteristics shared by many child sexual offenders.

- 97-98% are male offenders, 2-3% female offenders.
- Nationally ⅓ of all sexual crimes involve the offender using alcohol. In Alaska, it is over half. Young children around heavy alcohol users are at risk.
- 80% of all sexual offenders were sexually abused as children.
  (Columbia University)
- Men who batter their wives will frequently sexually abuse their children as well.
- Many have a rigid and authoritarian background (i.e., military, religious or punitive family)
- Sex offenders will generally sexually abuse someone of their own race.

The offender who abuses within the family has some unique characteristics. Incest is one of the least discussed forms of sexual abuse of children.

Incest is defined as being sexual intercourse between parents and children, between siblings, between a child and her/his grandparents, uncles, aunts, nephews or nieces. There are many reasons why incest is a crime. First, incest generally occurs between an adult and a child—an unequal power relationship. Children are told to obey adults. They are perceived as having no rights because the adult is the authority. The children are exploited because they are unaware of their options and the consequences of the act. Second, the incest victim can be physically harmed because of the difference in the adult and child's genital size. Third, incest is not a normal, nurturing, healthy love between family members. Children grow up with a distorted view of relationships. Lastly, there is an increased probability of physical deformities in the offspring of a related mother and father.

Sometimes the "force" used by a sex offender is not obvious. It may take the form of subtle coercion, bribes and psychological manipulation. The following are some typical statements made to children so they will cooperate and be silent.

Threats/Coercion

- *"I'll go to jail if you tell anyone"*
- *"I won't like you anymore"*
- *"You'll split up the family if you tell" (i.e., mom on welfare, child to foster home, divorce)*
- *"You'll get in trouble if you don't do what I tell you"*
- *"No one will believe you if you tell"*

Bribes

- *"I'll give you some money"*
- *"I'll let you stay up late and watch TV"*
- *"Come see my puppies/kittles"*

Psychological Manipulation

- *"What's wrong? Don't you like me?" (or "trust me?" "Are you prejudiced?")*
- *"I'm doing this because I love you"*
- *"I don't want you to have to learn about sex on the streets"*
- *"People don't like girls like you" (makes her feel dirty, unpopular)*
- *"What we're doing is all right. Everyone does it"*
- *"We're special friends. This is our little secret"*

Many cases of sexual abuse involve a secret between the child and the offender. Victims are often told that the activity is "our little secret," that "special friends have secrets," or "this is only for us to know." Coercion, manipulation and trickery in this fashion contribute greatly to why many children remain silent about the abuse for a long period of time.

Children should be taught the difference between

secrets and surprises; surprises with adults are OK but secrets with adults are not OK. For one thing, surprises are always told or revealed at some point, often in conjunction with a specified event or holiday such as a birthday or Christmas. A surprise may be kept silent for a short time under these conditions. A secret, on the other hand, is information kept silent forever. **Children should never have secrets with adults,** whether it be a relative, acquaintance or stranger. It is not acceptable for a child to withhold information or knowledge about certain activities for an extended period of time. Children should always tell if an adult tries to keep a secret with them.

A teacher or parent should pay particular attention to an adult who refers to a child in sexual terms or is flirtatious toward the child. For instance, referring to a little girl as a "knock out," "a fox," or "a real man charmer" may be a clue that he is involved in more than just verbal comments. If nothing else, it may be confusing for the child to understand and respond.

How do you know what is healthy sexual curiosity between two children who are exploring each other's bodies (i.e., playing doctor)? A teacher or parent should be concerned by this behavior and intervene if any exploitation is occurring, such as:

- force, coercion or a bribe is involved
- one child is much older or physically larger and stronger
- one child is told not to tell or they will get in trouble, beaten up, etc.
- when one child has some sort of responsibility for the other child (i.e., babysitter) and there is a differentiation of power.
- the child initiating the behavior is a loner who has minimal social and verbal skills and tends to communicate in a sexual fashion

Talk to the child or to his/her parents about your observations. Emphasize that taking advantage of someone is wrong whether it is in sexual play or any other behavior. This situation should be discussed openly with the child so that a solution can be reached.

DEFINITIONS

Legal Terminology

Acquittal: A "not guilty" verdict at a trial.

Alcoholic: A person who is physically and psychologically addicted to alcohol.

Caseworker: A person from Division of Family and Youth Services who is assigned to work/investigate a case of child abuse. Also known as social worker.

Crime: Something that is against the law. Some crimes are more serious than others; for example, beating someone up is more serious than taking a pencil.

Crisis center: An organization available to assist people with emergency situations that are disruptive.

Defense attorney: The legal representative of a person accused of a crime.

Exposer: A person who displays his/her genitals in order to excite him or herself or another person. Also called a "flasher," "exhibitionist."

Grand jury: A closed hearing of citizens summoned by law, to inquire into whether there is enough evidence to hold a trial.

Inner voice: A person's common sense, judgement or conscience.

Molestation: The act of sexually annoying or touching someone sexually against their will.

Obscene phone call: A telephone call made to scare or upset the person that answers the phone.

Offender: A person who violates a rule, commits a crime, or causes displeasure or annoyance to another.

Preliminary hearing: The first step in the trial process whereby evidence is evaluated and determination is made as to whether or not a trial should be held.

Private parts of the body: Those parts of the body covered by underwear or a bathing suit. This includes the genitals and buttocks of both males and females and the breasts of females.

Prosecutor: The lawyer representing the State or Federal government (and indirectly, the victim).

Public parts of the body: Locations on a person's body that are not covered by underwear or a swimsuit, parts that are okay for other people to see. This includes the head, arms, legs, etc.

Rape: A general term meaning forced sexual intercourse against a person's will.

Secret: Information kept silent forever.

Sexual abuse: A general term which includes all sexual crimes.

Sexual assault: (see laws).

Surprise: Something that is kept silent for a short period of time under the conditions of being revealed in conjunction with an event (i.e., birthday, Christmas). A surprise is always told at some point.

Trial: A judicial examination of facts relating to a criminal or civil matter.

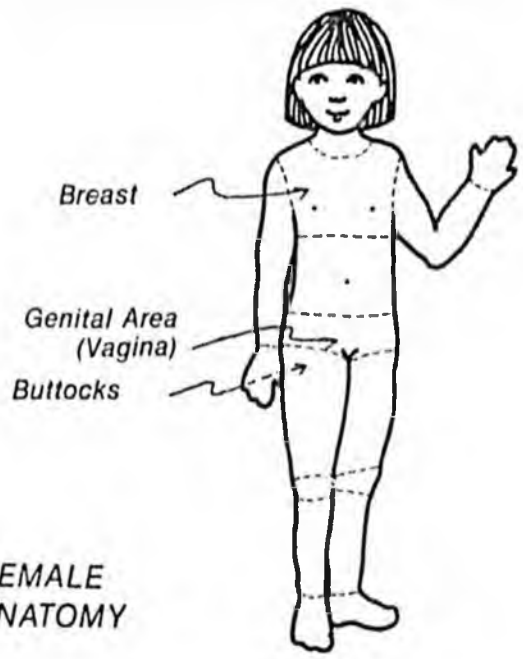
Victim: The person on the receiving end of a crime; a person selected or injured by the offender.

Witness: A person who testifies in court as to their knowledge of a criminal incident.

Medical Terminology (and Slang)

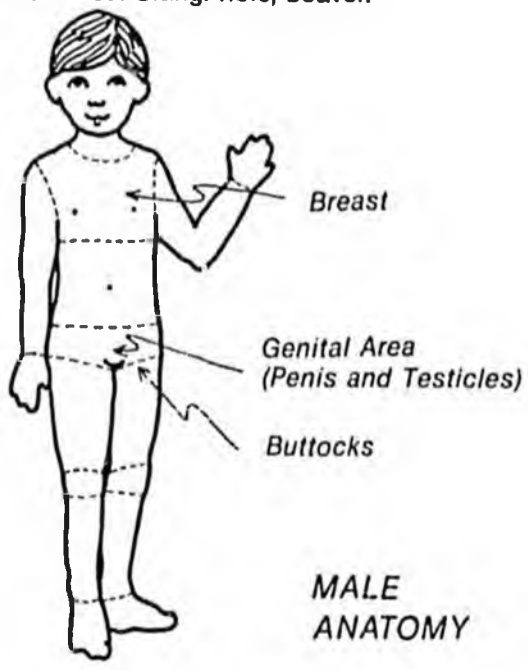
Anus: The opening in the buttocks from which a bowel movement comes. The posterior opening of the digestive tract. Slang: asshole.

Breast: Glands on the chest of a person, located between the neck and abdomen. Slang: boobs, tits.



Buttocks: The rear or posterior part of a person's anatomy. Slang: ass, butt, bottom.

Genitals: The reproductive organs (generally external) on a male or female.



Penis: The male sexual organ used in sexual intercourse and from which a male urinates. Slang: wienie, cock.

Testicles: The two male genital glands, located behind the penis, which secrete sperm. Slang: balls, nuts.

Vagina: An opening leading from the uterus to the vulva in a female's genital area. Slang: hole, beaver.

FEMALE ANATOMY

MALE ANATOMY

Defining OK and Not OK Touching

Different types of touching are rarely discussed, consequently children grow up receiving a combination of positive, negative and double messages about touching experiences. It can be confusing for young children who are spanked yet told not to hit their siblings, warned not to touch their genitals yet taken to the doctor who touches them there, and instructed always to be nice to Uncle Ernie even though they hate it when he secretly touches their bottom and kisses them too much.

A simple way to clarify these issues for children is to give examples of many types of touching. The "Touch Continuum" created by Cordelia Kent in 1978 in Hennepin County, Minneapolis, Minnesota, is a way to explain the concepts. The basic premise is that there are many forms of touching, some good and some bad. It is important to balance your examples with both. If children feel uncomfortable with any kind of touching, they should not be forced to participate. They have a right to say no because their body is their own.

Lack of Touch: Largely derived from the work of James Prescott, Ph.D. Studies indicate that children who did not receive physical affection during their formative years tended to exhibit violent behavior later in life (Body Pleasure and the Origins of Violence, *The Futurist*, April 1975).

OK Touching: Refers to positive expressions of nurturing, caring and giving through physical communication. Most often receivers of this kind of touching feel the act was a mutual sharing experience. They do not feel scared or like their personal space or body was violated. An example might be walking hand in hand home from school with a good friend or getting a big hug from Mom or Dad for a good grade or a spelling paper.

Confusing Touching: Encompasses much of the touching people experience. It is confusing when:

1. The receiver does not understand or misinterprets the intent of the giver.
2. Double messages are perceived between the verbal and physical communication.
3. The receiver is unfamiliar or not used to this type of touching.
4. The touching does not fit or is in conflict with the attitudes, values or morals of the giver and/or the receiver.

This might include a doctor or parent touching the child's genitals when putting on medicine, seeing naked people in a movie, or someone saying nice things while being physically forceful with a child.

1	2	3	4	5	6	7	8	9	10
Lack of Touch		OK Nurturing Touch		Confusing Touch		Not OK Exploitive Touch		Lack of Touch	

NOT OK TOUCHING: Refers to any manipulative, scary, uncomfortable, or forced touching. This includes touching the private parts of the body. One of the most extreme examples of exploitive touch is sexual assault. Another is the use of children for prostitution or pornographic purposes.

Laws in Alaska

The sexual assault laws of Alaska were reformed in October 1983 to make it easier to prosecute offenders. Sexual assaults that might not have been covered in the past are now clearly illegal. Prosecution and conviction are also more likely because details of the victim's past usually cannot be brought up in court.

In general, any forced sexual contact is against the law and sexual contact with a child by an older person is also illegal.

SEXUAL ASSAULT

There are two degrees of sexual assault depending upon the type of conduct prohibited.

SEXUAL ASSAULT IN THE FIRST DEGREE is the most serious and can be committed in one of two ways:

1. By engaging in sexual penetration* without consent** of the victim--commonly referred to as rape;
2. By attempting to engage in sexual penetration without consent of the victim and causing serious physical injury.

SEXUAL ASSAULT IN THE SECOND DEGREE:

1. Sexual contact*** without consent.
2. Sexual penetration by the defendant with a person he knows is mentally incompetent or is incapacitated.

SEXUAL ABUSE OF A MINOR. There are four degrees of sexual abuse of a minor depending on the type of conduct prohibited.

SEXUAL ABUSE OF A MINOR IN THE FIPST DEGREE is the most serious and can be committed in one of two ways:

1. When a person who is 16 years of age or older engages in sexual penetration with someone under 13 years of age.
2. When a person 18 years of age or older engages in sexual penetration with a son or daughter who is under 18 years of age or someone under 18 years of age who is entrusted to the offender's care by authority of law .

SEXUAL ABUSE OF A MINOR IN THE SECOND DEGREE:

1. When a person who is 16 or older engages in sexual penetration with a person who is 13, 14, or 15 is at least 3 years younger than the defendant;
2. Sexual contact between a person 16 or older and a person under 13 or induces a person under 13 years of age to engage in sexual contact with another.
3. Sexual contact** between a person 18 or older and a son or daughter under 18 or a person who has been entrusted to the offender's care by authority of law.
4. A person 16 or older aids, induces or causes a person under 16 to engage in prohibited sexual acts in sex exploitation media.

SEXUAL ABUSE OF A MINOR IN THE THIRD DEGREE: Sexual contact between a defendant 16 or older and a victim 13, 14, or 15 who is at least 3 years younger than defendant.

SEXUAL ABUSE OF A MINOR IN THE FOURTH DEGREE: Sexual penetration or contact between defendant under 16 and victim under 13 who is at least 3 years younger than defendant.

INCEST. A person commits incest if, being 18 or older, the person engages in sexual penetration with a person who is related.

UNLAWFUL EXPLOITATION OF A MINOR. Exploitation includes using a child under 18 as the subject of pornographic material.

INDECENT EXPOSURE. Can be committed in one of two ways. The first type is the more serious crime:
1. Indecent exposure**** before a victim under 16;
2. Indecent exposure before an adult.

DISORDERLY CONDUCT. One of the many ways to commit the crime of disorderly conduct is in the intentional exposing of one's buttocks or anus with reckless disregard for the offensive effect that act has on others.

The Mandatory Child Abuse Reporting Law

Sec. 47.17.010. **Purpose.** In order to protect children whose health and well-being may be adversely affected through the infliction, by other than accidental means, of harm through physical abuse or neglect or sexual abuse or sexual exploitation, the legislature requires the reporting of these cases by practitioners of the healing arts and others to the appropriate public authorities. It is the intent of the legislature that, as a result of these reports, protective services will be made available in an effort to prevent further harm to the child, to safeguard and enhance the general well-being of the children of this state, and to preserve family life whenever possible. (§ 1 ch 100 SLA 1971; am § 3 ch 104 SLA 1982).

Sec. 47.17.020. **Persons required to report.** (a) The following persons who, in the performance of their professional duties, have cause to believe that a child has suffered harm as a result of abuse or neglect shall immediately report the harm to the nearest office of the department:

(1) practitioners of the healing arts;

(2) school teachers and school administrative staff members

(3) social workers;

(4) peace officers, and officers of the division of corrections;

(5) administrative officers of institutions;

(6) licensed day care providers and paid staff;

(7) licensed foster care providers.

*"Sexual penetration" means genital intercourse, oral-genital contact, anal intercourse or an intrusion, however slight, of any object into the genital or anal opening of another person.

**"Without consent" means that a person with or without resisting is coerced by the use of force or threat of death, injury or kidnapping.

***"Sexual contact" means the intentional touching of the genitals, anus or female breast either directly or through clothing or the defendants causing the victim to touch the defendant's genitals, anus or female breast.

****"Indecent exposure" means the intentional exposure of defendant's genitals to the victim with reckless disregard for offensive frightening effect on the victim.

(b) This section does not prohibit the named persons from reporting cases which have come to their attention in their nonprofessional capacities nor does it prohibit any other person from reporting a child's harm which he has cause to believe is a result of abuse or neglect. These reports shall be made to the nearest office of the department.

(c) If the person making the report of harm under this section cannot reasonably contact the nearest office of the department, and immediate action is necessary for the well-being of the child, the person shall make the report to a peace officer. The peace officer shall take immediate action to protect the child and shall, at the earliest opportunity, notify the nearest office of the department. (§ 1 ch 100 SLA 1971; am §§ 4, 5 ch 104 SLA 1982).

Sec. 47.17.068. **Penalty for failure to report.** A person required to file a report of abuse or neglect under AS 47.17.020 who willfully or knowingly fails or refuses to report the harm required under AS 47.17.020 is guilty of a class B misdemeanor. (§ ch 104 SLA 1982).

Sec. 47.17.070. **Definitions.** As AS 47.17.010-47.17.070.

(1) "child abuse or neglect" means the physical injury or neglect, sexual abuse, sexual exploitation, or maltreatment of a child under the age of 18 by a person who is responsible for the child's welfare under circumstances which indicate that the child's health or welfare is harmed or threatened thereby;

(2) "child" means a person under 18 years of age;

(3) "department" means the Department of Health and Social Services;

(4) "institution" means a private or public hospital or other facility providing medical diagnosis, treatment, or care;

(5) "neglect" means the failure to provide necessary food, care, clothing, shelter, or medical attention for a child;

(6) "practitioners of the healing arts" includes chiropractors, dentists, health aides, nurses, optometrists, osteopaths, physical therapists, physicians, psychiatrists, psychologists, religious healing practitioners, and surgeons;

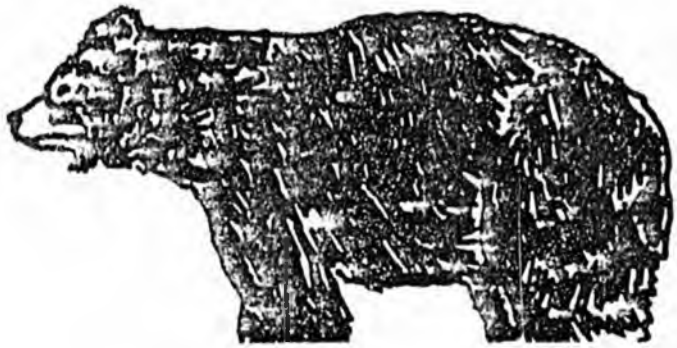
(7) "sexual exploitation" means

(A) permission or encouragement to a child for prostitution prohibited by AS 11.66.100-11.66.150 by a person responsible for the child's welfare;

(B) permission, encouragement, or activity involved in the unlawful exploitation of a minor prohibited by AS 11.41.455 by a person responsible for the minor's welfare. (§ 1 ch 100 SLA 1971; am § 6 ch 104 SLA 1971; am § 3 ch 222 SLA 1976; am §§ 56, 57 ch 94 SLA 1980; am §§ 8, 9 ch 104 SLA 1982)

5

LESSON PLANS FOR K-6 GRADES



Exactly how you teach your students depends upon the children's ages, language level, maturity, community resources, the school structure and support of parents. *However, the goal is the same in each case: to provide children with enough information to recognize dangerous situations and to develop their response skills if confronted with sexual abuse.* No matter what their age, children are vulnerable and should receive as complete information as they can comprehend.

Many teachers ask, "Isn't kindergarten or first grade too young to begin talking about sexual abuse?" The answer is no. Sexual offenders often do not discriminate by age when selecting their victims and may molest a child as young as a few months old. Sexual abuse is the only safety issue in which society feels the less information a child receives, the better. No one would use that way of thinking with fire safety, water safety, or learning to cross the street!

With very young children, you may not want to use the words "rape" or "sexual abuse," unless a child brings them up. Do not be evasive or misleading, but rather spend your time on simpler concepts that are less confusing. For instance, with poison prevention you may tell a young child "Do not open or go near the cabinet under the kitchen sink." As the child gets older and develops better judgment, you might say "If you are getting something from under the kitchen sink, do not touch bottles marked poison. They are dangerous and would make you sick." As the child gains more knowledge, independence, and is a better decision-maker, you gradually increase the amount of information. Likewise, sexual abuse prevention should be handled in stages.

If young people live or camp near bears, they are taught about the dangers of bears. They learn what bears look like, how they act, the sounds they make, and how to respond if they run into bears. Traditional warnings about sexual abuse were never as specific as these safety tips. In fact, they were so vague that many times children had no idea what was being discussed. You have an opportunity to change that. The more a child knows, the less frightened he or she will be, and the better prepared to prevent abuse.

For young children, defining sexual abuse in terms of touching is a good starting place. Later, add the idea that the touching may be sexual. This transition can be made successfully when you discuss public and private parts of the body, outlined in this chapter. The more specific the information, the less confusing it will be for the child. Reinforce the idea that "my body is my own."

Throughout the week, you may want to read to the class simple examples of inappropriate touching and specific responses. Children need information on what the offender might do so they will know when and how to react. Later in the week, students will have an opportunity to practice saying no and other assertive responses. This will give them some examples to think about prior to that exercise. Examples clarify the touching problem for children while minimizing their fear of how to respond.

The following are some examples you might use:

If someone pats or rubs you on the bottom, you can tell them to stop

If someone puts their hands down your pants, tell them "no" and run away

If someone older than you wants to touch your penis, tell them "no" and leave

If a friend of the family wants you to sit on his lap and you do not like it, tell him "no, thank you"

If someone touches or hugs you a lot and it makes you feel funny or uncomfortable, tell them you do not like to be touched that way

If a relative kisses you too much, wave hello/goodbye or shake their hand

If someone asks you to touch him under his clothing, tell him, "no, I don't do that."

If someone grabs you, scream, "No, let go!" and run away

If a person you know asks you to undress in front of him or her, tell them, "No, it's against our family's rules"

If a person touches you by accident and you do not like it, it is still okay to object

If a friendly person offers you a gift if you will get in his car, you can just turn and go the other way

The list of examples goes on and on. Feel free to add situations that are relevant to your school or to an incident that has happened in your community. Reinforce to children that there are many ways to say no, verbally and non-verbally:

Verbally

- *"No"*
- *"No, thank you"*
- *"It's against my family's rules"*
- *"My mom (father, teacher, etc) told me not to"*
- *"Stop"*
- *"Don't bother me"*
- *"I don't like to be touched that way"*
- *"I don't want to"*
- *"Leave me alone"*
- *"That's not okay to do"*
- *"I'm going to tell my father (or other adult)"*

Non-verbally

- Remove the offender's hand
- Ignore the person and leave
- Run away from the person

TELL CHILDREN: YOUR BODY IS YOUR OWN. YOU HAVE A RIGHT NOT TO BE TOUCHED BY ANYONE UNLESS YOU WANT TO BE.

Outline of K-6 Grade Lesson Plans

Day One

Pre-Test

A. Teacher lecture - Introduction (K-6)
B. Video scene #1:"The Ride" (K-6)
C. Video program discussion questions (K-6)
D. "Color the Car" exercise (K-4)
E. "Identifying People" exercise (K-6)
F. "No and Go" exercise (K-6)
* If time, teacher lecture - "Safety Outdoors," Chapter 7

Preparation check list:
Order video projector ☐
Make copies of games, handouts ☐
Re-read pages ☐

Day Two

A. Teacher lecture "OK and Not OK Touching" (K-6)
B. Video scene #2: "The Tickle" (K-6)
C. Video program discussion questions (K-6)
D. "Anatomically Correct Dolls" exercise (K-6)
E. "This Is Me. I am a Girl," "This is Me. I am a Boy" exercise (K-6)
F. "Answering the Telephone" exercise (K-6)
* If time, teacher lecture, "Safety Indoors," Chapter 7

Preparation checklist:
Order video projector ☐
Make copies of games, handouts ☐
Order dolls ☐
Bring telephone ☐
Re-read pages ☐

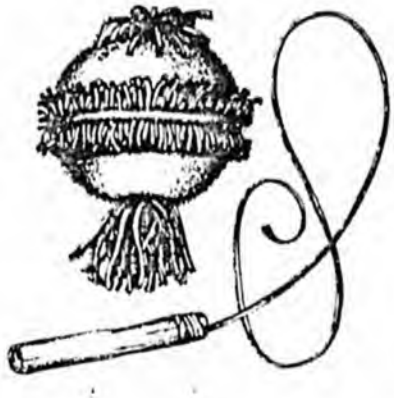
Day Three

A. Video scene #3: "Our Little Secret" (K-6)
B. Video program discussion questions (K-6)
C. "Secret or Surprise" maze game and discussion (3-6)
D. "Say No Bingo" exercise (3-6)
E. "Suppose" game with puppets (K-6)

Preparation checklist:
Order video projector ☐
Make copies of games, handouts ☐
Order or make puppets ☐
Re-read pages ☐

Day Four

A. Video scene #4: "The Bribe" (K-6)
B. Video program discussion questions (K-6)
C. "Crossword Puzzle" (4-7)
D. "Being Forced" definition exercise (4-7)
E. Theme song "It's OK to Say No" (K-6)
F. "Connect the Dots" exercise (K-3)



Preparation checklist:
Order video projector ☐
Make copies of games, handouts ☐
Contact music teacher or get piano ☐
Re-read pages ☐

Day Five

A. Teacher lecture/class discussion - Review of week
B. Movie "Who Do You Tell?" (K-6)
C. Speaker or field trip - Police or social service (K-6)
D. "Storytelling" (K-6)

Preparation checklist:
Order video projector ☐
Order 16mm projector ☐
Coordinate speaker/trip ☐
Make copies of post-test ☐

Post-Test

K-6 Lesson Plans

The following is a sample lesson plan for K-6 grades on the prevention of child sexual abuse. It is designed as a five day unit. This is the minimum amount of time suggested in order for students to begin to comprehend and practice the prevention concepts. Therefore, you are encouraged to extend the unit if possible and to repeat portions throughout the school year. Personal safety is not a one-time thing. It is very important to review.

Pre and Post Test

For grades K-3, read the following questions out loud. 4-6 grade students can take the test on their own. Place an "X" in the correct box that corresponds with either true or false.

		TRUE	FALSE
1.	If a stranger (someone you do not know) is at your door wanting to come inside, you should not let him in.	☐	☐
2.	If a grown-up person puts his hand down your pants, you should tell him, "No!" and leave.	☐	☐
3.	You should do everything a babysitter tells you to do like undressing in front of him/her or breaking house rules.	☐	☐
4.	Your body is your own and you have a right not to be touched if you do not want to be.	☐	☐
5.	It is okay to hitchhike or take rides from friendly looking people.	☐	☐
6.	Hang up on obscene and threatening (scary) phone calls	☐	☐
7.	Private parts of the body are covered by your underwear or a swimsuit.	☐	☐
8.	If a relative or family member touches you and you don't like it, you should tell him or her to stop and tell an adult.	☐	☐
9.	If an adult wants to have a secret with you, it is OK.	☐	☐
10.	If you have a problem or question about someone touching you, tell your teacher, mom, dad, relative, principal, nurse, doctor, counselor, minister, police or crisis center worker.	☐	☐
11.	Safety means using your head, your common sense and listening to your "inner voice."	☐	☐
12.	If a friend had a touching problem, you should not help your friend.	☐	☐
13.	If someone you know makes you touch him in a private part of his body, you should say, "No," and tell an adult.	☐	☐
14.	It is not your fault if someone touches you and you do not want them to.	☐	☐
15.	If a person gives you a gift (like candy, money) or lets you do something special (like watch TV), you have to do everthing they tell you to do.	☐	☐
16.	If you get a "funny" or "icky" feeling about someone, it is OK to leave.	☐	☐
17.	Drinking a lot of alcohol makes people act different.	☐	☐
18.	Always check to see who is at your door before opening it.	☐	☐
19.	If you tell an adult about a touching problem and they do not believe you, you should not tell anyone else about the problem.	☐	☐
20.	Know your route to and from school. Know where to run if you need help.	☐	☐

Day One

Goal: To gain a basic understanding of sexual abuse and touching problems with strangers.

Activity: (K-6) Introduction (15 minutes)

Important points for class discussion:

1. Define personal safety
   - Personal safety is important, it includes water safety, fire prevention and what to do if you have a touching problem. This unit will talk about touching problems.
   - Although most people you'll meet are good people who would not bother you, there are always a few who might.
   - Recognize sexual abuse could happen to you or someone you know.
2. Overview of the offender
   - The person bothering you could be a stranger, someone you know or have seen before or someone in your family. It could be a neighbor, babysitter, uncle/aunt, grandfather, teacher or coach.
   - No matter who the offender is, your body is your own and you have a right to say, "Stop," if someone is bothering you or touching you in a way you do not like.
3. What to do

   There are 3 steps to remember.

   1. Say "no."
   2. Run away from that person.
   3. Tell an adult what happened (if they don't believe you, tell another adult, until someone does believe you).

Objective #1: Students will demonstrate their understanding of their right to say no by appropriate responses to discussion questions.

Objective #2: Students will demonstrate how and when to trust their inner voice by sharing appropriate responses to discussion questions.

Objective #3: Students will be able to recognize potentially dangerous situations involving strangers and share appropriate responses to discussion questions.

Activity: (K-6) Scene 1 "The Ride" (5 minutes). Video Discussion Questions (15 mintues).

Scene #1, "The Ride"

1. You have a right to say NO if someone tries to get you to do something you know isn't OK. When did Kyle say no?
2. In this scene, what did Kyle's inner voice tell him?
3. What is another name for the inner voice (i.e., intuition, gut feeling, conscience, common sense, guardian angel, etc.)? When have you used your inner voice ?
4. Who could you tell if something like this happened to you? (List support people on board: teacher, mother, father, nurse, doctor, police officer, counselor, principal, etc.)
5. What would you say? What would you do if the person you told (even your parents) didn't believe you?
6. Why is it important to tell? (i.e., so it won't happen again, offender needs help)
7. Who is to blame? Whose fault is it? (Not the child, even if the child was in a place he/she should not have been.)
8. Can you tell a good stranger from a bad stranger?
9. What should you do if a stranger offers you a ride, money, food, or a gift?
10. If the people had gotten out of the car and tried to grab you, what would you do? (Grades 5-6)
11. What might have happened if Kyle had gotten in the car? (5-6)

Activity: (K-3) Have students stand up, stretch and say, "My Body Belongs to Me."

Objective #4: Students will be able to recognize and describe vehicles by correctly completing the "Color the Car" exercise (Grades K-4) or by describing their own vehicle—3 wheeler, snowmobile, boat, plane, car, truck. (Grades 5-6)

Activity: (K-4) Color the Car (15 minutes)

Objective #5: Students will be able to describe people by naming at least 3 characteristics (K-3) or 6 characteristics (4-6) in the "Identifying People" game.

Activity: (K-6) Identifying People (10 minutes)

Have a person come into the classroom during class to give you an item (i.e., book, papers, apple, etc.) and then leave. After he or she has left, have the students either discuss or write down the following descriptive information about that person: male/female, age, race, height (hint: one way to judge height is to compare that person with yourself or a stationary object), weight, clothes, hair color, eye color, glasses or distinctive facial features, scars, tattoos, direction of travel, statements made by the person. End the exercise with a discussion on the importance of being alert and observant. Repeat this exercise 2-3 times throughout the week so that students can practice and assess their awareness.

Objective #6: Students will demonstrate their understanding of how to get help by listing at least 5 (K-3) or 10 (4-6) people and places in the "No and Go" game.

Activity: (K-6) "No and Go" Exercise (15 minutes or take home)

"No and Go" Game

This game is designed to teach children where they can go for help. Have the students take a piece of paper and draw a line down the middle, creating two columns. Their assignment is to make two lists on the way home from school or while walking somewhere else that day (such as to a friend's house). The first column is for "places." List all the places a child could go for help if he or she needed assistance. For example, store, church, school, restaurant, hospital, police station, block home if applicable in your area, etc.

The second column is for "people." Make a list of all the adults a child could talk to if he or she had a problem or needed help. These people are referred to as the child's support system. This might include teacher, counselor, parent, neighbor, nurse, doctor, minister, fire fighter, aunt, uncle, grandparents, police officer.

After students have completed their lists, practice the verbal skills needed to tell someone about a touching problem. For instance, what would you say to:

1. The offender who was bothering you?
2. An adult?
3. An "unbelieving" adult?
4. A friend who has a touching problem?

If you have extra time today, teach "General Outdoor Safety," Chapter 7.

Day Two

Goal: To gain a basic understanding of touching problems with adults the child knows.

Objective #1: Students will be able to state two types of OK and two types of NOT OK touching.

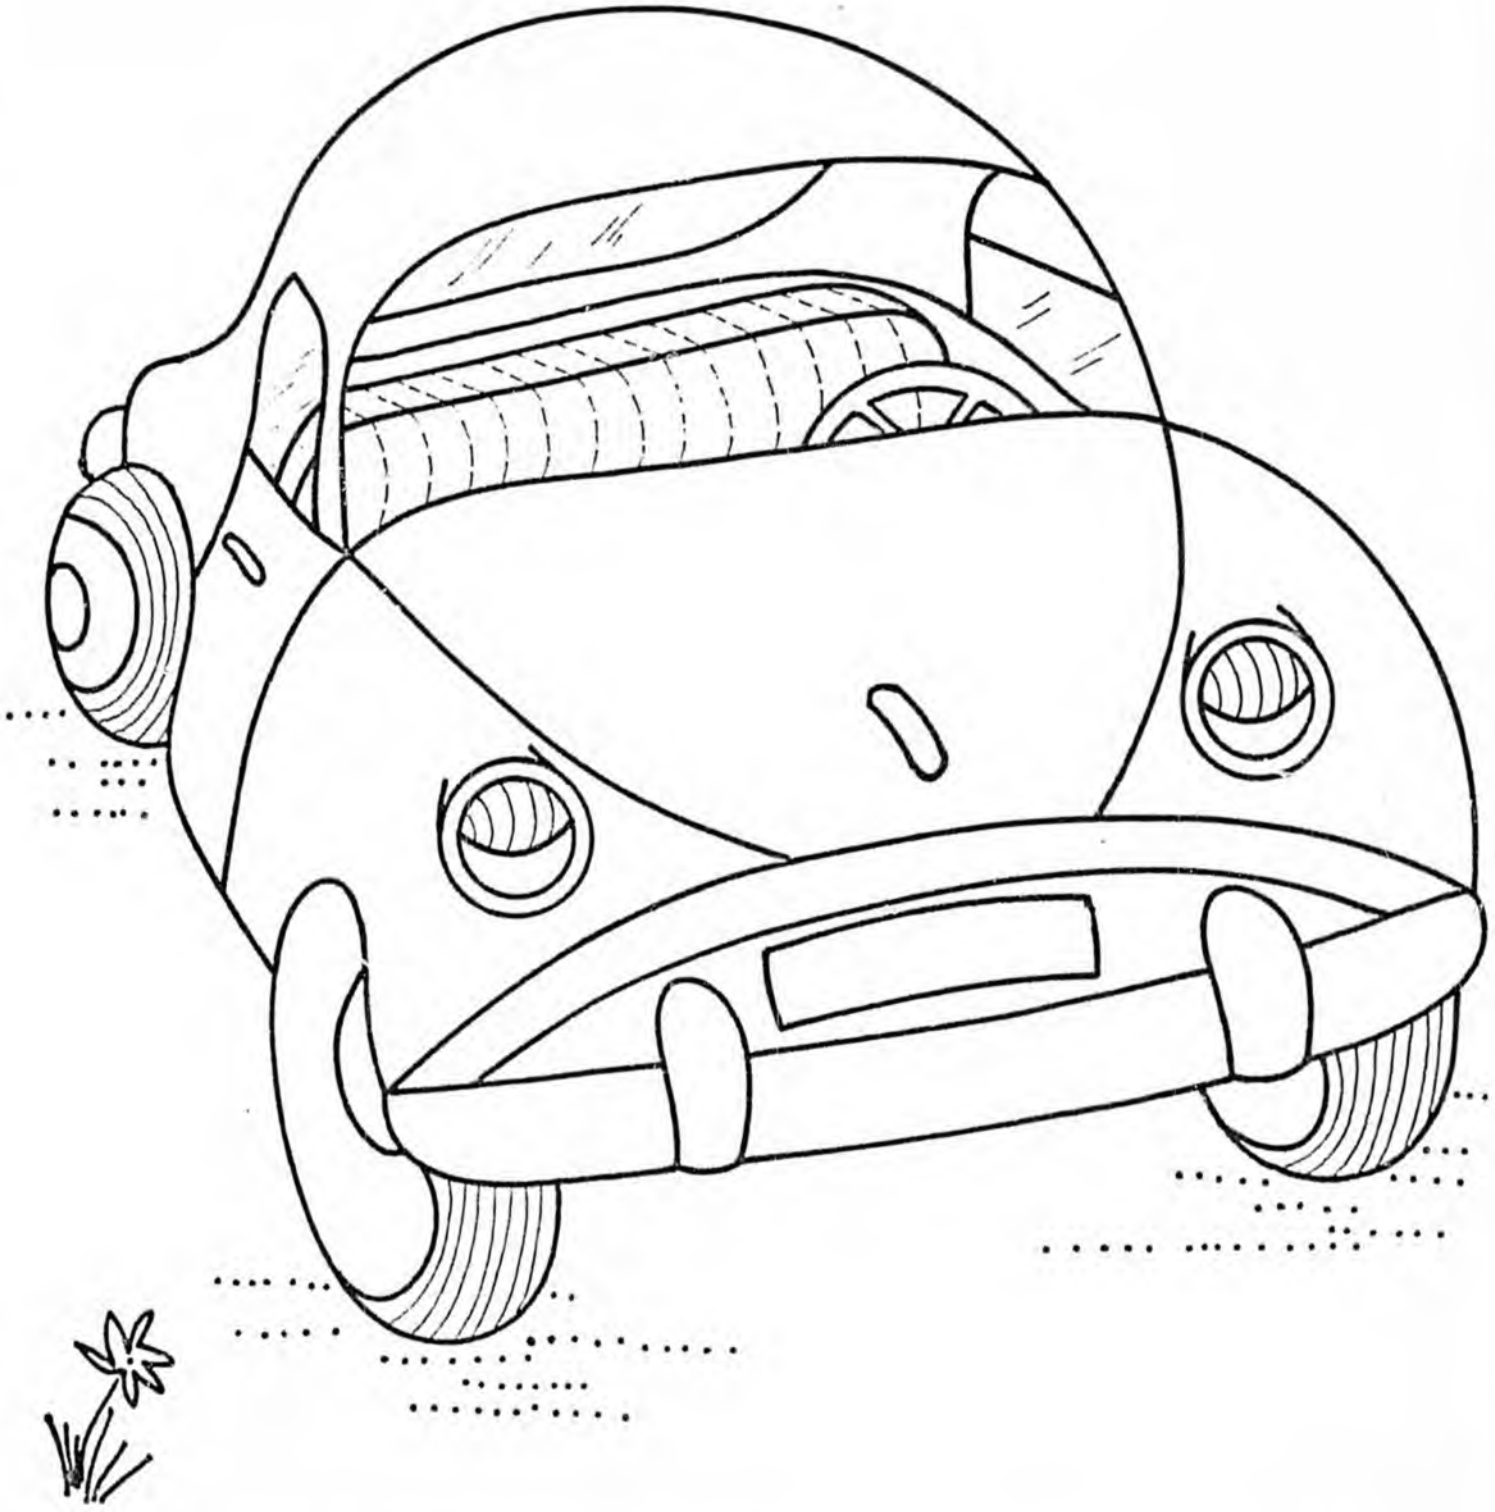
Activity: Teacher Lecture and Discussion on Types of Touching (see page xx in Chapter 4.)

Objective #2: Students will demonstrate an understanding that their bodies are their own, and they have a right to say no, through appropriate responses during class discussion.

Objective #3: Students will be able to list at least 3 people they could tell about a touching problem and describe how they would tell them during class discussion.

COLOR ME. . .

Just Like Your Car at Home or a Car You Like



COLOR OF CAR _____

MAKE/TYPE _____

YEAR _____

LICENSE NUMBER _____

COLOR OF LICENSE PLATE _____

Objective #4: Students will be able to state at least 1 way (K-3) or 2 ways (4-6) to help a friend or relative who has a touching problem.

Objective #5: Students will be able to know how and when to listen to their inner voice by sharing appropriate responses during class discussion.

Activity: (K-6) Scene 2 "The Tickle" (5 minutes) Video Discussion Questions (15 minutes)

Scene #2, "The Tickle"

1. Was it OK for George to touch Lita when she didn't want him to? Why or why not?
2. Should Lita tell her parents what happened even though George said, "Do not tell?" Whom else might she tell?
3. If your brother, sister, or friend was being touched like this and they did not like it, what would you do?
4. Should you do everything an adult or older person tells you to do?
5. What do you do if your inner voice tells you one thing and an adult tells you something else?
6. What would you have done if George had gotten real mad or violent? (Grades 4-6)

Objective #6: Students will demonstrate the ability to discriminate between OK, Not OK and confusing touching through sharing appropriate responses in discussion of the dolls.

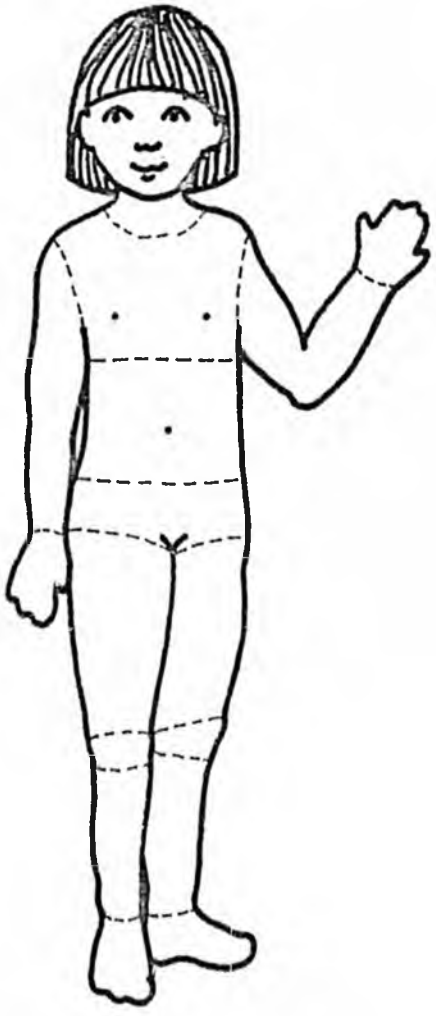
Objective #7: Students will demonstrate their ability to distinguish between public and private parts of the body by correctly coloring the body parts in the exercise and during discussion of the dolls.

Activity: (K-6) Anatomically Correct Dolls (20 minutes)

This exercise gives children an opportunity to clearly understand what parts of the body are public and what parts are private. This is a helpful concept in determining appropriate and inappropriate touching. The rag dolls are replicas of the human body and may be used with or without swimsuits. By using a neutral object, like the dolls, the teacher can point to the doll's body rather than to the child's or his or her own body. It is less embarrassing and more academic. Children do not have to guess or be confused by new terms and concepts.

When you first bring out the dolls, the children may giggle or laugh. That's OK. It is usually only shortlived. This is an opportunity for them to release their inhibitions about discussing the topic and to "test" you. The teacher's reaction at this point is important. Just smile and continue on in a low-key, matter-of-fact tone. If you do not let it bother you, the children will treat it seriously too.

Start by saying, these are your special dolls. They are special because they help you in talking to people about public and private parts of the body. These dolls have all the correct body parts: parts for boys (hold up the boy doll) and parts for girls (hold up the girl doll).



Next define public and private parts. Public means the parts of the body that are OK for the public and other people to see. This includes such parts as the head (point to the doll's head), arm, knee, toe, etc. Private means parts of the body that you keep covered by underwear or a swimsuit. This includes the genital area (point to the genitals on boy and/or girl doll), the buttocks (point to the rear of boy and/or girl doll), and the breast area of girls (point to the girl doll's breasts). Keep the tone of your voice the same whether you are saying the word knee or saying the word buttocks.

Hold up the dolls and ask the students to identify whether a part is public or private. This exercise can be done in a class discussion or you can have the children write their answers on a piece of paper. For example, "Is a leg a public or private part of the body?", "Is the ear a public or private part of the body?", "Is the penis a public or private part of the body?" With each question, hold up the dolls and point to the part to which you are referring. Always use the correct name for the body part rather than a cute or slang word. Learn the correct words yourself before you try and teach them to the children (see Chapter 4).

After the students recognize the difference between the public and private parts, incorporate the idea of assertiveness or saying no. "If someone touched you here, Susie, what would you do (pointing to the girl doll's genital area)?" Susie's response should be something similar to: "That's a private part of my body. I would tell them to stop and then run away. Then I'd tell my mom."

Be sure to balance your examples of Not OK touching (scary, bad, icky, inappropriate, funny) touching with OK

THIS IS ME. I AM A GIRL.

PARTS OF MY BODY

Breast
Foot
Arm
Genital Area (Vagina)
Leg
Head
Buttocks
Hand
Neck
Knee
Stomach

DRAW A LINE TO THE CORRECT BOX.

Breast
Neck
Buttocks
Leg
Knee
Stomach

DRAW A LINE TO THE CORRECT BOX.

Private Parts

(Color box red.)

Public Parts

(Color box green.)

COLOR THE PRIVATE PARTS OF MY BODY RED
AND THE PUBLIC PARTS OF MY BODY GREEN.

touching (good, consentual, caring). It would be a sad state of affairs if children grew up afraid to touch. Parents fear that this might happen as well. That is why it is important to give examples of the difference between nurturing touching all the way to confusing and exploitive touching. Good touching could include walking hand-in-hand with your best friend, getting a big hug from mom or dad when you leave for school, or a pat on the back from your teacher.

Next talk about confusing touching where children get double messages and are unsure if it is OK or Not OK to touch. Explain to the children that at some time they might hurt or be sore in a private part of their body. In that case, Mom or Dad or the doctor might put medicine on it to make it feel better or look at it to determine what is wrong. Young children may also need help washing themselves in the bathtub. In any of these potentially confusing touch situations, children always have a right to say "Thank you, but I want to do it myself." If the child is still confused or feeling uncomfortable, the child should tell an adult.

Not OK touching often means the child's intuition (inner voice) is telling him or her that something is not quite right. Examples: (1) Someone rubbing the inside of their leg (not a "private" part, but it still feels funny) or (2) someone putting his or her hand down the child's pants (a private part). Act out these little scenarios using the dolls to clearly show the touching. Continue to remind the child that their body is their own, and they have a right to tell another person to stop touching them. Children will feel they have control over their lives and their own bodies.

Anatomically correct dolls not only give children the picture, they clarify the touching concepts. The dolls can be purchased ready-made or you can buy a pattern and make your own. See the resource list in the back of the teacher guide.

"THIS IS ME. I AM A GIRL." exercise (10 minutes)
"THIS IS ME. I AM A BOY." exercise (10 minutes)

Objective #8: Students will demonstrate their knowledge of telephone safety habits by correctly answering the play telephone 2 out of 3 times.

Using the Telephone-Discussion

1. Only answer the telephone if your mother or father has said it is all right.

2. Do not answer with your name (i.e."Potter residence, Susie speaking"). A simple "hello" is best.

3. Hang up immediately on obscene, dirty, frightening, or scary phone calls. Do not say anything to the person on the phone. Tell an adult immediately. If no adults are nearby, call the police or the telephone company.

4. Do not give out any information over the phone unless you know who the caller is, and your mom or dad has said it is all right. This includes your name, where you live or go to school, what clothes you are wearing, describing your body or physical features or whether you are home alone. If someone asks if your mother or father are at home and they are not, another option is to say, "He/she can't come to the phone right now. Can I take a message?" or, "They're busy." This is not forcing the child to lie by saying, "My Dad's in the shower right now," or "My Mom's asleep." Both statements are too typical and unbelievable.

5. Know how to use the telephone in case of an emergency. Have emergency numbers (police, fire, doctor) written down or nearby the phone permanently. If you can't remember or find the numbers, you can always dial "0" for operator. The operator will help you.

Activity: (K-6) "Answering the Telephone" Exercise (15 minutes)

"Answering the Telephone" Exercise

Borrow a telephone from the phone company, use a play telephone, or unplug an extension phone from home and bring it to school. Children can practice answering the telephone and telephone etiquette. Have a student make a "ring-a-ling-a-ling" sound or get a bicycle bell to simulate the phone ringing. Then have the caller (the teacher) make statements such as the ones listed below. It is also helpful to give examples of appropriate responses. The object is for the child receiving the call to handle it properly without giving out personal information. For example:

CALLER: "HI there. Is your mom home? How about your dad? Are you alone?"
CALLER: "Hello. I'm doing a survey for Acme Polls and need to know a few things about you and your family. Are you the babysitter? Where do you live?"
CALLER: "Good afternoon. My, you sound awfully young. How old are you? What's your name?"

CALLER: "Hello. Is this Tony? Oh, it's not? I must be getting you mixed up with the Moore family. Well, who is this then?"
CALLER: "Hi. This is Jerry Smith. I'm a friend of your dad's. He asked me to check up on you. You know, to see how you are doing. What are you wearing? Tell me about yourself. What do you look like?"

A variation to this exercise, "Answering the Door," or "Using the CB or Shortwave Radio,"can be structured in the same fashion with a make-believe door perpendicular to the class or an old radio/box.

If time, teacher lecture on General Safety Indoors, Chapter 7.

Day Three

Goal: To gain a basic understanding of touching problems with adults the child knows very well.

Objective #1: Students will state during class discussion that it is the offender's, not the victim's, fault if sexual abuse occurs.

Objective #2: Students will demonstrate that it is important to trust one's own feelings ("inner voice") by appropriate responses during class discussion.

Objective #3: Students will demonstrate during class discussion that it is not OK to have secrets with adults.

Objective #4: Students will demonstrate during class discussion that they have a right to say no if an adult tells them to do something they think is wrong.

Objective #5: Students will be able to recognize potentially dangerous situations involving someone they know.

Activity: (K-6) Scene 3, "Our Little Secret" (5 minutes)
Video Discussion Questions (15 minutes)

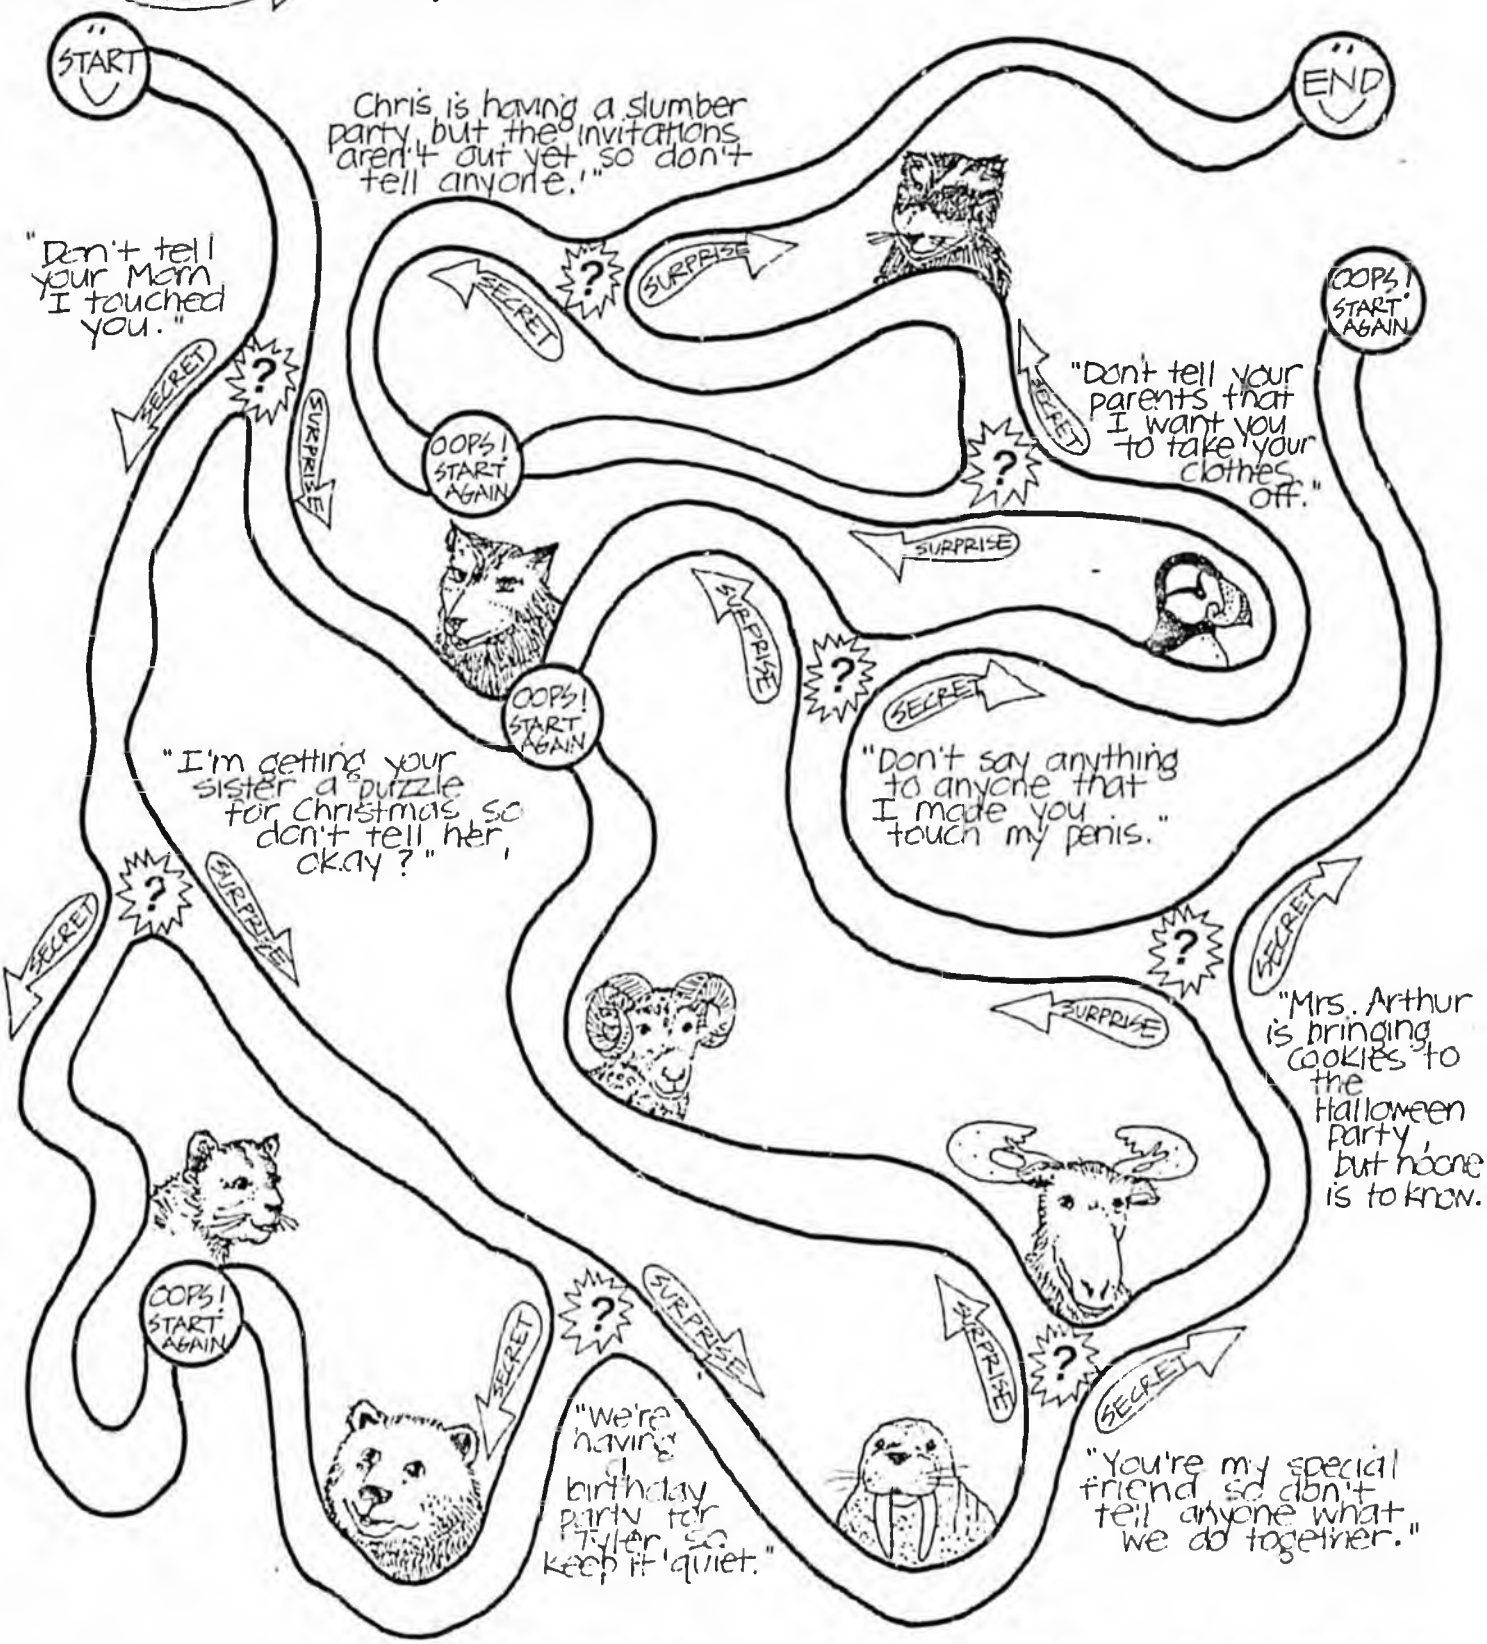
Scene #3, "Our Little Secret"

1. What did the man do that Jennifer didn't like?
2. (4-6) Whose fault is it that this situation happened? Jennifer's? The man's? Why? (K-3) What did the man do that was wrong?
3. Jennifer's inner voice told her something was wrong. Do you have a right to say "no," even if the person bothering you is an adult friend or relative?
4. Jennifer told her Mom and her Mom didn't believe her, so she told another adult. Who else would you tell?

Objective #6: Students will have the ability to discriminate between secrets and surprises by completing the maze exercise.

Activity: (3-6) "Secret or Surprise" Maze Game (20 minutes)

What is a Secret? (Discussion 10 minutes, game 10 minutes)



Many cases of sexual abuse involve a secret between the child and the offender. Victims are often told that the activity is "our little secret," that "special friends have secrets," or "this is only for us to know." Coercion, manipulation and trickery in this fashion contribute greatly to why many children remain silent about the abuse for a long period of time.

Children should be taught the difference between secrets and surprises; surprises are all right, but secrets are not. For one thing, surprises are always told or revealed at some point, often in conjunction with a specified event such as a birthday or holiday. A surprise may be kept silent for a short time under these conditions. A secret, on the other hand, is information kept silent forever. Children should never have secrets with adults, whether it be a relative, acquaintance or stranger. It is not acceptable for a child to withhold information or knowledge about certain activities for an extended period of time.

The "Secret or Surprise Maze" game is designed for children in grades 3-6. The objective is to recognize when an

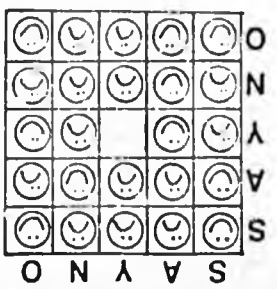
SECRETS or SURPRISES MAZE

Follow the trail until you come to a "statement" made by an adult. ? Decide whether the statement is a surprise or a secret. If it is a secret follow the trail marked SECRET ; if it is a surprise follow the trail marked SURPRISE . See if you can reach the END of the trail.

REMEMBER ☆☆☆ *A surprise is okay for Christmas or birthday, But a secret isn't, so Just tell the adult, "No!"* ☆☆☆☆☆

SAY "NO" BINGO

Learn to Recognize Good and Bad Touching



IT'S OK (Good touch)

I SAY "NO" (Bad touch)

S	A	Y	N	O
I hold hands with my friend on the playground.	An older kid at school wants me to "play doctor."	A stranger offers me a ride.	A man I know wants me to keep a secret.	Grandma hugs me.
My dog licks my toes when they are wet.	A babysitter tells me to undress in front of him.	My parent's friend touches my buttocks.	Dad carries me on his back around the house for fun.	An adult gives me a gift if I will undress with him.
Someone I know puts their hands down my pants.	I shake hands with the principal.	FREE SPACE	My friend's brother wants me to touch the private part of his body.	A doctor touches me when I'm sick.
A man in our family touches my breast.	I sit next to my mom in the car.	A relative kisses and touches me too much.	An adult takes a picture of me naked.	A kid at school hits me in the stomach.
Mom and Dad kiss me goodbye in the morning.	My teacher pats me on the head when I do well in school.	A neighbor touches a "private part" of my body.	Someone pushes me down on the ground.	I hug my best friend at school.

INSTRUCTION

The object of the game is to get all smiling or frowning faces in a straight line horizontally or diagonally. This is called a "BINGO." Children are given 5-10 minutes to complete the exercise on their own by reading each square and drawing in the correct face. As soon as a child gets a bingo, they call out, "Say no Bingo!" Discuss each space after all children have completed the exercise. Students should be able to recognize appropriate and inappropriate touching.

adult tries to involve a child in a secret or whether it is just a surprise. Students will be asked to follow the trail until they come to a "statement" made by an adult. They are to determine whether the statement is a secret or a surprise. Upon completion of the exercise, discuss the statements with the class.

Objective #7: Students will demonstrate their understanding of their right to say no by achieving a "bingo" in the exercise.

Activity: (1-6) "Say No" Bingo (15 minutes)

Objective #8: Students will demonstrate their ability to recognize potentially dangerous situations involving relatives, friends of the family, neighbors, and other adults they know well by responding appropriately in at least 3 suppose game exercises.

Activity: (K-6) "Suppose" Game with Safety Sam and Safety Shirley Puppets (15-25 minutes)

Suppose Game (K-6)

"Safety Sam" and "Safety Shirley" are two puppets that make this game fun as well as educational for children. The Suppose Game is an excellent way for kids to think quickly and plan a course of action in a variety of potentially dangerous situations. The teacher suggests a hypothetical predicament to a child and asks him or her to respond. Using the puppet that is the same sex as the child, he or she will act out what should be done. Situations can involve both Safety Sam and Safety Shirley together or alone.

The depth of the examples may vary depending upon the age and maturity of the children in the class. A critique and discussion of the child's response should follow each situation. This is an opportunity to explain the importance of awareness and good safety habits.

(K-3) • What would you do if someone stopped in a car, told you they were lost, then asked you to get in the car and direct them to a certain location?

(K-3) • What would you do if someone offered you money to go behind some bushes and asked you to pull down your pants?

(K-3) • What would you do if a man and a woman stopped in a car while you were walking home from school and said that your mother wanted them to pick you up and drive you home?

(K-3) • What would you do if a neighbor man asked you to come into his house and look at his kittens?

(K-3) • What would you do if a neighbor man you don't know very well asked you to come to his home for ice cream?

(4-6) • What would you do if your uncle was babysitting you one evening when he began tickling and touching you in a place that you didn't like?

(4-6) • What would you do if someone you know and love made you do things you didn't like, but that person said, "Don't tell, this is our little secret?"

(4-6) • What would you do if a teacher touched you in a way you didn't like while you were alone in the classroom after school?

(4-6) • What would you do if someone made you take your clothes off and said he would tell and get you in trouble if you didn't do it?

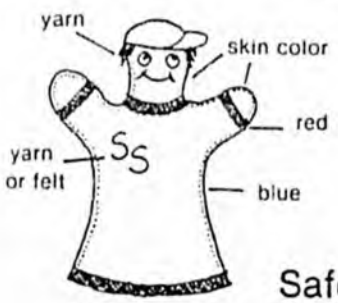
(4-6) • What would you do if someone you know very well asked you to do something you felt was wrong?

Day Four

Goal: To gain a basic understanding of a touching problem with any adult.

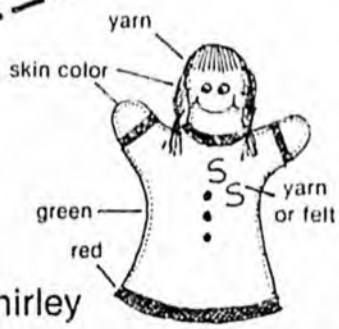
Objective #1: Students will demonstrate their ability to recognize potentially dangerous situations by sharing appropriate responses in class discussion.

Grades (K-6)



MATERIALS NEEDED

4 # 8x10" Felt Squares
(Tan-Brown for Skin, Red, Blue, Green)
Glue
Scrap Yarn for Hair
4 Wiggle Eyes



STITCH TOGETHER

PUPPET CUT-OUT

LEAVE OPEN FOR HAND

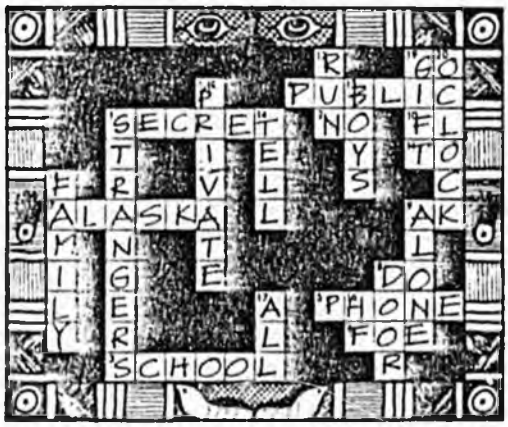
Safety Sam

Safety Shirley

Objective #2: Students will demonstrate their understanding of their right to say no by sharing appropriate responses in class discussion.

Objective #3: Students will know who, how and when to tell if a touching problem arises by expressing appropriate responses during class discussion.

Objective #4: Students will demonstrate their knowledge of how and when to trust one's own feelings ("inner voice") by sharing appropriate responses during class discussion.



Activity (K-6) Scene 4, "The Bribe" (5 minutes)
Video Discussion Questions (15 minutes)

Scene #4, "The Bribe"

1. What is a bribe? What was the bribe in this scene? How can you tell that it is a bribe?
2. Discuss how being nice (polite and obedient) affected Jimmy's personal safety.
3. Did Jimmy listen to his "inner voice?"
4. How does alcohol affect a person's behavior?

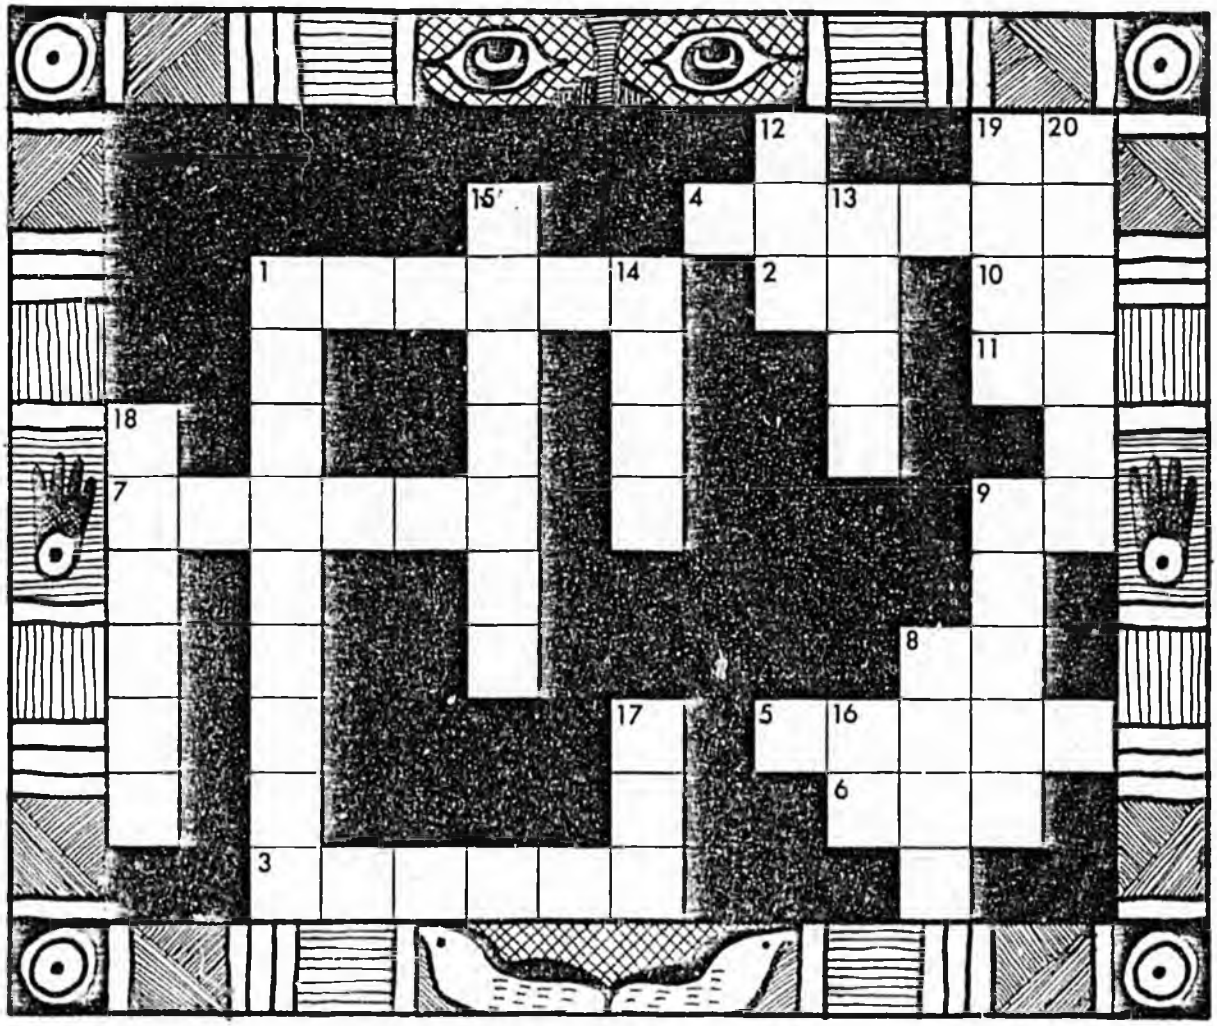
Activity: (3-6) Crossword Puzzle (15 minutes)

Have students complete the crossword puzzle using ideas they have learned from this personal safety unit.

Objective #5: Students will be able to demonstrate their ability to recognize a bribe, trick, threat or coercion as being forced by giving at least 1 (K-3) or 3 (4-6) examples of being forced.

Activity: (4-6) "Being Forced" Definition Exercise

Defining "Being Forced" (4-6)



The concept of being made or forced to do something that is wrong or could be harmful needs to be clarified for children. What is forced? How do you know when it is OK or not OK? These questions can be answered by a class discussion and writing various situations in two columns on the board.

"FORCED" MEANS:	*"FORCED" DOES NOT MEAN:*
Forced to be touched or to touch another person	When you have to clean your room
Forced to kiss or be kissed	When you have to do household chores (dishes, set the table)
Forced to undress or undress another person	When you have to babysit younger siblings
Forced is giving you a gift or special privilege if you will do any of the things listed above	When you have to go to school

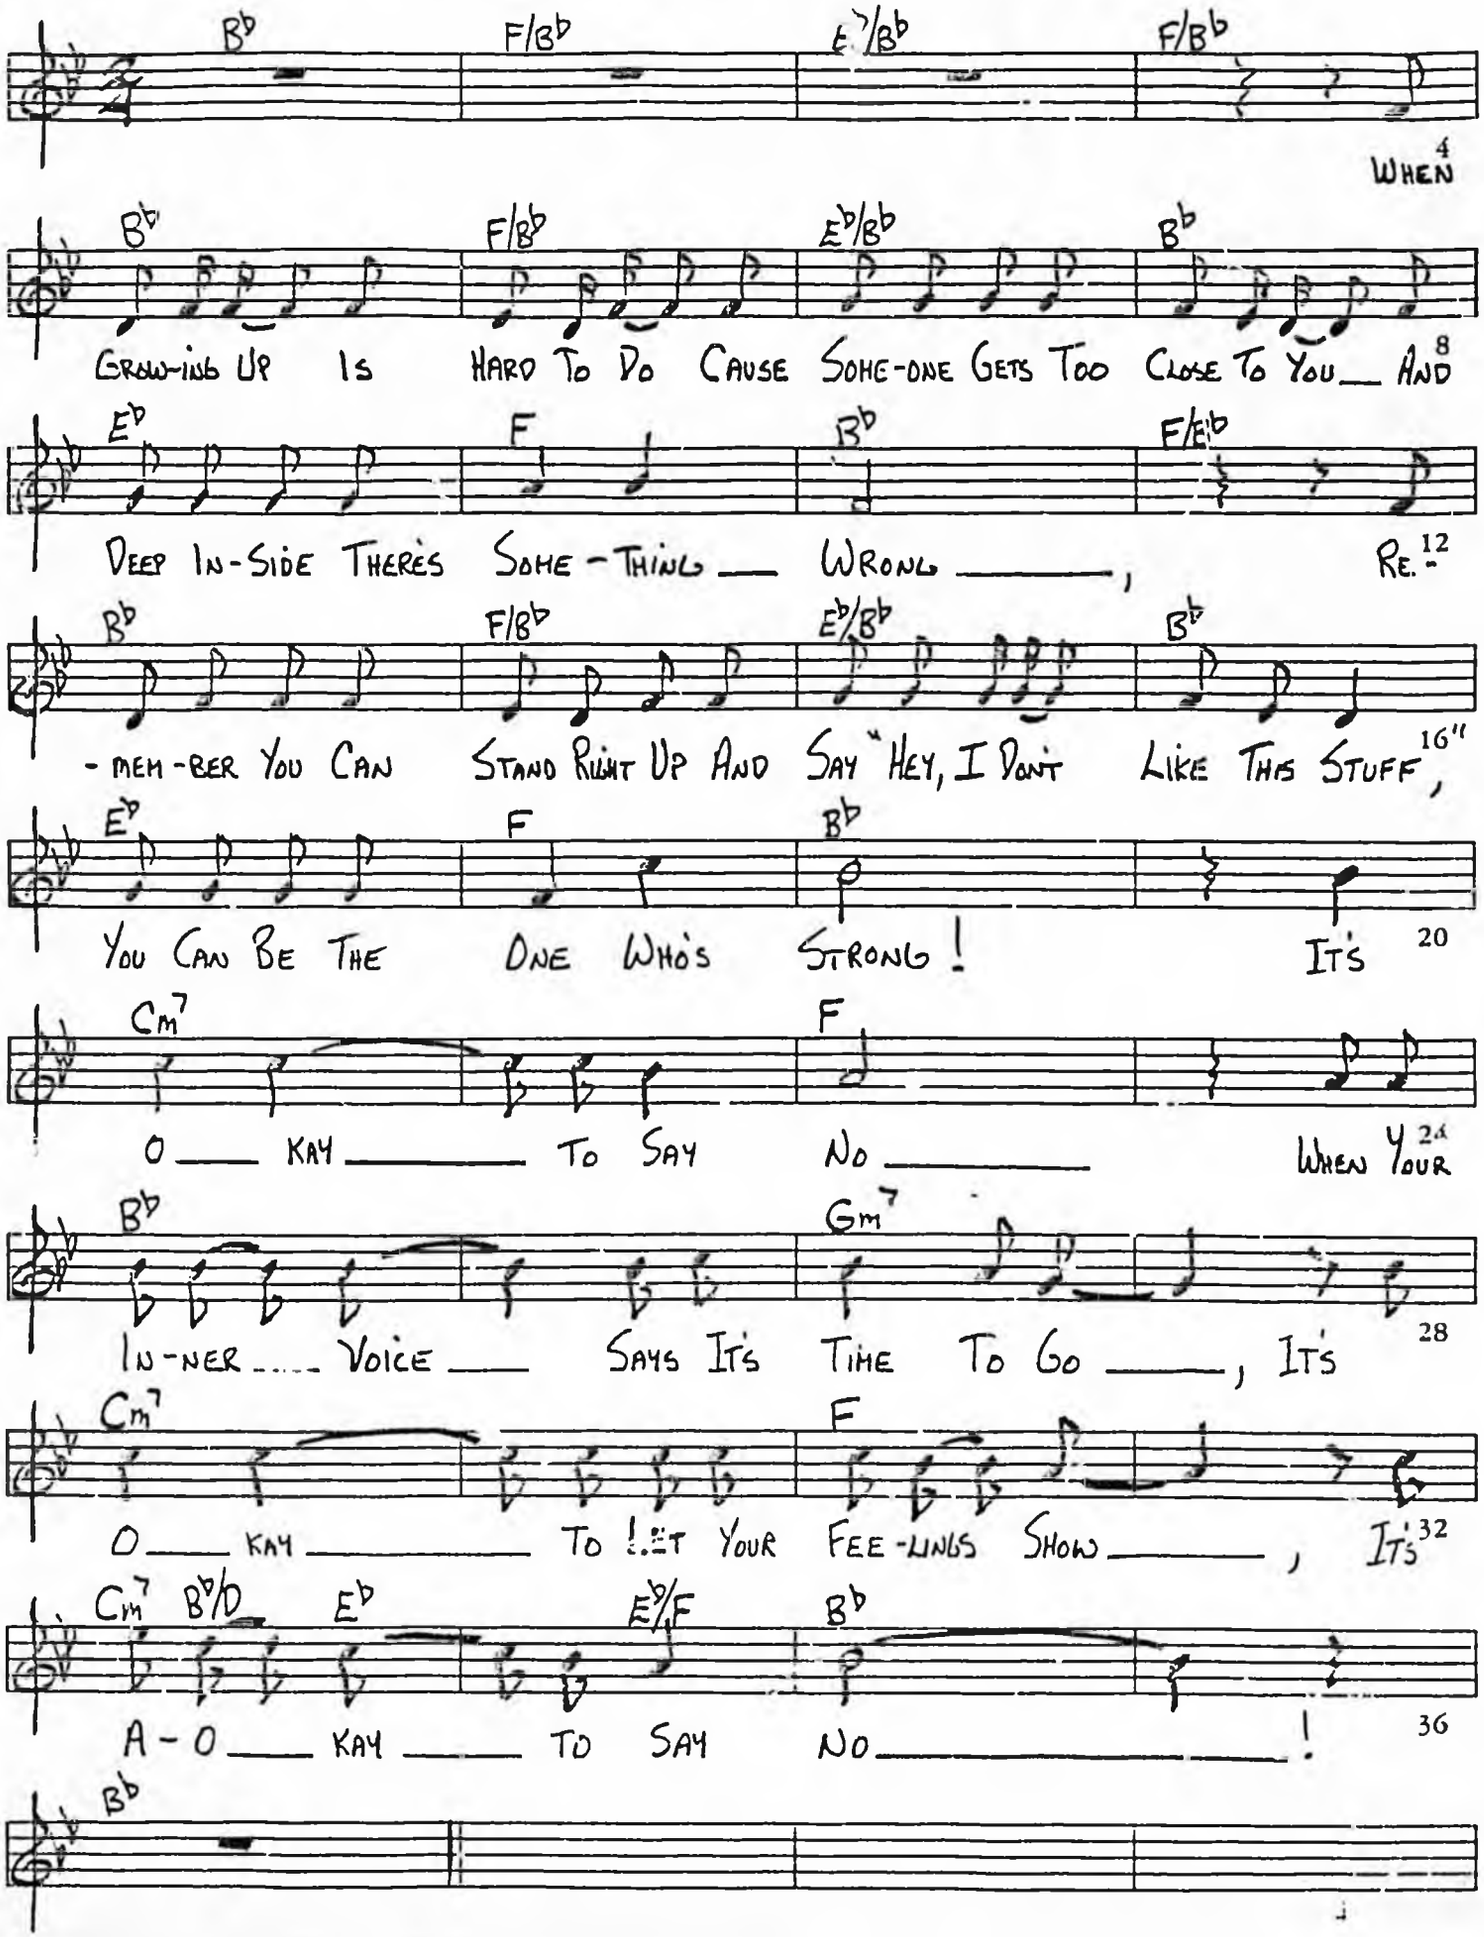
Activity: (K-6) Teach students the song "It's OK to Say NO." You may also want to involve the music teacher in this exercise.

Activity: (K-3) Have students connect the dots and color the picture describing who to tell if you have a touching problem.

CROSSWORD PUZZLE

ACROSS

1. A surprise with an adult is OK but a _ _ _ _ _ _ _ is not.
2. If someone touches me and I don't want them to, I say _ _!
3. I always go straight home from _ _ _ _ _ _ _.
4. The arm and hand are a _ _ _ _ _ _ _ part of the body.
5. Do not give our personal information over the _ _ _ _ _ _ unless you know who is calling.
6. "Friend or _ _ _."
7. The state where you live.
8. _ _ be aware of cars when you're walking, do not daydream.
9. Abbreviation for Alaska: _ _.
10. The sixth and twelfth letters of the alphabet.
11. If someone bothers me I run _ _ where there are other people to help me.

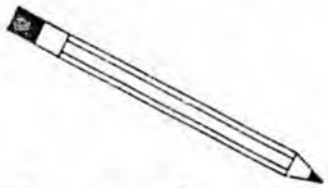


DOWN

1. I never accept rides or gifts from _ _ _ _ _ _ _ _ _ _.
8. I always check to see who is at the _ _ _ _ _ before opening it.
9. I do not wander off _ _ _ _ _ _ to play.
15. The genital area (penis or vagina) is a _ _ _ _ _ _ _ _ part of the body.
12. If someone bothers me I say no and _ _ _ away.
13. Both girls and _ _ _ _ _ need to practice safety tips.
14. If I feel confused about something that happening to me, I always _ _ _ _ an adult.
16. Initials for "Help Friends."
17. I tell _ _ _ secrets to an adult immediately.
18. A person who touches me more than I want could be a stranger, friend or member of my own _ _ _ _ _ _.
19. A person may give you a _ _ _ _ so you won't tattle on him.
20. A person might also let you stay up late, like to 11:00 _ _ _ _ _ _, so you won't tell.

IT'S OKAY TO SAY NO!

- CHORUS -



♩=104

TELL AN ADULT IF YOU HAVE A TOUCHING PROBLEM

INSTRUCTIONS:
Connect the dots and color to complete the picture.

Day Five

Goal: To know how to respond and who to tell if confronted with a touching problem.

Objective #1: Students will demonstrate their general knowledge about sexual abuse by appropriately responding during class discussion and through the post-test.

Activity: (K-3) Class Discussion—Review of Week (15 minutes)

Key concepts to review:

1. Right to say no
2. Run away from that person
3. Tell an adult

Repeat video in its entirety (14 minutes).

Objective #2: Students will demonstrate their knowledge of how to respond and who to tell if they have a touching problem by sharing appropriate responses during class.

Activity: (K-6) Speaker from or Field Trip to Police Department, Division of Family and Youth Services and/or Crisis Center (30-60 minutes).

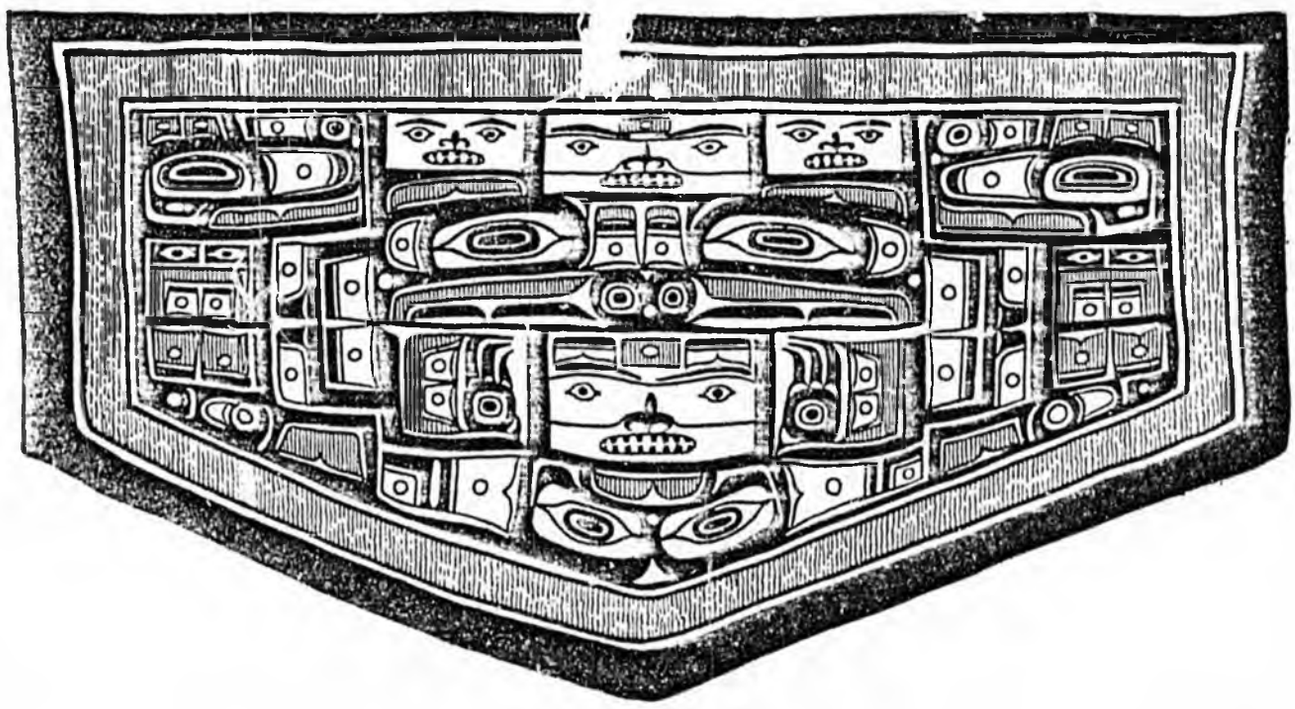
Activity: (K-4) Movie, "Who Do You Tell?" (11 minutes)

Activity: (5-6) Have each student write down one question to ask quest speaker.

Activity: (K-6) "Storytelling" (20 minutes)

Storytelling

After a break or recess, read a story to the class. The story might involve a child confronted by an awkward or frightening experience yet the child is able to successfully get away. Examples should show a child utilizing the skills outlined in this unit and acting on his or her own behalf. One such story follows:



Peggy is eight years old. One night she was watching television with Dick, a 20-year old neighbor and friend of the family. He was babysitting her as he often times did. Peggy loves gymnastics and often times would tumble and wrestle with Dick. That night, Peggy and Dick were tickling and tumbling during the commercials, but things got a little carried away. Dick asked Peggy to take her clothes off. He said it would be more fun when they wrestled around. He also told her that she could stay up late and watch television, but that it would have to be kept a secret. Peggy loved getting to watch late-night TV. It was a real treat. But she started getting this strange, "icky" feeling. It wasn't like she was going to throw-up or anything. It was just sort of a funny, uncomfortable feeling. Maybe it was the way he told her to take her clothes off, or the way he touched her when they wrestled or the fact he wanted her to keep a secret. She knew she wasn't supposed to keep secrets with adults. So she told him "no," and left the room and went to bed. The next morning at the breakfast table, Peggy told her Mom, "I didn't like what Dick did last night, Mom." "Why, what happened?" said Peggy's Mom. "Well, he did those funny things that you and I have talked about. He wanted me to take off my clothes and then keep it a secret. He shouldn't do that, right?" Peggy asked. "You're right, Peggy, He shouldn't do that and he needs some help. You did the right thing, Honey. I'm glad you told me. I'll talk to him and he shouldn't bother you anymore." Peggy and her Mom gave each other a big hug.

Activity: Post test K-6 (20 minutes)

6

LESSON PLANS FOR 7-12 GRADES

The following is a sample five-day lesson plan for 7-12 grades on the topic of sexual abuse prevention. It is designed for a one to two hour block of time per day. This is the minimum amount of time suggested in order for students to begin to comprehend and practice the prevention concepts. You are encouraged to extend the unit if possible and to repeat portions throughout the school year. Talking about personal safety should not be a one-time thing. It is very important to review.

Outline of 7-12 Grade Lesson Plans

Day One

Pre-Test

A. Show video scene #2: "Getting Home"
B. Discuss video scene
C. "Mere Fear" exercise
D. Poster contest and collage exercise
* If time, teacher lecture "Prevention Techniques-Outdoors," chapter 7.

Preparation checklist:
Order video projector ☐
Make copies of Pre-Test ☐
Re-read pages ☐

Day Two

A. Show video scene #1: "New in Town"
B. Discuss video scene
C. Teacher lecture on Psychological Prevention Techniques
   1. Education—mental preparedness
   2. Assertiveness
D. "Self-Report Assertiveness Diary" exercise

Preparation checklist:
Order video projector ☐
Make copies of activity games ☐
Re-read pages ☐

Day Three

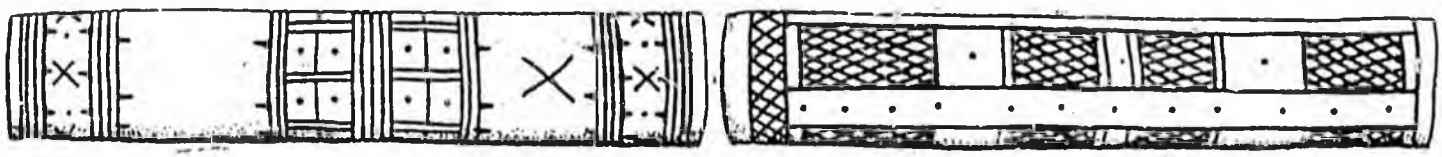
A. Show video scene #3: "In My Room"
B. Discuss video scene
C. Role-play assertiveness exercise
* If time, teacher lecture "Prevention Techniques-Indoors," chapter 7

Preparation checklist:
Order video projector ☐
Make copies of activity games ☐
Re-read pages ☐

Day Four

A. Show video scenes #4 and #5: "The Ride Home" and "Alone at Last"
B. Discuss video scenes
C. Class discussion "Effects of Alcohol on Decision Making"
D. "What is a Friend?" exercise
E. "Role Reversal" exercise

Preparation checklist:
Order video projector ☐
Make copies of activity games ☐
Re-read pages ☐



Day Five

A. Teacher lecture on "Self-Defense" options
   1. Aggressive resistance
   2. Non-aggressive resistance
B. Guest speaker from social service, crisis center or law enforcement or field trip to courtrooms, police department or crisis center.

Preparation checklist:
Arrange for speaker/field trip ☐
Make copies of post test ☐
Re-read pages ☐

Post-Test

PRE AND POST TEST

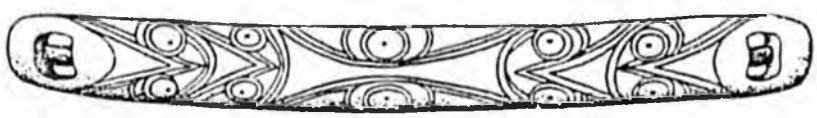
7-12 Grades

TRUE/FALSE

T 1. Most rapes and sexual crimes occur in or around a victim's home.

F 2. It is rare that a sexual abuse victim knows the person who committed the assault.

F 3. Women "ask to be raped" by the clothes they wear.



T 4. Most sexual abuse victims are abused by someone of their same race and cultural group.

T 5. If you are in your car and someone is following you, it is generally best not to drive home.

T 6. Hang up on obscene calls and report them to the police and telephone company.

T 7. People are responsible for their own behavior, even if they have been drinking alcohol.

T 8. There are two schools of thought in self-defense—aggressive and non-aggressive—either of which might work, depending on the situation.

MULTIPLE CHOICE

Write the letter of the correct answer in the blank.

d 9. Which self-defense is *not* considered aggressive?

a. chemical spray
b. screaming
c. whistle
d. talking persuasively

d 10. Some sex offenders will not be violent or forceful initially, but will try to get the victim alone by

a. bribes
b. coercion
c. manipulation or trickery
d. all of the above

c 11. If you stand up for your own rights without violating the rights of others (verbally or non-verbally) it is called

a. a passive response
b. an aggressive response
c. an assertive response
d. a violation response

a 12. Rapists are generally motivated to commit their crimes by

a. violence and opportunity
b. provocative clothing
c. sexual deprivation
d. homosexuality

c 13. Most rape victims are attacked by a male who is
   a. 40-60 years old and a "dirty old man"
   b. of a different race
   c. 18-30 years old and of the same race
   d. young and homosexual

d 14. If a stranger comes to your door asking to use your phone, the safest response is:
   a. let him in but watch him the entire time
   b. see if he looks honest and decide whether to let him in
   c. let him in and fake like there is someone else in the house
   d. make the call for him without letting him in

c 15. If you are walking alone on a city street and someone is following you, an assertive response is to:
   a. turn around, run towards the person, and pretend to grab his throat
   b. fall to your knees and start crying and pleading
   c. confidently turn around and assess the person and the situation
   d. keep looking straight ahead and ignore the person

16. A person whom you have seen several times around town comes up to you one Friday after school. You were just standing around with your friends, but end up talking for a couple of hours with this person. Everyone is ready to go home, and he offers you a ride. You politely say no thank you, but he becomes persistent. Give examples of assertive replies to his statements. Keep in mind that these statements are in sequence and should be answered as if it were a conversation.

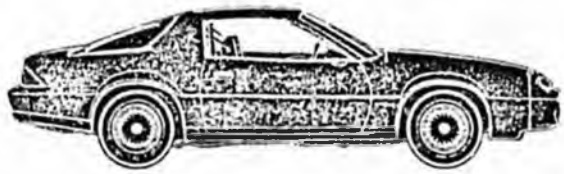
"Oh, let me give you a ride home. It's no trouble."

"Look, your friends are leaving, and they've got a car full. Come on, I'll take you home." (He firmly grips your arm.)

"Oh, come on, what's the matter, don't you trust me?"

"See, your friends left. It's just you and me. I guess you've got no choice, honey."

Day One



Goal: To recognize potential sexual abuse situations where the offender is a stranger.

(7-12)Activity: Teacher Lecture—Introduction to Unit

I. Define personal safety

- It includes water safety, fire prevention, sexual abuse prevention, etc. This unit will focus on sexual abuse and what to do if you have touching problems.
- Sexual abuse includes rape, touching private parts of a person's body, exposing genitals and sexual assault.
- The offender could be a stranger, casual acquaintance, "friend," date or relative.

2. Sexual abuse could happen to you, so it is important to discuss so you will be aware and not afraid.

Objective #1: Students will be able to identify potentially dangerous situations involving people in a car during participation in class discussion.

Objective #2: Students will demonstrate an understanding of trusting one's own feelings ("inner voice") during participation in class discussion.

Objective #3: Students will name 2 ways of seeking help and who to tell if confronted with a scary/dangerous situation.

(7-12) Activity: Video Program - Scene 2: "Getting Home" (5 minutes) Video Discussion Questions (15 minutes)

Video program discussion questions (7-12)

The following discussion questions correspond with each of the scenes in the 7-12 video program. Gear the extent and depth of these discussions to the maturity and grade level of your class. This is the first opportunity for the students to think through what they have observed on the screen and to formulate questions. Try to get the involvement of the entire class. Frequently at this age, there is a "class clown," or the boys may tend to predominate the conversation (often due to embarrassment or uneasiness). Involve as many students as you can in the activity. This might mean breaking into small discussion groups so everyone gets a chance to talk. Remember to be non-judgmental in responding to their answers. Focus on the part of the response that is correct or nearly correct. This encourages class participation while minimizing jokes and far-fetched answers.

Scene #1: "Getting Home"

1. Who would you tell about this situation if you were Jeff?

2. Why is the attitude, "it won't ever happen to me" dangerous? How does it affect our judgment and behavior?

3. What did Jeff's "inner voice" tell him? Give examples of when you have listened to your "inner voice."

4. What are some of the ways to get "safe" transportation rather than hitchhiking (i.e., call family, friend, bus, taxi, walk in well-lighted populated areas)?

5. How is sexual abuse difficult for the victim? Why? Are boys ever sexually abused? Is it as difficult/traumatic a situation for boys as it is for girls?

6. How did being male affect Jeff's actions and thoughts?

7. List 3 situations where sexual abuse might occur. Why are they likely to occur (i.e., isolation, victim unfamiliar with how abuses commonly occur)?

Objective #4: Students will be able to recognize their own ability to cope with frightening situations by completing this exercise.

(7-12) Activity: "Mere Fear' Exercise (15 minutes)

Mere Fear

The goal of this exercise is to have the students recognize that they have each experienced a difficult situation, they responded, and they survived. The students will also discover they learned from that experience. This gives the students a sense of confidence that they can handle other difficulties such as situations of inappropriate or scary touching.

Have students break into small groups. Each person tells about a frightening or threatening situation they have experienced. Examples: scary airplane ride, car accident, dog bite, nightmare, home alone for the first time, lost, or any other predicament. Have students answer these questions: 1) What did they do? 2) Did they learn something about themselves? 3) What resources did they use (i.e., people, places, coping skills, money, etc.)? 4) What would they have done differently?

Objective #5: Students will make a statement about sexual abuse prevention by creating a visual expression of their ideas.

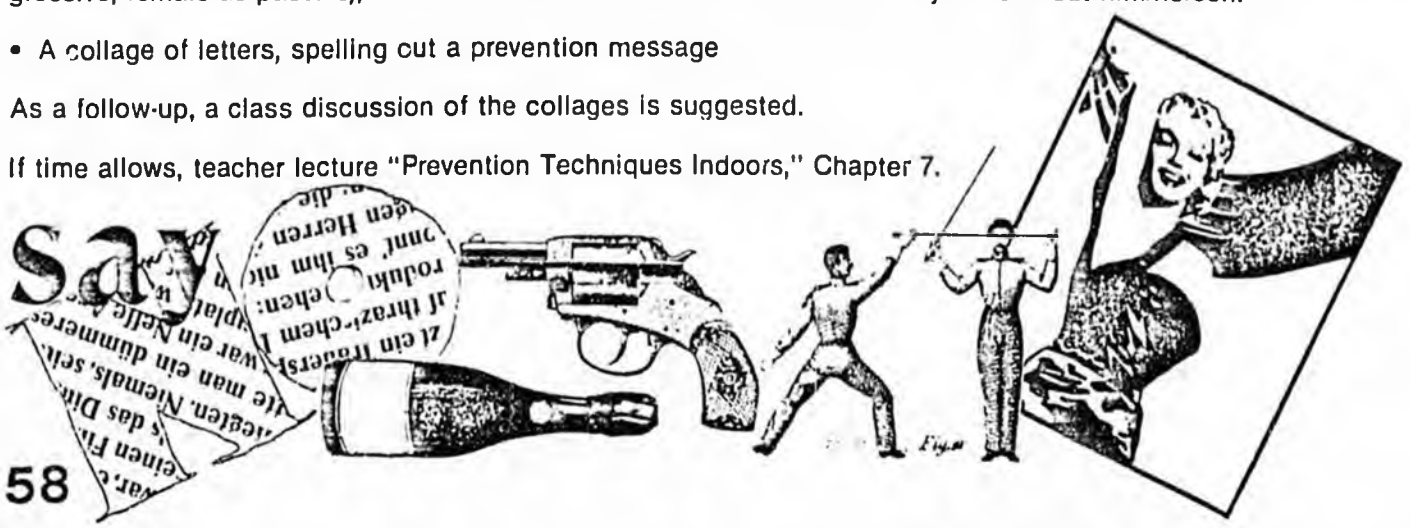
7-12) Activity: Introduce Poster Contest and/or Collage Exercise

Poster Contest

An interesting way to kick off the safety unit is to have a poster contest. Posters are an effective way of visually expressing an idea. Suggested themes for the posters are prevention, general safety and positive statements about how people can work together to stop sexual abuse. Posters may be left on display following the unit to remind students of the concepts learned.

Students can use their imaginations or any other resources available to them (magazines, felt-tip pens, paints, beads, leaves, wax paper, leather, etc.). You may want to set guidelines on the size, for instance, no smaller than 8½ x 11 and no larger than 36 x 36. The project could be coordinated with the art teacher or art classes.

Each student or pair of students creates a poster. If working in pairs, you may divide the class: ⅓ boys and girls, ⅓ girls and ⅓ boys. Compare the types of messages conveyed in the posters.



Collages

A collage is a collection of things which convey a message. In this exercise, students are asked to make a collage of pictures from magazines. The pictures and other objects can be glued in any order on to cardboard, wood or heavy paper. Themes for the collages might include:

- How advertising projects the image of sex and violence as attractive
- How advertising projects the image of sex and alcohol as attractive
- One-half of the collage can be pictures of how men or women are stereotyped in advertising (i.e., male as aggressive, female as passive), and the other half is how the student actually feels about him/herself.
- A collage of letters, spelling out a prevention message

As a follow-up, a class discussion of the collages is suggested.

If time allows, teacher lecture "Prevention Techniques Indoors," Chapter 7.

Day Two

Goal: To recognize potential sexual abuse situations where the offender is casually acquainted with the victim and to introduce assertiveness techniques.

Objective #1: Students will be able to identify potentially dangerous situations involving a stranger during participation in class discussion.

Objective #2: Students will be able to state at least one way to help another person who is being bothered or harrassed.

Objective #3: Students will demonstrate an understanding of their "inner voice" or common sense during participation in class discussion.

(7-12) Activity: Video Program - Scene 1: "New in Town" (5 minutes) Video Discussion Questions (15 minutes)

Scene #2: "New in Town"

1. Barbara was new in town in this scene. What are some of the "risks" of being in a new or unfamiliar area (i.e., unsure of people, customs, unfamiliar with high risk parts of town, places to get help, etc.)?

2. Is it all right to be pleasant with casual acquaintances or strangers? Where do you "draw the line" on how much information you give out? How did Barbara's inner voice help her "draw the line?"

3. What emotion was the man trying to make her feel when he said, "Don't you trust me?" (i.e., guilt, embarrassment, relax her defenses, etc.)

4. What should you do so that you would not get stranded somewhere (i.e., carry money for a phone call, carry family/friends telephone number(s), tell someone where you will be and when you expect to return, etc.)

5. Was it Barbara's fault that this incident occurred? Why or why not?

Objective #4: Students will analyze and evaluate the role of assertiveness in sexual abuse prevention during class discussion.

Objective #5: Students will be able to distinguish between passive, aggressive and assertive responses during participation in class discussion.

(7-12) Activity: Teacher Lecture - "Psychological Prevention Techniques"

Psychological Prevention

Most people will not be sexually abused. Yet it is important to psychologically prepare yourself and to realize that the potential does exist. After acknowledging this fact, you will be more alert to your surroundings and responsive to your common sense and judgment.

1. Education

One way to decrease your chances of becoming a victim is to learn all you can about sexual abuse. (1) Why do you think it happens (i.e., need for power, control)? (2) What are common approaches or techniques used by sex offenders (could be friendly at first, not a stranger jumping out of a bush)? (3) What locations and other setting variables (i.e., lighting, isolation from people) affect the chances of a rape occurring? Can you assess the surroundings and get a sense of the risk factor?

Changing behavior is an individual decision. Only you can decide how much freedom and mobility you are willing to exchange for increased personal safety. Being active and meeting people is important to most young adults. It only hurts us if we stop activities in order to be "safe." Therefore, if you are educated to the facts of sexual abuse, you can go on living as you are but with an increased awareness and preparedness to handle difficult situations or people. Sexual abuse can happen to you, but education will enable you to be aware, not afraid, and hopefully, not a victim

2. ASSERTIVENESS

Assertiveness, a method of simply stating what a person needs, wants or feels without putting down others, can be an effective technique in the prevention of sexual abuse. When you stand up for your-

self, when you express your true feelings, and when you stop others from taking advantage of you, then you are behaving assertively. You are generally able to get the results you want without upsetting or irritating others. If you are assertive, you can act in your own best interest and not feel guilty.

Non-verbal

Walk confidently, aware of your surroundings and at a steady pace. Give a visual impression that you are not an easy target for a purse snatch, mugging, abuse or rape. Pre-plan your route so you do not look lost and you know where to seek help if necessary. Offenders generally look for someone they think they can overpower. So your "body language" may prevent a sexual abuse from ever occurring.

Eye contact is another non-verbal, assertive behavior. When telling someone that you do not like their actions, make good eye contact. Your statement is more convincing and authoritative if you look the person directly in the eye.

Verbal

Many sex offenders attempt to manipulate, trick or "con" victims into doing something they would rather not do. Victims may be persuaded to give the offender too much personal information, accompany him to another location away from people, or be touched. Even though the victim's intuition or common sense says this could be a bad situation, many are afraid or embarrassed to refuse such requests.

Why are people afraid to be assertive?

- embarrassed
- afraid of reaction, rejection
- it is "easier" not to be assertive (initially)
- people (women in particular) are taught not to hurt feelings, to be polite, accommodating and helpful so saying "no" to someone may seem wrong
- women are often socialized to be passive and men aggressive
- children are told never to "talk back" to adults

Ask students: When is it easy for you to ask for what you want? When is it hard?

As soon as you get a "funny feeling" about someone, because of things they have said, they have gotten too close physically or touched you in an inappropriate way, an assertive response is needed. Some examples are listed.

SITUATION: If you are riding on a bus and a person you do not know or do not care for, puts his hand on your knee, an assertive response would be:

"Take your hand off my knee."

"I don't want your hand on my knee."

If it's a public place, do not be afraid to speak loud enough for others to hear. These statements should be made firmly with direct eye contact.

SITUATION: A relative comes to your home quite frequently. He's nice, but he always hugs you and gives you sloppy kisses. It makes you feel uncomfortable. An assertive response might be:

"Uncle Fred, I like you a lot, but I don't like to be kissed like that."

"Grandpa, it bothers me to be hugged (kissed) that way. Let's shake hands instead."

SITUATION: While walking home from school, a person starts following you. This goes on for at least 10 minutes and it worries you. Besides going to a house or business for assistance, an assertive response might be:

Confidently turn around and directly look at the person. Assess the distance between you and that individual (maybe it's only a postal carrier). Is there a weapon? What is the person's description? Is the person running towards you (at least you won't be taken by surprise if he is, you can get a few seconds head start)? By confidently turning around, you are giving yourself more information with which to work. You are also projecting an image of a person who can't be easily frightened, controlled or overpowered.

Sometimes it may be necessary to repeat a verbal assertive response over and over again. This technique is called "Echo talk." Echo talk may be necessary to convince the person that you are self-assured and are sincere in what you say. A common technique used by many sex offenders is to try to break down an assertive response, either by ignoring the statement, laughing or making comments such as "Oh, you don't mean it!" Just repeat your statement again. It does not have to be changed or reworded—just repeated or prefaced with, "I've said it twice..." or "I'll repeat myself again...you haven't listened." Remember, you have rights just like anyone else, so do not back down.

(7-12) Activity: Assertiveness Discussion

Have students break into small groups and talk about situations where they ended up doing something they didn't want to do. Were they pressured? How did they feel?

(7-12) Activity: Self-Report Assertiveness Diary - Due Day 4 (5-15 minutes)

After students have gained a basic understanding of assertiveness, ask them to keep a diary on their behavior for 2 days (7-9 one day, 10-12 two days). Students are to make notes of any confrontive situation and to determine whether they responded in a passive, aggressive or assertive manner. This might include asking a smoker not to puff their way, asking a sales clerk for correct change, telling a brother they do not want him to use their radio anymore, asking a fellow student to be quiet so they can hear the teacher better, asking someone for assistance, etc.

The Assertiveness Diary includes the following:

1. Briefly describe each situation. Who were the people involved (do not use names, just a general description—teacher, sister).

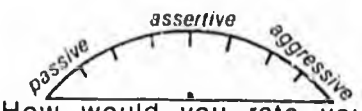
2. What did you say? Was it passive, aggressive or assertive? Do you tend to respond one way more than another?

3. Critique your verbal and non-verbal skills (body language).

This exercise can be graded and/or discussed in the classroom. For many students, this will be very self-revealing.

SELF-REPORT ASSERTIVENESS DIARY

Name _____ *Date* _____



Day One

THE SITUATION:

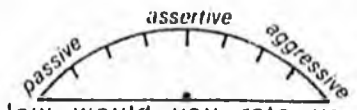
MY RESPONSE:

(Verbal)

(Non-Verbal)

How would you rate your response? Draw an arrow from the dot on the Assert-o-Meter.

COMMENTS: (Is it easier for you to be passive, aggressive or assertive? How did you feel? How do you think the other person felt? What would you have done differently?)



Day Two

THE SITUATION:

MY RESPONSE:

(Verbal)

(Non-Verbal)

How would you rate your response? Draw an arrow from the dot on the Assert-o-Meter.

COMMENTS:

Day Three

Goal: To recognize and practice assertive responses to potential sexual abuse situations where the offender is known to the victim.

Objective #1: During participation in class discussion, students will be able to identify potentially dangerous situations involving someone they know.

Objective #2: Students will demonstrate the importance of listening to their "inner voices" during participation in class discussion.

Objective #3: Students will demonstrate the understanding of their right to say no during class discussion.

(7-12) Activity: Video Program - Scene 3 "In My Room" (5 minutes) Video Discussion Questions (25 minutes)

Scene #3: "In My Room"

1. What was the hardest or most confusing part of this situation for Keta? Why?

2. Was Keta "seductive" in her night-gown? Whose responsibility or fault is the abuse? Does clothing (or the fact she is female) give someone the right to take advantage of her physically/sexually?

3. If this situation occurred regularly when Keta's mother was away from home, should Keta tell her mother? What if her mother doesn't believe her? Whom else might Keta tell?

4. Why did the man want to make Keta feel dirty, bad and guilty (i.e., so she wouldn't tell anyone)?

5. Who are the offenders in sex crimes? Are they more often strangers or people the victims know?

6. Does who the offender is make any difference in deciding whether or not you tell someone about the abuse?

7. Discuss sexual offense laws in Alaska. What is incest? Why is it illegal? (See Chapter 4, main point: It is illegal if someone touches your private parts and you don't want them to. This includes family, strangers or anyone.)

Objective #4: Students will be able to state the difference between passive, aggressive, and assertive responses during this exercise.

Objective #5: Students will analyze and evaluate the role of assertiveness in sexual abuse prevention.

Objective #6: Students will be able to observe and practice verbal and non-verbal communication during role play exercises.

(7-12) Activity: Review Self-Report Assertiveness Diary

(7-12) Activity: Role Play Assertiveness Exercise (25 minutes)

Role-Play Assertiveness Exercises

Students are asked to break into groups of 4 people. One student is in charge of reading the situation out loud. One student is to respond in an assertive manner (not passive or aggressive). The third student is to observe and critique the verbal response and the fourth will critique the non-verbal response. For each new situation, the students rotate roles.

SITUATION #1: You are outside in your front yard when a person comes up to you and says his car has run out of gas and he would like to use your telephone. He looks "OK" and your mom is inside taking a nap. Assertively handle this situation.

Examples: **Passive:** (avoids real issue) "I'm sorry, we don't have a phone." **Aggressive:** (verbally attack person) "Get lost creep head. You sure have a lot of nerve asking me that question!" **Assertive:** (direct and firm) "We don't let strangers in our house. There is a pay phone at the corner (or I can make the phone call for you, etc.)" Talk from a distance.

SITUATION #2: You are riding your bicycle in a residential area when it begins to rain. The faster you pedal, the wetter you get. Suddenly, you hear a "pop" and your tire goes flat. A person in a pick-up truck offers to give you and your bike a ride. You're tempted, but you really don't know this person.

Examples: **Passive:** "Gosh, I don't know, It'll stop raining soon." **Aggressive:** "Do I look helpless or something? Forget it! I don't need a ride from you!" **Assertive:** "No, thank you." or "No, but if you could make a call for me I would appreciate it."

SITUATION #3: You have many relatives that you love very much. But one uncle bothers you. He will often kiss and touch you. He jokes about your body and how much you have grown up physically. You don't like his behavior, but he is family and you hate to say anything to anyone. What might you say to your uncle directly?

Example: **Passive:** "Let's all go into the livingroom and watch TV." **Aggressive:** "You make me sick. Why don't you drop dead?" **Assertive:** "Uncle Fred, I don't appreciate being touched or talked to in that way. I love you very much, but I don't like it and I want you to stop."

SITUATION #4: You are sitting waiting for a ride, when a person comes up to you and says how nice you look. You say thank you and he asks you if you are waiting for a ride. You tell him. He asks if you go to school and where. You tell him. He then asks your name and you realize maybe you have given out enough information already. Assertively express yourself.

Examples: **Passive:** "Oh, here comes my ride." (even though it may not be). **Aggressive:** "What is this, 20 questions? Get lost you're bothering me." **Assertive:** "I don't give out my name to people I've just met."

SITUATION #5: It is Saturday afternoon and you are going for a walk with a person you love very much. This person keeps putting his hand on the inside of your leg and then tries to put his hands down your pants. Act assertively.

Examples: **Passive:** "Let's stop and get some ice cream soon." **Aggressive:** "Get your slimy hand off me, you pervert." **Assertive:** "Leave me alone. It bothers me." "I don't like that." "Stop doing that." "Stop it. This is against our family rules and I will tell my mom." "No, don't touch me. I don't want you to touch me like that."

SITUATION #6: Your parents have gone out to dinner and a movie so it is just you, your sister and your older cousin at home. Your cousin jokingly grabs you and has you sit on his/her lap. He/she keeps rubbing up against you and touching you until it makes you feel real uncomfortable. Act assertively.

Examples: **Passive:** "I want to watch TV now—Mr. Rogers, Wall Street Week, etc." **Aggressive:** "You hancho-macho. What kind of sex fiend are you anyway? Leave me alone, you animal." **Assertive:** "I don't want to sit on your lap. I don't like you rubbing up against me and touching me like that."

SITUATION #7: One afternoon at school, a person you know and see every day, asks you out for a date. He/she is someone you do not care to go out with, but you do not want to hurt his/her feelings, either. Respond appropriately.

Examples: **Passive:** "I'm late getting to class, I can't talk now." or "I'm busy that night." **Aggressive:** "Are you kidding? Go out with you? Ha-ah!" **Assertive:** "Thank you for thinking of me. You're a nice person, and I'm glad we can be friends. However, I'm not interested in dating you."

ASSERTIVENESS IS STANDING UP FOR YOUR OWN RIGHTS WITHOUT VIOLATING THE RIGHTS OF OTHERS. IT INVOLVES VERBAL AS WELL AS NON-VERBAL COMMUNICATION.

Day Four

Goal: To recognize potential sexual abuse situations where the offender is well known to the victim and to understand how alcohol affects behavior.

Objective #1: Students will demonstrate an understanding of how peer pressure affects behavior through class discussion.

Objective #2: Students will demonstrate through class discussion how to recognize potentially dangerous situations involving a peer.

Objective #3: Students will be able to state during class discussion that fault and blame lies with the offender, not the victim.

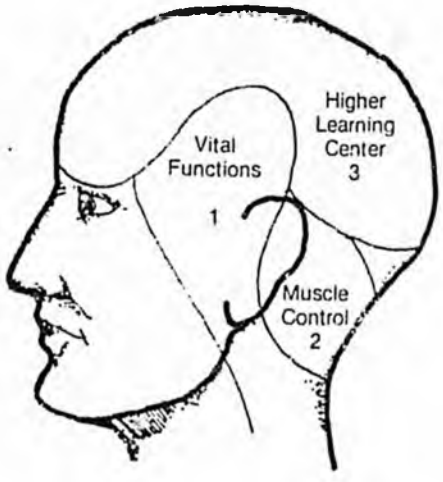
Objective #4: Students will demonstrate an understanding of the importance of stating what they think (assertiveness) and taking responsibility for one's own behavior through class discussion.

Objective #5: During class discussion, students will demonstrate the importance of trusting one's own feelings and listening to your "inner voice."

(7-12) Activity: Video Program - Scene 4 "The Ride Home" and Scene 5 "Alone at Last" (5 minutes each) Video Discussion Questions (25 minutes)

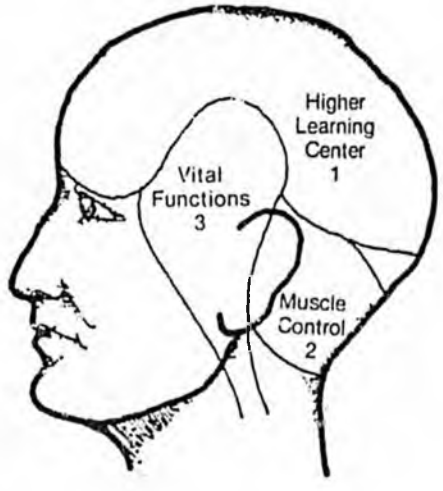
Scene #4: "The Ride Home"

1. What choices did Craig and Trisha have about drinking?
2. How does alcohol affect decision making and behavior?
3. What are the consequences of drinking and driving?
4. Define respect. How is respect shown to others? Was respect shown here between Craig and Trisha? Between Fran and Trisha?
5. What choices/decisions face us as we begin to date people? (i.e., independence from home, questions about drinking, sexual relations)
6. Should Trisha tell anyone about this incident? Whom should she tell?
7. What do you think Craig and Trisha learned from this situation? Was it anyone's "fault?"
8. Discuss the myth "when a girl says 'no,' she really means 'yes.'"
9. Discuss peer pressure. Would you be embarrassed if your friends found out what happened? How do your friends affect your decisions?
10. If this situation had continued, would it have been "rape?"
11. Discuss how each of these four people felt (Fran, Bill, Trisha, Craig) physically, emotionally, sexually.
12. How should the transportation have been worked out? Was it fair of Fran to leave Trisha?



Scene #5: "Alone at Last"

1. What was Fran really trying to say when she said, "Don't you want to listen to music/TV?" Why couldn't she come right out and say it?



2. Describe how this scene could have been handled differently so that it was less awkward for both Fran and Bill?

3. Discuss the importance of knowing your limits prior to going on a date.

ALCOHOL AND THE BRAIN

Sequence of Normal
Mental Growth

Progression of Alcohol's
Sedative Effects

ALCOHOL'S EFFECT ON SEXUAL ABUSE

OFFENDER
If a person has been drinking, his higher learning center is the first thing impaired. He may not "look" drunk (muscle control reflexes are affected second), but his actions and behavior change. His judgment, such as what is right or wrong (physically, sexually, verbally), is altered so he is more likely to act in an inappropriate fashion. Alcohol does not cause someone to be an abuser. It may facilitate the behavior through impaired judgment.

VICTIM
A victim should be aware of the effect of alcohol on a potential offender. Likewise, if a victim is drinking alcohol, it could affect his/her common sense, judgment and assessment of the situation.

Objective #6: During class discussion, students will demonstrate their understanding of the effects of alcohol/drugs on behavior.

(7-12) Activity: Class Discussion on the Poster "Effects of Alcohol on Decision Making" (10 minutes)

(7-12) Activity: Making Decisions

Discuss how decisions are made using the following format. Write this chart on the board. Have students choose a problem situation and work it through this chart. Example: Fran's problem with Bill (Scene #5)

What is the problem?	*What information do I have?*	*What information am I missing?*
What are the long and short term consequences of this decision?	*What human factors influence my decision? my feelings? friends? family? community?*	

Objective #7: Students will understand how sex roles and their socialization affects behavior by completing and discussing the exercise.

(7-12) Activity: "What is a Friend?" Exercise (15 minutes)

What is a Friend?

Have students either individually or in small groups make a list of what things they look for in a friend. Examples: good listener, trustworthy, good sense of humor, similar interests.

Next have students make a list of what they look for in someone of the opposite sex. This list will probably include physical characteristics as well as characteristics from the first list. Examples: large chest, shapely legs, nice rear, muscular, tan, long hair. Do not tell the students ahead of time what the list might include. Let them be surprised when you point out the differences in the lists.

You now have set the stage for a class discussion on why we primarily see people of the opposite sex as one-dimensional sexual objects. Discuss the following questions:

1. Why do we think of people of the opposite sex in physical terms?

2. Is physical appearance the most important characteristic? Can you judge a person by how they look?

3. "Trustworthy" is a characteristic often listed for friends. How do friends earn our trust? How do people of the opposite sex earn our trust? Trust is not automatic but gradual. People do have control over choosing friends and deciding whom they can trust.

(7-12) Activity: Sex Role Reversal Exercise (30 minutes)

One of the best ways for boys to understand how girls feel and vice versa is to "trade places." This level of understanding is important so that communication between the sexes can be clear and not misinterpreted. Frustration and stress related to the inability to communicate effectively with people of the opposite sex is one of many factors leading to sexual abuse.

The following is an example of a sex role reversal involving a prosecution, the way rape cases used to be handled. The victim is a man. Luckily, laws in Alaska have changed to protect victims from many of these embarrassing and unnecessary questions. However, it took many years before people realized how victims were affected by these questions.

"Was He Asking for It?"

Have two students take a role and read this story out loud.

Harper's Weekly carried an item from the American Bar Association Journal declaring that few rapists were punished for their crime: only one in five rapes is reported and only one out of eight reported rapes ends in con-

viction. In a dialogue to demonstrate why most rape victims prefer not to press charges, the article asks us to imagine a robbery victim undergoing the same sort of cross-examination that a rape victim does:

"Mr. Smith, you were held up at gunpoint on the corner of First and Main?"

"Yes."

"Did you struggle with the robber?"

"No."

"Why not?"

"He was armed."

"Then you made a conscious decision to comply with his demands rather than resist?"

"Yes."

"Did you scream? Cry out?"

"No. I was afraid."

"I see. Have you ever been held up before?"

"No."

"Have you ever given money away?"

"Yes, of course."

"And you did so willingly?"

"What are you getting at?"

"Well, let's put it this way, Mr. Smith. You've given money away in the past. In fact you have quite a reputation for philanthropy. How can we be sure you weren't contriving to have your money taken by force?"

"Listen, if I wanted to..."

"Never mind. What time did this holdup take place?"

"About 11 p.m."

"You were out on the street at 11 p.m.? Doing what?"

"Just walking."

"Just walking? You know that it's dangerous being out on the street that late at night. Weren't you aware that you could have been held up?"

"I hadn't thought about it."

"What were you wearing?"

"Let's see—a suit. Yes, a suit."

"An expensive suit?"

"Well—yes. I'm a successful lawyer, you know."

"In other words, Mr. Smith, you were walking around the streets late at night in a suit that practically advertised the fact that you might be a good target for some easy money, isn't that so? I mean, if we didn't know better, Mr. Smith, we might even think you were asking for this to happen, mightn't we?"

The object of the role reversal exercise is to develop the student's sensitivity to issues surrounding sexual abuse. They should be able to understand the issues from both a male and female perspective. Have the students break up into two groups: boys and girls. Have each group make a list of the following things:

1. What things do people of the opposite sex do that bothers you? (i.e., boys are rowdy and immature on the school bus, girls are so stuck-up when you just want to get to meet them, boys/men whistle when you walk by, girls have it easy, they don't know what it's like being a guy asking girls out for dates).

2. What do you think the opposite sex is trying to say when they do these things? Why do they do them?

3. What does this behavior actually say to you?

Take about 15-20 minutes for the group to meet. Although many of the group conclusions will be generalizations, they do serve to generate discussion. Have both the boys and girls get back together and talk about the two lists. You may have students who laugh or become defensive. Point out that: (1) these lists are people's impressions based on their own personal experience, (2) not all girls or all boys act alike.

Another role reversal activity is to have the boys stand in front of the class while the girls "look them over," ask them out on a date, take charge of all decisions (where to go, what to do, etc.). This exercise serves to illustrate what it is like for a woman to be objectified, powerless and having only one way communication. It also illustrates that males are often unwillingly placed in the role of decision-maker, aggressor, initiator, etc.

Day Five

Goal: To know how to respond in case of sexual abuse, who to tell and how to support others who have been abused

Objective #1: Students will demonstrate their knowledge of self-defense options in class discussion

(7-12) Activity: Teacher Lecture (20 minutes) "Self Defense: Aggressive and Non-Aggressive Resistance"

Stages in a Rape Attack

In the 1970's, James Selkin of Denver General Hospital conducted extensive research on rapists' behavior. He concluded that there were generally five distinct stages which surrounded incidents of sexual abuse. These stages were important to identify so that potential victims could recognize them and take the appropriate preventive measures.

1. TARGET SELECTION—VULNERABILITY STAGE

When seeking for a victim, the offender would look for any of the following characteristics:

a. Physical defect
b. Mental defect
c. Appropriate location
d. Solitude
e. Easy access to victim
f. Minimal likelihood of interruption

2. TESTING STAGE

This is the point where the victim's assertive behavior stopped the abuser from going further. (Video scenes: New in Town, The Ride Home, Alone at Last)

a. Can victim be easily intimidated?
b. Is victim submissive?
c. Is victim frightened?
d. Is victim hostile, unapproachable, confident?

3. THREAT STAGE

Stage where physical and/or verbal threats occur. (Video scene: In My Room)

a. Punishment followed if she refused his demands

b. Reward for complying (i.e., he stopped hitting her)

4. SEXUAL ASSAULT STAGE

The abuse occurs at this point.

5. TERMINATION STAGE

a. Offender threatens to come back (rarely does he actually return)

b. Apologetic and guilt statements made by offender

c. Harsh treatment one last time

Self Defense

The ideas presented here are only suggestions of possible response options to use if involved in a sexual abuse. There is no "one" way to protect yourself. Since each situation is unique, each individual should respond in the way he or she feels will work at the time. By understanding all possible options, you will be able to act more calmly and logically. Your chances of getting away unharmed are greater if you are prepared and have thought about self defense techniques.

Of course, your first priority is to get away. However, if you are in a secluded spot and you do not have the ability to run, other options are still available. An immediate response is generally the most effective because it is unexpected and may throw the sex offender off guard. This may give you the needed seconds to escape.

Basically, there are two self-defense approaches: non-aggressive and aggressive resistance.

Non-Aggressive Resistance

Non-aggressive resistance is a method of self-defense which, if it fails, will generally not cause any harm to the victim. With non-aggressive resistance, your imagination is your only limit. Some of the most unusual responses have worked. The object is to "psychologically outsmart" the offender in a non-threatening manner. This can be done in a number of ways, all of which should either reduce the attacker's violence or stall for time until there is a safe time to escape. Some of the ideas are listed below:

1. TALK. Talk your way out of the situation. Examples: you have a contagious disease, someone is going to be coming by shortly ("Oh, I thought you were my Dad, he is supposed to be here by now"), a deterrent tactic ("Let's go to my house"), try to reason with the person, be assertive ("I don't wish to talk to you now"), or simply talk to calm down the tension and violence. Generally speaking, pleading does not work.

2. PRETEND ILLNESS. Examples: Pretend to faint, fake a seizure, vomit, urinate or act sick.

3. BIZARRE BEHAVIOR. Act crazy. Surprise the attacker. Examples: eat twigs, bark like a dog, mumble, go into contortions, etc.

Aggressive resistance

Aggressive resistance is designed to distract or temporarily disable the attacker. The purpose is to react immediately to startle or surprise him. If you try an aggressive movement, you must be willing to incapacitate the attacker because you only get one chance to try aggressive techniques. If you miss or only partially hurt the offender, he will be more angry than before. Aggressive resistance can be effective, but you must know what you are doing and do it effectively, the first time. The following are some aggressive resistance techniques.

1. WEAPONS. Many items you carry with you could be used as "weapons." Example: a rat-tailed comb, brush, keys, umbrella, book, pencil or other pointed object might temporarily stop the attacker if used against a vital point of his body (such as his eyes). Do not rely on items that you carry. They are not always easy to get (generally kept in a purse, backpack, pocket), and could be dropped or taken away and used against you.

Chemical sprays such as C.S. Tear Gas may be effective, but may also be taken away and used against you. The "shelf life" of many of these sprays is only one year so older cannisters may not work. There is some question as to the chemical's immediate effectiveness with people who are drunk, high on drugs or mentally unbalanced. Test the cannister to see if it works and to get a sense of its spraying capacity. Chemical sprays can affect you too it used in a confined area. Many states have banned the public from carrying these chemical sprays.

Statistics show that guns can be very dangerous if you are not proficient at using them. They can be turned and used against you. It is also illegal in Alaska to carry a hidden weapon. Other weapons that are illegal to carry include zap guns, brass knuckles, knife with blade over 3½ inches long, and a stiletto.

2. FIGHTING. Advice about whether a victim should fight back or not has come from all sides, ranging from, "Don't fight, he'll kill you!", "A child doesn't have a chance fighting", to "A woman has a right to defend herself." The decision to fight lies with the victim alone. The victim must be confident in his or her strength. If you want to learn self defense, a commitment of time and energy to learn how to fight effectively is absolutely necessary (as with learning any athletic skill such as basketball or track).

This sexual abuse prevention program is not designed to teach aggressive self-defense techniques. It is intended to provide information about this option and to encourage students to seek out additional training if desired. Aggressive self-defense not only teaches you physical skills, but it increases your confidence in your ability to deal with an attacker. It is a viable option for many people no matter what their size or if they are male or female.

3. NOISE. If you are sure help is within hearing distance and confident that the help will be immediate and sufficient, scream! If not, don't. Pressurized air horns, whistles and other noise makers may bring help, but they are less effective than a loud scream.

If you are faced with the threat of an attack, think...don't panic. Your assailant expects you to react solely out of fear—crying, pleading and ultimately submitting. Remember those are not your only options. You still have a good chance of escaping by using aggressive or non-aggressive resistance. Create that moment needed to escape any way you can.

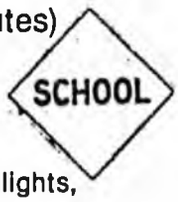
Objective #2: During class discussion, students will be able to name who to tell if they have a touching problem, and resources for help in case of sexual abuse.

Objective #3: Students will demonstrate appropriate ways to support others who are victims of sexual abuse through class discussion.

(7-12) Activity: Guest speaker from social service, crisis center or law enforcement discussing who to tell about a sexual touching problem, what to expect psychologically and legally, and how to be supportive of someone who has been sexually abused. Possible field trip to courts, police, or crisis center. See community resources listed in the back of the guide. (30-60 minutes)

(7-12) Activity: Teacher Lecture - Wrap-up, Review, Follow-up Questions (10-30 minutes)

(7-12) Activity: Post Test



7

ADDITIONAL ACTIVITIES

K-6 Grade

Objective #1: Students will gain an understanding of good safety habits while outdoors through participation in class discussion.

Activity: (K-6) Teacher Lecture and Discussion on "General Safety Outdoors" (20 minutes)

General Safety: Outdoors

TO AND FROM SCHOOL

1. Always take the safest route to and from school (i.e., with crossing guards, lighted streets, traffic lights, populated, etc.).
2. Know your route to and from school. Think and plan where you could go for help if you needed it (i.e., store, school, church, hospital, Block Home, friend's house, etc.).
3. Walk with a friend if possible. There is safety in numbers.
4. Do not take short-cuts. Always take the same route so your mother and father or teacher know where you are and when to expect you.
5. Do not daydream. Always be alert and aware of your surroundings.
6. Walk on a sidewalk if possible, facing traffic. That way a car cannot sneak up on you from behind.
7. If riding public transportation, stay near the driver. Do not give out personal information to strangers on the bus or train.
8. Do not hitchhike. Do not accept rides from anyone unless your parents have said it is all right.

PLAYING

1. If you want to play at a friend's house or elsewhere, always get permission ahead of time. You don't want your parents to worry about you or wonder where you are.
2. Play with a friend if possible—safety in numbers once again.
3. Do not play in alleys, deserted buildings, construction sites or near restrooms. They could be dangerous and no one would be able to hear you if you needed help.
4. If someone is watching you or bothers you in any way, run and tell an adult. This might be when you are in the movies, at the park, riding your bike or walking to a friend's house.
5. Do not play in or near streets. Because you are small, a car may not be able to see you. If a stranger asks you a question from a car, for instance, directions, you may help him or her from a distance or simply do not talk to strangers.

General Safety: Basic Tips

1. Know your first name and your last name.
2. Know your street address or route (street "name and number"), and the city or village where you live.
3. Know your mother or father's name and phone number and how they can be reached.

This is important to know in case you get lost. Do not give out this information to anyone unless you are asking for help (i.e., police officer, school nurse, counselor, teacher, etc.).

Objective #2: Students will gain an understanding of good safety habits while indoors through participation in class discussion.

Activity: (K-6) Teacher Lecture and Discussion on General Safety Indoors (15 minutes)

General Safety: Indoors

IN THE HOME

1. Always check to see who is at your door before opening it. Use a peek hole or look out a window. Do not rely on chain locks. They can easily be forced open.

2. Refuse to open the door for any stranger or other person unless your parents have said it is all right. Do not let anyone in who wants to use your phone. Tell them the location of the nearest phone booth or make the call for them while they wait outside.

3. Keep doors locked when home alone. Do not "broadcast" the fact you are by yourself. Always have a phone number where your parents can be reached.

4. All exterior doors should have good locks, preferably a deadbolt lock located right above the door knob. Although the following information may be more technical than need be for this age level, students should know how to operate these locks and have a general understanding of security. This may be important if they move to other areas or travel. The doors should also be solid core, not hollow core. Deadbolts are helpful in reducing the probability of someone breaking in since it is easy to spring back the latch of the standard door knob with a knife or credit card. A single cylinder deadbolt is preferable on most doors unless there is a glass window in the door or next to the door. In this case, a double cylinder deadbolt is better since it takes a key for both the inside and the outside of the door to lock or unlock. Therefore, the intruder cannot simply break the glass and turn the latch from the inside since a key must be used. If it is the only exit from your home, a deadbolt double cylinder may not be the best choice, since it does take longer to exit the home in case of an emergency. It is important after changing any locks to practice a fire drill.

5. All exterior windows should be secured as well. Sliding glass doors and windows are particularly vulnerable. They should be secured in two ways:

   a. In the upper track, drill screws straight up so that the head is facing down. Do this all along the top, every 3-4 inches. This takes up the gap so the window can't be lifted or pried out of the track.

   b. Place a sturdy stick, dowel or metal rod in lower track. There should be no more than a 1/8" gap. Tie a bright colored piece of yarn around stick so a child can easily lift the stick out in case of emergency.

   c. Wooden frame windows can be secured by "pinning" the frame where it overlaps. At a slight downward angle, drill a hole going through the front window's frame and catching the back frame. Place a nail in the hole so it can easily be lifted out yet so that the window can't be lifted up if the nail is in place.

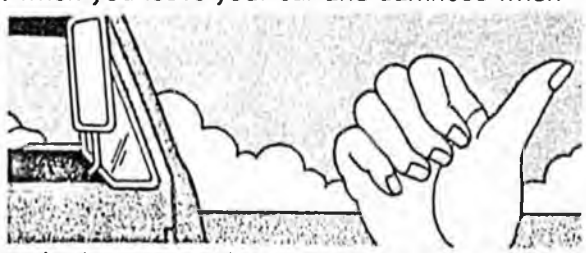
6. Do not hide an extra key outside. Plan ahead, or keep an extra key with a reliable neighbor.

7. If you enter your home and something doesn't seem right, as though someone has been there, leave immediately and go tell an adult.

8. When home in the evening, always close curtains so no one can watch you from outside.

9. If someone is loitering or "hanging around" near your home for no apparent reason, tell an adult immediately, i.e., your parents, neighbor, police. Try to get a description of the person and/or car.

7-12 Grade



Objective #1: Students will demonstrate an understanding of good safety practices involving cars and being in public places.

Activity: (7-12) Teacher Lecture (25 minutes)
Prevention Techniques Outdoors: Car and Streets

Prevention Techniques—Outdoors

CAR

1. Lock car door at all times, day or night, whether you are in the car or out of the car. Always have your keys in hand whether you are heading to or from the car.
2. Check the back seat area and around the car before getting inside.
3. Try not to drive alone, especially at night. If you are "cruising," go with at least one friend and stay together. Do not leave separately or go off alone with other people.
4. Leave space between your car and other cars when driving or stopped. You need room to manuever and leave quickly in case of an attack.
5. Do not leave your purse, packages or other valuables in the car. If you do, put them out of sight (i.e., trunk, glove box, under the seat.
6. If you see a vehicle in distress, it may be best not to stop. Drive on and alert police or a nearby gas station. Note all details of vehicle.
7. If someone signals that something is wrong with your car, use your best judgment whether or not to stop. Try to make it to a public area and check it out.
8. Avoid parking in poorly lighted areas. Plan ahead if it is daylight when you leave your car and darkness when you return.
9. Prevent being stranded alone with a broken down vehicle:
   a. Stick to well-traveled and well-lighted highways and streets.
   b. Check your gas gauge before each trip.
   c. Know how to change a tire.
   d. Keep your car in good running order.
   e. If your car breaks down in a strange area or neighborhood, stay in the car, and keep the doors locked. When someone comes by, roll down the window just far enough to ask them to call the police, service station, or CB emergency channel for you.

10. If you suspect someone is following you or trying to run you off the road, do something to attract attention. As long as your car is operable, stay in it and keep the motor running. Drive to a fire station, police station, an all-night grocery, drug store, restaurant or anywhere that there are people to help you. It's generally best not to go home.

The best advice about hitchhiking is "Don't." There are safer and better ways to travel: buses, bicycles, carpools, cross country skiing, snowmobiles, 3-wheelers, even walking. However, since some students will accept rides from strangers, here are some suggestions. But please remember, even if you follow these suggestions, you are still placing yourself in the highest rape-risk category. When you hitchhike, you are a prime target because of your obvious vulnerability.

1. Do not hitchhike alone. Make sure two of you get in and out of the car at the same time.
2. If you think the driver has been drinking, pass up the ride.
3. Find out the driver's destination before you say where you are going.
4. Check to make sure the inside door handle is there and that it is working so you can exit quickly in an emergency. If the door handle is missing, turn down the ride.
5. If you are carrying money, do not mention it.
6. Do not answer any personal questions.
7. Most important, use your intuition. If you have any doubts or uneasiness about the driver, turn down the ride.

STREETS AND PUBLIC AREAS

WALKING

1. When possible, avoid walking alone, especially during dark hours. Walk with someone or at least in areas where other people are near.

2. Stay in well-lighted areas away from dark secluded spots, wooded areas, and alleys. Walk in the center of the sidewalk.

3. Be alert and do not daydream. Surprise is the attacker's best weapon.

4. Do not overload yourself with parcels. Keep a tight grip on valuables, such as your purse.

5. Avoid wearing expensive jewelry or carrying large sums of money.

6. Have keys ready before you arrive home so you don't fumble around at your door, unaware of your surroundings.

7. Walk on the sidewalk/side of the road facing the traffic.

8. If you think you are being followed, go to the nearest business, residence, or cross the street. Walk confidently and try to get near other people. If that person is in a car, change directions. It is much harder for a car to turn around. Now you will have a head start on getting help. Remember to get a license number if possible.

9. If a driver stops to ask you directions, avoid getting near the car.

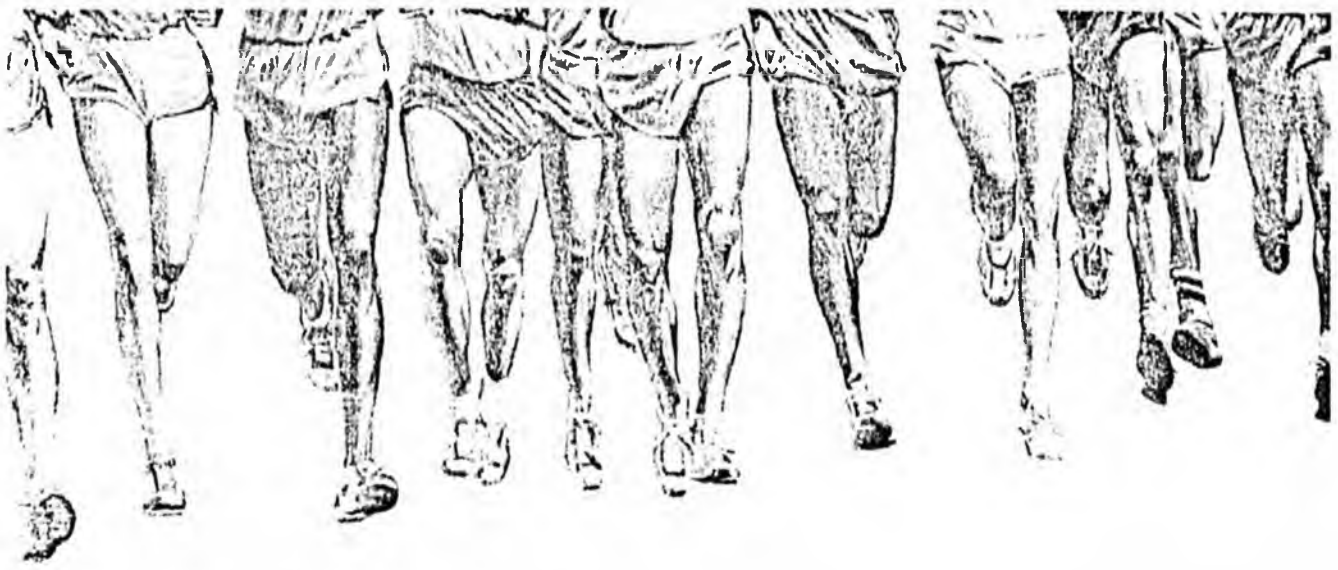
10. Do not stop to pick up mail at night.

11. It is your right to wear anything you wish in public. However, sometimes clothing may communicate something you don't intend. Dress wisely. High heels, clogs, tight clothes, and heavy boots hinder quick movement.

12. Carry your purse, backpack or wallet close to your body. Don't flash large sums of money in public. Some sexual abuses occur in conjunction with a robbery.

13. Do not flirt with strangers at the movies, skating rink, store, bar, etc. Do not underestimate a stranger because he is nice, good looking, or appears to be honest.

14. Do not step into an elevator alone with a suspicious looking person. Always stand by the floor button controls and the emergency call button.



15. Do not go to laundromats alone late at night.

16. Know your date. Avoid blind dates unless you are accompanied by another person or couple. Stay out of "lover's lanes" or isolated parking spots. When first dating a person, suggest public places.

17. If riding public transportation alone, don't take back seats. Sit near the driver.

RUNNING/JOGGING

Running and jogging are increasingly popular activities in Alaska. With this rise in popularity comes an increased awareness of the problems runners and joggers face.

1. Run with a partner. It is not always possible, but remember, there is safety in numbers.

2. Let someone know where you are going to be running and when you expect to return.

3. Always lock your house or apartment. Have good exterior lighting around your residence, especially for the winter months.

4. Do warm-up exercises inside or in areas where other people are near. Avoid using isolated areas.

5. Alter your route somewhat so that there is not a distinct pattern. However, be familiar with your routes and know the safety spots along the way. If you think you are being followed, go to the nearest business or residence for help. If there are no places to go, stop another jogger and tell them.

6. Traffic problems make you want to run in isolated areas, but they can be dangerous if an emergency arises (heart attack, injury, abuse, etc.) and help is needed. One solution is to run on bike paths and sawdust trails in parks. Unfortunately, these areas have gotten the undeserved reputation as a rapist's haven and because of this, people are avoiding them. However, the fact remains that as fewer people use these facilities they become increasingly isolated, and the risk of personal abuse rises.

7. If you must run on roads, pick your route carefully. Never run on a major highway or thoroughfare. Never run on a road that does not have an escape shoulder. Run facing the traffic and wear clothing that makes you highly visible. Wear light colored clothing at dawn and dusk, reflectors at night and bright clothing during the day.

8. Remember, as a runner, you are still a pedestrian and must obey all pedestrian laws including traffic signals. Be a defensive runner. Assume all motorists do *not* see you and will *not* yield to you. If you think that intersection down there is the finish line of the 5,000 meter run, you may be in your last race. If you want to race, do it on a track.

9. Stay in well-lighted areas. Avoid bushes, alleys, entry ways, and secluded locations. Run courses that pass by open areas or near roadways where there is at least some traffic or places to which you can run if pursued.

10. Be aware of traffic, people and your surroundings at all times. Do not daydream. An attacker many times chooses people who appear disoriented, lost or who lack self-confidence and direction.

11. Runners many times feel invincible. Never assume that because you are a runner you are faster than an attacker. Almost any attacker can muster up enough speed to catch a victim. A few yards of determined energy may be all he needs.

12. During your run, do not exhaust yourself by running so hard that if you are attacked you are too weak to resist or run away.

Report and encourage other runners to report *all* incidents, even those which seem only suspicious or minor in nature, to law enforcement officials. You may prevent other joggers from becoming future victims. You have the right to pursue such activities as running and jogging and the right to pursue them without fear of attack.

Objective #2: Students will demonstrate their ability to recognize home security weaknesses and how to correct them through class discussion and by completing the take home checklist.

Activity: (7-12) Teacher Lecture
Prevention Techniques—Indoors: At Home and with the Telephone (25 minutes)

Prevention Techniques—Indoors

There are many things in your physical environment which you can control. Whether it's changing a lock on a door or changing your name in the telephone book, you can regulate a portion of your own security.

IN THE HOME

1. Keep all doors and windows locked. Install deadbolt locks on exterior doors. Be sure doors are solid core and hinges are on the inside of the house.

2. Sliding glass doors and windows should have a stick or rod in the lower track and flat headed screws in the upper track.

3. If you move to a new home or apartment, change all locks. You don't know who has duplicate keys.

4. Don't hide extra keys outside such as under a doormat.

5. Maintain good exterior lighting all around the house. Photoelectric cells are inexpensive and work well. They turn lights on and off in accordance with the daylight. Keep shrubbery and fences low so no one can hide easily behind them.

6. Purchase electric timers for inside lights. Have lights come on routinely. Always come into your home with lights on.

7. If you come home and suspect someone has entered while you were away, do not enter. Leave quickly and quietly and call the police from a neighbor's home.

8. When dark, pull all shades or drapes. Don't undress in front of an uncovered window.

9. When someone comes to your door, don't open it automatically. Check to see who is there by looking out the window or using a peek hole. Do not rely on chain locks since it takes minimal pressure on the door for the chain to come off the wall.

10. Require repairmen to show identification by slipping the card under the door. Call the business to verify his reason for being in the area. Don't call the number he has listed on his card.

11. Don't let strangers in to use your phone. Make the call for them or simply direct them to a telephone elsewhere.

12. Familiarize yourself with the position of all meters and fuse boxes in your home. If they are located outside, do not let anyone inside who needs to check them. Also, be sure they are padlocked if located outside.

13. A dog or a sign that says "Beware of Dog" may be a good deterrent.

14. Use your initials rather than your first name on your mailbox, a last name alone may be sufficient. You may want to add made-up names to give the illusion there are several living at the location.

15. Practice an "emergency" situation; for example, what would you do if someone broke into your home?

TELEPHONE

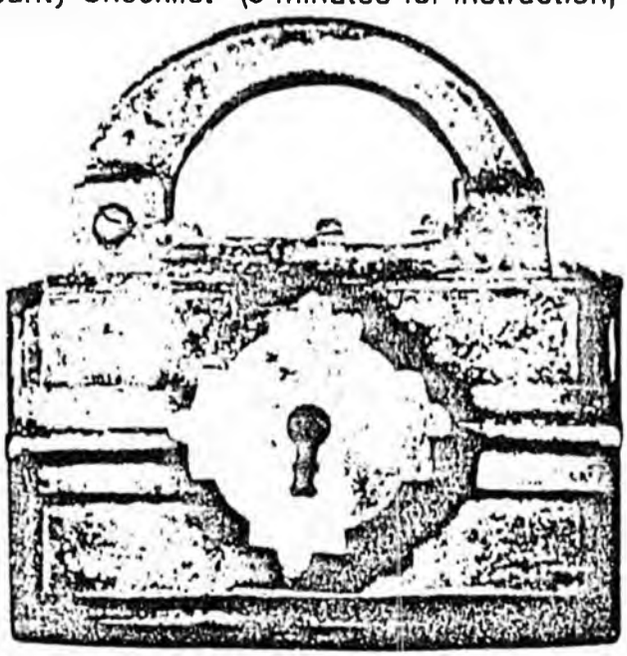
1. List your family's name in the telephone book under your last name and first two initials. You may also want to consider the option of not listing your address in the phone book.

2. Do not give out your number to someone who believes they have the wrong number. Instead, ask, "What number are you trying to call?"

3. Never tell strangers/acquaintances that you are home alone. Fake the presence of others if necessary, "I'll be right there, John," or "Would you like to speak to my father about this?"

4. Do not give name and address out to strangers over the phone.

5. Hang up immediately on obscene or threatening calls.



6. Report obscene or threatening calls to the police and the telephone company. Try to remember as much as you can about the voice: accent or peculiarities; where you have had your telephone number printed recently, etc.

7. Never answer the telephone with your name. Make the caller identify the name or number that he or she needs first.

8. List emergency numbers on the phone (i.e., with tape or stickers obtained from local emergency services).

9. Do not put your name and address on bulletin boards indiscriminately when advertising an item to sell. It is safest to only list your telephone number.

Activity: "Take Home Security Checklist" (5 minutes for instruction, 30 minutes at home)

Home Security Check-List

OK	Needs Change	
		DOORS
____	____	Are all your outside doors equipped with deadbolt locks? Are your door hinges the type on the outside of the house that can be lifted out?
____	____	Do your exterior doors, especially the front door, have peek holes or sight viewers?
____	____	Are you careful about lending or giving out duplicate keys? Do you know where they all are?
____	____	Are your sliding glass doors secured horizontally (stick) and vertically (screws)?
____	____	Does your bedroom door lock?
____	____	Are your exterior doors solid core, not hollow core?
____	____	Is your garage door secure?
		WINDOWS
____	____	If you have wooden, double hung windows, are they "pinned" and secured?
____	____	If you have sliding glass windows, are they secured horizontally and vertically?
____	____	Do you close your curtains at night?
____	____	Are your curtains heavy enough so no one can see in? (Check them at night.)
		LIGHTING (inside and outside)
____	____	Do you have good lighting on the front of your home? (walkways, courtyard, front door)
____	____	Do you have good lighting on the side of your home?
____	____	Do you have good lighting on the back of your home?
____	____	Are these outside lights high enough so they cannot be broken or unscrewed easily by someone at ground level?
____	____	Is your fuse box on the inside of your home? If on the outside, is it locked?
		LANDSCAPING
____	____	Is your shrubbery trimmed so that it does not hide or conceal windows?
____	____	Is your fence see through so that neighbors/police would notice a prowler?
		MISCELLANEOUS
____	____	Do you have emergency numbers printed on or next to your telephone?
____	____	Have you practiced a fire drill within the home in the last six months?
____	____	Do you avoid having identification on your keys?
____	____	Do you know your neighbors? Could you call them for help if you needed it?

List specific recommendations on back for all "Needs to be Changed" answers.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 566 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to training of teachers and principals on the subjects of child abuse and sexual abuse of minors."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.03.030 is amended by adding a new subsection to read:

(b) The school term in each school district shall include two days of in-service training of teachers and principals on the subjects of child abuse and sexual abuse of minors.

HB

567

MEMORANDUM 3/28/84

TO: Mae
FROM: Bill
RE: HB 567 (NEA Request)

As you requested, I told Bob Manners that HB 567 would not be calendared on Friday of next week. I implied it was because of scheduling problems. I did not say whether the bill would be considered for calendaring at a later date, but he didn't ask anyway.

Since I had said I would let Anne in Lacher's office know what your decision was, I also told her that scheduling problems would make it impossible to hear the bill on Friday.

You recall she had sent a formal request for you to hear the bill. I think Barb Lacher will probably call today in regard to the bill.

/wtl

MEMORANDUM 3/28/84

TO: Mae
FROM: Bill
RE: NEA Request

I did let Bob Manners know that HB 567 may be considered for calendaring should the other bills tied in with this one show any promise of moving in other committees.

I remind you that tomorrow is the day we must submit our committee schedule for next week. I have checked with other committees to see if HCR 46 or HB 566 "show any promise of moving." To date, no committee hearing has been scheduled for either bill. Neither bill ~~has bill~~ has yet been calendared for the House floor. Please bear in mind that the day Bob would like the bills heard is Friday, April 6 -- next week. I must let the clerk know if we want to hear this bill.

/wtl

Bill
Tell Manners that
HB 567 may be
considered for calendary
should the other
bills tied in with this
one show any promise
of moving in the
committees.

MEMORANDUM

TO: Mae
FROM: Bill
DATE: March 23, 1984

RE: NEA Request

Bob Manners, Secretary of the NEA-Alaska, called and asked that you consider calendaring one of the two following bills on Friday, April 6:

HB 522 (Duncan) - Mandatory Kindergarten

HB 567 (Lacher) - Appropriation to DOE to develop a training program on sexual abuse

The NEA fly-in begins on Friday and Bob said that many of the teachers would like to hear one or both of these bills.

I said that you had announced that the HESS Committee would not be hearing any new House Bills after April 2, but that I would ask you if you wanted to allow this one exception.

If you don't want to hear one of the bills, I would like to call Bob and let him know of your decision.

Please bear in mind that Barbara Lacher has requested in writing that you hear HB 567. It might be a good idea to do so -- being careful to announce that the exception was being made only because of the unique circumstances (that is, the fly-in, Lacher's earlier request, previous passage of bills related to this appropriation). This appropriation could even be identified as a "clean-up measure," since earlier legislation will have little affect without this funding.

MEMORANDUM

TO: Rep. Fischer, Chair
House Health, Education, and Social Services Committee

FROM: Rep. Zharoff

DATE: Febraury 9, 1984

RE: HB 570, An act making a special appropriation for payment as a grant to the Kodiak Island Borough for construction of the Kodiak auditorium and remodeling of Kodiak main elementary school; and providing for an effective date.

I wish to take this opportunity to request that the HESS Committee hold a hearing on HB 570 at the earliest possible convenience. If possible, I would request the hearing be teleconferenced to include the city of Kodiak, and other sites that may have an interest in HB 570. There are many people in my community that wish to participate in the hearing and I have been told that there may be others around the state that may wish to participate as well. (I have requested a list from the promoters of the auditorium of known supporters in other parts of the state.)

You may contact my office staff for needed back-up or to answer any questions that may arise. Thank you for your attention to this matter.

PERSEVERANCE
T·H·E·A·T·R·E

March 6, 1984

TO: Members of the House HESS Committee
SUBJ: Support for HB 570

Perseverance Theatre wishes to express our support for Rep. Zharoff's measure to build an auditorium facility in Kodiak in conjunction with the Kodiak High School.

The auditorium would benefit not only the students of Kodiak High School, but those organizations and individuals who participate in the performing arts. It would also increase the entertainment possibilities for the community. We urge its passage.

Sincerely,

Deborah B Baley

Deborah Baley
Producing Director

INTRODUCTION

The Kodiak Island Borough School District has completed several planning studies and has determined:

1. The School and Community needs are best served by the construction of a new Auditorium seating 750 people and remodeling Old Main Elementary School into support facilities for the Auditorium and other uses all on the Mill Bay School Complex Site.

2. That the Auditorium should be located to provide interior access from the Junior High School and High School without either student body crossing the others "territory" and also provide direct public access.

3. That music and some other facilities would be shared by the Junior High School and High School.

4. This new construction and remodeling would occur in the year following the remodeling of the Junior High School.

5. This project should provide a low maintenance, energy efficient educational facility that would be in architectural and fuctional harmony with the existing school buildings on this site.

6. The School District wishes to develop buildings that are a good "buy" in the opinion of the tax payers and attractive, functional buildings that are of low maintenance and energy efficient are the way to achieve this.

The intent of this education specification is to provide a sound program that defines the capabilities required of the facilities but does not dictate the design. This is particularily important in the case of the Auditorium so that the Architect can be creative in the design and perhaps provide even greater capabilities than those now required or envisioned.

This education specification is of a "streamlined" nature and relies on the master plan for the Mill Bay School Complex Site and previous educational specifications to provide a basis for this project and for such information as demographics and other community and school descriptions.

SCHOOL USES

KODIIAK AUDITORIUM AND MAIN
SCHOOL REMODEL

HB570 provides for a special appropriation to fund the Kodiak Auditorium and remodeling of the Main school. The bill is a revision to Representative Zharoff's sponsored HB269 and reduces the funding request by $386 thousand.

The Kodiak Community has identified the need for a multi-use facility for at least ten years. The facility would provide adequate stage area and seating for school and community art functions. The project has been identified in both the Kodiak City and Borough Capital Improvement Projects Plan. Additionally, The facility was also been targeted by the State Cultural Facility Council as a number one priority.

At present, the architectual and preliminary designs for the facility have been completed. A maintenance and operation budget report was prepared to indicate a cost of one quarter million dollars per year for the facility. The Borough has indicated that the current mill rates and existing levels of federal and state school funding subsidies are sufficient to cover the M & O of the facility.

REPRESENTATIVE WALT FURNACE

March 14, 1984

TO: House Health, Education, and Social Services Committee

FROM: Representative Walt Furnace

SUBJECT: House Bill 579

The purpose of this legislation is to correct an inequity existing in the Anchorage School District. Presently, all JROTC instructors regardless of educational attainment and the certification that reflects that attainment are paid at a lower level than their teacher colleagues. They are paid at 90 percent of the salary level of their teacher counterparts.

The bill in its present form grants teacher status to only certificated instructors that are charged with the direct supervision and teaching of students.

This legislation gives qualified JROTC instructors professional recognition as teachers and allows them to participate in the teachers retirement system.

MEMORANDUM

TO: Representative Mae Tischer
FROM: Bill Lovell, House HESS Committee Staff
DATE: March 14, 1984

RE: Sectional Analysis of HB 579

Pursuant to your request, I have prepared the following sectional analysis of House Bill 579, "An Act relating to Junior Reserve Officer Training Corps instructors."

Section 1 includes certain Junior Reserve Officer Training Corps instructors within the definition of "teacher" contained in AS 14.20.207 (1), which applies to all of AS 14.20, "Teachers and School Officials." Junior ROTC instructors thus included would be limited to those Junior ROTC instructors who

1.) are responsible for student supervision;
2.) have direct student contact for five or more hours a day; and
3.) are certificated instructors.

Section 2 includes certain Junior Reserve Officer Training Corps instructors within the definition of "teacher or member" contained in AS 14.25.220 (38), which applies to all of AS 14.25, "Teachers' Retirement." Junior ROTC instructors thus included would be limited to those Junior ROTC instructors who

1.) are responsible for student supervision;
2.) have direct student contact for five or more hours a day; and
3.) are certificated instructors.

Position Paper

HB 579

Passage of this bill would allow Junior Reserve Officer Training Corps Instructors to participate in the Teachers' Retirement System (TRS) if they are responsible for student supervision for five hours or more each day and if they are certificated.

The Department opposes this bill. To open participation in the Teachers' Retirement System to certain individuals who happen to be certificated but for whom certification is not a condition of employment does not appear to serve any public purpose. There are undoubtedly other employees in the Public Employees' Retirement System who happen to possess a certificate and would have reason to pursue coverage under the TRS.

House Bill 579
Fiscal Note Analysis
Prepared by the Division of Retirement & Benefits
Department of Administration

March 13, 1984

IV Analysis: Passage of this bill will allow Junior Reserve Officer Training Corps instructors to participate in the Teachers' Retirement System (TRS) if they are individually certificated and supervise students for five or more hours a day.

Currently there are nine positions covered by the Public Employees' Retirement System (PERS) that we estimate would qualify under this bill. Those positions are currently with the Anchorage School District, which would experience an increase in cost equal to the state match.

FY 85	FY 86	FY 87	FY 88	FY 89
17.5	18.9	20.4	22.0	23.8

The present value of this benefit is $80,000. This bill would have no perceptible effect on the funding ratio.

an active member, no benefits or refunds may be paid under this chapter and the member's records may be destroyed. (§ 14 ch 84 SLA 1969; am § 23 ch 13 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

Sec. 14.25.210. Penalty for false statements. A person who willfully or knowingly makes a false statement, or falsifies or permits to be falsified any record of the retirement system, is guilty of a misdemeanor and, upon conviction, is punishable by a fine of not more than $500 or by imprisonment for not more than six months, or by both, and forfeits all rights under this chapter. (§ 20 ch 145 SLA 1955)

Sec. 14.25.220. Definitions. In this chapter, unless the context requires otherwise,

(1) "active member" means a member who is employed by an employer, is receiving compensation on a full-time or part-time basis and is making contributions to the system, or a member making contributions under AS 14.20.330 or 14.20.345;

(2) "actuarial adjustment" means equality in value of the aggregate expected payments under two different forms of pension payments, considering expected mortality and interest earnings on the basis of tables adopted from time to time by the board;

(3) "administrator" means the person appointed by the commissioner of administration under AS 14.25.015;

(4) "annuitant" means a retired member or a disabled member who is receiving a benefit under this system;

(5) "average base salary" means the result obtained by dividing the sum of the member's three highest years' base salary by three, or if a member does not have three years base salary, then by dividing the sum of all base salaries by the number of years of base salary; the base salary for a year in which credit is granted for disability totaling more than one-third of a year may not be used in the computation of the average base salary; the base salary in a school year for which the member receives compensation for less than two-thirds of a year may not be used in the computation of the average base salary; if compensation is received for more than two-thirds of a year, the full base salary for that school year shall be used in the computation of the average base salary;

(6) "base salary"

(A) means the total remuneration payable under contract for a full year of membership service, including addenda to the contract;

(B) has the same meaning as "compensation" under AS 39.35.680(8) when applied to a state legislator who elects membership under AS 14.25.040(b);

(7) "beneficiary" means a person designated by a member to receive benefits that may be due from the system upon the member's death;

(8) "BIA service" means service, including partial years, as a teacher in a school operated by the Bureau of Indian Affairs in Alaska;

(9) "compensation" means the total remuneration paid under contract to a member for services rendered during a school year, including cost-of-living differentials, payments for leave that is actually used by the member, the amount by which the member's wages are reduced under AS 39.30.150(c), and the amount deferred under an employer-sponsored deferred compensation plan or the tax shelter annuity plan approved by the Department of Education, but does not include retirement benefits, welfare benefits, per diem, expense allowances, workers' compensation payments, or payments for leave not used by the member, whether those leave payments are scheduled payments, lump-sum payments, donations, or cash-ins; for purposes of AS 14.25.050, compensation paid includes any payment made after June 30 of a school year for services rendered before the end of the school year;

(10) "credited service" means all membership service as provided in (20) of this section, territorial employment as defined in (41) of this section, plus outside, military, and Alaska BIA service, with outside and military service limited to 10 years except under the conditions set out in AS 14.25.100;

(11) "deferred vested member" means an inactive member who meets the service requirements of a vested member;

(12) "dependent child" means an unmarried child of a member, including an adopted child, who is dependent upon the member for support and who is either (A) less than 19 years old, or (B) less than 23 years old and registered at and attending on a full-time basis an accredited educational or technical institution recognized by the Department of Education; the age limits set out in this paragraph do not apply to a child who is totally and permanently disabled;

(13) "disabled member" means a member who is terminated, who has not received a refund from the system, and who is receiving a disability benefit from the system;

(14) "early retirement" means retirement under AS 14.25.110(b);

(15) "employer" means a public school district, the Board of Regents of the University of Alaska, the Department of Education, the National Education Association of Alaska, the Regional Resource Centers or the state legislature with respect to a state legislator who elects membership under AS 14.25.040(b);

(16) "former member" means a member who is terminated and who received a total refund of the balance of the mandatory contribution account, or who has requested in writing a refund of the balance of the mandatory contribution account;

(17) "full-time teacher" means a teacher occupying a position requiring teaching on a regular basis for the normal work period per day or week at a teaching assignment, excluding teaching as an assistant or graduate assistant or teaching on a substitute, temporary, or per diem basis;

(18) "inactive teacher or member" means a member who is terminated and who has not received a refund from the system or a member who is on leave of absence and who is not making contributions under AS 14.20.345;

(19) "member contribution account" means the total maintained by the system of the member's mandatory contributions, indebtedness principal and interest contributions, interest credited to each of those accounts, and adjustments to the account in accordance with AS 14.25.170;

(20) "membership service" means

(A) full or part-time service as a teacher in a public school in the Territory or State of Alaska, or both, under the supervision and control of the Territorial Board of Education or the Department of Education or the school board of a city, regional educational attendance area, or borough school district;

(B) full-time or part-time teaching at the University of Alaska or a full-time administrative position at the University of Alaska which requires academic standing and which has been approved for inclusion in the system by the adminstrator;

(C) any period during which the teacher receives a disability benefit under this system or is on an approved sabbatical leave granted in accordance with AS 14.20.310; or

(D) continuous service as a state legislator when performed by a state legislator who elects membership under AS 14.25.040(b), subject to the requirements of AS 14.25.040(c);

(21) "military service" means active duty in the armed forces of the United States;

(22) "nonpublic school" means a school established by an agency other than a state which is primarily supported by other than public funds, and operation of whose programs rests with other than publicly elected or appointed officials, and is state approved or accredited;

(23) "non-vested member" means an active or inactive member who does not meet the requirements of a vested member or deferred vested member;

(24) "normal retirement" means retirement under AS 14.25.110(a);

(25) "outside service" means service

(A) as a certificated full-time elementary or secondary teacher or a certificated person in a full-time position requiring a teaching certificate as a condition of employment in an out-of-state public school within the United States, or in a school outside the United States supported by funds of the United States;

(B) as a certificated full-time elementary or secondary teacher or a certificated person in a full-time position requiring a teaching certificate as a condition of employment in an approved or accredited nonpublic school within the United States, or in a school outside the United States supported by funds of the United States;

(C) in a full-time position requiring academic standing in an out-of-state institution of higher learning accredited by a nationally recognized accrediting agency as listed in the Education Directory — Colleges and Universities by the National Center for Education Statistics;

(D) as a full-time teacher in an approved or accredited nonpublic institution of higher learning in Alaska;

(26) "part-time teacher" means a teacher occupying a position requiring teaching on a regular basis for at least 50 percent of the normal workweek at a teaching assignment, excluding teaching as an assistant or graduate assistant, or teaching on a substitute, temporary, or per diem basis;

(27) "permanent disability" means a physical or mental condition which, in the judgment of the administrator, based upon medical reports and other evidence satisfactory to the administrator, presumably prevents a member from satisfactorily performing the member's usual duties for the member's employer or the duties of another position or job which an employer makes available for which the member is qualified by training or education;

(28) "prescribed rate of interest" means the rate of interest used for computing employer contributions, for preparing actuarial tables used by the system, for crediting interest to members' contributions, and for charging interest on members' indebtedness accounts;

(29) "public school" means a school operated by publicly elected or appointed school officials in which the program and activities are under the control of those officials and which is supported by public funds;

(30) "r red teacher or member" means a member who is terminated, who has not received a refund from the system, and who is receiving a benefit, other than disability, from the system;

(31) "retirement" means that period of time from the first day of the month following

(A) the date of termination; and

(B) application for retirement in which a person is appointed to receive a retirement benefit, other than a disability benefit;

(32) "retirement benefit" means the annuity received by a retired member from the system;

(33) "retirement fund" means the fund consisting of all matching contributions by local school districts, money made available by appropriations by the state legislature and from all contributions from whatever source, and income and interest derived from the investment of money;

(34) "Retirement System of 1945" and "Retirement Fund of 1945" or like terms mean the system and fund established in sections 37-5-21 — 37-5-35, ACLA 1949;

(35) "school year" means the 12-month period beginning July 1 of each year and ending June 30 of the following year;

(36) "supplemental contribution account" means the account maintained by the system to record the supplemental contributions of each member, including interest and adjustments to the account in accordance with AS 14.25.170;

(37) "system" means the Teachers' Retirement System of Alaska;

(38) "teacher or member" means a person eligible to participate in the system and who is covered by the system, including:

(A) a certificated full-time or part-time elementary or secondary teacher, a certificated school nurse, or a certificated person in a position requiring a teaching certificate as a condition of employment in a public school of the state;

(B) the commissioner of education and all supervisory positions in the Department of Education;

(C) a full-time or part-time teacher of the University of Alaska or a person occupying a full-time administrative position at the University of Alaska which requires academic standing; the approval of the administrator must be obtained before an administrative position qualifies for membership in the system;

(D) a state legislator who elects membership under AS 14.25.040(b);

(39) "vested member" or "vested teacher" means an active member who has completed either

(A) 15 years of service, the last five of which have been membership service, for a member first hired before July 1, 1975; or

(B) eight years of membership service; or

(C) five years of membership and three years of BIA service;

(40) "year of service" means membership service during the dates set for a school year; partial-year service credit is given for membership service before July 1, 1969, during any school year as follows:

(A) less than 20 days, no credit;

(B) 20 days or more but less than 35 days, 0.2 years;

(C) 35 days or more but less than 49 days, 0.3 years;

(D) 49 days or more but less than 63 days, 0.4 years;

(E) 63 days or more but less than 77 days, 0.5 years;

(F) 77 days or more but less than 91 days, 0.6 years;

(G) 91 days or more but less than 105 days, 0.7 years;

(H) 105 days or more but less than 119 days, 0.8 years;

(I) 119 days or more but less than 133 days, 0.9 years;

(J) 133 days or more, 1.0 years; partial-year service credit is given for membership service after July 1, 1969, during any school year as follows:

(A) less than nine days, no credit;
(B) nine days or more but less than 27 days, 0.1 years;
(C) 27 days or more but less than 45 days, 0.2 years;
(D) 45 days or more but less than 63 days, 0.3 years;
(E) 63 days or more but less than 81 days, 0.4 years;
(F) 81 days or more but less than 100 days, 0.5 years;
(G) 100 days or more but less than 118 days, 0.6 years;
(H) 118 days or more but less than 136 days, 0.7 years;
(I) 136 days or more but less than 154 days, 0.8 years;
(J) 154 days or more but less than 172 days, 0.9 years;
(K) 172 days or more, 1.0 years; if service is performed on a part-time basis, one-half credit shall be given for each day of service.

(41) "territorial employment" means non-teaching employment with the Territory of Alaska as provided under AS 14.25.105; territorial employment is not membership service;

(42) "board" means the Alaska Teachers' Retirement Board established under AS 14.25.035. (§ 2 ch 145 SLA 1955; am § 1 ch 142 SLA 1957; am § 2 ch 89 SLA 1960; am § 7 ch 179 SLA 1960; am §§ 1, 2 ch 78 SLA 1962; am §§ 8 — 12 ch 86 SLA 1963; am § 1 ch 111 SLA 1965; am §§ 20 — 22 ch 151 SLA 1966; am § 1 ch 76 SLA 1968; am §§ 15 — 19 ch 84 SLA 1969; am § 21 ch 46 SLA 1970; am §§ 13 — 18 ch 138 SLA 1970; am §§ 3 — 5 ch 229 SLA 1970; am §§ 16 — 18 ch 32 SLA 1971; am §§ 6 — 8 ch 86 SLA 1971; am §§ 30 — 33 ch 66 SLA 1973; am § 3 ch 57 SLA 1974; am § 21 ch 127 SLA 1974; am §§ 12, 13 ch 173 SLA 1975; am §§ 1, 6 ch 155 SLA 1976; am § 5 ch 169 SLA 1976; am §§ 12, 13 ch 128 SLA 1977; am §§ 4, 5 ch 174 SLA 1978; am §§ 4 — 7 ch 82 SLA 1979; am § 24 ch 13 SLA 1980; am §§ 25 — 28 ch 137 SLA 1982)

Effect of amendments. — The 1980 amendment rewrote the section.

The 1982 amendment inserted the language beginning "including cost-of-living differentials" and ending "whether those leave payments are scheduled payments, lump-sum payments, donations, or cash-ins" in paragraph (9), inserted "territorial employment as defined in (41) of this section" and substituted "Alaska BIA service" for "service not exceeding 15 years" in paragraph (10), substituted "'member contribution account'" for "'mandatory contribution account'," "total" for "account," and "of the member's mandatory contributions, indebtedness principal and interest contributions, interest credited to each of those accounts" for "to record the mandatory contributions of each member, including interest" in paragraph (19), and added paragraphs (41) and (42).

Editor's notes. — Sections 37-5-21 — 37-5-35 ACLA 1949 referred to in (34) were repealed by § 24, ch. 145, SLA 1955.

Paragraph (1) of section 51, ch. 13, SLA 1980 provides: "This Act takes effect July 1, 1980 except that (1) the definitions of 'military service' and 'outside service' contained in AS 14.25.220(21) and (25), and the definitions of 'membership service' and 'teacher or member' contained in AS 14.25.220(20) and (38) to the extent that they apply to part-time teachers at the University of Alaska, as repealed and re-enacted in sec. 24 of this Act, take effect March 22, 1980, and are retroactive to July 1, 1955."

Legislative history reports. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, p. 138. For report on ch. 127, SLA 1974 (SCSHB 817 am S), see 1974 House Journal, p. 657.

14.18.070, and that the measures taken under (a) of this section have been ineffective, the board shall withhold state funds in accordance with AS 14.07.070. (§ 1 ch 17 SLA 1981)

Revisor's notes. -- The words "(a) of this section" were substituted for "AS 14.18.090(a)" this in subsection (b) by the revisor of statutes pursuant to AS 01.05.031.

Sec. 14.18.100. Remedies. (a) A person aggrieved by a violation of this chapter or of a regulation or procedure adopted under this chapter as to primary or secondary education may file a complaint with the board and has an independent right of action in superior court for civil damages and for such equitable relief as the court may determine.

(b) A person aggrieved by a violation of this chapter or of a regulation or procedure adopted under this chapter as to postsecondary education has an independent right of action in superior court for civil damages and for such equitable relief as the court may determine. (§ 1 ch 17 SLA 1981)

Sec. 14.18.110. Effect of chapter. This chapter is supplementary to and does not supersede existing laws relating to unlawful discrimination based on sex. (§ 1 ch 17 SLA 1981)

Chapter 20. Teachers and School Officials.

Article
1. Teacher Certification (§§ 14.20.010 — 14.20.090)
2. Employment and Tenure (§§ 14.20.095 — 14.20.210)
3. Salaries (§§ 14.20.220 — 14.20.275)
4. Sabbatical Leave (§§ 14.20.290 — 14.20.350)
5. Professional Teaching Practices Act (§§ 14.20.370 — 14.20.510)
6. Negotiation and Mediation (§§ 14.20.550 — 14.20.610)
7. Interstate Agreement on Qualification of Educational Personnel (§§ 14.20.620 — 14.20.650)

Article 1. Teacher Certification.

Section
10. Teacher certificate required
20. Requirements for issuance of certificate
30. Causes for revocation and suspension
40. Applicability of the Administrative Procedure Act
90. [Repealed]

Collateral references. — 68 Am. Jur. 2d Schools, §§ 128-143.

78 C.J.S. Schools and School Districts, §§ 154-182.

Matters proper for consideration in appointment of teachers. 94 ALR 1484

Tests of moral character of fitness as requisite to issuance of teacher's license or certificate. 96 ALR2d 536.

Bias of members of license revocation board. 97 ALR2d 1210.

Actionability of statements imputing inefficiency or lack of qualification to public school teacher. 40 ALR3d 490.

Sec. 14.20.010. Teacher certificate required. A person may not be employed as a teacher in the public schools of the state unless that person possesses a valid teacher certificate except that a person who has made application to the department for a teacher certificate or renewal of a teacher certificate which has not been acted upon by the department may be employed as a teacher in the public schools of the state until the department has taken action on the application, but in no case may employment without a certificate last longer than three months. (§ 37-5-3 ACLA 1949; am § 9 ch 98 SLA 1966; am § 1 ch 165 SLA 1976)

Editor's notes. — The words "that person" were substituted for "he" by the revisor of statutes under AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.020. Requirements for issuance of certificate. (a) The department shall issue a teacher certificate to every person who meets the requirements in (b) and (c) of this section.

(b) A person is not eligible for a teacher certificate unless that person has received at least a baccalaureate degree from an institution of higher education accredited by a recognized regional accrediting association or approved by the commissioner. However, this subsection is not applicable to

(1) persons employed in the state public school system on September 1, 1962;

(2) persons issued an emergency certificate during a situation which, in the judgment of the commissioner, requires the temporary issuance of a certificate to a person not otherwise qualified.

(c) The board may establish by regulation additional requirements for the issuance of certificates.

(d) The board may by regulation establish various classes of certificates. (§ 37-5-4 ACLA 1949; am § 1 ch 76 SLA 1962; am § 10 ch 98 SLA 1966; am §§ 13, 14 ch 32 SLA

Editor's notes. — In subsection (b), the words "that person" were substituted for "he" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Legislative history reports. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, p. 138.

Sec. 14.20.030. Causes for revocation and suspension. The commissioner or the Professional Teaching Practices Commission may revoke or suspend a certificate only for the following reasons:

(1) incompetency, which is defined as the inability or the unintentional or intentional failure to perform the teacher's customary teaching duties in a satisfactory manner;

(2) immorality, which is defined as the commission of an act which, under the laws of the state, constitutes a crime involving moral turpitude;

(3) substantial noncompliance with the school laws of the state or the regulations of the department; or

(4) upon a determination by the Professional Teaching Practices Commission that there has been a violation of ethical or professional standards or contractual obligations. (§ 11 ch 98 SLA 1966; am § 1 ch 9 SLA 1975; am § 1 ch 103 SLA 1976)

NOTES TO DECISIONS

Right of school teacher to serve as member of school board in same school district where employed. 70 ALR3d 1188.

Who is "teacher" for purposes of tenure statute. 94 ALR3d 141.

Sec. 14.20.095. Right to comment and criticize not to be restricted. No bylaw or regulation of the commissioner, a school board, or local school administrator may restrict or modify the right of a teacher to engage in comment and criticism outside school hours, regarding school personnel, members of the governing body of any school or school district, any other public official, or any school employee, to the same extent that any private individual may exercise the right. (§ 1 ch 14 SLA 1965; am § 13 ch 98 SLA 1966)

Revisor's notes. — The words "of education" were deleted following "commissioner" by the revisor of statutes under AS 01.05.031 and 14.60.010.

NOTES TO DECISIONS

This section was not enacted to be retrospective. Watts v. Seward School Bd., Sup. Ct. Op. No. 554 (File No. 427), 454 P.2d 732 (1969), cert. denied, 397 U.S. 921, 90 S. Ct. 899, 25 L. Ed. 2d 101, rehearing denied, 397 U.S. 1071, 90 S. Ct. 1495, 25 L. Ed. 2d 695 (1970).

It applies to activities conducted outside school hours. Watts v. Seward School Bd., Sup. Ct. Op. No. 554 (File No. 427), 454 P.2d 732 (1969), cert. denied, 397 U.S. 921, 90 S. Ct. 899, 25 L. Ed. 2d 101, rehearing denied, 397 U.S. 1071, 90 S. Ct. 1495, 25 L. Ed. 2d 695 (1970).

And is directed at rules or regulations which would restrict criticism of school officials. — This section is directed at the rules or regulations of a commissioner, a local school board, or a local administrator. Watts v. Seward School Bd., Sup. Ct. Op. No. 554 (File No. 427), 454 P.2d 732 (1969), cert. denied, 397 U.S. 921, 90 S. Ct. 899, 25 L. Ed. 2d 101, rehearing denied, 397 U.S. 1071, 90 S. Ct. 1495, 25 L. Ed. 2d 695 (1970).

Sec. 14.20.097. Duty-free time. Each governing body shall allow its teachers in school facilities with four or more teachers a daily duty-free mealtime of at least 30 minutes between 11:00 a.m. and 1:00 p.m. (§ 1 ch 11 SLA 1969)

Sec. 14.20.100. Unlawful to require statement of religious or political affiliation. No school board, or member of a school board may require or compel a person applying for the position of teacher in the public schools of the state to state a religious or political affiliation. (§ 37-5-1 ACLA 1949)

Editor's notes. — The revisor of statutes substituted "a" for "his" preceding "religious or political affiliation" pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Collateral references. — Discrimination because of race, color, or creed in respect of appointment, duties, compensation, etc., of schoolteachers or other public officers or employees. 130 ALR 1512.

Validity of governmental requirement of oath of allegiance or loyalty as applied to college curators. 12 ALR2d 303.

Dismissal or rejection of public schoolteacher because of disloyalty. 27 ALR2d 487.

Sec. 14.20.110. Penalty for violation of AS 14.20.100. A person violating AS 14.20.100 is punishable by a fine of not more than $100. (§ 37-5-2 ACLA 1949)

Sec. 14.20.120. Statement of qualifications. A statement of the qualifications of each teacher and superintendent employed by the state or a school district shall be filed with the commissioner. The statement shall contain the credits earned in college, normal school, or university, and the number of years of teaching experience both in the state and elsewhere in the form and manner prescribed by the commissioner. (§ 37-6-5 ACLA 1949; am § 5 ch 179 SLA 1957; am § 12 ch 46 SLA 1970)

Sec. 14.20.130. Employment of teachers and administrators. An employer may, after January 1, issue contracts for the following

school year to employees regularly qualified in accordance with the regulations of the department. The contract for a superintendent may be for more than one school year but may not exceed three consecutive school years. (§ 1 ch 92 SLA 1960; am § 14 ch 98 SLA 1966)

NOTES TO DECISIONS

Authority of school district to employ teachers. — A school district has no authority to employ teachers except as prescribed by statute and regulation. Spicer v. Anchorage Independent School Dist., Sup. Ct. Op. No. 325 (File No. 576), 410 P.2d 995 (1966).

Letter from superintendent of schools held not to be an offer of a contract. — See Spicer v. Anchorage Independent School Dist., Sup. Ct. Op. No. 325 (File No. 576), 410 P.2d 995 (1966).

Cited in Skagway City School Bd. v. Davis, Sup. Ct. Op. No. 1216 (File No. 2265), 543 P.2d 218 (1975).

Collateral references. — Duty of teacher to perform services other than those which pertain to instruction. 38 ALR 1414.

Instruction in physical education or coaching of athletic sports as within duties assumed by, or that may be assigned to, teacher, or among the subjects in respect of which teacher applicants must qualify. 119 ALR 819.

Sec. 14.20.140. Notification of nonretention. (a) If a teacher who has acquired tenure rights is not to be retained for the following school year, the employer shall notify the teacher of the nonretention by writing, delivered before March 16, or by registered mail postmarked before March 16.

(b) If a teacher who has not acquired tenure rights is not to be retained for the following school year the employer shall notify the teacher of the nonretention by writing delivered on or before the last day of the school term or by registered mail postmarked on or before the last day of the school term. (§ 1 ch 92 SLA 1960; am § 15 ch 98 SLA 1966)

NOTES TO DECISIONS

Notice of nonretention sufficient. — See Griffin v. Galena City School Dist., Sup. Ct. Op. No. 2469 (File No. 5388), 640 P.2d 829 (1982).

Quoted in State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

Collateral references. — Notice of intention to discharge teacher, or not to renew contract, sufficiency under statutes requiring such notice. 92 ALR2d 751.

Sec. 14.20.145. Automatic re-employment. If notification of nonretention is not given according to AS 14.20.140 a teacher is entitled to be re-employed in the same district for the following school year on the contract terms the teacher and the employer may agree upon, or if no terms are agreed upon, the provisions of the previous contract are continued for the following school year, subject to AS 14.20.158. The right to be reemployed according to this section expires if the teacher does not accept reemployment within 30 days after the date on which the teacher receives a contract of reemployment. (§ 16 ch 98 SLA 1966)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "a" for "his" in the second sentence.

NOTES TO DECISIONS

The purpose of tenure laws is to give job security to experienced teachers and to ensure that they will not be discharged for inadequate reasons. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

This section seeks to achieve this result by treating an improperly nonretained teacher as if the teacher had been retained, with no prejudice to result from the fact of nonretention. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

The effect of this section is to give an improperly nonretained teacher the enforceable right to a written contract of employment for the next school year containing provisions like those in the teacher's contract for the preceding year. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

This section does not automatically continue a teacher's prior contract in the event proper notice of nonretention is not given. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

The language requiring that the provisions of the previous contract are to be continued for the following school year is intended to protect the teacher's legitimate expectation of continued employment on terms no less favorable than those previously enjoyed. It is not meant to require each term of the previous contract to be continued unchanged where the result would be to unreasonably penalize either the teacher or the employer. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

No action for damages may be based on prior, expired contract. — Where the employer has refused to tender the teacher a new contract, the teacher may enforce the teacher's statutory right to be given a new contract and may then sue for breach of that contract, but an action for damages cannot be based upon a prior contract that has expired. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

Quoted in State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

Sec. 14.20.147. Transfer of attendance area or federal agency school; absorption. — (a) When an attendance area is transferred from a currently operating district to, or absorbed into, a new or existing school district, the teachers for the attendance area also shall be transferred unless otherwise mutually agreed by the teacher or teachers and the chief school administrator of the new district. Accumulated or earned benefits, including but not limited to, seniority, salary level, tenure, leave, and retirement, accompany the teacher who is transferred.

(b) When a school operated by a federal agency is transferred to or absorbed into a new or existing school district the teachers shall also be transferred if mutually agreed by the teacher or teachers and the school board of the new or existing district. A teacher transferred from a federal agency school, which does not have an official salary schedule or teacher tenure in the same manner as a public school district in the state, shall be placed on a position on the salary schedule of the absorbing district; the salary may not be less than the teacher would have received in the federal agency school. If the teacher taught two or more years in the federal agency school and, at the time of transfer, had a valid Alaska teaching certificate, that teacher shall be placed on tenure in the absorbing district.

(c) On the first day of service in the absorbing school district, a teacher transferred from a federal agency school shall be allowed the actual number of days of accumulated sick leave that the teacher has earned while teaching in Alaska. Consistent with the established district policy the absorbing district may allow credit for any other type of leave. Credit for retirement shall be allowed in accordance with AS 14.25.060. (§ 1 ch 53 SLA 1972; am § 1 ch 150 SLA 1975)

Legislative history reports. — For report on ch. 150, SLA 1975 (CSSB 128 am), see 1975 Senate Journal, p. 712.

NOTES TO DECISIONS

Back pay is not a benefit for the purpose of subsection (a) of this section. Aleutian Region R.E.A.A. v. Wolansky, Sup. Ct. Op. No. 2380 (File No. 5098), 630 P.2d 529 (1981).

Quoted in Northwest Arctic Regional Educ. Attendance Area v. Alaska Pub. Serv. Employees, Local 71, Sup. Ct. Op. No. 1811 (File Nos. 3360, 3362), 591 P.2d 1292 (1979).

Sec. 14.20.148. Intradistrict teacher reassignments. When a teacher is involuntarily transferred or reassigned to a position for which the teacher is qualified, within the district, the teacher's moving expenses shall be paid unless the one-way driving distance is 20 miles or less from the teacher's present place of residence, or unless otherwise mutually agreed by the teacher and chief school administrator of the district. (§ 1 ch 136 SLA 1972)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the teacher" for "he" and "the teacher's" for "his."

Collateral references. — Power of school authorities to transfer teacher from one school or district to another, 103 ALR 1382.

Sec. 14.20.150. Acquisition of tenure rights. (a) A teacher acquires tenure rights in a district when the teacher

(1) possesses a standard teaching certificate;

(2) has been employed as a teacher in the same district continuously for two full school years and is reemployed for the school year immediately following the two full school years.

(b) The tenure rights acquired under (a) of this section become effective on the first day the teacher performs teaching services in the district during the school year immediately following the two full school years. (§ 1 ch 92 SLA 1960; am § 17 ch 98 SLA 1966)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the teacher" for "his" in the introductory language of subsection (a).

NOTES TO DECISIONS

Purpose of tenure laws. — Tenure laws are intended to give job security to experienced teachers and to ensure that they will not be discharged for inadequate reasons. State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

A system of tenure has as its objective the retention of able personnel after they have undergone an adequate period of probation with the concomitant result that more talented personnel will be attracted to enter the teaching profession. State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

The law does not require that teachers shall teach every day, or every hour of every day. State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

The supreme court fails to find any provision of Alaska statutes concerning education which requires, or to perceive of any persuasive policy reasons why, a teacher must work full days throughout the school year in order to attain tenure rights. No legislative intent to exclude a teacher who works less than full days is manifest from a study of the applicable statutes. State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

Duties regular and substantial enough to afford intelligent evaluation are sufficient. — When a teacher's duties are regular and substantial enough to afford intelligent evaluation, there is little in the way of persuasive policy considerations for excluding such service from the ambit of Alaska tenure laws. State v. Redman, Sup. Ct. Op. No. 755 (File No. 1431), 491 P.2d 157 (1971).

Cited in Skagway City School Bd. v. Davis, Sup. Ct. Op. No. 1216 (File No. 2265), 543 P.2d 218 (1975); Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

Collateral references. — What amounts to waiver of status or rights under teachers' tenure statute. 145 ALR 1078.

Construction and effect of tenure provisions of contract or statute governing employment of faculty member by college or university. 66 ALR3d 1018.

Who is "teacher" for purposes of tenure statute. 94 ALR3d 141.

Sec. 14.20.155. Effect of tenure rights. (a) A teacher who has acquired tenure rights has the right to employment within the district during continuous service.

(b) A teacher who has acquired tenure rights may agree to a new contract at any time. However, if the teacher fails to agree to a new contract, the provisions of the previous contract are continued subject to AS 14.20.158. (§ 18 ch 98 SLA 1966)

Collateral references. — Compensation of tenure teacher. 145 ALR 408; 154 ALR 148.

Sec. 14.20.158. Continued contract provisions. Continuation of the provisions of a teacher's contract according to AS 14.20.145 or 14.20.155 does not

(1) affect the alteration of the teacher's salary in accordance with the salary schedule prescribed by state law, or in accordance with a local salary schedule applicable to all teachers in the district and adopted by bylaws;

(2) limit the right of the employer to assign the teacher to any teaching, administrative, or counseling position for which the teacher is qualified; or

(3) limit the right of the employer to assign the teacher, as is reasonably necessary, to any school in the district. (§ 19 ch 98 SLA 1966)

NOTES TO DECISIONS

This section puts the reemployed teacher in the same salary position he would have been in had his employment not been interrupted, regardless of his salary under his last contract. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

It further allows flexibility in the manner of reemployment where adherence to the strict terms of the prior contract would put an unreasonable burden on the employer. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802 1822), 519 P.2d 760 (1974).

Limited interpretation of section would defeat legislative intent. — A limited interpretation of this section as representing an exclusive list of the ways in which an improperly nonretaining teachers' prior contract may be varied would defeat the general intent of the legislature that an improperly nonretained teacher be returned to substantially the same position as before nonretention. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

Ways prior contract may be varied. — In assessing damages due to improper nonretention, the strict terms of a teacher's prior contract may be varied in ways not specifically enumerated in this section where such modifications are necessary to protect the reasonable expectations of the parties. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

AS 14.20.145 is expressly made subject to this section. Redman v. Department of Educ., Sup. Ct. Op. No. 1009 (File Nos. 1802, 1822), 519 P.2d 760 (1974).

Sec. 14.20.160. Loss of tenure rights. Tenure rights are lost when the teacher's employment in the district is interrupted or terminated, or when the teacher reaches the age of 65. (§ 1 ch 92 SLA 1960; am § 1 ch 104 SLA 1965; am § 20 ch 98 SLA 1966)

Sec. 14.20.165. Restoration of tenure rights. A teacher who held tenure rights and who was retired due to disability under AS 14.25.130, but whose disability (1) has been removed, and the removal of that disability is certified by a competent physician following a physical or mental examination, or (2) has been compensated for by

rehabilitation or other appropriate restorative education or training, and that rehabilitation or restoration to health has been certified by the division of vocational rehabilitation of the Department of Education, shall be restored to full tenure rights in the district from which the teacher was retired, at such time as an opening for which the teacher is qualified becomes available. (§ 1 ch 71 SLA 1975)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the teacher" for "he" twice near the end of the section.

Sec. 14.20.170. Dismissal. (a) A teacher, including a teacher who has acquired tenure rights, may be dismissed at any time only for the following causes:

(1) incompetency, which is defined as the inability or the unintentional or intentional failure to perform the teacher's customary teaching duties in a satisfactory manner;

(2) immorality, which is defined as the commission of an act which, under the laws of the state, constitutes a crime involving moral turpitude; or

(3) substantial noncompliance with the school laws of the state, the regulations or bylaws of the department, the bylaws of the district, or the written rules of the superintendent.

(b) A teacher may be suspended temporarily with regular compensation during a period of investigation to determine whether or not cause exists for the issuance of a notification of dismissal according to AS 14.20.180. (§ 2 ch 92 SLA 1960; am § 21 ch 98 SLA 1966; am §§ 1, 2 ch 104 SLA 1966)

Revisor's notes. — AS 14.20.170(1) and (2) are amended by ch. 98, SLA 1966, which is a revision of the education law. Chapter 104, SLA 1966, also amends paragraphs (1) and (2) to make manifest the legislative intent to specifically amend these paragraphs in relation to the Watts v. Seward School Board case. This is more fully discussed in the Legislative Committee Report, p. 988 of the 1966 House Journal.

Legislative history reports. — For report on ch. 104, SLA 1966, see 1966 House Journal, p. 988.

NOTES TO DECISIONS

In general. — See annotations under AS 14.20.095, Notes to Decisions.

Subsection (b) of this section is in a permissive form and allows temporary suspension during the investigation. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

A right of nontenured teachers to a hearing prior to dismissal for cause is not to be found in this section. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

The express language of subsection (b) of this section clearly lacks any indication that the legislature intended to provide a hearing prior to dismissal for cause of a nontenured teacher. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

Despite the reference to AS 14.20.180. — The reference to AS 14.20.180 in this section cannot reasonably be interpreted to extend the hearing rights given to tenured teachers under that section to nontenured teachers. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

The distinction in treatment between tenured and nontenured teachers is quite clear from the express terms of AS 14.20.180. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

Validity of dismissal proceedings. — When a discharged teacher had not demonstrated any way in which his dismissal was tainted by his temporary suspension with pay under subsection (b), nor any other way in which he was prejudiced by the suspension, his contention that the dismissal proceedings were void as a matter of law was found to be without merit. Renfroe v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Instructions. — There was no error in the court's inclusion of an instruction on provisions of the Professional Teaching Practices Commission Code of Ethics although there had been no determination that a dismissed teacher had violated the code by the commission when fair minded jurors, in the exercise of reasonable judgment, could differ on whether certain actions by the dismissed teacher were unethical or otherwise constituted substantial non-compliance under subsection (a) of this section. Renfroe v. Green, Sup Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Directed verdict. — When there was evidence that a dismissed teacher had verbally and physically abused another member of the teaching profession in front of students; and fair minded jurors, in the exercise of reasonable judgment, could differ on whether those actions violated provisions of the code of ethics of the Professional Teaching Practices Commission or otherwise constituted incompetency or substantial noncompliance under subsection (a) of this section, the superior court did not err in failing to direct a verdict in the dismissed teacher's favor. Renfroe v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Cited in Skagway City School Bd. v. Davis, Sup. Ct. Op. No. 1216 (File No. 2265), 543 P.2d 218 (1975).

Use of illegal drugs as ground for dismissal of teacher, or denial or cancelation of teacher's certificate. 47 ALR3d 754.

Dismissal of, or disciplinary action against, public school teachers for violation of regulation as to dress or personal appearances of teachers. 58 ALR3d 1227.

Sexual conduct as ground for dismissal of teacher or denial or revocation of teaching certificate. 78 ALR3d 19.

What constitutes "insubordination" as ground for dismissal of public school teacher. 78 ALR3d 83.

Dismissal of public school teacher because of unauthorized absence or tardiness. 78 ALR3d 117.

Sec. 14.20.175. Nonretention. (a) A teacher who has not acquired tenure rights is subject to nonretention for the school year following the expiration of the teacher's contract for any cause which the employer determines to be adequate. However, at the teacher's request, the teacher is entitled to a written statement of the cause for

nonretention. The boards of city and borough school districts and regional educational attendance areas shall provide by regulation or bylaw a procedure under which a nonretained teacher may request and receive an informal hearing by the board.

(b) A teacher who has acquired tenure rights is subject to nonretention for the following school year only for the following causes:

(1) incompetency, which is defined as the inability or the unintentional or intentional failure to perform the teacher's customary teaching duties in a satisfactory manner;

(2) immorality, which is defined as the commission of an act which, under the laws of the state, constitutes a crime involving moral turpitude;

(3) substantial noncompliance with the school laws of the state, the regulations or bylaws of the department, the bylaws of the district, or the written rules of the superintendent; or

(4) a necessary reduction of staff occasioned by a decrease in school attendance. (§ 22 ch 98 SLA 1966; am § 1 ch 11 SLA 1968; am § 13 ch 46 SLA 1970; am § 15 ch 124 SLA 1975)

Editor's notes. — The revisor of statutes, under the authority of AS 01.05.031 and in accordance with the directive in SLA 1982, ch. 58, § 4, substituted "the teacher's" for "his" in the first and second sentences of subsection (a), deleted "his" preceding "nonretention" in the second sentence of subsection (a), and rewrote the third sentence of that subsection.

Legislative history reports. — For report on ch. 11, SLA 1968 (HB 91 am), see 1967 House Journal, p. 160.

NOTES TO DECISIONS

Section exceeds federal constitutional requirements. — This section in requiring a statement of cause and an opportunity to be heard, exceeds federal constitutional requirements. Shatting v. Dillingham City School Dist., Sup. Ct. Op. No. 2177 (File No. 4240), 617 P.2d 9 (1980).

Discretion of school boards. — 4 AAC 19.010, which provides that formal evaluations shall serve as a method for gathering data relevant to subsequent employment status decisions pertaining to the person evaluated, cannot operate to limit the broad discretion that was intentionally given to local school boards by the legislature, and a school board's decision not to renew the contract of a nontenured teacher may be "for any cause which the employer determines to be adequate." Shatting v. Dillingham City School Dist., Sup. Ct. Op. No. 2177 (File No. 4240), 617 P.2d 9 (1980).

Despite the broad language of subsection (a), the board's discretion is subject to certain limitations; for example, a school board may not deny continued employment to a teacher because of the teacher's exercise of first amendment rights, nor may a school board deny continued employment to a teacher if to do so would deprive the teacher of other rights that are guaranteed by constitution or statute. Shatting v. Dillingham City School Dist., Sup. Ct. Op. No. 2177 (File No. 4240), 617 P.2d 9 (1980).

Rights of nonretained, nontenured teachers are limited. — The rights of a nontenured teacher who is simply not retained at the end of his period of employment are relatively limited. A nonretained, nontenured teacher has no constitutionally protected interest in public employment. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973); Shatting v. Dillingham City School Dist., Sup. Ct. Op. No. 2177 (File No. 4240), 617 P.2d 9 (1980).

Probationary employees who are otherwise lawfully discharged cannot obtain permanent status through

grievance procedures which do not purport to modify the statutory provisions concerning tenure and termination of employees. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

The grievance procedure may be of value to a nontenured teacher in attempting to persuade the hiring authority that he should be retained. The process might on occasion bring forth evidence and argument by which the termination of the nontenured teacher might be reconsidered. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

But any such results and action would be a matter within the discretion of the hiring authority, and thereby a matter of grace rather than legal right. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

Quoted in Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975); Jerrel v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1458 (File No. 2901), 567 P.2d 760 (1977).

Cited in Huber v. Fairbanks N. Star Borough School Dist., Superior Court, 4th Jud. Dist., C.A. No. 72-511 (1973).

Collateral references. — Right to dismiss public school teacher on ground that services are no longer needed. 100 ALR2d 1141.

Sec. 14.20.180. Procedure and hearing upon notice of dismissal or nonretention. (a) An employer shall include in a notification of dismissal of a teacher who has not acquired tenure rights, or of nonretention or dismissal of a tenure teacher, a statement of cause and a complete bill of particulars.

(b) The tenure teacher may, within 15 days immediately following receipt of the notification, notify the employer in writing that a hearing before the school board is requested. The tenure teacher may require in the notification that the hearing be either public or private and that the hearing be under oath or affirmation. The notification may also require that the right of cross-examination be provided and that the tenure teacher be represented by counsel and have the right to subpoena a person who has made allegations which are used as a basis for the decision of the employer.

(c) Upon receipt of the notification requesting a hearing, the employer shall immediately arrange for a hearing, and shall notify the tenure teacher or administrator in writing of the date, time, and place of the hearing. A written transcript, tape, or similar recording of the proceedings shall be kept. Transcribed copies shall be furnished to the tenure teacher for cost upon request of the tenure teacher. A final decision of the school board requires a majority vote of the membership. The vote shall be by roll call. The final decision shall be written and contain specific findings of fact and conclusions of law. A written notification of the decision shall be furnished to the tenure teacher within 10 days of the date of the decision. (§ 3a ch 92 SLA 1960; am § 23 ch 98 SLA 1966; am §§ 2, 3 ch 11 SLA 1968; am § 14 ch 46 SLA 1970; am §§ 16, 17 ch 124 SLA 1975)

Editor's notes. — The revisor of statutes, under the authority of AS 01.05.031 and in accordance with the directive in SLA 1982, ch. 58, § 4, rewrote subsection (b) and in the third sentence of subsection (c), substituted "request of the tenure teacher" for "his request."

Legislative history reports. — For report on ch. 11, SLA 1968 (HB 91 am), see 1967 House Journal, p. 160.

NOTES TO DECISIONS

Section describes procedure. — This section describes the administrative procedure, which includes a hearing, when a tenured teacher has been given a notice of dismissal or nonretention. Corso v. Commissioner of Educ., Sup. Ct. Op. No. 1412 (File No. 2870), 563 P.2d 246 (1977).

Reference to section in AS 14.20.170 does not extend hearing rights to nontenured teachers. — The reference to this section in AS 14.20.170 cannot reasonably be interpreted to extend the hearing rights given to tenured teachers under this section to nontenured teachers. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

But constitutional due process requirements overcome any statutory rule. — Even though a hearing is not accorded to nontenured teachers by statute, the constitutional requirements of due process overcome any statutory rule. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

And nontenured teachers are entitled to hearing upon dismissal. — Where a mid-year dismissal is at issue, clearly the teachers have been deprived of an interest in property, namely, their present teaching post. This is an interest protected by the 14th amendment to the United States Constitution and by the first article of the Alaska Constitution, and thus they are entitled to a hearing. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

A hearing is the procedure most likely to lead to a fair determination regarding the dismissal of a nontenured teacher. The stigma which attaches to a discharge for incompetence is sufficiently injurious to call for this type of safeguard. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

A full judicial hearing is not necessary, but a hearing that allows the administrative authority to examine both sides of the controversy will protect the interests and rights of all who are involved. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

But nontenured teachers must be given opportunity to present defense by testimony. Nichols v. Eckert, Sup. Ct. Op. No. 860 (File No. 1572), 504 P.2d 1359 (1973).

When time for appeal begins to run. — In light of the provision in subsection (c) of this section that the final decision of the school board must be "written and contain specific findings of fact and conclusions of law," the time for appeal from the board's determination did not begin to run until the written decision was mailed or delivered to the teacher. Jerrel v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1458 (File No. 2901), 567 P.2d 760 (1977).

Attorney's fees not allowed against teacher whose dismissal was affirmed. — See Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

Applied in Renfroe v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Collateral references. — Request for hearing, sufficiency under statute requiring hearing on request before discharge. 89 ALR2d 1018.

Sufficiency of notice of intention to discharge teacher or not to renew contract under statutes requiring such notice. 92 ALR2d 751.

Elements and measure of damages in action by schoolteacher for wrongful discharge. 22 ALR3d 1047.

Secs. 14.20.185 — 14.20.200. Procedure and hearing; appeals. Repealed by § 59 ch 98 SLA 1966.

Editor's notes. — The repealed sections derived from §§ 3b, 3c, ch. 92, SLA 1960; § 2, ch. 41, SLA 1965.

Sec. 14.20.205. Judicial review. If a school board reaches a decision unfavorable to a teacher, the teacher is entitled to a de novo trial in the superior court. However, a teacher who has not attained tenure rights is not entitled to judicial review according to this section. (§ 24 ch 98 SLA 1966; am § 1 ch 148 SLA 1966; am § 4 ch 11 SLA 1968; am § 18 ch 124 SLA 1975)

Legislative history reports. — For report on ch. 11, SLA 1968 (HB 91 am), see 1967 House Journal, p. 160.

NOTES TO DECISIONS

This section, granting a trial de novo to teachers, does not violate the separation of powers. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

On its face, this section bears no relation to the general provisions governing judicial appeals, which is covered by Title 22. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

AS 22.10.020 does not supersede this section. — AS 22.10.020, which provided in § 17(1), ch. 50, SLA 1959, that "All hearings on appeal from any final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, shall grant a trial de novo, in whole or in part," does not supersede this section, which expressly mandates de novo reviews for tenured teachers. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

In reenacting AS 22.10.020 in 1970 the legislature has not unequivocally expressed any intent to deny tenured teachers de novo review. Nor was the reenactment part of a comprehensive revision. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

Since this section and AS 22.10.020 are not irreconcilably conflicting, but can be intelligently read as conterminous expressions of a general rule and an exception to it, nothing in the edicts of statutory construction requires us to find that this section has been rendered inoperative by the reenactment of AS 22.10.020. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

A policy factor militating in favor of a full application of this section is that a tenured teacher against whose favor a decision has been reached is faced with the loss of a very important right, his source of income. In this connection, it is not necessary to indulge in such classificatory labels as "vested right" or "property right," for it is enough that the right be recognized as important for it to act as a guide to decision in the interpretation of this section. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

Rights of nonretained, nontenured teachers are limited. — The rights of a nontenured teacher who is simply not retained at the end of his period of employment are relatively limited because such a teacher has no constitutionally protected interest in public employment. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

Probationary employees who are otherwise lawfully discharged cannot obtain permanent status through grievance procedures which do not purport to modify the statutory provisions concerning tenure and termination of employees. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

The grievance procedure may be of value to a nontenured teacher in attempting to persuade the hiring authority that he should be retained. The process might on occasion bring forth evidence and argument by which the termination of the nontenured teacher might be reconsidered. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

But any such results and action would be a matter within the discretion of the hiring authority, and thereby a matter of grace rather than legal right. Gorder v. Matanuska-Susitna Borough School Dist., Sup. Ct. Op. No. 929 (File No. 1754), 513 P.2d 1094 (1973).

Right of nontenured teacher to judicial review. — While this section does not extend the tenured teacher's right to a trial de novo to a nontenured teacher, neither does it preclude a more limited form of judicial review of the school board decision; therefore a nontenured teacher has a right to judicial review, on the record, of a school board's nonretention, and although a review on the record is all that is required, in its discretion the superior court may grant a trial de novo. Shatting v. Dillingham City School Dist., Sup. Ct. Op. No. 2177 (File No. 4240), 617 P.2d 9 (1980).

Courts granted fact-finding role. — While courts normally feel constrained to defer to the fact-finding role which the legislature has given to a particular agency, no such constraint logically should exist where the legislature itself has granted the courts a fact-finding role in their review of administrative action. This section seemingly does just that, for it expressly grants a tenured teacher a "trial de novo" following an unfavorable school board decision. Matanuska-Susitna Borough v. Lum, Sup. Ct. Op. No. 1179 (File Nos. 2241, 2250), 538 P.2d 994 (1975).

When time for appeal begins to run. — In light of the provision in AS 14.20.180(c) that the final decision of the school board must be "written and contain specific findings of fact and conclusions of law," the time for appeal from the board's determination did not begin to run until the written decision was mailed or delivered to the teacher. Jerrel v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1458 (File No. 2901), 567 P.2d 760 (1977).

Attorney's fees not allowed against teacher whose dismissal was affirmed. — See Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

Applied in Renfree v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Quoted in Sjong v. State, Dep't of Revenue, Sup. Ct. Op. No. 2269 (File No. 4255), 622 P.2d 967 (1981); Fedpac Int'l, Inc. v. State, Sup. Ct. Op. No. 2520 (File No. 6034), 646 P.2d 240 (1982).

Sec. 14.20.207. Definitions. In AS 14.20.010 — 14.20.210

(1) "teacher" means a person serving in a teaching, counseling, or administrative capacity and required to be certificated in order to hold the position;

(2) "employer" means the school board or superintendent which appoints the teacher;

(3) "school year" includes "school term" if the teacher is employed only for the period of the school term;

(4) "continuous employment" means employment which is without interruption except for temporary absences approved by the employer or its designee, or except for the interval between consecutive school terms if the teacher is employed only for the months of the school term;

(5) "nonretention" means the election by an employer not to re-employ a teacher for the school year or school term immediately following the expiration of the teacher's current contract; and

(6) "dismissal" means termination by the employer of the contract services of the teacher during the time a teacher's contract is in force,

and termination of the right to the balance of the compensation due the teacher under the contract. (§ 25 ch 98 SLA 1966; am § 15 ch 46 SLA 1970; am § 19, ch 124 SLA 1975)

Editor's notes. — In paragraph (6), "the" was substituted for "his" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

NOTES TO DECISIONS

Validity of classification or grading of teachers for purposes of compensation. 133 ALR 1437.

Compensation of tenure teacher. 145 ALR 408; 154 ALR 148.

Construction and application of provision of social security or unemployment compensation acts relating to exemption of corporations or institutions of a religious, charitable, or educational character. 155 ALR 369.

Services included in computing period of service for purpose of. 2 ALR2d 1033.

Sec. 14.20.220. Minimum teachers' salary scale by area. (a) The school board of each school district shall pay a regularly qualified teacher employed by it a salary not less than that set out in this subsection plus the regional adjustments set out in (b) and (c) of this section.

(1) The base salary of a teacher with three years' training is $8,000 for a teacher with no school experience in or outside the state. The salary is augmented by $200 for each year of school experience in or outside the state up to and including four years. This paragraph applies only to teachers employed in the state before July 1, 1970.

(2) The base salary for a teacher holding a bachelor's degree and having the requisite number of hours in education is $9,500. This salary is augmented by the sum of .04 times the base for each year of school experience in the state up to and including seven years. Teachers transferring experience from outside the state are subject to (e) of this section.

(3) The base salary for a teacher having a master's degree and the required number of hours of education is $10,900. This salary is augmented by the sum of .04 times the base for each year of school experience in the state up to and including 11 years. Teachers transferring experience from outside the state are subject to (e) of this section.

(b) The school board of each school district in the Central area and in election districts 6 and 11 shall pay the amount set out in (a) of this section plus five per cent of the base salary.

(c) The school board of each school district in the Northwest area, in that part of the Central area lying north of the Arctic Circle, and in those parts of the Southcentral and Central areas lying west of 152 degrees West Longitude, excluding election districts 6 and 11, shall pay the amount set out in (a) of this section plus 10 per cent of the base salary.

(d) Repealed by § 35 ch 46 SLA 1970.

(e) For teachers holding bachelors' degrees, not more than six years of school experience outside the state may be substituted for a like period of school experience in the state when a teacher's position on the salary scale is established, and, for teachers holding masters' degrees, not more than eight years of school experience outside the state may be substituted for a like period of school experience in the state when a teacher's position on the salary scale is established.

(f) The salary for a certificated substitute teacher teaching in a public school in the state may not be less than 75 per cent of 1/180th of the base salary for the applicable area.

(g) In this section "school experience" means a full-time elementary or secondary teacher in a public or non-public school as defined in AS 14.25.220 (19) and (20). (§ 37-6-1 ACLA 1949; am § 1 ch 69 SLA 1949; am § 1 ch 104 SLA 1951; am § 1 ch 104 SLA 1953; am § 1 ch 176 SLA

1955; am § 1 ch 179 SLA 1957; am § 1 ch 51 SLA 1961; am § 1 ch 54 SLA 1963; am § 1 ch 160 SLA 1966; am §§ 1 — 3 ch 208 SLA 1968; am §§ 1, 2 ch 209 SLA 1968; am §§ 16, 35 ch 46 SLA 1970; am § 1 ch 229 SLA 1970)

Revisor's notes. — As of the date of the 1982 reprint of AS 14, this section is out-of-date and obsolete. Teachers' salaries in Alaska are established by negotiation between districts and the teachers (AS 14.20.550). The minimum salary scale in this section is no longer used but has not been repealed.

NOTES TO DECISIONS

Cited in Griffin v. Galena City School Dist., Sup. Ct. Op. No. 2469 (File No. 5388), 640 P.2d 829 (1982).

Sec. 14.20.230. Administrators' salaries. School boards of city and borough school districts and regional educational attendance areas shall pay a qualified school administrator a salary not less than the allowable amount for the school administrator's position on the teachers' scale provided in AS 14.20.220(a) — (c), plus

(1) 25 per cent for the chief school administrator of a district with an average daily membership of 500 or more;

(2) 20 per cent for the chief school administrator of a district with an ADM of less than 500;

(3) 15 per cent for a principal or other administrator;

(4) 10 per cent for an assistant principal. (§ 37-6-2 ACLA 1949; am § 2 ch 69 SLA 1949; am § 2 ch 104 SLA 1951; am § 2 ch 104 SLA 1953; am § 2 ch 176 SLA 1955; am § 2 ch 179 SLA 1957; am § 2 ch 51 SLA 1961; am § 2 ch 54 SLA 1963; am § 2 ch 160 SLA 1966; am § 17 ch 46 SLA 1970; am § 2 ch 229 SLA 1970; am § 20 ch 124 SLA 1975)

Revisor's notes. — AS 14.20.230 was amended by both § 17, ch. 46, SLA 1970 and § 2, ch. 229, SLA 1970. Although neither amendment took cognizance of the other, they appear to be compatible and are both given effect here.

This section is obsolete. See revisor's note under AS 14.20.220.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Secs. 14.20.240 — 14.20.270. Salaries; reimbursement by state to school districts; limitation on higher salaries not prohibited; determination of number of teachers, superintendents, principals and vice principals for which district entitled to reimbursement.

Repealed by § 6 ch 229 SLA 1970.

Editor's notes. — The repealed sections derived from §§ 37-6-3, 37-6-4, 37-7-4, ACLA 1949; §§ 3, 4, 6, ch. 179, SLA 1957; § 3, ch. 51, SLA 1961; § 3, ch. 54, SLA 1963; § 1, ch. 42, SLA 1965; §§ 3, 4, ch. 160, SLA 1960; § 19, ch. 46, SLA 1970.

Sec. 14.20.275. Definitions. In AS 14.20.220

(1) "Central area" means that area included within the boundaries of election districts 13, 14, 15, and 16;

(2) "Northwest area" means that area included within the boundaries of election districts 17, 18, and 19;

(3) "Southcentral area" means that area included within the boundaries of election districts 6, 7, 8, 9, 10, 11, and 12;

(4) "Southeastern area" means that area included within the boundaries of election districts 1, 2, 3, 4, and 5. (§ 5 ch 160 SLA 1966)

Revisor's notes. — The election district descriptions in this section are obsolete as a result of successive reapportionments of election districts since 1966. See also the note under AS 14.20.220.

Article 4. Sabbatical Leave.

Section
280. Basis of leave
290. Application
300. Selection of teachers
310. Amount of sabbatical leave and compensation
320. Responsibility of teacher
330. Position, tenure, and retirement
340. Military service and previous leaves of absence
345. Leave of absence without pay
350. Definition

Collateral references. — 68 Am. Jur. 2d Schools § 147.

78 C.J.S. Schools and School Districts, § 227.

Sec. 14.20.280. Basis of leave. A teacher who has rendered active service for seven or more years in a district is eligible for sabbatical leave. Sabbatical leave may be taken for educational purposes only, and for not more than one school year. (§ 1 ch 134 SLA 1962; am § 1 ch 62 SLA 1964; am § 2 ch 104 SLA 1965; am § 27 ch 98 SLA 1966; am § 1 ch 168 SLA 1968)

Collateral references. — Candidacy for or incumbency of public office or other political activity by teacher or other school employee as ground for dismissal or compulsory leave of absence. 136 ALR 1154.

Sec. 14.20.290. Application. A teacher who wishes to take sabbatical leave must apply to the governing body of the school district. The teacher must submit information showing qualifications for sabbatical leave and a plan for education during the leave. (§ 2 ch 134 SLA 1962; am § 28 ch 98 SLA 1966)

Editor's notes. — The word "his" was deleted preceding "qualification" and preceding "education" in the second sentence by the revisor of statutes under AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.300. Selection of teachers. (a) The governing body of the school district has the responsibility for selection of the teachers to be granted sabbatical leave.

(b) In selecting teachers for sabbatical leave, the governing body shall consider the benefit which the school district will derive from the proposed plan of the teacher for educational purposes, the field of study of the teacher, the contributions of the teacher to education in Alaska, and the seniority of the teacher. (§ 3 ch 134 SLA 1962; am § 29 ch 98 SLA 1966)

Sec. 14.20.310. Amount of sabbatical leave and compensation. (a) The number of teachers eligible for sabbatical leave which may be allowed under AS 14.20.280 — 14.20.350 is as follows:

(1) not more than one-half of one per cent of the total number of teachers from all borough and city school districts and the state-operated school district may be on state-supported sabbatical leave in any year;

(2) any number of teachers may be on sabbatical leave at school district or personal expense.

(b) A teacher on state-supported sabbatical leave is entitled to one-half of base salary to be paid by the department.

(c) A teacher on sabbatical leave at district expense is entitled to an amount of salary to be determined by the school board. (§ 4 ch 134 SLA 1962; am § 3 ch 104 SLA 1965; am § 30 ch 98 SLA 1966; am § 2 ch 168 SLA 1968)

Revisor's notes. — The reference to "state-operated school district" in (a)(1) of this section is obsolete. The state-operated school system was superseded by regional educational attendance areas in 1975. See AS 14.08.

Editor's notes. — In subsection (b), the word "of" was substituted for "his" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.320. Responsibility of teacher. Upon the return of a teacher to the teaching position, the teacher shall make a report to the governing body concerning educational accomplishments. A teacher who does not serve for at least a full year after returning shall refund to the district, if the sabbatical leave was at district expense, or to the board of state-operated schools, if the sabbatical leave was state-supported, money paid to the teacher under AS 14.20.310 unless the failure to serve a full year after return is attributable to sickness, injury or death. (§ 5 ch 134 SLA 1962; am § 4 ch 104 SLA 1965; am § 31 ch 98 SLA 1966; am § 20 ch 46 SLA 1970)

Revisor's notes. — The reference to the board of state operated schools is obsolete. The state-operated school system was superseded by regional educational attendance areas in 1975. See AS 14.08.

Editor's notes — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the" for "his" once in the first and second sentences, deleted "his" preceding "educational accomplishments" in the first sentence, substituted "returning" for "his return" in the second sentence, and substituted "the teacher" for "him" in the second sentence.

Sec. 14.20.330. Position, tenure, and retirement. (a) Unless it is otherwise agreed, a teacher returning from sabbatical leave shall return to the position occupied by that teacher when the sabbatical leave began.

(b) A sabbatical leave is not an interruption of the continuous service necessary to attain or retain tenure under AS 14.20.150, 14.20.155, or 14.20.160. However, the time spent on sabbatical leave may not be counted in determining when a teacher has sufficient service to enable the teacher to acquire tenure rights.

(c) A sabbatical leave is not a break in service for retirement purposes. Payment into the retirement fund shall be made on the basis of full salary. (§ 6 ch 134 SLA 1962; am § 32 ch 98 SLA 1966)

Editor's notes. — Subsection (a) was rewritten by the revisor of statutes under the authority of AS 01.05.031 and in accordance with the directive in § 4, ch. 58, SLA 1982. The revisor also, in subsection (b), substituted "the teacher" for "him" under the authority of AS 01.05.031 and ch. 58.

Sec. 14.20.340. Military service and previous leaves of absence. To determine eligibility for sabbatical leave, tours of military service and leaves of absence granted before July 1, 1963, are not considered years of active service. (§ 7 ch 134 SLA 1962; am § 2 ch 62 SLA 1964)

Sec. 14.20.345. Leave of absence without pay. (a) A teacher may be granted a leave of absence without pay for the purposes which may be approved by the governing body of the district if

(1) the teacher's application is approved by the governing body of the district; and

(2) the teacher agrees to return to employment in a public school not later than the beginning of the school year following termination of the period for which the leave of absence was granted.

(b) A leave of absence is not an interruption of the continuous service necessary to attain or retain retirement or tenure rights according to AS 14.20.150, 14.20.155, or 14.20.160. However, the time spent on leave of absence may not be counted in determining when a teacher has sufficient service to enable the teacher to acquire retirement or tenure rights.

(c) The leave of absence is not a break in service for retirement purposes.

(d) The governing body of the district may agree to continue the teacher's retirement contributions if the teacher agrees to pay the required seven per cent of the salary the teacher would have received during the leave of absence and reimburse the district for the district's required retirement contribution. Each year of leave of absence then would count as a year of retirement service

(e) The governing body of the district may advance the teacher on the district salary schedule when the teacher returns to employment if the governing body determines that the teacher's leave of absence was educationally or professionally beneficial to the teacher or the district.

(f) A teacher may make contributions to the retirement fund for each year or portion of a year of leave of absence taken. The contribution shall include the required per cent of the salary the teacher would have received had the leave of absence not been taken, plus the required employer and state contributions that would have been made. Compound interest at the rate prescribed by regulation shall be added as computed from the beginning date of the leave of absence to the date the teacher pays the contribution. (§ 5 ch 104 SLA 1965; am §§ 33, 34 ch 98 SLA 1966; am § 1 ch 44 SLA 1971; am § 1 ch 184 SLA 1972; am § 2 ch 99 SLA 1974)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the teacher's" for "his" in subsection (a)(1); substituted "the teacher" for "he" in subsections (a)(2), (d), (e), and (f); substituted "the teacher" for "him" in subsection (b); substituted "the" for "his" in subsection (d); and, in subsection (f), substituted "the leave of absence not been taken" for "he not taken the leave of absence."

Sec. 14.20.350. Definition. In AS 14.20.280 — 14.20-350 "teacher" means a certificated member of the teaching, supervisory, or administrative corps in the public schools of the state. (§ 8 ch 134 SLA 1962)

Revisor's notes. — This section was rewritten to eliminate former paragraph (2) which defined "department" by the revisor of statutes under AS 01.05.031 because of the redundancy in light of AS 14.60.010(4).

Article 5. Professional Teaching Practices Act.

Section

370. Teaching profession
380. Creation of a commission
390. Appointment and qualifications
400. Composition of the commission
410. Selection of members
420. Term of office
430. Dismissal
440. Reimbursement
450. Responsibilities of commission
460. Duties of commission
470. Powers of commission
475. Applicability of the Administrative Procedure Act
480. Effect of standards
500. Support
510. Short title

Sec. 14.20.370. Teaching profession. Teachers required by Alaska law to be certificated, instructors in institutions of higher learning, school administrators, school program administrators, and school counselors are within the teaching profession. (§ 35 ch 98 SLA 1966)

Opinions of attorney general. — Unless the duties of an employee of the department of education can be characterized as falling within one of the five categories of this section, that employee cannot be said to fall within the teaching profession for purposes of the Professional Teaching Practices Act. July 15, 1977, Op. Att'y Gen.

The only employees of the department of education who might fit into one of the categories of this section are those who are employed by the department at the Alaska Skill Center or in its centralized correspondence study program. July 15, 1977, Op. Att'y Gen.

Sec. 14.20.380. Creation of a commission. There is a commission of professional educators known as the Professional Teaching Practices Commission. (§ 35 ch 98 SLA 1966)

Sec. 14.20.390. Appointment and qualifications. The commission consists of nine members appointed by the governor and confirmed by a majority of the members of the legislature in joint session. Each member, in addition to having been actively engaged in the teaching profession for at least five years immediately preceding appointment, shall be a citizen of the United States and a resident of the state. (§ 35 ch 98 SLA 1966)

Editor's notes. — The revisor of statutes, pursuant to § 4, ch. 58, SLA 1982 and AS 01.05.031, deleted "his" preceding "appointment" in the second sentence.

Collateral references. — Bias of members of license revocation board. 97 ALR2d 1210.

Sec. 14.20.400. Composition of the commission. The commission consists of the following members:

(1) five classroom teachers;

(2) one principal;

(3) one superintendent;

(4) one representative of the office of the commissioner;

(5) one representative of an Alaska institution of higher learning. (§ 35 ch 98 SLA 1966)

Revisor's notes. — The words "of education" were deleted following "the commissioner" by the revisor of statutes under AS 01.05.031. See AS 14.60.010.

Sec. 14.20.410. Selection of members. (a) Members of the commission shall be selected as follows:

(1) the five classroom teachers from lists of names submitted by recognized Alaska teachers' organizations, each list not to exceed 12 names; however, in lieu of one of the five, one classroom teacher may be selected from a list of not more than four names signed and submitted by not less than 25 teachers who have no affiliation with any organization qualified to submit nomination lists, with the limitation that no teacher may sign more than one list in any year;

(2) the principal from a list of three names submitted by the Alaska Principals Association;

(3) the superintendent from a list of three names submitted by the Superintendents Advisory Commission;

(4) the representative of the office of the commissioner from a list of three names submitted by the commissioner;

(5) the representative of an Alaska institution of higher learning from lists of names submitted by Alaska institutions of higher learning, each list not to exceed three names.

(b) The lists shall be submitted to the commissioner who shall submit them as a group to the governor's office.

(c) At least 30 days before a position on the commission is due to become vacant, the chairman shall cause notice of the impending vacancy to be published and to be conveyed to each organized group eligible to submit a list of nominees. (§ 35 ch 98 SLA 1966)

Editor's notes. — In subsection (a)(4), the words "of education" were deleted following "the commissioner" by the revisor of statutes pursuant to AS 01.05.031. See AS 14.60.010.

Sec. 14.20.420. Term of office. (a) The term of office for each member of the commission is three years and until a successor is appointed, except that members of the first commission shall be appointed as follows: three members for one year, three members for two years, and three members for three years. Members of the first commission shall draw by lot for the initial term of appointment.

(b) Vacancies shall be filled by appointment by the governor for the unexpired term.

(c) No individual may serve more than a total of two 3-year terms.

(d) The commission shall select a chairman from among its members. (§ 35 ch 98 SLA 1966)

Sec. 14.20.430. Dismissal. Any member may be removed by the governor for misconduct, malfeasance or nonfeasance in office, or incapacity. (§ 35 ch 98 SLA 1966)

Sec. 14.20.440. Reimbursement. Members of the commission shall receive per diem according to law and are to be granted administrative leave with full pay by their employer for time spent in the performance of official duties under AS 14.20.370 — 14.20.510. If a member is required to spend more than 15 days in a fiscal year in the performance of official duties under AS 14.20.370 — 14.20.510, the state shall reimburse the employer for costs incurred after the 15th lay. (§ 35 ch 98 SLA 1966; am § 1 ch 4 SLA 1975)

Editor's notes. — The word "his" was deleted preceding "official duties" in the second sentence by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.450. Responsibilities of commission. (a) The commission shall have the initial responsibility of developing, through the teaching profession, criteria of professional practices in areas including, but not limited to:

(1) ethical and professional performance;

(2) preparation for and continuance in professional services; and

(3) contractual obligations. (§ 35 ch 98 SLA 1966)

Sec. 14.20.460. Duties of commission. The commission shall

(1) establish procedures, and adopt rules to implement the purposes of AS 14.20.370 — 14.20.510;

(2) conduct investigations and hearings on alleged violations of ethical or professional teaching performance, contractual obligations, and professional teaching misconduct;

(3) review the regulations of the department as they relate to teacher certification and recommend necessary changes;

(4) review the decisions of the department regarding the issuance or denial of certificates and in its discretion recommend reversal of decisions. (§ 35 ch 98 SLA 1966)

Sec. 14.20.470. Powers of commission. (a) The commission may

(1) study proposals developed by regular committees of any existing professional organization whose members are within the teaching profession;

(2) subpoena witnesses, place them under oath, and maintain written records;

(3) warn or reprimand members of the teaching profession, if in the judgment of the commission such action is warranted;

(4) suspend or revoke the certificate of a member of the teaching profession for one of the reasons set out in AS 14.20.030 except that in the case of an administrator, the commissioner must concur;

(5) make any recommendation to the board or to school boards which will promote an improvement in the teaching profession;

(6) request assistance through any of the investigative processes of any existing professional teaching organizations when analyzing charges of breach of ethical or professional teaching practices;

(7) appoint an executive secretary, delegate those ministerial functions to executive secretary as the commission may decide and set executive secretary's compensation with a starting salary not exceeding range 26, step B of the pay plan for state employees in AS 39.27.011(a).

(b) A decision issued by the commission with the approval of the commissioner under (a)(4) of this section is final. (§ 35 ch 98 SLA 1966; am § 1 ch 77 SLA 1972; am §§ 3, 4 ch 9 SLA 1975; am § 2 ch 103 SLA 1976; am § 13 ch 94 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "the pay plan for state employees in AS 39.27.011(a)" for "AS 39.27.010" at the end of paragraph (7) of subsection (a).

Editor's notes. — The revisor of statutes, under the authority of AS 01.05.031 and § 4, ch. 58, SLA 1982, deleted "of education" following "commissioner" in subsection (a)(4) and subsection (b), and, in subsection (a)(7), substituted "executive secretary" for "him" and "executive secretary's" for "his."

Legislative history reports. — For report on ch. 77, SLA 1972 (SB 126), see 1972 House Journal, p. 1208.

Sec. 14.20.475. Applicability of the Administrative Procedure Act. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under AS 14.20.370 — 14.20.510. (§ 5 ch 9 SLA 1975)

Sec. 14.20.480. Effect of standards. Members of the teaching profession are obligated to abide by the professional teaching standards adopted by the commission. (§ 35 ch 98 SLA 1966)

NOTES TO DECISIONS

Applied in Renfroe v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Sec. 14.20.500. Support. In addition to available state funds, the commission shall also be financed by members of the profession in accordance with regulations adopted by the department including, if necessary, an increase in the fees for certificates. (§ 35 ch 98 SLA 1966; am § 1 ch 73 SLA 1973)

Revisor's notes. — The word "adopted" was substituted for "promulgated" by the revisor of statutes under AS 01.05.031.

Sec. 14.20.510. Short title. AS 14.20.370 — 14.20.510 shall be known as the Professional Teaching Practices Act. (§ 35 ch 98 SLA 1966)

Article 6. Negotiation and Mediation.

Union security arrangements in state public employment. 95 ALR3d 1102.

Sec. 14.20.550. Negotiation with certificated employees. Each city, borough and regional school board, shall negotiate with its certificated employees in good faith on matters pertaining to their employment and the fulfillment of their professional duties. (§ 1 ch 18 SLA 1970; am § 3 ch 71 SLA 1972; am § 21 ch 124 SLA 1975)

NOTES TO DECISIONS

Constitutionality. — This section and AS 14.20.610 state two goals which apparently conflict, but since the supreme court construes this section fairly narrowly, it finds no constitutional infirmity in this section and AS 14.20.610. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Requirements of section. — This section merely requires a school board to negotiate with a union. It does not require a board to accept any particular proposal a union might offer. It does not require, and probably does not permit, a board to delegate to a union the sole power to make any decision. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

As to matters which affect educational policy and are, therefore, not negotiable, there is nevertheless implicit in the Alaska Statutes the intention that the school boards meet and confer with the unions. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Negotiable items. — Salaries, fringe benefits, the number of hours worked, and the amount of leave time are negotiable. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

The salary of teachers is a proper subject of collective bargaining under Alaska's statutes. Rouse v. Anchorage School Dist., Sup. Ct. Op. No. 2106 (File No. 4715), 613 P.2d 263 (1980).

Nonnegotiable items. — Such items as (1) relief from nonprofessional chores, (2) elementary planning time, (3) paraprofessional tutors, (4) teacher specialists, (5) teacher's aides, (6) class size, (7) pupil-teacher ratio, (8) a teacher

ombudsman, (9) teacher evaluation of administrators, (10) school calendar, (11) selection of instructional materials, (12) the use of secondary department heads, (13) secondary teacher preparation and planning time, and (14) teacher representation on school board advisory committees are, under the existing statutory language, nonnegotiable. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Dismissal of complaint held proper. — Change in teachers' salaries brought about by contract renegotiation did not abuse any "vested" rights entitled to judicial protection, and dismissal of the complaint for failure to state a claim for which relief could be granted was proper. Rouse v. Anchorage School Dist., Sup. Ct. Op. No. 2106 (File No. 4715), 613 P.2d 263 (1980).

Sec. 14.20.555. Optional coordinated employee negotiations. (a) Negotiations between the certificated employees of the regional educational attendance areas and the respective regional school boards shall be conducted by one team representing all the certificated employees, one team representing all the certificated administrative personnel if they have joined together to negotiate independently as provided in AS 14.20.560(f), and one team representing all the participating regional school boards.

(b) Each team may consist of as many members as there are regional school boards. Each board is entitled to one member on the team. However, each negotiating team shall consist of not less than five members.

(c) A regional educational attendance area board may by resolution choose to conduct its own negotiations in accordance with AS 14.20.550. (§ 22 ch 124 SLA 1975)

Sec. 14.20.560. Teachers' bargaining groups and meetings with the groups. (a) When a majority of the certificated employees in a school district have designated an educational organization of their own choosing to bargain for them, the organization shall be recognized by the school board as the bargaining agent for all the certificated staff, except superintendents of schools. The membership of any such recognized educational organization shall be composed principally of those employed in the teaching profession in Alaska.

(b) The organization representing a majority of the certificated employees of a school district shall, upon the request of the school board, submit an affidavit verifying that it does represent a majority of the certificated employees. Recognition of the employee bargaining agency by a school board is valid for one year or a term agreed upon by the two parties to an agreement, unless a majority of certified staff votes to request the termination of recognition of the employee bargaining agency. The school board is entitled to an affidavit of membership from the employee bargaining agency once each year.

(c) Upon the request of 25 per cent of the certificated employees in a district, the school board shall hold, within 20 days, an election by secret ballot of all the certificated employees in order to determine their choice of a bargaining agency. The results of this election are binding for one year.

(d) A school board shall, upon the written request of the employee bargaining organization, meet with the representative of the organization within 20 days of the request at a time and place to be mutually agreed upon. In the same manner, representatives of an employee bargaining organization are required to meet with a school board or its representatives within 20 days after receiving a written request. The school board and the employee organization may not select more than five representatives each to negotiate for them.

(e) The negotiating meeting may be held in executive session upon mutual agreement of both parties, but all final agreements shall be made at a public meeting of the school board.

(f) Nothing in this section shall be construed to prevent certificated administrative personnel groups, including principals and assistant principals, from having the right to negotiate independently of the other certificated personnel if they choose to do so as the result of a secret ballot. (§ 1 ch 18 SLA 1970; am § 1 ch 43 SLA 1971)

NOTES TO DECISIONS

Negotiable items. — The salary of teachers is a proper subject of collective bargaining under Alaska's statutes. Rouse v. Anchorage School Dist., Sup. Ct. Op. No. 2106 (File No. 4715), 613 P.2d 263 (1980).

Dismissal of complaint held proper. — Change in teachers' salaries brought about by contract renegotiation did not abuse any "vested" rights entitled to judicial protection, and dismissal of the complaint for failure to state a claim for which relief could be granted was proper. Rouse v. Anchorage School Dist., Sup. Ct. Op. No. 2106 (File No. 4715), 613 P.2d 263 (1980).

Sec. 14.20.570. Mediation. (a) Upon the written request for mediation by an employee bargaining agency or a school board, and upon certification by the requesting party that the parties cannot agree on an independent private mediator and that good faith negotiations have terminated in an impasse, the following occurs:

(1) Within seven days of the certification the requesting party shall ask the United States Federal Mediation and Conciliation Service to serve as the agency to resolve the dispute.

(2) The mediator shall chair all mediation meetings between the disputing parties and attempt to resolve the differences between the disputing parties and reach common acceptance of terms and conditions or other items in dispute wherever possible.

(3) Within 30 days of the initial meeting of the parties to the dispute the mediator shall have reduced all the agreed terms, conditions and other items to a written contract. If mutually agreed the period for reporting the contract to both parties may be extended.

(4) Each party to the dispute may select a team of not more than five persons to present the evidence, thinking and position of the group they represent, to the mediator.

(b) If the mediation meetings are held during the school day, teachers representing an employee bargaining agency shall be released from classroom or other assigned duties without penalty or loss of pay. (§ 1 ch 18 SLA 1970; am § 1 ch 201 SLA 1975)

Sec. 14.20.580. The mediation report. (a) Within 10 days each party to the dispute shall accept or reject in total the mediation report.

(b) If rejected by either party, the mediator shall have an additional five days to review the objections and prepare a final report.

(c) If the final report is rejected by either side, the governor may appoint an advisory arbitrator to review the issues and make recommendations for solution. (§ 1 ch 18 SLA 1970; am § 2 ch 201 SLA 1975)

Sec. 14.20.590. Grievance procedures. Negotiations agreements executed after July 1, 1975 shall define "grievances" and provide for grievance procedures for the certificated staff. The grievance procedures shall provide that the final step in the procedure shall be binding arbitration. The negotiations agreement shall provide a method for the selection of an arbitrator. (§ 1 ch 18 SLA 1970; am § 3 ch 201 SLA 1975)

Sec. 14.20.600. Individual cases. Nothing in AS 14.20.550 — 14.20.590 prohibits an employee from addressing a school board, as an individual, through the regular procedures of the school board for hearing individual cases. (§ 1 ch 18 SLA 1970)

Sec. 14.20.610. Legal responsibilities of boards. Nothing in AS 14.20.550 — 14.20.600 may be construed as an abrogation or delegation of the legal responsibilities, powers, and duties of the school board including its right to make final decisions on policies. (§ 1 ch 18 SLA 1970)

NOTES TO DECISIONS

Constitutionality. — AS 14.20.550 and this section state two goals which apparently conflict, but since the supreme court construes AS 14.20.550 fairly narrowly, it finds no constitutional infirmity in AS 14.20.550 and this section. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

As to matters which affect educational policy and are, therefore, not negotiable, there is nevertheless implicit in the Alaska Statutes the intention that the school boards meet and confer with the unions. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Negotiable items. — Salaries, fringe benefits, the number of hours worked, and the amount of leave time are negotiable. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Nonnegotiable items. — Such items as (1) relief from nonprofessional chores, (2) elementary planning time, (3) paraprofessional tutors, (4) teacher specialists, (5) teacher's aides, (6) class size, (7) pupil-teacher ratio, (8) a teacher ombudsman, (9) teacher evaluation of administrators, (10) school calendar, (11) selection of instructional materials, (12) the use of secondary department heads, (13) secondary teacher preparation and planning time, and (14) teacher representation on school board advisory committees are, under the existing statutory language, nonnegotiable. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Article 7. Interstate Agreement on Qualification of Educational Personnel.

Section
620. Entry into agreement
630. Terms and provisions of agreement
640. Designated state official to make contracts
650. Filing and publishing of contracts

Sec. 14.20.620. Entry into agreement. The interstate Agreement on Qualification of Educational Personnel is enacted into law and entered into in behalf of the State of Alaska with all other states and jurisdictions legally joining in it in a form substantially as contained in AS 14.20.630. (§ 1 ch 83 SLA 1970)

Sec. 14.20.630. Terms and provisions of agreement. The terms and provisions of the agreement referred to in AS 14.20.620 are as follows:

INTERSTATE AGREEMENT ON QUALIFICATION OF EDUCATIONAL PERSONNEL.

ARTICLE I. PURPOSE, FINDINGS, AND POLICY.

(1) The states party to this agreement, desiring by common action to improve their respective school systems by utilizing the teacher or other professional educational person wherever educated, declare that it is the policy of each of them, on the basis of cooperation with one another, to take advantage of the preparation and experience of such persons wherever gained, thereby serving the best interests of society, of education, and of the teaching profession. It is the purpose of this agreement to provide for the development and execution of such programs of cooperation as will facilitate the movement of teachers and other professional educational personnel among the states party to it, and to authorize specific interstate educational personnel contracts to achieve that end.

(2) The party states find that included in the large movement of population among all sections of the nation are many qualified educational personnel who move for family and other personal reasons but who are hindered in using their professional skill and experience in their new locations. Variations from state to state in requirements for qualifying educational personnel discourage such personnel from taking the steps necessary to qualify in other states. As a consequence,

a significant number of professionally prepared and experienced educators is lost to our school systems. Facilitating the employment of qualified educational personnel, without reference to their states of origin, can increase the available educational resources. Participation in this compact can increase the availability of educational manpower.

ARTICLE II. DEFINITIONS.

As used in this agreement and contracts made pursuant to it, unless the context clearly requires otherwise:

(1) "Educational personnel" means persons who must meet requirements pursuant to state law as a condition of employment in educational programs.

(2) "Designated state official" means the education official of a state selected by that state to negotiate and enter into, on behalf of his state, contracts pursuant to this agreement.

(3) "Accept," or any variant thereof, means to recognize and give effect to one or more determinations of another state relating to the qualifications of educational personnel in lieu of making or requiring a like determination that would otherwise be required by or pursuant to the laws of a receiving state.

(4) "State" means a state, territory, or possession of the United States; the District of Columbia; or the Commonwealth of Puerto Rico.

(5) "Originating state" means a state (and the subdivisions thereof, if any) whose determination that certain educational personnel are qualified to be employed for specific duties in schools is acceptable in accordance with the terms of a contract made pursuant to Article III.

(6) "Receiving state" means a state (and the subdivisions thereof) which accept educational personnel in accordance with the terms of a contract made pursuant to Article III.

ARTICLE III. INTERSTATE EDUCATIONAL PERSONNEL CONTRACTS.

(1) The designated state official of a party state may make one or more contracts on behalf of that state with one or more other party states providing for the acceptance of educational personnel. Any such contract for the period of its duration shall be applicable to and binding on the states whose designated state officials enter into it, and the subdivisions of those states, with the same force and effect as if incorporated in this agreement. A designated state official may enter into a contract pursuant to this article only with states in which the state official finds that there are programs of education, certification standards or other acceptable qualifications that assure preparation or qualification of educational personnel on a basis sufficiently comparable, even though not identical to that prevailing in his own state.

(2) Any such contract shall provide for:

(a) Its duration.

(b) The criteria to be applied by an originating state in qualifying educational personnel for acceptance by a receiving state.

(c) Such waivers, substitutions, and conditional acceptances as shall aid the practical effectuation of the contract without sacrifice of basic educational standards.

(d) Any other necessary matters.

(3) No contract made pursuant to this agreement shall be for a term longer than five years but any such contract may be renewed for like or lesser periods.

(4) Any contract dealing with acceptance of educational personnel on the basis of their having completed an educational program shall specify the earliest date or dates on which originating state approval of the program or programs involved can have occurred. No contract made pursuant to this agreement shall require acceptance by a receiving state of any persons qualified because of successful completion of a program prior to January 1, 1954.

(5) The certification or other acceptance of a person who has been accepted pursuant to the terms of a contract shall not be revoked or otherwise impaired because the contract has expired or been terminated. However, any certificate or other qualifying document may be revoked or suspended on any ground which would be sufficient for revocation or suspension of a certificate or other qualifying document initially granted or approved in the receiving state.

(6) A contract committee composed of the designated state officials of the contracting states or their representatives shall keep the contract under continuous review, study means of improving its administration, and report no less frequently than once a year to the heads of the appropriate education agencies of the contracting states.

ARTICLE IV. APPROVED AND ACCEPTED PROGRAMS.

(1) Nothing in this agreement shall be construed to repeal or otherwise modify any law or regulation of a party state relating to the approval of programs of educational preparation having effect solely on the qualification of educational personnel within that state.

(2) To the extent that contracts made pursuant to this agreement deal with the educational requirements for the proper qualification of educational personnel, acceptance of a program of educational preparation shall be in accordance with such procedures and requirements as may be provided in the applicable contract.

ARTICLE V. INTERSTATE COOPERATION.

The party states agree that:

(1) They will, so far as practicable, prefer the making of multilateral contracts pursuant to Article III of this agreement.

(2) They will facilitate and strengthen cooperation in interstate certification and other elements of educational personnel qualification and for this purpose shall cooperate with agencies, organizations, and associations interested in certification and other elements of educational personnel qualification.

ARTICLE VI. AGREEMENT EVALUATION.

The designated state officials of any party states may meet from time to time as a group to evaluate progress under the agreement, and to formulate recommendations for changes.

ARTICLE VII. OTHER ARRANGEMENTS.

Nothing in this agreement shall be construed to prevent or inhibit other arrangements or practices of any party state or states to facilitate the interchange of educational personnel.

ARTICLE VIII. EFFECT AND WITHDRAWAL.

(1) This agreement shall become effective when enacted into law by two states. Thereafter it shall become effective as to any state upon its enactment of this agreement.

(2) Any party state may withdraw from this agreement by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the governor of the withdrawing state has given notice in writing of the withdrawal to the governors of all other party states.

(3) No withdrawal shall relieve the withdrawing state of any obligation imposed upon it by a contract to which it is a party. The duration of contracts and the methods and conditions of withdrawal therefrom shall be those specified in their terms.

ARTICLE IX. CONSTRUCTION AND SEVERABILITY.

This agreement shall be liberally construed so as to effectuate the purposes thereof. The provisions of this agreement shall be severable and if any phrase, clause, sentence, or provision of this agreement is declared to be contrary to the constitution of any state or of the United States, or the application thereof to any government, agency, person, or circumstances is held invalid, the validity of the remainder of this agreement and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this agreement shall be held contrary to the constitution of any state participating therein, the agreement shall remain in full force and effect as to the state affected as to all severable matters. (§ 1 ch 83 SLA 1970)

Editor's notes. — In article III (1) of the compact, the word "that" was substituted for "his" in the first sentence and the words "the state official" were substituted for "he" in the third sentence by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.640. Designated state official to make contracts. The designated state official to make contracts on behalf of the state according to Article III of the agreement shall be the commissioner. (§ 1 ch 83 SLA 1970)

Revisor's notes. — The words "of education" were deleted following "commissioner" by the revisor of statutes under AS 01.05.031. See AS 14.60.010.

Sec. 14.20.650. Filing and publishing of contracts. True copies of all contracts made on behalf of this state according to the agreement shall be kept on file in the office of the commissioner and in the office of the lieutenant governor. The Department of Education shall publish all contracts in convenient form. (§ 1 ch 83 SLA 1970)

Revisor's notes. — In the first sentence of the section, the words "of education" were deleted following "the commissioner" and "lieutenant governor" was substituted for "secretary of state" by the revisor of statutes under AS 01.05.031.

HB

583

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 583

Support

The reporting of gunshot and stab wounds to law enforcement agencies by treating physicians and health care institutions is a basic tool within the criminal justice systems of most states that is not presently available to law enforcement agencies in Alaska. The absence of such a requirement under current law means that some serious assaults may never be reported to law enforcement authorities, especially in the remote villages and rural areas of the State.

Until recently, physicians and health care institutions had reported wounds of the types described in HB 583 to law enforcement agencies without being required to do so out of a desire to serve the public good. Privacy statutes and fear of litigation have virtually ended this long-standing informal relationship.

This legislation will enable timely responses from law enforcement officers to protect victims of violent crimes and to investigate the apparent commission of serious crimes. it may aid in the apprehension of the offender before he can do harm to other members of the public.

Robert J. Sundberg
Commissioner

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 583

For an Act entitled: "An Act relating to report of certain injuries."

This Act amends AS 18.20 by adding provisions requiring that health care facilities and providers report cases involving certain types of injuries to law enforcement agencies. The types of injuries include those inflicted by firearms and those which are caused by cutting or stabbing implements or which are likely to be fatal unless the cause of the injury is clearly accidental. Both immediate verbal and follow-up written reports are required. The Act also provides for civil and criminal immunity for persons making repo.ts in good faith under this requirement.

The Department of Health and Social Services endorses passage of this Bill since it clearly delineates when reports are required and provides the necessary legal protections to institutions and providers reporting such injuries. It will bring the Alaska statutes into line with those in many other states.

ANALYSIS

I. Assumptions:

House Bill No. 585 will create an Inmate Education Advisory Council made up of five members. The duties of the Council are to:

1. Research and make recommendations regarding inmate education in the State's prisons;
2. Coordinate a system of inmate education that is based on the individual inmate's education level;
3. Hire the staff necessary to carry out the provisions of the Act; and
4. Perform all acts necessary to carry out the purposes of the Act.

It is assumed that a staff of a full time Associate Coordinator and a half-time Clerk Typist III will be required by the Council to provide the research and support for the Council to receive adequate information to evaluate the existing education programs and then make recommendations regarding the future education programs in the State's prisons. It is also assumed that the Council will meet quarterly, with only four of the five members in attendance. As education is a statewide program, the cost estimates are based on the assumption that the Council will be appointed from the following areas of the State where prison facilities are located:

1 member - Ketchikan
1 member - Juneau
2 members - Anchorage/vicinity
1 member - Fairbanks

A 6% inflation factor was used for fiscal years subsequent to 1985.

II. Program Summary:

A. Positions:

	Associate Coordinator (12 months)	Clerk Typist III (6 months)
Annual Salary	$35,580	$ 9,588
Supplemental Benefits @ 6.13%	2,181	588
Retirement @ 13.8%	4,910	1,323
Variable Benefits @ 4.045%	1,439	388
Fixed Benefits @ $227.35/mo.	2,728	1,364
Total Personal Services	$46,835	$13,251
Travel	3,000	-0-
Contractual (communications, copying, rent)	4,500	3,000
Commodities (office supplies)	600	600
Equipment	1,500	2,500
Total Position Cost	$56,438	$19,351

B. Other Expenditures:

The following identified expenditures are for Council members travel and per diem costs, long distance telephone charges and commodities and/or supplies specific to their quarterly meetings:

Travel	$ 6,900
Contractual	1,000
Commodities	400
Total - Other Expenditures	$ 8,300

III. Economic Impact:

Enactment of this bill will not have a significant impact on the State's economy.

IV. Impact on Local Government:

This bill has no apparent impact on local government units.

ADULT CORRECTIONS AGENCY
Pouch T
Juneau, Alaska 99811

POSITION PAPER
House Bill No. 585

"An Act relating to the Inmate Education Advisory Council."

House Bill No. 585 would create an Inmate Education Advisory Council to coordinate inmate education services. The Council's duties would include, but not be limited to, conducting research and making recommendations regarding inmate education; coordination of an inmate education program based on individual inmate's education level; and hiring the staff necesssary to carry out the provisions of the Act.

The Adult Corrections Agency fully recognizes the value and need for input from both the community and agency staff regarding the development and administration of the inmate education program. The Adult Corrections Agency has set a high priority on the coordination of the inmate education program since the Director of Statewide Programs position was authorized and filled.

In keeping with this commitment, the Director of Statewide Programs, in conjunction with the Department of Education, has established a Corrections Education Advisory Board. The Board consists of thirteen members, who initially met December 15, 1983. The Board represents the following agencies:

University of Alaska - Anchorage, School of Justice
Anchorage Community College, Eagle River Extension
Adult Learning Programs of Alaska
University of Alaska, Rural Education
Department of Education
Hiland Mountain Correctional Center
Peninsula Learning Resources
Southeast Regional Resource Center
Fairbanks Correctional Center
Cook Inlet Pre-Trial Facility
Anchorage Community College, Adult Learning Center
Kawerak, Inc.
Human Resources Adult Education

The Board has been given the responsibility to make policy and procedure recommendations, but does not have as broad a scope of powers that House Bill No. 585 would give to the Inmate Education Advisory Council. It is felt that the Corrections Advisory Board meets the intent of the proposed legislation, while leaving the administrative responsibilities of the inmate education program to Corrections professionals.

Education is just one part of the complex incarceration/rehabilitation regimen experienced by the inmates. The Adult Corrections Agency must retain control of programs administered in the State correctional facilities to ensure that the needs of both the institution and the inmates are met.

Therefore, the Adult Corrections Agency agrees in concept with this proposed legislation, but does not support its passage.

Re: CSHB 588.

Dear Bill:

I have attached Guy's research on the captioned bill. It very well explains the subject matter of the bill; I favor the legislation.

Too often people get involved in a bureaucratic maze and encounter excessive red tape and unnecessary delay. If a hearing officer, for example, knew that the state could be assessed attorneys fees and/or costs if he made a capricious or arbitrary decision, we might arrive at more efficient processing and handling of claims.

I have not talked to the prime sponsor to find out whether she has a particular target in mind, but I'd be more than happy so to do if requested by you.

Regards,

3—

CSHB 588 AN ACT PROVIDING FOR THE AWARD OF COSTS AND ATTORNEY FEES TO PERSONS WHO PREVAIL IN CERTAIN STATE ADMINISTRATIVE PROCEEDINGS AND PROVIDING FOR AN EFFECTIVE DATE

NEW SECTIONS ADDED TO 09.50

Sec. 1. ARTICLE 7 COST AND ATTORNEY FEES IN ADMINISTRATIVE PROCEEDINGS.

09.50.140 AWARD OF COSTS AND ATTORNEY FEES TO RESPONDENTS IN ADMINISTRATIVE PROCEEDINGS.

(a) Allows a respondent, who prevails in an administrative proceeding involving a civil penalty on that person or revocation, suspension, limitation or the conditioning of a persons license or privilege, to recover from the state, the costs of defense including attorney fees.

(b) Allows respondent to recover from the state the reasonable costs of the appeal and the administrative proceedings, including reasonable attorney fees, if the origional determination imposes a civil penalty or revocation, suspension, limitation or conditioning of a right, authority, license or authority and that decision is reversed in a subsequent court proceeding.

(c) Provides that the award of attorney fees may not exceed $75 and hour for services actually rendered and the total may not exceed $10,000 unless the limitation results in the extreme hardship of the prevailing party.

(d) Provides that the award of attorney fees or costs made under this section may be appealed to Superior Court.

******(who pays for the appeal???)

(e) Provides that this provision does not apply to claims for costs or attorney fees that are specifically authorized by statute or rules of court.

(f) Defines state agency and includes the Univ. of Alaska

Section 2. Provides that the act applies only to proceedings commenced after the effective date of this act.

Section 3. Immediate effective date.

FISCAL ANALYSIS

CSHB 588 (Jud)

This legislation, if it becomes law, will create the need for a staff attorney/hearing officer to handle the more sophisticated proceedings which would result from the involvement of attorneys. At the very least, a contract attorney would be required to advise the commissioner.

We further believe it would be necessary to contract the services of court reporters to record the hearings and prepare transcripts which meet the more stringent expectations of an attorney.

Since hearings are requested and granted statewide, travel would be substantial in order to hold the hearings in locations most convenient to the participants.

The claims figures are based on the fact that in 1983, ten hearings were granted, only one of which could result in the reversal of an agency decision, at an estimated cost of $50,000 for costs and attorney fees.

In estimating future fiscal impact, we have assumed that passage of HB 588 would result in more hearings being requested and granted, with a similar percentage of reversals.

In truth, there is no way to accurately estimate fiscal impact. Each case is unique and could result in complications and costs even greater than anticipated herein.

JUSTIFICATION

Should HB 588 become law, this position would be necessary to handle the more sophisticated hearings which would result.

It is also anticipated that there would be an increase in the number of hearings requested, thereby precluding the Commissioner from acting as hearing officer, even if he had the legal expertise to do so.

Since hearings are held statewide, a substantial travel increment would be required. We further believe it would be necessary to contract the recording of the hearings to court reporters rather than simple cassette recordings by persons unfamiliar with formal proceedings.

POSITION PAPER

DEPARTMENT OF ENVIRONMENTAL CONSERVATION

CSHB 588 (Judiciary)

Award of Costs and Attorney Fees,
State Administrative Proceedings

While we have no problem with the concept of reimbursing reasonable costs to persons who challenge permit decisions and prove that the department erred, we believe encouraging the involvement of attorneys would complicate what is now a very simple process within our regulations and would result in an increase in hearings at great expense to the state with a disproportionate benefit to the public, given the fact that most of this department's challenged decisions have been upheld.

Our adjudicatory process was created for use by laypersons. It provides an informal forum whereby anyone may challenge a department decision and bring that challenge before the commissioner. In such cases, the Department of Law attorney assigned to defend the decision has kept a low profile with regard to strict legal procedure, keeping objections to a minimum and giving as much leeway to the layperson as possible.

Most of the adjudicatory hearings before this department have not involved attorneys. Those that have became a nightmare of motions to be decided, and extensions of time that delayed the decision many months beyond the limits set in our regulations. A formal atmosphere was created in what was intended to be a quasi-judicial setting.

Under AS 46.35.090(e), this department "need not conform to the Administrative Procedure Act" when a permit decision is adjudicated. However, when a proceeding becomes complicated with factors not anticipated when our regulations were drafted, we are forced to look elsewhere for guidance, i.e., the Administrative Procedure Act and the Alaska Rules of Court. Such complication was clearly not envisioned when the adjudicatory process was developed. If this bill becomes law, we would require a staff attorney/hearing officer or, at the very least, a contract attorney to advise the commissioner. It would also be necessary to rewrite our regulations to include more sophisticated procedures.

A memo dated July 8, 1982 from Art Peterson at Department of Law addressing award of costs and fees, states "It is difficult to relate [the concept of 'prevailing party'] to either the single-party or multi-party permit-application adjudications handled by your department."

For example, when someone challenges a permit issued for a solid waste disposal site, that challenge usually reflects the undesirability of having such a site near their home. That argument is a zoning issue beyond our jurisdiction. For that person to "prevail," we would have to withhold the permit and prevent the site from being established. What actually happens, however, when a decision is found lacking in some respect, is that the matter is remanded back to the regional office for further study or refinement. Permit conditions are sometimes amended. While that could be interpreted as a "victory" for the requestor, in the very strictest sense, it is not.

We certainly appreciate the intent of this legislation. Not many private citizens will devote the time and effort spent by Mrs. McCallon in her "successful" adjudication of the Auke Bay Breakwater permit, or by Mr. and Mrs. Allen in their "unsuccessful" adjudication of the Soldotna Landfill permit. They had no apparent difficulty with the hearing process and met most deadlines with ease.

At the other extreme we find the Cube Cove adjudication where five attorneys participated, and the Atwood adjudication with four attorneys. The Cube Cove decision was delayed for several months by complicated procedures, and the Atwood matter is still undecided nearly three years later. Costs and fees in those matters will probably amount to five figures.

While Cube Cove and Atwood would have involved attorneys with or without HB 588, that legislation will encourage even cases such as Auke Bay and Soldotna to escalate to the same unwieldy proportions.

Compliance order and emergency order hearings, on the other hand, are more formal, and more appropriately lend themselves to the presence of attorneys. This is evident from the requirement for the appointment of a formal hearing officer. Of the two types of hearings, it is suggested that adjudicatory hearings be exempted from this legislation, while compliance order and emergency order hearings be covered.

The amendment that places a ceiling on the amount that might be awarded is an improvement over the original bill, but it will still be costly for the state to bear this expense. Assessing fiscal impact is close to impossible.

We do not believe the delays inherent with a more complicated approach would serve the best interests of the public. Neither is the public well served by the state addressing increased, convoluted hearings at increased cost to the taxpayer, with no provision for reimbursement to the state from unsuccessful requestors.

If the award of attorney fees were restricted to proceedings which fall strictly under the Administrative Procedure Act (exempting our adjudicatory hearings but not our compliance hearings), while reasonable costs (excluding attorney fees but including expert witness fees--probably of far greater benefit to the requestor) were allowed for all proceedings, we believe the intent of the legislation would be carried out without jeopardizing the simple hearing process we follow.

March 27, 1984

SUBJECT: CSHB 596 (HESS)

TO: Representative Mae Tischer
Chairman, HESS Committee

FROM: Richard C. Folta
Legislative Counsel

You have asked if the committee can change the title of HB 596 originally sponsored by the Rules Committee at the request of the governor and if the amendments made in CSHB 596 are germane to the subject matter of the bill.

A. TITLE

Rule 24(c) of the Uniform Rules of the Alaska State Legislature does not allow a committee of a second house to change the title of a bill as enacted in the house of origin other than to make a clerical or technical change. There is no restriction on title changes in the house of origin other than the requirement that amendments must be germane to the original subject matter.

At the present time HB 596 is in the house of origin.

B. GERMANENESS

The original bill relates to public construction generally and schools specifically. CSHB 596 (HESS) relates to legislative space or facilities public works construction and location.

A committee substitute for a bill is an amendment to the bill. Rule 35 of the Uniform Rules provides in relevant part:

> A motion or proposition on a subject may not be admitted under color of amendment if the subject matter is different from that under consideration.

This is supplemented by Mason's Manual of Legislative Procedure which provides in Sec. 402.

Sec. 402. Amendments Must Be Germane

1. Every amendment proposed must be germane to the subject of the proposition or to the section or paragraph to be amended, and an amendment is not in order which is not germane to the question to be amended. This is, basically, a phase of the rule that each proposition have but one subject and that members have the right to vote separately on each question.

2. To determine whether an amendment is germane, the question to be answered is whether the question is relevant, appropriate, and in a natural and logical sequence to the subject matter of the original proposal.

3. To be germane, the amendment is required only to relate to the same subject. It may entirely change the effect of the motion or measure and still be germane to the subject.

4. An entirely new proposal may be substituted by amendment so long as it is germane to the main purpose of the original proposal.

5. An amendment to an amendment must be germane to the subject of the amendment as well as to the main question.

6. No independent new question can be introduced under cover of an amendment. But an amendment may be in conflict with the spirit of the original motion, and still be germane and, therefore, in order.

7. The admissibility of an amendment should be judged from the provisions of the text, rather than from the purpose which circumstances may suggest.

8. Whether a proposed amendment is consistent with the measure, motion or question proposed to be amended, is a question to be decided by the body and not by the presiding officer.

The HESS Committee substitute is an entirely new proposal. Both versions relate to public construction; however the original bill concerns school construction primarily while the substitute relates to legislative public work construction, planning, location and other matters that could be seen as not germane to the original subject matter. Using the germaneness criteria above, it is my opinion that the committee substitute is proper.

MEMORANDUM

TO: Representative Mae Tischer
FROM: Bill Lovell, Professional Assistant
DATE: March 27, 1984

RE: Sectional Analysis of CSHB 596 (HESS)

Pursuant to your request, I have prepared the following sectional analysis of the House HESS Committee Substitute for House Bill 596.

Section 1 inserts language allowing the legislature to convene regular legislative sessions in places besides the state capitol building. In accordance with current drafting methods, the word "that" is substituted for the word "which" throughout the existing section (Sec. 24.05.090).

Section 2 inserts language authorizing the Legislative Affairs Agency to supervise space occupied in any building by the legislature or its agencies, thereby permitting the Agency to maintain legislative space in buildings which are not state property (e.g., a private or municipal convention center). The section contains a definition which authorizes the Agency to supervise planning, construction, maintenance, occupancy, and operation of any facility, or space within any facility, for the legislature or its agencies. The agency is given specific right of prior approval before the state may acquire land, contract public works, expend state funds, or enter into a lease, if those actions relate to the legislature or its agencies (Sec. 24.05.190 (a)).

Section 3 adds new language permitting the legislature to authorize the Legislative Affairs Agency to acquire, construct or lease legislative facilities in the state capital or in any other location in the state for a regular or special session of the legislature (Sec. 24.05.190 (c)). The Agency is required to coordinate with the Department of Transportation and Public Facilities to carry out the provisions of AS 24.05.190 (Sec. 24.05.190 (d)).

Section 4 adds new language that requires appropriation bills

relating to legislative facilities or space within facilities to describe the location, purpose, and funding source for land acquisition, planning, and construction for the facility.

Section 5 inserts language requiring the Department of Transportation and Public Facilities to have the approval of the Legislative Affairs Agency before planning, or commencing construction of, legislative facilities.

Section 6 provides that the act takes effect immediately.

Introduced: 2/9/84
Referred: Health, Education &
Social Services and State Affairs

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 596

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public construction; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Public works →

* Section 1. AS 35.15.080(d) is amended to read:

(d) Provisions of this title governing planning, design, and construction of public works by the department, and regulations adopted under those [THE] provisions, govern the administration of projects assumed by a municipality or regional educational attendance area under this section or under AS 14.11.020. For that purpose those [THE] provisions supersede any conflicting provisions of ordinance or charter of a municipality.

School facilities →

* Sec. 2. AS 35.15.080(f) is amended to read:

(f) To carry out the purpose of this section, the commissioner of transportation and public facilities shall adopt regulations relating to the application for and the making and the conditions of agreements and the local assumption of responsibilities for the planning, design and construction of public works under this section. [HE SHALL INCLUDE IN GRANT CONTRACTS TERMS AND CONDITIONS REQUIRING A REGIONAL SCHOOL BOARD AND ITS CONTRACTORS TO ADHERE TO THE PROVISIONS OF AS 36.05.010 WITH RESPECT TO THE PAYMENT OF WAGE RATES ON CONSTRUCTION PROJECTS, AND AS 36.10.010 WITH RESPECT TO EMPLOYMENT PREFERENCE, AND MAY REQUIRE DIFFERENT TERMS IN AGREEMENTS FOR DIFFERENT PROJECTS TO MEET LOCAL CONDITIONS AND UNIQUE REQUIREMENTS AND TO ASSURE COMPLIANCE WITH THE PUBLIC FACILITIES PROCUREMENT POLICIES DEVELOPED BY THE

DEPARTMENT UNDER AS 35.10.160 -- 35.10.200.] If necessary, the commissioner may require as a condition of an agreement approval of the agreement by the federal government. [REGULATIONS ADOPTED, AMENDED OR REPEALED BY THE DEPARTMENT UNDER THIS SECTION WHICH RELATE TO EDUCATION FACILITIES SHALL BE DEVELOPED IN CONJUNCTION WITH THE ALASKA ASSOCIATION OF SCHOOL BOARDS AND THE ALASKA ASSOCIATION OF SCHOOL ADMINISTRATORS AND REVIEWED BY THOSE ASSOCIATIONS BEFORE FINAL ACTION ON THE REGULATIONS IS TAKEN BY THE DEPARTMENT.]

* Sec. 3. AS 35.25.020(2) is amended to read:

(2) "department" means the Department of Transportation and Public Facilities, except that, in connection with schools, it means the assembly, council, or school board that has assumed responsibilities under AS 14.11.020;

* Sec. 4. AS 35.27.030(1) is amended to read:

(1) "department" means the Department of Transportation and Public Facilities, except that, in connection with schools, it means the assembly, council, or school board that has assumed responsibilities under AS 14.11.020;

* Sec. 5. AS 35.30.040(1) is amended to read:

(1) "department" means the Department of Transportation and Public Facilities, [AND] the University of Alaska, and, in connection with schools, the assembly, council, or school board that has assumed responsibilities under AS 14.11.020;

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

HB 592, (cont'd)

state or the United States."

Provides Act takes effect immediately.

Introduced February 9 and referred to Labor & Commerce.

Criminal Cases (fines imposed)

HOUSE BILL NO. 593, by Reps. Liska, Barnes and Bussell. Amends section of statute relating to fines imposed on a defendant (AS 12.55.035) by adding language that states: "(e) If a defendant is sentenced to pay a fine, the clerk of the court shall increase the fine by a penalty of 20 percent of the actual fine imposed, excluding any amount that is suspended." Section 2 of the bill spells out the Legislative intent, stating: "It is the intent of the legislature that an amount equivalent to the 20 percent penalty collected under AS 12.55.035(e) be appropriated annually to the crime victim compensation fund (AS 18.67.162)." Does not provide for an effective date (becomes law 90 days after Governor signs bill).

Introduced February 9 and referred to Judiciary, Finance.

Appropriation (special) (Reindeer Herders Association)

HOUSE BILL NO. 594, by Rep. Fuller. Makes an $80,400 appropriation to the Department of Fish and Game for a grant to the Reindeer Herders Association for a study of the distribution and movement of caribou near reindeer herds on the Seward Peninsula. Provides appropriation shall be disbursed in accordance with laws relating to grants. Provides Act takes effect immediately.

Introduced February 9 and referred to Resources, Finance.

Court System Administrator (retirement benefits)

HOUSE BILL NO. 595, by Reps. Bussell, Cowdery, Fritz, Furnace, Hurlbert, Lindauer, Liska, Martin, Pestinger, and Ward. Would include the Administrative Director of the Alaska court system in the Public Employees' Retirement System (the Director is currently included under the Judicial Retirement System) and entitle the Administrator to credited service for employment as Administrative Director.

Repeals AS 22.25.012 (statute enabling the Director to be included in Judicial plan) and AS 39.35.680(21)(c)(vii) (Public Employees' Retirement System. Definition. "(21) 'member' or 'employee'. . .(C) Does not include. . .(vii) the administrative director of courts. . .unless he becomes a member. . .").

Provides Act takes effect immediately.

Introduced February 9 and referred to Judiciary, Finance.

Public Construction (schools)

HOUSE BILL NO. 596, by the Rules Committee by Request of the Governor. Relates to school construction (see accompanying letter from Governor Sheffield). Provides Act takes effect immediately.

HB 596, (cont'd)

Introduced February 9 and referred to Health, Education & Social Services, State Affairs..

In his message accompanying the bill, Governor Sheffield stated:

> Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting this bill making several changes pertaining to the school construction functions of the Department of Transportation and Public Facilities (DOT/PF). This bill augments the recent amendments (ch. 92, SLA 1982). It attempts to complete the job, clarifying the responsibilities for school construction, and removes uncertainties and inconsistencies in the pertinent statutes.
>
> Sections 1 and 2 correct what seem to have been oversights in ch. 92, SLA 1982. Although secs. 5 and 6 of that Act amended AS 35.15.080(a) and (c), respectively, to delete references to educational facilities and regional educational attendance areas, so that DOT/PF would no longer have primary responsibility for school construction, similar references were left in AS 35.15.080(d) and (f). Section 1 of this bill, recognizing the changes made by the 1982 amendments, inserts in (d) a cross reference to AS 14, the education title, to make clear that the various planning, design, and construction provisions of AS 35 and regulations adopted under AS 35 apply to schools as well as other public facilities. The present reference to a regional educational attendance area (REAA) assuming responsibility under "this section" is not correct since the 1982 amendments took REAA's out of that section -- AS 35.15.080 -- and enacted provisions governing them in AS 14. Similarly, sec. 2 of this bill deletes language pertaining to the commissioner of DOT/PF specifying grant contract provisions and adopting administrative regulations on school construction. Even when the DOT/PF performs the construction functions under a reimburseable services agreement with the Department of Education, it is the latter department that is responsible for the grant contract provisions and the regulations.
>
> Section 3 amends AS 35.25.020(2), the general definition of "department" for the purposes of AS 35, "Public Buildings, Works, and Improvements." Reference to assemblies, councils, and regional school boards (i.e., school districts, under AS 14.12.010) that have assumed responsibility under AS 14.11.020 is added to this definition, with regard to schools, because ch. 92, SLA 1982 provided for school districts to assume responsibility for school construction. (See AS 14.11.020 which appeared as AS 14.07.190 in sec. 3, ch. 92, SLA 1982.) It also transferred certain responsibilities from the Department of Transportation and Public Facilities to the Department of Education. Other than AS 35.25.020(2), there is no definition of "department" that is generally applicable to AS 35.10 and 35.15 (although both chapters contain definition sections applicable to individual articles in those chapters). This amendment thus should make clear that, when a school district assumes construction responsibility under AS 14.11.020, the district rather than the Department of Transportation and Public Facilities is responsible for functions under the following statutes:
>
> -- AS 35.10.010, "Standard Plans and Specifications and Limitations on Cost," which refers to "school buildings in incorporated cities" and excludes them from certain departmental duties unless built in whole or in part with state funds;
> -- AS 35.10.180, "Physical Facility Procurement and Planning Policies," in which subsec. (a) refers to "rural schools;"
> AS 35.15.100, "Responsibility of Department," which refers to "regional educational attendance areas;"
> -- AS 35.15.110, "Title to Site and Completion of Project," which refers to "school buildings" and "regional educational attendance areas;"
> -- AS 35.15.120, "Definitions," in which para. (2) refers to "regional educational attendance areas;"

HB 596, (cont'd)

-- AS 35.27.020, "Art Requirements for Public Buildings and Facilities," in which subsec. (c) refers to "schools;" and
-- AS 35.27.030, "Definitions," in which para. (2) refers to "schools."

Section 4 amends the definition of "department" in the chapter on art works in public buildings and facilities. AS 35.27.030(1). Reference to the school districts is added to the definition for the same reasons as mentioned in connection with sec. 3, above. The definition of "building" or "facility" in AS 35.27.030(2)(A)(i) is not being amended because there is no intent to delete the requirement for art work in public buildings -- just to make the responsibility for it clear in conjunction with ch. 92, SLA 1982.

Section 5 makes a similar amendment in the definition section -- AS 35.30.040 -- for the chapter on consistency with local government plans and ordinances.

These amendments do not include references to the court system because, although ch. 160, SLA 1980 transferred construction responsibility for court facilities from DOT/PF to the supreme court (see AS 22.05.025 and AS 35.-05.010), sec. 3 of that Act, as amended by sec. 2, ch. 70, SLA 1982, terminates that transfer as of June 30, 1984.

Section 6 gives this bill an immediate effective date since these amendments simply seek to complete the job of the 1982 amendments.

I urge your favorable action to preserve the intent of ch. 92, SLA 1982 and eliminate, for the benefit of the public, cluttered, inconsistent provisions.

State Election Laws (amending)

HOUSE BILL NO. 597, by the Rules Committee by Request of the Governor. Amends state election laws (see Governor's letter). Provides Act takes effect immediately.

Introduced February 9 and referred to State Affairs, Finance.

In his message transmitting the bill, Governor Sheffield stated:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill which amends or repeals several provisions of the state's election laws.

Sections 1 and 2 of the bill remove from the division of elections the burden of identifying and automatically reinstating the voter registration of certain felons who have been unconditionally discharged. Instead of suspending the registration of a person convicted of a felony involving moral turpitude, the division will cancel the registration until the person provides proof of unconditional discharge. Section 3 of the bill amends AS 15.-07.160, concerning unlawful acts, to conform to the changes made by secs. 1 and 2 of the bill.

Section 4 of the bill repeals AS 15.15.198(b), which allows to be counted certain questioned votes of voters whose names have been purged from the registration lists. As a result of the repeal, voters whose registrations have been cancelled under AS 15.07.130(b) will have to reregister in order to have their votes counted. Since AS 15.07.-130(b) requires the division to mail a notice of imminent registration cancellation to the affected voter, and AS 15.07.125 requires the division to post the list of registered voters 40 days before an election, a voter has adequate opportunity to preserve his or her voting rights.

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: HB 596

APPROVED: DM

TITLE: Relating to Public Constuction

DATE: 3/28/84

The Department of Transportation & Public Facilities supports the purpose of House Bill 596 to clarify Ch. 98, SLA 1982 relating to the administration of school construction functions of DOT&PF and the Department of Education. This bill clarifies the responsibilities of both departments and the local school districts with regard to school construction, and would make clear that the provisions of AS35 concerning public buildings, apply to a school constructed by a local district when it has assumed responsibility for school construction just as they do to a school constructed by the DOT&PF.

The Department of Education concurs with our position on HB 596.

BILL SHEFFIELD
GOVERNOR

HB 598

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 9, 1984

The Honorable Joe Hayes
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that would eliminate the cost-of-living-adjustment (COLA) requirement in the library assistance grant program. This change was requested by the Department of Education, the state library, and several community libraries. Due to the uncertainty of revenues, public library funding entities are experiencing difficulty in maintaining local funding for library services. Requiring an annual cost-of-living increase in local funding jeopardizes continuation of local library support and handicaps the purpose of the Library Assistance Grant Program to help local libraries provide service.

Usually communities that can increase local support of their public libraries do so. The COLA requirement implies that all communities need to be motivated by a legal requirement when that might be needed for only a few.

Section 1 amends the first sentence of AS 14.56.330(b) to remove the COLA requirement and to make clear that, if a library did not exist in fiscal year 1980, the amount to which the prohibition on using the state money to supplant the local money applies is the amount equal to local expenditures in the first year a matching grant is awarded. Section 2 would make this change effective immediately.

The legislation creating this program in 1981 passed both houses unanimously, and I urge early passage of this bill.

Sincerely,

Bill Sheffield
Governor

AG #377-118-84

IV. Analysis

This bill would remove from the library assistance grant program a requirement for a cost of living increase in local operating expenditures of libraries seeking grants. The requirement for COLA creates a hardship for some communities and endangers continuation of the local library service. The COLA requirement has an effect contrary to the intent to strengthen local library services with the grant program.

Increases in local expenditures for local libraries are better determined by local needs and capabilities.

class city of over 2,000 population. (§ 1 ch 42 SLA 1970; am § 27 ch. 53 SLA 1973)

Legislative history reports. — For report on ch. 53, SLA 1973 (CSHB 382), see 1973 House Journal, pp. 793, 885.

Article 5. Library Assistance Grants.

Section	Section
300. Library assistance grant fund	330. Limitations
310. Eligibility	340. Regulations
320. Applications	

Sec. 14.56.300. Library assistance grant fund. There is established in the department a library assistance grant fund. From legislative appropriations to the fund, the department shall make grants to eligible libraries for public library operations or for interlibrary cooperation or for both. (§ 1 ch 36 SLA 1981)

Sec. 14.56.310. Eligibility. (a) Libraries eligible for grants under AS 14.56.300 are:

(1) public libraries operated by municipalities or by public library nonprofit corporations; and

(2) libraries sharing resources or providing services to other libraries.

(b) A library described in (a) (1) of this section is eligible for a public library assistance grant. A library described in either (a) (1) or (2) of this section is eligible for an interlibrary cooperation assistance grant. (§ 1 ch 36 SLA 1981)

Sec. 14.56.320. Applications. An eligible library may apply to the department for a grant under AS 14.56.300 — 14.56.340 in accordance with regulations adopted by the board. (§ 1 ch 36 SLA 1981)

Sec. 14.56.330. Limitations. (a) A public library assistance grant under AS 14.56.300 — 14.56.340 may not exceed $10,000 for each local public library service outlet in any one fiscal year. However, no amount over $5,000 may be granted unless it is equally matched by local money.

(b) State money granted to a library under AS 14.56.300 — 14.56.340 may not be used to supplant local money equal to local expenditures for that library in fiscal year 1980, as adjusted annually by the commissioner to conform approximately to changes in the United States Department of Labor Bureau of Labor Statistics consumer price index for Anchorage, Alaska. A library that uses state money to supplant local money forfeits eligibility for grants under AS 14.56.300 — 14.56.340 for two years. (§ 1 ch 36 SLA 1981)

Sec. 14.56.340. Regulations. The board shall adopt regulations necessary to carry out the purposes of AS 14.56.300 — 14.56.330. (§ 1 ch 36 SLA 1981)

Editor's notes. — Section 3, ch. 36, SLA 1981, provides: "Administrative regulations adopted under a provision repealed by sec. 2 of this Act remain in effect until amended or repealed by the state Board of Education."

Article 6. Public Library Construction Grants.

Section
350. Public library construction grants

Sec. 14.56.350. Public library construction grants. (a) The director of the division of state libraries shall administer a program providing for grants to municipalities in the state for the construction and equipping of libraries. To be eligible for a grant under this section a municipality shall provide not less than 40 per cent of the total cost of the project for which funds are granted. The department shall administer the funds under this section and shall adopt regulations necessary to carry out the purposes of this section.

(b) In this section "municipality" means a city or organized borough of any class. (§ 1 ch 100 SLA 1970; AS 14.56.065)

Revisor's notes. — This section derived from AS 14.56.065 and was renumbered by the revisor of statutes under AS 01.05.031.

Cross references. — As to grants for constructing and equipping libraries in rural communities, see AS 14.56.200.

Chapter 57. The State Museum.

Section
10. The state museum
20. Museum Collections Advisory Committee
30. Officers; meetings, rules of procedure, quorum
40. Compensation; per diem, travel expenses
50. Collections management; acquisitions and dispositions
60. Advisory duties
70. Conflict of interest
80. Definitions

Collateral references. — 81A C.J.S. States, § 147.

Sec. 14.57.010. The state museum. (a) The Department shall manage and have complete charge of all of the property contained in the institution known as the state museum. The museum shall be maintained in the state capital. Branch museums may be established and maintained in other localities in the state.

MEMORANDUM State of Alaska

TO: The Honorable
Mike W. Miller, Chairman
Community and Regional Affairs
Alaska House of Representatives

DATE: March 2, 1984

FILE NO:

TELEPHONE NO:

FROM: Richard B. Engen, Director
Division of State Libraries
and Museums
Department of Education

SUBJECT: HB 598

The Cost of Living Allowance or inflation percentage requirement applied to local support of the local public library as a provision for receiving a Library Assistance Grant from the State was intended to assure that local governments would increase local support of local libraries at least at the rate of inflation.

There are two main problems with the COLA provision. They are:

1. Inflexibility- even though local support were increased, it might not be increased enough to meet a fixed percentage; and,

2. Indirect control of local decision - local support beyond maintenance of local expenditures in the base year should be decided by the local community, not by a fixed grant program.

By FY 1984, the COLA provision has become a potential liability to the local libraries. In some of the smaller communities there may not be any more money available for offsetting inflation. This currently would mean loss of the grant and deterioration of the library service. Since matching grants for Public Library Assistance had to be prorated this year at 73%, the State moved into a position of requiring local governments to spend more to receive less.

This position is not supportive of the purpose of the Library Assistance Grant Program or of the local libraries. Local libraries are part of their communities. The grant program is meant to assist public libraries with their operating costs and to be part of the Alaska Library Network. In addition annual reports from the majority of libraries indicate increases in local support since 1980. The increase in the number of eligible library outlets from 64 in FY 1982 to 89 in FY 1984 shows that both the communities and grants are working positively to improve library service in Alaska.

Removal of the COLA provision represents removal of a built-in conflict which creates a negative result for library service.

Two sample letters are attached.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF EDUCATION

DIVISION OF STATE LIBRARIES AND MUSEUMS

Richard B. Engen, Director

Pouch G, Juneau, Alaska 99811

October 26, 1983

Elva R. Scott
Eagle Public Library
P.O. Box 45
Eagle, Alaska 99738

Dear Mrs Scott:

Your Basic Public Library Assistance grant is being processed for FY 1984. I am pleased to see your plan to purchase a microfiche reader. It should be very useful to you and your library users.

Please start keeping circulation records and train volunteers to keep them, too. We use circulation statistics frequently as a mesaure of library activity and it is necessary to include Eagle.

I am concerned about your grant application for FY84 in that you request matching funds. Probably this is a repeated warning but if you start having matching for local funds, you must continue the amount plus cost of living increases or forfeit your grant for at least two years. Some libraries are running into this problem already. Since what you plan to do with your local money may relate to repairs and maintenance, I wonder if you will be able to have local money in the future. I really just want to be sure you understand the commitment you are making.

Sincerely,

Margaret

Deputy Director

cc: Audrey Kolb

Margaret - Elva is gone for the winter. Strike your 3rd paragraph, it's dumb. Tell me should not apply for the matching funds. So, if possible, please cancel that part of Elva's grant.

Patty Berg, Juneau

Margaret Leibowitz, Dep. Director
St. of Alaska/Dept. of Educ.
Alaska State Library
Pouch G
Juneau, Alaska 99811-0571

Dear Ms. Leibowitz:

The following information is what was requested on October 24th for our 1983 State Library Grant.

The library is kept open fifty weeks out of the year. We have $1101.94 left from the 1982 grant. The following orders are outstanding: World Book Encyclopedia @ $473.00; and Story House Corp. @ $310.00. That leaves about $319.00 to cover continues cataloging (card kits and labor) until the new grant arrives.

The library use statistics show the following community patron use: from November, 1980 to June, 1981 was 95 items - Cantwell started receiving television that year. July, 1981 to June, 1982 was 150 items. July, 1982 to June, 1983 was 300 items. July, 1983 to November, 1983 was 233 items. The library has one entire wall physically open to the main entrance hallway of the building with about only 35' of hallway reaching to the main doors. I had tried some evening hours in 1981, but haven't tried since then as I had had very little response. I'll be glad to approach the community about hiring someone as I as taking night classes. I do check books out for people any time I am in the building for classes or meetings. The school is still the major center for 95% of the meetings that are held in the community, and all of the adult education classes.

A Community of Cantwell, Inc. meeting was held November 9, 1983. It was decided that I should not apply for the matching grant monies even though the library has been designated to receive monies from them again. I was asked to get the complete procedures for the library grant and the matching grants. Margaret, this is the first time I have ever been told about the community being obligated forever and ever with cost of living increases. I would appreciate receiving ALL the information possible regarding this matter. Thank you.

Sincerely yours,
Armeda A. Bulard

STAFF REVIEW

HB 611, "An Act relating to dentists and dental hygienists," by Representative Walt Furnace, makes several changes to current law regarding dentists and dental hygienists. The Department of Commerce and Economic Development, Division of Occupational Licensing, estimates the fiscal impact of HB 611 to be $2,700 for FY 85, $1,300 for FY 86, $1,400 for FY 87, $1,500 for FY 88, and $1,600 for FY 89 (Please see fiscal note for greater detail).

Sections 1 - 6 of the bill amend AS 08.32, relating to the practice of dental hygienists. Many of the amendments in these sections transfer regulations applying to hygienists from AS 08.36, regulating dentists, to AS 08.32.

Sections 17 - 21 of the bill effect amendments to the practices of the Board of Dental Examiners which regulates both dentists and dental hygienists.

Sections 22 - 40 of the bill amend AS 08.36, relating to the practice of dentistry.

The bill does not provide for an effective date and would therefore become law 90 days after the Governor signs the bill.

("Sectional Analysis of CSHB 611 (Dentists and Dental Hygienists)," Teresa B. Kramer, Legislative Counsel. 4/23/84)

MEMORANDUM April 23, 1984

TO: Representative Mae Tischer, Chairman, House HESS
FROM: Bill Lovell, Professional Assistant

RE: CSHB 611 (HESS)

Pursuant to your direction, I have prepared a proposed House HESS Committee Substitute for House Bill 611, "An Act relating to dentists and dental hygienists."

The proposed House HESS Committee Substitute for House Bill 611 is identical to the House Labor and Commerce Committee Substitute, except that on Page 6, lines 10 - 11, of the proposed House HESS Committee Substitute, after the phrase "the direct," the words "or indirect" are inserted, so that the sentence now reads:

> "[A person licensed to practice the profession of dental hygiene in the state may,] if certified by the board and under the direct or indirect supervision of a licensed dentist, administer anesthetic agents." (Emphasis added to indicate insertion).

This language had been in the original version of the bill, but was removed in the Labor and Commerce Committee Substitute. Our office has received numerous requests from dentists, dental hygienists, and the general public to have the language reinserted.

SUBJECT: Sectional analysis of CSHB 611
(Dentists and Dental Hygienists)

TO: Representative Mae Tischer
Chairman, Health, Education and Social Services

FROM: Teresa B. Cramer TBC
Legislative Counsel

You have asked for a sectional analysis of CSHB 611 (HESS). The bill can be considered in three parts. Sections 1 - 16 amend AS 08.32, regulating the practice of dental hygienists. Many of the amendments transfer regulations applying to hygienists but codified in AS 08.36, regulating dentists, into AS 08.32.

The second group of amendments, found in sections 17 - 21, relate to the Board of Dental Examiners which regulates both dental hygienists and dentists.

The third part of the bill amends the regulation of dentists and is contained in sections 22 - 40.

Sections Relating to Dental Hygienists

Section 1 Clarifies the requirement that a dental hygienist be registered as well as licensed.

Section 2 Corrects reference to the Joint Commission on National Dental Examinations and permits an applicant to apply before graduating from school if the applicant will have graduated by the time of the examination.

Section 3 Makes changes to correct references.

Section 4 Permits dental hygienists licensed in another state to apply for a temporary license to pending receipt of the Alaska licensing examination results.

Section 5 Adds reference to licensing by credentials, created in section 4, and corrects reference to the fee section.

Section 6 Clarifies the composition and content of the licensing examination and permits the board to administer a laboratory examination as a prerequisite to the clinical examination.

Section 7 Renewal of registration is deleted from this section because the next section addresses the subject.

Section 8 Adds a new section to AS 08.32 to transfer provisions found in AS 08.36.250 for registration requirements for dental hygienists.

Section 9 The penalty established under AS 08.01.100(b) for late renewals $10.

Section 10 Gives the board power to set licensing fees by regulation. AS 08.36.190 currently lists fees for dental hygienists and dentists.

Section 11 Paragraph (6) adds reference to the board's certification process for administering local anesthetic agents.

Section 12 Permits the board to regulate functions, both intra-oral and extra-oral, that may be performed by a licensed dental hygienists.

Section 13 Paragraph (1) adds reference to registrations. Paragraph (2) adds fraudulent billing for services as a basis for imposing discipline. Paragraph (6)(A) substitutes "dependence" for "severe dependence." Paragraph (6)(B) adds failure to keep informed of or use current professional theories and practices as a ground for imposing discipline.

Section 14 Adds a new section to AS 08.32 to transfer provisions found in AS 08.36 that apply to dental hygienists. In subsection (c), the board is given power to suspend the license of a dental hygienist who refuses to submit to a physical or mental examination.

Section 15 A class B misdemeanor is punishable by a fine of no more than $1000 (AS 12.55.035) or imprisonment for no longer than 90 days (AS 12.55.135).

Section 16 Adds new provisions modeled on AS 08.36.350, which applies to dentists only, to permit hygienists in the categories listed to practice without a state license.

Sections relating to the Board of Dental Examiners

Section 17 Requires that the dental hygienist on the Board of Dental Examiners have practiced in Alaska for five years.

Section 18 Adds language to suspend a dentist or dental hygienist from the board if an accusation is filed against the person under the Administrative Procedure Act. The suspension lasts until the decision of the board is final under AS 44.62.520.

Section 19 Permits a majority of the board to call a meeting in the absence of a call of the president.

Section 20 Adds specific authorization for the department to reimburse board members for expenses.

Section 21 Paragraph (3) expands the required content of the board's annual report. Paragraph (a)(10) requires that the board publish information about its disciplinary decisions annually. Paragraph (a)(11) allows the board to set standards for specific procedures requiring training and education beyond the basic training provided to all dental hygienists and dentists and requires the board to issue certificates or permits to those who meet the requirements. Paragraph (a)(12) clarifies existing powers of the board.

Paragraph (b)(1) allows the board to order a professional to submit to a physical or mental examination if capacity to practice safely is at issue. Paragraph (b)(2) permits the board to authorize the inspection of records to monitor compliance with the licensing chapter for dental hygienists or for dentists.

Sections relating to Dentists

Section 22 Deletes reference to permits because the section allowing dentists to practice by permit instead of by license is repealed.

Section 23 Requires that all applicants for licensing as dentists pass the national board examination before taking the state exam. It also permits applicants to apply before

graduating if they will have graduated by the time of the examination.

Section 24 Requires that applications be signed and filed 45 days before the examination is given.

Section 25 Clarifies the composition and structure of the dentist licensing examination.

Section 26 The penalty established under AS 08.01.100(b) for late renewal is $10.

Section 27 Requires that dentists licensed in another state who are seeking licensure in this state have passed the national licensing examination.

Section 28 Deletes the requirement that dentists register with the clerk of the superior court.

Sections 29 and 30 Require that applicants for specialist licenses be eligible for diplomate status with a specialty board and that a licensed specialist take part in the licensing procedures.

Section 31 Adds subsection (b) requiring that dentists who are renewing their registrations report to the board any suits filed against them based on the quality of their professional services.

Section 32 Rewrites the fee section to allow the board to set fees by regulation instead of providing specific fee amounts by statute.

Section 33 Paragraph (2) adds fraudulent billing for services as a basis for imposing discipline. Paragraph (5) deletes "intentionally or negligently" from the paragraph permitting discipline for dentists who perform patient care below minimum professional standards. Paragraph (7)(C) permits disciplining dentists whose "dependence," rather than "severe dependency", on drugs or alcohol impairs their ability to practice. Paragraph (10) permits the board to discipline a dentist who fails to report a death that occurred at the office.

Section 34 Deletes reference to imposing discipline on dental hygienists (AS 08.32) because new sections were added to that chapter relating to discipline.

Section 35 Adds language to permit the board to suspend the license of a dentist who refuses to submit to a mental or physical examination.

Section 36 A class B misdemeanor carries a maximum fine of $1000 (AS 12.55.035) or imprisonment for no more than 90 days (AS 12.55.135).

Section 37 Paragraph (a)(5) exempts from licensing requirements licensed clinicians from other states who are providing limited instruction in this state. Paragraph (a)(6) exempts dentists providing emergency care from the state licensing requirements. Subsection (b) holds dentists exempt from licensing to the same standard of care as licensed dentists.

Section 38 Paragraph (7) defines the practice of dentistry to exclude owners and managers of dental facilities.

Section 39 Adds a new section to provide rights to dentists. Paragraphs (3) and (4) permit dentists supervising research in a research institution chartered with the state or in a school accredited by the American Dental Association to perform procedures that would otherwise violate the licensing chapter. Paragraph (4) requires that the dentist notify the board of any procedures to be performed on patients. The board may disapprove the procedures.

Section 40 Repeals five sections of the law.

08.36.140 permits the board to hold a licensing examination outside the state.

08.36.150 permits students in their last year of dental school to take the licensing examination and permits the board to give the exam in an out-of- state dental school.

08.36.170 permits students who are at least 19 years old to take section I of the state examination and then take the rest of the examination after graduation.

08.36.200 permits the board to waive the state written examination for applicants who have passed the national board examination.

08.36.280 provides for temporary permits to dentists practicing in a city or village which does not have a resident licensed dentist in active general practice.

FISCAL ANALYSIS:

Assumptions: If adopted in its present form, this bill would require regulations be adopted to implement the provisions of Sec. 17, paragraphs (10), (12) and (13), and Sec. 27. This would be a one time cost for FY '85 only for travel and contractual costs.

Sec. 17, paragraph (11), would require a continuing contractual cost for advertising of a summary of disciplinary actions by the board.

200 TRAVEL

1 staff travel to Fairbanks and Anchorage to conduct public hearings on proposed regulations.

Fairbanks:	Transportation - 1 trip	$ 450.00
	Per Diem: 2 days @ $90.00	180.00
Anchorage:	Transportation - 1 trip	375.00
	Per Diem: 2 days @ $80.00	160.00
	Total	$1,165.00

300 CONTRACTUAL

Advertising costs for public notices of proposed regulations and public hearings; 3 major newspapers, one time only X $100.00 each. (one time cost - FY '85 only)	$ 300.00
Advertising costs for quarterly publication of the summary of disciplinary actions; 3 major newspapers, one time only X $100.00 each = $300.00 X 4 quarters=	1,200.00
(7% inflation factor projected for succeeding fiscal years) Total	$1,500.00

4/25/84

A M E N D M E N T # 2
(AS TO INTENT ONLY)

TO CSHB 611 (HESS) BY THE HESS COMMITTEE

On Page 16, Line 20

After the words "A specialist," insert "appointed by the board."

On Page 16, Line 21

Delete "participate as a voting member of the board" and substitute "assist the board."

So that the sentence would read:

"A specialist, appointed by the board and licensed in that specialty, shall assist the board in the licensing procedures."

(Proposed by the Division of Occupational Licensing)

Amendment Adopted - incorporated into HESS CS

by Lowe

Sec. 08.32.165. Limits or conditions on license; discipline. (a) In addition to action under AS 08.32.160, upon a finding that by reason of demonstrated problems of competence, experience, education or health the authority to practice dental hygiene should be limited or conditioned or the practitioner disciplined, the board may reprimand, censure, place on probation, restrict practice by specialty, procedure or facility, require additional education or training, or revoke or suspend a license.

(b) Repealed by § 15 ch 59 SLA 1978. (§ 7 ch 102 SLA 1976; am § 15 ch 59 SLA 1978)

Cross references. — For present provisions covering the subject matter of repealed subsection (b), see AS 08.32.185.

Effect of amendments. — The 1978 amendment repealed subsection (b), which read "The Administrative Procedure Act (AS 44.62) applies to any action taken by the board under this section."

Sec. 08.32.170. Procedure followed.
Repealed by § 15 ch 59 SLA 1978.

Cross references. — For present provisions covering the subject matter of the repealed section, see AS 08.32.185.

Editor's notes. — The repealed section derived from § 4, ch 78, SLA 1953.

Sec. 08.32.180. Violation. A person who violates this chapter or who fails to comply with the requirements of this chapter, a penalty for which is not otherwise provided, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $100. (§ 5 ch 78 SLA 1953)

Article 3. General Provisions.

Section
185. Application of Administrative Procedure Act
190. Definitions

Sec. 08.32.185. Application of Administrative Procedure Act. The Administrative Procedure Act (AS 44.62) applies to any action taken by the board under this chapter. (§ 14 ch 59 SLA 1978)

Sec. 08.32.190. Definitions. In this chapter

(1) "board" means the Board of Dental Examiners;

(2) "dental hygienist" means a person who is licensed by the board to perform those educational, preventive, and therapeutic services and procedures that licensed dental hygienists are educated to perform;

(3) "general supervision" means the dentist has authorized the procedures and they are being carried out in accordance with the dentist's diagnosis and treatment plan;

(4) "direct supervision" means the dentist is in the dental office, personally diagnoses the condition to be treated, personally authorizes the procedure, and before dismissal of the patient evaluates the performance of the dental hygienist;

(5) "indirect supervision" means a licensed dentist is in the dental facility, authorizes the procedures, and remains in the dental facility while the procedures are being performed by the dental hygienist. (am § 13 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment rewrote this section.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) (§ 4, Chapter 58, SLA 1982).

Chapter 36. Dentistry.

Article
1. Board of Dental Examiners (§§ 08.36.010 — 08.36.091)
2. Examination and Licensing (§§ 08.36.100 — 08.36.300)
3. Unlawful Acts (§§ 08.36.310 — 08.36.340)
4. General Provisions (§§ 08.36.350 — 08.36.370)

Cited in Allison v. State, Sup. Ct. Op. No. 1763 (File No. 3716), 583 P.2d 813 (1978).

Article 1. Board of Dental Examiners.

Section
10. Creation and membership of board
20. Appointment and term of office
25. Removal of board members
30. Election of officers
40. Meetings
50. Quorum
60. [Repealed]
70. General powers
80. Applicability of Administrative Procedure Act
90. [Repealed]
91. Records and reports

Sec. 08.36.010. Creation and membership of board. There is created the Board of Dental Examiners consisting of seven members. Four members shall be qualified resident dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment, one member shall be a dental hygienist licensed under AS 08.32, and two members shall be public members. (§ 1 art II ch 186 SLA 1955; am § 2 ch 155 SLA 1968; am § 8 ch 102 SLA 1976; am § 12 ch 59 SLA 1980)

Cross references. — As to constitutionality of ch. 102, SLA 1976, see notes to AS 09.55.536 and Alas. Const., art. II, § 14.

Effect of amendments. — The 1980 amendment deleted "referred to in this chapter as the board" following "Board of Dental Examiners" in the first sentence, substituted "Four" for "Five" at the beginning of the second sentence, and substituted "two members shall be public members" for "one member with no direct

financial interest in the health care industry" at the end of the second sentence.

Editor's notes. — Section 1, ch. 155, SLA 1968, provides: "**Purposes.** The practice of dentistry in the state is hereby declared to affect the public health, safety and welfare and to be subject to regulation and control in the public interest. It is further declared to be a matter of public interest and concern that the dental profession merit and receive the confidence of the public and that only qualified dentists be permitted to practice dentistry in the state. All provisions of this chapter relating to the practice of dentistry and dental hygiene and to the registration of dental laboratories shall be liberally construed to carry out these objects and purposes."

Sec. 08.36.020. Appointment and term of office. Members of the board are appointed by the governor, subject to confirmation by the legislature in joint session. Each board member serves for a term of four years, and until that member's successor is appointed and qualified. The term begins on February 1. An appointment to a vacancy is for the unexpired term. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term. (§ 2 art II ch 186 SLA 1955; am § 1 ch 59 SLA 1964; am § 9 ch 102 SLA 1976; am § 13 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "four" for "five" in the second sentence, and added the present fifth sentence.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.025. Removal of board members. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal. (§ 14 ch 49 SLA 1980)

Sec. 08.36.030. Election of officers. The board shall elect a president and a secretary from among its members, each to serve for a term not to exceed two years. (§ 3 art II ch 186 SLA 1955; am § 1 ch 121 SLA 1972)

Sec. 08.36.040. Meetings. The board shall meet as often as, and at the times and places, necessary to conduct its business. (§ 3 art II ch 186 SLA 1955)

Sec. 08.36.050. Quorum. A majority of the board constitutes a quorum for the transaction of business. (§ 4 art II ch 186 SLA 1955)

Sec. 08.36.060. Expenses and salary.
Repealed by § 3 ch 69 SLA 1966.

Editor's notes. — The repealed section derived from § 4, art. II, ch. 186, SLA 1955.

Sec. 08.36.070. General powers. The board shall have, but not by way of limitation, the following powers and duties:

(1) to examine and issue licenses to applicants;

(2) to register licensed dentists and licensed dental hygienists who are in good standing;

(3) to submit an annual report of its proceedings to the governor and to members of the Alaska Dental Society, containing a statement of money received and disbursed;

(4) to affiliate with the American Association of Dental Examiners, and pay annual dues to the association;

(5) to hold hearings, and order the disciplinary sanction of a person who violates this chapter, AS 08.32, or the regulations of the board;

(6) to supply forms for applications, licenses, permits, certificates, and other papers and records;

(7) to enforce the provisions of this chapter and AS 08.32 and adopt or amend the regulations necessary to make the provisions of this chapter and AS 08.32 effective;

(8) to adopt regulations insuring that renewal of registration is contingent upon proof of continued competency by a licensed dentist or licensed dental hygienist;

(9) to provide the department with the requirements for proof of continued competency and to request the department to make these requirements available to each licensed dentist and licensed dental hygienist at least one year before the date on which the dentist or dental hygienist must renew registration;

(10) to order a licensed dentist or licensed dental hygienist to submit to a reasonable physical examination if the dentist's or the dental hygienist's physical capacity to practice safely is at issue. (§ 5 art II ch 186 SLA 1955; am § 6 ch 69 SLA 1970; am §§ 15 — 18 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment inserted "and licensed dental hygienists who are" in paragraph (2), substituted "and order the disciplinary sanction" for "revoke, annul, or suspend the license," inserted "AS 08.32" and deleted "rules and" preceding "regulations," all in paragraph (5), inserted "and AS 08.32," twice, substituted "adopt" for "make, alter," and deleted "rules and" preceding "regulations," and "or desirable" preceding "to make the provisions" all in paragraph (7), and added paragraphs (8)-(10).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

NOTES TO DECISIONS

The function of former AS 08.36.310 [see now AS 08.36.315], which specified the grounds for disciplinary action by the board, was to detail the scope of the power to revoke, annul, or suspend licenses given to the board by paragraph (5) of this section. State v. Smith, Inop. Ct. Op. No. 1606 (File Nos. 3707, 4001), 691 P.2d 676 (1979).

Practice of dentistry by persons committing acts listed in AS 08.36.310 not per se illegal. — Under former AS 08.36.310 [see now AS 08.36.315], the board could, after a hearing, revoke a dentist's license or take other disciplinary action in the event that he conducted himself in a manner described in one of the enumerated provisions. Since the power

was discretionary and since the board could impose penalties less drastic than license revocation, it was clear that the legislature did not intend that it be per se illegal for persons who have committed the listed transgressions to continue to practice dentistry. State v. Smith, Sup. Ct. Op. No. 1838 (File Nos. 3797, 3893), 593 P.2d 625 (1979).

Sec. 08.36.080. Applicability of Administrative Procedure Act. The board shall comply with the Administrative Procedure Act (AS 44.62).

Sec. 08.36.090. Records and reports.
Repealed by § 3 ch 59 SLA 1966.

Cross references. — For present provisions covering the subject matter of the repealed section, see AS 08.36.091.

Editor's notes. — This section derived from § 6, art. II, ch. 186, SLA 1955.

Sec. 08.36.091. Records and reports. The board shall maintain
(1) a record of its proceedings;
(2) a register containing the name, office and home addresses, and other information considered necessary by the board, of each person licensed as a dentist or dental hygienist, and a register of the licenses revoked by the board, and information on the status of each licensee. (§ 3 ch 155 SLA 1968)

Article 2. Examination and Licensing.

Section

Regulation of prosthetic dentistry. 46 A.L.R.3d 1213.

Constitutionality and construction of statutes or regulations prohibiting one who has no license to practice dentistry from owning, maintaining or operating an office therefor. 20 A.L.R.3d 808.

Sec. 08.36.100. License required. Except as provided in AS 08.36.238, a person may not practice, or attempt to practice, dentistry without a license or permit, and a current certificate of registration. (§ 1 art III ch 186 SLA 1955; am § 4 ch 155 SLA 1968; am § 19 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "Except as provided in AS 08.36.238, a person may not" for "No person, except those specifically exempted from the application of this chapter, may" at the beginning of the section.

Sec. 08.36.110. Qualifications of applicants. An applicant for a license to practice dentistry may apply to the board for an examination and license by submitting information that the applicant is a graduate of a dental college accredited by the Commission on Accreditation of the American Dental Association, or its successor agency, at the time of graduation, and holds a D.D.S. or D.M.D. degree or the equivalent. (§ 2 art III ch 186 SLA 1955; am § 1 ch 26 SLA 1965; am § 1 ch 36 SLA 1970; am § 7 ch 69 SLA 1970; am § 25 ch 245 SLA 1970; am § 10 ch 127 SLA 1974; am §§ 20, 32 ch 49 SLA 1980)

Revisor's notes. — The form of this section has been rearranged by the revisor of statutes under authority of AS 01.05.031 to conform to the style of the Alaska Statutes.

Effect of amendments. — The 1980 amendment repealed a former paragraph (2), which read: "of good moral character"; and substituted "accredited" for "approved" and "Commission on Accreditation" for "Council on Dental Education" and inserted "or its successor agency."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.115. Malpractice insurance.
Repealed by § 40 ch 177 SLA 1978.

Editor's notes. — The repealed section derived from § 10, ch. 102, SLA 1976.
For purpose of repealing act, see § 1, ch. 177, SLA 1978 as amended by § 7, ch. 46, SLA 1982, in the 1982 Temporary and Special Acts and Resolves.

Sec. 08.36.120. Photograph and filing date of application. Each applicant shall submit a recent unmounted, autographed photograph of the applicant. Applications shall be filed at least 30 days before the date scheduled for an examination. (§ 2 art III ch 186 SLA 1955)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.130. Examination. An examination shall be given at least once a year and at other times and at places determined by the board to be convenient and economical for the applicants and the state. At least once each year the board shall appoint an examination committee of at least three licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment to conduct the examination for applicants for licenses to practice dentistry. The board shall also appoint an examination committee of at least two licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment and one person licensed to practice dental hygiene in the state to conduct the examination for applicants for licenses to practice dental hygiene. The examination committees shall report the results to the board for official action. (§ 3 art III ch 186 SLA 1955; am § 5 ch 155 SLA 1968; am § 21 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

Sec. 08.36.140. Out-of-state examination. If an applicant requests the board to hold an examination outside the state, the board may require the applicant to pay the transportation costs to the members of the committee conducting the examination. (§ 3 art III ch 186 SLA 1955)

Sec. 08.36.150. Examination in out-of-state dental schools. The examination committee, with the approval of the board, may conduct an examination in the clinic of an approved dental school within the continental limits of the United States and admit to the examination a dental student in the student's last year of school who would otherwise be eligible for admission to examination and licensing in the state upon completion of the student's education. (§ 3 art III ch 186 SLA 1955)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.160. Contents of examination. The examination shall be clinical and written and of such a character as to test in a satisfactory manner the qualifications of the applicant to practice dentistry. The examination shall consist of the following:

(1) The subjects of the written examination shall be selected in accordance with the trend of dental education as determined by the Council of Dental Education of the American Dental Association.

(2) The applicant shall demonstrate skill in operative and prosthetic dentistry or any procedures as recommended by the American Association of Dental Examiners. (§ 4 art III ch 186 SLA 1955; am § 6 ch 155 SLA 1968)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.170. Partial examination. A student at least 19 years of age who has satisfactorily completed regular courses of instruction in dentistry in at least two different school years at an approved dental school, and who is certified by the dean of the college as having satisfactorily completed the subjects included in section I of the examination may take section I of the examination. If the student passes section I and subsequently takes the full examination, the requirements of section I are waived. (§ 5 art III ch 186 SLA 1955)

Sec. 08.36.180. Re-examination. An applicant shall pass each subject of each section of the examination with a score of at least 75 percent. If an applicant fails in one subject in each section, the applicant may be re-examined in that subject. If an applicant fails in more than one subject in any section, the applicant shall be re-examined in the whole section. If an applicant fails the examination or any section of it on two separate occasions, the board shall refuse to examine the applicant further until the applicant produces evidence satisfactory to the board that the applicant has pursued further study in preparation for the examination. (§ 6 art III ch 186 SLA 1955)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.190. Grading of examination. Upon the conclusion of the written examination and as soon as practicable, the papers shall be rated by an examiner. The examiner shall prepare a report in duplicate on each written examination and a report in duplicate on each practical examination. The examiner shall forward one copy of each report on each candidate to the secretary of the board and one copy to the division of occupational licensing. The secretary shall prepare a composite report on each applicant and file one copy of that report with the division of occupational licensing. As soon as practicable the division of occupational licensing shall notify each candidate of the results of the examination. (§ 7 art III ch 186 SLA 1955; am § 2 ch 121 SLA 1972)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.200. Waiver of written examination. The board may waive the requirement for written examination for an applicant who holds a certificate from the National Board of Dental Examiners that

the applicant has passed the theoretical or written examination given by the national board. (§ 8(a) art III ch 186 SLA 1955)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Secs. 08.36.210 — 08.36.220. Waiver of examination and issuance of license by reciprocity.

Repealed by § 32 ch 49 SLA 1980.

Cross references. — For present provisions, see AS 08.36.234.

Editor's notes. — The repealed sections derived from §§ 8(b), 9, art. III, ch. 186, SLA 1955; § 2, ch. 26, SLA 1965; § 7, ch. 155, SLA 1968; §§ 3, 4, ch. 121, SLA 1972.

Sec. 08.36.230. Practice outside the state. A dentist licensed to practice in this state and residing and practicing dentistry outside of this state, may maintain eligibility to practice in this state by registering the dentist's name and place of residence with the division of occupational licensing every four years and submitting proof of competency as required by the board. If the dentist fails to register, the board may reinstate the dentist's license without examination upon payment of a penalty of $25, payment of the delinquent registration fee under AS 08.36.290(10), presentation of proof of continued competency, and presentation of proof of active practice certified by the dental board having jurisdiction or, if there is no board with jurisdiction, by evidence satisfactory to the board. (§ 10 art III ch 186 SLA 1955; am § 5 ch 121 SLA 1972; am § 22 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment, in the first sentence, deleted "biennially" following "this state by" and added "every four years and submitting proof of competency as required by the board" at the end of the sentence, in the second sentence, substituted "the delinquent registration fee under AS 08.36.290(10), presentation of proof of continued competency" for "all delinquent registration fees," deleted "at his place of residence," following "active practice" and again following "having jurisdiction," and inserted "with jurisdiction."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.234. Licensure by credentials. The board may provide for the licensing without examination of a dentist who

(1) is a graduate of a dental college approved by the Commission on Accreditation of the American Dental Association, or its successor agency;

(2) has been licensed to practice dentistry in another state, territory, or region with licensing requirements similar to or higher than those of this state at the time of licensure;

(3) has been engaged in continuous active practice averaging at least 20 hours per week for the five years immediately preceding the application;

(4) is not the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental association;

(5) has not previously had a license to practice dentistry revoked;

(6) has not failed the clinical examination of this state;

(7) is personally interviewed by the board;

(8) pays all fees required under AS 08.36.290. (§ 23 ch 49 SLA 1980)

Sec. 08.36.238. Exemption from license requirement. (a) A person enrolled as a full-time student in an accredited school of dentistry may perform procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under this chapter, or under the direct supervision of a team of licensed faculty dentists, at least one of whom is licensed under this chapter; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dentistry under (a) of this section is subject to all other provisions of this chapter and to other laws and regulations which apply to the practice of dentistry. (§ 23 ch 49 SLA 1980)

Sec. 08.36.240. Issuance of license; recordation; display. The board shall issue a license to each successful applicant who has paid the required fees. The holder of a license shall register it in the office of the clerk of the superior court in the judicial district of the licensee's place of residence. The licensee shall display the license in a conspicuous place where the licensee practices. (§ 11 art III ch 186 SLA 1955; am § 6 ch. 121 SLA 1972)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.244. License to practice as specialist required. A licensed dentist may not hold out to the public as being especially qualified in a branch of dentistry by announcing through the press, sign, card, letterhead or printed matter, or any means of public advertising, using such terms as "specialist," or inserting the name of the specialty, or using other phrases customarily used by qualified specialists that would imply to the public that the dentist is so qualified, without first securing a specialist's license as provided in this chapter. (§ 8 ch 155 SLA 1968)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.246. Qualification for a specialist license. (a) An applicant for a specialty license must

(1) possess a license to practice dentistry in the state, and

(2) have completed two or more academic years of advanced education in the specialty.

(b) The provision of (a) (2) of this section does not apply to dentists who have limited their practice exclusively and who ethically announced limitation of practice in accordance with American Dental Association policy before July 23, 1968. (§ 8 ch 155 SLA 1968)

Sec. 08.36.247. Limitation of special practice. (a) A specialty license may not be issued unless the applicant presents proof satisfactory to the board that the applicant is qualified to practice that specialty.

(b) This section may not be construed as limiting or preventing a licensed and qualified dentist from performing, without a specialty license, dental acts or services to the public in any of the branches of dentistry, except that no dentist may administer a general anesthetic to a patient without a valid permit as required by regulations of the dental examiners board. (§ 8 ch 155 SLA 1968)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.248. Suspension or revocation of specialty licenses. The board may suspend or revoke a specialty license upon any grounds set out in AS 08.36.315, and the procedure shall be the same as for the revocation or suspension of a license to practice dentistry. (§ 8 ch 155 SLA 1968; am § 24 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "AS 08.36.315" for "AS 08.36.310," and deleted "for suspensions and revocations" preceding "shall be the same," and "regular" preceding "license."

Sec. 08.36.250. Renewal of registration. At least 60 days before January 1 of every fourth year, the division of occupational licensing shall mail a form for renewal of registration to each licensed dentist and licensed dental hygienist. Each licensee shall complete the form and return it together with the registration fee and offer proof of continued competency as required by the board. The division of occupational licensing shall, as soon as practicable, issue a registration certificate valid for the years for which it is issued. Each licensee shall keep the registration certificate beside or attached to the licensee's

license. Failure to receive the registration form does not exempt a licensee from renewing registration. (§ 12 art III ch 186 SLA 1955; am § 9 ch 155 SLA 1968; am § 7 ch 121 SLA 1972; am § 25 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "fourth" for "other," and "renewal of" for "biennial," in the first sentence, and "licensee" for "dentist," and "renewing" for "biennial," in the last sentence, and inserted "and licensed dental hygienist," at the end of the first sentence, "and offer proof of continued competency as required by the board" at the end of the second sentence, and "it is" near the end of the third sentence.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

NOTES TO DECISIONS

Cited in State v. Smith, Sup. Ct. Op. No. 1838 (File Nos. 3797, 3893), 593 P.2d 625 (1979).

Sec. 08.36.260. Branch office registration. A licensee who practices in an established office with an address other than that address for which the licensee's registration certificate is issued shall obtain a branch office registration certificate for each office. (§ 13 art III ch 186 SLA 1955; am § 10 ch 155 SLA 1968; am § 26 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment deleted "biennial" preceding "registration certificate."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.36.270. Permits for isolated areas.
Repealed by § 3 ch 26 SLA 1965; § 5 ch 93 SLA 1965.

Cross references. — For present provisions covering the subject matter of the repealed section, see AS 08.36.271.

Editor's notes. — The repealed section derived from § 14, art. III, ch. 186, SLA 1955.

Sec. 08.36.271. Permits for isolated areas. (a) The Department of Health and Social Services shall designate as isolated areas those specific places and regions remote from major population centers which are not served by dentists licensed under this chapter and which have a geographical location which works financial hardship, extended loss of time, or arduous and costly travel upon residents needing dental care.

(b) The board shall, upon recommendation of the Department of Health and Social Services, issue an annual permit authorizing the treatment of residents in an area designated under (a) of this section, who are not entitled to dental care by the state or federal government,

by a dentist employed by the United States Public Health Service or qualified member of the armed services who serves in that area. (§ 1 ch 93 SLA 1965; am § 11 ch 155 SLA 1968; am § 6 ch 104 SLA 1971)

Sec. 08.36.280. Temporary permit. (a) The board may issue a one year temporary permit without examination to an applicant to practice dentistry in a locality requested by the applicant if the locality is of the type specified in (2) of this subsection and the applicant

(1) meets the requirements of AS 08.36.110;

(2) desires to practice dentistry in a city or rural village which does not have a resident licensed dentist in active general practice;

(3) has a license in good standing to practice dentistry in a state, territory, district or possession of the United States;

(4) tenders and pays the fee prescribed in AS 08.36.290(9).

(b) The board may authorize a temporary permittee to practice dentistry in more than one city or rural village of the type specified in (a) (2) of this section.

(c) The board may annually renew a temporary permit upon written application of an applicant and upon payment of the prescribed fee if the applicant has not committed an act which is a ground for revocation in AS 08.36.310, but in any case, within two years from issuance of the applicant's first temporary permit, the applicant must pass a board exam.

(d) A temporary permit may be revoked, suspended or annulled, or the permittee may be reprimanded, censured or disciplined by the board in the same manner and for the same cause as a licensed dentist under AS 08.36.310.

(e) The board shall grant or deny an application for a temporary permit within 60 days after it is received. (§ 15 art III ch 186 SLA 1955; am § 4 ch 26 SLA 1965; am §§ 8, 9 ch 121 SLA 1972; am § 6 ch 59 SLA 1982)

Effect of amendments. — The 1982 amendment, effective May 28, 1982, substituted "AS 08.36.290(9)" for "AS 08.36.290(6)" in subsection (a)(4).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

AS 08.36.310, referred to in subsections (c) and (d), was repealed by § 32, ch. 49, SLA 1980. For present provisions, see AS 08.36.315.

Sec. 08.36.285. Licensing a permittee.
Repealed by § 10 ch 121 SLA 1972.

Editor's notes. — The repealed section derived from § 5, ch. 26, SLA 1965.

Sec. 08.36.290. Fees and penalties. The following fees and penalties shall be imposed by the board as applicable

(1) filing fee for examination and licensing application	$ 25
(2) examination fee:	
dentist	$200
dental hygienist	75
(3) credential review fee:	
dentist	$200
dental hygienist	75
(4) initial license fee:	
dentist	$ 30
dental hygienist	20
(5) registration fee (due every four years):	
dentist	$200
dental hygienist	100
(6) filing fee for reexamination application	$ 25
(7) specialty license fee	$ 30
(8) branch office registration fee	$100
(9) temporary permit to practice dentistry	$ 50
(10) delinquent registration fee	$ 10
(11) duplicate license fee	$ 10.

(§ 16 art III ch 186 SLA 1955; am § 7 ch 94 SLA 1968; am § 12 ch 155 SLA 1968; am § 27 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

NOTES TO DECISIONS

For history of taxation of profession of dentistry, see United States v. Dasher, 9 Alaska 719 (1940).

Sec. 08.36.300. Deposit of fees and payment of expenses.
Repealed by § 3 ch 59 SLA 1966.

Editor's notes. — The repealed section derived from § 17, art. III, ch. 186 SLA 1955.

Article 3. Unlawful Acts.

Section	Section
310 [Repealed]	320 Disciplinary sanctions
315 Grounds for discipline, suspension or revocation of license	325 — 330 [Repealed]
	340 Penalties

Sec. 08.36.310. Grounds for revocation of license.
Repealed by § 32 ch 49 SLA 1980.

Cross references. — For present provisions concerning grounds for discipline, suspension or revocation of license of a dentist, see AS 08.36.315.

Editor's notes. — The repealed section derived from § 1, art. IV, ch. 186, SLA 1955, §§ 13 — 15, ch. 155, SLA 1968; § 26, ch. 177, SLA 1978.

Sec. 08.36.315. Grounds for discipline, suspension or revocation of license. The board may revoke or suspend the license of a dentist, and the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that the dentist

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional dental services or engaging in professional activities;

(3) advertised professional dental services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects the dentist's ability to continue to practice dentistry competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under the dentist's supervision which does not conform to minimum professional standards of dentistry regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs the dentist's ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) permitted a dental hygienist who is employed by the dentist or working under the dentist's supervision to perform a dental procedure other than those permitted under AS 08.32.110. (§ 28 ch 49 SLA 1980)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.06.03(c) and § 4, Chapter 68, SLA 1982.

Professional incompetency as ground for disciplinary measure against physician or dentist, 28 ALR3d 487.

Sec. 08.36.320. Disciplinary sanctions. (a) When it finds that a dentist or dental hygienist is guilty of an offense under AS 08.32.160 or AS 08.36.315, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if the licensee continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The licensee may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds, after a hearing, that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders. (§ 5 art. IV ch. 186 SLA 1955; am § 29 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Collateral references. — Bias of members of license revocation board. 97 ALR2d 1210.

Secs. 08.36.325 — 08.36.330. Repealed by § 32 ch 49 SLA 1980.

Cross references. — For provisions concerning grounds for discipline, suspension or revocation of license of a dentist, see AS 08.36.315. For provisions concerning disciplinary sanctions which may be imposed by the board, see AS 08.36.320.

Editor's notes. — The repealed sections derived from § 7, art. IV, ch. 186, SLA 1955; § 10, ch. 102, SLA 1976.

Sec. 08.36.340. Penalties. A person who violates any provision of AS 08.32 or this chapter for which no specific penalty is provided is guilty of a class B misdemeanor. (§ 8 art IV ch 186 SLA 1955; am § 30 ch 49 SLA 1980)

Cross references. — As to punishment for misdemeanors, see AS 12.55.135.

Effect of amendments. — The 1980 amendment inserted "AS 08.32 or," deleted a comma following "is provided," and deleted "and is punishable by a fine of not more than $500, or by imprisonment for not more than six months, or by both," following "misdemeanor" at the end of the section, and inserted "class B."

Article 4. General Provisions.

Section
350. Application of chapter
360. Practice of dentistry defined
370. Definitions

Sec. 08.36.350. Application of chapter. This chapter applies to a person who practices, offers or attempts to practice dentistry in the state except

(1) dental surgeons or dentists in the military service in the discharge of official duties;

(2) Repealed by § 32 ch 49 SLA 1980.

(3) dentists in the employ of the United States Public Health Service, United States Veterans' Administration, Alaska Native Service, or Department of Health and Social Services, in the discharge of official duties;

(4) clinicians demonstrating at meetings of dentists approved by the board;

(5) physicians and surgeons;

(6) dentists in the employ of the United States Public Health Service providing care by authority of a permit issued under AS 08.36.271. (§ 2 art I ch 186 SLA 1955; am § 2 ch 93 SLA 1965; am § 6 ch 104 SLA 1971; am § 32 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment repealed paragraph (2), which read: "licensed dental hygienists in the performance of duties authorized by law."

Sec. 08.36.360. Practice of dentistry defined. A person engages in the practice of dentistry who

(1) performs or holds out to the public as being able to perform dental operations;

(2) diagnoses, treats, operates on, corrects or attempts to correct, or prescribes for, a disease, lesion, pain, injury, deficiency, deformity, or physical condition, malocclusion or malposition of the human teeth, alveolar process, gums or jaws and adjacent tissues;

(3) performs or attempts to perform an operation incident to the replacement of teeth;

(4) furnishes, supplies, constructs, reproduces, or repairs prosthetic dentures, bridges, appliances or other structures to be used and worn as substitutes for natural teeth, except on prescription of a duly licensed and registered dentist and by the use of impressions or casts made by a duly licensed and registered dentist;

(5) uses the word "dentist" or "dental surgeon" or the letters D.D.S. or D.M.D. or other letter or title which represents the dentist as engaging in the practice of dentistry;

(6) extracts or attempts to extract human teeth;

(7) owns, manages or operates a place where the acts and things described in this section are performed or done. (§ 1 art I ch 186 SLA 1955)

Cross references. — For professional designation requirements for dentists, see AS 08.02.010.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Collateral references. — Dentist as within statutes pertaining to physician or surgeon. 115 ALR 261.

Sec. 08.36.370. Definitions. In this chapter, unless the context requires otherwise,

(1) "board" means the Board of Dental Examiners;

(2) "department" means the Department of Commerce and Economic Development. (§ 31 ch 49 SLA 1980)

Chapter 40. Electrical Administrators.

Article
1. Board of Electrical Examiners (§§ 08.40.005 — 08.40.080)
2. Licensing (§§ 08.40.090 — 08.40.180)
3. General Provisions (§§ 08.40.190 — 08.40.200)

Sec. 08.24.340. Statement of persons employed by agency. (a) Within 15 days after licensure under this chapter, a collection agency shall submit to the department a list of all persons employed by the agency. Thereafter, upon hiring a new employee, the collection agency shall, within 15 days after the hiring, submit to the department the name of the newly hired employee and the further information required by (b) of this section.

(b) There shall be submitted with the name of the employee employed by the collection agency the following information:

(1) the employee's residence address;

(2) the employee's length of residence in the state;

(3) a statement of the new employee's previous employment in the last year;

(4) further information which the board or department may require.

(c) The statement shall be verified by the employee before a notary public or other person authorized to administer oaths.

(d) The owner or licensed operator of the collection agency shall also state upon the form submitted the date upon which the new employee was hired and that the new employee is an employee of the collection agency at the time the form is executed. (§ 1 ch 101 SLA 1968)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.24.350. Notice of withdrawal of employees. When an employee withdraws from employment or the employee's employment with a collection agency is terminated for any reason, the agency shall, within 15 days of withdrawal or termination of employment, notify the department in writing of the employee's withdrawal from employment. (§ 1 ch 101 SLA 1968)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.24.360. Fines and penalties. A collection agency or an operator who fails on written demand to render a true and complete account to the person from whom an indebtedness was taken for collection or who fails to turn over to that person the proceeds of the collection within 30 days after written demand, or who fails to comply with any of the provisions of this chapter is punishable by a fine of not more than $500, or by imprisonment for not more than three months, or by both. (§ 1 ch 101 SLA 1968)

Sec. 08.24.370. Nonresidents. A nonresident may apply for and receive a collection agency license or an operator license or both on the same basis as a resident. The application fee for a nonresident operator

license is $100, and the biennial license fee is $200. The application fee for a nonresident agency license is $200, and the biennial license fee is $400 for the principal place of business and $400 for each branch office. (§ 1 ch 101 SLA 1968)

Sec. 08.24.380. Definitions. In this chapter

(1) "board" means the Collection Agency Board;

(2) "department" means the Department of Commerce and Economic Development;

(3) "collection agency business" means the business of engaging directly or indirectly and having as a primary or secondary object, business or pursuit the solicitation of claims for collection or repossession of collateral security or the collection of claims owed or due or asserted to be owed or due to another or the repossession of collateral security;

(A) a house, agency, firm, person, corporation or voluntary association using a name other than its own in collecting its own claims with the intention of conveying, or which tends to convey, the impression that a third party has been employed, is conducting a collection agency business within the meaning of this chapter;

(B) a person who sells, attempts to sell, gives away or attempts to give away to another person, other than a licensee under this chapter a system of collection letters, demand forms or other printed matter where the name of a person other than a creditor appears in a manner to indicate that a request or demand is being made by another person, other than the creditor, for the payment of a sum due, or asserted to be due, or who solicits or accepts accounts for collection on a contingent or percentage basis or by a fee or outright purchase for collection purposes, is considered to be in the collection agency business within the meaning of this chapter;

(4) "collection agency" means a person licensed and authorized to engage in the collection agency business;

(5) "operator" means a person having managerial control of a collection agency. (§ 1 ch 101 SLA 1968; am § 45 ch 218 SLA 1976)

Chapter 32. Dental Hygienists.

Article

1. Examination and Licensing (§§ 08.32.010 — 08.32.095)
2. Regulation of Dental Hygienists (§§ 08.32.100 — 08.32.180)
3. General Provisions (§§ 08.32.185 — 08.32.190)

Collateral references. — 61 Am Jur 2d, Physicians, Surgeons and Other Healers, §§ 4, 19, 20, 44-45.

70 C.J.S., Physicians and Surgeons, §§ 1, 6-8, 11, 16, 24.

Constitutionality, construction and application of statutes relating to dental hygienists. 11 A.L.R.4th 724.

Article 1. Examination and Licensing.

Section
10 License required
15 [Repealed]
20 Examination required
30 Licensure by credentials
40 Application and fee
50 Disposition of fees
60 Frequency and content of examination
70 Registration and licensing of dental hygienists
80 [Repealed]
81 Lapse and reinstatement of license
90 [Repealed]
95 Exemption from license requirement

Sec. 08.32.010. License required. Except as provided in AS 08.32.095, a person may not practice, offer or attempt to practice, or advertise or announce as being prepared or qualified to practice dental hygiene without a license. (§ 1 ch 78 SLA 1953; am § 1 ch 59 SLA 1978; am § 4 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment substituted "oneself" for "himself."

The 1980 amendment substituted "Except as provided in AS 08.32.095, a person may not" for "No person may" at the beginning of the section.

Editor's notes. — The words "as being" were substituted for "oneself as" by the revisor of statutes pursuant to AS 01.05.031(b).

Sec. 08.32.015. Malpractice insurance. Repealed by § 40 ch 177 SLA 1978.

Editor's notes. — The repealed section derived from § 7, ch. 102, SLA 1976, § 2, ch. 59, SLA 1978.

For purpose of repealing act, see § 1, ch 177, SLA 1978, as amended by § 7, ch. 46, SLA 1982, in the 1982 Temporary and Special Acts and Resolves.

Sec. 08.32.020. Examination required. (a) An applicant for examination shall be

(1) Repealed by § 32 ch 49 SLA 1980.

(2) at least 18 years of age;

(3) a graduate of an accredited high school;

(4) a graduate of a dental hygiene school which requires at least a two-year course and is accredited by the Commission on Accreditation of Dental and Dental Auxiliary Education Programs of the American Dental Association; and

(5) an examinee who has successfully completed the National Board of Dental Examiners' written theory examination or an equivalent written examination given by the board, thereby demonstrating satisfactory theoretical knowledge of dental and basic biomedical sciences.

(b) An applicant for examination shall apply in writing to the secretary of the board at least 30 days before the date selected by the board for the examination. (§ 1 ch 78 SLA 1953; am § 1 ch 36 SLA 1969; am § 1 ch 99 SLA 1970; am § 3 ch 59 SLA 1978; am § 32 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment, in subsection (a), substituted "a dental hygiene school" for "an American training school for dental hygienists" and "by the Commission on Accreditation of Dental and Dental Auxiliary Education Programs of the American Dental Association" for "and recognized by the board" in paragraph (4), and in paragraph (5), substituted "of Dental Examiners' written theory examination or an equivalent" for "examination or the" and added the language beginning "thereby demonstrating" to the end.

The 1980 amendment repealed paragraph (1) of subsection (a), which read: "of good moral character."

Sec. 08.32.030. Licensure by credentials. The board may provide for the licensing without examination of a dental hygienist who

(1) meets the criteria of AS 08.32.020(a);

(2) has successfully passed a state or regional dental hygiene clinical examination which the board has determined is at least equivalent in scope, quality, and difficulty to the Alaska clinical examination;

(3) has been in active clinical dental hygiene practice averaging no less than 14 hours per week for the two years immediately preceding application for state licensure;

(4) has not failed the clinical dental hygiene examination of this state;

(5) has not previously had a license to practice dental hygiene issued by any state or region revoked;

(6) is personally interviewed by a board member;

(7) pays all fees required under AS 08.36.290;

(8) is not the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental or dental hygienics association. (§ 1 ch 78 SLA 1953; am § 4 ch 59 SLA 1978; am § 5 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment rewrote this section.

The 1980 amendment rewrote the section.

Sec. 08.32.040. Application and fee. An application for examination or determination of qualification for licensing by credentials shall be accompanied by the applicant's certificate of graduation from an accredited dental hygiene school and the fee provided under AS 08.36.290(1). (§ 1 ch 78 SLA 1953; am § 2 ch 36 SLA 1969; am § 5 ch 59 SLA 1978; am § 6 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment substituted "examination or ensing by credentials" for "qualifi- tion" and inserted "from an accredited dental hygiene school."

The 1980 amendment inserted "determination of qualification for" and substituted "the fee provided under AS 08.36.290(1)" for "a fee of $25" at the end of the section.

Sec. 08.32.050. Disposition of fees. All fees and charges shall be deposited in the general fund of the state. (§ 1 ch 78 SLA 1953)

Sec. 08.32.060. Frequency and content of examination. The examination shall be held at the same times and places as the examination of dentists under AS 08.36.130. The examination shall cover subjects considered essential by the board for the practice of dental hygiene including a clinical examination on the removal of calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques. (§ 1 ch 78 SLA 1953; am § 6 ch 59 SLA 1978; am § 7 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment, in the second sentence, substituted "the practice of dental hygiene including a clinical" for "a dental hygienist including a practical" and "calcareous deposits, accretions, and stains" for "deposits or stains" and added "beginning at the epithelial attachment by scaling and polishing techniques" at the end of the sentence.

The 1980 amendment deleted "once each year" following "shall be held," substituted "times and places" for "time" and added "under AS 08.36.130" all in the first sentence.

Sec. 08.32.070. Registration and licensing of dental hygienists. If the applicant passes the examination, the board shall register the applicant and issue a license upon payment of all fees required under AS 08.36.290. A licensed dental hygienist shall renew registration and offer proof of continued competency as required by regulation of the board every four years. (§ 1 ch 78 SLA 1953; am § 3 ch 36 SLA 1969; am § 7 ch 59 SLA 1978; am § 8 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment substituted "the applicant" for "him."

The 1980 amendment rewrote the section.

Sec. 08.32.080. Lapse and reinstatement of license.
Repealed by § 7 ch 94 SLA 1968.

Editor's notes. — The repealed section derived from § 4, ch. 78, SLA 1953.

Sec. 08.32.081. Lapse and reinstatement of license. The failure, neglect, or refusal of a licensed dental hygienist to pay the renewal registration fee constitutes a forfeiture of the license. The board may reinstate the license without examination within two years of the date on which payment was due upon written application, proof of continued competency, and payment of all fees required under AS 08.36.290. (§ 4 ch 36 SLA 1969, am § 8 ch 59 SLA 1978; am § 9 ch 49 SLA 1980)

Effect of amendments. — The 1978 amendment substituted "without examination within two years of the date on which payment was due" for "within three years" in the second sentence.

The 1980 amendment substituted "renewal" for "biennial" in the first sentence, inserted "proof of continued competency," and substituted "all fees required under AS 08.36.290" for "$25" in the second sentence.

Sec. 08.32.090. Temporary license.
Repealed by § 15 ch 59 SLA 1978.

Editor's notes. — The repealed section derived from § 2, ch. 78, SLA 1953; am. § 5, ch. 36, SLA 1969.

Sec. 08.32.095. Exemption from license requirement. (a) A person enrolled as a full-time student in an accredited school of dental hygiene may perform dental hygiene procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under AS 08.36, or under the direct supervision of a team of licensed faculty dentists, at least one of whom is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dental hygiene under (a) of this section is subject to all other provisions of this chapter and laws and regulations which apply to the practice of dental hygiene by a licensed dental hygienist. (§ 10 ch 49 SLA 1980)

Article 2. Regulation of Dental Hygienists.

Section	
100	Employment of dental hygienists
110	Scope of work of dental hygienists
120	Place of employment
130	Information required
140	Supervision required
150	[Repealed]
160	Grounds for discipline, suspension or revocation of license
165	Limits or conditions on license; discipline
170	[Repealed]
180	Violation

Sec. 08.32.100. Employment of dental hygienists. A licensed dentist, incorporated eleemosynary dental dispensary or infirmary, private school or welfare center, the United States of America or the state may employ a licensed dental hygienist. (§ 3 ch 78 SLA 1953)

Sec. 08.32.110. Scope of work of dental hygienists. (a) The role of the dental hygienist is to assist members of the dental profession in providing oral health care to the public. A person licensed to practice the profession of dental hygiene in the state may

(1) remove calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques;

(2) apply topical preventive or prophylactic agents;

(3) apply pit and fissure sealants;

(4) perform root planing and periodontal soft tissue curettage; and

(5) perform other dental operations and services delegated by a licensed dentist if the dental operations and services are not prohibited by (c) of this section.

(b) The board shall specify by regulation those additional intra-oral functions which may be performed by a licensed dental hygienist only upon successful completion of a formal course of instruction approved by the board. The board shall promulgate regulations specifying the education requirements, evaluation procedures, and degree of supervision required for each function.

(c) This section does not authorize delegation of

(1) diagnosing, treatment planning, and writing prescriptions for drugs; writing authorizations for restorative, prosthetic, or orthodontic appliances;

(2) operative or surgical procedures on hard or soft tissues except as allowed in (a)(4) of this section; or

(3) other procedures which require the professional competence and skill of a dentist. (§ 3 ch 78 SLA 1953; am § 6 ch 36 SLA 1969; am § 9 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment rewrote this section.

Sec. 08.32.120. Place of employment. A dental hygienist may practice in the office of a licensed dentist, or legally incorporated eleemosynary dental dispensary or infirmary, private school, welfare center, state or federal institution, village health facility, or in another place designated by the board. (§ 3 ch 78 SLA 1953; am § 10 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment substituted "may practice" for "may operate" near the beginning of this section and the language beginning "welfare center, state or federal institution" for "or welfare center, or in a building owned or occupied by the state and under the direct or general supervision of a licensed dentist" at the end of the section.

Sec. 08.32.130. Information required. Every dental hygienist practicing dental hygiene in the state shall furnish the board with the name and address of the dentist under whose supervision the dental hygienist is practicing. (§ 4 ch 78 SLA 1953; am § 11 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment inserted "practicing dental hygiene in the state" and substituted "The dentist under whose supervision the dental hygienist is practicing" for "his employer."

Sec. 08.32.140. Supervision required. A dental hygienist may not practice except under the general supervision of a licensed dentist or, if required by regulations issued under AS 08.32.110(b), the direct or indirect supervision of a licensed dentist. (§ 1 ch 78 SLA 1953; am § 12 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment inserted "general" and added the language beginning "or, if required by regulations" to the end of the section.

Sec. 08.32.150. Revocation of dentist's license. Repealed by § 32 ch 49 SLA 1980.

Cross references. — For provisions concerning grounds for discipline, suspension or revocation of license of a dentist, see AS 08.36.315.

Editor's notes. — The repealed section derived from § 4, ch. 78, SLA 1953.

Sec. 08.32.160. Grounds for discipline, suspension or revocation of license. The board may revoke or suspend the license of a dental hygienist, or the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that the licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects the licensee's ability to continue to practice competently and safely;

(5) failed to comply with this chapter, with a regulation adopted under this chapter or under AS 08.36, or with an order of the board;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) addiction or severe dependency on alcohol or other drugs which impairs the licensee's ability to practice safely;

(C) physical or mental disability;

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(8) performed clinical procedures for compensation without being under the supervision of a licensed dentist. (§ 6 ch 78 SLA 1953; am § 11 ch 49 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

Editor's notes. — This section was recodified by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.32.165. Limits or conditions on license; discipline. (a) In addition to action under AS 08.32.160, upon a finding that by reason of demonstrated problems of competence, experience, education or health the authority to practice dental hygiene should be limited or conditioned or the practitioner disciplined, the board may reprimand, censure, place on probation, restrict practice by specialty, procedure or facility, require additional education or training, or revoke or suspend a license.

(b) Repealed by § 15 ch 59 SLA 1978. (§ 7 ch 102 SLA 1976; am § 15 ch 59 SLA 1978)

Cross references. — For present provisions covering the subject matter of repealed subsection (b), see AS 08.32.185.

Effect of amendments. — The 1978 amendment repealed subsection (b), which read "The Administrative Procedure Act (AS 44.62) applies to any action taken by the board under this section."

Sec. 08.32.170. Procedure followed.
Repealed by § 15 ch 59 SLA 1978.

Cross references. — For present provisions covering the subject matter of the repealed section, see AS 08.32.185.

Editor's notes. — The repealed section derived from § 4, ch. 78, SLA 1953.

Sec. 08.32.180. Violation. A person who violates this chapter or who fails to comply with the requirements of this chapter, a penalty for which is not otherwise provided, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $100. (§ 5 ch 78 SLA 1953)

Article 3. General Provisions.

Section
185. Application of Administrative Procedure Act
190. Definitions

Sec. 08.32.185. Application of Administrative Procedure Act. The Administrative Procedure Act (AS 44.62) applies to any action taken by the board under this chapter. (§ 14 ch 59 SLA 1978)

Sec. 08.32.190. Definitions. In this chapter

(1) "board" means the Board of Dental Examiners;

(2) "dental hygienist" means a person who is licensed by the board to perform those educational, preventive, and therapeutic services and procedures that licensed dental hygienists are educated to perform;

(3) "general supervision" means the dentist has authorized the procedures and they are being carried out in accordance with the dentist's diagnosis and treatment plan;

(4) "direct supervision" means the dentist is in the dental office, personally diagnoses the condition to be treated, personally authorizes the procedure, and before dismissal of the patient evaluates the performance of the dental hygienist;

(5) "indirect supervision" means a licensed dentist is in the dental facility, authorizes the procedures, and remains in the dental facility while the procedures are being performed by the dental hygienist. (am § 13 ch 59 SLA 1978)

Effect of amendments. — The 1978 amendment rewrote this section.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) § 4, Chapter 58, SLA 1982.

Chapter 36. Dentistry.

Article
1. Board of Dental Examiners (§§ 08.36.010 — 08.36.091)
2. Examination and Licensing (§§ 08.36.100 — 08.36.300)
3. Unlawful Acts (§§ 08.36.310 — 08.36.340)
4. General Provisions (§§ 08.36.350 — 08.36.370)

Cited in Allison v. State, Sup. Ct. Op. No. 1703 (File No. 3716), 582 P.2d 813 (1978).

Article 1. Board of Dental Examiners.

MESSAGE:

I DISAGREE WITH THE PART OF HB 511 THAT PROPOSES TO REQUIRE "DIRECT" SUPERVISION OF THE DENTAL HYGIENIST BY THE DENTIST. AS THE RULES STAND NOW ONLY INDIRECT SUPERVISION IS REQUIRED. I PREFER THAT THE SUPERVISION REQUIRED REMAIN "INDIRECT." PLEASE DROP THAT ONE SECTION OF THE PROPOSAL REQUIRING "DIRECT" SUPERVISION OF DENTAL HYGIENISTS.
ALTHOUGH I AGREE WITH THE OTHER PROPOSED CHANGES IN HB 511, I'D PREFER THAT ONE PORTION OF THE BILL BE DROPPED AND THE OLD RULES OF INDIRECT SUPERVISION RETAINED.

RE: CS HB 611, CL & COREFERENCE: PAGE 6 LINE 10 & 11

MSG: THE ABILITY OF THE HYGIENISTS TO ADMINISTER LOCAL ANESTHETIC IS PRIMARILY FOR THE PATIENTS WELLBEING IE. LEVEL OF COMFORT AND THOROUGHNESS OF THE HYGIENE SERVICE. THE ABSENCE OF INDIRECT SUPERVISION DURING ADMINISTRATION GREATLY REDUCES THE LIKELIHOOD THAT ANESTHETIC WOULD BE USED. THE FEASABILITY OF A DENTIST STANDING OVER EVERYTIME THE HYGIENIST ADMINISTERED WOULD NEGATE THE HYGIENIST HAVING THE ABILITY TO ADMINISTER THE ANESTHETIC. HYGIENISTS ARE WELL QUALIFIED TO ADMINISTER WITHOUT DIRECT SUPERVISION.

POSTER

"FINE ARTS CAMP 84"

Dan L. Monroe
Box 2618
Juneau, AK 99813

March 6, 1984

Mae Tischer
Alaska State Legislature
Pouch V
Juneau, Ak
99811

Dear Representative Tischer,

I am writing to request your support of HB 617.

This bill would provide a <u>one-time</u> $180,000 appropriation to the Alaska State Council on the Arts for summer Fine Arts Camps in Sitka, Palmer, and Fairbanks.

These programs provide intensive training in visual, performing, and literary arts for more than 730 junior and senior high students from sixty-seven communities throughout the state.

<u>Problem Addressed by HB 617</u>

Fine Arts Camps are not new programs. They have been in existence for years. HB 617 is a one-time appropriation which addresses a very specific problem that cannot otherwise be easily resolved- Fine Arts Camps of necessity must take place in late June and July.

This fact creates a serious financial problem- the camps must be conducted prior to determination of State Arts Council funding due to the timing of the state's fiscal year and the Arts Council's funding cycle. While Arts Council funding ($162,032 in 1983) comprises only 38% of the total costs of the camps with the remainder coming from private-sector and program revenues, the camps cannot be operated without this support.

At present, the camps must sign contracts to provide services before they know what level of funding they will receive from ASCA. This is fiscally unteneable for both the Fine Arts Camps and ASCA.

HB 617 will provide the camps with a special forward-fund to cover start-up costs. This will avoid the necessity for camps to contract for services supported by State Arts Council before they know whether or not ASCA grants can or will cover such costs.

Why Support HB 617?

Why support HB 617 during a time when the state is experiencing decreasing revenues and is confronted with so many basic human and physical problems?

Until I had the opportunity to visit the S tka Fine Arts Camp, I had an inadequate appreciation of the exceptional value of these programs to young Alaskans. Having seen students involved in learning music, visual art, theatre, dancing, and writing with an excitement and intensity which cannot be found in schools, my estimation of

the value of these programs changed radically.

Self-expression, self-confidence, and self-esteem are irreplaceable qualities to give young Alaskans. These qualities carry over into all aspects of a students future life and career. Fine Arts Camps provide these qualities to thousands of young people over the years. They therefore deserve your full support.

I appreciate your consideration and support of HB 617. Best wishes.

Sincerely,

Dan L. Monroe

March 1, 1984

Representative Mae Tischer
Alaska State Legislature
Pouch V (MS 3100)
Juneau, AK 99811

Dear Representative Tischer:

Enclosed is a fact sheet on the three Fine Arts Camps in Alaska and their need for passage of HB617. The measure, if successful, will allow the Alaska State Council on the Arts to overcome an awkward and inappropriate cycle of funding for the Camps.

Your support is important to the passage of HB617 and will be greatly appreciated by students, parents, and the Fine Arts Camps. If I can provide you with further information, please let me know.

Thank you.

Clyde L. Carraway
Executive Director

Enclosure

FINE ARTS CAMPS -- FACT SHEET

The three Fine Arts Camps in Palmer, Sitka, and Fairbanks encourage your support and passage of HB617 on the basis of the following facts:

THE PROBLEM:

To do adequate planning, the camps must enter into contracts with faculty and staff, for facilities, food services, and materials before operating funds have been awarded. This awkward situation was created several years ago when the camps were transferred from the Department of Education's budget to the State Arts Council's budget. The timing of the transfer, the state's fiscal year, and the Council's funding cycle immediately combined to cause the problem of ASCA's reviewing camp funding requests after the camps had begun to operate.

THE SOLUTION:

HB617 provides for a <u>one time appropriation</u> that would enable the camps and the State Arts Council to establish a forward funding cycle. It would work this way: the supplemental appropriation provided by HB617 will fund this spring's start-up costs as well as the remaining costs of the 1984 camps. Both start-up and continuing costs for the 1985 camps would then be included in the State Arts Council's FY85 funding request to the legislature.

FINE ARTS CAMPS MEET A CRITICAL NEED:

These camps provide intensive arts experiences in music, theatre, dance, visual arts, and creative writing for Alaskan students who would otherwise not have them. Although some students have arts activites available in their communities, most students have their first and only opportunity to explore their talents and interests at camp. The camps also provide a valuable alternative for students who do not excel at sports or academics but who nonetheless have talents that must be developed--for their benefit and the state's.

In 1983, the three camps served a total of 731 students from 67 Alaskan communities, villages, and logging camps.

TOTAL BUDGETS AND ASCA GRANTS OF THE FINE ARTS CAMPS:

All Three Camps	1982	1983
ASCA Funds	$138,732	$162,032
Total Budget	252,198	409,408

The funds to cover the remainder of the total budget are raised from businesses, organizations, corporations, schools, individuals, and students' camp tuition.

Deducting the $205,000 specified in HB617 from ASCA's FY85 budget would perpetuate the problem, not solve it. The only solution is to establish a forward funding cycle for the Fine Arts Camps with this one-time appropriation provided by HB617.

3/8/84

CHILKOOT TLINGIT

CULTURAL CAMP

"A place for your children to learn to live the way your grandfathers did."

July 16 - 20, 1984
July 22 - 31, 1984

The Chilkoot Tlingit Cultural Camp will provide an opportunity for our children and our elders to live and learn together.

Classes will be offered in:

- singing
- dancing
- carving
- beading
- drum making
- story telling
- mountain safety skills
- traditional fishing
- native food preparation
- cultural history and philosophy
- informal language instruction

Camp costs:

- Partial day camp for local children, ages 5-8, $5.00 per day. July 16 - 20

- 10-days for ages 9-12 (excluding ferry transportation to and from Haines) $100.00 * July 22 - 31

* $70.00 for food, $30.00 for supplies

Items to bring for camp:

- sleeping bag
- raingear
- towel, washcloth
- toothbrush
- toothpaste
- mosquito dope
- flashlight

Please note that absolutely no alcohol or drugs of any kind will be allowed in camp.

For further information call Haines Chilkoot Indian Association at 766-2310 or Raven House 766-2606

Registration deadline: July 1, 1984

Please enroll _____, age _____, in the Chilkoot Tlingit Cultural Camp for the dates of ☐ July 16-20, 1984 or ☐ July 22-31, 1984.

☐ Enclosed is _____ at $5.00 per day for partial day camp experience, or

☐ Enclosed is our $100.00 payment for the 10-day period.

Address: _____

Telephone number: _____ (in case of an emergency)

Do you have any particular skill that you would like your child to learn from the Tlingit elders? If so, please let us know.

Does your child have any individual problems or habits we should be aware of? _____

Please return the enclosed form and camp fee to: Chilkoot Indian Association
P.O. Box 414
Haines, Alaska 99827

CHILKOOT CULTURAL CAMP

In the summer of 1982, Austin Hammond and members of Chilkoot Indian Association constructed a smokehouse at the old Chilkoot village site to teach young people how to dry fish and berries for winter food supply. An educational permit was issued by the Alaska Department of Fish and Game to take by traditional means 200 sockeye and 200 pinks from the Chilkoot River from July 1st to August 30 for this purpose. Because of the late construction of the smokehouse, no fish were taken or processed that summer.

In 1983, as soon as the snow left the ground at Chilkoot Village, Austin and members of Chilkoot Association began constructing a traditional walkway and fish boxes in the river. Twelve foot long poles with gaff hooks were made. A new educational permit was issued from the Department of Fish and Game for 200 sockeyes and 200 pinks to be taken from the river.

Platforms were built for 2 tents and an outhouse was made. The Raven's Wing building was donated and moved from the Folta house at Lutak to the campsite. This building was used for housing a caretaker, cooking and dining as well as evening storytelling.

Chilkoot Tlingit Cultural Camp was held in a 10-day session in August, 1983 , with these campers travelling from Juneau, Hoonah and Haines to attend the camp:

Participants	Sponsor
Bobby Brakes	Family
Joe Hamilton	Family
Gwen Austin	Tlingit and Haida
Rayna Serabia	SEARHC
Denise Austin	Sealaska Heritage Foundation
Aaron Greenberg	Family
Sarah Gregory	V.F.W.
Nicholas Folta	Family
Danny Hammond	Family
Michele Dalton	Family
Richard Dalton III	Family

The registration cost for each of these participants was $100.00 which covered the cost of food at $7.00/day and a supplies fee of $3.00/day.

The campers arrived by ferry and were transported by truck to Raven House to see the film "Haa Shagoon", moving then out to the campsite. Most of the camp construction was completed by this time, but the youth were challenged to make their tents homey by adding shelves, mattresses, extra blankets, mirrors, etc.

Three children from Haines attended camp on a day-camp basis. These children were:

Rob Figdor
Reed Scott
Leif Asper

Each camper made a drum with steamed wooden base and goat hide skin drum head. David Andrews helped us know how to stretch the drum heads over the frames. Some of the campers sketched their clan designs on their drums and will paint them during the winter. Several hours each day the youths practiced singing, drumming and dancing skills. They took great pride in teaching and learning from each other. Some campers who had never sung or danced before performed in Tlingit Park with the Eagle-Raven Dancers. Dixie Johnson came several afternoons to help the campers learn new songs.

Austin Hammond worked closely with each of the children, telling Raven stories, the history of Chilkoot Villate and shared "how to live" stories. This was the real magic of camp. The youth listened intently to the stories and yearned for more opportunities to learn from their elders.

Campers took part in the Deer Rock Celebration held along the Chilkoot River to commemorate the reconstruction of Deer Rock. They picked berries and made fried seaweed for the feast which followed the celebration. The campers also spent one day at the Southeast Alaska State Fair.

Each camper cut five fish to be dried in the smokehouse. The fish were donated by Fish and Game from the Chilkoot weir samples. The youth shared this fish with visitors and took some to their homes to share with their families. Some campers prepared dried berry cakes.

Although the campers fished every day, no dish were caught by gaff hooks. The Elders believe this is because the fish are not schooling after they come through the weir one by one, and the fish are moving up to the lake on the opposite side of the river.

Next year, in the early spring, more rocks will be moved when the water is low to encourage the fish to move again in their traditonal channels.

PROPOSED PLANS FOR CHILKOOT CULTURAL CAMP
FOR July and August, 1984

The Chilkoot Indian Association would like to plan two sessions for camp this summer, with the possibility of a weekend retreat for older teens and young adults.

The first session will be for young children ages 5-9, as a day-camp experience. The children will come from Haines each day for learning activities, including:

fish cutting
fire building
berry picking
making a family tree
listening to stories
making puppets to play the stories
making headbands with beaded designs

Lunch will be provided to provide opportunities for children to sample Tlingit foods. We hope to do some outdoor cooking as a part of this experience. Resource teachers who are skilled in Tlingit food preparation, stories and history , and beadwork will be hired to teach their skills for two hours in the morning and two hours in the afternoon of each of these days for a one week period. The video-equipment owned by the Chilkoot Association will record the happenings. The fee will be $50.00

The second session will be a 10-day, live-in experience for youth ages 10-14. Each family will pay $100.00 which will include food and camp expense costs. The learning activities will include:

catching fish in the river
cutting fish for drying
fire building
survival skills in the mountains and woods
making a family tree
berry picking
making berry cakes
carving skills
beading skills
drummaking
listening to stories
learning to retell stories

Teachers skilled in preparing Tlingit foods, survival skills, beading, and stories and history will be hired to teach their skills for four hours each day for ten days.

The Institute of Alaska Native Arts will provide Artist-In-Residence funds for Nathan Jackson to teach carving and design skills to the campers in the 10-day session. He will live at camp with the youth.

We have the committment of three adult volunteers who will also live at camp as counselors for the 10-day session.

We will hire a full-time cook who is skilled in preparing Tlingit camp food. We want to do some outdoor cooking this year.

We are seeking funds for the following items and we welcome your support:

- insurance
- resource teachers'salaries
- office expenses
  - telephone
  - copying
  - postage
- camp tools and equipment
- activities supplies
- cook's salary
- Raven's Wing repairs
- camper scholarships

Our 1984 budget is attached. We're looking forward to a great summer!

CHILKOOT CULTURAL CAMP -- 1984 BUDGET

ITEM	ALASKA STATE COUNCIL ON THE ARTS	J.O.M.	INSTITUTE OF ALASKA NATIVE ARTS	IN-KIND	BIA
ADMINISTRATIVE COSTS		CAMP DIRECTOR (250 hrs/$10 hr.) $2,500. EMPLOYMENT BENEFITS $377. 2 CAMP COUNSELORS (200 hrs/$10 hr.) $2,000		CHILKOOT INDIAN ASSOCIATION OFFICE SPACE & BOOKKEEPING SERV. $500. 4 VOLUNTEER CAMP COUNSELORS $19,200.	CAMP INSURANCE $1,000.
ARTISTS' FEES	2 STORYTELLERS, EACH (50 hrs./$10 hr.) 1 EAGLE CLAN 1 RAVEN CLAN $1,000. 3 BEADWORKERS, EACH (50 hrs./$10 hr.) $1,500. 1 PUPPETEER (50 hrs/$10 hr) $500. 1 DRUMMER (50 hrs/$10 hr.) $500. 1 SONG LEADER (50hrs/$10 hr.) $500 ARTIST-IN-RESIDENCE FOR WAYNE PRICE HONORARIUM $1,500.	TRADITIONAL FOOD CONSULTANT (250 hrs/$10 hr.) $2,500. SURVIVAL SKILLS CONSULTANT (80 hrs/$10 hr) $800.	ARTIST-IN-RESIDENCE FOR NATHAN JACKSON HONORARIUM $1,500.

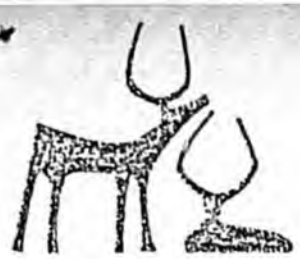
MEMORANDUM

TO: Representative Koponen
FROM: Deborah Niedermeyer, Legialative Aide DMN
RE: Arts Camp Supplemental
DATE: 23 March, 1984

BACKGROUND

Alaska's arts camps which begin typically in early July, get a major portion of their money through grants from Alaska State Council on the Arts. The Arts Council, which gets its money from the Department of Education through the Legislature does not know what its budget for arts camps grants will be until a month or two into the new fiscal year, that is, not until the arts camps are in progress or even completely over. This has been a serious management problem.

THE BILL



HB 617 makes an FY84 supplemental appropriation to Alaska State Council on the Arts equal to the amount the Arts Council expects to grant the arts camps in FY85. This allows the Council to hold whatever money it eventually receives from the legislature for FY85 in reserve for the beginning of FY86. The bill is thus a forward funding mechanism which allows both the camps and the Arts Council to make their budgets based on the money they have, not what they hope to get. It is a one time only appropriation.

THE BUDGET

Both the House and Senate Education Finance Subcommittees have added $180 to the FY85 Arts Council budget for the purpose of forward funding arts camps. We are extremely pleased as this would correct much of the problem after July 1985. However, only a supplemental appropriation to the FY84 budget will correct the problem in this fiscal year, in time for this summer's arts camps. In addition, the $180 appropriation is $25,000 below the figure needed for the four arts camps expected to qualify for grants from the Arts Council.

SPECIFICALLY

The U of A Fine Arts Camp in Fairbanks is requesting	$ 46,182
Alaska Arts Southeast Camp in Sitka is requesting	$ 76,650
Alaska Fine Arts Camp Inc. in Kings Lake is requesting	$ 73,500
Chilkoot Cultural Camp in Haines is requesting	$ 8,415
TOTAL:	$204,747

21 September 1983

Alison Elgee
Special Assistant to the Commissioner
Department of Education
Pouch F
Juneau, Alaska 99811

Dear Alison:

While I was in Juneau last week for budget meetings, we discussed the Fine Arts Camps in the state which receive funding through the Alaska State Council on the Arts. I mentioned that the Arts Council and the Fine Arts Camps were not satisfied with the present method of funding: grants which occur either at the beginning or end of the state's fiscal year and which do not allow for advance planning or proper cash flows. We and the camps suggested that the State Arts Council request a budget increment in our FY85 grants budget to begin forward funding for the camps.

Last week you suggested that since this would be a one time cost, a special appropriation might be a better solution than a budget increase. I am writing to say that I am in agreement and to provide you with some figures on the camps. Our goal for FY85 is to obtain funds for both the management and programs costs of the 1984 summer season as well as to grant out funds for the 1985 summer season. Program and planning costs for all three fine arts camps begin mounting up in January of a given year; Arts Council grants are not awarded until late July of the same year - after the camp season is over. The forward funding process will enable us to grant funds in July for programs and planning which will begin in January and end in mid-July. The special appropriation will enable us to "get over the hump" in terms of the extra money needed for the first year of the program.

The following figures have been provided by the three camps:

University of Alaska Fine Arts Camp, Fairbanks	$ 46,182	Request to ASCA for 1984 season
	157,182	Total budget for 1984 season
191 students at 1983 summer camp	53,725	Request to ASCA for 1985 season
	177,925	Total budget for 1985 season

Alaska State Council on the Arts
619 Warehouse Avenue, Suite 220/Anchorage, Alaska 99501/(907) 279-1558

Alaska Arts Southeast Camp, Sitka	$ 76,650	Request to ASCA for 1984 season
	201,852	Total budget for 1984 season
270 students at 1983 summer camp	74,500	Request to ASCA for 1985 season
	222,602	Total budget for 1985 season
Alaska Fine Arts Camp, Inc., Kings Lake	73,500	Request to ASCA for 1984 season
	161,000	Total budget for 1984 season
266 students at 1983 summer camp	73,500	Request to ASCA for 1985 season
	170,000	Total budget for 1985 season

Since we are attempting to overcome a lack of funds for advance planning and to begin forward funding of all three camps, I would suggest that the Legislature be approached for a special appropriation of $ 200,000.

Arts Council staff is still in the process of revising our project grant application for use by the Fine Arts Camps. As soon as that is done and the completed applications have been submitted to us, I will send copies to you. The applications will give you a detailed breakdown of what grant funds are used for, proportion of cash match, tuitions, etc.

Please contact me if you have questions. And thank you for all your help and support.

Sincerely,

Chris D'Arcy

STAFF REVIEW

House Bill 631, "An Act relating to runaway children," by Representative John Liska, adds a new subsection to AS 47.10.080 (Delinquent Minors and Children in Need of Aid. Judgements and Orders) that makes certain minors wards of the state if they refuse to return home, or stay at home, as ordered by a court; and requires the Department of Health and Social Services to place the child into a child care facility.

The bill also amends sections that outline legal custody, guardianship and residual rights and responsibilities by addition of language stating that a parent has no responsibility for support of a minor child who refuses to voluntarily reside with the parent and whose legal custody has been transferred from the parent by court decree, unless custody has been transferred from the parent because of abandonment, abuse, or neglect.

The bill also amends the section relating to temporary detention of a minor, providing that a peace officer, upon receiving a report that a minor is evading the person having legal custody, shall make reasonable efforts to locate and detain the minor for the sole purpose of either returning the minor to the proper custodian or taking the minor to an office specified by the Department of Health and Social Services.

The bill does not provide for an effective date and becomes law 90 days after the Governor signs the bill.

Do you know someone with ALS? (Lou Gehrig's disease)

If you do, then you know how devastating ALS can be. But, you may not know that throughout the country, friends and relatives of ALS patients are doing something about ALS by setting up Local Chapters of the National ALS Foundation.

Local Chapters are resource centers—places where ALS patients and their families can find out what services are available. They can get together for rap sessions, to share and ease the burden of ALS, and to find out that they are not alone.

Local Chapters can generate public awareness—raise money for the all important research—and bring us one step closer to finding a cure for ALS.

To learn how you can help set up a Local Chapter and to be part of a growing, nationwide organization that's doing something about ALS, contact the National ALS Foundation, 185 Madison Avenue, New York, NY 10016, or call (212) 679-4016.

This message contributed by Newsweek, Inc.

Back home: Darcy Reeves (front) with mother and sister

tans" who offered to take her to their house. The Port Authority police were also converging on her and won the contest; she was soon on a plane headed home. "You soon find out that all those 'good people' who want to 'help you' want something in return," says a Philadelphia 16-year-old who was not so lucky—and is now pregnant by her newfound "friend."

Pimps: Hustlers operate in a netherworld all their own. In Hollywood, for instance, there's a wage scale of sorts. Attractive new arrivals can earn top dollar ($250 or so, on up) from the homosexual "chicken hawks" who cruise Santa Monica Boulevard in search of young boys. "Everyone knows the regulars, so when they see a new face, they have to try you," explains one young denizen. "After they get to know you, though, you have to do more and more to earn your money." Times can be even tougher for girls, who usually have pimps to support, and staying straight is often well-nigh impossible. L.A. police detective Larry Broadhurst still shudders over one young victim from two years ago. "She was a real good looking blond girl," he recalls. "A pimp approached her to work for him, and she refused. Told him she didn't want to have anything to do with his business." The pimp didn't give up, he followed her and pounded on her motel door. "When she opened it, this guy just stuck a knife right through her head."

Authorities are trying to provide more effective refuge. In Boston, the vans from Bridge Over Troubled Waters roll right up to the kids on the streets, offering dentists, doctors and drug therapy. At many shelters the rules are stricter than those at the homes the kids have left: at Houston's Family Connection, residents must rise at 8:30 a.m., cook all their own meals, clean their rooms and request permission to stay out after 5:30. Generally, the shelters' goal is to identify family problems, begin counseling and return the runaways—except to parents who abuse them. The success rate runs anywhere from 50 to 70 percent. "We desperately need more places like this," says Sandra Reeves of Houston, whose 15-year-old daughter, Darcy, has run away three times, only to be reunited through family counseling. "Please tell mothers and fathers that their children *can* come home."

To help those children who resolutely won't—or can't—go home again, states and municipalities have also been changing their juvenile laws. At least a dozen states now allow courts to "emancipate" minors, so that they may hold jobs and apartments on their own; in Connecticut, a 16-year-old can effectively "divorce" abusive parents and be treated as an adult. Some law-enforcement officials are less than enthusiastic about the liberalization trend, claiming they're now unable to step in and aid troubled runaways. But some frustrated parents are saying "good riddance" to incorrigible adolescents. Toughlove, the Pennsylvania-based parents organization, suggests families lock the doors behind difficult runaways until they promise to change—while providing them with a list of other Toughlovers who will act as caretakers. In several states, wits-end parents can also ask the courts to designate perennial trouble-makers "persons in need of supervision"; they can then be picked up for running away, and a judge can impose psychiatric care or other treatment.

Rebels: To be sure, not every vagabond child can be classified as either innocent or incorrigible. Some classic rebels without cause still take off from pure pique or boredom. Beth, 16, showed up at a shelter in Prince Georges County, Md., claiming she had been maltreated by her mother; the "abuse" turned out to be a failure to provide designer jeans. But many experts say such cases represent a declining minority. "There is the child who is just too big for his britches," concedes Alice O'Shea, chief of the child-advocate unit in Philadelphia's Office of the Public Defender. "But they are the minority." Experts say only 10 percent of runaways qualify as "spoiled brats."

Authorities worry that [illegible] juvenile

facilities won't be able to handle an influx of teen agers who jump, or are pushed out on their own. Financing for shelters is precarious, although Congress authorized more than $20 million, the administration proposed only $6.6 million in the current budget. Several senators managed to boost the figure to $18 million. Even that amount would provide less than $18 per runaway — and the budget battle must be fought again when the current funding expires Dec. 15. "The private sector cannot and will not pick this program up," says Rep. Pat Williams of Montana. "This is a bedpan program, the kind that no one wants to get involved in, and that is why the Feds got into it in the first place."

Ultimate Rejection: Yet even if sufficient money could be found to put counselors on every street corner, more fundamental questions would remain. One's own home is, after all, supposed to be the place where they have to take you in, no matter what, being forced to leave it can be the ultimate rejection. Sister Dolores Gattanutti of New York's Noah's Ark shelter deplores "the Kleenex mentality" that brings most young charges to her door. "We live in a society where we use things and just throw them away," she says. "I swear, a lot of people have this attitude toward kids." And so the throwaway children pile up, from New York to California, to be exploited and brutalized. Sooner or later, those who cast them off must realize that children are not so neatly disposable. The longer they remain on the streets, the less chance they can ever be reclaimed — and the more they will cost everyone.

Alaska State Legislature

House of Representatives

John J. Liska

March 26, 1984

M E M O R A N D U M

TO: Rep. Mae Tischer, Chairman - Health, Education and Social Services

FROM: Rep. John J. Liska

SUBJECT: HB 631, "An Act relating to runaway children."

The purpose of this bill is three fold.

a. Section 1 - is an attempt to require by law a minor to be accountable to either parents at home or a guardian at a foster home or be placed in an appropriate institution.

Presently, if a minor runs away from home, and he is not breaking any laws, he is free to do as he wishes. The intention behind our bill is - The child does not have the maturity to exist in todays society without becoming a subject of prey for a variety of undesirable types of people. If you will refer to item D, Article number 1 - in your packet, it clearly describes what happens to these run away children.

While it is not the intention to violate the rights of any child, we feel it is the responsibility of either the parents of the State to be in control of the minor because at this stage in their life they are not mature enough to be able to function in society on their own.

Section C refers to a minor who refuses to reside with the parents, and who's custody has been transferred to the state, not because of abuse, neglect or abandonment, the minor has just decided he does not want to live at home. The parents of such a minor will no longer be responsible for the support of such a minor. Simply put, if the child refuses to live at home by the parents rules, the parents can legally be decleared not responsible for the support of the child. This will encourage the child to work this out with their parents. Additionally, it will encourage the Department of Health and Social Services to recommend the minors go back to their families due to additional state costs.

And the last section of the bill states that a peace officer shall make a reasonable effort to locate a minor who is evading his guardian. Presently the police can, if they want to but they don't have to, try to locate a run away child.

HB 631
Memorandum
3-26-84

Additionally, it is essential in my opinion that these children not be allowed to remain on the streets, even for a couple of days or long enough to decide at a court hearing whether or not they are to be picked up.

I refer to item D, Article number 2, the longer they are on the streets the more likely they will become involved in situations that will have a life long effect on them. We feel they are incapable of protecting themselves from this involvement and therefor it is the states responsibility to protect them.

In your packet you will find the following for your informa[illegible].

A. Copy of HB 631.

B. Position Paper from Health, Education and Social Services.

C. Memorandum from Jos Mapranath, Director-Division of Administrative Services, Department of Public Safety.

D. Article regarding runaway children.

1. From USA Today March 1979, Life in America, "The Adolescent Runaway: A national Problem"

2. Newsweek Oct. 18, 1982, Life/Style, "A Nation of Runaway Kids"

JJL/tm

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
HOUSE BILL 631

"An Act relating to runaway children."

OVERVIEW: This Bill proposes three major changes to the present statutes which deal with runaway children: 1. It adds a new subsection to Sec. 47.10.080, "Judgments and Orders," which automatically gives custody of runaway children to the Department for the purpose of institutional placement; 2. The Bill proposes relieving the parents (of runaway children) from any responsibility for support if the child is in the custody of someone other than the parent; and 3. This Bill adds to the responsibility of peace officers in two ways: (a.) the peace officer shall make efforts to locate runaway children; and (b.) the peace officer shall detain the runaway child.

STATEMENT OF THE PROBLEM

The Department of Health and Social Services provides services to runaway children through its field offices and by funding programs specifically designed to counsel runaway children and their families. These services can include placement of the runaway child; but the major goal is to reunite the family, and not support further family breakdown by premature or lengthy placement of the child. The child's action of running away from home is an indicator, a symptom of family dysfunction; the action is not criminal.

At the present time a runaway minor becomes a ward of the State under AS 47.10.010. Once a minor and his/her parents have participated in a court hearing the minor may be determined by the court to be a child in need of aid. If the court makes a child in need of aid determination, the court then orders the child committed to the Department for placement in an appropriate setting (AS 47.10.080 Judgments and Orders). The Department decides if a juvenile institution is the treatment service needed by the runaway child. If this Bill becomes law this whole procedure would be bypassed since this Bill essentially defines the runaway child as a ward of the State and then mandates the Department to place the child in a juvenile institution.

In 1977 the statutes were specifically changed to allow a runaway child to be defined as a child in need of aid and not a delinquent minor since running away from home was not defined as a crime. Before the statute changed, runaway children were detained in juvenile detention facilities; and it was recognized nationwide as an inadequate and punitive method for dealing with children and families who were in need of counseling services. With the lack of specificity in the current definition of "juvenile institution" and with the lack of definition in this proposed legislation, there is a high risk that children could/would be locked up in detention facilities with delinquents who have committed crimes.

In reference to the issue of parental support, currently when the Department of Health and Social Services is granted custody of a child, the parent remains responsible for the support of the child. The rationale for the continuation of a parent's responsibility is to encourage reunification of the family. The parents of a runaway child (who is found to be a child in need of aid and placed in the custody of the State) are not treated any differently than any other parents.

This Bill differentiates between the responsibilities of the parent of a runaway child whose custody has been given to the State as opposed to the responsibilities of the parent who has lost custody because of abuse and/or neglect. It is also conceivable that divorce custody support issues would be impacted since the wording of the Bill does not identify to whom custody has been given.

In regard to the third change which is proposed, running away is not currently defined as a crime; therefore, peace officers are not required to search for runaway children, nor are they required to detain a child when the child is located. The law enforcement agencies in the State of Alaska are not adequately staffed to assume the responsibility of even making reasonable efforts to locate runaway minors; and this law mandates peace officers to broaden their responsibility. If the Bill becomes law peace officers will also be mandated to detain minors relieving the police officer of any personal judgment in deciding whether or not a child should be detained.

RECOMMENDATION

The Department opposes this proposed legislation because: 1) It is not consistent with adjudication and dispositional statutes; 2) It appears to violate constitutional rights by excluding a hearing before granting custody to the Department; 3) It defines the placement need of the child without consideration of the individual case; 4) It provides for "special" treatment to parents of runaway children by relieving their responsibility for support; and 5) It endangers the non-criminal status of runaway children.

SUBJECT: Criminally Exploited Children

We have reviewed the materials submitted on criminally exploited children in Alaska and wish to express our support for the formation of a special law enforcement unit in Anchorage to deal with this serious problem. The unit would be a joint State and local cooperative effort similar to the successful Anchorage Metro Drug Unit. The cost is estimated at $375.0 for FY 85 and would include one Anchorage P.D. Sergeant, one Anchorage Police Officer, one Anchorage clerical position, and one State Trooper Sergeant.

While we recognize the seriousness of criminal exploitation of children and that this is a growing problem, it is not feasible at this time for either the Anchorage Police Department or the Division of Alaska State Troopers to divert limited existing resources to form the proposed special unit. We would, however, be pleased to participate in such an effort if funding is provided. Therefore, I urge your support of an appropriation in the amount of $375.0 to fund a special investigative unit on criminally exploited children.

Further details are available upon request. Your consideration of the requested appropriation to deal with this problem is appreciated.

SUBJECT: Criminal Activities of Juveniles in Anchorage

The purpose of this brief letter is to state my opinion of the status of current criminal activity involving juveniles in the Anchorage area. As you know I have been a police officer for the past five plus years in the Anchorage area and hive worked for two different periods as a counselor at McLaughlin Youth Center. What I am stating here is strictly my opinion and does not represent in any way the viewpoint of my employer, the Anchorage Police Department.

During recent years Anchorage, as well as other communities within the State of Alaska, has experienced a tremendous increase in the level and depth of juvenile criminal activity. I believe that this is in part due to the tremendous growth that this community and this State have experienced in recent years and also because of the ineffectiveness of the criminal justice system to deal with the problem. My opinion of the current status of this activity has developed because of my involvement with juveniles in the community and as a result of my involvement in numerous investigations dealing with some of these problems.

What has developed in this community, as is characteristic of other communities in other States, is a network of criminal activity of which juveniles play a substantial part. This has developed to the extent that many of our young persons so exposed actually are a part of a sub-culture existing in the same space but at different times within the mainstream of our society. This subculture has a set of values and morals that are substantially different than those of the mainbody of our society and paramount within this set of values is the belief that youth equates to victimization. When a young person in our community is, for a variety and combination of reasons, forced out of the home environment and onto the "streets" (so to speak), he is subjected to an elaborate system of victimization on the part of adults within the community who, in essence, use youth to their advantage in the perpetuation of their criminal activities and personal desires.

A young person finding himself/herself within this position is necessarily forced to first, survive. In order to do this, the youth must engage in activities which an adult can support. These activities extend from theft to drug usage/sales and prostitution. Adults involved in these activities will promote the involvement of juveniles to the advantage of the adult while at the same time providing for the juvenile, as a minimum, the basic needs of food, clothing and shelter needed by the juvenile to survive. Juveniles within this community are extensively involved in theft, drugs and prostitution and these activities are promoted and supported by adults within the community. The extent of the

problem is largely unseen, even by many persons within the criminal justice system who deal with these juveniles daily as a part of their jobs, because the juvenile does not often talk about depth of involvement to anyone, other than his/her peer group and in some cases, not even to them. The system tends to look at each individual act by itself, failing to realize that there is a much greater problem, individually and collectively, lurking below the surface of the individual act.

As an example of what I have previously stated, I would estimate that about 50% of all the boys admitted to McLaughlin Youth Center have had some contact with adults of a homosexual nature. I would further estimate that in excess of 25% of these have had what could be termed deep involvement with more than one adult. Often, this kind of activity, develops in relation to other types of activity including the adult using the juvenile for drug sales and to provide merchandise for fencing operations of small and large scale. It is not surprising then, that when the juvenile so involved is picked up for a property crime or drug related offense, the depth of his involvement is never revealed to those professionals within the system that later deal with him.

Any juvenile who, for whatever reasons, spends more than a short amount of time living away from a home and on the "streets" will become involved to a greater or lesser degree in the kind of activity I have just described. Since the adult(s) involved use the juvenile for their purposes, the normal role of adult guidance in the maturing process is severely distorted which in turn perpetuates the problem as the juvenile grows older and changes from being the victim to the user. Over a period of time of involvement in these kinds of activities the youth gradually begins to believe that the only thing that will change his being used to another's advantage is age and that when that age is attained the role can be reversed.

It is virtually impossible for a young person to survive away from home without becoming involved in these kinds of activities because of the inability of a young person to legitimately obtain the basic necessities of food, clothing and shelter necessary for survival. It is further, virtually impossible, for that young person to steal enough through burglary, robbery or theft to attain these necessities. As such, the young person in that position, must turn to other more profitable activities. These activities involve drugs and prostitution. The problem is further compounded, in most cases, because of th emotional problems that the youth is experiencing as the result of his necessity to leave the home or to replace the home needs with persons met outside the home and his resultant turn towards drug useage. Drugs are expensive and not within the reach of the average young person through legitimate earnings. Adults desiring use of juveniles for sexual purposes are well aware of the juvenile's problems and will frequently provide, either the basic needs of survival, or drugs or both in return for sexual favors. In many cases, the juvenile can provide sexual favors for a much higher than could be obtained through other types of criminal activity. Adults desiring these kind of favors are very perceptive in being able to identify those juveniles that are in a position to which they would be susceptable to such propositions.

All this exists on a large scale in the Anchorage area. The extent of this existence increases steadily because of the inability of the Criminal Justice System and the community to control it. I would estimate that the extent of the

problem in Anchorage is proportionately greater than it is in other comparable communities in the United States, again for a variety of reasons. It is common knowledge that large scale fencing operations exist within the Anchorage area as is evidenced by the very small percentage of stolen property that is recovered and the relatively high frequency of recovery of stolen property from Alaska in other states. The extent of drug sales operations and drug useage amongst juveniles in the Anchorage area, again, is particularly high to the extent that it is virtually impossible for any young person not to be exposed to drugs, and not just marijuana, beginning in junior high school. The extent of juvenile prostitution activities, particularly as it involves males, is also extremely high in the Anchorage area to the degree that virtually all juveniles living out of the home are exposed and many still living at home are exposed.

There exists, in Anchorage, houses where juveniles on the run can find temporary shelter. These houses are provided either directly or indirectly by an adult. Unfortunately, there are strings attached to the use of the house by the juvenile. There have been commercial pornography operations involving sexual involvement of juveniles in the most perverted kinds of sexual activity operating in the Anchorage area. These operations have been directed by organizations from without the State of Alaska. There have been commercial prostitution operations within the Anchorage area in which juveniles were the merchandise and in which the fees paid were extremely high. There have been large scale drug operations in which juveniles, many of them going to school and living at home, were involved as the primary pushers. There have been large scale fencing operations in the Anchorage area in which merchandise stolen by juveniles was fenced by adults to create huge profits.

The depth of this whole problem is really seen when one realizes what becomes of the juvenile that is involved in these kinds of activities. All young persons growing up need adult guidance and emotional support in order that a moral and value system can develop. If the child receives, for this need, guidance and "emotional support" from persons that only wish to use him, it is understandable how we are developing a subculture of increasing size within the mainstream of our primary culture, in which the value system is as foreign as one would be from a far Eastern country. The use of youth for personal gain is as foreign to the basis of our culture as is the crime of murder and yet we are allowing this to exist, and to in fact grow, within the Anchorage area to a massive degree. Much of this problem is a criminal problem and must be solved through enforcement means. To this end we are sorely lacking.

ARTICLE NUMBER ONE

LIFE IN AMERICA

The Adolescent Runaway:

A NATIONAL PROBLEM

"No one seems willing to accept clear responsibility for the thousands of children over 15 who stand outside the jurisdiction of family courts, criminal courts, and, in large part, the child welfare system."

by Bruce Ritter, O.F.M.

OVER a decade ago I became involved almost against my will with one of the many problems of any large metropolitan area when 30 runaway children from the ages of 13 to 17 sought my help asking to sleep on the floor of an apartment in the East Village of New York City I was receiving at that time a monthly stipend to the poor. There I found that 40 children had been recruited, advised by some junkies in the neighborhood, had been burned out of the abandoned building in which they were living and before that had been forced to make a pornographic movie in order to pay for their room and board.

Because I could not find any place for them in the child welfare system I kept them. They simply moved into my apartment. So many hundreds of homeless young people began knocking on my door that I and my friends were forced to begin a new child care agency — since that time over 10 years ago Covenant House has sheltered many thousands of runaway and self emancipated kids, returning many to their homes and keeping many for long term care. Hundreds upon hundreds were victims of child abuse.

Many people are unaware of the enormous dimensions of the problem of runaways and homeless children in our society — or what can happen to them. Over 1,000,000 juveniles run away every year in this country. According to a New York City Police estimate there are at least 20,000 runaways under 16 in New York City at any one time. If you add to that number the many thousands of *self emancipated* youngsters between the ages of 16-18 and even the greater number between 19 and 21, the numbers of children on the streets are staggering.

These numbers are not just pulled out of a rhetorical hat. In the first year after the Covenant House crisis center, Under Twenty One, was opened (April 1, 1977), well over 4,000 children have sought our help: over 500 of them were 15 and under, another 900 were between 16 and 17, and over 1,500 between 18 and 20. Covenant House expects to serve about 6,000 walk in children under 18 at its Eighth Avenue center this year: who should not be on the streets, but for whom no effective programs exist. As a result these children are frequently subjected to the grossest kind of abuse. About [illegible] children under the care of [illegible] come to Under Twenty One [illegible] during 1978.

A question of responsibility

The very complex issues raised by these thousands of homeless young people cross a dozen different jurisdictions: states' rights, parents' rights, children's rights, family and criminal court questions, the nature of the child care system, etc. The thinking and practice regarding the rights of juveniles has been evolving so quickly over the past 10 years that legislators have had great difficulty keeping up with the changing status of juveniles in our country. The ambiguity and confusion and differences in statutes between one state and another and within the same state make it almost impossible on occasion to resolve the legal status of a runaway or homeless child. Until recently, the problem of runaways was always considered essentially a police matter. The juveniles were to be found and returned home. Yet, an overburdened New York City police force can not begin to cope with the huge numbers (there is a seven man unit assigned for that purpose) and the police do not have any jurisdiction over children 16 and older.

Father Bruce Ritter is the founder and director of Covenant House and the author of [illegible] *, the first book ever written on the subject of runaway children and their problems.*

...problem is especially acute for ...16 and over since the law simultaneously permits a child of 16 to ...emancipate himself and then effectively ...arc mclusives that child. For the most ...a child can not get the medical ...he or she needs, can not easily ...ality for public assistance, can not ...into contracts, and can not find a ...ful job. Children are free to wander ...streets, panhandling, exploiting, ...being exploited. No one seems ...either to accept clear responsibility for the thousands of children ...18 who stand outside the jurisdiction of family courts, criminal courts ...for large part, the child welfare system. Neither Special Services for Children, the Division for Youth, or the Department of Social Services will ...to immediate jurisdiction and responsibility for a 16 year old boy or girl ...ordering up and down 42nd Street ...ever it is manifestly not in the best interest of the child or the general public to permit this to happen. *Something* ...protection must take the clear responsibility. We operate on a principle, seemingly, of *caveat puer*: let the child ...beware. Covenant House can document ...almost endless series of children ...15 for whom it can find no one to ...accept responsibility: no court, no ...family, no part of the child welfare system. The tangle of conflicting jurisdictions, of vague and ambiguous laws, a severe fiscal crisis, and the fact that most of these kids are black and Spanish make it easy to let them fall through the cracks. Many thousands of them become willing or unwilling victims of the $1,500,000,000 sex industry that feeds on children in the Times Square area. They have few options: cold, hungry, homeless, desperate for affection, they fall easy prey to the sex merchants who know all too well how to exploit them. These children find it almost impossible to get help. Until Covenant House, with the help of the Roman Catholic Archdiocese, opened its Under Twenty One crisis center on April 1, 1977, there were absolutely no services for these thousands of children in the Times Square area. Covenant House is always understaffed, underfinanced, and overwhelmed by the numbers of children coming to us at all hours of the day and night.

During the first year that Under Twenty One was open, over 4,000 children came to us for help and over 60% of these had some contact, major or minor, with prostitution and pornography. The list of horror stories we could...

- A 14 year old boy chased into our center by his pimp, a man of 40, who had a broken bottle. The man wanted to kill the boy who had escaped after being held prisoner for six weeks in a Times Square hotel.
- A pimp who offered us $500 for a young girl in our center.
- A 16 year old call boy with a contract on him. All he wanted to do was escape. He had made the mistake of ripping off one of his johns.
- A 14 year old girl held prisoner, raped, and forced into prostitution. Her hair dyed and with a false I.D. saying she was 18, who had gotten a job in an Eighth Avenue strip joint.

They are not bad kids and it is wrong to think that they are. They are good kids whose only crime is, for the most part, to be cold, hungry and homeless, with no skills, no resources, cut off from jobs or the possibility of getting medical help or public assistance. Since they have nothing to sell except themselves, they are easily victimized and abused by the so called victimless crime of prostitution.

There are many hundreds of juveniles caught up in a vicious degrading life style that kills many of them. They are caught in a kind of quicksand and can not easily escape. Hundreds will come, have already come, to Under Twenty One this year. Under Twenty One stays open 24 hours a day and offers a kid no questions when he or she asks for help: food, shelter, protection from their pimp and exploiters, a chance to go home again if that is possible, a chance to get a job, to go to school, to begin to think that they might live. Many times I have heard a kid say: "Bruce, I'm not going to make it. I'm going to die out there, the street is going to kill me." A 17 year old boy said to me recently: "Bruce, can you give me one reason why I shouldn't jump off the Brooklyn Bridge?" It was hard for me to answer.

What can be done

Why do we permit it? Why and how can such a wholesale abuse and neglect of children happen in our society? We seem both unable and unwilling to do anything about it.

There is much that can and must be done. It would be easy and unfair to attack the police for inadequate enforcement of existing laws. The police in New York City quite clearly have limited ability to achieve effective enforcement. At the same time, however, it is quite clear that the crime of child prostitution and abuse is not a priority for our police. Neither is it a priority for our district attorneys and the Attorney General, not the judges of our criminal courts who could exercise a little more fortitude in handing out sentences, not for our politicians, who only seem to discover the problem of child abuse and prostitution at election time.

Prostitution and this loathesome child abuse are big business and are obviously protected. What other reason could explain the apparent immunity with which this blatant, sick, savage destruction of children is carried on in our society?

We not only need more effective enforcement and more vigorous prosecution of the criminals that buy and sell children and more effective community action, we also need programs to help the thousands of juveniles on the streets that turn to prostitution simply in order to survive.

As I recently stated:

Last night 60 children came to the ... looking for a bed. Because we were unable to provide one for them they slept on the ... the street or in someone else's bed. We are ... almost without funds, our resources are ... staff strained to the utmost. With the ... weather coming on, we estimate that ... runs as 80 or 100 kids a night will come ... us for help. We are committed to the ... ing a child was without a bed. [illegible] ... on a cold night. We can never forget the ... that knocked on the door, sent by ... night. One of the ... said: "Are you Bruce ... and I said I was and he said: "Do you take ... kids in?" and I said: "Yes," and he said: "Can we stay with you?" I said: "No, because we have no room," and he began to cry and he said: "Where can I go and who can I die?" I said: "You can go back into the street and look and." And he stopped crying and looked at me and said: "I can do that." He did. They both went back into the street. One boy was 15, the other was 13.

Our records can document hundreds of cases of child abuse and maltreatment, drawn at random from our files. Based on our experience at Under Twenty One, we can distinguish three broad categories of gross child abuse: abuse within a family setting, abuse on the street, and abuse by [illegible]

Abuse within a family setting

In these cases, children came to Under 21 because of abuse by parents or guardians and because they did not have any other recourse. Typically there is the tragic plight of thousands of runaway children who every year flee dangerous and primitive situations at home. This type of child abuse is not family the best known and considered ... public attention has already been focused on it. The following are typical examples:

This project was financed by the New York State Crime Control Planning Board and the New York City Board of Education.

LIFE/STYLE

A Nation of Runaway Kids

Louis 15's homelife has long been no better than many a street bounced among a drug addict mother, an indifferent father and a savage stepmother who repeatedly hit the 15-year-old boy and tried to choke him to death. Nevertheless, Louis is a most reluctant runaway. His macho mask crumples as he sits in a cheerful Houston shelter—somewhat incongruously called Family Connection—and speaks softly of those he still loves. "I didn't want to leave her, but she said to get out and don't come back," he quavers, near tears whenever he mentions the mother who finally pushed him aside. Then, as other teen-agers return within earshot, Louis recomposes his cool. "I learned the hard way," he says. "Ain't nobody going to do nothing for me but myself."

A new generation of American youngsters is on the road—often at a desperate pace. They resemble less their romantic predecessors, from Huck Finn to the flower children, than refugees fleeing the wreckage of their families. Many are more truly castaways than runaways, forced from their homes by neglect, abuse or abandonment. "These kids are running *from* something, not *to* something," says Russell Frank, director of The Runaway Place, a Boston shelter. As many as 50 percent may be fleeing physical abuse, including sexual assault. A growing number are economic refugees, evicted by jobless parents who can no longer support them. "This is one of the first times we've seen people voluntarily bringing their kids in," says Carol Frank of the Child Welfare League. "It's a dust bowl kind of thing."

Others, without being told to leave home, may be driven out by violent arguments, drinking bouts, and other recession-related strains in the family. "A 14-year-old can't understand fully that his father may be depressed over losing his job," says Washington social worker Robbie Callaway. "As economic conditions get tougher, more and more kids are going to be out on the street."

'Meat Rack': The thoroughfares they travel include the likes of the infamous Minnesota strip located near Times Square—so named for the many blond nymphets from out of town who sell themselves there—and the "meat rack" on Hollywood's Santa Monica Boulevard where boy hookers are on display. Too young to work legally, a significant number support themselves by stealing, drug dealing or peddling sex. Like apprentice derelicts they huddle in abandoned buildings, on park benches or in the warm breeze from subway gratings. Many runaway kids display a pathetic ingenuity, fearful of pimps and muggers as well as policemen, one Philadelphia youth buried himself to his chin every night in a playground sandbox. But for most of the young nomads, there may be no place to hide: some 500,000 runaways simply disappeared last year.

There's no telling where they went, since

Bus station: Seeking aid at New York bus terminal

the United States does not keep computerized track of missing children as it does missing cars. By the most conservative estimates, however, each year more than 1 million kids between 10 and 17 leave home. Until 1974 the government's main helping hand was an arrest for juvenile delinquency. Then Congress—disturbed by reports of deaths and maltreatment in jails, reform schools and other institutions—passed the Runaway and Homeless Youth Act, to establish federally funded telephone hot lines and temporary teen-age shelters. But the 166 shelters—with their hopeful names like Halcyon House or Stepping Stone—serve only 45,000 kids in a year, roughly 5 percent of the runaway population, for a maximum stay of between two weeks and 30 days; and proposed Federal budget cutbacks threaten to cramp the space still more.

Fortunately for their survival odds, most runaways are relatively timid. According to juvenile welfare experts, most flee to within a relative's or friend's and eventually return home within 48 hours. The remainder, however, seem singularly ill-equipped for even a temporary life on the road. A recent report from the U.S. Department of Health and Human Services based only on shelter admissions, indicates the average runaway is 15. That's a full two years younger than the 1976 average—and kids even younger are now turning up with alarming regularity. Most of the kids are white (70 percent) and female (56.7 percent, although the gap is closing). Forty percent are school dropouts, many of whom might have [illegible] have migrated with [illegible]. [illegible] readily available [illegible] HHS estimates that 60 percent have never been in trouble with the police, and well over half have never been arrested.

'Flirters': Left to their own devices, kids develop a defensive subculture. Part is scrupulously observed: around Boston, male prostitutes are spread thinly over the bus terminal, while many more work the suburban combat zone. Hard-core street kids are supposed to congregate on Boston Common, where the heads cost a dollar. "It's a big local joke," hangs out in Harvard Square. Some runaways develop a sense of the community of the road. Each pad, which can make room for many more, will rent a room to the first spiritual the wind blows in with drugs and food. In one northeast suburb of Philadelphia, teen transients even built their own haven in the woods with lumber stolen from construction sites, complete with escape tunnels. Survival lessons are willingly shared: to score a free restaurant meal with a minimum of hiss (a gambit sometimes known as "chew and screw") leave the waitress a tip before you walk out without paying the check.

Time seems to be the greatest divider, determining which runaways can be salvaged. "If a kid has lived in the street for a month or so, it becomes very hard to reach him," says Father Bruce Ritter, founder of New York City's Covenant House for runaway youths. "If it's been six months, we've almost lost him, and if it's a year, he's gone. The poison works very, very quickly." In many cases, it takes only two days, beyond the 48-hour mark, one in 10 teen-agers is likely to become a prostitute. Incoming naifs are quickly spotted at such entry points as New York's Port Authority Bus Terminal by pimps or their scouts, sometimes called catchers. Blue-jeaned Marcia R., 13, remembers that she was barely off the bus from Ohio before a "man in one of those hats" approached her. He was headed off by a man and woman, two self-professed "good Samari-

House of Representatives
HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

MEMORANDUM April 9, 1984

TO: Representative Mae Tischer, Chairman, House HESS
FROM: Bill Lovell, Professional Assistant, House HESS

RE: Comparison of CSHB 631 (HESS) and HB 631

For your convenience, I have prepared the following comparison of the proposed House HESS Committee Substitute for House Bill 631 and the bill as originally introduced, both relating to runaway children.

Page and line citations refer to the original bill.

Page 1, lines 11 - 13, deletes "is habitually absent from the home or foster home to which the minor has been released by court order, without the consent of the minor's parent, guardian, or other legal custodian," and substitutes "habitually evades the person to whom the minor has been released by court order." This change has no substantive effect on the intent of the legislation, but may remove some possible difficulties in interpreting the bill.

Page 1, line 14, deletes "institution," and substitutes "facility." Although essentially semantic, this change makes it clear that the bill permits the Department of Health and Social Services to place children into child care services other than correctional "institutions".

Page 1, line 24, after "for" and before "support," inserts "financial." This change eliminates some ambiguity as to the precise definition of "support" by limiting the term to include financial support only.

Page 1, line 26, after "for," inserts "financial." This change, as in the previous amendment, eliminates some ambiguity as to the precise definition of "support" by limiting the term to include financial support only.

Page 2, line 17, inserts new Section 4, amending AS 47.10.120 (a), the principle effect of which is contained

in the new line 18. The amendment on new line 18 adds a proviso to the law, "Except as provided in as 47.10.084 (c)." This change eliminates an ambiguity in the law caused by the bill, whereby parents or guardians were held liable for financial support of a delinquent minor in situations which may be made exempt by the passage of this bill. The other changes to this section of the law are merely technical in nature: substituting "that" for "which" on lines 21, and 22; and in two places on line 25.

/wtl

631

Sec. 47.10.080. Judgments and orders. (a) The court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent or a child in need of aid.

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Social Services for a period of time not to exceed two years or in any event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing (A) two-year extensions of commitment which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and (B) an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it; the department shall place the minor in a juvenile facility which the department considers appropriate and which may include a juvenile correctional school, detention home, or detention facility; the minor may be released from placement or detention and placed on pronation on order of the court and may also be released by the department, in its discretion, under AS 47.10.200;

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for a period of time, not to exceed two years and in no event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing

(A) two-year extensions of supervision which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and

(B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it;

(3) order the minor committed to the department and placed on probation, to be supervised by the department, and release him to his parents, guardian, other suitable person, or suitable nondetention setting such as a family home, group care facility, or child care facility, whichever the department considers appropriate to implement the treatment plan of the predisposition report; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the department may transfer the minor, in his best interests, from one of the probationary placement settings listed in this paragraph to another, and the minor, his parents or guardian and attorney are entitled to reasonable notice of the transfer; the probation may be for a period of time, not to exceed two years and in no event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing

(5) order the minor committed to the Department of Health and Social Services for placement in an adventure-based education program established under AS 47.21.020 with conditions the court considers appropriate concerning release upon satisfactory completion of the program or commitment under (1) of this subsection if the program is not satisfactorily completed.

(c) If the court finds that the minor is a child in need of aid, it shall

(1) order the minor committed to the department for placement in an appropriate setting for a period of time not to exceed two years or in any event past the date the minor becomes 19 years of age, except that the department may petition for and the court may grant in a hearing (A) two-year extensions of commitment which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and (B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it; the department may transfer the minor, in his best interests, from one placement setting to another, and the minor, his parents or guardian and attorney are entitled to reasonable notice of the transfer;

(2) order the minor released to his parents, guardian, or some other suitable person, and, in appropriate cases, order the parents, guardian, or other person to provide medical or other care and treatment; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor, but the court may dispense with the department's supervision if the court finds that the adult to whom the minor is released will adequately care for the minor without supervision; the department's supervision may not exceed two years or in any event extend past the date the minor reaches age 19, except that the department may petition for and the court may grant in a hearing

(A) two-year extensions of supervision which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and

(B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it; or

(3) by order, upon a showing in the adjudication by clear and convincing evidence that there is a child in need of aid under AS [illegible] disposition by clear and convincing evidence that the parental conduct is likely to continue to exist if there is no termination of parental rights, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, and the department or guardian shall report annually to the court on efforts being made to find a permanent placement for the child.

(d) An order issued under (c) (3) of this section authorizes the commissioner of health and social services or his designee or the guardian of the person of the child to consent to the adoption of the child.

(e) If the court finds that the minor is not delinquent or a child in need of aid, it shall immediately order his release from the department's custody and his return to his parents, guardian, or custodian, and dismiss the case.

(f) A minor found to be delinquent or a child in need of aid is a ward of the state as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c)(1) or (2) of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision, as it is being provided, is in the best interest of the minor and the public. The department, the minor, the minor's parents, guardian, or custodian are entitled, when good cause is shown, to a review on application. If the application is granted, the court shall afford these parties and their counsel reasonable notice in advance of the review and hold a hearing where these parties and their counsel shall be afforded an opportunity to be heard. The minor shall be afforded the opportunity to be present at the review.

(g) No adjudication under this chapter upon the status of a child may operate to impose any of the civil disabilities ordinarily imposed by conviction upon a criminal charge, nor may a minor afterward be considered a criminal by the adjudication, nor may the adjudication be afterward deemed a conviction, nor may a minor be charged with or convicted of a crime in a court, except as provided in this chapter. The commitment and placement of a child and evidence given in the court are not admissible as evidence against the minor in a subsequent case or proceedings in any other court, nor does the commitment and placement or evidence operate to disqualify a minor in a future civil service examination or appointment in the state.

(h) The department shall pay all court costs incurred in all proceedings in connection with the adjudication of delinquency under this chapter, including hearings which result in the release of the minor.

(i) A minor, his parents or guardian acting on his behalf, or the department may appeal a judgment or order, or the stay, modification, setting aside, revocation, or enlargement of a judgment or order issued by the court under this chapter.

(j) Repealed by § 29 ch 63 SLA 1977.

(k) In making its order under (c) of this section, the court shall consider the fact, if it is a fact, that the minor was being provided treatment by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination. (§ 10(2) art I ch 145 SLA 1957; am § 2 ch 110 SLA 1960; am § 2 ch 118 SLA 1962; am § 1 ch 40 SLA 1967; am §§ 1—4 ch 27 SLA 1970; am §§ 12—15 ch 245 SLA 1970; am § 6 ch 104 SLA 1971; am §§ 6, 7 ch 1 SLA 1972; am §§ 1, 2 ch 125 SLA 1974; am §§ 14-18, 29 ch 63 SLA 1977; am § 6 ch 86 SLA 1979)

Effect of amendments. — The 1977 amendment substituted "delinquent or a child in need of aid" for "delinquent, or a child in need of supervision, or dependent minor" at the end of subsection (a), rewrote subsections (b) and (c), and in subsection (e), substituted "delinquent or a child in need of aid" for "delinquent, a child in need of supervision, or dependent," "the department's custody" for "its custody," and "dismiss" for "close." In subsection (f), the amendment substituted "delinquent or a child in need of aid" for "delinquent, a child in need of supervision, or dependent" in the first sentence, deleted "or (j)" following "under (b) or (c)(1) or (2)" and "and to determine if the minor is being treated fairly" following "and the public" in the second sentence, inserted "as it is being provided" in the second sentence, rewrote the third sentence, and inserted the present fourth sentence. The amendment also repealed subsection (j), which provided for orders of disposition when the minor was a child in need of supervision.

The 1979 amendment added paragraph (5) to subsection (b).

Editor's note. — Section 31, ch. 63, SLA 1977, provides: "Section 18 of this Act has the effect of adding to the court's responsibilities when holding a review under Rule 28, Alaska Rules of Children's Procedure, by requiring the court to hold a hearing upon a showing of good cause, give notice, and afford an opportunity to be heard."

Section 34, ch. 63, SLA 1977, in the first sentence provides: "The portions of AS 47.10.080(b) and (c) in secs. 15 and 16 of this Act which specify the length of commitment to the department or probation or supervision by the department are applicable to those minors affected under former AS 47.10.080(b), (c) and (j) before the effective date of the Act probation or supervision of minors by the department before the effective date of this Act (August 26, 1977) shall continue, but may not exceed two years from the effective date of this Act (August 26, 1977) unless two-year extensions have been granted by the court under this Act." Subsection (j) of AS 47.10.080 was repealed by § 29, ch. 63, SLA 1977.

Legislative history reports. — For report on amending bill, see 1960 House Journal, p. 494. For report on ch. 40, SLA 1967 (HB 131), see 1967 House Journal, p. 339. Chapter 245, SLA 1970 (HCSSB 399 am H), was identical to CSHB 406 (Jud.). For report on CSHB 406 (Jud.), see 1970 House Journal Supplement No. 6.

Each category of children mandates differences regarding content of dispositional orders. — Alaska's pertinent statutory provisions and procedural rules distinguish between categories of children for purposes of administering Alaska children's laws. Of controlling significance is that each class or category mandates distinct differences regarding the permissible content of any dispositional order the trial court can enter. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Where a delinquent child was sentenced for a fixed time period and ordered to an adult institution, this amounted to a penal sentence as opposed to the juvenile disposition required under subsection (b)(1). R.A.M. v. State, Sup. Ct. Op. No. 1104 (File No. 2144), 528 P.2d 437 (1974).

Court cannot place child in particular institution. — Under this section as amended, the court no longer has discretion to order the delinquent child placed in a particular institution. The court only has authority to commit the child to the department, which then places the child. R.A.M. v. State, Sup. Ct. Op. No. 1104 (File

Supp. Ct. Op. No. 1181 (File No. 2406), 538 P.2d 1004 (1975).

Jurisdiction dependent upon age of offender at time of act. — Juvenile jurisdiction of the superior court in delinquency proceedings is dependent upon the age of the offender at the time of the delinquent acts. Henson v. State, Sup. Ct. Op. No. 1590 (File No. 3024), 576 P.2d 1352 (1978).

Where a delinquent child was under the age of 18 at the time the acts of delinquency were committed, he is considered a minor for the purposes of adjudication and disposition. R.A.M. v. State, Sup. Ct. Op. No. 1104 (File No. 2144), 528 P.2d 437 (1974).

One who committed a crime when 18 years of age could be criminally prosecuted, as an adult, when he had been previously adjudged a delinquent minor and the court had retained supervisory jurisdiction over him until age 19. Henson v. State, Sup. Ct. Op. No. 1590 (File No. 3024), 576 P.2d 1352 (1978).

Section is maximum sentencing statute. — Statutes requiring release upon a specified birthday are, in effect, maximum sentencing statutes. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

Sentence reduction to 19 years of age not retroactive. — There was nothing in the amendatory legislation to this section that indicated an intention that the sentence reduction should operate retrospectively. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

There is no conflict between subsection (b)(1) and AS 47.10.060(d). In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

Age 20 is the proper age for determining whether a minor is amenable to treatment. In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

The inconsistency between AS 47.10.060(d) and subsection (b)(1) of this section that existed prior to the 1977 amendments to these sections has been eliminated in that AS 47.10.060 (d) now provides that the determinative age is 20 and subsection (b)(1) provides that the maximum limitation of confinement of minors is 20. In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

The lower court erred in considering the purported consent of a minor to an additional year of supervision because: (1) the minor could withdraw his consent upon reaching maturity and (2) even assuming the minor's consent could not be withdrawn, subsection (b)(1) requires that the department petition the court and that additional commitment be in the minor's best interests before the court has jurisdiction to order the additional one-year period. In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

Subsection (b)(1) requires that the department petition for an additional one-year period of supervision and that continued supervision be in the best interests of the minor before the court may order an additional year. Thus, a minor's prospective consent to additional supervision is not a material factor unless the other two conditions of the statute are fulfilled. In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

This statute contemplates that the decision to extend the period of supervision be made after the initial dispositional hearing. To give effect to the minor's advance consent would thus be contrary to the apparent intent of the legislature. In re F.S., Sup. Ct. Op. No. 1756 (File No. 1015), 586 P.2d 607 (1978).

The court must choose between commitment to the Department of Health and Social Services and probation, and may not delegate the choice to the Department of Health and Social Services. This is a correct textual analysis, especially in light of the provision in subsection (b)(1) for subsequent court order for probation following placement or detention. The legislature has clearly indicated its intent to place this choice in the hands of the court. R.L.R. v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

The hearing judge erred by placing a delinquent child on probation until his 20th birthday. R.A.M. v. State, Sup. Ct. Op. No. 1104 (File No. 2144), 528 P.2d 437 (1974).

Petition necessary to extend probation beyond 19th birthday. — The superior court was without authority to extend probation beyond the delinquent child's 19th birthday without a petition from the department to extend the probationary period for an additional year. R.A.M. v. State, Sup. Ct. Op. No. 1104 (File No. 2144), 528 P.2d 437 (1974).

A minor who has been adjudged a child in need of supervision [see now child in need of aid] cannot be institutionalized under the Children's Code. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Where a runaway child is found to be a child in need of supervision [see now child

in need of aid], not a delinquent minor, no legal basis exists for his incarceration. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The only instance under Alaska children's laws authorizing institutionalization or incarceration is when the child has violated the laws of the state, or any of its political subdivisions, and in turn has been adjudged a delinquent minor. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The legislature has authorized institutionalization only where the child is found to be a delinquent minor. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Power of court under subsection (c). — Under subsection (c) of this section, the court is empowered to order the minor committed to the Department of Health and Social Services or order the minor released to his parents, guardian, or some other suitable person. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The Department of Health and Social Services does not possess the authority to institutionalize any minor, including one who has been declared a child in need of supervision [see now child in need of aid], who has been committed to its custody. It is unreasonable to construe Alaska children's statutes in a manner which would result in the grant to the Department of Health and Social Services of broader powers of commitment than possessed by the trial court. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

A child "in need of aid" appears to be the functional equivalent of a "dependent" child under AS 47.10.010 as it existed prior to its 1977 amendment. In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Parental right to custody and control is not absolute. — While a parent has a right to the care, custody and control of his or her children, this right is not absolute, and "courts have become increasingly aware of the rights of children." The Alaska legislature has struck a balance between these potentially competing rights by requiring the state to prove its allegations by clear and convincing evidence in parental rights termination cases. Once this burden of proof has been met, however, the statute mandates a termination. In re D.C., Sup. Ct. Op. No. 1862 (File No. 3840), P.2d (1979).

The discretion allotted a parent in the administration of punishment is not unlimited. Clearly it does not extend to punishment regularly causing the "substantial physical harm" which under AS 47.10.010(a)(2)(C) determines that a child is in need of aid. In re D.C., Sup. Ct. Op. No. 1862 (File No. 3840), P.2d (1979).

Statutory provisions governing judgments and orders terminating parental rights have been changed. In order to terminate parental rights, the court must now find that the child is in need of aid under AS 47.10.010(a)(2) as the result of parental conduct proved by clear and convincing evidence and that the parental conduct is likely to continue to exist if there is no termination of parental rights, proved again by clear and convincing evidence. AS 47.10.080(c)(3). In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Under former AS 47.10.010(a)(5) and AS 47.10.080(a) and (c)(3)(D), in order to terminate parental rights, the superior court was required to find (1) that the child was a "dependent minor" and (2) that the parent had demonstrated by her conduct, proved by clear and convincing proof, that she was unfit to continue to exercise her parental rights and responsibilities. In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Abandonment. — For cases construing former language in subsection (c) providing for termination of parental rights and responsibilities when the child had been abandoned, see D.M. v. State, Sup. Ct. Op. No. 962 (File No. 1843), 515 P.2d 1234 (1973); In re B.J., Sup. Ct. Op. No. 1110 (File No. 2161), 530 P.2d 747 (1975); In re E.J. (T.), Sup. Ct. Op. No. 1348 (File No. 2775), 557 P.2d 1128 (1976).

A rehabilitation program is not a common practice in the trial courts absent approval by a representative of the state. In re E.J. (T.), Sup. Ct. Op. No. 1348 (File No. 2775), 557 P.2d 1128 (1976).

Trial court did not abuse discretion in failing to consider possibility of setting up plan for reestablishing family relationship between father and son. — See In re E.J. (T.), Sup. Ct. Op. No. 1348 (File No. 2775), 557 P.2d 1128 (1976).

Role of trial court in proceeding involving termination of parental rights. — See In re E.J. (T.), Sup. Ct. Op. No. 1348 (File No. 2775), 557 P.2d 1128 (1976).

Applicability of burden of proof. — A burden of proof is not applicable to a dispositive hearing other than when termination of parental rights is involved. In re S.D., Sup. Ct. Op. No. 1255 (File No. 2530), 549 P.2d 1190 (1976). See also In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Determination of the standard to be applied by the court at the dispositive phase of a child hearing was not tantamount to establishing a burden of proof requirement. Such a requirement had been set forth in former subsection (c)(3)(D) [see now subsection (c)(3)]. No such requirement had been set forth in situations such as where termination of parental rights was not involved. In re S.D., Sup. Ct. Op. No. 1255 (File No. 2530), 549 P.2d 1190 (1976).

Standard of proof held constitutional. — Allowing parental rights to be terminated based on a standard of proof less stringent than "beyond a reasonable doubt" does not violate the due process clause of the United States Constitution or the Alaska Constitution. In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Since in proceedings brought to terminate parental rights, the parent is neither charged with criminal behavior nor subject to incarceration as a direct consequence of the proceeding, there is nothing in the federal constitution that compels adoption of the proof beyond a reasonable doubt standard in termination proceedings. In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Clear and convincing proof is a more demanding standard than a mere preponderance of the evidence and is adequate to protect the parent's substantial interest in his or her child custody rights. This evidentiary standard balances the competing interests involved in a proceeding brought to terminate parental rights, one of which is the right of a child to an adequate home. In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

The due process clause did not require a standard of proof greater than clear and convincing evidence when the state sought to terminate parental rights because of unfitness under former subsection (c)(3)(D). In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

Standard of proof under former subsection (c)(3)(D) calling for "clear and convincing" evidence of the natural mother's unfitness for the care and custody of the child was held proper. In re Adoption of K.S., Sup. Ct. Op. No. 1219 (File No. 2359), 543 P.2d 1191 (1975).

Orders terminating parental rights met statutory and rule of court requirements regarding findings of fact. See In re C.L.T., Sup. Ct. Op. No. 1866 (File No. 3607), P.2d (1979).

For reference to apparent conflict between subsection (c)(1) as it read prior to 1977 amendment and Children's Rule 22(f), see footnote 30 in In re S.D., Sup. Ct. Op. No. 1255 (File No. 2530), 549 P.2d 1190 (1976).

Peremptory challenge procedure inapplicable to juvenile proceedings. — While juvenile proceedings have some of the characteristics of both civil and criminal actions, they are basically different from both, and the words "civil or criminal" as used in AS 22.20.022 must be strictly construed. The trial judge was correct in holding that peremptory challenge procedure applied only to civil and criminal actions and not to juvenile proceedings. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Notions of benevolent protective policies cannot be used to validate departures from positive law relating to the adjudicative and dispositive phases of children's proceedings. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Nor to justify dispensing with constitutional safeguards. — The benevolent social theory supposedly underlying children's court acts does not furnish justification for dispensing with constitutional safeguards. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The right of confrontation is paramount to the state's policy of protecting a juvenile offender. Davis v. State, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

But state's interest in secrecy of juvenile adjudications need not always fall before confrontation right. — See Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Prosecution witness impeachable by cross-examination for bias from probationary status as juvenile delinquent. — The confrontation clause requires that a defendant in a criminal case be allowed to impeach the credibility of a prosecution witness by cross-examination directed at possible bias deriving from the witness's probationary status as juvenile delinquent although such an impeachment would conflict with a state's asserted interest in preserving the confidentiality of juvenile adjudications of delinquency. Davis v. Alaska, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

Whatever temporary embarrassment might result to a prosecution witness or his family by disclosure of his juvenile record — if the prosecution insisted on using him to make its case — is outweighed by petitioner's right to probe into the influence of possible bias on the testimony of a crucial identification witness. Davis v. Alaska, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

The state cannot, consistent with right of confrontation, require the defendant to bear the full burden of vindicating the state's interest in the secrecy of juvenile criminal records. Davis v. Alaska, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

The United States supreme court has held that the constitutional right of confrontation required that defense counsel be allowed to investigate the potential bias of a crucial prosecution witness, even where that potential bias arose out of a juvenile adjudication and its resultant probationary status. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

The United States supreme court concluded that Alaska's interest in protecting the anonymity of the juvenile offender was outweighed by the more critical need to afford a criminal defendant reasonable inquiry into the motives of prosecution witnesses. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

Conflict between section and decision in Davis v. Alaska is superficial. — The conflict between this section and the supreme court's decision in Davis v. Alaska, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974), is only superficial. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

Since disclosure required because of probationary status, not juvenile adjudication. — The constitutional requirement of disclosure in the facts in Davis v. Alaska, 415 U.S. 308, 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974), is created not by the juvenile adjudication itself but by the probationary status of the juvenile at the time of Davis' trial, with its potential for motivating false testimony. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

Where the witness was not on juvenile probation, it cannot be seriously argued that the fact of previous juvenile convictions, standing alone, provided any inference of potential bias. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

State adjudications directed solely at credibility do not conflict with confrontation right. — Juvenile adjudications which are state by Alaska's standards and directed solely at general credibility rather than bias are generally not sufficiently probative to create a genuine conflict with the defendant's right of confrontation. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

Where the attempted impeachment was of general credibility by proof of prior "convictions," the probative value of this type of evidence is considerably less than that which suggests false or distorted testimony because of bias, and the need to confront a witness with such evidence is correspondingly less. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

As a general rule, the trial courts could properly refuse evidence of state convictions or juvenile adjudications where these were offered for the purpose of discrediting the witness generally rather than to show some specific potential for bias or prejudice toward the defendant. Thomas v. State, Sup. Ct. Op. No. 1040 (File Nos. 1888, 1854), 552 P.2d 528 (1974).

Privilege against self-incrimination. — When a person under the age of 18 years violated former AS 47.10.010(a)(1), he could be adjudged a "delinquent minor," one possible consequence of which adjudication was commitment to a juvenile facility until the age of 19 [now 20]. Moreover, if there was probable cause to believe the minor was delinquent and the court found that he was not amenable to treatment as a juvenile, he could be prosecuted as if he were an adult. Thus, there was always some danger of incarceration, or other criminal sanctions, when a child committed an act which would have been a crime if committed by an adult. Under such circumstances a child had a privilege against self-incrimination. E.L.L. v. State, Sup. Ct. Op. No. 1540 (File No. 3374), 572 P.2d 787 (1977).

A child adjudicated delinquent for selling LSD may be incarcerated, possibly even in a city jail, until age 19, which may be many years. R.L.R. v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Subsection (g) provides in part that a juvenile offender may not be considered a criminal by reason of the adjudication, nor may the adjudication be afterward deemed a conviction. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512, cert. denied, 419 U.S. 868, 95 S. Ct. 125, 42 L. Ed. 2d 106 (1974).

A judge cannot consider a juvenile offense as a criminal conviction for the purpose of prescribing a mandatory sentence. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

The judge's consideration of factors relating to accused's life, characteristics, background and behavior prior to reaching the age of 18 years did not mean that he considered accused a criminal or that he was using the juvenile offenses as criminal convictions in determining the sentence to impose. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

Consideration of the juvenile record is proper by the court imposing a sentence upon an adult offender. Penn v. State, Sup. Ct. Op. No. 1774 (File No. 3873), 588 P.2d 288 (1978).

Use of the juvenile history of the offender in sentencing proceedings does not amount to the use of those proceedings as evidence against the offender within the proscription of such a statute as this section. Penn v. State, Sup. Ct. Op. No. 1774 (File No. 3873), 588 P.2d 288 (1978).

When sentence determined. — The sentence which may be imposed upon a convicted adult is determined as of the time of the final judgment of conviction, or as of the time of commission of the offense. These rules have been applied to juvenile sentencing. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

Review of custody orders. — The new children's law, as a result of the 1977 acts, provides for review of custody orders annually or more often if good cause is shown. In re J.M., Sup. Ct. Op. No. 1548 (File Nos. 3219, 3229), 573 P.2d 1376 (1978).

Appellate jurisdiction. — AS 22.05.010 places final appellate jurisdiction in all cases in the supreme court. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1521), 490 P.2d 655 (1971).

Applied in L.A.M. v. State, Sup. Ct. Op. No. 1249 (File No. 2221), 537 P.2d 827 (1976); Adams v. Ross, Sup. Ct. Op. No. 1281 (File No. 2458), 551 P.2d 948 (1976); D.H. v. State, Sup. Ct. Op. No. 1396 (File No. 2837), 561 P.2d 294 (1977).

Quoted in Davis v. State, Sup. Ct. Op. No. 816 (File Nos. 1428, 1436), 499 P.2d 1025 (1972).

Stated in In re G.K., Sup. Ct. Op. No. 796 (File Nos. 1627, 1651, 1674), 497 P.2d 914 (1972).

Cited in Ellinson v. State, Sup. Ct. Op. No. 898 (File No. 1750), 511 P.2d 1066 (1973).

Sec. 47.10.081. Predisposition hearing reports. (a) Before the disposition hearing of a delinquent minor the department shall submit a predisposition report with a recommended plan of treatment to aid the court in its selection of a disposition, and any further information which the court may request.

(b) Before the disposition hearing of a child in need of aid the department shall submit a predisposition report to aid the court in its selection of a disposition. This report shall include, but is not limited to, the following:

(1) a statement of changes in the child's or parent's behavior, which will aid the court in determining that supervision of the family or placement is no longer necessary;

(2) if removal from the home is recommended, a description of the reasons the child cannot be protected or rehabilitated adequately in the home, including a description of any previous efforts to work with the parents and the child in the home and the parents' attitude toward placement of the child;

(3) a description of the potential harm to the child which may result from removal from the home and any efforts which can be made to

(4) any further information which the court may request.

(c) The court shall inform the child, his parents and the attorneys representing the parties and the guardian ad litem that the predisposition report will be available to them not less than 10 days before the disposition hearing.

(d) For purposes of this section "parents" means the natural or adoptive parents, and any legal guardian, relative, or other adult person with whom the minor has resided and who has acted as a parent in providing for the minor for a continuous period of time before this action. (§ 26 ch 63 SLA 1977)

Sec. 47.10.082. Best interests of the child. In making its dispositional order under AS 47.10.080(b) the court shall consider the best interests of the child and the public, and in making its dispositional order under AS 47.10.080(c) the court shall consider the best interests of the child; in either case the court shall consider also the ability of the state to take custody and to care for the child to protect his best interests under AS 47.10.010 — 47.10.142. (§ 26 ch 63 SLA 1977)

Sec. 47.10.083. Review hearing information. In the case of a child in need of aid, the child shall be returned home at the review hearing under AS 47.10.080(f) unless the court finds by a preponderance of the evidence that the basis upon which the child was adjudicated under AS 47.10.010(a)(2) continues to exist. If the child is not returned home, the court shall establish on the record:

(1) why the child was removed from the home;

(2) what services have been provided to or offered to the parents to facilitate reunion;

(3) what services were utilized by the parents to facilitate reunion;

(4) the visitation history between the parents and the child;

(5) whether additional services are needed to facilitate the return of the child to his parents;

(6) when return of the child can be expected. (§ 26 ch 63 SLA 1977)

Sec. 47.10.084. Legal custody, guardianship, and residual parental rights and responsibilities. (a) When a child is committed under AS 47.10.080(b)(1) or (c)(1) to the department or released under AS 47.10.080(b)(2) or (3) or (c)(2) to his parents, guardian, or other suitable person, a relationship of legal custody exists. This relationship imposes on the department and its authorized agents or the parents, guardian, or other suitable person the responsibility of physical care and control of the child, the determination of where and with whom the child shall live, the right and duty to protect, train and discipline the child, and the duty of providing the child with food, shelter, education, and medical care. These obligations are subject to any residual parental rights and responsibilities and rights and responsibilities of a guardian if one has been appointed. When parental rights have been terminated or there are no living parents and no guardian has been appointed, the

responsibilities of legal custody include those in (b) and (c) of this section. The department or person having legal custody of the child may delegate any of the responsibilities under this section, except authority to consent to marriage, adoption, and military enlistment may not be delegated. For purposes of this chapter a person in charge of a placement setting is an agent of the department.

(b) When a guardian is appointed for the child, the court shall specify in its order the rights and responsibilities of the guardian. The guardian shall be removed only by court order. The rights and responsibilities may include, but are not limited to, having the right and responsibility of reasonable visitation, consenting to marriage, consenting to military enlistment, consenting to major medical treatment, obtaining representation for the child in legal actions, and making decisions of legal or financial significance concerning the child.

(c) When there has been transfer of legal custody or appointment of a guardian and parental rights have not been terminated by court decree, the parents shall have residual rights and responsibilities. These residual rights and responsibilities of the parent include, but are not limited to, the right and responsibility of reasonable visitation, consent to adoption, consent to marriage, consent to military enlistment, consent to major medical treatment except in cases of emergency or cases falling under AS 09.65.100, and the responsibility for support, except if by court order any residual right and responsibility has been delegated to a guardian under (b) of this section. (§ 26 ch 63 SLA 1977)

Sec. 47.10.085. Child in need of aid; religious treatment. In a case in which the minor's status as a child in need of aid is sought to be based on his need for medical care, the court may, upon consideration of the health of the minor and the fact, if it is a fact, that the minor is being provided treatment by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination, dismiss the proceedings and thereby close the matter. This may be done, in the interests of justice and religious freedom, on the court's own motion or upon the application of a party to the proceedings, at any stage of the proceedings after information is given to the court under AS 47.10.020(a). (§ 8 ch 1 SLA 1972; am § 19 ch 63 SLA 1977)

Effect of amendment. — The 1977 amendment substituted "child in need of aid" for "dependent minor" near the beginning of the first sentence.

Sec. 47.10.090. Records. (a) The court shall make and keep records of all cases brought before it. The court's official records may be inspected only with the court's permission and only by persons having a legitimate interest in them. All information and social records pertaining to a minor and prepared in the discharge of his official duty by an employee of the

court or by a federal, state or city agency are privileged and may not be disclosed directly or indirectly to anyone without the court's permission. However, a state or city law-enforcement agency shall disclose information regarding a case which is needed by the person or agency charged with making a preliminary investigation for the information of the court. Within 30 days of the date on which a minor reaches his 18th birthday or, if the court retains jurisdiction of a minor past his 18th birthday, within 30 days of the date on which the court relinquishes jurisdiction over the minor, the court shall order sealed all the court's official records, information and social records pertaining to that minor, as well as records of all criminal proceedings against him and punishments assessed against him, except for traffic offenses. No person may use records so sealed for any purpose except that the court may order their use for good cause shown or may order their use by an officer of the court in making a presentencing report for the court.

(b) The name or picture of a minor under the jurisdiction of the court may not be made public in connection with the minor's status as a delinquent child or a child in need of aid unless authorized by order of the court, except that the name of a minor who is found for the second time to have violated a law, which if committed by an adult would be a felony, shall be made public unless the court, for good cause, in certain individual cases, enters an order prohibiting the disclosure.

(c) A person who violates a provision of this section is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $500 or by imprisonment for not more than one year, or by both. (§ 10(3)(4) art I ch 145 SLA 1957; am § 1 ch 124 SLA 1972; am § 1 ch 90 SLA 1975; am § 20 ch 63 SLA 1977)

Effect of amendments. — The 1975 amendment, in subsection (b), deleted "by a newspaper, radio, or television station" following "may not be made public," substituted "unless" for "except as," and added the language beginning "except that" to the end.

The 1977 amendment substituted "delinquent child or a child in need of aid" for "delinquent or dependent child" in subsection (b).

Editor's note. — Section 2, ch. 90, SLA 1975, provides: "Section 1 of this Act changes Rule 26 of the Supreme Court Rules of Children's Procedure in that the rule now provides that the names and pictures of minors under the jurisdiction of the children's court are not to be made available to the public unless authorized by a court order which is accompanied by a written statement supporting the authorization, and sec. 1 provides that for a minor who is found for the second time to have violated a law which if committed by an adult would be a felony, the minor's name must be made public unless the court, for good cause, in certain individual cases, enters an order prohibiting the disclosure."

Purpose for enacting subsection (a). — Reading this section together with other sections of the laws relating to children's proceedings leads one to believe that subsection (a) was enacted principally for the purpose of protecting the child against the possible adverse effects an unauthorized revelation of his social record would have. In re P.N., Sup. Ct. Op. No. 1127 (File No. 2191), 533 P.2d 13 (1975).

There is no indication that subsection (a) was intended to authorize the granting of testimonial use immunity to parents. In re P.N., Sup. Ct. Op. No. 1127 (File No. 2191), 533 P.2d 13 (1975).

The supreme court could not say with certainty that this section would be construed to forbid the use, in a subsequent criminal action against a parent, of testimony that the parent gave at a children's proceeding. In re P.N., Sup. Ct. Op. No. 1127 (File No. 2191), 533 P.2d 13 (1975).

Waiver of provisions of section. — In the case of use of restraints more severe than placement in adjustment rooms (solitary confinement), the approval of the director of McLaughlin Youth Center must be obtained and a report made to the child's attorney and the family court. The provisions of this section are waived for this purpose. T.M. v. Director of McLaughlin Youth Center, Superior Court, No. 72-149 (1973).

Stated in B.L.R. v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Sec. 47.10.095. Arrest of a minor. The arrest of a minor other than for a traffic offense is not considered an arrest for any purpose except for the purpose of the disposition of a proceeding arising out of that arrest. (§ 2 ch 124 SLA 1972)

Sec. 47.10.100. Retention of jurisdiction over minor. (a) The court retains jurisdiction over the case and may at any time stay execution, modify, set aside, revoke, or enlarge a judgment or order, or grant a new hearing, in the exercise of its power of protection over the minor and for his best interest, for a period of time not to exceed two years or in any event extend past the day the minor becomes 19, unless sooner discharged by the court, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it. An application for any of these purposes may be made by the parent, guardian, or custodian acting in behalf of the minor, or the court may, on its own motion, and after reasonable notice to interested parties and the appropriate department, take action which it considers appropriate.

(b) If the court determines at a rehearing that it is for the best interests of the minor that he be released to the care or custody of his parent, guardian, or custodian, it may enter an order to that effect and the minor is discharged from the control of the department.

(c) If a minor is adjudicated a delinquent or a child in need of aid before his 18th birthday, the court may retain jurisdiction over him after his 18th birthday for the purpose of supervising his rehabilitation, but the court's jurisdiction over him under this chapter never extends beyond his 19th birthday, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it. The department may retain jurisdiction over a child between his 18th and 19th birthdays for the purpose of supervising his rehabilitation, if he has been placed under the supervision of the department before his 18th birthday, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it. (§ 11 art I ch 145 SLA 1957; am §§ 16, 17 ch 245 SLA 1970; am § 21 ch 63 SLA 1977)

Effect of amendment. — The 1977 amendment, in subsection (a), substituted the language beginning "for a period of time not to exceed two years" for "until he becomes nineteen years of age, unless sooner discharged by the court, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment" at the end of the first sentence, and in subsection (c), substituted "delinquent or a child in need of aid" for "delinquent, a child in need of supervision, or a dependent" in the first sentence, the language beginning "apply for and the court may grant" for "petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment" in the first and second sentences, and "has been placed under the supervision" for "is committed to the custody" in the second sentence.

Legislative history report. — Chapter 245, SLA 1970 (HCSSB 399 am H), was identical to CSHB 406 (Jud.). For report on CSHB 406 (Jud.), see 1970 House Journal Supplement No. 6.

When one commits a criminal offense after reaching the age of 18 years, he is no longer entitled to claim the benefits of the Children's Code. Henson v. State, Sup. Ct. Op. No. 1590 (File No. 3024), 576 P.2d 1352 (1978).

Offenses to which court's jurisdiction not extended. — Neither subsection (a) nor subsection (c) purports to extend the court's juvenile jurisdiction to newly committed offenses occurring between the offender's 18th and 19th birthdays. Henson v. State, Sup. Ct. Op. No. 1590 (File No. 3024), 576 P.2d 1352 (1978).

Jurisdiction defeated only by expressly retroactive statute. — Once the sentencing court acquires jurisdiction over the individual, only an expressly retroactive statute could defeat its continuing jurisdiction for the duration of the sentence originally imposed. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

Sec. 47.10.110. Appointment of guardian or custodian. When, in the course of a proceeding under this chapter, it appears to the court that the welfare of a minor will be promoted by the appointment of a guardian or custodian of his person, the court may make the appointment. The court shall have a summons issued and served upon the parents of the minor, if they can be found, in a manner and within a time before the hearing which the court considers reasonable. The court may determine whether the father, mother, or the Department of Health and Social Services shall have the custody and control of the minor. If the minor is of sufficient age and intelligence to state his desires, the court shall consider his desires. (§ 12 art I ch 145 SLA 1957; am § 6 ch 104 SLA 1971; am § 22 ch 63 SLA 1977)

Effect of amendment. — The 1977 amendment rewrote the last sentence.

Sec. 47.10.120. Support of minor. (a) When a child in need of aid is committed under this chapter, the court may, after giving the parent a reasonable opportunity to be heard, adjudge that the parent shall pay in a manner which the court directs a sum which will cover in full or in part the support of the child in need of aid. When a delinquent minor is committed under this chapter, the court shall order that the parent of the minor pay in a manner which the court directs a sum which will cover in full or in part the support of the delinquent minor.

(b) If a parent wilfully fails or refuses to pay the sum fixed, he may be proceeded against as provided by law in cases of family desertion and

(c) The sum collected from a parent under this section shall be directly credited to the general fund of the state. (§ 13 art I ch 145 SLA 1957; am § 1 ch 31 SLA 1959; am § 1 ch 141 SLA 1959; am § 23 ch 63 SLA 1977)

Effect of amendment. — The 1977 amendment substituted "child in need of aid" for "dependent minor" in two places in the first sentence of subsection (a).

Sec. 47.10.130. Detention. No minor under 18 years of age who is detained pending hearing may be incarcerated in a jail unless assigned to separate quarters so that the minor cannot communicate with or view adult prisoners convicted of, under arrest for, or charged with a crime. When a minor is detained pending hearing, his parent, guardian, or custodian shall be notified immediately. (§ 14 art I ch 145 SLA 1957)

A detention which was twice continued by the master of the children's court for a total period of six days exemplifies a usurpation of judicial power. In re P.H., Sup. Ct. Op. No. 857 (File No. 1538), 501 P.2d 837 (1972).

Sec. 47.10.140. Temporary detention and detention hearing. (a) A peace officer may arrest a minor who violates a law or ordinance in his presence, or who he reasonably believes is a fugitive from justice. A peace officer may continue a lawful arrest made by a citizen. He may have the minor detained in a juvenile detention facility if in his opinion it is necessary to do so to protect the minor or the community.

(b) A peace officer who has a minor detained under (a) of this section shall immediately, and in no event more than 12 hours later, notify the court, the minor's parents or guardian, and the Department of Health and Social Services of the officer's action. The department may file with the court a petition alleging delinquency before the detention hearing.

(c) The court shall immediately, and in no event more than 48 hours later, hold a hearing at which the minor and his parents or guardian if they can be found shall be present. The court shall determine whether probable cause exists for believing the minor to be delinquent. The court shall inform the minor of the reasons alleged to constitute probable cause and the reasons alleged to authorize his detention. The minor is entitled to counsel and to confrontation of the witnesses against him.

(d) If the court finds that probable cause exists, it shall determine whether the minor should be detained pending the hearing on the petition or released. It may either order the minor held in detention or order him to be released to the custody of a suitable person pending the hearing on the petition. If the court finds no probable cause, it shall order the minor released and close the case.

(e) Except for temporary detention pending a detention hearing or temporary detention under (f) of this section, no minor may be detained

(f) A peace officer may detain a minor who is evading the person having legal custody of him if the minor is not otherwise subject to arrest or detention under (a) of this section, for the sole purpose of either (1) returning the minor to the person having legal custody of him or (2) if the minor prefers, taking him to an office specified by the Department of Health and Social Services, facility or contract agency of the Department of Health and Social Services where such exists in the community. Immediately upon detaining a minor under this provision, the peace officer shall advise him of his right to social services under AS 47.10.142(b), and, if known, the peace officer shall advise the person having the legal custody of the minor of his detention.

(g) No minor who is detained under (f) of this section may be detained in a jail or other facility unless kept out of contact with adult persons convicted or accused of a crime. No minor may be detained in a jail or other detention facility which has not been approved by the Department of Health and Social Services before detention of the minor. (§ 15 art I ch 143 SLA 1957; am § 3 ch 118 SLA 1962; am § 2 ch 100 SLA 1971; am § 6 ch 104 SLA 1971; am §§ 1, 2 ch 128 SLA 1972)

Detention orders neither based on competent testimony nor accompanied by the required statement of facts are invalid. In re P.H., Sup. Ct. Op. No. 857 (File No. 1538), 504 P.2d 837 (1972)

Sec. 47.10.142. Emergency custody and temporary placement hearing. (a) The Department of Health and Social Services may take emergency custody of a minor upon discovering any of the following circumstances:

(1) the minor has been abandoned;

(2) the minor has been grossly neglected by his parents or guardian, as "neglect" is defined in AS 47.17.070(5), so that immediate removal from his surroundings is, in the determination of the department, necessary to protect his life;

(3) the minor has been abused, as "abuse" is defined in AS 47.17.070(1), so that immediate medical attention is necessary, in the determination of the department.

(b) A minor who has left home and is evading the person having legal custody of him may obtain the services of the department. The department shall assess the situation and furnish the minor with the social services it considers appropriate to protect the well-being of the minor and to preserve his family life if preserving it is considered desirable under the circumstances. If, after assessing the situation, considering the wishes of the minor, and furnishing appropriate social services, the department considers it necessary, the department may take emergency custody of the minor.

(c) When a child is taken into custody under (a) or (b) of this section, the department shall immediately, and in no event more than 12 hours later unless prevented by lack of communication facilities, notify the

THE RUNAWAY YOUTH PROGRAM MODEL

Outline of presentation by Mr. Robbie Callaway
Executive Director
National Youth Work Alliance

I. INTRODUCTION OF THE PROBLEM

II. QUIZ ON RUNAWAYS (attendees will need writing instruments)

- A. Severity of the Problem
- B. Federal Involvement
- C. State Response
- D. Local Program Activity
- E. Parental Involvement
- F. Program Specifics
- G. Prostitution Among Runaways
- H. Miscellaneous

III. FEEDBACK ON THE QUIZ

- A. Question by Question response
  1. Self-checking System
  2. Audience participation

IV. WRAP-UP

- A. What can the States do to better address the problem.

February, 1983

STATE LEGISLATIVE STRATEGIES: RUNAWAY AND HOMELESS YOUTH

I. Legislation Enacted

1. New York

In 1978, New York passed the "Runaway and Homeless Youth Act" clarifying the legal status of runaway youth and establishing both procedures and funds to expand services through the development of new programs.

- Runaways are children under 18 years of age
- Administration by State Division of Youth Services
- 30-day state limitation in emergency shelter; may extend to 60 days without court petition
- Models the federal Runaway and Homeless Youth Act
- Requires county plan and county match

II. Line-Item Appropriation

1. Florida

In 1982, the Florida legislature developed a special line-item appropriation for runaway youth programs to replace lost federal dollars.

2. Vermont

Since 1980, the Vermont legislature has supported runaway youth programs through line-item, general fund appropriations.

III. Related Legislation

1. Ohio

In 1982, Ohio passed HB440 creating a two-part, formula-based grant of state aid to counties. Grants may be used for a variety of services for "alledged or adjudicated unruly or delinquent children, or children at risk of becoming unruly or delinquent."

- Requires annual local plan developed by juvenile courts and county commissioners
- Administered by State Division of Youth

2. Louisiana

In 1980, the Louisiana legislature passed Act 452 authorizing start-up funds for new shelter care facilities. The Department of Health and Human Services establishes provider contracts of services also under this legislation.

- Recipients of services must be clients of Department of Health and Human Services

3. California

California's AB90 established the "County Justice System Subvention Programs" in 1978. The program's broad objectives encompass the development, maintenance, and expansion of a range of local, community-based justice programs, including services to juvenile and status offenders. The goal of the program is to decrease the number of state institutional commitments.

- Requires advisory group at state and local levels
- Inter-agency coordination

4. North Carolina

In 1980, the North Carolina legislature established the development of community-based alternatives to eliminate placement of status offenders in state institutions.

- Requires local-level evaluation prior to juvenile court hearing disposition
- Administered by Department of Human Resources
- Formula funding for counties on a matching basis

Related Legislation (continued)

5. Pennsylvania

In 1978, the Pennsylvania legislature established what is now known as Act 148. The basic intent of the Act is to deinstitutionalize children and youth by providing counties with financial incentive to develop and utilize community-based alternatives to institutionalization.

6. Wisconsin

In 1982, Wisconsin passed legislation that earmarks Title IVB (the federal Child Welfare program) funds for runaway youth programs. Funding replaces lost federal appropriations for YDB grantees and establishes funding for additional programs.

Wisconsin also employs what is known as 'Youth Aids'. 'Youth Aids' are capacity-building grants to counties to improve the quality and range of juvenile delinquency and related services.

IV. Other State Strategies

1. Texas

The Texas legislature supported an appropriations rider to the Texas Family Code, setting aside $4.4 million (biennium FY83/84) to the Department of Human Resources (DHR) to serve runaways and truants. Should the rider secure passage, it is likely the funds will be targeted for new and innovative programs.

Several states, through the Department of Social Services typically, contract out to community-based programs through purchase-of-service agreements for specialized services for runaway youth and their families. This is the most difficult strategy to track because state agencies may not identify such contracts specifically for the runaway youth population.

V. States Considering Runaway and Homeless Youth Legislation

Other states exploring the development of specific runaway and homeless youth legislation include:

1. Florida
2. California
3. New Jersey

We would also appreciate receiving information to update this report.

The Juvenile Justice and Delinquency Prevention Act of 1974

Public Law 93-415

The JJDP Act of 1974, as amended, encouraqes states, through the disbursement of federal funds, to achieve the mandates of the federal legislation. These include: deinstitutionalization of status offenders; sight and sound separation from adult criminals; the use of the 'least restrictive alternative' for juveniles; and the removal of juveniles from adult jail or lock-up. Title III of the Act, administered separately by the Youth Development Bureau within the Department of Health and Human Services, is the federal mechanism establishing community-based programs for runaways. The Act will require reauthorization in September, 1984.

TITLE III—RUNAWAY AND HOMELESS YOUTH

SHORT TITLE

SEC. 301. This title may be cited as the "Runaway and Homeless Youth Act". *(42 U.S.C. 5701 note)*

FINDINGS

SEC. 302. The Congress hereby finds that—

(1) the number of juveniles who leave and remain away from home without parental permission has increased to alarming proportions, creating a substantial law enforcement problem for the communities inundated, and significantly endangering the young people who are without resources and live on the street;

(2) the exact nature of the problem is not well defined because national statistics on the size and profile of the runaway youth population are not tabulated;

(3) many such young people, because of their age and situation, are urgently in need of temporary shelter and counseling services;

(4) the problem of locating, detaining, and returning runaway children should not be the responsibility of already

overburdened police departments and juvenile justice authorities; and

(5) in view of the interstate nature of the problem, it is the responsibility of the Federal Government to develop accurate reporting of the problem nationally and to develop an effective system of temporary care outside the law enforcement structure. (*42 U.S.C. 5701*)

RULES

SEC. 303. The Secretary of Health, Education, and Welfare (hereinafter referred to as the "Secretary") may prescribe such rules as he considers necessary or appropriate to carry out the purposes of this title. (*42 U.S.C. 5702*)

PART A—GRANTS PROGRAM

PURPOSES OF GRANT PROGRAM

SEC. 311. (a) The Secretary is authorized to make grants and to provide technical assistance and short-term training to States, localities and nonprofit private agencies and coordinated networks of such agencies in accordance with the provisions of this part. Grants under this part shall be made equitably among the States based upon their respective populations of youth under 18 years of age for the purpose of developing local facilities to deal primarily with the immediate needs of runaway youth or otherwise homeless youth, and their families, in a manner which is outside the law enforcement structure and juvenile justice system. The size of such grant shall be determined by the number of such youth in the community and the existing availability of services. Grants also may be made for the provision of a national communications system for the purpose of assisting runaway and homeless youth in communicating with their families and with service providers. Among applicants priority shall be given to private organizations or institutions which have had past experience in dealing with such youth.

(b) The Secretary is authorized to provide supplemental grants to runaway centers which are developing, in cooperation with local juvenile court and social service agency personnel, model programs designed to provide assistance to juveniles who have repeatedly left and remained away from their homes or from any facilities in which they have been placed as the result of an adjudication.

(c) The Secretary is authorized to provide on-the-job training to local runaway and homeless youth center personnel and coordinated networks of local law enforcement, social service, and welfare personnel to assist such personnel in recognizing and providing for learning disabled and other handicapped juveniles. (*42 U.S.C. 5711*)

ELIGIBILITY

SEC. 312. (a) To be eligible for assistance under this part, an applicant shall propose to establish, strengthen, or fund an existing or proposed runaway center, a locally controlled facility providing temporary shelter, and counseling services to juveniles who have left home without permission of their parents or guardians or to other homeless juveniles.

(b) In order to qualify for assistance under this part, an applicant shall submit a plan to the Secretary meeting the following requirements and including the following information. Each center—

(1) shall be located in an area which is demonstrably frequented by or easily reachable by runaway youth;

(2) shall have a maximum capacity of no more than twenty children, with a ratio of staff to children of sufficient portion [1] to assure adequate supervision and treatment;

(3) shall develop adequate plans for contacting the child's parents or relatives (if such action is required by State law) and assuring the safe return of the child according to the best interests of the child, for contacting local government officials pursuant to informal arrangements established with such officials by the runaway center, and for providing for other appropriate alternative living arrangements;

(4) shall develop an adequate plan for assuring proper relations with law enforcement personnel, social service personnel, and welfare personnel, and the return of runaway youths from correctional institutions;

(5) shall develop an adequate plan for aftercare counseling involving runaway youth and their parents within the State in which the runaway center is located and for assuring, as possible, that aftercare services will be provided to those children who are returned beyond the State in which the runaway center is located;

(6) shall keep adequate statistical records profiling the children and parents which it serves, except that records maintained on individual runaway youths shall not be disclosed without the consent of the individual youth and parent or legal guardian to anyone other than another agency compiling statistical records or a government agency involved in the disposition of criminal charges against an individual runaway youth, and reports or other documents based on such statistical records shall not disclose the identity of individual runaway youths;

(7) shall submit annual reports to the Secretary detailing how the center has been able to meet the goals of its plans and reporting the statistical summaries required by paragraph (6);

(8) shall demonstrate its ability to operate under accounting procedures and fiscal control devices as required by the Secretary;

(9) shall submit a budget estimate with respect to the plan submitted by such center under this subsection; and

(10) shall supply such other information as the Secretary reasonably deems necessary. (*42 U.S.C. 5712*)

APPROVAL BY SECRETARY

SEC. 313. An application by a State, locality, or nonprofit private agency for a grant under this part may be approved by the Secretary only if it is consistent with the applicable provisions of this part and meets the requirements set forth in section 312. Priority shall be given to grants smaller than $150,000. In considering grant

[1] So in original. Apparently should be "proportion."

applications under this part, priority shall be given to organizations which have a demonstrated experience in the provision of service to runaway and homeless youth and their families. (*42 U.S.C. 5713*)

GRANTS TO PRIVATE AGENCIES, STAFFING

SEC. 314. Nothing in this part shall be construed to deny grants to nonprofit private agencies which are fully controlled by private boards or persons but which in other respects meet the requirements of this part and agree to be legally responsible for the operation of the runaway house. Nothing in this part shall give the Federal Government control over the staffing and personnel decisions of facilities receiving Federal funds. (*42 U.S.C. 5714*)

REPORTS

SEC. 315. The Secretary shall annually report to the Congress on the status and accomplishments of the runaway centers which are funded under this part, with particular attention to—

(1) their effectiveness in alleviating the problems of runaway youth;

(2) their ability to reunite children with their families and to encourage the resolution of intrafamily problems through counseling and other services;

(3) their effectiveness in strengthening family relationships and encouraging stable living conditions for children; and

(4) their effectiveness in helping youth decide upon a future course of action. (*42 U.S.C. 5715*)

FEDERAL SHARE

SEC. 316. (a) The Federal share for the acquisition and renovation of existing structures, the provision of counseling services, staff training, and the general costs of operations of such facility's budget for any fiscal year shall be 90 per centum. The non-Federal share may be in cash or in kind, fairly evaluated by the Secretary, including plant, equipment, or services.

(b) Payments under this section may be made in installments, in advance, or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments. (*42 U.S.C. 5716*)

PART B—RECORDS

RECORDS

SEC. 321. Records containing the identity of individual youths pursuant to this Act may under no circumstances be disclosed or transferred to any individual or to any public or private agency. (*42 U.S.C. 5731*)

PART C—REORGANIZATION

REORGANIZATION PLAN

SEC. 331. (a) After April 30, 1978, the President may submit to the Congress a reorganization plan which, subject to the provisions of subsection (b) of this section, shall take effect, if such reorganization plan is not disapproved by a resolution of either House of the Congress, in accordance with the provisions of, and the procedures established by chapter 9 of title 5, United States Code, except to the extent provided in this part.

(b) A reorganization plan submitted in accordance with the provisions of subsection (a) shall provide—

(1) for the establishment of an Office of Youth Assistance which shall be the principal agency for purposes of carrying out this title and which shall be established—

(A) within the Office of Juvenile Justice and Delinquency Prevention in the Department of Justice; or

(B) within the ACTION Agency;

(2) that the transfer authorized by paragraph (1) shall be effective 30 days after the last date on which such transfer could be disapproved under chapter 9 of title 5, United States Code;

(3) that property, records, and unexpended balances of appropriations, allocations, and other funds employed, used, held, available, or to be made available in connection with the functions of the Office of Youth Development within the Department of Health, Education, and Welfare in the operation of functions pursuant to this title, shall be transferred to the Office of Youth Assistance within the Office of Juvenile Justice and Delinquency Prevention or within the ACTION Agency, as the case may be, and that all grants, applications for grants, contracts, and other agreements awarded or entered into by the Office of Youth Development shall continue in effect until modified, superseded, or revoked;

(4) that all official actions taken by the Secretary of Health, Education, and Welfare, his designee, or any other person under the authority of this title which are in force on the effective date of such plan, and for which there is continuing authority under the provisions of this title, shall continue in full force and effect until modified, superseded, or revoked by the Associate Administrator for the Office of Juvenile Justice and Delinquency Prevention or by the Director of the ACTION Agency, as the case may be, as appropriate; and

(5) that references to the Office of Youth Development within the Department of Health, Education, and Welfare in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding shall, on and after such date, be deemed to refer to the Office of Youth Assistance within the Office of Juvenile Justice and Delinquency Prevention or within the ACTION Agency, as the case may be, as appropriate. (*42 U.S.C. 5741*)

RUNAWAY YOUTH: GOVERNMENT RESPONSE TO A NATIONAL PROBLEM

by

Michele R. Magri
NCSL Youth Services Project

This issue brief on runaway youth details federal efforts in this field, summarizes the service delivery system, and highlights the states' involvement.

HISTORY

Community-based runaway youth programs emerged in the mid-1960's in response to the needs of thousands of youth who left home and were on the move across the country. Concerned with the potential exploitation and victimization of young people while on the streets, the early programs provided neutral ground and protection unconnected with the "established systems." Emergency shelter, food, medical care, and immediate assistance were offered by volunteers, churches, and community groups through these centers.

Runaway programs provided home-like atmospheres and were located in old homes, apartments, or storefronts with open access 24-hours a day. Although their primary objective was to keep youth off the streets, these early shelters made every effort to put youth in touch with their parents and to help them return home.

A humanistic philosophy of youth's rights to self-determination and involvement guided the evolution of these centers. Program staff were committed to the concepts of trust, non-judgmental and supportive interaction, and responsiveness in service delivery to youth and to the needs of the community. Prevention and early intervention were the cornerstones of their work.

By the early 1970's, youth problems had begun to take on new dimensions. for example, the number of delinquency cases brought into the juvenile courts increased from 280,000 in 1970 to 1,112,500 in 1972, and the ratio of cases to the youth population (11 years to 18 years of age) rose from 1.6% to 3.4%.[1] Truancy and school drop-out rates also climbed dramatically. By spring 1972, the issue of runaway youth grew from a collective concern of parents and residents in certain communities to a concern of federal policymakers. Running away had become a common response to family and social pressures, reaching what a Senate Committee in 1973 called "epidemic proportions." The 1976 National Statistical Survey on Runaway Youth estimated that 733,000 young people annually leave home at least overnight without the permission of their parents or legal guardians.

THE EMERGENCE OF FEDERAL LEGISLATION: THE RUNAWAY YOUTH ACT

In the latter part of 1973, the Secretary of Health, Education and Welfare established an Intra-Departmental Committee on Runaway Youth in response to the growing national concern about the problems of runaway youth. Senator Birch Bayh, then the chairman of the U.S. Senate Judiciary Committee, was firmly committed to developing alternatives that would divert runaway youth, labeled

as status offenders. Many runaway program staff members testified before Bayh's Committee that the swelling number of runaway youth had begun to overwhelm their volunteer staffs and limited operating budgets.

As a result of these efforts, The National Runaway Youth Program was initiated under the authorization of Title III of the Juvenile Justice and Delinquency Prevention Act of 1974 (PL 93-415).

The goals of the Runaway Youth Act, as mandated by section 315, are:

(1) to meet the needs of youth during the runaway incident;

(2) to reunite youth with their families and to encourage the resolution of family problems;

(3) to strengthen family relationships and to encourage stable living goals for youth; and

(4) to help youth decide upon a future course of action.

The Juvenile Justice Delinquency Prevention Act has been amended twice since its enactment, expanding the legislative scope of the Runaway Youth Act in two areas. The first set of amendments in 1977 expanded the definition of runaway youth to include the previously unidentified and unserviced population of homeless youth. The amendments also specified that family reunification be encouraged when appropriate-- recognition of the fact that many of these youth were homeless because of parental abuse or neglect. The second set of amendments, in 1980, changed the grant funding process to a direct state allocation based on population to ensure services in each state. (See Table 1).

The Youth Development Bureau (YDB), located within the Administration for Children, Youth, and Families, Office of Human Development Services, has administered the Act since its passage. The Act authorizes grants, technical assistance, and short-term training to public and private non-profit agencies within the community. Grants are made to develop and strengthen community-based programs that provide the core services of temporary shelter, counseling, and after-care (follow-up services) to runaway, homeless youth and their families.

These services are provided both directly by the programs and through contracts established with other service providers. In addition to these grants, support is also being provided through the National Communications System, designed to serve as a neutral channel of communication between runaway youth and their families. This system also refers youth to needed services within their communities.

Even with the bipartisan support this legislation received, appropriation difficulties have plagued the program. However, in 1975, the appropriation was set at $5 million, and gradually increased to $11 million in 1978 where it remained through 1981. The appropriation for 1982 encountered difficulty, as several proposals were considered by both the Administration and the Department of Health and Human Services, including the incorporation of the Runaway Youth Act into a block grant to the states. It is anticipated that the program will

remain a categorical operation within the Youth Development Bureau of Health and Human Services for FY 83. An amendment to the Continuing Resolution for FY 1983 authorizes an increase in appropriations to $21 million. The Runaway and Homeless Youth Act, as part of the Juvenile Justice and Delinquency Prevention Act, is scheduled for reauthorization in 1984.

IMPORTANCE OF THE LEGISLATION

The Runaway and Homeless Youth Act is regarded as an important social service initiative for several reasons:

(1) Framed within the Juvenile Justice Delinquency Prevention Act, the Runaway and Homeless Youth legislation provides an impetus for the development and expansion of community-based programs designed to serve status offenders. Thus, non-violent, less serious offenders are diverted from the courts and inappropriate institutional arrangements.

(2) It is comprehensive in mandating the integration of the family into a wide network of community-based services designed to meet family needs. It requires attempts at family reunification and stabilization through individual and family counseling, and after-care services.

(3) The Runaway Youth Act provides recognition of the fact that the runaway youth problem is a national and interstate issue.

(4) The Act provides funding to ensure that programs exist in each state. These programs are linked together on a state, regional, and national level, providing a mechanism that assists youth in returning to their families. Acting under authority of the Act, the YDB facilitates and encourages information and resource sharing among the various programs.

(5) The Act provides YDB with the capability to collect data. This collection is the only source of nationwide statistical information on runaway, homeless youth and their families.

(6) Standard model regulations, developed by YDB, provide for program quality and consistency while allowing program flexibility and innovation.

(7) Programs funded by the Act are able to use YDB funds to establish credibility as recognized, federally-funded programs, using such funds as "seed money" to gather additional, broad-based support.

CHARACTERISTICS OF YOUTH SERVED

Why do youth run? There are many explanations for why youths run away from home. Although the research on this topic is fairly recent, the most comprehensive studies stress that runaways are not a homogenous group, and they examine three environments that constitute most of a youth's life experience: home, peer, and school.

A 1974 study concluded that the interaction of interpersonal, family, and school factors seems to precipitate running away from home. The most often

cited factors include the frequency of disruptive family activities, such as frequent moves, parental alcoholism, absence of one parent, little communication in the family, and physical or sexual abuse. Further studies demonstrate a correlation among alcohol abuse, drug abuse, and running away.

In short, it is important to stress that runaway and homeless youth represent two distinct categories: the former who run from a family situation that has the potential for reconciliation, and the latter in which reunification may not be possible because of family indifference.

Runaway Youth Centers are serving six distinct youth populations.

(1) Runaway Youth. Youth who are away from home without permission or legal guardians.

(2) Push-out Youth. Youth who leave home with parental encouragement.

(3) Throwaways. Youth who leave home with knowledge and approval of parents or legal guardians, and who desire to leave home.

(4) Potential Runaway Youth. Youth who are still living at home but are considering leaving home without permission.

(5) Non-crisis Youth. Youth who are living in an unstable or critical situation, but who are not planning to leave.

(6) Other. Youth who use the projects for various other purposes.

Demographics. The 1979 data base established by YDB reveals that runaways are the largest category (42%), followed by pushouts and throwaways (28%) and non-crisis youth (20%). More females than males run away in each category, with the exception of the push-outs where males predominate. The 14-17 age group represents 83% of the youth served, although programs also serve youth between the ages of 9 and 13 years (13.3%). While 72% of youth served are white/caucasian, minority youth also use these programs (16% black; 6% Hispanic).

Living situations. Of the youth who come to these shelters as runaways, the largest proportion (81.6%) had been living at home. However, the family had been typically (61.7%) headed by a single parent or stepparent.

Referrals. Youth come in contact with the runaway centers through a wide variety of referrals. The majority (19%) refer themselves for services. However, the police, courts, probation, and other juvenile justice agencies initiate 27% of all referrals--indicating that these programs, as a result of the implementation of deinstitutionalization laws, are serving as alternative service programs for status offenders. Protective services, mental health, and other public or private agencies account for 21% of the total referrals, demonstrating that these programs fill community service gaps.

PROGRAM DESCRIPTION

It is important to note that the 169 programs funded by the Runaway Youth Act do not constitute all of the runaway youth service programs in the country. The YDB programs, however, offer a successful demonstration effort which can be viewed as a model.

Runaway youth centers are diverse in terms of structure, ranging from free-standing emergency shelters to multi-purpose youth service agencies. Some have developed in response to specific community needs, while other programs have been selected as demonstration-sites to test their ability to deal more comprehensively with numerous youth problems. Examples of such problems include teenage pregnancy, school drop-outs, prostitution, youth employment, and adolescent abuse.

Despite this diversity, some common denominators exist in terms of key service components for all runaway youth programs. (All services are provided at no cost and have no eligibility requirements.) Emergency shelter is the cornerstone of the runaway program. Temporary housing is provided at the client's request on a 24-hour, 7-day-a-week basis through residences maintained by the programs, or through temporary foster homes, "host homes," and other community-based resources.

Crisis intervention counseling is another key component that assists the youth in thinking about family dynamics and the reasons for running away. This service attempts to avoid a breaking point in family communication and encourages family reunification. Other key services include outreach, information and referral, medical assistance, legal services, transportation, placement, advocacy, and after-care services. In addition to providing services directly, the projects have established solid working relationships with other institutions in the local communities, including welfare departments, juvenile justice agencies, social services programs, schools, police, and other runaway programs and crisis intervention units.

In a 1979 study, a sample of YDB funded runaway youth programs revealed that programs were operating highly complex and diversified service programs. In fact, the average YDB grant provided funding for less than half the cost of these programs. Other funds used by the programs included contracts from the Office of Juvenile Justice Delinquency Prevention, National Institute of Mental Health, Title XX, state agencies, local agencies, and private foundations. (See Table 2.) A cost analysis demonstrated that the projects generated an additional $3,000 worth of resources per month through the use of volunteers, donated resources, and in-kind services.

THE STATES' RESPONSE

The states have entered this arena by providing services to runaways, homeless youth, and their families through a variety of techniques, including specific legislation, line-item appropriations in general fund categories, and purchase of service contracts on the local level.

Because state involvement is a fairly recent activity, this section of the report is limited in scope and offers only a sample of state involvement. Further research in this area will continue through NCSL's Youth Services Project.

State Legislation. To date, New York, is the only state to have passed specific legislation related to runaway and homeless youth. Two key factors played a role in the legislation's development. (1) In 1976, Assemblyman Howard Lasher, chairman of the Assembly's Child Care Committee, held hearings to examine New York's runaway problems in light of the federally funded runaway youth programs which he perceived as useful. (2) Also in 1976, the state moved to keep status offenders out of institutions in order to comply with the Juvenile Justice Delinquency Prevention Act. Through joint hearings, committee members, police officers, and community groups developed a consensus that the best way to deal with runaways was through treatment rather than detention.

Passed in 1978, New York's law follows the Federal Runaway Youth legislation, and is administered by the Division of Youth. The statute clarifies the legal status of runaway youth and establishes both procedures and funds to expand services through the development of new programs. This provision restricts support to existing federally funded programs.

Ohio has passed legislation, HB440, that balances the goals of fair treatment for youth and protection for the public. (See "Juvenile Justice in the States: Which Way Is It Heading?" State Legislatures, January, 1982, pp. 19-24.) Administered by the Division of Youth, this legislation created a two-part, formula-based grant of state aid to counties. The grants may be used to support prevention, diversion, diagnosis, counseling, treatment, foster care, and rehabilitation programs for "alleged or adjudicated unruly or delinquent children, or children at risk of becoming unruly or delinquent." The juvenile courts and county commissioners jointly establish an annual plan of services needed at the local level.

Following an unsuccessful attempt to obtain line-item appropriation from the U.S. Department of Health and Human Services, Wisconsin passed legislation that earmarks Title IVB (the Federal Child Welfare Program) funds for runaway youth programs. For each of the next two years, $100,000 has been made available to support existing federally-funded programs. This funding replaces lost federal appropriations. Additionally, the law provides $100,000 per year for a two-year period to nonfederal programs that serve runaway youth as a portion of their overall client population. The selection of the Title IVB legislation as a potential revenue source for runaway youth programs was appealing to the legislature and to runaway programs, because the money remains administered by a state agency.

Connecticut has taken a unique approach in apssing a no-cost bill that sets a framework within which the family may be considered in need of services. This law grew out of Connecticut's efforts to deinstitutionalize status offenders.

Florida, which last year created a $307,000 line-item appropriation for runaway youth programs to replace lost federal dollars, also appointed an interim committee on status offenders within the Senate Judiciary-Criminal Committee. The committee is expected to recommend a state-local partnership in providing services to runaway youth. Legislation is being proposed in both the Florida Senate and House for Shelter programs, with the share used to purchase beds and support one-half of the operating costs of these programs.

Maryland has demonstrated its support by calling for a "sole source" 33% across the board increase to runaway youth programs. The Governor, whose approval is required, is expected to support this action.

Other State Action. Several states have responded to federal cutbacks in funding for runaway youth programs and to arguments for the cost-effectiveness of these programs by providing line-item appropriations. These states include Wisconsin, Maryland, Minnesota, California, Vermont, Florica, Ohio, and Hawaii. Other options for state support that will require review and study include: using state-formula Office of Juvenile Justice Delinquency Prevention grants; using funds available under the Social Services Block Greants; and creating various pass-through mechanisms from the state to local level that could result in purchase-of-contract services or free-for-service reimbursements.

SIDE OF LIFE

Girl on the Run: "Scared, Lonely, Scheming to Live"

UNHAPPY YOUNGSTERS who flee their families soon find that the road holds only fear, disillusionment and want. Yet taking the first step homeward is often the ultimate test.

Such was the experience of "Lisa," 17, who has a history of running away from her Maryland home. Now in a residential school, she gives this report of life on the run.

BETHESDA, Md.

I remember when my girlfriend and I hit Daytona, Fla., hopped up on "speed" that the truckers had given us, and these three guys pulled up in a car.

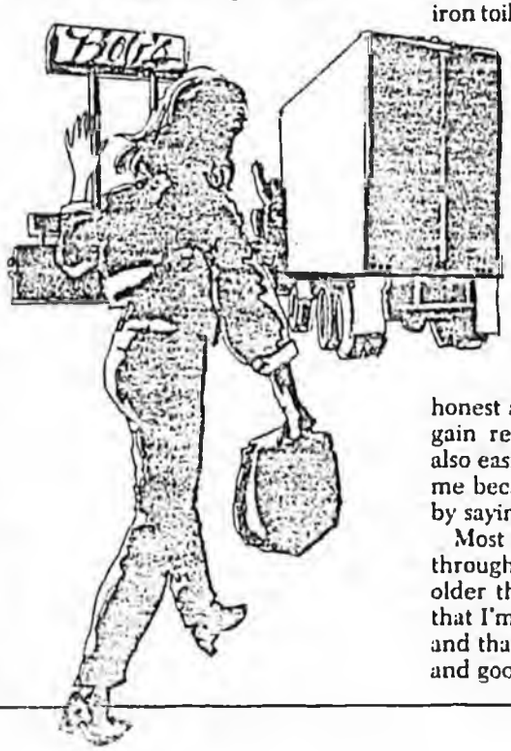
After two days of hitchhiking, all I wanted was a shower, so I cozied up to one of them—Michael—a 25-year-old guy from Ohio. Right off, he took me to the house he shared with the two others.

While the men were out at work rebuilding piers, I would clean and cook for them. Michael responded by protecting me from the others and keeping me away from Main Street, where drugs were dealt and people were always doing weird things. But when he asked me to marry him, I was scared because I was only 15 and I didn't really love him.

So I went to a party without him, got drunk and woke up in another house. When Michael wouldn't take me back, I started feeling desperate, went to the police and ended up in a youth shelter. In all, I had been in Florida for two weeks when my parents sent a plane ticket and I came home.

Through five years of running away, that's how it has always been: Looking for love but acting phony. Usually I'd drink or drug my way into trouble—then use seduction to get by.

The first time I ran away—when I was 13—it was because I had been drinking and stayed out late with a guy. My parents got the police involved, and things soon got so complicated I took off. A friend took me to an abandoned house in a cornfield near where he lived.



I stayed there a week, sweeping and cleaning and singing when I was lonely. I slept on the floor and tried to keep warm by wrapping myself in old sheets of plastic left over from the movers. One night a policeman—Officer Bear I called him—saw me in a parking lot and took me home. I called cops pigs then, but I loved that man because he cared enough to talk about my troubles.

That's what I was looking for—someone to care for me. At first, whenever I ran away I'd say to myself: "Wow, I'm on my own. I can drink and party all I want, take a bong hit [smoke a marijuana pipe] any time I want."

But it wasn't long before I realized how scared, lonely and totally phony I was. I was doing everything to get something—to be loved, to feel secure, to get money or food. I was using people, scheming to live. It was fun at first, but after a while you don't have any friends because people start getting back at you.

I think I ran because I was trying to get away from myself and the crazy way I was living. Also, I didn't feel loved at home, so maybe I would feel loved somewhere else.

My birth wasn't exactly welcome because my father was a chronic alcoholic. My parents divorced when I was 6 months old, and I only saw my father a couple of times before he was killed while being robbed.

My mother remarried when I was 9, but I couldn't stand my stepfather. Without giving it a chance, I downright hated the man because my mom was all I had and it seemed like he was taking her away. I felt very lonely. Both my parents are teachers, and when my mother got home from work I was buried somewhere in the four kids that came with my stepfather.

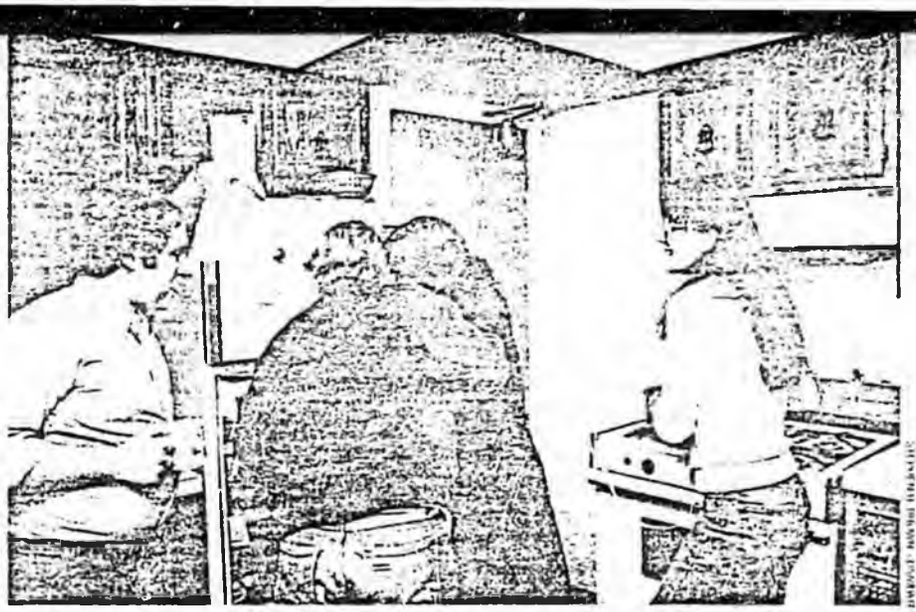
A few times our brawls were my parents' fault, but usually I'd bait my stepfather. "Come on, hit me, man," I'd say, "so I can take you to court." I was just a punk.

By eighth grade, I had run away twice, started skipping school to go partying, and, even though I have the ability to be an A student, I flunked twice before I reached 10th grade.

No paradise. I kept on running, five times in all, but my life on the road was always the same—too many trashy people, too many drugs, too much promiscuity and drinking.

Usually, when I called my mom, she'd say something like, "I don't agree with what you're doing, and I think you should come home." She was angry, but she knew she didn't have any control over me.

But this last time—six months ago—things were different. When my roommate and I went AWOL from the school where I'm living, we only got as far as Pascagoula, Miss., before the cops pulled the truck over. They arrested the driver for picking up hitchhikers and locked me in a cell that was the real thing—with only an iron toilet, a hard bed and a slot where they pushed in your food.



After the strip search, I was ready to come home. This time, my mother made no attempt to hide the fact that she was angry, and the counselors at the school where I stay have helped me see why I've been unhappy and how I'm responsible for my own actions.

Now I'm finally beginning to realize that I have to stop scheming and start being honest about my feelings in order to gain real love and self-respect. It's also easier to feel that my mom loves me because she now will risk a fight by saying "No."

Most of all, even though I've been through a lot, I don't want to act older than I am any more. I realize that I'm not 25—that I'm just a kid—and that I really do need my parents and good friends.

An Endless Parade of Runaway Kids

They may number 1 million a year—frightened, rebellious and often easy prey. Society is trying to help, but only a few can find safe refuge.

House parents Jerry and Sandy Girbach help a pair of young guests raid the refrigerator at the Open Door, a shelter and counseling center for runaways in Rockville, Md.

Despite scores of programs to help them, thousands of youngsters each year still are joining the rootless, troubled group known as runaway children.

The federal government's General Accounting Office estimates that at least 1 million children a year are absent from their homes. Of these, half are considered "push outs" who are not wanted by their parents. The rest are runaways who, at the average age of 15, turn their backs on anxious families to try a life full of chaos and peril.

The vast majority of runaways—80 percent, according to social workers—return home within two days, before police have included them in missing-persons reports.

Some 44,000 a year find their way to federally funded shelters, and additional thousands land in jail. Still others stay away from home for weeks, months or years and are numbered among the 18,000 juveniles who make up three quarters of the missing persons listed by the National Crime Information Center.

A drifter's life. As they move from city to city, these youngsters typically fall quickly into patterns of runaway life: Sleeping outdoors, hitchhiking, crashing parties, shoplifting, looking for odd jobs, panhandling or turning to prostitution, pornography or drugs.

"The incidence of criminal activity rises sharply with the length of time a kid is away from home," says Robbie Callaway, executive director of the National Youth Work Alliance in Washington, D.C. Although only 40 percent of runaways report legal troubles before leaving home, Callaway says, almost all children who have been gone more than two weeks get involved in crime, either as perpetrator or victim.

On the road, homeless young people tend to gravitate toward resorts or big cities: San Francisco, Los Angeles and Denver in the West, New York and Florida beach towns in the East.

Sixty percent are girls, and few have any work experience. Some earn tourist-season money at shops and restaurants, but many resort to dealing dope to friends or sex to strangers.

"What can a 13-year-old girl do besides show her body?" asks a girl at a youth shelter. "In all my trips, I had one real job: Making candles at the beach. But twice I had guys asking me to pose nude for pictures—$100 for the first shot, then a lot more later on."

In New York, runaways are the staple of the "Minnesota strip," a stretch of hookers' turf near Times Square that got its name by providing mostly out-of-state boys and girls between the ages of 10 and 20. In Chicago, recruiters at bus stations seek runaways for call-in services offering hired "companions" at rates as high as $450 a weekend for a boy in his early teens.

Although most young people return home after their first brush with trouble, dramatic incidents show how vulnerable they are. For example—

- The bones of many runaways were found among those of 27 victims linked to Elmer Wayne Henley, an 18-year-old convicted in 1974 as an operator of a homosexual torture ring in Houston.
- In 1980, Chicago handyman John Wayne Gacy was convicted of killing 33 boys and young men, many of them reported to police as runaways.
- Police are still searching for the bodies of several of the girls reported slain by Gerald Eugene Stano, who told authorities that over some 10 years he killed at least 31 females, mostly hard-to-trace young hitchhikers and prostitutes, in Florida and New Jersey.

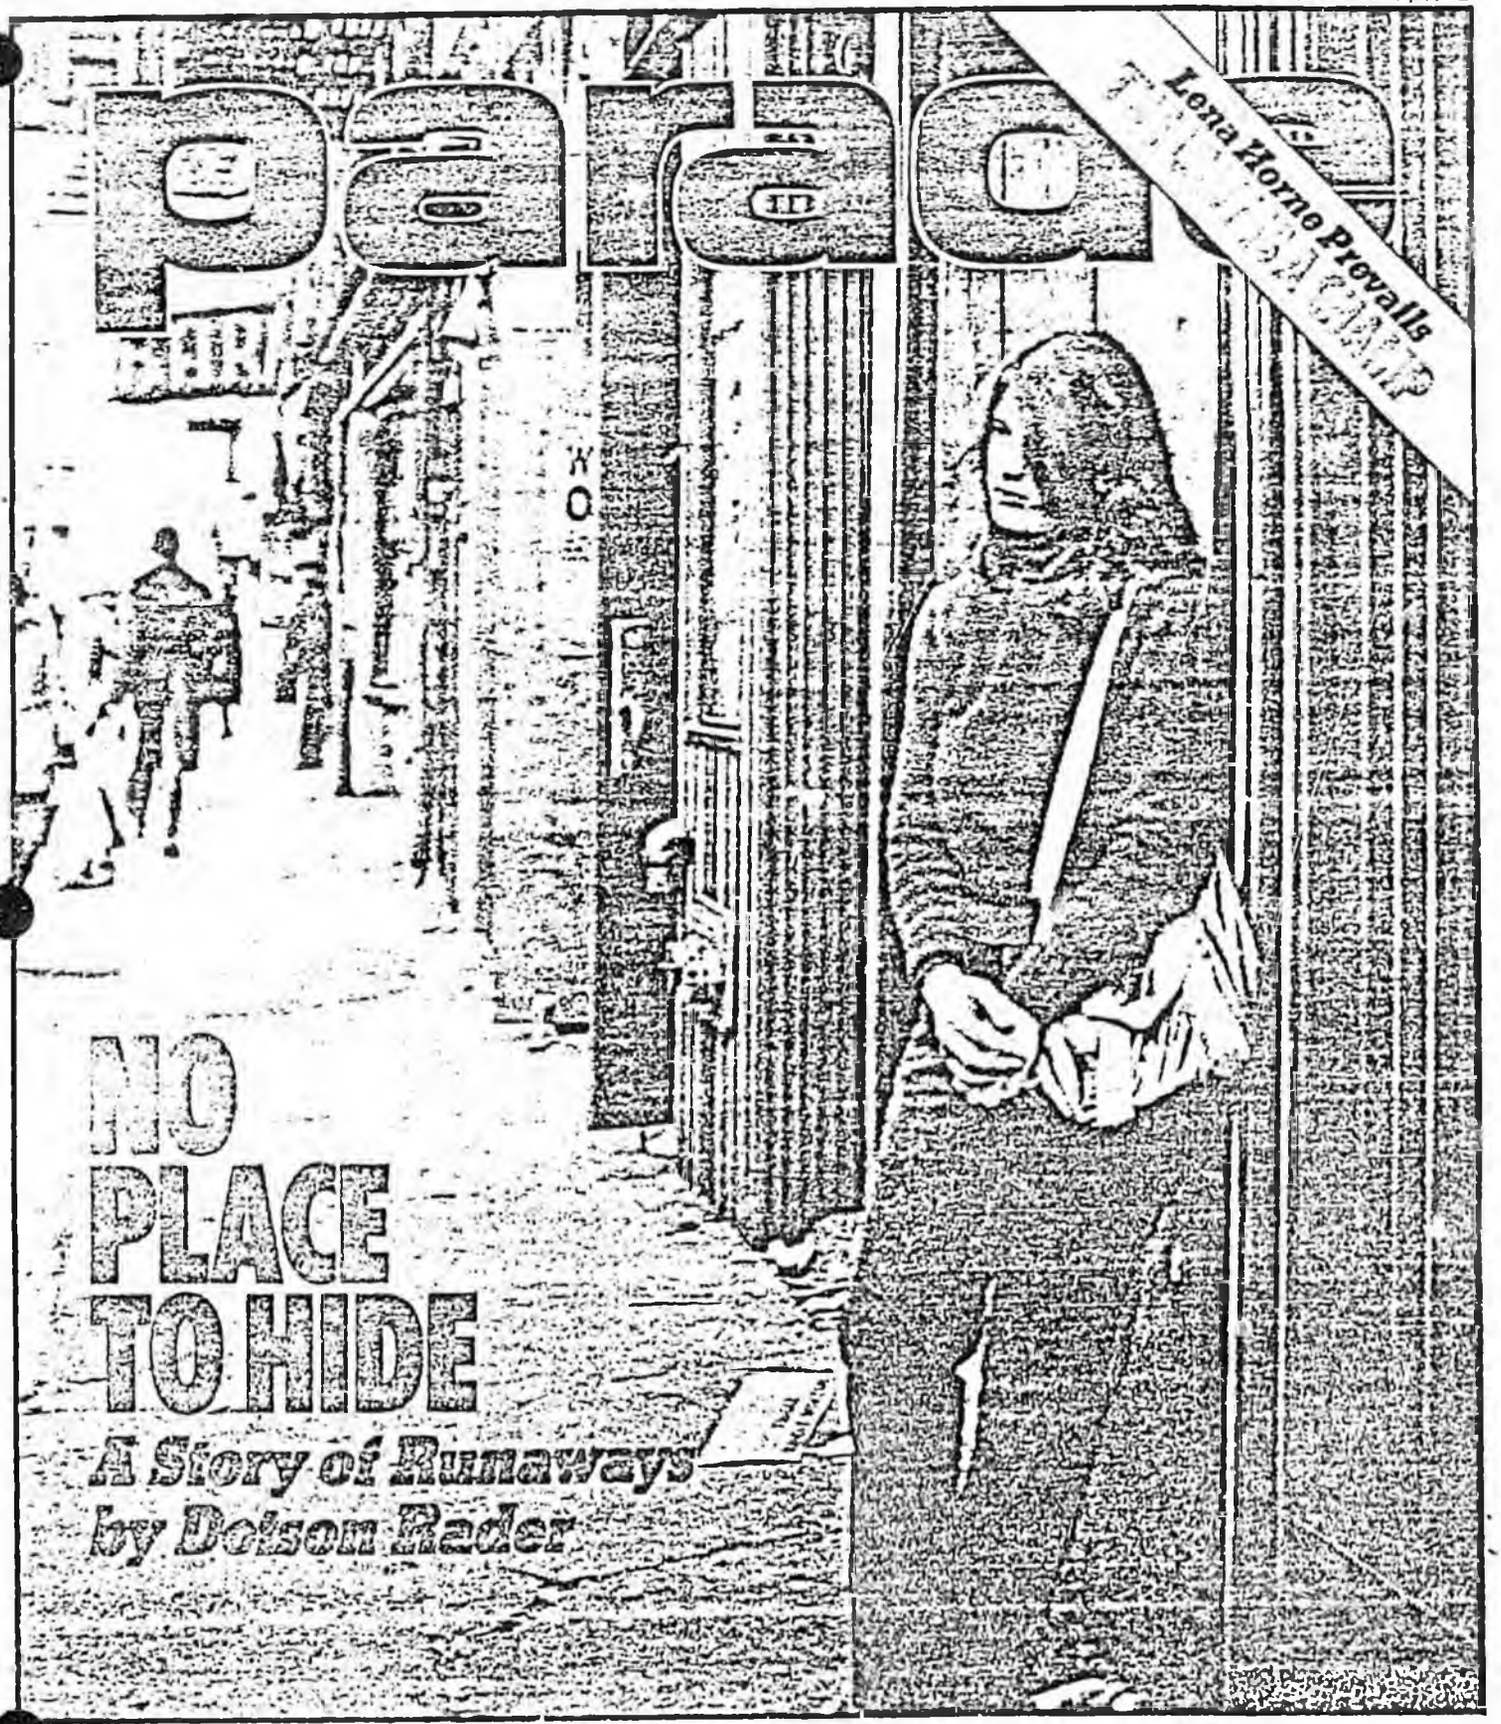
Politicians have responded to the runaway problem by pressing for more money and manpower to locate missing children. In October, President Reagan signed a law authorizing the Federal Bureau of Investigation to take reports about absent youngsters from parents and distribute them electronically to police departments nationwide.

Congress recently increased the funding of programs aimed at runaways from 10 million dollars to 21 million. Most of the money goes for youth shelters and for telephone hot lines set up to aid young people in major cities.

Typically, a child looking for help is steered to one of the 166 federally funded shelters by the police, church or social-welfare workers. Some agencies send scouts to areas where runaways often gather, and others run newspaper ads containing a child's picture and a toll-free phone number that anyone with information can call.

Within 24 hours after a runaway arrives at a center, counselors try to contact the parents and begin negotiating as to what the young person should do next. Social workers check out with teachers and police any complaints of parental abuse. Within 30 days, the runaway must decide whether to go home, live independently or move to a longer-term institution—usually one of 300 residential schools or group houses that provide a foster-family atmosphere.

Sticking point. "The problem in getting through to runaways is that, on the surface at least, most have what look like perfectly good reasons for leaving," says Dr. Martin H. Stein, medical director of Dominion Psychiatric Treatment Center in Falls Church, Va.



Probation officers report that well over half the fugitives who land in juvenile courts come from homes marred by alcoholism, beatings or sexual abuse by fathers or other relatives.

Even so, counselors say that they are encouraged by the progress they can make with youngsters who turn to the shelters. "Usually, running away is a sign that a kid feels a need for a change," says H. R. Kelly Kjeldsen, program coordinator of the Open Door in Rockville, Md. "If you can show them how, and sometimes get the parents involved, it's often gratifying to see the way they respond." □

NO PLACE TO HIDE

A Story of Runaways

by Dotson Rader

RUNAWAYS

The average age is 15 and most depend on prostitution or theft to survive • by Dotson Rader

Ann is a very pretty girl, with a round, childlike face, lovely smile and large brown eyes. She dresses colorfully and delights in collecting stuffed animals, bunnies mostly, and baby dolls. When she moves from one cheap hotel to another, as she frequently does, she piles her toys into two enormous plastic garbage bags and drags them with her.

Ann is 15. Like hundreds of other runaways, she hangs out around First and Post Streets in Seattle, a derelict in an area of porn shops, saloons, fleabag hotels. She sleeps late, spending her nights wandering the streets or sitting in the Donut Shop. While it's an unpleasant place, runaways feel welcome there, safe from the johns, pushers and pimps outside, and from the cops. For many, the Donut Shop is the only place they have to go.

Like Ann, all the children in this story are real. While their names have been changed, their stories are true. What they say here is typical of what hundreds of other kids told me across America, from Key West to Boston, and New York to Los Angeles.

This article centers on the runaways in Seattle and San Diego, cities chosen because they anchor the ends of U.S. I-5, the main road for kids on the run in the West. Also, they are representative places, largely middle class. These children could be from your town, from next door.

I sat opposite Ann at one of the long formica tables, under harsh fluorescent lights. I asked her why she didn't go home to her family.

"Everytime I try to go home to live, my Dad starts hitting me," she said. "Now I only go home on Christmas, Thanksgiving and on my birthday. I owe them that. I'd like to live at home again, but I know it would start all over again, Daddy drinking and beating me up. That's why I left. The first time I ran away, I was 11. When I was 12, I was gone for good. I got a job at the Exotic Body Exercise Club downtown near the Donut Shop.

"After I lost that job, I met this old man on the street. He said he needed a babysitter. I'd get paid well. He lived in a hotel in Chinatown. He had a prostitute there, and she had a baby I took care of. After a while, the old man made me a prostitute. I was 13 years old, and I had no place to go.

"The old man knew all these Japanese guys who'd come to the hotel for sex. Two or three times a week I'd turn tricks, usually five or six a night. They each paid the old man $40 for sex with me. He was good to me. Sometimes he gave me $7 to go to the disco, and $10 to spend. But I left him after nine months."

Ann glanced around the Donut Shop at the other kids. Then she leaned forward, lowering her voice, not wanting the other children to hear. Her modesty was touching and sad.

"My parents never spoke to me about sex. What I knew about it I learned at the movies," she confided. "When I first did it, I'd drink before the sex happened, and then I'd pretend it wasn't happening to me. I'd think about *pretty* things, like I wasn't even there. The first time, I was scared because I didn't know what was going to happen. Then I didn't care anymore. I really only like sex with someone I love. Other times I'm indifferent. I'm very lucky. I haven't been hurt by a trick. A lot of kids have.

Brent Petersen

"After I left the pimp," she continued, "I started mud wrestling on weekends all over the country. I was 14."

Ann told me about the mud show circuit, how she was auctioned off after each match to the highest bidder, who then had the right to bathe her down. She added that her life was okay. Anyway, what choice did she have? Nobody since she first ran away had ever tried to help her. Nobody.

We left the Donut Shop. Kids were huddled in doorways or walking back and forth to keep warm, some as young as 10, waiting around in the cold for someone to stop and buy their bodies for a few dollars or a meal or a warm place to stay. Police cars cruised by, as did johns peering through closed car windows, looking for kids to pick up.

Up to 1 million children in the United States run away from home each year, according to the federal Health and Human Services Administration. And most, after a few weeks, turn to prostitution and theft for survival. The average age of a runaway child is 15.

Forty-seven percent of runaways are girls, the agency says. More than half leave home because of child abuse. One-third are sexually abused. Of these children, 83 percent come from white families. The majority are never even reported as missing by their parents. Knowing all that, it was still disheartening to see in Seattle so many kids with nowhere to go.

As we walked, Ann introduced me to other street children, two of whom I asked to interview. Most of the runaways I met were unusually bright, attractive, lonely and hungry for adult regard and affection.

There were also johns who came up, trying to solicit Ann.

These men who have sex with children are almost entirely middle-class, usually married, and most often they have children at home about the same age as the child they violate, according to social workers. They are rarely arrested. When the police act, it is always against the children.

Before I left Ann, I asked how she envisioned her future. It was now after midnight. She stood near the entrance of a smut parlor, her small hands shoved in her jacket pockets, looking weak and defenseless. "Oh, I don't plan to be a prostitute for the rest of my life," she declared. "In Seattle, most of the runaway girls on the street end up in prostitution. It's do or die. The same with the boys. Do you know how hard it is for a kid to get a job in Seattle?" She shook her head. "If I had my life to do all over again, I wouldn't live like this. I would have stayed home. I'd rather be abused at home than this. Seriously, I would."

She paused.

"But it's too late now."

The following day I found Ann waiting in my hotel lobby with two of her friends, Daniel and Melanie.

Daniel, who just turned 15, is tall, handsome and unusually articulate. He told me about running away from home at 12, of being raped a week later by a middle-aged man in the back of a van and being too frightened to tell anybody. In almost deferential tones, he outlined his brief life—hitchhiking up and down the West Coast. His was an account of sexual abuse, drugs, desperation and an aching need to belong somewhere, to somebody. Now he was working as a busboy. He wants to be a radio announcer. Someone told him he had the voice for it.

After speaking with Daniel, I talked

"My parents never spoke to me about sex. What I knew about it I learned

COVER PHOTOGRAPH BY BRENT PETERSEN

h Melanie. She spoke rapidly, chain-smoking. There was a bravado in her manner, belied by her sorrowful gray eyes. She was 5 feet and underfed.

She told me about her parents' divorce and the death of her grandmother, whom she loved deeply. At 13 she became pregnant. She didn't know how pregnancies happened, she said. She left home when her mother forced her to abort the child. Melanie has been on the run since.

"I ran away on Christmas night, about two months after the abortion," she said. "I hated Mom after that. One night I went to downtown Seattle. I met a guy named Jim. He was 18, and he'd been a runaway since he was 14. We got an apartment together. It was really a hotel for bums. I started tricking [prostitution] to get money for us because Jim was having a hard time of it. The johns wanted younger boys, 14, 15, and Jim was too old. When I first started tricking, I didn't let Jim know. I wanted him to think I was an innocent little girl. Now it doesn't bother him."

Melanie sat by the window in my room. It was an overcast day, but you could still see past the skyscrapers to the lake beyond and, farther still, the hills of the neighborhood where she d been reared.

"I used to live over there," she remarked. "It was a nice house."

Now she lived with Jim, who was a bum dealing drugs, drinking and hanging out. She loved him, but she hated prostitution, all her years lost to the streets. She felt trapped.

"I'm so tired of sex," Melanie said wearily. "It doesn't do me any good, sex with anybody, even Jim. I don't enjoy it anymore." She is 16 now.

I suggested that she return home. If she told her parents what she had been through, they would help.

She laughed. "*My parents know I'm a prostitute*," she said. "All my father says is, don't get arrested. He doesn't want it in the newspapers."

Before I left for San Diego, I took Daniel and Ann to the restaurant at the hotel. They ate a lot and talked as children will about all they are going to do in life and what shining futures awaited them, but I knew they didn't believe a word of it.

"I'm flying to California on Tuesday to go on the roller-coaster and see a guy down there named Walt," Ann boasted. "He's a television producer."

"I've been to Disneyland!" said Daniel. "*Twice*!"

She ignored him. "I met Walt at an amusement park last year in Santa Cruz. I went to his ranch and rode horses and drank lemonade. He likes little girls. He likes me."

I asked how old he was, this man who likes little girls.

"Sixty-five," Ann said.

When they finished eating, they said they had to go to the bathroom. As I waited for them to return, I grew wary and began to suspect they were conspiring to hit me for money.

When they returned, each had a small gift for me they had bought at the hotel's gift shop. A bottle of after-shave and a souvenir mug.

For three days in San Diego, a runaway named Patrick took me to places where children on the lam gather. They're not hard to find. They sleep in the bus depot, or in the parks, particularly the area near the zoo. You find them in abandoned cars or empty houses or grouped around fires on beaches. They are everywhere.

Of the hundreds of children I met, Patrick was the most private. He was wounded inside, and the pain bred distrust and silence. He was 17, although he looked much younger. Blond, with blue-green eyes, he was small but athletic, liking gymnastics. Quiet, shy, suspicious. But despite that, he had a natural winsomeness, a ready smile and easy laugh joined by an insistent vulnerability that made him at once likable and sad. He elicited in me, as did the others, a desire to protect. But he was different, possessed by an almost palpable rage. When I first asked about his life, he angrily refused to reply. So I let it go by.

A runaway in San Diego finds a place to sleep—for a night. Steve Shames

On my second day, we drove to Chula Vista Park, where many runaways live. They survive by doing odd jobs, stealing, helping each other out.

We came to the park two days after the police had raided it, and we saw children with bruised faces and cuts on their heads. The police don't like children living in the parks.

Among the runaways I interviewed there was Steven, 15, from Ocean Beach, Cal. He ran away when he was 13, he said. Like most runaways, his chief concern was getting enough food and a dry place to sleep. He comes from a good family, but he can't go home again.

"It's frightening to be a runaway," Steven said, "because you don't know about tomorrow. You wonder where you're going to eat or live. Am I going to be all right? Will I be able to sleep somewhere other than in the park? You got nothing to grab onto because all that you own is what's on your back. Nothing is mine. When I want something to eat, I steal it.

"When you run away, you meet a lot of kids who got no place," he added.

"Why don't kids want to go home?" I asked.

"Some of them get beat up so bad," he said. "But the streets are bad too. The cops hassle you. Sometimes they beat you up.

"I don't want to go home because I really hate my mother. When I was 13, she kicked me out.

"If I had a child who ran away, I'd find him. I'd do my best. I'd sit down and ask him what was on his mind. What's troubling you, kid? And after we talked, I'd try to change the things he didn't like. We'd compromise. I want to go back home, but I can't. I see how small I am. *I'm nothing*. God, I can't live on my own. It's mad out there. It's crazy! Whew! It's scary! I can't pay my own way. And I know it."

The day I was to leave San Diego, Patrick and I went to Ocean Beach to interview more runaways. I talked to a girl and a boy who lived in a broken-down car. And to a girl of 15 with a year-old baby, and her friend of 13. They had been traveling together for two years and could not see beyond

***RUNAWAYS** /continued*

tomorrow. Also, there were young runaways spaced out on drugs or staggering about on cheap booze: children obviously undernourished, unhealthy, unwanted. America's children.

As the sun began to set, Patrick and I sat on the pier watching the light fade.

"I've had a pretty hard life," Patrick suddenly said, staring at the ocean.

I replied that I knew, although I didn't.

"I don't want to tell you all of it," he said. "I was always made to feel less." He sipped a beer as he sat hunched on the pier, his feet dangling above the water. "My mom hated me," he went on, "because I reminded her of my dad. I always knew she was bad, from the first day I can remember, like when I was 2 years old. She was always doing weird things, like wanting me and my little brother to take a bath with her." He stopped. I said nothing, for I sensed Patrick was trying to tell me what he had never told any other adult.

"She tried to do sexual stuff with us, too," he began again, staring out to sea as if he were addressing the ocean and not me. "To go to bed with her. All through my growing up, she was always trying something with me, and my little brother too. She was dating a guy, and she had a girlfriend at the same time, and they were all sleeping in the same bed, running around naked all the time. It makes me sick. My own mother. I've blocked it all out. That's the only way I've survived.

"Then when I was 13, I was sent to live with my grandparents," he said. "They cheated and lied. When I was 15, they sold me to a lady for $500. I ran away. So I never had a real family. I never saw my real father. I was always lonely . . . I feel like there must be something wrong with me. How come no one ever loved me? I must be bad. I feel like I don't exist because nobody ever *loved* me.

"My mom used to beat me with boards," he continued. "You wouldn't believe some of the stuff she whipped me with. Hot Wheel tracks. And my stepfather? He whipped me 25 times on the back of the legs with a rubber hose. I tried to block it, and I got hit on the hands. I counted every swat. Twenty-five times he hit me. And now he beats my little brother. How can I get even? I *can't* get even. But I'll remember it, believe me."

I asked Patrick if that was why he ran away, because of the beatings.

He looked at me, full of anger, and then he threw his beer can into the sea. He stood. We walked on the pier.

"I didn't want to be a runaway," he said. "I had no place to go. I didn't want to steal, I didn't want to starve. I didn't want to sleep nowhere to go."

He stopped and grabbed my arm.

"No one ever helped me! Ever helped me. Help me! I need help. Someone!"

"I know," I pulled my arm free.

"There's a lot of things I don't know and I'd like to learn. I want to learn to survive legally," he went on. "I don't have my ID, and I don't know how to get it. I'm willing to learn. I don't want to be a dummy all my life. I don't want to be a bum, because I'm better than that. Do you understand where I'm coming from? I need to know things to survive! I don't know anything. I can barely *read*, to tell me honest truth. My mom never helped me with my schoolwork. They didn't care about me."

I looked at him, his eyes expressing bewilderment, pain and deep humiliation. *I can barely read.*

"Patrick," I began, and gave up. I had no answer to give him.

We walked toward the fence separating the parking lot from the beach.

"Don't you think loving is hard?" he asked.

I said nothing.

He glanced at me, and then he cleared manfully. "I never cry."

With that, Patrick rushed to the fence, climbed it, and like a circus acrobat ran along the top of it quickly—away from me.

HOW YOU CAN HELP

A national network of shelters for runaways, financed by governmental and private sources, provides temporary housing and food to homeless children. Many, such as The Bridge in San Diego and Shelter Runaway Center in Seattle, are excellent. But The Bridge has eight beds and Shelter has six. Others around the country are similarly small and poorly funded and unequipped to significantly help a growing mass of children in flight.

The shelters need help. You can get in touch with those in your community through the National Runaway Hotline (1-800-231-6946) or the National Runaway Switchboard (1-800-621-4000). Or write the National Youth Work Alliance, Dept. P, 1346 Connecticut Ave. N.W., Washington, D.C. 20036.

House Bill 649
Fiscal Note Analysis
Prepared by the Divison of Retirement & Benefits
Department of Administration

April 9, 1984

IV Analysis: We have assumed that this bill would affect 439 TRS members by increasing their benefit by $10 per month for each year of service. We have calculated that passage of this bill will increase the state's contribution rate by .23% and the TRS State Match by .23%. The present value of these costs is $19,730,000.00 and would result in a decrease in the funding ratio of 2.46%.

The estimated FY 85 State TRS salaries are $63,713,500.00 and the total estimated TRS State Match salaries are $379,349,200.00.

We have also estimated that efforts of researching and correcting the current minimum benefit recipients and those newly qualifying recipients would involve approximately 500 hours at a one year cost of $13,000.00.

Position Paper

HB 649

The Department of Administration opposes this bill. The new minimum benefit would be paid to any retiree who retired with less than a $21,000 annual salary for their high three years. The adjustment under this bill would be made and then any post retirement pension adjusments which had been granted would be added. For example, the minimum benefit under this bill granted to a member who retired in 1965 would, when combined with post retirement pension adjustments, yield a total benefit equivalant to that of a person retiring today with a final salary of $31,966.44. This seems excessive for a minimum benefit. Those retirees who have been retired longer would benefit more because of the addition of post retirement pension adjustments.

The Department feels that the current minimum benefit provision when coupled with post retirement pension adjustments is adequate.

MEMORANDUM

TO: Representative Bob Bettisworth

FROM: David Teal
Legislative Analyst

RE: Adjustment of Teachers' Retirement Benefits
Research Request 84-091

Ralph Bennett, of your staff, asked us to apply inflation factors in order to determine benefit amounts that correspond to previous payments through the teachers' retirement system. The table below shows (1) previous minimum benefit amounts (in the first year in which an amount was applicable), (2) the Anchorage Consumer Price Index (CPI) in the same year, (3) the inflation factor required to bring the previous value to an equivalent value in January 1984, and (4) the minimum benefit (in 1984 dollars) that corresponds to the previous amount.

Year	Minimum Benefit*	January CPI	CPI Adjustment Factor**	1984 Minimum Benefit
1974	$15	125.6	2.16	$32.42
1975	20	142.9	1.90	38.00
1980	25	215.9	1.26	31.44

*The minimum benefit is presented as the minimum monthly payment per year of service. The floor was set at $200 per month, regardless of time served, prior to 1974.

**The CPI for January 1984 was 271.5. Adjustment to later values would increase the amount shown in column 5.

Alaska State Legislature

POUCH V
JUNEAU, ALASKA 99811

REPRESENTATIVE
ROBERT H. "BOB" BETTISWORTH

211 CUSHMAN STREET
FAIRBANKS, ALASKA 99701

April 10, 1984

M E M O R A N D U M

To: Representative Mae Tischer, Chair, House HESS Committee

From: Rep. Bob Bettisworth

Subject: HB649, "An Act relating to the minimum monthly retirement benefit under the Teachers' Retirement System; and providing for an effective date."

It has become evident that TRS retirement benefits have not kept up with inflation. This has resulted, for the most part, from the failure of post retirement pension adjustments to keep pace with actual inflation. In an attempt to partially redress this problem HB649 proposes to raise the current statutoral minimum TRS benefit for retirees under the system from $25/month/year to $35/month/year. The cost of this increase for those receiving minimum benefits would have to be borne by the state through increased annual appropriations to the TRS match.

The TRS system had no minimum or floor level for retirees until 1973 when a $200 minimum benefit per month was provided. In 1974 this was changed to $15/month/year of service and in 1975 the per month per year minimum was raised again to $20. The $20 floor remained in effect until it was raised to $25 in 1980 and it remains at that level today. DOA, Division of Retirement and Benefits has estimated that the number of retirees affected by the increased benefit would be 439.

In calculating what an appropriate increase would be the Anchorage CPI was used keeping in mind the changes over time since the first per month per year based floor was installed in 1974. A figure based on the amount of CPI change since the 1975 adjustment to $20/month/year was also calculated. Based on these two scenarios, a median figure of $35 was selected bearing in mind that the numbers were based on calculations of inflation only through January 1, 1984.

A chart showing the present minimum benefit levels for specific service longevity and the same representation for the new minimum benefit levels is provided:

Currently TRS contributors vest at eight years of service.

1.) EXISTING MINIMUM BENEFIT LEVELS FOR TRS RECIPIENTS

Eight Years	8 X $25	=	$200
Ten Years	10 X $25	=	$250
Twelve Years	12 X $25	=	$300

2.) PROPOSED MINIMUM BENEFIT LEVELS FOR TRS RECIPIENTS

Eight Years	8 X $35	=	$280
Ten Years	10 X $35	=	$350
Twelve Years	12 X $35	=	$420

An increase in minimum benefit from $25 to $35 is an increase of 40%.

Alaska State Legislature

REP. MAE TISCHER
CHAIRMAN

POUCH V
STATE CAPITAL
JUNEAU, ALASKA 99811

House of Representatives
HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

STAFF REVIEW

House Bill 649, "An Act relating to the minimum monthly retirement benefit under the Teachers' Retirement System; and providing for an effective date," by Representative Bob Bettisworth, raises the minimum amount for eligible members of the Teachers' Retirement System from $25 (under current law) to $35 a month for each year of credited service, excluding adjustments.

The bill provides that the law would take effect July 1, 1984.

(Legislative Reporting Service, 2/20/84, p. 369)

person, or circumstance shall not be affected thereby. If this agreement shall be held contrary to the constitution of any state participating therein, the agreement shall remain in full force and effect as to the state affected as to all severable matters. (§ 1 ch 83 SLA 1970)

Editor's notes. — In article III (1) of the compact, the word "that" was substituted for "his" in the first sentence and the words "the state official" were substituted for "he" in the third sentence by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.640. Designated state official to make contracts. The designated state official to make contracts on behalf of the state according to Article III of the agreement shall be the commissioner. (§ 1 ch 83 SLA 1970)

Revisor's notes. — The words "of education" were deleted following "commissioner" by the revisor of statutes under AS 01.05.031. See AS 14.60.010.

Sec. 14.20.650. Filing and publishing of contracts. True copies of all contracts made on behalf of this state according to the agreement shall be kept on file in the office of the commissioner and in the office of the lieutenant governor. The Department of Education shall publish all contracts in convenient form. (§ 1 ch 83 SLA 1970)

Revisor's notes. — In the first sentence of the section, the words "of education" were deleted following "the commissioner" and "lieutenant governor" was substituted for "secretary of state" by the revisor of statutes under AS 01.05.031.

Collateral references. — 60 Am. Jur. 2d Pensions and Retirement Funds, §§ 39-72.

78 C.J.S. Schools and School Districts, §§ 231-236.

Sec. 14.25.010. Retirement system established. A joint-contributory retirement system for teachers of the state is created. (§ 1 ch 145 SLA 1955; am § 1 ch 89 SLA 1960)

Sec. 14.25.012. Purpose and effective date. (a) The purpose of this chapter is to encourage qualified teachers to enter and remain in service with participating employers by establishing a system for the payment of retirement, disability, and death benefits to or on behalf of the members.

(b) The system created became effective as of July 1, 1955, at which time contributions by the participating employers and members began. (§ 1 ch 13 SLA 1980)

Sec. 14.25.015. Administrator. The commissioner of administration shall appoint an administrator of the system. (§ 1 ch 13 SLA 1980)

Cross references. — For definition of "administrator," see AS 14.25.22063).

Sec. 14.25.020. Powers of the administrator. (a) The administrator may

(1) formulate and recommend to the Alaska Teachers' Retirement Board regulations to govern the operation of the system;

(2) make expenditures from the retirement fund necessary to administer this chapter.

(b) The administrative expenditures permitted by (a) (2) of this section shall be included in the governor's budget for each fiscal year and are subject to appropriation by the legislature. (§ 4 ch 145 SLA 1955; am § 2 ch 142 SLA 1957; am § 3 ch 89 SLA 1960; am § 1 ch 137 SLA 1982)

Effect of amendments. — The 1982 amendment, in subsection (a), rewrote paragraph (1), which formerly read "promulgate and issue appropriate regulations having the force of law to implement this chapter and to cover matters not expressly touched upon or anticipated but implied by this chapter."

Sec. 14.25.022. Regulations. Regulations adopted by the Alaska Teachers' Retirement Board under this chapter relate to the internal

(e) The governing body of the district may advance the teacher on the district salary schedule when the teacher returns to employment if the governing body determines that the teacher's leave of absence was educationally or professionally beneficial to the teacher or the district.

(f) A teacher may make contributions to the retirement fund for each year or portion of a year of leave of absence taken. The contribution shall include the required per cent of the salary the teacher would have received had the leave of absence not been taken, plus the required employer and state contributions that would have been made. Compound interest at the rate prescribed by regulation shall be added as computed from the beginning date of the leave of absence to the date the teacher pays the contribution. (§ 5 ch 104 SLA 1965; am §§ 33, 34 ch 98 SLA 1966; am § 1 ch 44 SLA 1971; am § 1 ch 184 SLA 1972; am § 2 ch 99 SLA 1974)

Editor's notes. — The revisor of statutes, pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982, substituted "the teacher's" for "his" in subsection (a)(1); substituted "the teacher" for "he" in subsections (a)(2), (d), (e), and (f); substituted "the teacher" for "him" in subsection (b); substituted "the" for "his" in subsection (d); and, in subsection (f), substituted "the leave of absence not been taken" for "he not taken the leave of absence."

Sec. 14.20.350. Definition. In AS 14.20.280 — 14.20-350 "teacher" means a certificated member of the teaching, supervisory, or administrative corps in the public schools of the state. (§ 8 ch 134 SLA 1962)

Revisor's notes. — This section was rewritten to eliminate former paragraph (2) which defined "department" by the revisor of statutes under AS 01.05.031 because of the redundancy in light of AS 14.60.010(4).

Article 5. Professional Teaching Practices Act.

Section

370. Teaching profession
380. Creation of a commission
390. Appointment and qualifications
400. Composition of the commission
410. Selection of members

470. Powers of commission
475. Applicability of the Administrative Procedure Act
480. Effect of standards
500. Support
510. Short title

Sec. 14.20.370. Teaching profession. Teachers required by Alaska law to be certificated, instructors in institutions of higher learning, school administrators, school program administrators, and school counselors are within the teaching profession. (§ 35 ch 98 SLA 1966)

Opinions of attorney general. — Unless the duties of an employee of the department of education can be characterized as falling within one of the five categories of this section, that employee cannot be said to fall within the teaching profession for purposes of the Professional Teaching Practices Act. July 15, 1977, Op. Att'y Gen.

The only employees of the department of education who might fit into one of the categories of this section are those who are employed by the department at the Alaska Skill Center or in its centralized correspondence study program. July 15, 1977, Op. Att'y Gen.

Sec. 14.20.380. Creation of a commission. There is a commission of professional educators known as the Professional Teaching Practices Commission. (§ 35 ch 98 SLA 1966)

Sec. 14.20.390. Appointment and qualifications. The commission consists of nine members appointed by the governor and confirmed by a majority of the members of the legislature in joint session. Each member, in addition to having been actively engaged in the teaching profession for at least five years immediately preceding appointment, shall be a citizen of the United States and a resident of the state. (§ 35 ch 98 SLA 1966)

Editor's notes. — The revisor of statutes, pursuant to § 4, ch. 58, SLA 1982 and AS 01.05.031, deleted "his" preceding "appointment" in the second sentence.

Collateral references. — Bias of members of license revocation board. 97 ALR2d 1210.

Sec. 14.20.400. Composition of the commission. The commission consists of the following members:

(1) five classroom teachers;

(2) one principal;

(3) one superintendent;

(4) one representative of the office of the commissioner;

(5) one representative of an Alaska institution of higher learning. (§ 35 ch 98 SLA 1966)

Revisor's notes. — The words "of education" were deleted following "the commissioner" by the revisor of statutes under AS 01.05.031. See AS 14.60.010.

Sec. 14.20.410. Selection of members. (a) Members of the commission shall be selected as follows:

(1) the five classroom teachers from lists of names submitted by recognized Alaska teachers' organizations, each list not to exceed 12 names; however, in lieu of one of the five, one classroom teacher may be selected from a list of not more than four names signed and submitted by not less than 25 teachers who have no affiliation with any organization qualified to submit nomination lists, with the limitation that no teacher may sign more than one list in any year;

(2) the principal from a list of three names submitted by the Alaska Principals Association;

(3) the superintendent from a list of three names submitted by the Superintendents Advisory Commission;

(4) the representative of the office of the commissioner from a list of three names submitted by the commissioner;

(5) the representative of an Alaska institution of higher learning from lists of names submitted by Alaska institutions of higher learning, each list not to exceed three names.

(b) The lists shall be submitted to the commissioner who shall submit them as a group to the governor's office.

(c) At least 30 days before a position on the commission is due to become vacant, the chairman shall cause notice of the impending vacancy to be published and to be conveyed to each organized group eligible to submit a list of nominees. (§ 35 ch 98 SLA 1966)

Editor's notes. — In subsection (a)(4), the words "of education" were deleted following "the commissioner" by the revisor of statutes pursuant to AS 01.05.031. See AS 14.60.010.

Sec. 14.20.420. Term of office. (a) The term of office for each member of the commission is three years and until a successor is appointed, except that members of the first commission shall be appointed as follows: three members for one year, three members for two years, and three members for three years. Members of the first commission shall draw by lot for the initial term of appointment.

(b) Vacancies shall be filled by appointment by the governor for the unexpired term.

(c) No individual may serve more than a total of two 3-year terms.

(d) The commission shall select a chairman from among its members. (§ 35 ch 98 SLA 1966)

Sec. 14.20.430. Dismissal. Any member may be removed by the governor for misconduct, malfeasance or nonfeasance in office, or incapacity. (§ 35 ch 98 SLA 1966)

Sec. 14.20.440. Reimbursement. Members of the commission shall receive per diem according to law and are to be granted administrative leave with full pay by their employer for time spent in the performance of official duties under AS 14.20.370 — 14.20.510. If a member is required to spend more than 15 days in a fiscal year in the performance of official duties under AS 14.20.370 — 14.20.510, the state shall reimburse the employer for costs incurred after the 15th day. (§ 35 ch 98 SLA 1966; am § 1 ch 4 SLA 1975)

Editor's notes. — The word "his" was deleted preceding "official duties" in the second sentence by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.20.450. Responsibilities of commission. (a) The commission shall have the initial responsibility of developing, through the teaching profession, criteria of professional practices in areas including, but not limited to:

(1) ethical and professional performance;

(2) preparation for and continuance in professional services; and

(3) contractual obligations. (§ 35 ch 98 SLA 1966)

Sec. 14.20.460. Duties of commission. The commission shall

(1) establish procedures, and adopt rules to implement the purposes of AS 14.20.370 — 14.20.510;

(2) conduct investigations and hearings on alleged violations of ethical or professional teaching performance, contractual obligations, and professional teaching misconduct;

(3) review the regulations of the department as they relate to teacher certification and recommend necessary changes;

(4) review the decisions of the department regarding the issuance or denial of certificates and in its discretion recommend reversal of decisions. (§ 35 ch 98 SLA 1966)

Sec. 14.20.470. Powers of commission. (a) The commission may

(1) study proposals developed by regular committees of any existing professional organization whose members are within the teaching profession;

(2) subpoena witnesses, place them under oath, and maintain written records;

(3) warn or reprimand members of the teaching profession, if in the judgment of the commission such action is warranted;

(4) suspend or revoke the certificate of a member of the teaching profession for one of the reasons set out in AS 14.20.030 except that in the case of an administrator, the commissioner must concur;

(5) make any recommendation to the board or to school boards which will promote an improvement in the teaching profession;

(6) request assistance through any of the investigative processes of any existing professional teaching organizations when analyzing charges of breach of ethical or professional teaching practices;

(7) appoint an executive secretary, delegate those ministerial functions to executive secretary as the commission may decide and set executive secretary's compensation with a starting salary not exceeding range 26, step B of the pay plan for state employees in AS 39.27.011(a).

(b) A decision issued by the commission with the approval of the commissioner under (a)(4) of this section is final. (§ 35 ch 98 SLA 1966; am § 1 ch 77 SLA 1972; am §§ 3, 4 ch 9 SLA 1975; am § 2 ch 103 SLA 1976; am § 13 ch 94 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "the pay plan for state employees in AS 39.27.011(a)" for "AS 39.27.010" at the end of paragraph (7) of subsection (a).

Editor's notes. — The revisor of statutes, under the authority of AS 01.05.031 and § 4, ch. 58, SLA 1982, deleted "of education" following "commissioner" in subsection (a)(4) and subsection (b), and, in subsection (a)(7), substituted "executive secretary" for "him" and "executive secretary's" for "his."

Legislative history reports. — For report on ch. 77, SLA 1972 (SB 126), see 1972 House Journal, p. 1208.

Sec. 14.20.475. Applicability of the Administrative Procedure Act. The Administrative Procedure Act (AS 44.62) applies to regulations and proceedings under AS 14.20.370 — 14.20.510. (§ 5 ch 9 SLA 1975)

Sec. 14.20.480. Effect of standards. Members of the teaching profession are obligated to abide by the professional teaching standards adopted by the commission. (§ 35 ch 98 SLA 1966)

NOTES TO DECISIONS

Applied in Renfroe v. Green, Sup. Ct. Op. No. 2233 (File Nos. 4394, 4481), 626 P.2d 1068 (1980).

Sec. 14.20.500. Support. In addition to available state funds, the commission shall also be financed by members of the profession in accordance with regulations adopted by the department including, if necessary, an increase in the fees for certificates. (§ 35 ch 98 SLA 1966; am § 1 ch 73 SLA 1973)

Revisor's notes. — The word "adopted" was substituted for "promulgated" by the revisor of statutes under AS 01.05.031.

Sec. 14.20.510. Short title. AS 14.20.370 — 14.20.510 shall be known as the Professional Teaching Practices Act. (§ 35 ch 98 SLA 1966)

OFFICE OF THE ATTORNEY GENERAL

March 16, 1984

The Honorable Mae Tischer, Chair
Health, Education, and Social
Services Committee
Alaska House of Representatives
Pouch V
Juneau, AK 99811

Re: Draft CS for HB 681(HESS)
-- default on and collection of student loans
Our file: 377-114-84

Dear Representative Tischer:

At the request of Bill Lovell, of your staff, I have reviewed Legislative Counsel Lynn Asper's February 29, 1984 draft of a committee substitute for HB 681, which Bill delivered to me this morning. The draft CS makes no substantive change from the original HB 681, and the Department of Law has no objection to it on that basis.

The draft CS makes two minor style changes: (1) it changes the word "which" to the word "that" in two places, which is good; and (2) in the bill's sec. 2, the draft deletes our subsec. (f)'s reference to default "under (o) of this section," while adding to (f) a sentence stating that default occurs if a loan payment is 120 or more days past due. That new sentence in (f) repeats our new sentence in (o) and adds the phrase "under this subsection" in both places. Basically, that looks okay.

Regarding the latter, my only concern is that, when an identical provision is placed in two different locations in the statutes, there is always the potential for one of them to be amended in the future while the other one is overlooked; this could cause confusion and litigation. Lynn's objection to our version is based on his feeling that where our subsec. (f) refers to "default under (o) of this section" it is not really accurate since, although (o) contains what is essentially a definition of "default," default is not really occurring under that subsection. It's a fairly subtle point, but a third approach that would meet both of our concerns would be to change both (f) and (o) to refer to "default as defined in (q) of this section." Then add a new section to the bill that would add a new AS 14.43.120(q) to read "For the purposes of this section, a loan is in default if a loan

payment is 120 or more days past due." (Or perhaps this definition could be added to the definition section for AS 14.43's art. 4 -- AS 14.43.160.)

Thank you for this opportunity to comment.

Yours truly,

NORMAN C. GORSUCH
ATTORNEY GENERAL

TO CSHB 681 (HESS):

Lines 24 - 26, Page 1

Delete "A loan is in default under this subsection if a loan payment is 120 or more days past due."

Line 29, Page 1 - Line 1, Page 2

Delete "A loan is in default under this subsection if a loan payment is 120 or more days past due."

Line 6, Page 2

AS 14.43.120 is amended by adding a new subsection to read:

"(q) For the purposes of this section, a loan is in default if a loan payment is 120 or more days past due."

Article 3. Free Tuition and Fees for Dependents.

Section

80. Free tuition and fees at state-supported educational institutions

---

Revisor's notes. — This article derived from AS 14.40.920 and was renumbered by the revisor of statutes under AS 01.05.031.

Collateral references. — 15A Am.Jur.2d Colleges and Universities, §§ 19, 20.

14 C.J.S. Colleges and Universities, §§ 27, 28.

Sec. 14.43.080. Free tuition and fees at state-supported educational institutions. (a) Any dependent of a bona fide Alaska resident who, while serving during the hostilities involving the United States forces in Southeast Asia, was listed by the United States Department of Defense as a prisoner of war or missing in action in Southeast Asia may attend any state-supported educational institution without payment of tuition and fees.

(b) As used in this section, "dependent" means a dependent spouse or child. (§ 1 ch 176 SLA 1972; AS 14.40.920)

Article 4. Scholarship Loan Program.

Section

90. Scholarship revolving loan fund

140. Enforceability of certain contracts with minors
160. Definitions

Revisor's notes. — This article derived from AS 14.40.751 — 14.40.806 and was renumbered by the revisor of statutes under AS 01.05.031.

Collateral references. — 15A Am.Jur.2d Colleges and Universities, §§ 19, 20.

14 C.J.S. Colleges and Universities, §§ 27, 28.

Absence from, or inability to attend, school or college as affecting liability for, or right to recover back payments on account of, tuition or board. 69 A.L.R. 714.

Validity and application of provisions governing determination of residency for purposes of fixing fee differential for out-of-state students in public college. 56 A.L.R.3d 641.

Increase in tuition as actionable in suit by student against college or university. 99 A.L.R.3d 885.

Absence from, or inability to attend, school or college as affecting liability for, or right to recover back payments on account of, tuition or board. 69 A.L.R. 714.

Sec. 14.43.090. Scholarship revolving loan fund. (a) There is created a scholarship revolving loan fund. The fund shall be used to make scholarship loans to students selected under AS 14.43.090 — 14.43.160. All repayments of principal and interest on scholarship loans shall be paid into the scholarship revolving fund shall be used to make new scholarship loans. If estimated funds available from scholarship loan repayments are inadequate to fully fund estimated scholarship loans for any fiscal year, additional funding from the general fund may be requested and appropriated for that year.

(b) Repealed by § 31 ch 59 SLA 1982.

(c) Repealed by § 31 ch 59 SLA 1982. (§ 1 ch 98 SLA 1971; am § 1 ch 156 SLA 1972; am §§ 1, 2 ch 136 SLA 1974; am § 1 ch 136 SLA 1975; am § 31 ch 59 SLA 1982; AS 14.40.751)

Revisor's notes. — In subsection (a), AS 14.43.090 — 14.43.160 was substituted for a reference to AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1982 amendment repealed subsection (b), which provided for a tuition grant fund, and subsection (c), which provided for the transfer of unobligated funds in the tuition grant fund to the scholarship revolving loan fund.

Legislative history reports. — For report on ch. 98, SLA 1971 (CSHB 415 [Finance] am S), see 1971 House Journal, p. 935.

Sec. 14.43.095. Financial aid committee. (a) The student financial aid committee is composed of the members of the Alaska Commission on Postsecondary Education. The commission may delegate its functions under AS 14.43.090 — 14.43.160 to a committee of its members, with augmented membership as the commission considers appropriate. The executive officer of the commission is the executive secretary of the committee. The Alaska Commission on Postsecondary Education shall administer the program established by AS 14.43.090 — 14.43.160.

(b) Members of the committee serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions.

(c) The committee shall make an annual report reviewing the work of the committee to the governor, the legislature and the private colleges and universities where students receiving tuition grants are enrolled.

(d) The committee shall meet at least once a year. The meetings shall be held at the call of the chairman or upon petition by two members. (§ 1 ch 98 SLA 1971; am § 2 ch 156 SLA 1972; am § 5 ch 78 SLA 1974; am § 3 ch 136 SLA 1974; AS 14.40.753)

Revisor's notes. — The amendments of AS 14.43.095(a) by § 5, ch. 78, SLA 1974 and § 3, ch. 136, SLA 1974, are in conflict, the first act rewriting the subsection to provide that the Alaska Commission on Postsecondary Education will act as the financial aid committee, the second act changing the name and term of members of the existing financial aid selection committee. It is considered, on the basis of the legislative history, apparent legislative intent, and later effective date of the first act, that the re-enactment by ch. 78, SLA 1974 should prevail.

The last part of subsection (c) of this section is obsolete since the tuition grant program was repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

In subsection (a), AS 14.43.090 — 14.43.160 was substituted for a reference to AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Sec. 14.43.100. Applications. (a) Applications shall be submitted to the executive secretary of the committee.

(b) A person whose loan or grant application is not recommended or presented to the committee by the executive secretary may appeal to the committee through the chairman of the committee and the committee shall consider the application. (§ 1 ch 98 SLA 1971; am § 3 ch 156 SLA 1972; am § 4 ch 136 SLA 1974; AS 14.40.755)

Revisor's notes. — The reference to "grant application" in subsection (b) of this section is obsolete in light of the repeal of the tuition grant program by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Sec. 14.43.105. Administration of program. The executive secretary shall administer the programs subject to review by the committee and in accordance with the regulations prescribed by the committee. The promulgation of these regulations is subject to the Administrative Procedure Act (AS 44.62), and a summary of the regulations shall be distributed to each applicant. (§ 1 ch 98 SLA 1971; am § 5 ch 136 SLA 1974; AS 14.40.757)

Sec. 14.43.110. Undergraduate loans. The committee may make a loan, not to exceed $6,000 in any one school year, to an undergraduate student eligible under AS 14.43.125. (§ 1 ch 98 SLA 1971; am § 6 ch 136 SLA 1974; am § 1 ch 153 SLA 1978; am § 1 ch 89 SLA 1981; AS 14.40.759)

Revisor's notes. — AS 14.43.125 was substituted for AS 14.40.765 to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1978 amendment increased the maximum amount of the loan from $2,500.00 to $3,000.00.

The 1981 amendment substituted "$6,000" for "$3,000" following "not to exceed."

Sec. 14.43.115. Graduate loans. The committee may make a loan, not to exceed $7,000 in any one school year, to a graduate student who is eligible under AS 14.43.125 and is pursuing an advanced degree. (§ 1 ch 98 SLA 1971; am § 7 ch 136 SLA 1974; am § 2 ch 89 SLA 1981; AS 14.40.761)

Revisor's notes. — AS 14.43.125 was substituted for AS 14.40.765 to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1981 amendment substituted "$7,000" for "$5,000" following "not to exceed."

Sec. 14.43.120. Conditions of loans. (a) Proceeds from scholarship loans may only be used for books, tuition and required fees, and for room and board.

(b) The loans may only be used to attend a career education program or a college or university approved by the commission, and, if the loans are federally insured, by the United States Commissioner of Education.

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing in a career education program, college or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

(d) Scholarship loans may not be made to a student

(1) for more than five years of undergraduate study;

(2) for more than five years of graduate study;

(3) for more than a total of eight years of undergraduate and graduate study.

(e) Loans are interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section; however, a student is entitled to have a portion of the interest paid in accordance with (l) of this section.

(f) Interest on a loan given under AS 14.43.090 — 14.43.160 is at the rate of five per cent a year.

(g) Repayment of the principal and interest on the loan begins no later than one year after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection.

(h) Security may not be required for the loans; however, provision shall be made for payment of attorney fees and costs of court if either or both are incurred in collection of the amount owed on the loan.

(i) If a loan is in default, the commission shall notify the borrower that repayment of the remaining balance is accelerated and due by sending the borrower a notice by registered or certified mail.

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 50 percent of the total loan:

(1) two — three years residence in the state, 10 percent;

(2) three — four years residence in the state, an additional 10 percent;

(3) four — five years residence in the state, an additional 10 percent;

(4) five — six years residence in the state, an additional 10 percent;

(5) over six years residence in the state, an additional 10 percent.

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the student is eligible for interest payment benefits under (l) of this section during any of the following:

(1) return to student status as provided in (c) of this section;

(2) serving on active duty as a member of the armed forces of the United States;

(3) serving, for up to three years, as a full-time volunteer under the Peace Corps Act;

(4) serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

(5) for a one-time period up to 12 months in which the borrower is seeking and unable to find employment in the United States; or

(6) if the borrower becomes 50 percent or more disabled as certified by competent medical authority.

(*l*) The state will pay the interest on that portion of a loan that is not federally insured during

(1) the period before the beginning of the repayment period of the loan; and

(2) deferments under (k) of this section.

(m) In case of hardship, the committee may extend repayment of a loan for an additional period of up to five years in increments no longer than 12 months each.

(n) Repealed by § 11 ch 89 SLA 1981.

(o) The provisions of (j) of this section do not apply to a loan to a borrower named in a complaint as a defendant in an action by the state or by the commission to secure payment of the unpaid balance of a loan made under AS 14.43.110 or 14.43.115.

(p) For purposes of this section, a person qualifies as a resident if the person is physically present in the state with the intent to remain permanently in the state or, if not physically present in the state, the person intends to return to the state and is absent due to military service. (§ 1 ch 98 SLA 1971; am § 4 ch 156 SLA 1972; am § 6 ch 78 SLA 1974; am § 8 ch 136 SLA 1974; am §§ 1—4 ch 99 SLA 1977; am §§ 3 — 8 ch 87 SLA 1979; am §§ 3 — 9, 11 ch 89 SLA 1981; AS 14.40.763)

Revisor's notes. — In ch. 98, SLA 1971, AS 14.43.120(j)(2) read "four — five years . . . ." This was a typographical error occurring for the first time in the enrolled version of the bill (CSHB 415 [Finance am S]) and has been corrected here.

Effect of amendments. — The 1979 amendment deleted "approved by the commission" following "career education program" and substituted the language beginning "approved by the commission" for "accredited by the accreditation association for the region in which the college or university is located" in subsection (h), substituted "interest" for "non-interest" in subsection (e), added the language beginning "however, a student shall be entitled" to the end of subsection (e), rewrote subsection (g), and in subsection (j), substituted "paid on behalf of the borrower by the state" for "considered a grant," "borrower" for "grantee," and "three years" for "two years" in the first sentence, substituted "paid by the state" for "regarded as a grant" and "interest for up to a total of 40 percent" for "accrued interest" in the introductory language of the second sentence, and substituted "an additional 10 percent" for "20 percent" in paragraph (2), for "30 percent" in paragraph (3), and for "40 percent" in paragraph (4). The amendment also rewrote subsection (k) and added subsections (*l*), (m), and (n).

The 1981 amendment, added the second sentence of subsection (c). In subsection (d), the amendment added paragraphs (1) and (2) and in paragraph (3), substituted "a total of eight" for "six" preceding "years" and added "of undergraduate and graduate study" following "years." In subsection (i), the amendment substituted "shall" for "may" and "borrower" for "student." In subsection (m), the amendment substituted "12" for "six" preceding "months" and deleted "within the 15-year requirement of (g) of this section" following "months each." The amendment also rewrote subsections (g) and (j), added subsections (o) and (p) and repealed subsection (n) which read "Each year spent attending a college or university in Alaska qualifies as a year of employment and residency under (j) of this section, if the borrower resides no less than three years in Alaska after completion of the course for which the loan was granted, and has a total Alaskan residency of ten years time."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.10.031(c) and § 4, Chapter 58, SLA 1982.

Section 8, ch. 99, SLA 1977 provides: "The change in the repayment period of student loans set out in AS 14.40.763(g) [now 14.43.120(g)] as amended by sec. 3 of this Act and the additional basis for granting a deferment of repayment of a student loan set out in AS 14.40.763(k) [now 14.43.120(k)] as enacted by sec. 4 of this Act shall, upon request of the loan recipient, be applied retroactively to the outstanding balance of principal of and accrued interest on loans made under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] as they read before the effective date of this Act."

Section 12 of ch. 89, SLA 1981, provides: "The reenactment of AS 14.40.763(j) [now 14.43.120(j)] in sec. 7 of this Act applies to any student who has obtained a scholarship loan under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] since July 1, 1971."

Legislative history reports. — For a report of legislative intent concerning the loan forgiveness provisions of ch. 89, SLA 1981 (FCCSSB 120), see 1981 Senate Journal p. 1560, 1580, 1981 House Journal p. 2289.

Sec. 14.43.125. Eligibility of students. (a) A person may apply for and obtain a scholarship loan if the person

(1) is a resident of the state at the time of application for a scholarship loan;

(2) meets the requirements of (b) of this section; and

(3) is

(A) enrolled as a full-time student in a career education or associate or baccalaureate or graduate degree program; or

(B) a graduate of a high school, or scheduled for graduation from a high school within six months, with sufficient credits to be admitted to a career education program or to an accredited college or university.

(b) In addition to the requirements of (a) of this section, to obtain a scholarship loan a person must have been a resident of the state for at least two years at the time of application for the loan. For purposes of

this subsection, a person qualifies as a resident of the state if at the time of application for the loan the person

(1) has been present in the state for at least two years unless an absence from the state during any part of the two years was due to military service; or

(2) is a person who is dependent on a parent or guardian for care, and the parent or guardian has been present in the state for at least two years. (§ 1 ch 98 SLA 1971; am § 10 ch 89 SLA 1981; AS 14.40.765)

Effect of amendments. — The 1981 amendment rewrote this section.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.43.130. Selection criteria. (a) The selection committee shall grant loans based on total point accumulations under the subsection with priority going to those applicants with the highest point accumulations, except as provided in (b) of this section for loan applications completed before May 15 of each year. Points shall be awarded to applicants based upon student status and continuous Alaskan residency, according to the following schedule:

(1) student status:

(A) continuing undergraduate and graduate students with existing Alaska scholarship loans . . . . . 4 points

(B) continuing undergraduate and graduate students without existing Alaska scholarship loans . . . . . 3 points

(C) freshmen . . . . . 2 points

(D) new graduate students without existing Alaska scholarship loans . . . . . 1 point

(2) continuous Alaskan residency:

(A) students with continuous Alaskan residency of 10 years or more . . . . . 3 points

(B) students with continuous Alaskan residency of at least 5 years and less than 10 years . . . . . 2 points

(C) students with continuous Alaskan residency of more than 2 years and less than 5 years . . . . . 1 point

(3) students attending Alaska colleges or universities . . 1 point

(b) In awarding loans the selection committee shall award loans to applicants based upon the earliest date of completed applications if

(1) the applicant has accumulated at least 5 points under (a) of this section; and

(2) the applicant has filed a completed application not later than May 15 of the year for which the loan is requested. (§ 1 ch 98 SLA 1971; am § 2 ch 87 SLA 1979; § 3 14.40.767)

Effect of amendments. — The 1979 amendment rewrote this section.

Editor's notes. — Section 1, ch. 87, SLA 1979 provides: "The legislature determines that

"(1) there are no incentives in the student loan program for residents of Alaska to attend colleges and universities in Alaska as compared with colleges and universities outside Alaska;

"(2) the result of the lack of incentives is that 64.9 per cent of all undergraduate student loans and 92.9 percent of graduate student loans go to students attending colleges and universities outside Alaska;

"(3) the amount of the average loan to undergraduate students attending colleges and universities in Alaska is lower than the average of similar loans in all but one of the 10 western states and the amount of the average loan for graduate students is the lowest in the West;

"(4) the funds spent on education in Alaskan colleges and universities go further than when the funds are spent out of state; and

"(5) it would be an aid to the Alaskan economy if the funds in the student loan program were spent for education in Alaskan colleges and universities."

Sec. 14.43.135. Discrimination prohibited. The student loan program shall be carried out without regard to the race, creed, sex, color, ancestry, national origin, or membership in fraternal or political organizations of the student applying for the loan. (§ 1 ch 98 SLA 1971; AS 14.40.769)

Sec. 14.43.140. Enforceability of certain contracts with minors. A written obligation entered into by a minor at least 16 years of age, evidencing a loan or other assistance received by the minor from any person for the purpose of furthering the minor's education in a career education program or an institution of higher learning, is enforceable against the minor with the same effect as if the minor were, at the time of its execution, 19 years of age, if the person making the loan has before making the loan a certification from the institution that the minor is enrolled in the institution or has been accepted for enrollment. (§ 1 ch 98 SLA 1971; AS 14.40.771)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.43.160. Definitions. In AS 14.43.090 — 14.43.160

(1) "career education" means a course or program in vocational-technical training or education approved by the commission;

(2) "full-time student" means an undergraduate or career education student who is enrolled and is in regular attendance at classes for at least 12 semester hours of credit or the equivalent during the semester or a graduate student who is enrolled and is in regular attendance at classes for at least nine semester hours of credit or the equivalent; any combination of semester hours of credit, or the equivalent, aggregating to the requisite number of semester hours and undertaken during a semester at two or more public or private institutions of higher education operating under a consortium constitutes full-time student status;

(3) "part-time student" means a student who is enrolled and is in regular attendance at classes for at least three but less than the semester hours of credit required for full-time student status under (2) of this section during the semester;

(4) Repealed by § 11 ch 89 SLA 1981.

(5) "school year" means the period from September 1 of one year through August 31 of the following year;

"commission" means the Alaska Commission on Postsecondary Education;

(7) Repealed by § 7 ch 246 SLA 1976.

(8) "federally insured" means a loan covered by the provisions of the Guaranteed Student Loan Program of Title IV, Part B, of the Higher Education Act of 1965 (P.L. 89-329), as amended. (§ 5 ch 156 SLA 1972; am § 8 ch 78 SLA 1974; am §§ 18 — 20 ch 136 SLA 1974; am § 5 ch 136 SLA 1975; am § 7 ch 246 SLA 1976; am §§ 5 — 7 ch 99 SLA 1977; am § 9 ch 87 SLA 1979; am § 11 ch 89 SLA 1981; AS 14.40.806)

Revisor's notes. — Part-time student is defined in paragraph (3) above but is not used in the statutes.

AS 14.43.090 — 14.43.160 was substituted for AS 14.40.751 — 14.40.806 to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1979 amendment added paragraph (8).

The 1981 amendment repealed paragraph (4) which defined "resident."

Editor's notes. — Title IV, Part B of the Higher Education Act of 1965, referred to in paragraph (8), may be found in 20 U.S.C. §§ 1071 et seq.

Article 5. Memorial Scholarship Revolving Loan Fund.

Section	Section
250. Declaration of purpose	310. Selection
255. Fund created	315. Discrimination prohibited
300. Limits on, conditions of loans	320. Administering authority
305. Repayment of loans	325. Funding

Revisor's notes. — This article derived from AS 14.40.810 — 14.40.845 and was renumbered by the revisor of statutes under AS 01.05.031.

Sec. 14.43.250. Declaration of purpose. (a) The legislature may pay tribute to the memory of Alaskans who, by the example of their lives, or by their distinguished contribution and service to this state, their community or their profession, exemplified the best that is the challenge of "The Great Land" by the creation of memorial scholarships as a part of a general memorial scholarship revolving loan fund, setting out the purpose for which each is created, and the conditions applicable to each scholarship.

(b) The purposes of the several memorial scholarship accounts in the memorial scholarship revolving loan fund are as follows:

(1) the Michael Murphy memorial scholarship perpetuates the memory of Michael Murphy, a member of the Alaska State Troopers, who, while on leave from that division, gave his life for his adopted country in Vietnam on May 22, 1968;

(2) the Carroll L. "Butch" Swartz memorial scholarship perpetuates the memory of Carroll L. "Butch" Swartz, of Juneau, who was a student intern with the Criminal Justice Planning Agency and the Governor's Commission on the Administration of Justice during the summer months of 1972 and 1973 and whose accidental and untimely death in November 1973, occurred while he was completing his undergraduate education at Yale University, thus never realizing his educational goals or career objective;

(3) the Harvey Golub memorial scholarship perpetuates the memory of Harvey Golub, of Juneau, who was chief engineer of the bridge design section of the Department of Highways of the State of Alaska and whose accidental and untimely death September 13, 1971, cut short a widely-respected career in civil engineering; and

(4) the Robert L. Thomas memorial scholarship perpetuates the memory of Robert L. Thomas, of Juneau, who as Deputy Commissioner of Education, and for 13 years as a member of the professional staff of that department contributed significantly to the creation, operation and administration of a sound system of public education in Alaska and whose tragic and untimely death March 12, 1974, terminated a distinguished career in education and public administration that long will be exemplary for those who aspire to service in that profession. (§ 21 ch 136 SLA 1974; AS 14.40.810)

Sec. 14.43.255. Fund Created. (a) There is created a memorial scholarship revolving loan fund. The fund shall be used to provide educational scholarship loans to students selected under AS 14.43.250 — 14.43.325. All repayments of principal shall be paid into the memorial scholarship revolving loan fund and shall be used to make new scholarship loans.

(b) Each memorial scholarship, the purpose of which is set out in AS 14.43.250(b), is a separate account in the memorial scholarship revolving loan fund created under (a) of this section. (§ 21 ch 136 SLA 1974; AS 14.40.815)

Revisor's notes. — References to AS 14.40.810 — 14.40.845 and AS 14.40.810(b) were changed to AS 14.43.250 — 14.43.325 and AS 14.43.250(b), respectively, to conform to the renumbering of those sections by the revisor of statutes under AS 01.05.031.

Sec. 14.43.300. Limits on, conditions of loans. (a) A scholarship loan to a recipient under AS 14.43.250 — 14.43.325 may not exceed $2,500 a school year for an undergraduate student or $5,000 a school

SUBJECT: CSHB 681 (HESS)
(Student loans)

TO: Representative Mae Tischer
Chairman, House Health, Education
and Social Services Committee

FROM: Linn H. Asper
Legislative Counsel

At the request of your committee I prepared a draft committee substitute for House Bill No. 1681, relating to student loans. This draft, dated February 29, 1984, makes technical changes to the original bill in order to make it more clear and to put it in the form used by this office for drafting legislation. The changes I have made do not affect the substantive provisions of the bill.

ANALYSIS:

This bill would transfer the responsibility for the payment of the cost of post mortem examinations, autopsies, and related services, including transportation and facilities usage, to the Department of Health and Social Services upon the passage of this legislation. The FY 84 operating budget for the Court System contains funding for the payment of these costs. Upon the passage of this bill, the Court System would transfer the unobligated balance of FY 84 funds to Health and Social Services. The FY 85 budget for the Court System contains $539,100 of funds for these costs. The entire amount would be transferred to the other agency.

APPLICATION FOR FOOD STAMPS AID TO FAMILIES WITH DEPENDENT CHILDREN

(DATE STAMP HERE)

We will consider this application without regard to race, color, sex, age, handicap, religion, national origin, marital status, or political belief. If you believe you have been discriminated against, you can file a complaint with the Division of Public Assistance or the Department of Health & Social Services. Food Stamp complaints may also be sent to USDA FNS Western Region, 550 Kearney St. San Francisco, California 94108

FOR OFFICE USE ONLY:

Decision Office _____
GR APPLICATION
☒ New ☐ Review or RC ☐ Expedited Service

INSTRUCTIONS FOR COMPLETING APPLICATION

CAREFULLY READ and complete all of the questions in the application. All of the questions must be completed before your application can be processed. If a question does not apply to your situation, write "N/A". If you don't know or don't understand what the question means, write "don't know" or "not sure". Your eligibility worker or fee agent will assist you with these questions during your interview.

We are required to take action on your application within 30 days from the time it is received in our office. If you are applying for food stamps, you will receive them for the entire month in which you first apply. Most clients have to have an interview before we can see if they are eligible, but you do not have to wait for an interview before you turn in your application.

When you are interviewed, be sure to bring with you proof of all income received by all household members; for example—pay stubs, award letters from government benefits such as Social Security income, Unemployment Insurance, BIA grants, and other similar income.

You must list the Social Security number of each person for whom you want to receive a cash payment. If someone doesn't have a Social Security number, your eligibility worker or fee agent will help you apply for one. We will also need proof of the age and relationship of the children applying for AFDC (birth certificate, baptism papers, or school records will give us the necessary information). If you are applying for food stamps, all members age 18 and over must provide a Social Security number and certain members must also complete a work registration form.

We also need the following: rent or house payment receipts, utility bills, checking or savings account statements, child care receipts and work related expense receipts.

ASSISTANCE REQUESTED: Check the boxes which match your situation:

- ☐ FOOD STAMPS ONLY (available for most low-income households)
- ☐ AFDC ONLY (a cash payment for families in which one or both parents of a child(ren) under 18 are absent, deceased, disabled, or incapacitated)
- ☐ BOTH AFDC and FOOD STAMPS

7 AAC 35.090. CARE OF HUMAN REMAINS. (a) All human remains shall be disinfected by approved disinfecting solutions so that there will be no danger of spreading disease or infection.

(b) Embalmers shall take every precaution to prevent the spread of infections from persons who have died of communicable diseases.

(c) It shall be the duty and responsibility of all physicians licensed to practice medicine in the State of Alaska who are in attendance or any physician who by virtue of his appointment as medical examiner or local health officer shall have knowledge or suspect that a person has died of a communicable disease which may reasonably constitute a threat to the health of morticians and their staffs, village officials, clergymen, and all others involved in the handling and preparation of a dead human body, to inform and counsel such individuals promptly of this hazard or potential threat to their health and safety. Appropriate precautionary measures to prevent the spread of communicable diseases from deceased human bodies to employees of mortuary establishments, persons contracted to provide services involved in the preparation and handling of dead human bodies, and to the general public, shall be undertaken at all times and shall be the responsibility of the funeral director, or in his absence, the senior village official present.

(d) When death has occurred from smallpox, plague, anthrax, diphtheria, meningococcal meningitis, cholera, epidemic typhus, or any unusual and highly communicable disease, the body shall be handled and prepared under strict quarantine regulations. If one of the above named communicable diseases occurred or was reasonably suspected to be present, the body shall be embalmed by a licensed embalmer and immediately placed in a casket or coffin which shall be permanently closed unless the Commissioner of Health and Social Services shall make a specific exception. (In effect before 7/28/59; am 2/21/71, Reg. 37)

Authority: AS 18.05.040

7 AAC 35.100. TRANSPORTATION OF THE DEAD. (a) The transportation of human remains dead of any diseases mentioned in sec. 90 of this chapter shall be permitted only under the following conditions:

(1) the body shall be thoroughly embalmed with disinfectant solution; and

(2) all orifices shall be closed with absorbent cotton; and

(3) the body shall be washed with the solution and placed immediately in an hermetically sealed casket; and

(4) the casket encased in a suitable shipping container acceptable to the Commissioner of Health and Social Services.

(b) The transportation of human remains dead of any cause other than those diseases mentioned in sec. 90 of this chapter is permitted only under the following conditions:

(1) when the destination can be reached within the state within 24 hours after death, an unembalmed body shall be thoroughly washed, all orifices shall be closed with absorbent cotton, and the body dressed in a clean sheet and placed in an hermetically sealed metal shipping container;

(2) human remains shipped into or out of Alaska must first be embalmed;

(3) when the body cannot reach its destination within 24 hours after the death, the body shall be thoroughly embalmed, and placed in a casket; the casket encased in a suitable shipping container acceptable to the Commissioner of Health and Social Services;

(4) exceptions to (b) of this section may be approved only by the Commissioner of Health and Social Services where circumstances render the provisions of (b) of this section impossible to carry out.

(c) An outside shipping container is required in all instances except when the casket is transported in a hearse. The outside container shall be of wood, canvas, reinforced nylon, composition board, or other suitable material. (In effect before 7/28/59; am 2/21/71, Reg. 37)

Authority: AS 18.05.040

7 AAC 35.110. REQUIREMENTS OF FUNERAL ESTABLISHMENTS. (a) A funeral establishment shall

(1) repealed (Eff. 12/29/77, Reg. 64);

(2) have a sanitary preparation room; and

(3) be subject to approval and inspection by the department.

(b) Repealed. (Eff. 12/29/77, Reg. 64) (Eff. 2/21/71, Reg. 37; am 12/29/77, Reg. 64)

Authority: AS 18.05.040

7 AAC 35.120. PREPARATION ROOM REQUIREMENTS. (a) The walls and ceiling of the preparation room shall be covered with tile, plaster, sheet rock, composition wall board or brick. With the exception of tile, all these materials shall be finished off with an impervious, readily washable or cleanable material.

(b) Outside ventilation shall be provided for by windows or transoms. If outside ventilation cannot be provided for by these means, an eight-inch pipe shall be installed to run from the ceiling of the room to the roof of the building, or from the side wall to the outside of the building. The installation shall be arranged so that it will not be a public health hazard.

(c) The preparation room shall be private and shall not be located near a public passageway. It shall contain only equipment necessary for preparing bodies for burial or shipment, and no toilet or commode.

(d) Windows and exterior doors shall be installed in such a way that the room shall be obstructed from view from the outside and so that fumes and odors are prevented from entering other parts of the building.

(e) The equipment for preparation rooms shall consist of the following:

(1) an operation or embalming table, which has rustproof metal or porcelain or glass top and a drainage opening at the lower end;

(2) a covered waste can, and sink with running water and backflow prevention and sewage connections;

(3) a cabinet, and instrument table, instruments, all necessary supplies including disinfectants and antiseptics, a sterilizer for instruments, and several pairs of rubber gloves;

(4) a first aid emergency kit for personal use.

(f) A water supply shall be available that complies with the Water Supply chapter of the Administrative Code.

Title 45, Code of Federal Regulations, sec. 233.90(c)(v)(1), when the 18-year-old meets all of the following criteria:

(A) was an eligible recipient of Aid to Families with Dependent Children (AFDC) assistance in the month preceding his 18th birthday;

(B) is a full-time high school student living at home with a relative specified in 45 CFR 233.90(c)(v)(1); and

(C) other children and the specified relative are in the home and continue to be eligible for AFDC; or

(2) a person who has applied for but who is not yet receiving benefits under the Adult Public Assistance, Alaska Longevity Bonus, or Supplemental Security Income programs.

(b) Persons eligible for cash payments under (a)(2) of this section may receive them for a period not to exceed six months.

(c) There are no restrictions on the use of cash payments. (Eff. 3/23/78, Reg. 65)

Authority: AS 47.05.010
AS 47.25.120

7 AAC 47.130. FUNERAL AND BURIAL EXPENSES. (a) General relief assistance payments which may not exceed $750 per deceased person will be paid to the vendor for the following funeral and burial services provided in the state:

(1) preparation and embalming;

(2) provision of a cloth-covered wooden casket with at least four handles and a padded and lined interior, which is similar to Sound Casket Company No. 199 gray domet, Puget Sound Casket Company No. 0 gray flannel square, or Casket Distributors Incorporated No. A-2 welfare regular service flannel cover;

(3) chapel service with minister;

(4) use of a hearse; and

(5) other services, facilities, and equipment necessary for a dignified burial;

(b) General relief assistance will be paid to a vendor of funeral and burial services which exceed the monetary limitation provided in (a) of this section, for the following:

(1) the cost of the least expensive municipal or private cemetery plot that is reasonably available in the state, whichever is less, or the cost of cremation if cremation is requested by the next-of-kin;

(2) the reasonable cost of opening and closing the grave;

(3) the cost of hermetic sealers, an oversized casket, clothing and extraordinarily lengthy storage of the deceased if the service is necessary and authorization is given by a regional manager of the division before the service is rendered;

(4) the cost of transporting the deceased from the place of death to the place of burial if the deceased was transported from the last place of residence to the place of death at public expense and authorization is given by a regional manager of the division before transporting the deceased person.

(c) One assistance payment will be made for services under (a) and (b) of this section. This payment will be made to the vendor that prepares the deceased person for burial. The vendor who receives payment from the division shall immediately refund to the division any amounts received from a prior resource specified in sec. 160(b) of this chapter. (Eff. 3/23/78, Reg. 65; am 11/8/80, Reg. 76)

Authority: AS 47.05.010
AS 47.25.120
AS 47.25.300

7 AAC 47.140. ELIGIBILITY. Eligibility for General Relief and General Relief Medical assistance is based upon

(1) financial need;

(2) immediate and specific need for subsistence items such as rent, food, fuel, transportation, burial, or medical supplies and services;

. (3) lack of prior resources listed in sec. 160(b) of this chapter of any kind sufficient to meet the specific need:

(4) age at which applicant may be eligible, as set out in sec. 170 of this chapter; and

(5) residence in the State of Alaska at the time of application; proof of residence may be required;

(6) registration for work with the Alaska Department of Labor and acceptance of any bona fide offer of employment. This requirement applies to all persons 18 through 59 years of age except a person

(A) who has been determined by a physician to be mentally or physically incapacitated and that incapacity prevents the person from engaging in gainful employment;

(B) who is attending high school full-time; or

(C) who is needed in the home to care for a relative who has been determined by a physician to be mentally or physically incapacitated. (Eff. 3/23/78, Reg. 65; am 5/2/79, Reg. 70; am 5/24/80, Reg. 74)

Authority: AS 47.05.010
AS 47.25.120

7 AAC 47.150. DETERMINATION OF FINANCIAL ELIGIBILITY. (a) Financial eligibility exists only if the need standard exceeds monthly net income, as determined under this section.

(b) Need is determined by use of one of the following tables:

(1) Adult-only households

Number of Adults	Need Standard (Rent Under $35/mo.)	Need Standard (Rent $35 or more/mo.)
1	$235	$300
2	335	400
3	435	500
4	535	600
5	635	700

$100 must be added for each additional adult.

(2) Households with children and adults

Number of Persons	Maximum Need Standard
Parent plus 1 child	$300
Parent plus 2 children	350
Parent plus 3 children	400
Parent plus 4 children	450
Parent plus 5 children	500
Parent plus 6 children	550
Parent plus 7 children	600

$100 must be added for each additional adult, and $50 for each additional child.

(c) Monthly net income is determined by

(1) counting all income earned or unearned, from any source, except payments made under the Alaska Native Claims Settlement Act, received during the calendar month in which application is made, and all income reasonably expected to be received in time to meet the specific needs (income received weekly is multiplied by 4.3, that received every two weeks by 2.15, that received twice monthly by 2, and that received monthly by 1);

(2) subtracting all mandatory payroll deductions (federal and state income tax, FICA, unemployment insurance, union dues, insurance premiums, and retirement); and

(3) not counting income received in the month just before the calendar month in which application is made, but considering this a resource under sec. 160 of this chapter.

(d) Persons who are included in the household, and who will therefor have their financial needs, income, and resources considered in determining financial eligibility, include the applicant, all persons related to the applicant by blood, marriage, or adoption who reside with him, and all unrelated persons whose needs are included in the request for assistance and who would benefit directly from the requested assistance, or who would benefit directly even if their needs are not included. (Eff. 3/23/78, Reg. 65)

Authority: AS 47.05.010
AS 47.25.130

7 AAC 47.160. RESOURCES. (a) General Relief or General Relief-Medical assistance may

not be granted if the applicant, despite an excess of need over income, has other resources available and adequate to meet the specific need. Resources that will affect eligibility are classified as prior or personal.

(b) Prior resources include but are not limited to

(1) coverage by Social Security, workman's compensation, or by medical and hospital insurance;

(2) eligibility for assistance from categorical programs such as Adult Public Assistance and Aid to Families with Dependent Children;

(3) qualification to receive assistance from the Veteran's Administration, Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), Alaska Fisherman's Fund, U.S. Seaman's Act program, Crippled Children's Service, Office of Vocational Rehabilitation, Medicaid, Medicare, or free clinics;

(4) potential treatment or assistance from the United States Public Health Service and Bureau of Indian Affairs health care and general relief programs; and

(5) availability of cash, medical, and subsistence items and assistance from the Salvation Army, Red Cross, Lion's International, and other charitable organizations.

(c) Personal resources are

(1) liquid assets such as cash, savings, stocks, or bonds totaling more than $500;

(2) more than one each of these: automobile, snowmobile, boat, or a combination of all three, unless they are used to produce income; a combination of any two is not considered a resource for the purpose of this section;

(3) real property, except for the applicant's home and the land upon which it stands and land contiguous to it, unless the property is for sale at or below fair market value, is producing reasonable income, or is essential to the employment of the applicant;

(4) credit sufficient to directly or indirectly meet the specified need. (Eff. 3/23/78, Reg. 65)

Authority: AS 47.05.010
AS 47.25.130

7 AAC 47.170. AGE AT WHICH APPLICANT MAY BE ELIGIBLE. (a) Applicants 18 years of age or older may be found eligible for General Relief and General Relief Medical assistance.

(b) An applicant under 18 years of age may be found eligible if he meets at least one of the following requirements:

(1) is living apart from parents or guardian and managing his own financial affairs, regardless of the source of his income;

(2) is 16 years of age or older and married, living with his spouse at the time of application;

(3) is in need of assistance to pay medical expenses for the diagnosis, prevention, or treatment of pregnancy or for diagnosis, and treatment of venereal disease; or

(4) is a female seeking abortion, or treatment following an abortion. (Eff. 3/23/78, Reg. 65)

Authority: AS 09.65.100
AS 47.05.010
AS 47.25.120

7 AAC 47.180. PROVISION OF MEDICAL BENEFITS. The division shall provide a written certification of eligibility for General Relief Medical benefits upon a form or card specified by it. This certification signifies that the person or persons named on it have been found eligible for medical assistance for the period of time stated. This certification neither guarantees to the recipient that certain medical services and supplies will be furnished nor guarantees to the provider that he will receive unrestricted payment for any and all services and supplies he provides. (Eff. 3/23/78, Reg. 65; am 4/15/82, Reg. 82; am 5/25/82, Reg. 84)

Authority: AS 47.05.010
AS 47.25.170

Editor's Note: Emergency amendments of 7 AAC 43.005(c), 7 AAC 47.030, 7 AAC 47.050, 7 AAC 47.060, 7 AAC 47.070, 7 AAC 47.110, 7 AAC 47.180, 7 AAC 47.200, 7 AAC 47.210, 7 AAC 47.220 and 7 AAC 47.900, filed on 4/15/82 (effective 5/17/82), were repealed on 5/25/82 and are therefore not being printed. The text of these provisions appears as it did before the emergency amendments.

Memorandum

Alaska Court System

TO:

Alaska State Troopers, Kotzebue
Kotzebue Police Department, Kotzebue

DATE : September 17, 1982

FROM: Judge Jones and
Magistrate Sinkey

SUBJECT: Funeral expenses in
Coroner's cases

As of March 31, 1982, the Bureau of Indian Affairs and the Maniilaq Association ceased paying funeral expenses, i.e. embalming, casket and clothing, for deceased Alaska Natives taken to Anchorage for autopsy under Court Order.

The State Division of Public Assistance will now pay such funeral expenses up to $750 for persons eligible under the general relief burial requirements. The Court System will continue to pay autopsy and transportation costs.

To obtain this assistance, the deceased's family or next of kin should contact the Division's Kotzebue Office to report the name of the deceased and request burial assistance.

The Division of Public Assistance is open Monday through Friday from 8:00 a.m. to 4:30 p.m., telephone number 442-3451.

RE: Interim Report Concerning Meeting on Coroner Cases

Dear Participants:

As you recall, we met on November 12, 1982 regarding coordinating and solving problems we all are having with coroner cases.

We are still working on an information sheet to send out or to furnish those agencies making the initial contact with families. Meanwhile, our Clerk of Court, May Pannick, found an excellent article in the Tanana Chiefs, Incorporated publication which I am enclosing. This would seem to furnish an ideal beginning for an information sheet. Perhaps this information could be published in the publications of Maniilaq, NANA, Northwest Arctic School District.

Please note that TCC has a social service representative to advise families concerning funeral and burial arrangements. It would seem that Maniilaq could provide a similar type of representative as we discussed during our meeting.

I will continue working on the various items we discussed at the meeting.

Sincerely,

Paul B. Jones

Paul B. Jones
Superior Court Judge

Family death requires special arrangements

Though grief and shock often complicate arrangements after a relative's death, the situation can be made easier by following simple steps. TCC family services department offers the following advice:

-To avoid confusion, select one person to speak for the family in the funeral and burial arrangements. Please give TCC's social service representative the contact person's name.

-If the death was unattended by a doctor, law enforcement officials must be notified first. If an autopsy is required, those officers will arrange to transport the body. Autopsies are mandatory for all suicide and homicide deaths, and usually are required for accidental drownings or shootings, deaths unattended by a doctor or when the cause of death is unknown.

-If a person dies in a village and an autopsy is required, the state will pay to transport the body to the city and home again for burial. The state won't pay the funeral home bill unless the family qualifies for relief. If a person was taken away from home at state expense and then dies, the state will pay to transport the deceased home.

-If someone dies in a city or must be shipped to the city for an autopsy, embalming is required. Embalming also is required if the body isn't buried within 24 hours. A funeral home must be selected and authorities notified when family wants the body transported for burial preparation. State law prohibits a funeral home from keeping the body until payment is received, but the funeral home will want to arrange immediate payment.

-If the deceased was in a public assistance program or had little or no income at the time of death, the family should apply to the state's public assistance program for general relief assistance for burial expense. It is crucial to apply before making fee arrangements with the funeral home. If the deceased is eligible for general relief, the state will pay $750 for the least-expensive burial. Without the state's agreement to pay, the least expensive funeral is about $1200. If you arrange a funeral, make a partial down payment and then apply for general relief, you will be denied. Also, you can't have the state pay $750 then pay extra for a more expensive funeral.

-If you live in a village and want state aid to pay for the funeral, have your fee agent send the application immediately to Fairbanks. Or apply in person at the public assistance office. Applications are taken only between 8 and 9 a.m. weekdays.

TCC is encouraging the public assistance office to treat these cases as emergencies and see people immediately. TCC is asking public assistance to make immediate determinations so the family and funeral home will know how to plan. You can help by bringing or sending to public assistance pay stubs and other proofs of income for the deceased during the month he/she died. Incomes of family members living in the same household must also be verified.

Doyon Ltd. offers a $500 grant to the family of any deceased Doyon stockholder for the traditional potlatch following a death. Contact Kitty Harwood, 201 First Avenue., Fairbanks, 452-4755.

If the death is connected with a violent crime, the family may apply for special compensation. It is important to keep all receipts and costs and submit these with the application to Violent Crimes Compensation Board, Pouch N, Juneau, 99811. Applications must be made within two years of the violent death.

TCC no longer can financially assist with the burial. The burial procedure is complicated, so notify and work with your subregional TCC office.

Several villages are collecting reserve funds to assist families in need. These "revolving loans" are intended for cases when state public assistance and/or violent crime compensation isn't available.

Ms. Delores Wilks
Coroner
Alaska Court System
303 K Street
Anchorage, Alaska 99501

RE: Frederick Weinard, deceased
Coroner Case No. 2KB-83-03cor.

Dear Ms. Wilks:

On February 17, 1983, I ordered the remains of Frederick Weinard to Witzleben Funeral Home in Anchorage for autopsy. It was the usual order for post mortem-autopsy and nothing was required by this court except the post mortem and the subsequent return of the body for ultimate family burial in the village of Candle.

Surviving members of the family wished only two small services performed by Witzleben, these were to perform basic cosmetic work and to dress the body in the clothing supply by the family. The total responsibility required of the funeral home was performed by the following services:

1. Furnish the facilities for the ordered autopsy.

2. Removal of remains from airport.

3. Dressing and cosmetic work.

4. Return of the body in the seigler case, to the airport for its ultimate return to the village of Candle.

These basic needs were conveyed to Witzleben by this court and by close family friends in Anchorage who was prepared to pay for the dressing and cosmetic work.

At about the time the autopsy was taking place, the friend of the family, Ms. Karen Upchurch, called from Anchorage and was very upset after having been informed by Witzleben that costs to the family would be in the amount of $770. Witzleben was preparing to perform and charge for the following services:

1. Basic operating fee $175.00

2. Preparation of remains $230.00

3. Dressing and cosmetology $95.00

4. The obtaining of the death certificate and "administrative costs" $70.00

5. Recording of statistical data $100.00

6. Use of operating room $100.00

For a grand total of $770.00

Mind you, these were charges and services intending to recover from the family and were over and above the usual cost to the court system for use of the facilities and transportation both ways. These charges usually run in the neighborhood of $110.00 total.

The body was still at autopsy and the listed services had not yet been performed. In order to protect the family from these charges I ordered that the body be returned without further services and that the services already performed be itemized and broken down in detail. When Witzleben discovered that they could not charge the family as anticipated, they requested permission from your office to transfer the remains to another mortuary.

Ms. Wilks, this is the third time in the period of the year where frantic and unhappy family members and relatives have approached this court concerning attempted services and charges by Witzleben. I have not yet had problems steming from any other mortuary. In my opinion, the native families of the NANA Region are being victimized by Witzleben and I will in the future, direct autopsy to other Anchorage funeral homes.

Yours very truly,

Robert D. Sinkey
District Magistrate

MEMORANDUM

RECEIVED
OCT 14 1983
Office of Administrative Director
Alaska Court System

TO: Stephanie Cole

FROM: Karla Forsythe

DATE: October 13, 1983

SUBJECT: Suspension of funeral home

I have attached a portion of the West Virginia Board of Regents Purchasing Guidelines which discusses suspension of vendors.

As you may know, Fraya brought back the West Virginia manual from a government purchasing conference she attended. The manual is excellent, and I am using it as a basis for a first draft. However, there are several sections which are more relevant to a large government institution such as a school system, and which are not appropriate for use by the court system. The suspension provisions fall in this category.

It occurs to me that the provisions might be useful to you in developing a procedure for terminating the services of a funeral home which has been creating problems. The provisions are based on West Virginia statutes, and as far as I can tell, Alaska has no similar provisions. But they might be helpful. The procedures set forth comport with fundamental due process principles, and make sense from a practical standpoint.

Karla

ARTICLE SEVEN

SUSPENSION

In accordance with Section 5A-3-39 of the State Code, any person suspended under said provisions shall not be eligible to sell or offer to sell commodities or printing to the BOR.

SUSPENSION OF VENDORS BY BOARD OF REGENTS

In accordance with Section 18-20-10f of the State Code, the BOR shall have the power and authority to suspend, for a period of time not to exceed one year, the right and privilege of a person to bid on purchases of the board when there is reason to believe that such a person has violated any of the provisions in Section 18-26-10c through 18-26-10f of the State Code or the rules and regulations of the BOR pursuant thereto.

a. These rules and regulations require implicitly, and explicitly herein, that vendors honor and fulfill the terms and obligations imposed upon them by virtue of contracts entered into with the BOR. Adherence is hereby required to contractural provisions relating to the quantity and quality of commodities furnished or services rendered and to the price therefore and to the date(s) of delivery or performance. Further, adherence is required to all federal, state and local laws, regulations, and ordinances governing a vendor's performance or conduct, which laws apply to the vendor because of a contractural relationship with the BOR entered into pursuant to the provisions of Article 26 of Chapter 18 of the Code or these regulations.

b. The power and the authority of suspension vested in the BOR by virtue of Section 18-26-10f of the Code may be exercised when the BOR has reason to believe that:

1. A vendor has exhibited a pattern of poor performance in fulfilling his contractural obligations to the BOR in more than one contract (purchase order). "Poor performance" may include documented, repeated errors of omission or commission which constitute technical breaches of contract but which, taken individually, are insufficient to warrant termination of the relevant contract by reason of default. The essence of this ground for suspension is continued and repeated instances of a vendor proviling or furnishing commodities, materials, workmanship or services at a quantity or quality level below that which is required by generally accepted industry standards; or

2. The vendor has willfully breached any contract entered into pursuant to the provisions of Article 26 of Chapter 18 of the Code or these Regulations.

A contract shall be deemed to have been "willfully breached" in any instance wherein a vendor refuses to do or perform any act clearly required by the terms of the contract; or in any instance wherein a vendor knowingly provides or furnishes commodities, materials, workmanship, or services at a quantity or quality level below that which is specified in the contract; or in any instance wherein a vendor is given written notice that the quantity or quality level of commodities, material, workmanship, or services which he has provided is below that which is specified in the contract and such vendor, without questioning the accuracy of such notice of omission or fault, continues such omission or fault without recompense or correction for such omission or fault; or

3. A vendor has violated any provisions of the purchasing laws; or

4. A vendor has been convicted of any federal, state, or local law punishable as a felony, which conviction arises from the vendor's acts or omissions directly related to the performance of a contract entered into pursuant to Article 26 of Chapter 18 of the Code or these regulations.

c. Every person (vendor) whom the BOR has reason to believe has violated the provisions of the purchasing laws or these regulations will be notified by letter posted by registered mail of such belief and reason(s) therefore. At the same time, the vendor shall be given notice that a hearing will be held concerning the matter, if a hearing is requested within five (5) days of the vendor's receipt of the notice. The date, time, and place of the hearing will be specified in the Procurement Officer's letter to the vendor. The date and time of the hearing shall be at least ten (10) days after notice is given.

If a hearing is not requested, the vendor's right and privilege to bid on BOR purchases may be suspended for a period not to exceed one year, effective the date and time at which the hearing would have been held had one been requested. Notice of such suspension and the reason(s) therefore shall be sent to the vendor at that time by letter posted by registered mail.

d. The Chief Procurement Officer shall act as hearing examiner at any hearing held. An opportunity shall be afforded to all parties to present evidence and arguments with respect to the matters and issues involved. The affected vendor shall have the right, but shall not be required, to be represented by an official of his choice. The hearing shall be conducted in an informal manner; technical rules of evidence shall not apply. The vendor and the Chief Procurement Officer or their respective representative shall have the right to examine and

cross-examine witnesses who testify, and shall have the right to submit rebuttal evidence.

All of the testimony and evidence at any such hearing shall be reported by stenographic notes and characters or by mechanical means. All rulings on the admissibility of testimony and evidence shall also be reported. The institution involved shall prepare an official record, which shall include reported testimony and exhibits in each contested case, and all agency staff memoranda and data used in consideration of the case, but it shall not be necessary to transcribe the reported testimony unless required for purposes of rehearing or judicial review.

e. If the affected vendor or his representative does not appear at the hearing, the Chief Procurement Officer shall request such vendor's right and privilege to bid on BOR purchases be suspended for a period not to exceed one year. If approved by BOR, such suspension shall be effective immediately an' notice of such suspension and the reason(s) therefore shall be sent to the vendor by letter posted by registered mail.

Every such decision rendered by the Chief Procurement Officer in a contested case shall be in writing or stated in the record and shall be accompanied by findings of fact and conclusions of law. Prior to the rendering of any final order or decision, any party may propose findings of fact and conclusions of law. If proposed, all parties shall be given an opportunity to accept such proposed findings and conclusions, and the final order or decisions shall include a ruling on each proposed finding. Findings of fact, if set forth in statutory language, shall be accompanied by concise and explicit statement of the underlying facts supporting the findings. A copy of the order or decision and accompanying findings and conclusions shall be served upon each party and his attorney of record, if any, in person or by registered mail.

f. Any vendor suspended in accordance with Section 18-26-10f of the State Code shall have the right to have the BOR's action reviewed in accordance with Section 5A-3-40 of the State Code by a Board composed of the Governor, Attorney General, and Auditor of the State, which Board shall have the power and the authority to set aside such suspension. If the vendor wishes such review, he shall submit a request for review and three copies to the Board of Regents. Upon request to the Chief Procurement Officer by the vendor, all reported testimony and evidence taken at previous hearings, if any, shall be transcribed, and a copy thereof furnished to the vendor at his expense. The Chief Procurement Officer shall be responsible for making arrangements for the transcription of the reported testimony and evidence taken at a previous hearing, if any, shall be transcribed, and

a copy thereof furnished to the vendor at his expense and such transcription shall be accomplished with all dispatch.

g. Requests for review shall be in narrative form explaining in detail the reasons why the review is requested. The BOR shall distribute the "requests for review" to the Governor, Attorney General, and Auditor.

h. If the vendor feels an oral presentation is necessary, he shall request a hearing and give reasons why a hearing is necessary.

February 7, 1984

To: Stephanie Cole
Deputy Director of Services

Rick Barrier
Deputy Director of Operations

Bob Fisher
Fiscal Officer

RECEIVED
FEB 9 1984
Office of Administrative Director
Alaska Court System

From: Karla L. Forsythe KLF
General Counsel

Subject: SB 382 - payment for autopsies

Last week in Juneau Rick and I talked with Dr. Rabeau, director of the division of public health, and Dwayne Peeples, an analyst with the division who is preparing the fiscal note.

They wondered to what extent court involvement would continue if DHSS becomes responsible for payment. They wanted a step-by-step outline of who [illegible] They also wanted to know the number of autopsies statewide, and how many are performed in each location (Anchorage, Fairbanks, Bethel), as well as the procedure for bodies coming from southeast Alaska.

Although Bob had given a figure of $300 for embalming, this figure seemed high to Peeples who had called several mortuaries and was quoted a figure of $250. Peeples wondered if the $300 included dressing.

He also questioned the scope of "related services" under the statute, and decided it probably includes dressing and preparation.

Another question involved the use of sealer boxes, the rate of replacement and the cost. Peeples pointed out that DHSS inventory procedures are quite stringent and they will want to keep track of the boxes, although Rick noted that this is an administrative nightmare.

We all agreed that embalming would probably be needed for all the autopsies under the wording of the present bill, but that this could be modified if necessary.

Peeples asked the extent to which we become involved in complaints. Rick indicated the public health by regulation has more involvement.

He also wanted to know if we had considered bid procedures. Rick said the difficulty comes in knowing how to bid it, because the mortuaries may be willing to pay for the bodies.

They both indicated that the division needs new staff to coordinate the process, consisting of at least one clerk IV in Anchorage and probably another clerk in Fairbanks, who would work with the professional services contracts with the pathologists, with paying bills, with coordinating the process, and with enforcement of funeral home practices.

Rabeau noted that the commissioner has said that of all the DHSS offices, public health ought to have the responsibility. Basically, they don't want to become involved because they have undergone staffing cuts, and say they simply don't have anyone to do the work without additional staff.

I have not yet seen a copy of the DHSS fiscal note, but will forward it when it comes across my desk.

Please let me know if you have any questions.

Mr. Arthur Snowden II
Administrative Director
Alaska Court System
303 "K" Street
Anchorage, AK 99501

Dear Mr. Snowden:

I have received your letter of December 13, 1983. It appears that correspondence from this department (dated December 12, 1983, from E.S. Rabeau) passed yours in the mail. I believe your concerns and the position of this Department are generally addressed in that letter.

There is only one matter which I believe needs further discussion. This department has, as yet, made no commitment to assume costs of embalming in all cases involving court ordered autopsies. We are attempting to design provisions in our General Relief Program which would permit us to pay costs of embalming in a limited number of cases, which would include some rural deaths which are not presently covered by General Relief.

Sincerely,

Robert London Smith

Reference: Problems related to autopsies mandated under Alaska law

Dear Commissioner Smith:

As you may be aware, a variety of problems relating to court-ordered autopsies have surfaced in the past few months. Court system personnel, members of your staff and other interested parties have been working together in an attempt to remedy these problems.

After considerable study, the court has concluded that some problems may be remedied by transferring certain responsibilities from the court system to your department.

Under the system currently in place, a coroner (a court employee) is contacted about a death. The coroner makes an initial determination about whether an autopsy should be ordered pursuant to the provisions of applicable state statutes and Department of Health and Social Services regulations (see AS 12 65.020, 7 AAC 05.440). If an autopsy should be ordered, the coroner contacts a medical examiner from a list provided by your department. (Your department has the responsibility for

the appointment of medical examiners. AS 12.65.110). Since Alaska has no morgue, the coroner then directs that the deceased by transported to a funeral home. The choice of the funeral home (absent a specific designation by next of kin) is made from a rotation schedule presently maintained by the court of licensed funeral homes which wish to receive these referrals.

Payment to the funeral home is complicated. Under the present system, the court pays for the transportation of the deceased to the place of autopsy and then back to the place of death or residence (whichever is less), the pathologist's bill and the preparation room fee. Funeral expenses (casket, clothing, burial plot, headstone, services and burial) are the family's responsibility. The families deal directly with the funeral homes about these issues. It appears that in most cases involving bodies from rural Alaska, your department pays burial expenses through the avenue of general assistance. 7 AAC 47.130. (Payment for embalming costs has been a hotly contested issue in the past. However, it is our understanding that your department has agreed to assume these costs in cases involving all court ordered autopsies, and is presently designing a system to implement this policy change.)

Two problems appear to be occurring. First, the court system has no formal contracts with the funeral homes on the rotating list. There have been some indications that problems have occurred between the families of the deceased and one or more of these homes. One of the concerns that we have heard expressed is that maintenance of the rotation list should include responsibility for the quality of services and the investigation of abuses. The court system is not equipped to perform these functions. First, we are not charged with regulatory and licensing functions. Also, our role as an independent dispute resolution body precludes our involvement in investigations which may end up before the court. The Department of Health and Social Services, however, does investigate, regulate and license as part of its mandated functions.

The Department of Health and Social Services already regulates certain areas relating to autopsies. It is true that the Department of Commerce, not the Department of Health and Social Services, licenses persons who engage in the practice of mortuary science and issues funeral establishment permits. See AS 08.42.020 and 08.42.100. However, the Department of Health and Social Services enacts and enforces the regulations relating to embalming and the requirements for preparation rooms. See 7 AAC 35.090 - 7 AAC 35.130. The department's regulations also mandate that autopsies be performed in certain circumstances. See 7 AAC 05.440. In that the Department of Health and Social Services is already involved in regulation in this area, it is much more qualified than the court system to evaluate the qualifications of funeral homes for inclusion on a rotation schedule.

The Department of Health and Social Services is the primary beneficiary of information discovered during autopsies. The Bureau of Vital Statistics is contained within your department. The bureau is charged with the preparation of the state's vital records, including death certificates. Information obtained from autopsies is essential to the preparation of death certificates. As primary beneficiary of the autopsy results, your department logically has a greater interest in quality control in this area.

I would propose, in conclusion, that we enter into an inter-agency agreement wherein your department assumes responsibility for the maintenance of a funeral home rotation schedule or other mechanism which you find appropriate. Your department could screen, qualify and contract with funeral homes in a manner you determine to be appropriate. Your department would then provide the court with a list or rotation schedule of funeral homes to which the coroners will send bodies for autopsy.

The second problem in this area relates to payment of the funeral homes for services rendered. Because payment for different items comes from different sources under the present system, much confusion has been created. Also, there has been some concern that no routine checking can presently be done for "double billing" - items which may be charged both to families and the court system.

If the Department of Health and Social Services assumes the responsibility for the designation of funeral homes to be used for court-ordered autopsies, your department should also assume the responsibility for processing payments for those funeral home costs the state pays.

Your department already processes and pays some funeral expenses through the avenue of general assistance. See 7 AAC 47.130. Additionally, as previously stated, it is my understanding that the department has agreed to begin paying for embalming costs associated with all court-ordered autopsies, to begin at some point in the near future. If the department assumes the responsibility for paying all funeral and autopsy expenses which the state assumes, there is less chance of confusion about who should be paying what, and there is greater probability of preventing double billings of the same items to different state agencies and families (The court would, of course, transfer the monies allocated to the court for autopsy expenses to the department.)

It would be possible to propose legislation to effect these changes. However, it appears that the necessary changes could be effected by means of an interagency agreement between the Department of Health and Social Services and the court system.

I'll be happy to talk to you about this proposed change in procedures. Also, Deputy Director Stephanie Cole and Fiscal Officer Bob Fisher are authorized to work with your staff and provide you with any information you may need.

I am optomistic that we can work together to eliminate these problem areas for the benefit of the public.

Re: Autopsy Costs-Letter of September 9, 1983

Dear Mr. Snowden:

This letter is in reply to the letter from Stephanie Cole, your Deputy Director for Services, on the same subject.

In reply to your inquiries therein, after careful consideration, I am not prepared to commit the Department of Health and Social Services to the assumption for all autopsy and related burial costs. It is still my belief as expressed at our September meeting that all such costs, including costs of embalming, should be the Court System's responsibility.

While, as you note, this department does have certain responsibilities which affect the process of doing autopsies, those responsibilities are only peripherally related to autopsies. Each is part of a duly authorized activity, well within the scope of this department's mission. This department, at present, has no mission to perform the role you describe.

The scope of this department's authority is set out at AS. 44.29.020. This department's role does not include the criminal investigatory role that court-ordered autopsies in Alaska serve. (Note AS. 12 Chapter 65.)

Our regulations related to embalming, of course, cover all deaths, not merely those in which an autopsy is done. The present regulation are disease control measures, authorized by AS. 18.05.040(1) and (7). They are in no way specific to court ordered autopsies, and carry with them no administrative apparatus to administer the performance of all court ordered autopsies.

Our vital statistics duties, again, cover all deaths, births, marriages, divorces, and adoptions in Alaska. They too do not require an administrative apparatus of the sort needed for the purchasing of services ordered by the court system in the course of autopsies.

Our authority for general relief burials, (7AAC 47.130) is found at AS 47.25.120-300. Qualifications for G.R. burials must be need-based under those sections. Our procedures for handling such burials are for the provision of public assistance to the needy.

The Commissioner's authority to appoint a medical examiner does not include with it any specific authority or responsibility after the appointment. It is simply related to this department's responsibilities as the State's health agency.

Your proposal would entail a separation of the authority to order autopsies and the transportation and handling of dead bodies, (which, by its nature, must remain with the court system), from the responsibility to pay for such handling. It would present extreme management problems and would necessitate, not only a shift of a large portion of the court system's budget over to DHSS. but also a legislative change in the fundamental functions of this department. At this time, this department does not favor such a change.

It is still our opinion, as previously expressed, that if the court system mandates an autopsy (thus necessitating the need for embalming) it should assume the responsiblity for paying for the embalming. The autopsy has removed the next of kin's option of interment without embalming.

Sincerely,

E. S. Rabeau

Subject: Autopsy Costs

When I returned to my office on September 8, I talked to Administrative Director Art Snowden about the matters discussed at the Thursday morning meeting.

Mr. Snowden agreed that there are several arguments in favor of the state's assumption of financial responsibility for embalming costs following a court-ordered autopsy. However, rather than simply seeking to add monies to the court system's budget to cover these costs, he would suggest that a larger examination of the system be undertaken with an eye to centralizing all responsibility for autopsy and related burial costs, and money to pay same, in the Department of Health and Social Services.

Our reasoning is as follows. The Department of Health and Social Services is the executive agency which has undertaken to regulate autopsy-related areas such as embalming (7AAC 35.010 -.130) and the requirements and procedures for the preparations of death certificates (7AAC 05.400 et.seq). Also, the Commissioner of Health and Social Services is the only official who may waive certain regulatory requirements (7AAC 35.100 (b)(4)). As discussed at our meeting, the Department of Health and Social Services already has procedures in place, through general relief programs, to handle claims for funeral and burial expenses. 7AAC 47.130.

Additionally, the Commissioner of Health and Social Services is the authority who may appoint medical examiners. AS 12.65.010.

It seems to us that the Department of Health and Social Services, as the primary regulatory agency in this area and the agency most concerned with death investigation results (re: preparation of vital records), is a more appropriate vehicle than the court system for handling expenses and billings for autopsies and related burial costs.

At present, the court system does have money budgeted for autopsy purposes. We would be willing to transfer our monies to the department should the department begin paying autopsy expenses. Then, the department could seek additional monies from the legislature to cover embalming costs.

This assumption of total responsibility, in line with existing regulatory authority, could also be extended to you in the area of funeral homes. The department could examine and contract with funeral homes in any manner it deemed appropriate, and simply provide the court system with direction as to which funeral homes to use. In that way, if abuses did occur which came to the attention of the department, the department could take whatever steps were necessary to cease dealings with a particular home. The court system would follow the department's direction in such a matter.

Please let us know your reactions to these ideas.

Very truly yours,

Stephanie J. Cole

Reference: Problems related to autopsies mandated under Alaska law

Dear Commissioner Smith:

As you may be aware, a variety of problems relating to court-ordered autopsies have surfaced in the past few months. Court system personnel, members of your staff and other interested parties have been working together in an attempt to remedy these problems.

After considerable study, the court has concluded that some problems may be remedied by transferring certain responsibilities from the court system to your department.

Under the system currently in place, a coroner (a court employee) is contacted about a death. The coroner makes an initial determination about whether an autopsy should be ordered pursuant to the provisions of applicable state statutes and Department of Health and Social Services regulations (see AS 12.65.020, 7 AAC 05.440). If an autopsy should be ordered, the coroner contacts a medical examiner from a list provided by your department. (Your department has the responsibility for

the appointment of medical examiners. AS 12.65.110). Since Alaska has no morgue, the coroner then directs that the deceased by transported to a funeral home. The choice of the funeral home (absent a specific designation by next of kin) is made from a rotation schedule presently maintained by the court of licensed funeral homes which wish to receive these referrals.

Payment to the funeral home is complicated. Under the present system, the court pays for the transportation of the deceased to the place of autopsy and then back to the place of death or residence (whichever is less), the pathologist's bill and the preparation room fee. Funeral expenses (casket, clothing, burial plot, headstone, services and burial) are the family's responsibility. The families deal directly with the funeral homes about these issues. It appears that in most cases involving bodies from rural Alaska, your department pays burial experses through the avenue of general assistance, 7 AAC 47.130. (Payment for embalming costs has been a hotly contested issue in the past. However, it is our understanding that your department has agreed to assume these costs in cases involving all court ordered autopsies, and is presently designing a system to implement this policy change.)

Two problems appear to be occurring. First, the court system has no formal contracts with the funeral homes on the rotating list. There have been some indications that problems have occurred between the families of the deceased and one or more of these homes. One of the concerns that we have heard expressed is that maintenance of the rotation list should include responsibility for the quality of services and the investigation of abuses. The court system is not equipped to perform these functions. First, we are not charged with regulatory and licensing functions. Also, our role as an independent dispute resolution body precludes our involvement in investigations which may end up before the court. The Department of Health and Social Services, however, does investigate, regulate and license as part of its mandated functions.

The Department of Health and Social Services already regulates certain areas relating to autopsies. It is true that the Department of Commerce, not the Department of Health and Social Services, licenses persons who engage in the practice of mortuary science and issues funeral establishment permits. See AS 08.42.020 and 08.42.100. However, the Department of Health and Social Services enacts and enforces the regulations relating to embalming and the requirements for preparation rooms. See 7 AAC 35.090 - 7 AAC 35.130. The department's regulations also mandate that autopsies be performed in certain circumstances. See 7 AAC 05.440. In that the Department of Health and Social Services is already involved in regulation in this area, it is much more qualified than the court system to evaluate the qualifications of funeral homes for inclusion on a rotation schedule.

The Department of Health and Social Services is the primary beneficiary of information discovered during autopsies. The Bureau of Vital Statistics is contained within your department. The bureau is charged with the preparation of the state's vital records, including death certificates. Information obtained from autopsies is essential to the preparation of death certificates. As primary beneficiary of the autopsy results, your department logically has a greater interest in quality control in this area.

I would propose, in conclusion, that we enter into an inter-agency agreement wherein your department assumes responsibility for the maintenance of a funeral home rotation schedule or other mechanism which you find appropriate. Your department could screen, qualify and contract with funeral homes in a manner you determine to be appropriate. Your department would then provide the court with a list or rotation schedule of funeral homes to which the coroners will send bodies for autopsy.

The second problem in this area relates to payment of the funeral homes for services rendered. Because payment for different items comes from different sources under the present system, much confusion has been created. Also, there has been some concern that no routine checking can presently be done for "double billing" - items which may be charged both to families and the court system.

If the Department of Health and Social Services assumes the responsibility for the designation of funeral homes to be used for court-ordered autopsies, your department should also assume the responsibility for processing payments for those funeral home costs the state pays.

Your department already processes and pays some funeral expenses through the avenue of general assistance. See 7 AAC 47.130. Additionally, as previously stated, it is my understanding that the department has agreed to begin paying for embalming costs associated with all court-ordered autopsies, to begin at some point in the near future. If the department assumes the responsibility for paying all funeral and autopsy expenses which the state assumes, there is less chance of confusion about who should be paying what, and there is greater probability of preventing double billings of the same items to different state agencies and families (The court would, of course, transfer the monies allocated to the court for autopsy expenses to the department.)

It would be possible to propose legislation to effect these changes. However, it appears that the necessary changes could be effected by means of an interagency agreement between the Department of Health and Social Services and the court system.

I'll be happy to talk to you about this proposed change in procedures. Also, Deputy Director Stephanie Cole and Fiscal Officer Bob Fisher are authorized to work with your staff and provide you with any information you may need.

I am optomistic that we can work together to eliminate these problem areas for the benefit of the public.

Memorandum

Alaska Court System

TO: Art Snowden
Administrative Director

DATE : December 13, 1983

FROM: Stephanie Cole
Deputy Director for Services

SUBJECT: Autopsy problems

I have been investigating the idea of transferring our responsibility to designate specific funeral homes for autopsies to the Department of Health and Social Services. Specifically, you have asked that I consider any legislative changes which might be necessary to effect this transfer.

I have come to two conclusions: (1) Existing statutes do not require the court system to choose and designate the funeral homes to be used, and (2) It would be more appropriate to have Health and Social Services handle this task. However, I am not sure that legislation is the appropriate method of handling this change; an interagency letter of agreement may be a better way to proceed.

discussed w/Art 12/13

Adm. F-1
Rev. 2-73

The coroner's obligation

The coroner's obligation is to direct a medical examiner to perform an autopsy in appropriate cases:

> Sec. 12.65.020. Duties. When a person dies unattended by a physician, or when no physician is prepared to execute the certificate of death prescribed by the Vital Statistics Act, the coroner assigned to serve the place where the death occurs may, by written order, direct a medical examiner to view the remains of the deceased person and to perform the post mortem examination, including an autopsy, necessary to make a proper determination of the cause of death and to execute the prescribed death certificate. Upon the completion of the examination, the examiner shall, without delay, submit a report of the findings and conclusions to the coroner. The coroner shall order an inquest under this chapter if the findings and conclusions of the medical examiner, together with other information available to the coroner, warrant the inquest. Otherwise the coroner shall enter an order dispensing with the inquest and shall record the certificate of death as prescribed by law. (emphasis added)

The appointment of medical examiners is the responsibility of the commissioner of health and social services. AS 12.65.010. The statutes do not address the designation of the location for the autopsy, or the facility to be used.

As a practical matter, it is essential that the duty coroners be able to tell the state troopers or other officials who contact them about a death where the body will be taken. However, I see no reason why this information could not be provided to the court without any necessity for the court to maintain the list, receive complaints about particular cases, etc.

I tried to track down this history of the rotation list. I was only partially successful. Although some system may have been in effect prior to 1972, in March 1972 an interagency meeting was held to coordinate autopsy related activities. At that meeting, decisions were made about a rotation list, who should be on it, etc., and a decision was made to have the court provide the rotation schedule.

The arguments in favor of having the Department of Health and Social Services maintain the rotation list are as follows:

(1) <u>The court is not a regulatory and licensing agency; the Department of Health and Social Services is</u>.

One of the concerns that we have heard expressed is that maintenance of the rotation list should include responsibility for the quality of services and the investigation of abuses. The court system is not equipped to perform these functions. First, we are not usually charged with regulatory and licensing functions. Also, our role as an independent dispute resolution body precludes our involvement in investigations which may end up before the court.

The Department of Health and Social Services, however, does investigate, regulate and license as part of its mandated functions.

(2) The Department of Health and Social Services already regulates certain areas relating to autopsies.

The Department of Commerce, not the Department of Health and Social Services, licenses persons who engage in the practice of mortuary science and issues funeral establishment permits. See AS 08.42.020 and 08.42.100. However, the Department of Health and Social Services enacts and enforces the regulations relating to embalming and the requirements for preparation rooms. See 7 AAC

090 - 7 AAC 35.130. In that the Department of Health and Social Services is already involved in regulation in this area, it is much more qualified than the court system to evaluate the qualifications of funeral homes for inclusion on a rotation schedule.

(3) <u>The Department of Health and Social Services is the primary beneficiary of information discovered during autopsies</u>.

The Bureau of Vital Statistics is contained with the Department of Health and Social Services. The bureau is charged with the preparation of the state's vital records, including death certificates. Information obtained from autopsies is essential to the preparation of death certificates.

As primary beneficiary of the autopsy results, the Department of Health and Social Services logically has a greater interest in quality control in this area.

<u>Payment for funeral home services</u>

If the Department of Health and Social Services assumes the responsibility for the designation of funeral homes on a rotation schedule, the department should also assume the responsibility for processing payments for those funeral home costs the state pays.

The Department of Health and Social Services already processes and pays some funeral expenses through the avenue of general assistance. See 7 AAC 47.130. Additionally, it is my understanding that the department has agreed to begin paying for embalming costs associated with court-ordered autopsies, to begin at some point in the near future. If the department assumes the responsibility for paying all funeral and autopsy expenses which the state assumes, there is less chance of confusion about who should be paying what, and there is greater probability of preventing double billings of the same items to different state agencies.

In summary, I would suggest we ask the Department of Health and Social Services to enter into a formal interagency agreement in which the department:

> (1) agrees to provide the court with a list or rotation scheduled of funeral homes to which the court will send bodies for autopsies, and
>
> (2) agrees to begin processing and paying all bills received from funeral homes for state-assumed autopsy and burial expenses.

The court would, of course, transfer the monies allocated for autopsy expenses to the department.

Anchorage, AK 99501

Dear Ms. Cole:

Thank you for your letter of concern about the general assistance program for burial expenses.

Our representative in Point Hope is one of about 200 fee agents in small communities throughout the state. Fee agents are trained and paid to process applications for Food Stamps and Aid to Families With Dependent Children. However, they are often called upon to perform a good many other services as well. Because of lack of additional funding for training and compensation, fee agents are not conversant with all of the program services we offer. Thus we encourage that queries be addressed to district or regional offices, which are staffed with trained, full-time eligibility technicians.

The Commissioner of Health and Social Services has directed a full review of the fee agent system in coordination with other state agencies to explore ways in which the system can be strengthened and used more fully. Your letter further underlines this need, and we appreciate your expression of concern.

Sincerely,

Danny L. Harris

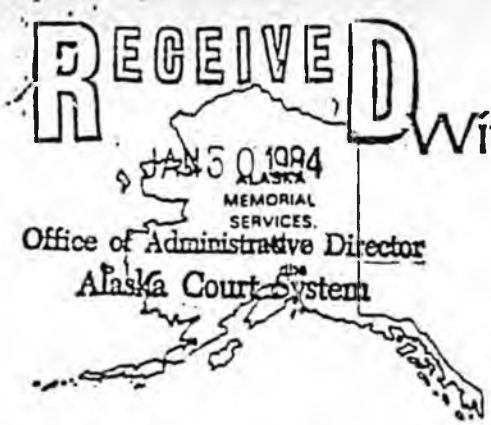
Re: Autopsies

Dear Lou Ann:

I understand that Bob Fisher did call you and give you a number for the amount of court-ordered autopsies statewide per year. It is also my understanding that in FY 1983 court-ordered autopsies numbered approximately 750 (± 20).

I did have one concern. Recently I was reviewing some autopsy billings and I briefly discussed various items on them with Bob Fisher. I had told you that the cost of embalming generally runs $150-$300. From current billings it looks like $300 is the more representative figure and that it is even higher in some cases. Therefore, if you are making cost calculations, I suggest you use $300 per case as the embalming cost (or a little higher).

Enclosed please find a copy of the letter I received from the Division of Public Assistance. This may be of some interest to you.



Please let me know if there is anything else I can do for you.

Very truly yours,

Stephanie

Alaska Court System
Attn: Dale Cuda
P.O. Box 130
Bethel, Alaska 99559

Re: Alaska State Trooper Belden

Dear Magistrate Cuda:

Yesterday, January 2, 1984, a Federal & State Holiday, Trooper Belden called our office wanting to know why the remains of Theresa B. Williams has not been sent back to Bethel. I informed him that it was because, up until that time, no one had contacted us regarding the remains and we had no instructions as to what to provide, to whom , or where to ship the remains. He informed me that the "Alaska Court System would pay all the charges" and that the remains was to be returned. He did not specify where, so I could only assume he meant to Bethel. As it turned out that was not the case.

Later in the day we received a call from a Mrs. Shavings of Mekoryuk requesting information and informing us that an application had been submitted to Joyce Freeman at the Division of Public Assistance, on Friday, December 30, 1983. I advised her that we had never been contacted by the family or the Division and therefore unable to do anything until Tuesday because of the holiday. I further advised her that she should contact Mrs. Freeman first thing on Tuesday morning. Mrs. Freeman called our office at 8:45 am today (Tuesday) giving approval - NOT because she had received an application (she had not), a call from Mrs. Shavings (she had not), NOR because she had been called by Trooper Belden earlier this morning, but because she knew the family and knew they qualified.

Miss Williams died December 26th. We did not receive her remains until Thursday, December 29th. The autopsy was performed the same day. However the permit you sent us gave her name as "Jane Doe" and listed "Storage in Anchorage". Even though, as Mrs. Shavings informed us, the family had been given our name and phone number, they made no effort to contact us with instructions, so the rude call from Trooper Belden on Monday morning, a legal holiday, was our first person to person contact.

Now if the court system is going to assume the responsibility of giving directions as to the disposition of a remains, then I feel it is only reasonable to expect you or someone from YOUR office to call us with that information, and tell us what you are and are not authorizing the court system to pay for. I will not take instructions from a state trooper (who represents another branch of government) since in coroner's cases I am acting under the authority of the Court System. Would you take a call from a person in the Department of Labor telling you to bill services to the Department of

of Transportation without first getting some confirmation from a representative of the Department of Transportation that they would accept such an order?

I understand and appreciate the difficulties you have with communications in the places you serve. However, it does not HELP to have troopers trying to play Funeral Director and only causing more confusion because they aren't fully informed on what responsibilities belong to the Court System (i.e. what it WILL authorize and pay for), what belong to the families and the social services agencies that serve them, and the guidelines and regulations under which we operate. What happened to the information form that the court system supposedly distributed that was to be given to the family and copied to the mortuary so that everyone would have the information they needed?

It was nice to know that Trooper Belden was working over the holiday, as we were, but that does not mean that we are able to get authorizations from a social services agency or obtain a new permit for shipment when all State and Federal Offices are closed. I would like to be able to provide those benefits to the families I serve EVERYday too. It would certainly make my life easier, since I'm working then anyway. I would hope that in the future the families will contact us in a timely manner, so that their loved ones can be sent to the appropriate place as expeditiously as possible. As a side note, the delays are also frustrating to non-bush families who want their loved ones shipped to the lower 48 but find they cannot because of airlines delays, weather, holidays, strikes, etc. Even in town the cemeteries often hold up, or force changes in a families wishes because they're closed for maintenance, weather, darkness, etc.

We both have statutes and regulations with which we have to work. Don't you think it would be helpful if we each were able to better understand the others duties and responsibilities, and not keep making it a one way street where the mortuary is ALWAYS the bad guy? Possibly as an alternative it would be beneficial for the Bethel area to consider having the pathologists come out there to perform the autopsies and then you can repair and send the bodies back to the families yourselves.

I trust that better communications can be developed so that these situations do not occur again.

Sincerely yours,

F. J. Witzleben, President

Memorandum

Alaska Court System

TO: Bob Fisher

DATE : January 30, 1984

FROM: Stephanie Cole
Deputy Director for Services

SUBJECT: Attached copy of bill from Chapel of Chimes re burial of John Tukle

Heather Noble from Alaska Legal Services in Barrow contacted me about this bill again. I was finally able to contact Mrs. Plummer with Chapel of Chimes in Fairbanks to explain some of the items which I felt required some further explanation. I think part of what makes this billing so hard to understand is the fact that the autopsy took place at Fairbanks Memorial Hospital. For example, the "use of operating room" cost billed at $100.00 is not for the use of that room for the autopsy, because the autopsy took place at the hospital. Rather, they are charging $100.00 for use of that room for the embalming process, although they have already charged $395.00 for the embalming (to include care and preparation for burial or cremation). Although this seems somewhat duplicative, it does seem to be a matter to be resolved between the family and the funeral home, and not by the court system.

The "outer receptacle" billed for is a wooden crate which surrounds the casket and which is apparently required by the airlines. According to Mrs. Plummer, this is not reusable and cannot be returned. Again, I would imagine that this is something with which the court system would not be concerned, because it doesn't relate to charges that we pay.

The items that are of the most direct concern to me are the two billings for transportation. According to Mrs. Plummer, these are not a "per mile" charge, but are rather a flat fee charged for any movement of the body. The funeral home has charged $85.00 for the transportation of the deceased from the hospital to the mortuary, and then an additional $85.00 for transportation of the deceased from the mortuary back to the Wien terminal for the return flight home. While this is not technically transportation "to and from the place of autopsy", I still think we should pay this amount. The "to and from place of autopsy" standard was devised to apply in the most common situation, where the autopsy actually takes place at the funeral home. In this case, it is just unfortunate that the autopsy and the funeral preparations did not take place at the same place. While the argument for paying for these

additional transportation costs is similar to the argument for our assuming embalming costs, I am still persuaded that in this case, we should pay those two costs.

In part, I am persuaded because the family in this case did not apply for public assistance monies quickly enough. Rather, they borrowed money to pay for the funeral. Therefore, even though they would qualify for general assistance under Department of Health and Social Services standards, they were unable to get the burial assistance grant because they did not apply in time. Under these circumstances, I believe that we should pick up the additional transportation charges. Please let me know what you think.

Re: Autopsies

Dear Lou Ann:

I understand that Bob Fisher did call you and give you a number for the amount of court-ordered autopsies statewide per year. It is also my understanding that in FY 1983 court-ordered autopsies numbered approximately 750 (± 20).

I did have one concern. Recently I was reviewing some autopsy billings and I briefly discussed various items on them with Bob Fisher. I had told you that the cost of embalming generally runs $150-$300. From current billings it looks like $300 is the more representative figure and that it is even higher in some cases. Therefore, if you are making cost calculations, I suggest you use $300 per case as the embalming cost (or a little higher).

Enclosed please find a copy of the letter I received from the Division of Public Assistance. This may be of some interest to you.

Please let me know if there is anything else I can do for you.

Very truly yours,

Stephanie

Dear Ms. Cole:

Thank you for your letter of concern about the general assistance program for burial expenses.

Our representative in Point Hope is one of about 200 fee agents in small communities throughout the state. Fee agents are trained and paid to process applications for Food Stamps and Aid to Families With Dependent Children. However, they are often called upon to perform a good many other services as well. Because of lack of additional funding for training and compensation, fee agents are not conversant with all of the program services we offer. Thus we encourage that queries be addressed to district or regional offices, which are staffed with trained, full-time eligibility technicians.

The Commissioner of Health and Social Services has directed a full review of the fee agent system in coordination with other state agencies to explore ways in which the system can be strengthened and used more fully. Your letter further underlines this need, and we appreciate your expression of concern.

Sincerely,

Danny L. Harris

Subject: General Assistance Monies for Burial Expenses

Dear Mr. Betit:

As you may know, the Department of Health and Social Services and the court system have recently been faced with numerous problems relating to autopsy and burial expenses for deaths in rural Alaska.

Recently, a problem came to my attention. Heather Noble, an Alaska Legal Services attorney in Barrow, contacted me about possible payment for burial expenses. I told her about the general assistance program for burial expenses, and suggested to her that her client contact your local representative in Point Hope. When her client did contact the Point Hope representative, the client was told that no such program existed. Because Ms. Noble had spoken to me, she pursued the matter further in a larger city and was able to obtain the requested assistance for her client.

I think it would be helpful if you could remind your workers that the general assistance program for burial expenses does exist. Their awareness of this program may help alleviate some of the problems that we are encountering. Thank you for your help.

Very truly yours,

Stephanie J. Cole

Dear Mr. Snowden:

A meeting has been arranged regarding Rural Burial Problems on behalf of the Governor and the Commissioner for the Department of Health & Social Services. The meeting will be held on Thursday, September 8, 1983 at 9:00 AM in the third floor conference room of the Frontier Building located at 3601 "C" Street.

As you know, Rural Burial Problems is a major issue for many citizens and elected officials of the State of Alaska. The agenda will cover two major topics; (1) Memorandums of Agreement between the Department and the Courts regarding burial charges by morticians that are not required by Courts and; (2) Administrative Regulations regarding same.

Your attendance and participation in this meeting will be of great value to all concerned. We look forward to seeing you.

Thank you.

RE: Coroner Functions

Dear Stephanie:

I have followed your exchange of correspondence with AVCP with interest. I have long felt that the coroner function is primarily an administrative one which should properly be placed in the executive branch. Determining cause of death, gathering evidence for use in possible criminal prosecutions, and investigating the facts and circumstances relating to unattended deaths are clearly executive branch, not judicial, functions. It is time for us to insist that these duties be handled by an executive branch agency.

Coroner's matters should be referred to the court system only when an inquest by a jury is needed to determine cause of death or, as in the case of a missing person, whether death should be presumed. Even then, the factual presentation should be made by the Department of Law, not by a judge.

On a more practical level there are a couple of other points to be considered regarding the feeling of people in the Bethel area about the need for autopsies. In the past there have been situations where bodies have not been returned for long periods of time. Sometimes this has happened because embalming charges or other related expenses are not paid and funeral homes hold the body.

Also, at least according to local rumor and belief, many villagers feel that an autopsy is some form of desecration of the body. One such story is that when an autopsy is performed the internal organs are removed and the body is filled with sawdust. While this may not be accurate, these notions affect public reaction to autopsy situations.

My own approach to many autopsy situations from the villages is to not order them even if the cause of death is somewhat uncertain if the circumstances indicate that the death is in all probability the result of accident or natural causes and where there is no likelihood that the death was caused by another person. In these cases conducting an autopsy to actually determine the cause of death is not worth all the inconvenience, expense, delay and hassles. If necessary, I will complete the death certificate based on the police report of the circumstances. However, it is still my feeling that these kinds of things are really not judicial business. Good luck.

Very truly yours,

Christopher R. Ccoke
Superior Court Judge

RE: Court Ordered Autopsies in the AVCP/Calista Region

Dear Mr. Snowden:

I am writing to you on behalf of the 56 Native Villages of the AVCP/ Calista Region concerning the present policy of having court ordered autopsies performed in Anchorage, outside of our Region.

Recent events in one of our villages, Kwethluk, underscore the legal and ethical limitations of removing the bodies of local residents for autopsy purposes to Anchorage. In Kwethluk, we had a serious clash of individual vs. state interests involved over the removal of the body of a local resident, Arnold Nicolai. The family of the deceased objected to the removal of the body on religious grounds and a prior adverse experience of having the body of a family member removed to Anchorage for autopsy purposes and not returned for a protracted period of time.

Although we recognize a legitimate State interest in conducting an inquiry into the cause of death, we believe that as a legal and ethical matter, the State must show a compelling reason for removing a body to Anchorage for an autopsy when fundamental First Amendment rights (i.e., Russian Orthodox and Eskimo religious practice of holding a 48 hour mourning period in the presence of the deceased and immediate burial of th untampered body thereafter) are involved.

As a matter of law, even if the State can show a compelling reason for an Anchorage autopsy (i.e., lack of facilities in Bethel and determination of the cause of death), the State is still under a burden in the face of a Fundamental Constitutional right to exercise that such an exercise would properly include holding all future court ordered autopys in Bethel.

We believe that such a change in policy will go along way towards balancing the valid but competing interests of the State and our Native Eskimo people in the Bush. It will also help to defuse volatile confrontations, such as the Kwethluk incident, through a sensitive application of State law to Native interests.

DHSS $750 embalming casket preparation

This procedural change would also rectify the additional financial burden placed on our rural families. Embalming and preparation costs directly related to the autopsy order are the responsibility of the deceased's family.

As a matter of information and courtesy, we are sending a copy of this letter to the interested parties listed below.

Sincerely,

ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS
Willie Kasayulie, Chairman

Grieving families caught in 'Catch-22'

by Liz Lauzen

When a 26-year-old Nuiqsut man fell off a perch and died recently, his body was sent to Fairbanks for an autopsy to determine the cause of death.

His mother, an unemployed woman in her 50s, is now stuck with a $2,000 bill for funeral services—much of it for state-required services which would not have been needed or desired had the person's body remained in the village for burial.

It's a situation which the state's senior citizen ombudsman, funeral directors and state officials all describe as a "Catch 22."

No one seems to know for sure how often grieving Alaskan families are caught in the squeeze between the state court system's requirement for an autopsy and the public health division's regulations concerning embalming and transportation of bodies.

But three divisions of state government and a legislative committee are currently seeking a solution aimed at relieving families of the costs of these state-mandated funeral home services.

In conversations with coroners, state court officials, funeral home directors, public health officials and attorneys, the problems surrounding autopsies were described.

State laws concerning coroner duties require an autopsy in nearly every death which is not attended by a physician.

In Alaska, this means most deaths of an accidental or violent nature, and any other death in which a physician is not following the case closely enough to feel comfortable in signing the death certificate.

Because autopsies are performed only in Fairbanks, Anchorage and Juneau, bodies must be transported from rural communities to the urban center.

At the same time, state public health laws require that the body be embalmed "when a body cannot reach its destination within 24 hours."

This time frame allows villagers to bury their dead in the village without embalming when an autopsy is not required. It does not allow for these simple burial practices when an autopsy is required.

The state court system will pay for the cost of transporting the body to the site of the autopsy; for the autopsy itself; and for the cost of returning the body to the village.

It will not pay for other

Continued on page 16

Grieving families caught in 'Catch-22'

Continued from page 1

expenses, including embalming.

The Divison of Public Health which requires embalming to control communicable diseases, does not pay for embalming. Nor does it pay the cost of transporting the body from the site of the autopsy to the funeral home, where the embalming is done. Nor does it pay the cost of a casket.

"The family is not responsible in any way for the remains being embalmed and put in a casket," said Heather Noble, attorney for Alaska Legal Services in Barrow who is investigating the problems of the Nuiqsut woman.

"I'm concerned with the money. I want the state to pick up the costs."

In some cases, the state Division of Public Assistance will pay these costs.

"People can qualify if they —or the deceased—meet resource and assets requirements," explained Public Assistance official Jim Dalman.

Generally, a family must have cash assets of less than $300 and a monthly income of less than $400 (for two adults) to qualify, Dalman said. Public Assistance recipients who die are almost always picked up.

But this is not a program which could pick up the funeral cost for every body on which an autopsy is performed and embalming is required, Dalman said.

em • balm *(em bäm'), v.t.* — to treat (a dead body) so as to preserve it, as with chemicals, drugs or balsams; to protect from decay.

"This is a state program with limited funding," he said. "We use it as a program of last resort, for use in a situation where the family must demonstrate it is without means. It is quite restrictive."

About 150 funerals are paid for by general relief each year, he explained.

One problem with the program is that it is little known in many villages

Another problem is that it must be applied for in advance, before embalming or other funeral home services are performed.

For those who do not qualify — or do not apply for — public assistance, costs for funeral services can add up rapidly.

For a grieving family, the lines between state-required services, funeral home-recommended services, and family-desired services often blur.

The Nuiqsut woman's $2,000 bill included $800 for a casket, $400 for embalming, and charges for limosine service, professional fees, clothes and flowers.

"If that body had stayed in the village, the family could have built a casket from a packing crate," explained Noble. The cost, in that case, would have been minimal.

In some villages, fear of what will happen to the body once it is removed from the village further complicates autopsy problems.

In Kwethluk, a village near Bethel, the problem recently came to a head when villagers refused to allow an Alaska State Trooper to remove the body.

Additional troopers were sent in, but villagers still opposed the removal, explained Stephanie Cole, deputy director for magistrate services for the court system.

"Apparently, someone in the past had had a negative experience in that the body had not been returned," Cole said. "That is not a common problem, but such stories do not die."

The result, said Cole, was that the villagers agreed to allow the body to be removed to Bethel, but not to Anchorage, where the autopsy would normally have been performed.

But Cole said facilities in Bethel are not sufficient for performing autopsies, so most bodies will continue to be removed to one of the state's three larger cities for autopsies.

State officials have begun to look at the problem.

Officials from the Division of Public Health, the court system, the Consumer Protection section of the Attorney Gen-

Continued on page 17

Autopsy-related fees add up

When the state requires an autopsy, and the family must then pick up fees for funeral home services, what does it cost?

Eight funeral homes provide services in Alaska: two in Fairbanks, one in Juneau and five in Anchorge. Fees vary from funeral home to funeral home. And they vary because of preference for more service or more expensive services.

One funeral home director, who asked that his firm not be named, outlined services and charges often encountered by families when an autopsy is performed.

Some of these services are not required by state public health laws, but grieving families often elect to have them performed after the body has been removed from the village for autopsy.

- Professional fees, $420- includes arrangements with families, paperwork, permits, overhead (utilities, salaries, etc.), writing obituary.
- Embalming, $395 — preparing body with chemicals for burial. (Required)
- Operating room charge, $100- restoring the body after autopsy. (Highly recommended by morticians).
- Transportation, $85- charge when autopsy is performed away from funeral home and body must be transported to funeral home for embalming. (Required, unless other arrangements can be made).
- Casket, $300 or more- (Families could elect to have body shipped back to village

for burial. (Required) in metal transfer container)

Grieving families caught in 'Catch-22' of autopsy

Continued from page 16

eral's office and the Alaska State Troopers met in September to discuss the concerns and begin to find solutions.

"There is a problem, several problems involved," said Cole.

"There are problems because there are several agencies involved, and a lot of tension focused on all of it."

Key to the discussions is who should pay for autopsy-related fees which the court system does not pick up.

Current regulations in both the Divison of Public Health and the court system do not authorize the state to pay for embalming and services incidental to autopsies.

"I personally feel the court system has the responsibility for paying the costs of embalming," said Dr. E. S. Rabeau, director of the Division of Public Health and deputy director of the Department of Health and Social Services.

"If they are taking custody of the body, then by God they should pay for it," he added.

Rep. Al Adams (D-Kotzebue) and his staff have begun to look at the problem as well.

Lack of information about how many people qualify for public assistance is one problem involved with deciding who should pay for the costs of embalming, said Lou Ann Cutler, an Adams aide.

"Personally, I feel the state should pay. But which agency?"

Another problem that can be addressed, Cutler said, is that of informing the public.

"A lot of people who do qualify don't know they qualify.

"It's not easy for the troopers and the magistrates to deal with the families. Families are upset, sometimes the troopers are under time constraints to get the body out.

"And also, there is some question perhaps whether or not some funeral homes are doing a hard sell."

Will legislation be needed to sort out the problem?

"If we have to go that route, yes. But we prefer to settle it internally, if we can," Cutler said.

SUBJECT: Letter from Ivan M. Ivan, 8/25/83

I don't know if you want me to respond to Mr. Ivan's latest letter. Since he is seeking "...a medical examiner be appointed for the Bethel Region, together with appropriate facilities, to conduct court ordered autopsies," it seems clear that his remedy is to seek help from his legislative representatives.

I could respond to his second paragraph. Although AS12.65.020 does say "may," corresponding regulations (see 7 AAC 05.440 - copy attached) make it clear that a magistrate must investigate any suspicious case. I suppose one does not have to equate "autopsy" with "investigation," but I don't how else you'd do an investigation in any thorough way.

Do you want me to respond to this point, or any portion of the letter?

No

possible, upon request of the State Registrar. (In effect before 7/28/59; am 7/25/60, Reg. 2)

Authority: AS 18.50.230
AS 18.50.240

7 AAC 05.440. SUSPICIOUS DEATHS. When there is any question of foul play, no one shall accept a death or fetal death certificate for filing or recording, issue a burial-transit permit, or otherwise move or allow a body to be moved or molested except by order of a law-enforcement officer or court until clearance by the proper magistrate. In any case without medical attention, the magistrate may request a medical examiner to determine the cause of death and prepare a certificate. In any suspicious case, the magistrate will investigate; and if he deems it necessary, enter the case as coroner and call a coroner's jury. In all such cases, the magistrate is responsible for seeing that the certificate of death or fetal death is prepared and filed. He may require anyone concerned to furnish the necessary facts for the certificate, and any medical examiner or other physician brought into the investigation to sign the certification of cause of death. If a coroner's jury has been impanelled, the magistrate must also sign the certificate as coroner, giving the jury's findings in addition to any medical certification.

In presumptive death cases, with no body established, presumption of death must be established in accordance with the statutes. In all presumptive death cases the filing of the certificate, and the presumption about death and its cause shall be the responsibility of the appropriate court. (In effect before 7/28/59; am 7/25/60, Reg. 2)

Authority: AS 12.65.020

AS 18.50.240

7 AAC 05.450. FETAL DEATHS. Any product of gestation of less than 20 weeks duration of pregnancy, showing no evidence of life, may have a fetal death certificate prepared, filed, recorded, and registered as required above, at the option of the parents or others concerned; such certificate is not mandatory for fetal deaths with a duration of pregnancy of less than 20 weeks. However, this regulation does not release anyone from the duty of reporting any suspicion of foul play or illegal act; nor does it except such cases from any existing burial requirements or restrictions, or other health requirements, either state or local. (In effect before 7/28/59; am 7/25/60, Reg. 2)

Authority: AS 18.50.240

7 AAC 05.460. BURIAL-TRANSIT PERMITS. No dead body or fetus of 20 weeks or more gestation shall be finally disposed of, or removed from the state, until a burial-transit permit has been issued by the proper local registrar or other agent duly authorized by the State Registrar. Such burial-transit permit shall be obtained in any case within 72 hours after death (or delivery), unless an extension of time is granted under secs. 550–570 of this chapter. (In effect before 7/28/59; am 7/25/60, Reg. 2)

Authority: AS 18.50.250

7 AAC 05.470. PERSONS WHO MUST OBTAIN. The funeral director, or person acting as such, who first assumes custody of a dead body or fetus shall be responsible for obtaining the burial-transit permit. For the purpose of these regulations, the person who first assumes custody shall include anyone first moving, or causing to be moved, such body or fetus for the following purposes:

(1) for final disposition;

(2) for removal from the state;

(3) for storage or other holding for a period beyond 72 hours after death;

(4) for transportation by common carrier; and

(5) for removal by any means from the registration district where death occurred.

No dead body or fetus shall be moved for any of the above purposes without being accompanied by a burial-transit permit, unless an emergency exists or the body is being moved by an established funeral director for the purpose of preparation for final disposition, and then only in accordance with these regulations and the instructions of the State Registrar; provided further that a law enforcement officer or a court may order the removal of a body when necessary for an official investigation, with a notice of such removal to the proper local

RE: Response to Cole Letter of August 17, 1983

Dear Ms. Cole:

Thank you for your response to our August 4, 1983 letter to Mr. Snowden.

First, Alaska court officials are not mandated to order an autopsy when a physician is unwilling to sign a death certificate. AS 12.65.020 provides that a court may order a medical examination of the deceased.

Secondly, your letter does not comment on the major point raised: the religious objection of the family to the removal of the body from the Bethel Region. We believe that this objection poses a fundamental constitutional issue which your letter and State Law does not address. Unless this issue is properly addressed we will be faced with a potential crisis and court contest, similar in intensity to that of Kwethluk, each time a court ordered autopsy is attempted.

Finally, it should be pointed out that the State could provide adequate facilities in Bethel for conducting autopsies. Additionally, AS 12.65.010 provides for State appointment of a medical examiner for the Bethel area. The Commissioner of health and social services may make such an appointment when "...in his opinion, the administration of justice requires."

We believe, and hope that you concur and will support the principal, that "the administration of justice" requires that a medical examiner be appointed for the Bethel Region, together with appropriate facilities, to conduct court ordered autopsies.

By copy of this letter we ask our state representatives to assist us in implementing the above request.

Sincerely,

August 17, 1983

Ivan M. Ivan, President
Association of Village Council Presidents
P.O. Box 219
Bethel, AK 99559

Dear Mr. Ivan:

Your letter to Art Snowden dated August 4, 1983, arrived in this office at a time when Mr. Snowden was out of the office. Because of the importance of your request, Mr. Snowden requested me by telephon to respond to you immediately.

Unfortunately, it is not possible to schedule all future court ordered autopsies from your region in Bethel.

As you know, the circumstances under which an autopsy must be ordered are set out in the Alaska Statutes. When a death occurs under such circumstances, court officials must order an autopsy.

Bethel does not have appropriate facilities for the performance of autopsies. The requirements for autopsy rooms are established by state regulation (see 7 AAC 35.120). There are no funeral homes in Bethel, and the Bethel hospital facilities do not conform with the state requirements for autopsy rooms. I have spoken with Dr. Propst, who performed the autopsy on Arnold Nicolai in Bethel. He told me that the facilities in Bethel are totally inadequate for autopsy purposes. (In that Bethel does not have an autopsy facility, Dr. Propst had to transport his autopsy instruments with him.)

Also, a medical examiner is not generally available to Bethel. We were very fortunate in that we were able to schedule Dr. Propst to go to Bethel for the autopsy of Mr. Nicolai. Medical examiners are not available to go to Bethel on a routine basis.

Also, the court system has no available funds which would allow us to conduct autopsies in Bethel. In the case of Mr. Nicolai, the court system chartered a plane to transport Dr. Propst to and from Bethel. The court system had to pay Dr. Propst's professional fees for his travel time, in addition to his fee for the autopsy. We have no money available in our budget to pay for these types of extraordinary expenses.

I would like to respond to two other points you made in your letter. Alaska law does require that a body be embalmed if it will not reach its final destination within 24 hours after the death. [7 AAC 35.100(b)(3)]. It is true that the embalming costs are the responsibility of the deceased's estate or the deceased's family. However, it should be noted that the state Division of Public Assistance will pay funeral expenses up to $750.00 for all persons unable to afford these costs.

Also, you noted that the Nicolai family objected to the removal of Mr. Nicolai's body because, in part, of a prior adverse experience of having the body of a family member removed to Anchorage for autopsy purposes and not returned for a protracted period of time. I understand that there have been cases in which this problem has occurred, primarily because of lack of communication between the family and the Anchorage funeral home. The funeral home will not release the body until it receives information from the family as necessary to complete the death certificate, and the funeral home needs direction from the family as to where the body should be sent. (Sometimes the required information is sent with the body.) However, in the past, some families did not know who to contact in Anchorage and a delay in the return of the body did occur. It is my understanding that the Anchorage coroner's office has been actively working to avoid any future problems in this area. Anchorage Coroner Dolores Wilks will be happy to discuss this situation with you and to give you any information you may need. You can reach her at the above address or by phone at 264-0690.

In summary, I must conclude that we are bound to our current practice because of the requirements of the Alaska Statutes and regulations, our budgetary constraints and the lack of an appropriate facility and a medical examiner in Bethel. To the extent that you may want to pursue changes in the laws that presently exist, I would suggest that you contact your legislative representatives.

RE: Court Ordered Autopsies in the AVCP/Calista Region

Dear Mr. Snowden:

I am writing to you on behalf of the 56 Native Villages of the AVCP/ Calista Region concerning the present policy of having court ordered autopsies performed in Anchorage, outside of our Region.

Recent events in one of our villages, Kwethluk, underscore the legal and ethical limitations of removing the bodies of local residents for autopsy purposes to Anchorage. In Kwethluk, we had a serious clash of individual vs. state interests involved over the removal of the body of a local resident, Arnold Nicolai. The family of the deceased objected to the removal of the body on religious grounds and a prior adverse experience of having the body of a family member removed to Anchorage for autopsy purposes and not returned for a protracted period of time.

Although we recognize a legitimate State interest in conducting an inquiry into the cause of death, we believe that as a legal and ethical matter, the State must show a compelling reason for removing a body to Anchorage for an autopsy when fundamental First Amendment rights (i.e., Russian Orthodox and Eskimo religious practice of holding a 48 hour mourning period in the presence of the deceased and immediate burial of th untampered body thereafter) are involved.

As a matter of law, even if the State can show a compelling reason for an Anchorage autopsy (i.e., lack of facilities in Bethel and determination of the cause of death), the State is still under a burden in the face of a Fundamental Constitutional right to exercise that such an exercise would properly include holding all future court ordered autopys in Bethel.

We believe that such a change in policy will go along way towards balancing the valid but competing interests of the State and our Native Eskimo people in the Bush. It will alsc help to defuse volatile confrontations, such as the Kwethluk incident, through a sensitive application of State law to Native interests.

Please contact me if you have any further questions.

Very truly yours,

Stephanie J. Cole

Memorandum

Alaska Court System

TO: Senior Staff

DATE : August 4, 1983

FROM: Stephanie J. Cole
Deputy Director for Services

SUBJECT: Bush Autopsy

Dale Curda, the magistrate in Bethel, called me today about a coroner situation in Kwethluk that some of you may be interested in.

Someone died in Kwethluk. Dale Curda ordered an autopsy. When the troopers arrived to pick up the body to take to Anchorage, the family would not let the troopers take the body. The troopers called for reinforcements; soon they numbered seven. However, about 50 villagers stood in and around the house where the body lay and refused to allow the body to be taken.

Finally, Dale called Judge Tunley who conducted a telephonic hearing until late that night. A compromise was reached: the villagers allowed the body to be taken to Bethel (not Anchorage) for autopsy and then the body was immediately shipped back to Kwethluk. Dr. Propst made a special trip to Bethel to perform the autopsy.

The court system had to bear the expense of Dr. Propst's trip to Bethel. Dr. Propst stated that he was rarely available for such trips because of his busy schedule.

The avowed reason for the problem was that Kwethluk is a Russian Orthodox village, and that religion requires that a body be buried within 48 hours of death. However, Dale indicated that there may be some controversy on this point. He thought the refusal could be related to specific problems a villager or villagers had with bush autopsies in the past: "mangled" bodies being returned, and communication problems - the villagers not being kept informed about where the body was.

Dale was concerned that the problem may reoccur in other villages, and he suggested that the court staff might want to give the problem some thought.

Memorandum

Alaska Court System

TO: All Magistrates, District Court
Judges and Clerks of Court

DATE : June 8, 1982

FROM: Bob Martin
Magistrate Training Assistant

SUBJECT: Funeral Expenses in Coroner Cases

As of March 31, 1982, the Bureau of Indian Affairs and A.V.C.P. Social Services ceased paying for funeral expenses, i.e. embalming, casket and clothing, for deceased Alaska Natives taken to Anchorage for autopsy under court order.

The State Division of Public Assistance will now pay such funeral expenses up to $750.00 for all persons unable to afford these costs.

To obtain this assistance the decedent's family or next of kin should contact the nearest Division of Public Assistance District Office (see Attachment #1).

If the family receives welfare assistance of any kind, they are presumed eligible for burial assistance. Otherwise, a form entitled Application for Food Stamps (GEN #50) with the words "GR Burial Application" added in the middle of the first page should be completed and submitted to the nearest district office (see Attachment #2). This form is available from village fee agents. When burial assistance is requested, the Division will determine eligibility, advise the applicant whether these services will be provided and, if so, arrange payment with the funeral home.

The Court System will continue to pay autopsy and transportation costs.

Further questions on this subject should be forwarded to my office.

Memorandum

Alaska Court System

TO: Susan Miller

DATE : October 8, 1982

FROM: Bob Martin
Magistrate Training Assistant

SUBJECT: Payment for Embalming on Court Ordered Autopsies

I talked with Bob Fisher this afternoon about your question regarding payment for embalming for court ordered autopsies.

Bob said that barring indigency, it is the family's responsibility to pay for embalming the body when the court has ordered an autopsy. The Division of Public Assistance will pay for embalming if the decedent's family or next of kin qualify for burial assistance.

In those cases where the FAA orders autopsies, the federal government pays the embalming costs.

RE: BILLY M. SHEA/RALPH NEAL HOWARD

Dear Mr. Witzleben:

I have been made aware that you have called Mr. Hall, Mr. Snowden and Mr. Barrier in Anchorage. You should be made aware that I have attempted to call you and your assistant Ms. Ellen Chiavaro-Smolenski and was not able to make contact with you, I did leave two messages. According to Ms. Chiavaro-Smolenski the messages were not passed on. I spoke to her on these matters on April 15, 1983. I tell you these things because I want you to know that I have not ignored your letters or requests.

When I spoke to Ms. Chiavaro-Smolenski I explained to her in detail why the families of the deceaseds had not received their Death Certificates as quickly as they might expect. In the case of Mr. Shea, his certificate has several errors which your assistant pointed out to this office. When those errors were reported we had to send the information to Juneau for their documents to be corrected. The certificate was then returned to our office with the errors corrected and the certificates were sent to his family. Also, in the notice sent of the errors your assistant indicated that sections 31a through 31g had not been completed. In the case of Mr. Shea there was not an accident and these sections did not need to be completed.

In Mr. Howard's case I sent a letter to Mrs. Howard and copies of the Death Certificate that we had. I pointed out to her that until the autopsy report was received and a decision was made as to whether or not an Inquest was to be held, the documents would not do her much good. This case was mainly handled in Fairbanks and I have to wait for autopsy reports (which can take up to a month) and any further information. If an Inquest had been needed in that matter it could have taken even longer for her to receive the completed certificate. If I send her copies without the necessary information contained she cannot submit them for the things she needs done.

Memorandum to Wilma
RE: Bill to ... Mike Hall Howard
April 2, 19..

Now that we have received the information on Mr. Howard we will have to submit to Juneau the new information and wait until they have the information on the original Death Certificate and return their corrections to us so that we can make the corrections on our certificate. Juneau is now about 4 to 6 weeks behind on their preparations. So, as you can see it might still be awhile before Mrs. Howard receives the corrected document. We have to wait for the corrections to be made in Juneau so that all documents correspond and their are not two different documents.

We understand the inconvenience that this puts on the families and would like to avoid the wait as much as you would, however, I don't feel that sending incorrect copies aids the families and I have ordered the staff here not to send out the copies until the corrections have been made or the additions added. Therefore, it will take quite a-while for the requests to be filled.

If you have any further questions on these matters do not hesitate to call or write our office and we will be of as much help as we possibly can.

Sincerely,

V. Jeanne Cross,
Magistrate
Acting Clerk of Court
Barrow Trial Courts

November 15, 1983

The Honorable Joe Josephson
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Josephson,

Considering your options (us or public radio), thank you for spending some of your time with us Saturday. Neither Dave Franke, Dick Rome, or myself belong to the Allied Funeral Group, so we were as much in the dark about the agenda for the meeting, and the reasons for holding it, as you were.

It is our feeling that the problems alluded to at the meeting this weekend, are not so much a legislative problem as an administrative one. We believe the Alaska Court Systems unwillingness to pay for our services upon completion of an autopsy, coupled with the discontinuing of E.I.A. funding, which had historically solved this problem, and the reluctance of the Department of Health and Social Services to provide funding without the usual administrative delay is creating problems for us, State Troopers, Magistrates and families of the deceased.

We took the time to do some legal research this morning. While we are not attorneys, it seems pretty evident to us that the Department of Health and Social Services has very broad statutory powers when it comes to regulating and protecting the public health (18.05.010 and 18.15.010) and also more specific power when it comes to transporting the dead (18.05.040). Perhaps someone on your staff could research this further to verify our assumptions. We have never been told by Health and Social Services that this was not the case, but some members of the allied group said that Health and Social Services staff people had told them this.

If Health and Social Services' solution to this problem is to eliminate the requirement for embalming, we think they are making a serious mistake. Sending an autopsied and unembalmed human remains back to a family is pure foolishness. Often, the cause of death cannot be determined for several days. But when the cause is Hepatitis B, Meningitis, Tuberculosis, Etc., sending that body back unembalmed is criminal. If you feel we lack objectivity in this matter, please contact Dr. Michael T. Propst, M.D. at Humana Hospital (264-1171). He is a State

NSM

Medical Examiner and board certified in clinical and forensic pathology. The choice of the words "foolishness" and "criminal" are his as I have just talked to him about this issue. Also, sending untreated bodies that have been autopsied back to families regardless of the cause of death would set the administration of rural justice back fifty years. Problems between the police and families would multiply ten-fold.

If you desire, we can arrange for you, your colleagues, members of your staff, Health and Social Services administrators, or others with a pertinent interest in this issue to attend an autopsy at our facilities. We are not suggesting this to shock anyone, but we are willing to give you a first-hand look at what takes place at an autopsy and following the examination. We think you would then have a better understanding of the problem and perhaps a clearer idea of what can be done to solve this problem. We are going to suggest that this same opportunity be given to Magistrates of the Alaska Court System and the courts administrators.

Thank you for your interest in this issue. Please call us if you have further questions or comments.

Very Truly Yours,

Lee Moeglein

Dear Mr. Witzleben:

In response to your letter of January 28, 1982 concerning the Embalming Regulations 7 AAC 35.090-130. I will attempt to respond to your comments and questions as they appear in the letter.

It is hoped you read through 7 AAC 35.090(a-d) in its entirety. Paragraph (d) begins with the sentence, "When death has occurred from smallpox, plague, anthrax, diphtheria, menningococcal meningitis, cholera, epidemic typhus, or any unusual and highly communicable disease, the body shall be handled and prepared under strict quarantine conditions." It would be unpracticable for us to attempt to list every highly or unusual communicable disease. To clear a possible misconception on your part the embalming process will not render harmless Tubercle bacillus or Hepatitis virus. The whole thrust of 7 AAC 35.090(a-d) is the importance of exercising the utmost care in the handling of the deceased, especially the mortician. Good sanitation practices cannot be stressed too highly.

As you have undoubtedly read through 7 AAC 35.100(a-c) you are aware that when a body can reach its destination within 24 hours after death and the person did not die of any of the diseases mentioned specifically or in the group "unusual and highly communicable" the body can be buried unembalmed. After the 24 hour period only the Commissioner of Health and Social Services can waiver the embalming requirement.

In the Fairbanks area we have worked out a speedy method of having a request for a waiver considered. The mortuary or relative of the deceased contacts the coroner who investigates, the coroner then contacts David Bruce, Deputy Director of the Division of Public Health. The coroner has obtained, in writing, a statement from the attending physician stating the deceased did not die from a communicable disease falling in the group listed in 7 AAC 35.090(d), or that the body in some other manner represents a threat to the health of the public. Incidentally, we will not grant a waiver unless we have the coroner's recommendation that one be given. Mr. Bruce then works with my Special Assistant to present the

information to me. If I am in travel status, my Special Assistant contacts me by phone and discusses the matter. If I am satisfied that a waiver is best for all parties concerned, the persons handling the body are not placed at risk and there is no threat to the public's health, a waiver is often granted. I would suspect in the instance of advanced decomposition it is unlikely a waiver would be granted.

Are you in violation of the code if you return the deceased after 24 hours unembalmed? While not an attorney, I would say yes you would be and thus subject to prosecution. For the remainder of the question I can only refer you to your own attorney and/or your insurance company.

Your next question concerning the metal shipping containers utilized by the Alaska Court System is difficult to answer as we have not promulgated regulations covering caskets. We can find no law mandating the use of a casket for burial unless the deceased is infected with a disease as referenced in 7 AAC 35.090(d). Our basic premise is that everyone deserves a "decent" burial. Beyond this we have not entered the arena of specifying casket requirements. What you and I determine to be a "decent burial" might be offensive to another.

If well constructed I see no reason why the court system's transfer case could not be considered both a shipping container and casket. As I have never seen one of these devices nor do I recall any dialogue on the subject, my office reserves the right to reevaluate this decision at a later date should a problem arise.

We hesitate to comment in to much detail on a portion of a proposed federal rule. However, I suspect the state regulation would supercede the federal rule especially since provision for superceding is contained in the wording.

In response to your questions concerning authorization, as we cannot interpret Federal intent again I can only refer you to your attorney. You might wish to provide comment to the Federal Trade Commission on their proposed rule.

There is one other Governmental Agency having some jurisdiction. The Federal Aviation Administration has rules and regulations covering the transportation of the dead. If their requirements are more rigid they would supercede state codes.

I hope some of your questions have been answered. For some, those outside my sphere of influence, it would be improper, have no legal standing and would only add to the confusion if I were to attempt a comment in detail.

Sincerely,

Helen D. Beirne

Memorandum

Alaska Court System

TO:
Rick Barrier

DATE : November 9, 1982

FROM:
Karla Forsythe

SUBJECT: Payment of expenses related to autopsies

I've attached the Probate Forms and statutes which relate to presentation of claims against an estate by a creditor.

Pursuant to AS 13.16.470 (a) (2), claims for "reasonable funeral expenses" will be paid second in line, after the costs and expenses of administration. If we can't argue successfully that embalming costs are part of funeral costs, the fourth payment preference is "reasonable and necessary medical and hospital expenses of the last illness of the defendant, including compensation of persons attending him." It seems unlikely that the legislature intended to pay claims for actually burying someone, and for expenses incurred while a person is dying, but to omit related expenses such as embalming.

The procedure could work as follows:

- when the coroner arranges to ship the body to the location at which the autopsy will be performed, the next of kin should be notified that the court will be seeking reimbursement for expenses which will be incurred in embalming the body and preparing it for travel. If the next of kin want to incur additional expenses (fancier casket), they should make separate arrangements with the funeral home.
- the court system would present a claim both to the personal representative and to the court. Someone would have to represent the court system before the court if the claim is disallowed and we want to pursue it.

Do you think these estates will have sufficie to make it worthwhile?

Hope this is what you wanted -

Adm. F-1

515. Encumbered assets
520. Administration in more than one state; duty of personal representative
525. Final distribution to domiciliary representative

Sec. 13.16.450. Notice to creditors. Unless notice has already been given under this section, a personal representative upon his appointment shall publish a notice once a week for three successive weeks in a newspaper of general circulation in the judicial district announcing his appointment and address and notifying creditors of the estate to present their claims within four months after the date of the first publication of the notice or be forever barred. (§ 1 ch 78 SLA 1972)

Only claims for money due the claimant from the deceased require presentation to the administrator. Geist v. O'Connor, 13 Alaska 15, 92 F. Supp. 461 (D. Alas. 1950).

Am. Jur., ALR and C.J.S. references.—21 Am. Jur., Executors and Administrators, §§ 321 to 336, 341 to 408.

Sufficiency of notice of claim against decedent's estate, 74 ALR 368.

Sufficiency of notice of unmatured or contingent claim, 74 ALR 385.

Filing claim against estate of decedent as affecting or precluding other remedies against the estate, 120 ALR 1225.

34 C.J.S. Executors and Administrators §§ 367 to 481.

Sec. 13.16.455. Statutes of limitations. Unless an estate is insolvent the personal representative, with the consent of all successors, may waive any defense of limitations available to the estate. If the defense is not waived, no claim which was barred by any statute of limitations at the time of the decedent's death shall be allowed or paid. The running of any statute of limitations measured from some other event than death and advertisement for claims against a decedent is suspended during the four months following the decedent's death but resumes thereafter as to claims not barred pursuant to the sections which follow. For purposes of any statute of limitations, the proper presentation of a claim under § 465 of this chapter is equivalent to commencement of a proceeding on the claim. (§ 1 ch 78 SLA 1972)

Sec. 13.16.460. Limitations on presentation of claims. (a) All claims against a decedent's estate which arose before the death of the decedent, including claims of the state and any subdivision of

(Title effective January 1, 1973)

it, whether due or to become due, absolute or contingent, liquidated or unliquidated, founded on contract, tort or other legal basis, if not barred earlier by other statute of limitations, are barred against the estate, the personal representative, and the heirs and devisees of the decedent, unless presented as follows:

(1) within four months after the date of the first publication of notice to creditors if notice is given in compliance with § 450 of this chapter; however, claims barred by the nonclaim statute at the decedent's domicile before the first publication for claims in this state are also barred in this state;

(2) within three years after the decedent's death, if notice to creditors has not been published.

(b) All claims against a decedent's estate which arise at or after the death of the decedent, including claims of the state and any subdivision of it, whether due or to become due, absolute or contingent, liquidated or unliquidated, founded on contract, tort, or other legal basis, are barred against the estate, the personal representative, and the heirs and devisees of the decedent, unless presented as follows:

(1) a claim based on a contract with the personal representative, within four months after performance by the personal representative is due;

(2) any other claim, within four months after it arises.

(c) Nothing in this section affects or prevents

(1) any proceeding to enforce any mortgage, pledge, or lien upon property of the estate; or

(2) to the limits of the insurance protection only, any proceeding to establish liability of the decedent or the personal representative for which he is protected by liability insurance. (§ 1 ch 78 SLA 1972)

Am. Jur. and ALR references.—21 Am. Jur., Executors and Administrators, § 343 et seq.

Conduct of representative preventing filing of claims in time, 11 ALR 246; 66 ALR 1415.

Contingent claim, 34 ALR 372.

Executory contract for sale, 35 ALR 927.

Bar of statute of nonclaim of decedent's domicile as affecting assertion of claim elsewhere, 72 ALR 1030.

Claim for taxes, 109 ALR 1370.

Necessity of presenting claim for specific performance of a contract to make a will in favor of another or to will the latter a specified sum or property, 113 ALR 1070.

Exclusiveness of grounds enumerated in statute providing, under specified circumstances, extension of time for filing claims under decedent's estate, 37 ALR2d 1304.

Sec. 13.16.465. Manner of presentation of claims. Claims against a decedent's estate may be presented as follows:

(1) The claimant may deliver or mail to the personal representative a written statement of the claim indicating its basis, the

(Title effective January 1, 1973)

name and address of the claimant, and the amount claimed, or may file a written statement of the claim, in the form prescribed by rule, with the clerk of the court. The claim is considered presented on receipt of the written statement of claim by the personal representative or on the filing of the claim with the court, whichever occurs first. If a claim is not yet due, the date when it will become due shall be stated. If the claim is contingent or unliquidated, the nature of the uncertainty shall be stated. If the claim is secured, the security shall be described. Failure to describe correctly the security, the nature of any uncertainty, and the due date of a claim not yet due does not invalidate the presentation made.

(2) The claimant may commence a proceeding against the personal representative in any court where the personal representative may be subjected to jurisdiction, to obtain payment of his claim against the estate, but the commencement of the proceeding must occur within the time limited for presenting the claim. No presentation of claim is required in regard to matters claimed in proceedings against the decedent which were pending at the time of his death.

(3) If a claim is presented under (1) of this section, no proceeding on it may be commenced more than 60 days after the personal representative has mailed a notice of disallowance; but, in the case of a claim which is not presently due or which is contingent or unliquidated, the personal representative may consent to an extension of the 60-day period, or to avoid injustice the court, on petition, may order an extension of the 60-day period, but in no event shall the extension run beyond the applicable statute of limitations. (§ 1 ch 78 SLA 1972)

Character of claim. — The claim that is to be presented to the administrator is not a claim of any peculiar or particular character, but is any claim that might be asserted as a cause of action or as a right demanded. In re Estate Gladough, 1 Alaska 649 (1902).

Am. Jur. and ALR references.—21 Am. Jur., Executors and Administrators, § 375.

Necessity of presenting claim to executor or administrator before bringing suit, 34 ALR 362.

Presentation of claim as condition precedent to action on contingent claim, 34 ALR 372.

Executor's or administrator's waiver or presentation of claim against estate before bringing action thereon, 34 ALR 393.

Presentation of claim against deceased debtor's estate as condition of action to enforce judgment lien, 114 ALR 1167.

Amendment of claim against decedent's estate, introducing new or different claim or effecting substantial change in claim, 56 ALR2d 627.

Sec. 13.16.470. Classification of claims. (a) If the applicable assets of the estate are insufficient to pay all claims in full, the personal representative shall make payment in the following order:

(1) costs and expenses of administration;

amended SLL p. 183

(Title effective January 1, 1973)

(2) reasonable funeral expenses and reasonable and necessary medical and hospital expenses of the last illness of the decedent, including compensation of persons attending him;

(3) debts and taxes with preference under federal law or the laws of this state;

(4) all other claims.

(b) No preference shall be given in the payment of any claim over any other claim of the same class, and a claim due and payable shall not be entitled to a preference over claims not due. (§ 1 ch 78 SLA 1972)

Am. Jur. and ALR references.—21 Am. Jur., Executors and Administrators, § 385.

Vendor under executory contract for sale of land as preferred creditor in case of vendee's death, 35 ALR 929.

State's prerogative right of preference at common law, 51 ALR 1355; 65 ALR 1331; 90 ALR 184; 167 ALR 640.

Remedies of creditors of insolvent decedent's estate where other creditors have received excessive payment, 77 ALR 981.

Effect of filing claim for mortgage on real estate, as against estate of deceased mortgagor, 78 ALR 1148.

Expense of preserving assets before appointment of executor or administrator as entitled to priority, 108 ALR 393.

Sec. 13.16.475. Allowance of claims. (a) As to claims presented in the manner described in § 465 of this chapter within the time limit prescribed in § 460 of this chapter, the personal representative may mail a notice to any claimant stating that the claim has been disallowed. If, after allowing or disallowing a claim, the personal representative changes his decision concerning the claim, he shall notify the claimant. The personal representative may not change a disallowance of a claim after the time for the claimant to file a petition for allowance or to commence a proceeding on the claim has run and the claim has been barred. Every claim which is disallowed in whole or in part by the personal representative is barred so far as not allowed unless the claimant files a petition for allowance in the court or commences a proceeding against the personal representative not later than 60 days after the mailing of the notice of disallowance or partial allowance if the notice warns the claimant of the impending bar. Failure of the personal representative to mail to a claimant notice of action on his claim for 60 days after the time for original presentation of the claim has expired has the effect of a notice of allowance.

(b) Upon the petition of the personal representative or of a claimant in a proceeding for the purpose, the court may allow in whole or in part any claim or claims presented to the personal representative or filed with the clerk of the court in due time and not barred by (a) of this section. Notice in this proceeding shall be given to the claimant, the personal representative and those other

(Title effective January 1, 1973)

persons interested in the estate as the court may direct by order entered at the time the proceeding is commenced.

(c) A judgment in a proceeding in another court against a personal representative to enforce a claim against a decedent's estate is an allowance of the claim.

(d) Unless otherwise provided in any judgment in another court entered against the personal representative, allowed claims bear interest at the legal rate for the period commencing 60 days after the time for original presentation of the claim has expired unless based on a contract making a provision for interest, in which case they bear interest in accordance with that provision. (§ 1 ch 78 SLA 1972)

Appeal. — If an administrator has any good reason to believe that the heirs of the estate are aggrieved by a decision of the court, allowing a creditor's claim previously rejected by him, and that their rights are injuriously affected by the judgment and decree of the court, upon their request it is the duty of the administrator, in their behalf, to present his application for an appeal in their interest; and in their interest such appeal may properly be allowed, if there is any reasonable ground for it whatsoever. In re Estate Gladough, 1 Alaska 649 (1902).

Interest of person seeking appeal. —The person seeking the appeal must have an interest in the subject matter of the appeal, and his interest must be adversely affected by the judgment. In re Estate Gladough, 1 Alaska 649 (1902).

Am. Jur., ALR and C.J.S. references.—21 Am. Jur., Executors and Administrators, §§ 171 to 204, 221, 361, 377, 386.

Allowance out of decedent's estate for services rendered [illegible] employed by executor, 79 ALR 521; 142 ALR 1[illegible].

Who entitled to contest, or appeal from, allowance of claim against decedent's estate, 118 ALR 743.

Executor's right to appeal from court's rejection of claim, 129 ALR 922.

Creditor's right to maintain action [illegible] interest of decedent's estate, 158 ALR 729.

33 C.J.S. Executors and Administrators §§ 129 to 140.

Sec. 13.16.480. Payment of claims. (a) Upon the expiration of four months from the date of the first publication of the notice to creditors, the personal representative shall proceed to pay the claims allowed against the estate in the order of priority prescribed, after making provision for homestead, family and support allowances, for claims already presented which have not yet been allowed or whose allowance has been appealed, and for unbarred claims which may yet be presented, including costs and expenses of administration. By petition to the court in a proceeding for the purpose, or by appropriate motion if the administration is supervised, a claimant whose claim has been allowed but not paid as provided herein may secure an order directing the personal representative to pay the claim to the extent that funds of the estate are available for the payment.

(b) The personal representative at any time may pay any just claim which has not been barred, with or without formal presenta-

(Title effective January 1, 1973)

tion, but he is personally liable to any other claimant whose claim is allowed and who is injured by such payment if

(1) the payment was made before the expiration of the time limit stated in (a) of this section and the personal representative failed to require the payee to give adequate security for the refund of any of the payment necessary to pay other claimants; or

(2) the payment was made, due to the negligence or wilful fault of the personal representative, in such a manner as to deprive the injured claimant of his priority. (§ 1 ch 78 SLA 1972)

Sec. 13.16.485. Individual liability of personal representative. (a) Unless otherwise provided in the contract, a personal representative is not individually liable on a contract properly entered into in his fiduciary capacity in the course of administration of the estate unless he fails to reveal his representative capacity and identify the estate in the contract.

(b) A personal representative is individually liable for obligations arising from ownership or control of the estate or for torts committed in the course of administration of the estate only if he is personally at fault.

(c) Claims based on contracts entered into by a personal representative in his fiduciary capacity, on obligations arising from ownership or control of the estate or on torts committed in the course of estate administration may be asserted against the estate by proceeding against the personal representative in his fiduciary capacity, whether or not the personal representative is individually liable therefor.

(d) Issues of liability as between the estate and the personal representative individually may be determined in a proceeding for accounting, surcharge or indemnification or other appropriate proceeding. (§ 1 ch 78 SLA 1972)

Tort committed in course of administration.—An administrator, executor, or trustee may be sued in his representative capacity, and collection may be had from the trust assets, for a tort committed in the course of administration, if it is determined by the court that the tort was a common incident of the kind of business activity in which the administrator, executor, or trustee was properly engaged on behalf of the estate. Vance v. Estate of Myers, Sup. Ct. Op. No. 770 (File No. 1447), 491 P.2d 816 (1972).

Sec. 13.16.490. Secured claims. Payment of a secured claim is upon the basis of the amount allowed if the creditor surrenders his security; otherwise payment is upon the basis of one of the following:

(1) if the creditor exhausts his security before receiving payment, unless precluded by other law upon the amount of the claim allowed less the fair value of the security; or

(Title effective January 1, 1973)

(2) if the creditor does not have the right to exhaust his security or has not done so, upon the amount of the claim allowed less the value of the security determined by converting it into money according to the terms of the agreement under which the security was delivered to the creditor, or by the creditor and personal representative by agreement, arbitration, compromise or litigation. (§ 1 ch 78 SLA 1972)

Sec. 13.16.495. Claims not due and contingent or unliquidated claims. (a) If a claim which will become due at a future time or a contingent or unliquidated claim becomes due or certain before the distribution of the estate, and if the claim has been allowed or established by a proceeding, it is paid in the same manner as presently due and absolute claims of the same class.

(b) In other cases the personal representative or, on petition of the personal representative or the claimant in a special proceeding for the purpose, the court may provide for payment as follows:

(1) if the claimant consents, he may be paid the present or agreed value of the claim, taking any uncertainty into account;

(2) arrangement for future payment, or possible payment, on the happening of the contingency or on liquidation may be made by creating a trust, giving a mortgage, obtaining a bond or security from a distributee, or otherwise. (§ 1 ch 78 SLA 1972)

Sec. 13.16.500. Counterclaims. In allowing a claim the personal representative may deduct any counterclaim which the estate has against the claimant. In determining a claim against an estate a court shall reduce the amount allowed by the amount of any counterclaims and, if the counterclaims exceed the claim, render a judgment against the claimant in the amount of the excess. A counterclaim, liquidated or unliquidated, may arise from a transaction other than that upon which the claim is based. A counterclaim may give rise to relief exceeding in amount or different in kind from that sought in the claim. (§ 1 ch 78 SLA 1972)

Sec. 13.16.505. Execution and levies prohibited. No execution may issue upon nor may any levy be made against any property of the estate under any judgment against a decedent or a personal representative, but this section shall not be construed to prevent the enforcement of mortgages, pledges or liens upon real or personal property in an appropriate proceeding. (§ 1 ch 78 SLA 1972)

Sec. 13.16.510. Compromise of claims. When a claim against the estate has been presented in any manner, the personal representative may, if it appears for the best interest of the estate, compromise the claim, whether due or not due, absolute or contingent, liquidated or unliquidated. (§ 1 ch 78 SLA 1972)

(Title effective January 1, 1973)

Sec. 13.16.515. Encumbered assets. If any assets of the estate are encumbered by mortgage, pledge, lien, or other security interest, the personal representative may pay the encumbrance or any part of it, renew or extend any obligation secured by the encumbrance or convey or transfer the assets to the creditor in satisfaction of his lien, in whole or in part, whether or not the holder of the encumbrance has filed a claim, if it appears to be for the best interest of the estate. Payment of an encumbrance does not increase the share of the distributee entitled to the encumbered assets unless the distributee is entitled to exoneration. (§ 1 ch 78 SLA 1972)

Sec. 13.16.520. Administration in more than one state; duty of personal representative. (a) All assets of estates being administered in this state are subject to all claims, allowances and charges existing or established against the personal representative wherever appointed.

(b) If the estate either in this state or as a whole is insufficient to cover all family exemptions and allowances determined by the law of the decedent's domicile, prior charges and claims, after satisfaction of the exemptions, allowances and charges, each claimant whose claim has been allowed either in the state or elsewhere in administrations of which the personal representative is aware, is entitled to receive payment of an equal proportion of his claim. If a preference or security in regard to a claim is allowed in another jurisdiction but not in this state, the creditor so benefited is to receive dividends from local assets only upon the balance of his claim after deducting the amount of the benefit.

(c) In case the family exemptions and allowances, prior charges and claims of the entire estate exceed the total value of the portions of the estate being administered separately and this state is not the state of the decedent's last domicile, the claims allowed in this state shall be paid their proportion if local assets are adequate for the purpose, and the balance of local assets shall be transferred to the domiciliary personal representative. If local assets are not sufficient to pay all claims allowed in this state the amount to which they are entitled, local assets shall be marshalled so that each claim allowed in this state is paid its proportion as far as possible, after taking into account all dividends on claims allowed in this state from assets in other jurisdictions. (§ 1 ch 78 SLA 1972)

Sec. 13.16.525. Final distribution to domiciliary representative. The estate of a nonresident decedent being administered by a personal representative appointed in this state shall, if there is a personal representative of the decedent's domicile willing to receive it, be distributed to the domiciliary personal representative for the

(Title effective January 1, 1973)

benefit of the successors of the decedent unless (1) by virtue of the decedent's will, if any, and applicable choice of law rules, the successors are identified under the local law of this state without reference to the local law of the decedent's domicile; (2) the personal representative of this state, after reasonable inquiry, is unaware of the existence or identity of a domiciliary personal representative; or (3) the court orders otherwise in a proceeding for a closing order under § 620 of this chapter or incident to the closing of a supervised administration. In other cases, distribution of the estate of a decedent shall be made in accordance with §§ 5—400 and §§ 535—695 of this chapter. (§ 1 ch 78 SLA 1972)

Am. Jur. and ALR references.—21 Am. Jur., Executors and Administrators, §§ 171 to 204, 221.

Accountability of domiciliary representative in respect of assets subject to ancillary administration in another state, 132 ALR 1369.

Article 9. Special Provisions Relating to Distribution.

Section
535. Successors' rights if no administration
540. Distribution; order in which assets appropriated; abatement
545. Right of retainer
550. Interest on general pecuniary devise
555. Penalty clause for contest
560. Distribution in kind; valuation; method
565. Distribution in kind; evidence
570. Distribution; right or title of distributee
575. Improper distribution; liability of distributee
580. Purchasers from distributees protected
585. Partition for purpose of distribution
590. Private agreements among successors to decedent binding on personal representative
595. Distributions to trustee
600. Disposition of unclaimed assets
605. Distribution to person under disability
610. Apportionment of estate taxes

Sec. 13.16.535. Successors' rights if no administration. In the absence of administration, the heirs and devisees are entitled to the estate in accordance with the terms of a probated will or the laws of intestate succession. Devisees may establish title by the probated will to devised property. Persons entitled to property by homestead allowance, exemption or intestacy may establish title to it by proof of the decedent's ownership, his death, and their relationship to the decedent. Successors take subject to all charges incident to administration, including the claims of creditors and allowances of surviving spouse and dependent children, and subject to the rights of others resulting from abatement, retainer, advancement, and ademption. (§ 1 ch 78 SLA 1972)

Sec. 13.16.540. Distribution; order in which assets appropriated; abatement. (a) Except as provided in (b) of this section and except as provided in connection with the share of the sur-

estate or to any other person having a superior right. (§ 1 ch 78 SLA 1972)

Sec. 13.16.690. Small estates; summary administrative procedure. If it appears from the inventory and appraisal that the value of the entire estate, less liens and encumbrances, does not exceed homestead allowance, exempt property, family allowance, costs and expenses of administration, reasonable funeral expenses, and reasonable and necessary medical and hospital expenses of the last illness of the decedent, the personal representative, without giving notice to creditors, may immediately disburse and distribute the estate to the persons entitled to it and filing a closing statement as provided in § 695 of this chapter. (§ 1 ch 78 SLA 1972)

Am. Jur. and C.J.S. references.—21 Am. Jur., Executors and Administrators, §§ 327, 427 to 518, 538 to 544; 40 Am. Jur., Partition, §§ 60, 61, 63, 114, 120.

34 C.J.S. Executors and Administrators §§ 432 to 535, 827 to 943.

Sec. 13.16.695. Small estates; closing by sworn statement of personal representative. (a) Unless prohibited by order of the court and except for estates being administered by supervised personal representatives, a personal representative may close an estate administered under the summary procedures of § 690 of this chapter by filing with the court, at any time after disbursement and distribution of the estate, a verified statement stating that

(1) to the best knowledge of the personal representative, the value of the entire estate, less liens and encumbrances, did not exceed homestead allowance, exempt property, family allowance, costs and expenses of administration, reasonable funeral expenses, and reasonable, necessary medical and hospital expenses of the last illness of the decedent;

(2) the personal representative has fully administered the estate by disbursing and distributing it to the persons entitled to it; and

(3) the personal representative has sent a copy of the closing statement to all distributees of the estate and to all creditors or other claimants of whom he is aware whose claims are neither paid nor barred and has furnished a full account in writing of his administration to the distributees whose interests are affected.

(b) If no action or proceeding involving the personal representative is pending in the court one year after the closing statement is filed, the appointment of the personal representative terminates.

(c) A closing statement filed under this section has the same effect as one filed under § 630 of this chapter.

(d) The superior court may authorize the disposal in a manner it prescribes of personal property which has not been disposed of

Sec. 13.16.440. Proceedings for review of employment of agents and compensation of personal representatives and employees of estate.

NOTES TO DECISIONS

Estates consisting of wrongful death recovery not exempted from procedures for presentation, etc., of claims against estate. — See In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Article 8. Creditor's Claims.

Section

455. Statutes of limitations
470. Classification of claims
515. Encumbered assets

Sec. 13.16.455. Statutes of limitations. Unless an estate is insolvent the personal representative, with the consent of all successors whose interests would be affected may waive any defense of limitations available to the estate. If the defense is not waived, no claim which was barred by any statute of limitations at the time of the decedent's death shall be allowed or paid. The running of any statute of limitations measured from some other event than death and advertisement for claims against a decedent is suspended during the four months following the decedent's death but resumes thereafter as to claims not barred pursuant to the sections which follow. For purposes of any statute of limitations, the proper presentation of a claim under AS 13.16.465 is equivalent to commencement of a proceeding on the claim. (§ 1 ch 78 SLA 1972; am § 15 ch 154 SLA 1976)

Effect of amendments. — The 1976 amendment inserted "whose interests would be affected" in the first sentence.

Legislative history reports. — For report on ch. 154, SLA 1976 (SB 717), see 1976 House Journal, p. 1569.

Sec. 13.16.460. Limitations on presentation of claims.

NOTES TO DECISIONS

This section, et seq., provides detailed and explicit procedures for presentation, allowance and payment of claims against the estate. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Nothing in AS 13.16.005 — 13.16.705 exempts estates consisting in whole or in part of a wrongful death recovery. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Applied in In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Sec. 13.16.470. Classification of claims. (a) If the applicable assets of the estate are insufficient to pay all claims in full, the personal representative shall make payment in the following order:

(1) costs and expenses of administration;
(2) reasonable funeral expenses;
(3) debts and taxes with preference under federal law;

(4) reasonable and necessary medical and hospital expenses of the last illness of the decedent, including compensation of persons attending him;

(5) debts and taxes with preference under other laws of this state;

(6) all other claims.

(b) No preference shall be given in the payment of any claim over any other claim of the same class, and a claim due and payable shall not be entitled to a preference over claims not due. (§ 1 ch 78 SLA 1972; am § 16 ch 56 SLA 1973)

Effect of amendments. — The 1973 amendment rewrote subsection (a).

Legislative history reports. — For report on ch. 56, SLA 1973 (HCS SB 140), see 1973 Senate Journal Supplement No. 9; 1973 House Journal, p. 819.

NOTES TO DECISIONS

Alaska Statute 13.11.135(a) and subsection (a) of this section can be construed harmoniously if, and only if, family allowances are not found to be within the meaning of the word "claim" as defined in AS 13.06.050. In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Alaska Statute 13.11.135(a), not subsection (a) of this section, is the statute of greater specificity. It deals only with family allowances and states that they have priority over all claims with unmistakable clarity. Subsection (a) of this section, on the other hand, is much broader. It deals with the priorities for all categories of claims. In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Family allowances are not "claims". — The word "claims" as used in subsection (a) does not include family allowances. In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978). Family allowances are not specifically included in the definition of "claim" in AS 13.06.050 as are, for example, expenses of administration. In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

The wording of AS 13.11.135(a) itself casts doubt on whether family allowances were meant to be included within the meaning of the word "claims". It states that family allowances have priority over "all claims," not "all other claims." In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Thus, family allowances should be given priority over expenses of administration. In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Sec. 13.16.475. Allowance of claims.

NOTES TO DECISIONS

Ordinarily claims against an estate need only be proved by a preponderance of the evidence. Cavanah v. Martin, Sup. Ct. Op. No. 1792 (File No. 3867), 590 P.2d 41 (1979).

Cited in In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Sec. 13.16.480. Payment of claims.

NOTES TO DECISIONS

Applied in In re Estate of Hutchinson, Sup. Ct. Op. No. 1618 (File No. 3570), 577 P.2d 1074 (1978).

Sec. 13.16.515. Encumbered assets. If any assets of the estate are encumbered by mortgage, pledge, lien, or other security interest, the personal representative may pay the encumbrance or any part of it, renew or extend any obligation secured by the encumbrance or convey or transfer the assets to the creditor in satisfaction of his lien, in whole or in part, whether or not the holder of the encumbrance has presented a claim, if it appears to be for the best interest of the estate. Payment of an encumbrance does not increase the share of the distributee entitled to the encumbered assets unless the distributee is entitled to exoneration. (§ 1 ch 78 SLA 1972; am § 16 ch 154 SLA 1976)

Effect of amendments. — The 1976 amendment substituted "presented a claim" for "filed a claim" near the end of the first sentence.

Legislative history reports. — For report on ch. 154, SLA 1976 (SB 717), see 1976 House Journal, p. 1569.

IN THE HOUSE BY DAVIS AND KOPONEN

SPONSOR SUBSTITUTE FOR HOUSE RESOLUTION NO. 6

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

Relating to the funding of the Emergency Medical Services System.

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS the purpose of the National Emergency Medical Services System Act of 1973 is to promote a standard to assist states and local communities to upgrade their pre-hospital emergency medical services; and

WHEREAS the State of Alaska has more than 1,600 volunteer emergency medical technicians working in more than 75 volunteer ambulance services; and

WHEREAS the provision of emergency medical service pre-hospital care systems is a responsibility of local government, the legislature and the administration; and

WHEREAS the quality of service rendered to a victim of an emergency should be standardized throughout the communities of Alaska; and

WHEREAS the planning process for ambulance service operation, ambulance service manpower certification, and technical assistance to ambulance services and communities is in place and functioning; and

WHEREAS the governor is responsible for the faithful execution of the laws; and

WHEREAS AS 18.08 authorizes the adoption of regulations relating to certification and recertification of emergency medical technicians, emergency medical technician instructors and ambulances; and

WHEREAS the legislature is responsible for the promotion and protection of public health and welfare; and

WHEREAS the state Office of Emergency Medical Services, Division of

Public Health, Department of Health and Social Services is responsible for the implementation of AS 18.08 to protect the public health and welfare; and

WHEREAS the current methods of financial distribution for the Emergency Medical Services System prohibit compliance with this law; and

WHEREAS the Emergency Medical Services System is dependent on several funding sources;

BE IT RESOLVED that the Alaska House of Representatives respectfully requests that the governor include in the annual budget a permanent single-source funding strategy for the Emergency Medical Services System in the state.

POSITION PAPER/Department of Health and Social Servi

POSITION PAPER

Sponsor Substitute for House Resolution No. 6

Relating to the Funding of the Emergency Medical Services System

Sponsor Substitute for House Resolution No. 6 recognizes the need for adequate funding of emergency medical services statewide and calls on the governor to include in his annual budget a permanent single-source funding strategy for the Emergency Medical Services System in the state.

Complicating the funding picture for EMS in the state is the $1.3 million for EMS in Alaska which is included in the U.S. Indian Health Service Budget. Although it appears at this time that this funding will be available in FY 84, it could be reduced or eliminated in the future, which would have a serious, negative impact on emergency medical service programs in native regions.

The Division of Public Health of the Department of Health and Social Services supports the general intent of this resolution. However, the department is not sure what is meant by the statement, "current methods of financial distribution for the Emergency Medical Services System prohibit compliance with. . .(AS 18.08)." This statute authorizes the department to give out grants to regions for EMS systems development, and requires the department to develop regulations for the certification of emergency medical technicians (EMT's), EMT instructors, and ambulance services. The Department of Health and Social Services has developed and implemented these regulations and grant procedures, and uses what it considers to be a fairly sophisticated methodology of distributing available funding within state budget constraints. In past years, the grant process has been complicated somewhat when some legislators put designated grants in other budget categories such as municipal grants through the Department of Administration or unincorporated community grants through the Department of Community and Regional Affairs. When this happens the EMS Section, within the Division of Public Health, is prohibited from identifying these sources of EMS funding when computing its base budget request for the following fiscal year.

SS HR 6

Davis - Explained numerous sources of funds. Passed out cut-sheets -

FY 83 Auth - 1.376

Gov - 1.376

House - 1.4 -

Purpose to draw attention to Ems. req. for funds annually - need one funding source.

Tischer - Hope that they do not lobby to increase their budget - we have telecom now etc. Turf battle - if shower go thru this entity, we will dispense our own funds.

Davis - Thks.

Tischer - Pg 2 l 4-25 - Whereas etc - Your bill addresses a funding mechanism. This whereas not appropriate.

Rabeau - Easier if there was one approp. to family proportion the funds but that it looses a legislative perogative.

3 areas covered by So. Region = Unresolvable issue because of legislative process. Cause lobbying efforts by individual interests. Really not going to change the financing. If we could limit to 3 regions - which is possible - we could do it but reasonably fair process to then boards represent geographical areas.

Rabeau - Candidly - I think we'd get less $ from this method.

Gen Fund, Indian Health Servis provides for co-ordinators, ③ legislatur add-ons - cap & pr budget.

Herrmann - Dept stand?

Rabeau - Prohibited in our budget from adding up all sources.

Herrmann - Security & IHS funds

Rabeau - IHS for Crk in 84 Budget in case budget - fairly secure.

Koperen - Would you or your staff work w/ staff to secure some funding?

Rabeau - Yes! We'd be happy to.

Tischer - How does this res help poor mgt.

Rabeau - It would put all $ into D: IHS budget. Cap. item - funds for an ambulance - already had one - if it would have come thru us or Council - the approp would not have been made.

Tischer - Continued libertarian comments.

Rabeau - Monuons Resolution, don't think the Legis will ever do anything like this.

Herrmann - Back-ground of program.

Davis - ⅓ of budget comes from other sources as add ons.

Mark Johnson - 5 sessions - depen to DR. Rabeau - Coord ⑥ - Admin of EMS

Johnson - 7 staff - Statewide train co-ord - 2 full time certifications. 2200 Statewide
Regions - generally in favor because of undidentifiable funding sources
Jamal Cadenza - SE - EMS Region - answer questions re/ operations - never know until after budget process completed. Reality - impossible to retain existing program at this level.
In favor of bringing this problem to a head.
Fritz - Entertain Motion
Jerry McCutchen - EMT. Would like to see $ flow to closest possible entity. ~~[illegible]~~

No single source.

Davis - Intend to show politically influence re/ add ons - attempt to take out some of the politics in EMS.
Anderson - Mini grants come out of Oper. Budgets.
Yoell - Move -
Tischler - Withdraw
Kopp - Move to amend pg 2 ℓ 5 - delete prohibit & insert "exhibit."
Tischler - Would you amend the whole Whereas -
Davis - Obj. even w/ amendment.
Fritz - Ques on amendment. -
Herman & Tischler - questions.

Tischer - Whereas on l. 4 - 7 pg 2 should be deleted.
Statements prior & that are pertinent.
Ikenmann - Whereas adds alot. - shouldn't delete
Goell - Unless also delete l 29 - Tischer Amendt.

Fritz - Ques on amendment. - 5 - 1 pass
Tischer - Ok, brought it up for the record.

Dear Representatives,

As a committee who has worked together as hard and as long as you have this session, I am sure you have seen countless priorities from across the State of Alaska. Today you will be discussing Sponsor Substitute for House Resolution No. 6. This resolution discusses priorities from across the State of Alaska.

The Alaska Municipal League passed a similar resolution in November of 1982. The Governor's Advisory Council on Emergency Medical Services has approved the content of the request the FY 84. These requests came from every corner of the State of Alaska and are submitted to the Department of Health and Social Services. The communities within the State request their needs for Emergency Medical Services through this granting procedure.

The granting procedure is approved through City Councils, Village Councils, Regional delegations from health and health education advisory boards, Physician specialists, school boards, State and Federal agencies, clinics, hospitals, businesses, Legislature, and countless other citizens of the State of Alaska.

The State of Alaska has one of the finest Emergency Medical Services System in the United States. Our statues and regulations allow certification and training to primarily volunteer citizens and rescue squads throughout the State. In Alaska, the standard testing scores indicating level of knowledge and skill as Emergency Medical Technicians is above the United States average. Currently, the State is providing just over two million dollars statewide to operate the Emergency Medical Services System within the State.

The total funds have been approved through the Governor's Office and Alaska Legislature. This year appropriations through the Governor's Office and Alaska Legislature do not equal the appropriations last year. The statues and regulations require training and recertification of Emergency Medical Technicians and Emergency Medical Technician Instructors. This year Lt. Governor McAlpine signed regulations approving the certification of ambulances. The Emergency Medical Services System provides these certifications.

This certification system as well as the rescue squads, volunteers, communities, tourists, and all others will feel the appropriation cut in the event of emergencies. The appropration is different in the three budgets and this is could be alleviated if a single source funding strategy could be developed.

If the State of Alaska consolidated the source of funding it would be easier to coordinate and evaluate the program progress and priorities with the State's priority goals and objectives. Historically the Legislature has had to supplement the Governor's Budget in order to meet statewide needs. A unified funding level statewide approved by the three governing bodies would ease problems in implementing life threatening problems throughout the state. The free conference committee action would have little debate on the Emergency Medical Service funding level as all three budgets would correspond to each other.

The communities and volunteers within the Interior Region contributed and donated a documented one million dollars in calender year 1982. The documented figures are from only ten ambulance squads of the near eighty squads statewide. This region is 200,000 square miles and covers only House Districts 17, 18, 19, 20, 21 and 24. If the communities and citizens of the state are contributing this much from the Interior Region, statewide would of course be a much larger figure.

The discrepancies in the budget figures would be at the level of funding it was last year at least, if it were not for the confusing funding sources. The breath that is lost or the heart that does not beat needs immediate and precise procedures to help alleviate the problem. The funding source and priority behind it should also be as direct.

Sincerely yours,

Jeanne E. Ostnes

RE: Summary/ SSHR 6 "Relating to the funding of the Emergency Medical Services Systems"

The Resolution requests that the Governor include, in his annual budget for FY 84, and each year thereafter, a permanent funding strategy for the Emergency Medical Service System in Alaska.

The Resolution also states that the Office of Emergency Medical Systems, Dept. of Health & Social Services has a statutory obligation under 18.08.080 to adopt regulations for the certification and recertification of emergency medical technicians, instructors and ambulances, but is prohibited from complying with the law due to the absence of a permanent funding structure.

notes: Currently there are approximately 2200 certificated people statewide. Approximately 650 people were certificated last year alone.

problem: FY 83 operating budget for the Office of EMS, Dept. H&SS was 1.3 million. Because of numerous buget items included in various catagories such as Dept. of Admin grants or Dept. of C&RA grants which accounted for an additional 1 million dollars (approx), this additional amount cannot be identified under the necessary operating expenses of the Office of EMS. Therefore, for purposes of compiling the Governor's proposed budget, the Office is tied to the dollar amount as a base that was received the preceding year, when the actual operating expense was over 2 million dollars. The inconsistency in funding appears to be a growing problem.

Re: SSHR 6, Relating to EMS Funding

The enclosed backup on SSHR 6 is as follows:

1. Position Paper and Fiscal Note
2. Letter from Southern Region EMS Council
3. Letter from Fairbanks North Star Borough
4. Info on FY 84 .. FY 83 Operating Budgets for EMS Regional Grants

EMERGENCY MEDICAL SERVICES REGIONAL GRANTS

SUMMARY OF FY83 AND FY84 OPERATING BUDGETS

This document summarizes the FY 84 regional grant requests. It is being submitted by the regional organizations which currently have funding for coordinating EMS training, certification, communications and organization in their respective areas. It includes the requests for the entire State.

The Department of Health and Social Services, Division of Public Health, Emergency Medical Services Section has been operating a grant program since 1976. This program provides funds to regional non-profit organizations to provide training, equipment and technical assistance to the State's: 75 volunteer, and 7 paid ambulance services; 12 regional native non-profit corporations; 22 hospitals; and, the general population. The primary function of these organizations, however, is to serve the needs of the rural volunteer ambulance services and the village medical care providers.

Table 1 depicts the current year operating funds of these organizations. All columns but Project Income are State General Funds that are being used for Operating expenses. All funds are being used strictly according to legislative intent. The first column is appropriated from the FY83 operating budget at the line item "Grants - Regional Councils" of the Emergency Medical Services BRU. The next three columns are State general funds appropriated in various other locations. HB 643 was a reapproriation bill passed last session. FY83 Capital are funds appropriated in the Capital section of the FY 83 Budget. FY82 Carryover are capital budget funds appropriated in prior years.

The main point of Table 1 is to demonstrate that the actual operating budget for the current year of the regional EMS programs is $2,244,400, 63% more than the Regional Grants Operating Budget line item of $1,376,000.

Table 4 presents the grant requests which will be presented to DHSS for FY84. It then presents the funding outlook for those requests as embodied in the Governor's Budget Request for FY84 plus anticipated Project Income. It also shows the difference between what is requested and anticipated revenues, the FY84 Deficit column.

The Governor's Budget requests that funding for Regional Grants remain at the same level for FY84 as funded in the FY83 budget. The project income projections are down for FY84 because the majority of that income is from interest earned on advance payments of Grants. This year's project income was earned on operating budgets plus an additional $750,000 of capital equipment funds in an era of strong money market interest rates. The Governor has proposed 0 dollars for EMS Capital Equipment for FY84, and, the money market has weakened. This situation will result in lower project income.

The FY84 shortfall will be $1.3 million of the requested funds and $763.4 thousand short of the current year funding level.

Southern Region
EMERGENCY
Medical Services Council, Inc.

May 9, 1983

Representative Mike Davis
Alaska State Legislature
House of Representatives
Pouch V
Juneau, AK 99702

Dear Representative Davis:

The Southern Region Emergency Medical Services Council, Inc. supports House Resolution 6 for the following reasons:

1. Currently, EMS operating expenses are funded by multiple sources. Our primary source of funds for regional training facilities is the EMS Section of the Department of Health and Social Services. However, the regional organizations have also been supplemented by legislative add-ons to the capital budget with the money going through Community & Regional Affairs, Department of Administration, as well as, DHSS. As a result, the total funding for the current year EMS regional grant programs is actually 1/3 more than is reflected in the Regional Grants line item of the DHSS Operating Budget.

   The problem is that while it is clearly the legislature's intent that the regional EMS programs be funded at a level greater than the Governor's request, the message does not seem to get conveyed to the Governor. This is indicated by the fact that his request does not reflect the total prior year funding authorized by the Legislature. Consequently, the regional organizations never really know from year to year what their funding level will be other than the lower amount provided in the Governor's Budget Request.

   It is our hope that this resolution would urge the Governor to include in his annual request the total amount of funds authorized for the regional programs in all parts of the prior year budget. If that were the case, then the both the Executive and the Legislature would be able to more effectively monitor EMS program performance and make the annual funding decisions in light of the complete picture.

2. Another area of funding that should be addressed by the Department is support for the Volunteer Emergency Medical Services in the State. This is especially important in the Unorganized Borough where there is no tax base for local services to turn to. Tremendous strides have been made in the last ten years in emergency care. Emergency Medical Technicians are trained to actually stabilize the seriously injured before they take them to the hospital, not just scoop up the patient

and run. We believe this has resulted in a reduction in lives lost on our remote highway system. And while there are lots of volunteers who are willing to do this, there is a need for significant funding for training and equipping those volunteers.

The justification for the State to be involved in supporting these services is that those on the highway systems primarily serve the motoring public. The small services in such places as Willow, Trapper Creek, Tok, Healy, Cooper Landing, Ninilchik, etc. respond 75% of the time to an auto accident involving residents of some other part of the State or World. It is difficult to expect a small community to raise $6,000 to $10,000 a year to support a service that really exists to serve people from other parts of the State. And, in fact, that is exactly the case in many of these communities. The same 3-6 volunteers respond day-in and day-out to calls that no one else in the community cares about.

Until this current year, there was a separate line item in the budget which provided a $2,500 no strings attached grants to the volunteer services. However, that program was eliminated by the last Legislature. The regional programs have carried it on as part of their operating grant this year, but without increased support from the Governor we may have to cut it back in order to adequately staff the training program. Thus it is important that a stable and fair funding mechanism be developed to help the volunteer services meet their basic operating expenses.

I hope this information is useful to you. If you need any more information please do not hesitate to contact me. We look forward to supporting this legislation through the legislative process.

Sincerely,

Thomas D. Scott II
Executive Director

March 4, 1983

The Honorable Bill Sheffield
Governor, State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

I would like to express my support for the Interior Region Emergency Medical Services Council and their funding needs for 1983/84.

The EMS Council performs a vital role in many ways for the delivery and quality of EMS services within the interior. In particular, the work done by this Council in providing quality training for EMS providers and the general public could not, in my opinion, be done more efficiently or cost effectively by any other organization. In this type of training there is a particular need for standardization and consistency. The EMS Council meets these needs.

The work done by the Council in planning and supporting emergency communications development is also of the highest importance to the area which we all serve.

I solicit your support for continued funding of these activities by the Interior Region EMS Council so that they may be continued at an adequate level.

Sincerely,

B. B. Allen
Borough Mayor

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

Sponsor Substitute for House Resolution No. 6

Relating to the Funding of the Emergency Medical Services System

Sponsor Substitute for House Resolution No. 6 recognizes the need for adequate funding of emergency medical services statewide and calls on the governor to include in his annual budget a permanent single-source funding strategy for the Emergency Medical Services System in the state.

Complicating the funding picture for EMS in the state is the $1.3 million for EMS in Alaska which is included in the U.S. Indian Health Service Budget. Although it appears at this time that this funding will be available in FY 84, it could be reduced or eliminated in the future, which would have a serious, negative impact on emergency medical service programs in native regions.

The Division of Public Health of the Department of Health and Social Services supports the general intent of this resolution. However, the department is not sure what is meant by the statement, "current methods of financial distribution for the Emergency Medical Services System prohibit compliance with. . .(AS 18.08)." This statute authorizes the department to give out grants to regions for EMS systems development, and requires the department to develop regulations for the certification of emergency medical technicians (EMT's), EMT instructors, and ambulance services. The Department of Health and Social Services has developed and implemented these regulations and grant procedures, and uses what it considers to be a fairly sophisticated methodology of distributing available funds within state budget constraints. In past years, the grant process has been complicated somewhat when some legislators put designated grants in other budget categories such as municipal grants through the Department of Administration or unincorporated community grants through the Department of Community and Regional Affairs. When this happens the EMS Section, within the Division of Public Health, is prohibited from identifying these sources of EMS funding when computing its base budget request for the following fiscal year.

(B) the offices of private physicians or dentists whether in individual or group practice;

(8) "category of health services" means a major type, program, unit, division, or department of care provided through a health care facility whether inpatient or outpatient, including an outpatient department. psychiatric wing, kidney dialysis program, radiotherapy, burn unit, or newborn intensive care unit, except that "service" does not include the lawful practice of a profession or vocation conducted independently of a health care facility and in accordance with applicable licensing laws of the state;

(9) "health systems agency" means an entity organized and operated in accordance with § 1521(b), P.L. 93-641, engaging in health planning and development functions in a specified health service area of the state;

(10) "office" means the office of planning and research in the Department of Health and Social Services;

(11) "secretary" means the secretary of the United States Department of Health, Education and Welfare. (§ 2 ch 275 SLA 1976; am § 2 ch 25 SLA 1981)

Effect of amendments. — The 1981 amendment, retroactive to June 29, 1976, in paragraph (7), added the subparagraph designation (B) preceding "the offices of private physicians" and added subparagraph (A).

Editor's notes. — Section 1 of ch. 25, SLA 1981, provides: "The purpose of this Act is solely to clarify and confirm that Alaska Pioneers' Homes are not, and never have been, subject to the provisions of AS 18.07."

Section 1524, P.L. 93-641, referred to in paragraph (5), and § 1521(b), P.L. 93-641, referred to in paragraph (9), may be found in 42 U.S.C. § 300m-3 and 42 U.S.C. § 300m(b), respectively.

The United States Department of Health, Education and Welfare, referred to in paragraph (11), has been redesignated as the Department of Health and Human Services.

Collateral references. — 39 Am. Jur. 2d, Health, §§ 9-18.

39A C.J.S., Health and Environment, §§ 3-17.

Sec. 18.08.010. Administration. The department is responsible for the development, implementation and maintenance of a statewide comprehensive emergency medical services system and, accordingly, shall

(1) coordinate public and private agencies engaged in the planning and delivery of emergency medical services to plan an emergency medical services system;

(2) assist public and private agencies to deliver emergency medical services through the award of grants in aid. (§ 1 ch 100 SLA 1977)

Sec. 18.08.020. Advisory Council on Emergency Medical Services. There is established in the department an Advisory Council on Emergency Medical Services. The council shall

(1) advise the commissioner with regard to the planning and implementation of a statewide emergency medical services system;

(2) assist the Statewide Health Coordinating Council in performing its duties under AS 18.07.011 relating to emergency medical services. (§ 1 ch 100 SLA 1977)

Sec. 18.08.030. Composition. The council shall consist of 11 members appointed by the governor. Four of the members shall be consumers of emergency medical services, and one from each judicial district in the state. (§ 1 ch 100 SLA 1977)

Sec. 18.08.040. Term of office. (a) Members of the council shall be appointed for overlapping terms of four years.

(b) Of the 11 initial appointments to the council, two shall be appointed for one-year terms, three for two-year terms, three for three-year terms, and three for four-year terms. A consumer shall be appointed to each of these overlapping terms. Appointments made on the expiration of the initial appointments shall be made for four years.

(c) A vacancy occurring in the membership of the council shall be filled by appointment by the governor in the same manner as original appointments, and when a seat is vacated before expiration of a term, the vacancy shall be filled for the unexpired portion of the vacated term. (§ 1 ch 100 SLA 1977)

Sec. 18.08.050. Compensation and per diem. Members of the council receive no salary, but are entitled to per diem, reimbursement for travel, and other expenses authorized by law for boards and commissions. (§ 1 ch 100 SLA 1977)

Cross references. — As to provisions relating to per diem, travel and other expenses for members of boards and commissions, see AS 39.20.180.

Sec. 18.08.060. Meetings. The council shall meet at the call of the chairman not less frequently than twice a year. A majority of members constitutes a quorum. (§ 1 ch 100 SLA 1977)

Sec. 18.08.070. Special committees. The council may create special committees or task forces outside its membership and may appoint persons who are not members of the council to serve as advisors or consultants to any committee created to carry out the purposes of the council. (§ 1 ch 100 SLA 1977)

Sec. 18.08.080. Regulations. The department shall adopt, with the concurrence of the Department of Public Safety, regulations establishing standards and procedures for the issuance, renewal, reissuance, revocation, and suspension of certificates required under AS 18.08.084, as well as other regulations necessary to carry out the purposes of this chapter. (§ 1 ch 100 SLA 1977; am § 1 ch 78 SLA 1978)

Cross references. — As to the power of a municipality to provide emergency medical services and facilities, see AS 29.48.030 (a)(23). As to the authority of a municipality to provide emergency medical services outside its boundaries and to regulate their use and operation, see AS 29.48.037(a).

Effect of amendments. — The 1978 amendment rewrote this section.

Sec. 18.08.082. Issuance of certificates. (a) The department shall prescribe by regulation a course of training or other requirements prerequisite to the issuance of certificates which provide for the following.

(1) certifies that a person meets the training and other requirements as an emergency medical technician;

(2) authorizes an emergency medical technician certified under this chapter to provide under the written or oral direction of a physician those advanced life support services enumerated on the certificate;

(3) certifies that a person, organization, or government agency which provides an emergency medical service meets the minimum operating standards prescribed by the department; and

(4) authorizes an emergency medical service certified under this chapter to provide under the written or oral direction of a physician those advanced life support services enumerated on the certificate.

(b) The department shall be the central certifying agency for personnel certified under (a)(1) and (2) of this section and under regulations adopted under AS 18.08.080. (§ 2 ch 78 SLA 1978)

Sec. 18.08.084. Certificate required. (a) No person may represent himself, nor may an agency or business represent an agent or employee of that agency or business, as an emergency medical technician certified by the state unless the person represented is certified as an emergency medical technician under AS 18.08.082.

(b) No person, organization, or government agency may represent itself as an emergency medical service or ambulance service certified by the state unless the person, organization, or government agency is certified as an emergency medical service under AS 18.08.082.

(c) No person may provide, offer, or advertise to provide advanced life support services outside a hospital unless authorized by law.

(d) No person, organization, or government agency which provides, offers, or advertises to provide an emergency medical service may provide advanced life support services unless authorized under AS 18.08.082. (§ 2 ch 78 SLA 1978)

Sec. 18.08.086. Immunity from liability. (a) No person certified under AS 18.08.082, or person or public agency which employs, sponsors or controls the activities of persons certified under AS 18.08.082, who administers emergency medical services to an injured or sick person may be liable for civil damages as a result of an act or omission in administering those services, if done in good faith and if the life of the injured or sick person is in danger. This subsection does not preclude liability for civil damages which is the proximate result of gross negligence or intentional misconduct, nor preclude imposition of liability on a person or public agency which employs, sponsors, or controls the activities of persons certified under AS 18.08.082 if the act or omission is a proximate result of a breach of duty to act created under this chapter. For the purposes of this subsection, "gross negligence" means reckless, wilful, or wanton misconduct.

(b) No physician who in good faith arranges for, requests, recommends, or initiates the transfer of a patient from a hospital to another hospital may be liable for civil damages as a result of arranging, requesting, recommending, or initiating the transfer if

(1) in the exercise of that degree of knowledge or skill possessed, or that degree of care ordinarily exercised by physicians practicing the same specialty in the same or similar communities to that in which the physician is practicing, the physician determines that treatment of the patient's medical condition is beyond the capability of the transferring hospital or the medical community in which the hospital is located;

(2) the physician has confirmed that the receiving facility is more capable of treating the patient; and

(3) the physician has secured a prior agreement from the receiving facility to accept and render the necessary treatment to the patient.

(c) No registered nurse or licensed practical nurse who escorts a patient in a means of conveyance not equipped as an ambulance may be liable for civil damages as a result of an act or omission in administering patient care services, if done in good faith and if the life of the injured or sick person is in danger. This subsection does not preclude liability for civil damages which are the result of gross negligence or intentional misconduct. (§ 2 ch 78 SLA 1978)

Collateral references. — Liability of hospital operating ambulance for personal injuries to person being transported. 21 ALR2d 915.

Hospital's liability as to diagnosis and care of patients brought to emergency ward. 72 ALR2d 396.

Application of rule of strict liability in tort to person or entity rendering medical services. 100 ALR3d 1205.

Sec. 18.08.088. Penalty. A person who violates a provision of this chapter is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than 90 days, or by both. Each violation is a separate offense. (§ 2 ch 78 SLA 1978)

Revisor's notes. — The words "A person" were substituted for "Any person" at the beginning of the first sentence by the revisor of statutes pursuant to AS 01.05.031.

Cross references. — As to sentences for misdemeanors, see AS 12.55.135.

Sec. 18.08.090. Definitions. In this chapter,

(1) "commissioner" means the commissioner of health and social services;

(2) "consumer of emergency medical services" means a person who is not a provider of emergency medical services as defined in this section;

(3) "department" means the Department of Health and Social Services;

(4) "emergency medical services system" means a system which provides for the arrangement of personnel, facilities and equipment for the effective and coordinated delivery of health care services under emergency conditions, occurring either as a result of the patient's condition or of natural disasters or similar situations, and which is administered by a statewide network which has the authority and resources to provide effective administration of the system;

(5) "provider of emergency medical services" means a person whose occupation or profession is, or has been, the delivery or administration of emergency medical services; a person who has a fiduciary position with, or has a fiduciary interest in, a health activity, facility or other health agency, or a legal or financial interest in the rendering of any component of emergency medical services;

(6) "Statewide Health Coordinating Council" means the council created under AS 18.07.011;

(7) "advanced life support" means emergency care techniques provided under the written or oral orders of a physician which include, but are not limited to, electric cardiac defibrillation, administration of antiarrythmic agents, intravenous therapy, intramuscular therapy, or use of endotracheal intubation devices;

(8) "ambulance" means any publicly or privately owned means of conveyance intended to be used and maintained or operated for the transportation of persons who are sick, injured, wounded, or otherwise helpless;

(9) "emergency medical care" means the services utilized in responding to the perceived individual needs for immediate medical care in order to prevent loss of life or aggravation of physiological or psychological illness or injury;

(10) "emergency medical technician" means a person trained in emergency medical care and certified in accordance with the regulations prescribed under AS 18.08.080;

(11) "emergency medical service" means the provision of emergency medical care and transportation of the sick and injured. (§ 1 ch 100 SLA 1977; am § 3 ch 78 SLA 1978)

Effect of amendments. — The 1978 amendment added paragraphs (7) through (11).

Chapter 10. Health Units and Districts.

Article
1. Health Units and Districts (§§ 18.10.010 — 18.10.050)
2. Consolidated Health Districts (§§ 18.10.060 — 18.10.260)

Article 1. Health Units and Districts.

Section
10. Local health unit and health board
20. Health unit in incorporated city
30. Health units in native villages and communities
40. Health districts
50. Commissioner of department to supervise local health boards

---

Collateral references. — 39 Am. Jur. 2d, Health, §§ 4-7.

39A C.J.S., Health and Environment, §§ 7-15.

Delegation to board or officer of police power to require vacation, destruction, or repair of individual building deemed by such officer or board unsafe or unsanitary, apart from noncompliance with specific regulations. 114 ALR 446.

Extension of police power of municipal corporation beyond territorial limits. 14 ALR2d 103.

Validity and construction of statute requiring establishment of "need" as precondition to operation of hospital or other facilities for the care of sick people. 61 ALR3d 278.

Sec. 18.10.010. Local health unit and health board. Each community or settlement outside an incorporated city is a health unit. In each health unit there shall be a board of health composed of the president of the school board and two citizens of the unit selected by the school board. At least one of the members of the health board shall, where practicable, be a licensed physician. In a health unit where there is no school board, the commissioner of the department shall appoint three residents of the unit to the local board of health, at least one member of which shall, where practicable, be a licensed physician. (§ 1 ch 118 SLA 1949)

oxygen may be drawn from any compressor or holding tank at any reasonable time by an authorized agent of the department for analysis. (Eff. 3/1/78, Reg. 65; am 9/1/82, Reg. 83)

Authority: AS 18.05.040

7 AAC 25.450. OPERATION OF COMPRESSORS. Repealed 9/1/82.

7 AAC 25.460. DEFINITIONS FOR 7 AAC 25.430 – 7 AAC 25.460. In 7 AAC 25.430 – 7 AAC 25.460

(1) "compressed oxygen" means elementary gaseous oxygen (O_2) that is free of all other substances;

(2) "department" means the Department of Health and Social Services;

(3) "registration" means notification in writing to the department's Division of Public Health regarding intent to engage in sale of compressed oxygen;

(4) "sale" means the transfer of ownership for consideration and includes the actual transmittal of money or coupons, or the supplying of compressed gases in conjunction with the sale of another product, service or membership as a bonus. (Eff. 3/1/78, Reg. 65; am 9/1/82, Reg. 83)

7 AAC 26.010. PURPOSE. The purpose of 7 AAC 26.010 –7 AAC 26.170 is to promote the health and safety of the people of Alaska by establishing uniform minimum standards for emergency medical technicians. Nothing in 7 AAC 26.010 – 7 AAC 26.170 is intended to prohibit a physician from authorizing a drug or procedure in an emergency situation which is not specifically covered by the certification of emergency medical technicians I, II, or III. (Eff. 12/31/81, Reg. 80)

Authority: AS 18.08.080

7 AAC 26.020. APPLICATION FOR CERTIFICATION. (a) A person applying for certification as an emergency medical technician I, emergency medical technician II, emergency medical technician III, emergency medical technician I instructor, emergency medical technician II instructor, or emergency medical technician III instructor shall apply in writing to the department.

(b) The application will be provided by the department and must contain the person's name, age, and mailing and geographical address (if different), evidence that the person meets the requirements of 7 AAC 26.030, and any other information the department considers necessary.

(c) A certificate for the appropriate level will be issued by the department when the person has met the requirements of the level applied for in 7 AAC 26.030. (Eff. 12/31/81, Reg. 80)

Authority: AS 18.08.080

7 AAC 26.030. QUALIFICATIONS FOR CERTIFICATION. (a) A person applying for certification as an emergency medical technician I must

(1) be 18 years of age or older;

(2) provide verification of active or intended involvement with an ambulance service, rescue service, or other organization having ancillary emergency health or patient care responsibilities, or otherwise demonstrate a need for certification;

(3) be of acceptable moral character;

(4) have successfully completed a department-approved emergency medical technician I training program; and

(5) pass, within six months after completing the training program, the written and practical examination for emergency medical technician I administered by the department.

(b) A person applying for certification as an emergency medical technician II must

(1) meet all of the qualifications for an emergency medical technician I set out in (a) of this section;

(2) have successfully completed a department-approved emergency medical technician II training program;

(3) within 30 days after completion of the course, have successfully completed 10 venipunctures, of which two must be with catheter-covered needles; all venipunctures must be witnessed by an individual above the EMT-II level who is certified or licensed to perform venipunctures; and

(4) pass, within six months after completing the training program, the written and practical examination for emergency medical technician II administered by the department.

(c) A person applying for certification as an emergency medical technician III must

(1) meet all of the qualifications for an emergency medical technician I and II as set out in (a) and (b) of this section;

(2) have successfully completed a department-approved emergency medical technician III training program; and

(3) pass, within six months after completing the training program, the written and practical examination for emergency medical technician III administered by the department.

(d) A person applying for certification as an emergency medical technician I instructor must have successfully completed a department-approved emergency medical technician I instructor training program.

(e) A person applying for certification as an emergency medical technician II instructor must be a physician, registered nurse, physician assistant, or paramedic, and have at least one year of emergency medical services teaching experience or one year of experience supervising EMTs.

(f) A person applying for certification as an emergency medical technician III instructor must be a physician, registered nurse, physician assistant, or paramedic with training in advanced cardiac life-support and have at least one year of

emergency medical services teaching experience or one year of experience supervising EMTs. (Eff. 12/31/81, Reg. 80)

Authority: AS 18.08.080

Regulations / Re - Ambulances

in topics included in the curricula for emergency medical technician I, II, or III which may be presented using critiques, didactic sessions, practical drills, workshops, or seminars; additional topics for continuing education include, but are not necessarily limited to: communications, air-ambulance emergency care, child abuse, rape intervention, industrial accidents, explosion injuries, electrical hazards, neonatal care/ sudden infant death syndrome (SIDS), battered wives, crime scene response, athletic injuries, rapelling, hazardous materials, protective breathing apparatus, farm machinery extrication, medical terminology, radioactive materials, medicolegal aspects, and special rescue (diving, aerial, mountain);

(5) "department" means Department of Health and Social Services;

(6) "direct or indirect supervision of a physician" means that a physician, who can legally practice medicine in Alaska, has authorized the medical care provided by EMTs either by direct voice contact or by written standing orders;

(7) "emergency medical technician" means a person trained in emergency medical care and certified in accordance with this chapter;

(8) "EMT" means emergency medical technician;

(9) "expert instructor" means a person with a demonstrated proficiency in an appropriate subject area, approved on an individual basis by the department (preferably a physician, nurse, physician assistant, or paramedic); an expert instructor is not necessarily a person who is certified as an EMT instructor by the department;

(10) "other organizations having ancillary emergency health or patient care responsibilities" means an organization such as, but not necessarily limited to, the United States Forest Service, a logging camp, the Alaska Railroad, or a pipeline camp, that must provide services to individuals needing immediate medical care in order to prevent loss of life or aggravation of psychological or physiological illness or injury;

(11) "refresher course" means a course, at least 24 hours in length, which includes didactic and practical skills appropriate for emergency medical technicians I, II, or III, which includes at least the following topics: cardipulmonary resuscitation (CPR), traction splinting, backboard, vital signs, patient evaluation, run reports, and updates on medical equipment information and use of oxygen equipment and bag masks. (Eff. 12/31/81, Reg. 80)

280. Actions not prohibited
290. Definitions

7 AAC 26.210. PURPOSE. The purpose of 7 AAC 26.210 – 7 AAC 26.290 is to promote the health and safety of the people of Alaska by setting minimum standards for an organization which provides, offers, or advertises to provide basic or advanced life-support emergency medical services outside a hospital. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.220. APPLICATION FOR CERTIFICATION. (a) An applicant for certification as an emergency medical service shall apply in writing to the department.

(b) The application form will be provided by the department and must contain the name of the organization and responsible official, the mailing address and, if different, the geographical address, evidence that the applicant meets the requirements of 7 AAC 26.230, and other information the department considers necessary.

(c) A certificate will be issued by the department if the applicant satisfies the requirements of 7 AAC 26.230. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.230. QUALIFICATIONS FOR CERTIFICATION. (a) An applicant for certification as an emergency medical service providing basic life-support outside a hospital

(1) shall list available emergency medical technicians I, and ensure that at least one emergency medical technician I, and one other person to act as driver when using a surface transportation vehicle, will be available to respond to emergencies 24 hours a day;

(2) must have a sponsoring physician;

(3) must have a direct communications capability with a physician, hospital, or mid-level practitioner such as a physician assistant or nurse practitioner, unless the department grants a waiver because of technical communications problems;

(4) must have appropriat equipment to perform basic life-support medical procedures; and

(5) must have a program of continuing education which will enable its certified emergency medical personnel to meet state recertification requirements.

(b) An applicant for certification as an emergency medical service providing advanced life-support outside a hospital

(1) shall list available, certified personnel, such as emergency medical technicians II, emergency medical technicians III, mobile intensive care paramedics, or other personnel, including registered nurses or physicians, who may respond to medical emergencies on a regular basis;

(2) must have an emergency medical technician II or III, mobile intensive care paramedic, or other medical personnel certified or licensed to provide advanced life-support (e.g., registered nurse, physician's assistant, or physician), and at least one other person trained to at least the emergency medical technician I level to act as driver when using a surface transportation vehicle, available to respond to emergency calls 24 hours a day;

(3) must have a sponsoring physician;

(4) must have a direct communications capability with a physician, hospital, or mid-level practitioner, unless the department grants a waiver because of technical communications problems;

(5) must have appropriate equipment to perform basic and advanced life-support medical procedures within the skill levels of availal e certified personnel; and

(6) must have a program of continuing educatio' which will enable the certified emergency medical personnel to meet state recertification requirements. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.240. SCOPE OF CERTIFIED ACTIVITIES. (a) A certified emergency medical service may provide, offer, or advertise to provide those basic or advanced life-support services which are within the capabilities of available certified or licensed personnel, and authorized by the sponsoring physician.

(b) Certified emergency medical services under this section may provide services on air medevacs whenever this is the most suitable means of transporting the patient. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.245. REPORTING REQUIREMENTS. (a) A certified emergency medical service providing either basic life-support or advanced life-support outside a hospital must complete an approved EMS report form for each patient treated. The report form must document vital signs and medical treatment given the patient.

(b) A copy of the completed EMS form must

(1) accompany the patient to the treatment facility;

(2) be sent to the sponsoring physician; and

(3) be kept by the EMS service as a permanent record.

(c) The sponsoring physician shall periodically review the EMS reports he or she receives to

determine the appropriateness of treatment given. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

Editor's Note: The EMS report forms referred to in 7 AAC 26.245 may be obtained from the Emergency Medical Services Section, Division of Public Health, Department of Health and Social Services, Pouch H-06, Juneau, Alaska 99811.

7 AAC 26.250. TERM OF INITIAL CERTIFICATION. An initial certification expires on December 31 of the year following the year in which it was issued. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.260. RECERTIFICATION. (a) To renew a certification, an applicant must complete and submit an application on a form provided by the department, showing that the applicant continues to meet the applicable requirements in 7 AAC 26.230.

(b) A recertification is valid for two years, and is subject to renewal under (a) of this section. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.270. GROUNDS FOR SUSPENSION, REVOCATION, OR REFUSAL TO ISSUE A CERTIFICATE. The department, after compliance with the Administrative Procedure Act (AS 44.62.), will, in its discretion, revoke, suspend, or refuse to issue a certificate

(1) for fraud or deceit in obtaining a certificate under 7 AAC 26.210 – 7 AAC 26.290;

(2) for gross misconduct by personnel of the emergency medical service providing basic or advanced life-support services;

(3) if a sponsoring physician is no longer sponsoring the emergency medical service; or

(4) for failure to maintain appropriate equipment or communications capability. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.280. ACTIONS NOT PROHIBITED. (a) Nothing in 7 AAC 26.210 – 7 AAC 26.290 prohibits a person certified above the EMT I level from using authorized skills. For example, a physician or a mobile intensive care paramedic, working with a basic life-support emergency medical service, is not precluded from using his or her skills when authorized by law.

(b) Nothing in 7 AAC 26.210 – 7 AAC 26.290 prohibits an uncertified person from responding to a medical emergency when no certified personnel or services are present or available, or when there are too many victims for available certified personnel to treat. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

7 AAC 26.290. DEFINITIONS. Unless the context indicates otherwise, in 7 AAC 26.210 – 7 AAC 26.290

(1) "advanced life-support" means emergency care and stabilization techniques provided under the written or oral orders of a physician which may include, but are not limited to, electric cardiac defibrillation, administration of anti-arrhythmic agents, intravenous therapy, intramuscular therapy, or use of endotracheal intubation devices;

(2) "air medevacs" means transporting emergency patients via fixed or rotary wing aircraft with at least one certified emergency medical responder in attendance;

(3) "appropriate equipment to perform basic life-support emergency medical procedures" means the basic ambulance equipment recommended by the American College of Surgeons (unless a specific exception is granted by the department);

(4) "appropriate equipment to perform basic and advanced life-support emergency procedures" means the basic ambulance equipment recommended by the American College of Surgeons (unless a specific exception is granted by the department), plus any additional equipment necessary to carry out the advanced life-support procedures offered by the emergency medical service including, but not necessarily limited to, esophageal obturator airways, defibrillator monitors, and intravenous supplies;

(5) "basic life-support" means noninvasive emergency care and stabilization techniques provided by emergency medical technicians under the direct or indirect supervision of a physician, either by voice contact or written standing orders;

(6) "department" means the Department of Health and Social Services;

(7) "emergency medical services" means the provision of emergency medical care and transportation of the sick and injured;

(8) "emergency medical technician" means a person trained in emergency medical care and certified in accordance with 7 AAC 26.010 – 7 AAC 26.170;

(9) "EMS" means emergency medical services;

(10) "EMS communications capability" means point-to-point voice communications between EMS responders in the field and a higher-level medical facility, including clinics with mid-level practitioners, or hospitals;

(11) "mobile intensive care paramedic" means a person trained in advanced life-support emergency medical care and certified in accordance with AS 08.64.107;

(12) "organization which provides basic or advanced life-support emergency medical services outside a hospital" means an organization, such as an ambulance service, rescue squad, fire department, medevac service, or other emergency medical service which has as one of its primary functions the provision of basic or advanced life-support emergency medical services;

(13) "responsible official" means the chief of the fire department or ambulance service, or any person who has administrative responsibility for the operations of the emergency medical service; and

(14) "sponsoring physician" means a physician who is authorized to practice medicine in the state and has agreed to be responsible for the activities of the emergency medical service including, but not necessarily limited to, approving the types of medical procedures which may be performed by the EMS service. (Eff. 3/3/83, Reg. 85)

Authority: AS 18.08.080

Editor's Note: A list of the basic ambulance equipment recommended by the American College of Surgeons, referred to in 7 AAC 26.290(3) and (4), may be obtained from the Emergency Medical Services Section, Division of Public Health, Department of Health and Social Services, Pouch H-06, Juneau, Alaska 99811.

INTERIOR REGION EMERGENCY MEDICAL SERVICES COUNCIL, INC.

P.O. BOX 2120 • FAIRBANKS, ALASKA 99707
PHONE (907) 456-3976

May 10, 1983

Representatives Milo Fritz, M.D. and Mae Tischer,
Co-Chairs House Health, Education and Social Services
Pouch V
Juneau, Alaska 99801

Dear Representatives,

As a committee who has worked together as hard and as long as you have this session, I am sure you have seen countless priorities from across the State of Alaska. Today you will be discussing Sponsor Substitute for House Resolution No. 6. This resolution discusses priorities from across the State of Alaska.

The Alaska Municipal League passed a similar resolution in November of 1982. The Governor's Advisory Council on Emergency Medical Services has approved the content of the request the FY 84. These requests came from every corner of the State of Alaska and are submitted to the Department of Health and Social Services. The communities within the State request their needs for Emergency Medical Services through this granting procedure.

The granting procedure is approved through City Councils, Village Councils, Regional delegations from health and health education advisory boards, Physician specialists, school boards, State and Federal agencies, clinics, hospitals, businesses, Legislature, and countless other citizens of the State of Alaska.

The State of Alaska has one of the finest Emergency Medical Services System in the United States. Our statues and regulations allow certification and training to primarily volunteer citizens and rescue squads throughout the State. In Alaska, the standard testing scores indicating level of knowledge and skill as Emergency Medical Technicians is above the United States average. Currently, the State is providing just over two million dollars statewide to operate the Emergency Medical Services System within the State.

The total funds have been approved through the Governor's Office and Alaska Legislature. This year appropriations through the Governor's Office and Alaska Legislature do not equal the approprations last year. The statues and regulations require training and recertification of Emergency Medical Technicians and Emergency Medical Technician Instructors. This year Lt. Governor McAlpine signed regulations approving the certification of ambulances The Emergency Medical Services System provides these certifications.

This certification system as well as the rescue squads, volunteers, communities, tourists, and all others will feel the appropriation cut in the event of emergencies. The appropration is different in the three budgets and this is could be alleviated if a single source funding strategy could be developed.

If the State of Alaska consolidated the source of funding it would be easier to coordinate and evaluate the program progress and priorities with the State's priority goals and objectives. Historically the Legislature has had to supplement the Governor's Budget in order to meet statewide needs. A unified funding level statewide approved by the three governing bodies would ease problems in implementing life threatening problems throughout the state. The free conference committee action would have little debate on the Emergency Medical Service funding level as all three budgets would correspond to each other.

The communities and volunteers within the Interior Region contributed and donated a documented one million dollars in calendar year 1982. The documented figures are from only ten ambulance squads of the near eighty squads statewide. This region is 200,000 square miles and covers only House Districts 17, 18, 19, 20, 21 and 24. If the communities and citizens of the state are contributing this much from the Interior Region, statewide would of course be a much larger figure.

The discrepancies in the budget figures would be at the level of funding it was last year at least, if it were not for the confusing funding sources. The breath that is lost or the heart that does not beat needs immediate and precise procedures to help alleviate the problem. The funding source and priority behind it should also be as direct.

Sincerely yours,

Jeanne E. Ostnes

Jeanne E. Ostnes

M E M O R A N D U M

TO: Linda Otey, Professional Assistant
House HESS Committee

FROM: Pat Williams Pat
Legislative Finance Division

SUBJECT: Study Accounts pertaining to REAA Activities

As requested, the following is a breakdown of monies expended from monies appropriated to Legislative Finance for REAA studies:

REAA DROP-OUT STUDY

FY 1982

	Authorization	Expenditures	Balance
Personal Services	122,050	125,069	(3,019)
Travel	19,910	44,636	(24,726)
Contractual	24,240	453	23,787
Commodities	4,200	453	3,747
Equipment	0	252	(252)
	170,400	170,863	(463)

In June 1982, $125,000 was appropriated to Legislative Finance for a study of REAA facility Operations and Maintenance Costs. It had a Fiscal Year 1982 effective date (June 29, 1982) and was treated for accounting purposes as a "supplemental." Thus, the appropriation was penalized the $463 overrun incurred by the Drop-Out study.

No expenditures have been made from the Operations & Maintenance study. There is a current balance of $124,536.70.

SUMMARY OF REAA BUDGET OVERSIGHT COMMITTEE
REPORTS TO THE LEGISLATURE

Initial Report - February 1982:

Title: Report to the Legislature on REAA School Districts

A. Alaska State Operated Schools - ASOSS created in 1970

1) State corporation - separate from Department of Education
2) Administrative matters handled through Dept. of Administration
3) Local boards = 9 - 6 rural members

1971 - Alaska Native Claims Act
1975 - Transition to Rural Education Attendance Areas (REAA)

1) Governed by elected school boards from 5 - 11 members
2) Larger districts allowed to organize into school board sections according to population distribution, with one or more seats on the board
3) REAA powers limited - Legislature the only governing body
February 1980 - Budget Oversight Committee established by President of Senate and Speaker of House
4) New school boards obtained - same powers as municipalities and borroughs
5) Originally operated in consultation with community school committees - this was repealed to reduce differences between REAA's and other school districts

B. REAA District Profiles

C. Current Rural Education Issues

1) Maintenance & Operations
   a. $200 million - REAA school construction in 5 years
   b. 31% increase in Maintenance & Operations budget - excluding cost and salary increases
   c. high energy costs - fuel delivery and storage
   d. inefficient structures - energy waste
   e. BIA's to be transferred to State
2) Instructional television
   a. 1975 - 100 small earth stations purchased by Alaska
   b. 1980 - 81 - $15 million for instructional T.V. - funded by Legislature
3) Teacher housing
   a. some form of subsidized housing
   b. district phasing out of housing or in process of doing so
   c. some districts never involved because of:
      1. school board policy
      2. abundance of housing
   d. Adak housing provided for by Federal government; Pribilof housing provided for by National Marine Fishery Service

e. criticism regarding subsidized housing
    1. isolates teachers from community
    2. discourages locals from investing in rentals
    3. money should go directly to educating children
f. quality of teachers/teacher turnover - not adequately informed of housing situation
g. National Education Association (NEA) - Housing Task Force
h. district built 4 houses - Lower Kuskokwim - selling locally - purpose two-fold: educate students - vocational education to construct future units

4) District breakdown teacher concerns
5) School districts priorities and committments
6) Budgetary constraints regarding program development
7) Drop Out Study - by district began July 1981
    a. records from districts incomplete and in some cases nonexistant
    b. summer dropouts not recorded
    c. dropouts compared with transfers are unclear and not traceable
    d. Mr. Parrett, Univ. of Alaska Research Inst., rendered services
        1. had to rely on personal interviews as a main source of dropout information - used surveyors
    e. graduation requirements; compare suburban high school grad with REAA high school grad
        1. total number of required credits varied from 19 to 22 credits throughout districts
        2. 109 high schools (grades 7-12) 64 accredited, 45 are not
            a. Alaska schools not required to seek accreditation (voluntary on school by school basis) - Metlakatla's high academic core curriculum good example for rest of REAA's

Supplemental Report - March 1982:

Title: Supplemental Report to the Legislature on REAA School Districts

A. REAA budget management to be looked into in further detail:
    1) inadequate responses from REAA's
    2) negative press coverage of some district fund mismanagement
    3) parental requests
    4) enlighten committee and give direction to concerns re: REAA budgets

B. Resolves in Supplemental Report of March 82
    1) Resolution #1
        a. committee requested Budget & Audit to conduct audits of 21 REAA's for past 3 fiscal years (FY 81,80,79)
    2) Resolution #2
        a. all schools to pursue accreditation

b. recommend annual visitation on status of school and curriculum development - goal = minimum uniform standards
c. Department of Education - records of all graduation requirements and course offerings of each school
d. establish 13-14 level school program within REAA high schools
    1. college level courses - further understanding of prerequisites
    2. program umbrellaed by University - pilot program
        ie. Koyukon Development Corporation to be broker for post secondary education in the Koyukon Region for college credits and non-credit courses

3) Resolution #3
a. paraprofessionals work towards teacher accreditation
b. strong couselling efforts to encourage students to join teaching profession and return to their home communities
c. establishing teaching college in rural community
    1. rural students to enter teaching profession
    2. urban students to participate in endeavor to become acculturated to rural environment

January 1983 Report:

Title: Report to the Legislature - 1983

A. Background
B. Fiscal information for REAA's by district
C. Audits, Department of Education program finals
    1) Revenues and expenditures - budget comparisons
    2) Food service programs audited

COMMENTS BEFORE HOUSE HESS

FEBRUARY 11, 1983

THE ALASKA STATE LEGISLATURE IS EMPOWERED BY ALASKA'S CONSTITUTION, ARTICLE 10, SECTION 6, TO ACT AS BOROUGH ASSEMBLY TO THE UNORGANIZED BOROUGH. THIS CREATES A PARTICULAR LEGISLATIVE RESPONSIBILITY WITH REGARD TO THE REAA SCHOOL DISTRICTS.

IN 1980, THE SPEAKER OF THE HOUSE AND THE PRESIDENT OF THE SENATE APPOINTED MEMBERS TO A SPECIAL REGIONAL EDUCATION ATTENDANCE AREA BUDGET OVERSIGHT COMMITTEE. THE STATED FUNCTION OF THIS COMMITTEE WAS TO PROVIDE ACCOUNTABILITY FUNCTIONS SIMILAR TO THOSE WHICH MUNICIPALITIES EXERCISE OVER THEIR SCHOOL DISTRICTS.

THE REAA COMMITTEE HAS HELD EXTENSIVE HEARINGS DURING WHICH THE REAA SCHOOL DISTRICTS HAVE DISCUSSED FISCAL AND BUDGETARY CONCERNS.

THE COMMITTEE HAS REPORTED TO THE LEGISLATURE ON RURAL EDUCATIONAL ISSUES SUCH AS THE MONETARY AND EDUCATIONAL IMPACT OF TEACHER HOUSING AND TEACHER TURNOVER; THE COST OF SCHOOL DISTRICT COMMITMENT TO COMMUNITY AND NON-EDUCATIONAL SERVICES; BUDGETARY CONSTRAINTS ON PROGRAM DEVELOPMENT IN THE REAAS; AS WELL AS CONDUCTING ANNUAL FISCAL COMPARISONS OF THE REAAS BETWEEN FISCAL YEARS 1977 AND 1982.

AS THE NEWLY ELECTED CHAIRMAN OF THE SPECIAL JOINT REAA BUDGET OVERSIGHT COMMITTEE, I SEE AREAS IN WHICH THE COMMITTEES WORK SHOULD BE CONTINUED, AND IN SOME INSTANCES, EXPANDED.

PRESENTLY, SCHOOL DISTRICTS ARE REQUIRED TO SUBMIT THEIR FY 84 BUDGETS TO THE DEPARTMENT OF EDUCATION BY MAY 31, 1983.

THE PRESENT TIME FRAME AND THE POLICY OF THE PAST ADMINISTRATION MEANS THAT THESE BUDGETS HAVE BEEN BASICALLY CHECKED FOR ERRORS OF FORMAT AND CLERICAL ERRORS AND THEN RUBBER-STAMPED BY THE DEPARTMENT OF EDUCATION. I SEE THIS AS AN AREA IN WHICH THE COMMITTEE AND THE LEGISLATURE MUST FIND A SOLUTION.

HOUSE CONCURRENT RESOLUTION NO. 14 CONTAINS A RESOLUTION CLAUSE WHICH ASKS THE DEPARTMENT OF EDUCATION TO REVIEW AND RECOMMEND ACTION ON THE OPERATING BUDGETS OF REAAS BY AUGUST 15. THE REAA COMMITTEE WOULD THEN REVIEW THOSE FINDINGS. COMPLIANCE WITH THIS CLAUSE WOULD ALLOW THESE BUDGETS TO RECEIVE SOME SCRUTINY BY THE ADMINISTRATION.

AN ADDITIONAL CONCERN OF THE COMMITTEE IS THE BURDEN WHICH HIGH MAINTENANCE AND OPERATIONS COSTS IN THE REAAS PLACES ON THEIR INSTRUCTIONAL BUDGET AND ON THE STATE GENERAL FUND.

THE REAA COMMITTEE IS CONTINUING TO DEFINE ITS FUNCTION AND RESPONSIBILITIES IN FOLLOWING THE

INSTRUCTIONS GIVEN BY THE SPEAKER AND THE PRESIDENT IN 1980.

THANK YOU MR. CHAIRMAN.

SUMMARY OF REAA BUDGET OVERSIGHT COMMITTEE
REPORTS TO THE LEGISLATURE

Initial Report - February 1982:

Title: Report to the Legislature on REAA School Districts

A. Alaska State Operated Schools - ASOSS created in 1970

1) State corporation - separate from Department of Education
2) Administrative matters handled through Dept. of Administration
3) Local boards = 9 - 6 rural members

1971 - Alaska Native Claims Act
1975 - Transition to Rural Education Attendance Areas (REAA)

1) Governed by elected school boards from 5 - 11 members
2) Larger districts allowed to organize into school board sections according to population distribution, with one or more seats on the board
3) REAA powers limited - Legislature the only governing body
February 1980 - Budget Oversight Committee established by President of Senate and Speaker of House
4) New school boards obtained - same powers as municipalities and borroughs
5) Originally operated in consultation with community school committees - this was repealed to reduce differences between REAA's and other school districts

B. REAA District Profiles

C. Current Rural Education Issues

1) Maintenance & Operations
   a. $200 million - REAA school construction in 5 years
   b. 31% increase in Maintenance & Operations budget - excluding cost and salary increases
   c. high energy costs - fuel delivery and storage
   d. inefficient structures - energy waste
   e. BIA's to be transferred to State
2) Instructional television
   a. 1975 - 100 small earth stations purchased by Alaska
   b. 1980 - 81 - $15 million for instructional T.V. - funded by Legislature
3) Teacher housing
   a. some form of subsidized housing
   b. district phasing out of housing or in process of doing so
   c. some districts never involved because of:
      1. school board policy
      2. abundance of housing
   d. Adak housing provided for by Federal government; Pribilof housing provided for by National Marine Fishery Service

e. criticism regarding subsidized housing
   1. isolates teachers from community
   2. discourages locals from investing in rentals
   3. money should go directly to educating children
f. quality of teachers/teacher turnover - not adequately informed of housing situation
g. National Education Association (NEA) - Housing Task Force
h. district built 4 houses - Lower Kuskokwim - selling locally - purpose two-fold: educate students - vocational education to construct future units

4) District breakdown teacher concerns
5) School districts priorities and committments
6) Budgetary constraints regarding program development
7) Drop Out Study - by district began July 1981
   a. records from districts incomplete and in some cases nonexistant
   b. summer dropouts not recorded
   c. dropouts compared with transfers are unclear and not traceable
   d. Mr. Parrett, Univ. of Alaska Research Inst., rendered services
      1. had to rely on personal interviews as a main source of dropout information - used surveyors
   e. graduation requirements; compare suburban high school grad with REAA high school grad
      1. total number of required credits varied from 19 to 22 credits throughout districts
      2. 109 high schools (grades 7-12) 64 accredited, 45 are not
         a. Alaska schools not required to seek accreditation (voluntary on school by school basis) - Metlakatla's high academic core curriculum good example for rest of REAA's

<u>Supplemental Report - March 1982</u>:

Title: Supplemental Report to the Legislature on REAA School Districts

A. REAA budget management to be looked into in further detail:
   1) inadequate responses from REAA's
   2) negative press coverage of some district fund mismanagement
   3) parental requests
   4) enlighten committee and give direction to concerns re: REAA budgets

B. Resolves in Supplemental Report of March 82
   1) Resolution #1
      a. committee requested Budget & Audit to conduct audits of 21 REAA's for past 3 fiscal years (FY 81,80,79)
   2) Resolution #2
      a. all schools to pursue accreditation

b. recommend annual visitation on status of school and curriculum development - goal = minimum uniform standards
c. Department of Education - records of all graduation requirements and course offerings of each school
d. establish 13-14 level school program within REAA high schools
    1. college level courses - further understanding of prerequisites
    2. program umbrellaed by University - pilot program ie. Koyukon Development Corporation to be broker for post secondary education in the Koyukon Region for college credits and non-credit courses

3) Resolution #3
a. paraprofessionals work towards teacher accreditation
b. strong couselling efforts to encourage students to join teaching profession and return to their home communities
c. establishing teaching college in rural community
    1. rural students to enter teaching profession
    2. urban students to participate in endeavor to become acculturated to rural environment

January 1983 Report:

Title: Report to the Legislature - 1983

A. Background
B. Fiscal information for REAA's by district
C. Audits, Department of Education program finals
    1) Revenues and expenditures - budget comparisons
    2) Food service programs audited

House HESS Committee

FROM: Pat Williams
Legislative Finance Division

SUBJECT: Study Accounts pertaining to REAA Activities

As requested, the following is a breakdown of monies expended from monies appropriated to Legislative Finance for REAA studies:

REAA DROP-OUT STUDY

FY 1982

	Authorization	Expenditures	Balance
Personal Services	122,050	125,069	(3,019)
Travel	19,910	44,636	(24,726)
Contractual	24,240	453	23,787
Commodities	4,200	453	3,747
Equipment	Ø	252	(252)
	170,400	170,863	(463)

In June 1982, $125,000 was appropriated to Legislative Finance for a study of REAA facility Operations and Maintenance Costs. It had a Fiscal Year 1982 effective date (June 29, 1982) and was treated for accounting purposes as a "supplemental." Thus, the appropriation was penalized the $463 overrun incurred by the Drop-Out study.

No expenditures have been made from the Operations & Maintenance study. There is a current balance of $124,536.70.

Hepatitis B Virus (HBV)

HBV infection is becoming a significant health problem in Alaska, especially in the highly susceptible Alaska Native community and, in particular, the Yupik Eskimo.

Hepatitis B infection is usually caused by prolonged close and intimate contact with a carrier and/or infected blood or blood products or serous discharges.

Complications of HBV infection can be many e.g. polyarteritis nodosa (serious inflamatory condition of the arteries) with a 30% mortality rate; primary hepatocellular carcinoma (PHC), has the highest incidence in the U.S.A. Estimated 10% of HBV chronic carriers will develop HPC; chronic active hepatitis with cirrhosis (CAH) will develop in 20 to 25% of chronic HBV carriers.

People at high risk include:

Yupik Eskimos and to a lesser variable extent
other Alaskan Natives
Health and hospital care providers
Hemodialysis patients
Recipients of blood products
Laboratory workers
Dentists and allied dental personnel
Gay communities
Illicit injectable drug users
Staff and patients of mentally retarded institutions
Sexual and household contacts of known carriers
Newborn infants of mothers who are HBV carriers
Southeast Asian groups

In late November 1981 a request for a supplemental appropriation of about 800,000 dollars to initiate a HBV program was sent to the Governor's Office. It never reached the legislature.

Normally the State provides and totally runs immunization programs for all State residents. Due to shortage of funds, high cost of HBV program and availability of some funds to ANHS in their budget ANHS (Alaska Native Health Service) and the State (Division of Public Health) are coordinating a joint effort. A Memorandum of Understanding has been jointly developed by both agencies covering many issues e.g.

(a) Public Health Nurses will assist ANHS personnel where possible in screening initial vaccination and particularly follow-up vaccination.

(b) If ANHS cannot hire people because of locale of fund allocation of last $500,000, they will contract with us to provide all the necessary program people and activities.

(c) In predominantly Native communities their screening teams will screen all citizens. We will be responsible for the lab testing of non-natives and will make arrangements for vaccination or replacement of vaccine if they do it.

(d) ANHS and the State will use common forms e.g. info sheet, indications for blood-testing, vaccination, refusal-for-vaccination form. These forms are being edited for both parties.

The attached report gives necessary funding for a control program.

Because of the economics, a control program rather than an eradication program is proposed at this time. The purpose of such a program is to identify foci of infection and wall it off (break the chain of infection) by vaccinating the appropriate susceptibles.

Enclosed also is a document in which the population for an urban non-military, non-native program will go hand in glove with the rural predominantly native program.

We cannot estimate the cost of vaccine down the road but guess it will drop fairly precipitously within five years.

REPORT ON HEPATITIS B

The following action program outline is of two parts; an HBV program to control non-native population, one to coordinate a joint ANHS/State program and a total for a State-wide program conducted by the State.

Personnel required to handle project for the non-native, non-military Alaska population:

Project supervisor	21A	41.7
Clerk IV	9B	19.5
Microbiologist II	16A	34.0
2 Nurse Practitioners or equiv.	18A (34 x 2)	68.0
		163.2
Computer Programmer		32.0
		195.2

4 Months Program (March thru June, 83) FY 84 Program

Personnel	48.8	195.2
PCIS	25.0	10.0
Lab	50.0	90.0
Travel	38.0	91.0
Vaccine	80.0	112.0
Equipment, Misc.	8.2	1.8
	250.0	500.0

Much of the vaccinations would be handled by PHN's, health centers and by staffs of institutions. Screening i.e. blood collection, likewise would be done by health care facilities and private practitioners to a great extent. Much of the non-native possible high risk populations may be clustered around the various cities.

These program logistics are in addition to the program proposed by the ANHS. They anticipate expenditure of one million dollars a year for three years.

The total cost of a State-wide program is about 5 3/4 million dollars through June, 1987. It is based on State funding of $250.0 balance of present fiscal year, $500.0 FY 84, $600.0 FY 85, $700.0 FY 86, $700.0 FY 87 along with the ANHS expenditure of 3 1/4 million over first three years of above activity. It is anticipated that these dollars would be turned over to the State through contract to get Alaskan Natives to a maintenance level. If, for any reason, the Federal monies were not appropriated, it would require additional State funding. ANHS received $500,000 FY 82 year end monies and they purchased vaccine sufficient for the first year of the program. They received $500.0 in their FY 83 appropriation which is $265.0 less than their indicated program need. They envision 60,000 patients screened and 19,000 vaccine recipients over the three years. They plan for a staff of 10 persons - we would reduce this to 8 persons if we do (hopefully) the program.

The following table summarizes their proposed Hepatitis B Detection Surveillance and Control Program for Alaska Natives.

3 Year Proposed Budget

Item	Year One	Year Two	Year Three	Total
Personnel	385.0	300.0	316.0	901.0
Travel	294.0	147.0	294.0	735.0
Supplies	172.0	172.0	172.0	516.0
Equipment	15.0	-0-	-0-	15.0
Vaccine	-0- already bought (with year-end FY 82 monies)	405.0	518.0	923.0
Total	766.0	1024.0	1300.0	3090.0

Population at High Risk for HBV
(excludes Military and Native Populations)

The assumptions are made that the Native population, as well as the military, will be handled by the ANHS (Alaska Native Health Service) and the military health system respectively.

Various population groups are at high risk; they may be so for a variety of reasons, ranging from geographic location, occupation, sexual practices to life style.

The following chart illustrates the types, numbers and rationales. This is followed by summary tables elaborating on numbers to be screened and numbers for potential vaccination. (numbers rounded off to nearest twenty-five for ease)

1)	EMS workers (non-native, non-military)	1500
2)	Health Care Workers (long term care)	1400
3)	Hospital staff (exc. Federal Hospitals)	3500
4)	Harborview, already screened, vacc. on 1/26/83	0
5)	Developmentally disabled (500 staff, 200 clients)	700
6)	Hemodialysis and hemophiliacs (patients & family)	200
7)	Gay community, est. 9600 (Anch., Fairbanks, Juneau)	7800
8)	Illicit injectable drug users (600-700)	650
9)	Household and sexual contacts of known carriers 2000-3000 (allowing for double reporting)	2500
10)	Corrections inmates (first study shows not at high risk)	0
11)	To identify newborn infants of mothers who are carriers	8000

EMT's	1500 x 90% =	1350
L.T. Care Workers	1400 x 90% =	1250
Hospital Workers	3500 x 90% =	3150
Dev. disabled staff & patients	700 x 80% =	550
Hemodialysis, hemophiliacs & staff	200 x 90% =	175
Gay community est. 9600 (Anch., Fairbanks, Juneau)	7800 x 20% =	1550
Illicit injectable drug users	650 x 20% =	125
Household and sexual contacts, carriers	2500 x 85% =	2125
Correction inmates	0	
Newborns of carriers	8000 x 0.3%=	25
	26,250	10,300

(rounded-off figures)

26,250 estimated to be screened (exclusive of IHS program). This will not include other people not included above who will ask for test.

39% (est. 8.700) susceptibles to be vaccinated.

The above needs to be done within the next 16 months, (FY 1984, plus last 4 months of FY 83).

APPENDIX

Methodologies Used

1) EMS population figures from Section of EMS, DPH, reduced by eliminating Natives.

   Health care workers population (long term care) taken from State Health Plan Data Appendix.

2) Hospital staffs (exclusive ANHS and Military) taken from State Health Plan Data Appendix.

3) Developmentally disabled patients and staff members given by Division of Mental Health.

   Harborview staff and clientele already done by Division of Public Health.

4) Hemodialysis patients and staff, hemophiliacs numbers supplied by Section of Family Health, DPH.

5) Gay community numbers arrived at by figuring male population (non-native and non-military) between ages of 15 and 65; taking 10% of that number. Number used was calculating numbers for Anchorage, Fairbanks and Juneau. 1980 census for numbers of sex, racial and age characteristics was used.

6) Numbers of illicit injectable drug users was furnished by Office of Alcoholism and Drug Abuse.

7) Contacts of household and sexual contacts was estimated trying to eliminate double reporting of ones that would be counted under any of the above categories.

8) Numbers of corrections' inmates is counted as zero because study we did shows them not to be at high risk at this time. We screened over 350 long term males. Many of new ones will have been screened under one of the aforementioned programs.

9) There are about 10,000 births in the State annually; 2000 of them are Native and can be excluded from this listing.

Assumptions are many --

a) It is difficult to accurately predict numbers that will accept screening and/or vaccination. Probably the screening numbers may be as much as 10-20% under our figures.

b) For vaccination the percentages used were to allow for varying numbers of susceptibles and also refusal to accept vaccine.

c) The percentage used for calculating male homosexual population was received from homosexual physician in Anchorage plus articles in medical journals.

d) This program is considerably different than any other immunization program. The cost of the test and the exorbitant cost of the vaccine makes it necessary to screen rather than to vaccinate carte blanche.

e) In addition, it is necessary to test to identify carriers (HBV surface antigen bearers) in order that testing for liver cancer can be done.

MEMORANDUM OF UNDERSTANDING

I. Statement of Introduction

The State of Alaska, Department of Health and Social Services, Division of Public Health and the United States Public Health Service, Indian Health Service, Alaska Area Native Health Service intend to enter into a memorandum of understanding to cooperatively develop and deliver a preventive program of Hepatitis B Virus infection control in Alaska.

Hepatitis B Virus (HBV) infection is a significant health problem in Alaska, especially in the highly susceptible Alaska Native Community. The recently available hepatitis B vaccine is an effective tool to control this important infection and to prevent the HBV related complications of liver cirrhosis, primary hepatic cancer and vasculitis.

A Hepatitis B Immunization and Control Program is a complicated one, and multifaceted activities are required at all organizational levels by several agencies to make it successful. Therefore, it is the desire of the Alaska Native Health Service and the Division of Public Health to coordinate available financial resources, personnel, laboratory services and professional expertise for implementation of a quality Hepatitis B Immunization and Control Program in an expeditious and cost-effective manner and to designate major administrative priority to the Program.

Implementation and accomplishment of the Heptatitis B Control Program depends upon the availability of continued State of Alaska funding and USPHS funding. Lack of funding would invalidate or necessitate modification of this understanding.

II. Areas of Agreement

A. Needs

1. At risk individuals need to be identified through expert analysis of appropriately obtained blood sera.

   a. adequate laboratory facilities and technical capabilities are necessary to perform a large number of serologic determinations.

   b. specialized personnel are necessary to obtain blood specimens from all individuals in entire rural Alaska Communities and who can separate serum, accurately identify specimens and ensure arrival at the laboratory expeditiously and intact.

2. Data systems need to be accessible and able to provide:

   a. census data

   b. demographic identification of all specimens

   c. integration of individual serological and immunization data into the medical record.

d. lists of susceptible individuals

e. lists of susceptible individuals by risk category

f. lists of individuals who are HBs Ag carriers.

g. the established data system would provide the above data on an ongoing basis.

3. As much as possible, the immunization phase of the Hepatitis B Immunnization and Control Program needs to be integrated into existing vaccine delivery programs.

a. Initially, the immunization phase needs coordinated efforts from public health nurses, specifically employed supplemental personnel, Community Health Aides and Alaska Native Health and Native Health Corporation health care providers.

b. Specialized care provided to newborns and infants of HBs Ag positive mothers needs to be provided in the hospitals at the time of delivery and the times when routine care coincides with established hepatitis B immunization protocols.

4. Sera aliquots from specimens needed by CDC need to be provided with demographic and serologic data to the CDC, Alaska Investigations Division.

a. to establish a sera bank

b. to provide cancer screening with alpha-fetoprotein determinations on all HBs Ag positive individuals.

B. Risk Priorities

1. Infants born to HBs Ag positive carriers.

2. Household contacts of HBs Ag carriers.

3. Rural Alaska communities with a HBs Ag carrier rate of 5 percent or greater.

4. Individuals and staff in institutions for the mentally retarded.

5. Renal hemodialysis patients and hemophiliacs.

6. Active male homosexuals.

7. Health care providers having frequent blood contact.

8. Identified high risk prison groups.

9. Illicit injectable drug users.

C. Agency Interactions

1. To meet the high risk needs in the Alaska Native Community, the Alaska Native Health Service intends to enter into a contract with the State of Alaska.

   a. to develop and maintain a Hepatitis B Control Program in cooperation with the AANHS Project Officer and the CDC-AID Director.

   b. to identify and vaccinate high risk Alaska Natives.

      (1) household contacts of known HBs Ag+ carriers
      (2) village residents of known villages with 5 percent or greater HBs Ag+ carriers.
      (3) high risk villages in Western Alaska with first priority to the Yukon-Kuskokwim Delta Area.

   c. the contract will be written immediately and implementation start as soon as possible.

2. Coordination of the Hepatitis B Immunization and Control Program will be cooperatively directed by the Chief, Communicable Disease Control Section and the Chief, Community Health Services.

   a. Monthly meetings involving key persons will occur

   b. Records of discussion and decision made in the monthly meetings will be appropriately distributed

   c. A periodic information circulation will be published.

3. Free access and exchange of Hepatitis B epidemiologic information will be shared between the State of Alaska, Alaska Native Health Service and the Centers for Disease Control.

D. Specific Responsibilities

1. The State of Alaska Division of Public Health will be responsible for the administration of Hepatitis B vaccine. The vaccine will be administered by public health nurses, supplemental personnel, and other health care providers as needed.

2. Initial hepatitis preventive care and care that coincides with routine preventive care of newborns and infants will be provided by the Alaska Native Service or contract physicians.

3. Sera aliquots with demographic and serologic data will be sent to CDC, Alaska Investigation division by the State Laboratory.

4. Alpha Fetoprotein determinations will be performed by the CDC, Alaska Investigations Division.

5. Serologic determinations for the clinical needs of the Alaska Native Health Service and for the prenatal screening of Alaska Native Service beneficiaries will be provided by the Clinical laboratory of the ANMC.

6. In consultation with appropriate experienced CDC persons, the Laboratory Section, Division of Public Health, State of Alaska will develop the capability and quality assurances to assume responsibility for all the serologic screening necessary to conduct the Hepatitis B Immunization and Control Program.

7. In consultation with the appropriate CDC and PCIS persons the State of Alaska will develop an accessible and acceptable computer service to conduct the Hepatitis B Immunization and Control Program in the State Northern Regional Laboratory in Fairbanks.

8. The administration of the Hepatitis B Infection and Control Program will be the responsibility of the State of Alaska.

9. Evaluation of the impact of the Hepatitis B Infection and Control Program on the beneficiaries of the Alaska Native Health Service will be a responsibility of appropriate Alaska Native Health Service personnel. The State of Alaska Division of Public Health will evaluate the effect of the Program on the overall state population.

III. Renewal/Modification Clause

This Memorandum of Understanding is in effect for three (3) years unless modification or termination is issued with thirty (30) days advance notice by the offices of the original signers.

IV. Conclusion

Although the need to begin Hepatitis B Infection prevention and control is urgent, actions in program development and delivery must hold to the following principles;

1. Cooperation and trust

2. Open communication

3. Quality assurance

4. Rational planning.

IMPORTANT INFORMATION
ABOUT HEPATITIS B AND HEPATITIS B VACCINE

Please read this carefully

WHAT IS HEPATITIS B?

Although Hepatitis B is an unpredictable disease with a variety of presentations and outcomes, most patients recover. Persistence of viral infection (the chronic carrier state) occurs in 5 to 10% of persons who become infected with hepatitis B virus. Acute Hepatitis B infection may be symptomatic and can incapacitate a person for weeks to months or lead to complications or chronic sequelae. However, 50 to 60% of all Hepatitis B infections are subclinical, asymptomatic, and usually undetected. These cases have a greater risk of progression to chronic sequelae. Chronic sequelae of Hepatitis B infection include:

Chronic carrier state - develops in 6-10% of adult patients who have Hepatitis B.
Chronic persistent hepatitis - generally benign.
Chronic active hepatitis - major late complication; occurs in 3-5% of cases; often progresses to cirrhosis.
Cirrhosis - an estimated 11% of deaths due to cirrhosis are associated with Hepatitis B. (4000/year)
Liver Cancer - the relative risk for carriers is 273 times greater than for non-carriers (800 die/year from Hepatitis B related liver cancer)

There is no specific treatment and no known cure for Hepatitis B. The new vaccine can help prevent Hepatitis B.

HEPATITIS B VACCINE

The Immunization Practices Advisory Committee (ACIP) USPHS, has identified certain populations at risk of HBV infection and has recommended vaccination for appropriate members of the following groups:

ACIP recommendations for vaccination against Hepatitis B infection	
.health-care workers	.classroom contacts of deinstitutionalized mentally retarded HBV carriers who behave aggressively.
.hospital staff	.special high-risk populations from areas where Hepatitis B is highly endemic Indochinese and Haitian refugees Alaskan Eskimos
.clients and staff of institutions for the mentally retarded	.inmates of long-term correctional facilities
.hemodialysis patients	
.homosexually active males	
.illicit injectable drug users	
.recipients of certain blood products	
.household and sexual contacts of HBV carriers	

Persons at substantial risk of Hepatitis B infection who are demonstrated or judged likely to be susceptible should be vaccinated.

Division of Public Health
State of Alaska

VACCINATION: Vaccination consists of 3 intramuscular doses of vaccine. The second and third doses should be given 1 and 6 months, respectively, after the first. Vaccine doses administered at longer intervals than those stipulated provide equally satisfactory protection, but optimal protection is not conferred until after the third dose. The duration of protection and the need for booster doses have not yet been determined.

Vaccination of individuals who possess antibodies against HBV from a previous infection is not necessary but will not cause adverse effects. The vaccine produces neither therapeutic nor adverse effects in Hepatitis virus carriers.

POSSIBLE SIDE EFFECTS FROM THE VACCINES:

Adverse Reactions: Hepatitis B vaccine is generally well tolerated. No serious adverse reactions attributable to vaccination have been reported during the course of clinical trials involving administration of Hepatitis B vaccine to over 6,000 individuals. Approximately half of all reported reactions were injection-site soreness. Other less common local reactions have included erythema, swelling, warmth, or induration. These signs and symptoms of local inflammation are generally well tolerated and usually subside within 2 days of vaccination.

Low-grade fever (less than 101°F) occurs occasionally and is usually confined to the 48-hour period following vaccination. Although uncommon, fever over 102°F has been reported. Systemic complaints, including malaise, fatigue, headache, nausea, dizziness, myalgia, and arthralgia, are infrequent and have been limited to the first few days following vaccination. Rash has been reported rarely.

As with any vaccine, there is the possibility that broad use of the vaccine could reveal rare adverse reactions not observed in clinical trials.

WARNING - SOME PERSONS SHOULD NOT TAKE THIS VACCINE WITHOUT CHECKING WITH A DOCTOR:

.Hepatitis B vaccine is not known to cause special problems for pregnant women or their unborn babies. However, doctors usually avoid giving any drugs or vaccines to pregnant women unless there is a specific need. Pregnant women should check with a doctor before taking Hepatitis B vaccine.

.Those who are sick right now with something more serious with a cold.

QUESTIONS: If you have any questions about Hepatitis B vaccination, please ask us now or call your doctor or health department before taking the vaccine.

REACTIONS: Anyone receiving vaccine who gets sick and seeks medical help in the 4 weeks after vaccination should report this to the facility which provided the vaccine.

STANDING ORDERS
Hepatitis B Vaccine

Type of Vaccine	Age	Dosage
Hepatitis B	3 months through life	3 doses i.m.; given on days 0, 1 month later and 6 months after 1st dose.

	Initial	1 mo.	6 mo.
3 months to 10 yrs.	0.5ml	0.5ml	0.5ml
> - 10 yrs.	1.0ml	1.0ml	1.0ml
Dialysis and Immuno-compromised	2.0ml*	2.0ml*	2.0ml*

* Two 1.0 ml doses given at different sites, i.m.

1. Store vials at 2-8°C. (35.6 - 46.4°F)
2. Shake well before using.
3. DO NOT FREEZE
4. Provide Hepatitis B Vaccine information sheet to each person before vaccination.

Centraindications: Hypersensitivity to any component of the vaccine.

Precautions:
1. Not recommended for use in pregnant women. Ask if woman is pregnant. If answer is no, vaccine may be administered.
2. Not recommended at present for use in children below the age of 3 months.

Indications:
1. Indicated for immunization against infection caused by all known subtypes of Hepatitis B virus.
2. Vaccination is recommended in persons 3 months of age or older who are at substantial risk of infection with Hepatitis B virus.
3. Groups and individuals to be vaccinated are designated by the Medical Epidemiologist, Division of Public Health or his designee..

HEPATITIS B AND HEPATITIS B VACCINE

I certify that I have been provided information about Hepatitis B. I am aware that I may be at increased risk of contracting Hepatitis B infection because of my work or my residence. I have had an opportunity to ask questions about Hepatitis B and to discuss Hepatitis B with staff at this facility. I understand that I can have my blood tested free of charge to see if I have been infected with Hepatitis B in the past or whether I could become infected with Hepatitis B in the future. I understand that I can also be vaccinated against Hepatitis B free of charge and that vaccination can protect me from becoming infected with Hepatitis B in the future. I understand that this program is entirely voluntary but that the Division of Public Health strongly recommends that I have my blood tested and, if I have not been infected with Hepatitis B in the past, that I receive Hepatitis B vaccine.

☐ I do not wish to have my blood tested for Hepatitis B.

☐ I do not wish to be vaccinated against Hepatitis B.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

CS for SS for House Bill No. 270

"An Act relating to child pornography."

CS for SS for House Bill No. 270 raises the penalty for exploitation of a minor from a Class C felony to a Class B felony in AS 11.41.455. House Bill No. 270 also adds a new section, Sec. 11.61.125, to Alaska State Statutes which makes distribution of child pornography a Class C felony. The Department estimates that one additional medium security bed will be necessary to house offenders convicted of unlawful exploitation of a minor and/or distribution of child pornography.

IV. ANALYSIS

A. Assumptions

Based on conversations with Department of Law staff, it is assumed that there will be one additional Class B felony conviction and four Class C felony convictions per year. It is assumed all will be first time offenders. Therefore it is estimated that 50% of the Class B and 20% of the Class C felony offenders will receive terms of confinement. This will result in approximately 1.5 person years per year of jail time will be served.

It is further assumed that the distributors of child pornography will remove these materials from their visible stock and convictions for distribution of child pornography will decrease from the original estimate of four per year.

Therefore, it is estimated that one additional medium security bed will be required if this proposed legislation is enacted.

B. Program Summary

1. Positions - An average of one position is required for every 2½ beds. Since only one bed is requested in the fiscal note, no positions are identified as being needed.

2. Other expenditures

a. Contractual Services
Medical care and counseling services $2400

b. Commodities
Food and clothing $2500

c. Grants
Inmate gratuities for kitchen, janitorial or other assigned tasks $200.

C. Impact

There will be no significant economic or local government as a result of passage of this bill.

enrollment. No children will be provisionally admitted except in exceptional circumstances. Where exceptions are granted, they shall be reported to and discussed with the Communicable Disease Section of the Division of Public Health, Department of Health and Social Services, who will then be responsible for determining that the required immunizations are completed during the provisional period.

(d) If a parent or guardian is unable to pay the cost of immunization, or immunization is not available in the district or community, immunization shall be provided by state or federal public health services.

(e) Immunizations shall be recorded on each pupil's permanent health record form.

(f) School districts shall initiate action to exclude from school any child to whom this section applies but who has not been immunized as required by this section. (Eff. 1/13/73, Reg. 44; am 8/28/77, Reg. 63)

Authority: AS 14.07.020(7) and (8)
AS 14.30.125

4 AAC 06.060. SUSPENSION OR DENIAL OF ADMISSION. (a) In the district schools, the superintendent or principal may suspend pupils under the provisions of AS 14.30.045, and the pupils may be reinstated by the superintendent or principal or by the school board.

(b) Expulsion or denial of admission of a pupil shall be only upon the action of the governing school board in a district school.

(c) A pupil suspended or expelled under this section may appeal to the district board. (In effect before 7/28/59; am 9/24/65, Reg. 20; am 9/8/66, Reg. 24; am 1/9/68, Reg. 26; am 5/10/78, Reg. 66)

Authority: AS 14.30.045

4 AAC 06.070. ELEMENTARY COURSE OF STUDY. The Course of Study for the Elementary Schools in Alaska, reissued by the department in 1971, is officially adopted as the standard for elementary schools. (In effect before 7/28/59; am 5/30/71, Reg. 38)

Authority: AS 14.07.020(4)

4 AAC 06.075. HIGH SCHOOL GRADUATION REQUIREMENTS. (a) Each chief school administrator shall develop and submit to the district board for approval a plan consisting of district high school graduation requirements. The plan must require, at a minimum, that before graduation a student must have earned 19 units of credit. However, any portion of the total program may be based upon competencies.

(b) Specific subject area units of credit requirements must be set out in each district plan and must require that before graduation a student must have completed no less than one unit of credit in each of the following:

(1) language arts;

(2) social studies;

(3) mathematics;

(4) science; and

(5) physical education.

(c) Districts which do not require 19 units of credit for graduation on March 1, 1978, must increase their requirements by at least one unit each school year until the number of units required attains or exceeds 19.

(d) Transfer students who have earned 10 units of credit while in attendance outside the district may, at the discretion of the district, be excused from the district subject area unit of credit requirements. (Eff. 3/1/78, Reg. 65)

Authority: AS 14.07.020(1),(2) and (4)

RE: Summary/ HCR 38 "Relating to the teaching of sign language"

The Resolution directs the Department of Education to offer sign language courses through the public schools and credite them in the same way that foreign language courses are credited.

The department has suggested that it is highly doubtful that a University would accpet a sign language course in place of a credit for a forein language.

Curriculums are established by School Districts. With this in mind perhaps the Districts should be encouraged by the Department of Education to offer sign language courses. In conversation with the Department, there a numerous ways in which this encouragement could be handled.

Also, it is more likely that a sign language course would be offered through an elective course for credits rather than through one of the five specific subject area unit requirements; 1) language arts, social studies, mathematics, science, and physical education.

JUSTIFICATION

This is a new assignment for the Records and Identification Section. The additional duties anticipated would be generated by the passage of HCR 46. Regulations set up by the Attorney General governing implementation of Chapter 66 include checking state files for prior arrests, sending fingerprint cards and $12 fee required by the Federal Bureau of Investigation to the F.B.I. for prior arrests not on file in Alaska, maintaining file of requests pending return of findings by the F.B.I., screen records for only convictions reportable per statute, directing letters reflecting results of the record checks to the employer, the applicant and the Division of Alaska State Troopers.

A Clerk IV level is requested for this confidential specialize subject area as employee will be responsible for extreme accuracy of work because of legal ramifications involved and complex duties require extensive substantial knowledge of the specialized area.

Equipment costs reflected is for the need for a typewriter to be utilized by the employee in this position. Commodities needed are normal supply items.

Fiscal Note Analysis

The passage of HCR 46 is anticipated to generate a very substantial increase in workload in the Records and Identification Section. The regulations set up by the Attorney General governing the implementation of the provisions of Chapter 66, SLA 83, requires paperwork flow which cannot be absorbed by the current staff of the section.

The cost of the clerk is based upon a July 1984 hire. Costs after FY'85 are estimated with a 6% inflation and with no equipment costs.

INTENT OF LEGISLATION

HCR 46 - "Relating to background checks on school district employees who come into contact with children."

It has come to our attention that not all school district administrations conduct background investigations on individuals applying for employment within the school district. In positions requiring direct contact with children, this can lead to potentially dangerous situations.

Because of the ease of availability to information regarding convictions of individuals relating to sex crimes, school districts must be strongly urged to implement appropriate background checks on all school district employees who come into contact with children. While recognizing the burden this may place on some school districts, it is a necessary precaution to ensure the safety of our students.

inaccurate, incomplete or misleading, the commission shall order it to be appropriately purged, modified or supplemented by an explanatory notation. An agency or person in the state with custody, possession or control of the record shall promptly have every copy of the record altered in accordance with the commission's order. Notification of a deletion, amendment and supplementary notation shall be promptly disseminated by the commisson to persons or agencies to which records in question have been communicated, as well as to the person whose records have been altered.

(d) An agency holding or receiving criminal justice information shall maintain, for a period determined by the commission to be appropriate, a listing of the agencies to which it has released or communicated the information. These listings shall be reviewed from time to time by the commission or staff members of the commission to determine whether the provisions of this chapter or any applicable regulations have been violated.

(e) Reasonable hours and places of inspection, and any additional restrictions, including fingerprinting, that are reasonably necessary both to assure the record's security and to verify the identities of those who seek to inspect them may be prescribed by published rules. Fingerprints taken under this subsection may not be tansferred to another agency or used for any other purpose.

(f) A person or agency aggrieved by an order or decision of the commission under (e) of this section may appeal the order or decision to the superior court. The court shall in each case conduct a de novo hearing and may order the relief it determines to be necessary. If a person about whom information is maintained by an agency challenges the information in an action under this subsection as being inaccurate, incomplete or misleading, the burden is on the agency to prove that the information is not inaccurate, incomplete or misleading. (§ 1 ch 161 SLA 1972; am § 1 ch 66 SLA 1983)

Effect of amendments. — The 1983 amendment inserted "and in AS 12.62.035" near the beginning of subsection (a).

Sec. 12.62.035. Access to certain crime information. (a) Notwithstading any other provision of law, an interested person as defined in (e) of this section may request from the commission records of all convictions involving contributing to the delinquency of a minor and any sex crimes of a person who holds or applies for a position in which the person has or would have supervisory or disciplinary power over a minor. The commission shall authorize the disclosure of the information to the requesting interested person and shall provide a copy of the information to the person who is the subject of the request.

(b) A request for records under (a) of this section shall include within it the fingerprints of the person who is the subject of the request and

any other data specified in regulations established by the commission. The request shall be on a form approved by the commission, and the commission may charge a fee to be paid by the requesting interested person for the actual cost of processing the request. The commission shall destroy an application within six months after the requested information is sent to the requesting interested person and the person who is the subject of the request.

(c) The commission shall adopt regulations to implement the provisions of this section.

(d) If an individual is denied employment as a result of the disclosure of inaccurate or incomplete records under this section, an action may be brought against the state. No other action may be brought against the state, or an agency or employee of the state, as a result of disclosing or failing to disclose criminal justice information.

(e) As used in this section

(1) "contributing to the delinquency of a minor" means a conviction for a violation or attempted violation of AS 11.51.130(a)(1), (3), or (5) or for a violation or attempted violation of an offense committed outside the state if the offense would have been a crime in this state under AS 11.51.130(a)(1), (3), or (5) if committed in the state;

(2) "interested person" means a corporation, company, partnership, firm, association, organization, business trust, or society, as well as a natural person, that employs or solicits the employment of a person to serve with or without compensation in a position in which the person has or would have supervisory or disciplinary power over a minor;

(3) "Sex crime" means a conviction for a violation or attempted violation of AS 11.41.410 — 11.41.470, AS 11.61.110(a)(7), or AS 11.66.100 — 11.66.130 or for a violation or attempted violation of an offense committed outside the state if the offense would have been a crime in this state under one of the above sections if committed in the state. (§ 2 ch 66 SLA 1983)

JUSTIFICATION

This is a new assignment for the Records and Identification Section. The additional duties anticipated would be generated by the passage of HCR 46. Regulations set up by the Attorney General governing implementation of Chapter 66 include checking state files for prior arrests, sending fingerprint cards and $12 fee required by the Federal Bureau of Investigation to the F.B.I. for prior arrests not on file in Alaska, maintaining file of requests pending return of findings by the F.B.I., screen records for only convictions reportable per statute, directing letters reflecting results of the record checks to the employer, the applicant and the Division of Alaska State Troopers.

A Clerk IV level is requested for this confidential specializ subject area as employee will be responsible for extreme accuracy of work because of legal ramifications involved and complex duties require extensive substantial knowledge of the specialized area.

Equipment costs reflected is for the need for a typewriter to be utilized by the employee in this position. Commodities needed are normal supply items.

HCR 46

Fiscal Note Analysis

The passage of HCR 46 is anticipated to generate a very substantial increase in workload in the Records and Identification Section. The regulations set up by the Attorney General governing the implementation of the provisions of Chapter 66, SLA 83, requires paperwork flow which cannot be absorbed by the current staff of the section.

The cost of the clerk is based upon a July 1984 hire. Costs after FY'85 are estimated with a 6% inflation and with no equipment costs.

PROCEDURES FOR OBTAINING CRIMINAL BACKGROUND INFORMATION
Per Marilyn Crenshaw, Department of Public Safety

HOW: Application and two sets of fingerprints to Alaska State Troopers

COST: No charge by state, $12 by FBI

TIME: State check made same day; 3-4 week delay with FBI

Only releases information regarding these sex crimes:

Sexual Assault 1st, 2nd and 3rd degree
Sexual Abuse of Minors 1st, 2nd, 3rd and 4th degree
Incest
Unlawful Exploitation of a Minor
Indecent Exposure
Contributing to Delinquency of a Minor
Disorderly Conduct/Exposure
Prostitution
Promoting Prostitution 1st, 2nd, and 3rd degree

Also included are convictions for attempt to commit any of the above, and out of state convictions which would have been violations of one of these statutes if offense had been commited in Alaska.

STATE OF ALASKA
DEPARTMENT OF PUBLIC SAFETY

AS 12.62.035 authorizes the release of certain criminal justice information to an "interested person." "Interested person" is defined in AS 12.62.-035(e)(2) as: "a corporation, company, partnership, firm, association, organization, business trust, or society, as well as a natural person, that employs or solicits the employment of a person to serve with or without compensation in a position in which the person has or would have supervisory or disciplinary power of over a minor." A minor is a child under the age of 18.

PART I. REQUEST FOR CRIMINAL HISTORY INFORMATION

"Applicant" is the person requesting the criminal justice information. "Subject" is the person about whom the request is made.

1) Name of Applicant: _____

2) Position or Title: _____

3) Organization (if any): _____

4) Address: _____

5) Mailing Address: _____

6) Phone Number: _____ IRS No. (if any): _____

7) Description of applicant. Check the box which best describes the applicant:

A) ___ public school/school district
B) ___ private school
C) ___ nursery/day care center
D) ___ church/religious organization
E) ___ youth organization
F) ___ local, state or federal government agency
G) ___ private business
H) ___ individual
I) ___ other

8) If box F, G, H, or I is checked above, describe the applicant. If an organization, explain its purpose and what it does. Explain specifically the duties the subject has, or will have, which involve supervisory power over children.

_____

_____

_____

_____

_____

9) List two people who are familiar with the organization (or individual applicant) and can serve as a reference:

NAME: _____ PHONE NO: _____

NAME: _____ PHONE NO: _____

10) Name of Subject: _____

11) Residence Address: _____

12) Mailing Address: _____

13) Phone Number: _____ Security No. _____

14) DOB: _____ Driver's License No. _____

15) Sex: _____ Hgt: _____, Wt: _____, Eye Color: _____ Hair Color: _____

16) Aliases or prior names: _____

17) Position subject now occupies or is being considered for: _____

PART II. AGREEMENT FOR THE DISSEMINATION OF CRIMINAL HISTORY INFORMATION

I hereby certify that I have read the information contained on the first page of this form, and that (check one:) I am ____ or I represent ___ an "interested person" as defined in AS 12.62.035. I hereby request a record of any convictions of the above-named subject for contributing to the delinquency of a minor or a sex crime as defined in AS 12.62.035(e).

I certify that the subject of this request (check one): is employed ___ or is being considered for employment ___ (with or without compensation) in a position involving supervisory or disciplinary power over a child or children under the age of 18. I certify that employment considerations are the sole reason for this request for information.

In exchange for the release of the requested information, I agree that any information released to me will remain confidential, and will be used only to make lawful employment decisions. I agree to take all possible precautions to prevent the disclosure of this information to unauthorized persons, and agree to immediately report to the Alaska State Troopers any intentional or accidental disclosure of this information by anyone to unauthorized persons.

I understand that unauthorized dissemination or other misuse of this information will result in the denial of future requests for information and may subject me to criminal penalties, including a fine of up to $1,000, a jail sentence of up to one year, or both.

POSITION PAPER

Re: SJR 11

Sponsor: Senator Ferguson

Program Effect

Head Start grantees are required by the federal government to provide medical and dental screenings and services for all children in the program. Public Law 97-394 will greatly impact services formerly provided and will segregate Native and non-Native children, especially in the rural areas.

Comments

The Department supports the intent of Senate Joint Resolution No. 11 as the reduction of medical services entailed in PL 97-394 will severely impact Head Start children and their families.

In 1978, the U.S. Congress amended Section 518 (a) of the Economic Opportunity Act of 1964, to include "poverty of access". This amendment allows certain children, whose families exceed the poverty guidelines, to be included in the Head Start program. Thus, these families included since 1978 may now be excluded by the action of PL 97-394.

The Alaska Head Start Directors Association meeting in Juneau January 26 and 27, 1983 identified potential impacts. Quantitative data on these impacts are being developed at this time.

SENATE JOINT RESOLUTION NO. 11 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

Relating to health care delivery to non-Native dependents by the United States Public Health Service.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Public Law 97-394, making appropriations for the Department of Interior, was sigred by the President of the United States in December 30, 1982; and

WHEREAS Public Law 97-394 contains a provision eliminating Indian Health Services health care delivery to non-Native dependents; and

WHEREAS Public Law 97-394 became effective immediately and had an immediate and adverse effect on health care planning for Native Alaskans and their non-Native dependents;

BE IT RESOLVED that the Legislature of the State of Alaska requests the United States Congress to reinstate health care for non-Native dependents at Indian Health Service Clinics so that they may have an adequate time frame during which to find alternative health care; and be it

FURTHER RESOLVED that in the event of future curtailment or elimination of health services provided by the Indian Health Service, recipients of the care shall be notified at least sixty days in advance so that they may find alternative health care.

COPIES of this resolution shall be sent to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

Memorandum

Date JAN 5 1983

From : Director, Indian Health Service

Subject : Non-Indian Eligibility - Immediate Action

To : All IHS Area/Program Directors

The fiscal year 1983 Appropriations for the Department of the Interior (P.L. 97-394) was signed by the President on December 30, 1982.

The law contains a provision restricting non-Indian eligibility as follows:

> . . . notwithstanding current regulations, eligibility for Indian Health Services shall be extended to non-Indians in only two situations: (1) a non-Indian woman pregnant with an eligible Indian's child for the duration of her pregnancy through postpartum, and (2) non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard . . . .

This law supersedes IHS regulations, manual provisions and policy statements granting beneficiary status to non-Indian spouses and dependent members of an Indian's household or immediate family.1/ Effective immediately, non-Indians may be regarded as beneficiaries of the Indian health program only in the two exceptional situations stated in the appropriations statute above. Additional instructions will follow dealing with the provision of services to non-Indians with acute infectious diseases or other conditions which constitute public health hazards.

Non-Indians who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who are presently inpatients in IHS facilities shall continue to be hospitalized until the need for hospitalization has ended. The determination as to when hospitalization is no longer needed shall be made by the patient's physician and be based upon the medical circumstances

---

1/ See the following statements governing non-Indian eligibility for IHS services: regulations at 42 CFR 36.12(a) regarding non-Indian wives, the preamble to proposed rules at 45 Federal Register 82839 (Dec. 14, 1980) regarding non-Indian husbands; section 2-1.2C of the IHS Manual regarding dependent non-Indian members of an eligible Indian's household; and section 2-3.7E(4) regarding non-Indian members of an eligible Indian's immediate family being eligible for contract health services.

of each patient. These patients shall be notified that after discharge they will no longer be eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

Non-Indians who were regarded as beneficiaries prior to enactment of the new law and who are presently undergoing a course of outpatient treatment may not be given further treatment unless, in the judgment of the medical officer in charge, immediate termination of treatment would threaten the life of or seriously impair the health of the individual patient. In that case the individual may be treated as an emergency patient (non-beneficiary) under regulations at 42 CFR 36.14. These patients shall also be notified that they are no longer eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

After receipt of this directive, no further initial authorization of contract health services may be made for any services provided after December 30, 1982, to former non-Indian beneficiaries except for non-Indians who meet the eligibility requirements of P.L. 97-394. Non-Indians who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who are presently receiving inpatient contract care authorized under regulations at 42 CFR 36.21 et seq., may be authorized additional inpatient contract health services, within medical priorities, until the need for hospitalization has ended. No outpatient contract health care shall be authorized for these non-Indians after receipt of this notice. Outpatient contract health care authorized for these non-Indians before receipt of this notice shall be honored. These patients shall be notified that after discharge or completion of their previously authorized outpatient contract health care, they will no longer be eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

P.L. 97-394 does not affect treatment of non-beneficiaries where otherwise provided for by law. For example, the IHS facilities may continue to treat non-beneficiaries in cases of emergency as authorized under section 322(b) of the Public Health Service Act, 42 U.S.C. 249(b) and regulations at 42 CFR 36.14; the Alaska Area Native Health Service may treat non-indigent non-beneficiaries on a fee basis as authorized by 48 U.S.C. 49; and IHS facilities may continue to treat beneficiaries of other Federal programs under Economy Act arrangements. There may be other valid examples since this list is not intended to be all inclusive.

Within your respective jurisdictions, immediate dissemination of this notice shall be made to: (1) all IHS facilities and personnel involved in the provision of services, the determination of eligibility for services, and the authorization of contract health services; (2) all tribal leaders and leaders of Indian organizations involved in health issues, e.g., Indian health boards, urban Indian organizations, etc.; (3) all P.L. 93-638 contractors and grantees; (4) all non-IHS health care providers who provide services to IHS beneficiaries whether under contract (including Buy Indians) or not under contract; and (5) all local agencies that provide or pay for health services to the general population.

In addition, this notice shall be posted in the public areas of all IHS facilities, whether operated by IHS or by an Indian tribe or tribal organization, and in tribal facilities providing services to IHS beneficiaries under authority of P.L. 93-638. Finally, every reasonable effort should be taken to notify the general beneficiary population with particular emphasis given to individually notifying non-Indian patients, or their guardians, who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who had received services as beneficiaries.

Individuals who are denied services under P.L. 97-394 shall be denied in writing and shall be afforded the current notice and appeals procedures.

Everett R. Rhoades, M.D.
Assistant Surgeon General

Dependents

Can order Medicaid immediately, declare that no health care will be provided to non native dependents @ IHS clinics with the exception of 4 categories

1- Non Native preg women care will be given for prenatal & post Partum Care

2- Emergencies approved my Director

3- Contract contagious individuals

4- If the only medical service available are IHS & the care will be on a fee for service basis

The problem is be a consultation for those not entitled persons to pay alternate health Care ie - 30 - 60 days -

M E M O R A N D U M

TO: Senator Josephson, Chairman
Senate Health, Education, and
Social Services Committee

FROM: Senator Ferguson

DATE: February 7, 1983

SUBJ: SJR 11

President Reagan signed Public Law 97-394 into law on December 30, 1982. This law had the effect of immediately restricting the eligibility of non-Native dependents for Indian Health Services health care delivery. Although PL 97-394 was signed by the President in December of 1982, Indian Health Service Area Program Directors were not notified of the immediate change in health services eligibility until January 6, 1983. Neither the IHS Area Directors nor clients of the Indian Health Service had any official advance notice of changes in eligibility.

SJR 11 would request Congress to reinstate health care for non-Native dependents at IHS clinics to allow an adequate time frame for previous clients to find alternative health care, and would request Congress to allow a similar time frame in the event of any future curtailment of services.

FEB 2 3 RECD

Senator Frank Ferguson
Pouch V
Juneau, Alaska 99811

Dear Senator Ferguson

This letter is in support of Senate Joint Resolution No. 11, which addresses health care delivery to non-Native dependents by the United States Public Health Service.

I am a Registered Nurse and work at the Alaska Native Medical Center in the outpatient/emergency room department. With the passage of Public Law 97-394, which immediately instructed us not to provide health care to non-Native dependents, I have had an opportunity to witness the hardship the immediate implementation of the bill had on patients. I feel a more humane method would have been to give the patients time to find alternative health care prior to being denied health care by the Public Health Service.

I appreciate the fact that the budget cuts have played a key role in this decision but I fully support your resolution in seeking a request of the Indian Health Service to give a reasonable notice of any intent to curtail or eliminate future health care.

If I can be of any more support I would appreciate your call.

Sincerely

Joan Phair Thorp

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

HOUSE JOINT RESOLUTION NO. 27

"Relating to health care delivery to Non-Native dependents by the United States Public Health Service."

This Resolution requests the U.S. Congress to reinstate health care services for Non-Native dependents in order to give affected individuals an adequate time frame in which to find alternative sources of health care. It also requests advance notice of 60 days in the event of any future cut-off.

The abrupt discontinuation of eligibility for health care of Non-Native dependents will undoubtedly cause hardship in many instances. Adequate lead time would have allowed for a more orderly planning process. Therefore, the Department endorses the intent of this Resolution.

Dear Representative Herrmann

This letter is in support of House Joint Resolution No. 27, which addresses health care delivery to non-Native dependents and the future curtailment or elimination of services by the United States Public Health Service.

I am a Registered Nurse and work at the Alaska Native Medical Center in the outpatient/emergency room department. With the passage of Public Law 97-394, which immediately instructed us not to provide health care to non-Native dependents, I have had an opportunity to witness the hardship the immediate implementation of the bill had on patients. I feel a more humane method would have been to give the patients time to find alternative health care prior to being denied health care by the Public Health Service.

I apprectiate the fact that the budget cuts have played a key role in this decision but I fully support your resolution in seeking a request of the Indian Health Service to give a reasonable notice of any intent to curtail or eliminate future health care.

If I can be of any more assistance please call.

Sincerely

Joan Phair Thorp

Joan Phair Thorp, R.N., B.S.N.

Honorable Representative Herrmann

We, the undersigned, support House Joint Resolution No. 27, which requests of the United States Public Health Service, Indian Health Service to provide 60 days notice to persons whose eligibility for health care services is to be curtailed or eliminated, so that those persons may have an adequate opportunity to find alternative health care.

DEPARTMENT OF HEALTH & HUMAN SERVICES — Public Health Service

Memorandum

Date: JAN 6 1983

From: Director, Indian Health Service

Subject: Non-Indian Eligibility - Immediate Action

To: All IHS Area/Program Directors

The fiscal year 1983 Appropriations for the Department of the Interior (P.L. 97-394) was signed by the President on December 30, 1982.

The law contains a provision restricting non-Indian eligibility as follows:

> . . . notwithstanding current regulations, eligibility for Indian Health Services shall be extended to non-Indians in only two situations: (1) a non-Indian woman pregnant with an eligible Indian's child for the duration of her pregnancy through postpartum, and (2) non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard . . . .

This law supersedes IHS regulations, manual provisions and policy statements granting beneficiary status to non-Indian spouses and dependent members of an Indian's household or immediate family.[1/] Effective immediately, non-Indians may be regarded as beneficiaries of the Indian health program only in the two exceptional situations stated in the appropriations statute above. Additional instructions will follow dealing with the provision of services to non-Indians with acute infectious diseases or other conditions which constitute public health hazards.

Non-Indians who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who are presently inpatients in IHS facilities shall continue to be hospitalized until the need for hospitalization has ended. The determination as to when hospitalization is no longer needed shall be made by the patient's physician and be based upon the medical circumstances

---

1/ See the following statements governing non-Indian eligibility for IHS services: regulations at 42 CFR 36.12(a) regarding non-Indian wives, the preamble to proposed rules at 45 Federal Register 82839 (Dec. 10, 1980) regarding non-Indian husbands; section 2-1.2C of the IHS Manual regarding dependent non-Indian members of an eligible Indian's household; and section 2-3.7E(4) regarding non-Indian members of an eligible Indian's immediate family being eligible for contract health services.

of each patient. These patients shall be notified that after discharge they will no longer be eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

Non-Indians who were regarded as beneficiaries prior to enactment of the new law and who are presently undergoing a course of outpatient treatment may not be given further treatment unless, in the judgment of the medical officer in charge, immediate termination of treatment would threaten the life of or seriously impair the health of the individual patient. In that case the individual may be treated as an emergency patient (non-beneficiary) under regulations at 42 CFR 36.14. These patients shall also be notified that they are no longer eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

After receipt of this directive, no further initial authorization of contract health services may be made for any services provided after December 30, 1982, to former non-Indian beneficiaries except for non-Indians who meet the eligibility requirements of P.L. 97-394. Non-Indians who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who are presently receiving inpatient contract care authorized under regulations at 42 CFR 36.21 et seq., may be authorized additional inpatient contract health services, within medical priorities, until the need for hospitalization has ended. No outpatient contract health care shall be authorized for these non-Indians after receipt of this notice. Outpatient contract health care authorized for these non-Indians before receipt of this notice shall be honored. These patients shall be notified that after discharge or completion of their previously authorized outpatient contract health care, they will no longer be eligible for services as IHS beneficiaries and should be assisted in locating other health care providers.

P.L. 97-394 does not affect treatment of non-beneficiaries where otherwise provided for by law. For example, the IHS facilities may continue to treat non-beneficiaries in cases of emergency as authorized under section 322(b) of the Public Health Service Act, 42 U.S.C. 249(b) and regulations at 42 CFR 36.14; the Alaska Area Native Health Service may treat non-indigent non-beneficiaries on a fee basis as authorized by 48 U.S.C. 49; and IHS facilities may continue to treat beneficiaries of other Federal programs under Economy Act arrangements. There may be other valid examples since this list is not intended to be all inclusive.

Within your respective jurisdictions, immediate dissemination of this notice shall be made to: (1) all IHS facilities and personnel involved in the provision of services, the determination of eligibility for services, and the authorization of contract health services; (2) all tribal leaders and leaders of Indian organizations involved in health issues, e.g., Indian health boards, urban Indian organizations, etc.; (3) all P.L. 93-638 contractors and grantees; (4) all non-IHS health care providers who provide services to IHS beneficiaries whether under contract (including Buy Indians) or not under contract; and (5) all local agencies that provide or pay for health services to the general population.

In addition, this notice shall be posted in the public areas of all IHS facilities, whether operated by IHS or by an Indian tribe or tribal organization, and in tribal facilities providing services to IHS beneficiaries under authority of P.L. 93-638. Finally, every reasonable effort should be taken to notify the general beneficiary population with particular emphasis given to individually notifying non-Indian patients, or their guardians, who were regarded as beneficiaries prior to enactment of P.L. 97-394 and who had received services as beneficiaries.

Individuals who are denied services under P.L. 97-394 shall be denied in writing and shall be afforded the current notice and appeals procedures.

Everett R. Rhoades, M.D.
Assistant Surgeon General

Project Description:

Plan, design and construct secondary school addition. This facility would be approximately 21,960 square feet.

Project Justification:

Project Need:

This facility is needed to meet secondary program needs. The district presently has no High School building and all secondary classes are being taught in the elementary building. This addition is essential in order to meet program needs.

Documentation of Estimated Capital Costs:

The district estimate of $4,461.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

A. Continue to house high school students in existing facility. Rejected due to inability of structure to house students or program.

B. Phase I & II as identified in FY81 feasibility study study totalled $9,647,335. Rejected due to exhorbitant expens[illegible].

C. Comp[illegible]e new and separate high school facility. Rejected [illegible] to lack of space, construction and operating cos[illegible]

PROJECT DESCRIPTION (CONTINUED):

PROJECT JUSTIFICATION (CONTINUED):

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this project will increase their annual operational budget by $65,000-85,000.

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 803 • DOUGLAS, ALASKA 99824

April 14, 1983

The Honorable Jan Faiks
Alaska Senate
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Faiks:

Consistent with your request for additional information on the Juneau City & Borough School District's revised CIP budget request for FY 1984, I have revised the letter written to Senator Ray on April 8, 1983. In so doing, all pertinent information will be kept in its respective category with less chance for confusion.

Originally the City & Borough of Juneau School District submitted funding requests to the 1983 Legislature in the approximate amount of $8.9 million. In the process of scaling down those funding requests, the following projects emerge as being critical with regard to student safety, program operation and public awareness of school facilities and services.

PROJECT DESCRIPTION	REQUESTED FUNDS
1. Fire Code Upgrade at Auke Bay and Glacier Valley Elementary Schools - Both of these schools require major modifications to the present fire alarm systems. These modifications will not only ensure the increased safety of the children attending those schools but will bring the systems up to existing code requirements.	(Rounded)

The fire code upgrades referred to above are in response to letters from the State Fire Marshal requiring compliance with NFPA 72 A.

Requested funding..... $50,000

Fairbanks North Star Borough School District
FY 84 Capital Improvement Request

Project: Lathrop High School Classroom Addition

FNSBSD Priority: 8

Department of Education Priority: 2) Unhoused students

Goal: To provide classrooms and physical education facilities at existing school to relieve overcrowding.

Justification: Lathrop High School is experiencing an increase in enrollment that over tacks the existing facility. The design enrollment for the school is being excluded by 200 students. This has resulted in classes being held in areas not designed for teaching activity or overcrowding of facilities designed for special classes. This project would provide for an addition to the present gym, rehabilitation of the library into an art department as a new library is being constructed. The area now being utilized by the art department would be remodeled into classroom area and the renovation of the band and music area.

Capital Cost:

The budget cost estimates for construction are:

Administration	=	$ 121,800.00
Design	=	548,100.00
Construction	=	4,878,090.00
Contingency	=	542,010.00
Project Cost Total		$6,090,000.00

Program for Progress

Project: School District Facilities - Fire/Life Safety Code Upgrades

Sponsoring Agency: Fairbanks North Star Borough

Capital Request: $2,307,000

Estimated Annual M&O Cost: No change from existing

Description/Public Benefit:

The goal of this project is to bring existing school facilities up to minimum fire and life safety code standards required by State and Federal law.

The specific components of the request have been identified by the State of Alaska Department of Transportation and Public Facilities condition survey and through inspections conducted by the Fairbanks Fire Department and the Borough's Risk Management Department. Budget level cost estimates have been developed by HMS, Inc. and the Borough Engineering Department. Projects include identification and removal of asbestos products, upgrade of exiting (stairs, corridors, doors) features, construction of fire separation walls and electrical and mechanical system rehabilitation.

This project is part of a continuing effort to bring existing facilities into code compliance, make them safer for the occupants and user groups, make major repairs and make the buildings more economical to own and operate. Whenever possible, these fire/life safety projects will be combined with funded major repair and energy management projects to maximize cost efficiency and to minimize disturbances to building use.

Due to the nature of these projects they would have a high priority for implementation as funds become available, thus full funding is requested at this time. Design for portions of this project is underway so funding of this request will permit some work to be done in the 1983 construction season. The balance of work will be designed in the fall of 1983 with construction continuing in summer 1984

	☐	☐	☐	☐			

Project Description:

Planning, designing, and constructing a multipurpose-vocational education facility (5,850 GSF) at Levelock.

Project Justification:

Project Need:

Present schools multipurpose room is too small (1,032 GSF). Moreover, there is no vocational educational space in the school. Plans include the conversion of existing multipurpose space to secondary classroom space and for constructing a separate multipurpose/industrial education building at the present school site. These additional spaces are necessary in order to accommodate the schools insturctional program.

Documentation of Estimated Capital Costs:

The estimated cost of this project was submitted by school district officials, and must be verified by a qualified A/E or by a professional cost estimator. LCC analysis has been requested.

Identification of Alternatives Considered:

Require the students to attend school at another location in the district where needed facilities exist. Rejected because neither the district nor the state can require a student to live away from home in order to complete his/her education through the twelfth grade (Tobeluk/Local Education Regulations).

Special Features:	One of Several Phases	External Funding Source	Funds to Enable Completion	Contingent Upon Other Projects	Site Owned? No	Utilities Available? Yes	Access Available? Yes
	☐	☐	☐	☐			

Project Description:

Planning, designing, and constructing a new elementary/high school, consisting of 300 square feet of classroom space, 1,100 square feet of library/media space, 600 square feet of industrial space, 2500 square feet of multipurpose space and, 2520 square feet of supplementary space.

Project Justification:

Project Need:

The existing facility is old (1946) and would require approximately $445,000 (1982 base) to upgrade the deficiencies identified by the DOT/PF Facility Survey. This would not provide the additional instruction space needed. The school is also located approximately 225 feet from the high water line and a 1980 storm brought tidal waters onto the school site. This storm also prompted 12 HUD housing units to be constructed onto the bluff, where the proposed school would be located.

Documentation of Estimated Capital Costs:

The estimated cost of this project ($5,325.6) was submitted by school district officials, and must be verified by a qualified A/E or a professional cost estimator.

Identification of Alternatives Considered:

1. Do nothing. Rejected because health and life safety hazard to students attending school in this facility.
2. Present facility remodel/additon. Rejected because remodelling/retrofitting is the more expensive option.

Project Description:

This project will provide a classroom, multipurpose room, with provision for vocational education. Wood frame on concrete foundation.

Project Justification:

Project Need:

The existing facility lacks multipurpose and library/media space. State's guidelines for a facility with 28 students would allow for approximately 2500 sq. ft.

Documentation of Estimated Operational Expenses:

Cost figures are provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. Continue as is. Rejected as school facility would not meet educational program standards.
2. Postpone. Rejected because of inflation.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this project will increase their annual operational budget by $80,000.

PROJECT DESCRIPTION (9)

Current facility at Dot Lake is inadequate for the number of students served. Currently there are 21 students, K-12, attending the school, with a demand for additional vocational programs to serve students ages 16 - 20. School district is sensitive to the role a school building plays in a community such as Dot Lake, and wishes to build a multi-purpose addition that is both functional and highly flexible. Additionally, the existing building is not energy-efficient, and is in need of extensive renovation and insulation.
New construction is estimated at $170/sq.ft. for 5,880 square feet, and renovation of the existing building is estimated at $80/sq.ft. for 3,840 sq. feet, for a total project cost for $1,300,000.

Operating costs are not expected to increase significantly, and may even decline as a result of increased energy efficiency.

Municipality Name

PROJECT DESCRIPTION (9)

The main thrust of this request is to add to the appropriation currently in the Governor's FY 84 capital budget. $600,000 has been requested for code upgrade at Nenana School, and the school district would like to raise this amount $300,000 in order to replace the existing roof at the same time. The roof was originally constructed in 1955, and insulated in 1974 with spray-on polyurethane foam. This insulation is deteriorating and absorbing water, which adds a considerable weight load to the already marginal condition of the existing roof. The roof is leaking as is the vapor barrier, which indicates a state of high energy-inefficiency as far as existing insulation is concerned. The school district estimates that the cost of replacing the current roof with a metal structure insulated to R-76 would be approximately $300,000 if done at the same time as the code upgrade, but if done later, the cost is expected to more than double, to $750,000.

This project is expected to have a positive effect on the school district's operating costs.

MEMORANDUM

March 23, 1983

SUBJECT: Capital Projects - Education

TO: The Honorable Don Bennett
Co-Chairman of Senate Finance

FROM: Senator H. Pappy Moss HPM/mjd

Following is a prioritized list of school construction needs that have been identified within Senate District J. Form 35's have been attached as back-up, and additional information may be obtained from my office.

X (1)	Dot Lake - Multi-purpose room/code upgrade	$1,300,000
(2)	Salcha - Multi-purpose room	1,300,000
X (3)	Nenana - Code upgrade and roof repair	900,000
(4)	Healy - Tri-valley school coal conversion, code upgrade	2,150,000
(5)	Nenana - School construction, Phase II	2,500,000
(6)	Fort Greely - Multi-purpose facility, Phase II	3,950,000
X (7)	Delta Junction - Vocational education facility completion	895,000
	TOTAL:	$12,995,000

Project Description:

This project will provide for remodelling of old multi-purpose room into a modern kitchen cafeteria for elementary and junior high students. Project will include storage area, preparation area, serving and eating area.

Project Justification:

Project Need:
A new gym is under construction and will replace this facility. Adequate lunch facilities do not exist. This project will provide for a modern up-to-date facility complete with eating areas.

Documentation of Estimated Capital Costs:
Cost estimates provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Continue as is - rejected because of inadequate food preparation area and conflict of use of gym
2. Postpone - rejected because of inflation.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this

RE: CSSB SB 18
Proposed amendement in Sec. 18.: amend $11,205,740 to read $12,965,810
* with revised letter of intent

DESCRIPTION OF CHANGES

CATEGORY 1
PRIORITY 2 (only Mears higher priority)
WENDLER JUNIOR HIGH $1,408,700
* currently 204 students over capacity
* projection of 80 additional students next year
* addition of three classrooms and library
$220,200 is for Fire Code compliance

INLET VIEW $351,370
* for classroom and office space necessary for retention of accreditation.

Matanuska-Susitna Borough School Board
District Wide Maintenance and Upgrade Priorities
March, 1983

1. Summer Maintenance $200,000

Funding is extremely important to carry out summer maintenance in the schools around the district.

2. Wasilla High School Roof Repair $1,400,000

This appropriation is necessary to prevent further deterioration of the high school roof. Engineering and architectural design will soon be completed and the project will be bid ready in June.

3. Big Lake Elementary Addition $3,750,000

This appropriation would suffice for the design and construction of a 2nd story addition to the elementary school where has been tremendous population impact in the last 3 years. Without this funding the school district would have to locate portable classrooms at the school for the coming academic term.

4. Swanson Elementary Roof and Insulation Upgrade $1,000,000

Roof repair and insulation for one wall of the structure would be supplied with this funding. The insulation sub-contract was never completed and this funding would alleviate the inadequacy. The roof repair would prevent further deterioration of the structure.

5. Computerized Energy Management System - District wide $300,000

Funding this request would result in significant savings in energy costs to the school district.

6. Palmer Area Playgrounds Upgrade $250,000

This appropriation would allow rehabilitation of playgrounds: grading, fencing and removal of boulders at the Swanson, Sherrod, Snowshoe and Butte Elementary Schools. At some of the locales, dogs have been allowed to access to the playground since there has been no fencing.

7. Susitna Valley Art Room Addition $400,000

This construction would enable this sorely needed program to be included in the curriculum.

Project Description:

Plan, design, and construct K-12 classroom additions to existing facility. Total addition adds up to 16,000 square feet.

Project Justification:

Project Need:
This project is necessary to replace existing building which is not up to code and no longer meets program needs. New facility would be an energy efficient structure. Cost of remodeling existing facility is prohibitive according to district.

Documentation of Estimated Capital Costs:
The estimate of $4,100.0 million dollars was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:
1. The alternative of continuing to use the current building. Rejected because it is so poor functionally and it does not meet modern codes.

2. Renovate the old building. Rejected due to cost estimates which make it unfeasible. Also because it would not be very functional.

2. Floyd Dryden Junior High Classroom Additions/Renovations

In 1980 the School district decided to make a major change in the organizational structure of the educational program within the District. Beginning with the 1984-85 school year the District's present Junior High structure (Grades 7-9) will be changed to a middle school structure (Grades 6-8). This change will relieve the present overcrowded conditions in our elementary schools, and provide, what we believe to be, a significantly improved educational system at all levels. Unfortunately it will further aggravate the already overcrowded conditions at the middle school level. The High School is presently being remodeled to accommodate the additional students expected there with the addition of the 9th grade. These conditions were all created by the very rapid and significant increase in the District's school population (4007 students in June, 1981 to the present population of 4405 students).

SUPPORTING DATA:

* Present Enrollment.....	616 Students
* Gross existing square footage.....	67,804 ft.^{2}
* Allowable square footage using old St te space guidelines.....	93,525 ft.^{2} max.
* Allowable square footage using new State space guidelines.....	89,900 ft.^{2} min. 97,400 ft.^{2} max.
*** Additional space required to bring Floyd Dryden into compliance with the recommended "minimum" State space guidelines.....	22,096 ft. ^{2}

The above figure should dramatize the crowded conditions which presently exist in this facility. It is unlikely that the requested funding will bring the facility up to the recommended minimum. However, with additions to both junior high facilities and a better balancing of enrollments overall, conditions should be significantly improved.

Requested funding..... $1,700,000

3. Marie Drake Junior High Library Addition and Renovations:

In addition to the same difficulties described at Floyd Dryden, the District's other junior high school requires considerable renovation in order for it to adequately meet needs as a middle school. The library at Marie Drake is one of the smallest in the District and cannot be expanded without major cost and a loss of already premium classroom space. The addition of a new library will also create new and needed classroom space where the present library exists. Additionally, the present shop facility needs to be converted from a metal shop to a woodworking shop to better fulfill the needs of the planned middle school program.

SUPPORTING DATA:

* Present Enrollment.....	432 Students
* Gross Existing square footage.....	72,134 ft.^{2}
* Educationally useable square footage (partial basement is counted into the gross square footage - approximately 1/3 of this area cannot be made functional for specific facility uses).....	70,243 ft.^{2}
* Allowable square footage using old State space guidelines.....	65,925 ft.^{2} max.
* Allowable square footage using new State space guidelines.....	72,500 ft.^{2} min. 80,000 ft.^{2} max.
*** Additional space required to bring Marie Drake into compliance with the recommended "minimum" State space guidelines.....	2,257 ft.^{2}

Though the square footage deficiencies in Marie Drake are considerably better than those described for Floyd Dryden, Marie Drake was constructed in 1965. Because of its older design, the comparison between the available space for educational purposes to the total space is also of concern. Fortunately, in this case, renovations are possible to increase the functionability of the existing facility, especially with the addition of an adequate library.

Requested funding..... $1.400,000

4. Major Playground Planning & Renovation

A recurring complaint of many parents within the School District is the generally poor and potentially hazardous condition of its playgrounds. (Parent groups have often wanted to purchase playground equipment for their schools through fund-raising drives). Unfortunately, many of the schools have serious drainage problems associated with their playgrounds and these must be resolved before significant money is expended on equipment and installation. Much of the existing equipment will have to be removed in order to provide for adequate drainage. The funds requested will provide for the engineering, planning, renovation and minor expansion of the existing playgrounds.

Requested funding..... $350,000

If funded, the projects described above will allow the School District to proceed with projects having major impact on the majority of our students. The needs as identified are immediate and significant and should they remain unmet, have the potential to seriously effect the programmatical goals of the School District.

Your willingness to assist us in our efforts to acquire funding for this scaled-down version of our capital improvements program is greatly appreciated. Please do not hesitate to call me if additional or more detailed information is needed by you, your staff or colleagues.

CAPSULATED BUDGET

1.	Fire Code Upgrade at Auke Bay & Glacier Valley Elementary Schools.....	$ 50,000
2.	Floyd Dryden Classroom additions/renovations...	1,700,000
3.	Marie Drake Library addition/renovations.....	1,400,000
4.	Major Playground Planning, Engineering and renovation.....	350,000
	Revised Funding Request.....	$3,500,000

Sincerely,

Michael Adams

Project Description:

Design and construct a 3,200 square foot elementary school.

Project Justification:

Project Need:
Present structure is leased and space is inadequate.. It is essential that a school be constructed to serve enhoused students.

Documentation of Estimated Capital Costs:
The district's estimate of 280.0 thousand dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Students to remain in existing trailer facility. Rejected due to inadequate space and function.
2. Facility not to provide library/media, vocational/home economics area. Rejected due to need for these programs

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district

Project Description:

This project will provide adequate space for a combination elementary/secondary school. The proposed 4300 square feet would include classroom, library/media, vocational home economics and supplementary space.

Project Justification:

Project Need;

There are twelve students residing in the area. Statutes provide for the establishment of a school. No school facility has previously existed in the area.

Documentation of Estimated Capital Costs:

Cost figures were provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered;

1. Do not establish school - rejected because of statutes.
2. Utilize leased facilities - rejected as adequate facility does not exist.
3. Postpone - rejected because of need and inflation.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates

Project Description:

Fire code upgrade/roof replacement.

Project Justification:

Project Need:

This project is necessary to preserve existing structures and comply with existing fire code. Due to water damage the gypsum drywall has lost it's one hour rating.

Documentation of Estimated Capital Costs:

The district's estimate of 901.9 thousand dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

As scope of work mandated by fire code the only other alternatives are to:

1. Replace entire structure - too costly.
2. Close structure as school - no facility available.
3. Revise fire code

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not

Project Description:

This project will provide for a new elementary/high school to replace the existing facility. This will be a wood frame structure of approximately 9720 square feet. Existing facility will be maintained as teachers' quarters.

Project Justification:

Project Need:

Existing facility was constructed in late 1950's. It is small and substandard for modern educational program for 32 students in an elementary/secondary school.

Documentation of Estimated Capital Costs:

Cost figures were provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. Utilize portable units. Rejected as not standard or cost effective.
2. Remodel and remove teachers' quarters. Rejected as displacing teachers would have detrimental effect on educational program. No other housing available.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates

Project Description:
Construct a 4,200 square foot elementary school.

Project Justification:

Project Need:
Existing facility is located on private land. The owner will no longer lease this facility to the district. If this facility is not built there will be no school at this location.

Documentation of Estimated Capital Costs:
The estimate of 1,400.0 million was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:
No Alternatives. Facilities must be constructed on new site. Their present lease expires in one year. Relocatables can be moved to the new site if necessary, but is not cost effective or appropriate for a suitable learning environment.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to the districts based soley on student enrollment. District expenditures for administrative services, including operational expense may not exceed

Project Description:

This project will provide an elementary school for eleven students located in a state maintenance camp on the haul road. No facility exists in the area.

Project Justification:

Project Needs:

The state has established a maintenance camp at this site. An elementary school is needed for eleven elementary students. The people are all state employees.

Documentation of Estimated Capital Costs:

The funding estimate is provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. No nothing - rejected because no facility available.
2. Lease facility - rejected because no facility available.
3. Postpone - rejected because of need and inflation.

Analysis of Estimated Operational Expenses:

The school is operated by the school district under AS 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative service including operational expense may not exceed 45% of the district's total budget. The district estimates this project will increase their operational budget by an unspecified amount annually.

Project Description:
Modify district facilities to meet state life/safety code requirements.

Project Justification:
Project Need:
DOT/PF Survey documents the various code violations throughout the district.

Documentation of Estimated Capital Costs:
The estimate of $2,543.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Continue program without making required upgrade. Rejected because of the nature of code violations, risk to students and public and limitations of program.
2. Postpone - rejected as inflation in the construction field continues.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17. which allocates funds to the districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this project will decrease their annual operational budget by an unspecified amount.

Program for Progress

Project: School District Buildings - Major Repairs and Rehabilitation

Sponsoring Agency: Fairbanks North Star Borough

Capital Request: $2,400,000

Estimated Annual M&O Cost: Reduction from existing

Description/Public Benefit:

The goal of this project is to do the major repair and rehabilitation construction necessary on School District facilities to bring them up to a maintainable standard within reasonable budgeting limits. The projects will also provide protection against the continuing deterioration of the facilities which create unaffordable maintenance situations.

Projects would be funded according to priority need with any appropriation provided. Projects would be coordinated with Fire/Life Safety Code Upgrades, energy management retrofits and handicapped access renovations. In this way maximum cost efficiency could be achieved.

The total amount requested would fund two years of a five year program of major repair projects. Some projects have been designed and some require only minimal design; construction on these projects could begin as early as the 1983 construction season.

Project Components

Project	Est. Cost
a. Lathrop - Replace Lighting System @ Hering Auditorium	$ 160,000
b. Hunter School - Corridor Ceiling Tile Replacement	$ 10,000
c. New Roofs - Barnette, Denali, Hunter, Lathrop, Ryan, Salcha, University Park	$4,603,800
d. Major Roof Repair - Hutchison, Nordale, Tanana, West Valley, Woodriver	$ 753,500

Project Description:

Upgrading the existing elementary/secondary schools, including modifications to air handling system, provision emergency power, heating system improvements, replacement oil fired kitchen stove, roof repair, window replacement and painting plus the addition of vocational education space (2,000 GSF) and general purpose storage space.

Project Justification:

Project Need:

Existing schools need attention in the following areas in order to preserve its useful life: hot water distribution lines (insulation), and roof (repairs), exterior (painting), windows (replacement to prevent heat loss and to conserve energy). Moreover, modification to the air handling systems of both the elementary and secondary school need to be made in order to effect operational cost savings.

Two other improvements are also needed: provision of emergency power generation and replacement of an oil fired stove in the high school's kitchen. Lastly, the addition of vocational education and general purpose space will improve the instructional program and allow for convenient, safe storage of supplies and materials.

Documentation of Estimated Capital Costs:

The estimate of $710.0 was prepared by the district. LCC Analysis has been requested.

CATEGORY EDUCATION

PROJECT DESCRIPTION (CONTINUED):

PROJECT JUSTIFICATION (CONTINUED):

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this project will decrease their annual operational budget by $5,500.

Project Description:

Planning, designing and constructing a multi-purpose room addition of 2,201 GSF to the existing school.

Project Justification:

Project Need:

At the present time, the high school gym serves as a multi-purpose room/cafeteria for grades K-12. This lowers the amount of instructional space available and as a result students are forced to eat in this area at times when physical education/recreation activities are being conducted, which is hazardous from a safety standpoint. This project will enclose and adjoining porch area and convert it to a multi-purpose room/cafeteria, which will be used for elementary physical education classes.

Documentation of Estimated Capital Costs:

The estimate of $530.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected because health and life safety hazard to students attending school in this facility.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

Project Description:

Remodeling of existing Buckland High School Shop and the addition of general purpose storage space (1000 GSF).

Project Justification:

Project Need:

This project is for upgrading the shop to eliminate electrical/ventilation deficiencies and to facilitate the use of more extensive power equipment for welding. This project will eliminate existing health/safety hazards and enable the school to expand the scope of its vocational education program. Moreover, storage space is needed to remove supplies, materials, equipment and food products from the instructional areas of the school. Adequate storage is a major problem in the remote village schools due to the necessity to acquire and to store large quantities of materials, supplies and food products at one time, as well as the provision of security to prevent loss from theft.

Documentation of Estimated Capital Costs:

The estimate of $195.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected because health and life safety hazard to students attending school in this facility.

Project Description:

Constructing of an addition (3,250 GSF) to the existing high school, consisting of classroom space (1,200 SF), library/media (1,300 SF) and related supplementary space (750 SF).

Project Justification:

Project Need:

Original design for the Savoonga High School included the requested classroom, library/media, and related supplementary spaces. These items, however, were deleted when the construction bids came in over estimate. The loss of these spaces has left the school without sufficient library/media and classroom spaces. Without an adequate library and sufficient class room space, the schools instructional program is diminished.

Documentation of Estimated Capital Costs:

The district's estimate of 1,340.0 million dollars was prepared by the district's consultant, a qualified A/E.

Identification of Alternatives Considered:

1. Require students to attend school at another location in the district where needed facilities exist. Rejected because neither the district nor the state can require a student to live away from home in order to complete his/her education through the twelfth grade (Tobeluk/Local Education Regulations).
2. Do nothing, rejected as being irresponsible.

	☐	☐	☐	☐			

Project Description:

Construction of a 4,574 GSF addition to existing Hooper Bay High school, including classrooms, lab space, vocational education space, and related supplementary spaces.

Project Justification:

Project Need:

It is the school district's position that the existing new high school is undersized for its educational program needs. When the BIA built the new high school, the village would not accept anything but a full-size gym. Consequently, needed instructional space was sacrificed. Without the requested additional space, the district claims that the instructional program will continue to suffer.

Documentation of Estimated Capital Costs:

Cost estimate of 1,417.9 was provided by school district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. Status quo. Rejected because of program needs.
2. Remodel gym to provide needed space. Rejected as unacceptable to community.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

Project Description:

Construction of a 2,972 GSF addition to the existing Alakanuk High School, including a laboratory space.

Project Justification:

Project Need:

Existing school, which was built in 1974, has major design deficiencies, i.e., the building's percentage of assignable space is less than what is desirable and noise from gym is transmitted to every classroom area. The requested addition will help to remedy this situation somewhat.

Documentation of Estimated Capital Costs:

Cost estimated of $921.3 was provided by school district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. Status quo. Rejected because of program and safety considerations.
2. Curtail program. Rejected as being impractical and incompatible with mission of school to provide balanced education program.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

FY 84

ELEMENTARY FACILITY
NOME, ALASKA

1. Project Description:

In 1981, CCC Architects and Planners prepared an Inventory and Conditions survey for the Nome Elementary School. The present Nome Elementary School facility has a gross floor area of 62,060 square feet and currently accommodates approximately 443 students. The initial building construction began in 1935; major additions followed in 1955 and 1972. At least four additions occurred between 1940 and 1961.

2. Impact on the Maintenance of Life, Health and Safety:

The existing elementary school facility is severly deficient with respect to life, health and safety. The "Nome Elementary School Facility Inventory and Conditions Survey" identified many of the fire, structural, and health considerations outlined below:

a. Fire related deficiencies: There is considerable potential for a major fire in the existing facility. The 1936 portion of the building is totally non-rated combustible construction. The office of the State Fire Marshal has closed down the second floor of this portion of the building. In addition, major mechanical and electrical deficiencies, as well as dead-end corridors, lack of alternate means of egress, and non-rated door openings make the 1936 portion of the existing elementary school facility an extreme fire hazard. The existing boiler room is also non-rated and without one hour rated separation walls, and there are no draft stops in the ceiling/roof assembly.

In terms of fire hazard the 1955 section of the facility is probable the least hazardous portion of the building. This facility does, however, have major mechanical and electrical deficiencies which could start or contribute to a fire. The main corridors do not have a one hour rated ceiling/roof assembly and door openings off of the corridors are non-rated assemblies.

The 1972 building addition has severe fire related deficiencies including a combustible return-air plenum, lack of draft stops, non-rated ceiling/floor and ceiling/roof assemblies, major mechanical deficiencies, and non-rated door and window opening assemblies off of corridors.

b. Structural deficiencies: The entire existing elementary school complex has severe foundation degradation problems which can only be solved with large amounts of money and on-going monitoring and leveling of the floor systems for the duration of the life of the facility.

The foundation under the 1936 portion of the building has the most controlled foundation degradation problems but there is virtually no way to keep water from getting into the crawl space since the roads are so close to the building and are higher than the crawl space.

THERE IS A NEED FOR SEVERAL SHEAR WALLS TO TRANSFER LATERAL LOADS TO THE FOUNDATION, AND THERE IS A LIMITED AMOUNT OF ROT IN SOME STRUCTURAL MEMBERS AND IN SOME OF THE TEMPORARY WOOD PADS/SUPPORTING PARTS OF THIS PORTION OF TH BUILDING (PARTICULARLY UNDER THE BOILER ROOM AREA).

The concrete foundation underneath the 1955 portion of the facility is experiencing severe differential settlement. The worst area underneath the northeast corner of the multipurpose room shows about 5" of differential settlement from the middle of the room to the corner. The concrete slab on the metal deck in this area supports itself with the structural members another 2" to 3" below the slab. Temporary wood shims have been driven to provide some support to the concrete. The multipurpose room will need to be shut down in the near future as the problem continues to get worse. The settlement in this portion of the building is continuing to be monitored but it will be a major expense to cut the concrete piers, jack the building into level, and install steel channels on each side of the cut piers and grout them solid. If remedial action is taken this portion will still need to be monitored and releveled for the remaining life of the building.

The 1972 portion of the facility is also experiencing severe foundation degradation (pile subsidence). The crawl space is heated and has caused piling settlement in the middle of the building. The exterior entry piling shows signs of frost jacking. Water needs to be positively channeled away from these piles (and interior piles). The foundation movement in this portion of the facility is widely evidenced by cracked gypsum board walls, leaks in the roof, and cracked concrete entry landings.

The following code violations are outlined in the fire marshal's letter dated January 23, 1982. Because of cost, several major violations cannot be complied with without major renovation.

Item 1: The structure is required to be of one hour fire resistive construction (UBC Table 5-D).

Item 6: Southwest exterior exit door is not 36" wide as required by UBC Sec. 3303.

Item 15: Change in corridor floor elevation between the 1936 building and the 1955 addition is too steep and does not comply with the ramp provisions of UBC Sec. 3306.

Item 25: Book storage room and all other storage areas need to be separated from classrooms and other areas of the building by one hour fire resistive construction (UBC Sec. 802).

Item 27: The shop (rm 117) shall be separated from the rest of the building by a one hour fire resistive occupancy separation with communicating openings protected by one hour fire rated door assemblies equipped with approved self closure (UBC Sec. 806).

#3 PAGE
ITEM 33: BOILER ROOM #119 SHALL BE SEPARATED FROM THE REST OF THE BUILDING BY NOT LESS THAN A ONE HOUR FIRE RESISTIVE OCCUPANCY SEPARATION (UBC SEC. 806).

Item 42: Exit stairway from girl's locker room is 30 inches wide, has a rise of about 8½ inches, a run of 9 inches and no handrail, contrary to the requirements of UBC Sec. 3305.

Item 48: Sill height of classroom windows is 44 inches. 13 AAC 50.020 requires classrooms to have approved sprinkler system, direct exterior exit or an openable window that may be used for emergency escape having a sill height of the openable section not more than 36 inches above the floor and not more than six feet above the adjacent grade level.

Item 63: The area above the first floor suspended ceiling, including corridors, is of combustible construction and is being used as an air plenum. The area is not sprinklered.

Item 64: The floor-ceiling assembly between the first and second story and the ceiling-roof assembly are required to be one hour assemblies (UBC Tables 5-D and 17-A). The present assemblies do not have sheetrock protecting the bottom cord of the 1st floor trusses or the second story ceiling joist.

Item 76: Classroom windows of rooms 215 and 216 have a sill height of about 46" and do not open. Other windows either have a sill height exceeding 36" or do not have a clear net openable area of 5.7 square feet with a net clear opening height of 24 inches and a net clear opening width dimension of 20 inches. Sill height cannot exceed 36 inches above the floor. Direct exterior exits or an approved automatic sprinkler system throughout the building is required by 13 AAC 50.020.

Item 77: One end of the exit corridor from the home economics room and office area opens into the "open plan" concept area. A room cannot exit into a corridor and through another room to a second exit corridor and stairway (UBC Chapter 33). The corridor should be extended to connect either the southwest or southeast exit corridor and stairway.

In response to these items, Charles L. Davis, Deputy Fire Marshal, acknowledged the difficulty in his reply of December 20, 1982:

"Dear Mr. LaBolle, This will acknowledge your letter of November 30, 1982, and our conference of December 6, 1982, regarding correction of deficiencies noted in the above referenced survey report.

I agree that correction of Item 31, 6, 15, 25, 27, 30, 33, 42, 45, 63, 64, 76 and 77 will entail considerable expense necessitating legislative appropriations. Please keep us advised."

The Nome Elementary Schoo' Project was originally submitted to the Department of Education for inclusion in the Governor's Capital Improvement Budget on June 7, 1982. In October the City passed a $1 million bond for planning of the project. As a result, the planning and engineering of the project is proceeding on schedule utilizing these funds.

If the project can be funded in phases it is possible to estimate some of the costs involved in the initial phase of the project.

The City Council has identified a site located on 5th Avenue. Several test holes have been drilled on the site and geotechnical information dealing with some of the foundation needs has been prepared.

In their report of January 18, 1983, CCC Architects and Planners estimate the cost for a foundation system to be $2,240,000. If the concrete floor deck is added to the piles the total cost is estimated to be $5,160,000.

Since the City bond should be adequate for the planning and bidding phase that amount should carry the project through the winter and the early part of the 1984 construction season.

PROJECT DESCRIPTION

⑨ THIS APPROPRIATION TO THE CHATHAM SCHOOL DISTRICT IS FOR DESIGN AND CONSTRUCTION OF THE NEW SCHOOL PROJECT. THIS PROJECT IS A NUMBER ONE PRIORITY OF THE CHATHAM SCHOOL DISTRICT. THE EXISTING FACILITY HAS BEEN OPERATING SINCE 1910, AND RENOVATION IS NOT RECOMMENDED. THE STRUCTURE IS UNSOUND, SANITATION IS INADEQUATE AND STUDENT COUNT PROJECTIONS POINT TO STEADILY GROWING ENROLLMENT, PLACING IT AT THE TOP OF THE COMMUNITY'S LIST OF CONCERNS.

KLUKWAN SCHOOL HAS BEEN OPERATED BY THE BIA IN THE PAST, AND WAS JUST RECENTLY TURNED OVER TO THE STATE.

FY 84

35 LEGISLATIVE REQUEST
PROPOSED CAPITAL

⑩ CATEGORY (Direct grant)

REQUESTING LEGISLATOR:

(Signature)

Sen. Eliason

Although the school at Klukwan may become the second largest in the District, the reality of limited funding has forced consideration of a phased funding package:

Phase I = 8,500 square feet
- 4 classrooms
- Library
- Office, Counseling, Storage
- Toilets, Circulation, Mechanical

Phase II = 6,000 square feet
- Multipurpose room
- Home Economics
- Storage-Circulation, Mechanical

Phase III = 2,500 square feet
- 2 classrooms
- Teacher Preparation
- Mechanical and Circulation

The phase package, designed to extend over a three-year period has been subjected to an inflated cost estimate which is identified below:

Phase I = 8,500 square feet

$1,445,000	= $170 per sq. ft./ construction
289,000	= Project Development Costs design equipment art in public places site development construction contingency
1984 $1,734,000	TOTAL

Phase III = 6,000 square feet

$1,020,000	= $170 per sq. ft./ construction
97,000	= 9% Inflation
223,400	= Project development Costs (identified above)
1985 $1,340,400	TOTAL

Probably the maximum amount available for replacement would be in the area of $300,000, ($361,933) a figure far too small to actually replace the facility. Other difficulties with this amount surface, as it appears the monies may only be used for "repairs" rather than the replacement of the facility.

The other apparent source for funding is through direct legislative appropriation. As submitted to the Department of Education, the request for a school at Klukwan was listed as a 1986 priority and ranked as 14th. Since that time, however, Chatham District has revised their own prioritization and made Klukwan a NUMBER ONE PRIORITY along with Tenakee. Unlike Tenakee, however, funds have not been tentatively allocated in the Governor's FY'83 budget. This may be due to several reasons--namely the fact that FY'83 is the first year Klukwan has been a part of the on-going request cycle of Chatham whereas Tenakee has been requested for three years.

The re-prioritization of the request for Klukwan is due primarily to previously undocumented enrollment projections. Based on recent awareness of an increase in students combined with the housing of the educational program in a totally obsolete facility, the District recognizes the need for immediate action.

It is the request of the Chatham District that the FY'83 Alaska State Legislature consider a direct appropriation for PHASE 1 CONSTRUCTION of 4500 SQUARE FEET IN THE AMOUNT OF $1,734,000.

Project Description:

Phase II design and construction of planned addition. This addition consists of the following special use areas: Library/media Center 1500 square feet, Science room 1100 square feet, Business Education 600 square feet and Home science 300 square feet. Total 3,200 square feet.

Project Justification:

Project Need:

McGrath is a growing community. This would provide the required program for the next 10 years. This space is needed to allow for program expansion and anticipated student population growth.

Documentation of Estimated Capital Costs:

The district's estimate of 1,200.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected since requested funds are needed to complete projects.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services including operational expense, may not exceed 45% of the district's total budget. The district estimates this project will increase their operational budget by

Project Description:

Plan, design and construct a 3,100 square foot classroom addition to the existing facility.

Project Justification:

Project Need:
Need based on student enrollment. Existing modular unit is undersized and expensive to maintain and operate.

Documentation of Estimated Capital Costs:
The district's estimate of 1,800.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
Remodel existing facility--floor space not available.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services including operational expense, may not exceed 45% of the district's total budget. The district estimates this project will increase their annual operational budget by $31,000.

Project Description:

Plan, design and construct a 4,550 square feet addition to existing facility.

Project Justification:

Project Need:

District maintains that existing space is not adequate for program needs.

Documentation of Estimated Capital Costs:

The district's estimate of 1,800.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

Occupy existing building-space limitations prohibit described program. Remodel present facilities--floor space not available at present.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services including operational expense may not exceed 45% of the district's total budget. The district estimates this project will increase their operational budget by $45,000 annually.

SB 18 BACKUP

MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT
MAINTENANCE AND UPGRADE PROJECTS

1.	Summer Maintenance	$ 200,000
	This funding is extremely important to carry out summer maintenance in the schools throughout the district.	
2.	Land Acquisition and Planning Funds	1,400,000
	Acquisition of land and planning and design monies for West Palmer Elementary and Houston Junior-Senior High.	
3.	Swanson Elementary Roof and Insulation Upgrade	1,000,000
	One wall of the structure that was not insulated under a previous contract would be completed. The roof repair would prevent further deterioration of the structure.	
4.	District-Wide Computerized Energy Management System	300,000
	This project would result in significant savings in energy costs to the district.	
5.	Palmer Area Playgrounds Upgrade	250,000
	Grading, fencing, and removal of boulders would be done at the Swanson, Sherrod, Snowshoe, and Butte Elementary Schools. At some of these schools, unleashed dogs are present at the playgrounds since there is no fencing.	
6.	Susitna Valley Art Room Addition	400,000
	With these facilities, a sorely needed program could be added to the curriculum.	
	T O T A L	$3,550,000

To: HESS Committee Date: May 5, 1983

From: Linda Otey, Committee Aide

Re: proposed House CS for CS for SB 18 (HESS)

The attached backup is in the order listed in the proposed legislation. Other back-up in more detail is available for review but has not been duplicated because of its bulk.

As well as the back-up provided for each school district, the following explanations are appropriate:

BIA School transfers - (List Attached) - Seventeen schools will receive $11.1 million in federal receipts to bring the sites up to State Fire-Life Safety Codes. The mechanics of the actual dollar transfer are in the process of being developed.

The BIA, DOE, and the State Fire Marshall's Office have identified specific areas in need of modification. The Dept. of Educ. will make the final decision as to how these funds will be allocated.

The final decision will be made after the budget process to enable the Department to determine remaining needs of the BIA transfer schools.

Also attached:

DOE - Elementary/Secondary and Combined Elementary-Secondary School Space Guidelines

DOE - Prioritization of Capital Projects/ Combined City & Borough - REAA School Districts

Project Description:

Upgrading the existing elementary/secondary schools, including modifications to air handling system, provision emergency power, heating system improvements, replacement oil fired kitchen stove, roof repair, window replacement and painting plus the addition of vocational education space (2,000 GSF) and general purpose storage space.

Project Justification:

Project Need:

Existing schools need attention in the following areas in order to preserve its useful life: hot water distribution lines (insulation), and roof (repairs), exterior (painting), windows (replacement to prevent heat loss and to conserve energy). Moreover, modification to the air handling systems of both the elementary and secondary school need to be made in order to effect operational cost savings.

Two other improvements are also needed: provision of emergency power generation and replacement of an oil fired stove in the high school's kitchen. Lastly, the addition of vocational education and general purpose space will improve the instructional program and allow for convenient, safe storage of supplies and materials.

Documentation of Estimated Capital Costs:

The estimate of $710.0 was prepared by the district. LCC Analysis has been requested.

Project Description:

Planning, designing and constructing a multi-purpose room addition of 2,201 GSF to the existing school.

Project Justification:

Project Need:

At the present time, the high school gym serves as a multi-purpose room/cafeteria for grades K-12. This lowers the amount of instructional space available and as a result students are forced to eat in this area at times when physical education/recreation activities are being conducted, which is hazardous from a safety standpoint. This project will enclose and adjoining porch area and convert it to a multi-purpose room/cafeteria, which will be used for elementary physical education classes.

Documentation of Estimated Capital Costs:

The estimate of $530.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected because health and life safety hazard to students attending school in this facility.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

PROJECT DESCRIPTION (CONTINUED):

	☐	☐	☐	☐			

Project Description:

Remodeling of existing Buckland High School Shop and the addition of general purpose storage space (1000 GSF).

Project Justification:

Project Need:

This project is for upgrading the shop to eliminate electrical/ventilation deficiencies and to facilitate the use of more extensive power equipment for welding. This project will eliminate existing health/safety hazards and enable the school to expand the scope of its vocational education program. Moreover, storage space is needed to remove supplies, materials, equipment and food products from the instructional areas of the school. Adequate storage is a major problem in the remote village schools due to the necessity to acquire and to store large quantities of materials, supplies and food products at one time, as well as the provision of security to prevent loss from theft.

Documentation of Estimated Capital Costs:

The estimate of $195.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected because health and life safety hazard to students attending school in this facility.

Project Description:

Construction of a 4,574 GSF addition to existing Hooper Bay High school, including classrooms, lab space, vocational education space, and related supplementary spaces.

Project Justification:

Project Need:

It is the school district's position that the existing new high school is undersized for its educational program needs. When the BIA built the new high school, the village would not accept anything but a full-size gym. Consequently, needed instructional space was sacrificed. Without the requested additional space, the district claims that the instructional program will continue to suffer.

Documentation of Estimated Capital Costs:

Cost estimate of 1,417.9 was provided by school district. LCC analysis has been requested.

Identification of Alternatives Considered:

1. Status quo. Rejected because of program needs.
2. Remodel gym to provide needed space. Rejected as unacceptable to community.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

AGENCY EDUCATION

PROGRAM

FY 84

ELEMENTARY FACILITY
E, ALASKA

1. Project Description:

In 1981, CCC Architects and Planners prepared an Inventory and Conditions survey for the Nome Elementary School. The present Nome Elementary School facility has a gross floor area of 62,060 square feet and currently accommodates approximately 443 students. The initial building construction began in 1935; major additions followed in 1955 and 1972. At least four additions occurred between 1940 and 1961.

2. Impact on the Maintenance of Life, Health and Safety:

The existing elementary school facility is severly deficient with respect to life, health and safety. The "Nome Elementary School Facility Inventory and Conditions Survey" identified many of the fire, structural, and health considerations outlined below:

a. Fire related deficiencies: There is considerable potential for a major fire in the existing facility. The 1936 portion of the building is totally non-rated combustible construction. The office of the State Fire Marshal has closed down the second floor of this portion of the building. In addition, major mechanical and electrical deficiencies, as well as dead-end corridors, lack of alternate means of egress, and non-rated door openings make the 1936 portion of the existing elementary school facility an extreme fire hazard. The existing boiler room is also non-rated and without one hour rated separation walls, and there are no draft stops in the ceiling/roof assembly.

In terms of fire hazard the 1955 section of the facility is probable the least hazardous portion of the building. This facility does, however, have major mechanical and electrical deficiencies which could start or contribute to a fire. The main corridors do not have a one hour rated ceiling/roof assembly and door openings off of the corridors are non-rated assemblies.

The 1972 building addition has severe fire related deficiencies including a combustible return-air plenum, lack of draft stops, non rated ceiling/floor and ceiling/roof assemblies, major mechanical deficiencies, and non-rated door and window opening assemblies off of corridors.

b. Structural deficiencies: The entire existing elementary school complex has severe foundation degradation problems which can only be solved with large amounts of money and on-going monitoring and leveling of the floor systems for the duration of the life of the facility.

The foundation under the 1936 portion of the building has the most controlled foundation degradation problems but there is virtually no way to keep water from getting into the crawl space since the roads are so close to the building and are higher than the crawl space.

THERE IS A NEED FOR SEVERAL SHEAR WALLS TO TRANSFER LATERAL LOADS TO THE FOUNDATION, AND THERE IS A LIMITED AMOUNT OF ROT IN SOME STRUCTURAL MEMBERS AND IN SOME OF THE TEMPORARY WOOD PADS SUPPORTING PARTS OF THIS PORTION OF T BUILDING (PARTICULARLY UNDER THE BOILER ROOM AREA).

The concrete foundation underneath the 1955 portion of the facility is experiencing severe differential settlement. The worst area underneath the northeast corner of the multipurpose room shows about 5" of differential settlement from the middle of the room to the corner. The concrete slab on the metal deck in this area supports itself with the structural members another 2" to 3" below the slab. Temporary wood shims have been driven to provide some support to the concrete. The multipurpose room will need to be shut down in the near future as the problem continues to get worse. The settlement in this portion of the building is continuing to be monitored but it will be a major expense to cut the concrete piers, jack the building into level, and install steel channels on each side of the cut piers and grout them solid. If remedial action is taken this portion will still need to be monitored and releveled for the remaining life of the building.

The 1972 portion of the facility is also experiencing severe foundation degradation (pile subsidence). The crawl space is heated and has caused piling settlement in the middle of the building. The exterior entry piling shows signs of frost jacking. Water needs to be positively channeled away from these piles (and interior piles). The foundation movement in this portion of the facility is widely evidenced by cracked gypsum board walls, leaks in the roof, and cracked concrete entry landings.

The following code violations are outlined in the fire marshal's letter dated January 23, 1982. Because of cost, several major violations cannot be complied with without major renovation.

Item 1: The structure is required to be of one hour fire resistive construction (UBC Table 5-D).

Item 6: Southwest exterior exit door is not 36" wide as required by UBC Sec. 3303.

Item 15: Change in corridor floor elevation between the 1936 building and the 1955 addition is too steep and does not comply with the ramp provisions of UBC Sec. 3306.

Item 25: Book storage room and all other storage areas need to be separated from classrooms and other areas of the building by one hour fire resistive construction (UBC Sec. 802).

Item 27: The shop (rm 117) shall be separated from the rest of the building by a one hour fire resistive occupancy separation with communicating openings protected by one hour fire rated door assemblies equipped with approved self closure (UBC Sec. 508).

ITEM 33: BOILER ROOM #119 SHALL BE SEPARATED FROM THE REST OF THE BUILDING BY NOT LESS THAN A ONE HOUR FIRE RESISTIVE OCCUPANCY SEPARATION (UBC SEC. 806).

Item 42: Exit stairway from girl's locker room is 30 inches wide, has a rise of about 8½ inches, a run of 9 inches and no handrail, contrary to the requirements of UBC Sec. 3305.

Item 48: Sill height of classroom windows is 44 inches. 13 AAC 50.020 requires classrooms to have approved sprinkler system, direct exterior exit or an openable window that may be used for emergency escape having a sill height of the openable section not more than 36 inches above the floor and not more than six feet above the adjacent grade level.

Item 63: The area above the first floor suspended ceiling, including corridors, is of combustible construction and is being used as an air plenum. The area is not sprinklered.

Item 64: The floor-ceiling assembly between the first and second story and the ceiling-roof assembly are required to be one hour assemblies (UBC Tables 5-D and 17-A). The present assemblies do not have sheetrock protecting the bottom cord of the 1st floor trusses or the second story ceiling joist.

Item 76: Classroom windows of rooms 215 and 216 have a sill height of about 46" and do not open. Other windows either have a sill height exceeding 36" or do not have a clear net openable area of 5.7 square feet with a net clear opening height of 24 inches and a net clear opening width dimension of 20 inches. Sill height cannot exceed 36 inches above the floor. Direct exterior exits or an approved automatic sprinkler system throughout the building is required by 13 AAC 50.020.

Item 77: One end of the exit corridor from the home economics room and office area opens into the "open plan" concept area. A room cannot exit into a corridor and through another room to a second exit corridor and stairway (UBC Chapter 33). The corridor should be extended to connect either the southwest or southeast exit corridor and stairway.

In response to these items, Charles L. Davis, Deputy Fire Marshal, acknowledged the difficulty in his reply of December 20, 1982:

"Dear Mr. LaBelle, This will acknowledge your letter of November 30, 1982, and our conference of December 6, 1982, regarding correction of deficiencies noted in the above referenced survey report.

I agree that correction of Item 31, 6, 15, 25, 27, 28, 33, 42, 48, 63, 64, 76 and 77 will entail considerable expense necessitating legislative appropriations. Please keep us advised."

The Nome Elementary School Project was originally submitted to the Department of Education for inclusion in the Governor's Capital Improvement Budget on June 7, 1982. In October the City passed a $1 million bond for planning of the project. As a result, the planning and engineering of the project is proceeding on schedule utilizing these funds.

If the project can be funded in phases it is possible to estimate some of the costs involved in the initial phase of the project.

The City Council has identified a site located on 5th Avenue. Several test holes have been drilled on the site and geotechnical information dealing with some of the foundation needs has been prepared.

In their report of January 18, 1983, CCC Architects and Planners estimate the cost for a foundation system to be $2,240,000. If the concrete floor deck is added to the piles the total cost is estimated to be $5,160,000.

Since the City bond should be adequate for the planning and bidding phase that amount should carry the project through the winter and the early part of the 1984 construction season.

PROJECT DESCRIPTION

⑨ THIS APPROPRIATION TO THE CHATHAM SCHOOL DISTRICT IS FOR DESIGN AND CONSTRUCTION OF THE NEW SCHOOL PROJECT. THIS PROJECT IS A NUMBER ONE PRIORITY OF THE CHATHAM SCHOOL DISTRICT. THE EXISTING FACILITY HAS BEEN OPERATING SINCE 1910, AND RENOVATION IS NOT RECOMMENDED. THE STRUCTURE IS UNSOUND, SANITATION IS INADEQUATE AND STUDENT COUNT PROJECTIONS POINT TO STEADILY GROWING ENROLLMENT, PLACING IT AT THE TOP OF THE COMMUNITY'S LIST OF CONCERNS.

KLUKWAN SCHOOL HAS BEEN OPERATED BY THE BIA IN THE PAST, AND WAS JUST RECENTLY TURNED OVER TO THE STATE.

FY 84

35 LEGISLATIVE REQUEST
PROPOSED CAPITAL

⑩ CATEGORY (Direct grant)

REQUESTING LEGISLATOR:

(Signature)

Sen. Eliason

Although the school at Klukwan may become the second largest in the District, the reality of limited funding has forced consideration of a phased funding package:

Phase I = 8,500 square feet
- 4 classrooms
- Library
- Office, Counseling, Storage
- Toilets, Circulation, Mechanical

Phase II = 6,000 square feet
- Multipurpose room
- Home Economics
- Storage-Circulation, Mechanical

Phase III = 2,500 square feet
- 2 classrooms
- Teacher Preparation
- Mechanical and Circulation

The phase package, designed to extend over a three-year period has been subjected to an inflated cost estimate which is identified below:

Phase I = 8,500 square feet

$1,445,000	= $170 per sq. ft./ construction
289,000	= Project Development Costs design equipment art in public places site development construction contingency
$1,734,000	TOTAL

1984

Phase III = 6,000 square feet

$1,020,000	= $170 per sq. ft./ construction
97,000	= 9% Inflation
223,400	= Project development Costs (identified above)
$1,340,400	TOTAL

1985

Probably the maximum amount available for replacement would be in the area of $300,000, ($361,933) a figure far too small to actually replace the facility. Other difficulties with this amount surface, as it appears the monies may only be used for "repairs" rather than the replacement of the facility.

The other apparent source for funding is through direct legislative appropriation. As submitted to the Department of Education, the request for a school at Klukwan was listed as a 1986 priority and ranked as 14th. Since that time, however, Chatham District has revised their own prioritization and made Klukwan a NUMBER ONE PRIORITY along with Tenakee. Unlike Tenakee, however, funds have not been tentatively allocated in the Governor's FY'83 budget. This may be due to several reasons--namely the fact that FY'83 is the first year Klukwan has been a part of the on-going request cycle of Chatham whereas Tenakee has been requested for three years.

The re-prioritization of the request for Klukwan is due primarily to previously undocumented enrollment projections. Based on recent awareness of an increase in students combined with the housing of the educational program in a totally obsolete facility, the District recognizes the need for immediate action.

It is the request of the Chatham District that the FY'83 Alaska State Legislature consider a direct appropriation for PHASE 1 CONSTRUCTION of 4500 SQUARE FEET IN THE AMOUNT OF $1,734,000.

Project Description:

Phase II design and construction of planned addition. This addition consists of the following special use areas: Library/media Center 1500 square feet, Science room 1100 square feet, Business Education 600 square feet and Home science 300 square feet. Total 3,200 square feet.

Project Justification:

Project Need:

McGrath is a growing community. This would provide the required program for the next 10 years. This space is needed to allow for program expansion and anticipated student population growth.

Documentation of Estimated Capital Costs:

The district's estimate of 1,200.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected since requested funds are needed to complete projects.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services including operational expense, may not exceed 45% of the district's total budget. The district estimates this project will increase their operational budget by

Project Description:

Continuation of the design and construction of the school facility. This includes 1400 square feet of classroom space, 1092 square feet of library/media center and 700 square feet of supplemental space.

Project Justification:

Project Need:

This facility is needed to complete Phase II of the project. This facility will replace the existing structure which is old and has numerous life-safety code violations as documented by the State Fire Marshall.

Documentation of Estimated Capital Costs:

The district's estimate of 1,200.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

Do nothing. Rejected due to fire and safety hazards.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates the project will not increase or decrease their operational budget annually.

Project Description:

Renovation of existing elementary school to correct life-safety, utility, architectural, and program deficiencies.

Project Justification:

Project Need:

Lower Kuskokwim School District received $1,000,000 in Chapter 82/81 SLA for districtwide major maintenance. This amount, however, was insufficient to take care of the total needs of the Kilbuck School, as well as the needs at other sites. The requested funding is for completing the renovation of this school pursuant to the deficiencies documented in the DOT/PF Inventory & Condition Survey.

Documentation of Estimated Capital Costs:

The estimate for this project ($2,400.0) was submitted by school district officials, and must be verified by a qualified A/E or by a professional cost estimator. LCC analysis has been requested.

Identification of Alternatives:

Do nothing. Rejected because of district's commitment to alleviate architectural barriers in its facilities.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely

Project Description:

Fire code upgrade/roof replacement.

Project Justification:

Project Need:

This project is necessary to preserve existing structures and comply with existing fire code. Due to water damage the gypsum drywall has lost it's one hour rating.

Documentation of Estimated Capital Costs:

The district's estimate of 901.9 thousand dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:

As scope of work mandated by fire code the only other alternatives are to:

1. Replace entire structure - too costly.
2. Close structure as school - no facility available.
3. Revise fire code

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not

Project Description:

This project will provide for a new elementary/high school to replace the existing facility. This will be a wood frame structure of approximately 9720 square feet. Existing facility will be maintained as teachers' quarters.

Project Justification:

Project Need:
Existing facility was constructed in late 1950's. It is small and substandard for modern educational program for 32 students in an elementary/secondary school.

Documentation of Estimated Capital Costs:
Cost figures were provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Utilize portable units. Rejected as not standard or cost effective.
2. Remodel and remove teachers' quarters. Rejected as displacing teachers would have detrimental effect on educational program. No other housing available.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates

Project Description:
Modify district facilities to meet state life/safety code requirements.

Project Justification:
Project Need:
DOT/PF Survey documents the various code violations throughout the district.

Documentation of Estimated Capital Costs:
The estimate of $2,543.0 million dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Continue program without making required upgrade. Rejected because of the nature of code violations, risk to students and public and limitations of program.
2. Postpone - rejected as inflation in the construction field continues.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17. which allocates funds to the districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. Program for Progress

Project: School District Buildings - Major Repairs and Rehabilitation

Sponsoring Agency: Fairbanks North Star Borough

Capital Request: $2,400,000

Estimated Annual M&O Cost: Reduction from existing

Description/Public Benefit:

The goal of this project is to do the major repair and rehabilitation construction necessary on School District facilities to bring them up to a maintainable standard within reasonable budgeting limits. The projects will also provide protection against the continuing deterioration of the facilities which create unaffordable maintenance situations.

Projects would be funded according to priority need with any appropriation provided. Projects would be coordinated with Fire/Life Safety Code Upgrades, energy management retrofits and handicapped access renovations. In this way maximum cost efficiency could be achieved.

The total amount requested would fund two years of a five year program of major repair projects. Some projects have been designed and some require only minimal design; construction on these projects could begin as early as the 1983 construction season.

Project Components

Project	Est. Cost
a. Lathrop - Replace Lighting System @ Hering Auditorium	$ 160,000
b. Hunter School - Corridor Ceiling Tile Replacement	$ 10,000
c. New Roofs - Barnette, Denali, Hunter, Lathrop, Ryan, Salcha, University Park	$4,603,800
d. Major Roof Repair - Hutchison, Nordale, Tanana, West Valley, Woodriver	$ 753,500

School District Buildings - Major Repairs and Rehabilitation (Cont.)

Project Components (Cont.)

Project	Est. Cost
e. Chimney Repair - Joy, Nordale, North Pole Elementary, North Pole High	$ 177,100
f. Interior Finishes - North Pole Elementary Ryan, Salcha, & Tanana	$ 180,000
g. Exterior Finishes - Barnette, Hutchison, Joy, Main, North Pole Elementary, Ryan, Salcha, Tanana, Woodriver	$ 345,000
h. Architectural Deficiencies - Nordale, Denali, University Park	$ 116,500
i. Mechanical Deficiencies - Nordale, Denali, Barnette, Hunter, Joy, Salcha, Lathrop, Ryan, University Park, Borough School Service Facility	$ 640,000
j. Electrical Deficiencies - Nordale, Barnette, Borough School Service Facility	$ 54,000
Estimated Total	$7,040,100

Fairbanks North Star Borough School District
FY 84 Capital Improvement Request

Project: Lathrop High School Classroom Addition

FNSBSD Priority: 8

Department of Education Priority: 2) Unhoused students

Goal: To provide classrooms and physical education facilities at existing school to relieve overcrowding.

Justification: Lathrop High School is experiencing an increase in enrollment that over tacks the existing facility. The design enrollment for the school is being excluded by 200 students. This has resulted in classes being held in areas not designed for teaching activity or overcrowding of facilities designed for special classes. This project would provide for an addition to the present gym, rehabilitation of the library into an art department as a new library is being constructed. The area now being utilized by the art department would be remodeled into classroom area and the renovation of the band and music area.

Capital Cost:

The budget cost estimates for construction are:

Administration	=	$ 121,800.00
Design	=	548,100.00
Construction	=	4,878,090.00
Contingency	=	542,010.00
Project Cost Total		$6,090,000.00

Program for Progress

Project: School District Facilities - Fire/Life Safety Code Upgrades

Sponsoring Agency: Fairbanks North Star Borough

Capital Request: $2,307,000

Estimated Annual M&O Cost: No change from existing

Description/Public Benefit:

The goal of this project is to bring existing school facilities up to minimum fire and life safety code standards required by State and Federal law.

The specific components of the request have been identified by the State of Alaska Department of Transportation and Public Facilities condition survey and through inspections conducted by the Fairbanks Fire Department and the Borough's Risk Management Department. Budget level cost estimates have been developed by HMS, Inc. and the Borough Engineering Department. Projects include identification and removal of asbestos products, upgrade of exiting (stairs, corridors, doors) features, construction of fire separation walls and electrical and mechanical system rehabilitation.

This project is part of a continuing effort to bring existing facilities into code compliance, make them safer for the occupants and user groups, make major repairs and make the buildings more economical to own and operate. Whenever possible, these fire/life safety projects will be combined with funded major repair and energy management projects to maximize cost efficiency and to minimize disturbances to building use.

Due to the nature of these projects they would have a high priority for implementation as funds become available, thus full funding is requested at this time. Design for portions of this project is underway so funding of this request will permit some work to be done in the 1983 construction season. The balance of work will be designed in the fall of 1983 with construction continuing in summer 1984.

Project Description:

Plan, design and construct secondary school addition. This facility would be approximately 21,960 square feet.

Project Justification:

Project Need:

This facility is needed to meet secondary program needs. The district presently has no High School building and all secondary classes are being taught in the elementary building. This addition is essential in order to meet program needs.

Documentation of Estimated Capital Costs:

The district estimate of $4,461.0 was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:

A. Continue to house high school students in existing facility. Rejected due to inability of structure to house students or program.

B. Phase I & II as identified in FY81 feasibility study study totalled $9,647,335. Rejected due to exhorbitant expense.

C. Complete new and separate high school facility. Rejected due to lack of space, construction and operating costs.

Special Features:	One of Several Phases ☐	External Funding Source ☐	Funds to Enable Completion ☐	Contingent Upon Other Projects ☐	Site Owned? Yes	Utilities Available? Yes	Access Available? Yes

Project Description:

Planning, designing, and constructing a multipurpose-vocational education facility (5,850 GSF) at Levelock.

Project Justification:

Project Need:

Present schools multipurpose room is too small (1,032 GSF). Moreover, there is no vocational educational space in the school. Plans include the conversion of existing multipurpose space to secondary classroom space and for constructing a separate multipurpose/industrial education building at the present school site. These additional spaces are necessary in order to accommodate the schools insturctional program.

Documentation of Estimated Capital Costs:

The estimated cost of this project was submitted by school district officials, and must be verified by a qualified A/E or by a professional cost estimator. LCC analysis has been requested.

Identification of Alternatives Considered:

Require the students to attend school at another location in the district where needed facilities exist. Rejected because neither the district nor the state can require a student to live away from home in order to complete his/her education through the twelfth grade (Tobeluk/Local Education Regulations).

84 Agency 24 Education | Governor

Special Features:	One of Several Phases ☐	External Funding Source ☐	Funds to Enable Completion ☐	Contingent Upon Other Projects ☐	Site Owned? No	Utilities Available? Yes	Access Available? Yes

Project Description:

Planning, designing, and constructing a new elementary/high school, consisting of 300 square feet of classroom space, 1,100 square feet of library/media space, 600 square feet of industrial space, 2500 square feet of multipurpose space and, 2520 square feet of supplementary space.

Project Justification:

Project Need:

The existing facility is old (1946) and would require approximately $445,000 (1982 base) to upgrade the deficiencies identified by the DOT/PF Facility Survey. This would not provide the additional instruction space needed. The school is also located approximately 225 feet from the high water line and a 1980 storm brought tidal waters onto the school site. This storm also prompted 12 HUD housing units to be constructed onto the bluff, where the proposed school would be located.

Documentation of Estimated Capital Costs:

The estimated cost of this project ($5,325.6) was submitted by school district officials, and must be verified by a qualified A/E or a professional cost estimator.

Identification of Alternatives Considered:

1. Do nothing. Rejected because health and life safety hazard to students attending school in this facility.
2. Present facility remodel/additon. Rejected because remodeling/retrofitting is the more expensive option.

Project Description:
This project will provide a classroom, multipurpose room, with provision for vocational education. Wood frame on concrete foundation.

Project Justification:
Project Need:
The existing facility lacks multipurpose and library/media space. State's guidelines for a facility with 28 students would allow for approximately 2500 sq. ft.

Documentation of Estimated Operational Expenses:
Cost figures are provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Continue as is. Rejected as school facility would not meet educational program standards.
2. Postpone. Rejected because of inflation.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this project will increase their annual operational budget by $80,000.

MEMORANDUM

March 23, 1983

SUBJECT: Capital Projects - Education

TO: The Honorable Don Bennett
Co-Chairman of Senate Finance

FROM: Senator H. Pappy Moss HPM/kjl

Following is a prioritized list of school construction needs that have been identified within Senate District J. Form 35's have been attached as back-up, and additional information may be obtained from my office.

X (1)	Dot Lake - Multi-purpose room/code upgrade	$1,300,000
(2)	Salcha - Multi-purpose room	1,300,000
X (3)	Nenana - Code upgrade and roof repair	900,000
(4)	Healy - Tri-valley school coal conversion, code upgrade	2,150,000
(5)	Nenana - School construction, Phase II	2,500,000
(6)	Fort Greely - Multi-purpose facility, Phase II	3,950,000
X (7)	Delta Junction - Vocational education facility completion	895,000
	TOTAL:	$12,995,000

PROJECT DESCRIPTION (9)

Current facility at Dot Lake is inadequate for the number of students served. Currently there are 21 students, K-12, attending the school, with a demand for additional vocational programs to serve students ages 16 - 20. School district is sensitive to the role a school building plays in a community such as Dot Lake, and wishes to build a multi-purpose addition that is both functional and highly flexible. Additionally, the existing building is not energy-efficient, and is in need of extensive renovation and insulation.
New construction is estimated at $170/sq.ft. for 5,880 square feet, and renovation of the existing building is estimated at $80/sq.ft. for 3,840 sq. feet, for a total project cost for $1,300,000.

Operating costs are not expected to increase significantly, and may even decline as a result of increased energy efficiency.

PROJECT DESCRIPTION (9)

The main thrust of this request is to add to the appropriation currently in the Governor's FY 84 capital budget. $600,000 has been requested for code upgrade at Nenana School, and the school district would like to raise this amount $300,000 in order to replace the existing roof at the same time. The roof was originally constructed in 1955, and insulated in 1974 with spray-on polyurethane foam. This insulation is deteriorating and absorbing water, which adds a considerable weight load to the already marginal condition of the existing roof. The roof is leaking as is the vapor barrier, which indicates a state of high energy-inefficiency as far as existing insulation is concerned. The school district estimates that the cost of replacing the current roof with a metal structure insulated to R-76 would be approximately $300,000 if done at the same time as the code upgrade, but if done later, the cost is expected to more than double, to $750,000.

This project is expected to have a positive effect on the school district's operating costs.

Project Description:

This project will provide for remodelling of old multi-purpose room into a modern kitchen cafeteria for elementary and junior high students. Project will include storage area, preparation area, serving and eating area.

Project Justification:

Project Need:
A new gym is under construction and will replace this facility. Adequate lunch facilities do not exist. This project will provide for a modern up-to-date facility complete with eating areas.

Documentation of Estimated Capital Costs:
Cost estimates provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Continue as is - rejected because of inadequate food preparation area and conflict of use of gym
2. Postpone - rejected because of inflation.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates this

TOTAL	$12,965,810

Matanuska-Susitna Borough School Board
District Wide Maintenance and Upgrade Priorities
March, 1983

1. Summer Maintenance $200,000

Funding is extremely important to carry out summer maintenance in the schools around the district.

2. Wasilla High School Roof Repair $1,400,000

This appropriation is necessary to prevent further deterioration of the high school roof. Engineering and architectural design will soon be completed and the project will be bid ready in June.

3. Big Lake Elementary Addition $3,750,000

This appropriation would suffice for the design and construction of a 2nd story addition to the elementary school where has been tremendous population impact in the last 3 years. Without this funding the school district would have to locate portable classrooms at the school for the coming academic term.

4. Swanson Elementary Roof and Insulation Upgrade $1,000,000

Roof repair and insulation for one wall of the structure would be supplied with this funding. The insulation sub-contract was never completed and this funding would alleviate the inadequacy. The roof repair would prevent further deterioration of the structure.

5. Computerized Energy Management System - District wide $300,000

Funding this request would result in significant savings in energy costs to the school district.

6. Palmer Area Playgrounds Upgrade $250,000

This appropriation would allow rehabilitation of playgrounds: grading, fencing and removal of boulders at the Swanson, Sherrod, Snowshoe and Butte Elementary Schools. At some of the locales, dogs have been allowed to access to the playground since there has been no fencing.

7. Susitna Valley Art Room Addition $400,000

This construction would enable this sorely needed program to be included in the curriculum.

Special Features:	One of Several Phases ☐	External Funding Source ☐	Funds to Enable Completion ☐	Contingent Upon Other Projects ☐	Site Owned? ____ Access Available?	Utilities Available? ____

Project Description:

Plan, design, and construct K-12 classroom additions to existing facility. Total addition adds up to 16,000 square feet.

Project Justification:

Project Need:
This project is necessary to replace existing building which is not up to code and no longer meets program needs. New facility would be an energy efficient structure. Cost of remodeling existing facility is prohibitive according to district.

Documentation of Estimated Capital Costs:
The estimate of $4,100.0 million dollars was prepared by the district. LCC Analysis has been requested.

Identification of Alternatives Considered:
1. The alternative of continuing to use the current building. Rejected because it is so poor functionally and it does not meet modern codes.

2. Renovate the old building. Rejected due to cost estimates which make it unfeasible. Also because it would not be very functional.

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 808 • DOUGLAS, ALASKA 99824

April 14, 1983

The Honorable Jan Faiks
Alaska Senate
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Faiks:

Consistent with your request for additional information on the Juneau City & Borough School District's revised CIP budget request for FY 1984, I have revised the letter written to Senator Ray on April 8, 1983. In so doing, all pertinent information will be kept in its respective category with less chance for confusion.

Originally the City & Borough of Juneau School District submitted funding requests to the 1983 Legislature in the approximate amount of $8.9 million. In the process of scaling down those funding requests, the following projects emerge as being critical with regard to student safety, program operation and public awareness of school facilities and services.

PROJECT DESCRIPTION	REQUESTED FUNDS
1. Fire Code Upgrade at Auke Bay and Glacier Valley Elementary Schools - Both of these schools require major modifications to the present fire alarm systems. These modifications will not only ensure the increased safety of the children attending those schools but will bring the systems up to existing code requirements.	(Rounded)

The fire code upgrades referred to above are in response to letters from the State Fire Marshal requiring compliance with NFPA 72 A.

Requested funding..... $50,000

2. Floyd Dryden Junior High Classroom Additions/Renovations

In 1980 the School district decided to make a major change in the organizational structure of the educational program within the District. Beginning with the 1984-85 school year the District's present Junior High structure (Grades 7-9) will be changed to a middle school structure (Grades 6-8). This change will relieve the present overcrowded conditions in our elementary schools, and provide, what we believe to be, a significantly improved educational system at all levels. Unfortunately it will further aggravate the already overcrowded conditions at the middle school level. The High School is presently being remodeled to accommodate the additional students expected there with the addition of the 9th grade. These conditions were all created by the very rapid and significant increase in the District's school population (4007 students in June, 1981 to the present population of 4405 students).

SUPPORTING DATA:

* Present Enrollment.....	616 Students
* Gross existing square footage.....	67,804 ft.²
* Allowable square footage using old State space guidelines.....	93,525 ft.² max.
* Allowable square footage using new State space guidelines.....	89,900 ft.² min. 97,400 ft.² max.
*** Additional space required to bring Floyd Dryden into compliance with the recommended "minimum" State space guidelines.....	22,096 ft.²

The above figure should dramatize the crowded conditions which presently exist in this facility. It is unlikely that the requested funding will bring the facility up to the recommended minimum. However, with additions to both junior high facilities and a better balancing of enrollments overall, conditions should be significantly improved.

Requested funding..... $1,700,000

3. Marie Drake Junior High Library Addition and Renovations:

In addition to the same difficulties described at Floyd Dryden, the District's other junior high school requires considerable renovation in order for it to adequately meet needs as a middle school. The library at Marie Drake is one of the smallest in the District and cannot be expanded without major cost and a loss of already premium classroom space. The addition of a new library will also create new and needed classroom space where the present library exists. Additionally, the present shop facility needs to be converted from a metal shop to a woodworking shop to better fulfill the needs of the planned middle school program.

SUPPORTING DATA:

* Present Enrollment	432 Students
* Gross Existing square footage	72,134 ft.²
* Educationally useable square footage (partial basement is counted into the gross square footage - approximately 1/3 of this area cannot be made functional for specific facility uses)	70,243 ft.²
* Allowable square footage using old State space guidelines	65,925 ft.² max.
* Allowable square footage using new State space guidelines	72,500 ft.² min. 80,000 ft.² max.
*** Additional space required to bring Marie Drake into compliance with the recommended "minimum" State space guidelines	2,257 ft.²

Though the square footage deficiencies in Marie Drake are considerably better than those described for Floyd Dryden, Marie Drake was constructed in 1965. Because of its older design, the comparison between the available space for educational purposes to the total space is also of concern. Fortunately, in this case, renovations are possible to increase the functionability of the existing facility, especially with the addition of an adequate library.

Requested funding..... $1.400,000

4. Major Playground Planning & Renovation

A recurring complaint of many parents within the School District is the generally poor and potentially hazardous condition of its playgrounds. (Parent groups have often wanted to purchase playground equipment for their schools through fund-raising drives). Unfortunately, many of the schools have serious drainage problems associated with their playgrounds and these must be resolved before significant money is expended on equipment and installation. Much of the existing equipment will have to be removed in order to provide for adequate drainage. The funds requested will provide for the engineering, planning, renovation and minor expansion of the existing playgrounds.

Requested funding..... $350,000

If funded, the projects described above will allow the School District to proceed with projects having major impact on the majority of our students. The needs as identified are immediate and significant and should they remain unmet, have the potential to seriously effect the programmatical goals of the School District.

Your willingness to assist us in our efforts to acquire funding for this scaled-down version of our capital improvements program is greatly appreciated. Please do not hesitate to call me if additional or more detailed information is needed by you, your staff or colleagues.

CAPSULATED BUDGET

1.	Fire Code Upgrade at Auke Bay & Glacier Valley Elementary Schools.....	$ 50,000
2.	Floyd Dryden Classroom additions/renovations...	1,700,000
3.	Marie Drake Library addition/renovations.....	1,400,000
4.	Major Playground Planning, Engineering and renovation.....	350,000
	Revised Funding Request.....	$3,500,000

Sincerely,

Michael Adams

Project Description:

This project will provide adequate space for a combination elementary/secondary school. The proposed 4300 square feet would include classroom, library/media, vocational home economics and supplementary space.

Project Justification:

Project Need;

There are twelve students residing in the area. Statutes provide for the establishment of a school. No school facility has previously existed in the area.

Documentation of Estimated Capital Costs:

Cost figures were provided by the district. LCC analysis has been requested.

Identification of Alternatives Considered;

1. Do not establish school - rejected because of statutes.
2. Utilize leased facilities - rejected as adequate facility does not exist.
3. Postpone - rejected because of need and inflation.

Analysis of Estimated Impact on Operation Expenses:

The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not exceed 45% of the district's total budget. The district estimates

Home Economics	200 square feet
Multipurpose	860 square feet
Supplemental	640 square feet
	3,200 square feet

Project Justification:

Project Need:
This facility is required to accomodate enrollment increase and anticipated increase. Additional space is necessary to maintain program quality.

Documentation of Estimated Capital Costs:
The district's estimate of 450.0 thousand dollars was prepared by the district. LCC analysis has been requested.

Identification of Alternatives Considered:
1. Loft construction in existing school. Rejected by Fire Marshall.
2. Use of other facilities city space in poor shape and not suitable for school. No toilets or other support elements in building.

Analysis of Estimated Impact on Operation Expenses:
The school is operated by the school district under A.S. 14.17 which allocates funds to districts based solely on student enrollment. District expenditures for administrative services, including operational expense may not

Juneau, Alaska 99811

Dear Jim:

In reference to the January 19, 1983 Memorandum from Wanda Cooksey, Acting Director Division of Management Law & Finance, I am enclosing a request for funding of a student dormitory at the Kotzebue Technical Center. If we had to place this on our Priortized Capital Improvement request we would have to put it as priority # 3 with the rest being dropped down one.

I am submitting this proposal pending Board approval. The Northwest Arctic School District Board will be meeting on February 15, 1983 and will address the proposal at that time. I will notify you of the Boards action concerning this request.

If you need any further information, please contact me at your convenience.

Sincerely,

John L. Rogers

Northwest Arctic School District

BOX 51
KOTZEBUE, ALASKA 99752
(907) 442-3472

KOTZEBUE TECHNICAL CENTER

DORMITORY

The Northwest Arctic School District is presently operating the Kotzebue Technical Center, an Adult Vocational Educational Facility, which serves adult Alaskans from the entire State.

The Kotzebue Technical Center Staff and Students are presently moving into a facility which has just recently been completed. At the present time we have an enrollment of approximately 65 students but with the completion of the new facility we have the capacity to serve as many as 200 students. The Technical Center Staff is receiving request for information on the Programs offered by the Technical Center daily and we have a minimum of 500 people who have expressed an interest in enrolling in the Technical Center.

At this time the Kotzebue Technical Center has an agreement with the Nul-Luk-Vik Hotel to house students who do not live in Kotzebue. This arrangement is adequate for the small enrollment we have now, but as our enrollment increases there will not be adequate room to handle all the students. Kotzebue does not have any other facility available to house students so the Northwest Arctic School District is requesting funds to build a Dormitory for the Technical Center Students.

The Dormitory would be an approximate 20,000 square foot building whose main components would be sleeping and study rooms. The building would not require any food service facilities because it would be built on the Technical Center site and the cafeteria in the Technical Center would be used to feed the students staying in the Dormitory.

The estimated cost for this facility is $6.6 million dollars. If approved and funds appropriated we anticipate the design phase to start in August of 1983 and construction completed by July 1985.

Operating and maintenance costs would be incorporated into the operational budget request of the Kotzebue Technical Center which is submitted to the Department of Education yearly.

With the ability to house additional students this would create an expanded program at the Kotzebue Technical Center. This would provide some additional employment at the Kotzebue Technical Center, but the type and number of additional positions is unknown at this time.

Another area that needs addressing is the possibility of a joint use facility with Chukchi Community College. We foresee the possibility that in the future Chukchi Community college might be in need to house students who are enrolled in their programs. Through the cooperation of both the Kotzebue Technical Center and Chukchi Community College these needs could be addressed on a space available basis.

Enrollment

Numbers for credit courses only (toward accredited degree or program).

KPCC Fall '82	Fulltime	329
	Part time	1008
	TOTAL	1237
Kuskokwim	Full time	41
	Part time	609
	TOTAL	650
UAJ	Full time	303
	Part time	2036
	TOTAL	2339

NOTE:

Of these three schools, KPCC had the highest full time enrollment figures for credit offered courses.

Priorities KPCC

KPCC was listed in fiscal year 1982 CREE priorities six year plan to be built in 1987 at $5 million. In this year no other community college or U of A campus, except Fairbanks, was set out in CREE or the regent's six year plan. The during policy period was to allow no other student housing except Fairbanks. KPCC was the first exception to this in CREE priorities following extensive public hearings and participation by KPCC president, Wilsey, and faculty member John Williams.

The study and hearings for housing resulted in a detailed study plan and needs assessment which set out housing needs against a dramatic shortage of housing available in the Kenai/Soldotna area for students.

PREFACE

Two design alternatives were considered by the committee as valid methods of providing student housing for the Kuskokwim Community College students. Design concept drawings were developed by Facilities Planning and Construction. Construction models were developed, estimated, and the operation budgets constructed for each alternative.

The duplex will house 48 students in 11,168 square feet of space or 232 square feet per student. The capital cost to construct 4 duplex units will be $2,494,052 or $51,959.41 per student. The 1985 operations budget will be $87,660 or $1,826 per student. The dormitory will house 42 students in 10,430 square feet of space or 248 square feet per student. The capital cost to construct the dormitory will be $2,238,416 or $53,295.61 per student. The 1985 operations budget will be $80,522 or $1,917 per student.

The duplex will require an increase of capital of $255,636 and an increase in the operations budget of $55,347 over the next 6 years.

INTRODUCTION

This feasibility study is based on a development plan that is both comprehensive and long range in scope. The plan considers the relationship of the facilities with the Lower Kuskokwim/Delta Communities and the wide range of forecasted conditions.

The forecasted student housing requirements was based on previous research by the Kuskokwim Community College, the Lower Kuskokwim School District, with population and employment projections supplied by the State of Alaska Department of Commerce and Economic Growth.

The method used in the economic analysis was based on the design team developing two separate student housing concepts. A model of each concept was constructed expressing the space requirements, the construction techniques, and the forecasted operating costs. The models were then compared to each other using a common 20-year life.

The purpose of this study is to compare alternative housing concepts.

THE NEED

The Kuskokwim Community College mission was and will continue to enroll students from the villages within our service area. In order to provide an environment for our students, the College leased an apartment building owned by the Bethel Native Corporation. The apartments were not designed for dormitory use and would require major architectural modifications to meet the minimum requirements. There are a number of management problems that exist with this arrangement. The apartment building is located some distance from the campus making transportation for the students difficult. Rental costs for the apartment building had escalated to the point where financial aid was not sufficient to cover the housing cost. Therefore, the lease that was entered into between the Bethel Native Corporation and the College in 1975 was terminated in 1980.

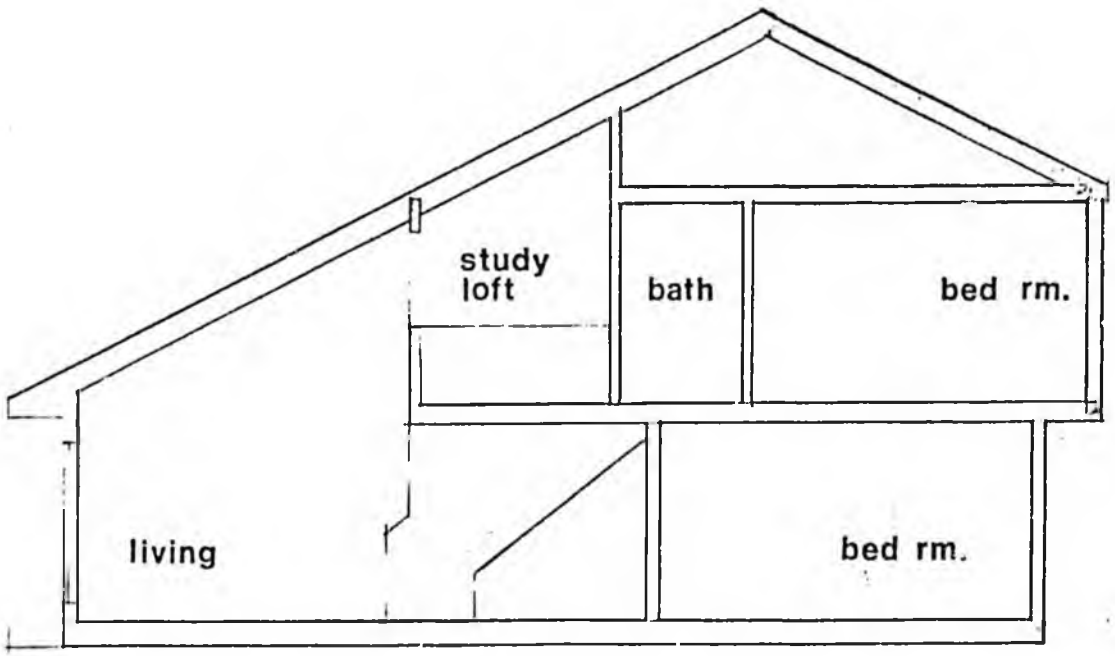
Currently, village students must live with relatives or in boarding homes. The Kuskokwim Community College Student Services Division has found a limited number of acceptable boarding homes in Bethel. This limited housing has adversely effected the Community College student enrollment.

When the apartment building was being used as a student dormitory, the Community College enrolled between 70 to 100 full time students. To date, there are between 30 to 40 boarding homes in the Bethel area and our present full time student enrollment is between 40 and 50.

Students living in boarding homes often confront problems that hinder their ability to study and remain in school. Many of the boarding homes are small and a space for quiet study is not available. Meal times and other household schedules and requirements can conflict with the class schedules and needs of the student. Additionally, many boarding homes are some distance from the main campus which makes transportation difficult.

Many parents in the Delta are also reluctant to have their children attend school in Bethel because of student housing problems. Parents would like the College to guarantee that their children will be housed in a comfortable environment where personal security and group discipline are ensured. Public meetings have been held throughout the lower Kuskokim region by the Community College. The parents have stated that they would feel comfortable sending their children to college in Bethel if well maintained housing

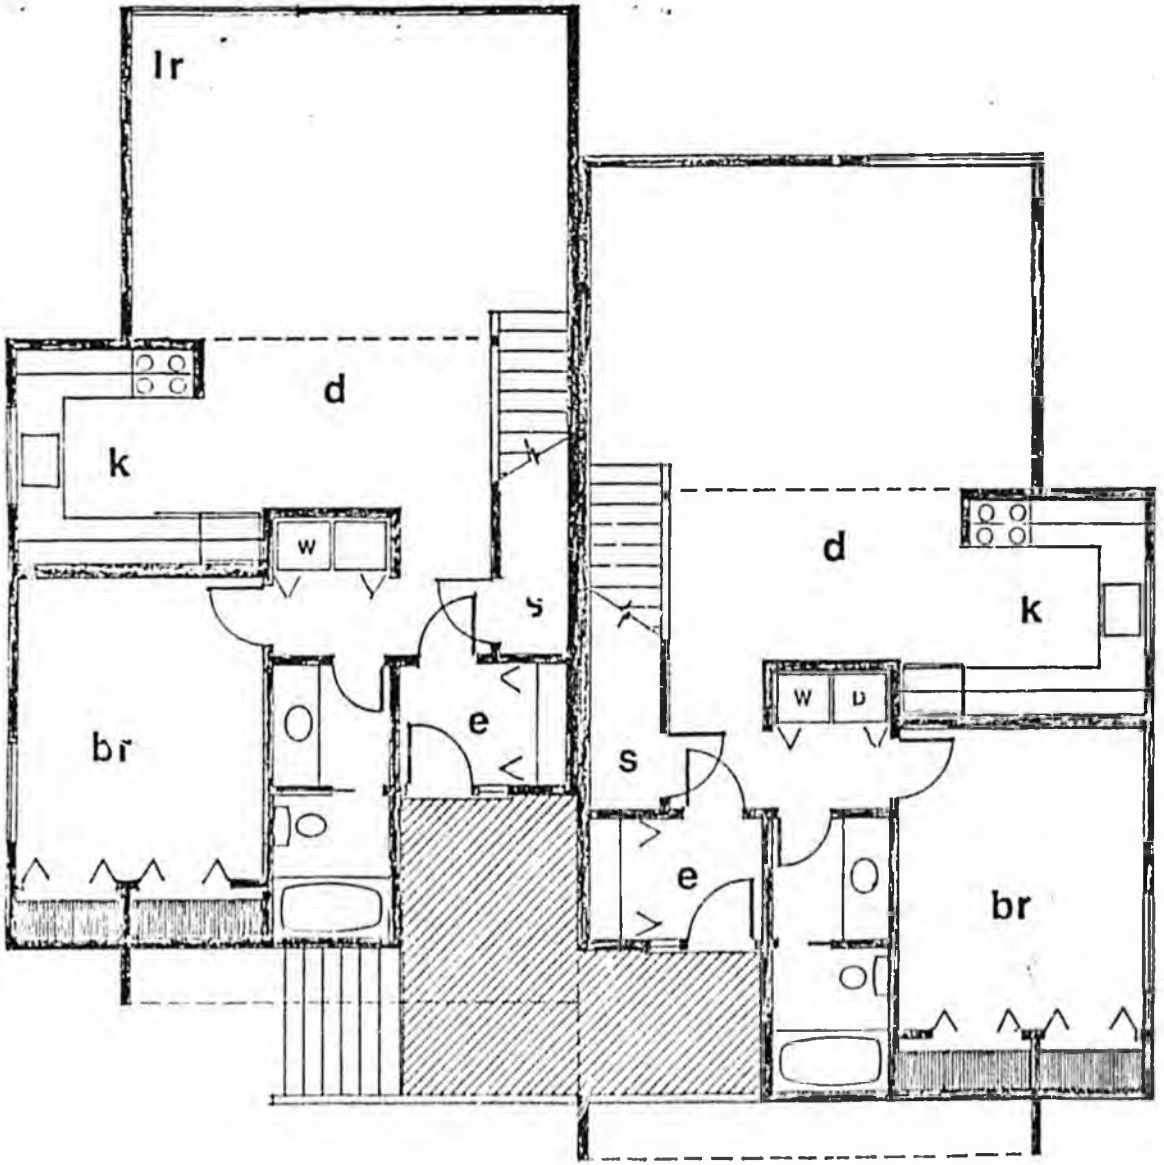
were available. It is our judgement that constructing of University-owned and maintained housing on the campus in Bethel is the most effective method of providing the residential and learning environment desired by students and parents of this region.



The proposal to build student housing on the College campus has received broad support throughout the Delta.

The forecasted growth for student housing is based on the 1982 census data for the Bethel, area. The report indicates the 1982 population of 3536 people will grow to 5579. Based on the research by the Community College staff, it is our recommendation that student housing be provided for 40-50 students by the fall term of 1984, with an additional facility for 40 to 50 students by 1990.

DUPLEX



PLANNING CONSIDERATIONS

The design concept of the proposed duplex units is to provide student housing by means of 3-bedroom units housing as many as six students per unit or 12 per duplex unit. They are highly efficient in terms of space utilization and provide a study loft overlooking the living room. The ceiling of the living room is vaulted to add more feeling of open space. Standard residential construction adapted to the Kuskokwim delta climate would insure low initial cost. These units would easily adapt to married faculty or student housing as needs changed. The problem of supervision or student advisor would have to be solved as an administrative problem. As in the dormitory proposal, food preparation would be done in the unit but a greater need would result for a future Student Center Facility. This Student Center would provide lounge space for students to mix and socialize as well as other official functions. A small cafeteria or food service program for hot meals and snacks would be a great compliment to this housing program.

CONSTRUCTION CONSIDERATIONS

SITE

The duplex housing has been sited on the Kuskokwim Community College Campus property and located northwest of the existing facilities and west of the future Student Union and future classroom expansion sites.

Site preparation will consist of providing unclassified fill material to raise the building site, road, and parking to divert surface water.

UTILITIES

The above ground Municipal owned and maintained sewage system will be intercepted at the site. Electrical service from City Electric will be served from their system to one weatherhead and meter for each duplex. The transformer, power pole, and secondary wiring from the transformer to the weatherhead will be provided by the Municipal Power. Water will be provided from the 2" water main located at the existing site will be intercepted and routed to each of the duplexes.

FOUNDATION

The buildings will be constructed on wood pilings with freeze back inserts. The estimate is based on setting the piling during the winter of 1983-1984.

Framing

The duplex will be construction with a TJI framing system, with 2"x6" exterior studs, and 2x4 interior studs. The exterior will be type 303 surface T-1-11 plywood siding.

Finishes

R-19 insulation, vapor barrier and 5/8 gypsum board. Roof system will be 12" TJI systems, 1/2" COX 4-ply sheeting with metal roof with R-38 insulation.

Interiors

Interior walls will be 5/8" gypsum board painted except in living room, which will have 1/4" panelling. All floor surfaces will be carpeted except the bathroom and kitchen areas which will be treated with sheet vinyl.

Electrical

Each unit in the duplex will be served from a 100 amp service. All receptacles are added to the study area and kitchen.

Mechanical

A two pump above grade sewage pumping station will be provided for each duplex. The main sewage line was upsized to a 4" pipe and is to be installed at

maximum slope. Each unit in the duplex will be served by an oil fired 50% glycol filled hydronic hot water system. The 1000 gallon fuel tank will be located above grade with an automatic transfer two pump system servicing the boiler.

The single loop hydronic baseboard system will serve each of two zones from a two-pump manifold through line voltage actuated control valves. The domestic hot water will be served from a single oil-fired 80 gallon hot water heater.

Fire Management

Smoke and heat detectors will be connected to the main panel located in Phase III of the main campus. Automatic alarm to 24-hour surveillance.

Appliances

Each unit will be furnished with a clothes washer and dryer, electrical kitchen stove and 18 cubic foot refrigerator.

Furniture

Each unit will be furnished with a living room couch, chairs, table, and table lamp. The bedroom will be furnished with beds and night stand. The study area will be furnished with desks and chairs.

PROJECT BUDGET

DUPLEX - OPERATING COST - VALUE ENGINEERING MODEL

Utilities

Water

The domestic water will be supplied by the Municipality at a 1983 base cost of $12.50 per 1000 gallons. The esculation figure of 6% per year is based on a labor intensive service with system growth funded by non-rate capital .

Annual Consumption 550×10^3

Annual Cost $6,875

Sewage

The sewage will be maintained by the Municipality at a 1983 base cost of $10.00 per 1000 gallons. The esculation figure of 6% per year is based on a labor intensive service with system growth funded by non-rate capital.

Annual Consumption 605×10^3

Annual Cost $6,050

Electricity

The electric power will be supplied by City Electric at a 1983 base cost as follows:

KWH	$
1-5	.216
51-450	.163
451-2500	.145
2501-22,000	.135
22,001-25,000	.130

The escalation figure of 10% per year is based on a fossil fuel energy system with comparative high labor cost.

Water Consumption

	Gal/Day/Student	Student	Total
Sink	4	12	48
Water Closet	9	12	108
Shower	16	12	184
Kitchen	6	12	72
Washing Machine	8	12	96
	TOTAL GALLONS PER DAY		508

508 gals/day x 30 days/month x 9 months per yr.

137,160 gals/yr

4 duplex units 548,640 gals/yr

550×10^3

Base 12.50/1000 gal x 550×10^3 = $6875/year

Sewage Consumption

Water Consumption plus 10%

605×10^3 gal x $10.00/1000 gal = $6050/year

ENERGY CONSUMPTION:

Degree day method was used in calculating the probable energy consumption for one duplex unit. The total amount of energy for the duplex units was derived by multiplying the units. The analysis procedure disregarded the change in the orientation angle.

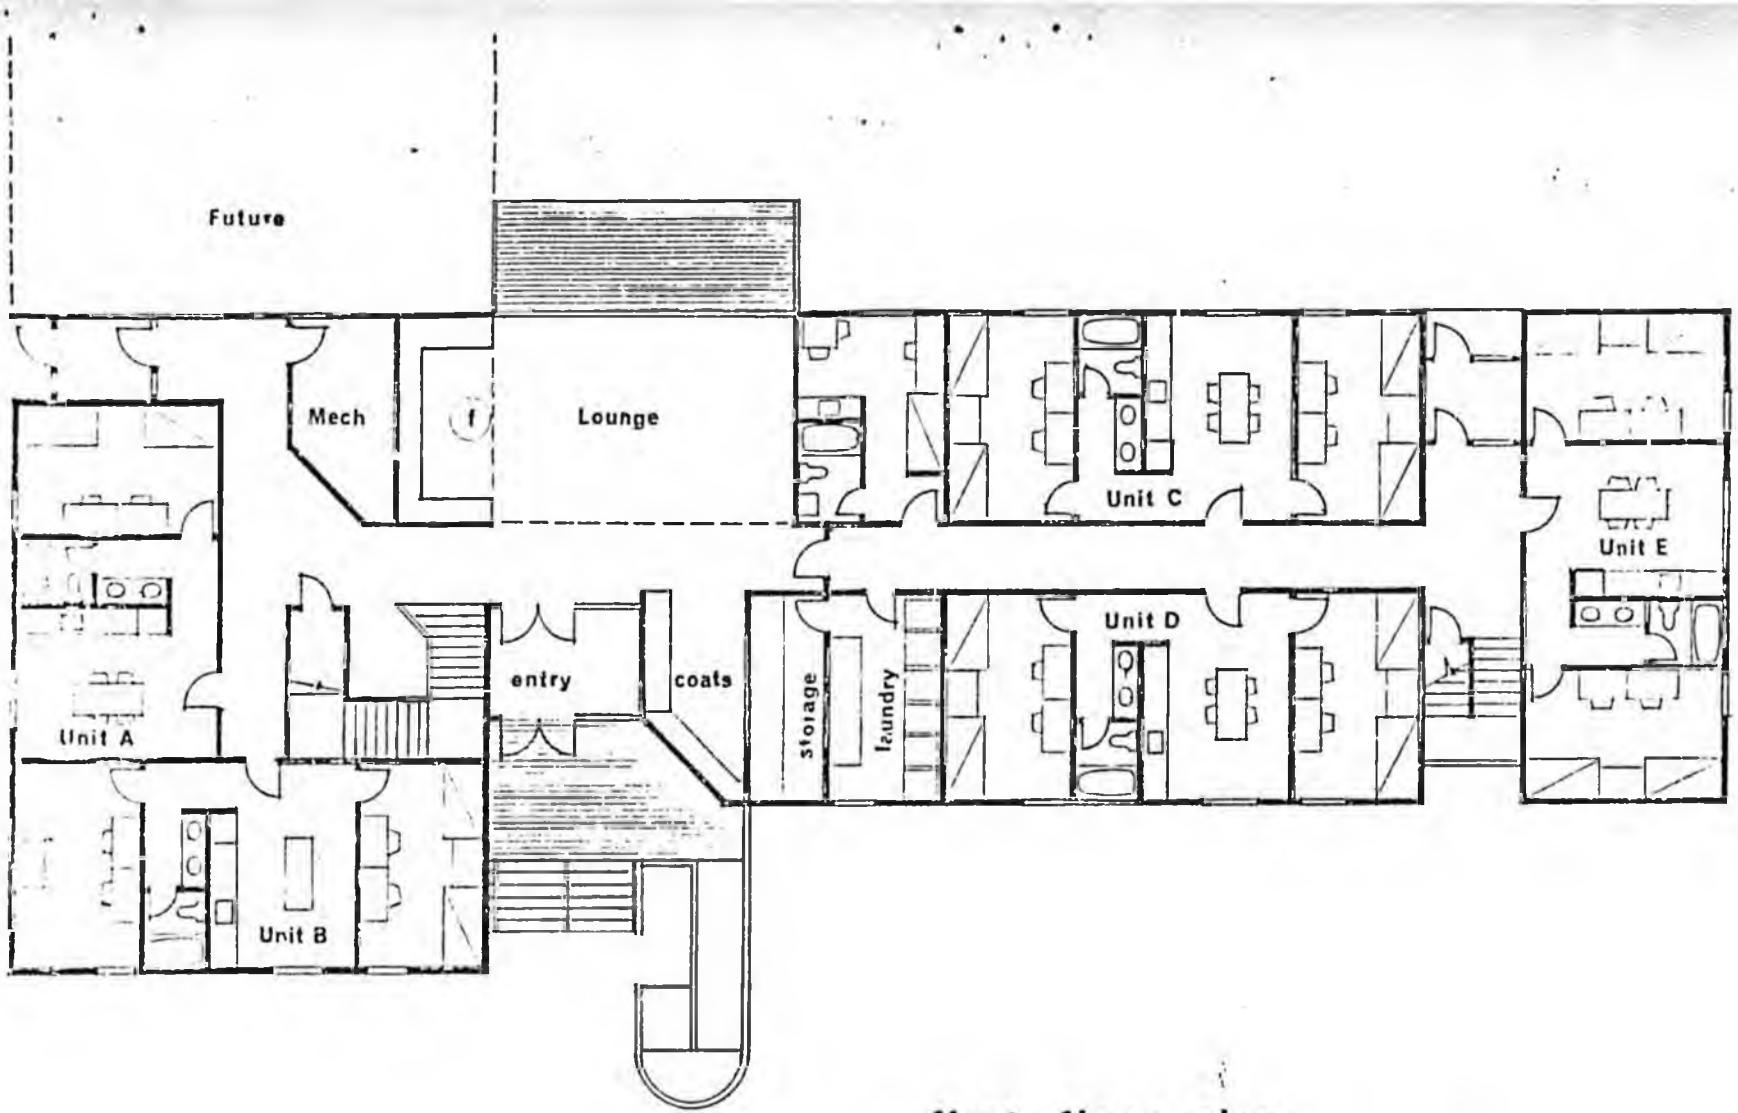
DORMITORY



PLANNING CONSIDERATIONS

In an attempt to produce a design concept that is both energy efficient, attractive, in symphony with the existing community college buildings, and yet residential in character and scale, the dormitory has taken the following form. The basic living component or unit is roughly 16' x 38' and is divided into two sleeping/study rooms each housing two students per room. These four students share a bathroom with 2 lavatories each, a pullman kitchen (11' in length) and an eating space. There would be a central lounge area with books, T.V., and fireplace on the first floor. A laundry room and storage room would be shared by all students. There would be an advisor on each floor to assist in maintaining an orderly life style and sufficient opportunity for the development of academic growth. Although the initial program does exclude married students, it would be easily possible to convert the basic unit to a comfortable one bedroom apartment with 608 sq. ft. by eliminating one interior partition. The dormitory is designed to allow future expansion.

OCTOBER 1968

CONSTRUCTION CONSIDERATIONS

SITE

The dormitory housing has been sited on the Kuskokwim Community College Campus property and located northwest of the existing facilities and west of the future classroom expansion sites.

Site preparation will consist of providing unclassified fill material to raise the building site, road, and parking to divert surface water.

UTILITIES

The above ground Municipal-owned and maintained sewage system will be intercepted at the site. Electrical service from City Electric will be served from their system through one meter. The transformer, power pole, and secondary wiring from the transformer to the weatherhead will be provided by the Municipal Power. Water will be provided from a new 6" water main to serve the domestic water and sprinkler system.

FOUNDATION

The buildings will be constructed on wood pilings with freeze back inserts. The estimate is based on setting the piling during the winter of 1983-1984.

The single loop hydronic baseboard system will serve each of two zones from a two-pump manifold through line voltage actuated control valves. The domestic hot water will be served from a single oil-fired 80 gallon hot water heater.

Fire Management

Smoke and heat detectors will be connected to the main panel located in Phase III of the main campus. Automatic alarm to 24-hour surveillance. A complete sprinkler system will be provided.

Appliances

Each unit will be furnished with a clothes washer and dryer, electrical kitchen stove and 18 cubic foot refrigerator.

Furniture

Each unit will be furnished with a living room couch, chairs, table, and table lamp. The bedroom will be furnished with beds and night stand. The study area will be furnished with desks and chairs.

Framing

The dormitory will be a construction with a TJI framing system, with 2"x6" exterior studs, and 2x4 interior studs. The exterior will be cedar siding.

Finishes

R-19 insulation, vapor barrier and 5/8 gypsum board. Roof system will be 12" TJI systems, 1/2" COX 4-ply sheeting with metal roof with R-38 insulation.

Interiors

Interior walls will be 5/8" gypsum board painted except in living room, which will have 1/4" panelling. All floor surfaces will be carpeted except the bathroom and kitchen areas which will be treated with sheet vinyl.

Electrical

The dormitory will be served from a 400 amp 120/240 volt single phase service.

Mechanical

A two pump above grade sewage pumping station will be provided for each duplex. The main sewage line was upsized to compensate for deviations from changes in the piling system. The dormitory will

be served by an oil fired 50% glycol filled hydronic hot water system. The 1000 gallon fuel tank will be located above grade with an automatic transfer two pump system servicing the boiler.

DORMITORY HOUSING - PROJECT BUDGET

Project Costs:

Description	Cost	Man Days
General Conditions	175,857.00

DORMITORY - OPERATING COST

Utilities

Water

The domestic water will be supplied by the Municipality at a 1983 base cost of $12.50 per 1000 gallons. The esculation figure of 6% per year is based on a labor intensive service with system growth funded by non-rate capital .

Annual Consumption 464×10^3

Annual Cost $5,800

Sewage

The sewage will be maintained by the Municipality at a 1983 base cost of $10.00 per 1000 gallons. The esculation figure of 6% per year is based on a labor intensive service with system growth funded by non-rate capital.

Annual Consumption 510×10^3

Annual Cost $5,100

Electricity

The electric power will be supplied by City Electric at a 1983 base cost as follows:

KWH	$
1-5	.216
51-450	.163
451-2500	.145
2501-22,000	.135
22,001-25,000	.130

The escalation figure of 10% per year is based on a fossil fuel energy system with comparative high labor cost.

Water Consumption

	Gal/Day/Student	Student	Total
Sink	4	40	160
Water Closet	9	40	360
Shower	16	40	640
Kitchen	6	40	240
Washing Machine	8	40	320
	TOTAL GALLONS PER DAY		1720

1720 gals/day x 30 days/month x 9 months per yr.

464,400 gals/yr

464×10^3

Base 12.50/1000 gal x 464×10^3 = $5800/year

Sewage Consumption

Water Consumption plus 10%

510×10^3 gal x $10.00/1000 gal = $5100/year

Dryer	4	96.00	2248	5
		$717.00	$20128	

Cost of Capital @ 6%

MECHANICAL MAINTENANCE:

Mechanical maintenance costs are based on emergency maintenance of plumbing equipment and preventative and emergency maintenance of hot water heater and boiler.

Plumbing - Based on 4 service calls per year

1.5 hours per call

$26.99 x 1.5 x 4 x 1.25= $202.00

Material = 200.00

$402.00

Boiler Maintenance:

Boiler maintenance is based on a preventative maintenance inspection during the last week of August and the second week of March and emergency maintenance.

The assigned tasks are detailed in the appendix.

Preventative Maintenance Craft Hours - 4 hrs.

Rate - $26.99

26.99 x 4 x 2 x 1.25= $269.90

Material = 100.00

Emergency Calls (1 @ 2 hrs.) = 67.50

$487.40

ELECTRICAL MAINTENANCE:

Annual maintenance is based on replacing electrical circuit components and fire management control repairs. It is invisioned a licenced electrician will be called four times a year and spend 1.5 hours per call. The electrician rate is based on Davis-Biggs requirement plus overhead and profit at 25%.

Rate:

29.30 x 1.25= $36.62 x 6 hours= 219.75

OIL FIRED HOT WATER HEATER:

Hot water maintenance is based on preventative maintenance inspections made twice a year and one emergency repair call. Detailed maintenance task in appendix.

Preventative Maintenance 3 hours

$26.99/hr x 1 x 3 x 1.25= $101.22

Material = 30.00

$131.22

HOT WATER CONSUMPTION

PREVENTATIVE MAINTENANCE TASKS:

Oil-Fired Hot Water Heater

Item	Description of Work	Est. Craft Hours
1	Check for water leaks to tank and piping. Check for fuel system leaks.	.063
2	Adjust pilot fire on oil burner.	.209
3	Check pilot on oil burner. Adjust if required	.056
4	Adjust oil burner flame.	.206
5	Check oil burner flame. Adjust if required.	.123
6	Check operation and condition of relief valve.	.008
7	Check automatic controls for proper operation (temperature regulators, thermostatic devices, automatic fuel shut off valve, etc.).	.042
8	Check fuel strainer element on oil burner.	.052
9	Check fuel level in tank. Check tank, fill pipe and fuel lines and connections for damage.	.017
10	Inspect, clean, and adjust electrodes and nozzles on oil burners. Inspect fire box and flame detection scanner.	.194
11	Check electrical wiring for fraying and loose connections on oil burner.	.051
12	Check for proper water temperature setting. Adjust as required.	.002
13	Clean fire box.	.444
14	Check for proper draft adjustment. Adjust draft meter if necessary.	.004

PREVENTATIVE MAINTENANCE TASKS:

Oil-Fired Hot Water Heater

Item	Description of Work	Est. Craft Hours
15	Check condition of flue pipe, damper, and chimney.	.113
16	Drain and flush tank (average 75 gal.)	1.013
17	Clean up area around unit.	.051
18	Check operation and condition of safety pressure relief valve.	.083
19	Check operation of boiler low-water cut-off devices (per device).	.043
20	Check pressure gauges	.064
21	Inspect and clean water column sight glass (or replace).	.102
22	Clean fire side of water jacket boiler	.333
23	Perform exterior inspection on water tube boiler. Includes foundation, doors, lagging, leakages, and area.	.546
24	Check and operate fuel oil	.25
25	Lubercate, check and operate glycol hot water pump.	.045
26	Test Ph factor and specific.	.50
27	Gravity of glycol air bleed hydronic system.	.25
28	Fill out maintenance reports.	.017

PREVENTATIVE MAINTENANCE TASKS:

Oil-Fired Hydronic Low Pressure Boiler

Item	Description of Work	Est. Craft Hours
1	Check combustion chamber for air or gas leaks.	.063
2	Inspect and clean oil burner gun and ignition assembly.	.396
3	Inspect fuel system for leaks.	.012
4	Change fuel filter element for oil burning equipment.	.067
5	Check tank fuel level. Check tank, lines, and connections for damage.	.017
6	Check for proper operational response of burner to thermostat controls.	.093
7	Check and lubricate oil burner/blower.	.062
8	Check main flame failure protection, include full cycle operation.	.095
9	Check main flame detection scanner on boiler equipped with spark ignition.	.085
10	Check flame detection scanner (main and pilot) includes full cycle burner check.	.194
11	Check electrical wiring to burner controls and blower.	.057
12	Clean fire box (sweep and vacuum)	.444
13	Check operation of mercury control switches (i.e. steam pressure, hot water temperature limit, atomizing or combustion air proving, etc.)	.084
14	Check condition of flue pipe, damper and exhaust stack.	.113
15	Clean up boiler room (per 100 sq. ft.).	.051

PREVENTATIVE MAINTENANCE TASKS:

Oil-Fired Hydronic Low Pressure Boiler

Item	Description of Work	Est. Craft Hours
16	Check draft diverter and clear openings if clogged (gas burners).	.021
17	Inspect and operate circulating pump.	.025
18	Fill out maintenance record/report.	.017
		1.896 hrs.

February 16, 1983

HESS Committee Letter of Intent

Subject: CSSB 19 (Appropriations to University of Alaska for Student Housing and Land Acquisition)

Mr. President:

Your Committee on Health Education and Social Services has had Senate Bill 19 under consideration, and the Committee recommends that the Bill be replaced by Committee Substitute for Senate Bill 19, and that the Committee Substitute (CSSB 19) do pass.

The HESS Committee intends to reflect, through CSSB 19, a commitment that student housing on the Anchorage, Fairbanks, Juneau and Kenai campuses will be provided as expeditiously and cost-effectively as possible.

CSSB 19 contemplates that the University will expedite housing construction. Because architectural and engineering work for the Fairbanks (College) campus has been performed, actual construction at that location could begin during the 1983 construction season.

On the other campuses mentioned, architectural and engineering work is required to be done. Funds for that purpose are made available in CSSB 19. In addition, however, appropriations are also provided for construction at Anchorage, Juneau, and Kenai with an appropriation effective date of May 1, 1984. In this way, we avoid having to legislate for student housing appropriations in two separate measures and we stress our commitment to this program.

The May 1, 1984 appropriation effective date has another purpose. It permits the University to analyze, and to report to the second session of the Thirteenth Legislature in January, 1984 with respect to, the possibility of other funding options for student housing construction. For example, some mixture of revenue bonds, appropriations from the general fund, and private sector investment, might be appropriate in one or more of these cases and might provide student housing at housing rates affordable to Alaska students. If those possibilities can be demonstrated to exist, the second session of the Thirteenth Legislature could make necessary adjustments. If not, the appropriations for housing construction at Anchorage, Juneau and Kenai would be in place without the necessity of additional action by the Legislature.

Joseph P. Josephson

COMMITTEE REPORT

SENATE

1/18/83

FURTHER: FINANCE

Date: 16 Feb, 1983

Mr. President:

The Committee on HEALTH, ED. & SOC. SERV has had SENATE BILL NO. 19

An Act making appropriations to the University of Alaska for construction of dormitory complexes: eff. date.

under consideration and (a majority of the committee) (the committee) reports it back with the following recommendations:

[ ] do pass [ ] do not pass

[ ] do pass with attached amendments(s)

[X] replace with CS for SB 19 (HESS) with [ ] same title [X] new title

and recommends may do pass

[X] AND with attaches a "Letter of Intent" [ ] New Fiscal Note

[ ] reports it back without recommendation

[ ] referred to the _____ Committee

MEMBERS SIGNING DO PASS

V. J. Kerttula

H Ragnar Moe

Rick Halford

MEMBERS HAVING OTHER RECOMMENDATIONS:

Joe P. Josephson do pass
CHAIRMAN

* Note all figures are in thousands.

Statewide Budget Office
September 30, 1982

84-1 MASTER PLANNING AND NEEDS ASSESSMENT $ 4,060.0

Each year the University receives many questions concerning the eventual developmental plans for a campus. There is need for a substantial amount of funds to perform the long-range campus development plans, especially in response to a detailed needs assessment for each location. The campus development plans and needs assessment processes must be under the control of the University architect and must be performed in a rigorous manner. This is the highest priority of the University of Alaska system.

84-2 UA/FAIRBANKS MAJOR REPAIRS AND RENOVATION $ 4,000.0

The dormitories located at the University of Alaska Fairbanks campus, after several years of insufficient maintenance funds, are in need of substantial repairs and renovations. These renovations include upgrading heating systems, replacement and upgrade of kitchen equipment, renovation of student rooms, replacement of dormitory room doors, conversion of storage space to laundry rooms, and upgrade a variety of apartment furnishings.

84-3 GENERAL REPAIR AND RENOVATION $ 11,667.3

The University has historically been underfunded in terms of receiving funds to maintain current physical plant. All units of the University have a substantial need for funds to repair facilities to protect the buildings from the weather,

improve the efficiency of the energy systems, and renovate existing spaces to make them more usable for current programs. The amount to be allocated to each unit depends on a formula utilizing total square footage available, age of buildings, number of people using the facilities, location, and type of structure.

84-4 UA/FAIRBANKS - ESSENTIAL OBLIGATIONS $ 435.0

This project will provide cathodic protection for the dock at the Seward Marine Education Center. Specifically, the repairs will include the bulk head and cells at the dock approach, west end abutment, southwest corner of the warehouse and the bull rail on the west end of the old rail bulkhead. Without this protection, electrolysis will occur and deteriorate the steel pilings with an ultimate result in the loss of the dock.

84-5 UAJ STUDENT HOUSING $ 13,200.0

This project is for student housing which will provide students with low-cost room and board while attending the University of Alaska, Juneau. The addition of this facility is considered essential by the regional accreditation organization. The proposed building(s) will have a total area of 65,823 square feet and will house 200 single students in dormitory-type buildings which will include common recreational, cafeteria, study room areas, computer room; laundry room and resident manager's quarters. Also included will be housing for 50 married students which will feature individual kitchenettes, common recreational and study room areas, computer room, laundry room, and manager's quarters. Parking

is included in the project. The proposed facility will be a ten minute (appproximate) walk from the Auke Lake Campus.

84-6 UAA CLASSROOM/LABORATORY/OFFICE BUILDING $ 25,300.0

This project will provide a 84,000 square foot facility on the Anchorage campus to provide classsroom, laboratories and faculty offices for expanding enrollments in the College of Arts and Sciences and parking spaces as required by code. An FY82 appropriation for $786,700 was to permit the initial design and engineering for this project.

84-7 UAF STUDENT HOUSING $ 11,000.0

The student housing complex will be designed to accommodate single students and student families. A $500,000 appropriation was received in FY82 for dormitory design (student residencies). The building program will require each living unit to be an apartment which will accommodate four single students or a student family. Approximately eighty living units are planned. Each living unit will have a kitchen, a living room, two bedrooms and one bathroom. The units will be furnished. A central facility for mail, laundry and storage is also planned. There will not be a food service facility. The project will be located in the vicinity of the existing student family housing facilities on the campus. The June 1982 "On-campus student housing market analysis" feasibility study by housing consultant Ira Fink, recommends construction of 175 housing units by UAF. This request for funds in the amount of $11 million is to construct Phase I of a larger total project.

84-8 STATEWIDE SERVICES BUILDING $ 18,800.0

The project will be an office structure of 64,000 gross square feet (50,000 NASF) to house all the University of Alaska Statewide Administrative Service functions, including support spaces, i.e., conference rooms, storage areas, work rooms, computer facilities, etc. required for their functioning. $604,500 was appropriated in FY82 to perform the initial design and engineering work, and this work will be awared this fall.

84-9 UAF CLASSROOM/LABORATORY/OFFICE $ 20,000.0

The purpose of this capital request is to obtain space for research and graduate training at the Fairbanks campus. $500,000 was appropriate in FY82 for the initial planning and design of the facility. Lack of space is now the most restrictive factor on research and student training. This request is for an extension to the (existing) C. T. Elvey Building on the West Ridge of campus. Though an extension to the Geophysical Institute itself is an important aspect, the purpose is to provide for further development of all research undertaken by the University, and to provide for the offices of state and federal government which have close scientific connection with the university. The total gross area for the addition would be approximately 56,200 square feet. The estimated net assignable area would be approximately 35,300 net square feet.

84-10 ESSENTIAL EQUIPMENT $ 3,345.4

UA/Fairbanks requires a substantial infusion of new equipment to accommodate a recurring need as a result of expanded enrollment and technological improvements. This project will purchase shelving fixtures to complete the UAA bookstore facility for full use. Without these funds there would be an inadequate amount of shelving to display items the bookstore is selling. Funds are included to purchase the furnishings necessary to complete the UAA administration/classroom building. The location of this facility was moved due to the wetland issue. This resulted in additional costs and surveys, soil testing, and administrative and expense fees. Without this additional funding, the administration building will not be totally operational. Additional items to be funded include equipment for the UA/Juneau Marine and Technology Center and for Anchorage Community College's Applied Science Building.

84-11 SITE DEVELOPMENT, CAMPUS IMPROVEMENTS, LAND ACQUISITIONS $ 14,320.0

The individual projects included in this category are usually preliminary to building new facilities or funds to improve surrounding areas. Funds are being requested to design the campus at Tanana Valley Community College, purchase land at UA/Anchorage, Northwest Community and Ketchikan Community College, improve pedestrian walkways at Anchorage Community College, a variety of roads and streets and parking improvements in the community college division and grounds improvement and landscaping at UA/Fairbanks.

84-12 ANCHORAGE COMMUNITY COLLEGE CLASSROOM/ADMINISTRATION BUILDING $ 10,600.0

Anchorage Community College requests a new building to replace three temporary, relocatable structures currently housing instructional programs and support services. The current temporary structures are unsafe and have been condemned by the Anchorage Fire Marshal. This building would permit centralization of administration and student service departments. It will also provide space for instructional programs, computer labs and conference rooms. Programs and functions that will be programmed into or accommodated by Phase I are: Home Economics, Computer Assisted Instructional Labs, Chancellor and Deans, Public Affairs, Business, Personnel, Accounting, Payroll, Purchasing and Public Safety.

84-13 UA/ANCHORAGE CAMPUS HOUSING $ 5,000.0

This request will provide campus housing for 100 students. The housing will consist of a series of units within a structure which would provide for single or married students without remodeling construction. The units will have self-contained bath, dining and sleeping areas for a small group or family. Site work will include utilities, roads, walkways, lighting and landscaping. The facilities will be located in the vicinity of an existing shopping center on the south side of the campus. The projected building site is currently owned by Alaska Pacific University and leased for purchase by the University.

84-14 CCREE - SITKA PHASE II $ 6,500.0

This request is for the second building (Phase II) for the Sitka Community College Campus. It will contain vocational shops, general classrooms, offices, storage, and community service rooms. It includes permanent and operational equipment.

84-15 COMMON USE INFORMATION EQUIPMENT $ 3,167.6

Equipment in this category includes such items as computer hardware for the computer network, development of new systems for use by the whole University system, and library books and media equipment at UA/Anchorage and UA/Juneau. This equipment is used by a wide variety of people. The computer equipment in particular needs to be purchased to permit a continued and planned upgrade of the facilities from year-to-year as a result of changing technology.

84-16 EQUIPMENT $ 4,884.1

There is an ongoing need to purchase instructional, research, and direct support equipment throughout the University system. This is all in excess of replacement equipment funds which are normally available in the operating budget. The university has greatly expanded its programs and the amount of equipment purchased has lagged behind. Major upgrades in the area of instructional telecommunications and high technology areas require something more substantial than simple replacement.

84-17 FISHERIES RESEARCH AND INSTRUCTION AT UA/JUNEAU $ 385.0

These funds would be used to complete Phase II of the seawater circulation system at UA/Juneau which would include a permanent pumphouse and reservoirs, supply pumps, filters and headtanks. The seawater system is used for holding marine animals and plants for teaching and research purposes at UA/Juneau. Phase I has already been completed. Additionally, this relatively new program has expanded into the new third floor addition of the Fishery Science Building and the facility needs a variety of equipment to be operational. Some examples of equipment include a freezer/dryer, ultracentrifuge, computer terminals, chromatograph, and aquariums.

84-18 ADMINISTRATIVE EQUIPMENT $ 913.2

Funds are being requested for Statewide Administration to microfilm and store all pertinent design and construction drawings for all University facilities. This would permit better recordkeeping and be a more secure way of keeping track of our facilities. Funds are also being requested for UA/Anchorage to purchase physical plant equipment for snow removal, general maintenance, ground maintenance, and equipment for the maintenance shop. Additional equipment including word processors and computer terminals are also needed.

ENERGY CONSERVATION $ 2,395.5

The UA/Fairbanks coal handling facility project would improve the efficiency of handling 75,000 tons of coal per year at the UA/Fairbanks heating plant. The proposal is for building a heated enclosure large enough to hold ten railroad cars of coal. The structure would be designed so that coal can be thawed from waste heat from the power plant which would result in more efficient burning of the coal in the furnaces. At present, up to five men must be utilized to help with coal handling. This structure would permit the reduction to one or two persons. UA/Anchorage building modifications for energy and safety is being requested for the modification of the energy modules to heat supply and combustion air when the ambient condition is below freezing. Funding for a building automation system for the UAA/ACC campus is also requested. This system would permit monitoring of campus energy utilities and energy user systems in each facility. Control would be provided for each of the fire zones in each campus facility.

10—90. [Repealed]

Secs. 37.30.010 — 37.30.090.
Repealed by § 1 ch 118 SLA 1972.

Editor's note. — The repealed article derived from § 1, ch. 117, SLA 1964; § 1, ch. 189, SLA 1970.

Article 2. Restrictions on Sale of Bonds and Bond Anticipation Notes.

Section
100. Prohibited bidding on bonds

Sec. 37.30.100. Prohibited bidding on bonds. (a) No person who provides financial programming or marketing assistance to a political subdivision of the state, whether home rule or otherwise, in connection with the issuance or sale of general obligation bonds, revenue bonds or bond anticipation notes of the political subdivision may bid on the bonds or notes if offered at public sale, or negotiate for their purchase if sold at private sale.

(b) The sale of general obligation, revenue bonds or bond anticipation notes of a political subdivision to a person prohibited from bidding on, or negotiating for the sale of bonds or notes under (a) of this section is against public policy and the sale is void.

(c) In this section "person" means an individual, firm, agent, factor, intermediary, partnership, corporation, association, bond house, stockbroker or bond broker. (§ 2 ch 102 SLA 1974)

Prepared March 9, 1983

Senator Faiks

SB 19 began as a $30 million dollar appropriation for construction of UAA dormitory complexes at Anchorage and Fairbanks.

There is a HESS committee substitute and Letter of Intent. The substitute raises the appropriation to $53,250,000, and expands the bill to include a land purchase in Anchorage, construction money for student housing for Fairbanks, and planning and construction money for student housing in Anchorage, Juneau, and Kenai. The construction appropriations for Anchorage, Kenai and Juneau have an effective date of May 1, 1984. In this way, the necessity of legislating for student housing appropriations in two separate measures is avoided, and commitment to the program is stressed.

The Letter of Intent explains that the effective date of May 1, 1984 for construction funds also allows time for other means of funding to be explored, such as a mixture of revenue bonds, private sector investment and general fund monies. If those possibilities exist, adjustments can be made in the second session of the legislature; if they do not exist, the money is in place for construction.

Section 1: Land Purchase

It is suggested that a Finance Committee substitute be adopted incorporating the following wording:

" The sum of $9,900,000 is appropriated from the general fund to the University of Alaska for acquisition of approximately 40 acres of land from Alaska Pacific University under an option to purchase agreement executed in June, 1982."

The change in wording of this section is to further define the land purchase.

In 1982, an option to purchase approximately 40 acres of APU land for 10.9 million dollars was negotiated. The option to purchase cost one million dollars per year for three years. The cost of the option reduces the purchase price of the land. The previous legislature appropriated 1 million dollars for the option with the hope and expectation that this year sufficient funds for the complete purchase might be appropriated. Section 1 of the bill does just that.

Section 2 and Section 6: Anchorage

Appropriates 1 million for planning, including preparation of engineering plans, and $10 million for construction of student housing at UAA and ACC in Anchorage. The housing will be built on land purchased by Section 1.

In 1974, ASHA did a study and estimated housing requirements for students in Anchorage would reach 800-1200 students by the early 1980's. In 1981, a pre-registration sample at UAA indicated a need for housing for 410 students. ACC's enrollment is three times that of the University, but has a smaller percentage of students who desire housing. The University feels that the 800+ number estimated by ASHA is valid.

The University Office of Facilities Planning Construction in Fairbanks has determined, based on other construction and cost per square foot formulas, that the Anchorage housing will cost $10 million to build. Pre-planning, soils work and architectural work generally runs 10% to 20% of the construction cost.

Planning and actual site work can begin immediately, and some housing can be completed in time for occupancy by September, 1984.

About 800 students can be housed in this facility. Each individual unit will have self-contained bath, dining and sleeping areas for a small group or family. There will be no common food service - it is felt to be a greater economy to provide cooking facilities in the individual

units, or let students purchase meal tickets [illegible]

It is hoped that fees can be established that will cover the maintenance costs, so that the housing is self-sustaining once it is built.

(Information furnished by Lee Piccard, Vice Chancellor of Campus Affairs, 786-1588).

Section 3: Fairbanks

Appropriates $11 million for housing construction at UAA in Fairbanks.

Design and engineering work is done, but a portion of the architectural and administrative costs are not paid. $8.8 million will be used for actual construction, the rest for administration, fees, furnishings, art and miscellaneous expenses for the project.

This phase of construction will contain 61 units of two bedroom apartments, housing four students each; the total facility will house 254 students. Market survey feasibility studies done in 1982 indicate a demand for 175 units.

Fairbanks projected rent charge is $150 per student per month for housing. It is hoped this will cover operation and maintenance so that the housing is self-sustaining.

(Information provided by Jerry Neubert, Office of Facilities, Planning and Construction, 474-7591).

Section 4 and Section 7: Juneau

Appropriates $1 million for planning and $13.2 million for construction of housing at UAA Juneau.

Several studies have been done over the past years to determine the need for student housing in Juneau. In 1981, the Student Housing Committee of UAJ conducted a survey among high school students in

Southeast Alaska. This survey indicated a need for housing for approx. 750 students over the next few years. This funding will provide housing for the first phase of 250 students. The need for housing will be reconfirmed out of money appropriated for planning. An official study will be done out of the $1 million dollar planning appropriation.

The City and Borough of Juneau has agreed to donate the land to the University for the student housing. The University does not at this time hold title to the land, but the mechanics to accomplish this is in process.

The proposed building will either be a dormitory-type building which will include common recreational, cafeteria, study room areas, computer room, laundry room and resident manager's quarters, or individual units like those planned in Anchorage and Fairbanks, or a combination of the two plans.

No rent charges have been established as yet.

(Information provided by Gerry Neubert, Office of Facilities, Planning and Construction, UAA, 474-7591).

Section 5 and Section 8: Kenai

Appropriates $650,000 for planning and 6½ million for construction of student housing at Kenai Community College.

A study conducted in 1981 by John Williams of the Kenai Faculty indicated a need for housing 156 students. By the fall of 1984 there is a projected need for housing for 238 students. No additional growth factor was added for the additional student body expected to occupy the new Vocational Training Center so the housing need figure is considered to be conservative.

The bond package that was vetoed by the Governor in 1982 contained a section for an appropriation to the Kenai Peninsula Community College for $580,000 for engineering and architectural design of student

housing. This is apparently the basis for the $650,000 request of this year, with an inflation factor, and projects out to $6,500,000 for the construction phase.

There is sufficient land available on the campus to accomodate the proposed housing.

Section 9:

Money for the land purchase in Anchorage lapses into the general fund July 1, 1984.

Section 10:

Appropriations 2-8 are for capital projects and subject to AS 37.25.020.

Section 11:

Appropriations for the land purchase, planning at Anchorage, Juneau and Kenai and construction at Fairbanks take effect immediately.

Section 12:

Construction appropriations for Anchorage, Juneau and Kenai take effect May 1, 1984.

EXCLUSIVE OPTION TO PURCHASE REAL PROPERTY

THIS AGREEMENT is made and entered into this 17th day of June, 1982, by and between Alaska Pacific University, an Alaska non-profit corporation (hereinafter referred to as "Optionor") whose address of record is President's Office, Alaska Pacific University, E. Wesley Drive, Anchorage, Alaska 99504, and the University of Alaska, a constitutional corporation (hereinafter referred to as "Optionee") whose address of record is President's Office, University of Alaska, 101 Bunnell Building, 303 Tanana Drive, Fairbanks, Alaska 99701.

WHEREAS, the parties were unsuccessful in their attempts to secure $10,900,000 from the 1982 Legislature to effect an immediate sale of the following described real property, and

WHEREAS, the parties believe it is to their mutual advantage to secure the Optionee's right to purchase that property at a given price within a time certain in the future;

NOW, THEREFORE, the parties mutually agree as follows:

1. Exclusive Option to Purchase

Subject to the terms and conditions contained herein, Optionor grants Optionee an exclusive option to purchase that certain real property (hereinafter referred to as "Property") described as follows:

> A portion of Section 28, Township 13 North, Range 3 West, Seward Meridian, Alaska, more particularly described as follows:
>
> That portion of the Northeast quarter of the Southeast quarter and the Southeast quarter of the Northeast quarter of Section 28 lying west

9/28/82 XC CHRIS ATTY

of Bragaw Street centerline and south of University Avenue centerline containing approximately 40 acres.

2. Term

The term of this agreement shall be two (2) years and one (1) month, commencing on July 1, 1982, and terminating on July 31, 1984. Optionee, in its sole discretion, has the right (but no obligation) to purchase the Property in accordance with the terms and conditions stated hereafter at any time during the term of this agreement.

3. Consideration

Optionee shall pay to Optionor the sum of One Million Dollars ($1,000,000) for the first year and an additional sum of One Million Dollars ($1,000,000) for the succeeding thirteen months, as good and valuable consideration for this exclusive option. Payment in full for the first year shall be due and payable upon execution and delivery of this agreement. Payment in full for the succeeding thirteen months shall be due and payable on or about July 1, 1983, but in no event later than July 31, 1983. The total amount of consideration paid shall be deducted from the purchase price if the option is exercised.

4. Purchase Price

The purchase price of the Property shall be Ten Million Nine Hundred Thousand Dollars ($10,900,000).

5. Eminent Domain

In the event any part of the Property is condemned by a public entity in the lawful exercise of its power of eminent domain,

the purchase price shall be reduced pro tanto by the total amount of compensation paid to Optionor for the property taken.

6. Exercise of Option

Optionee shall exercise its exclusive option by giving written notice of its intent to do so not less than ten (10) days prior to the proposed closing date. At the time of closing, Optionee shall deliver to Optionor a sum of money equal to the purchase price, less any prior remittances of consideration (including option payments and compensation paid for takings, if any, by way of eminent domain). At the time of closing, Optionor shall deliver to Optionee a recordable statutory warranty deed conveying fee title to the Property.

7. Title Conveyed

(a) Title to the Property will be conveyed subject to the following matters or encumbrances:

(1) Reservations, exceptions and conditions in U.S. Patent(s);

(2) Easements and permits of record, including but not limited to telephone, natural gas pipeline, water, sewer, drainage and gas;

(3) Agreement dated March 21, 1979, between the U.S. Department of Interior ("BLM") and Alaska Pacific University, recorded March 29, 1979, in Volume 389 at Page 768;

(4) Contemplated realignment of the South Fork of Chester Creek pursuant to a plan approved by the Army Corps of Engineers with the realigned creek running or passing through the southeasterly corner or segment of the Property.

(b) In the event Optionor is unable to convey title to the Property to Optionee at the closing, in accordance with

this agreement, Optionor may adjourn the closing for up to 180 days during which time Optionor will use its best efforts to cure any and all title or other defects; provided, however, Optionee may accept such title as Optionor is able to convey, without any claim by Optionee for abatement of the purchase price.

(c) If the closing is adjourned pursuant to subsection (b, and the Optionor at the end of such 180 day period is still unable to convey title as contemplated herein, (i) the Optionor shall refund to the Optionee all option payments made hereunder, (ii) this option agreement shall terminate forthwith, and (iii) neither party shall have any further rights or obligations of any kind under this agreement.

8. Closing in Escrow

Either party has the right, on five (5) days' notice to the other party, to close this sale through an escrow with the Alaska Title Guaranty Co., in accordance with the usual form of deed and money escrow agreement then in use by that company.

9. Closing Costs

The costs of closing shall be borne by the party incurring them, except that Optionor expressly assumes the cost of document preparation.

10. Failure to Remit Consideration; Failure to Exercise Option

In the event that Optionee fails to timely remit payment of any consideration due or to timely exercise its exclusive option, then this agreement shall terminate forthwith and neither party shall have any further rights or obligations of any kind under this agreement.

11. General Conditions

Recording--Either party has the right to record this agreement.

Amendments--This agreement sets forth the entire agreement and understanding between the parties and may not be modified except by a writing signed by both parties hereto.

Successors in Interest--The terms, covenants, and conditions contained herein shall be binding upon and inure to the benefit of the parties' heirs, successors, and assigns.

Representation as to Authority--Each party represents and warrants that it has the authority to enter into this agreement and that the persons signing for each are expressly authorized to do so by their respective governing boards.

Notices--Any notices permitted or required hereunder shall be delivered or mailed postage prepaid with return receipt requested, and delivered or addressed to the following:

PROJECT DESCRIPTION

This will complete the purchase of land from Alaska Pacific University which was initiated July 1, 1982 with a payment of $1,000,000.00. This request is for the balance due July 1, 1983.

This land is adjacent to University of Alaska land and land owned by Providence Hospital. It is bordered to the north by University Drive (UAA border), to the east by Bragaw Street, and to the west by Providence Hospital property.

PROJECT DESCRIPTION

This project will provide funds to complete the planning and design of a total campus facility for Tanana Valley Community College. Planning for the campus was begun in fiscal year 1982 in conjunction with the schematics for the first building funded under a 1978 obligation bond. Of necessity, planning and design for the campus had to be severely limited due to both the intent of the authorization and the amount of funding available. A Users Committee, which was appointed for the planning of a master plan and the Phase I building, and the TVCC Community College Council have endorsed a concept for future campus development which has been approved by the Board of Regents. The Regents have also dedicated a parcel of land to TVCC for use for the campus.

The first building (Phase I) will house Student Services (admissions, records, registration and counseling), Business Services (purchasing, payables, receivables, and personnel) and the Campus President's office. Funding is now needed to complete the planning and design of the remainder of the campus (Phase II and III). These future facilities will house the instructional programs and academic support offices, shops and storage areas, study areas, classrooms and laboratories. The total size of Phase II and III is 140,195 gross square feet.

Tanana Valley Community College does not presently have any physical facilities of its own nor any facilities under its direct control. There is confusion in the service area over where people and programs are located, and there is inconvenience to the students in attending classes and obtaining information. The completion of planning and design for the campus is an important step toward the realization of the goal of providing a totally comprehensive campus and in providing an identity and definite location for the college.

Capital Project Expenditures (Cash Flow)	Total	Budget Year	Budget Year Plus 1	Budget Year Plus 2	Budget Year Plus 3	Budget Year Plus 4	Remaining Cost
Planning and Engineering	1,500.0	1,500.0					
Land							
Construction							
Equipment							
Administration and Other							
Total Annual Expenditure (Capital Cost)	1,500.0	1,500.0					

Project Justification

Tanana Valley Community College, established in July 1974 and having no facilities of its own, utilizes space on the University of Alaska Fairbanks campus for administrative support services, student services, specific instructional activities and programs and for general classroom use. Limited space has also been obtained at the Hutchison Career Center for specific programs and technical support services and other space in the community is leased for program and activity use.

Space for the programs, offices and support services on the Fairbanks campus is at a premium as both TVCC and UAF are experiencing enrollment increases and program expansion. With this expansion and increased enrollment comes the need for additional classrooms, laboratories, storage space and offices. This space is not available for either institution and often overcrowded conditions exist.

As TVCC becomes more comprehensive, enrollment in present programs is expected to increase and requests for additional instructional services will be forthcoming. Planning and design funds for the campus mean a step toward the construction of a total facility which will enable the college to be adaptable and flexible, serving its constituency quickly and effectively.

PROJECT DESCRIPTION

The student housing complex will be designed to accommodate single students and student families. A $500,000 appropriation was received in FY82 for dormitory design (student residences). The building program will require each living unit to be an apartment which will accommodate four single students or a student family. Approximately eighty living units are planned. Each living unit will have a kitchen, a living room, two bedrooms and one bathroom. The units will be furnished. A central facility for mail, laundry and storage is also planned. There will not be a food service facility. The project will be located in the vicinity of the existing student family housing facilities on the campus. The June 1982 "on-campus student housing market analysis" feasibility study recommends construction of 175 housing units by UAF. This request for funds in the amount of $11 million is to construct Phase I of a larger total project.

Total Annual Expenditure (Capital Cost)	11,000.0	640.0	5,270.0	5,090.0			

Project Justification

Project Need:

The University of Alaska, Fairbanks is experiencing a period of substantial full-time enrollment growth and a coincidental housing occupancy increase. In FY82 about 200 residence hall applicants and 100 student family housing applicants cannot be accommodated. It is anticipated that this growth will continue.

The proposed complex will accommodate either or both single students or students with families. The flexibility inherent in the design will permit the University to respond to disproportionate demand by either group. If this proposal is not funded the consequent housing shortage will adversely affect University full-time enrollment. Enrollment growth is currently projected to be at 4.8% annually for the next five years.

Documentation of Estimated Capital Costs:

The costs of the project have been estimated by the Office of Facilities, Planning and Construction and a cost consultant. Included in the estimate are fixtures, furniture and equipment required for occupancy of the facility.

Analysis of Estimated Impact on Operating Expenses:

The operation of the complex will require a $175,000 increase in the housing operating budget derived from program receipts (rent collections). In addition the need for a resident advisor and four student advisors, a total of two, full-time employment positions, will require a $30,000 increase in the Student Affairs operating budget derived from State general funds.

Identification of Alternatives Considered:

The availability of off-campus rental housing facilities in Fairbanks has been examined. A housing office survey of 27 privately operated complexes with a total of 1891 units revealed only 13 vacancies for September 1981. A study conducted by Northwest Pipeline revealed a similar finding.

PROJECT TITLE:

Bid Date: 1983	Budget Request:	FY of Request FY84
Occupancy Date: N/A	General Fund: $	Project Category 5; Site Development
ASF N/A NSF: N/A	Other Fund:	Category Priority
	Total $ 500,000	Campus Priority

Project Description:

CATEGORY 5: LAND ACQUISITION AND SITE DEVELOPMENT

ACCESS ROADS

1. Construct an access road to the Student Housing site.	$ 450,000
CONSTRUCTION TOTAL	450,000
Contingency	50,000
Project Total	$ 500,000

Project Justification:

Sites for student housing are currently not accessible. A student housing facility is being requested under a separate appropriation. Development of new areas of the campus necessitates major investments in the infra-structure which are far beyond costs normally covered by an appropriation for a new building. Constructing access prior to beginning the construction of the housing units is a necessary and logical sequence to avoid further delays in completion of the work.

Engineering and administration for this project will be conducted under a separate appropriation for design of student housing.

PROJECT DESCRIPTION

This project is for student housing which will provide students with low-cost room and board while attending the University of Alaska, Juneau. The proposed building(s) will have a total area of 65,824 sq. ft. and will house 200 single students in a dormitory-type building which will include common recreational, cafeteria, study room areas, computer room, laundry room and resident manager's quarters. Also included will be housing for 50 married students which will feature individual kitchenettes, common recreational and study room areas, computer room, laundry room, and manager's quarters. Parking is also included in the project. The proposed facility will be a 10 minute (approximate) walk from the Auke Lake Campus.

Administration and Other	730.0	400.0	330.0				
Total Annual Expenditure (Capital Cost)	13,200.0	4,350.0	8,850.0				

Project Justification

Affordable housing is essential to UAJ students seeking an education. Results of a national survey reported in The Chronicle of Higher Education (2/9/81) showed that over half of 1980 entering freshmen expected to live in some form of campus housing. UAJ cannot currently fulfill that expectation. The visiting evaluation team of the Northwest Association of Schools and Colleges Commission found the lack of student housing in Juneau serious enough to comment on in their exit interview. The recommendation took this form: "The Committee believes that the current lack of living facilities for students seriously inhibits the realization of the full potential of UAJ. We recommend most urgently that the University press toward the development in Juneau of housing and dining facilities appropriate to its student clientele and in keeping with the unique Southeast Alaska environment." In their official accreditation report, the NWASC further stated, "The University of Alaska, Juneau should take steps to increase the number of full-time resident students." It is essential that UAJ provide low-cost housing to accommodate the needs of the students it is serving, and to help it meet accreditation standards.

Bethel, Alaska 99559

Representative Anthony Vaska
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Tony:

As we have discussed on numerous occasions, student housing is the single most important need at Kuskokwim Community College. The ability of the College to meet the post-secondary educational needs of this region is dependent upon the provision of stable, student housing in Bethel. Your support for our student housing project is greatly appreciated.

Over the past two months I have been working with local contractors and the University's Division of Facilities Planning to develop cost estimates for the proposed housing complex. We are still working with two design concepts: duplexes or a single dormitory building. Our Community College Council will make a final decision on the type of housing desired following further discussion with faculty, students, and community members. In the interim, we have developed cost estimates that would allow for the construction of a single dormitory or duplexes to house approximately 40-45 students. These costs are as follows:

Design planning and engineering	$185,000.00
Construction	1,807,500.00
Equipment and occupancy costs	97,500.00
Construction management costs	110,000.00
TOTAL COST	$2,200,000.00

Life cycle cost information, comparing duplex vs. dormitory construction, is being developed by the Division of Facilities Planning. This information will be used by the College Council in making a final decision on the design of the housing project.

If you have any questions regarding the cost estimates or if you need additional information, please contact me.

Sincerely,

Fred Ali, Campus President

February 2, 1983

Senator John Sackett
Alaska State Legislature
Pouch U
Juneau, Alaska 99811

Dear John:

In January I forwarded a letter to your office outlining preliminary cost estimates for student housing in Bethel. The purpose of this letter is to provide you with additional information on our student housing request.

Kuskokwim Community College has always enrolled students from the villages within its service area. From 1975 to 1980 the College leased an apartment building owned by the Bethel Native Corporation for student housing. A number of problems were associated with this arrangement. The building was not designed as a dormitory and major architectural changes would have been necessary to efficiently house students. Rental costs had escalated to the point where financial aid was not sufficient to cover housing costs. Finally, the building was located some distance from the College making transportation for students difficult, especially in inclement weather. In 1980, therefore, the College cancelled its lease of the building.

There is no doubt that the absence of a student housing facility in Bethel has adversely effected student enrollment. Currently, village students must live with relatives or in boarding homes. Our Student Services Division finds that there are a limited number of acceptable boarding homes in Bethel, approximately 30 to 35. Therefore, full-time student enrollments are restricted by the lack of acceptable housing in Bethel. When the apartment building was being used as a student dormitory, the College enrolled between 70 to 100 full-time students. Currently, full-time student enrollment averages between 40 and 50.

Based on existing instructional and student financial aid resources available to the College and its students, a full-time student population of between 65-70 students appears optimum. The College's student housing proposal envisions construction of a facility that would house between 40-45 students. The balance of the full-time students would either be Bethel residents or continue to live in boarding homes. Discussions with students on campus indicate that a small percentage would prefer to remain in boarding homes even with the availability of University-owned housing.

KUSKOKWIM COMMUNITY COLLEGE
University of Alaska

In addition to allowing the College to increase its full-time enrollment, there are other reasons that support the request for student housing in Bethel. Students living in boarding homes often confront problems that hinder their ability to study and remain in school. Many of the boarding homes are small and a space for quiet study is not available. Meal times and other household schedules and requirements can conflict with the class schedules and needs of the student. Additionally, many boarding homes are some distance from the main campus which makes transportation difficult.

Many parents in the Delta are also reluctant to have their children attend school in Bethel because of student housing problems. Parents would like the College to guarantee that their children will be housed in a comfortable environment where personal security and group discipline are ensured. In public meetings throughout the region, I have repeatedly been told by parents that they would feel comfortable sending their children to college in Bethel if well maintained housing were available. It is our judgement that construction of University-owned and maintained housing on our campus in Bethel is the most effective method of providing the residential and learning environment desired by students and parents of this region.

The proposal to build student housing on the College campus has received broad support throughout the Delta. Enclosed are resolutions and letters of support for student housing received by the College during the past two years. I am also forwarding copies of floor plans developed by the University's Division of Facilities Planning and Construction. As we have discussed, the College is considering two design concepts for student housing: duplexes or a single dormitory building. The drawings outline floor plans for each of these concepts.

As we develop additional information on the student housing proposal, I will forward it to your office. If you have any questions or need specific information, please contact me.

Sincerely,

Fred Ali
Campus President

March 16, 1982

The Honorable Nels Anderson
Senator, State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Senator Anderson:

At its February 8, 1982 City Council meeting, a resolution was passed in support of a college dormitory for the Kuskokwim Community College in Bethel. As Mayor of Bethel, I would encourage your support for this project.

The Kuskokwim Community College has struggled with fluctuating student enrollments for the past several years, due not only to program needs but even more critically, housing. As an observer of this situation over the last several years, I have watched K.C.C. attempt to resolve its housing in several unsuccessful ways. A student dormitory, on campus, appears to be the most viable solution. Students from regional villages need the stability, companionship and continuity that an on-campus dormitory can provide.

Thank you for your continued support,

Sincerely,

John Guinn,
Mayor

TESTIMONY BEFORE THE HOUSE SUBCOMMITTEE ON THE UNIVERSITY BUDGET, FEBRUARY 1, 1983

Good morning Chairman Martin and members of the Subcommittee. My name is Moses Ayagalria. I am a full-time student at Kuskokwim Community College. I have been coming to school here since the Fall Semester. KCC is called a community college but the students here come from 50 villages scattered over 100,000 square miles. We all need suitable housing in order to get a good education. Just like all KCC students, I have been living in a boarding home. To live in a boarding home is no fun. It is no fun because it not only puts a burden on that family, but also on the student. The students suffer countless problems living in a boarding home, some of which are:

*Housing in Bethel is inadequate. Families are large. Even when homes are suitable, there is no privacy.

*The student can't burn midnight oil if he wants.

*Young children in the boarding home are distracting for students doing homework.

*Some boarding homes are a long distance from the College.

*Students miss out on the social benefits of dormitory living.

What I would like to stress is that this institution is growing and is in need of student housing to accommodate that growth. The student housing will give a tremendous amount of encouragement to the students and to the potential students. A college education is becoming very important to young people in this region. However, many parents will not let their children come here to College because of the poor living situations they would encounter. I do not want to make myself too long on this subject lest our true need be obliterated. I only ask that our plea be considered for us and the future generation. Thank you.

Respectfully submitted,

Moses Ayagalria

Dear John:

I am writing to update you on the status of the office building released by the Department of Administration to the Community College.

We have had difficulty in obtaining cost estimates to move the building from its present location at the old PHS Hospital site to the College. The contractors that we have contacted in Bethel have indicated the building is oversized and, therefore, will be costly to move. To date we have not been able to secure detailed cost estimates from the local contractors.

Working with the University's Division of Facilities Planning, we have, however, developed the following estimates to relocate the building to our campus.

Site Work		
Fill with Classified - 900 cu. yd. @ $10/yd.		$ 9,000
Install Freeze Back Piling - 14 @ $1,200 ea.		16,800
Install 12x12 Beams - 4 @ $750 each		3,000
		$ 28,800
Move Building		
Disconnect Utilities -		
Electrical	4 hrs. @ $50/hr.	200
Plumbing (sewage)	8 hrs. @ $60/hr.	480
Plumbing (water)	4 hrs. @ $60/hr.	240
Mechanical (oil)	1 hr. @ $50/hr.	50
		$ 970

Disconnect Sections		
Labor	80 hrs. @ $45/hr.	$ 3,600
Move Sections to Site	1000/Section	5,000
Set Sections on Site	80 hrs. @ $45/hr.	3,600
Rent Crane	80 hrs. @ $100/hr.	8,000
		$ 20,200
Install New Roof		
Labor/Material	2200 SF @ $6/SF	$ 13,500
Mechanical		
Sewage Connection -		
Labor	40 hrs. @ $60/hr.	$ 2,400
Material		2,000
Install Oil Tank		1,000
Water		
Labor	20 hrs. @ $60/hr.	$ 1,200
Trench/Labor/Material	200' @ $12.50/ft.	5,000
Power		
Connect New Service		$ 500
New Ground System		1,000
Exterior Modifications		
Install New Entry	60 hrs. @ $50/hr.	$ 3,000
Install New Ramp	200 SF @ $40/SF	8,000
		$ 11,000
Interior Modifications		
Carpet	2200 SF @ $3.40/SF	$ 7,480
Base	700 LF @ $2/LF	1,400
		$ 8,880
	Sub Total	$ 96,450
	Contingency @ 10%	9,645
	TOTAL	$ 106,095

Sorry for the delay in getting this information to you. Obtaining good cost data has been much more difficult than expected.

If you need additional information, please contact me.

Sincerely,

Fred Ali
Campus President

HESS Committee Letter of Intent

Subject: CSSB 19 (Appropriations to University of Alaska for Student Housing and Land Acquisition)

Mr. President:

Your Committee on Health Education and Social Services has had Senate Bill 19 under consideration, and the Committee recommends that the Bill be replaced by Committee Substitute for Senate Bill 19, and that the Committee Substitute (CSSB 19) do pass.

The HESS Committee intends to reflect, through CSSB 19, a commitment that student housing on the Anchorage, Fairbanks, Juneau and Kenai campuses will be provided as expeditiously and cost-effectively as possible.

CSSB 19 contemplates that the University will expedite housing construction. Because architectural and engineering work for the Fairbanks (College) campus has been performed, actual construction at that location could begin during the 1983 construction season.

On the other campuses mentioned, architectural and engineering work is required to be done. Funds for that purpose are made available in CSSB 19. In addition, however, appropriations are also provided for construction at Anchorage, Juneau, and Kenai with an appropriation effective date of May 1, 1984. In this way, we avoid having to legislate for student housing appropriations in two separate measures and we stress our commitment to this program.

The May 1, 1984 appropriation effective date has another purpose. It permits the University to analyze, and to report to the second session of the Thirteenth Legislature in January, 1984 with respect to, the possibility of other funding options for student housing construction. For example, some mixture of revenue bonds, appropriations from the general fund, and private sector investment, might be appropriate in one or more of these cases and might provide student housing at housing rates affordable to Alaska students. If those possibilities can be demonstrated to exist, the second session of the Thirteenth Legislature could make necessary adjustments. If not, the appropriations for housing construction at Anchorage, Juneau and Kenai would be in place without the necessity of additional action by the Legislature.

MEMORANDUM

To: Senator Joe Josephson
Chairman
Senate HESS Committee

From: Senator Don Orman

Subject: Requested Amendment to SB 19
(U of A Dormitory Complexes, ED)

I am requesting an amendment to SB 19 for design and engineering money for student housing at Kenai Peninsula Community College (KPCC)

KPCC offers many programs which attract students statewide. Research has shown that over 40% of full-time students come from outside the Kenai/Soldotna area. Housing shortages in the area necessitate student housing to become part of the KPCC facilities.

The many attached resolutions show wide support from the large area which KPCC serves. I have also provided the Committee with copies of the housing study prepared in 1981-1982 which resulted in local hearings in which strong support was expressed for this project. These hearings took place January 22, 1982 when the Board of Regents Community College Subcommittee met with the Community College Council, Chancellor Bickerstaff, Dr. Vierro, representatives of Kenai City Council, Soldotna City Council, Kenai Peninsula Borough, and several private businesses and individuals.

was a Third Priority
on crime in 1982 - has
now been taken off list

I would offer the following language for:

New Section 3

"The sum of $580,000 is appropriated to the University of Alaska for Kenai Peninsula Community College student housing for engineering and architectural design."

This language is identical to that in CCSSB 876 which passed both Houses last session. As you will recall, this bill was vetoed by Governor Hammond.

KPCC → 442 average credit hours per full-time faculty → best in the University system

CITY OF SEWARD, ALASKA
RESOLUTION NO. 81- 52

A RESOLUTION OF THE SEWARD CITY COUNCIL,
SUPPORTING ON-CAMPUS HOUSING FOR
KENAI PENINSULA COMMUNITY COLLEGE

WHEREAS, the City of Seward recognizes the contributions toward education that Kenai Peninsula Community College has made, and

WHEREAS, the citizens of Seward from time to time wish to become students at the Kenai Peninsula Community College, and

WHEREAS, the distance from Seward to Kenai Peninsula Community College presents difficulties in attending classes and taking part in the Kenai Peninsula Community College educational process, and

WHEREAS, the Kenai Peninsula Community College has no on-campus housing to provide shelter to those who must come from the outlying areas;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEWARD, ALASKA, that the Council hereby goes on record as supporting the addition of on-campus housing at the Kenai Peninsula Community College campus.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF SEWARD, ALASKA, this 9 day of November, 1981.

I, JoAnne E. Shanley, City Clerk of the City of Seward, Alaska, do hereby certify that this is a true and correct copy of the document as it appears of record in my office.
IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Seal of the City of Seward, Alaska, this 10th day of November, 1981.

RESOLUTION #81-21

A RESOLUTION OF THE CITY OF SELDOVIA SUPPORTING THE ADDITION OF ON-CAMPUS HOUSING AT KENAI PENINSULA COMMUNITY COLLEGE.

WHEREAS, the City of Seldovia recognizes the contributions being made toward the education of its citizens by the Kenai Peninsula Community College, and

WHEREAS, the location of the Kenai Peninsula Community College makes daily access to its facilities impossible for our citizens, and

WHEREAS, the additional cost of securing full-time housing when available for Seldovia citizens to attend Kenai Peninsula Community College works a financial hardship on those citizens, and

WHEREAS, the Kenai Peninsula Community College does not now have on-campus housing to accomodate those citizens wishing to attend Kenai Peninsula Community College,

NOW, THEREFORE, BE IT RESOLVED that the City of Seldovia does go on record as supporting the addition of on-campus housing at the Kenai Peninsula Community College campus.

CITY OF SOLDOTNA

RESOLUTION 81-38

A RESOLUTION BY THE CITY OF SOLDOTNA URGING FUNDING FOR ON-CAMPUS STUDENT HOUSING AT KENAI PENINSULA COMMUNITY COLLEGE IN FISCAL YEAR 1982-83

WHEREAS, Credit hours, courses and student attendance have increased steadily and noticeably at Kenai Peninsula Community College in the last five years, and

WHEREAS, The unique instructional fields of oil petroleum, industry and mining offered at the local community college and an expanding statewide industrial base have comfortably joined to produce a dependable, steady portion of the local institutional growth, and

WHEREAS, more and more students are also electing to spend their first two years of college at the local educational institution, and

WHEREAS, The addition of a new 26,000 square foot Vocational Training Center soon will greatly accelerate student enrollment, and

WHEREAS, Peninsula students would choose to stay on campus instead of traveling endless hours on hazardous Borough roads, and

WHEREAS, A recent Housing Survey (October 1981) has shown an undeniable need for on-campus housing, and

WHEREAS, Tight money and high interest rates in the private sector have discouraged construction of multiunit, low to medium income rentals in the local area, and

WHEREAS, The community College Council is chaired by Hazel Heath and George Day, and the Vocational Advisory Board and the College Council have approved the concept of on-campus housing, now therefore

BE IT RESOLVED THAT the City Council of the City of Soldotna urges the Alaska Legislature to appropriate $5,200,000 in fiscal year 1982-1983 that will fund on-campus Student Dormitory Housing.

BE IT FURTHER RESOLVED THAT The City of Soldotna send copies of this resolution to Mr. Jay Hammond, Governor of the State of Alaska; Dr. Patrick O'Rourke, Chancellor, Community College, Extension and Rural Education; Mr. Edward B. Rasmusson, President, University of Alaska Board of Regents; Mr. Ed Dankworth

and Mr. Don Bennett, Co-chairmen, Finance Committee, Alaska Senate; Mr. Albert Adams, Chairman, Finance Committee, Alaska House of Representatives; Mr. Don Gilman, District 13 Senator, Alaska Senate; Mr. Hugh Malone and Mr. Pat O'Connell, District 13 Representatives, Alaska House of Representatives; and Mrs. Betty Cato, District 5 Representative, Alaska House of Representatives.

RESOLUTION NO. 81-107

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA, EXPRESSING SUPPORT FOR THE KENAI PENINSULA COMMUNITY COLLEGE'S ENDEAVOR TO PROVIDE ON CAMPUS LOW-COST HOUSING FOR STUDENTS ENROLLED IN THE COLLEGE'S CURRICULUM.

WHEREAS, the Kenai Peninsula Community College has embarked upon a program to increase the number of faculty members to cope with the increased number of students attending the College, and

WHEREAS, increasing numbers of students are in desperate need of low-cost housing to be in economic position to pursue their academic goals, and

WHEREAS, the Kenai Peninsula Community College is a growing economic and academic facility that is extremely beneficial and supportive of local industry and local commercial enterprises and,

WHEREAS, the Board of Regents for the University of Alaska has authorized on-campus housing as one of their priorities for the Kenai Peninsula Community College.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, that said Council is on record in support of the Kenai Peninsula Community College's effort to provide low-cost housing for the students attending the college.

KENAI PENINSULA BOROUGH

RESOLUTION 81-195

DECLARING THE ASSEMBLY'S SUPPORT FOR THE PROVISION OF STUDENT HOUSING FACILITIES ON THE CAMPUS OF THE KENAI PENINSULA COMMUNITY COLLEGE.

WHEREAS, the Assembly and the Borough administration recognize the need for post secondary education on the Kenai Peninsula; and

WHEREAS, the Assembly and the Borough administration also recognize the important educational purpose of the Kenai Peninsula Community College and its important service to all the citizens of the Borough as well as other citizens from around the state and elsewhere; and

WHEREAS, the lack of student housing curtails the opportunities of the college and the student body; and

WHEREAS, the lack of student housing precludes the opportunity of this educational program to persons in remote locations and prevents many students from attending the community college on a full time basis; and

WHEREAS, the Kenai Peninsula Community College has recognized this need and intends to pursue funding and construction of on-campus student housing; and

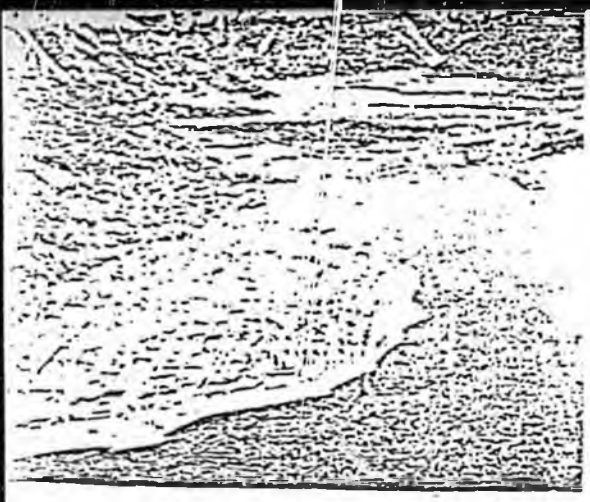
WHEREAS, the Assembly and the Borough administration fully support on-campus student housing at the Kenai Peninsula Community College;

NOW THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

Section 1. That the Borough Assembly and the Borough administration record their support and endorsement for the provision of student housing facilities on the campus of the Kenai Peninsula Community College;

BE IT FURTHER RESOLVED that the Assembly and the Borough administration urge the Twelfth Alaska Legislature, Second Session, to provide funds in the next fiscal year for the provision of on-campus student housing at the Kenai Peninsula Community College.

Section 2. That the Clerk shall serve a copy of this resolution upon the Honorable Jay S. Hammond, Governor of the State of Alaska; upon the Honorable Jalmar Kerttula, President of the State Senate; upon the Honorable Joe L. Hayes, Speaker of the State House; upon the Honorable Donald E. Gilman, State Senator; upon the Honorables Bette Cato, Hugh Malone, and Pat O'Connell, State Representatives.



Section 3. That this resolution takes effect immediately upon its adoption.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH ON THIS 15th DAY OF December, 1981.

RESOLUTION

A RESOLUTION OF THE SEWARD CHAMBER OF COMMERCE, SUPPORTING ON-CAMPUS HOUSING FOR KENAI PENINSULA COMMUNITY COLLEGE

WHEREAS, the Seward Chamber of Commerce recognizes the contributions toward education that Kenai Peninsula Community College has made, and

WHEREAS, the citizens of Seward from time to time wish to become students at the Kenai Peninsula Community College, and

WHEREAS, the distance from Seward to Kenai Peninsula Community Collge presents difficulties in attending classes and taking part in the Kenai Peninsula Community College educational process, and

WHEREAS, the Kenai Peninsula Community College has no on-campus housing to provide shelter to those who must come from the outlying areas;

NOW, THEREFORE, BE IT RESOLVED BY THE SEWARD CHAMBER OF COMMERCE OF SEWARD, ALASKA, that the Chamber hereby goes on record as supporting the addition of on-campus housing at the Kenai Peninsula Community College.

ADOPTED BY SEWARD CHAMBER OF COMMERCE this 16th day of November, 1981.

Brent Whitmore, President
Seward Chamber of Commerce

Homer Chamber of Commerce

November 16, 1981

Members of the Alaska State Legislature
Juneau, Ak. 99801

Sirs:

The Board of Directors of the Homer Chamber of Commerce would like to voice unanimous support for the requested legislative appropriation of $5,200,000 for the construction of housing units for the Kenai Peninsula Community College.

The Kenai Community College serves the Soldotna/Kenai area, the remainder of the Peninsula and many students from other areas of the state and even "outside". Their unique course offering, including instruction in the fields of oil, industry, mining and secretarial sciences attracts students from many geographic locations. As the state's industrial base continues to grow, so to will the Kenai Peninsula Community College.

There are many factors leading to the need for college housing at the facility. There is a housing shortage in the Kenai/Soldotna area. Thus students are often forced to take isolated or sub-standard housing situations. More likely, they are discouraged from even considering attendance due to the problems of finding suitable housing. The housing that is available, because of the shortage, is expensive and this puts an additional burden on the student. There is no public transportation so the students who are able to secure housing must also invest in a car.

Campus housing would alleviate these problems. It would encourage attendance by those who have stayed away because of the housing situation. It would facilitate students from Homer, Anchor Point and other out-lying areas of the Peninsula in obtaining their core education. Dormitory housing on the campus would be of benefit to every peninsula community and many other communities not within our borough. We have reviewed the findings by the College staff and feel that they have proven that the housing would be used to capacity and that it is a needed addition to continue the growth and service of the college.

We urge that the appropriation be passed during the upcoming legislative session.

Sincerely,

HOMER CHAMBER OF COMMERCE

Gil Russell
President

KENAI PENINSULA COMMUNITY COLLEGE COUNCIL
Minutes of January 13, 1983 Meeting

Meeting called to order at 7:05 P.M. by Chairman Heath.

MEMBERS PRESENT: LeRoy Barton, Charlotte Calhoun, John Douglas, George Ford, Hazel Heath, Marion Hylen, Debra Mullins, Jason Roth, Alex Shadura, Donnis Thompson, Walter Ward. Ex-Officio: Les Vierra, Tom Wagoner, Kate O'Dell, Kate Fenton, Bonnie Heimbuch.

MEMBERS ABSENT: Roger Holl. Ex-Officio: Michael Beck, Nancy DuPaul.

GUESTS: Dottie Krzyzanoski, Ethel Clausen, Patricia Morris.

AGENDA: Agenda approved as submitted.

MOTION: By Hylen, seconded by Thompson, passed unanimously.

That the Minutes of the December 9, 1982 meeting be approved as submitted with the correction made under Chairman's Report that she had traveled to Juneau for the Older Alaskans Commission.

REPORTS: Chairman. Read letter received from President Barton concerning his informative meeting with the Council. Reported that KPCC's Homer Branch open house had been successful.

President. Reported that UA has submitted 1984 Budget to the Governor; the February 1 audio conference for defense of Budget; Council members encouraged to attend and speak; Carolyn Cannava from Kenai Peninsula Borough School District (KPBSD) will speak on behalf of KPCC; KPCC starting FY-85 Budget process within next few weeks; projected enrollment for 1992 is 1200 FTES; projections to be mailed to Council as soon as completed; hope to involve everyone who is interested in FY-85 Budget; after prioritization, will be presented to Council for adoption; KPCC has requested continuation budget from KPBSD; student body will be coming to Council for request of increase in student activity fee and student budget, will be presented at next meeting; Chancellor Melican and Vice Chancellor Bomotti will be in attendance at next Council meeting to speak regarding the machinist-millwright instructional position; two proposals received on Student Housing thus far.

Dean, Support Services. Reported that KPCC is in process of doing final spring reconciliation (budget) to determine what our status is; Spring registration duplicated headcount as of January 13 is 2,242

Dean, Academic Affairs. Reported that letter had been sent to Chancellor to eliminate Industrial Electronics degree program; John Rogers hearing scheduled on this campus on February 8; possibility of facility being donated for Homer Branch, is in preliminary talking stage; new facility (Phase V) basically 98% complete and we are utilizing space this semester

MOTION: 83-17

By Barton, seconded by Ward.

Move that the Council concur with the decision to eliminate the Industrial Electronics degree program based on the enrollments presented at this meeting.

MOTION WITHDRAWN.

Suggestions: That this matter be brought before Council at next meeting; that more information on the second year offerings be presented; obtain reaction from industry; advertise more widely for this program.

REPORTS: (CONTINUED)

Dean, Student Services. Reported that Student Body Officers, Dean and President would have audio-conference with Chancellor on January 25 (9:00 A.M.) regarding Student Constitution - Council members encouraged to attend; reported enrollments in Learning Skills Center; 295 state loans awarded as of December 10, 7 of the 42 students who applied for state incentive grants were awarded, 395 KPCC students have applied for state/federal financial aid grants; announced hiring of new personnel: Sharon Williams as Media Services Technician, Dodie Smith as Arm Chair College Facilitator.

Council Members. Thompson requested that there be a presentation of Arm Chair College at future meeting; questioned whether Senator Fischer and Representative Malone had been apprised of happenings at meeting with local legislators. Mullins questioned if we keep Representative Cato informed of KPCC happenings. Calhoun stated that Homer residents are aware that KPCC Homer Branch has moved into new location; questioned if Homer and Seward students charged student activity fee, what would be the benefit, suggested that student newspaper would be one way; suggested that KPCC register the logo as adopted by the Council and if royalities ever received could they be dedicated to scholarship account.

Faculty, Students and Staff. No reports.

Public. No reports.

DISCUSSION:

Community College Council Handbook. The complete handbook is to be handed out at the next meeting. This document will be single spaced and paginated. Questioned how changes in the handbook would be brought about. Suggested that blanket statement regarding Council's acceptance of Board of Regents policies be placed in front of the handbook as well as referrals to BOR policies at appropriate sections. Recommended that personal pronouns reflect both gender. Questioned was whether or not faculty, staff and students can feel free to go to Council members without

permission of College administration, or whether Council members can go directly to faculty, staff and students with concerns.

Advisory Committee Handbook. Concern as to how advisory committees were to bring back information to the Council, Council to receive copies of minutes from all committees. Recommended that information regarding termination of committee members be recommended to the Council be placed in handbook. With consent of Council, this item will be brought back to the Council at their next meeting for approval.

MOTION: 83-18

By Hylen, seconded by Douglas, passed unanimously.

That the Administration present a continuation budget request to the Kenai Peninsula Borough School District to reflect programs related directly to the agreement with the District.

NEXT MEETING: The next meeting of the Council will be held February 10, 1983 at 7:00 P.M. on campus. Chancellor Melican and Vice Chancellor Bomotti will be in attendance.

ADJOURNMENT: Meeting adjourned at 9:45 P.M.

Respectfully submitted,

Gwen Freeman--
Recroding Secretary

Cook

	$30,957,000

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

HOUSE CS FOR CS FOR SENATE BILL NO. 19 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making special appropriations for postsecondary education, capital projects and land acquisition for educational purposes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $9,900,000 is appropriated from the general fund to the University of Alaska for acquisition of approximately 40 acres of land from Alaska Pacific University under an option-to-purchase agreement executed in June 1982 for the Anchorage campus.

* Sec. 2. The sum of $11,000,000 is appropriated from the general fund to the University of Alaska for construction of student housing at the Fairbanks campus.

* Sec. 3. The sum of $500,000 is appropriated from the general fund to the University of Alaska for access acquisition and road construction for student housing at the Juneau campus.

* Sec. 4. The sum of $650,000 is appropriated from the general fund to the University of Alaska for planning, including preparation of engineering plans, for student housing at the Kenai Community College campus.

* Sec. 5. The sum of $2,200,000 is appropriated from the general fund to the University of Alaska for the construction of student housing at the Kuskokwim Community College campus.

* Sec. 6. The sum of $107,000 is appropriated from the general fund to the University of Alaska to be used to move an office building in Bethel to the Kuskokwim Community College campus.

* Sec. 7. The sum of $6,600,000 is appropriated from the general fund

to the Department of Education for payment of a grant to the Northwest Arctic School District for construction of student housing at the Kotzebue Technical Center.

* Sec. 8. The appropriation made by sec. 1 of this Act lapses into the general fund July 1, 1984.

* Sec. 9. The appropriations made by secs. 2 - 7 of this Act are for capital projects and are subject to AS 37.25.020.

HCS CSSB 19 (HESS)

Enrollment

Numbers for credit courses only (toward accredited degree or program).

KPCC Fall '82	Fulltime	329
	Part time	1008
	TOTAL	1237
Kuskokwim	Full time	41
	Part time	609
	TOTAL	650
UAJ	Full time	303
	Part time	2036
	TOTAL	2339

NOTE:

Of these three schools, KPCC had the highest full time enrollment figures for credit offered courses.

Priorities KPCC

KPCC was listed in fiscal year 1982 CREE priorities six year plan to be built in 1987 at $5 million. In this year no other community college or U of A campus, except Fairbanks, was set out in CREE or the regent's six year plan. The policy period during was to allow no other student housing except Fairbanks. KPCC was the first exception to this in CREE priorities following extensive public hearings and participation by KPCC president, Wilsey, and faculty member John Williams.

The study and hearings for housing resulted in a detailed study plan and needs assessment which set out housing needs against a dramatic shortage of housing available in the Kenai/Soldotna area for students.

Dear Jim:

In reference to the January 19, 1983 Memorandum from Wanda Cooksey, Acting Director Division of Management Law & Finance, I am enclosing a request for funding of a student dormitory at the Kotzebue Technical Center. If we had to place this on our Priortized Capital Improvement request we would have to put it as priority # 3 with the rest being dropped down one.

I am submitting this proposal pending Board approval. The Northwest Arctic School District Board will be meeting on February 15, 1983 and will address the proposal at that time. I will notify you of the Boards action concerning this request.

If you need any further information, please contact me at your convenience.

Sincerely,

John L. Rogers
Assistant Superintendent:
Administrative Services

Senator Frank Ferguson
Representative Al Adams

Northwest Arctic School District

BOX 51
KOTZEBUE, ALASKA 99752
(907) 442-3472

KOTZEBUE TECHNICAL CENTER

DORMITORY

The Northwest Arctic School District is presently operating the Kotzebue Technical Center, an Adult Vocational Educational Facility, which serves adult Alaskans from the entire State.

The Kotzebue Technical Center Staff and Students are presently moving into a facility which has just recently been completed. At the present time we have an enrollment of approximately 65 students but with the completion of the new facility we have the capacity to serve as many as 200 students. The Technical Center Staff is receiving request for information on the Programs offered by the Technical Center daily and we have a minimum of 500 people who have expressed an interest in enrolling in the Technical Center.

At this time the Kotzebue Technical Center has an agreement with the Nul-Luk-Vik Hotel to house students who do not live in Kotzebue. This arrangement is adequate for the small enrollment we have now, but as our enrollment increases there will not be adequate room to handle all the students. Kotzebue does not have any other facility available to house students so the Northwest Arctic School District is requesting funds to build a Dormitory for the Technical Center Students.

The Dormitory would be an approximate 20,000 square foot building whose main components would be sleeping and study rooms. The building would not require any food service facilities because it would be built on the Technical Center site and the cafeteria in the Technical Center would be used to feed the students staying in the Dormitory.

The estimated cost for this facility is $6.6 million dollars. If approved and funds appropriated we anticipate the design phase to start in August of 1983 and construction completed by July 1985.

Operating and maintenance costs would be incorporated into the operational budget request of the Kotzebue Technical Center which is submitted to the Department of Education yearly.

With the ability to house additional students this would create an expanded program at the Kotzebue Technical Center. This would provide some additional employment at the Kotzebue Technical Center, but the type and number of additional positions is unknown at this time.

Another area that needs addressing is the possibility of a joint use facility with Chukchi Community College. We foresee the possibility that in the future Chukchi Community college might be in need to house students who are enrolled in their programs. Through the cooperation of both the Kotzebue Technical Center and Chukchi Community College these needs could be addressed on a space available basis.

MEMORANDUM

To: Senator Joe Josephson
Chairman
Senate HESS Committee

From: Senator Don Orman

Subject: Requested Amendment to SB 19
(U of A Dormitory Complexes, ED)

I am requesting an amendment to SB 19 for design and engineering money for student housing at Kenai Peninsula Community College (KPCC)

KPCC offers many programs which attract students statewide. Research has shown that over 40% of full-time students come from outside the Kenai/Soldotna area. Housing shortages in the area necessitate student housing to become part of the KPCC facilities.

The many attached resolutions show wide support from the large area which KPCC serves. I have also provided the Committee with copies of the housing study prepared in 1981-1982 which resulted in local hearings in which strong support was expressed for this project. These hearings took place January 22, 1982 when the Board of Regents Community College Subcommittee met with the Community College Council, Chancellor Bickerstaff, Dr. Vierro, representatives of Kenai City Council, Soldotna City Council, Kenai Peninsula Borough, and several private businesses and individuals.

was a Third Priority
on area in 1982 - has
now been taken off list

I would offer the following language for:

New Section 3

"The sum of $580,000 is appropriated to the University of Alaska for Kenai Peninsula Community College student housing for engineering and architectural design."

This language is identical to that in CCSSB 876 which passed both Houses last session. As you will recall, this bill was vetoed by Governor Hammond.

KPCC → 4/42 average credit hours per full-time faculty → best in the University system

2/25/83

CITY OF SEWARD, ALASKA
RESOLUTION NO. 81- 52

A RESOLUTION OF THE SEWARD CITY COUNCIL,
SUPPORTING ON CAMPUS HOUSING FOR
KENAI PENINSULA COMMUNITY COLLEGE

WHEREAS, the City of Seward recognizes the contributions toward education that Kenai Peninsula Community College has made, and

WHEREAS, the citizens of Seward from time to time wish to become students at the Kenai Peninsula Community College, and

WHEREAS, the distance from Seward to Kenai Peninsula Community College presents difficulties in attending classes and taking part in the Kenai Peninsula Community College educational process, and

WHEREAS, the Kenai Peninsula Community College has no on-campus housing to provide shelter to those who must come from the outlying areas;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEWARD, ALASKA, that the Council hereby goes on record as supporting the addition of on-campus housing at the Kenai Peninsula Community College campus.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF SEWARD, ALASKA, this 9 day of November, 1981.

CITY OF SEWARD, ALASKA

Donald W. Cripps
Mayor

I, JoAnne E. Shanley, City Clerk of the City of Seward, Alaska, hereby certify that this is a true and correct copy of the resolution as it appears of record in my office.
IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Seal of the City of Seward, Alaska, this 10th day of November, 1981.

RESOLUTION #81-21

A RESOLUTION OF THE CITY OF SELDOVIA SUPPORTING THE ADDITION OF ON-CAMPUS HOUSING AT KENAI PENINSULA COMMUNITY COLLEGE.

WHEREAS, the City of Seldovia recognizes the contributions being made toward the education of its citizens by the Kenai Peninsula Community College, and

WHEREAS, the location of the Kenai Peninsula Community College makes daily access to its facilities impossible for our citizens, and

WHEREAS, the additional cost of securing full-time housing when available for Seldovia citizens to attend Kenai Peninsula Community College works a financial hardship on those citizens, and

WHEREAS, the Kenai Peninsula Community College does not now have on-campus housing to accomodate those citizens wishing to attend Kenai Peninsula Community College,

NOW, THEREFORE, BE IT RESOLVED that the City of Seldovia does go on record as supporting the addition of on-campus housing at the Kenai Peninsula Community College campus.

CITY OF SOLDOTNA

RESOLUTION 81-38

A RESOLUTION BY THE CITY OF SOLDOTNA URGING FUNDING FOR ON-CAMPUS STUDENT HOUSING AT KENAI PENINSULA COMMUNITY COLLEGE IN FISCAL YEAR 1982-83

WHEREAS, Credit hours, courses and student attendance have increased steadily and noticeably at Kenai Peninsula Community College in the last five years, and

WHEREAS, The unique instructional fields of oil petroleum, industry and mining offered at the local community college and an expanding statewide industrial base have comfortably joined to produce a dependable, steady portion of the local institutional growth, and

WHEREAS, more and more students are also electing to spend their first two years of college at the local educational institution, and

WHEREAS, The addition of a new 26,000 square foot Vocational Training Center soon will greatly accelerate student enrollment, and

WHEREAS, Peninsula students would choose to stay on campus instead of traveling endless hours on hazardous Borough roads, and

WHEREAS, A recent Housing Survey (October 1981) has shown an undeniable need for on-campus housing, and

WHEREAS, Tight money and high interest rates in the private sector have discouraged construction of multiunit, low to medium income rentals in the local area, and

WHEREAS, The community College Council is chaired by Hazel Heath and Georoe Day, and the Vocational Advisory Board and the College Council have approved the concept of on-campus housing, now therefore

BE IT RESOLVED THAT the City Council of the City of Soldotna urges the Alaska Legislature to appropriate $5,200,000 in fiscal year 1982-1983 that will fund on-campus Student Dormitory Housing.

BE IT FURTHER RESOLVED THAT The City of Soldotna send copies of this resolution to Mr. Jay Hammond, Governor of the State of Alaska; Dr. Patrick O'Rourke, Chancellor, Community College, Extension and Rural Education; Mr. Edward B. Rasmusson, President, University of Alaska Board of Regents; Mr. Ed Dankworth

and Mr. Don Bennett, Co-chairmen, Finance Committee, Alaska Senate; Mr. Albert Adams, Chairman, Finance Committee, Alaska House of Representatives; Mr. Don Gilman, District 13 Senator, Alaska Senate; Mr. Hugh Malone and Mr. Pat O'Connell, District 13 Representatives, Alaska House of Representatives; and Mrs. Betty Cato, District 5 Representative, Alaska House of Representatives.

ADOPTED This 19th day of November, 1981.

RESOLUTION NO. 81-107

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA, EXPRESSING SUPPORT FOR THE KENAI PENINSULA COMMUNITY COLLEGE'S ENDEAVOR TO PROVIDE ON CAMPUS LOW-COST HOUSING FOR STULENTS ENROLLED IN THE COLLEGE'S CURRICULUM.

WHEREAS, the Kenai Peninsula Community College has embarked upon a program to increase the number of faculty members to cope with the increased number of students attending the College, and

WHEREAS, increasing numbers of students are in desperate need of low-cost housing to be in economic position to pursue their academic goals, and

WHEREAS, the Kenai Peninsula Community College is a growing economic and academic facility that is extremely beneficial and supportive of local industry and local commercial enterprises and,

WHEREAS, the Board of Regents for the Uni ersity of Alaska has authorized on-campus housing as one of their priorities for the Kenai Peninsula Community College.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, that said Council is on record in support of the Kenai Peninsula Community College's effort to provide low-cost housing for the students attending the college.

RESOLUTION 81-92

A RESOLUTION SUPPORTING KENAI PENINSULA COMMUNITY COLLEGE OBTAINING ON-CAMPUS HOUSING.

WHEREAS, the Kenai Peninsula Community College has served the educational needs of the City of Homer and its citizens for a number of years, and;

WHEREAS, many residents of the City of Homer wish to participate in full-time college studies offered at the main campus of Kenai Peninsula Community College, and;

WHEREAS, the distance from Homer to the Kenai Peninsula Community College is in excess of 150 miles round trip by a sometimes very hazardous road system, and;

WHEREAS, the availability of student housing is nearly non-existent thus creating a great hardship on those Homer students wishing to further their education, and;

WHEREAS, the Kenai Peninsula Community College has embarked upon a program to obtain on-campus housing for students from outlying areas,

NOW THEREFORE, BE IT RESOLVED that the Common Council of the City of Homer and its citizens go on record as supporting Kenai Peninsula Community College in its efforts to obtain funding for this project.

KENAI PENINSULA BOROUGH

RESOLUTION 81-195

DECLARING THE ASSEMBLY'S SUPPORT FOR THE PROVISION OF STUDENT HOUSING FACILITIES ON THE CAMPUS OF THE KENAI PENINSULA COMMUNITY COLLEGE.

WHEREAS, the Assembly and the Borough administration recognize the need for post secondary education on the Kenai Peninsula; and

WHEREAS, the Assembly and the Borough administration also recognize the important educational purpose of the Kenai Peninsula Community College and its important service to all the citizens of the Borough as well as other citizens from around the state and elsewhere; and

WHEREAS, the lack of student housing curtails the opportunities of the college and the student body; and

WHEREAS, the lack of student housing precludes the opportunity of this educational program to persons in remote locations and prevents many students from attending the community college on a full time basis; and

WHEREAS, the Kenai Peninsula Community College has recognized this need and intends to pursue funding and construction of on-campus student housing; and

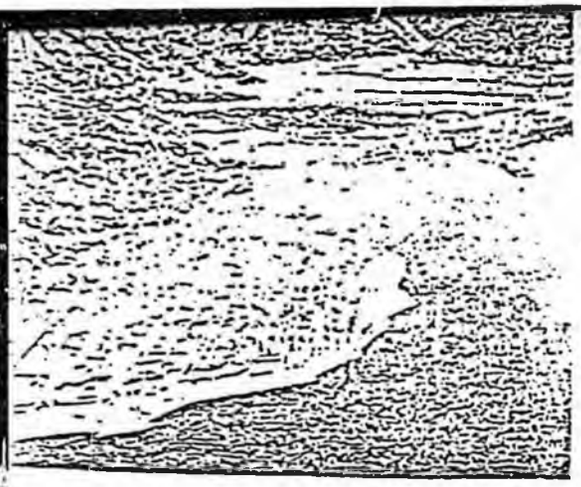
WHEREAS, the Assembly and the Borough administration fully support on-campus student housing at the Kenai Peninsula Community College;

NOW THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

Section 1. That the Borough Assembly and the Borough administration record their support and endorsement for the provision of student housing facilities on the campus of the Kenai Peninsula Community College;

BE IT FURTHER RESOLVED that the Assembly and the Borough administration urge the Twelfth Alaska Legislature, Second Session, to provide funds in the next fiscal year for the provision of on-campus student housing at the Kenai Peninsula Community College.

Section 2. That the Clerk shall serve a copy of this resolution upon the Honorable Jay S. Hammond, Governor of the State of Alaska; upon the Honorable Jalmar Kerttula, President of the State Senate; upon the Honorable Joe L. Hayes, Speaker of the State House; upon the Honorable Donald E. Gilman, State Senator; upon the Honorables Bette Cato, Hugh Malone, and Pat O'Connell, State Representatives.



Section 3. That this resolution takes effect immediately upon its adoption.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH ON THIS 15th DAY OF December, 1981.

ADOPTED BY SEWARD CHAMBER OF COMMERCE this 16th day of November, 1981.

Brent Whitmore, President
Seward Chamber of Commerce

November 16, 1981

Members of the Alaska State Legislature
Juneau, Ak. 99801

Sirs:

The Board of Directors of the Homer Chamber of Commerce would like to voice unanimous support for the requested legislative appropriation of $5,200,000 for the construction of housing units for the Kenai Peninsula Community College.

The Kenai Community College serves the Soldotna/Kenai area, the remainder of the Peninsula and many students from other areas of the state and even "outside". Their unique course offering, including instruction in the fields of oil, industry, mining and secretarial sciences attracts students from many geographic locations. As the state's industrial base continues to grow, so to will the Kenai Peninsula Community College.

There are many factors leading to the need for college housing at the facility. There is a housing shortage in the Kenai/Soldotna area. Thus - students are often forced to take isolated or sub-standard housing situations. More likely, they are discouraged from even considering attendance due to the problems of finding suitable housing. The housing that is available, because of the shortage, is expensive and this puts an additional burden on the student. There is no public transportation so the students who are able to secure housing must also invest in a car.

Campus housing would alleviate these problems. It would encourage attendance by those who have stayed away because of the housing situation. It would facilitate students from Homer, Anchor Point and other out-lying areas of the Peninsula in obtaining their core education. Dormitory housing on the campus would be of benefit to every peninsula community and many other communities not within our borough. We have reviewed the findings by the College staff and feel that they have proven that the housing would be used to capacity and that it is a needed addition to continue the growth and service of the college.

We urge that the appropriation be passed during the upcoming legislative session.

Sincerely,

HOMER CHAMBER OF COMMERCE

Gil Russell

KENAI PENINSULA COMMUNITY COLLEGE COUNCIL
Minutes of January 13, 1983 Meeting

Meeting called to order at 7:05 P.M. by Chairman Heath.

MEMBERS PRESENT: LeRoy Barton, Charlotte Calhoun, John Douglas, George Ford, Hazel Heath, Marion Hylen, Debra Mullins, Jason Roth, Alex Shadura, Donnis Thompson, Walter Ward. Ex-Officio: Les Vierra, Tom Wagoner, Kate O'Dell, Kate Fenton, Bonnie Heimbuch.

MEMBERS ABSENT: Roger Holl. Ex-Officio: Michael Beck, Nancy DuPaul.

GUESTS: Dottie Krzyzanoski, Ethel Clausen, Patricia Morris.

AGENDA: Agenda approved as submitted.

MOTION: By Hylen, seconded by Thompson, passed unanimously.

That the Minutes of the December 9, 1982 meeting be approved as submitted with the correction made under Chairman's Report that she had traveled to Juneau for the Older Alaskans Commission.

REPORTS: Chairman. Read letter received from President Barton concerning his informative meeting with the Council. Reported that KPCC's Homer Branch open house had been successful.

President. Reported that UA has submitted 1984 Budget to the Governor; the February 1 audio conference for defense of Budget; Council members encouraged to attend and speak; Carolyn Cannava from Kenai Peninsula Borough School District (KPBSD) will speak on behalf of KPCC; KPCC starting FY-85 Budget process within next few weeks; projected enrollment for 1992 is 1200 FTES; projections to be mailed to Council as soon as completed; hope to involve everyone who is interested in FY-85 Budget; after prioritization, will be presented to Council for adoption; KPCC has requested continuation budget from KPBSD; student body will be coming to Council for request of increase in student activity fee and student budget, will be presented at next meeting; Chancellor Melican and Vice Chancellor Bomotti will be in attendance at next Council meeting to speak regarding the machinist-millwright instructional position; two proposals received on Student Housing thus far.

Dean, Support Services. Reported that KPCC is in process of doing final spring reconciliation (budget) to determine what our status is; spring registration duplicated headcount as of January 13 is 2,242.

Dean, Academic Affairs. Reported that letter had been sent to Chancellor to eliminate Industrial Electronics degree program; John Rogers hearing scheduled on this campus on February 8; possibility of facility being donated for Homer Branch, is in preliminary talking stage; new facility (Phase V) basically 98% complete and we are utilizing space this semester.

MOTION: 83-17

By Barton, seconded by Ward.

Move that the Council concur with the decision to eliminate the Industrial Electronics degree program based on the enrollments presented at this meeting.

MOTION ITHDRAWN.

Suggestions: That this matter be brought before Council at next meeting; that more information on the second year offerings be presented; obtain reaction from industry; advertise more widely for this program.

REPORTS: (CONTINUED)

Dean, Student Services. Reported that Student Body Officers, Dean and President would have audio-conference with Chancellor on January 25 (9:00 A.M.) regarding Student Constitution - Council members encouraged to attend; reported enrollments in Learning Skills Center; 295 state loans awarded as of December 10, 7 of the 42 students who applied for state incentive grants were awarded, 395 KPCC students have applied for state/federal financial aid grants; announced hiring of new personnel: Sharon Williams as Media Services Technician, Dodie Smith as Arm Chair College Facilitator.

Council Members. Thompson requested that there be a presentation of Arm Chair College at future meeting; questioned whether Senator Fischer and Representative Malone had been apprised of happenings at meeting with local legislators. Mullins questioned if we keep Representative Cato informed of KPCC happenings. Calhoun stated that Homer residents are aware that KPCC Homer Branch has moved into new location; questioned if Homer and Seward students charged student activity fee, what would be the benefit, suggested that student newspaper would be one way; suggested that KPCC register the logo as adopted by the Council and if royalities ever received could they be dedicated to scholarship account.

Faculty, Students and Staff. No reports.

Public. No reports.

DISCUSSION:

Community College Council Handbook. The complete handbook is to be handed out at the next meeting. This document will be single spaced and paginated. Questioned how changes in the handbook would be brought about. Suggested that blanket statement regarding Council's acceptance of Board of Regents policies be placed in front of the handbook as well as referrals to BOR policies at appropriate sections. Recommended that personal pronouns reflect both gender. Questioned was whether or not faculty, staff and students can feel free to go to Council members without

permission of College administration, or whether Council members can go directly to faculty, staff and students with concerns.

Advisory Committee Handbook. Concern as to how advisory committees were to bring back information to the Council, Council to receive copies of minutes from all committees. Recommended that information regarding termination of committee members be recommended to the Council be placed in handbook. With consent of Council, this item will be brought back to the Council at their next meeting for approval.

MOTION: 83-18

By Hylen, seconded by Douglas, passed unanimously.

That the Administration present a continuation budget request to the Kenai Peninsula Borough School District to reflect programs related directly to the agreement with the District.

NEXT MEETING: The next meeting of the Council will be held February 10, 1983 at 7:00 P.M. on campus. Chancellor Melican and Vice Chancellor Bomotti will be in attendance.

ADJOURNMENT: Meeting adjourned at 9:45 P.M.

Respectfully submitted,

Gwen Freeman
Recroding Secretary

MEMORANDUM

TO: Sen. Bill Ray, Chair
Senate Judiciary Committee

FROM: Sen. Dick Eliason

DATE: May 18, 1983

RE: SB 26 - "An Act providing for immunity from civil liability for certain persons who render services in response to hazardous materials emergencies."

As requested, I have reviewed the above-referenced legislation and I am now reporting my findings to you.

SB 26, introduced by Senators Ziegler and Halford, would add a new section to the "Alaska Good Samaritan Act" to include civil liability cases involving a person responding to a hazardous materials emergency. This legislation would grant immunity from civil liability to those individuals who render assistance during a hazardous materials emergency at the request of trained professionals. It does not guarantee immunity in cases of gross negligence or intentional misconduct.

Distributed by Senator Ziegler

SB 26 - IMMUNITY FROM CIVIL LIABILITY TO PERSONS RESPONDING TO HAZARDOUS MATERIALS EMERGENCIES.

SECTION 1

(a) GRANTS CIVIL LIABILITY EXEMPTION TO A PERSON REQUESTED TO RESPOND TO A HAZARDOUS MATERIALS EMERGENCY FOR AN ACT OR OMISSION WHILE GIVING AID.

(b) DOES NOT PRECLUDE LIABILITY FOR A PERSON RENDERING AID IF THAT PERSON CAUSES DAMAGES THROUGH GROSS NEGLIGENCE, RECKLESS OR INTENTIONAL MISCONDUCT; OR THROUGH SIMPLE NEGLIGENCE IN THE ORDINARY CONDUCT OF THAT PERSON'S BUSINESS(EXCEPT FOR THOSE REQUIRED TO RESPOND TO AN EMERGENCY BY THEIR PROFESSION); OWNS, LEASES OR CONTROLS THAT WHICH IS INVOLVED IN THE ACCIDENT; OR A PERSON EXPECTING REIMBURSEMENT FOR SERVICES.

(c) IMMUNITY GRANTED IN (a) EXTENDS TO THE PERSON'S EMPLOYER OR ANY PERSON OR ENTITY RESPONSIBLE FOR THE PERSON RESPONDING TO THE EMERGENCY FOR ACTS OR OMISSIONS OF THE PERSON.

(d) DEFINES HAZARDOUS MATERIAL AS A SUBSTANCE CLASSIFIED AS HAZARDOUS BY THE STATE OR FEDERAL GOVERMENTS OR A CHEMICAL, PETROLEUM PRODUCT, GAS, OR OTHER SUBSTANCE THAT IS LIKELY TO CAUSE HARM IF RELEASED

SENATE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

Hearing on Senate Bill No. 26 "Providing for Immunity from Civil Liability for Certain Persons who Render Service in Response to Hazardous Materials Emergencies"

May 2, 1983

Mr. Chairman:

My name is E. Robert Haag representing the Alaska State Firefighters Association and the Alaska Fire Chiefs Association.

We wish to speak in favor of Senate Bill No. 26 now before your Committee. Our two Associations, at their annual meetings last October 1982, passed a number of resolutions pertaining to the Fire Service. One of the resolutions concerned supporting of a State enacted "Hazardous Materials Good Samaritan Act".

Senate Bill No. 26 would provide for a new section to AS 09.65 to add to the "Alaska Good Samaritan Act" (AS 09.65.090) a section "Civil Liability for Responding to Hazardous Material Emergency". The existing AS 09.65.090 covers only "Civil Liability for Emergency Aid". A copy of this section is enclosed for your general information. It covers "a person at a hospital or any other location who renders emergency care or emergency counseling to an injured, ill, or emotionally distraught person....".

Alaska Fire Chiefs and Firefighters are concerned since incidents involving hazardous materials are happening with increased frequency in all areas of the State of Alaska. These incidents often require immediate assistance of

persons with technical expertise to advise the Fire Service as to how to deal with the hazardous materials accident or spill. Many persons, outside of the Fire Service, who are technical experts, are reluctant to provide advice because of fear of legal liability.

Take an example of a Fire Chief in a small community who encounters a hazardous materials accident. When he arrives on the scene he finds a powdered substance spilled from a container. He does not know what it is and the container is not marked. His quick reaction is to call the local high school chemistry teacher to see if he can possibly identify the powder. That teacher could refuse to make a test in fear of a civil liability. If the proposed Statute were law, that same teacher would feel more at ease to make the test since he could be protected under the "Civil Liability Act".

A number of States have enacted "Good Samaritan Acts" similar to the proposal before your Committee.

Mr. Chairman and members of the Committee, we strongly urge your "DO PASS" on this Bill so that it may proceed through the Senate and the House to become a valuable Statute. The saving of even one life, by the passage of this Bill, would make you feel proud that you had an important part in its becoming law.

Mr. Chairman, if we can provide you with any information to assist in the Bill's passage, please let us know.

We thank you for your valuable time in allowing us to testify.

Alaska Fire Chiefs' Association

RESOLUTION No. 82-3

WHEREAS incidents involving hazardous materials are happening with increased frequency in all areas of the State of Alaska; and

WHEREAS these incidents often require assistance of persons with technical expertise to help with their management; and

WHEREAS many persons outside of the fire service are reluctant to provide this advice because of legal liability,

NOW, THEREFORE, BE IT RESOLVED that the Alaska Fire Chiefs' Association support the concept of a State enacted "Hazardous Materials Good Samaritan Act" patterned on similar acts recently enacted in other states; and

BE IT FURTHER RESOLVED that the Alaska Fire Chiefs' Association urges the Alaska State Legislature to pass such a law in the next legislative session.

APPROVED in conference October 20, 1982 in Ketchikan, Alaska.

WHEREAS many persons outside of the fire service are reluctant to provide this advice because of legal liability,

NOW, THEREFORE, BE IT RESOLVED that the Alaska State Firefighters Association support the concept of a State enacted "Hazardous Materials Good Samaritan Act" patterned on similar acts recently enacted in other states; and

BE IT FURTHER RESOLVED that the Alaska State Firefighters Association support and assist the Alaska Fire Chiefs' Association in this regard.

ACTION Passed DATE: October 3, 1982

Leigh Gallagher

LEIGH GALLAGHER, President, ASFA

Sec. 09.65.090. Civil liability for emergency aid. (a) A person at a hospital or any other location who renders emergency care or emergency counseling to an injured, ill, or emotionally distraught person who reasonably appears to the person rendering the aid to be in immediate need of emergency aid in order to avoid serious harm or death is not liable for civil damages as a result of an act or omission in rendering emergency aid.

(b) This section does not preclude liability for civil damages as a result of gross negligence or reckless or intentional misconduct. (§ 1 ch 52 SLA 1967; am § 1 ch 119 SLA 1971; am § 38 ch 102 SLA 1976)

Cross references. — As to constitutionality of ch. 102, SLA 1976, see notes to AS 09.55.536 and Alas. Const., art. II, § 14.

Effect of amendments. — The 1976 amendment rewrote subsection (a) and deleted the second sentence of subsection (b) which read "Gross negligence means reckless, wilful, or wanton misconduct."

Analysis
SSSB 72

February 3, 1984

This bill provides that the Department of Public Safety, in conjunction with the Department of Law and the Department of Health and Social Services shall develop and distribute a uniform sexual assault examination kit. The bill further provides that these departments shall develop a manual of protocols governing the distribution and use of the sexual assault examination kit.

The Department of Law will have primary responsibility for developing the manual of protocols. Some preliminary work in this project has already been accomplished as an outgrowth of the establishment of specialized sexual assault prosecution units and the use of victim/witness assistance paralegals in several of the department's District Attorney offices. In addition to developing protocols that enhance the preservation and protection of evidence, and writing protocols that deal with victims in a sympathetic and supportive manner, the department believes that it will be necessary to develop training packages for police officers. These training packages would then be incorporated into the regular police training curriculum and be available to Village Public Safety Officers, local police agencies and the Alaska State Troopers.

The biggest single obstacle to be cleared in making the sexual assault examination kit program work is the training of health care providers and private medical practitioners who examine and treat rape victims, in the preservation of evidence and the handling of victim/witnesses. There is no mechanism to command the attendance of health care providers at standardized training courses, nor would such a mechanism be a practical solution. Consequently, the department believes that this critical link in the chain of evidence can be best assured by providing on-site training and consultation to health care providers on a recurring basis. Recurrent on-site training will also be of vital importance for the staffs of the Department of Health and Social Services and the Council on Domestic Violence and their contractors who assist victims of sexual assault and particularly victims of child sexual abuse.

The Department of Law therefore requests sufficient funds to hire an Associate Attorney II who will be responsible for writing and revising the protocols for the distribution and use of the sexual assault examination kit. This position will also be responsible for developing police agency training packages and the position will develop and provide ongoing training for health and social services care providers. Funds are also requested for the printing of training materials and protocol manuals.

The Associate Attorney will be located with the Violent Crimes/Sexual Assault supervisor in the Office of the Chief Prosecutor.

FISCAL ANALYSIS - SSSB 72

This analysis is based upon establishing an Associate Attorney II position at Juneau. It provides for usual position support cost. Travel is set at a higher than usual level to allow for the training of rural health care and social services care providers. Ongoing costs include $400 per month for communications and copying, and $250 per month for office and library supplies. One-time expenses include $1,500 in new position office commodities and $1,500 in new position equipment. Another one-time expense is for the printing of protocol manuals, as well materials for and printing of training manuals. These costs are estimated at $20,000, in the first year, and $5,000 per year, thereafter. These costs have been estimated on the basis of similar projects requiring training efforts such as the criminal code revision. Costs beyond FY 85 include a 6% inflation factor.

JUSTIFICATION

This position is required to develop and revise protocols for the distribution and use of a sexual assault examination kit. The position will also develop and write training guides for police officers to be incorporated in various training programs used by the Village Public Safety Officers, local police departments, and the Alaska State Troopers. The position will also provide recurrent on-site consultation for health care and social services care providers who assist the victims of sexual assault, particularly the victims of child sexual abuse. The position will interpret the legal requirements for safeguarding the evidence of sexual assault by health care and social services care providers such as hospitals, private medical practitioners, domestic violence shelters and village health aides.

Support

February 6, 1984

CS SS SB 72 (HESS) - "An Act relating to sexual assault investigations."

By making the sexual assault examination kits universal and by providing sufficient training in their use, a significant increase in the number of sexual assault convictions is expected.

Robert J. Sundberg
Commissioner

OSITION PAPER/Department of Health and Social Servic

POSITION PAPER

SENATE BILL NO. 72

"An Act relating to free emergency medical examinations of victims of sexual offenses."

This Bill adds a new section to the statute governing the Violent Crimes Compensation Board which provides that the victim of sexual assault or, in the case of a minor, a victim of sexual abuse may request and shall receive free emergency medical examination at a public or private hospital or other emergency medical facility so that evidence may be gathered to assist in the possible prosecution of the offender. The Bill also provides that the Board may reimburse the hospital or emergency facility for the reasonable costs of the examination. It further provides for retroactive payment to the victim or parent if the victim agrees to aid in the prosecution of the offender.

The Department of Health and Social Services endorses measures which assist in law enforcement. Costs of examinations for victims are coverable under the state's Medicaid program at present and under many health insurance pr[illegible] We have no means to estimate how this Bill would affect the costs [illegible] the Violent Crimes Compensation Board. We do not anticipate any increased costs to the medical assistance programs administered by this Department.

It is noted that no provision is made for reimbursement of costs to physicians or other health care providers who may be involved in such examinations.

ALASKA NETWORK ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

110 SEWARD #13 JUNEAU ALASKA 99801

(907)586-3650

POSITION PAPER: SSSB72
AN ACT RELATING TO SEXUAL ASSAULT INVESTIGATIONS

The Alaska Network on Domestic Violence and Sexual Assault, representing twenty member programs statewide providing services to victims of domestic violence and sexual assault, supports sponsor substitute for Senate Bill 72, An Act Relating to Sexual Assault Investigations.

The Network's primary area of concern is provision of comprehensive, sensitive, and timely services to victims. In cases of sexual assault, this concern involves assuring the victim that all necessary evidentiary information will be gathered in order to facilitate a successful prosecution. For that reason, it is imperative that uniform kits are provided for use statewide, that protocols be developed for use and distribution of the kits, that protocols address needs of both rural and urban areas, and that training be provided in both the use of the protocol and the kit to peace officers, District Attorneys, other appropriate law enforcement agencies, health care providers, and sexual assault program personnel.

Uniformity of kits is necessary in order to insure that evidence is gathered properly and that all necessary materials are available for a complete and thorough examination.

The development of protocols that address that unique and specific needs of rural areas is necessary because the level of health care provision may differ from that available in urban areas and because law enforcement personnel may not be immediately available.

It is the Network's position that training in the protocol and the use of the kit is primary. Availability of the kits is incidental if health care providers and criminal justice personnel are unaware of their availability and untrained in their use. Sexual Assault examinations can be an additional trauma to the victim, and so should be done in a sensitive and efficient manner. Training in performing sexual assault examinations is necessary in order to accomplish this aim.

In cases of sexual assault investigation and prosecution, collection of evidence plays a crucial role. In the opinion of the Network, more efficient, timely, and sensitive performance of sexual assault examinations can be accomplished by the provision of uniform kits, development of protocols, and provision of training to involved personnel in their use.

Elizabeth J. Hickerson
Senior Advisor
Senate Advisory Council
1024 W. 6th Avenue, Suite 203
Anchorage, Alaska 99501

Dear Elizabeth:

I just received your letter and am planning to be out of town for the beginning of next week for regional provider meetings, so I wanted to contact you regarding rape kits. For your information, I have attached some research Susan McInnis in Fairbanks did on the status of rape kits in the Fairbanks area.

I certainly am not locked into developing any sort of task force and am anxious to explore other options. However, I want to state that I feel the Council is not the appropriate group to develop specific rape kit materials and protocols. The development of those items will require legal, medical and law enforcement expertise not present on the Council. I agree that we are the appropriate agency to oversee coordination of other agencies with specific expertise as that is mandated in our legislation. I also think it is appropriate that we establish and implement a system to assure humane and adequate collection of evidence.

I will call you when I return to the office, so we can discuss possibilities. Now that I am more aware of what is happening statewide, I should be of more help.

Sincerely,

Barbara

October 24, 1983

Dear Barbara,

Enclosed you'll find comments from the Troopers, D.A.'s office, and Alaska Native Health Service doctors. I called each, asked how well they felt medical rape exams were being performed; asked about problems encountered and possible solutions. You'll be interested, I'd think, in the responses. I paraphrased in most cases, caught a quote or two, and tried to preserve the integrity of the responses throughout.

Interesting assignment. If notes from these people inspire more questions, I have permission from each to call again. Feel free to ask.

I'd be interested in your and Elizabeth's thoughts after reading the enclosed. I passed copies to Ruth.

Stay well.

Susan McInnis

postscript: Barbara, you'll notice that the different points of view are interpreting 'reality' differently. I suspect we'd get differing points of view from any number of people queried.

Troopers:

First Sergeant Close, in Fairbanks; supervisor for Interior Troopers.

There are health clinics in all sub-regional centers (eg: Galena, Tok, Ft. Yukon, etc.). Staffed by physician, health aide, physician's assistant, or paramedic. For the most part Close thinks they do a pretty good job. Troopers know which health aides are capable of doing the work and which are not --because they work with them daily. When the health aide (p.a., paramedic, etc) is incapable, Troopers do their best to get the victim to a better staffed clinic. Not always possible. Where there is no clinic, Troopers will try to get the victim to a subregional center where she can receive an exam.

Troopers responsible (DPS is) for cost of rape exam, for providing rape kits, for securing the evidence and transporting it to Fairbanks. Because chain of evidence is their responsibility, they try to assure an effective exam.

Close feels reporting is pretty good overall in the bush. Lots of attempted reports, and of child sexual assault. Fewer actuals. Attempteds and child sexual assaults may not necessitate exams as often as sexual assault 1.

Says their greatest problems are weather and funding. A man died in Huslia the other day --from a gunshot wound to the head-- because Troopers could not get in to airvac him. Autopsy shows he probably would have died anyway, but it shows that AST is crippled by adverse weather conditions. Had Huslia had the proper equipment for guiding a plane, they might have been able to land. Same problem besets them when there is a reported sexual assault. May always be a problem in rural Alaska. Here, funding (for equipment) might help; might not.

Because AST is responsible for securing evidence, the lack of sufficient funding for rape kits is a real problem. If they can't afford to make up the kits, they can't oversee proper collection of evidence. ... As well, transportation of victims to a clinic or hospital, and paying for the exam when it's done, are both stymied by insufficient funds.

District Attorney's office:

Terry Foster, past Assistant D.A. in charge of the special assault unit.

Medical Exams from the bush are simply not up to snuff. There are logistical, emotional and training problems not encountered in urban areas. These prohibit uniform and effective collection of medical evidence. In Terry's opinion, a new law won't help.

Some of the problems:

There is much late reporting in bush communities. A sexual assault may be reported 2, 3, 4 days after taking place. Community education, a concerned and effective medical/law enforcement team could increase timely reports.

Police officers (both troopers and VPSOs) tend to minimize the importance of the rape exam. Don't effectively oversee thorough exam.

eg: If a victim says, "Hey, I'm fine. I don't need to go see the doctor (especially if seeing the doctor requires a trip to town). I just want to go home and take a bath," the p.o. is likely to let her go home. Often this is out of a desire to be sensitive to her needs, but it thwarts the collection of evidence.

eg: She related a case where the p.o. had the woman go into another room and clip her own pubic hair. Undoubtedly out of modesty or sensitivity to her modesty, but it again thwarted the collection of legal evidence. ...Another sample case, the p.o. asks the woman to brush off her own coat for evidence. Just doesn't work legally.

There is often more violence associated with a sexual assault in the bush. When this is the case, the medical exam often takes a lower priority than necessary attention to other injuries. It is excluded or only partially completed.

Health aides, paramedics, doctors, and physician's aides in the bush just aren't as sophisticated as their urban counterparts. They may do the vaginal smear, but not know to have the woman undress over a sheet of paper to catch falling fibers, blood, etc. May not do pubic combings, nail clipping, etc. This is a problem of ignorance and of staff turnover. One MD (health aide, etc.) may be very well trained, but may only stay 6 months. Replacement never receives adequate training.

In areas where there is no clinic or where it is felt that the clinic personnel cannot do a good exam, the victim may not receive an exam. She may be transported to an urban or subregional clinic. In this case, AST faces weather problems, and the problem of separating the woman from her support group at a time she most needs support. Here the state faces a dilemma: separation from her support group may

create problems for the victim but guarantee legal evidence. Not separating her from her support group means a loss of evidence for the case. Transporting the victim can also mean a delay in time which will mean loss of evidence.

Another example of the problems created by distance and weather: A woman was assaulted in Kaltag shortly after Terry became a d.a. At the time, she wanted to report, she had support from the community. Troopers were called, but it took them two days to get there. Meanwhile supportive villagers were protecting the victim from the assailant, but "that maniac was still running around loose and by the time they got there the evidence was lost."

In Terry's mind, sexual assault and child sexual assault in the bush " are the prime unmet issues in law in Alaska." Because of the idiosyncracies in the bush, no system can be effectively applied over time. Each case must be dealt with individually.

Nonetheless, she would oppose new laws. Laws, she says, are to enforce what the people refuse to do on their own. Law enforcement officers, health aides, etc., are not refusing to do their job. They don't know what to do... Or they don't know why they are being asked to do it. (Terry says the latter may be the greatest problem. The explanation sheet with the exam tells what to do --it doesn't tell the officer or medical person WHY he/she is being asked to do it. So, they get lax). In some cases an experienced person (eg: Trooper) is frustrated in his/her work by an inexperienced person (generally the health aide, p.a., md, etc.) No law will rectify that situation.

Finally, emotional ties in the bush often preclude effective exams. The health aide is the assailant's aunt... has a bit of a feud going with the victim's family... has been told to steer clear of either family, etc.... Small bush communities are family-oriented communities. Where that creates a problem for effective medical exams or collection of evidence, no law will offer a solution.

Terry does agree that a simplified protocol which could be followed by a partially educated medical person or law enforcement officer might help. Standardized rape kits, readily available and understood by police and medical personnel would help. Education about sexual assault generally, legal aspects, emotional aspects, medical aspects --in the community and particularly for those legally involved--would help. Laws won't do it.

Pat Duggan, Assistant District Attorrey, Fairbanks. In charge of the Barrow area.

Pat feels that medical rape exams are done pretty well. No significant problems.

He does encounter a bureaucratic problem with the Public Health Service from time to time. They have been reluctant in certain cases to do rape exams to collect evidence. Most recently, doctors' supervisors have been reluctant to have the physicians, physician and patient records subpoened. He has worked with them and settled the problem.

Non-native patient/victims may be a problem. Although the Barrow hospital is the only available health service, it is a native facility and non-natives can be refused service such as a rape exam. (Pat hadn't any specific problems or complaints in this area --was simply saying that it could be a problem).

No, says Duggan, a law would not help the effectiveness of rape exams. In Barrow, as in all Indian Native Health Service communities, the staff is made up of federal employees. No state statute would govern their provision of care. They now perform rape exams at the request of the state --but exams for the purpose of collecting evidence would not be considered a medical service.

Pat believes that where there is reluctance to collect evidence, it would be exacerbated by a state law. The federal facility might just refuse.

At this point he usually speaks with a new physician, discusses the state's needs and gains the doctor's willingness to assist. Good rapore between the government agencies seems the better route.

Dr. Ron Gould: Director of Patient Care Services. Supervises health aides in 23 villages.

Referred me to Dr. Pete Marshall, but did give the following comments:

Villages of a size to have a health aide would usually transport the patient to a subregional center for the exam. By and large they are not trained in gyn: pelvics, paps, etc.

Dr. Gould suspects there is little call for rape exams in health-aide staffed villages. He believes he would be getting calls from health aides seeking assistance or to check on their work were there more exams being given.

When asked if the health care system in villages should be upgraded to include training and protocol for rape exams, he said: It would be reasonable, but must take into account the varying levels of sophistication among health aides, and the family ties in villages. Any confrontation requiring medical assistance places the health aide in jeopardy. "A health aide would rather 'seal off' from all that to protect herself." Giving a rape exam could be a sign of taking sides in a confrontation which also included sexual assault.

Dr. Peter Marshall --Alaska Native Health Service; Clinical Director (over health care in regional/subregional centers)

Dr. Marshall sees that the bureaucratic system is in place: things flow well from village to subregional or regional center --but it doesn't work. He does not feel that laws or regulations will help it function any better.

In Marshall's experience and belief, there is an "incredible range of assaults and abuses taking place, but no complaints."

"You can see why when you know what happens when someone does complain..." In Stevens Village, for example, a woman was raped by two men. The health aide reported the incident and the woman was transported to Fairbanks (regional center for S.V.). The men were identified, taken to Fbx for arraignment, and released on bail within 24-hours. They returned to Stevens Village to threaten the health aide for having reported the incident. In addition to threats, the men shot at her house with a rifle. She has since (because of that and other incidents) resigned and left the village.

Marshall believes that the reality of the village situation lags far behind the hopes of anyone who wants to improve care (legal/medical) to individuals there. There is an intense distrust of any interference in local relationships or problems.

'We recognize the rights of the accused (and have a system to protect him/her, as well as the victim and the state), but you can't convince small villages of that. 110 people living in a scattered cluster of cabins spread over a remote area are totally interdependent. When one of those people commits what we see as a crime, even when we protect his/her rights, we are still seen as ripping him away from his people and his position in the community. To the villagers, the person who complains is at fault --and at risk of retribution.'

Indirectly, I think Dr. Marshall is making a bid for education and altered services over any laws you might propose. He suggests --as concerns the whole range of child abuses-- that the system be decriminalized. The state or feds could 'encourage people to come forth because the act in question is not good for the people or for the village. Then help them work out an in-place solution.' When asked if he suggests that same altered system when it comes to sexual assault of adults, he said: "We're not getting anywhere with the current system. A changed one might work better."

Marshall

He cited the example of the state regs re child abuse (etc.): They allow the state to remove children from a home which neglects or abuses them. The federal regs now require that children of Natives be returned to the immediate family, extended family or tribe as soon as possible. The difference between the two laws puts health care providers in a bind. As a result, he says, they have had to take a closer look at counseling/working with the families, in order to facilitate a speedy return of the child. In cases where the state has been able to make a good placement (in a native home) of the abused/neglected child, and give excellent counseling to the problem parent --as well as other family members-- they are finding that the family can recover and change.

He feels that if the state concentrates on the possible consequences of laws (more laws regarding reporting would result in an uproar --and danger to those who would report, collect evidence, etc.), and on improving the outcome for people, there may be a better result.

At this point, however, he agrees with Terry Foster that matters having to do with crimes in villages will have to be taken case by case --suspending system to work with the idiosyncracies of village life.

Dr. Marshall had some thoughts on alcohol during the conversation. Venetie is and has been a dry community. In the four years Dr. M. has been traveling to Ft. Yukon and its near villages, "the worst thing that ever happened in Venetie was when a Ft. Yukon man came in, beat up old Mr. Christian (who was 90) and killed him." In Stevens Village --a wet village-- assaults and abuses, and murders, happen all the time. People are drunk all the time. "In Venetie, people live normal lives. There is very little violence." It's a tangent, but a thoughtful one, yes?

SB 72: BACKGROUND INFORMATION

It appears that payment for emergency medical examinations for victims of sexual offenses has at times varied throughout the state. The following supports this statement.

Anchorage, Bethel, Barrow, Fairbanks and Juneau police departments were asked how these exams were paid for in their areas. The following is information gathered from those departments.

Anchorage - When a victim of sexual assault is taken by the city police to the hospital and an exam is administered, the police department pays for the exam with department funds which essentially come from the Municipality of Anchorage.

Bethel - In Bethel the police department stated that the majority of sexual offense victims in their area are native and would be taken to the native hospital in Bethel where there would be no charge to the native victim (hospital is federally funded). But in the case of a nonbeneficiary (non-native) the victim would be personally responsible for the payment of the exam.

Barrow - In Barrow the same standards are followed as in Bethel.

Fairbanks - The police department in Fairbanks stated that if the city police take a sexual assault victim to the hospital and the victim undergoes an exam, the expense of the exam is the responsibility of the investigating agency, in this case the city police department would pay for the exam with funds from their operating budget. In a case outside of the city limits where the State Troopers were called, the exam would be paid by the State Troopers with state funds which come from the Department of Public Safety.

Juneau - As far as the Juneau police department knew, the victims of sexual assault would be responsible for the expense of an exam given.

Nola Capp, administrator to the Violent Crimes Compensation Board, stated that awards of compensation for emergency medical examinations have been made both to a provider via the victim and also to the victim who had previously paid at the time of the exam.

According to the Network on Domestic Violence and Sexual Assault, the payment for these examinations have been a problem in past years. It seems that on occasions an examination would not be administered unless payment was made. This seems to have been generally corrected. Incest victims, however, have been treated differently. According to the Network often the incest victim must be reimbuirsed through the board which causes financial hardship.

Given the different procedures utilized throughout the state for these examinations, it is in the best interest of the state to enact a uniform law.

SB 72 adds a new section to AS 18.67 "Violent Crimes Compensation Board" and provides that emergency examinations for victims of sexual offenses will be provided at no cost to the victim when the purpose of the examination is to gather evidence to assist in the possible prosecution of the offender.

As the evidence gathered is used only for the benefit of prosecution there is no justification for a victim having to pay for this examination, even if later reimbursed by the board.

SUBJECT: CSSB 78(HESS)am. "Relating to teachers' collective bargaining agreements; and providing for an effective date."

In reading over this bill, I have one question and that is, throughout the bill it has referred to "educational employees labor relations agency", is this NEA?

If so, I want to amend this entire bill to include the AFT as well. If this is not I would like to propose the following amendment:

> Page 10, lines 17-19: DELETE: "one each from lists of nominees submitted by the National Education Association of Alaska and the Alaska Association of School Boards"

There are two unions in Alaska and they are the Alaska Federation of Teachers and the National Education Association, therefore, I want AFT included.

With this amendment, I respectfully request that this bill be heard in your committee at your earliest convenience.

Thank you.

3/21 PASSED OUT

OSH ROOM PAPER/Department of Health and Social Service

POSITION PAPER

SENATE BILL NO. 96

"An Act making a special appropriation to the Department of Health and Social Services for innoculations for hepatitis B; and providing for an effective date."

Sponsor: Sackett

This bill appropriates $250,000 SGF to the Department of Health and Social Services for innoculations for hepatitis B and provides for an immediate effective date.

Background

A. The Disease

Hepatitis B is a disease caused by a virus. Disease severity can range from inapparent infection to a fulminating process leading quickly to death. There is currently no specific treatment against the virus.

Once infected, individuals may become chronic carriers of the virus, i.e., continue to be infected and to be able to spread infection to others. Moreover, chronic carriers of hepatitis B virus (HBV) are subject to complications including primary liver cancer with a nearly 100% mortality rate unless detected early or polyarteritis nodosa, a serious inflammatory disease of arteries with a 30% mortality rate. It is estimated that 20-25% of chronic HBV carriers will develop chronic active hepatitis with cirrhosis.

B. Prevalence

Both the rates of infection and the rates of chronic HBV carriers are known to be very high in certain Native groups in Alaska, particularly the Yupik-speaking groups in the Bethel area. In some villages which have been surveyed, the infection rate has been found to be as high as 73.1%.

Less is known about prevalence in other Native groups but there are reasons to suggest that rates are probably higher than among non-natives.

Other groups at high risk of HBV infection include: health and hospital care providers; hemodialysis patients; recipients of blood products, laboratory workers; dentists and allied dentist personnel; homosexuals; illicit users of injecter drugs; staff and residents in institutions for the mentally retarded; sexual and household contacts of HBV carriers; newborn infants whose mothers are HBV carriers; and immigrants from geographic areas with a high incidence of HBV such as Southeast Asian refugees.

C. Vaccine

In November, 1981 a vaccine against hepatitis B was licensed for use in individuals 3 months of age or older. Vaccine is administered to high risk groups in three doses over a six month period. The vaccine is estimated to be 80-95% effective in protecting susceptible individuals. Duration of protection, and consequently the need for booster doses, is not known.

The vaccine is expensive (current cost is $95.55 for sufficient vaccine for the three-dose course for one individual). Because of the high vaccine cost and because the vaccine is of no value to individuals already infected, pre-vaccination blood testing of potential recipients is recommended. Cost of blood testing is estimated at $10-15 per test. To these costs must be added cost of vaccine distribution and administration plus data processing.

D. Existing programs

In the current fiscal year, DHSS undertook screening and vaccination of high risk groups in state institutions including Harborview Developmental Center, The Alaska Psychiatric Institute and State Correctional Centers.

The Alaska Native Health Service (ANHS) in cooperation with the federal Center for Disease Control has undertaken a vaccination program in the Bethel area villages where prevalence studies have been conducted. They have also used federal fiscal year-end monies ($500,000 for FFY 1982) to purchase additional vaccine.

Proposed program

The proposed activities during FY 83 involve close correlation with the Alaska Native Health Service hepatitis B program. Emphasis will be placed on screening of the highest risk population who will not be reached by the ANHS. Susceptibles will receive vaccine.

Position

The Department is strongly supportive of funding in FY 83 which would permit intensification of the program in the current fiscal year. However, the Governor's Office is submitting a delete-add supplemental for $250.0 utilizing funds already appropriated for Permanent Fund Hold Harmless. Thus, costs of HBV program activities in FY 83 could be absorbed without additional appropriation.

March 4, 1983

The Honorable Ted Stevens
United States Senate
147 Russel Office Building
Washington, D.C. 20510

Dear Senator Stevens:

As you are aware Alaska faces a very serious problem because of the increasing numbers of people who either have or are susceptible to hepatitis. The State Department of Health and Social Services in conjunction with the Alaska Native Health Service has outlined a detection, surveillance and control program which will be administered by the State over the next four-five years. The program includes inoculation for those determined to have a high risk of contracting the disease. By 1987 the State Department of Health experts to have the problem under control and will continue monitoring the population as part of their regular programming.

The joint venture will cost an estimated $5.75 million over the life of the program. The State anticipates providing $2.75 million in funds and the Alaska Native Health Service will request federal funds of $2 million through FY84 and FY85, in addition to $500,000 which has already been received through ANHS, and another $500,000 of FY82 year-end ANHS funds which were used to purchase vaccine for the inoculation program.

This letter is to call your attention to the fact it appears only $500,000 has been proposed in the federal FY84 budget. (See attachment). It is important every effort be made to secure the full $1 million in funds to augment state funding so the detection and inoculation program may continue on schedule.

Funding of $250,000 from the state is in the process of being authorized by the State Legislature and the Governor for FY83, and an additional $500,000 is expected to be approved for FY84. State health officials note it is vitally important that the program be kept on schedule so the "chain of infection" will be broken reducing the high-risk factor that faces so many Alaskans, particularly Native Alaskans.

Your help in securing the needed funds from the federal government for the coming fiscal year would be greatly appreciated. Please feel free to contact me, or my assistant, Max Gifford, if more information is needed. We can be reached in Juneau at: 465-3753.

Thank you very much for your attention to this important matter.

Very Sincerely,

JOHN C. SACKETT
State Senator

Gene Dusek, Associate Director
Office of Management and Budget
Office of the Governor

Dear Gene:

Attached is a copy of the proposed committee substitute for SB 96, reducing the Permanent Fund hold-harmless appropriation by $250,000 and reappropriating those funds to the Department of Health and Social Services to fund the hepatitis B inoculations program.

Senator Sackett, the original sponsor of the legislation, would very much appreciate a letter from you or the appropriate spokesperson in the Governor's office acknowledging that this approach for funding the inoculation program meets with the Governor's approval.

Use of the committee substitute for SB 96, as opposed to introducing new legislation, should expedite the bill through the legislative process so that it can be transmitted to the Governor quickly.

Although no date for hearing the substitute in committee has been set your participation at the hearing would be appreciated.

Thanks for your help. Please call me if you have any questions.

Sincerely,

Max Gifford
Administrative Aide

(e) Hepatitis B Screening and Immunization Program (Alaska)

(Dollars in thousands)

	Actual Obligations 1982 Amount	Amount Available 1983 Amount	Estimate 1984 Amount	Increase (+) Decrease (-) Amount
Direct Appropriation..	$ ---	$500	$500	$---
Reimbursements..	---	---	---	---
Total	$ ---	$500	$500	$---

The funding in FY 1983 for the Hepatitis B Screening and Immunization Program will allow partial completion of a three year program to deliver comprehensive hepatitis B control services in Alaska. Funds will allow staff to deliver services to the Alaska Natives at risk or suffering from hepatitis. Supplies will include the blood drawing and testing kits necessary for screening patients and supplies for administering hepatitis B vaccine.

The program will collect approximately 20,000 blood samples for hepatitis B screening and epidemiological studies and immunize approximately 3,000 people in 1983. People primarily targeted for this program, in order of priority, include: newborns whose mothers are hepatitis B surface antigen (HBsAg) positive or who will be living in villages where the prevalence of HBsAg is 5% or greater; new Alaska Area Native Health Service and Native Corporation employees who are both susceptible to hepatitis and providing direct health care services; household members where another member is HBsAg positive; and residents of communities where the prevalence of HBsAg is 5% or greater.

The epidemiological studies will provide a better understanding of the risk of sequelae of hepatitis B and to better determine where at-risk populations reside so future vaccination programs can be efficiently targeted.

The proposed funding of $500,000 in FY 1984 will allow a continuation of the program efforts started in FY 1983. Approximately 25,000 blood samples for hepatitis B screening will be collected and approximately 4,000 people will be vaccinated. The screening and epidemiological studies will be continued.

From Indian Health Service

Administration FY 84 Budget Document

Hepatitis B Virus (HBV)

HBV infection is becoming a significant health problem in Alaska, especially in the highly susceptible Alaska Native community and, in particular, the Yupik Eskimo.

Hepatitis B infection is usually caused by prolonged close and intimate contact with a carrier and/or infected blood or blood products or serous discharges.

Complications of HBV infection can be many e.g. polyarteritis nodosa (serious inflamatory condition of the arteries) with a 30% mortality rate; primary hepatocellular carcinoma (PHC), has the highest incidence in the U.S.A. Estimated 10% of HBV chronic carriers will develop PHC; chronic active hepatitis with cirrhosis (CAH) will develop in 20 to 25% of chronic HBV carriers.

People at high risk include:

Yupik Eskimos and to a lesser variable extent
other Alaskan Natives
Health and hospital care providers
Hemodialysis patients
Recipients of blood products
Laboratory workers
Dentists and allied dental personnel
Gay communities
Illicit injectable drug users
Staff and patients of mentally retarded institutions
Sexual and household contacts of known carriers
Newborn infants of mothers who are HBV carriers
Southeast Asian groups

In late November 1981 a request for a supplemental appropriation of about 800,000 dollars to initiate a HBV program was sent to the Governor's Office. It never reached the legislature.

Normally the State provides and totally runs immunization programs for all State residents. Due to shortage of funds, high cost of HBV program and availability of some funds to ANHS in their budget ANHS (Alaska Native Health Service) and the State (Division of Public Health) are coordinating a joint effort. A Memorandum of Understanding has been jointly developed by both agencies covering many issues e.g.

(a) Public Health Nurses will assist ANHS personnel where possible in screening initial vaccination and particularly follow-up vaccination.

(b) If ANHS cannot hire people because of locale of fund allocation of last $500,000, they will contract with us to provide all the necessary program people and activities.

(c) In predominantly Native communities their screening teams will screen all citizens. We will be responsible for the lab testing of non-natives and will make arrangements for vaccination or replacement of vaccine if they do it.

(d) ANHS and the State will use common forms e.g. info sheet, indications for blood-testing, vaccination, refusal-for-vaccination form. These forms are being edited for both parties.

The attached report gives necessary funding for a control program.

Because of the economics, a control program rather than an eradication program is proposed at this time. The purpose of such a program is to identify foci of infection and wall it off (break the chain of infection) by vaccinating the appropriate susceptibles.

Enclosed also is a document in which the population for an urban non-military, non-native program will go hand in glove with the rural predominantly native program.

We cannot estimate the cost of vaccine down the road but guess it will drop fairly precipitously within five years.

REPORT ON HEPATITIS B

The following action program outline is of two parts; an HBV program to control non-native population, one to coordinate a joint ANHS/State program and a total for a State-wide program conducted by the State.

Personnel required to handle project for the non-native, non-military Alaska population:

Project supervisor	21A	41.7
Clerk IV	9B	19.5
Microbiologist II	16A	34.0
2 Nurse Practitioners or equiv.	18A (34 x 2)	68.0
		163.2
Computer Programmer		32.0
		195.2

4 Months Program (March thru June, 83) FY 84 Program

Personnel	48.8	195.2
PCIS	25.0	10.0
Lab	50.0	90.0
Travel	38.0	91.0
Vaccine	80.0	112.0
Equipment, Misc.	8.2	1.8
	250.0	500.0

Much of the vaccinations would be handled by PHN's, health centers and by staffs of institutions. Screening i.e. blood collection, likewise would be done by health care facilities and private practitioners to a great extent. Much of the non-native possible high risk populations may be clustered around the various cities.

These program logistics are in addition to the program proposed by the ANHS. They anticipate expenditure of one million dollars a year for three years.

The total cost of a State-wide program is about 5 3/4 million dollars through June, 1987. It is based on State funding of $250.0 balance of present fiscal year, $500.0 FY 84, $600.0 FY 85, $700.0 FY 86, $700.0 FY 87 along with the ANHS expenditure of 3 1/4 million over first three years of above activity. It is anticipated that these dollars would be turned over to the State through contract to get Alaskan Natives to a maintenance level. If, for any reason, the Federal monies were not appropriated, it would require additional State funding. ANHS received $500,000 FY 82 year end monies and they purchased vaccine sufficient for the first year of the program. They received $500.0 in their FY 83 appropriation which is $265.0 less than their indicated program need. They envision 60,000 patients screened and 19,000 vaccine recipients over the three years. They plan for a staff of 10 persons - we would reduce this to 8 persons if we do (hopefully) the program.

- ANHS.

The following table summarizes their proposed Hepatitis B Detection Surveillance and Control Program for Alaska Natives.

3 Year Proposed Budget

Item	Year One	Year Two	Year Three	Total
Personnel	385.0	300.0	316.0	901.0
Travel	294.0	147.0	294.0	735.0
Supplies	172.0	172.0	172.0	516.0
Equipment	15.0	-0-	-0-	15.0
Vaccine	-0- already bought (with year-end FY 82 monies)	405.0	518.0	923.0
Total	766.0	1024.0	1300.0	3090.0

Population at High Risk for HBV
(excludes Military and Native Populations)

The assumptions are made that the Native population, as well as the military, will be handled by the ANHS (Alaska Native Health Service) and the military health system respectively.

Various population groups are at high risk; they may be so for a variety of reasons, ranging from geographic location, occupation, sexual practices to life style.

The following chart illustrates the types, numbers and rationales. This is followed by summary tables elaborating on numbers to be screened and numbers for potential vaccination. (numbers rounded off to nearest twenty-five for ease)

1)	EMS workers (non-native, non-military)	1500
2)	Health Care Workers (long term care)	1400
3)	Hospital staff (exc. Federal Hospitals)	3500
4)	Harborview, already screened, vacc. on 1/26/83	0
5)	Developmentally disabled (500 staff, 200 clients)	700
6)	Hemodialysis and hemophiliacs (patients & family)	200
7)	Gay community, est. 9600 (Anch., Fairbanks, Juneau)	7800
8)	Illicit injectable drug users (600-700)	650
9)	Household and sexual contacts of known carriers 2000-3000 (allowing for double reporting)	2500
10)	Corrections inmates (first study shows not at high risk)	0
11)	To identify newborn infants of mothers who are carriers	8000

EMT's	1500 x 90% =	1350
L.T. Care Workers	1400 x 90% =	1250
Hospital Workers	3500 x 90% =	3150
Dev. disabled staff & patients	700 x 80% =	550
Hemodialysis, hemophiliacs & staff	200 x 90% =	175
Gay community est. 9600 (Anch., Fairbanks, Juneau)	7800 x 20% =	1550
Illicit injectable drug users	650 x 20% =	125
Household and sexual contacts, carriers	2500 x 85% =	2125
Correction inmates	0	
Newborns of carriers	8000 x 0.3% =	25
	26,250	10,300

(rounded-off figures)

INDIAN Health Service

26,250 estimated to be screened (exclusive of IHS program). This will not include other people not included above who will ask for test.

39% (est. 8.700) susceptibles to be vaccinated.

The above needs to be done within the next 16 months, (FY 1984, plus last 4 months of FY 83).

APPENDIX I

Methodologies Used

1) EMS population figures from Section of EMS, DPH, reduced by eliminating Natives.

   Health care workers population (long term care) taken from State Health Plan Data Appendix.

2) Hospital staffs (exclusive ANHS and Military) taken from State Health Plan Data Appendix.

3) Developmentally disabled patients and staff members given by Division of Mental Health.

   Harborview staff and clientele already done by Division of Public Health.

4) Hemodialysis patients and staff, hemophiliacs numbers supplied by Section of Family Health, DPH.

5) Gay community numbers arrived at by figuring male population (non-native and non-military) between ages of 15 and 65; taking 10% of that number. Number used was calculating numbers for Anchorage, Fairbanks and Juneau. 1980 census for numbers of sex, racial and age characteristics was used.

6) Numbers of illicit injectable drug users was furnished by Office of Alcoholism and Drug Abuse.

7) Contacts of household and sexual contacts was estimated trying to eliminate double reporting of ones that would be counted under any of the above categories.

8) Numbers of corrections' inmates is counted as zero because study we did shows them not to be at high risk at this time. We screened over 350 long term males. Many of new ones will have been screened under one of the aforementioned programs.

9) There are about 10,000 births in the State annually; 2000 of them are Native and can be excluded from this listing.

Assumptions are many --

a) It is difficult to accurately predict numbers that will accept screening and/or vaccination. Probably the screening numbers may be as much as 10-20% under our figures.

b) For vaccination the percentages used were to allow for varying numbers of susceptibles and also refusal to accept vaccine.

c) The percentage used for calculating male homosexual population was received from homosexual physician in Anchorage plus articles in medical journals.

d) This program is considerably different than any other immunization program. The cost of the test and the exorbitant cost of the vaccine makes it necessary to screen rather than to vaccinate carte blanche.

e) In addition, it is necessary to test to identify carriers (HBV surface antigen bearers) in order that testing for liver cancer can be done.

MEMORANDUM OF UNDERSTANDING

I. Statement of Introduction

The State of Alaska, Department of Health and Social Services, Division of Public Health and the United States Public Health Service, Indian Health Service, Alaska Area Native Health Service intend to enter into a memorandum of understanding to cooperatively develop and deliver a preventive program of Hepatitis B Virus infection control in Alaska.

Hepatitis B Virus (HBV) infection is a significant health problem in Alaska, especially in the highly susceptible Alaska Native Community. The recently available hepatitis B vaccine is an effective tool to control this important infection and to prevent the HBV related complications of liver cirrhosis, primary hepatic cancer and vasculitis.

A Hepatitis B Immunization and Control Program is a complicated one, and multifaceted activities are required at all organizational levels by several agencies to make it successful. Therefore, it is the desire of the Alaska Native Health Service and the Division of Public Health to coordinate available financial resources, personnel, laboratory services and professional expertise for implementation of a quality Hepatitis B Immunization and Control Program in an expeditious and cost-effective manner and to designate major administrative priority to the Program.

Implementation and accomplishment of the Heptatitis B Control Program depends upon the availability of continued State of Alaska funding and USPHS funding. Lack of funding would invalidate or necessitate modification of this understanding.

II. Areas of Agreement

A. Needs

1. At risk individuals need to be identified through expert analysis of appropriately obtained blood sera.

   a. adequate laboratory facilities and technical capabilities are necessary to perform a large number of serologic determinations.

   b. specialized personnel are necessary to obtain blood specimens from all individuals in entire rural Alaska Communities and who can separate serum, accurately identify specimens and ensure arrival at the laboratory expeditiously and intact.

2. Data systems need to be accessible and able to provide:

   a. census data

   b. demographic identification of all specimens

   c. integration of individual serological and immunization data into the medical record.

d. lists of susceptible individuals

e. lists of susceptible individuals by risk category

f. lists of individuals who are HBs Ag carriers.

g. the established data system would provide the above data on an ongoing basis.

3. As much as possible, the immunization phase of the Hepatitis B Immunnization and Control Program needs to be integrated into existing vaccine delivery programs.

a. Initially, the immunization phase needs coordinated efforts from public health nurses, specifically employed supplemental personnel, Community Health Aides and Alaska Native Health and Native Health Corporation health care providers.

b. Specialized care provided to newborns and infants of HBs Ag positive mothers needs to be provided in the hospitals at the time of delivery and the times when routine care coincides with established hepatitis B immunization protocols.

4. Sera aliquots from specimens needed by CDC need to be provided with demogrephic and serologic data to the CDC, Alaska Investigations Division.

a. to establish a sera bank

b. to provide cancer screening with alpha-fetoprotein determinations on all HBs Ag positive individuals.

E. Risk Priorities

1. Infants born to HBs Ag positive carriers.

2. Household contacts of HBs Ag carriers.

3. Rural Alaska communities with a HBs Ag carrier rate of 5 percent or greater.

4. Individuals and staff in institutions for the mentally retarded.

5. Renal hemodialysis patients and hemophiliacs.

6. Active male homosexuals.

7. Health care providers having frequent blood contact.

8. Identified high risk prison groups.

9. Illicit injectable drug users.

1. To meet the high risk needs in the Alaska Native Community, the Alaska Native Health Service intends to enter into a contract with the State of Alaska.

   a. to develop and maintain a Hepatitis B Control Program in cooperation with the AANHS Project Officer and the C C-AID Director.

   b. to identify and vaccinate high risk Alaska Natives.

      (1) household contacts of known HBs Ag+ carriers
      (2) village residents of known villages with 5 percent or greater HBs Ag+ carriers.
      (3) high risk villages in Western Alaska with first priority to the Yukon-Kuskokwim Delta Area.

   c. the contract will be written immediately and implementation start as soon as possible.

2. Coordination of the Hepatitis B Immunization and Control Program will be cooperatively directed by the Chief, Communicable Disease Control Section and the Chief, Community Health Services.

   a. Monthly meetings involving key persons will occur

   b. Records of discussion and decision made in the monthly meetings will be appropriately distributed.

   c. A periodic information circulation will be published.

3. Free access and exchange of Hepatitis B epidemiologic information will be shared between the State of Alaska, Alaska Native Health Service and the Centers for Disease Control.

D. Specific Responsibilities

1. The State of Alaska Division of Public Health will be responsible for the administration of Hepatitis B vaccine. The vaccine will be administered by public health nurses, supplemental personnel, and other health care providers as needed.

2. Initial hepatitis preventive care and care that coincides with routine preventive care of newborns and infants will be provided by the Alaska Native Service or contract physicians.

3. Sera aliquots with demographic and serologic data will be sent to CDC, Alaska Investigation division by the State Laboratory.

4. Alpha Fetoprotein determinations will be performed by the CDC, Alaska Investigations Division.

5. Serologic determinations for the clinical needs of the Alaska Native Health Service and for the prenatal screening of Alaska Native Service beneficiaries will be provided by the Clinical Laboratory of the ANMC.

6. In consultation with appropriate experienced CDC persons, the Laboratory Section, Division of Public Health, State of Alaska will develop the capability and quality assurances to assume responsibility for all the serologic screening necessary to conduct the Hepatitis B Immunization and Control Program.

7. In consultation with the appropriate CDC and PCIS persons the State of Alaska will develop an accessible and acceptable computer service to conduct the Hepatitis B Immunization and Control Program in the State Northern Regional Laboratory in Fairbanks.

8. The administration of the Hepatitis B Infection and Control Program will be the responsibility of the State of Alaska.

9. Evaluation of the impact of the Hepatitis B Infection and Control Program on the beneficiaries of the Alaska Native Health Service will be a responsibility of appropriate Alaska Native Health Service personnel. The State of Alaska Division of Public Health will evaluate the effect of the Program on the overall state population.

III. Renewal/Modification Clause

This Memorandum of Understanding is in effect for three (3) years unless modification or termination is issued with thirty (30) days advance notice by the offices of the original signers.

IV. Conclusion

Although the need to begin Hepatitis B Infection prevention and control is urgent, actions in program development and delivery must hold to the following principles;

1. Cooperation and trust

2. Open communication

3. Quality assurance

4. Rational planning.

IMPORTANT INFORMATION
ABOUT HEPATITIS B AND HEPATITIS B VACCINE

Please read this carefully

WHAT IS HEPATITIS B?

Although Hepatitis B is an unpredictable disease with a variety of presentations and outcomes, most patients recover. Persistence of viral infection (the chronic carrier state) occurs in 5 to 10% of persons who become infected with hepatitis B virus. Acute Hepatitis B infection may be symptomatic and can incapacitate a person for weeks to months or lead to complications or chronic sequelae. However, 50 to 60% of all Hepatitis B infections are subclinical, asymptomatic, and usually undetected. These cases have a greater risk of progression to chronic sequelae. Chronic sequelae of Hepatitis B infection include:

Chronic carrier state - develops in 6-10% of adult patients who have Hepatitis B.
Chronic persistent hepatitis - generally benign.
Chronic active hepatitis - major late complication; occurs in 3-5% of cases; often progresses to cirrhosis.
Cirrhosis - an estimated 11% of deaths due to cirrhosis are associated with Hepatitis B. (4000/year)
Liver Cancer - the relative risk for carriers is 273 times greater than for non-carriers (800 die/year from Hepatitis B related liver cancer)

There is no specific treatment and no known cure for Hepatitis B. The new vaccine can help prevent Hepatitis B.

HEPATITIS B VACCINE

The Immunization Practices Advisory Committee (ACIP) USPHS, has identified certain populations at risk of HBV infection and has recommended vaccination for appropriate members of the following groups:

ACIP recommendations for vaccination against Hepatitis B infection	
.health-care workers	.classroom contacts of deinstitutionalized mentally retarded HBV carriers who behave aggressively.
.hospital staff	.special high-risk populations from areas where Hepatitis B is highly endemic
.clients and staff of institutions for the mentally retarded	Indochinese and Haitian refugees
.hemodialysis patients	Alaskan Eskimos
.homosexually active males	.inmates of long-term correctional facilities
.illicit injectable drug users	
.recipients of certain blood products	
.household and sexual contacts of HBV carriers	

Persons at substantial risk of Hepatitis B infection who are demonstrated or judged likely to be susceptible should be vaccinated.

Division of Public Health
State of Alaska

VACCINATION: Vaccination consists of 3 intramuscular doses of vaccine. The second and third doses should be given 1 and 6 months, respectively, after the first. Vaccine doses administered at longer intervals than those stipulated provide equally satisfactory protection, but optimal protection is not conferred until after the third dose. The duration of protection and the need for booster doses have not yet been determined.

Vaccination of individuals who possess antibodies against HBV from a previous infection is not necessary but will not cause adverse effects. The vaccine produces neither therapeutic nor adverse effects in Hepatitis virus carriers.

POSSIBLE SIDE EFFECTS FROM THE VACCINES:

Adverse Reactions: Hepatitis B vaccine is generally well tolerated. No serious adverse reactions attributable to vaccination have been reported during the course of clinical trials involving administration of Hepatitis B vaccine to over 6,000 individuals. Approximately half of all reported reactions were injection-site soreness. Other less common local reactions have included erythema, swelling, warmth, or induration. These signs and symptoms of local inflammation are generally well tolerated and usually subside within 2 days of vaccination.

Low-grade fever (less than 101°F) occurs occasionally and is usually confined to the 48-hour period following vaccination. Although uncommon, fever over 102°F has been reported. Systemic complaints, including malaise, fatigue, headache, nausea, dizziness, myalgia, and arthralgia, are infrequent and have been limited to the first few days following vaccination. Rash has been reported rarely.

As with any vaccine, there is the possibility that broad use of the vaccine could reveal rare adverse reactions not observed in clinical trials.

WARNING - SOME PERSONS SHOULD NOT TAKE THIS VACCINE WITHOUT CHECKING WITH A DOCTOR:

.Hepatitis B vaccine is not known to cause special problems for pregnant women or their unbor babies. However, doctors usually avoid giving any drugs or vaccines to pregnant women unless there is a specific need. Pregnant women should check with a doctor before taking Hepatitis B vaccine.

.Those who are sick right now with something more serious with a cold.

QUESTIONS: If you have any questions about Hepatitis B vaccination, please ask us now or call your doctor or health department before taking the vaccine.

REACTIONS: Anyone receiving vaccine who gets sick and seeks medical help in the 4 weeks after vaccination should report this to the facility which provided the vaccine.

Division of Public Health
State of Alaska

STANDING ORDERS
Hepatitis B Vaccine

Type of Vaccine	Age	Dosage
Hepatitis B	3 months through life	3 doses i.m.; given on days 0, 1 month later and 6 months after 1st dose.

	Initial	1 mo.	6 mo.
3 months to 10 yrs.	0.5ml	0.5ml	0.5ml
> - 10 yrs.	1.0ml	1.0ml	1.0ml
Dialysis and Immuno-compromised	2.0ml*	2.0ml*	2.0ml*

* Two 1.0 ml doses given at different sites, i.m.

1. Store vials at 2-8°C. (35.6 - 46.4°F)
2. Shake well before using.
3. DO NOT FREEZE
4. Provide Hepatitis B Vaccine information sheet to each person before vaccination.

Contraindications: Hypersensitivity to any component of the vaccine.

Precautions:
1. Not recommended for use in pregnant women. Ask if woman is pregnant. If answer is no, vaccine may be administered.
2. Not recommended at present for use in children below the age of 3 months.

Indications:
1. Indicated for immunization against infection caused by all known subtypes of Hepatitis B virus.
2. Vaccination is recommended in persons 3 months of age or older who are at substantial risk of infection with Hepatitis B virus.
3. Groups and individuals to be vaccinated are designated by the Medical Epidemiologist, Division of Public Health or his designee..

HEPATITIS B AND HEPATITIS B VACCINE

I certify that I have been provided information about Hepatitis B. I am aware that I may be at increased risk of contracting Hepatitis B infection because of my work or my residence. I have had an opportunity to ask questions about Hepatitis B and to discuss Hepatitis B with staff at this facility. I understand that I can have my blood tested free of charge to see if I have been infected with Hepatitis B in the past or whether I could become infected with Hepatitis B in the future. I understand that I can also be vaccinated against Hepatitis B free of charge and that vaccination can protect me from becoming infected with Hepatitis B in the future. I understand that this program is entirely voluntary but that the Division of Public Health strongly recommends that I have my blood tested and, if I have not been infected with Hepatitis B in the past, that I receive Hepatitis B vaccine.

☐ I do not wish to have my blood tested for Hepatitis B.

☐ I do not wish to be vaccinated against Hepatitis B.

BULLETIN NUMBER 7 WEEK ENDING APRIL 8, 1983

HEPATITIS B SEROSURVEY RESULTS

Since November 1982, the Division of Public Health systematically has been testing certain populations suspected to be at increased risk of hepatitis B virus infection. The preliminary results presented here provide overall prevalence data of hepatitis B infection for the groups listed. More detailed analyses to derive age, sex, and race specific attack rates will not be possible unless computer data processing becomes available.

Group Tested	HbsAg	(%)	HbcAb	(%)	Total Tested
State Public Health Nurses	0	(0)	7	(10.3)	68
State Laboratory Employees	0	(0)	4	(14.3)	28
Harborview Developmental Center, Valdez					
Staff	4	(2.5)	20	(12.7)	158
Patients	21	(24.4)	77	(89.5)	86
Alaska Psychiatric Institute Patients	0	(0)	16	(16.5)	97
Corrections - Long-term Inmates	3	(0.8)	80	(22.5)	356
Seward Hospital Staff and Wesleyan Nursing Home	1	(1.0)	9	(9.2)	98
Wrangell Hospital Staff	0	(0)	3	(7.3)	41
Nuiqsut (young adults only)	0	(0)	2	(3.2)	62

Group Tested	HbsAg	(%)	HbsAb	(%)	HbcAb	(%)	Positive For Any Marker	(%)	Total Tested
Rural School Teachers (637 person-years exposure)	0	(0)	4	(4)	4	(4)	6	(6)	100
Stony River	9	(12.7)	6	(8.5)	14	(19.7)	18	(25.4)	71
Sheldon's Point	16	(15.5)	39	(37.9)	59	(57.3)	61	(59.2)	103
Russian Mission	21	(11.6)	67	(37.0)	86	(47.5)	89	(49.2)	181
Marshall	24	(10.1)	55	(23.1)	85	(35.7)	88	(37.0)	238

As expected from previous epidemiological studies, the prevalence of hepatitis B virus infection varied widely among these high risk populations. Because of the sporadic distribution of hepatitis B virus infection, it is impossible to predict accurately the prevalence of hepatitis B infection in any population or in population subgroups.

Results of serosurveys can provide accurate information on the prevalence of infection among many subpopulations within high risk groups. Individuals can then make an informed choice about whether or not to receive hepatitis B vaccine based on their community, occupation, and lifestyle, taking into account the documented prevalence of infection in their group.

(Reported by Gerard Lowder, M.D., South Baltimore General Hospital, Epidemiology Office, and Don Ritter, Northern Regional Laboratory, Section of Laboratories, State of Alaska.)

Bethel Social Services, Inc.
• A PRIVATE NON-PROFIT CORPORATION •

November 5, 1982

Senator John Sackett
P. O. Box 29
Ruby, Alaska 99678

Dear Senator Sackett:

This letter is to follow-up on our recent conversation regarding the cost of care dilemma that the Bethel Receiving Home is now in.

Bethel Social Services, Inc., opened the original Receiving Home in 1969 in an old B.I.A. building. This project was closed on 1976 as the building was simply not licensable. At the request of many State agencies, especially the Department of Corrections, Bethel Social Services, Inc., built a new receiving home with a combination of borrowed funds and Criminal Justice monies. This facility was constructed at great financial risk to the Corporation with assurances from the State that it would be fully utilized.

Our cost of care was set at $55.63 based on the proposed budget divided by 75% of the number of licensed beds. Thus began the cost of care rat race of having to lose money to get the cost of care rate up to make money. The following circumstances have prevailed at the Bethel Receiving Home in regard to the cost of care:

1. When the new home was opened in 1980, the cost of care rate was set too low because the anticipated usage AS ESTIMATED BY THE STATE fell below the actual usage.

2. With the exception of one facility which has donated labor, the Bethel Receiving Home has had the lowest cost of care rate throughout the State.

3. The Bethel Receiving Home has lost money each year. It failed to lose enough money, however, to raise the cost of care rate substantially to make money.

4. We have always been opposed to the cost of care method of setting rates. It rewards the inefficient. However, the interim method of freezing the rates will cause the Bethel Receiving Home to close. Our rate has been frozen

at the lowest receiving home rate in the State with the exception of the Sitka Home which has donated labor, we understand.

5. We were not aware that there had even been a change in the process until three months after it went into effect.

6. We are requesting the legislature set a cost of care rate for the Bethel Receiving Home at $115.00 per day. Our current rate is $75.52 per day. The $115.00 is the average rate taken from averaging the rates from the receiving homes in Anchorage, Juneau, Nome and the North Slope. In essence we are saying that it should cost us an average of what the other facilities are providing care for. With sound management, this rate will allow the Bethel Receiving Home to provide care and reduce it's indebtedness.

Just to clarify the relationship between Bethel Social Services, Inc. and the Bethel Receiving Home, Inc. --- Bethel Social Services, Inc. operated the old receiving home. The building was owned by the Bureau of Indian Affairs. Bethel Social Services, Inc. built and owns the new receiving home and is the parent corporation and registered agent for Bethel Receiving Home, Inc., which operates the Bethel Receiving Home. (Without the two separate entities, there is no provision for paying the lease on the building under cost of care regulations.)

We are also enclosing a copy of the current rates for facilities throughout the State and a table of information pertinent to the Bethel Receiving Home's operations during the past three fiscal years. We have been in contact with John Pugh, Division of Youth & Family Services, and are trying to keep him abreast of our request through the legislature.

Please let us know if we can provide you with any additional information.

Sincerely,

Loreen Foster
Administrative Director

CHAMBERS OF
CHRISTOPHER R. COOKE, PRESIDING JUDGE

PHONE: (907) 543-2298

November 1, 1982

Mr. John Pugh, Director
Division of Family and
Youth Services
Pouch H-05
Juneau, Alaska 99811

Re: Bethel Receiving Home

Dear Mr. Pugh:

It has come to my attention that the Bethel Receiving Home is in serious financial trouble. The home is operating at a substantial loss and will soon be forced to close unless additional revenue can be secured.

The Receiving Home provides temporary shelter for juveniles detained in delinquency proceedings and emergency foster care for children in need of aid. Loss of the Receiving Home would have a great adverse impact upon the Alaska Court System and this region since it is the only facility of its type in this area.

Without the Receiving Home, juveniles detained in delinquency proceedings would have to be housed in the substandard Bethel City Jail and, at great expense and inconvenience, McLaughlin Youth Center in Anchorage. Emergency foster homes for neglected or abused children would have to be found on a case-by-case basis. This would constitute a giant step backward for the juvenile justice system in this region and for the local and regional operations of your department.

One reason for the Receiving Home's financial plight is the cost of care rate paid by your department. Currently that rate is $75.52 per day while comparable facilities in Nome, Juneau and Anchorage receive

$116.97, $106.17 and $149.85, respectively. The Receiving Home would be financially viable if their daily rate were in the vicinity of $100.00 or if bed space could be provided to your agency on a monthly retainer basis.

I would appreciate your prompt attention to this situation. If the Bethel Receiving Home is forced to close, this community, the 56 villages of our region, and both our agencies will suffer. With your cooperation I hope that such a drastic result can be avoided.

Very truly yours,

Christopher R. Cooke
Superior Court Judge

Mr. Lee Stoops
Aide to Senator Sackett
Pouch V
Juneau, Alaska 99811

Dear Lee,

As per our phone conversation on December 3, 1982, please find enclosed the letter which we delivered to Senator Sackett on November 5, 1982 when he was visiting in Bethel. I will attempt to clarify the urgent request from the legistlature for a supplemental budget request for the Bethel Receiving Home. With the constant escalation of real operational costs, it has been a battle trying to achieve a cost of care level that allows us to recoup the true costs of the program. We feel we have reached our limit on how much we can jeopordize the corporation for one project.

As you can see from the summary of operations table, we have lost a total of $31,680. on this project as of June 1982. We had hoped to have the cost of care rate raised this fiscal year and were unaware of the freeze that is now in effect. I have requested an audit from the Dept. to get the cost of care rate raised, but that request was denied. It seems that we are audited bi-annually and this is not our year.

If our rate for FY'83 were $115 , which is the average rate in this state for comparitable services, we could recoup some of this money and would not be faced with the possibility of closing this facility. We believe that the Receiving Home does play an important role in Bethel, and without it many children would have to be placed outside the area and at a much higher cost to the state.

If there is anything further you require, please contact me. We are anxiously awaiting an answer to this dilemma.

Sincerely,

Loreen M. Foster

AN ACT

Relating to vision and hearing screening examinations, public assistance, and other assistance provided by the state; and providing for an effective date.

---

* Section 1. FINDINGS. The legislature finds that the present method for establishing payment rates under AS 47.40 for residential child care services is inadequate. The Department of Health and Social Services shall conduct a study of alternatives to the method of establishing payment rates under AS 47.40. The study shall be conducted by a committee of five members appointed by the commissioner of the Department of Health and Social Services. Three members of the committee shall be employees of the Department of Health and Social Services and two members shall be providers of residential child care services. The study shall contain, among other matters determined by the department, a suggested redefinition of the manner in which rates for residential child care services are calculated, a consideration of the method and amount of reimbursement for capital costs of residential child care facilities, and the availability and use of other sources of money to finance residential child care services and to finance the construction of residential child care facilities. The committee shall report its findings to the legislature on or before the 30th day of the Second Session of the Thirteenth Legislature. The legislature further finds that the rates established under AS 47.40 should be suspended from June 30, 1982 to July 1, 1984.

* Sec. 2. The operation of AS 47.05.010(14), AS 47.40.010, 47.40.040, and 47.40.050 is suspended from July 1, 1982 through June 30, 1984. During the

period of suspension, payment for services provided by residential child care facilities shall be made solely in accordance with the provisions of secs. 3 and 4 of this Act.

* Sec. 3. For fiscal year 1983, the payment authorized per day for each child placed by the Department of Health and Social Services in an existing residential care facility is:

Alaska Children's Services Receiving Home (Anchorage)	$149.85
Alaska Children's Services Jesse Lee Home (Anchorage)	165.48
Alaska Children's Services Rabbit Creek Group Home (Anchorage)	166.40
Alaska Children's Services North Star Home (Anchorage)	103.55
Alaska Children's Services Aquarius House (Anchorage)	107.60
Alaska Children's Services Colletti House (Anchorage)	117.51
Alaska Baptist Family Service Center (Anchorage)	117.02
Booth Memorial Home (Anchorage)	146.90
Hilltop Home, Inc. (Anchorage)	85.53
Kenai Peninsula Community Care Center (Kenai)	91.74
Kodiak Baptist Mission (Kodiak)	61.61
Turning Point Boys Ranch (Willow)	105.37
North Star Children's Home (Dot Lake)	62.25
Presbyterian Hospitality House (Fairbanks)	111.98
Juneau Receiving Home (Juneau)	106.17
St. Jude Center, Inc. Receiving Home (Juneau)	72.33
Nome Receiving Home (Nome)	116.97
Manillaq Group Home (Kotzebue)	167.00
North Slope Borough Children's Receiving Home (Barrow)	168.35
Ketchikan Teen Home I (Ketchikan)	74.26
Ketchikan Teen Home II (Ketchikan)	81.61
Ketchikan Children's Home Intensive Treatment Unit (Ketchikan)	152.56
Sitka Receiving Home (Sitka)	40.66

Bethel Receiving Home (Bethel)	75.52
Bethel Group Home (Bethel)	59.06
Covenant High School (Unalakleet)	51.16

* Sec. 4. For fiscal year 1984 the payment rates for residential child care services shall be the amounts set out in sec. 3 of this Act increased by five percent.

* Sec. 5. For fiscal years 1983 and 1984 the Department of Health and Social Services may contract for residential child care services with a facility not listed in sec. 3 of this Act at a rate to be determined by the department.

* Sec. 6. AS 14.30 is amended by adding a new section to read:

Sec. 14.30.075. VISION AND HEARING SCREENING EXAMINATIONS. (a) A vision and hearing screening examination shall be given to each child attending school in the state. The examination shall be made when the child enters school or as soon thereafter as is practicable, and at regular intervals specified by regulation by the governing body of the district.

(b) The Department of Health and Social Services shall

(1) set standards for the performance of vision and hearing screening;

(2) train and certify public health nurses and school district employees to conduct hearing and vision screening tests;

(3) assist with referral and follow-up of children needing professional examination or treatment; and

(4) assist with maintenance and repair of screening equipment.

* Sec. 7. AS 44.29.020 is amended to read:

Sec. 44.29.020. DUTIES OF DEPARTMENT. The Department of Health and Social Services shall administer the state programs of public health and social services, including: (1) maternal and child health services;

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 97
PAGE 1

"An Act making a supplemental appropriation to the Department of Health and Social Services for payment as a grant to Bethel Social Services, Inc.; and providing for an effective date."

Senate Bill No. 97 makes an appropriation of $65,000 to the Department in the form of a grant designated for Bethel Social Services, Inc. to operate the Bethel Receiving Home during the remainder of the current fiscal year.

There are a variety of problems inherent in operating such facilities in Bush communities which are either unique to those facilities or exaggerated because of their location. For example, initial start-up and ongoing operating costs of such facilities are usually greater than for urban facilities.

In addition, smaller facilities located in rural areas generally have less predictable resident populations and suffer from cash flow problems.

The number of emergency placements has declined in the Bethel area as it has statewide. This decline has resulted from changing needs of children and more effective efforts to comply with the Indian Child Welfare Act, which mandates preferential placement of Native children in the homes of relatives or in Native foster homes. This has proven particularly problematic, however, to those facilities, such as the Bethel Receiving Home, operating in areas in which the majority or a very large percentage of the population is Native. Thus, while staffing is generally maintained at levels adequate to provide for the average population of the facility and for emergency circumstances the actual number of residents is often below the level required to provide fiscal support for the facility's operation. Since contracting for a number of beds is not allowable under existing purchase of services law, the facility cannot be assured of income necessary for operation during those periods when few or no placements are made.

In summary, the Department is supportive of maintaining facilities such as the Bethel Receiving Home which serve as necessary placement resources for abused or neglected children and for delinquent youth who do not require detention. Maintenance of such facilities in rural areas is critical due to the general paucity of alternative resources. Without such resources many children and youth would necessarily be placed in urban facilities far from the systems of support provided in their communities and separated from their families. Such separation at times nullifies efforts to resolve the precipitating social or family problems and may prevent reunification of the child and family or rehabilitation of delinquent youth.

The intended method of disbursement of grant funds would be more clearly stated if Section 2, Lines 15 and 16 of the Bill were amended to include only the specific statutory citation for disbursing grants to named recipients other than a municipality. The appropriate wording would be:

> "Sec. 2. The appropriation made by this act shall be disbursed in accordance with AS 37.05.316."

SUBJECT: Refunding bonds as old debt

You have asked whether refunding existing indebtedness for school construction amounts to incurring a new debt under AS 43.18.100(a). In our view, the answer is no.

The Municipality of Anchorage proposes to refund existing indebtedness for school construction dating from 1970-1971. Under AS 43.18.100(a)(1), the municipality is entitled to total reimbursement for payments made on debts incurred prior to July 1, 1977. Under AS 43.18.100(a)(3), the municipality is entitled to reimbursement of 80 percent of payments made on debts incurred after June 30, 1978. The question is whether refunding the old indebtedness, i.e., issuing refunding bonds, constitutes "indebtedness incurred after June 30, 1978," within the meaning of the statute.

Analogizing from cases on legal limitations on incurring debt which holds -- most universally -- that refunding bonds do not constitute new debt, the municipality posits that the same should be true here, i.e., that the act of refunding indebtedness does not constitute incurring new debt within the meaning of AS 43.18.100(a). We agree.

The cases cited by the municipality are persuasive. The refunding merely reduces the old indebtedness, it does not create a new debt. We are buttressed in this view by article IX, sec. 11, of the Alaska Constitution which provides that restrictions on indebtedness do not apply to "refunding indebtedness of the State or its political subdivisions." This is an obvious acceptance of the view expressed in the cases relied upon by the municipality, i.e., refunding does not constitute new debt. Accordingly, it is our view that, for purposes of reimbursement under AS 43.18.-100(a), refunded indebtedness should not be considered as a new debt.

RE: Bill Overview - SB 97 - An act making a supplemental appropriation to the Department of Health and Social Services for payment as a grant to Bethel Social Services, Inc.

Bill analysis: If enacted, SB 97 would appropriate $65,000 to the Department of Health & Social Services for payment as a grant to Bethel Social Services, Inc. for the operation of the Bethel Receiving Home. According to information received from Sen. Sackett's office, the figure was arrived at by multiplying an average 1,025 child care days for FY '83 by the difference between the existing daily cost of care rate ($75.52) and the proposed rate ($115.00). To date, Bethel Receiving Home has had 1,579 child care days in FY '83.

Background information: At the request of several state agencies, Bethel Social Services, Inc. opened the new Bethel Receiving Home in 1980. It currently owns Bethel Receiving Home and is the parent corporation for Bethel Receiving Home, Inc. which operates the receiving home.

Bethel Receiving Home provides short term shelter for juveniles detained in delinquency proceedings, and emergency foster care for abused and neglected children.
